

Constitution

Mohandas Gandhi

"Truth never damages a cause that is just."

A hybrid free press

Under the new system, will still have a free press sniffing out stories. However, the Sub-Senate's channel and its greatly reduced bias, together with its Ubiq recognition awards and money awards will make it dominant in comparison to the free press — which must be much more fragmented by law, by constitutional law. This will change the nature of journalism and the way the public is informed. Under this new system, the role of corrupting money in journalism is much smaller. No longer will the large news feeds have the most credibility. Now the million-man Sub-Senate's feed will have the most cred. Also, journalist careers will be measured in a much different way now. It is not hard to imagine that soon most people will work in journalism for the Senate recognition. Then if they are awarded any sort of Ubiq status by the Senate, it is generally a shoe-in for most candidates running in weakly contested Nomes. Also, weakly contested Centi-Nomes are surely made up of weakly contested Nomes.

So many people will run for the Senate in other nearby Nomes. There will be no residency requirement. And every voter's mandate is to pick the smartest leader they can so their democracy will work as well as possible.

Fictional citizens are 2nd class citizens

- 1/ There shall be no right of free speech for fictional citizens, for it all diminishes the ability of real flesh and blood citizens to hold a public dialogue.
- 2/ Fictional citizens shall have no right to earn a premium on assets condemned by the public. They only get fair value. This includes IP rights condemned.
- 3/ Free speech being a thing of real flesh and blood people, all fictional citizens, shall always:
 - a/ Be required by law to tell the truth, the whole truth and nothing but the truth, and not in a deceptive way.
 - b/ Be prohibited from uttering any opinion, judgement, innuendo or analysis of news events. They may only report facts, and they must be unbiased in this duty.
 - c/ Shall pay business-crippling toxic-waste sized fines for polluting the public discourse in any way.

We the people

These are the first 3 words of the US constitution. These three words say very clearly that power rests with the people, not the government the people establish for themselves.

Islamophobia and Racism

Here I talk about the words Islamophobia and racism rather than the subjects: To my mind the term Islamophobia has been over-used, and now when many

people hear the term Islamophobia, they presume that it is Muslims trying to cover-up perhaps justifiable hatred of their people. I just wanted to point out that the word Racism has in 2020 been sliding down the same slippery slope due to over-use by the Left. That should not be. Racism should remain a useful and powerful word. Its meaning should not be diluted through overuse and through use for semi-racist things. Religious freedom and sexual identity

Discrimination

Race and pigmentation is a huge thing and the most important sort of discrimination. A close 2nd is discrimination against women. 3rd is discrimination based on membership in a non-violent religion. 4th is discrimination against non-overt homosexuals. Discrimination against the following is at times a problem, but it doesn't really matter in comparison to any of the above:

- 1/ People from adversary nations.
2. People who follow religions and ideologies that are even occasionally violent.
- 3/ People who are overtly sexual.
- 4/ Workers who are disabled and unable to work like a normal adult without special accommodations made by the employer.

If you are a transexual of any sort

You must use a name that is unequivocally of your birth sex. This is so for transvestites too.

Government may lie to terrorists

When government agrees to terrorist demands, it isn't valid. Government is free to lie in this matter. Doing the opposite is asking for trouble.

She should have been jailed

Recall how Oakland mayor Libby Schaaf tipped-off the homeless camp about an upcoming ICE raid. To my mind, she committed obstruction of justice, and should have been jailed for obstruction of justice. That was not upholding the law as she swore to do. Here we see exactly the sort of thing her oath exists to protect against.

Video free urban zones

Surely we must have video free zones.

- 1/ Where shall we have them?
- 2/ How much of our cities shall be video free?
- 3/ How will we protect against little brother?

Ponder government secrecy

It is mostly a 4-headed thing:

- Head-1:** Secrets of weapons, plans & tactics.
- Head-2:** Secrets of the justice system.
- Head-3:** Secrets of the political system.
- Head-4:** Secrets of group spending.

There are many secrets of the 1st head that are acceptable under certain conditions. And witness protection programs are a thing of the second head that should be allowed. However, all the other secrets of the four head should generally be regarded as always bad. • • • Senate orientation should explain this subject well. Government workers should never work towards secrecy, except with regard to military secrets, plans & tactics, and witness protection programs.

Everyone should be taught the police rules.

You must cooperate with your own arrest
Everyone must put their hands in cuffing position.

Smart vehicle stops

There is a smart telephoto camera on the front of the police car. This camera reads license plates around the police car and runs the cars for potential users with warrants. Because the license information, registration, and insurance, along with driving records and warrants will be available to police, police stops will be much safer for police. When one gets stopped, the license plate gets run and the name of the registered owner and all registered drives comes up on the cop's tablet. The cop already knows the name of most potential drivers, their violence history if any, their photos, their names and their driving history. There is no longer anyone reaching into glove compartments to get anything. So the officer walks up to the window of the car and has a number of potential drivers of the vehicle. He picks the one most likely people and says "Are you John Smith?" you say yes. He clicks your image and then the system generates the appropriate print-out, fairly instantly.

Sharia law = Nazism

The lovers of freedom should make it a point to treat one like the other

No fear government

Democracy works better when everyone can proudly say what they think, and when nobody fears speaking out. Nothing helps this state to exist like like when the people are armed.

**twice as man Americans
die from lightning
than mass shootings.**

Conforming defense rifles

They all use one of two sizes .50 and a smaller size. We want as much as possible to standardize the sizes of our defense ammo. High powered size for long distances and light armor, and regular size for where there is no armor.

Defensive rifle barrel length

For civil defense purpose, for sniping defenders, we want to have longer barrels for accuracy at a distance. Also, given how people are frequently moving around in vehicles, our defenders need to be able to shoot people inside vehicles that are sometimes armored. So the bullets are rather high-grained and powerful. This leads us back to the strong chambers of bold action rifles, which conveniently have a slow fire rate. Also the defensive rifles are long and conveniently harder to conceal.

Snipers and ambushes

1/ There is much media propaganda about these tactics. There is nothing shameful about about free men using them to defend their freedom.
2/ When defenders use these tactics this completely transforms what it is to invade and occupy another nation. Without them, invasions are safe and easy, with them, it is the opposite.

What do you bowl?

What do you shoot?

There are 3 classes: long pistol, assault rifle, and sniper rifle. If you hit every target, you shoot a perfect 100. If you miss 2, you have shot a 98. Some targets are close, other's not, some are perhaps moving at walking speed. The sequence of targets is mixed up, but the nature of the 100 shots are not. Here we have an objective numerical way to gauge marksmanship.

Defender training

More of being a national guardsman/ militiaman should be about marksmanship in sniper situations. Also, there should be a synchronized shooter aspect to civil defense training. You get the ready 5, 4, 3, 2, 1—fire via your earphones and then you have to get your shot off within say one second, before the target drops to the ground

Township armories

Perhaps our the police stations will be built around the armories, or in such a way that one cannot enter the armory without going through the police station.

The cowardly towns of western films

Imagine a town of 5,000 people armed with 100 un-rifled tamp-the-cotton muskets. Imagine a 20-men showing up with state of the art and expensive 1850-era 6-multi-shot pistols and true rifles. It is important to realize that this difference in arms was what caused the lawlessness of the old West. Because everyone was afraid (rightly so) to challenge the desperados due to their higher quality weapons.

Also, the fast gunmen of the old west... they were not fast in how quickly they took their guns out. It was more in how fast they could get rounds off and on target with their modern rifle barrel guns.

Bolt-action single shot scoped Rifles

This is one of the best civil defense weapons around. It is very hard to invade a land armed with this sort of weapon. Yet the weapon does not facilitate armed crime very well. The guns are too big and heavy and they can only fire one noisy shot every 6-seconds or so.

Kid-safer guns Hard revolvers

Imagine a revolver that requires a 15-kg force to cock the hammer. So the hammer has a 3X4cm palm pad. This is so the hammer doesn't hurt when you lower the gun to your waist to bear down and cock it. So the gun's action is too heavy for small kids to cock. So the fire rate is maybe one shot per 8-seconds, and this is just fine for civil defenders hiding behind cover and using a 9" barrel 6-shot revolver. It's not such a bad weapon for civil defenders, yet it's just a little bit more effective than a knife at killing lots of people, the noise and the occasional miss being big impediments to a murderous rampage. So, to my mind, we would be safer in many places if people were allowed these as carry weapons, as opposed to no weapon at all. We might also require a hole at the hammer for inserting a padlock that prevents cocking. Police officers will have the right to verify that the action on any ostensibly hard revolver, is actually hard enough when they encounter one in circumstances where a hard revolver is required. Also, other weapons such as 2-shot derringers might be allowed in the same places.

The Astra weapon

In the Mahabharata (from around 400AD.), guru Drona was a master of the Astra weapon, which seems to be a firearm.

IP and civil defense

There should be no IP protection for official national weapon systems, including civilian weapons. They must all be ubiquitized.

When is it an invading army?

Armed groups and hoards of unarmed peoples crossing into our nation may be treated as an invading army.

Civil defense rifles

There should be a standard rifle with interchangeable parts standard like .30-06 with scopes. These CD guns should all be the same caliber, so people can share ammunition, and ammunition can be more cheaply produced and gotten where it is needed.

Armor piercing civil defense bullets

For civil defense purposes, we want to have bullets with teflon and hardened steel jackets that will defeat body armor. However, because we don't want these used against police, the armor defeating bullets are only sold only in .50 calibre size, and all the civilian .50 calibre rifles are quite long and bolt action with hand insertion of new bullets.

Guns, dogs, and marauders

I don't think people fully realize just how much stability the synergy between guns and watch dogs brought to America.

Carry yes

Machine guns no

If you're exercising your right to be armed in public, then the public can demand that every shot be aimed, and no faster weapons may be carried in public.

Assault rifles

Civil defense is about defense, not offense. Rapid fire "assault" rifles are more about offensive assaults.

Throwing knives

These are not defensive like spring open knives. They are also a clumsy weapon likely to cause collateral harm to unintended people. For these reasons, throwing knives, throwing discs and weapon darts should be prohibited.

Second hand smoke and gun control

5.5X as many people die from second hand smoke as firearm homicides. 72,000 die in the US from second hand smoke and 13,000 die from fire arm homicides.

Chicago gun laws

1/ Each nome of 250 in certain parts of Chicago might have 5 to 20 Centi-Nome selected deputies (2% to 8%) that are supposed to carry arms. These are only supposed to intervene if firearms come out.

Barney Fife

This idiot deputy character was someone messing with our heads politically. They did not want us thinking of armed deputies as effective or smart. In truth, deputies seem a great way to reduce gun crime. This especially in lawless places like parts of Chicago.

Civilian carry deputies

Society can have a ready auxiliary and backup police force if it wants for nothing more than the cost of screening and gun carry certification as payment. If you want to carry, you have to agree to be a sort of backup deputy if you are armed and you are in that place. Also, maybe:

1/ Deputies have to agree to have their general location available to the recorder and the police while they are armed and in public.

2/ Deputies must have served without problem in the Police, Military, or other high confrontation work for a number of years, or be over age 35.

3/ Deputies must be better screened and better trained in regard to marksmanship and de-escalation than normal carry holders.

Gun cams

1/ They have multiple cameras, including a backwards-facing camera.

2/ They have a charger in their safe/rack.

3/ They come on when lifted or tilted horizontal.

Gun cams

1/ Our phones come-on when we lift them. Gun cams should also come-on when the gun is moved or lifted. Then the gun cam calls the county recorder which provides free backup for gun cam feeds that are signed up to the system. This includes police.

2/ Some jurisdictions will allow cam carry where before they did not allow carry at all. Other jurisdictions will change their carry rules to require that all carry weapons have a cam.

3/ The cam itself backs up video like a dash cam.

4/ It is impossible to delete files, only to destroy the camera and gun and cover the main lens (The main lens is inside the forward sight block.)

5/ There should also be a presumption of guilt if a gun cam is used but there are no files due to any cause such as: dead battery, cam off, or cam broken, etc.

6/ Central command and arriving officers can patch into the recorder's gun cam feeds.

7/ Deputies can call and ask for guidance based on the gun cam.

8/ There is a delay for turning off the cam.

9/ Some gun cams will permit the admin to turn the gun off if it is being used by another wrong person.

Maybe the admin can turn the firing off if kids are playing with the guns.

10/ Maybe there are 2 or 4 cameras recording at once.

All police cars have 3 firearms

Side pistol, scoped long rifle for the trunk, and a shotgun with 4-types of round:

1/ First round up is a "gentle" rock salt round

2/ Second round up is a "strong" rock salt round.

3/ Third round is bird shot with an irritant.

4/ Fourth and subsequent rounds are maximum carnage rounds. If the cops don't want the first rounds, they cock the cartridges out. Also the rock salt rounds are supposed to be aimed for the legs. This is how police deal with people armed with a knife or a quasi-weapon. Also, all rounds are color coded and all police shotguns are kept

chambered exactly the same nationwide so people are not getting shot with the wrong type of round.

.22cal less lethal sniper rounds

In the original Terminator film, there was this scene where the terminator was pulling bullets out that got stuck in its flesh coating. Here we imagine a bullet that mushrooms on impact and breaks the skin and goes in, but only barely. This is a weapon for giving people nasty-seeming wounds that will tend to be much less deadly than a larger and higher energy bullet. Maybe it is 22cal or .15cal hollow point, low grain rounds. Here is a police weapon stronger than rubber bullets, but far from a killer round. Also, these rounds might have a small amount of phosphorus or pepper in them so they are very painful.

The taser rule

If the Tazer doesn't work, you better lie down, because about half of the time, they are going to shoot you. And it's going to be your fault.

Family firearms

Registrations by spouses, parents, grandparents, children, grandchildren, and genetic full or half siblings are normally considered registered unless the arm was reported stolen.

Traveling and weapons

We should be biased in favor of local defenders and against travelers with arms. I do not support arms or even weapons for people who are traveling, unless they are in a war zone. There should be a UM map & app to remove any confusion.

.50 calibre rifles

These keep the people safe from those who wear body armor. These are important weapons

National ballistics registry

Given the patriot act, and the state of information tech, we are kidding ourselves that this does not already exist.

Safety box cutters

1/ Safety box cutters have smaller, short blades will cause less harm to products. We will have #3, #4, #5 & #6 cutters for the various thicknesses (3mm to 6mm) of corrugated cardboard. Safety box cutters have a flat edge that must be longer than 7cm. This long flat edge is an important aspect of making this sort of cutter an ineffective weapon.

2/ Safety cutters are seldom considered weapons when carried on a person, except in schools, airports, and parties. On the other hand the sort of box cutter where the blade can be projected over 2.5-cm shall always be considered weapon-grade knives if carried around the person.

The number is 10,000

Just google "Tiananmen + 10,000". The BBC Reported 10,000 at the time in 1989.

Abraham Lincoln

"Whenever the vicious portion of [our] population shall be permitted to gather in bands of hundreds and thousands, and burn churches, ravage and rob provision stores, throw printing-presses into rivers, shoot editors, and hang and burn obnoxious persons at pleasure and with impunity, depend upon it, this government cannot last."

Mohandas Gandhi

"Non-violence and truth are inseparable and presuppose one another."

Mohandas Gandhi

"The pursuit of truth does not permit violence on one's opponent."

John Lewis

"We must continue to teach the way of peace, the way of love, the philosophy and the discipline of non-violence,"

Gauge Halupowski

This man attacked a stranger from behind at a political protest. Because he hit the victim in the head twice with one of those telescoping metal rods, he should have been charged with attempted murder. He also assaulted the arresting officer. As all of this was at a protest, so he should have been given a multiplier penalty. Thus he probably should have gotten something like 20-years for the attempted murder plus 5-years for the assault on the officer assuming it was mild. And the penalty should be doubled or tripled considering that it was at a protest, so he should have gotten 50 to 75-years. I would have handed down a life sentence to show what happens to violent protestors in our democracy. To do otherwise is to allow the sort of brownshirt fascists (deceptively named anti-fascists) that brought Hitler to power

It is very important to the proper functioning of our system that no group can jam or hinder the right of protest by making it dangerous. Anyone doing so (like Antifa) should be considered as a sort of democide organization — like Hitler's SA, that would club people on their heads, as Hitler described it in his writings.

Senate

Mohandas Gandhi

"A man becomes great exactly to the degree which he works for the welfare of his fellow-men." [A great Senate motto]

Phronesis (Ancient Greek: φρόνησις, romanized: phrónēsis) is an ancient Greek word for a type of wisdom

or intelligence. It is more specifically a type of wisdom relevant to practical action, implying both good judgement and excellence of character and habits, sometimes referred to as "practical virtue". This word should be popularized and made to seem sort of synonymous with virtue by all democracies.

Cynthia Johnson

1/ This is what the creeping idiocracy looks like in our democracy.

2/ The system must have some rules that fairly exclude clearly incompetent people like Cynthia Johnson.

3/ The way this embarrassment of a leftist elected official was so quickly censored on Youtube/Google by a flood of cover-up media is truly amazing.

How do you get a smart democracy?

In order to vote, one has to pass high school or the equivalency test in the national language. This is not too much to ask for a test of suffrage in an informed democracy.

Terms for making it to the Senate

1/ You become a "made man", a term which also applies

to females when they donate their eggs to the Senate

2/ People are said to "have it made" or "got it made", a reference to their Senate status and access.

The Ministry of Truth lying can be seen in the South China Morning Post article Aug 2+/- 2021 about the Tiananmen Square massacre.

Assembled by Senators under oath

The Senators assembling the information must swear an oath not to hide any information at all no matter how they feel, everything must be presented fairly and honestly.

Also, here in this role, we are using Sub-Senators, hundreds of them.

4.5 million Doctorates

500,000 Sub-Senators annually

100,000 Main-Senators annually

10,000 Over-Senators annually.

1/ Being a confirmed Sub-Senator will not quite be as rare as being a Ph.D. But being a Main-Senator will be much rarer. And being an Over-Senator will be even rarer.

2/ Instead of people focusing on learning other people's ideas, they will now be more focused on coming up with new stuff to help everyone.

3/ The cred these people have is not a thing to be used on an individual basis. They are like individual jurors, they hold no official power over others as individuals. The only power they have is in groups of appropriate size.

What do we get in return for letting lawmaker swayers know if their corruption efforts actually worked?

No double jeopardy for leaders

You can't have this sort of a circus like the Blues in the house of representatives repeatedly attacking the Red president.

The main senators are not done

They are all still trying to make it into the OS. So the main law making body is not the end. Instead, everyone is still trying hard.

Voting

John Lewis

"I don't necessarily think that democracy is about electing representatives. I think it is more about finding a body of smart and honest leaders that cannot be easily corrupted."

Cross town nomes

People shall be able to join cross town nomes if they are running for office. It is just a lot easier if you live in the neighborhood. Unless you are clearly Senate "material", in which case you might move and try to get into the Senate.

Low voter nomes tweak

Let's consider the way New York's 14th congressional district has 706,000 voters and only 152,000 participated in the 2020 election, with only 105,000 voting for Al Cortez. (a 21.5% voter turn out, and 15% to elect). Clearly democracy breaks down in communities of such apathetic and indifferent voters, and such low voter turn-out. Let's have a rule that nomes cannot be apathetic, and must participate in the democracy to a certain extent, or it cannot elect Senators.

This will drive a separation of the nation into voting and non-voting communities, with the latter being regarded sort of the dregs of society. This also drives the people in the middle to get involved. Because they don't want to live in a community that is so apathetic its votes are ignored.

Voting age

After going to the the BLM protests and talking to hundreds of young people, I have changed my mind about voting age. I now think that most people are still rather dumb at age 18 and even age 22, at least as far as politics and economics go. They are also quite vulnerable to ideological manipulation. So let's err on the other side and put the minimum voting age in the mid-twenties.

