2026 US CONSTITUTION

WE THE PEOPLE, we the flesh and blood people the nation called America, the land of the free, the beacon of democracy and liberty, and the avowed eternal enemy of monarchy, tyranny, enslavement, parasitism and darkness everywhere on earth: **WE THE PEOPLE**, we the flesh and blood people of the nation also known as the United States of America hereby establish this 3rd Constitution, this America 250 Constitution for our new broadly democratic government of the people, by the people, and for the people. This Constitution shall be the supreme law of the land, higher than any government body, or treaty, domestic or international, and higher than any other law. If this Constitution conflicts with any other document or body, domestic or international, this Constitution shall prevail. There shall be no foreign or international power over our government or our people. This shall include all laws, treaties, police forces, debts, and police/military/security forces. All nations should have and obey a similar, and similarly detailed set of rules for the conduct of their government and their people. The rights granted herein shall not be construed to deny or diminish other unmentioned rights retained by the people.

The powers of the government shall be limited to those powers that are absolutely necessary. The powers not given to government by this Constitution, nor prohibited by subsequent constitutional laws, shall belong to the people, as shall any ambiguity in any law. Text of this Constitution may be repealed and struck-through, but no text shall ever be removed. **WE THE PEOPLE** are the first 3 words of this Constitution. And this shall be held to mean the flesh and blood citizens of our nation, and not foreigners, and not fictional citizen entities like corporations and non-profit organizations. These three words (We the People) say very clearly that the ultimate power in our nation rests with the people, not the government the people established for themselves, and certainly not any fictional citizen entity or foreign group. This constitution shall always be valid in all courts in the land, and it shall trump all other laws, codes, rules, and customs. All of our citizens shall be considered a party to this American constitution of 2024, and none shall ever be allowed to say that they are not a party to this constitution.

We shall enshrine and long ponder the great words of Thomas Jefferson, principal author of our nation's great Declaration of Independence, and update Thomas Jefferson words as follows: "We hold these truths to be a self-evident, that all native citizens shall be treated equally under the law, and that all native citizens are endowed with certain inalienable rights enumerated herein, and that along with the specific rights enumerated herein, there are also general rights to life, liberty, and the pursuit of happiness and property: That to secure and regulate these rights, governments are instituted among men. And that all just governments (without limit) derive their just powers from the consent of the governed and from nothing else: That whenever any form of government becomes an impediment to the rights of the people, and other reasonable, fair, and righteous ends, it is the absolute right of the people to alter or abolish that government, and to institute new a government

as a majority elects. Prudence in human nature dictates that long-established governments will not be changed for light or transient reasons. Also, all experience shows that mankind is much more likely to suffer, while evils are sufferable, than to repair their situation by abolishing the existing problematic form of government they have become accustomed to. But when a long train of abuses and corrupt usurpations, pursuing invariably the same parasitic objectives evidences a design to reduce the people under absolute despotism. It shall be thought the right and indeed the duty of the people to throw off such government, and to provide new guards for the future security and benefit of the people. We shall also enshrine the great words of Ronald Reagan: "Almost all constitutions are documents in which governments tell the people what their privileges are. Our constitution is a document in which we the people tell the government what it is allowed to do." We shall also enshrine the great words of John F. Kennedy: "Those who make peaceful revolution impossible will make violent revolution inevitable."

Again, for clarity, America's Earth changing Declaration of Independence from 1776, gained for all mankind the following important anti-tyranny rights and distinctions:

- 1/ That the rights of men are self evident.
- 2/ That all men are equal.
- 3/ That our rights are inalienable rights, that cannot be lost or sold, because surely this is on the route to slavery.
- 4/ That governments exist primarily to secure the rights of the people.
- 5/ That all governments exist by the consent of the governed.
- 6/ That whenever any form of government becomes destructive to the people, it is the Right of the People to alter or abolish it, and to institute new Government as a majority of them elects.
- 7/ What that new government looks like is entirely up to the people to decide. And no people from the old governments should have any role at all in the new government. Because they are all more likely to be corrupt than some random person from the street.

"There is an imaginary circle drawn around every human being, over which no government should be able to step."

—John Stuart Mill

"I have no reason to suppose that he, who would take away my Liberty, would not when he had me in his Power, take away everything else."

—John Locke

"Whenever legislators endeavor to take away and destroy the property of the people, or to reduce them to slavery under arbitrary power, they put themselves into a state of war with the people, who are thereupon absolved from any further obedience."

—John Locke

"This nation, under god, shall have a new birth of freedom, and that Government of the people, by the people, and for the people, shall not perish from this earth."

—Abraham Lincoln

NA'1. OVERVIEW OF SENATES

1/ Our new democracy shall use 3-tiers of Senate, each with a 1-year term of office. They shall be called the: Sub-Senate, Main-Senate and Over-Senate collectively "the Senate". The representation ratios relative to the voting age population shall be:

Sub-Senate = 1-in-250 voters.

Main-Senate = 1-in-2,500 voters.

Over-Senate = 1-in-25,000 voters.

2/ The people elect the Sub-Senate from folks they know as neighbors. The Sub-Senators then elect the Main-Senate from their ranks, from people they have been working with in the Sub-Senate. And the Main-Senators elect the Over-Senate from their ranks, from people they have been working with in the Main-Senate. In all elections, face-to-face, in-person contact as either a neighbor, or as a Senate colleague will unavoidably be the deciding factor in who gets elected and elevated as our leaders. So no longer will campaign spending and media coverage have much power over the election process. In fact, our new democracy has been designed to spoil the value of campaign money in several ways — along with the corruption that campaign spending always brings to the process of electing leaders and making group decisions.

3/ Assuming a nation of 250-million voters, the million-man Sub-Senate will inform and administer. The 100,000-man Main-Senate will be the main decision making body. And the 10,000-man Over-Senate will manage:

a/ The directions for Government to move in.

b/ The budgets for the 10 sluices of the Main-Senate.

c/ The apportionments of Government duties.

d/ A new supreme court, acting as the judges thereon. The Over-Senate, it is not supposed to have a lengthy procedure for access to it's rulings, like the old US Supreme court.

e/ A Sub-Senate recommended veto over the Main-Senate for all matters of constitutionality.

4/ Our 100,000-man Main-Senate will have 10 "Sluices" (10 specialized decision making channels). These Sluices will make all of our national laws, and replace both the legislative branch and most of the executive branch of the previous 1789 government. This constitution has a great many new checks and balances that prevent the consolidation of Senate power. However, one check of the old system shall be cancelled. This is the separation of Legislative and Executive power. In other words, our old democracy had a large group (committee) of elected people designing government activity, and another group of appointees under a hugely distracted 4-year monarch executing/ making/ building-out the design. Now we will have 10-specialized Sluices that both design and build-out for government. Also, government spending plans shall generally be approved in one year, and implemented a year later, when the entire Senate has been replaced. So the large group of people coming up with the plan are different from the large group executing/ implementing the plan. Also during the 1-year interval, the plan shall stand for public comments, Senate revisions, and other sorts of plan polishing.

5/ Without exception, all elected officials at all levels of our nation's Senate shall serve for one year in their office. Then without exception all shall cycle out of that position. 10% shall be elevated to a higher national Senate, but 90% shall cycle out of the national Senate at the end of one year of Senate service.

6/ This type of government shall be called a "broad democracy" or a "25,000 democracy", in reference to its narrowest representation ratio. A democracy's representation ratio at its narrowest point is perhaps the most fundamentally important aspect of a democracy's design. The prior constitution shall be regarded as a 4-year monarchy checked and balanced by a 1:3.3 million Senate and a narrow oligarchy of 9 appointee lawyers.

7/ As we will have 1-million Sub-Senators, and 100,000 Main-Senators, we will have no shortage of Government decision makers and higher-level administrators. For this reason, we can say that no Government policy decisions shall be made by anything less and smaller than a grand jury of 99 Main-Senators, all of which have been elected to the Sub-Senate and elevated to the Main-Senate. Where important decisions are to be made, such financial aid for an ally in need, school voucher amounts, and funding for blueberry research, these must stand alone as a topic and the entire sluice must read the text under monitoring before voting on the matter. People who have not been elected and confirmed to the Senate at some point in their life shall not be allowed to participate in making policy decisions or managing parts of our Government, except to give testimony and advice.

8/ It is thought that having a national Senate with a million elected people in it to randomly draft from: It is thought that this is a huge step in the direction of good government.

9/ In a nation of 250 million voters, there will be 1,000,000 neighborhood "Nomes" (of 250 voters each), and 5,000 Centi-Nomes of 200 Sub-Senators each.

10/ Each Centi-Nome shall serve as both a venue for secret Sub-Senate voting, and for subtotaling of Sub-Senate election votes. Thus, in our nation, assuming 250 million voters:

a/ The Nome polling places each total-up 250 voters.

b/ The Centi-Nome total-up 200 Nomes.

c/ The nation tallies 5,000 Centi-Nomes.

d/ $250 \times 200 \times 5,000 = 250,000,000$. Small steps like this are used so that hugely redundant audits are relatively easy for everyone to do at each stage of the election/voting process.

11/ We shall enshrine the words of Thomas Paine, from Common Sense: "the necessity of a large and equal representation: There is no political matter which more deserves our attention. A small number of electors, or a small number of representatives are equally dangerous."

12/ We shall enshrine the words of the Massachusetts constitution that "In order to prevent those, who are vested with authority, from becoming oppressors, the people have a right... to cause their public officers to return to private life, and to fill up vacant places by certain and regular elections."

Here in the late 1700s, to be clear, regular elections meant annual elections. And never shall a real democracy have anything longer than annual terms of office. For what if we all changed our minds after 1-year, but have elected a 4-year leadership thoroughly "invested" in a particular approach

that most people have come to disfavor? There are a number of problem with long terms of office:

- a/ They lead to Government marching longer and further down the wrong road, a tremendous problem historically.
- b/ It is thought that our Government will think and work faster if everyone has only a year to push their ideas. The ultimate goal after all is smart and more responsive government, not a pleasant time in office. And all the Senators get a year. It is thought better that we give 4 times as many people a year than we give 1/4 the number 4-years to make their changes.
- c/ With 1-year terms of office we can allocate funds in one year, and spend them in the next with a completely different group of Senators.
- x/ For the above reasons, we shall think and say that never shall a real democracy have anything longer than annual terms of office. Never shall our leaders have 2-year, let alone 4-year terms of office. These leisurely terms of office are a thing of slow, and most of all fake democracies mastered from the outside. Multi-year terms are simply not a thing of a dynamic democracy — a government that is an attentively obedient leadership for the people.

NA'2. SUB-SENATE ELECTION RULES

1/ Nothing, nobody, not group and no emergency shall ever delay our elections. This shall include all sorts of: natural disaster, war, invasion, political unrest, economic crisis, civil unrest, epidemic, computer virus, scandal, rioting, volcanic eruption, worldwide epochal-lyse of a tsunami, and all other sorts of crisis event. None shall ever be an excuse for delaying any election. Even if aliens suddenly arrive on Earth from outer space on election hour, elections shall not be delayed. First we vote, then we meet the aliens. So the first rule of elections is that elections shall never be delayed for any reason. This is because throughout human history, the delay of elections often goes from days to weeks to years, decades and even centuries (as with the Roman empire). So the first rule of elections is that there is a sacred line, and this line goes at the start of the slippery slope where elections get delayed at all. So we shall have it that all leaders who cross this line and either propose, or vote in favor of, or make public statements in favor of delaying elections, all of these people (even if it is our entire Senate leadership) shall be subject to a sentence of life in prison, regardless of any illustrious career. Also, delaying elections is a mission-critical, game-over sort of thing for our democracy. Illustrious careers built on infinite achievements should never mitigate charges of trying to delay elections. In other words, nobody ever delays, or attempts to delay elections for any reason ever, or they go to jail for life, regardless of who they are.

2/ In the matter of elected leaders delaying elections for any reason at all, the people are supposed to all say to their elected leaders: "You are not obeying our great constitution, and for that reason, we are all going to ignore you and have our annual election anyway on voting day as usual. And if you deploy any armed men to prevent the people from voting as constitutionally required and guaranteed, we the people shall rise up and kill all these anti-democratic henchmen along with you as our civic duty". Furthermore, we shall treat all conspiracies to delay elections, no matter how big or small as

a sort of cancer to the body politic. Also, we shall remove the cancer's margins. Thus everyone even slightly involved with delaying elections, and everyone who publicly said even one word slightly in favor of delaying elections shall be considered a full conspirator. Future generations are warned to away from the line.

3/ During times of severe deadly epidemic (such as bubonic plague), when people gather to vote, they shall meet outside and maintain 12m social distancing, but voters shall never wear any mask or head covering while they are being filmed voting. Also, where people filming the vote are wearing masks, they must have their name in big letters, and their voter number in big numbers written clearly in fat block letters on their mask and their other voter information attached to their chest. This social distancing creates a voting chute that is over 840m long with zig-zagged people on either side 3m away. During other lesser plagues we might vote at 5m social distancing, or 2m social distancing. However, social distancing shall be the only anti-infection measure we take when we briefly meet to vote in times of epidemic.

4/ Except in the first Senate elections, the current Sub-Senator shall officiate and referee their Nome's voting process according to the rules herein. If the current Sub-Senator is ill, his predecessor shall officiate. If this man is ill, then his predecessor shall officiate. The standing Sub-Senator shall call people to line up for voting. He shall:
a/ Give the 15 and 5-minute warnings where he says "I call the vote where we elect our Senators. All line up, 15-minute warning". He shall use a megaphone if possible, and this Senator's megaphone shall be the only megaphone that can be used at an election.

b/ Call the people to follow and start voting while walking through the video voting gauntlet. The sitting Senator shall also call for the reversal of positions, where the voters switch to recording, and the people who were recording start to vote.

c/ Administer the various Nome discussion forums.

d/ Submit voter's videos to the recorder's office with a recorded video oath as to their accuracy, along with all of the 125 witness videos.

x/ It shall be a felony if any non-Senator officiates any election. Also all elections officiated by non-Senators shall be invalid. Those who officiate the old corrupt election system shall be given no more cred than anyone else.

5/ It shall not be possible to re-elect Sub-Sub Senators for consecutive terms, because each sitting Sub-Senator is responsible for administering the election of his successor at the end of his term. Under these circumstances, running for office would be a conflict of interest. Also, instead of Senate success being a thing about serving many terms, it shall instead now be a thing with getting highly regarded, and highly ranked in one's Sub-Senate voting group ("Centi-Nome"). This is because the 50% highest get confirmed to the Senate, and the 10% highest get elevated to the Main-Senate. Also, there shall be no community campaigning by our elected Sub-Senators, except within their Centi-Nome voting group of 200 Sub-Senators. These are people in our part-time Sub-Senators that are working with the Sub-Senate one or more mornings a week. (Our Senators are supposed to work mornings more than other times because people are smarter in the morning). All Senates sessions start at 9:00

unless another time is elected. Where the Senators will be working after lunch, lunch shall be from 12:00 to 1:00. Again, instead of there being a competition to get elected many times: instead, there is a competition to say or do useful things, so as to get confirmed as a Senator, or better, to get elevated to a higher Senate.

6/ We shall have a mandatory annual census at the same time as we vote. Therefore everyone in our nation must both attend the annual census and attend the annual election (even if they are not voting). All voters and everyone else at the annual census shall be 3D face scanned before being issued a public identity card and number for the following year. This government issued identity card/number must be shown to all the other people in the voter's Nome in order to vote. If this face scan is insufficient to guarantee identity, then the Sub-Senate may elect to require that everyone also be finger print scanned, palm print scanned, 3-D hand scanned, and/or Iris scanned. The identity of our voters, and everyone in the annual census must be certified and guaranteed.

Everyone in our nation (including all foreigners) must participate in the census as one category or another (citizen, non-citizen, medical, elder, incarcerated, or overseas live-stream). To do otherwise is to permit foreigners and dark actors in our elections, our censuses, and our nation. And what people live in anonymity and darkness but criminals who must hide and camouflage their parasitic activities and their existence, like ticks do. No. Everyone must be verified and video recorded/photographed annually, and to do otherwise is foolish from the standpoint of crime prevention. People shall have a right to live far away and off grid, but everyone must still come in and take part in the annual census and attend the vote either as a voter, or an abstainer.

All non-citizens shall be identified and counted in the census as non-citizens, and they shall never vote, or be involved with the voting process, or given any voting rights. Senators, people working in government, or involved in the voting process who attempt to either involve non-citizens, long-term dole recipients, or convicted felons in the voting process, or give non-citizens voting rights shall be tried for felony democide, or capital treason, a per count crime, so that people who help more than a few people vote, will go away for life to prison or they will be executed.

7/ All voters must use a valid ID verified 20-digit voter number (in groups of 4 like on a credit card) in order to join a Nome, and also to vote in that Nome. Voters with common names like John Smith must use a distinguishing middle name that may include a number (such as: John Quincy152 Smith). In fact, all voters must have both a unique voter number, and a 3-part name that is unique nationwide. Voters shall not be required to own property, or have a physical address. They shall however be required to prove their identity and full citizenship to vote. Also, it shall be thought a well-worn path to disaster when a democracy allows public aid recipients to vote. However, this shall not include support for mothers and their children, or government pensions, but it shall include all unemployed and all poor aid recipients.

8/ Once the Senate has mustered and fully propagated as called for herein, the nation's voting hour shall occur each year, at 10:00am on June 19, the day that the insanity of slavery in the land of the free first began to end for the slaves

themselves. Until our land of the free fully honors and exalts its greatest act of freedom, that act will seem half-hearted and incomplete. This especially in consideration of the fact that it took an incredible 155-years for this important day to be honored in any official way at all by the so-called "land of the free". Now we shall honor 6/19 (the real most important day in Black history, not the cover-up date of 1619), where it most matters, where it will have the greatest effect on our democracy. For here, we shall marry the celebration of slavery's end with voting each year. Thus the celebration of freedom day will include the act of voting. However, no alcohol shall be sold or given away from noon on June 18, to noon on June 19.

9/ We shall push for June 19 to be a worldwide voting day and holiday. Having an international special voting day like this, once per year will have a number of positive effects:

a/ It will raise awareness of slavery worldwide and make it harder for slavery to continue on Earth. It will also make it harder for men to bring slavery back to mankind.

b/ If everyone around the world is voting on the same day, it makes it much harder to delay elections by a few days, which then becomes a few months and then a few years. Then this becomes forever as was the case with the Roman empire.

c/ Two days before the summer solstice is a much better time for voting than November. People tend to be happiest and most optimistic due to the long days around the summer solstice. This while people tend to be at their unhappiest and least optimistic due to the shortening days of November. And certainly it was no accident that our old corrupt front government rolled the clocks back a week before elections.

Did we pick early November for elections, or did our someone else who wants us weaker do that for us?

x/ If having an international voting day keeps just one country from delaying elections, in each decade, it's worthwhile to do.

10/ All of the following shall be prohibited from our elections, and every person arguing for them, implementing them, or attempting to change the system to allow them shall be considered corrupt, or foreign spies and enemies of our dear freedoms:

a/ All forms of unmonitored voting. All elections shall be conducted with observers. Where election observers are harassed or ordered around by the people conducting the election, or counting the ballots or vote, these people shall be considered either corrupt or foreign spies and enemies of our dear freedoms.

b/ All use of printed paper ballots, or paper ballot receipts or where the voter's selections are printed by means of a machine. All paper ballots must be handwritten by the voter on home-printed "PDF" form ballots using a paper-bleeding ink pen of highly varied ink colors, pen balls, and nano objects in the ink.

c/ Ballots counted anywhere but the polling place, immediately after the vote, and on video by a long line of people. There shall be no ballots counted behind closed doors. All attempts to count ballot boxes away from the polling place shall void, and the person calling for this shall be charged with felony election fraud.

d/ Voting machines of any sort. All voting machines shall be thought to of as tools of concealment and fraud, the election version of the magician's cape, or the black box.

d/ Elections conducted by the same people every time.

e/ Long elections that take more than 30-minutes to conduct, for this gives valuable time to election corrupters. Thus there shall be no form of so-called early voting, or late voting. All voting shall take place over 1-hour nationwide.

f/ Voting my mail. All ballots cast by mail shall be void under this constitution. Those calling for mail ballots shall be considered spies and enemies of our democracy.

g/ Ballot drop boxes. All ballots cast outside of a regular polling place where hundreds of people gather to vote shall be void under this constitution. Those calling for ballot drop boxes shall be considered spies and enemies of our democracy.

h/ Any form of voting where ballots are not counted where they are cast. This especially includes all forms of voting where ballots are driven from one place to another to be counted. Each such transfer from one place to another is an opportunity to change-out the real ballot boxes with cloned ballot boxes.

j/ Any mention of political party membership in any candidacy marketing media or on any ballots, or in election speaking. Also, no ballot shall be organized in such a way that people can go down the line and vote for the members of any political party. Also political parties shall not be allowed to have any money of their own, or payrolls, or bank accounts. Political parties may exist, but they must remain informal. Political parties can neither have money, nor receive money, nor spend money. Where this occurs, or where people try to change the system to allow political parties to collect money, everyone involved with calling for this shall be charged with corruption.

Also, political parties shall not have the right to kick people out of them, or to regulate who uses their names. This is so that by design, political parties don't mean very much. We do this intentionally and by design to reduce the power of political parties.

x/ It shall be thought that the main outcome of all these things above will be a great reduction in election corruption

11/ All forms of voting machines/ robots/ scanners/ ballot counting devices shall be prohibited in our democracy and in all of its sub-democracies. In fact it shall be considered felony democide to:

a/ Advocate or campaign for the use of voting machines or robot ballot counting tech.

b/ Make, sell, or attempt to sell voting machines or robot ballot counting tech.

c/ Deny that voting machines and robot ballot counting tech are a first step towards people being able to corrupt our nation's elections for massive corrupt profit.

12/ Mail ballots shall be thought to be especially pernicious because of the way they can be signed like a blank check in front of a vote buyer or his agent, with the vote seller not quite realizing that they have committed a felony by selling their vote for some cash, or drugs, of time with a prostitute.

13/ All forms of mail ballot and voting that is not in person shall be prohibited in our democracy and in all of its sub-democracies. In fact it shall be considered felony democide to:

a/ Advocate the use of mail ballots, absentee ballots, electronic ballots, or ballots where people do not use a pen to

make their voting choices.

b/ Make, sell, or attempt to sell mail ballots, absentee ballots, electronic ballots, or ballots where people do not use a pen to make their voting choices.

c/ Deny that mail ballots, absentee ballots, electronic ballots, or ballots are a first step towards people being able to corrupt out elections for massive profit.

d/ Advocate for voting by foreigners, or felons or voting without government issued ID.

14/ Government issued voter status identification shall always be required to vote. This is to protect our democracy from voting by felons, non-citizens, high-school drop outs, and from people who are too young or too old to vote. Requiring ID shall not be thought to be racist in anyway, but merely the requirement that we need in order to preserve the integrity over our election system.

15/ Voter identity shall be government ID verified at two points in the election process. The first identity check (where the voter must show their government issued identity documents) shall occur when the voter joins a Nome (Greek Nome = district). The second identity check (where the voter must show their government issued identity documents) shall occur when the people actually cast their vote on video. Here voters will print their Name, voter ID number, and election choices on an A4, or letter sized sheet of paper. Then voters will hold that sheet up to their chest as they walk through a video gateway with 125 cameras running. Thus each voter's face gets recorded by 125 people with the voters name, ID and choices. The system may also use face-recognition tech.

16/ Except in the first 183 days of this Constitution, all voters shall be required to use various Senate approved identity verification systems when their Nome verifies that the person is a citizen and not a convicted felon, and that they are legally allowed to vote. Use of these various identity verification systems shall be required to join a Nome. If the Sub-Senate elects: the technologies may include: 3D face scanner, finger print scanners, palm print scanner, iris scanner, and voice recording and comparison.

17/ All voters and abstainers shall scan themselves into the ID system the Senate requires. They shall also enter their public ID number and state their name, address, and voter number to the recorder's video feed. Nothing may be worn on the head, hair must be pulled back. All eyeglasses and head coverings must be removed during voter log-in.

18/ Regardless of whether Sub-Senate voting is secret or open, everyone going to vote shall be recorded entering the voting area, and then either stepping through the video voting gate, or casting a secret handwritten pen and paper handwritten ballots.

19/ The reason we vote in secret is to impede vote selling — so vote buyers and voter intimidators can't tell if their efforts worked or not. However, today we live in an age of nano-cameras, like those in our handy pocket telescreens. So it seems impossible to assure that vote sellers are not wearing a nano-camera or snapping a photo of their ballots in order to sell their vote. Therefore, we might as well stop voting in secret, and instead vote totally openly on video. At least we can entirely stop corruption of the counting process and of the voter rolls. And if we all vote at once, we can totally stop multi-voting.

20/ Every aspect and step in the voting/election process shall be transparent, video-recorded, forensically verifiable, and open to regular spot inspection as directed by the Sub-Senate. No aspect of the election process or Senate voting process shall be confidential, except which Senator voted for what. That shall be confidential. All voting shall only occur in person, and live third party recorded on video. Proxy voting shall only be allowed for essential services workers and those laid up in bed. Everyone proxy voting shall hold their proxy's sheet of printer paper (with "Proxy: their name visibly printed on it") up to their chest and walk through the video voting gantry. It shall potentially be a capital offense and extremely easy to convict anyone attempting to censor anything having to do with claims of voting corruption.

21/ The voting site should be paved, such as in the middle of a blocked-off street, but it doesn't need to be paved. Wheel chairs and crutches shall always be allowed at the polls.

22/ To reduce vote buying and voter intimidation, we shall have it that:

a/ For police, the number one non-emergency response item shall be the investigation of all claims of vote buying and voter intimidation. So there will be a great deal of police attention and heat.

b/ Vote buying and voter intimidation shall be charged by the count and people involved with buying or intimidating four or more votes will normally go away for life. So there will be very high penalties.

c/ The Senate will have generous rewards for those who report vote corruption schemes, or video record people threatening voters or offering to buy their votes. So there will be many people going around trying to sting people for the generous Senate rewards.

d/ We shall learn from Ancient Rome. We shall not allow voting by the people getting caesar rolls and other benefits for the poor. Also, we shall all think that people who can't make a living on their own: all these people shall be thought incompetent to vote until they have lived on their own for 10 years.

23/ Where people are threatened, intimidated, or unsafe voting openly, or vote buying/ selling schemes are widely alleged, that Centi-Nome may elect for certain member Nomes to vote secretly. However, where voter intimidation is alleged, the police and the government must make it their #1 most important non-emergency response item to neutralize all voter intimidation and vote buying as a critical threat to our democracy. The ideal state is where everyone feels safe to vote openly. Whatever punishments need to be handed down to stop people from buying votes and intimidating voters, they must be handed down.

24/ Participating in vote-buying, vote-selling and election corruption schemes or Intimidating voters shall include:

a/ Election workers.

b/ Attempting to direct or hindering election monitors and election related observers, or interfering with election administrators.

c/ Attempting to bribe election officials, or the media about voting.

d/ Preventing or hindering candidates and their supporters from campaigning.

e/ Inciting violence, or directing a mob to violence or disruption, or even organizing heckling and chanting to drown out the voice of candidates.

f/ Harvesting apathetic voters.

g/ Abusing one's high position in government to campaign for others.

h/ Impersonating a politically important person.

i/ Destroying or attempting to destroy ballot boxes, or tampering with ballot boxes.

j/ Tampering election materials or mechanisms.

k/ Carrying a weapon to a campaign rallies, voter registration, or the polls.

25/ There shall be no more FEC, or Federal Election Commission, or Commissioner of Canadian Elections. This role shall be taken over by the Sub-Senate.

26/ Until the Senate produces a database and system for identifying people as genuine native born citizens. Everyone who immigrated to our nation, and everyone who speaks with a foreign accent shall be prohibited from voting in our elections, and from serving in the Senate. This constitution calls for voting to be a birth right in the land of the free. We do this because then we can tolerate more immigration when the immigrants are never voting for as long as they live. Only the children of immigrants shall be allowed to vote, and then only if they can speak without a foreign accent.

27/ Unless changed by the constitutional amendment process as stated herein, those who vote or otherwise participate in our nation's elections who are not native born citizens (even if granted citizenship), shall be sentenced to 10-years in lockup per count of illegal voting and 20-years if they corrupt or attempt to corrupt the election system.

28/ The problem with mail ballots, transmitted ballots and all sorts of voting that is not done in person is that these ballots are all easy to sell and falsify. Therefore all forms of mail ballot, transmitted ballot and voting that is not in person shall be prohibited in our nation. The problem with voting machines is that they can very easily be hacked. Thus, these are a black box for cheating our democracy's elections. Therefore, all forms of election machine shall also be prohibited. Also, if paper ballots are used, the entries must be hand written by the voter. This is because the micro-analysis of hand writing combined with the tens of thousands of various re-usable voting pens/inks is what makes paper ballots secure. These will be pens with 10 different ball point sizes, 40 colors, and 500 different nano markers. Indeed, the term paper ballot is a misnomer, and these ballots should be called handwriting and unique pen ballots. There shall never be ballots where printers print the selections of the voter.

29/ Again, no immigrant shall ever vote in our elections, and if they do, they shall get 10 years in prison. Everyone voting in our elections must speak English without a foreign sounding accent. This includes the children of foreign people, who have moved to our nation, and grew up among foreigners and do not speak the national language properly. People who speak with a foreign accent, shall no be allowed to vote in our elections. Unless the Senate amends this constitution, all the people in every Nome shall be required to reject all people who speak with a foreign accent from voting in our nation's elections. Also, if foreigners ever get the vote, then we must have a way to keep tight-knit foreigner communities (like the

friends of Palestine) from electing their people. The author of this constitution is unable to think of a way to completely prevent this, and this the second most important reason why this constitution doesn't allow foreigners to vote. The first reason is to repeat: that more foreigners will be tolerated this way.

30/ All elections shall take place exclusively in the national language of English, and all instructions for all elections shall only use the national language of English, just like all government services from now on must be delivered in English exclusively.

31/ Everyone voting shall be required to speak the national language without a foreign accent when they vote. If they don't speak with the people of their Nome and demonstrate that they speak the language without an accent the Nome is not supposed to count their vote. There is no jail time associated with attempting to vote with an accent, unless the voter insists above the will of the Nome to say: "We all think you have a foreign accent". The threat of 10 years in prison is for all the immigrants that walk the video voting line with a ballot to their chest despite being immigrants. The 10-years in lockup is a verify after the fact sort of thing. It is thought that these two systems for preventing illegal voting will together eliminate nearly all voting by foreigners and convicts.

32/ It shall no longer matter what a person thinks their citizenship is. If they were born in another country and moved to our country, they shall not be allowed to vote until the Senate passes a constitutional amendment. This is a completely black and white rule that completely eliminates the tens of millions of people that have come illegally into our nation from participating in our elections. No longer will these unauthorized foreign people have any vote over who is in our government. And if they do, They shall go to prison for a decade.

33/ Regarding those who push to make it harder for citizens to vote (apart from reasonable identity verification), and those who work to make it easier for foreigners to vote: These people may be charged with democide, just like those who work to narrow our democracy. This shall also be so for those attempting to make secondary school or secondary-equivalent trade school more or less difficult than stated herein as a means of distorting the results of our nation's elections.

34/ Only the national Senate shall have the ability to make policy regarding election law. When anyone else attempts to make election law, on color of authority, it shall be considered both void, and democide.

35/ Only native born citizens shall be allowed to vote in our nation's elections.

a/ It dilute the vote of our nation's citizens, its people, when we allow immigrants to vote.

b/ We invite foreign backed coups and takeovers (slow coups) when we allow non-citizens to vote.

36/ Now that iPhones and micro cameras are so easy to get into the voting booth, there shall be thought no benefit to secret ballots. This is because the people buying votes and intimidating voters can simply require the voter to take a video of how they voted. So we must ask: "What is the point to having secret ballots anymore? Why not all vote openly on

video all at once nationwide in groups of 250 voters and eliminate the many other greater forms of corruption, like:

a/ Fraudulent counting of ballots.

b/ Fraudulent addition or removal of ballots.

c/ Voting by mail.

d/ Voting machines.

e/ Voting by foreigners who are afraid of the video.

f/ Voting by felons who are afraid of the video.

g/ Voting more than once.

h Elections that are not believable.

i/ Campaign money.

j/ Media corruption.

k/ The people having to wait years to have an election. The people should be able to elect a new government at any time, whenever 50% of the recent electorate musters a new democracy in the streets.

37/ There shall be no spending authorizations or bond authorizations by plebiscite or referendum as these can be easily corrupted by the media as happened disastrously in California in recent decades. In other words, this constitution prohibits the use of plebiscites and referendums and requires that our nation's immense part-time Sub-Senate make the decision instead.

38/ Wherever there are corrupt elections, there is a corrupt democracy. There's no way to get an honest democracy from corrupt elections. Somebody is going to come along and quietly grab control behind the scenes. Then they are going to run the democracy in a way that suits them.

39/ All of our precious voter roles shall be kept like treasure in the next key over from the one indicating how much money everyone has. This voter information (and the information about how much money everyone has) this gets kept in 4 places:

a/ The county recorder system.

b/ The national treasury department and the relevant sluice of the Main-Senate

c/ The CCS.

d/ The Sub-Senate.

40/ Everyone shall have two taxpayer ID numbers, one public and the other private. When people vote, they must put their public ID number on their ballot under their name and above their email address and physical address, and this information shall be open for everyone to look at and verify ID. From each person's ID, the other people in their Nome can check the recorder system voting record.

41/ No paper ballots may be countered after 5pm on election day, or on any following day.

42/ We shall recall the words of Samuel Adams: "Let each citizen remember at the moment he is voting... that he is executing one of the most solemn trusts in human society."

43/ Where they are used, all paper ballots shall from now on be printed by means of an ordinary laser printer on ordinary white paper at home by the voter or someone else. Neither Government nor any fictional citizen organization shall any longer be involved with printing ballots on paper and sending these around. Instead all the voters (or their neighbors) print their own ballots. There shall be nothing sacred or official about government printed ballots. Where paper ballots are used, the people shall be free to use their own ballots or to download a ballot form. Also, if a candidate is missing from

any downloadable ballot, then the people shall be free to use their own ballot PDF, so long as the standard ballot format is used.

NA'3. SUB-SENATE ELECTION PROCEDURES

1/ On voting day and during voting hour, all the voters of the nation shall assemble into neighborhood Nomes of 250 citizens eligible to vote. In these Nome elections, the people shall make a somewhat shoulder-to-shoulder line (with many turned around 45° to the right). All of these people shall have their cameras on. Then the voter that is on the right-most side of the line relative to the direction everyone is facing shall affix or hold up their paper ballot to their chest, and walk up the line, in front of all the people recording. (It shall be allowed for the voter to record the line of people recording them, but it shall not be required.) All voters shall walk straight past his Nome-mates who are recording the vote. The voter shall walk straight, but turn his upper body diagonally towards his Nome mates as they record him. Each shall walk his vote up, ~2 seconds behind the last person voting. Then the next person does the same thing. At 2 seconds per voter, it will eventually take (after a number of elections) about 8-to-10 minutes for all 250 people to vote. And there are over 200 videos of everyone's vote. If practical, the voting line shall be straight, but it shall not be required. There shall be no changes in the time for voting hour, there shall be no other method of voting except voting on video, or voting on handwritten paper ballots using highly varied random pens and inks. It shall not be allowed to call for other methods of voting, just as it is a crime to call for rounding up the guns of the people.

2/ All voters shall use an open source vote counting app on our phone/ telescreen to count the votes from their video. They may also compare this count with the other counting apps that the other voters are using. They may also "eye count" the videos Then everyone in the local "Nome"= division of 250 voters signs off on the count/score, which may be double-checked by anyone voting in that nome. So here is how we do vote counting in a way that can't be corrupted.

3/ Each year, everyone's Nome boundaries (and Nome numbers) will shift, and it will be normal for people to be grouped with their neighbors on one side of their home in one year, and their neighbors on another side of their home for the next year. Thus people will vote with around a thousand neighbors over the years.

4/ All voters shall be required to have their name, voter ID number, and election choice(s) printed in black and white on an ~A4 sheet of paper that they tape up on their chest or hold up on their chest with both hands. Everyone is supposed to use a standard election computer form and personalize their own print file for their voting data. People are supposed to use a printed sheet, but it shall not be required if it is not practical. Voters shall be free to hand write their voting sheet on paper in clear block letters using a heavy black felt marking pen. However, the hand writing must be clear and unambiguous, or the ballot shall be disqualified. Each voting site is supposed to have computers, printers, paper, and incidentals for the voters to print their ballot papers before the vote starts.

5/ All vote counting software shall scrape the data off the voting papers and superimpose it as text over the video stream to facilitate data verification. This text shall follow the people around on the video. Everyone recording the election sees printed names superimposed on their telescreen, along with check marks about the voter identity being matched and also the voter's abstention status, if any.

6/ As we will have ~250 video records of every Nome election, our elections will be almost impossible to cheat on. It will certainly be almost impossible to falsify the count.

7/ For the purposes of candidate/ Senator identity verification, each Nome candidate shall be required to appear in person, and vote for himself on the video record, so that he is indicated as the candidate, automatically by the conjunction of the matching name and face on all 250 voting videos. Thus, the election video files also serve as record of who was actually elected by the people. Also, candidates cannot be one of the first 50, or last 50 voters. All election files shall be redundantly archived and kept by the person filming, the county recorder system, and the Senate's election recording system.

8/ It is important to realize that every vote of every voter in every election is recorded redundantly by ~250 voters and by the election system. These people are supposed to keep their videos for at least 7-years, for later review. This formation shall be password protected. The county recorder system shall also keep un-tallied copies of the voting videos that can always be duplicated and re-tallied at a later date. However these re-tallies shall never overturn a prior election. A search warrant shall be required to access the county recorder system's voting videos and voting data. The public however, shall not have access to the county recorder system's election voting videos and voting data without a search warrant. Also, except for Nome-mates questioning election integrity right after the fact, it shall be the crime of democide when people share and traffic in voter information about how people voted, or secretly possess copies of voting records. It shall also be democide when people try to punish others for how they voted, or attempt to change how people will vote.

9/ We shall have a great many telescreen apps/ tools for scanning the text on everyone's standardized, home-printed ballots. Where possible, these are all A4, or letter-sized sheets of printer paper from changeable text PDF forms. The print outs get held up to everyone's chest and filmed on the voting video. The apps will convert the printing on the video, into virtual ballots and then total up the vote tally. And everyone's phone does this in parallel, block chain style. And people can go back and check the video. And there will be ~250 video records of everyone's vote.

10/ Every vote in every election will be recorded on video by ~250 people depicting the voter's face with a ballot held-up, or stuck-to his chest. So the video evidence of foreigners voting, felons voting, high-school drop-outs voting, and multi-voting, will be incontrovertible, and it will almost assure conviction if brought to trial. Also, every ballot will be audited at 3 or potentially 4 levels (Nome, County recorder, National Sub-Senate, and county police responding to voter complaints). Also we will have long incarcerations for certain

types illegal voting. Thus foreigners, felons, and others not allowed to vote will be quite afraid to vote illegally.

11/ If a national plebiscite is called, our nation's 250-million voters, will be expressed as 1-million Sub-Senate level scores, sub-totaled into 5,000 Centi-Nome level scores, then 50 "tallying states" corresponding to the old states (which old borders shall not be built over by any structure, for a final tally involving only 50 parts. Thus the people can easily and quickly verify each small section of a national tally. Thus if we ever need to have a national plebiscite, this is how we shall do it.

12/ There shall be a semi-automatic mode to each voting app. The user taps the screen and a new voter, or pair of voters pops up and is progressively counted by the system.

13/ The Senator organizing each Nome election shall say: "Here-ye, here-ye, I have a vote count of X for Smith winning over a vote count of Y for Jones, and Z for Johnson. Does anyone here disagree? If four or fewer people disagree, the matter shall pass automatically.

14/ The election apps shall also take each voter filmed at each Nome election and match their face with the recorder's face recognition files for that Nome. The entire vote gets completed, then the images are presented as a scrollable stack of short looping video files with text overlay on the sides of the screen indicating the verification of the person and how they voted by the voting system. Also, maybe there is a green/red dot, a red dot means that means the voter must be personally verified. The voting app thus helps us with three areas:

a/ It identifies people as eligible to vote.

b/ It tallies the vote in a way that is easy to match with reality.

c/ It gives us a record for forensic resolution of election corruption claims.

15/ Once the Nome accepts the vote, the system emails a score report to all 250 voters in that Nome. The system shall also send a report to each of the 200 other Nomes in that Centi-Nome, and to the county recorder system.

16/ As a voting security measure, we shall have it that during voting time, on voting day, from noon to 1:10pm, the non-emergency internet and the various municipal and wireless non-emergency cellular network functions shall stop working for a few minutes, while everyone is voting and while their counter is working. Then, when the elections are all reported, then the internet is supposed to start working again.

17/ When people are walking down the voting chute, they are supposed to be looking a bit left to right and back again so everyone's face can be better verified.

18/ The score for each voting location will be ready in moments. Then everyone at each voting site can compare their telescreen data. They can also go back and look at the video and count on pen and paper. But election results shall require uploading in 30 minutes or less nationwide.

19/ All Nomes must report their election score by 1:00, or the election for that Nome must be re-voted and re-counted on the next make-up voting day by outside Nomes.

20/ If any Nome fails to make the voting quorum, by having less than 125 voters (and election recorders) who have watched all the candidate material and want to vote, that Nome shall be disqualified from a June 19 vote, and must instead be recombined with other neighboring Nomes that did

not make quorum for a June 21 make up election.

21/ All make up Nomes shall be randomly sent the top scoring second place winners from other Nomes in that county that voted on June 19. (These shall be first the candidates that tied with 125 votes, but only lost because the the existing Senator broke the tied vote. Next it shall be the candidates that got 124 votes. Next it will be the candidates with 123 votes and so forth.) In other words, the best second place candidates from the Nomes that made quorum shall be sent to Nomes that don't make quorum for a second chance at being elected in the June 21 election. The Nomes that vote on June 19 shall report on June 19, by noon. The Nomes that vote on June 21 shall report on June 21, by noon. If there are any people left, they shall vote on June 23 and shall report on June 23, by noon.

22/ Once a person gets census scanned for the June 19 vote, there shall be no requirement of attendance at the June 21, or June 23 vote. Those who fail to show up for June 21, or 23 voting shall be automatically regarded by the system as abstainers after showing up at the June 19 vote.

23/ Where a Nome's June 19 vote gets cancelled for not making quorum, the county recorder system shall have until 4:00pm on June 19 to both reassign voters from Nomes that didn't make quorum, and also to reassign the top second place candidates.

24/ If the remainder Nome in each county has more than 125 voters in it, it shall count and elect a Sub-Senator. If it has less than 125 voters in it, it shall not count and shall not elect a Sub-Senator.

25/ To greatly reduce voting fraud, all voting in both government and non-government elections shall be recorded on video. We do this for a number of important reasons:

a/ To make it much harder to cheat the vote counting system.

b/ To guarantee the integrity, accuracy, and believability, of our elections.

c/ To find where election irregularities are coming from, and stop them in the future.

d/ To greatly reduce voting by non-citizens, felons, non-high-school graduates, multi voting, and all other forms of voting fraud.

26/ Because open voting is inherently more vulnerable to vote buying and voter intimidation, we shall institute measures to shut-down these practices:

a/ We shall make vote buying and selling into terrible crimes with unavoidable and long prison sentences per count.

b/ To stop the violent and anti-democratic double-crime of voter-intimidation, we may imprison these people for life upon clear and recorded evidence, or the corroborating testimony of many people. Also, where voter-intimidation occurs, we can also use the alternate system for secret voting that is explained below in some elections.

c/ Around election time, we shall have various sting operations that try to lure people into buying and selling votes on video. We shall also pay fat rewards for election fraud video and tips that lead to a conviction. Our system must be as violently allergic to election crimes as it has been in regards to counterfeiting money.

d/ We shall allow people to cast their votes and abstain from voting in a confidential way that only the other 250 people in their Nome will know about. Thus people will be video

recorded voting, but their vote will not count. This will ruin the value of voting videos. Also, everyone in each Nome shall be required to keep their voting information secret.

27/ We shall pay half a day's wages (average wages for the nation as always herein) to every eligible voter who abstains from voting. This is not only to reduce vote selling, but also to reduce voting by indifferent people. It also helps get everyone to show up at the brief annual census. Those who have abstained from the next election shall be free to ask around about vote selling and lure other people into trying to buy their vote. There shall be a reward of 90-day's wages of money for everyone supplying information that leads to a conviction for attempted vote-buying conviction. All attempted vote buyers shall be considered treasonous people that are working for an enemy nation. All shall get 20-years in a work camp.

28/ Truth and accuracy shall be considered the most important aspect of our elections. The cost of re-voting an election shall be considered completely inconsequential in comparison to the value of honest elections. Where voting irregularities occur, or there are two candidates less than 1% apart, or no candidate gets at least 50%, there shall be up to 2 do-over votes on video. After that, all the people in that Nome shall be reassigned to make-up Nomes for the June 21, vote.

29/ Where there are serious voting irregularities in any election or vote, there must be a do-over election. The system shall lean towards do-over if there is any doubt at all.

30/ All matters of election integrity in all three Senates and election validity shall be decided by the entire Sub-Senate and no other group.

31/ We shall work under the premise that incorruptible elections are far more important than inclusion. This is because an added 5% more voters will normally only shift an elections outcome slightly, while 5% corrupt or sold votes might a 5% majority.

32/ When Nations allow convicted felons to vote, these felons create an evergreen, fiercely loyal, and malignant constituency, with an endless hunger for criminal leniency, and even abolition of the police and prison system. Also, this plays nicely into the hands of other nations that seek to undermine our nation's wealth and power so there is more for them. Clearly we don't want felons voting. This is why we even make it illegal to help felons to vote, sentencing people by the count and quickly locking people up for life for helping felons to vote.

33/ This democracy values "we the people" of our nation above all others. Those who conspire to help foreigners to vote and help foreigners to get money from our government shall be charged by the count, and shall quickly be sentenced to life in prison. This shall include people loudly advocating that foreigners be able to vote in any election be it government, or as a company director or manager, or a homeowner in a condominium board.

34/ The people are supposed to realize that everyone campaigning for democracy ruined by foreigners voting, felons voting, vote my mail, black-box voting machines, taking away people's rights, giving pallets of money and equipment to our enemies: all of these things are hallmarks of corrupt democracy.

35/ It shall be thought a hallmark of tyranny when a majority

can't have an election whenever a majority wants. If a majority of the recent electorate assembles in the streets, that shall be considered enough to have an election under the constitution they have mustered under. (See: NR'16. VOTING DAY and NR'218. SENATE MUSTERING)

36/ There shall be no qualification to run in a Nome election other than being nominated, and seconded for the election. Note, these people cannot nominate or second anyone else in that Nome's election in that year. Also, the candidates shall not be allowed to nominate or second themselves.

37/ No change in the voting process (no matter how small) shall occur unless approved using the constitutional amendment process, and ratified by 2/3 of the College of Confirmed Senators. Also no changes in the voting process shall come into effect until at least 2 intervening Senate terms have occurred and a 3rd has started. This shall be thought vitally important for keeping the workings of the election process outside the control of the people we elect. If we fail to do this, we see our elected officials tirelessly working to slope the election process to favor their agenda.

38/ Working to illegally change or subvert the voting process shall be considered democide.

39/ It shall be thought a critical democracy killing problem when one part of our citizenry eligible to vote does not believe in the veracity of our election results.

40/ The ideal situation with regard to preventing campaign funding corruption shall be thought to be:

a/ That our public election scale is so small and numerous that third-party media advertising and coverage of candidates provides little, if any benefit to getting elected.

b/ That where any media is used, it shall be provided uniformly to all candidates nationwide via an unbiased online forum that lists all candidates in each election alphabetically by last name, providing so much video space that most candidates do not use all the space allotted to them.

c/ That all information exchange for candidates is 100% free, and provided by government for free.

d/ That sufficient candidate video capacity must be provided for the people to properly evaluate candidates, and where it is provided, we must ban all paid media advertising for candidates.

e/ All candidate media shall be made by the candidate and one other person who is not a professional video producer/ maker/worker. All this video election media shall be recorded in one of the county recorder system's recording booths, and the candidate shall spend no more than 40 hours recording/ editing their video messages per election. Furthermore, the amount of time the candidate spends recording their message shall be indicated to all voters.

f/ There shall be no money at all involved in the video recording and posting process except that we might allow candidates to hand out, perhaps three ordinary sheets of paper to their constituents for each annual election. So that's 750 photocopies per election or about \$50. We should also allow the handing out of up to 25 low cost thumb drives per annual election to assure that the downloads have not been censored or tampered with in any way.

41/ There shall be a capital offense, and it shall be thought easy to convict people of attempting to censor claims having to do with voting corruption.

42/ No aspect of the voting process shall be confidential. Everything related to Senate voting or connected or involved with Senate voting shall be open and transparent for the people to view and inspect. Those who attempt to close off or hide anything that in any way touches Senate voting or Senate discussions shall be a felony and considered democide.

43/ All non-citizens who video evidence suggests participated in the 2024 elections shall get 10-years in work camp, per count with no discounts. Multi-voters and mail ballot fraudsters shall also get 10-years per count with no discounts. Those who participate in mass voting fraud schemes involving over 30 ballots should be executed. All employees of all voting machine companies and their lawyers and loyal friends and defenders in government and the media, all shall be tried for capitol democide.

44/ No government agency, police, or military, or corporation or NGO, or charity, or religion shall have anything to do with conducting elections, or counting election results, or helping everyone to remember to get informed, or to remember to vote, or certify the count, or to allow ballot boxes to be moved or to allow ballot boxes to be kept in a room without lots of people continuously until the box is counted by many people in succession.

45/ Every internet account in the nation and every email account gets reminders about voting at 30 days 7 days 48 hours before. 24 hours before, and on voting day in the morning. of voting/census day.

NA'4. MERITOCRACY

1/ The Sub-Senators shall meet in groups called Centi-Nomes, because each Centi-Nome group will confirm 100 Sub-Senators per year. Each Centi-Nomes will however, contain 200 adjoining Nomes, and 200 Sub-Senators. Each Centi-Nome will thus represent about 50,000 voters.

2/ Our Centi-Nomes are supposed to be inclusive, and all must draw from the rich as well as the poor parts of each community. If the west side of a city is rich and the east side poor, the Centi-Nomes may be up to 8 times wider than it is tall so that a proper cross-section of the community is running each Centi-Nome. Other than this sort of rectangular elongation for the purpose of increasing inclusion, all Centi-Nomes and Nome are supposed to as close to squares as possible. All voting districts must be drawn by people randomly drawn and assigned from another part of the nation that are unfamiliar with the districts being divided up. All shall make their divisions without the use any maps of race, or income, or other demographics when they draw Nome boundaries. All Nomes must have smooth square edges as practical.

3/ Government shall work according to a new division of time called a teneth, which is 1/10th of a year, or 36.5 days. Odd teneths have 37 days, even teneths have 36. The second teneth of leap year has an extra day.

4/ In each teneth, each Centi-Nome shall rank its membership and the top man shall be thus elevated to serve in the Main-Senate for 1-year, after the end of his term in the Sub-Senate. The Main-Senate shall do roughly the same thing each teneth, with its top 1% elevated to serve in the

Over-Senate. In this way we elevate the top 10% of the Sub-Senate to the Main-Senate and the top 10% of the Main-Senate to the Over-Senate. Senators, once elevated do not participate in later rankings in that Senate.

5/ In ranking elections, each Senator may vote once for as many of his voting-house mates as he wishes. In the event of tied votes, the Senator being replaced casts gets a second vote for breaking the tied vote. Thus in tied votes, and only in tied votes, does a Senator get to choose his successor.

6/ The top half of all Senators cycling out of the Sub-Senate shall be called "confirmed", and the rest called "not confirmed". Not-confirmed Sub-Senators shall not be considered as Senators once they leave the Senate. Confirmed Sub-Senators shall hold the honorable but officially powerless title of Senator for their entire lifetime. Thus our million-man Sub-Senate will be full of men competing to do something to make the nation better.

7/ The only way into the Senate is to be elected by one's neighborhood Nome. There shall be no quotas or guaranteed places for anyone or any race, even if they are a super-genius, a zillionaire, a founding father, a holy man, descended from ancient aristocracy, or the winner of some noble prize. There shall be no backdoors to the Senate at all.

8/ Future generations be warned! No Senator's term of office shall ever be extended in any way beyond one year, even as an honorary position and with no powers. It is a trick of those who wish to degrade a democracy to first bestow lasting but powerless positions, and later to struggle to add powers to those positions.

9/ Future generations are warned! No Senator shall ever have more power or honor than the other Senators of that Senate. For it is a trick of those who wish to degrade a democracy to first give slight or honorary powers to a cadre of lawmakers and later increase those powers later.

10/ The power of a democracy arises from the will of the people to get involved in their common weal being. Our Government shall do what it reasonably can to make participation in Government as easy, understandable, accessible, enjoyable, and esteemed as possible.

11/ Public service is a much more powerful draw when it is paid with respect and money, than with money alone. It is everyone's duty to their democracy to respect their confirmed Senators. Everyone should help make public service the main source of respect and status in society. Only those whose work has been ubiquitized should have status similar to that of our Senators.

12/ Government is everyone's business. And everyone needs to get involved with their business or they will have to pay. The real enemy of democracy is non-participation and apathy on the part of the people.

13/ There shall be no qualification for Nome elections other than being nominated and seconded for the election. Note, those who run or second cannot run or second anyone else in that Nome in that election. Also, candidates shall not be allowed to nominate or second themselves.

14/ The Senate motto shall be the words of Mohandas Gandhi: "A man becomes great exactly to the degree which he works for the welfare of his fellow-men."

NA'5. SUB-SENATE ROLES

1/ Meet with the people, and elevate their worthy ideas to the Main-Senate discussion boards. In general, the people shall not be permitted to approach Main-Senators and Over-Senators with their ideas, but must find a Sub-Senator to listen and post their ideas to a Senate bulletin board service (BBS). This BBS is part tweeting platform, part DM service, part video posting board, part law and report assembly platform, part part WIKI, part facebook and part archive. The perhaps antiquated term BBS shall be used for the time being. Later the term "Senate CIS" shall be used, meaning collective intelligence system.

2/ The Sub-Senate shall assemble, and verify information for the Senate and people of our democracy. We give this role to our massive Sub-Senate to minimize the corrupting influence of extra-democratic voices in our democracy, including: lobbyists, special interest groups, advertisers, and the openly corrupt paid commercial media.

3/ The million man Sub-Senate shall have its own search engines, wikipedias, twitters, and facebook. All of which will shall be mostly ad free. The Sub-Senates juries will run the county recorder system, and legal system, and replace appointee managers throughout our bureaucracy. There may also be Main-Senate's juries for Main-Senate level management.

4/ The Sub-Senate shall accept all common theories and rate them for popularity/likelihood. Where there are multiple paths that are supported by factions of Sub-Senators, the Main Senate knowledge sluice shall judge which versions if any will be made the official policy of the nation, with the other versions being called "divergent, but popular", or "divergent and not very popular". The subs, and it may also declare things as "unknowable". But all reasonable theories should get examined, even if not many people believe them. People catch glimpses of things, and then others can perhaps see other aspects of them.

5/ The million man Sub-Senate shall be thought to see a sort of multi-path granular perceptual truth independently from the openly corrupt paid commercial media. Then the Main Senate shall choose which of these it endorses.

6/ The sub-Senate shall manage the election system. Management of the election system creates a situation of such potential power over a democracy, that it is dangerous to leave this power in the hands of any narrow group of people.

7/ The Sub-Senate shall also:

a/ Serve as a staffing pool for the Main-Senate.

b/ Be responsible for buying, selling leasing, and distribution of Government property.

c/ Spend and distribute Government money within the budgets and divisions set by the other Senates.

d/ Assemble our government's free public-domain media, to include the ubiquitized content library, software library, education system, children's media, and various ubiquitized information services, such as the national search engines, wikis, twitting platforms and facebook. In general, all Sub-Senate produced content may be accessed, used, and

copied free of charge and free of advertising. (Although the Senate may elect to have ads on up to 3% of our media time.) In general, the Senate shall not track users while they are on other websites, or require that viewers login or register. Like all free nations, we shall share and server-up our public libraries and information outlets for the rest of the world free of charge and open for all to freely view.

e/ Ubiquitize and nationalize intellectual property rights (IP rights) into the public domain for everyone to use free of charge. When government ubiquities property, it shall give fair compensation as described herein. When government nationalizes property, it shall give nothing. This ubiquitization and nationalization process will involve many classes of private assets that are blocking the group way including especially land for new communities and land for new linear infrastructure. No longer will anyone have the right to block the way for a whole community, and extort excess profit for intentionally or accidentally settling in the middle of an obvious future road.

f/ Ubiquitize intellectual property or "IP" rights into the public domain for fair payment of money and Ubiq status. This includes patents, copyrights and trademarks. The Sub-Senate shall also grant official Ubiq status units to those whose activities the Sub-Senate wants to reward with public praise and money. The Sub-Senate may also officially stigmatize media for cause, and cancel IP profit rights for cause. Senate stigma shall not interfere with the right of free expression, only the right to profit from what was expressed when those words are considered a problem for society as decided by a majority of Sub-Senators.

g/ Catalogue all identifiable propaganda in all widely viewed media.

h/ Supervise industries that require government oversight and liability protection.

i/ Compile the nation's Senate-compiled WIKI, news channels, and news websites, so the people will have access to an alternate democratically elected truth. This will be in addition to anyone else who cares to produce news media. As we enter a world of deep fakes, this ability to consider the source will become extremely important.

j/ Set standards and manage the government rating system for all industries, products, services, professionals, workers, and employers. The Sub-Senate shall compare and rate every widely distributed product and service that can be sensibly compared or rated.

k/ Staff the nation's judiciary. All Sub-Senators that get confirmed, but not elevated to the Main-Senate shall go on for a tour of judicial duty. Once the Senators complete their judicial duty service, they shall for all their life be recognized as a Senator, a word that speaks of a person's wisdom, intelligence, and worth.

l/ The Over-Senate shall establish pie-slices for the tasking of the Sub-Senate, the nation's 'million-man' magistrate corps. In each Senate term, the Over-Senate may, with a 2/3 overmajority, adjust each Sub-Senate staffing pie-slice up or down as stated above by as much as 5% of its staffing. The Over-Senate shall however, not have any power to select which Centi-Nomes work and vote on which matters. All selection and tasking of Sub-Senators and Main-Senators, and Centi-Nomes shall be by random well-shaken sack

draws.

m/ To ensure that we get our important decisions right, the Over-Senate may allocate tens, or even thousands of Sub-Senate Centi-Nomes to figure-out, write-out, decide-on, or implement truly important matters in parallel, and with (at times) great redundancy.

n/ The Over-Senate shall be prohibited from drafting any individual Senators, or groups of Senators, as this edges into appointment/ anointment corruption. And where non-Senators are called as witnesses and advisors, they shall not vote.

o/ To reduce the potential for corruption in the Main-Senate, we shall give the Sub-Senate (which is 10 times larger, and 10 times harder to corrupt) a line-item veto over any Main-Senate law. The initial overmajority shall be 58%, however the College of Confirmed Senators may elect to use any number between 53% and 72%. If we use a lower number we get more vetos, less spending and less stealing, and more stinginess. However, if the number gets too close to 50/50, we lose much of the benefit of having a multi-channel democracy.

p/ To prevent the recycling and mis-attributing of old recordings, the Sub-Senate shall assure that all recordings are accurately date stamped and these dates used for all posts. The Sub-Senate shall also compile a searchable library of important, sensational, and spammy media kept by the county recorder system.

q/ Sub-Senate juries shall replace most of the mid-level and low-level decision makers and department heads in government. The top people hired by government shall be mere secretaries obeying the directives of their elected Senate managers. The Sub-Senators shall also be placed where they will work directly with government workers, and government contractors, and with the managers of large fictional citizens, helping to assure that these non-human entities are not misused for nefarious purposes. Sub-Senators assigned to managing government operations shall not be less than 1:100 government workers, or 1% of government workers in each department.

r/ Sub-Senate juries shall monitor both the county police and the national police while they are in the field. These remote video juries shall also issue search warrants and arrest warrants in real time. They shall also direct and over-rule the officers in the field. Police officers shall now have a much narrower range of powers.

s/ Sub-Senate juries shall monitor all aspects of government and conduct all matters related to internal affairs investigations, leaving no part of internal affairs under the control of the hired employees of our democracy.

t/ In matters of election integrity and elected officials, and when elected people refuse to leave office, the million man Sub-Senate shall have jurisdiction and the power to indict and remove any person from government once their term is up. This is because the Sub-Senate's power base is so diverse.

u/ Be more accurate and believable because the Senators will be elected and then randomly drawn, and then finally tasked as groups to figure out what the truth is.

v/ Standardize zoning nationwide, so there is no zoning approval process, and people can build the approved types of housing on the various zones without asking for government permission.

x/ Approved of a building plan library with over 10,000 building plans that are free to use by the public, and pre-approved on various zones nationwide. Also, all of the house casting factory units will be pre-approved for various zones. There will be no more local building department approval required.

8/ The Sub-Senate shall not be the exclusive arbiter of what is the truth. It is however supposed to provide alternate ways for this, and to offer another channel for discerning the truth. The openly corrupt, paid commercial media and individuals just looking out for the truth and being independent journalist shall be allowed to offer other channels for free speech.

9/ The Sub-Senators are supposed to be the ones that people go to report law breakers, or tax cheats.

NA'6. MAIN-SENATE

1/ The Main-Senate shall be composed of twice elected Main-Senators that serve in one of 10 specialized legislative channels called sluices. To start with, these sluices shall be Economic, Industry and Commerce, Healthcare, Socialist, Public Property, Foreign, Military and Militia, Internal Security, Judicial, and Knowledge. Main-Senators may participate in the discussion, and post comments to all all sluices. However, in their role as vote-casting decision-makers, they are randomly assigned to one of the ten sluices for their entire 1-year Senate term.

2/ Each sluice shall elect, execute, and enforce its own laws. Each sluice shall also apportion its own budget as it alone sees fit, subject to the Over-Senate's inter-sluice budgets and power divisions among the various sluices, and also subject to the Over-Senate's interpretation of this Constitution, for the Over-Senate may strike-down laws as a supreme court was empowered to do under the old system.

3/ Except in the beginning, the various sluices are not expected to have the same number of Senators.

4/ Only the national Main-Senate shall have the power to make the laws of the nation. Neither the national Sub-Senate, nor the national Over-Senate, nor any court, nor any other body shall have the power to make or modify, any national law, or interpret any national law for others.

5/ The Main-Senate shall have the ultimate and sole power to make laws, and allocate money within the Over-Senate's sluice budgets.

6/ The College of Confirmed Senators may also change the the number of Main-Senate sluices from 10 to 20 or 25, or 50, or 100. However, the constitutional amendment process shall be required for other numbers.

7/ All Government agencies must be under one Main-Senate sluice alone. And while each government agency shall be required to be under one Main-Senate sluice alone, we shall have a number of redundant agencies that all double-check and triple-check their counterparts such as:

a/ GOSA = Government Office of Spending and Auditing.

b/ IRS = Taxation and government income.

c/ EIA = Economic intelligence agency, gathering statistics

d/ NFCA National Fictional Citizen Administration, regulating and tracking the activities of the nation's for profit and non-profit fictional citizens.

e/ the OPMA = Other People's Money Administration which

regulates all investment managers and all company management.

f/ The State department, which regulates our relations with other nations.

g/ Our new CIA if any. The nation's foreign spying organization (today called the CIA) shall not be allowed to spy on American that are on US territory, and this is to be understood in the broadest possible context.

h/ Our new Military intelligence agency.

8/ With regard to redundant government agencies, the fastest way to ubiq status should be to bust one's counterpart agency for doing something illegal, or approaching illegality, or coming up with a new way to do something and forcing your counterpart agencies to follow your example. Here we should strive for a constant AB testing situation.

9/ The following shall be the initial sluices, and some of their duties. The rough plan is for all federal agencies to plug into the various Senate sluices as follows, and use Senator juries instead of their existing appointee management. These appointee managers shall be required to stay on until they can do a handover to the Senators replacing them. At the end of each Senate term, the Over-Senate shall publish an updated version of sluice duties with great detail and all updates:

a/ Economic Sluice (ES): Tax collection, currency, treasury, deposit insurance, money supply, central bank, interest rates, flation management, economic statistics, banking, financial markets, real estate flation, lending levels for various industries, audits of government agencies, anti-monopoly, antitrust, and abuse of market power prosecutions. International trade. Redundant agencies: GOSA (Government Office of Spending & Auditing, GAO, budgeting, comptroller) TRS (Taxation and Revenue Service, former IRS, tariffs)

b/ Industry and commerce Sluice (ICS): Business rules and regulations, product standards, industrial base development, business development lending, industry de-consolidation, standards testing, duplicate anti-monopoly prosecutions, prevention of predatory pricing, business adjudication, commerce rules, SBA, OSHA, worker rights and safety, working conditions, environmental regulation, union regulations, The ICS also administers the national industrial catalogue, the national post office, drop-ship warehouse system, and the national auction website. Redundant agencies: EIA (Economic intelligence agency, includes SEC NFCA (National Fictional Citizen Administration) OPMA (Other People's Money Administration, including SEC)

c/ Healthcare Sluice (HS): Disease control, FDA, EPA, healthcare education and training, health related research, public health procedure fees, facilities construction, healthcare approvals, food safety and nutrition, food additives, pesticides, use of toxic substances in the economy, healthcare services regulation and taxation, public education, consumer produce safety, mafia drugs administration and regulation and taxation of tobacco and alcohol, and especially mafia drugs. Health procedures, medical practices, pharmaceutical practices. Elder care practices, Healthcare taxation. healthcare tiers and categories.

d/ Socialist Sluice (SS): Worker's rights, Intellectual property and Ubiquitizations. Elder pensions, child support, child financing and child services, unemployment payments, handout payments, homeless shelters, and other social programs and social work. Luxury taxation, daycare, workforce development, labor regulation, worker training, mother education, adoptions and foster care, reproductive medicine, disability, employment-related testing and certification. Social Security and retirement savings, community planning and development, homelessness, HUD, HHS, DOL. Redundant agencies: GOSA (Government Office of Spending & Auditing, GAO) TRS (Taxation and Revenue Administration)

e/ Public Property Sluice (PPS):

New cities, urban standards, building standards, universal municipal rules, electric power, pipelines, water supply, sewage, rain water runoff, transportation and commerce infrastructure, rail and road system, automobiles, rail, vehicle networks, goods delivery. USDA, USGS, Fish and Wildlife, Forest Service. DOT, energy conservation, petroleum, and liquid fuels, coal and solid fuels. nuclear energy and radioactive waste, National parks, BLM, endangered species, FCC. The PPS shall deal with the acquisition, sale, and rental of the nation's properties, infrastructure, mineral extraction reserves, and nature reserves. The actual administration for auctioning off the rights shall be at the county level. Redundant agencies: GOSA (Government Office of Spending & Auditing, GAO, budgeting, comptroller) TRS (Taxation and Revenue Service, former IRS, tariffs) EIA (Economic intelligence agency)

f/ Foreign Sluice (FS): International relations, State Department, foreign policy, trade policy, foreign aid, international actions, embassies, foreign language news outlets. United Majority (UM) integration, tariffs, duty enforcement, and subsidies to prevent foreign predatory pricing. Inspections of imported shipments. Redundant agencies: (MIAA (Military Intelligence, accounting & auditing, includes replacement of the CIA) foreign intelligence

g/ Military and militia Sluice (MMS): DOD, FEMA, Armed forces, defense industry, military bases, Border patrol and defenses, weapons development, civil defense, disaster preparedness, emergency services, veterans, peace corps, NASA, Strategic industrial subsidies. The MMS pays and equips the military, however, the military shall only act under the command of the Over-Senate. The militia (like the voting system, and the military selection system for drafting people) shall be organized at the Nome and Centi-Nome level, and their decision making and communication and leadership shall happen independently. Redundant agencies: MIAA (Military Intelligence, accounting & auditing) State department & foreign intelligence

h/ Security Sluice (ISS): visitor visas, immigration approvals, illegal immigration enforcement, refugees, Exhods, internment camps. Anti-terrorism, FBI, CIA, national police department. Civilian aviation, ports, border control, ICE, Customs, Coast Guard. Interpol. Law enforcement training

and Government ethics. Wire fraud, cybersecurity, and hacking. The ISS shall also oversee the domestic internet and software apps and keeps our information safe and private. The ISS also works with Identity, census, civil rights, spying and TSA. The ISS pays and equips the militia, however, the militia is under the command of each Centi-Nome. The ISS manages police rules and national police department. The county police are under their county Senate, but where the ISS establishes constitutional rules and laws, the local Senate's and their police forces must obey. Redundant agencies: EIA (Economic intelligence agency) NFCA (National Fictional Citizen Administration) OPMA (Other People's Money Administration, including SEC)

i/ Judicial Sluice (JS): Court and prosecution system. jail, prison, and work camp system. Writes the nation's criminal code, and sets criminal penalties. Manages court, crime and police statistics and databases. Adjudicates between counties. Randomly draws Senators for Senate juries and hires appointee judges for small claims matters. The JS may inspect any part of the justice system or any branch of government at any time and for no stated reason. The JS chronicles all legal changes and informs the people about developments in the legal system. The JS is the primary prosecutor with regard to corruption, tax evasion, and organized crime.

j/ Knowledge Sluice (KS): Patents, trademarks, and copyrights. Senate budget office, research funding, Senate budget office #2. Government information website, public textbooks and tutorials, education system, colleges, education standards, education testing and funding, job training, public libraries and public service. The KS also administers all public service websites such as the Senate library, the Senate's national search engine, The Senate ratings website. the Senate's facebook, the Senate's twitting system and other similar publicly-owned non-commercial information utilities — all of which shall allow competition from the private sector. The KS also develops the various template services that the counties will clone. The KS does not assemble knowledge like the way the Sub-Senate does, although it does elevate important Sub-Senate works. The KS votes to approve the Sub-Senate's work or not. The Library of congress shall be under the recorder's system, however the KS shall establish the rules and administer the new county recorder system using blockchain tech for secure verification of facts, and for financial system ledgers, and for real estate ledgers.

NA'7. MAIN-SENATE ROLES

1/ Only the national Main-Senate shall have the power to make the laws of the nation. Neither the national Sub-Senate, nor the national Over-Senate shall have the power to make or modify any laws. However, the Over-Senate (the OS) may strike-down laws and parts of laws for reasonable constitutional violations, or when a Main-Senate sluice exceeds its area of jurisdiction. Also, when multiple sluices pass laws within their jurisdictions that are in conflict with, or create ambiguity with the laws of other sluices, the Over-

Senate shall have the power to strike down the text of laws in line-item fashion to eliminate the conflict or ambiguity. The Over-Senate may also merge the two laws into one unified law, preferring parts of law-A here and parts of law-B there. The Over-Senate shall also have the following powers:

2/ Lay and collect taxes, and fees and spend money within the single-number budgets for each sluice set by the Over-Senate.

3/ Regulate commerce, business, and trade with foreign nations, and within the nation.

4/ Issue a national currency, inflate and deflate (flate) the value thereof, and punish counterfeiting and fraud.

5/ Determine and record the ownership of all real estate, all fictional citizens, and all significant asset in the nation.

Everything without exclusion. Conduct universal and individual audits to determine the ownership of all assets in the nation. Determine the wealth and assets of all citizens, foreigners and fictional citizens in the nation. To be clear, the term fictional citizen shall include all: for-profit entities, not-for-profit entities, charities, churches, religions, schools, endowments, colleges, government-linked entities, financial exchanges, homeowner associations, and all other non-human legal entities. All forms of fictional citizen, notional entity, and foreigner shall no longer be allowed to own real property. They may only lease and hold real estate under a tenancy or a temporary agreement under the time frames stated herein. But they cannot own real property. To be clear, the term fictional citizen shall apply to all organizations of men, including corporations, trusts, and partnerships of more than 10 people.

6/ Freeze, confiscate, or nationalize illegally-obtained, or unjustly-obtained assets and ownership rights, including any asset held on behalf of any foreign nation or empire our nation finds itself at war or jihad with.

7/ Mark-down and mark-up different classes of debt to modulate flation.

8/ Ban, discount or void the value of entire classes of debt, financial obligations and equity ownership.

9/ Freeze and seize accounts and assets belonging to any foreign nations, and people from any foreign nations.

10/ Establish product standards, as well as standards of quality, weights, measures, ratings. Standardize commercial practices in the nation.

11/ Establish public utility systems for railways, roads, airports, boat ports, rail interchanges, freight systems, delivery systems, emergency medical systems, water pipes, steam and power movement, fuel movement, fuel storage, information transmission, mineral mines and information systems.

12/ Establish new cities sufficient to prevent urban land prices from inflating relative to the average wage of the nation.

13/ Con-dem private land for public facilities and building new communities & linear infrastructure for the people. Then the condemned land is sold at a profit or ongoing tax income.

14/ Con-dem and impose special taxes on areas that are unsafe due to natural hazard.

15/ Tax, acquire, sell, and lease out the nation's land and public buildings. Government shall generally be prohibited from leasing privately-owned assets for more than half a year in total.

16/ Break up and smitheren monopolies and cartels. Keeping our fictional citizens small reduces their ability to corrupt our government.

17/ Impose special taxes to prick speculative bubbles. The Senate shall be required to take action whenever it identifies speculative bubbles, or the building of ghost cities or the like.

18/ Ubiquitize the various needs of the people as practical.

19/ Grant monopoly periods for inventors, authors and discoverers, and award money, and official public recognition to inventors, authors and discoverers for their contribution to the good of all.

20/ Promote progress in science, technology, industry and education.

21/ Create manufacturing, nature, and mineral extraction reserves, together with structures, housing, transportation systems and processing facilities.

22/ Create maquiladora and foreign worker zones both inside the nation's territory and (through treaty) outside of its territory. In these zones, unskilled foreign workers can easily come and work, but they are not able to enter the main part of the nation. The Senate may also establish different laws for fenced-off foreign worker zones that are also on the nation's border.

23/ Provide for the common defense and general welfare of the nation. Give loans, aid, and arms to other broad democracies struggling to be free. When we distribute weapons to people defending themselves, we shall put the weapons in the hand of the actual men doing the fighting, so that the government can't divert weapons aid for their own corrupt profit.

24/ Make laws concerning terrorism, piracy, and those captured in war. Make laws concerning crimes against humanity.

25/ Write the nation's legal code and set penalties. This shall be written entirely de novo, and from scratch, and in such a well-explained way that the code requires no experts to interpret. The entire legal code, together with all commentary, explanations, example, and teaching material shall be posted online for free anonymous downloading and copying. The nation's legal code shall not copy anything from the Roman law, also known as the Code of Justinian, which the Mideast wrote just before it initiated the European Dark Ages and also not coincidentally the great age of Islam.

26/ Compile a list of laws that are prohibited among the nation's counties.

27/ Administer the national court system, including the assignment of Senator judges. By 2027.01.01, all judges and jurors in all felony trials, and all large-scale financial matters shall be confirmed Senators on judicial duty.

28/ Raise, develop, organize and maintain military forces and military equipment.

29/ Create rules for the armed forces of the nation. Authorize and ban certain weapons and military tactics.

30/ Repel invasions and suppress violent insurrection. Subdue regions, cities and extra-democratic organizations that rebel against the authority of the national government.

31/ Regulate all trade and commerce with foreign nations and with the Parasitic Union.

32/ Impose various ongoing taxes and one-time imposts based on any metric except income taxes, work taxes,

productivity taxes, output taxes, and automation taxes.

33/ Impose national wealth taxes.

34/ Tax luxury products, advertising, and industries where high pay is in some way detrimental to the people.