Video voting by line

Under this scheme, everyone who is voting walks up to the camera with their votes printed on an 8x11 sheet. This includes the voter's name. 10 people come together and stand on a line facing a row of community people who are

taking videos. There is a clock in the middle of the line. Then the people get motioned away. Then a new group comes of 10 people comes up to the line. There are 100 lines of 10, or 1,000 voters per video folder. People are told their folder and line number. Later there are screen shots of the video and each voter's clip is posted for all to see.

M signs for mustering

The sign for a mustering nome is the capital letter M the size of a yard sign. The color is bright red. Then under the M people write the names and days for mustering. Cardboard and spray paint M's with arrows may be used.

National Lawmaker vote audit

Let's hold a new census and among the other questions, we will ask people if they voted and how they voted in the old 1789-era democracy. Then we will know which lawmakers won through fraud.

Going to a poor nation to run for Senate

When learned foreigners come to your land, you should compare them accurately to your own people. Be a sliver biased in favor of them until they are at least 5% of your senators. Then be completely unbiased. Also, when people go to a poor place to run, it should be seen as similar to joining the Peace Corps. This going to poorer parts of the world should never be seen in any way as cheating, or less than Senate service at home.

God mind

Our democracy is the closest thing we have to a god mind.

We should ponder this and make it a mantra.

Eu-tropia

This isn't a mythical society, it's a list of characteristics to trope and bend Society towards. • • • Eutopia isn't a mythical society, it's a direction objective for society, it is a direction.

The ring of truth = the arc of the covenant

The ring of truth and arc of the covenant are not physical things. They represent different aspects of thought leadership:

Ring of truth = how your leader speaks with resonance and truth.

Arc of the covenant = how you let your leader re-write everything.

We the people or... We the god?

Emotions don't make one human

Emotions are more basic than that. They make one a living feeling animal. It is the thoughts that make us human and special in the biome. The thoughts are what

make us the cortical cell of life on earth, the best shot at spreading our planet's life infection to other worlds.

Must day dream

I don't think I directly participate in the world like most people. I am spending much more time thinking of things in my own mind.

A prophet = a guy who dreams up a better future for everyone and manages to get them to follow
A Cassandra = this is like a prophet, but nobody follows.

Real prophets use logic
Mysticism is for posers.

He has come many times
You just never listen
Don't just wait for the arrival
He is already here among you
He has always been among you
You just have to listen for him.

The post-theist god's fuel

The respect, friendship and kids that people give to their Senators and Ubiqs will be the fuel that makes people struggle to innovate and to become Senators. And it will be very important to prevent the counterfeiting of this status, so it may become the coin of the realm of politics and group contributions.

Why my message is long

- 1) It prevents people of limited abilities from commenting on it.
- 2) It serves as a test for leaders.
- 3) I had a lot to say.
- 4) It slows down activity, so action cannot be easily subverted.

The first thoughts of the god mechanism

Don't be surprised at how mundane, and even autonomic they seem at first. This is expected. Also, I have no idea how long it will take before the next phase can start. None at all. I don't even know what is involved. But I do know that I can get you closer.

Bottlenecks and overall speed

Maybe it is not so much the overall speed of the information exchange. It seems that the bottlenecks are more important: the parts where people get stuck on something that needs to be explained better. To obtain network speed, there needs to be some sort of quantification and mapping of where people get hung up and stuck, and where they switch to the slower versions.

The group mind

Our problem is not one of individual intelligence, or fast thinking, it isn't even really integration. It seems to be one of unbiased choice of the best solution.

Encrypted technology for synchronized sniper fire countdowns should be distributed by government as this greatly empowers the defending civilian rifles while doing absolutely nothing for the effectiveness of lone gunmen.

As soon as kids pass the high-school test, they are emancipated.

BBS Comment graying

GV = Content GRAYED out as pointless VACANT or nonsense, or non-valuable.

GR = Content GRAYED as REHASHING, or nothing new.

GE = grayed as EMOTIONAL/ insulting/ pitiful/ patriotic/ etc.

GC = content GRAYED as consolidated to location 123-456-789.

I see Senate twitter committees/ juries as greying out and consolidating most comments.

UBIQOLOGY = the study of democratic status, especially its administration, its results, its fairness, and its optimization.

Public status

All public status awards must pay the recipient some money, even just one week of wages. Also, the ubiquitization budget is supposed to be a thing with countless tiny rewards, and some big notable ones too.

A totally granular group mind

There is a neuron (a Sub-Senator) for every 250 cells. It will no longer be hard to get Ideas introduced.

Senate literacy test

Looking at the Squad and George Bush Jr. I can't help but think that a good number of our Senators will have trouble keeping up with their reading in the Main Senate.

What did mankind accomplish in the first two decades of the 21st century?

Mohandas Gandhi

"You must not lose faith in humanity.

Humanity is an ocean;
if a few drops of the ocean are dirty,
the ocean does not become dirty."

Argumentum ad grexum

In order for you to be right,
everyone-else would be wrong
and that's impossible...

Matrix enslavement

This is when nearly everyone agrees that some new proposed mechanisms would be better, but nobody can figure out a way to do a system upgrade and change the mechanisms.

Janus was first a god of leadership not war

The symbolism of the two-faced Roman god Janus makes a better god of leadership than a god of war. One face looks backwards into history and the other forward towards the future. And given how easily leadership can be turned into war by those bent on war for profit, Janus seems to have been changed.

The accuracy of my message

Most of it, I am pretty sure is true. Also, I am absolutely sure there are some errors. And there are probably a great many errors considering the length of it.

What a closed mind is

This is when you make up your mind about things and then blindly refuse to hear any question.

The delight

It's a good name for my message of light.

Names for my message

The way the Arabs have 88 words for Mohammed, maybe you also want to have multiple names for different aspects of my message.

Criminal Code

5 divisions of violence

Violence-1 = Gun/knife Battery. This includes battery by gunfire, or stabbing by large knife to the torso, neck, or head or groin. It also can include striking someone's head forcefully with a potentially deadly weapon to include bottles, rocks, clubs, and surfaces. V-1 is just below attempted murder. Severe or repeated stabbing, slashing, or beating can be considered attempted murder.

Violence-2 = Club Battery. This includes small knives, and smaller stabs and slashes, blunt impact weapons, and any attack on the neck/throat, and repeated hand or foot beating of the head, neck, torso, or groin. It also includes rock throwing with significant injury. Shoving or striking a person's so their head hits or is likely to hit a surface with significant injury. Also, included is shoving a person down a normal flight of stairs.

Violence-3 = Unarmed Battery. This is fist and hand fighting, except for targeting the throat, eyes, or groin, or when it drives the head to strike the ground or a wall. It includes spitting in the face, improper use of sprayed irritants with no long-term harm, and may include intentionally burning people with one's cigarette. It is participating in a protest that goes to someone's home, or

a makes demands on people the protest encounters under implied threat. In both of the last two cases, the protest is becomes the weapon that threatens violence.

Violence-4 = Slapping Battery. This is a women slapping a men's face hard. It is punching someone on the shoulder, or kicking them in the legs. It is scratching hard with one's long fingernails. It is spitting on the body, It's throwing soft things like food, water.

Violence-5 = Virtual Battery. It is getting close to someone and screaming, or cursing at them, or intentionally insulting someone. This may not be a crime in many jurisdictions and circumstances. And in some it will only be a crime if the victim is before an audience, or broadcasting live, or protesting, or voting, or or a leader of men, or a Senator, or police officer. Virtual battery might also include the haring of personal information as a way of doing harm to a person. if it is done with intent to cause harm to someone.

Sucker punches

These shall get 3x the normal penalty.

Types of murder

Murder-1 = Planned murder

Murder-2 = Unplanned murder with malice

Murder-3 = Passion homicide = voluntary manslaughter.

Murder-4 = Negligent homicide

Honor murder shall always be considered murder-1.

Firearm brandishing

This is any threatening reference to a firearm that is not in self defense.

Brandishing-1 = Offensively pointing a gun at someone. Felony

Brandishing-2 = Offensively taking a gun out & not pointing it. Felony

Brandishing-3 = Offensively lifting one's clothing to reveal a firearm as a means of threat, or putting one's hand on one's open carry firearm, or gesturing towards one's hidden firearm bulge. This includes verbal reference to one's firearm. Bad misdemeanor.

Brandishing-4 = Defensively pointing a firearm at a threatening person in a situation that doesn't truly warrant pointing a firearm. Minor misdemeanor.

Brandishing-5 = Drawing a firearm for a threat situation that doesn't truly warrant drawing a firearm. This includes firearms not pointed directly at a threat. Generally not a crime.

The rules of brandishing firearms in defense

Particularly in high crime areas, it shall be a crime to walk up to strangers in public or private places that are mostly deserted. Approachers like this must speak to their approachees from a distance of at least 12-meters unless the approachees agrees to closer communication. People who violate this rule shall be subject to an unpointed firearm draw. If they approach to less than 6-meters, or

they are running towards the approachers, then a firearm may be pointed at them.

Shoving people

1/ The way that Martin Gugino was shoved should be considered as if the officer had blindly swung a club and hit him in the head.

2/ If there is no injury, a shove like this should be considered a missed punch to the face.

3/ Police, including riot police can only shove people like this if they have taken one step back in the past few minutes due to pushing from person.

Attempted murder—no weapon

It may be considered attempted murder when people attempt to strangle others, or crush their windpipe, or when they strike others in the throat with great force, or use choke holds, or they stomp or kick on a person's head while they are down, or they drive a person's head into a hard object, or they pummel a person while they are down. Shoving a person in front of an oncoming vehicle may also be considered attempted murder. Attempted murderers get sent away for life, but to an island.

Perjury refined

1/ Perjury convictions require all of the following:

a / The thing lied about must be an important decision point in a trial and there must be significant benefit for the accused or witness in lying.

b/ The thing lied about must be an absolute and cannot resemble a relative thing that might change depending on when or how it is described.

c/ There must be criminal intent to lie or mislead without correction during the trial.

d/ Perjury is a crime of the courts and affidavits and not of interactions with police.

e/ The evidence of the lie must be incontrovertible.

f/ Equivocal statements must be interpreted as broadly as reasonably possible.

2/ Nobody should ever face perjury penalties for maintaining their innocence. And statements about one's innocence shall never be considered grounds for a perjury conviction.

Trespassing refined

All of the following types of trespassing need different penalty ranges, and realistic penalties that match the crime.

Trespassing on a private balcony or patio

Trespassing on unfenced land.

Trespassing on fenced land.

Lobby trespassing = Entering a building's secure lobby without authorization.

Sneaking in = Not paying for a movie, concert, private club, gym, etc.

Camping on private land without damage.

Camping on private land with damage.

Shoplifting refined

Shoplifting-1 = Shoplifting many items, or Shoplifting expensive or marketable goods that seem likely to be sold (8-years). When groups of shoplifters work together in synchronized teams, it should generally be considered shoplifting-1. This should be so even if they are coincidentally in a crowded store with another shoplifter.

Shoplifting-2 = Theft of goods that seem to be for personal use. (2-year)

Shoplifting-3 = Theft of low cost items and non-luxury foods. (1-year)

Provisioneering = Theft of low ingredient stamps foods or absolutely necessary items. (3-months)

Campering

This is using a vehicle to sleep in an unauthorized area.

Intervention and apparent felonies

When bystanders intervene to stop an apparent felony, or to prevent a felony getaway, the bystanders people may grab, pull, wrestle with, and hold on-to the suspect until police arrive. They may hold the suspect in place by the hair. They may pull the suspect to the ground if he is combative. They can lay on top of the suspect. then can't harm or tackle the suspect, or strike the suspect unless he has moved to harm them. However if the suspect fights the people justly trying to restrain him, he shall be quickly be considered guilty of assault, as well as the other crime he was being held for.

Custody abduction

This is the term to use when one separated genetic parent seizes a child that is in the custody of the other separated genetic parent and there is no conviction for abuse. This is a significantly lesser crime than kidnapping by strangers where sexual abuse is normally assumed. The jail time for custody abduction shall not exceed the duration of the abduction provided the abducting parent notifies the other parent that they have the child.

Police

How to end BLM

Part 1: Dumb drug and weapons laws

- 46% of Chicago incarcerations are for the drugs that are totally endemic.
- 20% of Chicago incarcerations are for weapons possession.
- So in Chicago, about 2/3 of incarcerations are not for actually harming someone else, but for things that might harm someone. And these convicts that might have hurt someone outnumber the convicts that actually DID harm

someone by 2-to-1. Here we see the absurdity of our nations drug and weapons laws.

Part 2: End money bail

1/ Money bail is unjust because it hits the poor more than the rich.

2/ Money bail is unjust because the 10% bail bondsmen fees penalize the innocent and guilty alike. A 500,000 bail bond costs \$50,000 to obtain. And this money is collected by the private sector not government.

3/ Penalty multiplication is the main thing driving people to come back for trial. The amount of money people deposit with the court doesn't really assure their return for trial, and it should have nothing to do with whether they are released pre-trial.

Part 3: A national code of police conduct

What can police do, and what can't they do? When can they search a person? When can they order people out of their cars? When can they take their guns out? When can they break your car's window? Let's all know what the rules are precisely. Then there will be much less question about differential enforcement.

Part 4: Stop killing people to avoid civil lawsuits. We will change the rules. Now armed people who do not surrender and are injured during their arrest shall have no right to seek damages from government.

Police hatred is mostly from the war on drugs

Isn't this is the main reason for police hatred. Isn't this mostly from American's failed drug policies. And won't this hatred shrink greatly once we legalize drugs and institute a more sensible weapons policy?

Heroin holes

I would use the old jails to house CTD junkies, and meth heads who can come and go as they like to the often remote locations. But before getting one's license for heroin or a crystal meth, the last thing that people should have to do is go and visit with the junkies in a Heroin-hole, or Meth-hole for 8 waking hours as applicable. And maybe they have to go back and visit for 4 hours each year. Go and hang out and talk to the addicts.

Clear rules for non-lethal weapons

We need rules like no-non-lethals when people have their hands up or are mostly lying on the ground, or in handcuffs.

Fast release tear gas

These discharge lots of tear gas real fast.

Dart guns are better than tasers

Tasers result in lots of head injuries due to the way people fall. Incremental doses of Injected drugs are a

safer way to take people down, even considering adverse reactions. Darts also have a much greater range.

Shooting looters with rock salt

There doesn't need to be any warnings. They can simply be shot in the lower half with government approved rounds

Police shotguns

1/ The police shotguns need to be foolproof about which shell is inside. There needs to be daily verification of the sequence or a clear window to the shell compartment.
2/ The different sorts of shells all have different colors, internationally identical shell colors. Maybe the colors are Day-glow yellow for rock salt, Orange for bird shot, and red for kill rounds.

Shooting looters

During riots and natural disasters, crisis law rules. Those who break into occupied homes, or occupied businesses (other than grocery stores and gas pumps) may be shot dead in any numbers without warning by the defenders. This however does not apply to food and drug stores, or gas stations.

Quick release of police shooting videos

In general, all police cam recordings should be made public within 24 hours in original form, however, the police department may provide narration with the officers or their commanders explaining what happened.

Standardized rules for officer conduct

There should only be one code in the US. Especially with regard to arrests and weapons use.

Once you draw a gun on police...

Can someone reenact the video from the McCreary police shooting in Phoenix? But there are two endings. In one she keeps running, but in the other she turns and fires 11 rounds at officers. Play one ending then play the other randomly. Do it a few times. There is no way to tell what is going to come next. The rule that officers may never fire at someone running away is clearly too blunt.

>>>>

When officers can't fire, crooks know this and are more likely to run, turn, and shoot. Then the people have trouble finding good men to be officers. This is why we say that when people draw on officers and run away, they still may be shot.

No unlogged weapons or seizures

1/ We don't want police carrying around extra weapons to frame people with. No. Police may only carry logged weapons, even clubs, either on them, or in their car.
2/ All cops and their vehicles get randomly searched by Senators for extra weapons and contraband at least

quarterly. In places with law-enforcement corruption issues it should probably be every 30 days or even more frequently.

3/ Police may not come in possession of any evidence that has not immediately declared into the recorders video record.

hand and give the law greater reach and force on the margins.

Brandishing arms around one's place

Brandishing arms around one's place is allowed when gangs of people are roaming the streets and there is widespread shooting, killing, burning, beating, looting or rioting. Or when gangs come to a residence or business (a "place") in a way that is confrontational. In all these cases, the defending residents/workers should be free to be armed on and around their premises. Also when the people in the gangs are brandishing firearms, or have flames or rag bottles, or clearly threatening violence, or demand money, those with the firearms, flames, or rag bottles, and those threatening violence may be shot by the defenders without warning.

Cops confronting armed shooters

None of these guys should ever come with a handgun. This is ridiculous. All should have scoped rifles

Firearms

Due to training, police pistols may fire at a faster than normal rate and not be considered militia weapons.

Police temper testing

Let's test all police cadets for their temper. And with female police let's test them during their PMS time.

Arrest classes

A1 = Murderous, or firearm use

A2 = Violent history

A3 = Everyone else

Police are allowed to take reasonable precautions when they have reasonable cause to think they are in an A1 or A2 situation. Also, statistics for A1 and A2 arrests are separately tabulated from overall arrests.

Minimum enforceable speed limit

This is 30mph (49kph) except where a hazard exists on the road such as a sharp corner, or sharp crest, or a blind intersection.

We got him on a weapons violation

This is not the way the legal system is supposed to work.

Publishing data with intent to cause harm

This is a crime

How do we punish police?

1/ Don't punish police for legitimate mistakes and bad split second decisions even if people die. If it is a close call, we must err on the side of forgiving them, or we will not find good men to be our police. It is very simple.

2/ What do we do to them when they are moderately bad? Do we fire them? Do we disgrace them? Do we fine them? Do we make them police bad neighborhoods? Do we do nothing?

The 911 app

This is mandatory on all cell phones. It makes no sounds. It works like WhatsApp video. We imagine situations like people in the front yard with their kitchen on fire sending the video to the dispatcher which hits the forward button to the arriving fire truck.

Bezel cams

All phones should have a third camera at the edge or bezel for s filming.

Police

Emergency services are funded by the county, and there is only county police and national police. The county police are directed and reviewed by the county Senate.

Gun license plates?

Maybe all carry firearm should be required to display serial numbers in large text in a contrasting color.

The police commissioner

1/ How many times have we seen this person features in US media?

2/ It should be a police commission of many people, not a single police commissioner.

3/ This group does not supervise the police. It evaluates and judges public claims against the police.

Door ID

Wouldn't it be nice if there was this county operated RFID video door bell. Thus visitors could put their chip on the scanner and the device would send the number to the recorder and it would show their ID photos to the person inside. So the resident can compare the image on their screen with the person at the door. Maybe there is an option that all the people coming to your home have to make an appointment using the ID verification system. And maybe you have to accept before it is legal to visit you. Maybe they can't get out of the township public area without someone accepting their ID.

Free ID verification

County ID verification a service that County government will offer for free.

Of vehicle networks & crime getaways

If all the vehicles are controlled by a network, how does one get away from the scene of a crime using a vehicle.

Demonetize Brazil

Demonetizing drugs and getting rid of cash will affect the most dangerous nations the most.

Provisioneering

This is when people in a crisis situation take reasonable amounts of essential items like food, gasoline, and needed medical supplies.

When thugs with records loot

When people with criminal records engage in political violence, or disaster looting, or disaster violent crime, they may be sent away for life. (Looting here does not include provisioning reasonable amount of essentials)

EMS screw up liability

There shall be no liability when trained rescuers working for government screw up in crisis situations. This shall include firemen, police, paramedics, air rescue and emergency room healthcare. You get what you get with all these services.

A good example of what police uniforms should look like, but perhaps with smaller numbers.

https://sallyscopshop.com/index.php?route=product/product&product_id=845#PhotoSwipe1579445722763

Dayglo yellow British tops are another good idea. They will help rebrand American police as nice and helpful in the wake of scrapping our old drug laws, money-based bail system, and vehicle stop and ticket system. We might also emulate the British cars paint design for our emergency vehicles. This design seems less confrontational.