35/ Impose industry-specific income taxes on occupations elected as either detrimental to the national economy, or detrimental to the ambitions of the nation's youth.

36/ Tax transactions involving gold, silver, diamonds, platinum, palladium, titanium, rare-earth minerals, expensive materials, gemstones, mineral specimens, and other rare and potentially fungible materials as potential anonymous currencies of crime. Likewise with black-market cryptocurrencies and secret unrecorded agreements, all of these shall be called Fungibles herein.

37/ Tax land and buildings and their use and sale.

38/ Regulate immigration and new citizenship. Grant refuge and immigration to foreigners.

39/ Regulate identity and secure the relative anonymity of the people.

40/ Con-dem property immediately, or up to 40 years in the future by making a discounted payment today.

41/ Tax wasteful or luxury uses of inherently scarce healthcare resources. Then use the proceeds to fund a level of free healthcare for the people.

42/ Strike down labor union contracts and provisions elected as outside the market.

43/ Modify the parameters of the national economy in any way prudent or convenient over the long run.

44/ Offer financing for the people for their sensible capital investments including especially new community creation.

45/ The Over-Senate shall harmonize and regularize conflicting laws that the various Main-Senate sluices make. However, in this role, the Over-Senate must select between the two laws, two approaches, two texts, two meaning, and may generally not embark on its own ways. The Senate is also supposed to use footnotes to connect each new law to older laws that are relevant, or nearby in some way.

46/ The Main-Senate shall have the power to remove any government employees and appointees it elects at will and without explaining why. Those working against, or trying to undermine the Senate's decisions shall be removed. Also, there shall be no notice period, and the bureaucrats shall be subject to arrest if they are judged to have either acted in defiance of either the Senate, or a Senate order. All civil service and union rules and agreements from the past democracy shall be voidable by the Senate. Those wishing to leave a government position must stay on until they can be replaced.

NA'8. OVER-SENATE ROLES

1/ The Sub-Senate shall be thought of as a corps of people empowered to be local managers, magistrates, jurors, information gatherers and minor decision makers. The Sub-Senate shall also implement the laws of the Main-Senate. The Sub-Senators are also the direct representatives of the people and their voice. The Main-Senate shall be thought of as mostly about lawmaking and programming government with detailed laws, rules and policies for Government activity. The Over-Senate shall be thought of as the wise-man, policy-

statement, general-plan, supreme-court, soft-power, Senate that claims its cred from the fact that all its members was thrice-elected. Thus the Over-Senate shall the soft-power master of government. (Although, the Over-Senate shall have a number of hard powers explained below.) So when the Over-Senate talks, the other Senate's are supposed to listen to the wise-man advice: However the other Senates shall not be required to obey the Over-Senate except as called for herein.

2/ Perhaps we will say that Over-Senate policy cred only comes with a 55% or 60% over majority or above.

3/ The Over-Senate shall define and write-out the overall broad problems, directions, objectives, and ambitions of government. It shall also make broad plans for the nation's government and written statements of national government policy, direction and objectives. These general courses shall however all be considered recommendations.

4/ The OS shall act as the body that coordinates all of the government divisions, and makes official government policy on the fly. For example: when everyone knows that the drones in New Jersey are ours and not from a foreign government. It shall also formulate opinions and say things like: We as a nation no longer believe in any carbon emissions hokum.

5/ If any of the various clauses of this Constitution, or subsequent laws are found to be conflict with each other, then the Over-Senate shall decide which of those clauses will be enforced, and which will be ignored. Also, when elements of this Constitution are impossible to comply with immediately, the Over-Senate shall give reasonable time extensions for compliance to begin. The Over-Senate shall also adjudicate conflicting or overlapping jurisdictions among the nations sluices and counties.

6/ The Over-Senate shall apportion and balance duties, workloads, and authority among the various sluices of the national Main-Senate. The similarity of tasks within each sluice division shall not be considered terribly important.

7/ Only the national Main-Senate shall have the power to make the laws of the nation. Neither the national Sub-Senate, nor the national Over-Senate shall have the power to make or modify any laws — except that the Over-Senate shall have the power to strike down laws for:

- a/ Genuine violations of this Constitution,
- b/ When a sluice exceeds its jurisdiction.
- c/ When sluices pass laws within their jurisdictions that are in conflict with, or create conflicts or ambiguity with the laws of other sluices.

8/ The Over-Senate shall reasonably interpret this Constitution, and serve as the supreme and exclusive arbiter of the constitutionality of all laws in the nation: like the supreme court of the previous democracy. In the first teneth (36.5 days) of a law's existence, a 55% overmajority of the Over-Senate shall strike down any law or clause that the Over-Senate reasonably elects to be in violation of the nation's constitution, or Senate's power divisions. After 3-teneths, a 2/3 overmajority shall be required to do this. All non-emergency laws shall generally have a 3-teneth probationary period before the law is implemented, so that new laws and vetos will not drag the people this way and then that way.

9/ Except with regard to constitutionality, inter-sluice budgets and jurisdictional apportionments, the Over-Senate shall be prohibited from compelling, or halting any particular implementation or spending by the Main-Senate.

10/ The Over-Senate shall have no powers over Sub-Senate activities except to reasonably declare them as unconstitutional.

11/ The Over-Senate shall advise on the overall tax levels for the nation, but the Sub-Senate shall elect overall tax amounts and rates for the various taxes, adjusting these up or down from time to time to better balance the national budget.

12/ The Over-Senate shall establish a maximum rate of immigration for the nation

13/ The Sub-Senate shall set the overall single-amount spending budget and the tax income budget for the nation for each teneth. However the Over-Senate shall divide the national spending budget among the various sluices of the national Main-Senate, dividing the money up into tenethly budgets that are normally about the same size throughout the year. As a vitally important check on the power of the Over-Senate, these budgets shall not be sub-divided, ear-marked, or partitioned in any way by the Over-Senate. Except for this overall Sluice budget function, and the broad inter-sluice duty and workload allocations, the Over-Senate shall be prohibited from imposing any particular implementation, or spending requirements, or making any demands whatsoever on any other Senate or Sluice.

14/ The Over-Senate, and only the entire Over-Senate may Issue new pardons, or cancel any pardon by the prior corrupt narrow democracy. The Over-Senate may also cancel any prosecution, criminal trial, money court trial, judicial process, court decision, government proceeding, or legal decision in the nation with a 50% majority.

15/ The Over-Senate shall have the power to create money on the credit of the nation, and borrow money on behalf of the nation. However, a 50% majority of the CCS (College of Confirmed Senators) shall be required to ratify all creations of money once the CCS comes into existence.

16/ Spend up to 1/5,000th of the national government's budget as it sees fit. Except for this money, the Over-Senate shall not command any spending.

17/ Set per-capita transfer payment amounts between the national government and the counties, and approve of payments to the UM. However, a 50% majority of the Sub-Senate shall be required to ratify the initial amount and also to ratify any changes.

18/ Modify the parameters of the national economy in any way found provident or convenient to the people over the long run. However, a 2/3 overmajority of both the Over-Senate without a CCS 60% veto shall be required to make these changes.

19/ Put questions on the tenethly sophoscite with a 50% vote.

20/ The Over-Senate may bind the nation to treaties and trade agreements with a 2/3 overmajority. However, a 2/3% overmajority of the Sub-Senate shall be required for mandatory ratification of all Over-Senate treaties. Also a 2/3 overmajority of the CCS can cancel any treaty at any time. No treaty shall be above the rights stated in this constitution, but always subject to this constitution. All international agreements and treaties shall always be regarded as

Chinese contracts. This means that either/any party can withdraw or all parties can withdraw at any time, and for any reason from any part of the agreement. This shall be regarded as an important part of internationalism.

21/ The Over-Senate shall have the power to fire any person or any group of people, or any administration in the nation and require their replacement.

22/ All treaties that our nation enters into shall be considered "Chinese contracts". This means that they may be cancelled by either party at any time that it becomes convenient, without any loss of face. Where treaties are held by a 2/3 overmajority of the CCS to be dis-favorable to our nation, they must be ended. Also, no treaty clause shall be valid if it conflict with this Constitution. Treaties shall not be allowed to become a backdoor process for changing this Constitution, as they were contrived to be under the old corrupt 1789 constitution. No treaty shall be above the rights stated in this Constitution, but always subject to this Constitution. Also, no treaty shall exceeded 1000 words except for an accountings or descriptions of divided assets, payments, territories and human relocations.

23/ The Over-Senate shall Determine and adjust the average national wage, which is initially put at around \$20. Any time the term "wages" is used in this Constitution to describe a cash amount, the average national wage is what is meant. An adjustment of this important number shall be elected at least once per year by the Over-Senate. This amount must accurately reflect the average income of the people in our nation.

24/ The Over-Senate shall Classify and declassify matters of national security as a national secret. A 50% vote of the Over-Senate shall be required to classify information as secret or declassify secret information. The various intelligence and police departments may make recommendations about secret documents, however the final decision shall be up to the Over-Senate if it has time. The Over-Senate shall be the exclusive arbiter of what will be classified and what will not be classified for each department and division of Government. In general, only matters having to do with spying, intelligence gathering, military equipment, military tactics, dangerous technology such as bioweapons, chemical weapons, bombs and similar dangerous things shall be classified as secret by the Senate. Nothing having to do with spending, budgets, taxation, healthcare, epidemiology, education, welfare programs, Government activities, police activities, Government screw-ups, or assassinations, shall ever be classified. In order to have a bias towards secrete Government information getting out, we shall have it that any secret information can be declassified and released by the relevant Main-Senate sluice.

25/ The greater risk with civil defense plans is that they are inept because they go uncriticized, rather than they make us vulnerable to attack by being widely known. Therefore, all civil defense and disaster plans shall be public information, and these will get lots of public criticism. Then the people will know when the police are implementing the Maui tsunami disaster plan instead of the Maui forest fire disaster plan.

26/ Review and approve or disapprove of all government confidentiality agreements. All things being equal, the Senate shall try to minimize national secrets. All existing laws

regarding government secrecy expire in 180 days. In general, all government confidentiality agreements with people about non military matters shall be unenforceable.

27/ Establish the words, names, and definitions used by Government. Only the Over-Senate shall have the power to ask the people to use a new word instead of an older established one. Also, words shall only be officially changed for reasonable cause, and after at least several years in widespread use. Also, each root word replaced must have its own separate vote by the Over-Senate.

28/ Establish salaries for those working for government and for the nation's publicly traded fictional citizens.

29/ The Over-Senate shall NOT:

a/ Try to make laws as if it had the power to do so.

Participating in such an attempt may be considered a capital offense.

b/ Try to coerce the Sub-Senate (or any Sub-Senators) into acting a particular way.

c/ Try to coerce the the Main-Senate (or any Main-Senators) into acting a particular way, or making or altering laws, except in matters of constitutional compliance, sluice jurisdiction, and inter-sluice conflict or ambiguity.

30/ When government people violate the constitutional rights of the people, there shall be no long time be time-eating process required to stop this. Indeed, this was a profound flaw of the old democracy, that it often took many years for clearly unconstitutional laws and programs to get tossed out by the old corrupt narrow supreme court of 9 appointee lawyers. Instead, we shall now have a system where the Over-Senate reviews all of the laws in the nation before they come into effect and then calls for a veto vote by the Sub-Senate on the grounds that they are unconstitutional. Also, either the Sub-Senate, or the CCS can also veto new laws within the time periods called for herein.

31/ It is important that Senate status be a thing that involves between 3% and 10% of the nation. If we have broader membership than this, then we don't eliminate the below average people from the decision making process, and higher than this and we start seeing concentration of power and interest.

32/ All the Senators that are pushing policy changes should already have some ideas written up or presented in video. So they will be both pushing their material and making decisions in Senate juries.

33/ Starting with the 4th Senate term, all confirmed Senators no longer in office and of voting age shall be automatically be included in the College of Confirmed Senators or CCS. In the CCS, all confirmed Senators shall all be of equal status and equal vote.

34/ The jurisdiction of the CCS veto shall be thought to be one of corrupt spending, pork barrel spending, and wasteful spending. This, while Over-Senate vetos shall be more about advice and about unconstitutional activities. Also, if there is to be any ratifications, let them be done by the CCS on behalf of the people.

35/ To start, when the CCS can get a 2/3 overmajority in favor of vetoing a Main-Senate law, or some line or item within a Main-Senate law, that line/item shall be removed from that law. With regard to this line item veto of the CCS, we shall control government spending by adjusting the overmajority

that the CCS needs for exercising its line-item veto. The range for this adjustment shall be between a 52% overmajority, and a 75% overmajority. The lower overmajorities empower the CCS to more easily reduce pork barrel spending, while the higher over-majorities empower the Main-Senate over the CCS. This is rather like the mixture screw on an old carburetor. Lower the mixture to 55% and government becomes super stingy with fuel/money. Raise the mixture to 75% and government gets loose with its fuel/money. This line item veto shall work on any spending passed by the main Senate. Once the CCS uses its line item on text, all similar text will be banned as well.

36/ In the US, the CCS will eventually have on the order of 10 Senators in it, for an electorate of around 250-million voters. Thus it will be too many people to corrupt for profit.

37/ Where redundant sluices attempt to establish conflicting policy, rules, or budgets, the CCS shall decide which aspects of the two versions are optimal and which the nation will use.

38/ Once it exists, the CCS shall manage our elections and adherence to election policy.

39/ There shall be no person who is specifically a canceller/chancellor who has any official power over the Senate. There shall however be people like the "Doge-fellows" who are respected by the Senate and who have a name with the Senate as being a top cost-cutters and top cancellers of wasteful legislation. The valuable word canceller was incidentally effaced by the sands of Ishtar and turned into the word chancellor, which was forever smeared with the filth of Adolph Hitler and the NAZIs. So we might have hundreds of cancellers at any one time, that are highly regarded by the Senate.

NA'9. WHO CAN BE A SENATOR?

1/ The people shall enshrine and long ponder the following paraphrased words from Thomas Jefferson: "When we estimate a man's value to his democracy, integrity comes 1st and foremost. Learning and talents are only secondary considerations." In other words, for positions of power in our democracy, we shall hold incorruptible-ness to be much more important than expertise.

2/ No person shall be elected to the Sub-Senate more than once in 8 Senate terms, or more than 5 times in their lifetime. However, Senate service in poor foreign nations shall generally not count towards term limits in our nation. Also, each Sub-Senator shall officiate the election of their successor, and are not allowed to run for office in an election they manage. This clause was added as a sort of double-lock on the constitutional condition that there be no consecutive terms for Senators.

3/ Anyone from any nation may serve in the Senate of our nation. However, all Senate candidates must officially declare and swear under penalty of perjury their nationality (birth place), their parents, and their current citizenship when they run for office. All Senators must also pass the secondary school test in our nation in order to serve in the Senate.

4/ All Senators must be native born citizens that spent at least 3/4 their life in our nation. If a person is not a native born citizen that spent at least 3/4 of their life in our nation, they shall be disqualified from getting into the Senate. Thus, no

immigrants will ever serve in the Over-Senate, the Main-Senate, or the Sub-Senate. We shall also have a Biden plastic surgery rule and we shall say that no Senator shall have plastic surgery to their face between the time that they were first elected, and the time that they last cycle out of the Senate. Where Senators have had plastic surgery to their face, this shall automatically end that person's Senate career.

5/ There shall be no property, wealth, advanced education, age, religious, or citizenship qualification for Senate service. However all Muslims all so-called "Free Masons" shall be prohibited from Senate service because they have both waged a secret war of dominance against our land and our people for centuries. Also, due to the remarks of John F. Kennedy, we shall also prohibit all other secret society members as listed herein from the Senate.

6/ Given that a substantial amount of Senate dialogue will occur in writing on the Senate BBS, all new Sub-Senators shall be expected to demonstrate an ability to read the amount of material (in English, the language of our land) that Senators read on average each day on the Senate BBS. The lengthy Senate orientation media shall test each new Senator's ability to read this much serious Senate-level material daily during orientation as well as each Senator's knowledge of Senate ethics rules. The Senate shall also produce lengthy orientation and re-orientation media for the nation's unelected bureaucrats. These shall be reminded many times that the Senate is the only path to policy change in our democracy, and that when bureaucrats change policy, it will normally be considered a felony. There shall also be sting operations where police try to lure government people into some corrupt practice or other.

7/ Each new Sub-Senator must also pass subject proficiency test(s) demonstrating proficiency with the following subjects before entering Senate service:

a/ Scientific notation at the level of a high-school chemistry class. This is so our leaders grasp the large sums of our money they are spending.

b/ Square meter and per-capita cost auditing for the projects they are voting on, and so the square meter cost of all public projects can be properly understood and compared by our leaders.

c/ Supply and demand, and the money-circulation model of macro-economics.

d/ How to budget and how balance a checking account, and how to calculate compound interest.

e/ How to multiply and divide fractions.

f/ How to recognize and understand exponential and linear relationships.

g/ How to do geometry at the high-school level.

h/ How Senate rules of order work.

i/ Issues of tax fairness.

j/ The lies and deceptions that enable Socialism and communism to work as a front for Islamic parasitism

k/ Senate anti-corruption rules-1.

l/ Senate anti-corruption rules-2.

m/ Senate anti-corruption rules-3.

8/ New Sub-Senators unable to keep-up with the load of orientation reading in English, and new Senators unable to pass the Senate's orientation rules test, and new Senators unable to pass the subject proficiency test(s) shall be

considered as failing their Senate orientation. Then the Sub-Senate runner-up for that Nome shall be called up as a replacement when the first elected can't pass orientation. However, if neither of the two can pass the tests, then that Nome shall not send a Senator in that year. Thus in many poorer Nomes, it is thought that most candidates will take the Senate tests before running for office, because people will doubt their ability to pass Senate orientation.

9/ It is by design that Senate service involves a heavy reading schedule:

a/ Our lawmakers will be able to cover much more territory and in greater depth using efficient text instead of public speaking.

b/ The reading will boost lawmaker intellect as opposed to boring government voice proceedings that dull the intellect.

c/ A moderately heavy reading workload will eliminate poorly read and poorly informed people from our national decision making process.

d/ Some particularly bad neighborhoods and foreigner dominated neighborhoods may have trouble electing people that can pass Senate orientation.

10/ All new Senators shall complete the relevant tests on anti-corruption rules and Senate procedures orientation. Due to the common sense and memory nature of these tests, all new Senators must pass these tests with a 100% score before they can start Senate service.

11/ No Senator or unelected government official shall while in office, and for 30 days on either side of being in office, engage in financial market transactions involving options, individual stocks, non-government bonds, commodities, commodity futures, exotic (not commonly heard about) financial instruments, or similar market assets. Nor shall any Senator enter into, or terminate any closely held partnerships or new business ventures. This rule shall apply to spouses, offspring, parents, and other close family members and associates, as well as each Senator's staff, but it shall not apply to any of the following, and all shall be a safe harbor against charges of insider trading by Senators:

a/ Assets, liabilities, and other positions that were acquired prior to the Senator's election, and not closed/sold until at least 30-days after the Senator ended their Senate service.

b/ Privately held companies and small partnerships were founded or co-founded by the Senator, or the Senator's family members. Also dividends and interest paid by these positions, including dividend re-investments.

c/ Transactions involving our nation's treasury bonds.

d/ Transactions involving Senate approved whole market index funds that credibly seek to emulate the performance of the entire domestic stock market, or the world stock market, or the 500 largest companies, or Wilshire 5000, or similar indexes, but not the tech heavy Nasdaq.

e/ Monthly loan payments that began at least 30-days before the Senator began their Senate service.

x/ Furthermore, all trades by Senators and unelected government people must be reported to the recorder system by all brokers and aggregated in each Senator's disclosure file.

12/ Senators shall only be allowed to trade treasury bonds and stock market indexes, and pay loans and continue with prior investments while serving in the Senate and for two

months afterwards.

13/ We obviously need strict rules against bribes and other reward inducements made to steer our Senators. It is less obvious but equally true that we also need strict rules against punishment inducements. Therefore, overtly attempting to frighten, or harass or stalk a Senator outside the democratic system may be considered similar-to and charged like bribery. Also the word stalk shall encompass the real world, the virtual world, and all forms of intrusive investigation of the Senator's personal life, and past life. So here we state that all Senators shall have a right to privacy with regard to their past sexual conduct, family life, and business life. And this shall include all claims of sexual misconduct, financial misconduct and other sorts of misconduct that did not at the time of the act result in any criminal convictions. If we don't have these protections, we empower foreign nations to investigate, shame, punish Senators that they find problematic in our Senate: something we definitely do not want to do. Furthermore, where we see the openly corrupt paid commercial media, singling-out certain influential or newsworthy Senators for their alleged past misdeeds, the correct reaction of the Senate and people should be to assume that the paid commercial media is being corrupted by our nation's adversaries. Then we should go in the opposite direction, and perhaps investigate those media people for participating in a conspiracy to corrupt our Senate on behalf of a foreign government.

14/ We should all long ponder the words of Clarence Thomas about the way sexual allegations are used to get rid of government people the ruling junta does not like:

"Senator, I would like to start by saying, unequivocally, un-categorically, that I deny each, and every single allegation against me today that suggested, in any way, that I had conversations of a sexual nature, or about pornographic material with Anita Hill. That I ever attempted to date her, that I ever had any personal sexual interest in her, or that I in any way ever harassed her. A second, and I think more important point. I think that this today is a travesty. I think that it is disgusting. I think that this hearing should never occur in America. This is a case in which this sleaze, this dirt, was searched for by staffers of members of this committee, was then leaked to the media, and this committee, and this body, validated it, and displayed it at prime time over our entire nation. How would any member on this committee, any person in this room, or any person in this country, would like Sleaze said about him or her in this fashion? Or this dirt dredged up and this gossip and these lies displayed in this matter? How would any person like it?"

The supreme court is not worth it. No job is worth it. I am not here for that. I am here for my name, my family, my life, and my integrity. I think something is dreadfully wrong with this country when any person, any person in this free country would be subjected to this. This is not a closed room. There was an FBI investigation. This is not an opportunity to talk about difficult matters privately, or in a closed environment. This is a circus. It's a national disgrace. And from my standpoint, as a black American, as far as I am concerned, it is a high tech lynching for uppity blacks, who in anyway deign to think themselves, to do for themselves, to have different ideas, and it is a message that unless you

kowtow to an old order, this is what will happen to you. You will be lynched, destroyed, caricatured by a committee of the US Senate rather than hung from a tree."

15/ Senators shall not be allowed to have staff, or helpers, or volunteers, or regular visitors, or trusted advisors. This is to make it harder to use Senators as puppet frontmen.

16/ Sub-Senators shall receive part-time pay for 10 teneths. Main-Senators and Over-Senators shall receive full-time pay for 13 teneths, even though they only serve for 10 teneths. This is for the costs associated with putting their lives on hold while they are in the Senate. Aside from the pay mentioned in this paragraph, there shall never be any pension or money award of any kind for Senate service after our Senators leave office. All Sub-Senators shall be paid for 365-hours of work per year at the median income. Full-time Main-Senators and Over-Senators make 125% of the median income for their full time Senate service while in the Senate and for three more months. Sub-Senators that rank in the top 10% in any teneth get their pay topped up so they make 125% of the median income for that teneth.

17/ For-hire truth-benders and judgement-leaners (lawyers) are the opposite of what we want for our truth-seeking lawmakers. Anyone who has ever been a lawyer shall declare that fact in his campaign and to the various Senates he serves in. Lawyers are allowed to become Senators, but non-lawyers should be preferred over glib lawyers if they are otherwise equal candidates. The following shall be banned from the Senate:

a/ Anyone previously elected to office. These are many times more likely to be corrupt than any average person.

b/ Anyone who has worked in government management.

c/ Any who has worked as a lobbyist or industry advocacy.

d/ Anyone who has worked for quasi governmental commissions such as zoning commissions, port commissions, or police commission.

e/ Anyone who has served on the board or acted in the directorate of a top 1000 company.

f/ Everyone with a career in academia.

g/ All movie stars and singing stars, and star athletes.

x/ If these people are going to make a recognized contribution, they must make it as an outsider Ubiquitous. All of the people of the former system that are banned from Senate service shall also be banned from working in any field related to government or management of the nation's largest 1000 companies. And we are definitely throwing the good out with the bad here, it is just that we have plenty of good people to replace them with. We need to make a break from the old system.

18/ It should be thought that actors are the best natural liars and political frontmen/ puppets. Actors and media personalities should all thought of as very likely to be soul-sold puppets and back doors to non-democratic power. Those who are famous for being an actor, athlete, musician, or corporate staff member should always be regarded as inappropriate for either being in the Senate, or giving any sort of political opinion. Every person that has worked for government in a high level unelected position should also be regarded as inappropriate for either being in the Senate or for giving any sort of political opinion. Those who are/were professors should be regarded as slightly smarter, but

similarly inappropriate to lead due to the great possibility that they are either under someone's thumb, or habituated to intellectual subservience to extra-democratic power.

19/ Political people shall not be allowed to act, and actors shall not allowed to get involved with politics. Where this occurs, the media that political people make or produce shall not have any profit right.

20/ All famous actors that have played political roles in widely watched media shall banned the Senate for life. Also, it shall be considered felony fraud to participate in a conspiracy when any public figure is ever replaced with another different person that looks the same and is passed off as the original person. Where the person replaced is a Senator or a politically important person, all involved shall be charged with espionage and imprisoned for life as spies.

21/ The voting aspect of Senate service is supposed to take up only 1% to 10% of Senate time — not including traveling to the RVC. The Senators shall be allowed to work where, when, and how they want.

22/ The Senate shall keep many pleasant meeting spaces, co-working spaces, and public surveillance/ AV-documentation rooms in communities throughout the nation. These shall be run by all the counties. Here the Senators shall have priority in scheduling, but others may rent space hourly.

23/ Senators shall not consume more than 150 portions of alcohol per teneth. They can also take THC and marijuana, and other hallucinogens as individuals, but no other Mafia drugs.

24/ Government shall no longer require that elected officials obtain a bond as the old democracy required.

25/ Strong leaders often ignore group-think and say things that are outrageous or egregious (outside the flock). Strong leaders tend to seem abrasive, arrogant. and even abusive. As we want strong leaders, we shall all try to be tolerant of these unimportant negative personality traits when we elect our Senators.

26/ No government worker, including our Senators, shall ever have advocated or supported any of the following:

a/ Murdering any population sub-groups.

b/ Monarchy, oligarchy, or lifetime leadership.

c/ Non-democratic government (or front government) including Nazism, Marxism, Leninism, Maoism, theocracy and Sharia law.

27/ The people are strongly advised to vote against all Ishtarian/deep-state frontmen who previously advocated or cast legislative votes in favor of:

a/ Open borders, unvetted immigration, defunding the border patrol, and especially handouts to unvetted immigrants, a thing that hands money to the Mafias selling immigration places to people for a promise to pay a large sum of money and an oath of loyalty. These places, and these new life positions, can generate much higher income streams for the Mafia when they come with housing and meals. So the Mafia corrupts our government to increase its take from its human trafficking revenue, where poor people are sold places in their dream destination for a mortgage, (mort•G•age = death•big•age).

b/ Long-term wars of occupancy, and generous spending in support of wars. When leaders are crazy to do this, they are

probably getting a big cut.

c/ Recommending or requiring the use of drugs that cost cents per dose and are sold for many dollars per dose. Here we note that regarding the fake COVID vaccines, 3 doses x \$59 each x 330-million people is \$58-billion, and 99% of the money is profit.

d/ Mysterious or secret government programs, or closed hearings. What happened on January 6? What happened in Maui? Why are there so many state secrets? The people have a right to know, and those who oppose the people knowing seek to be the master of the people, a thing of tyranny.

e/ Transsexuals and pedophiles, for the contagious harm they do to the youth of our society.

f/ Shutting down our nation's domestic ability to produce and pipe-in enough oil and coal so that we will not need to import oil.

g/ Easy to corrupt voting machines and other easy to corrupt voting practices that keep the door open to corruption.

h/ Cancelling the first or second amendment.

i/ Taking measures to reduce CO2 output. All climate action shall be rescinded and dismantled.

x/ All of the people above have demonstrated their vulnerability to corruption and should be disqualified from any position of leadership in our nation for the rest of their lives. Also, where elected officials participated-in politically motivated prosecutions against the true defenders of our democracy, these people are supposed to be tried, and if convicted, they are supposed to be executed as traitors. Also, those who have previously espoused the climate change religion in public should be banned from working in either government or any of the nation's large fictional citizens, or in labor unions or running for office.

28/ With regard to protected pedophiles in positions of power in society: The presumption (when they are protected) shall be that these are not only sexual predators, but they have also mostly forsaken their people (our people) and are all acting as obedient agents for their blackmailers and protectors. So as much as we don't want pedophiles, we especially don't want powerful ones that are hard to get fired. This is because these people are the exact description of a traitorous foreign/enemy agents/frontmen in our government/ society. Also, all police and everyone in the justice system and government shall be statistically reviewed to make sure that their are not favoring pedophiles.

29/ If we allow criminal convictions to disqualify people for the Senate, then we hand the judicial system a sort of veto power over our legislative system, and this is wrong. The judicial system shall be in every way lower than the legislative system, and shall in every way have no power over the legislative system, or our public elections, including the making of rulings on election validity.

30/ Military service, and other public service is a fine way to distinguish those running for Senate. However people with new and different approaches (even if they don't completely work) should always be preferable by a wide margin. Furthermore, the concept of new and different approaches shall not be more people touting the same old windmill approach, but new and un-heard-of approaches.

31/ The following people shall be banned for life from Senate

service, and from working for government, or in the management or directorate of a top 5,000 fictional citizen they did not found. They shall also be banned from working in the media:

a/ All current Washington D.C. area employees of government, including nearby commuter counties. These shall be replaced by Senate juries at the Senate's convenience.

b/ All current national Government managers working all over the nation. These shall eventually be completely replaced by Senate juries at the Senate's convenience.

c/ Everyone who has ever been a registered employee of a political party.

d/ Everyone who has ever worked as a judge or prosecutor.

e/ Everyone who has worked as a top 1,000 manager in a defense or pharmaceutical company.

f/ No university or law school professors until 2040,

g/ No intelligence people until 2040

h/ No person who has ever worked at a television news outlet, or a top 20 newspaper/ news magazines.

i/ No person who has ever worked in the largest two law firms in any of of the nation's 50 largest cities.

j/ Everyone closely connected with the Governments of any foreign government, and especially China, Russia, Ukraine, Romania, Belarus, North Korea, Iran, Israel, Burma, or any islamic nation.

k/ Everyone who has ever been a member of the WEF.

l/ Everyone who ever worked for the United Nations, Federal Reserve, WTO, or World Bank.

m/ Everyone who has ever worked in state government in Albany, Sacramento, Chicago, or Seattle.

n/ Everyone who has ever worked in Switzerland, the City of London, Bonn, Ottawa, or the Brussels area.

32/ In "Hawthorn's House of Seven Gables" Ch.15, we read about an archetypical politician paralyzed by the slightest smell of the rotting corpse that was long buried in his basement. How absurd is the idea that this is an archetype, and most people in power have a rotting corpse in their basement.

33/ All Government managers (and especially those who have worked for decades as Government managers) shall be thought to be more likely corrupt, than not. We shall replace the entire management class of government and start over with juries of annually elected Senators.

34/ No more than 5% of the Sub-Senate shall be foreign born.

35/ No practicing Muslim of the slave's religion of Islam shall be any sort of Senator because they are all pointed in the wrong direction and mortal enemies of our land of the free. They only want to conquer us and enslave us, and as such they are all disqualified from being our leaders.

36/ Nobody who's biological parentage on either side is a mystery may serve in the Senate.

37/ Nobody over age 25 shall serve in the Senate who does not have at least one biological child.

38/ All priests and nuns and former priests/nuns shall be excluded from the Senate, as allowing priests creates a back door for religion in our democracy.

39/ There is a problem with allowing foreign born people in the Sub-Senate, and this is that they cannot serve as judges

on jury duty. So either we don't allow foreign born people in the Sub-Senate, or we simply acknowledge that foreign born people are not as good to elect to the Sub-Senate.

40/ Again for emphasis, we shall only allow native born citizens to serve in the Senate at any level. Also, no Muslims shall be allowed to serve in the Senate.

41/ To prevent another deep-state from happening again, we shall have it that each person who has spent more than 80% of their work career working for government shall not be allowed to serve in the Senate.

NA'10. SENATE VOTING RULES

1/ All Senate votes shall be cast under mandatory secrecy to make the corrupt selling or exchanging of votes absolutely unverifiable. Senators shall be expelled and stripped of their Senate status for revealing their vote, except when they rightly challenge the recording of their own vote and by logical extension, the entire vote.

2/ Our first priority in Senate voting is that Senate voting remain secret, unverifiable and impossible to sell. A distant second priority, a priority that doesn't really matter in comparison is that our Senators use their time as effectively as possible. We shall not compromise our first priority in any way for our second and much lower priority.

3/ Senators are not allowed to discuss their past or future voting and people are not allowed to ask.

4/ Under our democracy, we elect our wise men as our leaders and empower them to govern as they see fit. It is corrupt when they heed:

a/ The loud cries of a badly aggrieved micro-group assembled in a spectacle of lawmaker swaying protest.

b/ The claque of fast talkers hired by the openly-corrupt paid commercial news media to act the part of wise men.

5/ If we allow the come cry of the war monger in our elections, the masses will be the ones making the decision to go to war, instead of our best and wisest, our true democratic leaders. And it is not just war. All important issues should be made by our wisest, rather than those who share our views. In fact, the more important the issue, the more important it be made by our wisest.

6/ Excessively high over-majorities should be avoided as they tend to hand veto power to corruptors. Then a small minority can more easily stop proposed new approaches.

7/ We require a small overmajority to:

a/ Create a bias against government spending.

b/ Create a bias towards government inaction, rather than on getting involved in everyone's business.

8/ Senators shall never trust or blindly follow experts, as this hands the so-called experts a backdoor to our democracy. We shall not rely on extra-democratic credentials, be they academic, professional, or religious credentials. These extra-democratic credentials are often corrupt and thus serve as a back door for our democracy.

9/ In our democracy we believe that everyone should see with their own eyes, and judge with their own mind. We hold that those who defer and yield to what other people say, should not vote because they are more often than not participating in a corruption of our democracy. We also hold that people who don't understand what they are voting on should abstain. If

you don't understand and you feel like you should be able to understand, then you should oppose the proposal.

10/ Senators shall not approve anything that they do not fully understand, anything that is not fully written-out, and explained, or anything that is kept secret from them.

11/ Nefarious parties often name their evil by the exact opposite of what it is. Therefore:

a/ Wise people don't rely on the names of things alone.

b/ Every item that our democracy decides on shall be named as accurately as possible.

c/ Senators that name or title their proposals in ways that hide the true nature of the proposal, especially when they name their proposal the opposite of what the proposal actually does, these Senators should be expelled from the Senate.

d/ Approved bills may be vetoed by the Over-Senate with a simple majority if they are in deceptively titled or labeled, or marketed. Thereupon a 60% overmajority shall be required to reinstate the renamed bill.

12/ Everything in government must be named in a way that accurately describes its function or what it is. The Senate may expel Senators for proffering bills with doublespeak or opposite names as was commonly done under the previous democracy.

Once a new government policy has been voted down or voted on by the Senate, it may never change its name again, unless it is more than 50% different from the last time it was voted on. And it will be perfectly fine to call the bill Bradley 2.0 bill, or Bradley 8.0 bill. The Bradley just can't change its name unless it becomes more than 50% different, whatever that is. Also, we shall have a general prohibition on naming bills in any way that that hides what they are about or their history. Also, all of the people who worked on the bill should write notes for their side for the next group that might revive the bill. Also, Government must name similar things with similar names, and short names, the Bradley heavy can and the Bradley fast can.

13/ Decision makers must never be involved in the matters they are deciding on. Jurors must not know the accused. If everyone in our nation knows about the accused, then we must draft an international mix of jurors from outside our nation.

14/ All Senators shall be obligated to the truth, to justice, and to the betterment of their nation and mankind. All Senators shall consider that these to be vastly more important than their personal loyalties to family, friends, and associates.

15/ All Senators shall be duty bound to do what is best for the nation and for mankind overall, and to put this cause ahead of their own county and regional constituency.

16/ Emotions are for individual decisions, not societal decisions. Wise leaders banish emotions and let logic rule society to the maximum extent practical.

17/ The Over-Senate shall use sophoscites to help define and state government policy and public opinion in great detail, with great accuracy and credibility.

18/ To create a bias towards better and shorter laws and more concise regulation, all Senators shall be required to read what they vote on at least 3 times. This shall be verified by a Senate-managed reading monitoring system.

19/ One of the greatest defects of human nature is that people are too quick to start new business, and too slow to

stop old business. All Senators should bear this in mind for government business. They should try to be careful when starting, and quicker with ending government business once it looks problematic. The recent COVID vaccine is the perfect example. It began almost instantly, and then even after multiple data points started coming in showing that the vaccine was less than zero in effectiveness, it became very hard for the government to stop.

20/ So that no Senate is able to alter its own operating rules, or vote on its own compensation, 10 teneths shall pass before any Senate compensation or conduct rule changes take effect.

21/ It shall not be allowed to make multiple changes to this Constitution at once. The only way to change this Constitution is to change it one paragraph at a time, by one vote, unless there are 2 or 3 paragraphs that relate to different aspects of nearly the same thing that must be changed. Also when changes are made to this Constitution, they should be tried out in microcosm before being rolled out for the entire nation.

22/ Because we should expect our Senators to cast a vote on every matter before the Senate, all Senate votes shall have mandatory attendance, except when the Senator has a medical certificate and video from a Senate approved clinic, or the Senator has resigned from the Senate.

23/ All laws shall be passed by one Main-Senate sluice only. There shall be no sequenced or bicameral voting as is so common in narrow democracies. Such sequences tend to multiply the power of veto corruption, that is, corruption of the process by which legislative business is delayed often indefinitely.

24/ Except for short-term emergency measures as described herein, no Senate law shall be voted on between 8pm and 10am, or without less than 48 hours advance notice the vote.

25/ Only active Senators registered to a Senate voting chamber may be inside that Senate voting chamber while voting is in progress.

26/ The Senate's final voting process shall operate under mandatory and total secrecy. However, the law assembly process shall be an open book that is fully recorded in as many ways as practical. The entire law writing and assembly process shall be recorded and posted for all to view anonymously, and without any login. This shall include:

- a/ All proposals both failed and successful.
- b/ Which Senators proposed which changes.
- c/ Who voted for which changes with regard to law assembly, but not the final vote.
- d/ What the vote count was for each change.
- e/ All Senate discussions, proceedings, and bulletin boards.

27/ All government infrastructure shall be tested in microcosm before being rolled out.

28/ All forms of secret law shall be prohibited, and all laws shall be in writing and promulgated for all to see.

29/ All laws shall be repealable under the same conditions they were passed. The overmajority required to cancel a law or amendment shall never be higher than the overmajority required to pass the measure in the first place. No law shall have its own special repeal rules. All special clauses that have the effect of slowing or hindering a law's repeal shall be void.

30/ Our nation is primarily for its human citizens. The Senate

shall always regard its human citizens above all non-citizens, and above all fictional citizens, be they for-profit companies, or non-profit entities such as churches, charities and schools. Our nation is primarily for its own citizens, and we shall not allow anything else to diminish those rights of our flesh and blood citizens.

31/ Our nation is a democracy of human people, not fictional citizen frontman entities. When there is a conflict, even the secondary rights of real flesh and blood citizens can be held higher than the primary rights of fictional citizens.

32/ Except in cases of Senator identity verification, expired term, removal from office by the Senate, or weapons carried at heated times, and fistfights, nobody shall ever interfere with a standing Senator's ability to enter a Senate voting house for any reason. Anyone including all Senate security people who ever interfere with a standing Senator's ability to enter a Senate voting house may be charged with democide. All Senate security people are advised to stay well away from interference with Senators entering the voting house.

33/ It shall be a felony to threaten a Senator with extra-judicial violence or call for extra-judicial violence against a Senator for their policy positions.

34/ All matters of the Senate that are under discussion and interrupted by external events shall be resumed at the beginning after those external events, and with a summary of what was said from each side. This is to keep people from staging external events to stop discussions. A good example of this is the way the September 11 terrorist attacks stopped discussion of trillions of dollars missing from the department of defense.

35/ The Senators take their voting cards from voting bowls that are a clamshell of white kitchen plastic. This clamshell design is to enable the inspection for nano spy cameras.

36/ Randomly drawn Senators shall be thought better for controversial matters that nobody wants to touch. The use of Randoms also makes the decision process harder to corrupt.

37/ This constitution bans all forms of ranked voting, ranked choice voting, instant-runoff voting, positional voting, and systems where voters vote for more than one person per election. These make the system much more complex and harder to use and more corruptible, for no benefit except voting for everything in one election. If a second or third vote is needed, then it shall be thought better to do this than to have a more complex system.

38/ The words of Sophocles should be noted here: "All men make mistakes. Good men quickly see their error and change course." This is related to the Turkish proverb: No matter how far you have gone down the wrong road, turn back.

39/ The Senate shall also use a system for prioritizing its agenda based on the percentage of votes each proposal receives in the random 1:100 and then later, the 1:10 test votes. :

a/ So first will go the matters that get 100% vote in the 1:10 election, and then next will go the matters that get 99%, then 98% and so forth.

b/ All the votes over 80% shall be pushed to the head of the line for Senate attention.

c/ These 1:100 votes will be random and use the last two digits of each senator's number. Then there shall be the 1-in-10 vote that uses the last digit of each senator's number.

Then if the 1-in-10 vote gets over 80%, the matter goes to the front of the line for Senate votes as a prioritized matter due to apparent consensus.

d/ This sort of consensus voting is better for spending, budgets, and honesty, because it narrows what is being voted on in each vote and it therefore waxes towards honesty. By contrast, majority and subtle overmajority voting is more for deliberations about what approach will be used. If more than one matter gets priority voting, the ones with the highest 1:10 vote approval go first. It is expected that this process will be used a great deal to make decisions in the Senate. This may happen to the point where most matters get approved as consensus items.

40/ We should be slower to fund and quicker to cut programs: especially those programs that do not pass either their 0.2% rollout test, or their 2% rollout test, or their 20% rollout test.

41/ In all Senate voting chambers there shall be plaques that say the following:

a/ Most people are too quick
to fund, too slow to cut.

b/ No vote recording

c/ A healthy bias towards less government

d/ If you don't understand
the thing, vote against.

e/ Remember the CO2 hoax
How they tricked everyone.

f/ See with your own eyes &
Think entirely for yourself

42/ Instead of having one plan/bill, the Senate very often should have two plans or three plans/bill. Then it decides which of the plans is the best. Then it also goes back in and takes the best elements from the other bill(s) and integrates these in with the winning bill. Then when the sluice has produced its bill, it's best bill, and the support level for that is over a certain level, then the bill gets put up for the vote of the entire main Senate. And then if it passes, then the college of confirmed senators will have its line-item veto, if they vote with a 60% overmajority. If they get the 60% overmajority, then they can delete any line of from the spending if it seems too expensive or it is offensive in some other way.

43/ Most of the actual idea generation is supposed to come from the Sub-Senate and its twitter-enabled constituency. The Main-Senate is more about deliberation and modifying language and voting. The Main-Senate starts with the language of the Sub-Senate, but it may make any modifications it elects without limit. It may even completely re-write the Sub-Senate version of the bill sent to it. Then two things happen at the same time in parallel. The constitutionality is reviewed by the Main-Senate, and a line item veto review is made by the CCS or the College of Confirmed Senators.

44/ There shall be a death penalty for judges that rule on election matters. All judges must stay far away from the line here or be presumed to be a conspirator and a traitor to democracy. All judging of judges shall be done by Sub Senate juries.

45/ We shall apportion voting rights based only on the number of citizen voters, and immigrants shall not count count, because they are not allowed to vote. This rule is needed to keep a politicians from flooding our country with

illegal immigrants to increase the viability of their party and liberalism in general.

NA'11. SENATE BULLETIN BOARD SERVICE (BBS)

1/ For the sake of efficiency, all Senates shall try to maximize the business they do via the Senate's online text-based BBS/ tweeting platform. They shall try to minimize the business they do on video. They shall try hardest to minimize the business they do in person when a large assembly of people travels to hear one person at a time say their piece. Live forums, hearings, and discussions shall be discouraged wherever possible because they are so wasteful of the vitality and time of our Senators. Also, there is much less need for hearings in a broad democracy because of the BBS and because there are better connections between the people and their democracy via the Sub-Senate.

2/ The following rules shall apply to the Senate BBS:

a/ Only Senators may post.

b/ Sub-Senators shall not post on Main-Senate or Over-Senate boards. Their work may however, be picked up and shared by the higher Senates.

c/ Main-Senators shall not post on Over-Senate boards.

d/ Over-Senators may post anywhere.

e/ Main-Senators may post on Sub-Senate boards.

f/ All titles to all posts must be accurate and intentional title spam, repeat spam, and other forms of spam shall be penalized.

g/ Lying and intentional distortion of the truth shall be a crime.

h/ All material must be accurately summarized.

i/ All posts shall have a full word count, a summary reader count and a rating.

j/ Each Senator in each Senate gets a fixed supply of like coins to use in each teneth. The fixed supply of "coins" is supposed to create a quantified and consequentially harder to corrupt economy for the election of competing ideas. In this economy, Over-Senate likes will be golden, Main-Senate likes will be silver and Sub-Senate likes will be copper. The exchange rate will be optimized over time. The number of likes will be the a basis for a reward system that offers Senate elevation, Senate resort time, and Senate money payments.

k/ The Sub-Senate will have a million-man economy for attention that views the nation in a very granular way. The Main-Senate will have a 100,000-man economy of attention that will omit much. The Over-Senate will have a 10,000-man economy of attention that will more still.

l/ When Senators say substantially the same thing, the comments should be consolidated and indicated with the number of consolidated comments with leading variants. Frivolous and off-topic comments go in those archive folders. m/ The most highly liked comments rise to the top of the feed. It is also possible to view by to time/date, and all comments of each Senator. Also, Senators are rated based on their elected Senate Status, so some fresh comments will tend to get attention on the status of the few high-status Senators agreeing with them.

n/ The Senate elects lines for required and recommenced reading on certain feeds. The posts above the top line is required, the posts between the lines is recommended, and

the posts below the bottom line is optional.

o/ We shall grant much and give great reward to the first person to say something important, even if it is a bit wrong at first. We shall carefully track who said a thing first. This is one of the best ways to identify and reward our true leaders. If a person was first to say many things later adopted by everyone, then he is a leader by definition.

p/ We will try to encourage Senate popularity as a sort of competitive process, to bring out the best in people for the benefit of human progress. This will help motivate many Senators to rack their brains looking to ways to improve the nation.

q/ Once the Senate elects questions, there should be a 1-to-30 day period where the Senators prepare their comments. Then there is this moment when everyone's comments "cards" are posted or shown. Thus we get to see who our leaders are in test after test. And this will probably be one of the biggest benchmark for determining who gets elevated: He who puts forth some aspect of the ultimate solution we use for everyone.

r/ Senate communication is not supposed to work on our dumb animal emotions. It is supposed to work on the rational judgement and the mind. We should have a strong bias against candidates that use emotion and oratory-cheating.

s/ No emoji or emoticons shall be used in Senate communication.

3/ Regarding the Senate's Twitter/BBS, the Senate will elect the best feed and be the newsfeed master. It will pick which feeds seem the most useful and truthful. Each feed gets one normal-sized text line for its name. There are also ratings based on popularity metrics and a string of popup icons for other statistics. These newsfeeds are searchable by title, headline, description, ratings, and script, and also all fields. The pages by default hold 200 lines of text. The total number of pages shall be shown and people can enter the page they wish to jump to. The lists shall also be exportable for verification purposes. Every day at 06:00, the ranking changes, but each person's rank stays identical for the entire day based on the prior day's ranking.

4/ Everything written by the Sub-Senate shall be labeled and called Sub-Senate communication. Everything written by the Main-Senate shall be labeled and called Main-Senate communication. Everything written by the Over-Senate shall be labeled and called Over-Senate communication. Everything not written by a Senate shall be called EX-Senate. Ex-Senate communication shall not be excluded from the discussion, but it shall always be treated with suspicion. All Ex-Senate communication used by the Senate shall have the words Ex-Senate boldly written on each page.

5/ Because the Main-Senate and Over-Senate will mostly deliberate via a twitter-like system, no deliberative sub-body in either the Main-Senate and Over-Senate shall limit its membership to voting members. All Main-Senators may post on every Main-Senate BBS for every sluice and every committee. Likewise, All Over-Senators may post on every Over-Senate BBS. This shall not however apply for matters of military secrecy.

6/ All Senates shall be expected to copy and pastiche the best ideas posted on the various Senate bulletin boards, and anywhere else in society. This shall include information that is

otherwise subject to IP protection, which shall never apply to Senate communications. In other words, Senators shall be free to ignore copyrights, trademarks, patents, confidentiality agreements and all other IP protections including privacy rights in their Senate communications. All posts to a Senate BBS shall also be considered as a submission to the patent clerk with regard to anti-patent and insight patent submissions if the utterer claims them within the period of time to make such a claim.

7/ Each Senate BBS shall have a heading for anti-patents, where ideas are proposed to the Senate and people. Once an idea has been proposed in such a way, it shall not be subject to insight patents, but only development patents. And no such development patent shall be issued until after a reasonable time has passed to demonstrate that a development patent is necessary to get the new product into production.

8/ Nobody else shall be allowed to tweet or communicate, or vote, or speak on behalf of any active Senator for official Senate business. All Senators must post to Senate boards without any helpers.

9/ Partial-law votes shall be titled that. They shall also use blue text. When text is removed red colored text shall be used for the part removed, and green colored text for the inserted text. Full laws shall be in black text only.

10/ To start, all partial-laws under 99 words long shall pass with a 50% vote. To start, all full and final laws, and all partial laws over 99 words long shall require a 56% vote to pass. The Over-Senate shall have the power to adjust the partial election percentage up or down between 50% and 55%, and the final election percentage up or down between 50% and 60%.

11/ All important Senate discussions and important comments shall be rated by the Senate. The most highly rated and valuable material will thus become a feed unto itself. Thus our Senate will have feeds of the most highly rated ideas and policies related to all aspects of the way we run our group effort. And each sluice will have many feeds.

12/ When a new law is elected by the Senate, it shall be available in both text and talking head video mode with each contributor speaking his own words to everyone. Also being a talking head shall be an honor even if it is only one word you contributed to the group cause.

13/ The prior constitution required that information had to be approved for entry into the congressional record. This constitution shall have no such foolishness, and any Senator may enter anything to the Senate BBS.

14/ When someone speaks out of order in the legislature, it is the obligation the other lawmakers to cry "Out of order", "Quiet", "wait your turn", and you're cheating". These words are supposed to generate a cacophony of yelling that prevents people from hijacking a legislative session by speaking out of turn. This sort of murmuring is right, and proper for those who speak out of turn. However, the way the British legislatures work is wrong: it is wrong for lawmakers to murmur in response to ideas they don't like.

15/ The Sub-Senate shall write and assemble versions for the Senate wiki. The Main-Senate Knowledge Sluice shall elect the best versions.

16/ All new ideas are supposed to rise in the Senate, and not

in the media. The media reports what the Senate is doing, and what changes are occurring in the Senate.

17/ BBS also perhaps stands for Big Brother System. Thus Big Brother monitors and records our Government discussions, and voting, and in a totally transparent and honest way, while it mostly leaves the people alone.

18/ With regard to the record for public comments about a government project, these shall be accessible as:

a/ 100% of all submissions.

b/ All submissions less redundant comments, mistaken comments, irrelevant comments, platitudes, jokes, and comments that don't seem to make any sense.

c/ The submissions the Senate jury decided to enter into its record for mandatory reading by all jurors.

d/ Senate jury report versions if any.

e/ Final report by the Senate jury.

f/ Final report approved by the overall Senate vote. These shall be called the A-records to the F-records.

19/ For open and shut matters, such as illegal voting recorded by 125 video feeds, and small infractions and fines, the preliminary steps may be disregarded. However for matters of importance to many people, or great punishment for one, full recording must be used by the judicial system.

20/ Our Sub-Senators might get 1 messages or 250 messages a day from their constituency. But the people are supposed to regularly send messages to their Sub-Senators, and these Sub-Senators will use their judgement and post the best to the Sub-Senate boards. So there will be this constant voice of the people aggregated and sifted through by the Sub-Senate. So the mind of government will be much closer to the mind of the people.

21/ Some images of the Senate BBS as an incipient meta mind:

a/ We want it to scoop up all the ideas it can.

b/ The Senate acts as a gold nugget sluice.

c/ We imagine media that illustrate the Sub-Senate as a vacuum wand/funnel for sucking loose nuggets/oranges from the hair of everyone's mind. In another PSA, Each Sub-Senator looks through his vacuum's inbox/bin daily for nuggets.

d/ If a Sub-Senator finds a nugget, and passes it up towards ubiquity, then he gets 20% of the Senate recognition for spotting and passing up that nugget. And if the nugget is important enough, then the up-passing Senator might earn enough Senate status to getting confirmed on that matter alone.

e/ We have a democratic weighing machine for the thoughts of the all the people. This elevates the remarks that get the most Senate votes/likes. Thus we imagine that mankind's meta mind partly begins as an honest systems for electing ideas into the group mind. And also a way to elect ideas for more group consideration.

f/ These perception, weighing, and interpretation functions of the group mind will be in addition to the various operating decisions that the Senate makes.

22/ Dishonest meta mind systems don't work because their masters doesn't want their host to have a mind, any real mind. Instead, dishonest systems work towards disfunction of the group mind so that it can further their "Odious-Rex" role of subjugation for a foreign nation or Mafia. However,

government must be totally honest for it to go anywhere as a meta-mind or god mechanism.

23/ Under the old system from 1789, we had the situation where only non-human entities could effectively lobby the government of our nation. However, now we shall regard this as the opposite of what we want. We want absolutely no fictional citizens, or non-human entities participating in the decision making process of our government. Instead, we want the people to do this, to try and steer the course of our national government, as individuals. We could say that we want neither, but the influence of the people will be beneficial to preventing the influence of non-human entities from arising as a force in our new democracy. Also, when these people feel the corrupting force of non-human entities, one sort of invisible hand, acting upon the decision making process of our government, they must report it. This is another reason why we always want to have the people trying to influence their own government. We shouldn't say don't let anybody try to influence government. We want the people to do this as individuals, so it helps us drive away the non-human entities and the foreign corruption and the mafia corruption.

24/ The people will be able to send material and pitch their ideas to their own Sub-Senator and the Sub-Senator with the next higher number. If either of these Sub-Senators post the person's media, then the media gets subject to Senate statistics on viewership and rating. Then it rises or not according to its rating. If it rises far enough, then the utter, or utterancer will wind up getting drafted into the Senate and or given Senate status.

25/ Where Senators are grandstanding, puffing themselves up, where they're talking about themselves when speaking to many, their right to speak gets immediately terminated for the day.

26/ To speak in metaphor about all industries: Government shall be prohibited from heeding its hotel industry and limiting how many hotels or hotel rooms will be allow. Indeed, government must always go in the opposite direction and encourage as many hotel rooms as people will build in all markets, so that nightly rentals remain cheap for the people. So whenever any industry asks Government to limit competition, or supply, or to increase costs for new competition, government must ignore this request.

NA'12. CONCENTRATION OF SENATE POWER

1/ Our nation's democratically elected Senate shall reign supremely and exclusively. Any attempt to permanently or temporarily delegate the Senate's authority or powers shall not only be void but shall be considered treason for all involved. For in a democracy, one hallmark of treason is attempting to undermine the democracy and seize power via the expedient of a "temporary" oligarchy or monarchy as happened in our own nation in 1789.

2/ No Senate powers shall be delegated to any president, prime minister, king, queen, prince, princess, princeps, monarch, ruler, czar, caesar, chancellor, veto person, chairman, emperor, governor, mayor, genius, ruler, lord, royal, oligarch, narrow democracy, unelected group, college of scholars, sacred priesthood, saint, mullah, messenger of god, supreme leader, leading council, or any individual, narrow

group, unelected group (unelected herein means not elected by the people for their government as stated herein.) Nor shall there be any postmaster general, surgeon general, chairman of the fed, head of homeland security, or any similar monarch or czar office with limited powers, veto right, over some aspect of government. All laws shall be approved and interpreted based on Senate voting alone, and no other party or group shall approve, officialize, present, deliver, enact, vote-on, veto, cancel, interpret, introduce, judge, assess constitutionality, or sign any law that has been elected by the Senate. Should the Senate ever elect any king, dictator, or any of the above, that person shall always be considered a usurper of Senate power unless they clearly refuse to go along. However, wise men who merely advise the Senate as ultimate arbiter shall be allowed.

3/ We the people shall be especially on guard against super popular leader coming to rule over the Senate in any way. It must be noted that most horrible dictatorial leaders of the past had periods where they were presented as super popular. This popularity normally came from the sphinx Mafia getting it's man, its odious Rex into a position of power, and then halting all their efforts to dissolve the country. Thus "the trains would run on time". This makes the odious Rex look like a great leader who deserved a great deal of power. Shortly thereafter, the Sphinx Mafia would use the name of the great leader to bleed the nation dry and kill many people as they did in Nazi Germany.

4/ No man or group of men shall have any privileges or powers over the Senate. The Senate shall have the power to terminate the employment of any and all government employees and appointees at will, without advance notice, and without stating any reason. This right to terminate shall include all presidents, prime ministers, kings, queens, princes, princesses, princeps, monarchs, rulers, czars, caesars, chancellors, veto people, chairmen, emperors, governors, rulers, lords, royals, oligarchs, oligarchic narrow democracies, colleges of scholars, sacred priesthoods, saints, or any other group(s) that may claim power over the people and their democratically elected government.

This is a constitution not for the people to create leaders, but to prevent anyone or any junta or mafia from ever coming into a position of excessive power over the people. Only the organic voice of the people in their many micro elections and grand jury rulings shall lead our nation.

5/ The Senate shall establish very strict rules and limits on the power of individual Senators and Government appointees. There shall be severe penalties for making decisions that usurp power from the Senate and the people.

6/ The Sub-Senate shall have no committees or sub groupings except Centi-Nomes and randomly selected juries. The Main-Senate shall have no committees or sub groupings except its sluices and randomly selected juries. The Over-Senate shall have no committees or sub groupings except for randomly selected juries, if any.

7/ The Senate shall not use appropriations or budgeting committees, or other groupings of Senators that only serve to dole out money. All appropriations and budgets shall be a function of the thing that they are spending money on.

8/ No part of the judicial system shall have the power to cancel, vitiate, modify, or re-interpret any law due to a conflict

with the constitution. The judicial system shall be considered lower in every way than the nation's Senates.

9/ No Senator shall ever have any official power as an individual, except when he is serving as a Senate judge for matters too unimportant, or too low in value to warrant more than one person as decision maker.

10/ We shall jealously guard the constitutional limits we put on our government, and no slight infraction at all should be tolerated by the Senate and people. Each tiny infraction shall be seen in the same light as a foreign power trying to inch into our nation's territory.

11/ For legislative and judicial bodies over 3,650 Senators, nobody shall conduct proceedings, or be speaker, or chairman, or have any position of elevated power more often than one hour per year. For legislative and judicial bodies over 365 Senators, nobody shall conduct proceedings, or be speaker, or chairman, or have any position of elevated power more often than one day per year. For legislative and judicial bodies over 36.5 Senators, nobody shall conduct proceedings, or be speaker, or chairman, or have any position of elevated power more often than one day per teneth. Each leader shall be randomly drawn from the eligible.

12/ It shall be a crime to enforce sharing of secrets laws on matters that are obviously not genuine military secrets.

13/ To repeat: The rights granted herein shall not be construed to deny or diminish other unmentioned rights retained by the people. The powers of the Government shall be limited to those powers that are stated herein. The powers not given to Government by this Constitution, nor prohibited by subsequent constitutional laws, shall belong to the people, as shall any ambiguity in any law.

14/ The Senate shall have power to adjourn themselves, provided such adjournments do not exceed 3- days per adjournment vote.

15/ No monarch or Pope shall be allowed to enter our country, and none of our leaders shall be allowed to meet with the Pope or the Vatican. We shall always remember in our country that the original American pilgrims came because they wanted freedom from the Roman Catholic Church. We shall never forget this, and our nation shall be preset against the monarchy of the Roman Catholic Church and its empire fronting for the parasitic Mideast.

16/ Everyone should long ponder the following words paraphrased from propaganda by James Madison (Mahdi-son): "We didn't fight our revolution for government by elected dictators. We fought for the powers of government to be divided. Divided so that nobody can exceed their powers, without being restrained by great numbers of other elected people."

17/ If we ever find ourselves in a situation with a narrow democracy, or worse an oligarchy, or even worse a monarch or presidency, we must always remember that when dumb people are being pushed up to be leaders that: The dumber the frontman, the bigger the blunders that can be gotten away with by the people using the frontman. Stupid leaders are a bonafide symptom of frontmen.

18/ All direction, and supervision, and top management of every government agency shall be by Senators, This shall include the intelligence agencies, and the military, and military

command. Furthermore, the intelligence and spying agencies shall have no absolute control over what is top-secret and what is revealed to the public. The Over-Senate shall be the exclusive arbiter of the rules of what can be classified as secret. The Over-Senate may also vote to cancel any secret designation it elects.

19/ We shall err on the side of having two little government instead of having too much government. The former is a minor problem. The latter is a massive problem.

20/ No government agency should exist for more than a decade without re-hiring new people and then terminating all the old workers.

21/ The entire left/right spectrum should be regarded as a fake dichotomy designed to hide the foreign power which exists in both left and right.

22/ There shall be no unelected parliamentarians in any Senate.

NA'13. SENATE CONDUCT

1/ Main-Senators and up shall not have unmonitored communication from the time they are elected until the time they leave office. This does not include spouses, children, parents, siblings, and people they live with, and even regular weekly friends. The Senate shall have especially broad rights to separate foreign money and foreign people, and fictional citizens from communicating with Senators. These things shall be thought to generally have no honest reason to coincide, and a whole lot of dishonest reasons to coincide. Also, the monitoring system shall allow Senators to bookmark their video streams.

2/ Regarding enforcement, prosecution, and punishment, each Senate shall judge its own membership. The Senate shall be the final judge of all matters in our nation including Senate elections, Senator qualifications, Senate membership, and Senate membership. No judge or appointee shall have any say in matters of Senate elections.

3/ To discipline or expel a standing Senator, a 66% overmajority shall be required. No Senator shall be disciplined or expelled without due process and full inquiry. Also, it shall not be possible to strip Senators or ubiqs of any status for any sex crimes or any charges relating to sex crimes. It shall be thought far more important that we protect our leaders from scandals rather than we get all the perverts out of our government. The only exclusion is sex with people under age 16. Therefore in all cases where important people are involved with a sex scandal, it shall be presumed to be a blackmailer. Also, in general, regarding people are in high places, there shall be a presumption with regard to sex crimes that the sex crimes all involve foreign run bating and blackmailing operations. For these reasons, all cases of sex crimes involving Senators must be brought more than two years after the Senator leaves office. And there shall be both a strong presumption of innocence and a strong bias in favor of overlooking sex crimes.

4/ All Main-Senators and above shall have immunity from all non-Senate legal matters, criminal and civil, while in Senate service and for 180 days thereafter. No charges shall be brought against Senators after they leave Senate service upon weak or controversial evidence, or for crimes that are

widely ignored among the general population. The protections of this paragraph shall be strongest for the most influential Senators and Ubiqs, and the more highly regarded the leader, the greater the immunity from prosecution.

5/ No Main-Senator or above shall be disciplined by the Senate, expelled from the Senate, or asked to resign for:
a/ Any crimes or actions that occurred before their election to the Senate.

b/ Any claims of groping, unwanted touching, sexual harassment, or sexual impropriety.

c/ Misstatements and inadvertent untruths.

d/ Lying about their CV., or lying about their sex life, or associates.

x/ The protections of this paragraph shall be strongest for the most influential Senators.

6/ The sexual conduct of our Senators shall be none of the Senate's business, so long as it is legal and with consenting adults. Marital infidelity/ adultery shall be none of Government's business

7/ In order for Senators to be disciplined by the Senate, for inciting violence, the Senator must both clearly call for violence, and the crowd addressed must then go on to seriously injure more than one person for every 1,000 people assembled. Also, the following sorts of injuries and deaths shall not count:

a/ Those from natural causes, or accidents.

b/ Those from trampling injuries from crowd movements.

c/ Those from pushing, or shoving.

d/ Those caused by police or government people.

e/ Those caused by counter protesters.

8/ Threatening or repeatedly attempting to scandalize a Senator or Ubiq shall be considered a form of extortion. Following Senators or Ubiqs around, or digging into their personal, family, business, and especially their sexual matters shall also be considered a form of extortion. It shall also be considered criminal extortion to attempt to drive a Senator into resigning by threatening scandal or legal prosecution during or after his term in office. These activities are not only a form of corruption, they drive many good people away from even thinking about public service and help foster a leadership vacuum situation that tends to lead to leaders working for foreign governments and organized crime.

The people shall have an obligation to treat/call all imagery of Senator and Ubiqs doing something illicit but not illegal as computer generated and fake. It shall be thought everyone's duty to democracy to say that this sort of imagery is fake so we can take this power away from the openly corrupt paid commercial media, the mafia and foreign powers. Why do we leave it to the media to decide which of our leaders is sexually egregious and who is not? This power is not for them. Therefore, we should all be saying it's all fake. Why do we let foreign nations, mafias and the openly corrupt paid commercial media veto our leaders like this with some scandal? Also, the word scandal comes from ancient Greek, and it means snare, like an animal snare. This is a word that leads us to see that there are Greek-speaking outsiders at work in our supposedly democratic governments worldwide.

9/ When Senators are expelled, or unable to continue service, the next runner-up in the most recent election shall be their replacement.

10/ The initial swearing in process of all Senators shall involve an enduring oath to always tell the truth while speaking to the Senate. When non-Senators give testimony to the Senate, including court testimony, they shall be sworn-in on video, but this track shall be skipped by default. It may be viewed at any time, but it shall be skipped by default. Thus our Senators will not waste time watching the oaths. People answering Senate questions and giving Senate testimony shall be required to answer their questions in a forthright manner, and those who answer evasively may be charged with contempt of the Senate.

11/ When people do not argue the facts, it should be presumed that:

a/ The facts are not in their favor.

b/ Their video testimony is automatically sent to the bottom of the feed.

12/ Only Senators shall be allowed in Senate voting facilities during sessions. Unauthorized people (including journalists, activists, and lobbyists) who sneak into the fence grounds of a Senate voting center, or go to the home of a Senator may be required to spend up to 3 years in work camp. This, even without doing anything else.

13/ All Senate voting center security staff shall be nominated by Senators, with no more than one security person nominated by one Senator. All Senate security staff shall come from police, or military police, and serve for one year.

14/ Senators shall not harass one another, or participate in group harassment of other Senators.

15/ When Senators try to arrest, prosecute or harass their political opponents, such politically motivated uses of the justice system can be considered democide. This constitution strongly advises all who would abuse the legal system to harass their political opponents to tread carefully as there shall be a low bar for this sort of thing. Also the people of the old democracy can be prosecuted under the new rules to set an example for future generations.

16/ Senators who advocate or praise monarchy, oligarchy, narrow democracy, communism, Islam, or totalitarian government (however disguised) shall be expelled from the Senate and stripped of their Senate status.

17/ Senators who push changes in our voting systems, or our democracy that are judged as making them more corruptible may be expelled from the Senate and stripped of their Senate status for saying such a thing.

18/ It shall be a crime for Senators to enforce government rules in a discriminatory way, favoring their friends and using government to punish their enemies.

19/ Senators that help unauthorized non-Senators to enter any voting chamber, or other Senate-only area shall be expelled from the Senate for this.

20/ Senators shall not take cocaine, meth amphetamines, or opiates, or they shall be expelled from the Senate.

21/ Senators and everyone else in government shall be regarded as servants. And none of these servants shall have any privileges like the Royals once had.

22/ All Senators shall wear a white Senator's over coat short or long, over their regular clothes. This shall be made of ordinary white fabric with no lace or embroidery, or patterns in white. There shall be no sequins, or anything but buttons and zippers on the clothing. Senators wear white to hide their

frequently white hair, and so the young "still colorful" leaders stand out more.

23/ Government shall never engage in "psych-ops" where it intentionally deceives its own electorate and people. Our nation is about openness, light and truth, not the opposite.

24/ We shall have a Talleyrand rule, and we shall say that people that have hand more than a one week gambling license in their life shall be prohibited from the Senate. Also, all Senators shall be prohibited from gambling for life once they leave the Senate. Also, with regard to this rule, we should consider how government corruption always needs an excuse. With Talleyrand (and Napoleon) the gambling was the excuse. Never did anyone question who operated the casinos they lost their money to when they shook-down all of Europe with their army. Also worth consideration is the way Ishtar and the Mideast land of no resources redirecting and dashed the democratic spirit of the French revolution against a brick wall (twice). Once in Russia and once against the British.

25/ Where Senators or people involved with trials are completely restating a witnesses testimony, and greatly changing it, so that it fits with their narrative reality. This sort of testimony should not be given much weight. Also, where people do this, it demonstrates an inability to have a free and fair discussion of the matter at hand.

26/ We shall long ponder the words of Thomas Jefferson:

"Experience shows that even under the best forms of democracy, those entrusted with power, have in time, and by slow operations, perverted it into tyranny.

27/ The Government and all government workers, including Senators shall be prohibited from lying to the people.

28/ A motto of the Senate shall be to dream big dreams, like our marvelous Panama Canal, and out interstate highway system.

29/ The penalty for lying to a legislature, to a giant body of lawmakers assembled to figure out the truth shall be twice that of the penalty for lying in court. In other words, the penalty for the crime of legislative perjury shall be twice that of a judicial perjury judicial system perjury. However, this shall only be for clear cases of legislative perjury. Also, where people are lying in a partisan way, and they are members of the legislature they suffer triple penalties for bold face conspirator lies. This is an addition to being removed from the Senate in either case.

30/ Where non-senators give testimony to the Senate, they shall speak in a glass box with a microphone that goes off when the questioning senator presses his talk button. Also, where the interviewing senator speaks for more than 1/2 of the time, the testimony shall be invalid and it shall not be entered into the record.

31/ The primary duty, the primary economic role of all elected officials, and all people in government is to maximize the utility for the people. The primary duty, the primary economic role of all in fictional citizen managers is to both maximize the utility for the people, and at the same time they must maximize utility and profit for the shareholders. Both things matter for fictional citizen managers, but government managers focus only on maximizing utility for the people.

NA'14. CONSTITUTIONAL AMENDMENTS

- 1/** No single amendment shall alter more than one aspect or paragraph of this Constitution. All amendments shall be subject to a unity of purpose rule, and no amendment shall pertain to more than one subject
- 2/** No single constitutional amendment shall exceed 250 words.
- 3/** Constitutional amendments shall only be written by the national Over-Senate and shall require a 75% overmajority of the national Over-Senate to be sent for ratification.
- 4/** Each time an amendment is sent for ratification, it shall be voted on twice with two years between the votes.
- 5/** Passing a constitutional amendment requires ratification by both the Main-Senate and the Sub-Senate. Once an amendment achieves 75% votes in both the Main-Senate and the Sub-Senate, on two occasions, one year apart, then the amendment shall be considered passed.
- 6/** The foregoing amendment processes shall not be used to restrict the rights of the people, increase government power, reduce the number of Senators, shift powers from the Sub-Senate to other Senates, shift powers from the Main-Senate to Over-Senates, shift powers from county government to the national government, or otherwise narrow this democracy or make it more corruptible. To do any of these things, an 80% overmajority shall be required where a 75% overmajority is otherwise called for.
- 7/** A wholly new constitution may be instituted using this amendment process, however the matter must be clearly called a new constitution, and an 82% overmajority shall be required in all three Senates.
- 8/** Any amendment that makes the amendment process more difficult shall be reversible under the old pre-existing "easy" standards for a period of 10-years.
- 9/** No constitutional convention, supervening body, UM agency, or extra-Senatorial body shall have any jurisdiction over this Constitution or the nation's Senate. We shall not make the same mistake we made in Philadelphia in the summer of 1787, when America's democracy was hijacked.
- 10/** If changes or amendments need to be made to this Constitution, let them be made after it is instituted, for it is much easier to change than the old constitution.
- 11/** The official version of this Constitution shall include all removed text in strikethrough text, and all additions in bold text immediately following the strikethrough text it replaces. This Constitution shall not be promulgated in abridged forms. Quotations and sections may be used, but abridgments of the whole shall be prohibited
- 12/** This constitution shall not be changed without adequate public notification, which shall not be less than 120-days or one Senate term, whichever is less.
- 13/** The Senate shall be free to re-sequence the numbered paragraph within each numbered rule R'1-R'202 herein. If non-identical redundancies exist, the Senate shall harmonize these. The Senate shall also have a mouseover that opens at each paragraph's number. This has hyperlinks to related matters in other parts of this Constitution, along with descriptions. It is expected that hyperlinking the related parts of this Constitutions will make it much easier to understand and reference.

14/ The Senate shall not have the power to abolish itself, or disarm by any means except the obsolescence of the equipment over the years.

15/ We shall long enshrine the words of Thomas Jefferson: "I wish it were possible to obtain a single amendment to our [1789] Constitution. I would be willing to depend on that alone for the reduction of the administration of our government; I mean an additional article taking from the Federal Government the power of borrowing."

NA'15. COUNTY GOVERNMENT

1/ In our nation, there shall only be two layers of government, national and county. All other branches and levels of government shall be eliminated and merged into one of these two layers. There shall no longer be any state, city, regional, port authorities, school district, improvement districts, quasi governmental agencies, or other layer of government. All shall be merged into these two levels. All duties and all government functions shall be performed by either the national Senate or one of the various county Senates, and no other level or form of government or quasi-governmental agency shall continue to exist in our nation, except for these two layers. There shall however also be a consensus-driven, world government called the UM, with greatly limited-powers over the various member nations. So government worldwide will be of three levels county, national, and world government.

2/ At the inception of this Constitution, the minimum size of a county shall be 500,000 people, the maximum size shall be 2 million people. Counties that later fall below 500,000 people shall be merged, and counties that later rise above 2 million people shall be split. Existing counties with a population over 500,000 shall not merge with one another. A number of present-day states such as Wyoming and North Dakota will now become single counties due to their low populations. Some larger states such as California, New York, and Texas will become many counties. Small urban areas such as around Spokane will include one small city and a lot of countryside. In other. Seattle will be 3 counties because 2 is too few counties and 4 is too many counties. Portland will be one county with most of its exurban area part of one of the other two counties in the state. Also the old state boundaries may be entirely ignored when we draw up our new county lines. Where practical, the people in each county are supposed to be more close together in terms of miles and lifestyle. San Diego will have 3 new counties, and El Centro/Yuma shall remain separate. Due to isolation and distance, each island in Hawaii, and each area over 90,000km in Alaska shall be a separate county, even if they are underpopulated

3/ To be clear, none of the existing states shall continue to exist as government entities. All duties and rights of the old cities and states shall be re-apportioned by the national Senate.

4/ Except in our foreign worker zones, All parts of our nation shall be under the jurisdiction of one county and one county only. All counties must be less than 2 times as long as they are wide.

5/ No county government including county police departments shall have offices outside of its jurisdiction. If there are any

claims as to overlapping county territory, the Public Property Sluice of the national Main-Senate shall adjudicate.

6/ The national government shall not distract itself with activities that the counties can do nearly as well. The national government shall delegate as many duties as practical to the various counties, provided the counties are capable of doing these duties nearly as well as the national government. The national government shall continually try to decentralize by expanding the activities of the counties, and continually reducing its own duties as much as practical. Also, we must keep in mind how Ishtar has struggled for centuries to drive the governments of its hosts in the opposite direction, towards greater centralization: viz. "All roads lead to Rome"

7/ It shall be official policy to push for decentralization in government wherever practical. The national government shall fairly consider all reasonable plans to increase decentralization.