<https://www.telegraph.co.uk/news/uknews/law-and-order/11870929/Poor-people-need-more-bobbies-on-the-beat.html>

Breaking up the cesspool

Junky-ville for the Heroin addicts is in the outskirts at 12:00. Meth-town for amphetamine addicts is out at 6:00, the Alcoholics are out at 3:00, and the poor housing is out at say 9:00. If your daily dose is over the threshold, you must move into the appropriate addict's hostel, which involves various levels of anti-drug media bombardment. But the poor are separated from the drug addicts and the drunks. And this will surely be of benefit to them.

Outlawing pre-crime is dumb

1/ 46% of Chicago incarcerations are for the drugs that are totally endemic.

2/ 20% of Chicago incarcerations are for weapons possession.

>>>>

So in Chicago 66% of incarcerations are not for actually harming somebody else, but for one of two activities that supposedly leads to harm to others. >>>

So we are tripling the number of inmates and ruining the lives of hundreds of thousands of people in the US. We are pissing away billions of dollars for prisons. What are we getting in return? Are we reducing drug use any more than taxation would? Are we reducing gun violence by much? We are certainly making part of America hate the police.

Roman homes, American rifles

This is the safest way to live. The flammable wood and glass houses of America are not terribly safe.

Police assemblies

I would send cops around to the schools to present these assemblies on:

1/ We cops are just like you.

2/ We have a job to do. We don't hate people, we are just doing our job.

3/ How the word "Freeze" means that the cop is going to shoot you if you don't freeze perfectly still".

4/ How "Hands" means that they are worried that you have a gun in your hand and are about to shoot you. Hands means hands up or you are about to get shot.

5/ If we say you are under arrest, you have to give us your hands right away or you might get either knocked down or shoved against a wall... perhaps on top of getting a longer sentence.

House call magistrates

The various counties should offer these as a paid service at perhaps 7x the average wage per hour. These are like the teacher monitoring the playground.

National databases of accusations

We should know who is getting lots of complaints.

Police priorities

Police protect us first against murder then injury, then violence, then threat of violence, then grand theft, then petty crimes.

Body cams that don't work

1/ If the camera is off, or not in backup mode with the recorder, the arrest shall be voidable, just as it was under the most restrictive construction of the Miranda rights.

2/ If the officer's camera is off when the citizen is harmed the presumption of guilt is on the officer.

3/ The camera rules apply to police, building inspectors, fire marshals, lifeguards, child protection services, and all other government people using any compulsory power over the people.

4/ Where one would expect the live backup camera record to evidence of a crime, the camera record must show evidence of a crime or there can be no conviction.

Nazis officers were given meth

Giving war fighters drugs like methamphetamine may improve survival, but it also leads to accidents and war crimes, right? I wonder if police on caffeine is also a bad idea. I mean shouldn't they be as calm as possible? Maybe we should go back and look at all the police officer shootings and correlate them to caffeine consumption. Is there a relationship?

Child protective services

- 1/ We are a land that errs on the side of freedom and tolerance in the way people live their lives and raise their children. This includes how much of a "free range" young children are allowed.
- 2/ If there are any rules about what is not allowed of parents, they must be composed, stated and promulgated by the Senate. There should be very little leeway on the part of CPS workers.
- 3/ Our legal system is based on physical evidence and not the subjective opinions of police officers. CPS must provide clear and definite evidence on video or otherwise to take non-emergency action.
- 4/ As with police, all CPS communication with the people must be publicly recorded under chest cam or recorder video phone line.
- 5/ Minors shall not be interviewed by CPS without parental permission unless it is under a court order.
- 6/ All children's interviews shall be recorded under remove backup by the recorder's office. No leading questions may be asked either before or during the interview.
- 7/ Our school system will take and board kids. In fact there may be special schools for "early removal" kids, so CPS will lose much of its jurisdiction.
- 8/ CPS must have a court order to remove children from a household for more than 24 hours.
- 9/ If any court motion is denied a CPS worker, that worker must hand the case/family in for re-assignment. After this, the CPS worker (and their associates) may never work on that case/family again.
- 10/ All CPS workers shall have an intervention ratio and a child removal ratio. The CPS workers that intervene least and most shall be investigated.

Less crime

- 1/ Eliminate cash and fungibles to make crime harder to profit from.
- 2/ Drug licenses, and free, safe, legal drugs where people pay with hours spent watching anti-drug media instead of paying the Mafia with money.
- 3/ Mandatory bezel cams in all phones. Then nobody knows who is recording and sending to the recorder and police when they are holding their phone normally.
- 4/ 987 = police record, watch & perhaps dispatch.
- 5/ Free public kid tracking.
- 6/ Less costly life and general abundance.

7/ Better education.

8/ Townships with ID verification for guests to enter the private areas.

9/ Eliminate human operated vehicles from safety zones at least. Getting away thus becomes hard.

Lawyers & Court

Why there must be an underlying crime

There is a reason we need to require an underlying or primary crime in order to have convictions for crimes of the judicial process such as: obstruction of justice, resisting arrest, misleading investigators, contempt of court, and lying to prosecutors. The reason is that without an underlying crime we risk having police and government people hauling innocent people into the justice system on flimsy charges. This in order to try to get them on an error, or a procedural charge, or an inconsistency in their testimony, a lie. These types of crimes are not for free people in a free nation. They are instead things of places where the people are subservient to their government.

Crimes of criminal procedure

These shall not be disqualifying felonies. They may have long sentences, but they shall not be felonies.

Tampering

When those charged with crimes communicate with witnesses to their crimes, or their accusers, their communication must be recorded.

Double penalties for police injury.

Triple penalties for protest violence.

Quadruple penalties for violence against leaders.

The power of the law

It's quite obvious, but it still needs to be pointed out: The law only has limited power over changing behavior. This is why making drugs illegal doesn't stop drug use. It's also why outlawing adultery doesn't work. The law can only bend behavior to a limited degree in a free society. If it exceeds that bend, people ignore the law. So lawmakers must make laws that are gentle curves that are obeyed, rather than sharp curves that are ignored.

National judicial oversight

1/ Some parts of the country are on the long tail with regard to "progress" or "progressive-ness". For example San Francisco. Other parts are on the other long tail with regard to traditional-ness like say Montgomery AL. In recent decades, both communities have clearly applied the law in ways unacceptable to the remainder of the nation.

2/ We do still see corrupt prosecutions and corrupt pardons on the part of local governments.

3/ A double checked legal system is probably a good idea where the national sense of justice is affronted. In other words, the national courts have the right to overturn county judgements and stop prosecutions.

4/ If the county fails to prosecute, the national Senate may.

Under oath

Everyone must tell me the truth when I ask them a question.

A slight legal immunity

There should be slightly higher standards for bringing cases against: Ubigs, Main-Senators, and Over-senators for both Criminal and money court. This especially when they have done things that anger a constituency.

My personal immunity as a prophet

I have said a great many things. Some of these things will certainly anger some. Some may think they can get rid of my changes by attacking me.

1/ I may never be charged, subpoenaed, deposed, sued, harmed, de-platformed, moved, or punished for anything I say, even if it is deemed racist, sexist, transphobic, or treasonous. Anyone attempting to harm me in such a way should be punished by the law.

2/ Nobody shall be free to take the most controversial parts of my message and re-assemble them so my message looks more controversial than it is.

3/ Nobody shall be free to take the dumbest parts of my message and re-assemble them so my message looks dumber.

4/ Nobody shall be free to substantially alter the context of my message.

5/ You are free to disagree with what I say, to call parts of it wrong, but you may not attack me personally.

6/ Only the American Over-Senate shall have jurisdiction over my actions.

7/ I may go anywhere on earth I want, and stay as long as I want without a visa or a passport.

Instant video adjudication

Most consumer products and services should be subject to instant video adjudication. This is where you video call a county specialist adjudicator and pay \$2/minute for talking and video showing. The winning side does not pay, and half the money (~\$60/ hour) goes to the county adjudicators working from home on call.

Not using a form contract

If you're not using a form contract, perhaps you need to submit your contract to the county law library to make sure that there are no conditions that are likely to lead to dispute or conditions that are unenforceable, or conditions that are biased against one side or the other. Here I imagine administrators that are like escrow officers reviewing the terms of a sales agreement. These are paid

by the Thousand words to review the contracts. Maybe for a contract to be valid, it must be either from the county law library, or accepted by it. Surely we don't need lawyers to keep reinventing the wheel, and keep making new contracts for us over 90% of the time.

A unified court system

We need to unify and simplify our nation's court processes. There should be one set of base rules nationwide. If any county wants to deviate from this, it must gain approval from the national Sub-Senate for the legality of its deviances between their passage and when they come into force. Each county with deviant laws must web-publish an annual list of all local deviances. Finally, the total number of deviances should be restricted where there is not some special local factor that necessitates a large number of unique local laws. For example due to the density of Manhattan, or being in Alaska, or the special foreigner presence on the Big Island of Hawaii, or on the witness protection islands.

Appeals

The current legal system makes multiple appeals a right to the person who has been convicted of a crime. Thus there are two (or more) defense trials for the defense lawyer industry to feed on. And that's why the system works this way. It's lawyers pushing legal accuracy at any cost to their clients, Costs that they will receive as payments.

Courts will grab power too

Courts should neither create laws, nor substantially modify, or interpret, or execute laws. And if there's a problem with the law being vague, or having multiple interpretations, or being apparently unconstitutional, the court's only power is to ask the legislature for clarification or correction.

William Douglas: Sierra club versus Morton 1972

"A ship has a legal personality, fiction found useful for maritime purposes... so it should be as respects valleys, alpine meadows, rivers, lakes, estuaries, beaches, ridges, groves of trees, swamp land, or even air that feels the destructive pressure of modern technology and modern life... The voice of the inanimate object, therefore, should not be still."

[1/ Here is a US supreme court justice giving rights to environments, this then lead to many of our richest mineral deposits being put off limits. It also caused our cities to grow around many central parks, thus increasing sprawl and sales of OPEC's oil.]

Vision is not judgement

The people who contribute the most to the group cause might not be good judges.

Democracies can only change the rules

for the next time

The way the House democrats have changed the rules for impeachment should only be applicable for the next time. The current impeachment needs to use the existing rules.

No court transcriptions or stenographers

Instead, there is central monitoring and recording in multiple, and HD audio and video inputs.

The prosecutors first duty

It is to justice, not conviction. The hiding of evidence by prosecutors should be a felony.

Me too

Accusations of sexual impropriety decades ago are almost impossible to refute. So with these sorts of attacks, anyone can be gotten rid of. So you will never have another good leader again. Because all can be easily disposed of with this sort of accusation.

Alzheimer's judges

There should be standardized cognitive decline tests. These should be administered by people who have completed a 6-month internship with another Alzheimer's judge. These judges should be employed by the public to gauge people's age-related mental decline. These people shall judge when people must get reviewed for:

- 1) Making big ticket purchases and investments.
- 2) Their right to undertake legal matters.
- 3) Their right to roam around alone because they have gotten into trouble before.
- 4) Their right to take care of themselves. Perhaps once a person reaches age 70, they must go for annual review.

Bad laws feed Lawyers

This should be a maxim

Lawyers, reputations, and status

Society should not allow any ranking or reputation scores for lawyers as it encourages a costly arms race in lawyers. Also, all lawyers shall keep their offices in a monitored court house annex. All offices shall be identical in each court house. They may vary between court houses, but at each site, the offices must be identical. The corner offices are for conference rooms. Lawyer offices cannot be on either the ground floor or the top floor. Total equality of office space.

Lawyer that become businessmen

Those who have attended law school for more than one month shall not be allowed to represent themselves as a plaintiff in money court. And if they have associates that are lawyers, these may not act as a plaintiff's lawyer. This also helps lower the status of lawyers so fewer of our best people go into law.

Lawyers and the truth

Under today's legal system, it is said that lawyers may not deliberately mislead the court, but they are not obligated to tell the whole truth. Yet when people take the oath of truth before appearing in court, they must promise to "tell the whole truth and nothing but the truth". Why is it that clients are required to tell the whole truth, but lawyers are allowed to tell part of the truth? Doesn't this give an advantage to lawyers, and those who hire costly lawyers? Why do we give this advantage to lawyers? The answer is simple, it is simply that if we didn't do this, fewer people would use lawyers unless they had to.

How to have fewer disputes and less crime

It is very simple, kids should be taught the law in school.

Senate immunity

This applies to all candidates, everyone waiting to begin Senate service, all sitting Senators and for 6-months after leaving the Senate.

The limit of equality

Everyone is equal under the law, and in all government and corporate activities. This however should obviously not extend to individuals, who must be free to choose their partners, friends and associates. Just imagine the absurd situation of people being called out as racists for not having any close friends of some race.

Legal Inclusion comes first

Legal accuracy comes after

- 1/ What if the legal system disfavored lawyers, so that most people self-represent?
- 2/ What if the courts were supposed to favor non-lawyers over lawyers, the way they're supposed to favor tenants over landlords?
- 3/ What if non-lawyers always got to speak first and last?
- 4/ What if the non-lawyers got a bit more time to talk?
- 5/ What if the non-lawyer got to set the trial duration within a range?

Inclusion trumps accuracy

We want 10x more lawsuits but we spend 10% of the time with each. Or maybe it is 5X, or 25X as many lawsuits.

There won't be any expert "judges"

Under the new system, there will only be Senators who probably never worked in the legal system before.

No shopping for judges

It is wrong the way politically charged cases are frequently shopped around to the various judges and prosecutors. Firstly, the decision to prosecute should be a

matter of one County Senate. And secondly, if a case is turned down by the County Senate, that is the end of the trail, unless the national Senate decides to prosecute.

Double Jeopardy

This clause in the US constitution wasn't about sentences. On the host side, it was about keeping the those in power from repeatedly trying people as a means of harassing them. But it's real reason to exist is that on the parasite's side it helped get bro's acquitted when everyone knew they were guilty.

Police videographers

These people go around to the witnesses at a crime scene recording the statements of witnesses, and the evidence the witnesses and officers show. They are armed, and all video is live recorded.

Spoken hearsay exemptions are no longer needed because

1/ Past sense impressions must be in writing, or video or audio recorded at the time to be valid. Spoken statements about spoken statements are never valid.

Also, regarding written impressions, they are only given credence because of their detail, regularity, and lack of inconsistency.

2/ What a gotcha society this rule fosters.

3/ If you witness an event, the event dialogue is admissible as part of one's first-hand testimony. However, if someone tells you they committed a crime, that is not admissible as evidence.

4/ Medical records system function, not hearsay.

5/ See #1 above.

6/ See #1 above.

7/ See #1 above.

8/ Recorder function, not hearsay.

9/ Recorder function, not hearsay.

10/ Recorder function, not hearsay.

11/ Recorder function, not hearsay.

12/ Recorder function, not hearsay.

13/ Recorder function, not hearsay.

14/ Recorder function, not hearsay.

15/ Recorder function, not hearsay.

16/ Not needed.

17/ Internet access, not needed.

18/ Published things are not spoken hearsay, but something recorded at the time. Things recorded at the time are not considered hearsay, however, they may still not be credible even though they are allowed.

19/ All wills must be recorded.

20/ Recorder function.

21/ People can vouch for one another in court. And this was never really hearsay.

22/ All court records, including pending matters from age 14 are always admissible. All public records are also admissible. And again, this was never really hearsay. And while the court system may seal the records of minors from the outside world, it may never seal this information from itself, or destroy this information.

23/ See #22 above.

The rules of hearsay add a great deal cognitive overhead to the legal system. But they add little to legal accuracy. In fact they make the legal system more a thing of hired guns who have mastered this abstruse subject. So let's scrap most of them and reinterpret the survivors into other parts of the legal code.

Also, as soon as the recorder system is up, all court admissible Written Records of Spoken Words WRSW must be made on the recorder's un-erasable boards to be valid. This CC's all parties and allows for reply statements. After this time, all WRSW must be on never-erase logging board. And while these WRSW files are admissible, they still should be doubted a bit.

What people say to others is not admissible ever. Telling somebody something in the past it's not evidence of anything in court. It may be grounds for a criminal investigation, but it should not stand as evidence in court.

Worthless distinctions

Why do we have judicial distinctions that only experts can understand and properly argue. Surely this sort of stuff was created by lawyers to help lawyers.

Unlawful detainer court rules

1/ Apartment managers and UD legal services may appear as principles.

2/ No lawyers in residential cases.

3/ Ones plaintiveness in UD matters does not affect one's overall plaintiveness rating.

UD protection side effects

I completely understand the reasons for having strict unlawful detainer (eviction) rules. I just think we should treat weekly rentals like hotels and not require any court procedure to evict the tenants.

1/ These eviction rules are very costly for the poorest part of society, and for those who have had a financial disaster. These people have a much harder time finding housing, except in bad neighborhoods. Landlords are afraid to rent to them because the UD rules can make it hard to get them out.

2/ At the bottom of society, many people are unable to find housing and become homeless partly as a knock-on result of unlawful detainer regulation costs.

3/ Landlords are much more reluctant to rent their places for short periods of time, and this is a huge cost to society. It is much of why tiny hotel rooms are so expensive.

No unlawful detainers here

Weekly rentals should be subject to the rules of hotels, i.e. the tenant may be evicted and ejected at any time by the landlord if they don't follow the rules or don't pay.

There should be some other areas that should be excluded from both court and the unlawful detainer process:

1/ Residential tenants documented having loud parties or playing loud media after 9pm.

2/ Tenants with certain high use alcohol or mafia drug licenses.

3/ Tenants caught on video intentionally damaging the property.

4/ Tenants without a written rental agreement.

5/ Roommate tenants that live in the same premises as the property owner.

Divorce adjudication

If the parties can agree, that rules. If the parties can't agree, then a public adjudicator looking at nothing but the assets and assessed values, together with their instructions and list of wanted items (in order) of each party splits the assets.

Divorce book-keepers not lawyers

The people dividing the assets should be inexpensive book-keepers, not expensive lawyers.

The one minute rule

The defendant must always be given the time to speak at all trials for at least one minutes for every year of potential sentence up to 20 minutes for life in prison, or death penalty charges.

Asbestos toxicity in talc

Before it was known that asbestos was toxic, it would be floating around at the density of rag weed's maximum in the asbestos mines and processing plants. In these places, workers would be pulling clumps or the stuff out of their mouths and noses. Asbestosis mostly comes from this sort of exposure level. The microscopic levels of asbestos exposure from talc would appear to be many thousands of times lower and of negligible risk.

The middle path for lawsuit payments

The parasite likes either extreme. On the "right", Ishtar is happy with the China-2020 & USA-1870 approach where people harmed by companies get nothing from the system. And on the "left", Ishtar is even happier with the \$80-million awards to people because they developed lymphoma after using a chemical that appears to be as

inert to mammal metabolisms as is say dish washing detergent.

Roundup Hypocrisy

Cigarettes kill 480,000 American a year. Of these about 15% of Americans die from second hand smoke, or about 72,000 people a year. How can we award people \$80-million for an unproven relationship that doesn't make sense to most organic chemists.

A corrupt Supreme Court

To see the corruption of the current US Supreme Court, simply look at the timing of the 1973 Roe vs. Wade decision, and how it preceded the 1973-77 Arab oil embargo by about 11 months. Regardless of how you stand on abortion, you must admit that this decision caused many more people to be more distracted by sex just before the oil embargo hit.

What do expensive lawyers have to do with justice? Aren't they a corruption of justice?

Political crimes and access to media

When people are imprisoned for crimes that have anything to do with government officials, or important people, or their crime is in the news, they shall never be deprived of their right to regularly communicate with members of the press for a reasonable time to fully explain their situation.

Honest services fraud

This is a pretty good example of a law that is so esoteric and so hard to understand that it should not exist.

No law dredging

If a law is only dredged up to jail people that police need to jail, then it cannot be enforced.

Biden's totally independent justice department

It won't even have a democratically elected person in charge.

The right to know what you are being arrested for

When police arrest a person, they don't have to name the section or even the law broken. They can do this at the station, later

<Prison by crime.jpg>

Fewer people in jail

In my new world, there are few drug offenders. And most of the weapons possession crimes will go away with realistic weapon carry laws. Also, few people will try to live as an illegal alien. So these are the top 3 groups in US prisons today. So we are going to cut the US prison populations by about 2/3. And then on top of this we will eliminate cash, and registering all our luxury goods. We will also license prostitution, and ending all the crimes

that people commit for drug money. This is because heroin addicts can just watch half a day of anti-drug propaganda to get their safe fix from Government. There is no reason to commit crimes for drug money. There will also be homeless dorms.

Ex-convict behavior

Ex-convicts should be walking on eggshells around seniors, kids, travelers, disabled people and the like

Internet in jail

In the work camps there will be internet for the inmates at after work time. But in the straight jails and prisons, there will be no cellular or internet service within range. Only jail communications may exist in this zone.

Prison time

It should not be awful due to violence and domination. It will be awful due to an intentionally exhaustive work and education schedule. Instead of being idle all day long and being conditioned by jailhouse life, prisoners will be busy all day long and have almost no time for their own thoughts. They should also be constantly reminded of how much money they would have if they were working this hard as a free worker.

Standard education pardons

- 1/ Those who have not completed high-school prior to their conviction shall get 5% off their sentence for completing their high-school equivalency test.
- 2/ Those who complete 14th grade get another 5% off their sentence.
- 3/ Those who complete 16th grade get another 5% off
- 4/ Those who get certified as a journeyman worker shall get 5% off their sentence.

Inmates should work long hours

- 1/ Their labor is a good revenue source. This money can be used to fund the corrections system and for restitutions and court costs.
- 2/ One's debt to society is literally paid in money while one lives as a prisoner and see almost none of the money.
- 3/ When inmates are released they'll have skills and be habituated to working long hours. Thus it will be easier to get a job than to go and commit more crime.
- 4/ If work camp inmates do their jobs well, exceptionally well, they'll get their own prison cell, and reduced work hours and more school hours. There's a couple levels below, then it's awful work, then it is prison cell lockup.

Honest democracy & prison labor

This is another area where having an incorrupt government is just so much better. It seems that we don't actually trust our current democracy, or republic, or whatever we are going to call it. So we have the secondary prohibition on prisoners working. But if we had

a believably honest democracy, we could put our prisoners to work.

Probation phones

- 1/ You must carry it at all times.
- 2/ It is constantly recording AV and can be monitored at any time.
- 3/ It tracks your location.
- 4/ You are not allowed to use other communication devices.
- 5/ It tells you (and your probation officer) when you are going somewhere you should not go, like drug dealer parks, kid zones, etc.
- 6/ Police and probation officers will drop by at random times to check on you.

Jail is supposed to get worse

It is supposed to get worse and worse each time you are in. You have to work longer and harder for less each time you go back.

Custody, dorms, work camp, jail, & prison

Custody rooms = a private room with a private bathroom and shower. There is a bed a desk, and a sofa. It is like a basement hotel suite that you can't leave.

Custody hostel = where one stays in a dorm but has the day free to walk around.

Work camp = where one stays in a dorm and works most or all of the day. 3,000 hours a year under lock-up.

Jail = the inmates do work and reconditioning 3,000 hours a year under lock-up

Prison = the inmates do work or reconditioning 3,500 hours a year under lock-up

Factory camp is ideal for

- Shoplifting
- Vandalism
- Petty assault
- Drug license violations

Urban homeless and work camp

Work camp is the perfect penalty for nuisance criminals like those who repeatedly:

- 1/ Use public areas as a toilet.
- 2/ Use public property to be drunk or high in.
- 3/ Frighten multiple people with ravings, or actions.
- 4/ Steal things of trifling value.
- 5/ Dig in people's private garbage
- 6/ Burn things outside in an urban environment.
- 7/ Get into trouble for tent living in a city center.

Prison conditions

- 1/ All prisoners shall wear location monitor tech.
- 2/ All prisoners shall live under continuous AV monitoring of their cells and all prison locations they occupy for their entire lock-up time.

3/ Prisoners shall be randomly blood tested for drugs, alcohol, and tobacco once every 100 days based on the last two digits of their prisoner number Those found to have any of these in their system shall be moved and their sentence extended.

4/ There shall be no religious or luxury food in prison. No beef or pork shall be served.

5/ No packaged foods, alcohol, tobacco or sweets shall be allowed in prison.

6/ There shall be no weight lifting or ball sports in prison.

7/ Prisoners 32 prisoners. each prisoner gets 15 minutes to use a the time-shared shower by themselves. They go by themselves and return by themselves.

What is the recidivism rate?

The studies use shorter periods of time like 4 to 10-years. The studies also don't include ex-convicts that learn from their prison time talks and don't get caught. So all the statistics on recidivism underestimate the true life-long recidivism numbers. Therefore the studies that show how say 64% of released prisoners get sent back, these are an underestimate and the true number is perhaps closer to 70% or perhaps 80%.

These numbers are of course for people trapped for years in a cell where they live a life of passivity and inactivity. If we habituate prisoners to long days of work. If we require that prisoners work outside the jail (but come right back after work) for the last 100 days, keeping all their money on a limited spending welfare card. If we give them a nest egg on this card from their years of 10% prison wages, they will certainly have a lower recidivism rate. Also, the prison and the half-way job should be very far away from where they are from. And they should do their parole in this new place as a sort of new person.

Non-criminal jail

There should be special prisons for apparently good people who are first offenders, who have no criminal relations but who commit crimes under accidental, poorly judged, quasi-self-defense, or extreme situations, like say Kyle Rittenhouse.

Inmates will lie to get out early

Surprise! inmates will learn to be actors and say absolutely anything to get out of jail. So the I-have-truly-changed interviews where the inmates repent their past life and say how much they have changed — These are a mostly a fantasy and a waste of time.

Good behavior early release should be robotic

How much lawyer and court time does the legal system waste on this thing that should be determined once and for all at sentencing? So as part of sentencing, the court should select one of 4-10 standard good behavior

matrixes, ABCDEFGHIJ. Then there are no parole hearings.

The Jail experience

Perhaps the juvenile courts should have the option to hand down short term stays. This is to demonstrate what all-waking-hours factory prison/ re-education life is about. It comes also perhaps with a 24-hour sample of dark solitary confinement.

Repeat offender multiplier

In addition to penalties for the current crime, repeat offenders might re-serve up to 50% of their prior sentences, all of them. Also, the multiplier might depend on the severity of the current crime.

Non-Citizens

Nations are natiois, places of birth

Why isn't the workers party saying Less immigration and more jobs for workers?

The Democrats should oppose immigration because it undermines wages. But today, they demand even unchecked illegal immigration. Why?

People will tolerate more immigration if it is properly vetted.

Welfare for illegals = buying constituents

Voting rights and immigrants

Foreigners in our democracy

Non-citizens who vote or attend our protests shall spend 10-years in a work camp paying for their keep. If the foreigners are helping to organize or support a protest, then this shall be considered an act of espionage.

Citizenship qualification

The citizenship test

1/ When a foreigner becomes a naturalized voting citizen, it is supposed to mean that they are as good or better than the average person who grew up in our nation. It is not supposed to be easy for a foreigner to become a citizen and such a thing should be seen by all as a badge of honor.

2/ The citizenship test shall have 20,000 potential questions, of which 200 shall be randomly selected for each person taking the test. No electronics, or study material, or notes, or dictionaries, or translators.

3/ Composition of the citizenship test:

20% Economics and how our economy works.

20% How our democracy works.

20% National values and customs.

20% Tactics of freedom's enemy.

20% Vocabulary in the national language.

People should be denied immigration when:

- 1/ They have not finished high school.
- 2/ They follow an unwelcome ideology.
- 3/ They are under-skilled to earn a living.
- 4/ They have a history of giving.

These are not refugees

Refugees are people fleeing for their life from natural disasters and war. The following groups should have no right to claim refugee status:

- 1) Ordinary criminals fleeing the law or simply wanting to make a new start.
- 2) Those fleeing economic hardship.
- 3) Those fleeing community persecution for being a sexual deviant, or being disabled, or being discriminated against.

Language & migration

When you migrate you must learn your new language and continue to progress in your new language (or Euemi) until you have mastered the language.

You take their customs

When you migrate, you must give the new ways primacy. You can only practice your old country's ways if there is no conflict in the two ways.

You are the guest

When you migrate, you must never push your hosts except when they are clearly and certainly wrong in a serious matter.

The number of children

This might be another criteria for deciding if illegals can stay. I think 6, 5, and probably even 4 kids represent an alien culture, and one that threatens to take over numerically in our democracy.

It isn't that bad

When people are sent back to where they emigrated from. It happens to people all the time.

Non citizens and crime

Non-citizens and Mafia drugs

- 1/ There shall be no licenses issued for non-citizens to take methamphetamine, opiates, or certain other recreational drugs. Nobody needs this.
- 2/ Foreigners shall not be allowed to consume more than 4 drinks a day on average over their trip, or more than 8 drinks in one day.
- 3/ Foreigners may not smoke more than one pack a day while they are in our nation.

Voter fraud and illegal aliens

Encouraging non-citizens to vote is a form of voter fraud. This is so even for lawmakers.

Dreamers policy articulated

Nearly everyone agrees that the hard working and college bound kids should stay and the lazy good for nothings should get the boot. Simple. The only problem is where the line goes. The Right wants to send more of the lazy problem kids back. The Left wants all the constituency it can get.

Senate service and multiple nationalities

I see lots of people going from the richer parts of the world to the poor parts because they will have a better chance at making it into the Senate. These should still be able to keep their original citizenship, and have a partial secondary citizenship in the nation that they made Senator in. Even though they remain a citizen of the original country, they will still be treated as a citizen in the nation that adopted them as a Senator. In other words, we make an exception for Senators to the

Double luxury taxation

Those who bring luxury goods across international borders may be subject to double luxury taxation or re-export bond upon each entry. This does not apply to engagement and marriage rings weighing in combination less than 10g and having stones under 0.1g in total weight.

International travel and visas app

When you get your "State Department" passport app. You can select up to 3 nations from a list for a charge of 2 hour's pay each. The state department then notifies each nation that you will be visiting, and that you continue to maintain say your class C visitor status. This means that you have over "4-year's" wages in assets. (D = over 1-year, B = over 9-years, and A= over 16-years, whatever a year is). The state department also gives the applicant nation access to your background info page to see that you have no known criminal problems. After a while, the other nation sends you a visa/invitation via the app. Depending on your visitor class, you are governed by different visa guidelines.

Must declare all names

All immigration checkpoints shall ask all incoming persons to list all names they have used and all nations that they have been a citizen of and to declare under penalty of perjury that this is a complete list.

The slaves of Islam

These will all be charming model citizens for the rest of their lives. All of them will consider this to be a key part of their new struggle, a struggle plan that everyone can see will actually work and bring the ancient struggle to a genuine conclusion.

Global citizens

I think the Main-Senators and Over-Senators of all nations should be allowed to visit all nations without a visa. Also, it is sort of irresponsible if they come from a poor nation and they leave after becoming a Main-Senator. This is not supposed to happen.

No illegals = no more housing bubble

It's not a concentration camp if you can leave and go back.

The lesson of Athens and Sparta

Look at where Athens is. It is just outside the "border" of the Peloponnese and Sparta. So this city fed on the prosperity of Sparta until it outgrew Sparta and ultimately dominated Sparta. Now look at the unsafe border towns of the US Mexico border.

Mexico entry permits

Perhaps we have a temporary system where people driving in from Mexico who are not US citizens must go to entry.state.gov and enter their data, their passenger's data, and their vehicle's data. Then they must pay the current entry fee. Then they are given a bar-code/QR-code PDF that they can print or display on a screen. Then they show this to the agent upon crossing. Cars and trucks are charged at a higher rate because they take more time to inspect. Also, with this system, we can tax entries with money and easily phase out most border crossings.

Illegal immigration must be stopped

1/ It is necessary for the achievement of a world-wide eutopia that we figure out how to optimally run a developed economy. The thing is we can't do this with hoards of illegals flooding in to take advantage of the free hand-outs.

2/ We reward hard work worldwide by rewarding it in our immigration policy. Let's only let hard working people come and work.

We can easily secure the border.

Two 8-ft tilt-up concrete walls and a mine field in between will do that. But can we do it a better way?

The cost of US border forces

There are currently about 17,000 people working to secure the US/Mexico border. If we build a wall and can

cut 12,000 of them (@\$70,000/year each fully burdened with management costs, offices, vehicles, etc.), This comes to \$900-million per year for 3,145km. This is \$286,000 per kilometer, or \$286 per lineal meter of border each year that we are paying each year mostly because we don't have a wall. And not only that, but our border patrol system is clearly not effective.

The advantages of buffer zones

- 1/ Jump drones are harder to use.
- 2/ No "tunneled" goods.
- 3/ They have to carry the ladder to the second wall.

Mexico border crossings

1/ It shall be the official policy of the US government to phase out all the communities in Mexico directly on the US border. This shall be accomplished by:

- a/ Expensive crossing fees.
- b/ Dialing down and deleting the water we supply to these communities.
- c/ Requiring that people check in at a station 200-km outside the US before entering the US by land from Mexico.

2/ The immediate plan is to consolidate border crossings to nine points at: San Ysidro, Otay, Tecate, Mexicali, Yuma, Nogales, El Paso, Laredo, and McAllen. The other crossings like Del Rio shall be closed. The immediate plan also includes fees and long wait times that make commuting impossible.

3/ The eventual plan is to phase-out trans border automobile traffic and to push all freight into 5 truck/train crossings near Nogales, El Paso, Laredo, Mc Allen, and Matamoros.

4/ Eventually the border will be closed to pedestrians and automobile traffic. Then everyone will either be required to fly or take the train to and from and from Mexico. And if they are entering or leaving the US, that must be from a point in Mexico that is more than 200-kem from the border like how Chihuahua, Hermosillo, and Monterrey are this distance away.

US-side maquiladora zone

The initial US-side border Maquiladora areas will go in two locations near McAllen and El Paso:

1/ McAllen maquiladora zone: The southern parts of Texas, south Falcon state park (on Lago Falcon). There will be only two roads connecting this area with the north: US Hwy. 77 and US Hwy 281. Thus there are only two border crossings and two access points. The area between Falfurrias TX and Linn TX is 41 miles, and this shall become a restricted area with all roads moving roughly east/west and connecting to the two very-well-secured highways, and all the existing north/south roads (paved or dirt) will be made inaccessible to vehicles by means of road-crossing trenches every ~1,000' and several east/west fences.

2/ El Paso maquiladora zone: The second US-side maquiladora zone will be all portions of Texas west of Fort Hancock Texas. This second zone will also include all portions of New Mexico state that are east of Fox peak and south of Texas' northern border at El Paso. Also, where the El Paso maquiladora zone is adjacent to the state of New Mexico, the southern 7-miles of New Mexico shall be included.

A safe maquiladora zone

Because of the US immigration and customs checkpoints on both sides, and advance notice shipping manifests, the border **maquiladora zone** will be quite safe. There will be tracking devices on all vehicles entering this area. All the workers will likewise be required to carry a track-phone at all times.

Parallel roads near the border

The vehicle access to the border zone should be via roads that are roughly parallel to the border. There are few roads perpendicular to the border with checkpoints that feed these border-parallel roads. This design give the border guards the ability to access the entire border zone quickly, but slows down people trying to get away from the border.

The border maze

1/ Which would you rather do? Walk 125m to the end of a fence and 125m back, or climb an 8' (2.4m) chain link fence with a couple sharp and floppy concertina wires on top. Everyone just goes around. It isn't worth the risk, and it also isn't really worth cutting the heavy gauge chain link with alarm sensors. And these fences are cheap, cheap cheap. And easy to repair. So let's have 250m long segments of fence with 10m gaps, one after another along the border. And let's layer these, offset, like courses of bricks, one after another. So to get from one segment to the next one must walk 250m. And let's position these (6m) apart, so nobody can bridge the tops and so the field sensors will still work. So in order to move 6m away from the border, one must walk 125m laterally. To walk 60m away from the border, one must walk 1.25km laterally. To walk 600m away from the border, one must walk 12.5km laterally. To walk 1.8km from the border one must walk 37.5km laterally.

2/ The compression of space-time in one dimension makes the area much easier to monitor and respond to.

3/ Maybe we also break up the surface of the ground up so it is hard to walk on.

4/ We should probably have lots of bilingual signs up telling people that there is triple jail time for entering where there is damaged fence or holes are dug under the fence.

5/ At each end of each "maze" there is a much taller wall that cannot be scaled without equipment that must be carried through the maze.

6/ It is important to realize that that the most expensive part of border protection is the people. Even the expensive Trump wall pays itself back rapidly in terms of ICE wages saved.

7/ There are two roads for border guards: one between the Trump wall and the maze and the other road on the inside the maze. These roads move parallel to the border and give no benefit to illegals.

8/ The maze isn't hard to figure out, but time consuming to get through.

Fence mazes the easy way

Much like a temporary construction fence, they mount to a round steel pipe driven or drilled/cemented into the ground. This has a T-caps that are tack welded in place after the panels are lowered. Also, the areas under the fences might have irrigated cactus growing to deter digging and sliding under

El Centro California border protections

Between El Centro and Calexico there is about a 3-mile zone where there is no building. Here we erect a border wall and up to 16 fences between the fields. Then the only way in or out is via highway-111 and highway-7) south of Highway-8,

Border areas that shall be ceded to Mexico Or made into maquiladora zones

| Border area | Percent hispanic |
|--------------------|-------------------------|
| Calexico | 98% |
| Nogales | 95% |
| El Paso | 85% |
| Del rio | 86% |
| Eagle Pass | 95% |
| Laredo | 96% |
| Zapata | 85% |
| Starr county | 96% |
| Hidalgo county | 92% |
| Cameron county | 90% |
| Willacy county | 88% |

The 40-mile border zone

There shall be a 10 to 40-mile-wide double border zone with a double border along all portions of the Mexican border except for two parts:

1/ The exception in the east is where the 40-mile border zone will be larger and include all portions south of Bluntzer Tx (Corpus Christi).

2/ The exception in the west is where the the 50-mile border zone will be smaller. In San Diego, the double border zone will be the portions south of the Otay river and Lower Otay lake. Then Otay Lakes road. Then Honey

Springs road. Then Lyon's Valley road. Then Japatul Valley road. Then Highway 8 east.

A place for refugees

Maybe we should look at our border zone as another place to house refugees and put them to work.

Maybe this wasteland is where America's high-paying, hard-working, work-and-leave foreign-worker factory-towns go. Maybe we let people come here from other parts of the world to work under contract, like Singapore does.

Unskilled worker programs

We share our ways most by sending people back. One 50-year worker shares little of America with his countrymen. Ten 5-year guest workers will allow us to touch so many more foreigners. And maybe the best is to touch 50 times as many foreigners with 1-year guest worker programs.

Just imagine a world where the people from the poorest nations could participate in a worldwide guest worker program, becoming cosmopolitan, and then going back home and help develop their home land.

Mexico doesn't care about El Norte

The Mexicans regard their northern border rather like how Americans regard Detroit. And the whole narco trafficking thing, while good for the economy is, causing way too many murders. And that is obviously a thing of the border. So Mexico has problems with El Norte and mostly it would welcome the imposition of solutions that would work.

Mexico is made of glass in matters of border security

All the US has to do is throttle either remittances or border traffic. So whatever way the US wants to remake the border and the relatively uninhabited desert parts of northern Mexico, that is how it will be if the US truly decides.

The long term US Mexico border plan

- 1/ Close the land border to traffic that is not rail based.
- 2/ Only allow people to come into the US if they started their trip more than 200 miles from the border.
- 3/ Eliminate all the border towns.
- 4/ Make sure that all Mexican roads within 200 miles of the border run parallel to the border except for the feeder roads which all have 24 hour roadblocks.