8/ Full faith and credit shall be given in each county to the public records, judicial proceedings, operator licenses and professional licenses of every other county. Those charged with a crime in one county are subject to arrest in all counties. Citizens shall however, only be delivered to another county after a court hearing in the extraditing (sending) county.

9/ The various counties shall not assemble into blocks or have political parties, or lobbying groups, or political committees, or any other similar organization (permitted or not) because this will make our national democracy more vulnerable to corruption. The counties may however band together against fictional citizens and criminal street gangs and criminal mafia gangs.

10/ No county or group of counties shall make any law or policy that reaches beyond their borders and sets nationwide standards or drives nationwide change. Only the national Senate may establish national standards. Counties shall also not be allowed to have any say, or make any resolutions about their stance on national policy or international policy which they are not regulating. The people in county government shall have every right to express their own opinions about politics. It is just that no county government itself shall ever make or get involved with any national policy decisions.

11/ The national government shall not pay money to county governments to enact laws that it cannot pass, or to enforce laws that it cannot enforce. The national government shall not withhold hold money from local governments that do not pass laws that the national government cannot pass. When the people access public records, government shall not make a big profit from the fees charged.

12/ The national government shall not circumvent the laws of any country by transporting or paying to transport people from one county to another.

13/ County Senates shall not have the power to expel national Senators or official sent by the national Senate, or interfere with them in the conduct of their duties, or arrest them, or obstruct them.

14/ All government workers in all departments and all positions nationwide shall be reconsidered by the new Senate to see if the worker is redundant, or the position can be eliminated.

15/ In each teneth, the top 10% of the nation's Main-Senate

shall be elevated to the national Over-Senate. The next highest 10% shall serve for one year in the Main-Senate of the county that elected them to the Sub-Senate. Each county shall have a 1:10 Over-Senate ruling over its Main-Senate sluices. This shall be elected by the same process as the National Over-Senate.

16/ The counties shall not have the power to decide which national programs they are going to fund and maintain and cooperate with. They shall also not have the power to use money for one thing and apply it somewhere else, and this shall always be viewed as corruption. Also the national government shall have the right to stop all corrupt transfers at the county level of government.

17/ All county Main-Senators shall serve in one of 10 sluices. The initial changeable breakdown of jurisdictions shall be as follows:

a/ Railroads, public transit, and militia.

b/ Roads, network vehicle operation, water, sewer, electric and other non-communication utilities, like municipal heat.

c/ County recorder, county info-systems, Virtual communication infrastructure and utilities.

d/ Education, schools, child payments, and libraries.

e/ Public dole, adult education, colleges, retirement benefits

f/ Police, court system, criminal law, and jails.

g/ Healthcare, public health, fire, and EMS.

h/ Taxation, budgeting and auditing.

i/ County property management including leases, parks, mineral extraction reserves, dumps and waste disposal.

j/ Building approvals, building rules, land divisions, business regulation, workplace regulation.

x/ The county Over-Senate may adjust these divisions to balance the workload. Also the tasks of each county sluice need not be related,

18/ County Senates shall neither send ambassadors to foreign nations, nor receive ambassadors from foreign nations. In fact, the Senate shall try to reduce the embassy staff in foreign nations due to the new way that travel visas will be issued, as well as advances in telecommunications.

19/ All taxes and fees shall conform to national standards established by the National Senate. No county government shall have the power to impose any income, consumption, sales, value added taxes or other taxes, or fees unless they are on the national menu, and in total, the volume of county tax is below the maximum established by the national Senate. An exemption to this rule shall, however, be available for test programs of a reasonable duration that are externally conducted and analyzed.

20/ The Over-Senate shall establish 9 standard fiscal policies and 9-standard tax rates for county government: libertarian-1, ultra-conservative-2, conservative-3, slightly conservative-4, neutral-5, slightly liberal-6, liberal-7, ultra-liberal-8, and socialist-9. These shall be slightly different and shall be applicable nationwide. There shall be no other possible tax rates or systems that county governments may use.

21/ Except for short-lived experimental/ test programs, in the small number of counties chosen for all the testing started in that year, every aspect of county taxation shall be uniform nationwide except that the final tax rate calculation shall involve 9 different standard county tax rates.

22/ The entire Main-Senate of each county shall vote each year and declare which fiscal policy it will be using 3 years in the future, and which standard county tax rate it will begin using 24 to 36 months in the future.

23/ Except for approved test programs, in that year's drafted counties, county governments shall not be allowed to impose any special taxes. If they need to increase income, they must declare a more socialist standard county tax rate in the future.

24/ Regardless of the foregoing, the national government shall be allowed to test taxes and tax systems in various counties before rolling them out nationally. Thus perhaps 3% or 10% of counties may temporarily have a different tax rate than the 9 standard rates.

25/ In 2030, the term state shall be revived and considered a synonym for county, and thus the term United States will be more apt and refer to the united counties.

26/ To reduce confusion and mental overhead, most county names should be the same as the main city in that county. If a city is in more than one county, the county with the largest portion of the city center should be named after the city. We may also have names like: Upper Manhattan county, Lower Manhattan county, Bronx county, Brighton county, Brooklyn county, Astoria county, etc.

27/ The national government shall technically own all the unclaimed land, and all the government land. It shall also own all road, railroad and linear infrastructure land in the nation, all of the township sites, most of the farmland, most of the mineral mines, and all the expired long-term lease land, all the properties of individuals and married couples who die out, or their heirs surrender the family home due to the tax liability. The national government shall establish zoning for this land, restricting use by the public, only where this is necessary. Then the various counties shall lease out this land as it can for up to perhaps 30-years: the farmland subject to the national Senate's reasonable rule for maintaining soil conditions. And miners shall be subject to the national Senate's reasonable rules for mining and for other activities. Where county governments lease out land for agriculture or townships, 15% of revenues goes to the county's general fund, and 1% goes to the county recorder system. These taxes will create a bureaucratic bias towards getting as many as possible government properties on the market and leased-out nationwide. This incentive will be focused on the county recorder system, which will get 1%. For this reason, the county recorder system will work diligently to display and lease out all government properties on the market. The result being that our nation will have abundant and cheap life estate land leases that will cost so little per unit, the Counties will normally include the land lease rent in with the utilities charges on the county bill. Sometimes this billing will also include the 17-year loan payments on the unit, moving, and placement fees they bought from a house casting factory.

28/ It should be noted that this is the opposite of the way the national government previously worked to hide and remove its assets from the people. Instead, of a housing shortage, we will not have an unlimited supply of sites for townships, because of their population density. Also, our new system will have almost no roadkill, and all our communities will be walled/fenced for wildlife. And we shall require wilderness

permits. So we can now have totally inexpensive apartments in the most beautiful nature-reserve parts of our nation.

29/ The lawyers will hate the simplification, but the county Senates shall not be allowed to make their own special or idiosyncratic laws, standards, or taxes about the following matters, except that they must select a nationally approved menu option. This is so that we can have a clear, easy to understand, easy to learn, easy to comply-with, and unvarying set of rules nationwide:

a/ Murder, rape, armed robbery, violent felonies.

b/ Child sex crimes.

c/ Petroleum and gas extraction, refining and transport.

d/ Asylum, sanctuary, Immigration, citizenship, and the treatment of immigrants.

e/ Environmental regulations, including all pollutants waste disposal, waste water disposal, and especially vehicle emissions.

f/ Vehicle standards, including especially vehicle energy use.

g/ Aviation, railways, road standards and road regulations.

h/ Energy policy including oil extraction regulations, coal extraction regulations, power generation, solar power, wind power, and energy taxes and subsidies.

i/ Industrial standards, and worker safety.

j/ Fictional citizen regulations.

k/ Business practices.

l/ Product standards and industrial standards.

m/ Wages, minimum wages, prevailing wages, union workers, labor unions, or worker safety.

n/ Rent, tenancy, evictions, unlawful detainers, rent control, rent stabilization, squatting, and adverse possession.

o/ Employment and labor law.

p/ Securities, stocks, bonds, financing.

q/ Banking, lending, credit cards, and payments.

r/ Insurance.

s/ Taxation.

t/ Intellectual property.

u/ Education laws and rules.

v/ Civil rights, and discrimination.

w/ Political rules and laws.

x/ Healthcare.

y/ Professional licensing.

z/ Firearm licensing or carry.

aa/ International trade, laws and relations.

bb/ Constitutional law.

cc/ Jails, probation, and ex-convicts.

dd/ Violent crimes, and sex crimes.

ee/ Theft, robbery, shoplifting and similar crimes.

ff/ Family law matters.

gg/ Child custody, child removals, and options and Government handouts.

hh/ Real estate ownership, transactions, and zoning.

ii/ Professionals and labor unions.

jj/ Travel and tourism regulation.

kk/ Entertainment and sports law.

ll/ Admiralty and international trade.

mm/ Inter-jurisdictional commerce.

nn/ Torts and money court liability.

oo/ Legal procedures.

pp/ Lawyer conduct.

qq/ Other areas the national Senate may elect.

rr/ Sentencing guidelines for crimes.

ss/ Food and restaurants.

tt/ County recorder system

uu/ Other reasonable additions the Senate may want to later add.

30/ We shall promulgate our standardized legal system once it is completed. This our legal system shall be called "US Law". It shall have a number of variable clauses for abortion, firearms, religion, etc. It shall be designed in a way that everyone's honest laws are on the menu, but all the dishonest and corruption favoring laws and practices like FGM and child marriage are eliminated. We shall regard this standard legal system as a way to both simplify business, and to also make corruption stand out more.

31/ US Law shall be allowed to change over time. Also 5% to 25% of our Counties might be involved with experimental programs at any time.

32/ No county government shall have offices or embassies, or do business outside of its county.

33/ All counties must obey the rights enumerated in this constitution. There shall be no more states and state governments, or any other layer of government.

34/ The various counties shall manage the following partial list of government roles among other roles enumerated herein:

a/ Make county budget and spend county funds.

b/ Manage the tax collection system.

c/ Manage the local commodity extraction reserves and local parklands.

d/ Manage the local public buildings and their support staffing, including the courthouses and the various office buildings of the national government.

e/ Manage and maintain various forms of linear infrastructure such as roads, drinking water, storm water drainage system, sewer, trash removal, waste dumps, electric system, natural gas system, power generation, last mile internet wiring, dog catcher, pest abatement, etc.

f/ Manage the education system and library system.

g/ Manage licensing.

h/ Run the local transit system, including railroads, rail transit systems, and bus transit.

i/ Manage local emergency services such as local fire, local police, local EMS, etc.

j/ Manage the local healthcare system.

k/ Supervise and give teeth to the grass-roots election system. This shall not be done by the national government, but by the counties.

l/ Snow removal, signage, local ordinances. building department, local land planning, etc.

m/ Conduct local aspects of the annual census.

35/ The national government shall manage the following partial list of government roles and make all policy decisions regarding the following, among other roles enumerated herein. The county governments having only an advisory role in the following:

a/ All national laws.

b/ All issuance of currency.

c/ All matters of interest rates and currency valuation.

d/ All regulation of the national economy.

e/ All regulations about tax rates.

f/ All laws about taxation.

g/ All laws about the stock market and accounting.

h/ All laws about lending and borrowing money.

i/ All laws about immigration and immigrants.

j/ All international treaties.

k/ All establishment of national standards.

l/ All declarations of war and use of the nation's military, but not its militia.

m/ All laws about the post office system, and delivery system, and self driving car system

Punished piracy

n/ Interpret the constitution.

o/ create a network of township sites, national parks, and commodity extraction reserves.

36/ The national government shall not be the sole arbiter of the limits of its own powers. To this end, we shall have a system of nullification of any new national law by the Sub-Senate, should the entire Sub-Senate vote with a 2/3 overmajority to nullify any national law.

37/ If the entire Over-Senate votes with a 60% overmajority to declare any law unconstitutional, then that law shall be cancelled as being unconstitutional.

38/ Except in regard to choosing from the national Senate's menu items, there shall be no right of county government to make any policy that is anything to do with Citadel rights, including freedom of speech, the right to bear arms, the right to assemble, or any of the other rights enumerated herein. Where county government attempt to do this or they make immigration policy, this shall be considered a felony, and the county senators shall lose their status, and they may be jailed.

39/ Bold new paths taken by individual counties must be approved by the national government when they exceed one half percent of the county budget.

40/ No county shall be on both sides of any major river.

41/ There shall be a single national criminal code for all felony crimes. All counties must enforce the national criminal code in the same way. The national code shall also apply in matters of speeding, drunk driving, shoplifting, sexual assault, rape and kidnapping. The national law shall also apply in matters of insurance, finance, banking and all national government system functions.

NA'16. INTERNATIONAL GOVERNMENT

1/ This 2024 American Constitution is intended to be used with both the 2024 UM Constitution and the 2024 Addendum of Initial Laws, which are attached hereto and incorporated herein. The 2024 UM Constitution shall not come into effect for our nation until ratified by a 2/3 vote in all three Senates. All Over-Senators cycling out of service in the National Senate shall be automatically elevated to the UM, the United Majority, the world government of the free world. At the UM, the national Over-Senators shall act as UM Main-Senators for one year (or less during initial Senate propagation times). After one year of service (or less during initial Senate propagation times), each of the seven UM member blocks (or less during initial Senate propagation times) shall elevate 8,000 Senators to the UM Over-Senate where they shall serve for two years. Therefore, a complete picture of the

representation ratio of the entire world government, both national and international is as follows for a nation of 250 million voters.

National Sub-Senate	1-in-250 voters
National Main-Senate	1-in-2,500 voters
National Over-Senate	1-in-25,000 voters
UM Main-Senate	1-in-25,000 voters
UM Over-Senate	1-in-31,250 voters*

*Assuming 250-million voters.

2/ For the sake of simplicity and efficiency, all Senates and all organs of government worldwide are supposed to have uniform worldwide rules and procedures where practical.

3/ Except where specified otherwise, the term Government (with a capital G) shall refer to all layers of government: local, national, and international, that can in any way bind or command the people of our nation.

4/ Our nation of free people shall never be on the side of the tyrants, monarchs, oligarchs, or fictional citizens, but the people, as long as they support elections and democracy. We shall also be on the side of fairness and justice and everybody having enough to eat and carry on economically.

5/ Any attempts by foreign governments or world government to supersede the powers of our nation shall be void, and all of our people shall be instructed there upon eliminate anybody involved with such a conspiracy to defraud our country of its natural rights and sovereignty.

6/ Government shall be prohibited from making any and all laws concerning carbon and carbon footprints and other garbage ideology foisted upon the world by OPEC about environmentalism. Further, all of the laws domestic and international concerning chlorofluorocarbon are hereby repealed. Now that we have realized that the hole in the ozone layer is a natural consequence of the outgassing of our planet occurring around Antarctica. CO2 and ozone readily combine after all, and this is why there's a hole in the ozone layer

7/ The UM shall have no administrative offices or military/police assets in our nation, and UM people shall never be allowed into any government or RVC building in the land. Everything owned by the old UN in our nation shall be nationalized.

8/ Our nations government, shall not have business dealings with any international government, or international organizations, or international fictional citizens that either under mines the proposition of personal freedom, or our constitution, or who cheat on our trade, or our intellectual property rights.

9/ This constitution is not for foreigners and non-citizens, especially those that entered our country illegally. These people shall not be governed by the same rules as those who are citizens, especially those were born citizens to citizen parents.

NA'17. DECENTRALIZED VOTING

1/ National Main-Senators, national Over-Senators, UM Main-Senators, and UM Over-Senators shall register and cast their votes in one of the Senate's 34 Regional Voting Centers, or RVCs for our nation. The Senators shall choose one RVC that is convenient to them. These RVCs shall replace the

nation's current single and isolated capitol as the location for decision making. The initial RVC locations shall be near: Southeast of Tacoma, Grant's pass OR, Stockton CA, Kettleman City CA, Riverside CA, Billings, Salt Lake City, Phoenix, Bowman ND, Denver, Albuquerque, Midland TX, Denton (Dallas), Sandy Oaks TX (San Antonio), Kansas City, Minneapolis, Minooka (Chicago), St Louis, Little Rock, Jackson, Lansing, Canton OH, Lexington KY, Nashville, Sebring FL, Lake City (Jacksonville FL), Locus Grove (Atlanta), Raleigh, Gate City, Culpepper, Allentown, Syracuse, Mount Kisco NY, and Worcester. When Canada joins the US, we shall have RVCs near Chambly (Montreal), Barrie (Toronto), Brandon (Manitoba), and Red Deer.

2/ It is thought that having 34 RVCs will make it more than 34 times harder for anyone but the people to seize power in our nation. In other words, we won't have a single national capital, instead will have 34 regional voting centers, or RVCs and this will make us both less vulnerable to attack, and also less vulnerable to take overs of our government.

3/ RVC locations may be changed or added with a 2/3 overmajority of the national Main-Senate. No RVC or any government administration center shall be located less than 100-meters above sea level, in any 5,000-year flood zone, or in any building over 15-meters tall. No RVC shall be located in any luxury district, or in any central business district. After 2027.01.01, no RVC shall be located on private property. RVCs shall not specialize as specialization will make it easier to lobby the Senate.

4/ There shall be no RVC in either Hawaii or Alaska due to low populations. Main-Senators and Over-Senators from these places will have register-with, and travel-to a distant RVC.

5/ If any of the above named cities fails to maintain the minimum voting quorum of 90 Senators per Main-Senate sluice-head, then that RVC must be closed down and merged.

6/ All Senators shall be provided free Senator-only mini bus or train transportation from any RVC to all towns of over 5,000 people in their area. These vehicles shall not be fancy or luxurious.

7/ A significant advantage of having at least 34 regional voting centers is that our 10 sluices can all vote at once in a synchronized manner. Thus we will say that all Senate voting shall be synchronized.

8/ It is better if the Senate makes a large number of small decisions instead of making a small number of large decisions. This is the sort of granularity that government needs.

9/ The Senate shall aim to vote 10 matters per hour. However, it will start out without time limits.

10/ As the vote reporting system is debugged, the Over-Senate shall shrink the reporting delay as much as reasonably possible so that the vote is harder to corrupt.

11/ When the Senate votes in numerous voting houses, the vote tally in each voting house shall be reported and archived as a single pair of numbers called a score. The first number of the score is the yea vote, and the second number the nay vote. The scores shall appear next to the title of the matter being decided upon. The title shall be linked to the actual text of the vote and the title must be an accurate reflection of the

matter being voted on. Also careful consideration shall be given to make sure that bills are not named as their opposite.

12/ The scores in each Senate voting house from the prior 24 hours shall be linked to at the top of the landing page of its cloned and mono-form vote-reporting website.

13/ Each county recorder shall redundantly record, total-up, and server up all election scores in the nation. The National government shall also redundantly report and total up all Senate scores on its website as soon as they are available. After each vote, each RVC and each Centi-Nome shall immediately check the National and County websites and make sure that its scores are accurately recorded. Then the RVC and Centi-Nome shall change the confirm icon on its website from red to green if it agrees.

14/ The various Centi-Nomes, RVCs, and recorders shall host their websites on their own dedicated, internally managed, and separately located internet servers. These shall all have back-up power generators. Each shall have a unique password known only to the Centi-Nome's or RVC's internet managers. These passwords shall be changed at least annually and there shall be no central database of these Centi-Nome, RVC, and website passwords. All Senate voting bodies shall be prohibited from asking about, or knowing about the server passwords of other Senate voting bodies.

15/ There shall be no outsourcing of Senate servers or website hosting, and all must be managed by the Senators of that RVC.

16/ To make the system less vulnerable to cyber-attack, the website of each Centi-Nomes with the same last two numbers shall mirror other websites of all other Centi-Nomes with the same last two numbers. Also, all Centi-Nomes shall mirror all RVC vote reporting sites.

17/ Except for topics reasonably elected as secret by a 2/3 overmajority of the Over-Senate, all laws proposed in any Senate, together with all changes, shall be posted on that Senate's server, out in the open, in real time, on never-forget bulletin boards that can be viewed anonymously by anyone at any time without login. This poses little risk to honest Senators, however for the sake of reducing corruption, society must see how its laws are being assembled and who is responsible for the corruption friendly clauses being added.

18/ Tsunami vulnerable and totally corrupt Washington DC shall be eliminated and totally abandoned as a seat of government in all ways.

19/ It shall be thought a primary duty of those conducting elections to make those elections as transparent as possible, and to prove that their elections were fair and legitimate. Those election officials who hide evidence, or discourage inquiry into the legitimacy of elections may be presumed to be engaged in election fraud.

20/ The RVCs in the Canadian lands, shall go near: Moncton, Montreal, Saskatoon, and Hope, British Columbia.

21/ All RVCs are supposed to go at the outskirts of large communities, where they are less of a strategic risk, and where land is cheap and plentiful.

NA'18. CONTINUOUS GOVERNMENT

1/ The Senate shall use staggered terms, with 10% of Senators replaced in every teneth of every year. We do this

for 3 reasons:

a/ To make it more likely that our elected leaders leave office when they are supposed to.

b/ To eliminate time wasting transition periods and speed up government.

c/ To make our nation less vulnerable to attack during transfers of power.

2/ In each county, the Nomes shall be numbered sequentially west to east, in rows as much as practical. Then south to the next row and repeat, like how text is read in English. Each county shall have a unique 6-digit number written 123-456. Each Nome shall be entirely within one county, and shall have a unique 7-digit number written 123-4567. That there are too many numbers allows us the convenience of most numbers not resolving.

3/ There shall be no national control of where Nome, Centi-Nome or county boundaries are drawn. These boundaries are up to the Nomes, Centi-Nomes, and counties affected, but they shall have the correct number of voters. All such boundaries shall be of one blob, and without zig-zags, islands, irregular shapes, and generally without large inlets or peninsulas in their shape.

4/ Race, ethnicity and wealth shall not be a consideration in drawing up any Nome, Centi-Nome, county or other district.

5/ Except in the first 5 years, while the Senate is propagating, Sub-Senators elected to Nomes ending in a 1 shall start service on the first workday of the first teneth of the year. Nomes ending in a 2 shall start service on the first workday of the 2nd teneth of the year, and so forth.

6/ All Senators shall retain their Nome number throughout their Senate service. If a Senator is elected and elevated to the Main-Senate or Over-Senate, he shall begin service on the appropriate teneth for his Nome's suffixing number.

7/ The Main-Senate terms shall begin some time behind the Sub-Senate, so that the new Main-Senators will have time to complete the Main-Senate's specialized education modules for their sluice. The Over-Senate shall begin its terms some time after the Main-Senate, so that the new Over-Senators have time to complete the Over-Senate's specialized education modules.

8/ Each sluice-head of the Main-Senate (each sluice at each RVC) shall rank its membership using the same methods as the Centi-Nomes of the Sub-Senate. One Over-Senator shall be elected each Teneth for every 100 Main-Senators registered at each sluice in each RVC. Portions less than 50 round down and shall not count. Portions over 51 round up and count.

9/ All of the nation's Senates shall change by 10% per teneth, and 100% per year. After one year, every single Senator will cycle out of their Senate position. The only people who will remain in the Senate are the Senators that were elected and elevated by their peers for a year of service in a higher Senate.

NA'19. THE DECISION TO USE THE MILITARY

1/ All shall be aware that our military abilities are vastly greater when we remove our self-imposed restraints.

2/ The Foreign Sluice may impose and remove economic and trade sanctions with a 55% overmajority.

3/ The military and militia Sluice may order war equipment and war preparations with a simple majority, subject to its budgeting, as is typical of all sluices.

4/ The military and militia Sluice shall review all war policy, war strategy, combat techniques, and weaponry in great detail and with extensive combat simulations.

5/ The Shriner's saber shall be the symbol of the our nation's arms purchase division. This is a heavy, ungainly, brittle, cast iron, single-edge, curved saber with a bad grip. In the Shriner's icon, this symbolic fake "weapon" is supporting the crescent moon of Islam.

6/ Government may temporarily take over the management, purpose, and ownership of any fictional citizens (FCs) or labor unions, when the defense of the people requires it. also, in general, all labor union management shall be put into hibernation whenever large numbers of citizens are drafted to fight a war.

7/ When fellow freedom fighters and especially a fellow broad democracy falls victim to force because they are poorly armed, our nation shall arm that democracy with fast-rusting, single-shot sniper rifles and other defense-oriented small arms. If this is insufficient for the weaponry of the armed forces they are fighting, we may send more advanced weaponry and military advisors at a ratio of not to exceed 1% of the local forces.

8/ In addition to whatever temporary enemies the free nations of the world may have, the eternal enemy of our freedom has always been the parasitic land of no resources. This has been so since before our free and democratic progenitors the ancient Hellenes retaliated against the Persians in the Trojan War. The totally desperate land of no resources eternally jihads, struggles, or wars against us because our freedom undermines their ability to feed like a parasite on the outside world.

9/ Given that the main root cause of war, terrorism, and barbarian-style raiding has historically been the desperation mindset of the Mideast people, We shall always ask if we are fighting the right people and not the front-man, or escape-goat the Arab house of war has framed for us to blame.

10/ Given that the Arab empire struggles as a collective while intently pretending not to be a collective, the Senate may retaliate against any portion of the PU or Arab empire it elects will be most efficacious.

11/ If our nation comes under large-scale nuclear or biological attack, regardless of the ostensible cause, the Senate may elect to also retaliate against the Arabian Peninsula, and the rest of the Arabian empire.

12/ Except on live-fire battlefields, and where allies host our bases and forces, all high ranking military personnel shall be prohibited from talking with enemy or adversary foreign governments or forces.

13/ Democracies work better in crisis mode. Simply look at America during WW2.

14/ The selling-off of valuable surplus government equipment and assets for below market prices being an age old way to steal from government, very large Sub-Senate juries shall audit the contemplated action and supervise all such sales.

15/ There shall be 4 categories of war action. The military and militia Sluice shall produce comprehensive rules for what is allowed under each category, and review these rules at least

annually. In order to declare war, make war, or halt a war, the following majorities shall be required of our nation's Over-Senate:

a/ To arm and mobilize our nation, to protect the people of a foreign nation in a state of anarchy or warlordism for up to 30 days, to order the assassination of monarchs, presidents, or 1-in-3-million oligarchs, to have voluntary inoculations of the people for germ warfare pathogens, a simple majority of the Over-Senate shall be required.

b/ To initiate a restrained war under a defined and restrained mandate, to initiate a sea blockade, to destroy an enemy nation's communications, electrical and aircraft infrastructure, to assassinate 1-in-100,000 oligarchs, a 60% overmajority of the Over-Senate shall be required.

c/ To assassinate monarchs or oligarchs and their appointed administrations without regard to collateral damage, a 2/3 overmajority of the Over-Senate shall be required.

d/ To initiate an unrestrained war, or war for survival. To use a nuclear or neutron first strike, or to practice collective punishment of foreign groups, a 75% overmajority shall be required.

16/ We shall recognize 4 involvement levels in all wars, so that our leader ship can speak to us accurately about a very important life and death subject for our nation.

Level-1-War: This is a war involving only our nation's full time professional military. A 55% overmajority shall be required for this.

Level-2-War: This is a war involving our nation's part time professional military in addition to its full-time military. A 60% overmajority shall be required for this.

Level-3-War: This is a war involving only our nation's militia as well, therefore, it must be militia fighters defending our nation. A 2/3 overmajority shall be required for this.

Level-4-War: This is a war involving the drafting of people from beyond the militia. A 75% overmajority shall be required for this.

17/ Instituting a military draft shall require a 75% over majority of the Over-Senate. Institute a military draft shall require an 80% over majority of the Over-Senate.

18/ It shall be the duty of all patriots to take up arms and kill everyone attempting to circumvent these draft rules/laws, as well as everyone attempting to draft people by any other means but a birthday draft.

19/ Our nation shall be mostly an isolationist country, however we shall stand ready to arm unarmed and disarmed nations oppressed by tyranny so that their people may rise up against the tyrants oppressing them, and also against their foreign occupiers. We shall also stand ready to use our world beating air power to rain death upon the tyrants, and we shall also stand ready to withhold access to our oceans from the tyrannical nations of the world. However, we shall be extremely hesitant to send our ground troops, and we shall not generally share our most complex and secret weapon systems.

20/ The following great words about the use of our nation's military by John F. Kennedy shall be included in this constitution:

a/ "Let every nation know, whether it wishes us well or ill, that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and

the success of liberty.”

b/ “To those nations who would make themselves our adversary, we offer not a pledge, but a request: that both sides begin anew the quest for peace, before the dark powers of destruction unleashed by science engulf all humanity in planned or accidental self-destruction.”

c/ “Let all our neighbors know that we shall join with them to oppose aggression or subversion anywhere in the Americas. And let every other power know that this Hemisphere intends to remain the master of its own house.”

NA'20. ULTIMATE GOVERNMENT AUTHORITY

1/ The Senate shall be the final arbiter and judge of all matters in our nation, including but not limited to Senate elections, Senator/bureaucrat qualifications, Senate membership, and bureaucrat employment. No aspect of Government shall exist outside the authority, purview, and jurisdiction of the national Senate. There shall be no national security matter, no investigation, no bank, no Warren Commission, no fictional citizen activity, no matter affecting large numbers of people that will be outside the power of the nation's Senate.

There shall be no person, or director, or head-man, or department/bureaucracy/division of Government, or Government-related fictional citizen that is not entirely under the authority of the Senate and tenethly accountable to the Senate. This includes all of our nation's military, internal security apparatus, spying forces, intelligence gathering services, and all police forces, and all other similar agencies of government.

2/ All aspects of Government shall be under the supervision of at least one Sluice of the Senate. It shall be a felony to conduct a black-op, or attempt to establish, or to work for a branch of government that is not under the direct supervision of at least one Senate Sluice, or to be involved with an operation that is doing other things than it is supposed to be doing. In fact, all of the employees of government activity are supposed to constantly review their mandate end check to make sure they're not going off somewhere else in their purpose and duties. Intentionally conducting a black up, similar to what Oliver North conducted, even if there is no private benefit, shall be considered as a democide. Where people are merely confused about what they're supposed to be doing, and following the herd, this should not be a crime. The crime only involves intentional misdirection of government and government funds for some completely different purpose.

3/ The Senate shall have the right and ability to fire any and all members of the government bureaucracy at will, and without notice, at any time they wish day or night 365 days a year for stated cause or for no cause at all. All that has to happen is that the relevant Main-Senate sluice decides to fire certain people in the government bureaucracy. Indeed it may fire all members of any government bureaucracy at once or some of these bureaucrats (no matter what agreements or rules were previously created by this democracy or the prior corrupt democracy, and this includes all agencies/ bureaucracies, especially the totally corrupt Federal Reserve with its hard to understand name in disguise of its mass

stealing for foreign parasitic nations.

4/ No government agency shall make any policy of any sort. They must ask for guidance from the Senate if they don't know what to do or how to proceed. Also, nobody not elected by the people shall ever participate in the process of making any official policy, and it should be a crime for unelected people to make policy, including the mere forms that people fill out to apply for government permission; including when permission must be applied for.

5/ The national Senate and the military shall not have authority over the militias. It may ask, but the militias don't have to go, and they may leave at any time. The militias are lightly organized and entirely voluntary because they are both much stronger and harder to misuse this way.

6/ All courts shall be below the Senate, and no court shall ever have the power to countermand the Senate in any way, or compel the Senate to do anything at all. In general, court rulings should not hold much validity in the Senate. Otherwise the courts become a back door to Senate power. There shall be a death penalty for those people in the court system who rule on election matters or attempt to say to any person that they are not allowed to run for the Senate, or hold a position in government. Only the Senate shall be able to do this, and then only with a 2/3 overmajority, and never for partisan or political purposes, or petty crimes, or shadow crimes. Those who bring cases of election impropriety to the court system shall be guilty of a felony. Only our million-man Sub-Senate shall be allowed to rule on election matters.

7/ No person, court, group, jury, or government agency shall ever have the power to interpret, veto, cancel, modify, officialize, inaugurate, or bring into force any Senate policy: Otherwise that group would have a sort of veto over the Senate. Senate juries may elect to dismiss, acquit, not enforce, or not prosecute any case before them, however, they shall not have the power to cancel the law itself.

8/ The Senate shall have the right and ability to fire any and all members of the government bureaucracy at will, and without notice, at any time they wish day or night 365 days a year for stated cause or for no cause at all. All that has to happen is that the relevant Main-Senate sluice decides to fire certain people in the government bureaucracy. Indeed it may fire all of them at once with one single vote, or it may fire some of them with one single vote.

All unelected government workers must share all information and act with total honesty with the elected part of government, or then may face felony contempt of congress charges, or Senate perjury charges. Everyone including especially all government manager and other workers must answer the questions posed at Senate hearings with complete honesty, and never hide information by omission, Indeed, each Senate jury holding a hearing shall have the power to charge with contempt of the Senate, any of the people called to testify, if that Senate jury elects that they are acting in a dishonest way.

9/ All government employees must truthfully answer all Senate questions either asked via email or at a hearing related to their work. Where any government worker claims government secrets, the Senate hearing must close its doors so the government worker can speak openly and candidly. Then after the hearing is over, the Senate shall decide

whether the matter and the video recording of the testimony will be made public or not. However, no government employee may evade answering any Senate questions the way so many rogue government bureaucrats did in the early 2020s. Furthermore, where the Senate judges that a Senate witness is behaving evasively, it shall generally be thought to be an admission of guilt that the person has gone rogue, and is involved with a government conspiracy to either steal money or arrogate Senate powers. So the Senate shall have a particularly low bar for referring evasive and lying bureaucrats to national prosecutors, for trial under charged of either perjury or contempt of the Senate.

10/ The new constitution and the new Senate shall take very seriously those people who lie to it under oath. No longer shall we slap people on the wrist for lying to the national legislature when it's investigating serious matters. These people should go to prison for decades, depending on the severity of their intentional lies and material misrepresentations, intentional omissions and failure to be forthright.

11/ There shall be no oaths of allegiance to any sub part of government. All oaths shall only be to the people of the nation.

12/ It is widely thought that our prior government attracted and promoted corrupt people and that the top leadership was mostly corrupt. It is also widely thought that we would be better off just eliminating all of the old management and even many workers and start over. And likewise with the rules they have established. Thus we shall replace the entire government bureaucracy and eventually its entire legal code from the prior corrupt democracy.

13/ We shall always keep in mind that many people like to work for government, and it is easy for government to find good workers. So when we cut off the old heads/limbs of government, new ones will grow right back. Nonetheless, the Senate shall foster a situation where:

a/ Many good workers compete to be a government worker.

b/ Working for government is regarded as getting a sort of seal of approval on your career.

c/ Working for government has ~15% higher pay than in the private sector.

d/ Nearly everyone leaves their job in the private sector if they get honored by being hired by Government.

e/ Government workers are regarded in much the same way as people called to serve in the military. Thus, most good people who have been hired/drafted to work for government for a short time find it easy go back to their industry at a higher career level then when they went to work for government.

14/ As a second protection against corruption we shall say that no person shall work in any Government management role for more than 2-years. This is intended to give corrupt Government managers a reasonable fear of their successors. And all successors shall be obligated to audit their immediate predecessor. Successors will also be incentivized by Senate status to report all possible evidence of corruption. Also, to prevent government employee rings, nobody shall be allowed to work in Government management for more than 4-years in 12. The best way to assure the honesty of the current government shall be thought to be the certainty of the new

government reviewing the work of the prior government for gross misconduct and corruption, and stealing, and malfeasance and other similar crimes.

15/ Regarding 1-year terms of office for all government management (elected, appointed and hired):

a/ Corruption is harder to organize, less profitable, and more dangerous when we use 1-year decision makers.

b/ Government veers off course less with 1-year decision makers than 4-year decision makers.

16/ There is not supposed to be a specific bureaucratic culture as such cultures augur against our laymen Senators who do not know the metaphorical secret handshake.

17/ We shall not have systems and programs where power centralizes. Instead we shall create systems that are centripetal and constantly divide power. Indeed, those who call for the centralization of ultimate judging and allocating power should be regarded as working to corrupt our government. Also, this is not to say that one many may come up with a new plan, or approach. It means that our decision making bodies, our Senate juries are supposed to be in the thousands when they allocate funds for each department of each sluice.

18/ To reduce the power of the appointee level of the national bureaucracies, the top hired position possible is to be the head of one division at one regional voting center. That is to say that no appointee shall rise higher than controlling 1/36th of any national bureaucracy among the hundreds of bureaucracies in the federal budget. Above this, the management shall all be by Senate jury.

19/ Only the entire Sub-Senate shall have jurisdiction over matters of election honesty and fairness.

20/ Except for UM taxation on international trade, our nation and its people shall not be bound in any way to pay any taxes or fees to any other nation or international body.

21/ We are a separate nation from use of three names to hide things. And as such we shall owe no money or taxes, or anything else to this foreign nations. All assets of foreign monarchs shall be nationalized including especially those belonging to the English crown.

22/ There shall be no government corporation, or fictional citizen passing itself off as the government or usurping the roll of our government. There shall be no fictional citizen that uses the name the United States, or the United States of America, or America, or American, Or US, or similar confusing names. Every entity called by one of these names shall be nationalized and subsumed by our nation's national government. No corporation or legal entity shall ever use one of these names or imply that it is government again. All such use in the future shall be considered counterfeiting and punished accordingly. Everyone is advised to stay far away from this line, or go to prison.

23/ There shall be no corporations or other fictional citizens either within our government, or acting as our government and all such corporations and fictional citizens shall be considered as foreign fronts. As such, anyone acting on behalf of such a fake imposter corporation or fictional citizen shall be considered as working for a foreign government subject to execution for treason/ democide.

24/ No fictional citizen shall serve as the government of our nation, or make any laws or rules, or enforce any of the

rights, rules, or duties expressed herein. All claims by fictional citizens over the people of our nation, or their democratic government shall not only be void, but those attempting to usurp the rights of the people shall be subject to charges of treason and/or democide

25/ All attempts to transfer away the powers of the Senate shall be void. Those who work to transfer away the rights of the people should be at the tops of everyone's list.

26/ The people of our nation shall have an obligation to kill all foreign military and peace keepers on our land, including all so called "peace keepers" of all international bodies. We as an armed people have no need for this.

27/ The nations spying apparatus shall be regarded as the thing that belongs to the people, and not the Senate.

28/ to keep our nations spying apparatus from acquiring too much power, and being used against the people, we shall say that the most powerful 200 intelligence people must cycle out of the intelligence industry for life after 5-years of service.

29/ When the nation's spying apparatus finds dirt on the opponents of their allies and benefactors, this may be a felony.

30/ The top employed managers of government shall be changed regularly because it reduces misappropriation and theft.

31/ There shall be, no secret government agencies that nobody knows the name of, or that exist in any way off budget, or outside what is thought to be the budget of the national government. In all cases, all the people involved shall be thought to be traitors that sold out to foreign interests.

32/ Only government may do simulations of disasters. Otherwise, we may not be able to distinguish between preparing to solve the problem and preparing to cause the problem as the World Economic Forum has been doing recently

33/ Our new Senate shall have the right and power to renege on, and dishonor absolutely anything the old corrupt government did, agreed to, or promised. The new Senate shall also be free to try and punish any or all of the corrupt or overreaching people of the old Government. It may punish the people of the old system for any reason it sees fit, and with any punishment it elects to dispense. The old Government shall be viewed as surrendering unconditionally.

34/ Our nation's spying and intelligence gathering apparatuses shall only be allowed to gather information. Where our intelligence gathering people to take action against foreigners, and especially against our own people, this shall be considered capital democide, whether or not authorized by the Senate. The Senate may however authorize the military to act against foreign governments and foreign individuals. However, there shall be a firewall between the intelligence gathering aspects of government, and action parts of government. And the Senate shall be the master of this firewall for our honest nation.

35/ The Senate may take overt or covert action against foreign governments and foreigners. It may attack tyrants, and foreign leaders who are leading nations down the drain and away from democracy. However, our government shall be strongly biased against covert action.

36/ The Senate shall be prohibited from establishing, using,

or funding independent agencies such as the old Federal Reserve, and the old SEC, the old FDIC, the old EPA. Again, the Senate shall be prohibited from establishing independent agencies that are not under its complete control, and where it does not have the total and immediate right to direct every aspect of the agency, and the right to fire every single person working for or with that agency, along with the right to shut that agency down, or lay off its workers to see if there is any perceptible effect of the nation going-it without the agency.

There shall be no unelected people working in government that are exempt from Senate regulations and Senate's absolute control over firing.

37/ All government workers shall have an annual review. All contracts, (including all hiring agreements) made by the Government shall be voidable by the Senate any time it wishes.

38/ Government's involvement in the financial, movement, and lifestyle decisions of the people is supposed to be minimized.

39/ When we study the Oracle of Delphi from ancient (democratic) Greece, we find a tool that the Sphinx Mafia to quietly influence and redirect the Greeks. We shall not make this mistake again. There shall be no use of computers or so-called AI in the decision-making process of the Senate. All we have to do is look at the Oracle of Delphi to realize that we don't want this.

NA'21. INTER-ELECTION PERIODS

1/ Our part-time Sub-Senators shall begin service on the appropriate teneth considering their Nome's number. Once we are out of the propagation period, this shall not be less than 2-teneths after being elected. This inter-election period is so the new Senators will have time to pass the Sub-Senate's orientation, anti-corruption, and education programs.

2/ Our full-time national Main-Senators shall begin service no less than 2-teneths after cycling out of the Sub-Senate. This is so they will have time to pass the Main-Senate's orientation and anti-corruption education program.

3/ Our full-time national Over-Senators shall begin service no less than 2-teneths after cycling out of the Main-Senate. This is so they will have time to pass the Over-Senate's orientation and anti-corruption education program.

4/ When our Over-Senators are elevated to the UM Main-Senate, they shall begin service no less than 2-teneths after cycling out of the national Over-Senate. Those entering the UM-Over-Senate shall begin their service immediately after their UM Main-Senate service is over.

5/ The periods called for herein shall not necessarily apply during the shorter initial Senate propagation terms in the first 5-years of this Constitution.

6/ In the beginning, new Senators will only have to complete a limited amount of orientation and anti-corruption courses. However, over time the amount of educational material will grow. The Over-Senate may increase the inter-election periods for our nation if it elects to do so with a 2/3 overmajority. The inter-election periods shall not exceed 4-teneths.

NA'22. CRISIS AND EMERGENCY BODIES

1/ In our new democracy, it shall be legally impossible for anyone but the national Senate to declare any state of emergency. Everyone involved with establishing or using a state of emergency as an excuse for claiming special powers or ignoring the provisions of this constitution should be regarded as a democide and traitor democide and executed by the state. Also, where people attempt to use an unelected organization or foreign organization, or international organization, or multinational organization such as the UN, NATO, WHO, or the EU, or some Swiss organization to take away our dear rights or for ignoring our constitution, they shall likewise be considered a democide and executed, even if they are not our citizens. If the Senate does not act immediately to imprison all conspirators improperly using a state of emergency to gain powers over the people, it shall be the duty of the people to kill all conspirators. Also, everyone who sticks their neck out for this purpose and pulls the trigger shall always be regarded as a great hero and given a large Senate pension for life.

2/ Neither the Senate nor anyone else shall ever be allowed to institute any emergency powers acts, or narrow emergency bodies with broad powers or long-lasting powers except as described below. If any emergency acts or bodies are constituted due to an emergency, they shall obey the following rules. Any violation of these rules shall generally be considered a coup attempt, and all participants shall be subject to charges of capital democide, with the national Sub-Senate serving as jury. Anyone else but the national Sub-Senate who usurps the power to judge in these matters, shall also be subject to charges of capital democide. The following rules shall apply for all emergency bodies in our nation:

a/ No emergency acts or bodies shall be above, or have any authority over the Over-Senate, the Main-Senate, or the Sub-Senate of our nation.

b/ No emergency bodies shall have a representation ratio narrower than 1-in-10,000 voters.

c/ All emergency acts and emergency body actions shall always be subject to veto by either the Sub-Senate or Main-Senate with a simple majority vote and without stating a reason.

d/ The Sub-Senate and the Main-Senate may immediately shut down any emergency act or emergency body at any time with a simple majority vote, and without stating a reason.

e/ All emergency acts and bodies shall be created in one step, and then staffed afterwards in a second separate step. All emergency bodies shall be staffed exclusively with acting national Main Senators. Also, all Senators involved in creating an emergency body shall be disqualified from serving on that emergency body. They may address the emergency body, but they shall never be part of the decision making apparatus.

f/ There shall be no centralized staffing of emergency bodies of our nation, and each RVC shall independently elect the appropriate percentage of its members to create the appropriately sized emergency body.

g/ No emergency act or emergency body shall live for longer than 30 days. There shall be no renewals, or extensions, and after 30 days the emergency act and emergency body shall die forever. No emergency act or emergency body action

shall live or survive for longer than 30 days from the date the emergency act or emergency body was created.

h/ No person shall serve on more than one emergency body, or manage more than one emergency act in their lifetime.

i/ No protest/assembly movement shall be the subject of emergency powers.

j/ The forgoing provisions (a—h) are intended more than anything else to entirely prevent the use of emergency acts, emergency bodies, and the granting of emergency powers. Future generations are strongly warned that emergency bodies and emergency powers are more than anything else, a backdoor to corrupting and even dissolving a democracy. Emergency powers and those asking for them should always be viewed with extreme suspicion and mistrust.

3/ No emergency act or emergency body shall have the power to suspend or ignore any part of this Constitution for any reason. Only the amendment process shall be used for that. Every person involved with using an emergency act or emergency body to ignore all or part of this Constitution shall conclusively be considered capital democides. It doesn't matter if there is a pandemic, a war, an epochal lyse of a tsunami, or a volcanic (ice age) winter, everyone involved with the creation of a sub-routine that attempts to usurp control over the whole by using a supposed emergency shall be considered a coup plotter and a capital democide.

4/ The National government shall proactively establish a system of crisis law, so that civil society can continue on in various levels of catastrophic crisis. There shall be 5 levels of crisis law. In general, the crisis law system shall use multiplied penalties for crimes committed during a crisis, as the stakes are higher. This shall be accomplished by means of a lockup sentence multiplier, 0.5, 1, 2, 3 and 4. These multipliers are for Prosperity mode (0.5X), normal mode (1X), minor crisis (2X), major crisis (3X), and extreme crisis (4X) respectively. The level 4 and 5 crisis is close to the context for the Sharia law of Islam, the slave's religion of desperation.

5/ Reasonable written promises to pay made in a disaster shall be legally enforceable in court with Senate established multipliers for non-compliance, once the crisis abates. These promises shall be quantified in labor units which are convertible to dollar currency.

6/ In all levels of crisis, the Senate shall continue to rule the nation. If the voting locations every come under attack, then the Senators shall reconvene in new secret location RVCs that are 1/10th the normal size until the crisis abates. Thus there will be 340 RVCs instead of 34.

7/ When Main-Senators and Over-Senators die or are disabled, each Centi-Nome and RVC shall elevate the #2 person immediately. If this #2 person is not fit, the #3 person shall be elevated, and so forth.

8/ If the national Senate cannot convene or is unable to give instructions, then the county Senates shall rule their respective jurisdictions under this Constitution until such time as the national Senate can re-convene.

9/ There shall be no emergency suspensions of rights, like the right to go outside and the right to assemble as happened under COVID and also in Nazi Germany with the Enabling Act of 1933. Those participating in an illegal power grab involving an emergency suspension of rights may be charged with capital democide.

10/ There shall be no martial law, or military rule in our nation. This shall not be on the menu because it lacks a broad based decision making legislature, and is corrupted by a small group or junta of men. And it is the part where a narrow group rules over the whole that will no longer be possible. The Senate must continue and it must remain in charge of the military.

11/ As we will no longer be using specialist judges in our judicial system, there will be much less need to delay justice in times of crisis. So there is little need for Government to have any special right to hold citizens in a time of crisis.

Therefore, we will say that even in times of crisis, Government shall only get 30 days to charge full citizens. And this shall not apply to foreigners and immigrant citizens that don't have the right to vote. Also, for citizens, there shall be no special courts convened, or special trials or special penalties, or special jurisdictions, or special judicial rights, or special procedures due to any crisis. The Senate is imposing this system of standby crisis law rules, so nobody will make up legal rules on the fly in any future crisis.

12/ There shall be no rationing or allocative taxation, except when we are clearly facing a shortfall that is beyond the ability of a market to fairly balance supply with demand. If the market can fairly allocate, then the market shall be left to work its allocative magic.

13/ Government disaster response should be seen as a supplement to the local response of the people, not a replacement for it. The correct disaster response recipe shall be seen as people helping themselves, with government helping out.

14/ History clearly shows that government mismanagement is many times more likely to cause serious problems than the organic response of the people. For this reason, government shall never be allowed to entirely take-over and manage the entire disaster response to the point where they exclude others. Such is the domain of tyranny and contrary to our freedoms.

15/ Individual crime scenes may be closed off by police for a reasonable amount of time to conduct an investigation. And police may drive people out of their low-lying places due to expected floods and winds. But Government and police shall have no right to close off areas to owners and tenants after the disaster. And again, government shall not monopolize the disaster response.

16/ Government and police (regardless of orders) shall not be allowed to exclude informal charity aid and charity help from entering a disaster area where people might need either help of supplies after a disaster. Government may have up to 20-minutes of mandatory advice, but they shall not be allowed to exclude people in a disaster.

17/ The people shall be free to move around at all times, including especially during times of disaster and war. Government may advise the people about where to go, however Government and police shall have no authority to tell the people where to go or to keep the people from moving around or leaving their homes, or going to work. And this shall be especially so in times of disaster. Also, everyone shall have the right to crawl around and through collapsed buildings looking for loved ones and strangers.

All people who attempt to limit other people's right to move and go around, for pleasure, or to engage in goods

movement in commerce: And whether this limiting is by government or by fictional citizens or individuals or using the law or using threat of force: All shall be regarded as working for Ishtar and hence democides: All shall be subject to prosecution for being democide as traitors to democracy and freedom. Also, these limitations can take many forms such as:

a/ Increasing the parts of the nation closed to the people.

Military bases, national parks, fisheries, good farm land.

b/ Mass lock downs for excessive time.

c/ Masking and distancing requirements.

d/ Vaccine requirements to travel.

e/ Domestic visas or travel permits as they have in China.

18/ In times of severe disaster, police officers shall not have the power to order people out of their place or out of an area. They can advise, but they cannot order people to leave. This rule also applies in times of peace and order, but in times of extreme war and disorder and corruption, we especially don't want police having the power to order people from their homes.

19/ All the people entering a crisis area to help should ping the recorder system about this. Also, in all crisis situation, the recorder system starts paying special attention to documenting who is going where in crisis areas. Also, in times of crisis, all outsiders have to keep their phones on.

20/ All new dwelling units must have a switched generator input plug on the outside if they have outdoor area. This way, people can easily buy and plug in a generator when needed.

21/ All new units shall have a switch in their breakers so that the power company can turn off each service's high power system, so everyone can power their critical power system. The low power system powers refrigerators/freezers, the LED lighting, and the personal electronics. This shall be 1,200w maximum.

22/ Government shall not be allowed to close passable roads or deny access during crisis situations, and this, especially for people wanting to help. Wherever government is trying to deny access for volunteer helpers, it should be viewed as just another erosion of our rights for some excuse or other.

23/ Tyrannical interests in government love to chip away at the fundamental rights of the people. We shall not let them. In crisis situations, government people unnecessarily denying the people access should be jailed.

24/ It shall be a felony for government officials to confiscate private aid without good reason, or without calling the matter in for recorder system monitoring.

25/ We will have a militia drone corps of over a million pilots (1:250 nationally), and a similar number of drones. Some of these will be fall-back/ evacuation drones, some will be resupply drones, some will drop bombs, some will intercept enemy drones, some will surveil and report. However, in all cases, the drones and the pilots must be able to be re-purposed in minutes for disaster relief.

26/ Government shall have the right to run its own disaster response. Government shall not have the right to run the entire disaster response and restrict access, and to keep out private drones and private helicopters in disaster areas. Also, there shall be no national or federal management of disaster areas. All management must be local and at the level of that county, or if this is not possible, then adjoining counties.

27/ Our Air force will always be ready to jump at the opportunity to air drop supplies to remote places and re-collect the parachutes.

28/ In natural disasters, death shall be presented as confirmed and estimated.

29/ Where entire communities are wiped out, in a flood, there shall generally be no right to rebuild in the flood zone. It shall also no longer be possible to sell flood insurance or build in a flood zone.

30/ Government shall be prohibited from giving money aid for disasters, and must buy things and deliver them to the disaster area.

31/ Stealing valuables, and breaking and entering into stores get double penalties during disasters. Those who loot houses get triple penalties for those who loot houses residences,... provision, hearing must be for realistic things that people actually need, and in realistic amounts, and cannot include especially expensive or fungible things. Your child needs some kind of drug, or you need plywood, or you need weatherproof tape, or something very practical. Also provisioning must send an email to the company that they are provision from showing the goods that they have provision prior to leaving the site of the provision hearing where the provision occurred. The businesses provision shall be entitled to a 25% overage for their goods that were needed.

32/ During times of mass trauma, or other mass medical crisis, where there isn't enough care to go around, the care shall be prioritized by triage. Those who require immediate care and don't appear to be about to die shall come before those who do appear about to die. Those who have problems that can be delayed get delayed.

33/ Instead of having a bloated national bureaucracy for disaster response, we shall use a decentralized design funded and managed at the county level, but shared and dispatched by the national Senate. However some things like our late-life emergency aircraft fleet will also be managed and operated at the national level.

34/ As with other parts of our government, there shall be no disaster response director, or czar. Instead we shall use Senate juries.

35/ The Senate shall prepare disaster plans in advance for all communities for all reasonably foreseeable natural disasters, and military attacks. These plans shall be open to the public because mismanagement is a greater risk than enemy attacks on civilians in time of disaster.

36/ We shall have a government emergency information service team for sharing and viewing videos and texts about disaster conditions.

37/ There shall be no secret declaration of crisis law, and all such declarations shall be void as if they were trying to declare martial law and seize our dear liberties. Further, all who participate in any secret declarations of martial law whether in government or the media shall be executed for capital treason when the people get their Government and nation back.

38/ All emergency proclamations shall require a prior exogenous natural or war disaster. There shall be a death penalty for those making emergency proclamations without a an exogenous natural or war disaster.

39/ Except for military bases, there shall be no special zones or areas where any of the rights expressed in this constitution are subject to suspension.

40/ There shall be no circumstances such as epidemic, civil unrest, invasion, debt crisis, or declaration of martial law, where any part of this constitution can be suspended.

41/ An 80/20 vote, a 4:1 overmajority shall be required for the Senate to institute any new:

a/ Disease lockdowns.

b/ Food rationing.

c/ Gas rationing.

d/ School closures.

e/ Carbon taxation.

f/ Travel restrictions.

g/ Social credit systems.

h/ Alternative energy project funding.

i/ Price fixing schemes.

42/ It shall not be possible for any Government people to gain any powers at all by declaring an emergency. This back door to power shall not exist in our democracy. Also, the people that try to do this should be arrested and charged with democide just for attempting to use this ruse on our democracy.

43/ There shall be no land within our nation that is out of the Senate's jurisdiction. There shall be no special jurisdictions, including that of Washington, or Mexas. All shall be under the Senate. Anyone attempting to create or advocating a special jurisdiction zone should be regarded as someone trying to corrupt government by using a back door.

44/ Except for 2-meter tall fenced government military bases and other controlled entry government areas maintained by government and fenced with a 2-meter fence and with 24 hour security, there shall be no special jurisdictions. No fictional citizens, including corporations, charities, religions, endowments, universities, colleges, or other schools shall have their own legal jurisdictions or police force.

45/ Regarding non-citizens, the Senate shall be free at any time of extreme crisis to declare that non-citizens (and non-citizens only) are subject to a form of martial law. And as with some other parts of this constitution, we are allowing foreigners only martial law to emphasize that we have an absolute prohibition on declarations of martial law for citizens.

We as Americans, as the land of the free, we must always be allergically opposed to any form of government where either the military makes the decisions, or some small group of oligarchs, or even a narrow democracy is making the decisions for the nation, or there is no clear decision making process. In all of these circumstances, the people are supposed to rebel and have a counter-revolution against the narrow (probably Mideast fronting) group running their nation for them. So when tyranny becomes law, rebellion becomes duty, as Thomas Jefferson said.

Under martial law for non-citizens, certain non-citizens may be subject to arrest and indefinite pre-trial lockup at anytime with suspended rights. However this shall not apply to citizens. Furthermore, under martial law for non-citizens, any or all people who cannot speak the national language like a native speaker, may be considered a non-citizen, and either incarcerated or deported en mass without any hearing. Where the Senate declares martial law for non-

citizens, it shall not be applicable for citizens unless they come to the defense of non-family non-citizens: in which case the foreigner defending citizens shall also be subject to martial law for non-citizens for defending non-family non-citizens.

46/ Wartime destruction normally leads to much sudden desperation for key commodities, and as such, it is inherently prone to profitable exploits by foreign nations providing so-called "far" grain, super expensive supplies from far away. Thus war frequently creates many highly profitable situations for economic parasites similar to the Arab Oil Embargo of 1973-1977 where oil prices went up by 10-fold. Also this astronomically massive profitability frequently creates powerful incentives for economic parasites to fund war, to cause war and to keep war going on for many years. For this reason, wartime shall be viewed as the absolute worst time to have monarchs, tsars and concentrations of power and corrupt deep-state appointees they invariably rely on. Also, these concentrations of power are how our enemies corrupt our government and military and cause meat grinder situations in war to weaken host nations for the benefit of their parasites. In other words, the foreign interests that benefit from the eliminating of host men are invariably behind the Monarchs and tsars, and particularly so in war. And this is the way it's been since the pharaohs built the pyramids. Therefore, we must always go in the opposite direction and never use monarchs, presidents, tsars and the like when we go to war. We must instead go in the opposite direction and retain our regular form of broad democracy.

47/ The Over-Senate shall produce a new definition of treason.

48/ There shall be no special districts like Washington DC. the regional voting centers should just be part of the counties are there in. They shall be national property, but they shall not be a special jurisdiction until themselves. If we allow this, then it becomes easier to convert these into special districts with special powers, where special laws apply for the benefit of the people working in government. We do not want this, so we shall never have any special districts, even our regional voting centers. This shall merely be security areas so that senators can work and govern without interruption.

49/ All secret declarations of martial law shall be void, and everyone participating in this shall be considered a traitor, and executed when the people recover their democracy and their nation.

50/ In crisis situations such as those from forest fires, floods, earthquakes, tornados, hurricanes, tsunamis, volcanic eruptions, and certain other natural disasters, government people (including the Senate) shall not be allowed to command civilian volunteers to stop helping, or prevent them from helping. This shall simply not be allowed.

51/ In disaster situations, government must give clear instructions about when people need to stay home from work and when they need to go to high ground. After this, it shall be a crime for employers and managers to ignore these emergency instructions.

52/ Each Centi-Nome shall manage the distribution of donated money and disaster goods. The army is supposed to have disaster equipment such as bulldozers, off-road trucks, and fire extinguishing equipment.

53/ Regarding the power of government to keep people off the land and premises they own and rent: this right shall be extremely minuscule and temporary. Everybody who evacuates for a natural disaster shall have the right to immediately return to their premises they own or rent at any time, immediately after the crisis has passed. It shall be a crime for government people or insurance people or anyone else to prevent evacuees from returning home or rebuilding, except in flood zones, or near volcanos or earthquake faults. No branch of government shall be allowed to keep people out of their houses once the hurricane has passed and once the fire has been contained, and once the tsunami is over, and once the earthquake/volcanic eruption has ended. Where there seems to have been a murder or kidnapping or arson fire, police shall have up to 7 days.

54/ There shall be no national FEMA department, and all emergency management shall be managed at the county level, with it possible to draft response supplies. Also, each person receiving government benefits for a disaster or any kind of government benefits at all they have to ID in and they have to verify how much they got of what and the amount that government is paying for this.

55/ Wherever government declares a crisis due to a natural disaster, that shall be considered as freezing prices of disaster goods and services for 30-days. It will be a crime to take advantage financially during a crisis.

56/ All disaster monies from government must be authorized by the Senate, and then shall be no allocation by any unelected people.

57/ government is responsible for allocating, money fairly, and across all disaster needs, for all citizens, and shall not pay money to non-citizens. Government may however send aid workers and food, and medicine and other supplies to foreign countries that are that suffer, extreme disasters, but it shall not give them money

58/ with regard to spending on domestic disasters, government shall not dis favor any particular location over any other and shall aim to be per capita egalitarian it spending on disasters relative to the damage caused.

59/ when it is convenient, the Senate shall completely shut down FEMA, and restaffing, prohibiting all FEMA managers from working in disaster response for life.

60/ When parts of government and others donate things for disasters, they shall do this via the recorder system which will verify everyone's plight and prioritize those most in need. This will include small children and disabled people, and families with small these first, and those with later older children and elders. Then single women, then men. It should be noted that the recorder system must immediately disburse the donations and it shall take nothing for this. Also both the recorder system itself and the various redundant counties will check the recorder system here. However, (very important) government and anyone else helping donations getting to disaster needy, shall not delay handing out supplies that people need for more than 24 hours.

61/ Where there have been structure fires, the black materials and the black soil may be scraped off by the property owner and delivered to the nearest operating town dump and pay no dump fees. If the property owner does not do this within 6

months, then the county government may also do this scraping off work free of charge to the property owner.

62/ Where there have been wild fires, or mass structure fires in urban, suburban, or exurban areas, the area shall not be replanted with any dry phoenix species such as cedars, pines, chaparral, etc.

63/ Where there have been wild fires, or mass urban fires attributed to wildfire, all property owners shall have the right to rebuild their old previously approved plans without the involvement or intervention of government. They may also update the interiors and external look of their plans and ignore all aesthetic rules of government. All of the people who's buildings have burnt down may also rebuild using any other approved plan from the neighborhood. Also, there should be no right of eminent domain on the part of the public after wildfire disasters. Otherwise people have an incentive to cause so-called wild fires so they can get key properties they want away from their owners.

64/ Where people rebuild their home due to mass wild fire catastrophe there shall be no new building permits, permit fees, impact fees, or other government charges for rebuilding.

65/ Where there is a natural disaster or a mass casualty event, or one is widely predicted (such as with hurricane Helene) all parents shall automatically be granted leave from their jobs and from the military and government employment, except in times of war.

66/ For all disasters, the county recorder system shall offer free accounts for all verified addresses in the severely affected disaster area, combined with an estimated level of damage to that address/person/family. The Senate shall also keep track of all donations by government, and by private people, so that all the money may be spread around more effectively and subject to some sort of fund control system.

67/ All disaster monies from government shall be authorized by the Senate, and there shall be no allocation by any unelected people.

68/ The Senate shall be responsible for allocating all government aid money fairly, and across all disaster needs, for all citizens, and shall not pay any disaster money to non-citizens. Government may send aid workers and food, and medicine and other supplies to foreign countries in the wake of extreme disasters, but it shall not give them money. In disaster situations when there isn't enough to go around, we shall favor citizens over permitted non-citizens, and those over illegals. All the non-citizens shall be expected to leave all disaster areas and go back where they came from, and this especially when there isn't enough to around.

69/ with regard to spending on domestic disasters, government shall not dis favor any particular location over any other and shall aim to be per capita egalitarian it spending on disasters relative to the damage caused.

70/ when it is convenient, the Senate shall completely shut down FEMA and hire completely new people.

71/ No branch of government shall acquire any privately owned property in any disaster without using the eminent domain process. This especially includes money lent to people in disaster areas.

72/ We shall keep our government disaster response organized at the county level so that the disaster response is more accurate and less money is stolen.

73/ Money for disaster response shall be allocated to a particular geological disaster areas and shall not be spent either elsewhere, or on things not related to disaster response in the prescribed area. We do this to prevent disaster administration people from shifting money from one purpose to another, as happened in 2024 when our bloated Department of Homeland Security shifted money away from FEMA and towards housing illegal immigrants in hotels, leaving no money to pay for the hurricane crisis in the Asheville Valley.

74/ Government shall not be allowed to close roads or deny access during crisis situations, and this, especially for when people need help, with the history of helping and volunteering, and for family of people in the area disaster area. The truth demand this, and also the needs of the people demand this. This shall be seen is just another erosion of our rights for some special condition. The government loves to take away our rights. We shall not let them. In crisis situations like this to government people denying the people access in times of crisis should be put away for 20 years as traitors to the constitution.

75/ We shall long remember the great words of Thomas Jefferson that: "There is no justification for taking away individuals' freedom in the guise of public safety." In other words: Never let any disaster, any plague, any war or any other condition be used as an excuse for anyone to take away any right of the people. There shall be no right on the part of government to suspend any rights in any crisis, especially our citadel rights and property rights, and the right to due process.

76/ Wherever there's an evacuation order, the people who own and live in that premises and can show their identity documents that support this, shall have the right to return as soon as the emergency is over, as soon as the hurricane has passed, as soon as the fire is contained, as soon as the tsunami has retreated, as soon as the earthquake has ended, they shall all have the right to return to their residence and begin rebuilding without any involvement by government people seeking to extract money from them.

77/ The public discourse must always remain outside of government control, especially in times of war, financial crisis and other crisis. Never shall any crisis be any excuse for suspension of our rights, particularly our citadel rights.

78/ There shall be no prorogation, of suspension of Senate power by anyone, or any group, and any attempt to do this shall be considered capital democide by the plotters.

79/ All of the old communities that burn down from wildfire or washed away in a flood shall all just be bulldozed and the people there relocated to a new township.

80/ The people shall have the right to give and receive charitable help from one another without government involvement. There is no need for government to regulate or regularize donations. And certainly, no government body having to do with disasters is allowed to turn away reasonable donations.

81/ The national government doesn't run the initial disaster response, instead the national government only makes sure that the local county governments have are properly designated for various sorts of disaster, and they have

sufficient resources on hand to deal with the problems as expected

82/ When the government can suspend your rights any time it declares a crisis, you don't have rights, you have permissions.

83/ There shall be no restrictions on private drones that remain airborne in disaster areas. Everyone may fly over and see what happened what what their government is doing in response.

84/ In times of disaster the militia drone corps shall typically get assigned firstly to inspect disaster areas and also to distributed emergency supplies by land or air. The other drones must keep 100m away on the 3D gps based "radar" that drones use to avoid colliding with other drones. There shall be no right on the part of government to keep the private drones out, or to jam their signals.

85/ From about 90 to 44BC, there was a string of wars, plagues, disasters, and purges of Rome's finest. We should carefully study this list of tragedies that afflicted Ishtar's main adversary.

86/ After a group wild fire, the fire department forensics shall have up to 7-days to collect evidence. After that, everyone shall have the right to clear all the burned stuff on their own lot when they want to and without any sort of permit, or to join with others and clear their lots. After fires, there shall be no special permit to to clear a lot. The government may provide this, however it's not allowed to charge anything for the service, and it's not allowed to dictate terms for how people have to clear their land except that they can't get charcoal and ashes or ash all over the place, and around their community.

87/ After fires, there shall be no need to obtain building permits to rebuild burned buildings. Everybody shall have a constitutionally guaranteed right to rebuild/restore their burned buildings in the general way it was before the fire. Also, all foundation steel that was exposed in a prior fire shall be heated until it glows and then quenched and then the temper drawn again. Then it may be re-used.

88/ It shall not be possible to live in a community of over 100 people in dry woods, dry tall grass, cedar, chaparral, or any other phoenix species of plants that have evolved to help periodic firestorms along, so as to get rid of all the competing but slow growing species. Every community over 100 people in a town in a dry brush/trees situation must be inside a realistic sized fire break zone. The next rule is that if you live in a fire zone where embers can fly from the fire a mile away then you have to build your house out of non-combustible materials.

89/ All of the new buildings must be made of non-combustable materials.

90/ Members of the public are supposed to offer help to the fireman by waiving arms briefly to firemen who raise an arm up to indicate OK and waiving both arms like an angel is a call for the person to come and help.

91/ There shall be no chaparral, no cedars, no pines no dry oaks no phoenix plants in the urban and suburban areas of our nation's communities. There are certain plants that will no longer allow in our communities due to the species being a fire hazard.

92/ People shall have reasonably sized water cisterns or rainwater swimming pools at their homes in fire zones. They are also supposed to only refill these from

93/ The fire hydrant system in our new townships should be a bit over-designed in terms of volume. But this system can be used to fill cisterns and swimming pools during storms when there is plenty of water. Thus we imagine many people filling their pools with free storm water and then selling that water back for agriculture in late October when it is very dry and there isn't enough water, but it is cool and swimming isn't really as great as it is in the summer.

94/ Our nation's strategy for reducing forest fires and community fires shall be:

a/ To have many wide fire breaks around the nation.

b/ To close the wilderness areas to outsiders during high wind situations.

c/ To allow the public to shoot arsonists recorded lighting fires.

d/ To develop firefighting robots that can be dropped in from the air.

e/ To establish a national fleet of fixed wing water dropping aircraft.

e/ To ban electric vehicles from areas that suffer high wind forest fires.

95/ The firemen in times of forest fire shall guide their own efforts and all the people on the outside shall only be able to change the lead firefighters.

96/ We shall also develop .5x, 1x, 2x, 3x 4x and 6x humanoid AI robots, that are operated by people in electronic leotards with hand controls. The 4x and the 6x robots will be very strong, and they will have tires too. So they can pick up a pallet load somewhere and bring it elsewhere on a construction site. They can also work putting out forest fires.

97/ The Senate shall use x-prizes to develop an AI robot wood chipper. This is a self propelled wood chipper on smallish tank treads. It has a generator and all the equipment is electric. The tank treads, the chipper mechanism, the robot arms are also electric/hydraulic. The lobster style robot grasping arms automatically cut plants and another pair of arms brings the cutting to the chipper. Out of the chipper the flammable chips are sprayed with water as then enter a tumbling wetting bin. This is then dumped as a pile of wet wood chips. Maybe the Senate should have an a couple hundred x prizes to develop these things. Then the Senate should guarantee the purchase of say 20,000 of these as a massive test run. Then we will always have 20,000 of these on call for delivery to wildfire emergencies where they are needed. Or maybe it will be 200,000 of these that the US has for sending around to fires.

98/ We shall enshrine the words of Robert LaFollette, his defense of wartime dissent from 1917.10.06:

"Six members of the Senate and 50 members of the House voted against the declaration of war [WWI]. Immediately there was let loose upon those Senators and Representatives a flood of invective and abuse from newspapers and individuals who had been clamoring for war, unequaled, I believe, in the history of civilized society. Prior to the declaration of war every man who had ventured to oppose our entrance into it had been condemned as a coward or worse, and even the

President had by no means been immune from these attacks. Since the declaration of war, the triumphant war press has pursued those Senators and Representatives who voted against war with malicious falsehood and recklessly libelous attacks, going to the extreme limit of charging them with treason against their country. ... But, sir, it is not alone Members of Congress that the war party in this country has sought to intimidate. The mandate seems to have gone forth to the sovereign people of this country that they must be silent while those things are being done by their Government which most vitally concern their well-being, their happiness, and their lives. Today and for weeks past, honest and law-abiding citizens of this country are being terrorized and outraged in their rights by those sworn to uphold the laws and protect the rights of the people. I have in my possession numerous affidavits establishing the fact that people are being unlawfully arrested, thrown into jail, held incommunicado for days, only to be eventually discharged without ever having been taken to court, because they have committed no crime. Private residences are being invaded, loyal citizens of undoubted integrity and probity arrested, cross examined, and the most sacred constitutional rights guaranteed to every American citizen are being violated. It appears to be the purpose of those conducting this campaign to throw the country into a state of terror, to coerce public opinion, to stifle criticism, and suppress discussion of the great issues involved in this war. I think that all men recognize that in time of war, the citizen must surrender some rights for the common good which he is entitled to enjoy in time of peace. But sir, the right to control their own government according to constitutional forms is not one of the rights that the citizens of this country are called upon to surrender in time of war. Rather, in time of war, the citizen must be more alert to the preservation of this right to control his Government. He must be most watchful of the encroachment of the military upon the civil power. He must be wary of those precedents in support of arbitrary action by administrative officials, which excused on the plea of necessity in war time, become the fixed rule when the necessity has passed and normal conditions have been restored. Most of all, the citizen and his representative in Congress in time of war must maintain his right of free speech. More than in times of peace it is necessary that the channels for free public discussion of governmental policies shall be open and unclogged. I believe, Mr. President, that I am now touching upon the most important question in the country today -- and that is the right of the citizens of this country and their representatives in Congress to discuss in an orderly way frankly and publicly and without fear, from the platform and through the press, every important phase of this war; its causes, the manner in which it should be conducted, and the terms upon which peace should be made. [had they done this, millions of fine infidel men might not have died in repeated futile charges against machine-gun fortified positions] ... that this most fundamental right is being denied to the citizens of this country is a fact: The tremendous significance of which, those in authority have not yet begun to appreciate. I am contending, Mr President, for the great fundamental right of the sovereign people of this country to make their voice

heard, and have that voice heeded upon the great questions arising out of this war. [This] including not only how the war shall be prosecuted, but the conditions upon which it may be terminated with a due regard for the rights and honor of this nation and the interests of humanity. I am contending for this right because the exercise of it is necessary to the welfare, to the existence, of this Government, to the successful conduct of this war, and to a peace which shall be enduring and for the best interest of this country. [Here we must note that the impossible war reparations Germany had to pay after WWI are normally cited as a main cause of WWII.] Suppose success attends the attempt to stifle all discussion of the issues of this war, all discussion of the terms upon which it should be concluded, all discussion of the objects and purposes to be accomplished by it, and concedes [. And suppose we concede to] the demand of the war-mad press, and war extremists, that they monopolize the right of public utterance upon these questions unchallenged. What think you would be the consequences to this country not only during the war, but after the war. It is no answer to say that when the war is over, the citizen may once more resume his rights and feel some security in his liberty and his person. As I have already tried to point out, now is precisely the time when the country needs the counsel of all its citizens. In time of war even more than in time of peace, whether citizens happen to agree with the ruling administration or not, these precious fundamental personal rights -- free speech, free press, and [the] right of assemblage so explicitly and emphatically guaranteed by the Constitution should be maintained inviolable..."

99/ We should all ponder Herodotus 5.92 and consider how historically there have been people who try to secretly eliminate the smartest of their human flock: "Thrasybulus invited the [messenger] to walk with him from the city to a field where corn was growing. As he passed through the cornfield, he kept cutting off and killing all the tallest and best stalks of corn which he could see, until the finest and best-grown part of the crop [generation] was ruined Peri-and-er grasped the point at once; it was perfectly plain to him that Thrasybulus recommended the murder of all the people in the city who were outstanding in influence or ability."

100/ We should also keep in mind what happened to Iran's young men in Black Gold, the Story of oil in our lives Ch. 6 "Khomeini ordered "human-wave" attacks, mass assaults on Iraqi positions without artillery or air support. Iranian soldiers went to the front carrying their own coffins, for the ayatollah told them that "the purest joy in Islam is to kill and be killed for God". Khomeini also urged [tens of] thousands of boys as young as 12 to become "martyrs" in the "holy war" and gave them "Passports to Paradise", plastic keys their spirits could use to unlock the gates of heaven. Iraqi soldiers could hardly believe their eyes. An officer reported: 'They chant 'Allah Akbar' [God is Great] and they keep coming, and we keep shooting... My men are 18, 19, just a few years older than these kids. I've seen them crying, and at times the officers have to kick them back to their [machine] guns."

101/ One of the most important rules for crisis response is that the people who are running the crisis response shall not have any ability to short-circuit any government bidding process, or administrative process, or pricing rules because

there's a crisis.