A corrupt Supreme Court:

The 14th amendment totally misconstrued

[The US Civil War ended in April-1865, and the 14th amendment was passed in June-1866. Reading the 14th amendment, one clearly sees a nation trying to force the

defeated South give full rights to the former slaves. This was a hugely important thing for America, a thing that that took over a century to actually get underway.

The 14th Amendment is all about the wake of the Civil War and only about the Civil War:

Section 1: Makes the former slaves citizens.

Section 2: Gives the vote to former slaves.

Section 3: Bans rebels (Confederate people) from serving in government.

Section 4: Guarantees the Union debt and defaults on the Confederate debt.

Now Section 1 of the 14th amendment says:]

"All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

[So here is an amendment was totally about the end of slavery, an amendment that had absolutely nothing to do with the children of illegal immigrants.]

Slave talk = slave culture?

That "you-is", "i-is", "we-is" sort of black language was how slaves were taught English. It is a simplified slave-speak that the owners used on their new African slaves that spoke various languages on arrival. After emancipation, the slave language remained and slave culture remained among many. And it remains today still, as "black speak" in its various mutations. Here I would suggest are cultural and mental pathways of slavery and resistance to domination. So, I ask: Is this a heritage that should be preserved, or is it a heritage that should be extensively altered?

Slave talk

Evil spirits can be killed by mirrors and the look-at-yourself, self-awareness they imply. Another way to kill an evil spirit is to call it by its true name. This is another way to impart look-at-yourself, self-awareness. So maybe we should use the term "Slave talk" instead of black talk.

BRV = Black resistance virus

The African-American slaves didn't even have to tell each other to resist their owners. And after that, when they were "free", but poor and heavily discriminated-against, they naturally resisted the dominant culture and "the man". You need to put this aside now, it is getting in the way of your equality.

No black only colleges

These schools are totally racist and segregationist and should be ended. There can be female-only schools, but there shall be no male-only schools, and no schools that

are restricted to one race. I mean, just imagine if there were white-only colleges again.

Stop the hate

Your slave ancestors unquestionably suffered a great injustice, all of them. But no more hate. Let it go.

You don't get to hate back

If you want to liberate your people you just ask the question: "What would Gandhi do?" Would Gandhi hate back?

What sliver of equality are you trying to wring out of the system now?

The slave spirit can never be reformed

It will only die when it is forgotten. Just abandon it. That is the best course.

Giving money to other nations

Never give money to tyrannies or avowed enemies as it strengthens them and weakens us.

Clarification on Illegal immigrant injuries

The injured workers get as much as they would back home. If this is nothing, then they they receive nothing. Also, to dis-incentivize hiring illegals because the payouts are less, the Employer pays as much as he would for a legal worker and government keeps the difference.

What do we owe them?

The migrant tax cheats... We don't owe them anything.

Converting illegal workers to legal workers

Let's say that 30 million out of our nation's 330 million people are illegals. That is 10%. And certainly these people are low wage people. And some do pay taxes. But maybe they are costing the US 5% in cheated taxes, and maybe they are costing the US 5% in wrongly paid benefits to foreigners.

Now this one thing isn't going to solve all our budgetary problems. But it will improve our government budget situation substantially if these numbers are correct.

Great profits from this Immigration trade

Sell: Non-tax paying, unskilled, under-class illegals with no background checks that stay and breed a permanent underclass ruining the land of the free.

Buy: Tax-paying temporary semi-skilled and skilled workers with thorough background checks that go home and spread our American ways. Also, the government allows say 10% of these to stay longer than say 2-years as path-to-citizenship workers if they find employer sponsorship (this can be different employers) for another 8-years.

Social security fraud for illegals

When illegals workers use another person's ID to get around the government's controls on illegal workers they should go to work camp for immigration fraud and illegal immigration.

Remittances

1/ None of these companies may accept US funds from accounts not tied to social security or whatever national worker ID number we will use.
2/ All remittances are subject to withholding while the tax office verifies the sender's information.

Sex, Babies, Porn

Children

How to have 3-to-4 only-children

The mother has #1 at ~18, #2 at ~27, and #3 at ~36. Or perhaps it is #1 at ~20, #2 at ~29, and #3 at ~37. This is how to breed a society right. To my mind, the father aspect is much less important to the kid than the single-minded focus of the mother.

More babies, less romance

Let's pull all the Cinderella media like we pull all the Dear Wendy media from circulation. And it is not that society wants to say "go home with prince charming the night you meet him". It is just that nobody has any right to say things to young people about this subject. But out. And keep your dysgenic kids propaganda to yourself.

Is this life the end of it for you?

Or will you have children and live on as a line?

If one child isn't enough

Good. Then the right to have more than one child was a valuable thing and perhaps a thing that will motivate women to get an education or make it into the Senate or to achieve Ubiq status.

Breeding propaganda doesn't work on the mindless.

There is a large part of the population that is incapable of controlling reproduction. Whatever propaganda you run, it will only work on people capable of thought. It will not work on the idiocracy people. So all the anti-breeding matrix propaganda only plays on the better elements of mankind.

Stop starving the females

What a thing it is that we have this world infidel culture where all the "model women" in the media, the ones portrayed as attractive all have bodies that are thinner than 90% of women. This has the effect of:
1/ Making all the women err on the side of not eating and all become less fertile as a result.

- 2/ Many women don't want to reproduce because it will ruin their figure.
- 3/ Many women feel terrible about their bodies and are too ashamed to get intimate.
- 4/ All of this only really works well on the smarter women.

The morality of cloning

- 1/ I will not say that cloning people is immoral and should be stopped.
- 2/ I do think it is immoral to clone people for post birth tissue harvesting. However I find no problem with either growing an organ in a lab, or in a livestock animal that must be killed to harvest the organ.
- 3/ Cloning is new and there are many gray areas due to insufficient information.
- 4/ Cloning males offers no genetic advantage to the species.

Sex has no place

- 1/ Society and government should be 1,000 times more concerned with having smart babies than sex. Having smart babies is critically important to the future of a society, sex will be quickly forgotten.
- 2/ The legal sexual activities of your leaders are meaningless. Even their gray area transgressions are meaningless and should be off limits to prying eyes.
- 3/ Free speech does not include the right to stand up and talk about sex with people who don't want to listen to you talk about sex.

Sex vs. kids

Temporary pleasures vs. eternity.

The females we should really listen to

They are the ones that are complaining about being married off against their wishes. These are the women that society should have the keenest ear for. This is vastly more enduring than crime of groping.

How old is old enough?

Today, it is legal for a 16-year old boy to begin taking hormones because he is in his mind female rather than male. So why is it not legal to harvest a female's super strong and super numerous eggs when she is 16? Why must she wait until she is 18? What if she identifies as having many offspring. Why isn't it allowed for her to start living her sexual identity at 16 as well? What if she wants to sell her 16-year old fresh eggs which are highly in demand because she is one of the 5% most progressive girls academically. Do we let her sell her eggs? Do we let her keep the money? What if the girl is already married and with a child.

Sex in the City

All the media glamor of the single life, all the fashion and standing out, all the make up and lipstick and flirting. All of that is fostered by the enemies of freedom to make the

land of the free easier to subjugate and extract money from. None of it is real. It is all the de•ex•pull trying to make money harming infidels.

Sexual morality

- 1/ It has nothing to do with god, except the part where women pick the best men to reproduce with.
- 2/ Fake notions of sexual morality distract us from the other real aspects of morality.

S•odom and Gamorah

S•hod•an = Not•road•rebirth

G•an•ora = Big•rebirth•mouth

One daughter augurs towards idiocracy, the other augurs towards the elevation of mankind. Sodom is the idiocracy girl. She as she pleases with HER life, following her emotions and living for her life alone. Gamora, the "good" daughter thinks about her future and the future of her line.

So this valuable eugenic meme, this bit of useful advice was in the original good book, but all we have in the Bible today is a bunch of junk that more than anything else hides the nature of this story. We are told that Sodom and Gamorah are towns where pervy events took place. Totally reified over and over again in the media. And why should we think this from the text? Then we have this incest porn which seems to be hiding something about two daughters. And how did this chapter get so much longer than the rest if not by extra text added later.

And perhaps more important than the rest, I say: behold how much your word of god has been garbled and adulterated by the de•ex•pull spirit of the world. And behold what is your word of god, but the world's dirtiest secret.

Reducing child abductions

- 1/ What if we said that all kids had to be registered and that it was a misdemeanor to house an unregistered minor under age 16 that is even visiting overnight.
- 2/ What if neighbors could go to kids.gov and look up their address and see the ages of the kids in their neighborhood or on their floor. Then it will be much harder to hide abducted kids.
- 3/ If we issued family ID cards for each kid, with photos of parents and guardians. Maybe we require these to check into a hotel. Also during traffic stops the officers may verify that the kids are authorized. Surely over 95% of parents will welcome this, and see the value of this.

Preventing international abductions

Each person leaving the nation and old enough to answer questions shall be required to appear by themselves before an immigration official, where they will have two side by side buttons on the left is the button that says: "I want to

leave the nation" and on the right is another button which says "I do not want to leave the US, please help me".

Kid phones

The Senate shall develop kid phones for kids. This is their education and social media platform, and it allows the parents to interrupt and shut down except during class time, when the teacher can do this. It has all these interesting feeds pre-programmed into it.

ID cards for kids

Kids will all have ID cards on their phones, their picture, and both parents listed on the ID card, as well as other people authorized to pick up. There is also a system for temporary authorizations. This includes school enrollments, field trip authorizations, international travel authorizations. For all international travel, both parents must agree and access their accounts and authorize the travel. This unless they are both present when the minor is leaving the nation.

Cloth diapers should be prohibited as unsanitary and a public nuisance

Diaper recycling

Moisture absorbent material + fertilizer mixed into soil and aged for say a year or two. This is perhaps a particular type of amending soil produced by township utility plants. The diapers gets shredded into 4mm ribbons that help keep the soil together.

In all polygamous marriages where one man marries multiple women, the women shall be considered divorced upon filing a signed certificate of divorce with the recorder. Likewise in all polygamous marriages where one woman marries multiple men, the men shall be considered immediately divorced upon filing a signed certificate of divorce with the recorder. Where there are both multiple men and multiple women in a marriage, both men and women shall have this right of immediate divorce. In all such cases of immediate divorce, the departing spouse keeps only their separate accounts, clothing, and other personal property (personal property not brought and shared with the communal house). Also, if the departing spouse is female, she of course gets sole custody of her children, with typical visitation rights for the genetic father only. This is intended to apply worldwide.

Wedding day myth

Women should not wrap their identity around this day. Your children should matter more than your partner and your relationship with him.

Wedding dresses

It is crazy that there are all these fancy dresses out there that are worn once and never again, but saved forever.

Of stick-carrying protohumans & sexism

Well over 90% of human evolution (since the dawn of the stick carrier instinct) was in this reality where the males went out with their sticks and drove predators off their prey. Then later they built chutes and set up ambushes, and later used spears. And at the same time, the females stayed back and had babies with the males that brought home the meat (the bacon=say•con). Where females went out hunting, these lines tended not to survive as well as the other lines. And where the males stayed back, they probably lacked meat to trade for sex and their lines died out. So we have this dimorphic species where the males have large T-shaped bodies with long muscular arms for wielding sticks and clubs. Meanwhile the females are generally much smaller and have much much smaller arms and shoulders. They are most legs hips & belly. Clearly, our males are specialized for wielding sticks, and our females are specialized for reproduction. Also clearly, females are in general much less able to fight than males. They also seem under-equipped in tactical ways judging from chess abilities.

Women as leaders

I worship timocracy (rule by merit) and the truth. So when I see how only 37 of 1721 chess grandmasters are women (2.1%), that is a data point to me — and a very compelling one. And it says two things: That most of our true leaders are going to be men, and a few women are going to make it among the top thinkers of the world.

We must assume that the "Grandmaster rate" is probably an accurate ratio for tactical and military leadership, and perhaps for engineering and for similar male dominated activities. Outside of this type of field/subject, the imbalance will certainly not be so great. However it will still be great in these fields.

Women leading your military

This is unwise given that only 2% of chess grandmasters are females.

New-feminism

- 1/ Females have equal rights under the law.
- 2/ Females have an equal right to own property and no female shall belong to anyone else.
- 3/ Females have the right to vote.
- 4/ Females shall be treated equally at school.
- 5/ Females have the right to equal treatment at work where they are actually equal.
- 6/ All females are free to choose a Senate sire.
- 7/ Females are free to manage their own pregnancies as they see fit until their unborn child is viable outside their body at around the third trimester. After this, there must be a reasonable medical reason to abort the pregnancy such as anoxia, early labor or a health risk to the mother or child.

8/ A conforming number of children will be supported by the public dole so females can be free to choose a mate without concern for economic support.

9/ Females can take a reasonable amount of time off work to have children. This should be seen as one of the most important aspects of a nation being rich. This right however is not the right to return to the exact same job, but the right to return to another equal job, and to have a legitimate long-term leave from work.

10/ Neo-feminism is primarily for reproductive women, and not about lesbianism or transsexualism.

Gender pay equality

I don't believe in it. Women are physically weaker, and where they must use their minds, they tend to be somewhat disabled with regard to math, engineering, and permutational/ tactical thinking of the sort used in chess. They also tend to have shorter careers because they tend to have children and put their careers on hold.

Sexual consent and rape

Sex offenders

Group 1: Inappropriate touching, groping and non-violent date rapists.

Group 2: Violent rapists people with violent sex convictions.

Group 3: Child molesters

Unless they are repeat offenders, there should be no notification requirements for the first group. These may also not be required to live in an isolated community as the other groups.

Touching your kid's friends

Step-kids, girlfriend's kids, whatever. If the person is under 21, then the parent role person is not supposed to touch the kid ever, in any way. The same with teachers. They are never supposed to touch the kids unless it is to break up a fight between kids, or to keep the kids from harming themselves.

A gradation for sex crimes

I just read about the Perilloux case where a judge was sentenced to 14 years in prison for giving two of his daughter's 14-year old friends unwanted back rubs, and rubbing sunscreen on the back of another of her friends. This penalty is excessive. This man should lose his judgeship and maybe do some community service. That is enough.

Gang rape or consensual sex?

When multiple people take turns or simultaneously have sex with one person who is not a registered prostitute, or advertised swinger, consent must be explicit, and the burden of proof shall be on the gang to provide proof of consent if accused. To prevent issues of coerced consent, the consent must be at least 48 hours in advance. Very

convincing sober-looking AV statements will work too, but these are perhaps subject to claims of coercion if they are not totally believable. Without explicit consent, the gang will be totally at the mercy of the person they all had sex with to not claim gang rape.

https://www.youtube.com/watch?v=7MFJ7ie_yGU

Baby its cold outside film 1949

1/ Certainly this behavior was not considered assault or rape in vastly more prudish 1949 America. Now people are asking if this is criminal behavior given the #Metoo climate.

2/ Is Ricardo Montalban using force? He is certainly holding the woman 10 times at 0:29, 0:33, 0:35, 1:18, 1:32, 1:37, 1:41, 1:54, 2:22, and 2:26. But he is gently holding her, and he is not using his superior male strength to restrain her. In fact, she is able to easily get away every time.

3/ This behavior was a part of the courtship in the film, because the woman eventually stopped objecting.

4/ In this film, no did not mean no, and the woman eventually gave in.

5/ If we look at the animal kingdom (pigeons, dogs, cats, etc.) no often mean try again, as we see here. In fact this clip is quite reminiscent of the way pigeons mate.

6/ In many mating situations, no does not always mean no.

7/ To my mind, this clip is valuable because it is pretty close to the edge, but it is definitely not sexual assault for people who willingly went to a private place together.

8/ When did society change the rules? What notice did it give that the rules have changed? What are the new rules exactly?

9/ Someone should make a show where there are a few 3-minute examples of what is definitely sexual assault, and a few 3-minute examples of what is definitely not sexual assault.

10/ When does aggressive begging become robbery under threat of force? Where do we draw the line? Where do we draw the line with regard to persuading for sex vs. sexual assault.

11/ "Say what's in this drink" is sarcastic, and a reference to liquor (of course) being added to the soda or canned juice. It was not about date rape drugs. It was about an already-interested seldom-drinker given a 2X-4X drink in a tall glass of juice.

12/ Her lines: "well, maybe a half a drink more" and "maybe just a cigarette more" do not fit with assault. In fact, it says that all the prior behavior was acceptable to her and not over the line.

A presumption of sex trafficking

1/ Being found in possession of the travel documents of multiple unrelated young women in certain contexts should be enough to convict for sex trafficking.

2/ There should be a presumption of sex trafficking when prostitutes work in brothels and no presumption when

they work outside in an apparently free environment with no taxi or tout intervention. Also there should be severe penalties for brothels customers, but no penalty for customers of prostitutes with government licenses working in secured markets.

Breakfast at Tiffanies

It is a euphemism for prostitution

Licensing prostitutes shuts-down sex trafficking. It also shuts down husbands visiting prostitutes because their wives will be able to see this on thier husband's record if they check.

Taxi mafias and sex trafficking

Don't they support virtual brothels?

Massage businesses

All massage businesses must:

- 1/ Be in a shared room of over 100-sqm.
- 2/ Have glass on at least one side in plain view of a public area, and with no window coverings or screens or curtains of any sort between the outside and the massage areas.
- 3/ There may be no toilets or hidden areas inside a massage establishment. All toilets must be outside of the establishment.
- 4/ The outside area must have a base level of foot traffic to keep the massage place honest.
- 5/ If these conditions are not met, the location should be considered a brothel under the law.
- 6/ No massage place may touch the bikini area or genitals.
- 7/ Legitimate massage is therapeutic and should not be discouraged by society.
- 8/ Recorder video is required inside all massage businesses.

Booty girls

The sex partners of criminals that receive any booty and know that their benefactor boyfriend is a criminal... These are seen as both receiving stolen merchandise and being an unregistered prostitute catering to criminals.

Pornography

Porn categories

level-1 porn: no clear picture of the genitals or bikini area other than public hair. Hair pieces will be common, particularly among the men.

level-2 porn: nude people solo with nobody else and no other people or touching genitals.

level-3 porn: heterosexual sex involving no more than two people, both documented to be over age 21. There is no contact with the anus in this category.

level-4porn: all other legal porn.

level-5porn: illegal subject matter such as rape, bondage, violence, coercion, sex with animals, incest, etc.

2/ To reduce exploitation, Government shall certify pornography as It shall be a crime to distribute unregistered porn. Registered porn will never get the possessor into trouble with the law, but unregistered porn might.

Registered porn

1/ Some people want to be porn stars and want others want to look at them. Who are we to say that they can not do this?

2/ All porn actors must be licensed by a recorder's office. They must go alone and verify identity, age and that they have completed the online porn licensing course. They also have to have a prostitutes license which requires 1,000 hours of legitimate work. Then the recorder's office issues a license.

3/ All actors must go alone to a recorder's office and sign off that they allow their sexual images to be published freely. They must also provide a urine sample that tests negative for opiates, cocaine and methamphetamine.

4/ All registered porn must be reviewed and assigned a level.

5/ There will be registered porn which is completely safe under the law, and unregistered porn which is not safe and most people will not go near. This includes including secret recordings, private pictures, celebrity fakes, grabs of single-view sexts, violence, and last but not least underage subjects. So we can't eliminate these problems, but we can greatly marginalize them, and reduce them if we run the distribution system.

6/ Unregistered porn shared between the parties involved in the filming shall be exempt from porn registration.

7/ Fictional citizens and server farms may not display or permit the display of unregistered porn.

Sending porn to others

This is allowed if the other person requests it. It can be the crime of public exposure if it was not asked for, and especially if the intent was to shock. Nude pictures sent voluntarily to one person have no protections under the law if subsequently shared. The sharer may be

Gays

The Gay pride flag

This should also be considered the flag of abused freedom, the flag of false "Greek love" to help dissolve infidel society. This is the flag of the the homos of ancient Greece and Rome, part of the reason these free civilizations failed. That is what the Gay pride flag is.

Straight males matter more

Sexual freedom for hereto males leads to the better males having more kids. Thus the next generation is better. Sexual freedom for homo males takes the better males out of circulation and these tend to have fewer kids. Thus the next generation is worse.

It is curious the way the media presents it as fine to be promiscuous and homo, but if you are promiscuous and hetero, that is something sort of exploitive or shameful, or perverted, or bad. This is the opposite of the way the world should work. Men with many children should be considered the richest and the most veni•rated.

Homos and the next generation

To the extent they are a total homo, their line will die out. This is why Homosexuality should never be encouraged by society. It can be tolerated, but it shall never be encouraged in any way.

Boys are not born homos

This assertion is proven by how gay men tend to be better looking by birth. Clearly the better looking ones are getting picked (interesting word intersection here) by males who are hungrier for sex than females. They can go either way, but they get first-experienced by a male and then go that way for life. Perhaps society should say that whatever the sexual orientation you think you are, your first experience should be with someone of the opposite sex, and that you are just making yourself gay and miserable to have your first sex with someone of the same sex.

Queer defined

It is the funniest thing the way there is the Q in LGBTQ and nobody knows exactly what queer means. Well, once upon a time there were tarts, which were excessively flirty women. Excessively flirty men were called queers. This is someone that is excessively and offensively friendly in a homosexual way. It sort of has a very pungent smell like spoiled food. To me, there is no right of homos to get in other people's faces with their life choices. Also there is no right to trick people and make other people uncomfortable by dressing as a person of the other sex. So I think that this group should go back to being LGB and no longer use LGBTQ.

Pervology

Pervology is a much truer and more accurate name for gender studies — a field which is concerned with little more than elevating society corroding perversions, and filling young people's minds with worthless garbage programming that will weaken our proposition of freedom.

gay = promiscuousness

If we tolerate gay men, we tolerate very promiscuous sex, because that is a big part of what being gay is about.

Not pro-gay

Gays will be free to live their lives, but:

1/ Government and all the nation's fictional citizens shall be prohibited from doing anything that fosters or normalizes homosexuality in any way, particularly with people under age 21.

2/ There can be no pro-gay political organizations or advertising.

3/ Homosexuality is something tolerated by government, and something protected by the criminal law system. However, there is no right to be openly gay in front of children.

Gay pride

What a manipulative matrix term this is. It is actually doublespeak about gay shame.

Thumbs-men

They are brought to power because the people bringing them up all have dossiers of pre-dirt on them.

Warren Hurst, State congressman 2019

"We got a queer runnin for president"

Transexuals

CNN.com 2019.12.20

"[Trans people are facing huge levels of abuse and discrimination with one in eight having been attacked while at work in the last year.](#)" [It's dangerous work because the transexuals are "tricking" males and having sex with them for money as if they were a female prostitute. The victim males quite often become enraged when they discover that the person they had sex with was actually another male altered to look like a female.]

Madeleine Kearns on men using women's bathrooms

"[While some men presenting as women are benign and sincere, others are malign and predatorial.](#)" [All ladyboys seem malign and predatorial to me. They spend their lives "tricking" men for money.]

What time of the day transexual go out

In Thailand, ladyboys are most common between midnight and 5am. In fact, as the normal population falls in the wee hours, the ladyboy population rises. So the ladyboys are hundreds of times more common after midnight. Ask people. Everyone will say the same thing. It is because their chances of finding a drunk victim are highest at this time. And I think this one fact cries about the true predatory nature of ladyboys.

Transexuals and disease

Which group has the highest STD rates?

1/ Heterosexual men.

2/ Homosexual men.

3/ Transexuals.

We really should be producing statistics for both male and female homosexuals and for both sorts of transsexual. I bet the percentage of fake-female transsexuals that are STD+ will be shocking.

Fake female/ fake male

These is the most truthful names for transsexuals.

Worse than priests

I bet Ishtar's transsexuals are even more effective at turning infidel men into homos than priests.

Public onanism

Everyone accepts that the right of society to be free of public wankers is obviously more important than the right of the wanker to express and live his sexual fantasy in public. I argue that this same line of thinking also applies with other forms of public onanism — like solicitous prostitutes, flamboyant (solicitous) homosexuals, and trans-genders. These people should be relatively free to live their sexual fantasies in private. But when they accost strangers in public with their onanistic sexual fantasies, and when they expose other people's children to their onanistic sexual fantasies: This should be viewed as a sort of public wanking. Also, these sort of onanistic fantasies should not be protected either in the workplace, or in the housing market.

Ladyboys

Who are we to judge a male and call him a freak if he inverts his penis and pretends to be a female? And certainly we must all participate in this person's delusion or we are horrible judgmental narrow minded hillbillies. Rubbish.

Transsexuals and classification

If the person ever had a penis, they shall always be considered a male for the purposes of

- 1/ Shared toilets.
- 2/ Shared changing rooms.
- 3/ Government identity recording and property ownership.
- 4/ Sports.
- 5/ Academic applications.
- 6/ Marriages. In other words, if they marry, it must be considered same sex with one partner noted as a fake-female or fake-male transsexual.

Women can use men's bathrooms

Women should be free to use the stalls in the men's bathrooms if there is a line for the woman's and no line for the men's. They should also be allowed to stand in the men's line to use the mens room if the line is shorter. When there is a long line for the men's bathroom and nobody is using the women's, the men can use the women's bathroom provided there are no women inside and someone by the door to alert any arriving women

which shall have priority as soon as the men then using the woman's bathroom leave.

No rule of equal sized bathrooms

There should be no rule that the bathroom sizes must be equal in all cases. In many male dominated places, the women's areas can be much smaller than the mens due to simple workforce demographics. In other female dominated places, the men's areas can be much smaller than the mens due to simple workforce demographics.

Media

Pat Sajak

["One of the \(many\) odd conceits of celebrityhood is the notion that the ability to sing or tell jokes or portray other characters somehow qualifies one to tell others how to vote."](#)

Thought crime = you're not with us, are you?

The Senjinkun of Imperial Japan should be required reading

All over the world, high-school kids should have to study this document multiple times, so they know about war propaganda.

Nanny state

This is the name of the entity that sponsors all the anti-drug, anti-alcohol, anti-tobacco, and anti-whatever stuff that people must watch to get their stuff.

George Orwell, 1984

"The party could thrust its hand into the past and say of this or that event, it never happened."

There should be a stricter definition of the truth with regard to paid communications.

Your opinions?

Everyone thinks: "I am the master of my opinions". It is just that so few actually are.

More altruism, less egoism

If we dial up the audio knob on both recognized egoism and altruism, it will help lean the boat. Also remember you don't want to eliminate egoism totally, you only want less of it. If you have too little egoism, it makes society feel stifling.

The purpose of Q&A

It supposedly exists to improve communication. However, when journalists put people on the spot in front of a camera with difficult questions and play gotcha journalism, that doesn't improve communication. That just raises the power of corporate journalism.

Ad hominem = against his (good) name

If you can't attack a man's ideas, attack the man himself.

For the benefit of future generations, we should keep people's legal private lives out of the media. People should consider gossip as a thing that is embarrassing to listen to.

No talk about the personal lives of leaders

This should be something that is off limits because on one hand it is so easy to make things up, and on the other hand this gives so much power to the media and to rumor mills. So to the maximum extent practical, we must try to make the private and family lives of our leaders off limits for the media. In fact, maybe it should be considered sort of an extension of the prohibition on court prosecutions of sitting leaders to talk about any crimes that are supposed to have happened before they were elected. Maybe all Senators get automatic time out for all pre-election accusations and claims from their election until maybe 6-months after they leave office.

The lives of your leaders

It is probably best to presume that it is an outside force struggling against people it does not like. Just look at how the private life of Eliot Spitzer was blown-up just days after he was first discussed as a presidential candidate. This was dirt that someone was holding on him.

Claques and caned laughs

Rudi Giuliani's Michigan senate ways and means committee audience from 2020.12.03 is what a claque sounds like. This is a serious problem for democracies and public speakers. People should be free to shout their heads off if they are out of ear shot, or before or after. But when they interrupt public speaking, they should do time for heckle-hacking. Maybe, depending on the length of the interruption and the number of people present, the heckle-hackers will have to spend 1-12 months in work camp for the first offense.

Ad Hominem

If you can't attack the ideas, attack the man
If you can't attack the ideas, attack the man
If you can't attack the ideas, attack the man
This is where people don't attack the policy, but instead attack the man associated with the policy. And they smear him with anything they can find or make up. This is how people get rid of ideas they don't like. This is one of the most important lessons we can teach kids about democracy, to recognize all the many forms of Ad Hominem attack and not only to ignore them, but also begin to ignore the people and news outlets spreading them. It should be considered one of the hallmarks of a biased press that it launches ad hominem attacks on people.

We should have these words on our school hallway posters. This is so we can have a smarter electorate in our democracy. And we should repeatedly teach kids to recognize all the types of ad hominem attack.

The real sexual freedom

Few of us care one bit who our coworkers or the people living down the street have sex with. Most people figure that as long as it is consenting adults, it is none of our business.

- 1/ The world would work much better if we all stopped thinking and talking about who other people have sex with, particularly our leaders.
- 2/ This is keeping good people from elected office and reducing the pool of government people.
- 3/ This gives corrupters a way to drive our leaders out of office.

Biden ain't

When Biden uses ain't in the right way with black people... that is a magic key someone else gave him. He didn't learn how to use this word himself talking to people. He doesn't really get it, he is just a puppet, like the other actor.

Award winning journalist

To my mind, there shouldn't be any non-Senate awards for news people. To my mind, the Pulitzer Prize, the Nobel prize, the Oscars and all the rest are corrupt mechanisms for helping Ishtar to gain control of peoples minds.

Fictional citizens and free speech

Free speech being a thing of real flesh and blood people, fictional citizens shall:

- 1/ Be required by law to tell the truth, the whole truth and nothing but the truth, and not in a sneaky, or deceptive way.
- 2/ Be prohibited from **uttering** any opinion, innuendo or analysis of events. They may only report the facts.
- 3/ Not hold discussions or round tables about politics or economics. Such is the domain of the Senate.
- 4/ Not have a stable of favorite experts.
- 5/ Pay business-crippling toxic-waste fines for polluting the public discourse if they have been convicted of violating the free speech rights of genuine citizens.

No tax advantage for non-profits

What a foolish thing to subsidize charity across the board. Many charities are dumb, or poorly run. Here is why I think that all charities should pay the same taxes as everyone else. However, all of government's tax revenues from charities should be redistributed to other charities that fit with our democracy's priorities for non-profits.

Government may also give money to the most effective charities, or take on their projects as a public effort.

Can we trust little brother?

We are deluding ourselves in thinking that we can trust Facebook, Twitter, Google, Amazon, or Apple, any more than we can trust our democracy.

George Orwell

Just as George Orwell's ministry of truth was primarily concerned with telling lies, nearly all political media is propaganda trying to game our democracy. This includes TV, Newspapers, magazines, websites, Facebook, Twitter and your email in box.

Pedophiles in power

It's not that they are pedophiles per se that is the real problem. The real problem is that they are thumbs-men and under someone's thumb and they will all do whatever they are told by their masters.

Discredited scientists

If you studied an aspect of science and that aspect of science is later declared "fully discredited" by your nation's Senate, then you will no longer be a real scientist, but a discredited scientist.

Political labeling

This is an important aspects of Democracy. We are wise to give our loyalty to the Senate here. Anyone people can create names, but if the Senate does not like them, it can change them for our nation. For example instead of the "Democratic People's Republic of Korea", we might call this nation as "Fascist Korea", or "China's colony of Korea".

Scripted vs. unscripted media

1/ When media is scripted, or has a high-budget, or has a huge audience, or is corporate, or has a production team we should err on the side of being unforgiving about umbrageous remarks.

2/ When media is unscripted, or has a low budget, or has a small audience, or is "garage-made", or has a tiny production team, we should err on the side of being forgiving about umbrageous remarks.

3/ When people say outrageous remarks in off-the-cuff "street" interviews, they should be allowed the greatest freedom to say what is on their mind and suffer no harm or negative commentary.

News caster rules

Those people discussing the news on video feed shall not:

1/ Color their hair or skin with dyes, bleaches, or makeup.

2/ Wear any wig, hat, or hairpiece.

4/ Speak with a foreign accent. This includes regional accents from foreign nations that speak english.

5/ Cherry-pick shots, or statistics, or intentionally exaggerate what they are reporting on.

6/ When one can tell the position of a news caster, they shall be subject to Senate stigmatization.

7/ News outlets and newsreaders who get repeatedly stigmatized for bias in the news media may be required to display that stigmatization at the start of all their media as the Senate decides.

Those with regional or ethnic accents may not read the news. For example Josh Navarro on WROC

Un-biased news people

If the political leanings of a news person are ever discernible from their reporting, they should be stigmatized for this. The most important part of their job is to be unbiased.

Conspiring to create a fake reality

You have the right to say what you want as an individual, or as a small local group, but when you are a national organization conspiring to delude the nation, that is something else.

The right of free speech is for real people and not entities. When large news entities are clearly biased and when they tell intentional lies, their people can all be stigmatized.

Who may not call for resignation

1/ No fictional citizens or foreigners.

2/ No senators as individuals.

2 No news organization, or its workers.

4/ No political party.

https://m.youtube.com/watch?v=9aEPD_azG40

Look at Obama touch his nose at 17:50-18:10

ID verification in social media

To stop the Foreign troll farms working to game our democracy, we need to ban anonymous comments.

Max max max

Everything in our society seems turned up to the max because there's an arms race for:

1/ Sweetness in beverages.

2/ Saltiness in snacks.

3/ Emotion and energy in arts.

4/ Loudness in music and art.

5/ Violence and sensation in media.

What if we used public policy to dial downs the volume, and set it at 3 instead of 12, (where the speakers cones can't keep up with the signal and thus distort.

Bye bye mis American pie

Here we see America's peak marked by this well broadcast song. Drugs and Athenian-style social relaxation took over. Bye bye America. you have peaked due to sex and drugs.

Performer contracts shall not be enforceable more than 6-months from their signing.

**Big media is 90% lies & fluff
Social media is 90% trolls and bots**

**Stop the steady stream news crisis
It's bad for kids to grow up under this**

Free press equip is not tracked
Anything even remotely having to do with printing and sneaker-net and dissemination of information should never be tracked.

How is it that there is only one republican news outlet?

We should not have media like "The Act"

The thoughtlessness of music
It isn't just the thoughtlessness of it, it is the process of repeated thoughtlessness that dis-tracks our true intellects. People should feel free to listen to music and spend hours drinking and dining, if that floats your boat. Feel free to have sex, and watch media and play video games, Just don't let these things take over your life, or they will make you stupid.

If our group mind will eventually become the mind of god, what is advertising?

To encourage exercise
1/ The Senate should offer a whole long list of action videos that pump people up for exercise.
2/ Kids can't use more than a short amount of media unless they do their daily exercises in some form or other.
3/ Government provides free well-equipped gyms.

The wonderful world of dis•nee

The people behind the camera are free to work continually. It is just the ones in front of it that society needs to limit.

Search engines must favor principals Search engines cant knowingly display third parties and middlemen ahead of principals.

Daphne Caruana Galizia
This was the journalist killed in Malta. She was
1/ Seemingly an independent.
2/ Was reporting on corruption.
3/ Not selling out as judged by her murder.
4/ A different breed from the journalists I see working for the billion dollar US news media.

"Religion is...the opiate of the masses"
This top quote by Marx is a blid. It isn't religion that is the opiate, it's the sacrament. The correct saying should be: Religious sacraments often contained addictive opiates and other drugs for the masses. And by the way, if you find blids, the author isn't real. So Marx was not real. He was a fake genius with a lame administrator-base sharing system that was very easy for Ishtar to corrupt.

King, Caesar, Lord, Duke, Shah
People with royal names should be excluded from becoming leaders in the land of the free. If you want to go into politics, you have to change your name so it contains no reference to royalty or dynasty. Martin Luther King shall now be MLK, and Caesar Chavez shall now be known as Estrada Chavez.

Aggressive Maori Haka
These aggressive war chants should be considered a thing of the overpopulation, endless war, and widespread cannibalism that plagued the Maori and Fijian cultures. This is war and hate energy amplified. And it sure looks like Ishtar's handiwork, because it is not going in the direction of the good god of peace and love, but straight in the opposite direction of the evil ex-pull towards more hatred and more fighting. If I had to find examples of George Orwell's 5-minute-hate, the Hakas would definitely be near the top of my list.

The Statute of Liberty
The Statue of Liberty should probably be moved up a hill and inland. Also, the fake immigration policy plaque has to go.

Frivolous fame & free speech
1/ The Senate may stigmatize athletes, actors, and musicians that abuse their fame to sway the people in matters of politics or policy.
2/ When serious news outlets amplify the remarks of athletes, actors, and musicians, these outlets may be reclassified as frivolous by the Senate.

Elected as propaganda
At the start of each tract that the Sub-Senate elects as propaganda we will see "PROPAGANDA>>>" and at the end we see "<<<PROPAGANDA" And at the center of each page that is considered entirely propaganda will appear the word "PROPAGANDA".

Plato's Republic is brilliant fool•sophy
It is fool's wisdom, It is political and social propaganda designed to make a government easy to parasitize. It isn't a real book.

Missio, an awful band

This is a band with some rather socially corrosive lyrics. I would recommend that the Senate stigmatize this band and its members and affiliates and require that its music/videos only be streamed by those who are over age 18. Furthermore I would put a warning that this media seems designed to create violence and undermine our nation's freedoms.

Directories shall not:

Exclude, discriminate, charge for listing, or sell preferential placement

TV's ugly stepkids

That is what Netflix and YouTube are.

Anderson Cooper lecturing a Facebook person. The pot calling the kettle black.

["You're making money by being in the news business. If you can't do it well, shouldn't you just get out of the news business?... you are in this particular case spreading and allowing the spread of a clearly false, doctored video. Again, you're in the news business. There's a responsibility that comes along with that. And this, this isn't even a question."](#)

Reservoir Dogs

This title is a blid. It exists to cover up a problematic term for vicious two-legged human dogs on standby.

Anti-fascism

It's like The Democratic People's Republic of Korea, a nation that's neither democratic, a republic, nor for the people. it's the exact opposite of its name. Likewise anti fascism is really just fascism called not-fascism.

The road to Hitler

It doesn't matter what the initial intentions are... even if they are completely anti-fascist. Once people start hurting candidates and free speech, the road invariably heads in the direction of a fascist Hitler type.

Media cut speed

Perhaps the various sorts of media should have a limit on the cut rate to disadvantage emotional media. Perhaps the fully EDU media has no limit on cut speed, the semi-EDU media has a limit of 0.8 seconds and the non-EDU media has a limit of 2 seconds per cut. Also, it would be easy to slow down all the legacy media so it conforms.

The great Thanksgiving cover up

We remember the 4th of July perfectly well. How come we don't remember the day that America adopted its 2nd constitution, its current constitution? (November 26) Why

does this day lack even a specific date now? Why is it celebrated on the last Thursday in November? And why is this important political date now celebrated as a sacred family day, a sort of 2nd Christmas day, a day of family that has nothing to do with our democracy? Does someone want us not thinking about how the US has had two constitutions? Also worth mentioning are:

1/ How the Indians (the so-called Native Americans) had this Christmas-like day of sharing and gift giving that was on December 26 (or 25).

2/ How there is this whole confusing thing about Christmas and Christmas eve (December 24/25) and how this seems to have been invented to cover up the December 25/26 problem with similar holidays between cultures that are supposed to be separate.

3/ How easy it is to confuse the similar December 26 special day with the November 26 special day.