102/ It shall be the official policy of our national government to keep our nation ready for at least a 1-year climate-related total food shock, and perhaps in the future, we will increase that to 3 and eventually decades later to 10 years.

103/ The Senate shall establish a standard police to population minimum and maximum ratios for all the counties nationwide, and these numbers shall vary depending on the nature and severity of the crisis.

104/ Police, fire, EMS, hospitals and public utilities including trash collection shall be through the most important government duties, the government spending that shall be required to get cut last in a budget crisis. However:
a/ The first areas of government spending cuts shall be a moratorium on starting new non-emergency projects in that county or in the nation, until that jurisdiction's budget impasse has been resolved.

b/ The second area shall be that we double our classroom sizes in terms of students per teacher, cutting teacher work time and wages by 50%.

c/ The third thing is that we symbolically cut all Senator pay by 20% because they didn't do their job right and can't come to an agreement.

d/ The fourth thing is all government workers get up to a 50% pay cut (as needed) until the matter can get resolved. And once there is resolution, the lost wages shall be considered lost forever with no restitution for lost government wages in a budget crisis.

x/ These priorities may no longer be needed due to the way our legislature is now voting in thousands of chunks. However they should be remembered nonetheless, they may one day be needed.

105/ People who riot and loot and commit arson in a time of crisis. All of these people clearly demonstrate that they are potentially a national security liability for our nation. Therefore:

a/ We shall have triple penalties for crimes committed during a time of crisis, or rioting.

b/ As with our sex criminals, their lock up is supposed to be oriented towards long-term removal from society. Therefore, many of these people will get decades away from society in a not-so-bad island work camp.

NA'23. RESTRICTIONS ON UNIVERSAL SUFFRAGE

1/ Wealth or lack of wealth shall never be a factor in deciding who gets to vote or serve in our nation's Senate.

2/ Bankruptcy shall never disqualify people from voting or holding office. Furthermore, bankruptcy should never have any shame or stigma for those running for the Senate unless the count reasonably declares that the bankruptcy was primarily due to the person's spendthrift, careless, inattentive, or negligent ways.

3/ We shall not have a democracy of fools or foreigners. For this reason, we shall say that those who have not completed secondary school in our nation, or passed the secondary school equivalency exam in our nation, and in its national language of English: These people shall not have the right to vote in our nation's elections.

4/ The secondary school equivalency exam for people over age 20 shall be a bit harder than the exam for high school

students. It shall have an extra tenth of education modules for each of the following three: law/ manners, public economics, and starting a business.

5/ If more than 82% of the new generation of native born non-hispanic white, native English speaking citizens turning 18 can pass the national secondary school graduation exam the first time, then it must be made harder. If less than 78% can pass on the first test, then the test must be made easier.

Everyone, whether they can vote or not must attend the annual vote and national census. It is only 30 minutes and all the people who either abstain or are disqualified from voting, or foreigners in our country, they all get the abstention payment, whether or not they are eligible to vote or not.

6/ No government document (including instructions for immigrants and visitors) shall be written in any language other than English, or perhaps in the future Euemi. And this shall especially apply to election material and candidacy material, and the names of our Senators. There shall be no spelling other than English, and zero use of foreign characters that do not also exist in English, and later Euemi when over 90% of all born Americans speak that language. Government shall be prohibited from providing translation or interpreter services for speakers of foreign languages.

This goes for printed matter as well as interpreters and translators and the courts. No government service may be conducted in any language except the national language of English or later Euemi. Also we shall emulate Muslim Indonesia in how they banned all Chinese writing for reasons of cultural imperialism. However, we shall also do this with all other non-roman writing systems, and especially Arabic. Also, there shall be no more religious services conducted in foreign languages, or that use non-roman texts. Also, there shall be no more Arabic or Arabic-based names used in our nation.

7/ Surely those unable to speak the national language and join the national dialogue will be poorly informed voters. Therefore all school testing shall be only in the national language of English, or later Euemi, and no provision shall be made for any inability to speak the national language, either in school, or in our nation's democracy, or in the delivery of government services.

8/ We shall follow long established tradition and say that those in jail, prison, or work camp, and those previously convicted of a felony shall not have the right to vote. When these people are allowed to vote, they create an evergreen constituency with an endless hunger for criminal leniency, and even abolition of the police and justice system. This constituency was after all a main force driving for police defunding, and the ridiculous criminal justice leniency that our nation suffered from around the year 2020.

9/ We are a capitalist democracy, not a socialist one. We are also a wise democracy that has learned from its predecessor democracies. In ancient Rome, an immense underclass of vote-selling plebs dependent on food handouts was an immense back door to extra-democratic power. Therefore, we shall say that one year after this Constitution comes into effect, we shall bar the long term dole constituency from voting. Those who have received government welfare/dole payments for over 3-years (including those people who did this under the old system) shall lose the right to vote for life. To eliminate confusion, this voting restriction shall not include:

a/ Government child support benefits for women with a conforming number of children, or with grandfathered-in children from before this Constitution was in effect.

b/ Public retirement pensions, but not public injury pensions.

c/ Those who are disabled by an injury that can be verified with imaging technology or other healthcare system tests. Those people who are collecting long term government disability payments and unverifiable disability conditions may be deprived of the right to vote.

10/ Alcoholics who consume 8 or more portions of alcohol per day per 100kg of body weight on average shall not be allowed to vote.

11/ Those with high use amphetamine, cocaine, recreational opiate licenses, or certain other recreational drug license shall not be allowed to vote.

12/ Those who have not heard their candidates speak either in real or virtual shall not have the right to vote.

13/ Non-citizens and immigrant citizens shall not vote in our nation's elections under any circumstances. It shall be considered conspiracy to commit voter fraud to enable non-citizens and immigrant citizens to vote. The only exception is foreigners that have been confirmed to our nation's Senate and have been given the full rights of our full citizens.

14/ Those who cannot speak the national language of English without a foreign accent and those who cannot read our nation's language at the secondary school graduate level shall be considered incompetent to understand the intricacies of our nation's government and policy decisions: As such, they shall be considered incompetent to vote in our nation's elections. In other words, those who speak with a foreign accent, and people who have not graduated secondary school, or passed the secondary school test shall not be allowed to vote in any of our nation's elections.

15/ Along with felons, there shall be no right to vote for those who have visited family members and friends (but not legal advisors) in prison more than 25 times in the visitor's lifetime.

16/ Only citizens eligible to vote may attend public hearings by government. With regard to county government hearings and operations, only citizens with an actual and registered address in that county shall be permitted to attend, speak or ask questions unless called as a witness or speaker by the county government. In matters of local land use policy, people who do not own real estate in the affected area shall not be permitted to attend, speak or ask questions.

17/ County government hearings shall not be allowed to exclude people because they come from a different county. They may however exclude non-citizens of our country.

18/ The national Senate shall establish and promulgate uniform national rules for all public hearings in the nation. These rules shall include the following among other sensible rules:

a/ Rules of order.

b/ Rules for how long people can speak

c/ Rules for when the chair can cut people off.

d/ Rules of objectivity.

d/ Rules for removing people who disrupt hearings.

e/ Rules for who can attend

19/ All non-emergency public hearings shall require around 10-days advance notice, no more no less. All emergency

public hearings shall require at least 24-hours notice and no more than 48 hours notice.

20/ Immigrant citizens shall not vote in our nation's elections unless R'193, Option 21 is turned off. Then, only only people who have been immigrant citizens for over 20-years shall be allowed to vote.

21/ Those living in mental health facilities, prisons, jails, or work camps shall not be allowed to vote. Those people living in assisted living facilities shall not be allowed to vote.

22/ Those over age 60 who do not pass their biennial cognitive test at the DMV, and as a result lose their right to financial sovereignty and legal competency due to mental decline in old age shall not vote. However, nearly everyone between age 20 and 60 that is literate must be able to pass this test.

23/ We shall learn from ancient Rome and its eternally foreign-directed constituency of plebs living on Caesar's bread. This handout was profoundly engrained in the group mind even thousands of years later as Kaiser Rolls. This corrupt leftist/foreign handle (the leftist excuse seizure role) on a democracy should never be allowed to happen again. And it is to prevent this vulnerability of democracy that we say that those who receive government aid money shall not be allowed to vote for 4-years. No longer shall we allow our poor to become a captured constituency for a leftist-appearing foreign-run junta in our democracy. Those who are getting government aid shall no longer be allowed to vote. And they must remain off government aid for at least 4-years before they can vote again. Note that this does not include aid for children, aid for young students, or non-cash aid like dorm lodging. But it shall include disability aid recipients whether from government or from fictional citizens like insurance companies. to repeat in succinct words, we shall say simply that: "Those who get government handouts for being poor shall not be allowed to vote." Thus we have a rule that is vital to controlling the corruption of handout/ Kaiser-role democracy. Also, whenever government money goes out as any form of handout or unpaid debt, or some other trick of hiding what is really going on: Whenever Government handout money goes out, it gets reported to the voter rolls, the voter maps, and to the person's main government facebook. Also, everyone receiving government aid must live with the shame of it, otherwise by definition, we surely hand out more money than we need to.

24/ Everyone convicted of rioting or looting shall be prohibited from receiving government aid for life. This shall include men, women, and children age 12 and older. These must live in remote homeless dorms if they cannot make it.

25/ When people conduct large scale looting and flash mob robberies, they shall generally be subject to triple penalties, and ejected from society for perhaps 10 to 20—years. If it's during a normal time, they get 10 years, if there's any sort of a crisis, it's 20 years if it's a severe crisis, they get 30 years. living on an island.

NA'24. PRIOR CORRUPT GOVERNMENT

1/ We shall remember and long ponder the words of George Carlin: "They talk about how we have freedom of choice... Two political parties essentially, two. Big media companies, 5

6 max... Oil companies down to three now. ... banks, the big banks, the big brokerage houses, the big accounting firms, all the things that are important reduced in choice. Newspapers in the city, how many, used to be 3 or 4... now it is 1 or 2... they also own radio stations and tv stations. But jelly beans 32 flavors. ice cream, all the things that don't matter, the unimportant things, lot of choices. And you know what I say? ... You know what your freedom of choice is in America? Paper or plastic. that's it man, it comes down to paper or plastic, cash or charge, aisle or window, smoking or non-smoking, Coke or Pepsi, these are your choices, everything else is kind of laid out for you. You get to do what they really want, they do what they want. The ones who own this country, they do what they want."

2/ Our primary goal is to rapidly sweep away the old system. To this end, we shall remember how at the end of the war with Nazi Germany, we did not engage in a slaughter of our former enemies. In fact it was only the most egregious mass murderers that were punished.

3/ Micro instructed is not micromanaged. It is good if the initial instructions are in great detail, leaving the management up to the Senate.

4/ We shall have a sticks and stones policy regarding the people of the old system. None of the people of the old uni-party and deep state shall be punished for the words they said. In fact, the most egregious words and mostly harmless acts should generally be forgiven for their role in waking the people.

5/ We can always punish people later. The official policy shall be to lock them up now, and figure out later what we will do with them once the dust settles.

6/ To be perfectly clear, the Senate shall within 30-days replace every single elected official in the land, and most of the high ranking unelected officials in the land. This includes all courts, all legislators all school boards, all sheriffs, all elected officials in the land, including all port officials and everyone else all Shelby fired. It shall also include all people who most people think our government employees such as all of the people working in the leadership of the federal reserve, and all of the people working for the FCC and all of the people appointed by the former presidents of our country as well as all CIA leaders, all FBI leaders all national intelligence leaders. All of these people shall be without any powers at all, and where they come back or when they go on new pads before they leave or they and exercise any powers, they shall be charged with the felony and incarcerated for no less than 10 years. Furthermore, the new Senate shall be the judge of its own actions, and all of the old people of the old system shall also be subject to the new system and its outsider Senate.

7/ It should be noted that using elected people for all upper positions in the bureaucracy, greatly reduces both corruption and the (corrupt) liberal bias in government forever.

8/ To be perfectly clear, the Senate shall within 60-days replace every single elected official in the land, and most of the high ranking unelected officials in the land. This includes all courts, all legislators all school boards, all sheriffs, all elected officials in the land, including all port officials and everyone else in government. All shall be let go. It shall also include all people working in the federal reserve, and all of

the people working for the FCC and all of the people appointed by the former presidents of our country as well as all CIA leaders, all FBI leaders all national intelligence leaders, etc. All of these people shall be terminated along with all their powers.

9/ The now ubiquitous telescreen has changed something very important for those ruling over others by force. When this new constitution comes into effect, each of these powerful people will have an abundance of video evidence against them. So this time around, we will catch all of the bad people, and there is not going to be any more ability to flee back home due to new international regulations. So nobody needs to worry about people getting away with their crimes.

10/ This constitution shall supersede all prior constitutions and all laws of the land. The new government contemplated herein shall entirely rewrite all existing laws of the land, including all national state and local laws within 2 years, or these laws shall expire.

It is the intent of this constitution that it has included all important prior valuable legal precedent, and as a result, all prior legal works concerning similar topics all cancelled and are no longer valid with regard to legal proceedings. So there is no longer any need to even consider the law of Justinian or any prior constitutions, or any foreign constitutions in any legal proceedings. These old documents shall no longer be allowed in the courts. And this is by design, so that learning the legal code is greatly simplified and it involves only one 2,500 page document and a bunch of common government practices that are not addressed by this constitution. But it is expected that these will be summarized and put in appendices by that by the Senate.

11/ We shall enshrine the following words about how corrupt our old Supreme Court was:

a/ "We have divided power between three branches of government and erected checks and balances to prevent abuse of power. However, where is the check on the power of the Judiciary? If we fail to check the power of the judiciary, I predict that we will eventually live under a judicial tyranny." –Patrick Henry speaking against our current 1789 US constitution.

b/ "The opinion which gives to the judges the right to decide which laws are constitutional, and which are not, not only for themselves, in their own sphere of action, but also for the legislature and executive in their sphere, would make the judiciary a despotic branch." –Thomas Jefferson to Abigail Adams, 1804.09.11

c/ "The question whether the judges are invested with the exclusive authority to decide on the constitutionality of a law has been heretofore a subject of consideration with me in the exercise of official duties. Certainly there is not a word in the constitution which has given that power to them more than to the executive, or the legislative branches." –Thomas Jefferson, letter to William H. Torrence, 1815.06.11

d/ "To consider judges as the ultimate arbiters of all constitutional questions is a very dangerous doctrine indeed, and one which would place us under the despotism of an oligarchy." –Thomas Jefferson letter to William Charles Jarvis, 1820.09.28

e/ "The constitution, on this hypothesis is a mere thing of wax

in the hands of the judiciary, which may twist and shape into any form they please." – Thomas Jefferson, 1819.09.06

12/ "There is an ambiguity, Sir, a fatal ambiguity; an ambiguity which is very astonishing. In the clause under consideration, there is the strangest thing that I can conceive. I mean, when it says, that there shall not be more Representatives, that one for every 30,000. Now, Sir, how easy is it to evade this privilege [restriction]? 'The number shall not exceed one for every 30,000'. This may be satisfied by one Representative from each State. Let our numbers be[come] ever so great; [in] this immense continent, [they] may, by this artful expression, be reduced to have but [only] 13 Representatives. I confess this construction is not natural; but the ambiguity of the expression lays a good ground for quarrel. Why was it not clearly and unequivocally expressed, that they [the American people] should be entitled, to have [a representation ratio of] one for every 30,000? This would have obviated all disputes; and was this difficult to be done? What is the inference?"

– Patrick Henry, Virginia Ratifying Convention. 1788.06.05. Here we must note that Thomas Jefferson called Patrick Henry the true father of the American Revolution for his ideological leadership, including especially his famous "Give me Liberty, or give me death" speech where Patrick Henry stood up and openly called for rebellion against the English King fronting for the Arab empire that was managed mostly by a British slave nation.

13/ "The founders of your own [1777] Constitution made your Government changeable: But the power of changing it is gone from you! whither [to where] is it gone?" – Patrick Henry, Virginia Ratifying Convention. 1788.06.05. This is about how it was so famously hard to change the old US constitution. In fact, the US constitution of 1789 was rather a thing written in stone, almost impossible to change. Once the Arabs get institutions exactly the way they want them, they then make them very hard to change.

14/ "Our situation is represented to be so critically dreadful, that, however reprehensible and exceptionable the proposed plan of government may be [the 2nd US constitution], there is no alternative, between the adoption of it and absolute ruin. My fellow citizens, things are not at that crisis, it is the argument of

tyrants." – Anti-Federalist Papers, 1787.10.5. Here we see how the 1789 constitution was rushed through.

15/ "Knowing the danger of frequent applications to the people, they ask for the whole at once. And [they] are now by their conduct, teasing and absolutely haunting you into a compliance. If you choose all these things should take place, [then] by all means gratify them. Go, and establish this Government which is unanimously confessed imperfect, yet incapable of alterations." – Anti-Federalist Papers, John DeWitt, 1787.11.5. Here we see how it was a constitutional coup.

16/ "An honorable gentleman from New York [arch Federalist Alexander Hamilton] observed yesterday, that the states would always maintain their importance and authority, on account of their superior influence over the people. To prove this influence, he mentioned the aggregate number of the state representatives throughout the continent. But I ask him, how long the people will retain their confidence, for 2000 representatives who shall meet once in a year to make laws

for regulating the height of your fences and the repairing of your roads? Will they not by and by be saying -- Here, we are paying a great number of men for doing nothing: We had better give up all the civil business of our state with its powers to Congress, who are sitting all the year round: We had better get rid of that useless burden. That matters will come to this at last, I have no more doubt that I have of my existence. The state governments, without object or authority, will soon dwindle into insignificance." – Melancton Smith speech, 1788.06.25. New York ratifying convention 1789, Anti-Federalist Papers

17/ "One Gentleman alone (Colonel Hamilton) in his animadversions on [criticism of] the plan of New Jersey, boldly and decisively contended for an abolition of the State Governments. Mr. Wilson and the gentlemen from Virginia who also were adversaries of the plan of New Jersey held a different language. They wished to leave the States in possession of a considerable, though a subordinate jurisdiction." – Anti-Federalist Papers, 1787.06.21. It wasn't state rights vs national rights it was one big easy to many government with 65 lawmakers or 13 governments with over 2,000 to blackmail, extort, bribe, influence. State rights is just what they called it to make it to hide the real agenda.

18/ "...there shall be one representative for every 30,000 according to the enumeration or census mentioned in the Constitution,." Failed amendment to the current U.S. constitution, 1788.06.27, Anti-Federalist Papers. The reason this common sense amendment failed, and the 1789 constitution passed lies in a difference in the way voting took place under the two constitutions. Under the first US constitution of 1777, the delegates carried the vote score of the entire legislature, but under the 2nd constitution, the people elected to the congress voted as they wanted. And this was an intentional ruse. So the 2000 lawmakers in the 13 state legislatures thought they were electing delegates to carry their group score/vote, but they were actually electing independent decision makers that made the decision about what would be changed and whether to approve of the new coup constitution of 1789. Here is how the Arabs pulled off their constitutional coup and gave the US this totally weak maximally corrupt version of democracy that only worked as long as most people in it were good and honest.

19/ "As the proportions of numbers in different States will alter from time to time; as some of the States may hereafter be divided; as others may be enlarged by addition of territory; as two or more States may be united; as new States will be erected within the limits of the United States, the Legislature shall, in each of these cases, regulate the number of representatives by the number of inhabitants, according to the provisions hereinafter made, at the rate of one for every 40,000." Proposed amendment to the current U.S. constitution, 1787.08.06, Anti-Federalist papers. In the Federalist and Anti-federalist papers, we read at least 6 attempted amendments to to change this clause, yet swart Alexander Hamilton, who Thomas Jefferson once called a Creole bastard, his side held firm and resisted all attempts by people to change this clause which gave the US in 2026 the option to have no more than 11,000 lawmakers in the House of Representatives, when it should have protected the people

by saying that they shall have no fewer than 11,000 lawmakers in the US.

20/ "The legislature of a free country should be so formed as to have a competent knowledge of its constituents, and enjoy their confidence. To produce these essential requisites, the representation ought to be fair, equal, and sufficiently numerous, to possess the same interests, feelings, opinions, and views, which the people themselves would possess, were they all assembled; and so numerous as to prevent bribery and undue influence. And [al]so responsible to the people, by frequent and fair elections, [so] as to prevent their neglecting or sacrificing the views and interests of their constituents, to [over] their own [selfish] pursuits. We will now bring the legislature under this constitution to the test of the foregoing principles, which will demonstrate, that it is deficient in every essential quality of a just and safe representation. The house of representatives is to consist of [a mere] 65 members. That is one for about every 50,000 inhabitants, to be chosen every two years. 33 members will form a quorum for doing business; and 17 of these, being a majority, determine the sense of the house. The senate, the other constitutional branch of the legislature, consists of 26 members being two from each state, appointed by their legislatures every six years [with no right of recall if they don't vote the way the 2000 state senators wish]. 14 senators make a quorum; the majority of whom, 8, determines the sense [vote] of that body... Thus it appears that the liberties, happiness, interests, and great concerns of the whole United States, may be dependent upon the integrity, virtue, wisdom, and knowledge of 25 or 26 men. How inadequate and unsafe a representation! Inadequate because the sense and views of 3 or 4 millions of people diffused over so extensive a territory comprising such various climates, products, habits, interests, and opinions, cannot be collected in so small a body: And besides, it is not a fair and equal representation of the people even in proportion to its number, for the smallest state has as much weight in the senate as the largest and from the smallness of the number to be chosen for both branches of the legislature; and from the mode of election and appointment, which is under the control of Congress; and from the nature of the thing, men of the most elevated rank in life, will alone be chosen. The other orders of the society, such as farmers, traders, and mechanics, who all ought to have a competent number of their best informed men in the legislature, will be totally unrepresented. The representation is unsafe, because in the exercise of such great powers and trusts, it is so exposed to corruption and undue influence, by the gift of the numerous places of honor and emoluments at the disposal of the [administration of the lone] executive; by the arts and address of the great and designing; and by direct bribery. The representation is moreover inadequate and unsafe, because of the longer terms for which it is appointed, and the mode of its appointment, by which Congress may not only control the choice of the people, but may so manage as to divest the people of this fundamental right, and become self-elected. The number of members in the house of representatives MAY be increased to one for every 30,000 inhabitants [100 men at the time]. But... we are persuaded that this is a circumstance that cannot be expected. On the contrary, the number of representatives will probably be

continued at 65, although the population of the country may swell to treble what it now is..." [Actually, the US population swelled to 100x what it was and Congress is only 4.7x larger]

– Anti-Federalist Papers, The minority report of the Pennsylvania delegates to the US Constitutional Convention, 1787.12.18

21/ "He understood from the [new 2nd US] Constitution, that 65 members were to compose the House of Representatives for 3 years. That after that time, a census was to be taken, and the number... shall never exceed 1:30,000. If this was the case, the first Congress that met might reduce the number below what it now is; a power inconsistent with every principle of a free government, to leave it to the discretion of the rulers to determine the number of the representatives of the people. There was no kind of security except in the integrity of the men who were entrusted. And if you have no other security, it is idle to contend [a waste of time to argue] about Constitutions. ... [now] supposing Congress should declare that there should be one representative for every 30,000 ... it would [still] be incompetent to the great purposes of representation...[in spite of] all the experience we had from others [nations trying different types of government], it had not appeared that the experiment of representation had [yet] been fairly tried. ... There was something like it in the ancient republics, in which, being of small extent [scale], the people could easily meet together. Though instead of deliberating, they only considered of those things which were submitted to them by their magistrates [These legislatures voted yes or not on the agenda set by the lone figurehead frontman magistrate that worked for the foreign parasitic interests running the government. It was a government where the critical agenda setting primary house

was a figurehead mono-arch and the comparatively weak secondary house was a somewhat broad democracy.]

~~America was the only country, in which the first fair opportunity had been offered.~~ [So far America is the only country fairly test a broad representation ratio]. When we were Colonies, our representation [as many as 199 lawmakers in some colonial legislatures] was better [broader] than any that was then known. Since the revolution, we had advanced still nearer to perfection [there being over 2,000 state lawmakers in a nation of 2.5-million voters...]

the representative should be chosen from small districts. This being admitted, he would ask, could 65 men, for 3,000,000, [1:46,000]... Would they possess the requisite information to make happy the great number of souls that were spread over this extensive country?

There was another objection to the clause: If great affairs of government were trusted to a few men, they would be more liable to corruption. Corruption, he knew, was unfashionable among us, but he supposed that Americans were like other men. And thought they had hitherto displayed great virtues, but still they were men. And therefore such steps should be taken as to prevent the possibility of corruption. We were now in that stage of society, in which we could deliberate with freedom. How long it might continue, God only knew! Twenty years hence, perhaps, these maxims [of the day] might become unfashionable. We already hear, said he, in all parts of the country, gentlemen ridiculing that spirit of patriotism and love of liberty, which carried us through

all our difficulties in times of danger. When patriotism was already nearly hooted out of society, ought we not to take some precautions against the progress of corruption."

– Anti-Federalist Papers, Melancton Smith, 1788.6.20

22/ "In so small a number of representatives, there is great danger from corruption and combination. [vote selling/ swapping and political parties]. A great politician has said that every man has his price: I hope this is not true in all its extent – But I ask the gentlemen to inform, what government there is, in which it has not been practiced? Notwithstanding all that has been said of the defects in the Constitution of the ancient Confederacies of the Grecian Republics, their destruction is to be imputed more to this cause than to any imperfection in their forms of government. This was the deadly poison that effected their dissolution. This is an extensive country, increasing in population and growing in consequence. Very many lucrative offices will be in grant of [granted by] the government, which will be the object of avarice and ambition. How easy will it be to gain over a sufficient number, in the bestowment of these offices, to promote the views and purposes of those who grant them! Foreign corruption is also to be guarded against. A system of corruption is known to be the system of government in Europe. It is practiced without blushing. And we may lay it to our account [assume that] it will be attempted amongst us. The most effectual as well as natural security against this, is a strong [broad, lots of people]... legislature frequently chosen... Does the [proposed] house of representatives answer this description? I confess, to me they hardly wear the complexion of a democratic branch – they appear the mere shadow of representation. The whole number in both houses amounts to 91 -- of these 46 make a quorum; and 24 of these being secured, may carry any point. Can the liberties of three millions of people be securely trusted in the hands of [a mere] 24 men? Is it prudent to commit to so small a number the decision of the great questions which will come before them? Reason revolts at the idea. The honorable gentleman from New York [Alexander Hamilton] has said that 65 members in the house of representatives are sufficient for the present situation in the country, and taking it for granted that they will increase as one for 30,000, in 25 years they will amount to 200. It is admitted by this observation that the number fixed in the Constitution, is not sufficient without [unless] it is augmented. [However] It is not declared [anywhere in the constitution] that an increase shall be made, but is left at the discretion of the [congressional] legislature, by the gentleman's own concession; therefore the Constitution is imperfect. We certainly ought to fix in the Constitution those things which are essential to liberty. [and] If anything falls under this description, it is the number of legislators. To say, as this gentleman does, that our security is to depend upon the spirit of the people, who will be watchful of their liberties, and not suffer them to be infringed, is absurd. It would equally prove that we might adopt any form of government."

– Anti-Federalist Papers, Melancton Smith, New York ratifying convention, 1788.6.20

23/ "Their proceedings are now before us for our approbation [approval]. The eagerness with which they have been received by certain classes of our fellow citizens, naturally forces upon us this question: Are we to adopt this

Government without an examination? Some there are, who, literally speaking, are for pressing it upon us at all events. [Some people literally press the new constitution upon us at every gathering.] And the name of the man who... [whispers] any sentiment in objection is... handed to the printer, then by the printer to the public, and then by the public he is led to execution. They are themselves stabbing its reputation. For my part, I am a stranger to the necessity for all this haste! Is it not a subject of some...importance? Certainly it is. Are not your lives, your liberties and your properties intimately involved in it? Certainly they are. Is it a government for a moment, a day, or a year? By no means. but for ages [It is a government for all eternity] – Altered it may possibly be, but it is easier to correct before it is adopted. Is it for a family, a state, or a small number of people? It is for a number no less respectable than 3 millions. Are the enemy at our gates, and have we not time to consider it? Certainly we have [time]. Is it so simple in its form as to be comprehended instantly? [Not at all.] Every letter, if I may be allowed the expression, is an idea. Does it consist of but few additions to our present confederation? ... [exactly the opposite.] It is a complete system of government, and armed with ever power that a people in any circumstances ought to bestow. It is a path newly struck out, and a new set of ideas are introduced that have neither occurred or been digested. A government for national purposes ... it ought to undergo a candid and strict examination... [and we would be better to proceed slowly rather than too fast]. It is much easier to dispense powers, than recall them. ... Some are heard to say, 'When we consider the men [Washington, Franklin, and the arch Federalist traitors Hamilton and Madison, or Madhi-son], who made [the constitution], we ought to take it for sterling, and without hesitation that they were [all using, the lawmakers were all using] the collected wisdom of the States, and [they] had no objective but the general [public] good... That the citizens of Philadelphia are running mad after it, can be no argument for us to do the like: Their situation is almost contrasted with ours; they suppose themselves a central State; they expect the perpetual residence of Congress, which of itself alone will ensure their aggrandizement. [the cover story at least]... We are told by some people, that upon the adopting [of] this New Government, we are to become everything in a moment: Our foreign and domestic debts will be as a feather; our ports will be crowded with the ships of all the world, soliciting our commerce and our produce: Our manufactures will increase and multiply."

– Anti-Federalist Papers, John DeWitt, 1787.10.22

24/ "Who are this House of Representatives? "A representative Assembly, says the celebrated Mr. Adams [as an apologist] ... Can this Assembly be said to contain the sense of the people? Do they resemble the people in any one single feature? ... Have you a right to send more than one for every 30,000 of you? Can he be presumed [to know] your different, peculiar situations - your abilities to pay public taxes, when they ought to be abated, and when increased? Or is there any possibility of giving him information? All these questions must be answered in the negative. But how are these men to be chosen? Is there any other way than by dividing the senate into districts?... [We might just as well use] your annual Assemblies [state senates] with the power of

choosing them -- where is the essential difference? The nature of the thing will admit of none. Nay, you give them the power to prescribe [determine] the mode [of election]. ... If you choose them yourselves, you must take them upon credit, and elect those persons you know only by common fame. Even this privilege is denied you annually, through fear that you might withhold the shadow of control over them. In this view of the System, let me sincerely ask you, where is the people in this House of Representatives? Where is the boasted popular part of this much admired System? Are they not cousins-german [of the same family] in every sense to the senate? May they not with propriety [rightly] be termed an Assistant Aristocratical Branch, who will be infinitely more inclined to cooperate and compromise with each other, than to be the careful guardians of the rights of their constituents? Who is there among you would not start [be shocked] at being told, that instead of your present [State] House of Representatives, consisting of members chosen from every town [in your state], your future House were to consist of but ten in number, and these to be chosen by districts? ... In the one case, [under the 1st US constitution] the election would be annual, the persons elected would reside in the center of you, their interests would be yours, they would be subject to your immediate control [recall], and nobody to consult in their deliberations. But in the other, [the proposed 2nd US constitution], they are chosen for double the time [two years]." – Anti-Federalist Papers, John DeWitt, 1787.11.05. It must be realized that American democracy began with one-year terms of office, and the longer terms of office were a thing that was always supported by the same foreign parasitic people who used monarchs as front men. Life times monarchs are best for parasitism, next in preference comes monarchies of a few years. Shorter terms of office like one year or half a year makes for a system that is more immune to corruption, our #1 priority in democracy.

25/ "The honorable gentleman [Alexander Hamilton] says, that the clause by obvious construction fixes the representation. I wish not to torture words or sentences. I perceive no such obvious construction. I see clearly that on the one hand the representatives cannot exceed 1 for 30,000 inhabitants; and on the other that whatever larger number of inhabitants may be taken for the rule of apportionment, each state shall be entitled [under this new constitution] to send [only] one representative. Everything else appears to me in the discretion of the legislature. If there be any other limitation, it is certainly [only] implied. Matters of such moment [important, momentous] should not

– Melancton Smith and Alexander Hamilton debate representation, aristocracy and interests. 1788.06.21. Hamilton it must be pointed out was on the team pushing to cut the number of US lawmakers from over 2,000 to an oligarchy of 65. So Both Madison and Hamilton were spies.

26/ "Guard with jealous attention the public liberty. Suspect everyone who approaches that jewel." – Patrick Henry.

27/ "I have thought, and still think, that a full investigation of the actual situation of America, ought to precede any decision on this great and important question [the adoption of the 2nd US constitution of 1789]... If it be demonstrated that the adoption of the new plan is a little or a trifling evil, then Sir, I acknowledge that adoption ought to follow. But, sir, if this be a

truth that its adoption may entail misery on the free people of this country, I then [must] insist, that rejection ought to follow. Gentlemen strongly urge its adoption will be a mighty benefit to us: But, Sir, I am made of such incredulous materials that assertions and declarations do not satisfy me. I must be convinced, Sir. And I shall retain my infidelity [lack of Latin fides=faith] on that subject, till I see our liberties secured in a manner [that is] perfectly satisfactory to my understanding. The Honorable Gentleman [Governor Randolph] has said, that it is too late in the day for us to reject this new plan: That system which was once execrated [loathed, ex-sacred] by the Honorable member, must now be adopted, let its defects be ever so glaring. ... It is too late in the day. Gentlemen, [you] must excuse me, if I should think differently. I never can believe Sir, that it is too late to save all that is precious. If it [the 2nd US constitution] is wisely constructed, [then] let us receive it. [welcome it]. But, Sir, shall its adoption by eight States induce us to receive it, if it be replete with [full of] the most dangerous defects? They urge that subsequent amendments are safer than previous amendments, and they will answer the same ends. At present we have our liberties and privileges in our own hands. Let us not relinquish them. Let us not adopt this system till we see them [our liberties] secured. ... Let us recollect the awful magnitude of the subject of our deliberation. Let us consider the latent consequences of an erroneous decision — and let not our minds be led away by unfair misrepresentations and uncandid suggestions. ... The Honorable member advises us to adopt a measure which will destroy our Bill of Rights. For after hearing his picture of nations, and his reasons for abandoning all the powers retained... [by the states in] the confederation, I am more firmly persuaded of the impropriety of adopting this new plan in its present shape. I had doubts of [about] the power of those who went to the Convention. But now we are possessed of it, let us examine it. When we trusted the great object[ive] of revising the Confederation to the greatest, the best, and most enlightened of our citizens, we thought their deliberations would have been solely confined to that revision. Instead of this, a new system, totally different in its nature and vesting the most extensive powers to Congress, is presented. ... Nations will expend millions for commercial advantages. That is, they will deprive you of every advantage if they can. Apply this another way, their cheaper way. Instead of laying out millions in making war upon you... [they] will... corrupt your senators... [which we all] know ... are not above all prices... [and some] may sacrifice our[nation's] commercial interests ... Sir, if our senators will not be corrupted, it will be because they will be good men; and not because the Constitution provides [any check] against corruption, for there is no real check [against corruption] secured in it [the 2nd US constitution of 1789], and the most abandoned and profligate acts may be committed by them with impunity.

... Representative for every 30,000 souls, it must be by implication. The Constitution does not positively secure it. [They] even say it is a natural implication, [but] why not give us a right to that proportion in express terms, in language that could not admit [permit] evasions or subterfuge? If they can use implication FOR us, then they can also use implication AGAINST us. We are GIVING power, they are GETTING

power. Judge then, on which side the implication will be used. Once we put it in their option to assume constructive power, danger will follow. Trial by jury and liberty of the press, are also on this foundation of implication. Patrick Henry then declared a Bill of Rights indispensably necessary. That a general positive provision should be inserted in the new system, securing to the States and the people, every right which was not conceded to the General Government, and that every implication should be done away [with]."

Anti-Federalist Papers, Patrick Henry, Virginia ratifying convention, 1788.06.07

28/ [This new Constitution of 1789] "was not a mere revision and amendment of our first Confederation, but a complete system for the future government of the United States, and I may now add in preference to, and in exclusion of, all others heretofore adopted. It is not TEMPORARY, but in its nature, PERPETUAL. It is not designated that you shall be **annually** called either to revise, correct, or renew it; but that your posterity shall grow up under, and be governed by it, as well as ourselves. It is not so capable of alterations as you would at the first reading suppose; and I venture to assert, it never can be, unless by force of arms.

– Anti-Federalist Papers, John DeWitt, 1787.10.27

29/ "If your elections are by [large voting] districts instead of counties, the people will not be [personally] acquainted with the candidates. They must therefore be directed in the election by those who know them. So that instead of a confidential connection between the electors and the elected, they will be absolutely unacquainted with each other.

A common man must [therefore] ask a man of influence how he is to proceed, and for whom he must vote. The elected, therefore, will be careless of [not care about] the interest[s] of the[ir] electors. It will be a common [easy] job to extort [twist-out] the suffrages [vote] of the common people for the most influential characters. [It will thus be normal for the most influential characters to twist/sway the vote of the common man.] The same [men] may be repeatedly elected by these means. This, Sir, instead of promoting the freedom of elections, leads us to an Aristocracy. Consider the mode of elections in England. Behold the progress of an election in an English shire. A man of an enormous fortune will spend 30,000£ to 40,000£ to get himself elected. This is frequently the case. Will the Honorable Gentleman say, that a poor man, as enlightened as any man in the island, has an equal chance with a rich man to be elected? He will stand no chance though he may have the finest understanding of any man in the shire [county]. It will be so here [in America]. Where is the chance that a poor man can come forward with the rich? The Honorable Gentleman will find that instead of supporting Democratical principals, it goes absolutely to[wards] destroy[ing] them. – Anti-Federalist Papers, Patrick Henry, Virginia ratifying convention 1788.06.12

30/ "A few years ago we fought for liberty. We framed a general government on free principles. We placed [put in place] the state legislatures, in whom the people have a full and fair representation, between Congress and the people. We were then, it is true, too cautious; and too much restricted the powers of the general government. But now it is proposed to go into the contrary, and a more dangerous extreme; to remove all barriers; to give the new [federal] government free

access to our pockets, and ample command over our persons; and all this without providing for a genuine and fair representation of the people." Anti-Federalist Papers, – Melancton Smith, 1788.06.21

31/ "Mr. President [chairman], I am a plain man and get my living by the plow.... I had been a member of the Convention to form our own state constitution, and had learnt something of the checks and balances of power, and I found them all there. I did not go to any lawyer to ask his opinion. [apparently other founding father types sought the "expert advice" of lawyers about the new constitution.] We have no lawyers in our town, and we do well enough without. I formed by own opinion, and was pleased with this [2nd 1789 US] Constitution. ... I never had any post, nor do I want one. But I don't think worse of the Constitution because lawyers and men of learning, and moneyed men are fond of it. I don't suspect that they want to get into Congress and abuse their power ... Some gentlemen think that our liberty and property are not safe in the hands of moneyed men, and men of learning. I am not of that mind... Some gentlemen say, don't be in a hurry. Take time to consider, and don't take a leap in the dark. I say, take things in time, gather fruit when it is ripe. There is a time to sow and a time to reap. We sowed our seed when we sent men to the Federal Convention. Now is the harvest. Now is the time to reap the fruit of our labor. And if we don't do it now, I am afraid, we shall never have another opportunity." – Anti-Federalist Papers, Farmer Jonathan Smith's speech at the Massachusetts ratifying convention.

32/ "This large state [Pennsylvania] is to have but ten members in that Congress which is to have the liberty, property and dearest concerns of every individual in this vast country at the absolute command [of] ... ten people, who are to be our only guardians; who are to supersede the [entire] legislature of Pennsylvania. This is not the choice of the people, nor amenable to them. From the mode of their election and appointment they will consist of the lordly and high-minded; of men who will have no congenial feelings with the people, but a perfect indifference for, and contempt of them..." – Anti-Federalist Papers, The minority report of the Pennsylvania delegates to the US Constitutional Convention, 1787.12.18

33/ "Taking a respite from the unsettled question of the executive department, the Convention considered how the proposed constitution might be ratified. Oliver Ellsworth of Connecticut supported ratification by the state legislatures [with over 2,000 elected officials], while Mason and Madison of Virginia favored special conventions [narrow bodies of people appointed] in each state for that purpose. [As follows is the nonsense rationalization for how the 2nd US Constitution was ratified by a small number of appointee delegates. Also, if you don't understand what you are reading, don't worry, it a nonsensical argument.]: Colonel Mason considered a reference of the plan to the authority of the people as one of the most important and essential of the Resolutions. The Legislatures have no power to ratify it. They are mere creatures of the State Constitutions, and can not be greater than their creators. [What exactly does this mean?] As he knew of no power in any of the Constitutions, he knew there was no power in some of them, that could be competent to this object. Whither then must we resort? To the people

with whom all power remains that has not been given up in the Constitutions derived from them. It was of great moment he observed that this doctrine should be cherished as the basis of free Government. Another strong reason was that admitting the legislatures to have a competent authority, it would be wrong to refer the plan to them, because succeeding Legislatures having equal authority could undo the acts of their predecessors; and the National Government would stand in each State on the weak and tottering foundation of an Act of Assembly. ...Mr. Madison thought it clear that the Legislatures were incompetent to the proposed changes. – Anti-Federalist papers, 1787.07.23

34/ "It is a lesson we ought not to disregard, that the smallest bodies [with the narrowest representation ratios] in Great Britain are notoriously the most corrupt. Every other source of influence must also be stronger in small than large bodies of men." – Anti-Federalist Papers, 1787.06.16. People of the time spoke of the importance of a wide representation. And the US began with 1 lawmaker per 1,250 voters. Then in 1789, it was narrowed to 1 per 46,000 voters thanks to a constitutional coup, then recently it was around 1 per 467,000 voters.

35/ How the 1789 constitutional coup happened: "It was [in 1783] that the want [lack] of an efficient federal government was first complained of. And that the powers vested in [the] Congress [of the 13 states] were found to be inadequate to the procuring of the benefits that should result from the union [of the 13 States]. The impost [a Congressional tax on states] was granted by most of the states, but many refused the [requests for] supplementary funds. The annual [automatic] requisitions were set at zero by some of the states [these would vote each year how much to contribute to the cause of the states united.] while others complied with them by legislative acts, but were tardy in their payments, and Congress found themselves incapable of complying with their engagements [paying their bills], and supporting the federal government. [Thus the government of the united 13 states thus couldn't pay for its obligations]. It was found that our national character was sinking in the opinion of foreign nations. The Congress [of 13 states] could make treaties of commerce but not enforce the observance of them. We were suffering from the restrictions of foreign nations, who had shackled our commerce, while we were unable to retaliate: And all now agreed that it would be advantageous to the union to enlarge the powers of Congress; so they should be enabled in the amplest manner to regulate commerce, and to lay and collect duties on the imports throughout the United States. With this view, a convention was first proposed by Virginia, and finally recommended by Congress for the different states to appoint deputies [mere deputies with limited powers] to meet in convention, 'for the purposes of revising and amending the present articles of confederation, so as to make them adequate to the exigencies [urgent needs] of the union'. This recommendation the legislatures of twelve states complied with so hastily as not to consult their constituents on the subject; and though the different legislatures had no authority from their constituents for the purpose, they probably apprehended the necessity would justify the measure; and none of them extended their ideas at that time further than

'revising and amending the present articles of confederation.' Pennsylvania by the act appointing deputies [and it] expressly confined their powers to this object[ive]; and though it is probable that some of the members of the assembly of this state had at that time in contemplation to annihilate the present confederation, as well as the constitution of Pennsylvania, yet the plan was not sufficiently matured to communicate it to the public... [Text seems to be missing here.] The Continental convention met in the city of Philadelphia at the time appointed. It was composed of some men of excellent characters; [and] of others who were more remarkable for their ambi·tion [willingness to go either way] and cunning, than their patriotism; and some who had been opponents to the independence of the United States. The delegates from Pennsylvania were, [all] six of them, uniform and decided opponents to the [1st] constitution of this commonwealth [of 13 independent states]. The convention sat upwards of four months. The doors were kept shut, and the members brought under the most solemn engagements of secrecy. Some of those who opposed their going so far beyond their powers, retired, hopeless, from the convention, others had the firmness to refuse signing the plan altogether; and many who did sign it, did it not as a system they wholly approved, but as the best that could be then obtained, and notwithstanding the time spent on this subject, it is agreed on all hands to be a work of haste and accommodation. Whilst the gilded chains were forging [being forged] in[side] the secret conclave, the meaner instruments of despotism without [outside], were busily employed in alarming the fears of the people with dangers which did not exist, and exciting their hopes of greater advantages from the expected plan than even the best government on earth could produce... [more text missing] We entered on the examination of the proposed system of government, [the 2nd US Constitution] and found it to be such as we could not adopt, without, as we conceived, surrendering up your dearest rights. We offered our objections to the convention, and opposed those parts of the plan, which, in our opinion, would be injurious to you, in the best manner we were able; and closed our arguments by offering the following propositions to the convention... [most of which are in the US Bill of Rights]. – Anti-Federalist Papers, The minority report of the Pennsylvania delegates to the US Constitutional Convention, 1787.12.18.

36/ The brevity of the past constitution shall be regarded as a thing related to the widespread illiteracy of the day in the colonial and frontier America. Today the public can be expected to read and sample a much longer document.

The brevity of the past constitution shall also be seen as a thing which favors government over the people. This is because the constitution is more than anything a protection for the people from those they have previously made their leaders. So the extreme brevity of the constitution regulating government, is a thing that strengthens government and weakens the people. And thirdly, the brevity of the constitution gives its language considerable vagueness that gives government even more power over the people.

37/ The very-long Polish constitution of 1792 stands as a powerful commentary on how the US constitution was widely perceived as much too short in length.

38/ This new America 250 constitution shall not really be seen as a limit on the freedoms of the people, but as a limit on the powers of government.

39/ The rights herein are not the only rights that the people shall have with regard to their government and its fictional citizen entities, just some of them. This Constitution doesn't list every right of the people, it only attempts to list some of them to help the people to preserve their rights. Just because a right of the people isn't listed herein, doesn't mean it doesn't exist. This is only an incomplete list of rights, and the Senate will certainly find that it must amend this constitution to to add other rights of the people. In fact, the Senate shall always be allowed to add other rights and to modify this constitution according to the reasonable amendment system explained herein. However, the New Senate should be given about 10 times more freedom and power to add limitations on government power, and fictional citizen power, than to take rights away. We absolutely need a strong bias here. Also, again, just because a right of the people is not listed herein shall not mean that the right does not exist. It may very well exist, but just not listed. Also, it shall be thought that the freedoms of our people don't come from the constitution necessarily they're just enumerated in the constitution.

40/ In the bifurcation of the old 1789 constitution between Bill of Rights and the body of the constitution written by Hamilton and Madison, we see two agendas. One agenda was the foreign parasitic side that initiated the constitutional coup that produced the body of the current 1789 US constitution, and endlessly pushed for the federalization (which is another word for DC power centralization). And this centralization made it much easier to steal from and parasitize our government.

The other agenda was the natural organic agenda of the American people. This side was opposed to centralization. But not to the degree the parasitic side absolutely had to have centralization if it was going to have a continued life stealing from the American government and people. This side insisted on a bill of rights.

Also, we see a similar bifurcation in the Federalist papers and Anti-Federalist papers. On one side were the power centralizing foreign backed Federalists and on the other side we have the natural organic agenda of the American people that were sensibly against the foreign-fronting Federalists. And in 2026 we see a similar bifurcation between the natural organic agenda of the American people and their Elephant party against the foreign-backed Donkey party and its endless thirst for wasteful government spending and the stolen cash flows this spending generates.

41/ "A Bill of Rights is what the people are entitled to against every government and what no just government should refuse." – Thomas Jefferson.

42/ We shall ponder the words of John Adams that: "Government is instituted for the common good; for the protection, safety, prosperity, and happiness of the people. It is not for the profit, honor, or private interest of any one man, family or class of men: Therefore, the people alone have an incontestable, inalienable, and indefeasible right to institute government, and to reform, alter, or totally change the same, when their protection, safety, safety prosperity, and happiness require it."

43/ The rights herein are the rights of citizens and they are

not frequently applicable to non-citizens, and especially foreigners that have illegally entered our nation.

BILL OF RIGHTS AND RULES

For the 2026 US Constitution

The following listing of rights and rules of man and the government we establish for ourselves shall constitute a 2nd integral half to this third American Constitution of 2024. Here we enshrine the words of Thomas Jefferson: "A bill of rights is what the people are entitled to against every government on earth, general or particular, and what no just government should refuse, or rest on inference." From this day forward, we shall hold no constitution, or its government valid, anywhere in the world without a similarly extensive listing of the rights and rules of men and the government they establish for themselves. Unless specifically stated otherwise, all rights and rules expressed herein shall be considered universal and inalienable rights of the people that apply to all citizens and sometimes to others. These rights shall not be considered alienable privileges that can be taken away, lost in money court, signed away, sold, or bartered away. This constitution provides a long, highly-specific, and well-regarded enumeration of the rights, rules, and protections of the people. It is thought that simply having such a list and constitution is a thing that will protect our dear rights from erosion at the hands of corrupt lawmakers, and this is a big reason why this Constitution is so long. Where we have constitutional rules herein, these shall be considered rules governing laws. In other words, the laws can't conflict with the rules.

A — CITADEL RIGHTS

NR'1. FREEDOM OF SPEECH AND PRESS

1/ The right to examine and communicate freely about our policies, our leaders, our government, and our world has always been the most important factor in helping to guarantee every other right of the people. Therefore, the freedom of speech and its main objective, knowledge of the truth shall be the first and foremost priority, and the most sacred right in our informed democracy. Especially when the people are in the midst of a revolution, a massive epidemic, a war, a financial crisis, or other massive problem, there shall be no denial of

the right of free speech. In fact, the bigger the crisis the more the people need the right of free speech and free information exchange.

2/ The right of human citizens to communicate with one another freely, safely, and at times anonymously shall be the supreme right, the right above all other rights, the right that can never be infringed-upon to preserve any other right, public or private. Come terrible events as they may, we shall never compromise the first and foremost right of our human citizens to meet and to discuss and to figure-out what the truth is. The right of free speech shall also include the right to share one's ideas anonymously, especially when they are about: society, government, reforms, fictional citizens, and especially with regard to crimes, criminal evidence, or suspected crimes. Freedom of speech shall always be thought to be freedom from fear. When the people have any fear at all of expressing or accessing political ideas, the completeness and accuracy of the information the people are using to make democratic decisions declines. And as a result, their democracy's decision making ability suffers. So there must be absolutely no fear at all of speaking about any political matter if we are going to have an impartial discussion, and a fair trial of the things our democracy is considering. Also, this freedom from fear with respect to free speech is not only about our government. It also includes mafias, crime gangs, individual criminals, business interests, and foreign governments as well as "independent" fanatics. We must have freedom from all forms of political expression fear, or our beautiful democracy, no matter how well designed and measured will have a back door to those who would use violence and fear to drive men as a herd.

3/ Truly free speech includes the option of anonymity for all who speak out. The only way to guarantee the safety of our best free men expressing the most controversial ideas — the only way to truly preserve our cornerstone democratic right to free speech — is to assure the right of the people to anonymous free speech if they want. Both anonymous free speech & secret lawmaker voting shall be thought to be absolutely critically important for a fair and honest democracy. Anonymous voting is always critical for our lawmakers — so their votes cannot be sold, swapped, blackmailed, or intimidated. Anonymous free speech is critical for our thought leaders. for reasons just explained above. Just imagine if our enemies could identify our 1,000 or 10,000 top political luminaries, and then quietly snuff them out before they become famous.

4/ To be clear, the right of free press shall include:

a/ The dissemination of news stories.

b/ The gathering of news information.

c/ Participation and operation of chat boards and social media platforms, and search engines, and other similar information platforms.

d/ The gathering of signatures for petitions and elections.

Those who interfere with any of these three primary rights of free speech shall be subject to both criminal and money court prosecution for the democidal crime of censorship.

5/ Government and administrators may force information to remain on topic where there are named channels, but Government shall do nothing that hampers or discourages a genuine public discourse about any of the matters of our

Government, or our fictional citizens, or the economy in our nation. Government shall do nothing that hampers or discourages outlier opinions or prevents outlier remarks from being heard. Government shall in fact be required to move in the opposite direction and encourage a fair discussion of all outlier opinions and solutions where practical. We shall enshrine and long ponder the words of Rosa Luxembourg: "Freedom is always the freedom of the dissenter." and "Freedom only for the members of the government, only for the members of the Party - though they are quite numerous - is no freedom at all. Freedom is always the freedom of the one who thinks differently."

6/ The rights of fictional citizens and foreigners shall be significantly lower and less than human citizens in matters of free speech and participation in the public discussions of the people. To protect the people, the Senate shall have the right to censor the words of foreigners, non-human entities, advertisers, sponsored media, and subsidized media. Also, the Senate shall censor all TV-like general channels that can be reached without login. However, there shall be no censorship of login media. The Senate censorship of non-login media shall include: nudity, explicit sexual material, homosexuality, media depicting murders, torture, extreme or graphic violence and depicting actual real-world injuries, vengeance, or vindictiveness, retribution, or holding grudges, and people scheming about getting even. Also, media that depicts people simmering with hatred or carefully planning to commit some crime, and also media directed at children and media depicting children engaging in or planning school shootings. Also media that encourage kids of school age to get guns or to engage in violent activities.

Fictional citizens shall include: corporations, partnerships, labor unions, political parties, religions, charities, colleges and all other associations of men. Fictional citizens shall have the right to have, utter, and express whatever opinions their owners and their managers decide. However, their oversized money flows, and credibility of fictional citizens shall not be directed by their managers to shape, lean, or drown-out or over-shout the natural voice of our human citizens. In our nation, no fictional citizen or foreigner, or foreign nation shall expend money to sponsor, amplify, advertise, tout, broadcast, publish, promulgate, or display messages that have anything to do with politics, the economy, the legal system, the business environment, the natural environment, energy policy, drug use, social norms, sexual norms, sexual messages, body aesthetics, consumerism, and especially reproductive norms. Fictional citizens and their spokespeople and media shall not be allowed to defame, or smear, or criticize real people either in the media, or with live touts (paid or volunteer). Communications by fictional citizens must in general stick to the products they sell, or the charitable cause they are organized to help with.

We shall ponder Thomas Hobbes characterization of corporations as "Lesser commonwealths" and "worms in the body politic", that act like parasitic organisms within the larger body of government. These entities shall be therefore deprived of many of the rights of citizens. And this especially anywhere that the mere rights of entities diminish or drown out, or cancel out the rights of the people, the real human

citizens of our nation, such as happens inevitably when billion dollar entities have the right of free speech, or the right to bear arms, or the right to get involved politically.

7/ No fictional citizen or foreigner shall directly or indirectly lobby, communicate with, or participate in Government decision making. No fictional citizen or foreigner shall give money to lobbyists, political parties, candidates, committees, charities of any sort, or other straw men doing these things. It shall be a felony for real human citizens to take money from fictional citizens or foreigners to lobby our democracy. Fictional citizens shall not endorse or advertise on behalf of candidates, political people, political platforms, political parties, political charities, political agendas, or give money or aid to these. Fictional citizens shall also not be allowed to boycott, divest, or impose sanctions based on political reasons, unless the national Senate orders them to do so. The prohibition against fictional citizens being involved with politics, includes especially fictional citizens lobbying to change the rules by which they operate, or the rules regulating their products and services: It also especially includes all forms of political party support, candidate support, political committee support and donations to candidates. If society is going to deregulate any industries, that industry shall not be allowed to advertise, or lobby for the conditions of this, or make gifts to any lawmakers or their family or associates participating in this process or after it. All of the foregoing practices shall be considered prima facie evidence of felony corruption on both sides of the transaction.

8/ It shall be a felony for financial industry people, financiers, money allocators, OPM money investors, mutual fund managers, hedge fund managers, social responsibility investing, fund managers, social impact investing fund managers, bankers and other money people to discriminate against customers based on their non-criminal acts, political views, political associations, economic views, race politics views, sexual views, personal sexual conduct, drug use, or anything related to people's conduct or the way society works. If we allow this, then we allow a huge backdoor to power in our nation. The Senate shall investigate all of the people involved with this sort of financial discrimination and undermining of our nation. The Senate may also charge these people with conspiring against the United States and its proposition of freedom. And certainly these people should lose their right to vote and serve in the Senate. But the Senate should investigate all the corruption and undermining of our government and decide for itself on the action it will take, bearing in mind the best message to be sent to the future, to prevent this sort of stuff from ever happening again.

9/ Fictional citizens, and foreigners shall not be allowed to have high and grand political platforms and pulpits in our nation. Where news media groups exist, they shall not be acquired, or run by, or affiliated with large fictional citizens or foreigners. People with peculiar or foreign accents shall not be allowed to read the news, Even British and Australian accents shall not be allowed to read the news in our nation.

10/ Free speech shall be thought a thing that is about real people, and any time artificial thought by fictional citizens and foreigners starts interfering with natural organic thought of the people, the artificial thought must be curtailed, or the democracy comes to be in danger.

11/ There shall be 2 classes of free speech: 1st class free speech and 2nd class free speech. 1st class free speech shall be thought to be all important and vital to the functioning of our democracy, while 2nd class free speech shall be thought to be unimportant and either irrelevant or detrimental to the functioning of our democracy. 1st class free speech shall include talk by our flesh-and-blood citizens about: Their Senators and other leaders, their public policy, their elections, their politics, their government, their economy, their public spending, their public finances, their social practices, their sciences, their health, their foreign policy, their military, their financial system, their fictional citizens, and other serious and important subjects related to the operation of the nation, and the conduct of its citizens (real and fictional). This sort of free speech (especially when it is fresh and new) is what truly matters for our democracy to make informed decisions and function correctly, and this sort of free speech shall be truly and totally protected, and no other free speech shall even come close in terms of importance or protections under this Constitution.

12/ For the sake of clarity, all of the following shall be considered first class free speech in time of peace, in time of war, in time of epidemic, and in times of any other crisis no matter how great the crisis is:

- a/ Calling public-policy, and elected officials dumb, stupid, misguided, or wrongheaded.
- b/ Making jokes about and ridiculing public-policy, and elected officials.
- c/ Calling elected officials dishonest, or corrupt, or part of a plan to take over government.
- d/ Calling science as defective, corrupt or propagandistic.
- e/ Expressing new ideas about government or society.
- f/ Calling any branch of the government, including the police as corrupt or inept, or wrongly guided.
- g/ Calling any public policy as wrong or stupid
- h/ Parodying leaders and making them look stupid and like they don't know what they're doing.
- i/ Stating any obviously observable fact.

13/ 2nd class free speech shall include all communication that involves even a flash or a reference to something that:

- a/ Is commercial in nature or paid, sponsored, advertised, paid by commission, done for money, done to make profitable sales, done for benefits or trade, or involves raising money, or begging for money, or selling goods or property.
- b/ Involves sex, sexual imagery, sexual audio, or prostitution. Also, there shall be no sexualized content with minors, even to the point of children saying
- c/ Involves people or humanoids fighting and struggling against each other. And it especially involves media depictions of homicides and bodies and injured people.
- d/ Is directed at minors under age 18.
- e/ Normalizes homosexuality, or hyper-sexuality. The people are free to have sex with whoever they like, however the media must never depict, reference, or normalize homosexuality.
- f/ Is by or from foreigners or non-human entities.
- g/ Is religious, or religion-proselytizing.
- h/ Depicts nudity or sex acts that are not legal in public, also descriptions of sex acts.
- i/ Depicts transsexuals or transvestites.

j/ Depicts the nude human body between mid thigh and armpits. (The legal armpits shall be inferred 3cm above the outer part of the armpit.)

k/ Solicits sex for free, or for money as prostitutes do.

l/ Is about pharmaceutical drugs or treatments for diseases or dietary supplements or healthcare.

m/ Offers or talks about, or glorifies taking alcohol or Mafia drugs including marijuana.

n/ Glorifies crime, war, violence.

o/ Disparages or glorifies one race beyond the others.

p/ Glorifies monarchy, communism, fascism, nazism, or narrow democracy.

q/ Is off-topic, where there is a topic or title.

r/ Depicts or references gambling of any sort, even gambling without real money.

s/ Depicts or references tobacco use, or smoking, or use of inhalants of any sort.

t/ It uses the name of a business or product or fictional citizen.

u/ It has musical lyrics, especially repeated songs such as we see before serialized media like the Beverly Hillbilly's TV show and the Big Bang TV shows with their repeated propaganda inculcations about the nature of petroleum. Also, super popular songs like the song "shake it off", which really is propaganda repeatedly saying that relationships hurt, so there is less heterosexual coupling and fewer infidel babies. Also, all Pavlovian music, such as the BBC chime, or the wide world of sports song for simply being too compelling.

v/ The media content is repeatedly broadcast or sent out. In fact, as a general rule, nobody is ever supposed to see repeated media, especially sponsored repeated media. However, non-commercial government PSA and EDU media may be repeated. However, each PSA/ EDU message must only be displayed for one 6-hour time slot in each year.

x/ The protections herein for free speech shall not necessarily apply to 2nd class free speech. The Senate shall be free to curtail certain types of 2nd class free speech as it finds beneficial, convenient or expeditious to elect. First class free speech is critically important, while 2nd class free speech rights can be restricted. Also, where people attempt to rouse the nation into a new path of unified action, this shall always be considered first class free speech.

14/ It shall be a felony, and may be considered capitol democide when people in power (in either government or fictional citizens) attempt to jail, fine, fire, discipline, de-platform, or punish people in any way for the lawful use of their protected free speech rights guaranteed herein. And this shall be especially so for their 1st class free speech, and free press rights guaranteed herein. It shall be a similar felony where the directors and managers of fictional citizens redirect the fictional citizen into making political statements.

15/ We shall have a Trump rule. We shall say that the right of free speech does not include the right to say that you dislike a leader, or their policies in public without explaining why in a logical way when asked. Also, this explanation cannot use the person's physical characteristics, love life, sexual history, family life, or criminal accusations not proven in a court of law.

16/ In our efforts to protect our freedom of speech, we shall not forget that it is a tactic for the enemies of our free speech

to conspire to fill the media and the group mind of a society with distracting rubbish. This is analogous to the way the walls in so many cities are filled with nonsense tag graffiti. Therefore, nonsense tagging and communication about cute animals, and sports, and semi-useless life hacks, and travel porn and architecture porn, and fear porn, and actual porn, and the like shall always be considered 2nd class free speech and subject to censorship.

17/ Graffiti should be seen as a symbol of government mismanagement and government ineptitude and government not caring about all important free speech. Graffiti space should be regarded as an aspect of sneaker-net. By rights, everyone should be tearing down and covering up all noise messages, and protecting and copying the good messages. There might also be specialized political chat boards around our cities that are administered by some one living nearby. Having walls like this in the design would probably help our communities in time of crisis. Maybe these are ads up high and postings at eye level.

18/ Graffiti tagging that does not contain any political message shall be considered as noise and may be freely removed. However graffiti with a political message shall always be considered as whitelisted, even if the message is an old one. However, messages of monarchy, communism, oligarchy, communism, sharia law and messages in foreign languages including Spanish shall not be considered a matter of free speech but by corruption of free speech.

19/ Also, it must be recognized that much graffiti is from renters who are trying to keep their rents down. Where this occurs, the County must mandate that people uses one of the 20 standard colors, so the graffiti is easy to touch up.

20/ Where government provides a robust venue for campaign information exchange, there should not be any right of candidates to cheat by advertising, and candidate advertising and third party coverage of candidates should not be regarded as a matter of free speech. It is more important that every candidate get a uniform and fair way to reach their constituency. Thus we make an exception in our free speech rules for fairness in regard to candidate communicating with their constituency.

21/ Except with regard to genuine military and intelligence gathering secrets, government worker shall never require permission to talk to the media about their job. If ever a government worker is to be punished for releasing or leaking government information to the public, there must first be a hearing to make sure the information is genuinely worthy of being classified as secret or confidential by government. If the first hearing by a Senate jury of over 49 randomly drawn Sub-Senators finds that the information is not worthy of being considered secret, the matter stops there.

22/ Our Government and the nation's fictional citizens, publishers, and media channels shall all be required to extol (ex-tel) Isocracy and call all men as equal. However, the individual citizens of our nation shall not be required to do this. Our all-important, first-and-foremost right to free speech shall be considered more important. Besides, where do we draw our lines? Who draws the lines? Certainly these lines must be objective. How can we have objectivity here with enforcement and punishment? How much should people be punished for saying something that is sort-of sexist or racist?

Therefore, we shall have it that individual citizens saying their own piece shall be free to say totally sexist and totally racist things. The people shall be free to advocate sexism and racism, just as they are free to advocate fascism and communism and universal basic incomes, and insist that the world is flat. The people shall however not be free to call for:

a/ Mass confiscation of arms.

b/ Curtailment of freedom of speech or other

b/ Mass confiscation of property without Senate action and good reason.

c/ Killing, shooting, cutting, beating, hanging, or other forms of violence, riots, arson, looting, damage to property,. Also, people have the right to exaggerate violence and death either in person, or in the media, but they shall not have the right to minimize death and violence manmade or natural.

d/ Calling for hanging shall be considered calling for a person's death under the legal system. Calling for lynching shall be considered calling for extra-judicial death.

23/ We shall never allow our first and foremost right of free speech to be compromised on account of people's personal feelings or their sense of personal, religious, or ethnic pride. These things shall be considered completely inconsequential in comparison to any erosion of our all-important, first-and-foremost right to free speech. Nothing shall ever stand in the way of the people knowing the truth. No law shall ever be so written that it makes hurting a person's feelings, or making a person feel uncomfortable into a violation of the law.

24/ We shall honor the following words attributed to Voltaire and make them a motto of our nation: "I may not agree with what you say, but I will risk my life to defend your right to say it." When government workers, or fictional citizen workers/ owners/ managers illegally censor, or impede the lawful 1st class free speech of our citizens by any means or agency, it may be a felony for those involved. Everyone is strongly advised to stay away from this area or risk prison time.

25/ When fictional citizens violate our first and foremost, right to free speech, these notional entities may be sentenced to death by the Senate. Their shareholder equity may also be seized, and their managers and agents may be jailed for censoring others. These people may also be prohibited from working in large organizations for life.

26/ The correct way to deal with misinformation, disinformation, hate speech, and manipulative content is to flag it and label it with rational, fact-based objective commentary, not to delete it. No ostensible venue for free speech shall censor, delete, hide, or make invisible any 1st class free speech. Ostensible venues for free speech can only censor or delete 2nd class free speech. Ostensible venues for free speech shall only be allowed to label 1st class free speech. Also, we shall enshrine and long ponder the words of Thomas Jefferson that: "When the speech condemns a free press [and demands censorship] you are hearing the words of a tyrant."

27/ Except for direct and unambiguous threats of physical violence, Government shall have no laws, or rules, or arrests or prosecutions for hate speech, or misinformation for real human citizens allowed to vote. To be absolutely clear, there shall be every right of real people to spread misinformation, hate speech, lies and even propaganda. The right to spread misinformation and hate speech and even

propaganda shall be absolutely guaranteed. Not only that, but the people trying to censor misinformation, hate speech and propaganda may be charged with a felony, regardless of the nature of the misinformation and hate speech. Calling for vigilante action shall be considered advocating violence, and it's not covered by free speech.

28/ Having more ideas makes the group mind smarter, while censorship makes the group mind vastly easier to hijack and corrupt. Therefore, it shall be considered over 100 times more important that we have a broad range of ideas in the public discussion than we have reduced lies and propaganda in the public discussion. Paid communications and sponsorships shall not be allowed anywhere near the public discussion about the group, problems of the people.

29/ Fictional citizens (including all schools and especially all media production companies, and all social media companies) shall be prohibited from using the words "disinformation", "misinformation", and "hate speech", because these shall be considered completely incompetent to decide on such things. They shall also be prohibited from calling real people or organizations as liars. This sort of labeling and commentary about what other people say shall be the sole domain of real humans and their Senate. This rule may also be enforced against fictional citizens using synonyms of these terms. When fictional citizens violate this rule, they may be both stigmatized and required to pay extreme toxic waste level fines. Again, everyone is strongly advised to stay away from the line. All fictional citizens that stray into this area shall be subject to toxic waste sized fines, and great dilution of shareholder equity or seizure of assets if applicable.

30/ With regard to schools and workplaces, there shall be no right on the part of the school to punish students or teachers in any way for mentioning or responding with their political and economic opinions about any subject at all either in class, or on the campus, or off the campus.

31/ Government shall not restrict hate speech from individual citizens, except when it calls for extra-judicial action or illegal violence. Human citizens shall have the total freedom to criticize, demean, degrade, insult, and say hateful and untrue things to and about one another and their government, and their nation's fictional citizens. The people shall also have the absolute right to make ugly faces at one another. However, they shall not have the right to threaten, or to call for extra-judicial action or illegal violence, especially mass violence. (Also, we shall have a low bar for threats of mass violence and a high bar for threats of individual violence).

32/ All threats of violence must be clear. Vague threats shall be considered hard to prove unless repeated and intended to strike fear. Also, where something can be taken a violent and a non-violent way, the overall rhetorical history of the speaker shall be considered. Has the speaker been stigmatized for violent talk? Is the speaker repeatedly hiding messages of violence in acceptable messages?

33/ The following rules/protections shall exist with regard to those exercising their right to free speech:

a/ The people shall not have the right to touch each other in any way at all, or violate near personal space.

b/ The people shall not have the right to make fists, or threatening gestures, or lunging movements at one another.

c/ The people shall not be allowed to talk about or joke about killing or beating people, or holding a fake model of someone's bloody severed head, even in fictional media and comedy.

d/ The right of free-speech for citizens guarantees all political speech no matter how offensive, outrageous mocking, belittling, exaggerated, or just plain untrue. Also, the loss of reputation or community standing, loss of face, embarrassment, annoyance, insult, loss of money, or loss of friends shall not have any sway over our decisions about free speech. However physical violence shall be another thing, and that shall not be tolerated.

34/ There is much important free speech that is provocative and challenging, especially with regard to comedians, who should generally get more freedom of speech than others. However, they must still stay away from making threats, and sexualizing children. And their racist public remarks will go on their permanent record like everyone else who makes racist remarks.

35/ Between definitely permitted free speech and definitely prohibited violent speech, the Senate should have a wide band of speech that gets stigmatized as called for herein.

36/ The Over-Senate may elect to impose limits on depictions of criminal violence in the for-profit media, particularly those depictions that glorify violent criminals, or sex criminals, or violent crime, or sex crimes.

37/ The government and economy of our nation exists for its flesh and blood citizens, not fictional citizens, not foreigners, and not recent immigrants that are not yet allowed to vote. The free speech rights of these non-citizen and immigrant citizen groups shall be limited and less than the all-important voice of our nation's flesh and blood citizens. Also the all-important voice of our nation's flesh and blood citizens shall not be downed-out in any way by others usurping the free speech of citizens. The free speech rights of non-citizens, fictional citizens, and foreign governments shall not only not be guaranteed by this constitution, but this constitution allows discriminatory policies with regard to these groups when they attempt to drown out the organic voice of the people in any way or shade. This shall be particularly so with regard to paid and sponsored messages, sign messages, banner messages, spam messages, and messages delivered or handed-out by large numbers of people from a foreign nation, particularly an adversary nation. Also non-citizens, immigrant citizens, and foreign governments shall not be allowed to have political advocacy groups or individuals advocating or touting in our nation. When non-citizens, and immigrant citizens do these things it shall be thought the opposite of free speech for the flesh and blood full citizens of our nation.

38/ If our nation finds itself in a war with any nation, the people of that nation may be subject to different rules, including different free speech rules. For the purposes of this paragraph, the war may also be an undeclared war of terrorism.

39/ Government shall limit the voice of the wealthiest 1% with regard to paid and sponsored messages, so they can't use their wealth to drown out the organic voice of the people in our democracy.

40/ No Senator, active or retired shall ever be compelled to reveal his information sources, and all shall be duty-bound to

protect the identity of their sources, when their sources request. Non-elected journalists may be compelled by the nation's courts to reveal their sources.

41/ Neither Government nor any fictional citizen shall not prevent, hinder or delay the public dissemination or viewing of any political, economic, scientific, or public safety messages through any medium, except in relation to a clearly stated and credible defense or terrorism issue. Those convicted of abusing this section may be charged with felony censorship.

42/ With a 60% overmajority, the Sub-Senate may strip any work of its copyright protection, or preface any work or message.

43/ Robots, computer programs, and other forms of non-human automaton shall not have the right to free speech. Government shall carefully regulate when, and under what conditions non-human programs and robots are allowed to initiate contact with humans. Robots shall generally not have the right to initiate contact with humans, or the right to speak loudly, or to flash their lights or wave their appendages and call attention to themselves in public, or to impersonate real people. No robot (including robot voice calls) shall use a voice that sounds even vaguely human unless the person listening chooses that voice. Also, all robots must clearly disclose that they are robots when they introduce themselves, like the mythical C3PO. Also, things that are not alive cannot have letter-only names. They can only have numbers and alphanumerics, but not letter-only names. This is an important way that we know when we are communicating with a non-humans. Also, wheeled droids (but not droid convoys) must yield to humans when they are going about.

44/ When people gather to hear their leaders speak, the right of free speech shall apply to the leaders who have drawn the crowd. The right of free speech shall not apply to other people, particularly hecklers, claqueurs, counter-protesters, and others interrupting the speaker's ability to communicate with his followers. These people shall all be considered counter protesters, and counter-protesters must all keep their distance from the protests and the meetings and people of other party they disagree with. And if we fail to prevent this, we make involvement with government burdensome, menacing, and even dangerous for for no good reason.

We shall regard all hecklers as engaging in a sort of illegal censorship of speakers that they want to disrupt. But this shall not apply outside the show, and before and after the show. Those who interrupt a group speaker during his scheduled time speaking may be charged with violating the free speech rights of a leader while he is speaking to the people gathered to hear him. Those who commit this free speech crime may be jailed to up to 5-years on the first offense. And if there is a shared plan to heckle pre-planned speakers, they may be jailed for up to 10-years. These rules shall not apply to unscheduled speakers, or the time before a scheduled speaker goes on stage, or after he walks off the stage spotlight area.

Also, there shall be a rule of raising one's hand and being called on where people have gathered at a scheduled time to hear someone speak or perform on a stage with a wired microphone, even a drop-by scheduled event. At these particular places, while people are speaking, everyone must raise their hand, and the speaker must call on them,

otherwise, interrupting can easily be considered a free speech crime like heckling. Also before the speaker is on the stage and after they leave the fixed stage, people can say and shout and chant whatever they want and it shall never be considered heckling.

45/ Speakers shall always have broad rights to expel interrupters from their event by saying the words, "Get out, I hereby expel you from my audience", and describing the expelled people clearly. Thereupon, the expelled people must immediately stop talking and making noise, and immediately and quietly walk out of the venue. If the expelled people fail to immediately stop making noise and leave, they can be charged with contempt of free speech and sent to jail for a couple years. There shall be double penalties for those who don't start leaving until the arrival of an usher. There shall be triple penalties for those who will not walk out of the venue. When people gather to hear a respected person speak, only that person shall have the power to end the talk early, or clear the room early, except in case of fire or other emergency.

46/ Unaccompanied candidate signs shall be prohibited in all elections on the grounds that they are a way for money to influence elections. This includes yard signs, writing on vehicles, murals, and billboards. When candidates communicate with their constituency, they must use a no-cost avenue, so politics can be totally demonetized.

47/ The right to make money on media is a secondary aspect of free speech. This secondary right should never detract in any way from the primary right of free speech, that of exchanging information. Therefore, the right to make money on media shall not include the right to remove a work from circulation for any reason. Also, when copyright owners remove a work from circulation or buy publishing rights and then fail to use those rights, all of the rights they purchased shall revert to the author after 30 days and the creator shall get to keep all payments and then sell their rights again, or keep them.

48/ No agreement for publishing, promoting, or distributing written media or video media shall be for longer than 3-years. It shall be a crime for publishers, promoters, and media distribution companies to have exclusive dealing agreements with each other. No publisher shall publish more than 0.2% of the titles published each year in our nation, or 0.2% of the books sold each year in our nation. No book distributor or shipper shall sell more than 0.2% percent of the nations books in any year. Great documents may be underlined, they may be quoted, they may be annotated and explained, but they may never be be presented in a way where they are abridged or cut off, or parts are missing. This shall be a felony, especially when it is applies to the education of young people, or important documents like the Federalist papers. The principal and supporting authors of all news media including all television news media, shall have the author listed at the end of the article or clip.

49/ There shall be no passing off of scientific material as coming from one source, when it comes from another. It shall be a felony when individual experts take money for claiming that they wrote some scientific study that actually came from a fictional citizen, or a foreign government.

50/ Only apolitical people shall be allowed to work at

ostensibly unbiased media and social-media platforms.

51/ No communication platform shall intrude on the Sub-Senate's role of annotating controversial messages that are widely shared.

52/ It shall never be against the law to say things that are racist, sexist, homophobic, transphobic, xenophobic, insulting, ableist, misgendering, or similar things. This is because we must hear all sides if we are going to make well-informed decisions. However, media and the people involved with making it may be stigmatized for egregious racism or sexism, or for advocating terrorism, or attempting to minimize terrorism.

53/ The media exaggerates everything except the death tolls from wars and mass casualty events. And it struggles to minimize these. For this reason, the Senate shall publish official death toll ranges for all mass death and injury events worldwide present and past. It shall not be allowed for later historians more than a couple years after the event to reduce or challenge a death toll, injury toll, or destruction of any mass casualty events reported by either contemporary writers or the contemporary Senate. This historical reduction of casualties shall not be considered a matter of free speech, and it shall not be considered protected speech. Increasing death tolls due to newly discovered evidence shall on the other hand remain totally protected as free speech.

54/ It shall be considered election fraud to operate, or be employed by a system that practices shadow censorship, or shadow banning, or a system that secretly de-emphasize users based on their political views or social credit. Shadow censorship shall get the decades-long sentences that we hand out to those who corrupt the precious elections of our precious democracy.

55/ Even the Senate shall not have the right to censor First Class Free Speech (FCFS), unless it reveals genuine national secrets. So no censorship of any sort or shade should be tolerated when it is coming from anyone be they in the Government, or a fictional citizen, or a flesh and blood citizen, or a foreign entity, or a foreigner. People trying to use a fictional citizen to censor material may be charged with illegal censorship or democide. Those convicted of using their authority to silence or menace fresh voices may be sent to prison for decades, and this shall include judges, who cannot command or even suggest censorship for any reason except to protect the privacy rights of sex or violence victims. Figuring out the true truth shall always be though more important than anything else.

56/ Fictional citizens shall not be allowed to produce political media, or campaign for anything that does not directly have to do with the products they are selling, or the principal matters of their non-profit. There shall be no more so-called brand advertising, and brand advertising shall now be considered a sort of Trojan-horse for various sorts of unacceptable advertising, such as ads for political, social, environmental, or breeding matters.

57/ Fictional citizens shall not be allowed to:

a/ Favor one sort of political message over another.

b/ conduct any form of censorship, or have any opinion about political matters

c/ Own or operate multi-person news outlets (except for partnerships of less than 50 partners.

d/ Sponsor or give money to specific programming, media, films, or plays.

e/ Advertise on, or sponsor news, political, or financial platforms.

f/ Withhold advertising money from a media platform when the platform says something the directors of the non-human entity find offensive.

g/ Sponsor fictional material, or movies, or plays, or art exhibits, or donate to charities or schools.

h/ Hold polls or elections which the law shall always regard as corrupt and invalid and also an attempt to illegally manipulate real human citizens.

x/ These prohibitions shall be strictly enforced. It shall be a felony when people working for fictional citizens do any of the above.

58/ All political discussions staged by fictional citizens must be live broadcast and unedited and without teleprompters or rehearsals. Fictional citizens shall be prohibited from asking their guests what they will say, or censoring their guests. Failing to do this we have fake dialogues where fake political media apes a consensus reality. Also all panel discussions must keep to scheduled and 90% equal time for each speaker to speak uninterrupted.

59/ News reporting shall not intentionally lie to hide the truth, or editing videos in a way that distorts what people say (particularly political leaders). News reporting shall not judge or steer the heard, but only report events, and what people said. When news media lies, distorts, censors, or hides the truth, or it judges, or steers, it may be stigmatized by the Senate. Also, where the Senate can tell the political beliefs of journalists by how they conduct an interview, the journalist can be stigmatized.

60/ To prevent ambush journalism, the following rules of interviews shall apply except where the subject is committing a crime at that moment.

a/ When a subject person doesn't start to answer interviewer questions, that interviewer shall not have any right to disseminate, or publish any recordings, or any words by the subject person. Where people are asked on camera if they want to do an interview, and they start responding to questions, there shall be no obligation to obtain written consent.

b/ When a subject person says words like: "No interviews", or "get out of the way", or "please leave me/us alone", all interviewers must retreat and they cannot publish any recordings.

c/ Interviewers shall not be allowed to talk about how anyone walked out, or stormed out of their interview.

d/ Interviewers can raise their hand, but they shall not be allowed to interrupt the subject people they interview to change what the subject of the interview is talking about.

e/ Irrelevant Interviewers shall not be allowed to speak and interrupt, the genuine witnesses and experts they are interviewing. People interviewing others shall not be allowed to interrupt their subjects mid-though or mid-subject. The interviewer may dispute what was said, but only after the person being interviewed is done explaining their words.

f/ Interviewers may later edit the subjects words, however, the full version must be given in parallel for all to see.

g/ Interviewers shall not be allowed to talk for more than 20%

of the time during any interview, or make the interview more than 2-minutes longer due to their words. Everyone being interviewed shall have the ability to mute the words of the person interviewing them.

61/ Just as the election system shall be entirely outside the control of government, except in cases where the huge masses of people bring credible video evidence against election cheaters, so too shall the free press and free exchange of ideas be outside the domain of government.

62/ Where a fictional citizen speaks, only one person per day may speak for the fictional citizen. It shall be a crime to claue or shill for a fictional citizen.

63/ Elected officials shall be the most protected with regard to censorship. Senators cannot be censored or edited in any way at all that they don't agree to.

64/ Any action taken to punish people for an expression of 1st class free speech may be considered censorship. Physically hurting someone is subject to triple penalties. But also using second class free speech to interrupt or punish first-class free speech should be considered a form of censorship. So yelling to interrupt a speech, or scolding people in front of others, or not allowing them to talk, or spreading false stories about men to stop the platforms they espouse and are spoused to. All this should be considered a form of censorship. In other words, when people speak out about matters of first class free speech, others should not be allowed to use second class free speech to punish them, and those who do should go to jail.

65/ The government of a free nation shall be thought to be doing its job well when nobody is afraid to stand up and say what they think. The parties leaning on people with threats of violence or government prosecution shall always be thought to be the tools of tyranny and traitors. Where followers of one political ideology work to punish, dox, attack, or cancel members of other political ideologies for what they have said, it may be considered a form of censorship. We do best as an open society when people are totally unafraid to speak out. Also, talking/writing about the work or positions of important people shall never be considered doxing.

66/ No video sharing system shall display more than 1% of the nation's videos. Some of these can be for politics, some can be for families, and kids and children's and training education.

67/ We shall fight censorship in other nations by using our national intelligence apparatus to listen for stories of censorship from around the world. Then we shall use our media to repeat and elevate these stories if there are reasonable claims of censorship. Hopefully other nations will follow us down this path.

68/ Censorship shall not only be considered as silencing but as reducing, delaying, interfering with, and hindering any first class free speech in any intentional way.

69/ It shall not be considered censorship to remove things added by third parties to recordings like ads, music and commentary. It may be considered a felony to attempt to attempt to stop the publication of material through boycott or coercion.

70/ Where any nation erects a censorship wall, we shall out of devotion to liberty and freedom act to undermine this wall by:

a/ Repeatedly demanding that they stop.

b/ Repeatedly asking why they need to keep their own people in the dark.

c/ Monitoring what stories are being censored around the world and putting the most important things on the anti-censorship files that are pre-loaded on all data storage devices, including especially low-metal, ultra-micro USB-C drives fully optimized for data smuggling.

71/ If A says to B, "We won't do business with you, unless you stop doing business with C, because of what C said, or what C stands for, then A may be charged with attempting to censor C, which shall be a felony. Also, B may be charged if B accepts.

72/ Government, all Senators, all government workers, and all fictional directors, board members, and workers, shall not censor, or call for the censorship of first class free speech. Those who attempt to use their power within government or within a fictional citizen to censor or punish first class free speech may be charged with censorship or attempted censorship. In general all censors/ cancellers and attempted censors/cancellers shall themselves be cancelled by an appropriately jail sentence, and/or punitive toxic-waste-type punishment amounts.

73/ This constitution calls for the definition of free speech to be construed as widely as possible, with as little censorship as is reasonably possible. We shall always take the side of liberty and freedom with regard to free speech. Nobody can make a person delete photos, videos or other recordings of misconduct or alleged misconduct. Not police, not the CIA, not any airline staff, not any school workers, and it shall be a crime for people in power to demand this.

All professionals have the broadest possible right of free speech with regard to talking about errors in the way their profession operates. And there shall be no right of government or anyone else censor them. Where members of licensing boards overreach and act to censor professionals for their political or professional views, these shall be imprisoned for 3 years per count. And it shall be thought a good thing if these people are sent away for life if they've censored multiple people. Where people edit other people's words in a way that cleverly hides, or alters the true meaning of what they said, this can also be considered a form of censorship.

74/ Workers shall generally not be free to add their own sexual, economic, religious, or political messages or symbols to their work conversations or attire while at or around their workplace. Workers shall generally not be permitted to divert customers and co-workers to genuine competitors, or to their own personally profitable ends.

75/ Employers shall not be free to discriminate against their employees for what they say in their free time, or in their personal communications. To allow this sort of discrimination exists to undermine our first and foremost right to free speech. No fictional citizen, employer, school, charity, religion, club, transport carrier, political party, or other association of man shall be allowed to punish or discriminate against their members/ workers/ associates/ students for any free-time, off-duty, or away from campus political speech.

76/ Fictional citizens shall not compel their workers, customers, students, or other people to undergo any training

in matters that in any way relate to public policy, or politics. This includes training in ethnic, racial, and gender equality equity, diversity and inclusion.

77/ Government agencies shall not be allowed to spend money on censoring people who disagree with what they are saying or doing. All government agencies and the Senate are supposed to welcome all forms of criticism. This is how our crude initial policies become refined. It is by listening to people saying what's wrong, and letting the Senate and people (Que Roma, SPQR) decide what the right approach is. Government people shall not censor or attempt to censor the people for expressing ideas not directly related to secret military and defense plans, military tactics, weapons systems, nuclear weapons, chemical weapons, bombs, poisons, and ways to kill people. Where government people attempt to prevent the dissemination of information they are not allowed to censor, it shall be considered felony censorship.

Government people are supposed to fear the idea of censoring the release of information from the government that they cannot censor or control. Also, except in these national security matters, no doctor, scientist, or other highly certified expert shall ever be punished, intimidated, threatened, or insulted in any way for stating their expert opinion in their area of expertise.

78/ No person shall ever be punished by Government or others for describing deadly, violent, or anti-constitutional events they personally witnessed. All shall always be protected as whistleblowers.

79/ All punishing of whistleblowers shall be considered an act of censorship. Where whistleblowers commit suicide there shall be great amounts of police heat. Also the general presumption shall be that they were murdered, and it was made to look like a suicide.

80/ The bigger the crisis, the more we need to have a free and open discussion of our group approaches to that crisis. Those who work to suspend or shout over the right of free speech, especially in times of war, epidemic, or other major crisis shall be considered as censors, they shall be subject to special severe punishment for censorship in a time of crisis.

81/ It is important that we eliminate as much downside as possible from Senate service. And one big downside is when the candidates say negative things about each other because they are all election opponents. So we will say this: If any Senate candidate is talking about the other candidate(s) each of us should consider them disqualified from elected office on that fact alone. Candidates can talk about their opponents policies, plans, criminal convictions, and career, but they should not talk about, or hint at, the character, or appearance, or family, or romantic life, or untried indictments of their election opponents.

82/ Free speech about candidates is generally supposed to take place in the election forum where comments can be democratically fact checked, and where only serious and topical remarks are made. The people are generally supposed to ignore election comments and remarks made elsewhere unless those remarks claim corruption of the election forum system. This clause shall not be considered a law, but only a recommendation to the people.

83/ The openly corrupt paid commercial media shall not talk about candidates. They can talk about system corruption, but

not about specific candidates. The proper place for the conversation about candidates is in the election forum, where nobody gets preferential treatment because they spend more on ads, or because the people who own the forum favor them.

84/ The Senate shall always aim to be receptive to new, better, and less expensive ideas. The information gathering side of the Senate should have the open and receptive mind of a teenager, while the deliberative side should have the wise calm mind of an older person.

85/ Free societies welcome fresh and original dissent because it increases their understanding of their problems and how to fix them. Fresh dissent is a good thing that we want to encourage and never punish. We will all therefore need to suffer much dumb dissent in order to get a few jewels. Also, anyone trying to punish dissent is going in the wrong direction. It is only frontman tyrannies that punish dissenting opinions, this so their can have corrupt billion-dollar schemes that benefit their backers mostly.

86/ All Government and police charges related to free speech and free assembly seen as a double edged sword for those who seek to enforce them. If the charges are baseless, then the prosecution side shall generally be subject to similar penalties for malicious prosecution.

87/ It shall be considered democide when government, or the justice system, or police, or fictional citizens use their powers to punish, gag or discriminate against the people for their protected free speech. When fictional citizens discriminate against real citizens based on their political beliefs, they may be required to pay extremely large penalties.

88/ The people shall always be free to discuss and share all laws, requests, demands, mandates, and threats. This shall include both government and everyone who works for or with Government and everyone else. Nobody shall ever be punished in any way for discussing what government is doing to the people or requiring of the people. This sort of talk lies at the core of why we have free speech rights in the first place.

89/ Government shall be limited in the things it can say to the people:

a/ Government shall not attempt to manipulate the people by creating fear or by using herd behavior.

b/ Government shall never discourage questions and dissent, but must always reward them.

c/ Government shall not present individual people as authorities that are beyond question.

d/ Government shall never ask for zealotry. Zealotry is a thing of tyranny.

e/ Government shall never shame people or discredit people except for its Senate stigma votes for well-documented cause.

f/ Government shall not use the word god or a synonym, or speak of higher powers or religions.

90/ Free speech rights shall not apply to brand names, fictional citizen names, book titles, film names, TV show songs, song lyrics and the like, when these are traitorous or make reference to ending our nation or our proposition of freedom. For example: Victorious Secret lingerie. Also included are names that have meaning in Arabic, Greek, or Latin, like the brand Nike (Gr. victory) shoes, meaning Arab

victory over our proposition of freedom. Also there is Adi•das which means in Arabic: He-who charges out in war or sport• and tramples or treads on. Notably this is the exact opposite of the sentiment of our great Gadsden flag, the don't tread on me flag. These brands shall all be nationalized and ended. It shall also not be allowed to name and title products and businesses with words that can be construed to be an advertising to commit a crime or to normalize hyper-sexuality, for example the Super-Dry brand.

91/ The booing and cheering of legislatures using the English system is claque activity, and it shall be entirely prohibited on the argument that it helps enable minorities to gain extra-democratic power while also making service less enjoyable. The system is obviously at least a tiny bit better off without this, so it shall be deleted entirely.

92/ As a safeguard against puppets, when a person is speaking before a group of others, only the person speaking shall have the power to end the talk early or clear the room, or cut the feed. It shall be a crime when other people do this. Also, nobody may be arrested while speaking before a large assembled crowd in the real world or virtual world until at least 2-hours have passed. The police must wait until the speaker is done or until the speakers had an additional two hours to speak.

93/ Senators and Senate candidates shall be prohibited from using non-Senate assistants, and non-Senate researchers and anyone as speech writers while in the Senate.

94/ The production of simulated/ acted/ deep-fake reality intended to deceive the Senate and people into taking action shall not be a matter of free speech. Instead this sort of fake reality production may be considered felony democide if the intention was to deceive the Senate and people in matters of public policy, particularly in matters of life and death for a great many people. Charges may be applicable to both the producers and the actors.

95/ The right of free speech shall not generally apply to recordings of sex crimes, or crimes of extreme violence real or simulated, without victim consent. These recordings may be censored.

96/ In order to help assure that everyone remains truthful, all sponsorships shall be disclosed in full on the official government facebook pages of both recipient and benefactor. This includes gifts of free merchandise given without demands.

97/ The new word "blame-mirroring" shall be defined as accusing the other side of that which you are guilty of. The Senate shall have an obligation to inform the people whenever it elects that blame mirroring is going on.

98/ Where people are talking in a non-violent way about important matters, or government, or its policies, or what the truth is, or who should lead, there shall be no right of the police or other Government people to interrupt, and when they do interrupt for less than good reason on color of authority, it may be considered a felony.

99/ It shall be considered felony censorship for event venues real and virtual to refuse performers, speakers and others for their political views, or what they say in public. Event venue hosts must be careful when turning down business without a very good reason.

100/ Regarding insults between people and police officers:

a/ Police shall not communicate with the people using angry, insulting or vulgar words, domineering commands, sarcasm, or irony.

b/ Vulgar words, insults, abusive language and profanities shall all be protected free speech when talking with police officers. People shall have the right to call police whatever names they want, but not to threaten them. However it shall not be a crime to threaten officers with a lawsuit, or disciplinary action for misconduct, or to ask questions about their actions. Police, who take retribution against people for their words, may themselves be charged with a crime.

101/ It shall not be allowed for judges to gag people accused of crimes, except for violent criminals talking about their victims, or threatening people. In that case, all violent criminals shall be gagged, as a matter of course in the discussion of their crimes, and this shall apply even in jail. Violent criminals who talk about their crimes and particularly when they talk about sex or injury to their victims in jail, they may see their prison time extended. In all other circumstances the legal system shall be prohibited from gagging people accused of crimes. It shall be a crime when anyone in the legal system (including police) attempts to gag an accused person improperly.

102/ This constitution abhors gag orders and gag agreements as contrary to our first and foremost right of free speech. This especially with regard to the activities of fictional citizens, government agencies, foreigners, the judicial system, and anything that even hints at corruption. Also, we shall say that fictional citizens and foreigners shall not be thought to have any right of privacy, or right to be free from embarrassing or secret-sharing situations. Therefore all forms of gag order, except those having to do with military tactics, strategy, armaments, spying on other nations, police tactics, and the privacy of sex crime victims shall be unenforceable. Also, no agreements between citizens, or fictional citizens, or government agencies, or foreigners to keep information quiet shall be enforceable in our nation's courts. With regard to crimes that have anything to do with politics, politicians, the judicial system, or matters of legitimate public interest, it shall be a felony to impose, or attempt to enforce gag orders or gag agreements, or to seal public records, or redact documents. Any improper attempt by any court to issue a gag order, or redact records shall not only be void. This shall also subject the judge/jury to charges of misconduct and commonly get the judge/ jurors expelled from the Senate in addition to other charges that may apply.

103/ The justice system shall always work out in the open. Those being investigated, tried, and jailed by the justice system shall always have the right to communicate with their associates and with the public. There shall be no government gag orders for people under investigation, or charged with a crime, or being tried for a crime, and all such gag orders shall be void. The foregoing however, does not apply to those in jail for politically motivated murders and attempted murders. These people may be deprived of the right to free speech relating to:

a/ Their political objectives for their crime (if any).

b/ Insults or threats against their victims or their close people.

x/ If we fail to do this then there is a risk that violence can become a means of gaining a platform.

104/ Those saying that events were staged or fake, or a media creation, or done to influence political decisions, or blown greatly out of proportion shall have some of the greatest protections under the laws of free speech.

105/ Inaccurate or deceptive titles and headlines shall not be protected by the rules of free speech. The Senate may force works to be re-titled, or annotated if they are inaccurately titled. The Senate may also stigmatize for inaccurate or deceptive titling.

106/ Swearing, using dirty, and insulting god(s) shall never be a crime in our nation. It shall be a crime to punish the people for swearing or using dirty words, or insulting god(s). Nobody shall ever be arrested or cited for using dirty words in public, or insulting police. The words shit, stupid, homo, faggot, perv, and all all of their synonyms shall never be considered dirty words, even in schools.

107/ It shall be a crime to incite people to violent action. However, we shall be a lower bar for criminal incitement of violence by priests, so-called holy men, teachers, journalists, influencers, important people, and foreigners. Also, there shall be no crime of citizens influencing people to defy the government. Also, citizens shall have the right to denounce government policy, and the right to say to others, do not cooperate with government policy. This is an important aspect of our right of free speech.

108/ There shall be a right of access to all private property (real or virtual) for the dissemination of political information, whenever that property is anything even slightly like a town square, or gathering place. The following places shall permit all 1st class free speech in all areas open to the public or areas that invite the public to enter, and this shall be so whether the place is privately owned or owned by the public:

a/ All airports and airplanes.

b/ All train stations, transit stations, and their various sorts of trains.

c/ All bus stations and busses.

d/ All common areas in all shopping centers, malls, strip centers, office parks, amusement parks, fairgrounds, stadiums, sports arenas, athletic areas, zoos, museums, and all of their common areas, grounds, and parking lots in addition to

e/ All government building common areas. All multi-restaurant, multi-cafe and multi-shop common areas. All office park common areas, and office building lobbies.

f/ All common areas of all tertiary school campuses, and all school campuses for people who are generally over age 18.

g/ All public streets, parks, sidewalks, beaches, and medians.

h/ All of the forgoing places shall permit all non-amplified, in-person, 1st class free speech by flyers, placards, t-shirts, and in person talking, shouting, and touting (but no megaphones or electronic amplification without permission). It shall be the felony of censorship when owners, managers, police, and particularly the security guards of our nation's public forum locations interfere with, threaten, intimidate or arrest people for exercising their first and foremost right of free speech. The fact that the guests of these ostensibly public places will have to deal with the minor inconvenience of being exposed to political free speech shall be thought to be something that is completely unimportant in comparison to the first and foremost right of the people to communicate to others in

public about political matters.

i/ There shall be a right to use megaphones and electronically amplified sound for first class free speech in all remote places more than 200m from a dwelling or business when it is between the hours of noon and sunset, where the amplified sound does not rise above the level of ambient sound inside any nearby premises. Thus the center of New York's Central Park will allow megaphones at certain times.

109/ All places, public or private, that invite all comers shall be considered totally public property with regard to 1st class free speech, and all rights of free speech on public property shall exist in these privately owned places. Communications about politics, group economics, group decisions shall always be protected and thought a sacred thing never to be impinged upon anywhere people gather in numbers without paying an entry fee.

110/ There shall be no crime of trespassing and no legal way to eject people where they are disseminating first class free speech in places generally open to most people at that time of that day, whether on public or private property, or whether people may enter freely, or whether they must pay and admission fee. This shall include all shopping centers, office, office parks, lobbies, sports arenas, amusement parks, entertainment venues, concert halls, colleges campuses, airports, train stations, bus stations, restaurants, bars, parks, parking lots, or stores and all other similar places that invite the public to visit. In all of these places, and on public property, it shall not be allowed to ask people engaged in first class free speech during the busy times to leave. Where people are commanded to leave a public place, the reason must be stated at the time of the command. For example: "You are being told to leave because you were asking for money even though you are engaged in first class", or you are pestering the other patrons repeatedly", or "you are being told to leave because you're creating a mess." And in all of these cases, the ejecting party may be required to prove the truth of their claims in court, if the ejected party claims that his right of free speech was violated.

111/ In matters of free speech, free press, free assembly and free protest, the management may be charged with violating the civil rights of the people unlawfully ejected. Also trumping up excuses to eject somebody who has drawn attention to themselves for matters of free-speech free press or free assembly shall be a crime.

112/ All private property open to the public, and especially the most crowded places in every community: These places shall be considered public in every way with regard to public assembly, protest, free speech, and the dissemination of political material. Where the main meeting places in a community are grocery stores, or restaurants, or children's schools, then even these places shall be considered public in every way with regard to public assembly, protest, free speech, and the dissemination of political material.

113/ Property rights (including leaseholds) in commercial property shall not include the right to silence political speech, or to prohibit people from using the bathrooms. Everyone with a public place must allow both of these things. And this includes both police and private security guards, who were just following orders. It doesn't matter what shenanigans are used, or if the property belongs to government, or if it's

private but generally open to the public, or if there is some exclusive lease, or a fee is charged for admission, or not, there shall be no right to stop or regulate any free speech, or political flyers being handing out, or other political use at all on the property: All political uses shall be completely white-listed and cannot be restricted. Where police and other individuals act to restrict free-speech or political uses on any such public property, they may be charged with a felony, and if convicted, they shall be banned from working for government or police or security related work for life. This right of the people to directly communicate with other people about their political ideas, shall be considered one of the most important in vigorously enforced and aggressively punished aspects of this constitution. Stay away or pay, be you a government worker or a private citizen. Punishment for this sort of crime is sloped at about 99.9% towards the speaker, and about 0.1% towards the people owning or operating the public venue.

114/ Police are supposed to be afraid of engaging in policing where people are merely handing out handbills, or sneaker-net files, or polling, or gathering signatures. When the government people go near our rights of free speech, free assembly, and free press — when they try to censor or quash the truth in any way, they should be fired immediately. And we shall be biased towards firing government people who go near our first and foremost right of free speech especially.

115/ Police, private security, and others involved with attempting to intimidate, unnecessarily approach, or eject people from private property open to the public for peacefully disseminating political material, or other first class free speech may be charged with the crime of violating the free speech rights of the people. These individuals, as well as their commanders and employers may also be sued in money court for toxic-waste level fines. Those violating the free speech rights of others may be imprisoned for up to 5 years, and if they injure the people in any way for exercising their right political speech, it may be 10 years. This clause shall be vigorously enforced by the courts. Police and private security guards are hereby warned — stay away from the line on matters of free speech, or go to prison. Also, there shall be no qualified immunity with regard to matters of free speech, none at all. Also the employers of private security shall be warned, that there may be some co-responsibility for the illegal violent acts of their security guards.

116/ Retaliation against those who exercise their first amendment right to free speech or free assembly may be given 3-years in prison per count if they are in a position of power.

117/ We shall honor the words of Mohandas Gandhi that: "Truth never damages a cause that is just." We shall also honor the words of John F. Kennedy: "the very word secrecy is repugnant in a free and open society... and we are as a people, inherently and historically opposed to secret societies, to secret oaths, and to secret proceedings." Therefore, all secret societies shall be banned as conspiratorial, and all continued membership shall be at least a crime.

118/ It shall be a crime to prevent or hinder people from peacefully and respectably challenging elections for cause, and also challenging the people elect by those elections. It shall be a felony when leaders, elected or otherwise do this.

For where does this end, and where does the police state begin? Better we all stay away from this line and allow all human speech that challenges elections and leader legitimacy.

119/ The people on the side of truth and justice are always on the side of free speech.

120/ There shall be no laws that makes it a crime to simply annoy people, or to cause vexation or anxiety in others.

121/ All agreements where people agree to keep information secret and stop talking about something shall be unenforceable. Also, where such an agreement can be proven to exist, the courts may elect to jail the censorious side for engaging in censorship.

122/ Government shall never censor calls for the government to step down, or assemblies or protest against individuals in government, provided there are more than 1,000 people assembled in protest.

123/ The right to free speech shall be considered an inalienable right that can't be sold or traded away. Therefore, no hush-money agreement shall be enforceable in our nation's courts.

124/ It shall not be allowed to wear apparel that is threatening, or that talks about or depicts killing, or death, or torture, or corpses, or war, or similar murderous subjects, or that depict sex acts, or private parts, or mid section parts. Simulated penises shall not be worn, or carried exposed in public, or it may be considered grooming.

125/ All press conferences must be held in areas that are many times the capacity of the expected turn out for press people. There shall be no pre-registration of press people at press conferences. No news outlet shall send more than 2 people.

126/ News media organizations must remain small so they do not rise above the people in terms of credibility, as so many large news outlets have done in the past. To this objective, we shall limit the size, reach, company parentage, and output of all news media organizations. News media groups smaller than 50 people shall however always be exempt. We want our news media human scale so our news outlets are not giants among men with regard to influence.

127/ Except for Senate prepared news media, Government shall not have any officially approved, accredited, admitted, permitted or favored news sources. The oldest and most respected non-Senate news organization must remain equal with the newest and smallest. Otherwise this sort of credibility can become a backdoor to our democracy.

128/ Our nation calls itself isocratic in that all of its human citizens are supposed to have equal power. In our isocracy, no human leader is supposed to rise above the other human leaders as a prince or princeps, or king in the minds of the people. Therefore, we shall intentionally establish a headwind for the mighty, and say that no legal cases of slander, libel, defamation, insult, or hate speech involving the organic unsponsored/ undirected words of a real flesh and blood human citizen shall be allowed in either money court or criminal court. Also, the court system shall be prohibited from trying any matter related to slander, libel, defamation, insult, or hate speech involving anything a real flesh and blood citizen said without sponsorship or payment. However, this shall not apply to foreigners, fictional citizens, and media

outlets of 5 or more people, or the citizen cat's paws of such foreigners, fictional citizens, and media outlets, Also, to be clear, it shall be allowed for flesh and blood citizens to take foreigners, fictional citizens, and large media outlets to court for slander, libel, and defamation, and these entities may be held liable for toxic waste level fines and penalties. Also, the above shall apply in both criminal and money courts, and for both individual and group slander, libel, defamation, insult, and hate speech.

129/ Everyone shall have the right to speak their mind. However, the right of free speech shall not include the right to call for or advocate:

- a/ Any reduction in the right of free speech,
- b/ More censorship or to support more censorship.
- c/ Any reduction in our dear gun rights.
- d/ Any delay or cancellation of elections.
- e/ Any threatening of others, and this especially for what they say, or write.
- f/ The right to advocate the slaves' religion of Islam, the self-avowed enemy of our dear freedoms.
- g/ The right to advocate communism and the violent seizure of our property for redistribution by a totally corrupt Mideast-fronting mask administration.
- h/ to attempt to drive a large mass of people towards violence.
- i/ The right to advocate abandonment of due process of law and fair punishment and a fair trial hearing.
- j/ The right to say it's OK to vote without showing ID.
- k/ The right to advocate voting machines or mail ballots. For they are a ruse, a trick for stealing elections.

130/ The right of free speech and free press shall not include the right to follow people around recording them like paparazzi, private investigators, or journalists do. Free speech does not apply to images of people taken through the windows or doors of their permanent or temporary places, or vehicles. Free speech does not apply to images of people taken while they are at a beach, or swimming, or in a swimsuit, or embracing others, or eating or drinking, or in the bathroom, or changing clothing, or nude, or in a car, or with their family. Nobody has the right to display images of other people taken in these circumstances without written permission. This sort of activity may easily be considered stalking, and this especially when the stalker is getting paid by some third party for stalking someone. Also, there shall no longer be any magazines or websites dedicated to paparazzi-type photos of celebrities. All shall be closed down immediately. Also, those publications that later arise and that pay people to spy on others, and then display their private life images may be taken to court for spying and they shall be required to pay punitive damages to their victims.

131/ It shall be considered an illegal form of mind control and a corruption of the truth when paid advertisements repeat the same message over and over again. Paid advertisers shall only be allowed to display the same (or substantially the same message) twice per year, per viewer per media network or publication. The Senate shall establish a system of punitive postage charges sufficient to prevent the repetition of repeated messages that are substantially the same as each other, or that use substantially the same words or imagery.

132/ As paid messages shall no longer be considered a

matter of free speech, the Senate shall be allowed to regulate and ban any form of paid advertising as it elects. Here advertising shall be understood in a particularly broad sense and shall include among other similar things:

- a/ Paying influencers to tout a product, idea, or slogan.
- b/ Mass emailings.
- c/ Preferential placements in social media.
- d/ Preference in computer algorithms.
- e/ In person touting.
- f/ The words of salesmen.
- g/ Words and logos on athletic clothing.
- h/ Marketing based on a person's telescreen or electronic location.
- i/ Marketing based on what a person types into or sends via their social media accounts.
- j/ Political advertising by fictional citizens and foreigners.
- k/ Marketing to minors.

133/ The following sorts of advertising shall be banned:

- a/ Marketing based on a person's telescreen or electronic location.
- b/ Marketing based on what a person types into their search, email, texting account, or other communications.
- c/ Marketing based on what a person talks about in their social media accounts.
- d/ Political, economic, ecology, and social norms advertising by fictional citizens, and foreigners.
- e/ Marketing of games, media, simulations, porn, sex, or entertainment.
- f/ Marketing of children's media or toys.

134/ All Media and toys for minors under age 18 shall be pre-approved by the Senate before they can be distributed. The term media here shall include all toys as well as all music, advertisements and announcements, and there shall be no advertisements or announcements or toys in children's media that are not approved by the Senate. All children's media and toys must be in some way beneficial, educational, and never lean children away from a reproductive lifestyle. Also, the most exciting media must be the most educational. Our freedom of speech shall not apply to talk about, advocacy for, or descriptions or depictions of the following in children's media:

- a/ Sexual references, or sex education with minors. This includes all Barbie-style dolls which lean our young girls towards a child-less super-slender lifestyle. This shall also include Captain Marvel type characters which drive young girls into thinking they must fight others and raise cats instead of thinking about reproducing.
- b/ Drug, alcohol, or tobacco references.
- c/ Hyper-sexual lifestyle references.
- d/ Tattoos and tattoo references
- e/ Kings, queens, princes, princesses, monarchies, magic powers, super heroes, people with super powers, laziness, racism, communism, equality, Cinderella, Helen of Troy.
- f/ Religious indoctrination.
- g/ Music for frivolous learning. Music shall be reserved for serious learning.
- h/ Other harmful things for children to learn as decided by the national senate such as peculiar relationships between adults and children.

135/ We shall not allow speech and media about sex with

children. This shall include everything that normalizing the idea, or simulates sex with minors (with or without descriptive words), or plants mental seeds about this subject. Also, people normally stay far away from the line here, so we shall emulate this in our legal system, and require that people stay far away from this line. Also, art and literature shall be no excuse. And the children's internet shall require parent approval of all sent photos and videos to make sure the child is not sending their own home-made porn.

136/ Neither Government nor any fictional citizens, nor any foreign government, nor any individual shall punish, or turn-off, or de-platform any real human citizen for the non-threatening opinions, criticisms, or insults they express about their own government, any foreign government, any movement, any fictional citizen, any leader, any outspoken person, or any policy. In our nation, real humans shall have absolute and totally unlimited free speech in these matters. The only exception being that:

- a/ Nobody shall call for restrictions on free speech.
- b/ Nobody is allowed to threaten violence or call-for extra-judicial action or illegal violence against groups or individuals. And this rule shall be most aggressively enforced with our greatest leaders and those who call for genocide and mass murder
- c/ No calling for riots, even indirectly.
- d/ No advocating or praising terrorism and war violence.
- e/ No calling for sharia or Islamic take over.
- f/ No calling for tightened gun laws.
- g/ No advocating the legalization of child and adult sex.
- h/ No advocating drug use, or alcohol use.
- i/ Nobody may speak out to many people about the non-criminal personal life matters of people. These off-limits personal life subjects shall include: family, friends, coupling, sex, dating, address, residence photos, unauthorized images and videos, and private medical matters of other people, particularly leaders shall not be considered topics of free speech. The media is not allowed to talk about such private things, and can be sued for damages if they do. This prohibition on talking about the personal matters of famous people also extends in both directions to the family and close associates of the famous. However, where multiple people are politically important, and their ties are being discussed, this prohibition shall be void.

137/ Regarding all media personalities, actors, performers, musicians, sports celebrities, and especially news people and political commentators:

- a/ Other than being fired, and not rehired, none of these people shall suffer any penalty in either money court, or in criminal court for going off script.
- b/ All employment contracts for the services and performances of these people shall be considered Chinese contracts, meaning that either side may cancel the contract at any time, and at will and the other side shall have no right to take the other side to money court. Also, once the contract is cancelled, neither side shall have any further contractual relationship to the other.

138/ The freedom of speech shall not necessarily include government workers in uniform. Except for whistle-blowers, informing the public about illegal Government activity, those wearing official uniforms of government workers shall only be

allowed to say the things the Senate allows them to say. If they wish to takeoff their uniform and especially their badge, they shall have the same free speech rights of anybody else, and they shall not be restricted in what they say to the people. Where people are not employed by government, and not allowed to wear a government uniform, it shall be considered impersonating an officer to wear an official uniform or confusingly similar attire while speaking to the people via video, or in person.

139/ The people are advised to take note whenever they see the same product or service advertised multiple times. Whenever the people see this, they should presume that they product is of low quality and it needs to advertise. They should avoid buying that product or service as a means of helping their democracy and their free economy. They should tell others to avoid buying the advertising-heavy product.

140/ Where disasters and newsworthy events occur, all reasonably well established news people (a low bar here that includes citizen journalists) must be given at least supervised access. Also drones with license plates shall not be prohibited, so long as they keep at least 10m above the ground.

141/ There shall be no intellectual property rights where the public is using the IP in any genuine discussion about government, or political, or economic matters. Where people are genuinely discussing or corresponding in text about government, or political, or economic matters, the people shall be free to share IP.

142/ Paid advertising, and all outbound direct commercial messaging shall not be allowed to state pricing, or offer discount coupons. This however shall not apply to newsletters that people sign up for, and company websites.

143/ There shall be no more paid advertising or advertised sponsorships (including mere mention) for any sort of sports. Also, sporting teams shall no longer be considered things that are subject to ownership under the law. Where sporting teams are assets that can be owned, the owners naturally try to drum up team loyalty. The problem is that this is a mental process that can be redirected. Thus we will continue to have our sports, however, they will not be things that involve great amounts of money.

144/ It shall be a crime to participate in crisis acting situations where fake events are passed off as real. It shall also be a crime to present simulations as real imagery without the word FAKE in the lower left corner. Also, all real imagery shall have a date stamp and a location in the lower right corner, so we don't get confused about when and where real event happened, and so it is easier for everyone to verify the real imagery occurred.

145/ Foreign war cries such as Allah Akbar shall not be considered matters of free speech. Also there shall be no free speech protections for those people who call for extermination of one race or another, or yelling fire in a crowded theatre.

146/ Everyone has the right to express their own words and their own ideas themselves, but when they take money for expressing words, that shall not be considered free speech. That shall be considered paid speech no matter how it's disguised. Also, under some circumstances, it may be a crime to parrot the sedition, (or said-diction) of others, particularly

when this is part of a big scheme involving many other paid media outlets and media influencers.

147/ Government shall make no laws about the use of grammar or pronouns, especially when these confuse who is a male and who is a female.

148/ Government and fictional citizens shall not be allowed to run propaganda about real people.

149/ It shall not be allowed for people to contact bookstores and libraries to tell them not to carry a certain book or publication. This should be considered a form of censorship and illegal. Also, people are not allowed to protest in front of libraries, bookstores, or publishers, or websites about certain materials, or books, or call for these to be burned or destroyed. Also, all the propaganda books that the Senate is going to now eliminate from the list of acceptable children's media — even those will be available to adults, so they can see what sort of propaganda was removed from our schools.

150/ Except for military strategy and weapons system capabilities, no government worker or fictional citizen worker shall ever require permission to talk to the media about his job.

151/ It may be considered a felony for those in a position of power (including such minion-like people as flight attendants and school teachers), to attempt to censor information.

152/ The government shall thought to have no duty to protect the people from misinformation, beyond merely stating its opinion that certain information is misinformation.

153/ It shall be felony democide to attempt to change government policy so that it censors information, or to call for information to be censored because it is supposedly disinformation. This is precisely the sort thing that must go on the other side of the line.

154/ The definition of calling for violence, and especially assassination, shall be as low as reasonably possible for genuinely important political leaders that might be assassinated,

155/ Except where the buses are transporting police or military in uniform or militiamen Every place where a bus or a truck full of people goes, shall be considered public property, including areas in basements and within buildings and on private property.

156/ Claims touting the efficacy of for sale medical and herbal treatments shall not be considered a matter of free speech, but instead shall be managed by the FDA. However, claims by patients about lack of efficacy, side effects, and injury caused by medical products and procedures shall always be considered protected of free speech, particularly when it is already treated patients making these claims. Also stating theories about disease etiology and that a certain path of research might be beneficial shall also be always considered matters of free-speech, especially when they come from someone who does not profit from the suggestion. The Senate shall only have the right to censor claims about treatment efficacy. There shall be no right of the Senate to censor claims by individual patients that a treatment or cure is not working, or that it has certain side effects, or problems.

157/ Every person that manages somebody else during a public speaking event, telling them to stop saying something or to stop talking, or something similar: all of these people should be considered as committing the crime of censorship.

Cutting off peoples microphone before or during the time they are speaking on schedule before a group that has assembled to see them and before their time has expired shall be considered an act of censorship. Where Senators do this, they shall be expelled from Senate. Where non-Senators do this, they should be charged with illegal censorship.

158/ Where large crowds gather to hear people speak, either in the real world, or the virtual world, these shall have the right to physically eject people who are heckling and disrupting their meeting. These crowds shall also have the right to keep the disrupters out.

159/ It shall not be allowed for candidates to say that they will bring pork barrel spending to their district.

160/ We shall enshrine and long ponder the words of Thomas Jefferson:

“When the speech condemns a free press, you are hearing the words of a tyrant.

161/ The burning of our nation's flag of freedom shall not be considered a matter of free speech. Where our own native born citizens burn our nation's great flag of freedom, they shall get 5-years in lock-up. When immigrants do this, they shall get 10-years in lock-up. Where non-citizen guests do this in our land, they shall be executed. Furthermore burning our nation's great flag shall be considered justification for community self defense, and those burning our flag may be shot dead (or killed by other means) by those observing the immolation of liberty and freedom.

162/ The freedom of speech shall include prohibitions on both telling people what they can't say and telling people what they must say. Nobody shall be allowed to tell another person the words, names or pronouns they must use.

163/ Our nation shall have a rule that the correct way to refer to all people born male shall be to use male words and pronouns. And the correct way to refer to all people born female shall be to use female words and pronouns. Where government do not do this, they must be fired for discrimination. Where educational people do not do this, they may be banned from having a child worker license for life. They may also be charged with child sexual grooming and

164/ Those who participate in fake and corrupt facts checking agencies may be charged with censorship.

165/ The Senate and Government shall be subject to a freedom and information act that helps the people snoop on government. Also, all Main-Senators and Over-Senators shall be allowed to access all Government information (secret or not), so this information can be managed properly. All freedom of information act requests shall be submitted through the recorder system, and not through the Senate or the bureaucracy.

166/ It shall not be allowed for news reporting services to have debates. They may cover debates that other people have, but they shall not be allowed to have their own debates.

167/ Government and the openly corrupt paid commercial media shall be banned from producing propaganda to fool or trick the people. Government must always tell the truth to the people, and it shall never lie. Those government people who lie on behalf of government may be considered the equivalent of censors, and sent to jail for censorship.

168/ There shall be no right to say any of the following things. All of these topics shall not be considered as free speech:

b/ Speech that encourages the rounding up of arms.

a/ Speech that encourage illegal voting, or non-citizen voting.

c/ Speech that calls for narrowing our democracy or for oligarchy or monarchy.

d/ Speech that calls for communism.

e/ Speech that calls for censorship.

169/ Nobody shall ever be arrested or punished in any way for criticizing the government, even in time of war, epidemic, and other crisis, and all who attempt to punish citizens for this shall be regarded as democides. This shall include punishments by Government, fictional citizens, News media, hospitals, schools, police, and regulatory bodies. This shall also include threats of withholding licenses, and punishing people in any way for what they say. In fact, our motto, shall be the bigger the crisis, the more important that we hear all divergent opinions.

170/ The following words of Cardinal Richelieu should be pondered: "Give me six lines written by any honest man, and I'll find something in them which will get him hanged."

171/ The following words of Alexander Solzhenitsyn should be pondered: "Marxism can be recognized by how it spares criminals but criminalizes political opponents."

172/ The following words of Edward Snowden should be long pondered: "When exposing a crime is treated as committing a crime, you are being ruled by criminals."

173/ The following words of George Orwell/ Eric Blair should be long pondered: "The furthest Society drifts from the truth, the more it will hate those who speak it."

174/ The words of Robert F. Kennedy Jr. should be long pondered: "There is no time in history where the people who were censoring speech were the good guys."

175/ We shall not be fooled by new words for censorship that legitimize the process of censorship. Recently the words misinformation, disinformation, hate speech, and racism have come into popularity as excuses for censorship. This constitution says that everyone who has ever used these words as an excuse for censorship, or stood up in public and called for censorship in the name of these words is still guilty of the crime of censorship. Furthermore, this constitution calls for future generations to be very wary of any excuse for censorship with regard to matters of public concern. Everyone who abuses their power over our government and its agencies to censor information domestically or abroad shall be subject to charges of censorship and very long prison sentences.

176/ Senators and especially government managers and workers shall not have quite the same right of free speech as ordinary citizens.

a/ They shall not, for example, be allowed to tell lies. When government people lie about government, they shall be fired, or expelled from the Senate.

b/ They shall not be allowed to be mocking, or flippant, flirty, or disrespectful, unless the other side is being very rude.

c/ Government people shall not have the right to remain silent with regard to their official duties, but must give testimony when called in for testimony.

177/ Government people shall not deceive or trick the people about the true conditions of the world. All government shall be required to be frank and honest, even when it makes government and our nation look bad. The rules for the

questioning of government workers will doubtless be extensive. What can be asked, and both valid and invalid responses by government people.

178/ Government shall not be allowed to knowingly say untrue or manipulative things to the people or to run propaganda for the people. Also, it shall be considered felony misappropriation when government money is used to fund smear campaigns against its own citizens.

179/ Written medical conjecture is always protected free speech, but video and audio conjecture are not always free speech.

180/ There shall be no right of government to hinder or prevent people from using virtual private networks or their equivalent.

181/ When meetings administrators give people time to speak, and the administrators interrupt the person speaking, the person speaking shall be given twice the time the administrator used to interrupt them.

182/ We shall ponder the ancient Greek word: ἰσγορία or isogoria in Roman letters. Isogoria was the right of each citizen to speak in public and to be heard, and to address the gathered people without any bias related to their social position or reputation.

183/ Government shall not be allowed to punish people for spreading rumors or lies or true things, except when groups conspire to do this. However the Senate shall be allowed to add commentary about veracity of all dangerous claims, disinformation, and misinformation.

184/ The people shall always have the right of free speech with regard to asking questions about the efficacy of treatments, adverse reactions to various treatments, the efficacy of treatments, and the presentation of information about unintended outcomes for treatments. It should be a felony for people either in Government or fictional citizens, employers, and especially in Government licensing agencies to act or attempt to act to prevent this sort of whistle-blower free speech. Those convicted of censorship should lose 100% of their money and be sent to a work camp for at least a decade.

185/ Where the people have professional qualifications, the Senate licensing boards shall not have the right or power to strip them of their professional qualifications, except in conditions where they provided a bad service to their customers. Where licensing boards enforce matters of free speech, particularly speech questioning the wisdom of the procedures that all of that profession must follow, the licensing board members shall be tried for censorship. Also, only Senate juries of competent size shall judge in matters where people are stripped of their professional licenses.

186/ The people shall always have the right to express written theories and conjectures about etiologies and medical treatments in venues for this: provided they are not directly or indirectly profiting from their conjectures.

187/ Except in the first two weeks of a treatment's existence, there shall be no right to advertise or engage with third parties to promote any treatment.

188/ There shall be no right of government to prohibit the use of virtual private networks or sneaker-net or other information sharing networks, or their equivalent. All who attempt to punish the people for using these networks shall be guilty of

censorship. Those convicted of censorship should lose 100% of their money and be sent to a work camp for at least a decade.

189/ It shall be considered censorship for the people of our free nation to push other nations towards censorship that is not allowed in our nation.

190/ Censorship of 1st class free speech shall be considered as sort of democide and a felony. Fictional citizens that engage in censorship of 1st class free speech may be closed down. If they are foreign fictional citizens, their assets in our nation shall normally be seized. Also, if the censoring party is a for-profit entity, then their shareholder equity may be diluted slightly or totally. Furthermore, the directors and even the censorship minions may be imprisoned for engaging in this felony.

191/ The right of people to publish information about what they're studying shall be inalienable, and no confidentiality agreement shall be binding upon them

192/ Where fictional citizens attempt to censor their people who have valuable information for the public, the people in the corporations may be charged with democide. Where companies, persecute people who say things about what they're doing, then shall be considered censorship and deicide, for their directors

193/ Also, all doctors and scientists and people doing research. They'll have an absolute right to talk about their research in public and nobody shall be able to alienate them from this right.

194/ Government shall not engage in censorship of any sort with regard to political or economic, or important matters, or the people that say and talk about these things. It shall not try to de-platform or de-monetize, or de-bank people, or to shadow ban them, or to harm their reputation.

195/ Everybody is supposed to say far away from the line with regard to censorship of 1st class free speech, especially fictional citizens and foreigners. Following employer orders shall be no excuse for charges of censorship. We say this because we want our fictional citizens and their workers to stay far away from the line with regard to censorship of 1st class free speech.

196/ The Senate must have the high ground with regard to fact checking. There shall be no dedicated non-Senate fact checking organizations, or fact checking individuals with lots of credibility that compete-with, or influence the Senate and people in regard to fact checking, and what is real. However, while nobody and no group of people shall ever be allowed to have super-credibility as fact checkers: every normal person with an ordinary or near ordinary level of credibility shall be allowed to check facts.

197/ Except in regard to military secrets, government officials including especially police shall have the inalienable right to talk to the press about stupid government policies. After this, it shall not only be a crime for their superiors to retaliate against them, but their superiors must be terminated for retaliating against them.

198/ We should long ponder the words of George Washington: "If the freedom of speech is taken away, then dumb and silent we may be led, like sheep to slaughter."

199/ We should long ponder the words of George Orwell from his novel 1984: "Every record has been destroyed or falsified,

every book rewritten, every picture has been repainted, every statue and street building has been renamed, every date has been altered. And the process is continuing day by day and minute by minute. History has stopped. Nothing exists except an endless present in which the Party is always right.

200/ The right of free speech shall apply to documented patient claims of adverse reaction in all treatments. The right of free speech shall not apply to stories about cures and treatments, especially by those selling those treatments, or working with people selling those treatments. All treatments marketed for sale must have FDA approval. Also, except for new FDA approved drugs, there shall be no advertising of healthcare treatments, including natural herbal treatments.

201/ There shall be no advertising for any of the following without a permit from the Sub-Senate, which shall generally be withheld unless there is a clearly good reason to do this:

a/ Tobacco

b/ Alcohol

c/ Mafia drugs

d/ Pornography

e/ Prostitution

f/ Religious ads

g/ Cures and treatments

h/ Financial advice

i/ Real estate agents.

j/ Lawyers

202/ Freedom of speech shall not include the right to use loudspeakers, or for playing audio ads, or music. If fact, we shall outlaw vehicles go around playing music or audio ads, or preaching from the vehicle. Also, there should be no loud music at political rallies.

203/ Tearing up, covering, damaging or stealing people political signs shall be a free speech offense.

204/ There shall be no such thing as a qualified or professional journalist.

205/ It can be considered felony abuse of power where government people (including police) harass or de-platform people for saying what they think.

206/ The term Galvanization shall no longer refer to the process that electricity is used to deposit zinc onto iron. From now on, this shall be called zinc plating, and galvanization shall refer to the process by which materials are molecularly aligned and oriented and turned in the same direction by the momentary application of a strong electromagnetic aligning force. So now the word will mostly be used for groups of people that are galvanized by exposure to strong arguments. This is an important word for having a strong group mind.

207/ It shall not be allowed to intentionally disrupt other people's clear acts of free speech. For example, people that come and stand between a person reporting and a person recording the reporter, or people that come with a leaf blower or other noisy device in order to stop someone from speaking out, these people shall be guilty of a free speech crime and a felony at that. Those who intentionally make noise and disrupt others who are trying to record a message or interview should generally be charged with a free speech crime if their intent is clearly to prevent information from getting out.

208/ At protests, it shall be a free speech crime to interrupt people who are talking to others.

209/ There shall be no advertising to children without Senate approval.

210/ Both government and all fictional citizens must always tell the truth. It shall be a felony to use either government or any fictional citizen to spin lies for the people.

211/ The Senate shall have extensive rights to censor advertising and other paid content, non-human created content, and foreign-sourced content, the term non-human shall include both fictional citizens and artificial intelligence, as well as noise and commercial spam.

212/ Except when people are threatening others or calling for group violence, nobody shall ever be arrested or jailed for the words they use until after they have been convicted of a crime.

213/ The openly corrupt paid commercial media shall no longer be allowed to talk about matters of climate or weather, disasters or ozone or ice ages, ice sheets oceanography, atmosphere science, the rate of storms, or wildfires, or carbon dioxide or rising sea levels or any similar natural phenomenon.

214/ Diversity of opinion is supposed to be encouraged everywhere in Government, education, and in the media.

215/ Sexualized cartoons, and those that blend the two genders, and those who blend humans with animals in a sexual way shall not be considered a matter of free speech. They are thought to be aimed at children because of the animation, and man will be seen by children. So they should be eliminated.

216/ It shall not be allowed to name and title things with words that can be construed to be an advertising to commit a crime or to be a hypersexual, for example the Super-Dry brand.

217/ All talk about who has hetero sexual relations with who, or how/where they like to have legal sex with other adults, or with robots, or devices, or how many people someone has had sex with shall not be a matter of free speech. In fact, this sort of communication about others can quickly get the people saying/writing/insinuating these things stigmatized. Also, more important than our society's tolerance of extreme/ bizarre perversions, is our society's tolerance of how many heterosexual partners people have had.

218/ There shall be no so-called furry people. This shall be regarded as a fake foreign corrosive ideology to drive our young people into hyper-sexuality. This is because the ideology ultimately calls for the animal tails to be inserted into the anus. All of the people involved with normalizing this kind of junk ideology among our kids shall be at least symbolically convicted of a felony and banned for life from obtaining a child worker license, from working for government and from voting.

219/ The rights of free speech and free press demand that there be no more licensing of information, paywalls or subscriptions for factual information. The only source of income for this shall now be Senate Ubiq money, however this shall come in a fully automated way that enables creators to focus on their work.

220/ It isn't a democracy unless:

a/ People can safely talk about and hear about what they are voting for.

b/ People can discuss things anonymously, because anonymity helps assure the valuable sharing of

controversial information.

c/ Citizens have always have a right to call-out non-citizens as non-citizens, and call for them to be treated differently from real citizens, because they actually are not citizens, they are non-citizens.

221/ We shall ponder the words of Atifete Jahjaga:

"Democracy must be built through open societies that share information. When there is information, there is enlightenment. When there is debate, there are solutions. When there is no sharing of power, no rule of law, no accountability, there is abuse, corruption, subjugation, and indignation."

222/ Anyone in government who ever jails anyone for what they say shall be potentially subject to 20 years in prison per count for democide, for violating our first and foremost right of free speech. This includes all police officers, all private security officers, all senators, all judges, all prosecutors, all lawyers involved with the process of punishing people for what they say in the words they use. These people shall always be presumed to be the criminals, the felons, and the people merely expressing themselves shall always be presumed to be the victims. Also, the people saying the things must remain out of jail, pending trial, while the people arrested for censoring, and silencing people shall remain in jail pending trial without any possibility of bail until after the trial, because the law shall presume them to be guilty because they acted against freedom of speech.

223/ In the question about whether we allow people to insult the police:

a/ We definitely don't want the situation where we are all walking on eggshells around police.

b/ Cops can handle it.

c/ It is probably better if police know which people hate them.

d/ The words used must be non threatening and not calling for violence.

e/ Merely abusive and insulting language shall not be considered threatening.

224/ A good democracy is supposed to make police and government people afraid to go near enforcing matters of free speech, except with regard to protecting the real and true speakers from hecklers and disruptors.

225/ This constitution shall enshrine the words of **John 3:19-21**: "Everyone concluded that light came into the world. But some people loved darkness instead of light because their deeds were evil. Everyone who does evil hates the light, and will not come into the light. They fear that their deeds will be exposed [by the light]. But whoever lives by the truth [gladly] comes into the light." [Because they have done nothing wrong and have nothing to fear].

226/ The freedom of speech shall not include the right to advocate or call for:

a/ Censorship.

b/ Reductions in our first and foremost right of free speech.

c/ Reduction of our right to bear arms.

d/ Reduction in our right to assemble and protest.

e/ Reduction in our right to be free from unreasonable searches and seizures.

f/ Voting over a period longer than one hour.

g/ Voting without verifying one's identity and citizenship.

h/ Voting machines.

i/ Voting by non-citizens
j/ Counting ballots in private and outside of public scrutiny.
k/ Racial discrimination, including reverse racial discrimination to correct for past discriminatory systems.
l/ Extra-judicial violence.
m/ Talk celebrating the assassination of any leader.

227/ The right of free speech shall no longer include the right to go door to door to people's homes, except for registered candidates, registered people with political messages, and neighbors. Door to door commercial salesmen and religious people shall be prohibited, and their activities shall not be considered a matter of free speech.

228/ Where people deceptively package old videos as new videos for the traffic income, they should be stigmatized by the Senate in the public interest.

229/ To be clear, the following shall not be protected as free speech:
a/ The words of fictional citizens and non-human entities.
b/ Advertising and other commercial messages.
c/ Speech that incites lynching, rioting, or lawless action.
d/ False statements of fact.
e/ Threats.
f/ Imagery of nude bodies and people engaging in sex.

230/ We shall enshrine the following great words of Jeremy Bentham:
a/ "Secrecy, being an instrument of conspiracy, ought never to be the system of a regular government."
b/ "As to the evil which results from censorship, it is impossible to measure it, because it is impossible to tell where it ends."

231/ We shall enshrine the following great words of John Stuart Mill:
a/ "There is always hope when people are forced to listen to both sides."
b/ "Truth emerges from the clash of adverse ideas."
c/ "Liberty lies in the rights of that person whose views you find most odious."
d/ "So long as we do not harm others, we should be free to think, speak, act, & live as we see fit, without molestation from individuals, law, or government."

232/ There should be no free speech zones such as we see in London with its speaker's corner. And generally all public property where people gather shall be a place for free speech.

233/ We shall ponder the words of Benjamin Franklin;
"Whoever would overthrow a nation must begin by subduing the freeness of speech.

234/ We shall ponder the words of Thomas Jefferson:
a/ "I never considered a difference in opinion in politics, in religion, or in philosophy as a cause for withdrawing from a friendship." [This is one of the most important and foundational statements for our land of the free with its many varied opinions.]
b/ "No government should be without critics. If its intentions are good, then it has nothing to fear from criticism."
c/ "Our liberty depends on the freedom of the press, and that cannot be limited without being lost."
d/ "The spirit of resistance to government is so valuable on certain occasions that I wish it to always be kept alive."

235/ While it will not be allowed to call for domestic violence,

it shall be allowed to call for the entire nation to take up arms against certain foreign provocateurs.

236/ Government shall never require a permit to film on private or public property, unless the filming is creating a genuine obstruction to the flow of traffic or the flow of pedestrians.

237/ In matters of free speech, the term public property shall include all properties open to the public, all transportation systems, all transport stations and ports and airports, all shopping malls, all convention centers, all building lobbies, as well as all properties built or maintained with government money. All of these places shall be treated as the town square with regard to first class free speech.

238/ The use of relative probability shall be stopped and deleted, and only absolute probability shall be used.

239/ The old childhood saying that: sticks and stones may hurt my bones, but names will never hurt me. That is our way in the land of the free. That is our sensible approach to free speech.

240/ The freedom of speech shall not apply to communication about how to commit crimes, or how to avoid getting caught committing a crime. This sort of communication may also easily be considered conspiracy to commit that crime, particularly if the communication is two-way, back and forth repeatedly. However, those publicly exposing exploits and hack-ability shall always be protected and rewarded with Ubiquitous status.

241/ Government shall have no say in where and when people film. Government shall not be allowed to charge for filming permits.

242/ The right of free speech does not include the right to advocate slavery in its many forms, to include communism totalitarianism, fascism, and Nazis or the granddaddy, evil ideology of Islam.

243/ No records of the legal system shall be redacted except to protect victim names or where national security is at stake. However where national security is at stake, victim names shall never be redacted.

244/ Fictional citizens and government shall have zero right to privacy with regard to court records. Otherwise, how will we know if the giant corporation didn't indirectly pay a bribe by using the most expensive law firms that obtains their results by cheating and bribing their old friend judges.

245/ In the following sorts of cases, absolutely everything said in court shall be made available to the public in a completely uncensored and unedited way, and there shall be no redactions:
a/ Cases involving government and fictional citizen corruption, misconduct and crimes.
b/ Cases involving abuse of monopoly power, or anti-competitive practices.

246/ There shall be a first amendment right for the public to access court documents and police records, and indeed the records from all government meetings and policy decisions.

NR'2. THE RIGHT TO BEAR ARMS

1/ We shall enshrine the great words of the second amendment to the US constitution of 1789: "A well-regulated Militia, being necessary to the security of a free State, the

right of the people to keep and bear arms shall not be infringed." In other words, The right of the people to keep and bear arms shall not be infringed by either Government or anyone else, because a well regulated (self-regulated) citizen militia is necessary to the security of a free nation. Without this right to be armed, none of the other rights guaranteed in this constitution can be defended. However, the right of civilians to bear arms shall not include:

a/ Machine guns as defined herein.

b/ Exploding, poisonous, or tumbling bullets, or bullets that commonly break up into fragments upon impact. But the right to bear arms shall include the right to use hollow point bullets, all forms of lead, steel and silver bullets, and all sorts of high grain armor piercing bullets, including bullets for piercing the body armor of police and soldiers. All of these hard and heavy bullets shall be allowed.

c/ Bombs, grenades and mines.

d/ Missiles, and rocket propelled explosives.

e/ Armored vehicles, But the right to bear arms shall include the right to use body armor identical to what government people use.

2/ We shall enshrine the following great words from America's founding fathers about guns:

a/ "The Constitution... asserts that all power is inherent in the people, and that they may exercise it by themselves, and that it is their right and duty to be at all times armed." — Thomas Jefferson letter to John Cartwright, 1824.06.05

b/ "The Constitution should never be construed to authorize Congress to infringe on the liberty of the press, or the rights of conscience, or to prevent the people of the United States who are peaceable citizens from keeping their own arms." — Samuel Adams, Massachusetts Ratifying Convention, 1788.

c/ "Among the natural rights of the colonists are these: First a right to life, Second to liberty, and thirdly to property. Together with the right to defend themselves in the best manner they can. These are evident branches of, rather than deductions from the duty of self-preservation, commonly called the first law of nature." — Samuel Adams 1772, The Rights of the Colonists.

d/ "The right of the people to keep and bear arms shall not be infringed. A well regulated militia, composed of the body of the people, trained to arms, is the best and most natural defense of a free country." — James Madison, I Annals of Congress 434, June 8, 1789

e/ "To disarm the people...[i]s the most effectual way to enslave them." — George Mason, Virginia Ratifying Convention 1788.06.14

f/ "No free man shall ever be debarred [banned] from the use of arms. — Thomas Jefferson, Virginia Constitution draft

g/ "The right of the citizens to keep and bear arms has justly been considered as the palladium [or protecting spirit] of the liberties of a republic." — Thomas Jefferson, letter to George Washington 1796.06.19

h/ "Experience has shown that even under the best forms [of government], those entrusted with power, have over time, and by slow operations, perverted it into tyranny."—Thomas Jefferson, A bill for the More General Diffusion of Knowledge 1779

i/ "A militia when properly formed are in fact the people

themselves...and include... all men capable of bearing arms... To preserve liberty, it is essential that the whole body of the people always possess arms, and be taught alike, especially when young, how to use them..." — Richard Henry Lee, Federal Farmer No. 18, 1788.01.25

j/ An invading army: "would be opposed by a militia amounting to near half a million citizens with arms in their hands, led by men chosen from among themselves, fighting for their common liberties, and united and conducted by governments possessing their affections and confidence. It may well be doubted whether a militia thus circumstanced could ever be conquered by such a proportion [a proportionally tiny number] of regular troops. Those who are best acquainted with the late [recent] successful resistance of this country against the British arms will be mostly inclined to deny the possibility of it [ever happening]." — James Madison, Federalist #46, 1788.01.29

k/ Three million... people, armed in the holy cause of liberty... are invincible by any force which our enemy can send against us. — Patrick Henry, Give Me Liberty or Give Me Death speech 1775.03.23.

l/ "He who trades liberty for some temporary security, deserves neither liberty nor security." — Benjamin Franklin, Historical Review of Pennsylvania 1759. The original organic version was: "He who trades his arms for peace, deserves neither arms nor peace." [Digression: The Ministry of truth changed this saying from something specific and valuable, into a worthless matrix version that was too vague to be understood. Yet at the same time, it was within the range of a thing that could be chalked up to a faulty memory for the people who go back and look something up.]

m/ "[Why can't we] be trusted with arms for our [own] defense? What's the difference between having our arms in [our] possession, and having them under the management of Congress? If our defense be the real object[ive] of having those arms, in whose hands can they be trusted...more... [than]... in our own hands?" —Patrick Henry Virginia ratifying convention, 1788.06.09. Here is Patrick Henry speaking out against the body of the current US constitution and in support of the Bill of Rights part. Hamilton and Madison and the power centralizing Federalists drafted the body of the 2nd constitution and no-kidding, they campaigned against including the Bill of Rights. They were for slavery in the land of the free but against free speech, free assembly, and the right to bear arms. They were foreign agents, and the body of our constitution was written by foreign agents.

n/ "Arms, like law, discourage and keep the invader and plunderer in awe, and preserve order in the world as well as property [rights...] Horrid mischief would ensue were the law-abiding deprived of the use of them. For while avarice and ambition have a place in the hearts of men, the weak will become a prey to the strong. The history of every nation establishes these truths" — Thomas Paine, Thoughts on Defensive War, Pennsylvania Magazine, July 1775.

o/ "To be prepared for war is one of the most effectual means of preserving peace. — George Washington, First annual address to both houses of congress 1790.01.08

p/ "A free people ought not only to be armed, but disciplined... [and] ...they should [have] ... such manufacturing as to render them independent of others

[meaning foreigners] for essentials," [and particularly military supplies.] — George Washington, First annual address to both houses of congress 1790.01.08 This extremely important quote is commonly called fake by the totally corrupt paid commercial media. So that tells us it is very real and very important, if they are struggling to take it away from us. Clearly there were huge shortages of arms during America's revolutionary war, and fighters suffered until the very end of the war when Americans finally had enough guns. Then suddenly, the British surrendered at the hugely important battle of Yorktown. Indeed, Yorktown meant one main thing for Americans. It means, we finally had enough guns to defeat the foreign invading army and win our independence. Yorktown also means that free people need both a reasonable per-capita rate of arms ownership, and sufficient ammunition output for their militias.

This arming of the people is the single most important and cost-effective thing that the free people of the world can do to prevent war in their nation.

q/ "For a people who are free, and who mean to remain so, a well-organized and armed militia is their best security." — Thomas Jefferson, Message to Congress November 1808.

r/ "Let your gun therefore be your constant companion on your walks." — Thomas Jefferson, 1785.08.19, Letter to Peter Carr

s/ "Laws that forbid the carrying of arms... disarm only those who are not inclined... to commit crimes ... Such laws make things worse for the assaulted and better for the assailants. They serve rather to encourage than to prevent homicides, for an unarmed man may be attacked with greater confidence than an armed man." — Thomas Jefferson, quoting Cesare Beccaria's Essay on Crimes and Punishments from 1764)

t/ "Before a standing army can rule, the people must be disarmed, as they are in almost every country in Europe. The supreme power in America cannot enforce unjust laws by the sword; because the whole body of the people are armed, and constitute a force superior to any band of regular troops."

— Noah Webster, an examination of the Leading Principles of the Federal Constitution 1787.10.10

u/ "The project of disciplining all the militia of the United States is as futile as it would be injurious if it were capable of being carried into execution." — Alexander Hamilton, Federalist #29.

v/ "What, Sir, is the use of a militia? It is to prevent the establishment of a standing army, the bane of liberty ... Whenever governments mean to invade the rights and liberties of the people, they always attempt to destroy the militia, in order to raise an army [of domination] upon their ruins." — Elbridge Gerry Annals of Congress 750, 1789.08.17.

w/ "Guard with jealous attention the public liberty. Suspect everyone who approaches that jewel. Unfortunately, nothing will preserve it but downright force. Whenever you give up that force, you are ruined.... The great object is that every man be armed. Everyone who is able might have a gun." — Patrick Henry, Speech to the Virginia Ratifying Convention, 1778.06.05).

x/ "The right of self defense is the first law of nature. In most governments, it has been the study of rulers to confine this right within the narrowest limits possible. Wherever standing

armies are kept up, the right of the people to keep and bear arms is [normally] prohibited, under any color or pretext whatsoever; [where we see this], Liberty, if not already annihilated, is on the brink of destruction." — George Tucker (Blackstone's Commentaries on the Laws of England 1803. In our nation, the 4 afternoons a year militia will be at least 6 times the size of the military.

y/ "A well-armed people being necessary to the long-term security of a free and democratic nation, the right of the people to keep and bear arms shall not be infringed." — US Constitution 2nd Amendment)

z/ [The people] "have a right to defend themselves and recover by force what by unlawful force is taken from them." — John Locke

aa/ "I have no reason to suppose that he, who would take away my Liberty, would not when he had me in his Power, take away everything else." — John Locke

bb/ "All political power comes from the barrel of a gun. Thus the communist party must command all the guns. That way, no guns can ever be used against the party." — Mao Zedong, 1938.11.06, problems of War and Strategy, Selected works.

cc/ "The seizure of power by armed force, and the settlement of the issue by war is the central task and the highest form of revolution. This Marxist/Leninist principle of revolution hold well universally, for China and for the other countries."

— Mao Zedong, 1938.11.06, problems of War and Strategy/

dd/ "According to the Marxist theory of the state, the army is the chief component of state power. Whoever wants to seize and retain state power must have a strong army." — Mao Zedong, 1938.11.06, problems of War and Strategy, Selected works.

ee/ "We are advocates of the abolition of war, we do not want war. But war can only be abolished through war, and in order to get rid of the gun, it is necessary to take up the gun." — Mao Zedong, 1938.11.06, problems of War and Strategy, Selected works.

ff/ "if the opposition disarms, great. If it refuses to disarm, we shall disarm them ourselves." — Joseph Stalin, 1927.12.07, The political Report of the Central Committee, 15th congress of the CPSUB,

gg/ "There is no reason anyone in Canada, should need guns in their every day lives." — Justin Trudeau, 2022.05.30

hh/ "There is no excuse to have arms, no excuse, or permission to use weapons in the streets. We will continue disarming the civilian population. — Hugo Chavez

ii/ "Gun control means control. It means control for the government and then the government starts controlling the people." — Luke Scott

jj/ "The Militia, sir, is our ultimate safety. We can have no security without it. The great object [the main thing] is that every man be armed." — Patrick Henry, Virginia convention

kk/ "Every citizen should be a soldier. This was the case with the Greeks and Romans, and must be that of every free state." — Thomas Jefferson

2/ Here we realize that we have a very simple litmus test for our leaders as true or traitor. Leaders that lean towards disarmament of our people by any measure or micro-increment, and for any micro-excuse. So the people who advocate disarmament in even the most microscopic ways should almost invariably be regarded as fronting for our

nation's enemies. These shall be regarded as working towards a long-term plan of subjugation through disarmament, slaughtering and subjugation of our free people so people may have the Mafia world domination they seek, their super-profitable compass-rose monopoly in every direction. This, while those that want their people armed are normal and reasonable and goodly people. Also, we shall always remember that it was the Persians (Arabs) that told the Spartan Greeks (Europeans) under Leonidas to lay down their arms provoking the famous Spartan response *Molon Labe*, or come and take them. There shall be no further disarmaments by any degree in our nation, ever again.

3/ We shall now update the second amendment and say that the prior second amendment was defective because it banned all regulation of firearms, and there must be some regulation, at least with regard to machine guns, exploding bullets, missiles, bombs and similar super-powerful weapons. Therefore, this new constitution, regulates firearms in certain new ways that make them considerably safer without sacrificing any substantial loss of political power.

4/ Disarmed nations are easy to subjugate with force, while armed nations can easily have dedicated citizen defense militias numbering in the tens of millions. Thus armed nations are almost impossible to subjugate with force, either foreign or domestic, or both. All nations emulating this constitution must have a well-armed people to do their part to discourage/prevent war attacks, and less intuitively, attacks in times of global famine. Some of these nations will allow more powerful civilian arms in the hands of the people, while others will only allow the weakest slow-firing single-shot civilian arms, with their more powerful militia armaments kept in Centi-Nome armories. It shall be a job of police (who are greatly co-located at the armories) to prevent seizure of armory arms, and other civil defense supplies, and to assure that their free people can all be militia armed in hours. However, it shall be a capital offense for police to interfere-with their county Senate's instructions to open the armory, or to go around rounding up firearms that are guaranteed as legal civilian firearms under this constitution.

5/ An armed public is the hallmark of liberty. A disarmed public is the hallmark of tyranny. Disarmament is the #1 thing that tyrants need to rule over a people by threat of force. Under no circumstances shall the government of our nation, or any invading force disarm our people except for: minors, convicts, foreigners, crazy people, and a sliver of people judged by their neighbors and community as unstable. Those in positions of power who speak out in favor of substantially disarming the people (except in the context of a new constitution) may be charged with democide. Talking about rounding up firearms shall not be considered protected free speech, and it should be considered quite easy to imprison people for talking about rounding up our nation's deer firearms.

6/ Wherever a government or invading force is calling for people to disarm, the presumption should be that they are angling the nation towards extreme degradation and even perhaps concentration camps and death camps — and that it is better to fight back at the start, than later.

7/ A well armed people is the cheapest, the easiest, and the most foolproof way for a nation to defend against both

invasion, and the rise of domestic tyrants. It also brings much more stability to society in times of plague, famine, and natural disaster. Systems that use an armed government and a disarmed public are much more vulnerable to chaos and catastrophe in times of crisis, war, invasion, famine, and plague. Our nation's armories shall have at least one war rifle per six citizens.

8/ Widespread distribution of bolt action 50-cal and 30mm rifles prevent invasion by lightly armored vehicles. Several million automatic-fire shotguns and signal jamming tech kept in Centi-Nome armories shall be thought key to resisting flying drone attacks.

9/ Our nation shall always look at the big-picture, the long-term historical picture for firearm ownership. We shall look at how a large part of Eastern Europe lost up to 1/5th of its population during World War Two, largely because the people were not armed. Then we shall look at how the United States has been losing about 1/25,000th of its people annually due to firearm homicides in recent years. When we compare these numbers, we realize that our annual firearm homicide rate will take 5,000 years to add up to 1/5 of our population. And this is only in case of invasion. This does not count domestic seizure of power, domestic dictatorships, warlordism, mafia violence, crime gangs, and other forms of violent crime. It also doesn't count how the firearm homicide deaths are heavily skewed towards the more criminal elements of society, unlike the war deaths. There is also the twin problem of actually eliminating the guns and actually keeping them out. So we realize that the small amount of death caused annually by gun violence is insignificant in comparison to the immense death that not having firearms frequently leads to over the centuries and millennia.

10/ Democracy works better when everyone can say what they think, and when nobody fears speaking out. Few things help this state of affairs to exist as much as when outspoken people can be armed.