George Washington's

Thanksgiving Proclamation 1789.10.03

["By the President of the United States of America.](#)

[\[George Washington\] a Proclamation. Whereas it is the duty of all Nations to acknowledge the providence of Almighty God, to obey his will, to be grateful for his benefits, and humbly to implore his protection and favor—and whereas both Houses of Congress have by their joint Committee requested me "to recommend to the People of the United States a day of public thanksgiving and prayer to be observed by acknowledging with grateful hearts the many signal favors of Almighty God especially by affording them an opportunity peaceably to establish a form of government for their safety and happiness."](#)

[Now therefore I do recommend and assign Thursday the 26th day of November next to be devoted by the People of these States to the service of that great and glorious Being, who is the beneficent Author of all the good that was, that is, or that will be—That we may then all unite in rendering unto him our sincere and humble thanks—for his kind care and protection of the People of this Country previous to their becoming a Nation—for the signal and manifold mercies, and the favorable interpositions of his Providence which we experienced in the course and conclusion of the late war—for the great degree of tranquillity, union, and plenty, which we have since enjoyed—for the peaceable and rational manner, in which we have been enabled to establish constitutions of government for our safety and happiness, and particularly the national One now lately instituted—for the civil and religious liberty with which we are blessed; and the means we have of acquiring and diffusing useful knowledge; and in general for all the great and various favors which he hath been pleased to confer upon us. and also that we may then unite in most humbly offering our prayers and supplications to the great Lord and Ruler of Nations and beseech him to pardon our national and other transgressions—to enable us all, whether in public](#)

or private stations, to perform our several and relative duties properly and punctually—to render our national government a blessing to all the people, by constantly being a Government of wise, just, and constitutional laws, discreetly and faithfully executed and obeyed—to protect and guide all Sovereigns and Nations (especially such as have shewn kindness unto us) and to bless them with good government, peace, and concord—To promote the knowledge and practice of true religion and virtue, and the encrease of science among them and us—and generally to grant unto all Mankind such a degree of temporal prosperity as he alone knows to be best. Given under my hand at the City of New-York the third day of October in the year of our Lord 1789.

Go: Washington"

Tech

Public Theft RFID recording

Maybe the recorder should support RFID tracking as an anti-theft measure. It isn't hard to imagine nearly ALL sidewalk cafes, playgrounds, community centers, and schools widely taking advantage of this system for their stuff — much to the benefit of everyone. And if burglaries or bike thefts start going up, then people will have a smart way to fight back, (for who can be sure they got ALL the the passive password RFID chips from that electronic device?). This is probably the cheapest way to cut down on theft of goods in our cities. Because nobody will know what is tracked and what is not.

County recorder manages signatures

It records signatures on contracts. It also perhaps prohibits non-conforming clauses that are not in the pre-approved clause library.

Spying/ hacking is a felony

By this we mean spying in its broadest sense:

- 1/ Hidden cameras and listening devices.
- 2/ Software hacks.
- 3/ Selling undeclared data.
- 4/ Excessive investigation of people.
- 5/ Using secret data to smear a leader.
- 6/ Posting the hacked or obtained private communications about a leader.
- 7/ Simply being a former member of a foreign nation's leadership and going to work for the elite of our nation without declaring your prior elite position to the state department. Domestic spies get some years in prison. However foreign spies get life or execution.

Hacking confidential info

The counties manage our ID/ address/ signature/ financial information. Then they produces a unique single use first name + alphanumeric instead of the real customer data.

So the hotel and airline staff don't know you by name. And the booking company doesn't know your real name unless you give it to them.

Surveillance and ID verification where

- 1/ The hallways and all main streets and commercial areas all have overlap video recorded...backup buffered by the recorder as a public utility paid by property taxes.
- 2/ People have cameras by their units that may or may not be publicly backup buffered.
- 3/ The stations, their nearby streets, the trains, are all on overlapping video.
- 4/ People can use location-trackers when they do something dangerous.
- 5/ The outer woods, the privacy booths, the changing rooms, the public bathrooms and the private properties may not be recorded by government without a court order. These places shall also be checked by the local government and kept free of private recording devices.
- 6/ Residential communities should not only be allowed to verify ID for everyone entering the community, they should also be able to rely on the recorder's office as instant ID verifier.

Vanity phone numbers

Those in the law and healthcare industry shall be prohibited from using so called vanity numbers that are easy to remember. Also, no phone number may:

- 1/ End in 00.
- 2/ Contain any digit that is repeated more that 3 times sequentially.
- 3/ Contain less than three different numerals not counting the area code.

China big brother phones

You can't cover the screen of Huawei phone or the device will not work. That is because it is a big brother device, and it is cheap so everyone carries around a tele-screen.

Mic switches

All voice devices must have physical switches on the microphones.

Software as a service by government

You're free to use a private company, but the county assessors office will offer a whole lot of nationally/ internationally ubiquitized software applications for free, for your enterprise, or for your personal use. It will be a bit like the Google suite, except that It will be much more robust due to how government wants to foster business by offering quality free software. Also, without the imperative of generating higher fees, the upgrade cycles for desktop software will run much slower. Then less time and particularly less expensive techie time will be wasted on software upgrades and IP payment compliance.

Virtual meetings suite

1/ Whoever is doing this best gets ubiquitized and the application is given away for free because it reduces the need to build real world transportation infrastructure which is 1-to-2 orders of magnitude more expensive than servers and fiber optic bandwidth.

2/ Once this is up, we publish the code and give Ubiq status to those who help the platforms.

3/ We will do the same thing with many public software packages.

The Internet CDC

Computer Virus scanning

The county recorders should offer free virus scanning of all emails. The recorder system then certifies the traffic as clean.

Sensitive research

This does not belong to any university. This is a thing of the people and their military. Also, this is not a thing for foreigners to participate in unless perhaps they are extremely exceptional and from a dedicated democracy... and they are contributing something that WE want, and critically we make (spot, approach) them, rather than the other way around.

Search engines, paywalls and logins

1/ Paywalled and login-pages may not be returned by any search engine.

2/ The first/top word on all paywall websites must say paywall and the search engine must display this first.

3/ The first/top text on all login websites must say login and the search engine must display this first.

4/ No national or international news outlets shall have a paywall or charge subscriptions for current or past news media. None shall charge for printed paper versions of their periodical.

Pop up web ads

These should pay web ad tax as if they are 2 full pages in size.

Suspension of social media accounts

This may only be upon violation of the law and a court hearing in the jurisdiction of the account holder. The user must post a day's pay to arbitrate. If they win, they get 2 day's pay back. The arbitration takes up to 1 hour and takes place via video call.

Social media priority algorithms

1/ These must all be open source and well explained.

2/ They must be comprehensible by the Senate.

3/ They must be published two tenths in advance of when they come into effect.

User data and espionage

Everyone working in a public infotech center or recorder's office shall have security clearance, and there should be

no foreign born people here ever. Those found passing user data are subject to espionage charges

Healthcare and ubiquitization

1/ To the extent we ubiquitize drugs, we can give them to everyone who needs the drug. And we can do this for the same cost as today when we only give it to some of the people.

2/ If we scale our equipment manufacturing lines, we can outfit all the hospitals and more with all the ubiquitized equipment for essentially the same amount of money as only outfitting some of the hospitals.

3/ We are not getting any benefit from using a market economy for unique patented drugs. There simply is no free market here. Why are we pretending there is a free market? Maybe we should completely detach the market value from the X-prize award amounts. Then we just keep increasing the X-prizes slowly each year for the problems that have not yet been solved.

The ultimate nanny state

We make people carry pedometers, and charge them each day when they are torpid. So maybe each day that geezer and wife don't leave the house they get a "\$5 daily Healthcare allocation system charge" on their credit card for failing to move by the required daily minimum amount.

Government should supply all citizen with the following services free of charge and almost entirely free of advertising due to their low cost:

1/ Free internet via municipal wifi.

2/ Three free email accounts.

3/ Two free web-hosting account. (with 2 ads per hour)

4/ Two facebook page (with 2 ads per hour)

5/ Two twitter-like accounts (with 2 ads per hour)

6/ Two instagram-like accounts (with 2 ads per hour)

7/ A word processing and written report maker.

8/ A spreadsheet program.

9/ A photo editor.

10/ A large photo and video storage account.

11/ A 2D and 3D drafting program.

Ubiq first mover advantage

When IP gets ubiquitized, the developing company will still have a team already assembled.

Ubiq electronics

1) We should have standard versions of: desktop computer, and tablets in 6-sizes.

2) All designs are open source. with open publicly rewarded commentary.

3) Bugs reported (no matter how small) get some official ubiq status and money.

4) All software is open source and new applications in the IP period gets their fair sliver of the world IP budget, call it X-cents per user hour.

100 billion prices under one cent

What if every product and every transaction had a unique price that was to the billionth of a cent. Then we can easily search out the payment forensics. Theft becomes much harder. Auditing becomes many times more effective. And it rounds at the bank level for privacy.

Mesh networks and peer to peer network

These must not be prohibited by government

Twitter & Facebook

Should be open protocols not monopolies

Why does it take 3-years to get Google on trial for anti-trust?

Google is evil

That is where the entire “don’t be evil” thing comes from. It’s double-speak.

Google is evil

2/ It isn't right to have this for-profit entity extracting money from our baby businesses so that they may find their markets.

3/ It isn't right to let middlemen aggregators clog the entry to the marketplace, as they engage in a corrupt bidding war with their principals for top billing on Google, at the entry to the marketplace. Surely this just increases waste and drives prices up for nothing.

4/ Absolutely the same thing can be said about Facebook.

5/ If we condemned Google and Facebook, and ran the advertising for the benefit of the nation’s small industry, we would have a much better small business environment (and national economy). We would propagate any more small businesses that will turn into large businesses and benefit the people. The proper sharing of information about new businesses and new products is one of the most important things in a capitalist system. The fees that Facebook and Google charge are not designed to increase this, but to go in exactly the opposite direction and stifle new business so that the old businesses of Ishtar will stay as robust as possible for as long as possible. Thus we need to go in the opposite direction and offer Facebook/Google alternates.

Search engines rules

1/ Search engines are required to display the main url for each company first at top of their listings.

2/ Search engines shall not be allowed to display third party aggregators on their first page, or the first 20 listings.

3/ All ads must go in a separate column to the right that is no bigger than the right most 1/4 of the page — more or less as Google was originally designed.

4/ Ads must be blatantly distinguishable from real content.

5/ The jump to page numbers on the search result must be shown at the bottom of the search return pages as:

“1 2 4 8 16 32 64 128 256 512 1k, 2k, 4k, 8k, 16k.”

5/ The total number of search result hits must be shown for all search terms as this is valuable information for the people about the group mind.

Nations verifying user identity

To prevent foreign trolls from influencing our democracy and our culture, all social media platforms must verify ID with a nation’s police departments. If any nation can’t do this, or if they can’t keep their crooks off line, then the entire nation loses its right to guarantee identity and prosecution for web-crimes.

Senate Facebook

1/ There would be no need for ads, but we might have 2, 4, or perhaps 12 properly targeted ads per hour so the government's facebook makes lots of money. And no ad will ever be repeated, unless we go to the ad log page.

2/ Half the ads can be EDU messages, or PSA message like: dream big, work hard, be honest. Learn something new. Don't be a bum, etc.

3/ It really means something when you log in with your facebook now. Perhaps this has 2 or even 5 levels of ID/ information sharing with the site we are identifying with

4/ The person’s verified Senate, EDU, and ubiq achievements are listed.

Facebook, Amazon, Instagram & Twitter are posers

There is little real tech innovation that came from these companies. These companies are therefore posers, pretending to be innovators to hide how they are actually monopolists. Google at least brought forth some innovation about 15-20 years ago — although we are long beyond the patent protection period for tech. 40-year old Microsoft never did anything much either except buy innovators.

Always on listening devices

1/ These must have a physical switch to the microphone.

2/ They should never be required except by employers at work.

The easiest home sharing tweak

It is to eliminate the parties and noisy users by law.

1/ We need to have different rules for them because they don't have to live there.

2/ The noise rules are enforced by government, which will evict the over-night sharing renters on the spot for egregious violations such as large parties and damage to premises. Doing this helps people to share their residences more, a good thing for everyone.

Helping the people to share

If we really want to get serious about encouraging sharing in our economy, then perhaps government should subsidize it through providing the following low cost services for free, or nearly free:

Arbitration of sharing disputes

Documentation platform

Initial walk-through video backup
Transaction processing
ID and profile verification
De-platforming problem users
Police take responsibility for noisy users or abusive rental users.

UNDO

We should be able to call up a text interface of what we are undoing in order:

<<Undo zoom
<<Undo zoom
<<Undo paste of text "It is going to be..."
<<Undo paste of text "when you will..."

More Firefox buttons

It could easily have 14 or 18 buttons in place of the current 5 buttons. Several configurable buttons like:

- 1/ Turn off host-generated refresh.
- 2/ Cookies menu.
- 3/ Delete all temp info.
- 4/ safe mode.

Every bar must be hide-able

- 1) All command bars should hide automatically on all applications and all operating systems. These should all disappear from view until we mouse/finger over towards, gesture, or otherwise head to where the command bars are.
- 2) No website or application can have any bar that cannot be scrolled away and closed permanently
- 3) All operating systems and websites can use no more than the height of 2.4 lines of text for open "window tops". This is enough for 2.0 lines of text display and borders.
- 4) Browser text insertion bars shall be no more than 1.2 lines of text in height.
- 5) All browsers should have a "show hidden menus" command. This opens all the hidden menu bars.

Clipboard to file collect

Operating systems should have this setting where text can be selected and copied to a file clipboard without the additional step of pasting. You just do command-c, command-c over and over and the cuttings are all collected to a certain file, perhaps for that day or that week, or month, whatever. There is another version where the cuttings go in a spreadsheet

When you close a desktop document

It should automatically appear just as you left it when you saved and closed. Same window size and location, same appearance, everything.

Default no images mode on browsers

When images are off, there is a scaled image icon with a description. If you touch the image it loads. This makes it easier to keep images off.

Variable speed select by finger roll

You roll your finger a bit to go left slowly, you roll your finger far to go right fast.

Add voice notes to recent calls

We should be able to append notes to calls and then to review our own voice notes either in audio or in transcription.

Apple text edit flaw

Auto link should always go off when in text editing mode.

Transparent desktop

Ok, so we can't have translucent iPads. But we should be able to emulate them in the operating system. Then we can run the desktop better on vizors for augmented reality mode. Then we merge faces into construct footage, maybe a simulated conference room on the 77th floor, or an eternal Thira sunset, or whatever.

Presentation pointer & comet

Wouldn't it be nice if MAC OS had a giant cursor for presentations... one that turned into a colored highlight "comet trail" when you laid your finger flat on the track pad. So you could wipe your finger back-and-forth under a line of text to create this quick-fade highlighter. Or draw a ring around some thing to draw attention to it. The fade rate is adjustable as is width, length, and color.

Finger tip cursor

When you put your fingerprint down and roll your finger to the tip, a cursor or insertion bar appears depending on the app. To select text, roll the contact finger right or left. A little bit and it selects one letter every half second. More finger roll selects whole words every half second.

Phone alert LED color

Next to where the back cameras go there should be two or three variable color alert LEDs, so people can tell their alerts visually by color: Maybe Green is work, Blue is male, pink is female, red is spouse, dark blue is X, purple is Y, orange is Z. If the light is dim, it is not important, the brightness is high it is important it is. Urgent is flashing with quiet alert tone. Super urgent is flashing fast with loud super urgent interrupt tone. And why can't we authorize certain people to override our silent mode with a code?

No tracking of web users between sites

Once we have an attention payment system, why don't we just delete/outlaw cross-site cookies?

We might restrict resolution on internet devices to reduce bandwidth

Uninstall-able software

Companies that distribute un-installable software and software that is intentionally difficult to un-install shall be liable for the costs that people incur. They may also be shut down.

Batteries

1/ Devices should have a battery temp indicator like with a car engine. They should also have a yellow warning light when they are getting close or heating fast.
2/ When you plug in your charger a window pops up asking you to press a button indicating for how long you expect to be charging for, and your cut-off temperature levels for use and charging.

IOS notes

1/ People need to be able to search all notes, instead of individual ones.
2/ Notes needs to be more like a true word processor. Also, it should have low and high power mode.

Swipe to alternate desktop

4-vertical fingers swiping right opens an alternate desktop to the right. Over all, 8 alternate desktops can be swiped to via 2 such steps, or if we use diagonal 4-finger swiping.

Corner bumpers

Put tiny screws holes in the corner of the iPhone iPad so people can screw on dumb-bell shaped rubber corner bumpers. These can also be used for a mounting bezel, something the iPads could use.

Bezel cams

The real 3rd camera isn't on the front or the back of your phone, it is on the bezel. This camera points straight ahead when you have your phone sloped for viewing at 25°. This is the camera people use to record other people behaving badly.

Delete cache button

All browsers should have a clear temporary data button on the top bar given how much we use this function. Although this might not be needed if we get rid of web cookies entirely.

Camera buttons

There should be a touch image anywhere to shoot configuration. Tapping the center of the screen will produce less image shake. Also, when we tap the screen 2X + 2X it calls up the camera in photo mode. When we tap the screen 2X+3X, it calls up the video. Siri might listen for these tapping rhythms, or people might also tap the phone while it is laying down. Another way to set the camera into video mode might be to jerk the phone rapidly in any direction.

Website refresh off buttons

All browsers shall have a button to turn off website generated refreshes. This and the reload lock button are also on the browser bar. Tap the AA button to call up the command window. Put it in there.

Browser reloads

All browsers must be able to bring back all refreshed pages.

The clock zone on iPhone, the notches, these could contain a lot more information, like unread messages, and how long until your next appointment. Maybe we can give callers alphanumeric like A or 7 or M and you can see who called.

Imagemap

Videomap

This is where we upload photos and videos of places so people can look at a place remotely. Every image has GPS coordinates and an angle of view. This is mostly for landscapes and virtual travel. It is sort of like a Google Images, but it is more location specific. So you go to a map of say Bagan in Burma. Then you have these rolodexes of images from a certain spot looking in a certain direction. And there is also a video function, so you can go with countless people walking through the center of wherever. People will get off on exploring the world to take pictures for the image map.

Interface systems IP dies quickly

These rights die in maybe 5-8 years. Otherwise, this is a thing that is hindering the advancement of software development.

Unrelated ideas

When people working as hired inventors in one product/area come up with unrelated ideas, their employer should not be able to have any claim to that invention, even if a document is signed. A great many more good people will work in hired innovation if we do this. Related ideas belong to the employer, but unrelated ideas and different industry uses belong to the discoverers.

Internet rules

1/ Government shall not require people to acknowledge anything when visiting a website, as this is an opportunity for inserting malicious code.

2/ No internet browser shall be integrated with an operating system. All such combinations must cease upgrading as unified things.

Swiping up from the IOS delete button

This brings up a bunch of different selection and delete tools/ buttons, like an undo button, a redo button, a save all delete activity to document button.

IOS Voice + text

When we use voice text on our phones, the keyboard should be available to insert punctuation and special characters and to erase text without turning the voice part off and on.

Selection assisted voice transcription

When the voice control on your phone is uncertain of its choice for what you just said, that part should appear popped above the text in a box in a number of permutations that the computer suggests. You touch the one that's right, or semi-right.

Recorder transactions

These can be with or without the parties knowing each other's name. Some people will want this.

Phones

- 1/ Because of the ubiq system, all phones will have the same state of the art features. Or it won't be IP that holds some back at least.
- 2/ Most good software will be open source and funded by tax money and Ubiq rewards. It will also be free for individuals to use.
- 3/ Everyone can open every file using all devices without downloading anything.
- 4/ There will be one standard interface, not two.
- 5/ The Sub-senate runs tech support boards for eliminating bugs.

Holo gesturing

- 1/ There really should be one set of gestures for all systems.
- 2/ Holding your hands around an imaginary balloon being inflated/deflated is screen zoom, for example.
- 3/ Hands flash rotated inward is right-click, hands flash rotated out is left-click.
- 4/ Move screen with index finger.
- 5/ Rotate screen with thumb and index finger.
- 6/ Thor calling his hammer gesture = tools and settings.