11/ Surely armed foreigners in our land is the opposite of national security. And surely we must mostly ban gun-ownership by non-citizens in our land. Therefore, it shall be a felony when non citizens are caught in possession of a firearm. These shall go to jail for a decade on the first offense prior to their deportation. We shall have three groups of people in our nation with regard to gun rights: Citizens, immigrants, and visitors. The Citizens get full rights to be armed. The visitors get no rights at all with no access to arms, even range shooting. The immigrants get arms licenses on a case by case basis, with no more than a small number being issued licenses. This shall depend on how long they have been living in our nation, whether they have citizen children, their employment history, and also the subjective judgement of the Centi-Nome they live in. It shall be thought necessary that some immigrants be armed, so that immigrants do not become crime targets, because they are all known to be disarmed. Immigrants shall not hunt with projectile weapons including bows and slingshots. It shall be a felony for non-citizens to buy or hold firearms in our nation unless specially authorized by the Senate. It shall be a felony for a person to carry a firearm when they are not allowed to carry one. Also, people not allowed to carry a firearm are not allowed to carry stabbing or slashing blades upon them while

not at home or at their workplace where such blades are actually needed. Life sentences shall be possible for non-citizens and convicted felons that use firearms or knives in the commission of a robbery, rape, shooting, stabbing or other violent crime. Also, in times of widespread violence or crime involving immigrants: It will be a capital offense when immigrants are recorded carrying arms, including large knives. Furthermore, during these times, there will be universal carry rights for citizens/ And they are supposed to detain all immigrants found in arms that speak with a foreign accent, pending police arrival, shooting those who attempt to fight or flee.

12/ Those previously convicted of a felony shall not have the right to buy or hold firearms unless they are temporarily granted the right to hold arms by the Senate due to invasion or another sort of national emergency. Convicted felons and non-citizens found in possession of a firearm shall be put in a work camp for a decade for that crime alone. There shall be a potential death penalty for convicted felons and non-citizens who discharge a firearm under any circumstances including hunting, or range practice. The right to bear and practice with arms shall be a right of our own people, and a thing that is not for foreign visitors, or disarmed immigrants. Those found crossing our border with arms shall go to a work camp for life. Those firing on, or brandishing weapons at our border guards may be shot dead.

13/ Those with a conviction for a felony, and those convicted of several misdemeanors:

a/ Shall not own or hold a firearm.

b/ Shall not be allowed in our nation's military, except during times of invasion.

c/ Shall not work as police or private security guards.

d/ Shall not work for government, or in any management role in any fictional citizen.

e/ Shall not work with other people's children, or in education.

14/ Those people who have not graduated from English language high school or secondary school in our nation, or passed the equivalency test, shall not be allowed to buy or hold firearms until they are over age 35. However, there shall be two exceptions to this rule:

a/ The government's high school equivalency test, and especially the new robust freedom, democracy and history sections. And this test must be taken in our land, this test shall be a substitute for completing secondary school. This provided the test was delivered in the national language of English.

b/ This rule about secondary school graduation shall only be enforced in urban and suburban areas, and within 10km of them. In other areas, people who have not graduated secondary school or passed the equivalency test shall be allowed to own and hold arms once they turn age 18.

Where secondary school drop-outs and minors between 13 and 18 that are found in possession of a firearm, outside on the streets, on their body, in an urban or suburban area, they shall all get a mandatory 5-years of reform school and work camp and job training. Where people between 18 and 35 are found, they get sent to a work camp for for 10 to 20 years, before they can be released back in the US. Also, if these armed high school dropout people have a felony record, when they get picked up armed, they shall get life in a

work camp. Thus there will be no more armed crime gangs. Also, non-citizens also get life in a work camp if they are found with an unlicensed firearm.

15/ Government shall have education status on the police ID database. Those people found by police, or other government workers with a firearm and without the ability to prove their identity, age, and graduation status shall be arrested.

16/ Without a special carry permit issued by the person's Centi-Nome for cause, males under age 23 who are not secondary school graduates shall be prohibited from owning or carrying firearms.

17/ Citizens over age 15 that are in a designated hunting area, or at a commercial shooting range may legally hold a firearm, provided they are in the presence of a parent or permanent legal guardian.

18/ Everyone allowed to possess a firearms shall have the right to keep those firearms in their home, their workshop, their store, and their family workplace.

19/ People with irresponsible or young dependents shall be required to secure all their firearms in either a Senate approved gun safe, or with a Senate approved gun lockdown system. Guns hidden in locked vehicles shall also be considered secured. Minors recorded carrying or playing with firearms shall be sent to reform school for up to 3-years depending on their age and if they seem affiliated with gangs.

20/ Each county government shall keep an up to date list of residents eligible and ineligible to buy or hold a firearm for the reasons listed below. These name lists from the various counties shall be aggregated by the national government. They shall also come up when a person's ID is run by police. People shall generally be disqualified from buying or holding civilian arms if any of the following apply:

a/ They have ever had a felony conviction.

b/ They are a foreign person that is ineligible to vote.

d/ They are homeless, or were homeless in the past year.

e/ They have ever been locked up by the courts against their will for a mental health problem, or they have ever suffered from delusions, or complained of hearing voices.

f/ They have ever had a failed suicide attempt, or severe mental health crisis as judged by their neighbors in their Nome.

g/ They have made threats of unwarranted violence either under recording, or in front of at least 6 credible witnesses.

h/ They are taking, or have recently taken certain prescriptions or drugs that are widely known to cause mental instability or suicidal thoughts in users. This shall include all transexual drugs. Also, as transsexualism will now be considered a mental illness, and all transexual (past and present) shall be considered as mentally ill for life, and ineligible to own or hold firearms for life.

i/ They are licensed to consume more than 4 standard portions of alcohol on any given day per 84kg of body weight, rounded to the nearest integer number of drinks. However, the right of regular drinkers to own firearms shall not be confused with the prohibition on carrying arms while drunk or high on drugs. And this especially while going around on the public streets.

j/ They are licensed to consume an amount of marijuana that is more than half of the amount normally associated with daily use. The same government administration shall manage both

the firearm licenses and the alcohol/ drug licenses, and all this information shall be displayed together when police check a person's firearm data page. Those who have smoked marijuana in the past 24 hours, and those with a blood alcohol level over 0.02% shall not be allowed to carry a firearm outside their home. Where the right to take out and carry firearms exists, this right shall only exist for sober people, and both taking out and carrying while under the influence shall always be punished the same as driving under the influence. The Senate may slowly adjust the THC and alcohol intoxication metrics herein for cause.

k/ They have ever used anabolic steroids or taken transsexual sex change hormones, or hormones of the opposite sex in the past 10 years.

l/ They have been treated for PTSD in the past 10-years.

m/ A 2/3 overmajority of the person's Centi-Nome has voted that they should be put on the firearm-ineligibility-list. This can be for any reason at all.

n/ In the 20% of our nation's counties that have the highest murder rates, up to 20% of the population of these counties may be deprived of the right to be armed by their Centi-Nome. In the 80% least murderous part of our nation, no more than 2% of the people may be deprived of the right to be armed by their Centi-Nome. Also, those not on a Centi-nome ineligibility-list before they go to buy a firearm, shall always be eligible to buy firearms.

o/ The right to have and carry arms, and the revocation of these rights shall be decided at the Centi-Nome level in consideration of Nome advice. However, upon conviction of a felony by a court, the right to own a firearm shall be automatically revoked for life as a matter of standard government procedure. Thereupon, all firearms and related equipment and ammunition must be sold to government for 100% of public auction proceeds. In other words the person forced to sell gets 100% of the auction proceeds.

p/ Where upstanding citizens that can have firearms have psychologically unstable people living with them, the Nome may require gun safes.

q/ To repeat for emphasis, if the gun buyer/owner is not already on the their Centi-Nome's ineligible list before buying their arms, they shall be considered eligible to buy arms.

21/ Each county shall use one of 5 standard rule sets for firearm carry in public by citizens. Thus carry laws shall be rather standardized nationwide, with the various counties able to choose which standard firearm carry rules they wish to use. The counties shall also be free to require gun cams and other smart gun features on all carry firearms.

a/ Call to arms: militia arms may be carried. There is also a suspension of the pointing firearm rules if there is a public security reason. This rule set may only be used temporarily and during a crisis.

b/ Universal constitutional carry: Everyone that is allowed to own or hold a civilian firearm may carry it in a concealed way, or an open way that does not seem especially designed to intimidate or is especially like brandishing.

c/ Low restriction carry: Everyone allowed to own or hold a civilian firearm may carry it in a concealed way if they have watched the national firearm carry safety and training course and passed the firearm safety test with a 100% score.

d/ High restriction carry: In order to carry, one must be

approved for carry by one's Centi-Nome, and they must have watched the national firearm carry safety and training course and passed the firearm safety test with a 100% score.

e/ Police and deputy carry only: Only police and deputies can carry firearms in public. With regard to firearm carry, deputies shall be viewed an auxiliary/ standby/ backup police force for little more than the cost of screening, deputy training, gun carry certification, and a tracker app. Deputies shall be sworn to take action to protect the people when they can. When there is unrest, the deputies shall be called up before the militia is mobilized. Deputies shall be nominated by their Nome and Centi-Nome.

22/ Under all firearm carry rules, civilian firearm carry by non-staff people shall be prohibited in all: airports, schools, courthouse buildings, arbitration facilities, government buildings, jails, police stations, government buildings, alcohol areas, military facilities, mental health facilities, stadiums, arenas, sports events, concerts, bars, concert halls, and other normally crowded public places, such as Times Square. Deputies shall however be allowed to carry in many of these places. Businesses shall have no authority to prohibit guns in their place of business if they're open to everybody if they're open to all comers/commerce. Also, guns shall not be prohibited on trains, buses, or by people driving their own personal vehicles.

23/ In all trials for illegal weapons carry, the Senate jury shall figure out if the person is carrying offensively or defensively. The penalty for illegal defensive carry shall be about 5% of the penalty for illegal offensive carry.

24/ All confirmed Senators shall be automatically licensed to carry a firearm for life and without approval in all counties once they have completed the gun safety module for Senators.

25/ In order for police to confiscate arms, one of the following must be true:

a/ The owner of the arms is under arrest or out on bail awaiting trial for a violent crime or threat of a violent crime. If charges are dropped against the owner of the confiscated arms, his personal effects and weapons confiscated by police must be returned by police immediately upon release. If the charges result in a felony conviction related to the firearm, the firearms shall remain confiscated by police and eventually sold by the recorder system via slow reverse auction.

b/ The search warrant court has ordered arms confiscation for an individual because the person has been convicted of a felony, or the court thinks that person poses an immediate threat to either their community, their family, their associates, or to themselves.

26/ Police as protectors of the people shall always have a right to talk with anyone obviously carrying a firearms in public, and figure out if they look harmful or not. So where people are going around armed, they shall be required to talk to police about their plans and what they have been doing, as well as giving their holder's permit number. Also, police may inspect the arms they are carrying, particularly the serial numbers on the special expensive silver bullets they are carrying. Police shall also have the right to check their holder's permit, their firearm holder's permit. You can't hold (or even touch) a firearm unless you have a holder's permit.

27/ Police shall only be allowed to hold arrested people uncharged upon probable cause for up to 24 hours. However, police shall be allowed to arrest a person's arms (all of a person's arms for up to 90 days), if that person illegally brandishes a firearm in any community, confrontation, or crime.

28/ When a Centi-Nome considers firearm eligibility, it may use all information, including sealed juvenile records, school transcripts, the testimony of neighbors and classmates, employers, police officers, CPS officers, and all any others who wish to come forth with evidence, such as evidence of street gang affiliation, aggression to many people, fistfights, bullying events, and misdemeanor convictions may be also used. Also, a large number of apparently random and disinterested acquaintances of the person advising to disqualify may also be used to disqualifying people from having firearms.

29/ Prior Centi-Nome firearm approvals may be rescinded at any time by the Centi-Nome that authorized the carry rights in the first place.

30/ The Senate shall encourage stable people to go through the training and screening to become unpaid civilian deputies for times of crisis. All such deputies shall be allowed to carry firearms nationwide, except in the restricted areas like airport, courts and bars listed herein.

31/ Every citizen shall have the right to defend their home with arms against those who break in. This shall thought a thing that exists at the heart of our right to bare arms. Our system defaults to permitting the killing of stranger intruders in one's home, and this most especially at times when most people are asleep, or time of crisis, or where the intruders went through more than one security layer, or when threats have been made. But also at other times and when the intruders are unknown and not formally invited via the county recorder system's optional-use, invitation-system, with unfriending aspects.

32/ Instead of defining machine guns as more than one shot per trigger pull, we shall now use a fixed fire rate to define a machine gun. From now on, a machine gun, or a fully automatic firearm shall be defined as being capable of firing faster than 3 shots per 2 seconds (0.66 seconds per shot), or having bullet clips/cartridges larger than 40 shots. The slow fire rate will reduce death in mass shootings, but it will also help diffuse more gun on gun situations. Government shall have no restrictions on bullet size, or the amount of gunpowder used.

33/ There shall be 3 classes of civilian firearm for the people to use for defending their nation: civilian firearms, militia/armory weapons, and military weapons:

a/ Civilian long guns are mostly to protect the people from governments and their armies, be it their own government, or an invading army. Long guns with barrels over 13cm long shall have a maximum fire rate of one shot per 0.66 seconds per shot. Faster fire rates than this with removable clips/cartridges shall be considered machine guns. This rate may be adjusted up or down to between one shot per 0.5 seconds and one shot per 0.9 seconds using the constitutional amendment process. This firing rate modification shall be the only thing among our citadel rights that is subject to

modification through the constitutional amendment process. All other changes to our citadel rights shall require a new constitution. Firearms firing at this rate or slower, shall not be considered machine guns and shall not be subject to restrictions on the size of replaceable bullet holding clips/cartridges. The fixation of the corrupt former liberal party on rounding up our rifles shall be considered a traitorous thing that comes from our nation's enemies, and the enemies of freedom. For it is rifles, the defenders need to resist foreign nations in their forces.

b/ Civilian handguns are mostly to protect the people from criminal force. With regard to handguns, the many tens of thousands of people who annually need these to defend against crime shall be considered all important. The dozens of people who die in mass shootings shall be considered insignificant in comparison. All civilian handguns shall have a 20cm or shorter barrels, and shall be allowed to fire in semi-automatic mode. However, no civilian handgun shall have any removable bullet clips/cartridges, and none shall be capable of holding more than 14 rounds. Semi-automatic firearms that can hold more than 14 rounds, and Semi-automatic firearms with removable bullet clips/cartridges shall be considered as machine guns. Larger magazines in rapid-fire handguns shall be thought a thing of mass shootings, armed robberies, crime gang gun battles, and collateral casualties. The clips/cartridges of the new standard rifles shall be of a bullet size and cartridge design that cannot be fed into any of the standard sizes for handguns if the bottom of the handle if it is cut off. Thus there will no longer be semi-automatic handguns with replaceable bullet clips/ cartridges/ magazines.

c/ Militia weapons are intended to mostly protect the people from coups and situations like Russia's invasion of Ukraine in 2022-4. Militia weapons shall include all other firearms, such as those with exploding bullets and machine guns (exploding bullets and machine guns are banned as civilian firearms) Civilian guns shall not have silencers, or bayonets, or potential muzzle connectors for these, or exploding bullets, or fire like machine guns. Militia and military weapons may have muzzle connectors for silencers and bayonets. The loud explosive bang of firearms shall be considered a good thing that keeps arms from being used by the wrong people. These people are profoundly afraid of the bang, that a firearm makes, while the people who are legitimate and law-abiding citizens legitimate users of firearms, these even welcome the noise of the firearm as a means of calling attention to what's going on. So while silencers clearly have a role in the militia, they should be prohibited along with machine guns for civilian weapons. It is only crooks, and the most dangerous of crooks that want to expand the conditions where they can use their firearm by using a silencer. These are the people who use silencers as civilian weapons. They're all crooks. So silencers need to be regarded like machine guns.

34/ These restrictions on fire rate and magazine capacity shall be seen as a bone thrown to the left, to build consensus. This slow fire rate barely diminishes the ability of genuine defenders to use their weapons against criminals, government overreach, and invasion, but they cut the firepower of mass shooters in crowds by around 2/3. Slower fire-rates also augur towards stand-downs of two armed people pointed at each other. instead of shooting first and

asking questions later as occurs with semi-automatic guns. Also, the people may keep their fully automatic weapons at the armory shooting ranges for no charge.

35/ We have guns for 3 different reasons, and that we should have different sorts of guns, one for each reason. And the guns should be highly developed in certain ways towards each of these 3-uses. These 3 sorts of guns are:

a/ The rifles that we use to defend against overreach by our own government. These will have no electronics.

b/ The handguns we use to defend ourselves from crime while outside our homes and safe places. These will be loaded with electronics to reduce crime.

c/ The war guns (and war systems) we use to defend our land from invading armies and discourage other nations from invading our land.

Regarding the first groups, the a and b groups, these arms will all be in the hands of the people at their homes and other places. Regarding the c-group: These weapons will all be kept in our nation's Centi-Nome armory system, a public armory system of one armory per 50,000 people. There will be military-style machine guns and other military style weapon systems like drones, and anti-drone automatic fire shotguns, and ~25mm motorcycle mounted heavy guns for dealing with light armor, for at least 7,000 people in each armory. This will guarantee at least one weapons system per 7 people in our nation.

Regarding the a/ group, it shall not be allowed for government to require electronics where the government can shut off any of our guns. We also want guns like .50 calibre bolt action rifles that can defeat body armor, and shoot from great distance, but fire slowly. This sort of weapon must remain in the hands of the people. This empowers the great legions of the people over their government, and this is why so many foreign tyrannies are so bent on taking our long guns away from us. Also, when political people focus on the weapons we used to defend ourselves against tyranny, we can be pretty sure that they are working for tyranny, or they have been otherwise corrupted by tyranny. After all, nobody needs to focus on getting rid of slow firing, long guns. To what end other than tyranny would anyone do this?

Now regarding the b-group, the handguns that people carry around to defend from street crime and to deal with people inside our their homes. This class of weapon can and should be electronically supplemented with GPS, 6 gun cams, serialized silver bullets, cellular 911 patch in. Redundant rapid ID verification via face, and perhaps holster and trigger fingerprint login. Everyone carrying a firearm around in public must to use one of these sophisticated, electronic guns. And those who are carrying other guns in public shall generally be presumed to be doing it to commit crimes, especially where these guns are loaded or have sized bullets around them that are not serial number identified. They also have to be loaded with special expensive .999 silver serial number stamped bullets with multiple sorts of nano particles for easier identification of who owned the gun that did the shooting. We will then be able to have much more relaxed universal carry rules. In other words, it will be easy and legal for people to carry an "Orwell gun" in public. But the people carrying other than Orwell guns in public, or Orwell guns loaded with un-serialized bullets shall be treated as

felons.

36/ Having slower fire rates for civilian rifles and smaller bullet capacities for civilian handguns will help assure that each shot is aimed, and also help reduce the impact of people going crazy with a gun. It also helps defuse situations where people are holding guns on each other. This is because after one side shoots, the other side will almost certainly survive and shoot back. So the best choice for survival with slower firing guns is to back apart. However, if there are two people holding semi-automatics with large clips/magazines on each other, the best survival choice is often to shoot all 7 or 17 rounds as fast as possible.

37/ Without a special permit issued by the person's county, those under age 25 who are neither employed 3/4-time, nor a full time tertiary school student, shall be prohibited from owning or carrying arms.

38/ The Senate shall encourage the development of smart guns as discussed herein, guns with technology like GPS tracking, user face recognition, fingerprint recognition, ring-chip recognition, multi-video cameras, and public recorder live backup that comes on when the firearm is de-holstered or touched. These smart guns shall be subject to live monitoring by the recorder's office when de-holstered. Some smart guns may also fire as a full semi-automatic, when the recorder or police activate this function. For diffusing gun-on-gun situations, it shall be thought a good idea that nobody knows whether the other side can or cannot fire full semi-automatic, or full automatic like police and deputy guns will allow.

39/ Some civilian weapons should be high powered and have armor piercing bullets. It is important that the people have adequate arms to defend against oppressors using body armor and armored vehicles. Otherwise they can be oppressed by people using armor. However, the ability to rapidly fire large numbers of un-aimed bullets in some general direction, like what machine guns do — this should be considered too sloppy and dangerous for civilian weapons used in a community. We shall instead require that all shots from ordinary civilian weapons be aimed. And we shall accomplish this by having a maximum fire rate for civilian weapons nationwide. Some nations that use our constitution may have faster fire rates for civilian firearms, others may have slower fire rates, perhaps as slow as one shot per 6 seconds. Other nations that copy our constitution may only permit super-slow single shot firearms that must be reloaded after each shot by hand.

40/ All existing firearm that have replaceable bullet clips/ cartridges that can fire, or can be easily made to fire faster than one shot per 0.66 seconds must be sold to government for their prior relative value within 5-years. After this, all such rapid fire weapons shall be considered as machine guns, even if they are only semi-automatic. If these machine guns are going to be remain under private ownership, they must be either kept in a Centi-Nome armory and range facility, or be used by police, Senators or deputies. Police Senators and deputies may use semi automatic firearms with up to 20 shots in a clip. There shall also be no limit on fire rate or cartridge size for military or militia firearms kept in the Centi-Nome armory system.

41/ Because all semi-automatic guns (one trigger pull, one shot) can be turned into machine guns by means of a trigger

strap, and because 100 bullet magazines are relatively easy for people to make at home, all semi-automatic fire arms (except police/senator/deputy weapons) shall be re-classified as machine guns.

42/ Civilian weapons must be designed so they are very hard to modify and boost the fire rate without reworking the entire mechanism. The trafficking in machine-gun conversion hacks shall be considered the equivalent of trafficking in machine guns.

43/ Police/Senator/deputy firearms shall:

a/ Permit semi-automatic fire at faster fire rates to keep the police/Senators/deputies safe, and also to reduce the number of firefights with these people.

b/ Use electronic ignition and have various programmable fire patterns such as 1 shot at a time, or 2 shots per trigger pull.

c/ Be allowed to have larger magazines.

44/ All carry firearms must have special bullet sizes, and the owner's permit number must be stamped on both the bullets and shells. All smart firearms shall only use bullets made of .999 pure silver. Carry firearms ammunition shall also be required to have harmless nano-markers in the gun powder. A statement must be filed within 48-hours for each public carry firearm bullet fired, unless this is impossible. Only registered bullets may be carried with public carry firearms. Carrying unregistered bullets may be considered the equivalent of carrying an unregistered firearm. There shall be no tracker apps for people carrying arms, for fear this might get quietly hacked.

45/ All "Orwell guns" must have GPS, compass, audio and multi-video recording that all come on when the firearm is de-holstered. These must also buffer their streams if they are out of range for live backup, and auto-update to the recorder when they are in range. There shall be no user-operated delete function for the recordings of smart guns, and even the recorder's office cannot delete the de-holstered video logs for these guns. Also, smart carry firearms may be required to have user face recognition, and remote shut-off. However, except for smart "Orwell: carry guns, the people shall never be forced to use firearms that can be remotely turned-off. Except in public carry situations, "dumb" mechanical guns shall always be allowed, so long as they conform to standards about fire rate and magazine size.

46/ There should be a presumption of guilt if a required gun cam, or police cam, is non-functional. There shall always be a 5 minute delay for turning-off a gun cam, or a police officer's cam.

47/ Regarding all national parks and national wilderness areas in the nation: All citizens shall have the right to carry a special public carry firearms loaded with registered bullets if there are bears, mountain lions, alligators/crocodiles, or illegal border crossers, or border desperados, or border gangsters, or people repeatedly go missing.

48/ Except when a county Senate calls the people to arms, the possession of militia or military weapons off base, or outside a Centi-Nome armory, or while not on militia, military, or police duty shall be a felony.

49/ It shall be a capital offense to use or hold militia or military weapons such as a machine gun in the commission of a violent street crime such as a robbery, assault, or gang gun battle.

50/ All militia weapons shall be stored in Centi-Nome armories. Militia weapons shall not leave the armory facility except for militia training purposes, or in a call-to-arms. All armory weapons shall be assigned to specific individuals and militia units so that with a single broadcast call-to-arms, the Senate may rapidly arm all militia units. Most arms shall kept in armory bays like a 1-car garage made out of tilt-up concrete panels. This is so our armories are harder to knock-out with bombs or missiles.

51/ Only the militia shall be allowed to move, check and maintain their own armory weapons in their armory. Indeed, the servicing and maintaining of weapons shall be an important part of militia service. No other people including the Armi shall do this. And certainly, police, county government, and especially the national government and its Armi shall have nothing to do with the people's armory arms. The Armi shall however conduct annual inventories and operational checks (in the presence of the local militia who are supposed to record the entire inventory audit. All armory rifles shall all have a scope, silencer, 40-shot clips, and an automatic fire setting that exceeds 9 shots per second. Civilian rifles shall not have silencer threads. All armories should be designed so they are hard for 300 men to take, but easy for 3,000 men to take.

52/ If the nation ever comes under large scale attack by an enemy using tanks and other armor (such as we saw in Ukraine in 2022-3), then anti-tank missiles and anti-tank mines shall also be released to the militia. If the nation will come under low-altitude air attack, then low altitude anti-aircraft and anti-drone missiles shall be released to those militiamen trained in their use. All armory missiles, aircraft, drones, and military vehicles shall be equipped with a password verified transponder system to prevent friendly fire. The armories shall also have drone signal jammers, mortars and smoke projectiles. All townships shall have shielded, multi-source, full-spectrum high-powered fast-modulating signal jammers as an anti-drone civil defense matter. Signal jammer tech shall be regarded as like firearm silencers. These are all things we will greatly want in time of war, but things that are also problematic in times of peace. Therefore the Senate shall have great freedom in making and trying policy for civilian possession of silencers, machine guns, weaponized drones, and signal jammers.

53/ A call-to-arms and opening of our nation's Centi-Nome armories shall require a 3/4 overmajority of the relevant county Senate for that county. Also, it shall be noted that neither the national Senate, nor any emergency body, nor any other part of Government shall have any jurisdiction in cancelling a county's call-to-arms and opening of its armory. Also, whenever the militia is called to arms, or when it has its 6-annual meetings, this shall supervene from above for all other societal requirements including employment, school, and court dates. All shall go on hold.

54/ Whenever there is a call to arms, we shall allow our militiamen to take their armory weapons home and keep them. When the crisis is declared over, our militiamen must return their weapons. Again, all Centi-Nome armories are under the county and Cent-nome they are located in. Each county shall decide on opening up its own armories.

55/ The motto of all Centi-Nome armories shall be: "The

bigger the crisis, the more the people need to be armed". Whenever any of the following nine things a-h happen, or seem about to happen, each Centi-Nome armory shall open its doors to the militia men of that Centi-Nome, so everyone trained to bear militia weaponry in time of crisis can come and arm themselves:

a/ Invasion.

b/ Violent seizure of power.

c/ State of emergency declared.

d/ Epidemic emergency, or lockdown.

e/ Catastrophic natural disaster

f/ When martial law is declared.

g/ When emergency bodies come to power.

h/ When special powers are given to government.

56/ We shall honor the little-known words of Mohandas Gandhi, the luminary of non-violence: "Among the many misdeeds of the British rule in India, history will look upon the act depriving a whole nation of arms as the blackest."

57/ There shall be one Centi-Nome armory per Centi-Nome nationwide. In times of invasion or call to arms, the army shall normally re-supply the militia through these points, unless there is a good reason to do it elsewhere.

58/ All armory equipment get temporarily checked-out in all calls to arms by using a nationally cloned app on a tablet with multiple video cameras watching each check-out line. The guardsmen checking out equipment, including weapons hold up their A4 video ID sheet as they appear on video. This is done in a similar way to voting. It is thought that this is the fastest and best way to hand out weapons, uniforms, body armor, packs, combat kits, etc.

59/ The process of the militiamen documenting the rapid and orderly check-out of Centi-Nome armory arms by militiamen to militiamen should be regarded as one of the militia's most important bi-annual drills (twice a year). Next comes the drilling of the Armi resupply request and fulfillment process for militiamen. In other words, job #1 is that everybody is totally drilled on how to get their militia guns, and packs rapidly in a call to arms. And job #2 is that everyone is totally drilled on how to request re-supply and obtain re-supply from the armi. There shall also be a variety of drill for dealing with lots of injured people at once, There should also be an hour of target practice, and a half day of paintball war-games twice a year. There are also classes in strategy and first aid. Every day the militia meets, the Armi shall provide high quality free chicken and fixings barbecue starting at 4:00. BYOB allowed. All military paintball shall include a realistic simulation of limited ammunition situations. Some people will have 20 paintball rounds and some will have 300 paintball rounds.

60/ There shall be no national administration that has any authority or control over our nation's militia or its armories, and especially how and when they are opened. The only exception is that the army will employ people that make sure that all the weapons are working properly, and none are missing, and all other supplies like ammunition have not gone bad. Also, the militia shall run the system for handing out militia weapons and supplies during a call to arms. However, the army will audit the records in both drills and all real call to arms situations.

61/ To reiterate, armory opening is exclusively a decision of the local County-Senate. The opening of armories shall be

exclusively a thing that occurs at the county level by the people of a county who feel unsafe for some reason, and call everyone to arms. It shall be thought similar to the governor mobilizing the national guard under the old system.

62/ The militia and its armory supply system shall be thought our greatest defensive weapons system. For who can invade a nation so well prepared for and defended against foreign invasion?

63/ If any Government people start talking about nationalizing the militia armories, this is definitely a thing that narrows power in our democracy. This sort of talk should be regarded as an evil and democidal thing that is coming from the enemies of freedom. It shall be regarded as a thing that never has any reason to exist. Nobody ever has any reason ever to say that the armory system needs to be nationalized, or more centralized, and people who talk about this should be thought to be traitors working for the enemies of freedom. Everyone is advised to stay far away from this mind-space or be thought a traitor.

64/ All law-enforcement, and military must do defense exercises with the militia twice each year, so that a brotherhood is established.

65/ There shall be an absolute and total right to bear arms, and all of those who publicly say there isn't, or that the right to bear arms shouldn't exist shall be imprisoned for 1-years for each time they say there isn't this right, or if they argue in public that there should not be this right. This rule shall be enforced without exception, even if the person is joking. Everyone over age 16 shall be imprisoned for 1-years for each time they speak out against the people being armed. It shall be considered easy to charge anyone including Senators with disarmament treason when they propose, or support, or participate in the disarmament of the people, or the rounding-up civilian firearms under any circumstances or pretexts including shifting more sorts of arms from being civilian defense weapons to being armory defense weapons. Police may disarm people who are acting like they may hurt themselves or others, and they may disarm the people they arrest for just cause, and they may seize illegal weapons possessed by foreigners, felons, minors, and demented elders when they encounter them, but aside from this, there shall be no right of police to take any arms away from the people. Whatever any law or rule says, police shall not have any right or immunity when they improperly disarm the people, and this especially for police that go door to door rounding up the arms owned and possessed by the citizens of our nation. Whenever this rounding up of arms occurs, these people involved should be regarded by everyone as traitors and spies and dealt with accordingly. There shall be no situation at all, where our nation's government or our people's military, or militia, or police will be going around disarming the citizens of our nation. Military leaders who command their men to disarm the people shall be regarded and treated the same way as it they told their men to fire on their own people, for the effect in both cases is identical. Disarming the people of their civilian arms shall not be regarded as a lawful order, in the same way that orders to fire on your own people is not lawful. There shall be no cases of insubordination or punishment for not following any military or police order that leads to the disarming of the people, the

citizens of our nation. Senators and others, including military personnel and police on orders who are involved with round-up the firearms campaigns may be tried for capital democide by government and later governments and later generations. There shall be no statute of limitations for charges of rounding-up the guns. Everyone in the future shall be hereby warned, stay away from this area, because otherwise you may be considered a traitor and executed for it.

66/ The mass rounding up of firearms, and even the slow erosion of firearm rights shall be always considered unconstitutional. It shall be a right (and indeed a public duty) for all citizens to stop this sort of rounding up firearm activity with deadly force. Those who fire on the men rounding up the arms of the people should be regarded as heroes and pardoned. Few acts will have a greater impact on the future of freedom than killing those who go around disarming the people (including those doing this on color of authority). This mass rounding up of firearms shall be regarded as a distinct line on the slippery slope between freedom and tyranny. And this distinct line involves only one thing, the coercive disarmament of the people. If there is any disarmament, then there is tyranny, and the people must act to prevent tyranny. Also, this constitution says that where the people are forcibly disarmed, that shall be regarded as prima facie evidence of tyranny.

67/ No police oath or military oath shall include firing on their own people, or disarming their own people. All police and military oaths repeated at the start of each day shall include the text: "I promise not to fire on my people when disarmed, and I promise not to disarm my people."

68/ All local police departments and Centi-Nome armories shall offer civilian firearm lockers free of charge to their community. These lock-up weapons must always be returned immediately upon request, unless the owner is clearly intoxicated, delusional, fighting mad, or is wanted by police. All Centi-Nome armories shall keep a supply of food, water purification tablets, bio-protective garments, emergency medical supplies, fuel, water pumps, and the like. These disaster items shall be kept in kits on pallets in containers so that they can be easily sent around the nation when they are needed. These armory/disaster supplies shall be of a particular well-known design and style worldwide with all possession and commerce restricted. Nobody can buy or sell or hoard the public emergency goods without risking charges of public misappropriation.

69/ The Senate shall create standards for an opt-in county recorder system logged entry/access system for both apartments and for gun safes. In all cases, the system, the government, and the system administrator shall not have locking or unlocking mechanisms for the door, but shall only record who is opening the door and either entering or removing a firearm or other valuables that people take out. To encourage firearm ownership, government, shall certify, all firearm locking devices, as being a safe harbor for third-party firearm use or not.

70/ All flame throwers and drone delivered weapons systems shall be considered militia weapons.

71/ It shall be a felony to buy firearms for other people not qualified to buy arms. Straw-man gun buyers, and illegal arms merchants may be considered co-conspirators in the

crimes committed by the guns they sell or give away.

72/ Theft of firearms shall be subject to triple penalties. Theft of many firearms shall be considered akin to terrorism, and those caught in possession of large numbers of stolen firearms (More than 6) should generally get life in prison.

73/ The defensive power of firearms shall not be reduced by any purchase waiting periods. However:

a/ First time firearm owners may be required to complete up to 8-hours of video education on matters related to firearm ownership, and 8-hours related to firearm carry if they will be carrying arms. They may also be required to fire up to 50 rounds at a range.

b/ Government shall prepare detailed media about a wide range of firearm subjects like endangering bystanders, bullets going through walls, firearm kick, accurate shooting, and basic rules of firearm liability.

74/ We shall not discourage civil and national defense by taxing the cost of weapons or ammunition. All civilian firearms shall be free for civilians to own and keep. Government shall be prohibited from imposing any form of or tax, fee, payment, cost, charge, or insurance requirement, or any sort of complex registration or licensing process for either owning, buying, selling, or transferring, registering, firearms or ammunition. Also, current gun prices are far too expensive relative to other goods of similar complexity, composition, and weight. The Senate shall investigate why this is so and make it a top priority to keep the cost of quality firearms down through various means including the IP ubiquitization process.

75/ Transactions involving domestically made firearms and ammunition shall always be exempt from all tax, fee, and insurance payments. However, transactions involving foreign made firearms and ammunition shall be subject to a national protective tariff assessed at 60% of their market value at first sale.

76/ In the places that allow fireworks, these may only be used from 1-hour after sunset until 2-hours after sunset on July 4. And on New Years Eve from 11:00pm to midnight. This is so we will begin the new year with peace as our first step. Fireworks and firecrackers shall be prohibited at assemblies or protests. June 19, is supposed to be more of an eating day (with perhaps black music and soul food).

77/ Regarding liability for weapons and crime, the following sorts of cases shall be off limits in the court system:

a/ No weapon manufacturer or legal weapon seller/ dealer shall ever be held responsible (either criminally or financially) for any weapons they legally sold or supplied, To do otherwise will allow hostile foreign interests a path to eliminating our arms manufacturing industry with lawsuits.

b/ No property owner or tenant shall ever be held responsible in any way (either criminally or financially) for random third party crimes or violent acts by third party criminals that just happened to have occurred on their land, or their premises. Even if they always left their door or gate open, or it was dark or light, or the place was a hangout.

c/ When a crime victim or bystander (including police) is allowed to shoot a criminal dead in self-defense, or community self-defense, there shall be no money court liability for either shooting that person dead, or for only injuring that person.

78/ When Non-felons kill formerly convicted felons in confrontational situations that are partly instigated by the convicted felon, the maximum penalty shall be 5-years in prison. Also, when non-felons kill people while they are apparently committing a felony, the non-felon shall remain free, pending trial.

79/ So that the people may benefit from inexpensive weapons, large numbers of interchangeable repair parts in war situations, and firearms that are clearly legal or not, the Senate shall establish standard public domain designs for a number of extremely mass-produced civil defense firearms, and defense products including:

a/ Two or three easy-to-conceal civilian pistols that cannot be easily modified to accept bullet clips.

b/ Two or three civilian rifles with a scope and a maximum possible fire rate no faster than 0.66 seconds per shot. Because of the slow fire rate, this rifle shall allow for large clips/magazines as discussed herein.

c/ A semi automatic "assault" rifle with a scope for our militias. This rifle has neither a slowed fire rate, nor a limited magazine size. The militia, the army and the marines all use the same rifle because it is very important for unity that everyone in the military and militia use the same main rifle with the same parts, and fire the same ammo. Also, if practical, the ammo and clips for all the civilian and militia rifles should also work in the military and militia rifles as well. All of these rifles shall use the same caliber a bit more powerful than a .556 "regular" rifle bullet.

d/ A .50 calibre rifle with a scope and optional tripod. This rifle uses bullets for sniping and to defeat body armor and lightly armored vehicles.

e/ A 30mm rifle with a scope and tripod. This uses "extra large" bullets for lightly armored vehicles and for robots. The armory system shall have a sufficient quantity of .50 cal and 30mm depleted uranium rounds. These are mounted into motorcycles and are inserted under the seat and above the rear wheel, then under the gas tank, then above the spread out handle bar bracket. The barrel is pulled out and placed on a tripod created by the motorcycle's oversized kickstand(s). It should take no longer than 15 seconds for one man to slide out the gun and put the gun into deployment and 15 seconds to put it back. Soldiers just put their kickstand(s) down, pull the gun out of the sleeve that runs through the bike and put it on the kickstand tripod firing pin. This is the highly mobile armory weapon system for eliminating light armor from the battle field.

f/ The motorcycles are gas hybrid for sneaking up better.

g/ Standard designs shall not be required by the people, only recommended for the benefit of parts interchangeability in a crisis, and ease of service. The IP for all civil defense weapons and weapon systems shall be ubiquitized. There shall be no privately owned IP protection for official standardized national weapon systems. They must all be fully ubiquitized.

h/ All bullet sizes shall be by millimeter, and no longer shall we use caliber in describing bullet size. All shotguns shall be described by the gauge only.

i/ The absurd variety of hunting rifle bullet sizes appears to be something done to help sabotage and disarm the people. We shall now go in the opposite direction and have only 30

different bullet sizes for our hunting rifles. The alphabet soup of hunting rifle sizes shall be changed into 6 groups small to large: A, B, C, D, E, F. In each group there shall be 5 standard bullet sizes small to large: A1- A5, B1-B5, C1-C5, D1-D5, E1-E5, F1-F5. The A bullets are for small birds and small rodents. B bullets are for medium animals like skunks and foxes, C bullets are for deer sized animals. D bullets are for elk sized animals. E and F bullets are for wild boars, bears, bulls, etc. It is very important that we make bullet sizes easy to learn, easy to grasp, easy to look for, and as idiot-proof as possible with regard to humane hunting, people getting shot through walls, for the small person and big-kick gun problem, and other problems of improperly sized firearms.

80/ All dangerous animals such as polar bears, grizzly bears, wolves, alligators, mountain lions, coyotes, sharks, pigeons, venomous snakes, and other dangerous animals that go around human communities and beaches and waterways, all of these must be put down. And where they are living around remote human homes and farms, the populations of these animals needs to be brought down to no more than 1/2 of the natural levels, so the predators are generally well fed and less inclined to cause trouble. Where people need rifles to prevent wild animal attacks in wilderness areas, they may carry rifles, even if it is a national park. Coyote populations should be reduced to less than 20% of maximum levels.

81/ It shall be the official policy of our nation to despise all forms of armor for its centuries-old role in disarming the people. However, body armor cannot and shall not be prohibited because this is not a good solution. Therefore, the legal system and police shall not in any way discourage, discriminate-against, or punish those who use or carry ammunition rounds that can defeat body armor, or hollow-point rounds any more harshly than ordinary rounds. We do this because:

a/ Rounds that can defeat body armor are needed by the people so their arms cannot be defeated by body armor.

b/ In some situations it is preferable to use hollow point bullets that are less able to penetrate thin walls.

82/ The right to bear arms does not include:

a/ The right to bear arms in an assembly or protest.

b/ The right of non-citizens, minors, drug users, alcoholics, exhods, and some immigrant citizens to bear arms.

c/ The right to bear arms at other people's residence property without an invitation. However, all private property (except people's homes) that invites everyone to visit shall be considered public property with regard to firearm carry.

d/ The right to approach people and initiate contact while openly carrying a firearms.

83/ Ammunition shall generally not contain toxins except those commonly found in lead, steel, brass, bronze, copper, depleted uranium bullets and gunpowder. So long as the bullet diameter is not prohibited, all calibers, grains, and all types of bullets (except tumbling bullets) shall be equal under the law. Tumbling bullets shall be prohibited in civilian arms because of how they ricochet more and inadvertently harm others more. Civilian firearms shall not use explosive projectiles, or be larger than 20mm (weight 120kg+). When people use large caliber and magnum or high grain bullets in time of peace, they may be held criminally responsible for

collateral injuries to people behind walls. Again, 20mm guns are an important way for the Militia to prevent invasions by people using lightly armored vehicles.

84/ No company or supplier shall ever supply more than 11/200th of our nation's gunpowder, ammunition, or any key components of these. There shall be no importation of ammunition or ammunition components, except where a 5% sales tax is paid.

85/ All cockpit crew and air marshals on commercial airline flights shall be armed with low grain quick-kill poison darts that will kill, but cannot pierce the body of the aircraft. It shall also be possible for the cockpit crew to fire out from behind their door. All flight attendant crews shall be at least half male, and all flight attendants shall take a course in subduing dangerous passengers. All male flight attendants shall carry a code activated fish-hooks-in-the-skin telescoping taser wand and 3-clip ties. All aircraft meal stations shall have a 10m roll of duct tape. Full time police officers under age 40 shall fly free up to 2 per flight, and these shall be issued aircraft taser wands before boarding, which they shall return. The taser wands shall have two settings, one that is low and the other that immobilizes anyone, although up to 5% of the people it is used on may die. If there are air marshals, these shall be required to document at least 160 hours per teneth on commercial airplanes.

86/ Except when there has recently been, or there is expected to be gun violence, or rioting, or invasion, or terrorism threats, or that particular district has a huge amount of crime, or a fugitive situation exists, or there are animals to be shot: Long guns shall not be carried around in communities or in businesses open to the public. The minimum overall length for a long gun shall be 76cm, and the minimum barrel length shall be 49cm. All shotguns firing multiple projectiles at once must obey the rules of long guns. There shall be no shotgun pistols or bang sticks.

87/ Everyone holding or even touching a firearm thought to be unloaded must obey six important safety guidelines that are intentionally a bit redundant:

a/ They must immediately check for loaded rounds themselves when they pick up the firearm.

b/ They must never point the weapon at anyone or anything they don't either intend to shoot, or anyone they might shoot. Even if they know for a fact that the gun is unloaded, they must pretend that the firearm is loaded.

c/ They must treat all firearms as if they are loaded. Even if they know the firearm is unloaded, they must pretend that the gun is loaded.

d/ They must keep their finger off the trigger until they have decided to shoot.

e/ They must know their target, what is in front of their target, what is next to their target, and what is behind their target.

they must also know what behind what is behind their target.

x/ because these rules are law, it shall be the presumption of the courts that each person holding or touching a firearm shall be responsible for any injury or death resulting from any shooting, as if they knew the weapon was loaded with lethal rounds. This shall be so whether the firearm is thought to be not loaded, or loaded with blanks, or jammed, or a toy firearm.

88/ People shooting into the sky or distance shall be fully

responsible for any injury or death as if it was intentional.

89/ Firearms are not toys, and toying with them shall never be an excuse for any crime.

90/ Everyone entering a posted hunting area or shooting range must wear location tech, and all guns must have an electronic safety alert system.

91/ In order to graduate secondary school, each student male and female must take a one-day firearm safety and legal responsibility class where they must fire at least 10 rounds from a center-caged safety-rifle and 10 rounds from a caged safety pistol at a firing range. Those who refuse to fire shall not graduate secondary school and they shall not vote in our nation's elections.

92/ The right of the people to use, possess, and trade in body armor shall not be restricted by government in any way. The people shall be allowed to use all forms of body armor used by police.

93/ There shall be nothing wrong with civilians that have large, secure and hidden armories of conforming civilian weapons. If Ukraine had collectors like this, they would not have needed foreign arms so much in 2022-24. There shall be no special permitting requirements for second, third, fourth and subsequent firearms owned by an individual. Also, these arms shall never be confiscated by government in time of firearm crisis, but are supposed to be sold at an extreme profit by the collector to individuals in time of firearm crisis.

94/ We must ignore the propaganda media and always remember that the #1 lesson, the only important less of the Warsaw uprising was: "No Guns, No Uprising".

95/ We shall always remember how during the American Revolutionary war, the American side never have enough guns and ammunition until the very end when We the sufficiently armed people forced the British to abandon their attacks on us. Also, the main reason why the war dragged on for 8.3-years was lack of armaments for the people's militia to use.

96/ In this constitution, the term "We the people" means "We the armed and empowered people, and you the weak and powerless tyrants and invaders."

97/ For reasons stated elsewhere herein, all firearms are essentially anonymous with regard to ballistic records. So if we are going to have anonymous firearm ownership, we shall have buying and selling of firearms as follows:

a/ All firearm vendors shall regularly meet at gun and tool shows in either warehouses or tents where police check IDs and make sure that only people allowed to have firearms are allowed entry.

b/ All of the stalls are supposed to have double white sheets stretched above them so that micro video cameras cannot work from above. There may be styrofoam sacks between the sheets for infrared cameras. Also everyone is supposed to leave their electronics at home so they can't be tracked by their electronics.

c/ Everyone is supposed to wear all black and bring a Guy Fawkes mask, and put this mask on inside the show at some point. They are supposed to leave wearing this mask and get dropped off and picked up by someone else of practical.

d/ Everyone also brings a box or bag of wood scraps that gets changed out when they buy a firearm.

e/ Once inside the show they buy and sell all the firearms

they want for cash. If they want, or cash does not exist, they can use e-money to buy firearms or tools that cost the same exact amount as the firearms. Many people who don't have firearms will go to the shows and buy their tools there because it is a socially responsible thing to do.

f/ In this way, we will have sales of firearms for people who are allowed to buy arms. We also have firearm purchases that are anonymous.

98/ Only the Senate can make policies about firearms. If the Senate decides to have a firearm ownership database:

a/ The database shall be kept by the county recorder system. It shall not be possible to make more than one search at a time.

b/ Only police officers shall be allowed to do searches.

c/ Each search shall be tied to the names of the police officers involved, who may only make a limited number of searches.

d/ In general, enquiries shall on made from a ballistics sample.

e/ It shall be a treasonous life in jail sort of thing to dox gun owners and to traffic in the data on gun owners as this greatly weakens the defensive posture of our nation.

99/ All transaction services providers and retailers shall classify purchases of firearms ammunition and tools as tools or hardware. We do this to protect the privacy rights of gun owners from data leaks and hacking. If the Senate decides to have a firearm ownership database: Government shall be notified of gun purchases, but everyone else must mind their own business, and it shall be a felony to aggregate information about who owns guns and who does not. Furthermore, it shall be a crime for either fictional citizens or government to discriminate against firearm owners and gun buyers in any way.

100/ We shall learn from Ukraine. All militiamen shall be issued high-quality body armor and ballistic helmets. These shall be kept in the local armory in the name of the militiaman with their firearms. Militia helmets should be considerably heavier and stronger than military helmets. Everything that favors defenders augurs against invasion and war.

101/ Regarding snipers and ambushes:

a/ The media is oddly biased against these tactics, so they must be a good idea. There is nothing shameful when free men, defending their land from tyrants or empires, snipe and ambush their invaders.

b/ Nations that have a well-armed civilian sniper corps cannot be invaded without heavy casualties.

c/ Having a pre-armed civilian sniper corps completely transforms what it means to invade and occupy another nation. Without snipers, invasion is relatively safe and easy, with them, it is the opposite. Snipers thus make every nation much more invasion resistant at a very low cost.

d/ We shall give everyone in the nation's militia a synchronized shooting app, and low-cost hard-wired decoy antennas that plug into a standard phone plug. The app uses mesh networks. There shall be penalties for using the militia networks for commercial or unimportant messages. It will be a bit like pulling a fire alarm without good reason.

e/ Each militia-leader shall get a direct to satellite communication device, and each shall be in charge of

collecting the weapons and ammo bundles of the 9 others in their militia platoon. The militia-leaders then distribute these arms to their men, some of which may come and help carry supplies away from the armory re-supply point.

f/ Most armories will have a 24hour police stations at their entry, or be designed in such a way that one cannot enter the armory without going through the police station and verifying identity. Every two Nomes shall share an armory garages for the arms and resupply of 70+ men.

102/ The designs and standards for the national standard militia firearms shall be openly elected and recorded by the militia and the county recorder system on video with all militiamen voting in the normal way or abstaining.

103/ When government updates the firearms of the nation, it shall not buy back guns. Instead, it shall replace the old sort of arms with a new sort of ultra-mass-produced firearm that must be made from the best steel, using the best manufacturing practices, the highest standards, and highest durability, and the most superior firearm design. These new arms shall be made in the tens of millions, by many manufacturers, so competition will assure low cost and high quality. Government shall also assure quality through spot checking. Militia men may also check in addition to government. The recovered arms shall be given away to arm other nations.

104/ All new civilians firearms shall have a variety of connection points for adding various sorts of technology such as scopes, fingerprint locks, combination locks, firing gimbals, mesh network phone/ gps, and especially laser sighting. Laser sighting shall be regarded as an important technology for militia firearms because it helps with fire allocation and thus it magnifies the power of our militia firearms. Also, the commander should be able to flip on the lasers once the targets are in position for an ambush, so the attackers will grasp how outnumbered they are and surrender. This helps massive defense forces to win through intimidation, without firing a shot.

105/ The old replaced arms shall be kept by the nation's 5,000 Centi-Nome armories. As needed, these shall be handed out in the many oppressed nations of the world, such as Cuba, Burma, Iran, Corsica and Hong Kong. Until these arms are either used, sent abroad, or declared obsolete, they shall be kept, and kept from rusting by the nation's militia managing the nation's Centi-Nome armories. Each armory shall have an attached firing range that will charge nothing to use.

106/ Carry permits if any shall be shown on each person's driving license or ID.

107/ While some shall be allowed to carry firearms on them in public, none shall be allowed to take their firearm in hand (removing it from its holster or pocket) in public, except when the situation permits this as called for herein. Holding a firearm in an inappropriate situation shall not only be a crime, but it can get a person legally killed in self defense like Garrett Foster. Therefore going around in public with a firearm in hand shall be thought an extremely dangerous thing to do.

108/ Rifles carried in public in urban and suburban areas must be carried on the back unless they are being used justifiably in self defense, however this shall be thought to be

extremely dangerous due to the possibility of third party community self-defenders.

109/ Regarding car assaults:

a/ People who break the windows of occupied cars may be shot in self defense.

b/ Where mobs intentionally get in front of vehicles they may be run over in self defense. This must be the rule, or society breaks down.

c/ People who have entered a vehicle with their some part of their body to injure or remove an occupant, all these may be shot in self defense by the occupants of the vehicle

d/ Where people lie down or sit down on a roadway and get run over, the driver running them over shall never be at fault.

110/ Self defense (and community self defense) use of firearms in public shall normally require a "stop or I'll shoot" warning except where this is impractical.

111/ The people shall have the right to hold arms and wear holstered arms (carried openly or concealed) when they come to the door for unfamiliar people including police, so long as they remain within their home. There shall however be no special right of people to point that firearm or make threatening remarks or gestures to people who come to a person's door.

112/ Except where it is impractical, when police come to a person's home, the dispatcher is supposed to send special emergency alerts to both the land lines at that address, and all cell phones registered at that address. These calls+texts are supposed to announce the presence of the police. Then where practical police are supposed to wait 2-minutes before knocking. Police must also sound their siren immediately before entering. When police knock, they are supposed to say "police at your door", open up to reduce the potential for people getting shot. Police are never allowed to lie about who they are when they go to someone's door. Police cannot claim to be delivery men or neighbors, or anything but police. When police come to someone's door, they must always announce themselves as police, and use their police siren, if they failed to do this, they shall have no rights as police officers, even if there's just cause for them to knock on the door. The people must know when there are police at their door, and when it is criminals or other people, also the people inside, shall have a moment to go to police.gov and enter their address and see if the police are registered is coming to their door.

113/ The people shall have the right to hold arms while coming to their door until they verify that it is actually police at their door. The Senate shall establish much stricter rules for police to shoot people with a firearm in hand when police go to their homes, particularly when this happens at night, and even more so when most people are asleep.

114/ It shall not be thought a bad thing where people are afraid to break into the homes of strangers without an invitation.

115/ Un-familiar Intruders and even remote acquaintances in the process of breaking into a premises may be shot through a door/window or near the door/window by the occupants in the following circumstances for non-police:

a/ Those who are kicking a door down, or using their shoulders to force an exterior door open.

b/ Those who are using pry bars, or battering rams, or lock

picking devices, or lock bumpers to force a door or window open.

c/ Those using picks or bumping tools on the lock tumblers.

d/ Those who put their arms or legs inside another person's door to prevent the door from being closed.

e/ Those who are reaching into mail slots to try and open a door using interior knobs or levers.

f/ Those trying to break a door chain.

x/ All of these strangers and unfamiliar intruders may also be shot within 6m of the door, or inside the premises if they enter. These rules shall also apply to undercover police, and uniformed police that not sound sound their sirens and yell loudly to notify occupants that they are police before they start to break the door down.

116/ Those people quietly reaching through mail slots, windows, chained doors and similar barriers shall be considered to have already broken in to the premises. These may be shot dead as if their entire body was inside the premises. The defenders shall also be free to grab the body part inside the premises, and club, stab and slash it, as well as shooting it.

117/ Hands gently testing outside door knobs around one residence shall never be justification for violence, however it shall be a different story for hands violently testing knob, or hands going around and testing many knobs. Hands inserted inside the premises trying to actuate an inside door knob may be shot or amputated.

118/ It is recommended for the sake of safety, that people not keep bullets chambered, however, it shall not be required if they are in a dangerous place.

119/ The people shall be free to have non-Orwell guns at their house, and carry them without ammunition to the range. When people bring guns to the range that are not carry guns, they have to leave their ammunition at their place, and they have to buy the ammunition from the range. Also, they have to have an appointment at the range around the time they're carrying their non-carry firearm without any ammunition to and from the range.

120/ Where people carry non-Orwell guns around, they can easily be sentenced to to 10 years in prison, or 20 years in work camp. Where people have not graduated secondary school, or they use a non-Orwell gun in a armed robbery, the penalties shall generally be double or tripled. Thus it will be very common for thugs to be "isolated" for life on an island if they get caught. It is thought that this is the most ideal way to eliminate gun crime.

121/ The recorder system will have both lots of cameras in central areas, and triangulation audio monitoring for pinpointing the location of the gunshots and calling up video cameras in the neighborhood.. There will also be drones that can be released to follow the shots that do not link up with an Orwell gun. All Orwell guns will send lots of information about where and when they were fired and exactly when they were fired and in what direction they were fired.

122/ Where a normal person (as opposed to self-identified and siren identified police) goes to a stranger's else's home carrying a firearm and then, for whatever reason (including self defense) ends up shooting a resident of that home, the presumption shall be that the shooting/killing was premeditated murder. However where a person goes to

someone else's house carrying a firearm, and ends up getting shot upon showing a weapon or beating someone, it shall easily and generally be considered self-defense on the part of the resident. Furthermore, the defending resident shall remain out of jail pending trial.

123/ When unfamiliar strangers and conflict acquaintances visit people at or around their homes and either brandish a gun or knife or club, or they beat a resident, it shall generally be considered self defense for a resident to shoot the stranger or conflict acquaintance. Regardless, the maximum penalty for killing such strangers and conflict acquaintances under these circumstances shall be 2-years in jail. Also, where strangers and conflict acquaintances show up at a person's home, and call them out to fight with their fists or worse, and someone of the house brandishes a firearm, there shall be no criminal penalty for this.

124/ House breakers may be held at gunpoint by residents, store-keepers, their relatives, and even close neighbors upon "stop or I'll shoot" commands shouted at them. These people shall be considered under arrest until the police arrive. They shall all be expected to lay face down arms out until police arrive.

125/ Society shall regard non-lethal irritant sprays as a way of minimizing harm. Therefore, CS, CN, CR, and OC Pepper sprays shall be allowed nationwide up to 6-million SHU, and may be carried and used in self defense by everyone who has completed secondary school, and by females over age 16.

126/ Females shall have broad rights to spray strange males with irritant sprays (without warning and in the face) who:
a/ Approach them in deserted areas such as parking lots, woman's bathrooms and stairwells.

b/ Touch the female the first time they meet in deserted areas, or touch the female on other occasions without the female giving the male her contact information.

c/ Will not leave the female alone once the female has clearly asks the male to go away, or once she has communicated that she is not interested.

127/ Bear sprays may be twice as strong as human pepper sprays, but all bear sprays must come in 500ml or larger bottles that are at least 40cm tall

128/ All irritant sprays shall be sold to a single person and all shall contain a unique combination of nano-markers.

129/ All irritant sprays shall only be sold by government and shall be taxed so that they cost at least 8 hour's wages per spray bottle. If the irritant spray is not used, and returned, the taxes shall be refunded, or credited to a new bottle.

130/ People shall be free to use irritant sprays against dogs that charge at them or snarl ferociously at them in public areas.

131/ Unarmed security may carry irritant sprays like anyone else, however they shall pay for the misuse of irritant sprays like anyone else.

132/ Where irritant sprays are used offensively in the commission of a physical assault, the penalty for the assault shall be doubled. Where irritant sprays are used defensively, the penalty shall not exceed a 30 days of community service.

133/ Victims and third parties shall have broad rights to use spray irritants, and to use tasers to:

a/ Break up fist-fights.

b/ Stop violent crimes.

c/ Stop grab and run criminals.

d/ Stop non-compliant shoplifters from getting away once they have exited a store.

134/ Where tasers are used around flammable liquids, the person using the taser (especially police officers and private security officers) may be charged with arson for causing burns to the person tased. It shall be considered second degree assault to taser people in the face neck or crotch area.

135/ Where a single police officer encounters a person threatening them with a taser, they may shoot the person with their firearm because of the risk to the police officer. However, where multiple police officers are present, there shall be no right to shoot a person with a taser. Police shall not use tasers on people in busy roads, or raised places, or other especially dangerous places.

136/ Except for Orwell guns, it shall be a felony, to be in public carrying a firearm and masked. There shall be no right to open carry weapons around in public with one's face masked. This includes potential weapons such as skateboards, sticks and hammers. This also includes police, but not police and other justice system workers escorting arrested people involved with organized crime violations. People who are masked or have a helmets or other head/face coverings and have a firearm in hand may be presumed to be about to commit a felony and shot in self-defense.

137/ Molon Labe shall be the prime mantra of all free people who vow to defend their right to be armed. (μολὼν λαβέ is the famous Spartan Greek phrase "come and take them"). Many patriots should carry, bear or wear these words on Independence day. (The words and not necessarily the actual arms.) This constitution is of the opinion that:

a/ Nothing helps prevent invasion and war like an armed people.

b/ Nothing helps prevent the rise of tyrannical government like an armed people.

c/ It is best if we always remain skeptical of claims that mankind has evolved to the point where arms are no longer needed. Even after centuries of peace we must always be prepared for a climate emergency, like another Tambora eruption. For what happens to us if there is a terrible world famine when the sky stops working for a couple years? What happens if we have not guns them?

d/ Most of the people in politics or the media speaking out in favor of gun control are either useful idiots or traitors.

e/ There is an obligation upon all good people to completely shun those who push for even gradual disarmament, for this is mostly the domain of useful idiots, traitors and bribe takers.

x/ Plutarch attributed the phrase Molon Labe to King Leonidas of Spartan Greece. "Lion-ideas" said these words in response to the demand by Xerxes, emperor of the Mideast — Xerxes with his immense multi-year hoard of migrant invader desperados. Xerxes demanded that the Spartans surrender their weapons. Molon Labe or "come and take them" or "come and get it" was the Spartan response.

138/ All Illegal non-governmental "checkpoints" where money is extracted by a cartel/ mafia people shall be regarded as armed robbery under the law. Regarding armed robbery and mafia checkpoints: If the police do nothing, the correct

response for the people is to come in their great numbers on these men and shoot everyone involved. People may also run-over the highwaymen/ train robbers/ water pirates with their vehicles, or kill them in other ways. Also, our government shall be thought free use air strikes against highwaymen, train robbers, pirates, and organized criminals around the world.

139/ All Orwell guns shall have the last 6-digits of their gun's serial number on both sides of the gun barrel in big fat numbers and bright orange. It will be just like with vehicle license plates. Also, when random people can tell police a person's 6-digit firearm number, that should have a strong bearing in all brandish cases.

140/ In times and places of widespread rioting, there shall automatically be both open and concealed carry for firearms. The threshold for this shall be 1,000 killed nationwide in either rioting or political violence. After this there shall be expanded carry rights for each year the threshold is met.

141/ It is very important that we put an end to our divisions over firearms and also about abortion so we can unify our nation.

142/ All civilian firearms shall be free of charge for civilian to own, register, and keep as enumerated herein.

143/ There should be a blood alcohol level where people are not allowed to hold a firearm except in response to a clear crime. To start, this blood alcohol level shall be the legal level for driving. Then we shall experiment with allowing higher blood alcohol levels.

144/ When people sell their firearms, they shall be allowed to register the sale with the county recorder system for a safe haven from responsibility after the sale.

145/ Leaders that chip away at our 2nd amendment rights should be thought to be corrupted by foreign governments on that evidence alone.

146/ This constitution declares: "Shame on the Australians and Irish for letting foreigners corrupt their governments and take away their guns." When Australia and Ireland emulate this constitution, it is strongly recommended that they arrest all their government officials involved with outlawing and rounding up their guns in recent decades. These should sit in jail pending trial for capital treason. It is strongly recommended that these people be executed to send a message far into the future.

147/ The people shall beware the situation where the government says oh, you can just keep your arms at the armory and we will take care of them. This is expressly warned against in this constitution and people talking about this should be tried for attempting to disarm the people. Government shall never say to the people that they must keep their personal civilian weapons in the armory.

148/ There shall be no guns for anyone who ever heard voices, or for people with PTSD.

149/ Fictional citizens, store owners, and owners of private property open to all without a fee for entry shall not be allowed to establish firearm policy for their premises, but their premises shall be considered public property for the purposes of free-speech and firearm possession.

150/ Government shall aim to have at least 500 firearm and 200 ammunition makers in the nation, with no one company supplying more than 1/2% of the nation's firearms

or ammunition manufacturing needs. Also, each county must have a certain amount of ammunition making equipment at its armories.

151/ If any foreigners ever comes to our land and say that they have jurisdiction or rule over us for anything at all. The right thing for all of us to do is to kill them all.

152/ If any world government or international police or military force ever arises in our nation or over our nation, and it asserts a right to rule over our nation under any excuses at all, including epidemic, treaty, war, any reason at all. Our default response for all of our loyal citizens is to treat these men as an invading army and kill them to the man. Only our own people may make or enforce the decisions of our government.

153/ Where people demand money or valuables with knives or clubs or firearms, or they are in large unarmed groups: they may be shot by those they try to hold up, and it shall be considered self defense. The only problem is to prove their status as a crime victim.

154/ In general, those defending one person against other people's clearly illegal attacks shall have the same rights of self defense as the person being attacked, and this shall be particularly so when the person being attacked is weak.

155/ Carrying a loaded gun in one's personal automobile shall never be considered concealed carry, or open carry, but instead a variant of having a firearm in one's own residence, or business, which is completely legal and a guaranteed right of this constitution. Firearms shall not be left in parked vehicles except where those vehicles are kept in private sealed and secured garages. There shall be a fine of 2-week's wages where a firearm is stolen from a vehicle.

156/ The best group for regulating firearms shall be thought to be the Military, with one vitally important proviso: That the morning oath of all military (every day) includes words that they will never disarm their own people. "And I will never disarm my own people, or help with disarming my people, even if it happens as the result of a surrender." Everyone working for government in the regulation of firearms must have been honorably discharged from the military after over 10 years of military service. Also, police shall have nothing to do with enforcing court-ordered single person firearm confiscations, except when they happen to come across people. The people confiscating firearms upon an individual court order must be 10-year military veterans. The national police shall deal with firearm smuggling, but the county police shall enforce all the other firearm laws. There shall no longer be any ATF, or firearm regulatory body in the national government, except with regard to faulty, dangerous or smuggled weapons, or those who are illegally selling militia and military weapons to the people. Also, it should be noted that we are purposely creating a system where there is very little power to confiscate firearms. That the only mechanism is using a Senate jury with regard to crimes or strange behavior with regard to gun owners who seem to be either a risk to themselves or others. Sub-Senate Centi-Nomes may try these people with regard to their right to have a personal firearms of their own. And then only veterans shall be allowed confiscate guns due to an individually considered court order.

157/ Government shall have no right to regulate what sort of handle, grip, stock, silencer threads, sights, or cosmetic

features are allowed on our nation's firearms. Government shall have no right to regulate multi-action firearms that are cocked and then fired. Government shall only regulate/outlaw the following in civilian weapons:

a/ Poison or exploding bullets.

b/ Silencers.

c/ Short barrel shotguns.

d/ Trigger actions that are either too light or too hard.

e/ No ordinary hex key or Phillips screws to open the gun.

This is to keep kids from opening guns.

f/ That all civilian firearms be made of stainless steel, because this is stronger, lighter, non-corrosive, and more foolproof for stashed guns.

g/ That all civilian firearms have both an adult safety switch and a child safety mechanism.

h/ Firearms that can be made for fire more rapidly than is allowed herein, or firearms that will hold more bullets than is allowed herein.

158/ All prior laws concerning firearms shall be entirely void nationwide 90 days after this constitution comes into effect.

159/ It shall always be considered democide and a felony for any county or national senator or unelected government official to attempt to regulate our dear right to be armed. Also, such people shall always be regarded as traitors.

160/ Clothing Pockets and handbags and backpacks and similar covers shall be considered as identical to holsters under the law. No guns shall however be kept tucked into a waistband.

161/ The AR-15 shall be rebranded as the "standard rifle" of our country's militia, and that is why so many people use them. Also, we should make either the AR-15, or one like it into our nation's official standard gun so people can swap parts if there's a crisis. Also, if we have a standard militia weapon, then nobody can say that the weapon is to blame for any shooting. The vague terms "assault rifle" and "assault weapon" shall have no meaning under the law

162/ People who aggressively break other peoples car windows while the victim is in the care may be shot dead by the victim-occupants of the car, and it shall always be presumed to be self-defense.

163/ As a matter of public safety, there shall be standing shoot to kill orders for all citizens when confronted with groups of armed foreigners, even if they claim to be police officers or foreign military, or the military of global government. Prudence dictates that foreigners in this role should never be allowed, even if our government invites them in.

164/ Those with a foreign accent found in arms shall be arrested by police or the people unless they can prove that they are citizens.

165/ Those in the process of committing a crime shall not be able to shoot other people in self-defense, and this shall always be considered murder one

166/ We shall have the following rules of needles and syringes:

a/ The sports of darts, ax throwing shall no longer be allowed, and these things shall always be considered as weapons by police.

b/ Where people intentionally stab another person with anything, including a needle, dart, and especially a syringe,

the needle/ dart/ syringe shall be considered the equal of stabbing with a knife with regard to self defense. There shall be no reduction because a mere syringe dart, or plant spine was used. Also, armed people are supposed to take out people stabbing others in public with a syringe or needle, or dart, in the same way they are supposed to take out people doing the same with a dagger or machete, or firearm.

b/ Where people who go around needling or darting people they shall be presumed to be injecting poison or normalizing the process, and these shall be executed by torturous punishment.

167/ Because of the advent of gun cams, and 24 hour Senate juries authorizing police officers: we also find ourselves with a very large corps of unpaid on-call deputies (if we want it) that we can authorize to hold people at gunpoint pending arrival.

168/ When people chase others with sticks or blades or firearms, bystanders may shoot the aggressors. Having this rule greatly reduces the potential for inter-racial and other inter-group strife.

169/ Only the national Senate shall have the right to make policies about firearms. The county Senates may only choose from a menu of firearm laws established by the national senate.

170/ Spring-opening, and flip-opening knives being more of a defensive weapon, government shall not prohibit them except where all knives of this length are prohibited. Minors under the age for firearms shall not carry knives, folding knives, or box cutters on their person except in exurban wilderness areas. Those intentionally providing blades, firearms, or fire starting materials to minors who in turn go and hurt someone may be held partly responsible. Throwing knives, and hooked blade knives, boomerangs, and large darts shall be prohibited. In areas suffering from extreme youth violence, police shall be allowed to use metal detectors on those apparently under age 23 at will. Blades over 12 cm long, talon shaped blades, and blades with long handles shall be considered the equivalent of firearms for the purposes of stabbings and slashing.

171/ Toy guns and sexy twiggy-thin Barbie dolls are the devil's choice for our children's toys. The girls spend their childhood in endless moronic Barbie and Ken Rome-antics fantasies. This becomes a huge part of the girl's self image. Thus during this time, she is not imagining having children. Instead, she is living the Barbie fantasy that was given to her in her childhood via the Barbie doll company. On the other hand, many boys live their childhood in gun based fantasies. Surely this has something to do with the infidel shootings that Ishtar just loves: Because this violence is the main excuse for the all-critical disarmament stage or the slave society that enables the invasion by hoards. There are also many accidents involving toy guns that are actually real guns.

172/ Imitation, simulation and toy firearms and blades, that look even vaguely realistic shall not be sold or possessed in our nation. Also, real firearms shall not have design elements that make them look like toys.

173/ When people brandish imitation or simulation firearms, or play realistic gun sounds, or blades and they are subsequently shot, and the shooter claims self defense, that claim of self-defense shall not be questioned because the weapon or weapon sound was not realistic, or that only 1% of

the people are fooled by it. Those people running after others with knives, machetes, or firearms may presume to be trying to kill them, even if these weapons are fake, and these may be shot dead without warning by either bystanders of the person so attacked.

174/ It shall be thought that the cheapest, best most enjoyable way to have a strong militia is to make Paintball, skeet shooting, and drone racing into national sports. This shall be thought the best way to have a strong militia. And a strong militia should be regarded as the strongest and cheapest way to have a well defended nation. So government shall provide many areas for these activities.

175/ Assault with a paintball gun, BB or pellet gun, slingshot can get the assailant 6-months in work camp, even if they are 15 years old. If there is brandishing of a paintball gun, or BB gun, then those matters shall be other crimes in themselves.

176/ Using a fake gun, or a BB gun, or paintball gun in an armed crime shall be treated the same as a real weapon that is unused in a crime. However, it offers defenders a perfectly valid excuse to shoot the apparently armed person dead.

177/ The right to bear arms does not include the right to bear arms in bars and other drinking areas and places where people smoke marijuana and take other drugs. Also, it shall not apply to streets between multiple bars, where people are commonly walking from one bar to the next, places like 6th Street in Austin Texas, and other places where people commonly meet to drink and party in large numbers. These places may be cordoned off and ID verified, and people may be required to pass through metal detectors.

178/ Firearms and intoxication don't mix. Regardless of the carry laws, it shall be a felony to bring firearms to bars or intoxicant parties. Also, regardless of the carry laws, it shall be a felony to carry or pick up a firearm while intoxicated. The only exception is with clear cases of self-defense, or community self-defense with no co-instigation. Also firearms shall not be fired in times of celebration, even blanks. Where people gather in groups of 20 or more to drink or consume other intoxicants, and there is a recent history of gun violence involving gatherings at this location, or with members of this group, police shall have the right to sweep the group and the gathering spot with metal detectors looking for firearms and other illegal weapons. Entry guards at private drinking and intoxicant establishments shall have every right to use metal detectors and to pat the guests down for non-metallic arms prior to entry.

179/ Where mobs goes to lynch people from a government lockup, both police and community defenders are supposed to shoot the outspoken people, the leaders of the lynch mob.

180/ All Centi-Nome armories must allow the public to use their range for free.

181/ The Senate shall set standards for firearm reliability. All firearms sold in our nation shall be tested for jamming and exploding and failing to fire by the Army. The Army shall test and produce accurate failure rate statistics for all firearms for these factors and other factors. No firearm design sold in our nation shall:

a/ Explode more often than once in 500,000 shots.

b/ Jam more often than once in 1,000 shots.

c/ Contain any steel other than stainless steel so they last.

d/ Fire more than 3,000 rounds without needing any

replacement parts.

e/ Be lubricated with oil which collects dust. Graphite or silicone must be used instead.

182/ There shall be no video games where people use robots to harm other people or they use machine guns to fire on crowds of people. For this leads towards a situation where some people can't tell games from real life video, and murderous robot operators can say that they thought they were only playing a game, or simulation.

183/ The penalty for using a drone or robot to harm someone shall never be less than using a booby trap to harm somebody. In times of war, kill-drones and mines shall be considered co-equals, with the human controlled or AI drone considered more like first degree murder.

184/ Nobody shall be legally required to explain why they're carrying their firearm, so long as carrying their firearm is legal.

185/ In 90 days, all rules of the traitorous ATF shall expire unless the Senate reinstates those rules.

186/ There shall be a right of self-defense where mobs of people are attempting to take vigilante action against people. In such cases going onto the property of the mob-attacked person may be shot dead in self defense by either the mob-attacked person, or others. This includes front yards, driveways, porches, interior hallways, sidewalks and nearby road parking.

187/ Ballistic helmets shall be 100% allowed, just like bulletproof vest vests. However, we imagine that militia helmets will be much heavier duty and heavier than military helmets.

188/ Except on a military or militia base, it shall be a felony to be in possession of remote control firearms or remote control drones. and other weaponry.

189/ Due to a long string of mass shootings by transsexuals, it shall the case that all transsexuals of either form shall be prohibited from owning or possessing firearms. The use of exotic pronouns may also be considered a red flag for firearm ownership and possession.

190/ The siege of Yorktown explains why Americans love guns so much: All the second amendment people... All of them need to remember what happened at the siege and surrender of Yorktown, because this battle is the #1 reason for the Second amendment. For 6-years, upwards of around 10,000 British redcoats occupied our land, killing our people, and sleeping in our homes and eating at our dinner tables.

And then there was Yorktown, where 10,000 American militia and 10,000 french laid siege to the British forces of 10,000 on the Langley/West point/ Newport News peninsula. Over the course of the 23-day siege of Yorktown, the US side dug trenches and used horses to pull logs into place to create bullet-proof positions from which to fire from at the 4-mile narrow point in the peninsula just north of Yorktown. So after 23 days, the British surrendered.

The British surrendered because they were trapped and not supplied, and the US side was on the outside and was well-supplied from their nearby American brethren, which were beginning to converge with more guns and farm tools to massacre the invading British army while they had the chance. And also to break out, the outnumbered British forces would have to attack a dug-in enemy somewhere on a

7-mile front and they lacked the force-size advantage to do that. So the British probed a bit resulting in two or three times the casualties. So the British surrendered and probably tripled the number of arms we had.

And all of America wanted to know how it was that the British army suddenly surrendered, and we suddenly won. And everyone in America said at once, What? how can it be? How did our 6-year war suddenly end like this? How did we suddenly win? And whatever explanation people heard, the only thing that really stood out was the fact that our side won due to having twice as many men with guns in the field. And then after the surrender we had three times as many guns as before, thanks to the surrender of the British. And it seemed to everyone in the nation that to a very large extent national defense was best accomplished by means of everyone in the nation having a gun.

And this was one of the main formation ideas that the US was founded on, this second amendment of ours, this 2nd most important citadel right, the right to be armed. And they asked and they asked why and the #1 reason everyone went away with was that we finally had enough armed men in the field, and their training was not really so important, and whether they fired or not was irrelevant, and everyone just realized the simple truth that armed nations are pretty much invasion-proof. And here is what James Madison said about the matter in Federalist #46. He said that an invading army: "would be opposed by a militia amounting to near half a million citizens with arms in their hands, led by men chosen from among themselves, fighting for their common liberties, and united and conducted by governments possessing their affections and confidence. It may well be doubted whether a militia thus circumstanced [like this] could ever be conquered by such a proportion [a proportionally tiny number] of regular troops. Those who are best acquainted with the late [recent] successful resistance of this country against the British arms will be mostly inclined to deny the possibility of it.

After Yorktown, everyone in America realized that it would be best if we all had guns, and this is why Americans are so pro gun.

191/ It shall be thought unwise to have armories where there is a large number of foreigners, and especially Muslims living in that area. For surely these will plan and organize to take over the armories in the event of a crisis. Then having an armory will work in reverse. So Poland can have armories, but it would be a horrible mistake if Germany, France, or Britain used armories with so many foreigners living there.

192/ Our 24 hour Armi will be based in our nation's thousands of hardened-bunker Centi-Nome armories. Here we imagine that each of our nation's 2,500 paired and co-located Centi-Nome armories will have 50 Armi men stationed there to make a total of 125,000 men. This Armi shall repel all armed attacks with deadly force. However, either the national government, or local Centi-Nome government shall have the power to open their armory up to the people in any sort of crisis. So the job of the Armi will be:

- a/ To guard the nation's armories.
- b/ Keep the weapons and equipment maintained.
- c/ To drill in the maximally rapid distribution of arms using multiple fork lifts.
- d/ Train the civilian militia in the use of various weapon

system, drone operation and combat flying.

x/ There shall also be a hard rule at all armories that everyone who gets a gun must speak the language without either a foreign accent, or an immigrant community accent.

NR'3. FREEDOM OF ASSEMBLY AND PROTEST

1/ The freedom to assemble and protest shall be the third citadel right, ahead of all other rights except the right to free speech, and the right to bear arms. The term protest as used herein shall refer to all non-violent assemblies of the people, and all meetings of the people, including those meetings to criticize any or all Government leaders, and meetings for making plans to peacefully oust those leaders. We echo the great and immortal words of the Massachusetts constitution that: "Government is instituted for the common good; for the protection, safety, prosperity and happiness of the people; and not for the profit, honor, or private interest of any one man, family, or class of men. Therefore the people alone have an incontestable, inalienable, and infeasible right to institute government, and to reform, alter, or totally change the same, when their protection, safety, prosperity, or happiness require it." Furthermore we extend this right to include the acts of peaceful protest and assembly to attempt to muster a new democracy.

2/ In our nation, we hold that Government derives its power from the consent of the governed. And the people shall always have the right to end one government and institute a new one. Thus we believe that the right of the people to assemble, protest, muster and democracy, and re-muster subsequent democracies shall not be denied. Nor shall it be delayed, or re-directed by government. The Senate shall be required to hand off power to a 66% overmajority of voters re-mustered under a new democratic constitution.

3/ Protests and assemblies of the people (collectively protests) shall be held in parks and squares, and non-critical roads and other places that obstruct the functioning of society, such as airports, transit hubs, commercial centers, and entrances to such places. Small assemblies of the people that don't obstruct may be held anywhere (including inside airports, transit hubs, along major roads, major sidewalks, and inside shopping malls) provided they do not in any way impinge on the flow of vehicle traffic, or seriously impinge on the flow of pedestrian or air or train traffic.

4/ Where protesters assemble in such a way that they block roads or airports, transit hubs, or commercial centers, they shall be jailed for 3-years, and fined for harming the people's right of protest. Where protesters glue themselves in place as a means of preventing other from easily carrying them off, they shall be jailed for 7-years. Also, when protesters are merely overflowing and blocking a common road or city center with their protest, They shall get no more than a mid-level misdemeanor conviction and 3-days in jail. The intentional blocking of roads and other abusive protest tactics shall be treated as severe offenses because they undermine the people's critically important ability to protest.

5/ If an assembly of the people overflows from an out-of-the-way location and obstructs the functioning of the community, the assembly/ protest must stop by midnight and then relocate if it is to continue or be repeated. Then the next

assembly of that group must then be held in another location where obstruction will not occur. Also, where there are multiple roads of a generally equal size going in the same direction, and any but the largest is obstructed by an assembly of the people, then this location shall never be regarded as a major road.

6/ The people shall have the right to drive through, and walk-through, and to go through any protest in the streets, or in any public place that is designed to obstruct the flow of traffic. The right to protest does not include the right to obstruct other people in their daily activities, unless the protest is held in an out-of-the-way place like a park or dead-end street or private property (with the owner's permission) or in a park or some such.

7/ Except for reasons of public safety and obstruction of the functioning of society, and the reasonable separation of counter protests, government shall have no say over where the people protest. Also, all park lands and all streets that have ever been blocked-off for a Government permitted or condoned parade, assembly, protest, or event shall always and forever be fair game as locations for political assemblies. Nobody but the protesters shall determine the location, time, or circumstances of the protest. No protesting shall take place within 200m of a regional voting center, yet all RVCs shall have a park of at least 10-acres (4-hectares) for protesting that is 300m away. There shall be no protesting within 500m of an abortion clinic or a major hospital.

8/ Government shall not be allowed to do anything or say anything that that instructs the people to stay away from certain protests. Government shall not be allowed to say that any town district or any community be off limits for protesting, or that certain people must stay away from protests, unless they have been convicted of prior violent acts before. It is important to recognize that only a conviction for a violent act by a court of law is the bar for saying that people cannot attend a protest. Assaults against protesters that illegally block transport infrastructure shall be subject to no more than 20% of the normal penalty, and no penalty where there is no permanent damage and only minor bruising to the protesters. Also, there shall generally not be any penalty for spraying pepper spray into the air above road-blocking protesters, or train-blocking protesters, or protesters blocking key infrastructure such as Suvarnabhumi airport in 2008.

9/ There shall be no protesting in theaters during films or performances, or during live performances unrelated to politics. There shall be no unauthorized protests inside someone else's private property that is not open to the public, or where people pay money to see a show.

10/ Protesters are not allowed to yell, aggressive things at people who are either counter processors, or just passing through. Protesters are not allowed to block the way for people. Protests are supposed to be polite and peaceful, and a show of the number of people who believe in something. Those who seek to cheat and amplify their voice through violence, shall be sent to jail. All counter protesters that approach an attack protesters, shall be considered instigators of protest violence.

11/ Where people intentionally get in front of vehicles to stop them, and the driver runs them over and kills them, the maximum penalty shall be 5-years. Also, this is not a per-

count crime, but a per-incident crime. So running over a group of people trying to stop a car driving down the road can never get a person more than 5-years.

12/ Protesters shall be expected to do no significant or lasting harm when they protest. For this reason, being a protester shall not mitigate any crime where people or property are intentionally harmed. This shall be especially so where protesters endanger or harm cultural heritage artifacts as a means of protest. This harm to cultural heritage objects and structures shall not in any be mitigated by the act of protest. Generally, those who harm, endanger, or vandalize a priceless and well known museum artifact or art masterpiece shall get 20-years of work camp interment for the first conviction, and life if they have a prior felony conviction, or they are non-citizens,

13/ Except as stated herein in this R'3, Government shall have no say when and where the people may assemble or protest in their individual, small or great numbers. Government shall not be allowed to issue permits for protests. This is because the power to grant is the power to deny, and we don't want government denying the right to assemble and protest.

14/ All streets that are easily bypassed, such as the 3500 block of SW 8th Street in Miami, shall also be fair game as a site for political protests. Where a protest or assembly of more than 500 people is being held on a street that is easily bypassed, such as the above location, the protesters may close the street to vehicle traffic, however, if the protesters do not do this and it is needed for public safety, the police shall block the roads to assure a total separation of vehicles and protesters. Where protesters feel that they are on good relations with police, they are supposed to give police advance notice of where their protests will be. This notice however, shall never be required.

15/ Government shall not prevent, hinder, threaten, or intimidate the people from assembling in a more-or-less peaceful, and non-destructive way to hear speakers, discuss issues, organize, protest, or muster up into a new broad democracy except as explicitly described herein. Police may advise, but they shall have no authority to interrupt those trying to go to a protest or political rally even if there is insufficient parking, or a mildly hazardous situation occurs. Those who attempt to ban or hinder public demonstrations of the people using some claim to power, some emergency, some epidemic, some extreme circumstances as an excuse: these shall may be charged with capital democide.

16/ Those who organize protests and opposition to government shall be considered the most protected class of people in the nation. This shall be so particularly when these people have done nothing but organize peaceful protests, and say words about government people and other powerful people. And particularly when they claim bad behavior, impropriety, corruption, injustice, law breaking, unconstitutional acts and similar things. Where government people get involved with, threatening, interrogating, arresting, charging, prosecuting, deposing, suing, and trying protest leaders and other opposition leaders, they shall be thought to risk charges of democide.

17/ The following may be considered acts of criminal police abuse if they occur with generally peaceful protesters:

- a/ Brandishing weapons including clubs.
- b/ Firing rubber bullets, or using pepper spray, or tear gas.
- c/ Announcing threats of arrest for failure to disperse.
- d/ Encircling the assembled protesters as a means of intimidation.
- e/ Establishing roadblocks or prevent protesters from entering or leaving assemblies of the people.

18/ The right to assemble being so fundamental and vitally important to the cause of freedom, government shall never disband assemblies of the people unless on that very day a significant percentage of the assembly turns to bloodshed, fire, or widespread vandalism.

19/ It is recommended that everyone at each protest have a telescreen hanging from their neck recording. Peaceful protesters shall consider it their obligation to freedom to oust the violent from their protests by finger-pointing and opening to allow law enforcement in to arrest the people so pointed out. Peaceful protestors shall also consider it their duty to freedom to record all violent acts, and to stand witness against the violent perpetrators in court. Also, it is best for evidence recordings to be sent to the recorder's office immediately upon completion, or as a live stream, so the events can be properly time stamped. Also, people assembled at protests are not supposed to use voice or video or high bandwidth data transmission, unless something important is happening. This is so the channels stay open to the recorder, the police, and EMS. However Government and Police shall be prohibited from enforcing this matter.

20/ Everyone should keep in mind how the opponents of a protest will sometimes join and infiltrate a protest and cause violence in the protest's name as agent provocateurs. Then this is used as an excuse for disbanding or besmirching the side protesting. We shall have a low bar for convicting such violent agent provocateurs of democide, particularly when they are paid or are paying others for violent or provocative acts at mass protests, or they are working for government. It should be a felony when government employees (domestic or foreign) act like citizens protesting. Those who employed by governments shall have no right to protest while they're working for government and for two years afterwards. If they do, it shall be a felony.

21/ No police or protesters shall mask their faces during assemblies/ protests or wear a uniform that makes one protester or police officer hard to distinguish from the others. There shall be no under cover or un-numbered police at protests. It shall never be a crime to unmask masked people at assemblies/protests, and this shall include all masked police officers. Also, the unmasking of masked people at protests (including police officers) should be considered a primary objective of all protesters at all protests and assemblies. Furthermore, so long as there are no significant injuries directly attributable to the person removing a mask at a protest, no charges of assault shall be possible for removing a person's mask. And this includes police officers. Also, people protesting in masks shall not count for support because they might be either paid protesters or Muslims.

22/ During assemblies and protests, it shall be a principal obligation of police to detain those ousted by the mass of protestors for acting violently, or threatening violence. Also, police shall have the right to set-up mandatory walk through

metal detectors at assemblies and protests. They can also use touch-less magnetic weapon detection wands at protests.

23/ It shall be recognized by all, that maintaining order during assemblies and protests is one of the most critically important roles of police officers in a democracy, for this is where their actions also have a political dimension. All police shall keep in mind that the ancient excuse of "just following orders" will not work with substantial violations of fundamental liberties. It will also not work with conspiratorial and police-state violations of life and fundamental liberties. It also will no work with police abuses of protesters. Each police officer may be held personally liable for their actions just like war criminals.

24/ Those violating the rights of a peaceful political assembly or protest, especially those injuring or intimidating peaceful protestors may be charged with democide, even if lone individuals, even if under order by a superior officer, or commanding others, even if acting on their own, even if acting in great numbers, and even if this new Constitution was not yet in force. Also, those on the opposing side, who infiltrate an assembly or protest and cause violence in the name of a protest to smear the protesting group, these may be charged with democide. Those with violent felony convictions shall not be allowed to attend protests and political assemblies, and they shall get 5-years for this crime.

25/ Our new one-size-fits-all prototype democracy for the entire world must heed how so many armies have brought so many murderous dictators to power from Julius the Seizer, to Adolph Hitler, with thousands of others in between. Our democracy and its soldiers shall not take the intimidating power of men-in-arms lightly, and for this reason, the military shall be strictly prohibited from having anything to do with political matters, especially political meetings and protests of the people. Only police and civilian militia (national guard) may secure political assemblies and protests of the people. All military men shall be duty-bound to disobey all commands to go to such a meeting, if it ever is ordered, just as they are duty bound to disobey a command to fire on their own people — and the penalties shall be similar. Any military commanders ordering their forces to act upon, or intimidate political assemblies and protests of their people may be charged with democide.

26/ At political assemblies and protests, to assure that everyone is on their best behavior, there shall be triple penalties for unprovoked crimes, and double penalties for over-reactions to provocations.

27/ There shall be no open flames, lighters, matches, or smoking at protests. No fire, and no fire-starters or accelerants. At protests, carrying open fires shall be thought the equivalent of brandished fire arms.

28/ Wherever people are clearly recorded setting fire to buildings, vehicles, or places that seem likely to lead to a conflagration, these people are supposed to be treated as if they are armed enemy combatants in time of war doing this. They are supposed to be shot dead by the people without warning, and this shall be thought a heroic act of community self defense for the shooters. This rule shall however, not apply to fires in places that are unlikely to get out of control.

29/ To reduce protest violence, we shall say that the right to stage a group protest includes the right to protest in peace away from counter protesters. There shall be no counter-

protests within 3km. This prohibition against counter-protesting shall be understood, the broadest, sense reasonable, and shall include people who show up at meetings.

30/ There shall be no limitations or penalty for the words spoken or disseminated at an assembly of the people. The only exception is that it shall be a crime (but not a matter for money court) to call for violence, or to attempt to re-direct violence that is already occurring. Those who speak to a large audience, or who go around talking to smaller audiences calling for violence against people or destruction of property, or rape, or arson, these people may be charged with inciting violence if their words result in action. These people calling for violence may also be considered accessories to the violence, looting, arson, and similar damage they called for. Also, with regard to our first and foremost right of free speech, the right of leaders to speak freely to their followers shall always be more important than public order. The bar for the definition of speakers inciting violence shall err on the side of liberty with regard to free speech. If there is any doubt at all, then the speech shall be permitted. For any prosecution on charges of inciting violence to be valid, the call for violence or crime must be clear and literal and it must result in actual violence. Vague, indirect, figurative, and especially unheeded words and language shall not count as a call to violence.

31/ The right of free assembly shall not apply to those trying to do away with our freedoms. There shall be no right to protest for those who advocate: dictatorship, violence against any race or ethnic group, totalitarian changes, monarchy, constitutional monarchy, constitutional presidency, constitutional oligarchy, theocracy, totalitarian government disguised as religion, Sharia law, blasphemy laws, lynching, arson, or extrajudicial violence, or the short-circuiting of due process.

32/ Only citizens able to vote may attend, participate-in, organize, or fund political assemblies and political organizations. It shall be considered voter-fraud when non-citizens, and immigrant citizens try to participate in our democracy either by their physical presence at a protest, or political assembly, or by their aid or spoken words in front of an assembled crowd, or in front of video, or by their donations of money. However, visitors and immigrants shall be generally free to write what they want, so long as they don't call for violence, and they disclose that they are non-citizens at the start and end of their work and in their social media bio.

33/ Foreign people shall not be allowed to protest in support of dictatorships, oligarchies, monarchies, or the adversaries of our nation, and our land of the free. However, we shall generally welcome and support foreign people who are opposed to foreign dictatorships oligarchies, or narrow fake democracies, and we shall normally grant these people the right to peacefully assemble and protest against their own nation in our nation. We shall also defend these people from the agents of tyrannical foreign governments acting in our land. Foreign government agents, and foreign Mafia agents in our land that are intimidating our citizens or our guests shall be subject to the death penalty.

34/ No foreign government, Mafia, or quasi government organization shall operate police forces or security forces in our land. None shall intimidate its people, or threaten their

families while they are in our nation, and all people working in such organizations shall be considered spies and potentially subject to the death penalty upon conviction.

35/ Those who coerce foreigners living in our land by threatening their family members back home shall get 10-years in work camp per count.

36/ Where non-citizens and immigrant citizens are recorded engaging in illegal protest in our nation, they shall get 10-years in work camp.

37/ The right of free association shall not be totally guaranteed for non-citizen and immigrant citizen meetings in our land. Foreigners shall not have complete and total freedom to meet with whoever they like in our nation, or to be free from government attention and surveillance.

38/ Non citizens shall have imperfect rights of free speech, free association, and free religion. But they shall have no right to be armed, or to participate in protests regarding our government's policy, or do certain other things the Senate may decide are inappropriate.

39/ There shall be no right to hold assemblies or protests in any other language but English in our land. Even citizens shall not be free to conduct protests, or have assemblies, or have religious services in a foreign language. They shall only use English and later Euemi once that language comes into widespread use.

40/ The Senate may lock up and deport non-citizens, and immigrant-citizens for what they say, and the beliefs they have expressed in public.

41/ All news reporting of protests and assemblies shall include drone images that show the true scale of the entire protest from above. They shall count the number of protesters. News reporting must also show broad images with the faces of the people protesting so people can judge the character of the protesters.

42/ The right to assemble is a political right that shall not be diminished-by, or confused-with, riotous celebration, or protest of events that are not political, or economic in nature. This Constitution does not say anything about the right to assemble in groups for drinking parties, or for matters related to spectator sports. The various counties shall be free to establish reasonable rules for drinking parties and spectator sport fan assemblies. However these rules shall always protect free speech at drinking parties and spectator sports.

43/ Offering or accepting money, or anything of value, including beverages, food, lodgings, transportation and sexual favors to engage in a political assembly or protest shall be considered the felony of vote buying. Those purchasing multiple protesters, along with their conspirators, shall be penalized for each protestor purchased, and after just a few protesters may end up spending the rest of their lives in prison. Those funding or involved with giving massive amounts of money to protesters shall also be sentenced for each protestor purchased. Nobody shall be allowed to buy performers that pretend to be genuine political supporters. This practice is totally corrupt.

44/ Threatening people with violence for assembling, or protesting, or expressing their political views shall be considered democide.

45/ When a fictional citizen or group schedules a distinguished person as a speaker for a certain period of time,

the speaker shall have the absolute right to say whatever he wants for that period of time. The producers shall not be allowed to turn off the public speaker's microphone, or interrupt him, or remove his words from the video record of the live performance, or in any way seek to censor what the speaker says. Those who engage in this sort of censorship shall be subject to prosecution for the crime of illegal censorship.

46/ It shall be considered democide when undercover police pose as protesters and work to redirect protests or influence protesters as occurred on 2021.01.06.

47/ It shall be considered felony democide to be involved with:

a/ Shutting down regularly scheduled transit to reduce attendance at peaceful public assemblies or protests.

b/ Using signal jamming technology, or causing the shut-down of of telecom or internet at peaceful public assemblies or protests.

48/ Part of our obligation to truth and freedom is to always help the people of every nation who speak out against their abusive governments. We shall help them, and protect them on our witness protection island of Ni'ihau, next to Kauai. We shall also help give them a platform to speak to the world from. And we may even offer them residence and path to citizenship just for acting like an American and standing up to tyranny.

49/ Unstructured assemblies and protests shall not really count. Government should not listen to the easy-to-corrupt voice of unstructured protests.

50/ There shall be no government application process or approvals for holding protests or assemblies of the people. This is because an application process implies that the application can be denied, and this cannot be. So there can be no government application process for holding a protest or an assembly of the people. It shall be a felony for police or private security to abuse their authority and to assert that permits are needed to hold a protest or gathering of the people.

51/ Government people who attempt to ban, prohibit, discourage, harass or interfere with a protest or demonstration of the people in any way may be charged with democide. This includes government workers and police.

52/ Neither government, nor anyone else shall interfere with supplies of food, or fuel or utilities to a assembly or protest. Government shall not have the right to stop resupply of necessities during peaceful protests, or interfere with people from coming and going to a peaceful protest, or harass protesters in any way either at protests or after leaving protests.

53/ In order to qualify for protection status, the assembly/ protest must be at least 100 people.

54/ Those who hire, assign, or order police and non-police to secure demonstrations of the people shall frequently be criminally co-responsible for any injury caused by the people that they directed as if they caused the injury themselves.

55/ Police shall not use secret or undisclosed weapons at protests. Police shall not use sonic, EMF, or radiation weapons used against the people. This includes very loud sounds to drive people from a protest. Also no adhesive or sticky or greasy or staining substances may be sprayed or

applied to the people at protests.

56/ When police arrest peaceful protesters on flimsy charges, or minor infractions, or no violation at all, these police shall risk being charged with a felony. Where private security direct protesters inappropriately, they may also be charged with a felony.

57/ All arrested protesters must be kept in mid-range hotel-quality paid pre-trial lock up at community expense unless released pending trial, or convicted.

58/ There shall be no special fenced zones in the centers of our cities for special events where any rights of the people to enter or use public property are even temporarily suspended or limited. People can have events in the centers of our towns, they just can't exclude people who don't pay or don't register. Except for purpose-built auditoriums, amphitheaters, and stadiums on public property, all events that seek to exclude people who do not pay must be held on private property.

59/ It shall be a felony for undercover or off-duty police to attend protests. This is because undercover police are impossible to discern from agent provocateurs working for government.

60/ The maximum penalty for acting as an agent provocateur shall be death. The death penalty shall be normal where the agent provocateur previously worked long term for government.

61/ All police at assemblies and protest of the people must be full citizens that are allowed to vote.

62/ Police that hide their face or appear without website verifiable numbers at protests may be considered mercenaries. If these are killed, their killers may be entirely acquitted on the grounds of community self-defense. Their killers shall at least have 3/4 reduced sentences for killing masked police at protests.

63/ The crime of trespassing shall not be applicable for large non-violent political gatherings outside on property that is not entirely and permanently fenced, or walled with a barrier over 160cm tall. Temporary fences in their widest definition shall not count here as permanent fences. In fact, for the purposes of free assembly, and protest, we shall say that temporary fences, temporary police barricades, and temporary "don't-cross-this-line" barricades shall not be erected, and shall not count at all for anything, and the people shall be totally free to ignore them. Also, such barriers shall be thought to display a galling sort of dominance by police over the people. They shall be thought an insult, a momentary micro-dominance by police over the people. Police and emergency services can set-up their own small compounds, but these must be in a the less popular area. Also, these compounds can't be oversized, or have non-emergency vehicles, or police cars in them. A reasonable number of police vans are allowed however.

64/ When police arrest a person, they must explain what the arrest is for to all concerned people watching, and the camera if someone is recording the arrest for the video record.

65/ Government shall not have the power to ban certain individuals or groups from protesting and assembling. However the people meeting and assembling and protesting shall have the right to demand that people leave when they don't want them at their meeting or protest.

66/ There shall be no whistles, horns, noise makers, banging

pots, yelling nonsense or very loud music at assemblies and protests as these reduce serious communication between the people at the protest/assembly. Also, at protests, there shall be no following people around to interfere with them, or to interfere with their interviews or video recording. Only people who have gathered a audience of over 30 people can use megaphones or amplifiers. However, those who have an audience of over 30 people shall always have the right to use megaphones or amplifiers, regardless of local ordinance or permission during the daytime, provided that people have not gathered to hear someone else speak. It shall be an arrestable offense where people make disruptive noises at protests.

67/ Where the people have gathered in a generally sober and peaceful state to discuss serious matters relating to their group approach to problems, the crimes of unlawful assembly, or trespassing shall not exist on either public property, or private property generally open to the public.

68/ All crimes related to illegal assemblies shall be considered as minor offenses, and it shall never be possible to arrest, handcuff, or jail people for illegal assembly violations, but only to ticket them, and make them pay a fine.

69/ Police may be fired or charged with a felony if they overstep their authority with regard to protests, even if they are under orders to do so. And to be clear, it shall be a felony for police to arrest peaceful people who are merely trespassing en masse on property and places commonly open to all comers from the public. Such mass assemblies of the people shall be considered a precious thing to be nurtured by government, and never discouraged.

70/ All venues for discussions of democracy and government shall be considered public, and it shall not be allowed to charge entry fees for these events.

71/ All non-citizen and immigrant citizen that have protested in favor of the People's Republic of China, past and future shall be deported and excluded. In the future, all non-citizen protesters shall be jailed for 10-years, then earmarked and deported.

72/ The Senate shall have the power to grant permits to certain foreigner groups that they may protest in our nation. So while we will have strict laws against PRC Chinese participating in our protests, we might allow people to protest in favor of independence for Tibet, Xin Jiang, Burma, and Taiwan. Also the Senate may publish a list of white-listed nations and groups where our nation allows foreign protest.

73/ The Senate shall do its best to identify all the members of Antifa and BLM that it can.

74/ We shall have special extra large juries and extra strict rules for the prosecutions and trial of people who are politically active and especially anyone who is any sort of political leader.

75/ Implied consent for photography and recording shall exist for everybody protesting, and everybody attending a protest.

76/ During protests, the protesters shall all generally be expected to know something about what they are protesting. And they shall all be expected to want to share their information with other. After all, they are in the streets trying to gain support for their cause. This is the nature of political protest. Where most of the protesters are unable to answer questions about why they are protesting, the group shall be

investigated for using paid protesters.

77/ Paid protesting shall include the following activities and shall be a crime on both sides:

a/ Transporting people to protest and political rallies, or providing them with food, drinks, drugs, sexual favors, money favorable treatment, or anything of value.

b/ Directly or indirectly paying people to do things that simulate popular support of candidates, political causes or political agendas. Also paid actors posing as members of the public and asking questions for money, or addressing numerous people for money.

c/ Directly or indirectly paying people to mention, or say things on behalf of candidates or agendas.

d/ Directly or indirectly paying people to hold campaign signs, or other printed material, or hand out political flyers, or vocally tout a cause.

e/ Directly or indirectly giving people benefits, opportunities, raises at work, media coverage, favorable reviews, or sexual favors for supporting candidates, or attending protests/rallies, or for speaking out against political opponents.

f/ Directly or indirectly giving people benefits for attending political protests or rallies.

g/ Having communication specialists at protests, or acting as a communication specialist at a protest, and telling other protesters to shut up, or not engage in either conversation or interviews.

h/ Political tout and going around and supporting a political cause for money.

78/ There shall be no music or disco lights at political protests or political assemblies. It is far more important that the people at our protests be able to talk.

79/ Protesters shall not be allowed to build fences or have guards. Acting as a guard for a protest shall be a felony. People quietly recording and asking interview questions can't be expelled from protests.

80/ The prohibition on paid protesting includes both organizing protests for money, as well as actually protesting for money. Can it be anything else?

81/ Engaging in violence for the purpose of changing public policy shall be called rioting or terrorism, and both shall be regarded as the sort of felony that gets already convicted felons sent to live on an island for life. Engaging in looting is not be bad as rioting, or terrorism. However, all of the people convicted of looting with a prior felony convictions must be removed from society forever.

82/ Petitions exist to empower the people, the real flesh and blood citizens of our nation against its government and against its fictional citizens. It shall be considered fraud when fictional citizens or foreigners use petitions to give their simulated version of the voice of the people.

83/ The gathering petitions without any spam or commercial solicitation, shall be considered a rather protected aspect of our first and third rights.

84/ There shall be no right to protest or publicly celebrate in favor of people's death. And this especially after the death of a leader. Death of leaders in their prime is a main road that leads to widespread political violence. And ongoing insult added to the original injury probably with a multiplier effect. This is one of the big roads that leads to political violence. And this is why we can't allow any kind of celebration of

death. So we shall not allow anyone to celebrate the death of leaders. This shall not be part of the right to free assembly. And when supposedly tone-deaf foreigners celebrate the death of one of our leaders in our nation: When they unconscionably insult and besmirches the recent death of a hero's memory before a large audience, they can easily be considered part of the conspiracy to gain from the assassination of a leader.

85/ It is the most remarkable thing how so many of our leaders die young. This cannot be a coincidence. Just look at JFK, RFK, Steve Jobs, Charlie Kirk, Ronald Reagan (attempted) John Lennon for singing imagine, and Bob Marley for singing of Exodus. Wherever we see a leader die young, and there is an endless besmirching, in addition to the actual elimination of the leader, that should be thought to points straight to Ishtar. Also, all the people aggressively speaking out against the leader should be presumed to be working for Ishtar either as a useful idiot or as a paid protester.

86/ There shall be no protests allowed at other people's weddings, parties, and when people are out for food & drink. There shall also be no protesting outside of government lockup facilities of people accused of a heinous crimes, for this edges into lynch mobs. Supporters can however come and keep watch, but the moment the talk switches to jailbreaks, all the jail-breakers must be ousted, and they must go or they shall be on the wrong side of the law in almost all circumstances.

87/ Protesters shall have no right to intervene when people are being arrested. Where they do their status as a protester shall offer no benefit to charges of interfering with an officer trying to make an arrest.

88/ There shall be no protest of any matter of race. However this shall not include matters of religion, and foreign national origin. For example, people cannot protest all Africans because this is a race, but they shall be perfectly free to protest about Muslims and Sikhs, and Somalis and Nigerians and Palestinians if they want. Also, the people shall always be completely free to protest all actions, events, and everything else about the lying and violent religion of Islam as well as Mideast people as a whole because they have historically been so unified, warlike and troublesome to stimulate more money paid to their people.

89/ There shall be no right to protest outside someone's home, or where they are eating. There shall be no right to protest inside an office, or inside of a single shop, even if it is a giant warehouse of a shop. There shall also be no right to protest inside any peaceful religion's house of worship. Protesting inside a house of any peaceful religion's house of worship shall be considered akin to heckling.

90/ Where hearings are held to discuss group matters, including especially government policy matters: Everyone who speaks must start with their name and 5-digit postal code. However, people who do not speak before the assembly shall have no obligation to sign in or give identity.

91/ There shall be no appointee moderators, or regular moderators at any government meetings. All moderators for government shall be confirmed senators, drafted Senate randoms and shall only serve for one meeting. Where these show obvious bias, a 90-minute recess shall be declared, and

another Senate moderator shall be drawn immediately mid day that will replace the biased Senator.

92/ When people are violent during protests, or they are calling for violence, this shall be thought to void most of their free speech protections.

NR'4. NO TOLERANCE OF TYRANNY

1/ We shall enshrine Aleksandr Solzhenitsyn's great words: about our response to totalitarianism: "Communist leaders say, "Don't interfere in our internal affairs. Let us strangle our citizens in peace and quiet. But I tell you: Interfere more and more. Interfere as much as you can. We beg you to come and interfere."

2/ Tyranny is like a pathogen in that both are always evolving new disguises so they can go unrecognized by the host's immune systems and olfactory systems. Tyranny is always evolving new names, new excuses, new background stories, and new disguises to hide itself from everyone's recognition and immune systems. Sometimes tyranny cloaks itself as monarchy, or communism, or fascism, or emergency epidemic response, or emergency war rules and regulations, or some generals who have seized power. Sometimes it is elected people who find some excuse to never leave office. Sometimes it is a broad oligarchy or a narrow democracy. Sometimes tyranny uses other disguises. Tyranny, like a pathogen uses whatever works.

3/ Islam regularly changes its names and presents itself as many disunited even hostile and warring groups. We have seen this in our own lifetime. But this has been going on for thousands of years. In fact all of the following 70 aliases refer to just about the same eternally troublesome group of people: Afgani, Al Qaeda, Asians, Assyria, Arabia, Arabia Deserta, Arabia Felix, Arabia Petraea, Axum, Babylon, Bactria, Bahrain, Berbers, Carthaginian, Central Asia, Cilicia, Cyrene, Dhofar, Djibouti, Egypt, Eritrea, Eudaemon, Ghassanids, Hadhramaut, Hamas, Himyar, Iranians, Iraqis, Israelis, Isis, IS, Judaeans, Jordanians, Karim, Kuwait, Lakhmids, Lebanese, Lybia, Ma'in, Mamelukes, Marib, Meccans, Medinans, Medes, Mesopotamia, Mideast, Middle Eastern, Minaaea, Moors, Mundus, Munza, Nabataea, the Nile, Oman, Palestine/Philistine (the Turkish word for Palistinian is Philistinin), Pakistani, Palmyra, Parthia, Persians, Petra, PFLP, Phoenicia, PLO, Qataban, Qatar, Qedarites, Saba, Sassanids, Saudis, Seleucids, Sheba, Somalia, Sudan, Sumerians, Syrians, Syria Coele, Taliban, Turkey. It shall from now on be the official policy of our nation and all freedom loving people to stop allowing other nations and races to name and rename themselves (particularly Ishtarian and totalitarian ones). Also, when people go by many different names, or aliases, this is a pretty good indication that they are crooks trying to avoid being detected as crooks.

4/ Our nation shall be the avowed enemy of tyranny, fascism, monarchy, oligarchy, theocracy, and all other forms of narrow, or easy to corrupt government. It shall be a stated high-priority objective of our nation to struggle against, and bring about an end to, all these corrupt forms of government everywhere on earth in order to liberate mankind. As far as the people of our nation, our land of the free are concerned, it shall not be allowed anywhere on Earth to elect communist

governments, theocracies, or other forms of totalitarian or overly powerful government, or narrow democracies. Where this occurs, we shall never consider these elections as valid. Furthermore, it shall be one of our highest priorities to kill all monarchs, oligarchs and tyrants and particularly those that engage in or fund wars and terrorism in other nations. For surely they will eventually turn on us. Also we shall always be generous with regard to giving arms to those foreign nations we come across that are yearning to be free.

5/ Tyranny is currently playing dead in England, the Netherlands, Denmark, and Japan among other places. Just as we Americans stand opposed to all democracy in name alone, we shall also stand opposed to all forms of tyranny, even barely powerful constitutional monarchy. We shall not recognize any democracy with any monarch or president(s), even if the monarchy is "merely symbolic" or that has no powers. How much easier it will be to re-institute a dynasty of frontman dictator kings with absolute power once there already exists a dynasty of kings (powerless as they may be).

6/ Our nation shall from now (after the inception of this Constitution) consider all monarchs, presidents, chancellors, czars, kings, governors, prime ministers, theocrats, and oligarchs, elected or not, hereditary or not, sovereign or powerless in any part of the world as tyrants and a potential Hitler that may yet start another war and kill millions of innocents. Our nation shall regard all such tyrants and their administration in any part of the world, as the enemies of freedom and free men everywhere.

7/ We shall enshrine the famous words of Tullius Cicero about his contemporary, his namesake and his historical doppelgänger Julius Caesar (indeed, the two died 98 days apart): "Do not blame Caesar, blame the people of Rome who have so enthusiastically acclaimed and adored him and rejoiced in their loss of freedom and danced in his path and gave him triumphal processions. Blame the people who hail him when he speaks in the Forum of the 'new, wonderful great society' which Rome will now become. Most interpreted this to mean 'more money, more ease, more security, more living fatly at the expense of the industrious.'"

These words are about Julius Caesar, the seizer who seized the democratic Roman republic. Then he instituted a dictatorial Mideast-fronting empire. This was staffed by "Greek" (Mideast) slaves supposedly owned by the Roman government, but instead loyal to the Mideast from where they came from. These "Greek" (Mideast) slaves also ran the Roman latifundia corporations that also fronted for the chronically desperate Mideast and the ancient union of the poorest people on earth.

And this government was somewhat socialist or communist then as today, judging from the underlined text just above. But Caesar the seizer died and then he bequeathed the empire to his adopted nephew Octavian. This name Octavian, means "8-way" like the Islamic star, or compass rose, or the house of 8-gables. And this name was apparently problematic, so they changed it to Augustus. But Augustus was the 2nd of around 90 Mideast-fronting Roman emperors that would rule the Roman front empire for its Mideast parasites for more than 600 years.

There are actually several ancient books that show how the Mideast and Ishtar have been pushing for

communism since ancient Greek times at least. Ishtar is well experienced with all effective arguments in favor of the collectivism that it will surely steal from. For it is always much easier to steal from a giant banquet than a family meal. We would all be wise to regard Communism as primarily something that increases stealing for Ishtar. For this reason, we shall have penalties for those who advocate the various forms of communism and collectivism and tyranny in all their disguises. In other words, the right of free speech shall not necessarily include the right to advocate communism, or collectivism, or totalitarianism, or tyranny, or the collectivized versions of socialism.

8/ We shall enshrine the following words from Hesiod, Theogony 104 about communism from around 700BC. Thus, we realize that the Arab-fronting communism scam is over 2,700 years old. : "Tell us the origin of the first gods, the Earth, the rivers, and the endless sea, with its raging swell, and the gleaming stars, and the wide heaven above, and the gods who were born of them, givers of good things, and how they divided and shared their wealth, and honors"

9/ We shall enshrine the ancient words of Polybius about communism: "They don't actually cultivate the land, but instead live on meat, milk, and cheese. They have neither private ownership, nor exclusive enjoyment of land. Instead, an annual distribution of it [the land] is made by local chiefs and their officials, who determine both which land and how much land is apportioned to each class and clan. Every one of these groups being required to move elsewhere [each year. Thus people were unwilling to invest in any sort of land improvements, because they would have to give their property back. So there was little surplus to compete with Mideast interests. Thus we see communism as a thing that is fostered not by the host nation and its needs, but for the benefit of the foreign parasite. The foreign parasite typically uses communist front authority to seize control of all sorts of private property. And all the money flows through to the parasitic/Islamic/Ishtarian force that is quietly behind the communist front government.

10/ Our nation shall strongly oppose both communism and fascism. But of the two, we shall see communism with its promise of redistribution of confiscated booty to its supporters as a much bigger threat than fascism, which is quite obviously just a rebrand of authoritarian monarchy, which is widely hated worldwide.

11/ We shall enshrine the ancient words of Juvenal (4.26) about communism and foreigners changing the land ownership system so nobody invests in their land: "Lands proportioned to their own number are appropriated in turn for farming by the whole body of farmers. They then divide them among themselves according to rank; the division is made easy by the wide tracts of cultivable ground available. These plough-lands are changed yearly, and still there is enough and to spare. The fact is that although their land is fertile and extensive, they fail to take full advantage of it because they do not work sufficiently hard. They do not plant orchards, fence off meadows, or irrigate gardens; the only demand they make upon the soil is to produce a corn-crop."

12/ We shall enshrine the following words about Arab-fronting communism and Arab-fronting monopoly power from Procopius', Secret History, 26.35, c.565 AD: "There was one

Hephaestus [the Greek god of fire, forging metal and arms merchants]. He started by bringing all the shops in the city under a 'monopoly'. banning all other merchant from this industry, and making himself the one an only supplier. Then he began selling commodities of every kind, setting their prices [as he wanted]. His administration took Alexandria, which until now, even the very poorest could afford, and reduced it to the brink of famine. They felt the pinch most of all through his manipulation of the food supply. For he kept all the purchasing of grain from Egypt entirely in his own hands. He allowed nobody else to sell so much as a single bushel. In this way he controlled the supply of bread and the price of a loaf to suit his own convenience. So he soon amassed unheard-of wealth himself" [Rather in his name as an Arab-fronting rich man figure.]

13/ We shall enshrine Aleksandr Solzhenitsyn's great words: "How is it that people who have been crushed by the weight of slavery and cast to the bottom of the pit can find strength to rise up and free themselves...while those who soar unhindered over the peaks of freedom suddenly appear to lose their taste for freedom, lose the will to defend it, and, hopelessly confused and lost, seem to almost crave slavery."

14/ We shall enshrine Aleksandr Solzhenitsyn's great words about communism However this also describes Islam perfectly: "All Communist Parties become completely merciless when they come to power. But at the stage before they achieve power, it is necessary to use disguises"

15/ We shall enshrine Aleksandr Solzhenitsyn's great words about both communism and Islam: "The Communist leaders respect only firmness and have contempt for persons who continually give in to them."

16/ We shall enshrine Aleksandr Solzhenitsyn's great words about both communism and Islam: "Communism has never concealed the fact that it rejects all absolute concepts of morality. It scoffs at any consideration of 'good' and 'evil' as indisputable categories. Communism considers morality to be relative, to be a class matter. Depending on circumstances and the political situation, any act, including murder, even the killing of hundreds of thousands, could be good or could be bad. It all depends on class ideology. And who defines this ideology? ... A handful of people determine what is good and what is bad. But I must say that in this respect Communism has been most successful. It has infected the whole world with the belief in the relativity of good and evil. Today, many people apart from the Communists are carried away by this idea."

17/ To make democracy, freedom, and rule of law into something fierce and frightening to the tyrants of the world, the Senate shall have the power to declare tyrants as "Odious Rex", meaning hated king. This is from after Sophocles play Oedipus Rex with its adulterated title. Thereupon, (after the Senate elects foreign leaders as tyrants), all the people of our nation shall be duty-bound to kill these people if they can get away with it, or if they choose to sacrifice themselves. When someone takes the shot, or makes the ultimate sacrifice, we shall treat this person as a true war hero and give equal benefits to spouse and children, as well as housing on the nation's high-security residential, and extreme public service retirement islands.

18/ At some point in the next decade, the Senate shall tighten

our nation's definition of tyranny to include democracies more leveraged than 1-in 100,000 at their narrowest point.

19/ Everyone in our nation shall be required to struggle to do what they can against tyranny, Ishtar, parasitism, and the enemies of freedom. We Americans are 300 million from every race on earth. We are the ultimate infiltrators, and our people will now come for all the world's tyrants wherever they are. These men are advised to resign, confess and seek asylum on our protection island of Kauai. These tyrants are all hereby put on notice that the free people of the world will come for you unless you resign and confess all.

20/ The Senate shall generously reward those freedom lovers who take the shot, and kill the people it elects as tyrants for the cause of freedom and democracy. These agents of freedom, and their families shall be given new identities, housing, and up to 100-year's wages. They shall also be given the option of living on Kauai, our witness protection, and surrendered tyrants protection island.

21/ We shall drive worldwide change with regard to monarchy the same way California foolishly drove worldwide change with regard to vehicle emissions. We shall uphold very high standards for political purity and eliminate all forms of monarchic and oligarchic corruption worldwide.

22/ One of the greatest strengths of broad democracy stems from how there is less reliance on leaders, and how monarchies and oligarchies are many thousands of times more vulnerable to assassination than broad democracies. Thus we recognize that our democracy will prevail in a war of leadership assassination, and with much less carnage than in military war. Thus we shall regard assassination as one of the easiest and most direct ways for democracy to end tyranny, front-man-rule, and odious-rex-style parasitism, and to greatly reduce war.

23/ Part of the American way shall be to struggle to make the entire world free of monarchs, and oligarchs. We shall do this by making everyone in the world afraid to be a monarch or oligarch or one of their helpers. The killing of all tyrants and oligarchs on earth shall be the #1, head and shoulders strategic, military and foreign policy objective of our land of the free.

24/ Our primary duty to the cause of freedom and peace on earth include:

a/ Killing tyrants and front-man-rulers when they can.

b/ Treating tyrant killers has heroes of liberty.

c/ Helping tyrant killers to escape and hide.

d/ Offering tyrant killers and their families new lives and generous rewards.

25/ Our international intelligence agency shall concern itself primarily with overthrowing tyrannies and oligarchies around the world, by whatever means until these are no more. Then, we will help the people of that nation have an election of their own where they decide on their own about their new Senators. This should be a prime way that our land of the free eternally augurs towards liberty. Getting rid of tyrants, should be a large part of our military strategy and foreign relations strategy.

26/ With regard to foreign tyrannies, our mottos shall be "Remember the lesson of Yorktown", and "arm the disarmed". And our nation shall go out of its way to help other people and other nations struggling to liberate themselves from

tyranny. Our nation shall always aim to have surplus arms ready, so it can arm emergent democracies and help them to liberate themselves from those who rule over them by threat of force.

27/ No public property, road, district, facility, or holiday, or fictional citizen in the land of the free shall contain the malignant and evil name of king, caesar, czar, emperor, lord, majesty, royal, imperial, president, pope, saint, or any other name related to monarchy, religion, or dictatorship. This shall also include people who happen to have the names King and Caesar. All streets that are today named king shall be change to Brotherhood Way, and all streets named Caesar shall be changed to Equality Way. There shall be no children's media for kids under age 18 that talks about kings, dictators, caesars, or oligarchies in any way but a clearly negative way. There shall be no people named King, or princess or other confusing names, such as military, rank, or sergeant or commander or anything that implies that the person has some elevated status.

28/ The absence of democracy shall be seen by our nation as tyranny.

29/ No foreign leader shall be addressed by anyone serving in our government with any royal title or the words majesty, excellency, or highness, or similar foot-kissing words. Monarchs and oligarchs shall not be allowed to enter or leave our nation.

30/ No communication from our Senate to another nation shall be addressed to any individual but only to the people of that nation. People can however be named in an attention line.

31/ The Over-Senate shall establish the official name of all foreign nations. All such names shall be required to be accurate. The word democracy shall only be used for nations that are proper broad democracies with more representatives than 1-in-25,000 in their narrowest house. The word republic shall now be reserved for monarchies with tricky and illusionary systems of checks and balances. All dictatorships and oligarchies shall be called "Red", as in Red Korea, Red China, Red Iran, etc.

32/ We free people shall stop warning the most obnoxious and refractory tyrannies before we strike them, and we shall have very thin skin. We shall be the ones with the demands, which shall be many and vague, and made under constant threat of 3am stealth surprise.

33/ The practice of selling public offices to the highest bidder, who then squeezes the people for whatever they can extract, this practice shall be considered a hallmark of tyranny.

34/ We shall long ponder the words of Aristotle:
a/ "The guard of a [real] king is comprised of citizens, but the guard of a tyrant is composed of foreigners."

b/ "It is also a habit of tyrants to prefer the company of foreigners to that of real citizens at table and in society. They feel citizens are their enemies but foreigners will offer no opposition to them.

35/ The word assassin is an Arab word. It comes from Hashish-ins. Basically they would get some victims addicted to heavily opiated hashish and then when the victim was in withdrawal, he would become as brave as a addicted-robot in order to get his fix.

36/ Kleptocracy shall be seen as a milder subset form of tyranny, where the injury to the people is minimized to the point where the stealing overshadows the injury to the people.

37/ Our people shall consider it their personal responsibility to freedom that they help assure both the right of free speech and the right to be armed all around the world wherever practical. To this end, we shall stand ready to provide the entire world (and every nation of the world) with truthful, and unbiased political information sharing outlets for their nation. We shall also stand ready to arm many other nations when they have had their arms seized by their government.

38/ Ishtar evolves to use all the doors to power, influence and money it can find: education, publishing, police, criminal courts, constitutional courts, military, mafia, corporations, religions, celebrities, charities, TV, newspapers, search engines, social media, talk radio, insurance, finance, credit reports, food supplies, healthcare and more. Also Ishtar is behind both communism and the fascist response to communism in the right hand.

39/ Islam shall be regarded as a deceptive, lies-about-itself, committed-to-darkness, enslavement religion bent on power accumulation in the name of the ancient union of the poorest people on Earth. Nobody should ever believe anything that the so-far-immortal demon Ishtar says about itself. In fact what Ishtar says is much more likely to be a lie than it is to be the truth.

40/ Ishtar/Islam shall be thought to be the main behind-the-scenes force pushing for endless incursions into our dear rights. And the more beloved our rights are to us naturally, the more Ishtar hates these rights, Ishtar which batters on the misfortune and loss of its hosts. Interesting word that is, Batten, to prosper from the misfortune of others. We must use this word, for it protects us from those who would batten on our misfortune, here in the land of the free. So it is always Ishtar pushing for us to give up our arms by whatever mind tricks they are now using. And we are always vulnerable to front leadership that would force us all to lay down our arms instead of immortally saying "Molon Labe", or come and take them as the ancient Spartans said to the same request by the same Mideast race. Hopefully this section will help make our constitution more idiot proof with regard to future frontman trying to give away our dear gun rights.

41/ We shall ponder the words of Thomas Jefferson about slavery in our nation, from his first draft of our Declaration of Independence, before this section was vetoed by slave-owning Georgia and South Carolina: "he [the English king as front man for the Mideast] has waged cruel war against human nature itself, violating it's most sacred rights of life & liberty in the persons of a distant people who never offended him, ~~captivating~~ [capturing] & carrying them into slavery in another hemisphere, or to incur miserable death in their transportation ~~thither~~ [to here]. This piratical warfare, the opprobrium [disgrace] of **INFIDEL** [Muslim] powers, is the warfare of the **CHRISTIAN** king of Great Britain.

Determined to keep open a market where **MEN** should be bought & sold, he has prostituted his negative [veto] for suppressing every legislative attempt to prohibit or to restrain this execrable [appalling, awful] commerce [in slaves] ...he [the English king as frontman for the Arab

empire] is now exciting [agitating] those very people [the slaves] to rise [up] in arms [from] among us, and to purchase [back] that [same] liberty of which he has deprived them [of]....murdering the people upon whom he also-obtruded them-[forced them upon]; thus paying off former crimes committed against the liberties of one people, with crimes which he urges them to commit against the lives of another.” [In other words, the English figurehead king secretly fronting for the Mideast offered to restore the freedom to the slaves his side had captured, transported and sold to the Americans, if these slaves would rebel against the Americans and their efforts to be free from Ishtar. Here we see one of Ishtar's many matrix lies that it uses to cause strife and warfare among its enemies.]

42/ We shall ponder the words of John Hancock: “Some boast of being a friend of government. But I am only a friend to righteous government, to government founded on the principles of reason and justice. however, I glory in publicly avowing my eternal enmity and hatred of tyranny.”

43/ We shall ponder the words of Benjamin Franklin: “In free governments the rulers are the servants, and the people are their superiors and sovereigns.” Also: “When you abandon freedom to achieve security, you lose both and deserve neither.”

44/ We shall ponder the words of Thomas Jefferson: a/ “The issue today is the same as it has been throughout all history, whether man shall be allowed to govern himself, or to be ruled by a small elite.”

b/ “Experience shows that even under the best forms of government, those entrusted with power have, in time and by slow operations, perverted it into tyranny.”

c/ “Who will govern the governors? There is only one force in the nation that can be depended upon to keep the government pure and the governors honest, and that is the people themselves. They alone, if well informed, are capable of preventing the corruption of power, and of restoring the nation to its rightful course if it should go astray. They alone are the safest depository of the ultimate powers of government.

d/ “The purpose of government is to enable the people of a nation to live in safety and happiness. Government exists for the interest of the governed, not the governors.

e/ “The end of democracy and the defeat of the American Revolution will occur when government falls into the hands of lending institutions and moneyed incorporations.”

g/ “When tyranny become law, rebellion becomes duty.”

h/ “The tree of liberty must be refreshed from time to time with the blood of patriots and tyrants.

i/ “We have more machinery of government that is necessary. Too many parasites living on the labor of the industrious. Government big enough to supply everything you need is big enough to take everything you have. The course of history shows that as a government grows, liberty decreases. The two enemies of the people are criminals and government, so let us tie the second down with the chains of the constitution, so the second will not become the legalized version of the first.”

45/ We shall ponder the words of Edward Abbey that: “A true patriot will defend his country from its government.” Edward Abbey

46/ We shall ponder the words of William Pit the younger who echoed the sentiments of Thomas Jefferson: “Necessity is the plea for every infringement of human freedom. It is the argument of tyrants, it is the creed of slaves.

NR'5. CITADEL RIGHTS OF THE PEOPLE

1/ The people shall have the right to:

a/ Safely say, watch, read about, listen to, and print what they like, so their democracy can make informed decisions.

b/ Bear arms, and defend themselves against criminals, foreign invaders, home invaders, and those in their own government who might forcibly seize power.

c/ Assemble, organize and

d/ vote and re-institute their government.

e/ If a democracy lacks any one of the 4 things above, the democracy may be doomed to failure. Therefore, these first 4 rights shall be considered citadel rights, rights that lie at the core of this Constitution. These rights shall never be infringed-upon to preserve any other right, public or private. Come terrible events as they may, we shall never compromise these citadel rights in any way.

2/ Free speech, right to bear arms, right to organize, and the right of the people to have elections. These four things shall be regarded as citadel rights that are above all the other rights. These are rights that cannot be altered or suspended without instituting a whole new constitution. This includes all epidemics, all wars, all insurrections, all uprisings, all invasions, all treaties and all other forms of crisis or event.

3/ Regarding our 4 core citadel rights, these shall only exist for the citizens of our nation. Whenever foreigners do any of these 4 things, they shall be thought to be taking these rights from the organic voice and power of the people, the citizens of our nation, and jamming our democracy.

4/ Additional safeguards may be added to our citadel rights, and existing safeguards may be improved, But the citadel rights herein shall not be substantially diminished or diluted without instituting an entirely new constitution.

5/ Furthermore, the right of free speech shall not include:

a/ The right to call for the suspension of the right of free speech.

b/ The right to call for suspension of the right to be armed, or to call for firearm/ammo confiscation.

c/ The right to call for the suspension of the right to assemble or protest.

Those in government or the media who call-for, or speak in support of measures that limit the right of free speech or firearm possession, or free assembly shall be considered traitorous, and may be charged with democide.

6/ We will certainly have well-respected leaders in the future, but never should these men have any powers over our nation that even take one step towards monarchy or dictatorship.

We shall never weaken our democracy in even a minor way to give one man more power. No special powers for anyone, ever. We shall give our smartest our ears and listen to them if they say smart things, but always, the group mind must decide in an intelligent and un-biased way about the group course of action. Also, future generations are especially warned to never allow their great men to have protégés or chosen successors, as this path leads to a dynasty of

Caesars and national enslavement.

7/ Our nation won its independence from Great Britain and shall not pay or owe anything to Britain or any of its successors or assignees, or related entities for any old debts. We are a completely independent country, and we shall have no laws of Britain going forward, except those the Senate elects to add to our system that are not in conflict with this constitution.

8/ All citizens not in jail or prison, or in legitimately required quarantines shall always have the right to do any or all of the following, and no act of the Senate shall ever restrict any of the following:

a/ To travel and move about freely in their nation, and in and out of their nation, and to go out of their homes and workplaces and go around their community, or use various means of individual and group transport. Also to travel to all other public property parts of the nation, and to leave the nation. Government shall be prohibited from limiting how much a person can travel, either by air, rail, bus, personal vehicle, or by other means of transport. However government may tax the use of personal automobiles, and in particular double-wide and wider vehicles in various ways to drive the nation towards energy efficiency and reduced pollution. Also, the people shall be free from universal lockdowns that prevent travel or make travel difficult.

b/ To work and engage in commerce, and buy things and sell things. Everyone not in jail (even foreigners) shall have this right.

c/ To keep their businesses open. No act of the Senate shall shut down everyone's business or any essential segment of the economy.

d/ To meet and talk to one another about anything or nothing.

e/ To associate in groups of any size.

f/ To hide people fleeing from arrest for political crimes under a tyranny.

g/ To bodily autonomy and to refuse any medical treatment, vaccine, drug, implant, chip, cybernetics, android tech, brain implants, brain monitoring, etc. Also to be free from unwanted, uninformed, non-consensual, or forced medical treatments, injections and vaccines.

h/ To refuse to carry, let alone implant any tech. Also, no electronic implant or tattoo shall ever be required for any financial transaction or any other access by citizens. However, citizens shall always have the right to use either a microchip card, or an application. All implants including chips and electric tattoos shall require FDA approval.

i/ To have money and to spend that money as they see fit.

j/ To have friends, and to meet with people, to couple with people, to have sex with people, to marry or not marry, to have children with any unrelated male or female, even if they are not married or even acquainted. Also to marry any adult they mutually choose to marry, who is not already married to someone else, and not a blood relative.

k/ To generally raise one's children as you see fit, within having to give an explanation, and to be relatively free from government intrusion in these matters, provided the children can pass the placement test normally required of children that are of their age, and they are not abused physically or sexually.

l/ To use any reasonable and safe means of birth control and

without any sort of taxation or expensive fee for this.

m/ To eat meat as they like, for a land of meat eaters is a good thing. These men are not only less docile, and healthier, and better defenders. Also, an agricultural economy that is also supporting a large and hungry ranching/ meat industry is much less vulnerable to any form of grain famine or agricultural crisis. For all they have to do is cull their flocks and this alone multiplies their net food output. Vegetarianism should be regarded by politically savvy people as a form of voluntary enslavement to those who would cause famines.

n/ To never be driven into poverty by the money court system. If they are rich, they can only be made average by the money court system. And if they are average, they can't be made poor by the money court system.

o/ To never be locked or welded, or bolted inside their home. Also, even government shall not have the right to block required fire exits of buildings.

p/ To access the internet freely and without censorship or mind games, or threats from government or anyone else.

q/ To live in a world free of censorship and snooping in our homes and on our communication platforms.

r/ Except for a few agricultural practices and crops prohibited for good reason, and soil and water sustainability issues, to grow foods as they like without any sort of government intervention.

s/ To use a government that charges no fees for any of its permits.

t/ To bodily autonomy, including the right to refuse any medical treatment without stating a reason.

u/ To access all forms of contraception that are not harmful.

v/ To defend one's home against invaders and to shoot these when they come in.

9/ In addition to the above citadel rights, the following shall also be considered as citadel rights:

a/ The right to work and trade and earn a living without excessive government involvement or permissions.

b/ The right to be free from income taxes if the person is in the bottom 97% of earners. Our nation has already been down this path before with its first institution of income taxes. We shall not make this mistake again, and those who work to expand the use of income taxes beyond the top 2% may be charged with corruption for seeking to widen the percent of the population affected by industry harming income taxes.

c/ The right not to be conscripted into the military except by birthday lottery and the right of militiamen not to be conscripted into foreign wars due to their militia training.

d/ The right of the people to issue their own currency and that never shall anyone but the public treasury be in the wildly profitable business of issuing money for our nation or borrowing on behalf of our people. We shall no longer have any private central bank.

e/ The right vote each year, and the right to keep all immigrants and criminals from voting.

10/ Democracy itself shall be a citadel right of all free people. We shall ponder the great words of Rosa Luxembourg here:

a/ "Without general elections, without unrestricted freedom of press, and assembly, without a free struggle of opinion, life dies out in every public institution, and becomes a mere semblance of life, in which only the bureaucracy remains as the active element."

b/ "The most revolutionary thing one can do is always to proclaim loudly what is happening".

c/ "Those who don't move, don't notice their chains."

d/ "Freedom is always the freedom of the one who thinks differently. Not because of any fanatical concept of justice, but because all that is instructive, wholesome and purifying in political freedom depends on this essential characteristic, and its effectiveness vanishes when 'freedom' becomes a special privilege."

e/ "My dear, it is very nice here. Every day, a couple people are stabbed by [Nazi] soldiers in the city. There are daily arrests, but aside from these things, it is quite festive here.

11/ The right to Due process is mentioned twice in the 2nd US Constitution of 1789. And this right shall be considered inalienable. When two parties agree to non-Government arbitration, this shall not be binding, especially where the larger of the two parties is selecting the arbitration providers. Otherwise all the fictional citizens and big players will always choose arbitration and due to their extensive relationship with the arbitration people, they will generally win in all disputes.

12/ The following shall also be citadel rights in addition to the foregoing citadel rights herein:

a/ The presumption of innocence.

b/ The right to due process and regular treatment and consistent enforcement under the law by Government and the court system.

c/ The right to not talk to police officers or investigators.

d/ The right to safe and monitored criminal lockup.

e/ The right to a public trial and open Government procedures and proceedings.

f/ The right to remain free pending trial unless there is undue risk that the accused will either harm someone else or run away.

g/ The right to a speedy trial with nobody able to delay this process from within the judicial system.

h/ The right to be tried by a Senate jury of appropriate size.

i/ The right to self defense with regard to crimes, and this particularly within one's own place of residence and particularly with house breakers and at night.

j/ The right to shoot intruders in your house, whether or not you arrive back before they came.

k/ The freedom of religion that is the freedom from all religions making any threats or any demands at all on the people.

l/ The right to engage in commerce without excessive government permissions.

m/ The right to keep your money banked directly with the government.

n/ The right to own property and make deposits via a trustworthy system for recording property ownership rights and deposits.

o/ The right to keep the profits you earn from your life's work, free from an income tax. This except for the people in the top 3% of earners who are excluded due to the network effects of wealth.

p/ The right to be free from little brother power from fictional citizens.

13/ For meek religions that seldom use violence or aggressive words, the freedom to harmless practice one's religion shall normally be guaranteed. For aggressive

religions that often use violence and aggressive words, the freedom of religion shall not be guaranteed at all. Also, the freedom of religion is a right, but it is far from a citadel right, and this especially where the religion is both global, and it has a full time staff, and especially a full time staff managed from overseas.

14/ There shall be a right on the part of the people to use deadly force upon those tyrants who rule over them by deadly force or threat of deadly force, such as Saddam Hussein.

15/ The national Senate shall have the power to make laws, policies and regulations about citadel rights and other rights herein, provided these new laws, policies and regulations do not infringe upon any right herein. However the county Senates shall not have any power to make any laws, policies and regulations about citadel rights.

16/ Just to be perfectly clear, all lending money for interest shall be perfectly legal in our nation, and this shall be so forever until the end of time. Also, those people pushing for anti-lending laws and independent central banks should be regarded as traitors by good and honest people.

17/ Non-citizens shall not necessarily be entitled to due process. Also, apparent illegal aliens may be deported at any time without a hearing if they're not in our citizen or immigrant Identity system. In other words, when government seeks to deport apparent illegal aliens who cannot identify themselves and prove status, there shall be no hearing. This shall be so due to the utterly insignificant consequence of being deported, which is less inconvenient to citizens and legal immigrants than being detained in jail for a few days pending a hearing.

18/ Every adult citizen of sound mind shall be considered to have a fundamental right to govern himself, or herself, and do what they want, as long as what he wants to do doesn't cause harm, or damage, or distraction to another citizen's life, body, property, or privacy. Each citizen shall be considered to have an equal set of rights to their own life, body, property, and privacy.

B — MEDIA & TECH RIGHTS

NR'6. NETWORKS

1/ Because virtual networks are orders of magnitude less expensive than real world infrastructure, government shall provide a large amount of network access and network facilities for free. And because Government is providing free network access, there will much less need for the identity information of users, and as little as practical shall be collected.

2/ The internet and telephony services of Government shall not be run by the public to maximize revenue, but to cause as many people as possible to communicate virtually, rather than going on the roads and using real-world infrastructure. Thus these real world activities will cost society one to two orders of magnitude less to accommodate.

3/ All electronic service providers, communication platforms, message posting websites, social media websites, vending websites, and other public place websites shall be required to treat all content of similar bandwidth equally. None shall filter, favor or discriminate against one sort of content over another of the same bandwidth. None shall block websites or provide certain content at faster speeds.

4/ If people can say things anonymously and without fear, the group mind will get more ideas, more crazy ideas, more good ideas, more crime tips, and the group mind will be smarter.

5/ If we do a cost/benefit table for a totally-tracked vs. totally-untracked internet, we will find that all the costs are hugely important things related to free-speech and the intelligence of the group mind. This while all the benefits of a totally tracked internet can be gotten around by determined bad guys. Therefore we should aim for a totally untracked internet where possible.

6/ Interface device anonymity is one of the most important aspects of free speech in a modern world with a searchable internet. Government must allow, support and help preserve anonymity in internet access and internet interface devices. Government shall make no law requiring verification of identity to access the internet, or to send and receive electronic messages or streams. Government shall also protect the people from business practices that unnecessarily require verification of identity to access network services.

7/ Neither Government nor anyone else shall mark the people with biomarkers, chips, or tattoos without their consent. However these things may be made a condition of certain foreigners entering and remaining in our nation. These things may also be a condition of felons being released from prison.

8/ No payment platform or identity verification system for ordinary citizens shall be allowed to use any implanted chips or biomarkers, or other things implanted in the body or permanently tattooed on the body.

9/ Police and communication service providers shall not snoop on the verbal or text communications of the people without a separate warrant for each person snooped on.

10/ It shall be a felony when fictional citizens keep, aggregate, or share dossiers on their customer's lives outside of their relationship with that particular fictional citizen.

11/ The Senate shall compile a master list all sorts of data that people have previously collected, or they have tried to collect. Then the Senate shall say of each item whether it may be:

a/ Freely collected,

b/ Collected with a simple permit on the promise from the collector.

c/ Collected with a more complicated permits and with monitoring of the data collected.

d/ Not collected ever.

12/ For humans, the unauthorized, illegal collection of data may be considered as sort of spying activity for all involved, depending on the nature of the information and the number of victims, and if a foreign government is connected.

13/ Highly regulated, and often costly permits shall be required for when fictional citizens collect data from customers and users. Failure to obtain a permit in advance may result toxic waste sized fines for the FC. When foreign companies and foreign countries are behind the data collection/spying, the entire nation behind the company may be forced to pay a fine to continue to sell into our nation and to use our sea sphinxes.

14/ The Senate may use reasonable means to force other nations with tele-criminals to extradite these criminals. These may include illegal data harvesters spying on our nation, as well as other criminal online enterprises such as scamming call/email centers, hacker houses, and various other scams. Where it is impossible to take action via the government of that nation, the Senate may elect to take airstrikes on those criminal overseas facilities in that foreign lawless nation.

15/ Fictional citizens shall generally be prohibited from either producing or keeping files or dossiers on people who are not either their employees, or customers.

16/ All web browsers shall have the following functions available via the number of clicks indicated from any page:

a/ Delete all temporary and local files and restart browser (2 clicks).

b/ Block certain URLs from opening. Blacklist certain websites for immediate cookie deletion upon leaving that site.

Also whitelist certain websites so that their cookies are not deleted with everything else unless the delete all cookies button is clicked. (3 clicks)

c/ Copy image (2 clicks).

d/ Record video (2 clicks).

e/ Prevent all page reloading without approval of user (2

clicks).

f/ Block notifications and popups from all websites visited without approval of user(3 clicks).

g/ Monitor, view, and give permission for all outbound communication destinations and the the data sent. (3 clicks)

h/ Hide all navigation and command bars function.

i/ It shall be possible to restart and totally reset all web browsers from the OS level the way Safari on MAC works.

This shall delete all temporary files.

j/ No web browser shall allow for the re-direction of web-addresses without clicking a popup consent button.

x/ No more software updates shall be allowed for browsers that can't put all of the above within the required number of clicks/taps as indicated.

17/ After 2028.01.01, all new devices with a software browser shall also have a hardware web browser that cannot be reprogrammed. All web browser temporary files shall be deletable from within the app with no more than two taps while the browser is open. However the temporary file folder shall also be deletable from outside the browser. Also it shall be possible to delete all the temporary files for one browser window. While keeping those for other windows.

18/ All web browsers must have a single button for deleting all their temporary files.

19/ It shall be considered felony espionage to produce web browsers (or other programs) that secretly gather user information. These should all get many decades in prison when they are caught.

20/ All browsers and all social media "clients" shall have a function so that they can block certain websites and certain individuals regardless of the accounts they open. If a person's browser doesn't match the cookies don't match the addresses of the websites you visit they're automatically deleted.

21/ There shall be no in-game transactions, or gambling for people under age 21. Also, where people spend other people's money, including stolen money and misappropriated money on in-game transactions or gambling, the platform must return the money. To reduce fraud, all money exchanged for internet views or Content generation, or any other online reason shall be paid via the county recorder system's ID verification system as trusted intermediary. In general, social media accounts may not be legally sold or transferred as this edges into a backdoor for corruption and corrupt influence buying.

22/ Regarding temporary network files, or "cookies":

a/ All devices and applications shall have 5 sorts, save forever, save for a week, save for a day, save for 1-hour, and save for 15 minutes unless renewed subject to prompting. Except for the last two sorts of temporary files, the user must acknowledge for the temp file to be accepted.

b/ It shall be a crime for websites, programs, operating systems, or hardware devices to place third-party cookies, and third-party files (either temporary or permanent) on people's devices without describing and asking for approval for each such temporary file.

c/ All web browsers must support two click deletion of all temporary files from the main window. All operating systems must support three click deletion of all temporary files from the main window.

d/ It shall be a crime to intentionally create or place temporary files that do not actually delete, and this shall be considered a form of hacking. Websites, programs, operating systems, and hardware companies hacking their customers may be closed down temporarily, or if the practice is repeated, they may be closed down permanently.

e/ No operating system, web browser, or hardware device shall allow one website to know which other websites a user visited (except for the addresses immediately before or after).

f/ Websites shall not give more than one temporary file to each visitor.

g/ It shall be a crime for unrelated websites to put cookies on browsers, or for people to help with this.

23/ Regarding AI:

a/ All operating systems and AI systems shall be open source and separate things.

b/ All AI systems shall work upon an operating system that must work exactly the same without the AI.

c/ It shall be possible to instantly disable all AI's at the operating system level and then completely uninstall the AI in less than 30 minutes.

d/ All AI's can be changed-out with other AI systems.

e/ All AI technology must be licensed.

f/ There shall be no AI systems designed to commit any criminal or nefarious act such as putting a person's face on someone else's nude body.

f/ Tech companies shall not be allowed to have secret information about the way their software works, this should be considered anticompetitive.

24/ The six most popular video streaming websites shall be thought a thing for pure human communication and these shall not be allowed to run advertising or PR, or produced messages, or presentation videos from fictional citizens. Also, these websites are not allowed to link to the FC's website, or some third party website running media or ads for the FC. In general, all FCs shall be responsible for having their own platform in their own name.

25/ The six most popular video social media websites shall not be allowed to run the messages of fictional citizens either as fake human participants, or as advertisers. In general fictional citizens shall be responsible for having their own platform marketed in their own name. Also, where these websites link to the outside FC's website, or some third party website, this fact must be clearly disclosed.

26/ All non-Orwell electronic devices shall be prohibited from tracking or monitoring the people, or logging their location while they are ostensibly turned off or in airplane mode. All devices and software must go entirely off and not communicate with either external servers or other devices when they are ostensibly turned off or the software is ostensibly not in use. These shall also be prohibited from gathering data while turned off and later sending this data once connected to a network.

27/ Applications and websites shall not track users while they are not using the application or the website. Websites shall be prohibited from collecting data on users after they leave these websites unless this data collection is both necessary and specifically asked for in the settings.

28/ It shall be illegal to traffic in cookie data, or other forms of gleaned and implicitly non-consensual customer data. This

includes data from before this Constitution existed.

29/ All consumer information services shall permit the full removal of all account data displayed to the internet. This however does not apply to the old backups in long term storage. The Senate shall establish standards for how long various types of data may be stored by fictional citizens.

30/ All communications accounts shall have a settings button for excluding un-verified users. If a non-verified user tries to communicate with a user that only wants verified users communicating with them, the message will get returned as "verified users only" and the postage shall not be refunded. People may use aliases in their communication accounts, but their real names must be verified to make sure that they are not a bot.

31/ Destination URL's shall not be hidden, shortened, or disguised by any link. They may however be changed to a link button that displays the destination address with a mouseover.

32/ There shall be no anonymous social media postings and all identities of all posters shall be verified. No robot may post on an ostensible venue for free speech and human communication. It shall be a crime to program robots to spoof humans in any ostensible venue for free speech, or in any communication with humans. This shall include all spam and all spam bots.

33/ No person, party or IP address may change a WIKI page more often than once per day. Fictional citizens shall not be allowed to post to humans-only WIKIs. No non-Senate WIKI may describe itself as a Senate or official WIKI. Foreigners and foreign IP addresses shall not be allowed to post on domestic WIKIs.

34/ The rules of free speech shall not apply to the social media companies, but instead to the people posting content on the social media websites. This is for two reasons:

a/ The social media companies are not actually real people, and they are not entitled to the rights of free speech that real people are entitled to. On the other hand, the social media users are mostly real people, and these are often expressing 1st class free speech.

b/ The social media companies are not actually the ones making expressions of free speech, their users are.

x/ Therefore, Government shall see its role with social media companies as protecting the people from abuse of their free speech rights by the social media platforms they use.

35/ If the Senate elects that a social media system is either adverse to open and free communication, or adverse to our democracy, or corrosive to society, the Senate may require that social media system to change the way it functions under penalty of extreme shareholder equity dilution or shut down. The Senate may also require that social media systems change the way they do the following:

a/ Reward users.

b/ Prioritize and de-prioritize content.

c/ Censor content.

d/ Create an addictive experience.

e/ Display advertising.

36/ Where a social media platform steers viewers into some direction or other, it shall be prohibited from steering people towards sex, pornography, nude pornography, prostitutes, pretty people, music, music videos, games, travel,

architecture, or other things that are generally useless for society. Instead it must steer them towards useful things and educational things, unless the customer indicated that they want to see whatever useless subjects they have actively selected. Also, social media shall not allowed to display different comments to different people. There shall be only one stream of comments that everybody looks at it. These are important aspects of our social media as it grows into a productive and useful coalescent God mind.

37/ The Senate may censor the following types of content on social media platforms: dangerous stunts and challenges, violent pranks, fistfights, and media where copycats might be harmed, sex crimes, sexual assaults as well as sex acts, nudity, homoerotic media, and media directed at minors. Also all commercial and repeated spam messages on social media shall be required to pay postage, whether this postage is paid in advance or after the fact by government assessment. Also, it shall be a crime to place commercial spam in free speech venues.

38/ So far, no social media company has actually developed any significantly distinct or truly valuable invention for society. Also, as a group, social media platforms seem to be plagued with significant social problems like censorship, addictive and anti-social behavior in children, and school violence, among other problems. And these problems seem to more than counteract any minor benefits that social media have brought to society. Therefore, we shall say that the Senate shall have the power to nationalize, copy, permanently shut down, or fine any social media company it elects. However, if a social media company is shut down, half a year's notice must be given so that alternates can rise to take that company's place. The Facebook company shall get no money for any of its intellectual property rights. The Facebook company shall also cooperate with giving government all of its account information files, and all of what it does with that information. Failure by the Facebook company and its workers to fully cooperate shall be considered the crime of interfering with an investigation.

39/ If a 2/3 overmajority of Senators can discern that a social media company is biased, then that social media company must be shut down. This shall be temporarily at first, and then, after some warnings it shall become a permanent shut down.

40/ The Senate shall run its own free-to-use platforms for facebooking, twittering, instagramming, snap-chatting, Tic-Toking, video streaming, and slide streaming, among other uses.

41/ All social media shall index by subject where the Senate elects that this is practical. All social media posts shall have an original date of posting listed on all pages and even summary pages. All social media shall used different colors for offsite links and onsite links.

42/ No social media company shall run more than one platform of any sort. For example, the facebook, the instagram, and the WhatsApp must be run by separate entities. Search engines and social media companies shall not operate communication, messaging or email platforms. Also, major search engines, facebookes, mapping services, and certain other internet and real world utilities shall not be allowed to engage in commerce where they act as a

middleman or delivery/ fulfillment service. Global search engines and global social media companies shall be prohibited from offering services based on a person's physical location. Local search engines and local social media companies can however do this.