Auto rotate on phones

It would work better if it was oriented to the image of the viewer rather than gravity. Also, putting your phone down while video calling automatically flips the view to the ceiling instead of the counter top.

Stupid emojis

We should be able to not-show emojis on our phones

Double clicking the arrow-box should bring up the search engine homepage.

Communication PIN numbers

All phone numbers and email addresses should allow 4-digit passwords (that account holders can change at will).

This code (if the function is on) is the only way to make the recipients phone ring otherwise they get a missed call.

What if we never had to watch the same commercial twice?

Ratings systems

Let's tweak our review and rating systems so they have top bullet comments like:

- 1/ "lobby was full of dust because they're remodeling three units in that building." 27likes
- 2/ "Noisy area" 19 likes
- 3/ "Mosquitos coming from shower drain" 9 likes.

This type of commentary is both more useful because it is easier to grasp and also less subject to censorship.

Simulated reality

We will walk around and sit in these simulated reality situations where we can look down and wiggle our fingers with no perceptible lag. We will see people melded onto other people's bodies perfectly.

The VR view

We are either looking at the ground, looking out, or looking up. A proper VR system have at least these three modes.

Mankiller games & media

These should be stopped except in the context of training to defend against those trying to impose their will through arms.

Where does media violence shape minds the most?

Is it in our smartest people, or our dumbest?

Half-size credit cars and drivers licenses

We should miniaturize these so we can carry them 2-up in our wallets. 2cm x 8.5cm instead of the current size 5cm x 8.5cm.

Log-in real world entry

What if people had to login to enter a physical bank at any time, or a convenience store between 10pm and 6:00 am? What if you had to present your ID to get in through a bank's double doors? What if the banks knew the names of the bank robbers before they entered the bank? How do people then shoplift or do holdups?

Things that will now be considered hacking

1/ Websites that send visitors to other websites without them clicking their permission.

- 2/ Emails that send any information at all about the recipient to the sender.
- 3/ Data that remains on a browser after the cache is cleared
- 4/ Using any fingerprint scripts

Ghosting

All actions by all social websites must be declared. There shall be no secret ghosting.

Defense & War

America and Europe are big prizes Among billions of starving people.

This should be a 60-day or 90-day meme.

We help where we can

Freedom should be intolerant of tyranny and Mafia rule. Freedom should project power against injustice, where practical. Carrier-based air support to war torn areas of Africa is a prime example of a thing that freedom can do against tyranny that is very practical and very simple.

Infantry = cannon fodder

The term is related to the french term "enfant terrible". These are the young kids that don't know much yet. That is what infantry/enfantry means.

Organized criminals vs. mercenaries

What is the difference?

Like with the US civil war

Maybe there is a reason that India and Pakistan didn't fully part. Maybe it was Ishtar trying keep the door open for a profitable war in the future.

Are we sure nuclear weapons are real?

I am a bit skeptical that nukes will work well on large areas where the structures are not made of cedar and rice paper (or glass up high). I am not skeptical about the moon landing, but the killing power of nukes seems like it may be greatly exaggerated. The radiation certainly is.

Military vessels in the Taiwan straight

Except for China, Taiwan, Korea, Japan, and Vietnam, no nation may send its warships through the Taiwan straight. All must use the Luzon straight instead.

American Cred

The arsenal of democracy would be much more fearsome if it was used occasionally without warning against tyrants. Also killing tyrants makes the good people of the world trust us and the bad ones fear us (this despite all the matrix dissimulations).

Nukes: Damned of you do,

but damned more if you don't

Libya showed the world what happens if you give up your nuclear program. I wonder if another nation will have to be an example of the greater damage that occurs when a rogue nation doesn't do this.

PU peacekeepers

I think that PU people should keep the peace in all parts of the PU. I don't think outsiders have any reason to get involved. You are all in it together, so you deal with it and you bring a total halt to all the militants and warlords in all your territories. You will have lots of people looking for work, and looking to prove themselves in some way. Put some of them to work here.

Poison AK-47 ammo

Maybe we should make AK-47 ammo with some extra toxic ingredients in a small number of the rounds, in the gunpowder. Then we quietly "bleed" them into the supply chain in places with warlord troubles. Then those who would pick up black-market machine guns will be more afraid, so it will slope reality in the direction of peace.

- 1/ This practice favors national defenders and real armies with their own reliable supply lines.
- 2/ This practice cancels out the cheap AK-47 network effect, and serves to partly ruin the weapon.
- 3/ It is incredibly cheap to kill a portion of the bad guys everywhere.
- 4/ We don't even have to actually do this. Mere talk of the idea is corrosive to warlordism.

Sabotaged weapon replicas

The US should introduce all sorts of perfect replicas into the international weapons supply chain.

- 1) Perfect replica RPG rounds that detonate instead of firing.
- 2) Ammo that tends to kill the people who fire it and breathe the smoke.
- 3) AK-47 clips that are radioactive and poison the people wearing them every day.
- 4) Once word gets out, we should make a big thing of this in the media.

Arms/vehicles with missile beacons

Then air support (mere Super Tucanos) fly with beacon-seeking cluster munitions. Maybe the beacon only comes on when prompted.

Military medals

Existing medals will not be recalled, but no new medals should be issued.

Tank hunting RC mine carts

Imagine a cross between a Hershey's kiss and a shot put but it weighs maybe 20kg. This is placed on a 4-wheel video-operated RC drone car also weighing maybe 20KG.

Inside the kiss at the bottom of a snub-nosed barrel goes say a 2-cm DE cone. The RC drone car is electric and has perhaps a 2km range, but it can go 90kph on a smooth road. And due to its size and camouflage, it is hard to see, and also hard to hit. Also, the top of the drone has sloping rails that help it get under a tank. The bottom of the powder chamber is shaped like a lentil, the top like the flair of a trumpet mates with the lentil bottom. The two halves of the cannon probably screw together. As does the projectile in the barrel inserted into the trumpet. There is also a powder charge pack placed inside and a screw in detonator. This is how to make tank armor mostly obsolete.

Lightning capturing batteries are great for energy discharge weapons.

Glass skinned high rises

These are the most bomb sensitive.

See-thru glass houses

These are the 2nd most bomb sensitive.

What is Tyranny?

1/ Under Democracy the people rule and force is a crime.

Under Tyranny, force rules and democracy is a crime.

2/ Are large numbers of the government's critics eliminated by force? If so, it is a tyranny.

3/ Is the government menacing people in some way? If so, it is a tyranny.

4/ Were there elections, real and honest elections? If not, it is a tyranny.

Stop warning tyrants before we attack

Otherwise they will just do it until we point our guns at them.

Zero tolerance of tyranny

We as free men want to drive tyranny from the entire world. We want to liberate the entire world. Therefore, we will accept nothing but democracy on earth.

Democracy has the strength of the police

We are not only well armed and well trained, but if you kill one cop, you will have 10 after you, and if you kill them, you will have 100 after you, and so forth. So if it ever goes tit-for-tat, then tyranny always loses. Therefore democracy should take the offensive against those who rule by force over their own people. Rule by force shall now be considered an affront to our sense of justice, like grown men beating children or women.

Democracies never occupy

All they do is kill tyrants and their force apparatuses. Then they help the people muster over 3-weeks. Then they leave. That is what they do. So in all the little nations of the world that get into trouble with some dictator, king, or queen ruling over them, it is the responsibility of the

democracies of the world to kill that man lording over them by force, so as to liberate the free. If another bunch of tyrants later comes to power, the democracy returns and kills them. So the closest a democracy can get to occupation is repeated 3-week occupations.

“Don’t be Mr. 4th of July Stupid bravery doesn’t count.”

This should be drummed into the head of all recruits and all soldiers. Also, instead of rewarding stupid bravery, our military should punish it.

When diplomacy isn’t the answer

1/ When dealing with thugs who only understand force.

2/ When dealing with those who benefit from the status quo, or who otherwise do not want a solution, but continued conflict.

3/ When dealing with those wasting time to get stronger.

Sweet carrots

The other half of America’s big stick is the sweetness of the carrots, and how nice life will be on Kauai if they surrender.

The giant hypersonic missile under the Chinese bomber is fake

There is no need for the bomber. It just slows down the "hypersonic missile's reaction time.

The entire west coast of North America is a death trap for ships at harbor. This is due to the tsunami risk.

500 Missile attacks

This is the true threat to aircraft carriers. This is what they must defend against. The correct response is a 500 missile counter-attack to all soft targets by the accompanying destroyers.

Aircraft carriers

1/ They’ve never been unsinkable

2/ Better they attack a carrier with 10 missiles than downtown San Francisco, or Los Angeles.

3/ We might have 6 destroyers accompanying each carrier with ~500 missiles. These are pre targeted to stall any war build up with maximum effect. Then we publicize the bee hive response from our carrier groups when fired upon. If a nation attacks a carrier group with missiles, they get the bee attack in return. They will also have to contend with every aircraft on the carrier that can get up. At every point in the route, targets of maximum destruction are pre-programmed, in event of mass attack.

Submersible

What a blurd or blurring word submersible is. It prevents us from using this logical term to describe surface boats that can submerge when under attack.

Plasma cutter drone submarines

- 1/ Underwater plasma cutters exist.
- 2/ Plasma cutters are quite silent and fast. The ship is already sinking before anyone knows what is happening.
- 3/ Maybe they will have multiple cutters to work faster.
- 4/ Maybe the naval ships will have micro-torpedo drones or "keel-hauling chains for their defense.
- 5/ Maybe the ships should have plasma cutter sensors.

Neptune was a demon, not a god

As a rule of thumb, the oceans and especially ocean-based commerce are a thing of Ishtar, and thus they lean towards evil. In general, goodness is a thing of the land and evil a thing of the sea. So except for Islands and their commerce, and beaoned fishermen and beaoned "pleasure boats", the world's oceans should be mostly closed to sea trade when we mostly complete our rail system. Also, the oceans repeatedly prove dangerous to civilizations, and people should move away from them.

Maritime beacons

Even sport vessels and yachts should have multiple, redundant beacons with battery backup for safety's sake. Once we mandate these worldwide, we can say that all vessels that go out of a port and do not have a working beacon will be seized.

Pearl harbor

Because of its position in the middle of the ocean, it is only subject to far away tsunamis. Thus it is probably best place to harbor nuclear vessels. This overrules any local environmental needs, so there will be a big naval port support community there. And don't forget to put the community up out of the tsunami zone. And always have enough materials on hand to rebuild the harbor.

Rudder popping torpedos

Do we have rudder popping torpedos? These home in on the rudder. This is a bit more than a shot across the bow.

The Africa Corps.

What a shame Rommel ruined this term. It is a great idea. I see 1 or 2 end-life US carriers outfitted with end-life aircraft. Spies on the ground deploy drones and spot targets and call in air strikes.

Military drones are made of magnesium

Thus the drone itself burns and can start fires. The tech is also easier to destroy.

Old aircraft

- 1/ They can be easily made into drone bombers.
- 2/ They make great decoys.
- 3/ The US has an immense drone & decoy force.

They all look the same on radar

The bombers, escorts, and the cheap low payload decoy drones should all look the same on radar.

Submarines drone carriers

These ships can deploy submarine drones while cruising along.

Hypersonic aircraft

One reason to develop fast, high altitude aircraft is to make it harder for the missiles to catch up.

The future of missiles and artillery

They are guided missiles launched by rail guns at hypersonic speeds. The firing velocity provides most of the energy, as with artillery, so they use less fuel and less explosive. Thus more missiles can be kept on war ships. Because of the rail gun, the missiles can be fired on-and-on without too much heat generation like with battle ship guns.

Current Government

Patrick Henry is the real first American, not George Washington.

Risking the cross

Let's consider Patrick Henry's famous words: "Give me liberty or give me death". The true meaning of these words has been forgotten and badly needs clarification. You see, these are the words of the first man to stand before an assembled crowd and openly call for revolt and independence from the king. So Americans traditionally held Patrick Henry to be a leader and the true father of the American revolution. But on the British/royalist side, he was a man to be killed. And here with these famous words, Patrick Henry was saying that he wasn't afraid, that he was willing to risk death for liberty. This is why Patrick Henry was the main guy, not Washington or Hamilton, or Jefferson, or any of the others. It was Patrick Henry that got on the cross.

Paul Harvey on the declaration of independence

Paul Harvey clearly explained what happened to the brave men who signed the Declaration of Independence. This was the fate that American men faced for defying the English king in the 1770s.

Alexander Hamilton was a hero of color

If Thomas Jefferson called Alexander Hamilton a "creole bastard". How come Hamilton is not being celebrated as a hero of color? And why is a European-looking person depicted on the \$10-bill?

["while Hamilton is currently seen as a heroic figure, throughout much of the nation's history he was seen as "un-American" – a closet monarchist who hated the "great beast," the people, and a man whose dictatorial ambitions](#)

were checked by the champion of the common man, Thomas Jefferson."

"Jefferson believed that Hamilton favored 'a monarchy bottomed on corruption' and had betrayed the spirit of 1776. Hamilton was in essence a British agent, and this cunning immigrant from the Caribbean that repeatedly manipulated an aging, somewhat dim-witted President George Washington."

"John Adams, who also despised Hamilton, partly for good reason, would later join Jefferson in crafting a narrative which portrayed Hamilton in a most unflattering light. Jefferson's description of Hamilton as a plutocratic power-monger merged over time with Adams contempt for Hamilton's character. Adams believed that Hamilton suffered from a "superabundance of secretions" which led him to engage in unbridled whoring. Additionally, both Jefferson and Adams were nativists, and it perturbed them that this "Creole bastard," who was not quite "American," held such sway over George Washington, whom they also resented."

"Hamilton's reputation during the Second World War sank so low that he was seen by many as Joseph Goebbels in a waistcoat and breeches."

<http://universitypressblog.dept.ku.edu/uncategorized/alexander-hamilton-and-the-persistence-of-myth/>.

Thanksgiving

Thanksgiving was this Native American holiday of sharing 5 days after the winter solstice (December 26) Basically the Europeans would swap gifts and then on the next day the Indians would swapped gifts in the same way. What a coincidence. And it is sort of strange the way we do this whole Christmas eve, Christmas day thing. It is like someone is trying to make the Indian Thanksgiving coincidence go away through confusion. And then there is the way that the great George Washington moved Thanksgiving from December 26, to November 26.

The problem, the thing that was being covered over is this: Why did the Indians have this Christmas-like day of sharing on Christmas day if America wasn't actually re-discovered in 1492?

How long have they been in congress?

John Dingell — 59 years
Robert Byrd — 57 years
Carl Hayden —56 years
Daniel Inouye —53 years
Jamie Whitten —53 years
John Conyers — 52 years
Carl Vinson — 50 years
Emanuel Celler —50 years

Sam Rayburn — 49 years
Sidney Yates —48 years
Strom Thurmond —47 years
Wright Patman — 47 years
Ted Kennedy —47 years
Charles Rangel —46 years
Joseph Cannon —46 years
Don Young —46 years
Adolph Sabath —46 years
J Lister Hill —45 years
Thad Cochran — 45 years
Edward Kennedy —47 years
Patrick Leahy —44 years
Orrin Hatch —42 years
John Stennis —41 years
Ted Stevens — 40 years
Thad Cochran —39 years
Ernest Hollings — 38 years
Charles Grassley —38 years
Richard Russell —38 years
Russell Long—38 years
Francis Warren —37 years
James Eastland —36 years
Warren Magnuson — 36 years
Joseph Biden — 36 years

Carl Levin — 36 years
Richard Lugar — 36 years
Claiborn Pell — 36 years
Kenneth McKellar —36 years
Milton Young — 36 years
Ellison Smith —36 years

Realtors in high office

These politician leaders of ours. They are rather like the realtors that infest our real estate markets. They are mostly specialized in getting clients (getting elected) rather than actually solving problems.

US Declaration of Independence

"Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. — such has been the patient sufferance of these colonies;

and such is now the necessity which constrains them to alter their former systems of government.”

The weakness of our leaders strains belief.

Why are they so dumb. Well — With stupid leaders, bigger and more costly blunders are accepted by the public. Then more money can be siphoned off. Also with dumb leaders, the US military can be redirected to harm or to provide economic stimulus.

Sustainable Athenian freedom

I try to look at the big picture of the theft of beautiful Helen from the Hellenes of Hellenic Greece, then the utter degradation of the millennial Greek dark ages that followed. What must we do to keep the lights on? What must we do to keep the creeping idiocracy from taking over? All Americans over 50 can see what has happened to us physically over the past 30-years. Behold the physical manifestation of the mental idiocracy. Our young people are on average much shorter and less fine and delicate than in previous generations. And this applies to everyone regardless of color. Fine and delicate, like the distinctions their minds are less able to make.

The Crap US Constitution

1/ It permitted slavery in the land of the free and set our nation up for a civil war that people saw coming for 50-years.

2/ We are barely a democracy. We are a 1-in-1-million oligarchy checked and balanced by a 4-year monarch and 9-lawyers.

3/ Our constitution of the people is almost impossible to change.

4/ Our constitution was written by men who sent it for ratification without a bill of rights. And not only did they not include a bill of rights, they rode around on horseback to all the 13 ratifying conventions where they campaigned against the inclusion of a bill of rights. Why? How can it be?

Aphorisms

Bad democracy design a problem that makes all our other problems worse.

**Corruption made hard
Democratic revolutions made easy**

**Nothing harms tyranny like
improving democracy**

Tyranny can be seen as an absence of democracy. Wherever democracy does not rule our society, it is tyranny.

Republic = fake democracy

Bad democratic design is the mother of all the "free" world's problems.

Matters of public policy can only be decided by legislatures and never by judges

Federal monies are calculated by the number of voters, and non-citizens have no right to equal representation or to be counted in any census

**China doesn't want
America great again**

**If you can't attack the ideas,
attack the man saying them.
Make an Ad Hominem attack**

**Government is slow to react.
Then it tends to overreact.
Then it is slow to stop reacting**

**For an election to be valid,
all must agree on the rules.**

**Democracy should work without political parties
and the power that their non-elected bosses have.**

**When people listen to smears,
the bad politicians will tend to
drive out the good ones.**

Authority is normally overrated

People quickly defer to experts and far too rarely think for themselves. We should all trust our own opinions more.

Tyranny defined

The cut-off is when it is dangerous to organize opposition to government or its policies, or when people fear harmlessly assembling. If people fear doing these, it is a tyranny.

John Lewis

"When you see something that is not right, not fair, not just, you have to speak up. You have to say something; you have to do something."

The EU

Another redundant mostly useless layer of government.

Political Matrix Menu options:

Hands-ON government = fake democracy

Hands-OFF government = fake anarchy

Other

Kauai Island

1/ This will be America's witness protection and foreigner protection island. It will also be for distinguished retired military, distinguished police officers, firemen, and EMS

people as well as brave infectious disease healthcare workers and similar people. These other people will probably predominate.

2/ The island might have as many as 50 small fenced cantonment townships with restricted entry, like military bases.

3/ The smallish housing is owned by the public and life estates are rented for life at basic Midwest rents to the distinguished public servants as part of their distinguished service retirement package.

4/ There is a Walmart-like commissary that charges mainland prices for groceries.

5/ On Kauai, the protected residential townships are closed to visitors, except that offspring prior to their 12th birthday may visit the townships if invited.

6/ Island guests are generally restricted to parents, siblings, children, spouses, long-term partners, and long term friendships 15-years. Also, for security purposes, the actual names of the guests are not used for lodging bookings.

7/ No felony convicts, foreign born, or financially desperate guests will be allowed on Kauai. Also those with ties to vindictive nations or organizations as well as political and religious zealots of any shade should not be allowed.

8/ All retired police and military may carry arms. Also, the hundreds of township wings are particularly small and a bit spread out... and open only to residents. In other words, guests must stay in the visitor/ mixing areas with hotels, commercial and commissaries.

9/ The area north of Kekaha seems too low and tsunami vulnerable to be inhabited. This side of the island would seem a good location for the airport and guest town.