43/ All social media users shall be verified, however the username doesn't necessarily need to match the persons name, and people may have accounts in other names. Also, if the name on the account is the real verified name, it should be indicated as a real name, and if it's an avatar it should be indicated as an avatar. Avatar names are in red, Real names are in white.

44/ Regarding our nation's our nation's media, social media, media sharing, news media, email, texting, and all other systems by which our people communicate potentially political or economic information with each other: There shall be no foreign ownership, foreign management, foreign company parentage, foreign operation, foreign hardware, foreign communication lines, foreign administration, foreign staffing, foreign outsourcing, or foreign involvement with these things. Here, the term foreign shall include all people born in other nations. TikTok shall no longer be available in our nation unless we decide to clone it.

45/ There shall be no foreign communication equipment on our national communication networks.

46/ All communication infrastructure equipment shall be required to be open source software and hardware. All existing infrastructure shall be removed within five years of this constitution coming into affect.

47/ Activist organizations shall not be permitted to own, operate or administer social media systems or accounts. Also, activists and those loudly outspoken about any political cause shall not be allowed to work in social media companies.

48/ The Senate may require verified daily adult user login via video for social media that it elects as addictive or otherwise harmful. This is to prevent minors from sneaking on. Also, it shall be a crime to log-into an adult-only account on behalf of a minor, just as it is illegal to procure alcohol or pornography for a minor.

49/ The Senate shall attempt to foster a number of internet zones for kids of various school years, where older kids and adults are not able to communicate with them.

50/ No network service shall allow children to communicate with adults without parental ID and authorization. Those who operate network services that violate this rule shall go to prison. There's no road to riches this way. You will eventually get caught, and you will eventually go to jail for a long time.

51/ To disrupt the tactic of having addictive content for social media, computer games, and the like, the auto-payment system for the content providers shall have maximum daily payment per user per day for social media and other addictive content. This shall start at 20-minutes daily for people under age 13, 40-minutes daily for people age 13-18, and 60-minutes for adults. The Senate may adjust these time limits freely. Also, private advertising on non-government social media and other addictive content shall be subject to a 50% tax over non-addictive content. This at least to start. Wherever lots of people are saying: "gosh, this stuff is pretty addictive, then it's addictive". Also, Addictive drugs shall not

be subject to IP protection.

52/ All media players must have full functionality of play, stop, pause, fast forward functions in 15 or 30 second intervals, and time clocks to indicate where certain dialogue or certain activities in the video stream took place. Also, where the media is put down or stopped for a time, or if the application is re-opened, the player must begin playing from the same place as it was previously stopped.

53/ Where people enter one manufacturer, supplier, vendor, or business in a search engine, the top 3 returns must be to the actual subject of the search, and not to any competitors or Intermediaries. After these returns, the search engine may show competitors, intermediaries and other third parties in the search results page.

54/ Where fictional citizens are monopolists in some large aspect of the internet such as searching, or facebooking, and they have tens of millions of users: They shall pay a sales tax of at least 25% on their revenue. Where they are older than age 17, this tax shall be at least 50%.

55/ All search engine returns must:

a/ Accurately show the number of search return pages for that search term.

b/ Show a number-entry box at the top of the search return page that enable the user to jump to any subsequent search return page for that subject.

c/ Distinguish between purported fact, fiction, opinion, computer generated memes, and humor/satire. This is so we don't get (for example) search returns involving fictional characters and opinions when we're looking for facts.

d/ Automatically favor the original meme(s) or thing, which must always come up first.

e/ Show the date of the first instance of the meme or posting.

56/ Search engines may sell targeted advertising on the left third of their search returns page. However, they shall not be allowed to sell preferential or top placement in their search results page as this practice is not only corrupt, but it corrupts the group mind.

57/ Software update charges and recurring payments for software and hardware shall be subject to MECOT taxation when they involve a fee. All software delivered as a service shall pay MECOT.

58/ Government shall not require people to acknowledge or accept anything when visiting a website because this is an increased opportunity for inserting code.

59/ Only open-source software shall be used for Government systems, transaction systems, ratings systems, pricing systems, pricing algorithms, matching systems, auction systems, tweeting systems, social media prioritization systems, search engine systems, writing applications, email systems, ride-share assignment systems, and other software systems the Senate may decide to add. Also to be perfectly clear: There shall be no IP at all for the people doing anything for government. When you work for the people, the people get all ancillary rights to everything you make in the broadest sense.

60/ All verified personal email accounts must use the form Name, Surname, XXXXXX, YR, with the XXXXXX being a user selected available 6-digit number, and the YR being the person's birth year. Non verified email accounts shall not use this format. All confirmed Senators shall be able to use, and

are supposed to use a Senate email addresses, Senate tweeting address, and Senate facebook in addition to their other pre-existing accounts.

61/ It shall be a crime to offer the service of locating people except where there is an arrest warrant on the county recorder system, or the service is provided to a police force, or to the military, or national or county tax house. Those who locate people, or reveal people in hiding that are subsequently killed or injured once found shall generally be considered criminal accessories to those crimes.

62/ The people are supposed to pass along all plausible Sneaker-net messages and pass-along interface devices from stranger to stranger, sneaker-net style. When someone asks you to take a pass-along device, you are not supposed to look at them but you are supposed to look at the content carefully. If the content looks at all fresh and valuable, you are supposed to pass it on.

63/ To help hide our political thinkers, it shall be everyone's civic responsibility and duty to freedom and democracy to:
a/ Download a great deal of political, economic, and historical media files so nobody knows who is reading this stuff. Also to allow others to copy these files when asked.

b/ Buy communication equipment on behalf of strangers when asked and given pre-agreed-upon goods in trade.

c/ Sell (or give away their) old personal electronic communication equipment second hand for goods in trade or for anonymous money if this exists. All anonymous re-sales of this equipment may be freely bartered and sold tax free.

d/ Review all sneaker-net messages and pass these along if they seem fresh and reasonable.

64/ Where a communication device is discounted or subsidized by a communication service provider in order to gain a higher level of cash flow for the company, the ongoing cashflow shall be subject to MECOT.

65/ Where a communication device cannot use all service providers, or has to pay a new customer fee, then all charges shall pay monopoly sales tax of 80%.

66/ Where an electronic hardware device comes in many configurations, the price over the base price shall pay MECOT.

67/ All features of all application that can be delivered offline almost as well must be delivered that way. All network interfaces must be as client heavy as practical and as server light as practical.

68/ Government shall discourage and tax centrally delivered computing and software where possible due to the strategic and defense vulnerability that such systems create. This as well as the way that centrally delivered systems make our intelligentsia more vulnerable to genocidal purges and acmecide. Therefore all software sold as a service shall be subject to a particularly high rate of MECOT taxation. The Senate may also prohibit certain classes of centrally delivered software.

69/ All web browsers and all voice analytic software must reside on the client side exclusively. No web browsers or network interface shall be integrated with an operating system due to the security risk this causes. Social media companies shall not have their own browsers or provide any service that is like an internet browser, or track where their users go and what they do off the social media site. Violation

of these rules herein by fictional citizens may commonly cost those fictional citizens dilutions of equity in favor of the national government.

70/ Government shall do nothing to help guarantee the confidentiality of data or of intellectual property rights for any data service that is delivered in an unnecessarily centralized manner.

71/ No captcha process shall take more than 10 seconds to complete on average. Search engines and the most popular 30 web addresses shall be prohibited from using Captchas. All metadata collected by captchas shall be routed through the recorder's office and shall be public domain. Search engines shall not be allowed to return photos with watermarks of any size on them.

72/ Nobody shall ever take-over the personal network accounts of the people and assume their virtual identity. When Government does this, it creates a slippery slope that heads towards evidence fabrication and fake narratives. It also significantly undermines the value of all network communication as evidence. Better we say that nobody shall ever be allowed to take over someone else's network accounts and pretend to be that person. This includes Government, the network service provider, and everyone else. In other words, Governments not allowed to pretend to be the people on social media. This is related to the government prohibition on deceiving the people intentionally. Such activities must be regarded as a form of group mental illness, with some faction of the brain, the group brain acting to deceive the rest of the group brain for some reason

73/ If a social media post, or other posted information or advertising is is censored for a legal reason, there must be a notice of removal put in its place. The information cannot simply be deleted. This notice of removal must describe the exact nature of the material that has been removed, and provide a detailed and reasonable cause for its removal. The foregoing shall not apply to 2nd class free speech, but only 1st class free speech.

74/ Government shall not hack-into or take over any person's media accounts without a warrant. No warrant shall give Government the right to muddle, modify, fabricate, scramble, delete, or destroy the words and data of the people. Muddling, modifying and especially creating media in people's names is a thing that is pointed towards disaster. Government shall not spoof or impersonate individual real citizens. It shall be a felony for both Government and non-Government people to impersonate a distinguished political and economic figures.

75/ It may be considered democide when Government workers intentionally leak information, or dox the people.

76/ Network companies shall be required to keep network histories for one year, However, these must all be destroyed by 14 months. A search warrant shall be required for third parties to view this

77/ We shall regard social credit scores as a thing related to criminal convictions, house arrests, public service, work camp, and brief jail lockups. The Senate may also use them for foreigners, minors under age 18, and school dropouts. Social credit systems shall not be a thing of ordinary people and crimes that seldom result in jail time. The recognition of this approach, shall be regarded as a way of keeping social

credit scores, where they belong, as a court awarded punishment, or perhaps a thing for foreigners begging to enter our nation, and for refractory minors under age 18, and for secondary school dropouts while they are young.

78/ Regarding computer systems where the people are rewarded or punished for their behavior, the following rules shall apply in all cases:

a/ All reward systems shall use a well described open source design that must be approved by the Senate in advance.

b/ All changes to the system must be approved by the Senate.

c/ The reward system must conform to the Senate's design guidelines.

d/ There shall be no rewards or punishments without due process by. This due process must be administered by either randomly assigned public arbitration, or the courts.

e/ Nobody shall be allowed to reward or punish people for what they say or don't say because this is at best censorship through taxation. It also fosters echo-chambers and feedback-bubbles that result in catastrophic mistakes for everyone. We must all know what the menu options are, and nobody should be able to corrupt our decision making system by corrupting our knowledge of what the menu options are.

f/ We in the land of the free welcome new ideas and dissenting ideas, even unpopular ideas. Neither Government, nor any fictional citizen shall do anything to discourage free speech, including those implementing micro-taxes, and micro-demerits for the exercise of free speech.

g/ There shall be no system where the people are penalized or rewarded in any way for what they choose to read, view, watch, write, or say, or who they associate with.

79/ The Senate shall determined all credit rating rules, and the county recorder system shall undertake this function, and all the existing credit reporting companies , and bond rating companies shall be nationalized. All credit rating services shall take into consideration late payments, non-payments, default judgements, court judgements, existing debt and assets, employment history, education history, real property owned, recorded leases, alcohol licenses, drug licenses, and criminal convictions. Every time somebody runs another persons credit, or a background check, or a criminal check, the person investigated must agree, or the Government must order the check. Everyone running a check on another person gets recorded.

80/ No rating system of people shall take into account, consider, or store data on a person's voting history, communication history, viewing history, travel history, purchasing history, purchasing habits, energy use history, pollution history, religious attendance history, school grades, school citizenship rating, or friendship history.

81/ A person's history of speaking out against Government or anyone else, or opposing Government or anyone else, protesting Government shall never be a consideration in any rating system score.

82/ A person's health information, dating history, drug use history, porn history, and prostitution history shall be private unless shown-to, or shared with others. However spouses automatically get to see this information.

83/ Citizens shall not be denied any of the following rights that are generally offered to all citizens, or nearly all citizens,

for more than one-tenth in their lifetime without a conviction by a court of law:

a/ The right to fly on the nations aircraft, or use the nations, trains and buses and public transit systems, or boats or use their stations, ports, or airports.

b/ The right to access government services and licenses and permits.

c/ The right to use to the nation's public schools, and schools that accept public money, and public libraries, and trade organizations and facilities.

d/ The right to access financial services and the financial system like everyone else.

e/ The right to access discounted services like everyone else.

f/ The right to use and access and post on social media like everyone else.

g/ There reputation as a non-convict. Also no money court verdict shall ever be considered a conviction, even if it bankrupts a person.

84/ Government shall certify all weights, measures and rating systems:

a/ All ratings systems must have rating of raters.

b/ All rating systems in the land shall be base-10 and accurately calibrated to percentiles.

c/ It shall be a crime to have multiple accounts and vote more than once, or to get other people to vote on your behalf or to vote on someone else's behalf, or to give or receive money for votes, and it shall all be considered a remarkably serious crime, like second degree voter fraud.

d/ It shall also be a crime to impersonate others on a public comment or rating system, or to rate one's self or other close people as if one were unbiased.

85/ All business people and all business transactions shall be subject to public ratings and customer comments, and all businesses shall be able to post a response to all customer comments.

86/ No rating system score shall ever be a condition of access to Government services or utility services. No rating system of people shall have corrupt practices like:

a/ Buying a higher score for a payment.

b/ Scores that go up or down depending on one's associations or activities.

c/ Penalties for those who opt out of showing their data.

87/ All existing credit reporting data shall now be nationalized and put under the recorder system, which shall offer a wide variety of reports for various purposes. Also, this shall be a no-charge service on the part of government, just like the dating ID, Sexual consent, STD, and accidental baby system will be offered by government as a free optional service. Both of these systems and many others shall always be free.

88/ No medical debt shall affect anybody's ability to borrow money or rent property, or obtain employment, or get admitted to any school. In fact, from now on, the main credit report format that people use shall not include medical debt. Medical debt will be stored and accessed via the healthcare system, and it shall not have anything to do with the regular debt system.

89/ There shall be no annual fee for any payment card or credit card shall be charged where the card has not been used in that calendar year.

90/ All voice recognition systems shall be entirely client

based, and none shall ever communicate with an external server for any reason. No voice recognition system shall ever require an internet connection to work.

91/ There shall be many levels of access in each category for everyone's personal data held by the recorder's office.

92/ Hackers know exactly what they are doing and crimes of hacking shall have long sentences.

93/ Hacking for account numbers and passcodes, passing this information on to another person, acquiring this information, and using this information shall all be separate felonies, even if all done by one person.

94/ Hacking and malware propagation shall both be per computer sorts of crimes, and people convicted of hacking into dozens of computers will often go away forever. Also, hacking shall be considered espionage (and potentially capital punishment espionage) when important government military and defense secrets are hacked and also when great volumes of private information is hacked.

95/ It shall be a felony to intentionally filter, copy, delete or spy-on the mail in its broadest sense. This shall include emails and text messages and voice calls and video calls. It shall also include web traffic and server direction. Also, ethical hacking shall have nothing to do with hardware exploits. Merely being found in possession of hacking hardware (such as computer cables with hidden microchips can also be considered hacking.

96/ All login processes shall have an option for slow logins (up to 30-minutes) for the increased security.

97/ The national government shall CVPD, or a computer viruses prevention department, and this shall have updates of free virus check codes for the virus check software that all computers and phones must have. The CVPD shall also police the internet for virus-containing snippets. It shall not be allowed for anti-virus companies to sell cures for computer virus that are not shared with the CVPD as this helps people to make computer viruses for profit.

98/ Writing viruses and hacking shall be per count crimes where some prolific young hackers may find themselves locked up for life. However, those who hack in and then immediately turn themselves in shall get Senate recognition and generous prize money.

99/ It shall be a crime to impersonate another business to search engines, or their customers, so as to gain/divert web traffic that rightly belongs to that business. It shall also be a crime to display a useful thing on a website and then change the content to a page where traffic income is generated. Search engines must also clearly distinguish between:

a/ Original version and copies.

b/ Original images and altered images.

c/ Original songs and cover songs.

d/ Original creators and copiers.

e/ A principal business, and all agents and brokers.

x/ Search engines must also list creators and principals first, next followed by IP owners, next followed by others with rights to the IP or property, next followed by authorized people, next followed by those of an unauthorized or unspecified nature.

100/ Where web pages with medium to high traffic substantially replace their content, or add a new redirection of traffic, all search engines shall be required to start the site

over with regard to page ranking.

101/ Where search engines list web pages based on a text string, the search engine must display the page title, and the text in the context of the page. The search engine must also scan the page to verify that the indexed search text still exists in the body and title of the page. Where either of these change, the search engine shall display a message saying "page body no longer has search terms".

102/ Search engines shall not be allowed to return other machine pages as their search return pages, unless the user specifically requests this. Only one interfacing computer/network should be used at a time.

103/ Search engines shall not require personal information to conduct searches Or to operate any service operated by the search engine. Social media companies shall not require personal information to View accounts

104/ All search engines shall have a wayback machine for past versions of all indexed pages as required by the Senate.

105/ There shall be a 500% tax on income from fraudulent web traffic redirection.

106/ When search engines answer a question, they must display the Senates answer to that question first, if any.

107/ Search engines shall not be allowed to return websites where the information is hidden behind a paywall or login page, or a button. Likewise social media shall not be allowed to display links to information hidden behind a paywall or login. Websites that move their paywall/login in order to hide the search engine returns once they are indexed shall be banned by all search engines for 10-years. Also it shall be a crime to trick or corrupt search engines into listing pay wall/login information in their search returns as if the media was free. When people are searching for a financial institution, government service, airline, hotel, or other business service, it shall not be allowed for search engine to return intermediaries. Competitors may be listed, but not intermediaries.

108/ All networks shall require the description of all photographs so we can search for them text.

109/ The following shall not have paid paywalls, or User ID/logins required to access their online information:

a/ All libraries and museums without limit.

b/ All school textbooks and instruction material without limit.

c/ All social media and search engine websites. Login shall only be required to make posts.

d/ All search returns.

x/ Nothing that has ever been free and open on the Internet, or broadcast shall ever be put behind a pay wall.

110/ It shall be considered fraud to repeatedly change the subject of a group discussion to a completely unrelated topic that you profit from. For example the people who take over political chats and transform them into bitcoin chats.

111/ Turning off the Internet to control the people may be considered felony democide under the law.

112/ No data service or news agency shall be permitted to report, record, or display mere arrests.

113/ All communication systems (internet, wifi, cellular, etc.) used by the public shall have their own liquid fuel backup generators and 10 days of fuel stored on the generator site. This fuel shall be regularly returned to the fuel system, so it stays fresh. County government shall own all the network

broadcasting sites and towers. The government will have a free network, and it will also support companies with their own networks. All critical backup power generation like this shall be tested at least twice annually.

114/ Internet browsers and hardware shall not allow websites to see the browsing histories of their visitors either before or after they visited that site. Enabling this shall be considered a felony.

115/ There shall be no secret private search engine criteria or algorithms, and all must be made public.

116/ Each website shall describe itself accurately in a 1, 2, and 4 line summary. The Senate shall assure an accuracy review process here to prevent search engine spam.

117/ All search engine results that are ads must say the word AD on all advertisements in a size big enough to be read.

118/ The Senate may limit the quantity, size, and content of ads displayed by search engines, facebook's and other types of media.

119/ All electronic communication devices must come with must come preloaded with the standard government ubiquitized software. This shall print at any size. It shall also remain stable with regard to format chosen at all text sizes.

120/ The parameters for internet searches shall reside in the web browser.

121/ All web pages must have a date last modified.

122/ Virtual private networks shall not be prohibited by Government, or network providers.

123/ The Senate shall have a website for what's trending and why it is trending.

124/ All paper databases in the nation must be fully digitized by 2028.

125/ It shall be a crime to use or program computer robots to access or freeloader on internet content offered only to real humans for free.

126/ There shall be no dubbing or "deep fakes" of video where people appear to say something they did not say. This shall be thought equal to forging documents for profit.

127/ It shall not be possible to delete data from accounts used by minors under age 18. This data must be saved for parents to look at. There shall be no internet media accounts by minors without parental approval and access and ID verification of the parent or other guardian adult.

128/ There shall be no special crime of using a computer to commit a crime.

129/ It shall be a crime to make forging tech, either for printed things like valuable certificates, or for forging electronic data, or for forging people's identities. It shall not be allowed for artificial intelligence or computer programs, or social media companies to fake real humans, or to imitate real humans, even when they're dead.

130/ The crime of electronically peeping on people, and installing spyware, and malware on the electronics of other people shall be sentenced by the count, with reduced sentences for second and subsequent counts. Thus, one count gets 100% of the sentence, the second count gets 50% of the sentence, the third count gets 25% of the sentence, the fourth count gets 12.5% of the sentence, the fifth count gets 6% of the sentence, the seventh and subsequent counts get 1% of the sentence each. Thus people engaged in the mass illegal spying on thousands of people will frequently go away

forever upon conviction. Also, we have these extreme penalties for spying because this sort of behavior has historically been used by the enemies of freedom to decide on who to subject to acmedicide. Therefore, such severe penalties for spying on the people are warranted.

131/ Where virtual crime data-centers work to infect our computers with viruses and their host nation does not permanently shut them down, or they keep popping up, despite being shut down: Where this happens, the Senate may use airstrikes against these data-centers.

132/ Government shall not be allowed to restrict the use of virtual private networks, domestic or foreign, even though these are fake. Also, the national government must police and assure the safety and security of VPNs wherever feasible.

133/ Telecom services and Internet services and other similar services where data is transmitted over distances, shall not be subject to taxation of any kind by government at any level of government.

134/ No Internet service provider shall be allowed to make any rules about who it will serve, and who it will not serve, who it will favor, and who it will not favor. The national government shall make all the rules about internet service providers and other telecommunications services.

135/ Regarding account passwords and user-IDs:

a/ All fields for password and user-IDs must have a show text button.

b/ Travel accounts, utility accounts, insurance accounts, healthcare accounts, and other low security accounts shall not be allowed to require numbers or special characters in their passwords. Low security accounts shall also be prohibited from requiring the use of their own apps or websites for their account and payment services.

c/ All utilities and regular monthly payments shall be required to use the county recorder system's billing system. If it isn't here, then it isn't a valid monthly charge.

d/ Loan payment bills, rent bills, healthcare results and billing, utility bills, and insurance bills may either be sent to the monthly bill payment system, or sent via email, or both. Printed versions of these shall not be sent via physical object deliver mail (POD mail). They must also be available online at the provider's website via user login.

e/ It shall not be allowed to have account creation and login processes where more than 20% of people are unable to create an account and login without assistance.

136/ Everyone employed by an industry, making comments on social media, about that industry, or its regulation, must disclose that they are working for the industry, or they may be charged with a crime.

137/ There shall be no network user variability except under the following conditions:

a/ The user/parent selected the variability by fully disclosed preference, in the user preferences section of the application. or

b/ The network got the Senate to grant them a permit for user system-generated variability.

c/ Wherever different people see different media from the same media channel, and this was neither selected in preference, nor permitted by government, the Senate must investigate and prevent this crime of free speech and free media from happening.

138/ Nobody shall be required to log into an account to pay it with their own financial account.

139/ There is going to be much more trust online because:
a/ All online accounts are going to be tied to real citizens, or bonded foreigners, or reputable fictional citizens, or government.

b/ Online scams are going to be harder to pull-off because of payment holding periods.

c/ Software fraud and hacking is going to be harder due to changes in the way web browsers work.

d/ Software fraud is going to be harder due to the way software is developed, sold and distributed.

140/ Those who post content on the Internet for all to see shall not generally be allowed to control where that content may be displayed.

141/ There shall be no cropping of emails below the Senate-determined size.

142/ No social media company or electronic third-party intermediary for sharing shall ever be considered eligible to acquire any right to any IP shared on their platform, regardless of what any agreement present or past says.

143/ There should be private airline booking websites, and private meal ordering websites, and private shopping websites, but these will all be in competition with the government's free service, which only has payments where this is needed to prevent spam.

144/ Faraday cages and lead boxes for electronics shall never be illegal.

145/ It shall be a crime to use or program robots (including network robots) to present themselves as real humans, or to lie to counterparties about being a real human. Also, all non-emergency robots and droids shall generally have to pull over to the side and give way (similar to what human drivers have to do for emergency vehicles) when humans come along.

146/ With regard to all computer and internet buttons for agreeing/ disagreeing, the agreement button shall always go on the right side, and the disagreement button shall always go on the left. It may be easily considered fraud to have buttons in any other configuration including vert

147/ All media intended for minors shall be required to prominently display its Senate approval number in the regular Senate determined front and center locations.

148/ In order for websites to pay money for internet content of any sort, the payer of the money must get the tax ID number of the payee and submit this number along with the annual payment history to the tax house. Where content is stolen or misappropriated from others for profit, it shall be this taxpayer (and his employers) who are subject to punishment of various sorts including fines and prohibition from all internet monetization platforms. Once a taxpayer has been demonetized from the internet, it shall be considered fraud for them to use someone else's number to get around their prohibitions.

149/ Where companies update widely used programs and access interfaces, they shall not be allowed to change the format, or the names of things unnecessarily, or excessively fast. Where interfaces are to be changed, they should not be changed more than 5% per year. The most valuable thing about software shall generally be thought to be the user time invested in learning how to interface with the software. This is

why we don't allow intellectual property protections for interfaces.

150/ All AI and deepfake creations shall be monitored and recorded. Also, there shall be search of new AI and deepfake tech so that people know what is fake and what is not.

151/ It shall be a crime to sell or give away software that cannot be uninstalled, or is difficult to uninstall, or has files that cannot easily be uninstalled or deleted.

152/ Open source software cannot ever be turned into for-profit software. Free means free forever with regard to software, and those attempting to charge people to use upgraded free software maybe guilty of a crime.

153/ In general, companies that make software shall not be allowed to trade in data acquired by from users of that software unless they get a permit from the Senate in advance.

154/ All group data sold must be declared to the county recorder system, and may require a permit.

155/ There shall be no cross website tracking of user behavior, and this shall be considered data trafficking.

156/ It shall be considered fraud to redirect people to websites they did not intend to go to.

157/ The Senate shall be allowed to regulate addictive products and addictive services.

158/ There shall be no intellectual property protections or ownership rights for data collected from computer users, hand phone users, and computer system users. Further, all of this data must be shared with the county recorder system, or the data shall be considered trafficked.

159/ No software may shut down due to non-payment or non-updating, unless the user is given at least 90-day, 30-days, 10-days and 3-days notice whenever they open the application subsequently and via email, so the user can export their data. When software fail to do this, they may be required to pay extreme toxic waste level fines to their users.

160/ The delivery aspects of Amazon shall nationalized. Amazon may continue to sell things, but the delivery aspect show me nationalized. Also, no vendor shall sell more than one percent of the nation's Internet commerce.

161/ The selling of likes and dislikes and favorable ratings on social media shall be considered fraud.

162/ The Senate may elect to charge postage on social media posts.

163/ Our domestic social media shall only be a thing for real human citizens.

164/ Social media is not allowed to have a pay wall requiring that viewers login or join in order to view the social media posts. It shall only be allowed for social media to require people to join to make posts.

165/ The following sorts of media shall only be available to people who go looking for them. They shall never appear in any passive feeds, even ramified passive feeds, even social media feeds. It shall also not be possible to surf links to them, except by entering a term into a search bar. None of the following should ever come up in any feeds by themselves:

a/ Porn media or media that shows skin between roughly mid thigh and armpits.

b/ Music, music videos and videos with music.

c/ Sports media, fitness, diet,

d/ Gore media.

e/ Dramatic and comedy entertainment media.

f/ Food, alcohol, drug media, or smoking media.

g/ Religious media.

h/ Weather or climate information.

i/ Advertising, except for a 75 second ad slots every hour on the hour, or 10% of page area may be used for still display advertising.

166/ We want a clear line between the porn internet and the regular internet. We don't want the slippery slope where people click on dressed models, then bikini models, then nude, then porn. We also don't want the slippery slope towards universal pornography where images and video of sex occasionally appear all over the Internet. The line here shall be that government and others are free to censor accounts and material that involves the showing of human skin between roughly the mid thigh and the armpits.

167/ There must be a clear line. And here the definition shall be the rule about showing skin between roughly the mid thigh and armpits either directly, or through sheer material or lace. And this rule shall be very strictly enforced in the general media. So that even a hint of even simulated nipple or genital outline shall be prohibited. Show more than this and your media must be re-platformed to some degree of the porn internet. Also, with regard to bare bellies and visible nipple outlines: These have not been traditionally covered due to the patriarchy, but due to the matriarchy. For it is the older women that most want the young bellies, firm nipples to be covered. Most men favor less clothing for women, but it is women (especially older women) that favor covered bellies and breasts. Women cover their breasts for the same reason, they cover their bellies, to protect the women that have had children from being compared with the women that haven't. Societies that allow women to expose their breasts and bellies tend to not produce at the same rate as the ones that do, because the women can't compete with the other ones that are covering their bellies. So covered women societies are much more likely to have children because men are not looking at the woman's body.

168/ Surely there are few circumstances around the world in real life, where we see people displaying their bellies or their upper thighs in public, except perhaps at the beach. So let this be the line between the porn/sex internet and the regular internet. Media that depicts the human body between the armpit and roughly mid thigh shall not be subject to free speech protections and should normally be relegated to the porn internet. Also, where people are exposing their skin between roughly mid thigh and armpit, there shall be no right to record them. The term mid thigh shall permit all shorts, skirts and dresses longer than 6cm from the crotch.

169/ In social media, the date of first posting shall be automatically determined by the social media, supercomputer and shown, so that old media is marked as old

170/ Where anything is displayed on the Internet, the viewers must be able and allowed to take a screenshot or video grab of it. Those who thwart this right may be charged with censorship. Furthermore, It shall be a felony to attempt to defeat this right in any way. The people shall have a right to take screenshots of everything that is ever displayed on their device, and all devices must allow for screenshots and video capture of all screens they show regardless of format.

Furthermore, It shall be the felony of censorship to attempt to defeat this right in any way.

171/ The Internet should be regarded as a voracious thing. Where people share, it generally becomes public information.

172/ Software shall not be allowed to suddenly lock people out of using the application and accessing their data files. There must be pre-notification so people can download their files.

173/ Everybody shall have the right to access an old version of software to export their old files.

174/ It shall be a crime to market pornography outside of government approved venues either in the real or virtual world. Also fictional citizens engaged in making large amounts of pornography shall be nationalized.

175/ Pornography shall not be delivered by type, such as blonds, Black, Asian, busty etc. This is so people have more open minds about what women look like. Also, a few really ugly ones helps with porn addiction.

176/ All social media policies and AI policies must be approved by the Senate in the same way that building plans must be approved. Also, fictional citizens shall not really have any power to censor anything on their platforms.

177/ All Consumer map applications must show topographic offsets on maps and distance summaries.

178/ TikTok, Instagram, Reddit, Twitter and all the rest shall all be regarded as biased and corrupted by foreign influences. After all foreign corruption generally pays the most.

179/ The Internet should be regarded as voraciously omnivorous, especially with regard to things said in public. If you say something in front of people, like in an airport line, you totally run the risk that people will record and play what you have said. If you are going for a quiet walk in the woods, or are at home with the windows closed, the people you are talking to can repeat what you said either in person, or on the internet. Where people share memes, impersonal memes, especially, where there is no disappearing posts feature (such as with Snapchat) that is subject to archiving and marketing. Where they don't

180/ All computer applications must work to the maximum extent practical using the nodal device and without the network. It is good robust design, and it shall also be the law. Also, a free and democratic people should always want to be as far from centralized computing as it can be, due to concerns about government snooping on behalf of foreign parasitic nations.

181/ This constitution calls for all devices to have a privacy wall for things that only get backed up locally directly to alternate discs. With the cloud side granted access to only certain things by default.

182/ The Sub-Senate shall fund its own versions of TikTok, X, Facebook, Snapchat, and most other social networks.

183/ We shall have a government snapchat that allows people to program fake senders and recipients pages, so there is no way to know if the page is real or not. And it shall not be admissible in court and cannot be used in the media except by the user. It also doesn't come with any form of corroboration, and in fact lets people program lies at will, so nobody can tell. This the platform will do what it is supposed to do.

184/ All of the people in our nation are supposed to use our nation's own social media to communicate with each other and with foreigners. This isn't a mandate, it is just a way to keep foreign influence and corruption down.

185/ With regard to Instagram, Facebook, Reddit, and YouTube, these shall no longer have any political dimension to them, and they may not use words related to candidate and political matters.

186/ We have a problem with versions of software and unnecessary variation in command paths. This is why we need to have some sort of menu consistency rule in our software, so that changing commands require government approvals and it doesn't happen much.

187/ Once we have something placed in a menu location in a popular piece of software, it shall be considered as sort of like a structure built in the real world, and it never ever gets moved unless it has a permit. And it can't be torn down either, because it never wears out like in the real world it may become functionally obsolescent, but it never wears out, so it lives forever in that menu location, and perhaps leads to a sign with detour directions and perhaps it gets shrunk down to a secondary small size, but it doesn't get deleted, except with a permit. Each menu bar has its own sort of color we move down the rainbow for the different commands, and the boarded up commands go outside, and they are in black with white text, small, perhaps 1/3 of the size of the normal commands unless you mouse over them. Also, the names of the commands need to be frozen, and they need to directly imply something, so the meta mind is as intuitive as possible to access and use, and thus as smart as possible. We really need to have this totally intuitive, so that it almost seems like it's part of our own mind that we're learning to use.

188/ The Senate shall attempt to standardize interfaces wherever practical. From forklifts, to powerboats, to cad programs, to handhelds, to voice commands, all of them shall be required to use universal interface formats wherever it is not completely impractical.

189/ When temporary data survives being supposedly deleted, this can be considered data trafficking.

190/ It shall not be allowed to have mass e-mailings to more than 10 people with clickable links. Also, clickable links shall never be sent by any fiduciary.

191/ All 500,000 users plus software and websites shall be tested for power consumption, and an average power use shall be indicated. All video players and Social media video apps shall must allow low data and low bandwidth settings.

192/ Websites shall not be allowed to have acknowledgement buttons to view their landing page, and nobody shall ever be required to acknowledge cookies on a new website. Also, search engines shall not display websites that have any sort of click in or acknowledge something to access a page.

193/ We may eventually come to this strange paradox world where people can fake any virtual communication So none of this will really be believable, let alone valid in court unless we have multiple eye-witnesses saying yes I saw it, and yes the video is true.

194/ It is the strangest thing the way clearing your cache in IOS takes 17 taps or swipes and two searches though long lists for the right menu items? It is almost like Apple does not want the people deleting their data.

195/ Regarding voice messages:

a/ All voice mail shall have the option of converting the voice files to text, and sending them as texts or emails, with a link to a recording of the voice message.

b/ There shall never be any charge for contacting a data/ telephony provider, especially for retrieving messages.

196/ The Senate shall investigate which microwave frequencies are most bio-active in which at least bio-active. The most bio-active frequencies shall be used for cooking food and the least bio-active ones shall be used for data transmission.

197/ Computers shall not be allowed to monitor humans with regard to their facial expression or mood.

198/ The Senate shall block emails and other direct inbound communications from Nigeria and the 10 biggest nations for scammers and spammers. Also all foreign proxy hosts shall be blocked for inbound first time messages.

199/ Everyone shall have the right to their own data drives that cannot be controlled from the network or seized by police for more than 24 hours. Everyone shall also have the right to have numerous off-network drives and copies of their data. Government shall not have the power to take away all of a person's drives and drive data and thus cut off their work. This shall be a protection we afford even everyone, even if they get sent to prison, even if they are Nazis, or communists, or they are saying crazy things.

200/ All computer applications shall be required to notify users when they're modifying a document that is a not the most current. And the application should do this repeatedly until the person actually creates a new third document and proceeds from the third document.

201/ All handy operating system shall be required to use a desktop menu. The top edge of the handy screen will have pop-up, draw-down menus related to the operating system. The right side will be the application category folders. The left side and bottom will be user programmable. The various corners will be for the next desk blotters up down, left and right, in the middle of a 7x7 hall of mirrors. When the device goes off it automatically re-centers to the center blotter. Also, perhaps each blotter runs its own independent version of a web browser, and other software, so we imagine multiplexed browsers that only go to one website. We also imagine people using one blotter for one regular customer. It is thought that the current IOS style system may be more fun, but the index system makes people dumber.

202/ It shall be thought important for the strength of the group mind that our photos be searchable by location if people want to turn location on for their photos. It is also important that there be a vast number of photos of every place on earth. So all the ways on earth are supposed to have 5-way HD photos at least once per 200m. This includes roads paved and not as well as food, motorcycle and horse trails and rivers that people can get a boat up or hike up. All of these on earth shall now have a photo record on the global map also, in communities the photos shall be at least once per 10 meters. There shall also be top and multi-angle drone imagery of the entire land surface of the world. And all of this shall be assembled by the Senate and given to the people for free so they are better able to understand and make use of the lands of their nation.

203/ We call it search, but it really is actually group mind recall. It is memory recall for the group mind.

204/ All files shall have the total time the file has actively used to make modifications, as well as the total time that file was open.

205/ The Senate shall produce detailed rules on when and under what circumstances the people may be tracked either geographically in the real world, or on the internet, or how they spend their money. There shall be different rules for everyone born a US citizens and who grew up in our nation, and everyone else.

NR'7. ELECTRONICS.

1/ The Senate shall ensure that our devices and networks do not aid or spy for tyranny, or otherwise sabotage our ability to defend our freedoms. The Senate shall certify all new electronic devices and software as spy-free by design. The Senate shall do this primarily by offering generous rewards those who find electronic security vulnerabilities that everyone else missed.

2/ The Senate shall assure that hardware and software distributed in our nation are not spying for our enemies, or offering an opportunity for sabotage. This shall be considered a vital aspect of both national defense and our first and foremost right to safe and anonymous free speech. The rights of technology manufacturers shall be secondary to these primary rights of the people. The Senate may compel manufacturers of hardware or to share accurate and concise design information with it. The Senate shall require that all software widely distributed in our nation, or used in by government, be given to the Senate in un-compiled form for inspection. If the Senate elects that the interest of the people is best served by making this uncompiled software public domain, it may do so, especially when the software has expired intellectual property rights.

3/ Regarding all the software that existed in any commercial form on the market, more than 15 years before the then current date, all the software, all the rights to it now have flowing into the public domain forever due to age. All programming languages and all programs that existed in any popular form before 2010.01.01, no matter how much upgraded shall now be in the public domain.

4/ There shall be no IP for any of the following sorts of software. All of these sorts of software shall all now be free, open source and given away by government. The gold-rush ended long ago for this sort of software. All of these classes of invention are now off protection. Also, the source code shall be made public and be open source. All of the following shall only use open-source software compiled by the Senate:

a/ All operating systems.

b/ All network browsers.

c/ All email clients

d/ All Word processing software.

e/ All CAD software.

f/ All voice recognition software

g/ All software in all robots.

h/ All vehicle driving software.

i/ All vehicle machine software.

j/ All software in or controlling all factory or earth moving

equipment, or other equipment.

k/ All image manipulation software.

jl/ All software used in gambling, prostitution, spying, data mining, government interface.

m/ All software used by Government and the military

n/ All page layout software.

5/ The Senate shall also have the right to examine and approve all commercial software offered for sale for various problems like lack of security, or lack privacy, or poor functionality.

6/ There shall only be one dominant universal operating system for all telescreens and another for other various consumer device.

7/ Government shall have the right, but never the exclusive right to distribute digital content.

8/ The Senate shall allow both approved and unapproved software and content for the general public. All the approved software and upgrades shall be distributed by the county recorder system for no charge. Most people will not get software from other sources. However, some will use trusted companies in software distribution. Others will perhaps use an old device and be more free with their downloading.

9/ Software development companies shall not be allowed to operate private software distribution businesses. They shall be required to use the recorder system's distribution, which will verify that the code does not contain exploits.

10/ No aspect of human to computer interface menu and design shall have any IP protection. All designers shall be free to copy all computer interface designs that work. And this is absolutely necessary to maximize the critically important intuitiveness of our interfaces. Also, to be perfectly clear, this is the interface menu design, not the hardware or datalink

11/ Tech companies shall not be allowed to have secret information about the way their software works, this should be considered criminally anti-competitive and a thing that favors spying on the people.

12/ All electronic devices and software shall generally be required to connect, and use the same formats and standards. Those manufacturers judged by the Senate as intentionally creating a fiefdom through a pattern of non-cooperation may be considered environmental polluters and fined as environmental polluters by the Senate. The Senate shall however not penalize those whose non-connection is due to genuine innovation, or good reason.

13/ All media viewer software for non-streamed media must cache 100% of data, and make this data available as easily to copy files in all widely used formats to facilitate sharing. No media viewer for streamed media shall cache any data, or make this data available as copiable files.

14/ Nobody shall ever be required to wear remote control or robotic death or pain devices for any reason. However, taser-handcuffs shall be allowed when police are transporting convicts.

15/ All QR code readers and similar applications must verify that the user wants to go to the website displayed.

16/ All immersive reality sets for children shall have external look over the child's shoulder monitoring of content via either desktop or handheld.

17/ All electronic devices must come loaded with the latest software for that device. If the latest software is not in that

device, then the buyer may return the device for a full and immediate no-questions-asked cash refund. Initial software updates shall not be allowed to become an opportunity for manufacturers to identify who owns which device.

18/ No telescreen, computer, or communication hardware device shall require registration with the manufacturer or any middleman in order to use the device or connect to networks.

19/ No product may be sold that requires a download to operate properly, or that has limited functionality until an "update" is downloaded. All products must be sold with fully updated software, unless they're clearly dated from the year before.

20/ It shall not be allowed to collect product-registration information for appliances and electronics costing less than 3-day's wages.

21/ When a screen button is pressed on a touch screen, there must be some sort of lingering visual feedback that the button was pushed.

22/ Where companies, manufacture, battery powered devices:

a/ All batteries must be removable and the device must work without a battery on its charger cable.

b/ Those companies shall not be allowed to offer battery replacement services, or take measures that discriminate against non-OEM battery manufacturers, or certify non-OEM battery manufacturers, or void warranties for third party repairs of batteries, or power system parts, or power couplings.

23/ Telescreen and computer companies may give away software with their products, however, they shall not be allowed to sell software of any sort without paying MECOT tax.

24/ Electronic devices in airplane mode cannot produce any EMF radiation, or store any information for later without the direction of the user.

25/ All telescreens, laptops, road vehicles, rail vehicles, and military weapons systems must be entirely made in North America by 2030.01.01, or they cannot be sold.

26/ To reduce counterfeiting, spying, and to eliminate a big advantage of larger companies: Government shall strongly encourage that software and hardware be delivered directly to consumers via either secure download websites, or via the postal service's 3PL warehouses where product authenticity is guaranteed. Also, the Amazon company shall be thought to have usurped a role of government with regard to its delivery functions.

27/ To increase the accessibility of information, all main programs shall be required to begin at zero, with prefacing material going before the zero, for people who want to back up and get the whole story.

28/ There shall be two types of telescreen. One that's always in tracker mode, and one that is optionally in tracker mode, and can also go into pocket mode. Once in pocket mode, which is also a form of low power mode, the phone should go on and then off once every five or 10 or 30 minutes, 1-hour, 2-hours, etc. as the settings are set to check for messages. Also people shall be able to turn off the tracking of the phones location, in settings, or with the physical switch.

29/ Neither Government nor anyone else shall require or incentivize that the people put anything at all inside their

body. This shall include ID chips, electronics, drugs, inorganic substances, organic substances, harmless markers, vaccines, natural or modified DNA, RNA, or other genetic or cellular material, or bio-engineered anything. However this shall not apply to people who have been justly imprisoned, interred, isolated, or are awaiting trial for a felony. Also, worn electronics and location trackers may be required on military bases, in prisons, jails, and work camps, in foreign worker zones, ports, industrial or warehousing zones, and secure government facilities, and by Non-citizens and immigrant citizens in other parts of our nation.

30/ The FDA must study and approve all head mounted and head positioned technology (including all telescreens) for possible brain damage from all forms of radiation. All potential harm must be disclosed to the public. The Senate shall measure all forms of harmful radiation exposure.

31/ Lifelike androids, whether in the real world or online shall be required to have some means that everyone can instantly recognize that they are not a real person. It shall be thought a basic human right of all people to be free from fake people acting like real people. For without this line, reality starts decomposing. It shall be thought very important that it is easy to discern real people from fake people, and real experiences from fake experiences, and real females from fake females.

32/ Hardware manufacturing companies shall not be allowed to collect any data at all. Software companies may only data that has been affirmatively authorized by informed consent.

33/ All data collection regarding phones computers, laptops, and vehicles and anything else shall be affirmative. The user must enter their data in the sharing window. Also, no function shall be designed so that it doesn't work if you don't input your data. If there are functions like this, they may be called additional intrusive functions.

34/ All data transmission modules must be independent of the other hardware. This includes hand phones, laptops, desktop computers, vehicles, firearms, and everything else. The people must be able to remove their communication modules in case of war and for other situations.

35/ No electronic services shall allow for adults to view or communicate with the accounts of minors, without the parents authorizing it. Where electronic services allow this, it shall be considered a sex trafficking or grooming sort of crime.

36/ Once a certain sort of software has entered the public domain, all versions must be consolidated, with the best functionalities taken from each system.

37/ The people shall always migrate their device data from one device to another without using any network. All data migration functions must work without any network via both wireless and wire transfer. And it shall be considered data trafficking to do otherwise. Companies that drive their customers into migration over a network may be charged with espionage. All telescreens and all computers must allow for easy migration of data from an old device to a new one. Where it takes the average person over 20 minutes to get the migration process started in full, the new device shall not be allowed on the market.

38/ Unstable devices and software that must be restarted more often more frequently than once per 100 hours of use shall be deemed defective and shall not be sold.

39/ All software sold to the public must be open source so we

can prevent spying.

40/ Whenever a device resets settings by itself, it needs to notify the user that the settings have been updated with a detailed description of what was updated.

41/ For all phones. Touching the middle of the screen at any time with 4 fingers together turns off all access shortcuts like face ID and fingerprint ID access.

NR'8. TELESCREENS

1/ It must be possible for users to replace and simply remove the data transmission modules, and/or GPS modules from all Telescreens with nothing more than a single small screwdriver. The Senate shall maximize the portability of telephone numbers and email addresses and other network information.

2/ No identity information shall be required to buy or activate any telescreen, or other communication equipment or connect to any telephone or internet system or their subsequent replacement network(s). The Senate shall assure that non-ID communication networks exist and prosper on the internet. Also, never shall the non-ID networks be silenced because people post offensive material on them.

3/ Cellular phones shall not be tied to any carrier or network in any way. All telescreens and all network access devices shall work identically on all networks, and all networks shall work identically with all access devices.

4/ We shall have telescreens in both Orwell and non-Orwell versions. And we shall use the snooping nature of the Orwell versions to create a clear distinction in the minds of the people about what is Orwellian and what is not with regard to telescreens.

5/ Given the head-and-shoulders-above, primordial nature of anonymous free speech, there shall never be any penalty when the people let strangers use their non-Orwell telescreens and other communication devices. The people shall have the right to swap communication devices, and to go without any or all communication devices whenever they like. Also, it shall be a felony to design, sell, or use hardware or software that secretly spies on the people via a non-Orwell communication device. However, at work and in controlled entry work zones, people may be required by their employers to have or wear a location tracker and use an Orwell telescreens or other electronic monitoring device(s). Yet, no employer shall require these when their workers are off-duty.

6/ All non-Orwell telescreen and other devices with camera(s), or microphone(s), or GPS, or cellular shall have a mechanical slide switch, similar to the ringer switch on an iPhone. This switch cuts power connections to the camera, the microphone, the GPS, and the cellular. Also, there shall be a second power switch to the wireless data transmission system on all telescreens and all other communication and recording devices. If any spyware get-around is ever discovered for either switch, the device must be recalled and cannot be used on networks. No communication device shall become dysfunctional when the camera/mic is covered, or unrelated applications or settings are switched-off as with the Huawei telescreens. All Telescreen shall have means of turning off all data and all power to all apps Individually. Also, there shall be no all-encompassing programs such as in

China.

7/ No aspect of any communication device not connected to the camera shall become dysfunctional when the camera is powered off, disabled, or covered. No aspect of any communication device not connected to the microphone shall become dysfunctional when the microphone is powered off or disabled. All telescreen information sharing in all updates shall not be changed to on as a result of the software update.

8/ All non-Orwell telescreens and other battery powered communication devices shall have user removable batteries that use one of 50 standard batteries (PB1-PB40) each of a particular size and output level. Companies that sell telescreens shall not be allowed to offer or sell OEM batteries, except as sold in their devices. Telescreen manufacturing companies shall not be allowed to have anything to do with the data on each person's telescreen or other device. They shall also not be allowed to make repairs to their devices.

9/ All telescreens shall have standard configuration physical data ports for hardwire backups.

10/ Regarding telescreen hardware:

a/ They must also be instantly capable of exporting data and making backups up to physically connected devices, even if they normally backup wirelessly. However, this shall be protected by the regular login password.

b/ There shall be two sorts of wire connectors for all telescreens sold in the nation. One is a wide data and power connector, the other is a narrow power only connector that connects to the left side only.

c/ All local data storage modules must connect-with, fit-inside-of and work-with all telescreens sold in the nation. They shall all be the same size, and all use the same connectors. No user data shall remain on the device after the data module is removed. Also, it should take no more than 5 minutes to change a data module.

d/ So we imagine ultra thin phones that are not designed to be used without a case. These will be reliant on the case for protection and for the battery. This anyway is how we do both fast swappable batteries and genuine off switches on our telescreen listening devices. It will also give us great flexibility in mounting our telescreens to various devices.

e/ Regarding data module replacement, we are doing this mostly to facilitate and increase recycling and swapping of telescreens as a matter of protecting free speech. And people have to do a secure log-off from the recorder system to do this, otherwise the recorder system alerts the person that their data module has been unplugged.

f/ When people buy and sell old electronics, there shall never be any identity exchange required. Also, it shall never be a crime to barter a reasonable amount for a telescreen that has been used for over 2-years by the seller.

11/ All telescreens and all telescreen systems shall support a low energy use, and low EMF pocket mode, similar to airplane mode, where the transmission components only come on briefly to check for calls and messages every 10, 20, 30, minutes, and every 1, 2, 3, 4, 6, 8, 12, and 24 hours as the user determines.

12/ All telescreens and other devices must only use Senate inspected open source software that is certified by the Senate as spyware and malware free.

13/ Government may require Orwell telescreens in foreign worker zones, and island imprisonment work camps. Orwell telescreens may also be required for felons recently released from incarceration, sex-offenders on probation, and certain categories of immigrants and Exhods. All of these groups may be required to live under monitoring. However, the people in foreign worker zones may have a way for the user to turn off their camera and mic while in their quarters and while at the workplace of some employers.

14/ All telescreens shall use the same universal charger connectors and wireless charging pads. All rechargeable battery devices must use the same 6 or 10 charging connections. All electric vehicles shall be required to use the same charging connectors, one for trucks, heavy equipment, and doublewides, one for single-wide automobiles, motorcycles and bicycles. All data couplings, dongles, and wires must be clear and all connections visible, so micro spy chips can be more easily seen and detected. Standard charging connections shall only be updated with Senate approval. Manufacturers shall not be allowed to have their own unique or proprietary chargers. There shall be no intellectual property protections for chargers. Making, selling, buying, distributing, possessing, or using spy cables, dongles, and other plug-in spyware shall be considered felony hacking. Also, there shall be no chips in any computer or telescreen cables as this makes it easier to hide spy chips.

15/ All communication devices shall be capable of showing a black screen, or a decoy image while recording.

16/ It shall not be possible to switch off the mass emergency notification alert tones on telescreens except by turning the device off. It shall be a crime to use the emergency system for anything but a mass emergency alert such as earthquake, tsunami, firestorm, flood, hurricane, active mass shooter etc. Kidnappings and other alerts related to individual crimes and problems shall not be allowed to use the mass emergency alert system except on a neighborhood level and this shall be thought akin to crying wolf.

17/ All telescreens must come with a built-in camera-covering slide that is removable.

18/ All new telescreens shall have a 75° bezel-cam, in addition to the 0° and 180° cams they come with today. This is for stealth recording by the people. All such telescreens must also come with stealth recording and 911/video-call-in apps that only allow the client-side to accesses to the app with a password. These shall also allow for decoy passwords that pull up another new app tab as if the app was not being used. All telescreens shall also permit multiple identity modes that are impossible to detect without removing the personal data card. All of these will work in background mode, and will only be visible if the right pin is entered in the secure access pin reader. If the wrong pin is entered, the app acts as if the right pin was entered, but there is no data, or no use. This is so crooks can't tell if someone is recording them or simply holding their phone in their hand as normal. It is thought that the combination of bezel cams with the possibility of stealth mode will make people afraid to commit crimes in front of people because they will almost certainly be recorded, caught, and punished. Also, the 911 app will let people background record their walk and if one of the 911 buttons is pushed, then the dispatcher can view all 3 cams and the prior

recorded stream. Also, there should be several levels of emergency on 911 apps. All 911 apps shall work on video and audio, where the dispatcher can see what the caller sees and talk to the caller (or not in some circumstances.)

19/ It shall be a crime to impersonate people either in person or on video or by using lookalikes or by using faking tech, or recordings. However where the impersonation is done as a burlesque, it shall be protected as free speech.

20/ To prevent eye strain and provide a variety of interfaces for the people, all phones/tablets/phablets must be sold in at least 8 different incremental sizes of relatively even spacing between 5.4 inches and 22 inches.

21/ All portable computer devices such as iphones, tablets and laptops shall have at least two physical sim cards that permit two cellular accounts. Also desktop computers shall be required to have two physical sim cards. All must support hot-swapping between these cards without turning the device on or off. It shall not be allowed to sell telephones with eSIM only capability, or less than two physical SIM slots.

22/ With immediate effect, all text-only SMS messages domestic or international worldwide shall be free on both sides. Within 1-year, we shall entirely prohibit all time-billed and per-call telecom, including:

a/ Domestic and International land line calling.

b/ Roaming charges for voice and data. After this point in time, there shall also be no markup for roaming vs. local telecom services.

x/ All sim card accounts shall cost no more than 1-hour's wages to establish. There shall be no difference in billing rates for charged accounts whether pre-paid or billed after the fact.

23/ Communication service providers shall not be allowed to subsidize the purchase of telescreens as this ties users to devices more thoroughly and reduces anonymity.

24/ Non sign-in web pages shall not be allowed to refresh without asking

25/ Telescreens and other devices shall not notify anyone else but the user taking the screenshot when a screenshot is taken.

26/ There shall be a rule of ostensible privacy with regard to electronic devices. Where privacy is falsely claimed, that application or website may be fined or closed down until the reality matches the claims for all users.

27/ Those companies that sell electronic devices shall not be allowed to also sell separate data connectors as accessories. They may include these connectors with their devices as it is sold, but they shall not be allowed to sell connectors separately. Also, all communication devices must have a power port, and at least one separate hardwired data port.

28/ In times of emergency, and when the voice and data system cannot handle the load, all shall be turned off except the SMS or short message system. In times of emergency, everyone is supposed to keep their voice and data off.

29/ All telescreens shall have page position bookmarks, and a go back feature for positions on all handheld screens.

30/ All communications by telescreens must be encrypted up to the Senate's standards. All telescreens shall permit micro-caching of data. This is where a small cache is used that is overwritten daily in multiple chunks that are encrypted. The encryption keys use four 5-digit multipliers that can be easily

reset by the user.

31/ All new features, software and chips on widely used telecreens must be inspected and approved by the Senate.

32/ All telecreens shall come pre-loaded with a mesh network or similar system for use in case of emergency. In energy saver mode, these also switch-on every hour at the hour and listen for messages. They also switch-on 9am and 9pm in an even stricter energy saver mode. This system is designed to relay files to large capacity stationary satellite phones in a system with dishes and large batteries that stay filled by power grid. But when power goes down, the sms and small-attachment email system will still work due to the batteries. This is an important defense technology.

33/ All telecreen video players and servers shall have 5 standardized bandwidth/size modes to conserve bandwidth when needed. One shall play at full bandwidth, one at 1/4 bandwidth, one at 1/16th bandwidth, one at 1/64th bandwidth, and one at one medium resolution image per half second with medium bandwidth audio. In times of crisis and when many people are gathered in one place, these modes may be needed. The systems are supposed to dial down everyone's device when there isn't enough bandwidth to go around to all the people gathered.

34/ All secure telecreens shall have the capability of multi verification login including fingerprint, 3d face-id with facial expression or hand gesture challenge, followed by a voice match password, and a typed password. Many users will wear some anonymous random chip to stay logged in, this chip is matched with the telecreen, and when the two are separated, by more than 1.5 meters, the the telecreen must be logged into again. The user also has lock phone and lockdown till police visit commands that can be given instead of the the real passwords.

35/ All secure telecreens shall also support virtual near-field credit cards, and other payment/ accounting systems from a single payment center. Each payment account gets a button in a scrollable window.

36/ In order to minimize legal system fees, we shall try to push dispute resolution for most smaller transactions onto the transaction system mostly, although the review system shall also have an integrated role. There will be an ABCD rating system for both sellers and buyers. Those who don't file many complaints shall be an A payer. When these buy from an A seller, they can use a low-cost, A-level intermediary with little dispute resolution in the budget. B and C buyers and B and C sellers will have to use more costly B and C level dispute financial intermediary services with a bigger budget for dispute resolution. If the sliver fees these systems are allowed to make are insufficient for proper 3rd party dispute resolution, the Senate may increase the fees for services that offer robust and fair dispute resolution services for mini transactions the scale of the average hotel stay, or vehicle purchase.

37/ All transaction and credit cards must now have chips and virtual chips. The physical chips must be available in chips the size of a standard sim card. They must also be available in chip-cards that are 1/4 the size of a standard credit card cut from short sides to short side.

38/ In many secure areas the telecreen will only communicate with the county recorder system, thus

Government verifies ID before the log-in with the transaction provider.

39/ All accounts with a login shall allow users to turn off access to their account for days, to set limits to online debits and when a visit to a branch should be needed.

40/ When people login directly to the county recorder system, the system uses its own secure post office telecreens in secure 24 hour police stations.

41/ All telecreens shall allow for secret password areas inside inside the main password areas. This enables apps that are not visible unless you know to look for them. So people with banking apps can put these on their secret pages.

42/ All telecreens shall come pre-loaded with a universal work location tracker app that (when activated) will show a manager where their workers are, how long they have been in that place, and how much moving they are doing at that place, along with how much phone calling, texting and internet access they are engaging in. This is to reduce skiving and freeloading, and to make the nation's workforce more productive. All employers shall be free to require this app while their workers are at work.

43/ Third-party telecreen applications:

a/ Shall not be allowed to locate, track or listen to people, when they're not using the application.

b/ Are not allowed to send tracking data from when the phone has been previously.

44/ When telecreens are turned vertically, upside-down, it shall go into the user's settings for pocket mode.

45/ People shall have the right to hold their place in the media they are watching, and to come back to where they were in all media. People also have a right to repeat any section of the media they are watching. It shall not be allowed to have one time showings of media, except with broadcast media. In this age of recording, everyone shall have the right to go scroll back and review what they were displayed for public viewing. Whatever slim rights and market power the developers of the content may have, the rights of the people to study the content they are viewing is a critical, democratic right. The people must at least be able to study the media they watch, or we will all be dumber. Therefore, all media players must have standard 60-second jump back buttons and 10-second say again buttons.

46/ Police shall not be allowed to have detection devices that can tell them whether a person is carrying a telecreen or not.

47/ When telecreens are in airplane mode, no data of any sort shall be collected by the device.

48/ All telecreens shall have the ability to exchange data via plug-in memory without connection to any network.

49/ Slave "Tracker" phones will look like an iPhone with two sandwich pieces of glass, glued in a sandwich. This sort of phone will have written on the back Tracker in bright letters and numbers, however this can be covered in a case. The start up screen will also say Tracker. Basically we will have two similar devices, one for tracking people, called a tracker, and the other called a tele-screen, both names shall be thought, apt and accurate. The phones that normal people use will be open-able, although they may also have seals on them, and they will also log when they are opened and send and display alerts after this.

50/ All Internet browsers shall have:

a/ a language selection menu item, so that people can once and for all choose the language for their device.

b/ Sexual content filtering settings: G-3, G-5, G-7, G-9, G-11, PG-11, PG-13, R, porn.

c/ dirty word/ kids subject filtering: Under 6, 7-10, 11-13, 14-17, 18+.

d/ Violence: Under 6, 7-10, 11-13, 14-17, 18+.

51/ For the sake of personal privacy, the Senate shall discourage the use of cloud backup tech for personal computing due to the reduction in personal privacy, the master/slave nature of cloud computing, and the unnecessary centralization (and society-wide vulnerability) that this leads to. No cloud backup shall take place more frequently than once every 15 minutes by default. Where any cloud backing up occurs without authorization it shall be considered a data trafficking.

52/ All telescreens and computers shall allow for direct wired connection by thumb drives so people can back up their data privately if they want.

53/ When people think they have something important to say, let them get a serial number if they want to put one on it, or if other people want to do this because what they said is important. This will provide an important way to access memes.

54/ Memes are not silly little things, as they are labeled in social media, they are the memetic DNA that evolves into the group mind. It is remarkable the way the devil's side of things mocks memes when they are actually the very memetic DNA that evolves into the meta mind.

55/ All found electronics get photographed and posted on the recorder system website. It shouldn't be possible to use any of the main components a telescreen unless the part numbers all agree, or the chip in the replacement part agrees to a known user ID within the field of

56/ All laptops, and all tablets shall have at least 2 physical sim card slots, and the ability to make and receive voice and text messages. If any part of the simple cellular telephone capability fails to function, the telescreen cannot be sold.

57/ All phones must also come with four corner bumper mounting screw holes.

58/ The shake and wrist rotate command for all telescreens turns on the light. two rapid taps to the the back turns on the photo camera. Three turns on the video camera.

59/ There shall be no moving, rerouting, or renaming of paths on computer applications, unless these things occur very slowly, and are completely intuitive. In general, all applications must use the same precise tech instruction word for each command.

60/ All telescreen shall be required to track the battery usage of all applications, along with all the data usage in the next column, used by each application, and this shall automatically record all screens looked at until deleted. Whenever anybody wants to, they can reset these statistics over 2 weeks old, and they can also track by day by week by month, etc. Also there shall be maximally adjustable alerts for when there is a sudden rise in data transmitted, or battery power used. It shall also be possible to get a similar picture of all transmission data rates available to all phones. This to curb data throttling.

61/ Where software companies charge for software updates more often than 5-years after purchase, or once every 5-years, the fee shall be taxed at 50%. Also, there shall be no kill functions for software that is not upgraded. The old software must continue to work and if it doesn't, then the paid software must be given away for free.

62/ No web browser or telescreen shall store temporary files from web domains they have not been to. We do this to hinder the information trade. All web browsers must have a delete all temp files button on the main browser bar, right next to the back button and the same size. Pressing this button gets an are you sure button. You click this and then the browser clears all data and restarts the program. Also, if you tap the screen of a browser 5 time rapidly in succession, or hit the keyboard return key 5 times, it also calls up the same are you sure window. You click this and then the browser clears all data and restarts the program.

63/ No temporary internet files shall be so designed that they act as a sponge for information about other websites visited or other external data from the user's device.

64/ All telescreens shall have the security option of face recognition plus a second unlock pin to unlock the device.

65/ All telescreens shall have:

a/ At least 2 optional low power modes on all devices, and each shall be configurable for all applications and for all big power uses. These settings must be configurable to be active once, or to always stay on. may be programmed to stay always on.

b/ Means to allow for users to select cloud backup every minute, every 5 minutes, every 15 minutes, every hour, every 2 hours, every day, every week, or every month.

c/ Means of throttling the maximum data transmission rates and preventing all or some background data transmission.

66/ It shall not be allowed to have the sort of handheld design where users can't easily take all their personal files and shift them over from one place to another at once and delete and erase them. Also people must be able to do this movement an deletion of files without connecting to the network, just as we can do this on our laptop computers. Also, with regard to cloud back ups, the users must be able to select files and folders for backup just as one typically does with a thumb drive.

NR'9. MONITORING OF THE PEOPLE

1/ Except for those on trial, and those convicted of a crime, the people (once grown) shall always be free to enter and leave their country, to go around their country, to leave electronic surveillance zones, and to communicate all without surveillance.

2/ There shall always be ample urban, suburban and exurban zones that are free from electronic and government surveillance and policing. Where there is a problem with illegal snooping, government shall sweep our nation's public places for unauthorized snooping devices.

3/ Except for felons and employees and certain foreigners, government shall not require any hardware or software to monitor people's location. Citizens that are not felons shall not be required by government to use location tech. Government shall not permit anyone else to require hardware

or software to monitor people's location. The people shall always be free to go around without a locator device.

4/ All non-vehicle beacons for the vehicle navigation system shall all be anonymous, and they shall not store any location data at all, and they shall be off-switchable to prevent tracking.

5/ Except as permitted herein, neither government nor any other group shall track and log the exact location or movements of the people either in the real or virtual world.

6/ We shall have video zones in our communities where everyone is subject to video recording. We shall also have non-video zones in and around our communities that government keeps free from video and audio recording. All these video zones are supposed to create a clear distinction in the minds of the people about what is Orwellian and what is not with regard to video zones. All transit and all stations, all urban streets, all lobbies waiting areas, and cashier and business interface areas shall be video zones where video recording is always allowed. Apartment and hotel lobbies and hallways shall likewise be video zones, while the individual apartments and hotel rooms shall be no-video, no-recording privacy zones. Also, public bathroom approaches, and public bathroom sink areas outside the stalls and urinal area of our public toilets shall be considered a video zone, while the stalls insides and urinal areas shall be private and non-video zones for where safety is a problem. Near our communities, we shall use up to 10% of the area for wilderness areas that are gated and demarcated by doorless Japanese style shrine gates. Here we will have public maintained hiking paths with surveillance video cameras and ID of all visitors. In fact, it will be a crime for people to be in a wilderness park without a tracking device of some sort.

7/ Most crowded public areas and predator places will be video surveilled. However very few places shall be audio monitored. Only places where people are talking to others in a commercial or government sort of relationship, only these places get audio monitored. Also, the front doors and entries of residences and lobbies of residential buildings may record sounds.

8/ Government shall regularly check to make sure that all supposedly unmonitored places actually are free of monitoring and surveillance.

9/ The various areas around our cities shall have colored bands on the road to indicate the sorts of network coverage and video surveillance that place has. The people who want total surveillance should stay near the center of their community, the people who want privacy should leave the community center.

10/ It shall be thought a hallmark of totalitarianism when one cannot easily find a nearby public place that is free of surveillance.

11/ Neither Government nor anyone else shall use mobile surveillance drones such as flying spy drones and wheeled drones to snoop on the people without a court order. This shall be thought a thing akin to having private investigators follow people around and spy on them.

12/ The following people may be required to use a tracking device at all times:

a/ Non-citizens.

b/ Those previously convicted of a violent and non-political

felony.

c/ Those out on bail awaiting trial.

d/ Police and government officials.

e/ Those carrying arms upon them.

f/ Those with amphetamine, cocaine, opiate, and certain other recreational drug licenses.

g/ Prostitutes.

h/ Those working with minors such as school teachers and camp counselors.

i/ Students at school and en route to school.

j/ Where parents require this of their minor children.

13/ Special high-resolution location monitoring systems shall be used in all children's places like schools. The recorder shall provide free monitoring of all Schools and day care streams, as well as streaming for the parents who wish to login and connect.

14/ Anyone that has recorded a crime shall be required to send a copy of the file to the recorders office. Third parties who send in valuable information that results in a conviction may be rewarded provided they did not set anyone up.

15/ Except for test programs involving less than 10,000 people, there shall be no use of face recognition technology without Senate approval.

16/ Government employees that tell people to stop filming when they lack the right shall be fired. Everyone working for government shall sign a public recording waiver as a condition of their employment.

17/ Software installation and software updates shall not send any customer data, except the customer number and a unique password/key. Also, no more than 1000 characters may be sent by the user's application during a software update. No privacy aspect of any software upgrade feature shall be on by default, or changed to on by the upgrade. All new software features and all functions that transmit data out shall be non-functional and off by default. No software update shall adjust anyone's settings, except in regard to new or deleted settings. All software upgrades that are charged shall pay MECOT.

18/ All devices capable of wireless communication shall:

a/ Be capable of caching their outbound data according to the user's preferences.

b/ Come loaded with a little snitch application.

c/ Have audio alerts when data is sent to a new address.

d/ Have a recent use screen when anything unusual happens.

19/ Web browser, search engines, and other potential user data aggregators shall not be allowed to collect or sell detailed user data, except with regard to past purchases and marketing-related keyword use.

20/ It shall be a crime for Government officials, and anyone else to remotely access telescreens or computers that are ostensibly secure.

21/ All communication tech and surveillance video cameras must be on regularly spaced, registered poles that are made to be seen. Only Senate-approved hardware shall be allowed here. There shall be rewards for turning in unauthorized data harvesters.

22/ There is already the telescreen data, there is little point worrying about who-went-where in the city privacy issues here. So as a matter of crime reduction, and civil defense,

government shall encourage residential communities to create controlled-entry, ID-verified security zones of perhaps 80 to 10,000 dwellings. In these communities, nobody gets in unless invited by a resident. We might also want to have people log-in to use urban parks. This can be used to keep nuisance park dwellers out of the parks. If political people want to meet anonymously, they must use the peripheral park.

23/ All area entry authorizations expire once at 24 hours. The resident shall choose renew, extend, or refuse. Renew gets 24 hours more. extend gets 10 days, refuse cancels the request. There shall be similar renewals at 10 days, 180 days, and then on the last day of each year.

24/ Government shall always be presumed to be recording when government people meet with the public. The people shall also be free to record government workers and teachers interacting with minors, (Government or private).

25/ The following sorts of people may be freely recorded:

a/ Those shouting things in public.

b/ Those speaking to many people.

c/ Those in confrontations and fistfights.

d/ Those doing things or behaving in a way that makes it look like they may commit a crime.

e/ Those ordering a person to do something on claim of authority. This includes ordering a person to leave a premises.

26/ In general, the people shall have the right to record in:

a/ Public places, and on public property.

b/ Private property open to the public, even if an entry fee was charged.

c/ All entertainment venues.

27/ Where products require registration or software downloads, or updates to work as intended, these may be returned to the place of purchase for a full and immediate refund within 30-days of purchase. No pre-registration shall ever be required to activate or use a product warranty. A paper receipt, or an electronic image of a purchase many years ago shall suffice to make a claim against any product warranty.

28/ Manufacturer that register the users of their products shall be required to have a permit to do this for each product they sell. They shall and also have cumbersome ongoing regular updates for compliance. Software makers may require registration, however, hardware shall makers generally shall not.

29/ As all speakers can be used as microphones, the Senate shall regulate all speakers sold on the market so as to prevent this.

30/ Those who put or engineer secret snooping devices in manufactured goods shall be treated as spies under the law. These people may be executed or get life sentences for spying. Where fictional citizens engage in spying on the people, their directors can sometimes be charged with capital spying. Countries with manufacturers that put secret snooping devices in their electronics shall be sanctioned and increasingly prohibited from accessing our markets and our seas. Also, this minor thing shall be regarded as yet another important incentive for encouraging the decentralized the world's mega-nations so we may decentralize.

31/ Non-human entities shall have no right to privacy at all.

Privacy shall be thought a human right and non-humans shall have no privacy rights, lest they be used by humans as a disguise or shield for nefarious purposes. All fictional citizens and their workers can be freely recorded and talked about. Companies that sue whistleblowers for speaking the truth may be punished by toxic-waste scale fines.

32/ When people commit crimes and are allowed probation, or home confinement, the courts may have the ID-verification system exclude them from various sorts of secure area, including stores, offices, and residential areas. Under this system, many courts will say that a convict must be released into a specific neighborhood more than say 200km away from their old neighborhood. They can only use their money in this new location, and are not allowed to leave.

33/ All felony ex-convicts shall be prohibited from traveling to other counties. They must register in one county for life after they are released from prison.

34/ The Senate shall decide when and how stores, and store chains, and groups of store chains, and restaurants are allowed to use facial recognition to control entry and blackball certain individuals convicted or not-convicted of a crime. The Senate shall decide under what exact conditions this is allowed, and when is it prohibited. And it all cases the recorder is storing and accessing the video streams where the private sector pays the reasonable cost of this

35/ Felons shall never be allowed in any breeding area, or secure community. The county recorder's ID-verification system prevents these people from leaving the interchange to get on the platform to board the train to most townships. Here we imagine 7 face recognition double door security chutes in front of each train. There is also perhaps another 15 chutes directly in front of the 15m wide interchange binarios. Thus 22 people can enter and exit at once, the ID verification system simultaneously processing of the person while they are a couple meters away from the gate. Big brother will rule the interchanges and stations, the food courts, and township shops. However each township will be required to assure that at least half of the peripheral areas remain totally surveillance free. Townships are also supposed to have sufficient anonymous lockers to meet demand. In fact, there shall be an overlap of mail lockers and personal property lockers at the post office in the center of each township. Thus people will find it easy to lock their phone up if they want to.

36/ Many people will pay a small fee for AI video monitoring of their video feeds and recorder back up of these security camera feeds, door cam feeds, elevator cams, and other cams.

37/ If somebody is in a video feed, making a big rotating look here Y with their arms. All video monitoring software shall be programmed to call that a distress call to the monitoring cameras.

38/ Where Government has not pre-notified the people of electronic equipment on their private property within the prior year, the people shall be free to take, vandalize, and to destroy this electronic equipment on their private property. The destruction of illegal surveillance equipment whether by Government or individuals shall never be a crime.

39/ It shall be considered the same under the law when people spy on others with their own equipment, or they hack into the equipment of others.

40/ Community Big Brother shall be strongest around our transport system and city centers. Big brother shall be present to some degree in our inner parks and outer walkways. Big brother shall be non-existent inside people's homes, even with a warrant. And even government shall not be allowed to put listening/recording in the homes of the people. Big brother shall be non-existent at township peripheries. But big brother shall always be watching felony ex-convicts and search warrant people, and sometimes watching non-citizen visitors.

41/ It shall not be allowed for fictional citizens to monitor the people's telephone calls, text messages, emails, or social media for any purpose including the purposes of marketing and advertising without either the user's permission or a government search warrant. Furthermore, no service may make monitoring a condition of any service. Furthermore, it shall be the Senate's official policy that targeted advertising money fosters private engines for spying on the people and the people do not want this.

42/ Everyone shall always have the right to go to an unmonitored place to meet with other adults. Nobody shall ever have the right to question people about why they went to talk in an unmonitored place. This sort of question shall always be thought to be a definite violation of everyone's right to peacefully assemble. Nobody gets to ask questions like:

a/ Why did you go to an unmonitored place?

b/ Why did you talk to somebody or share information in an unmonitored place?

c/ What were you discussing in the unmonitored place?

43/ The people shall not be required to carry a locator device in their own neighborhood or in remote outdoor areas. They may however, be required to carry one when they visit a strange township, or a potentially dangerous national park area, or a wildfire area in fire season. Also non-citizens and felony ex-convicts shall in general always be required to carry a locator device.

44/ All humans, cyborgs, and human machine hybrids shall always be allowed to go without their machine equipment. We shall never have a Borg situation where people are attached to the group equipment and they're not allowed to disconnect this.

45/ The county Senate may easily order extreme video surveillance of public and semi public places where there are many crimes, and/or prostitution and/or drug arrests. Rural and wilderness counties may also monitor the identity of everyone entering certain high fire risk areas to prevent forest fire arson and other sabotage.

46/ Telephone location records and browsing histories shall be kept for 30 days and then deleted/destroyed unless the Senate decides to keep them for a different time period after careful consideration. No phone shall store, or send any location data from a time when either in airplane mode or powered off. No phone shall require the camera to be on or uncovered to operate. All phones must have way to cover the camera lens with an opaque.

47/ The idea that monitoring the people brings security from terrorism shall be regarded as a Trojan Horse, and one that leads to more terrorism to provoke more monitoring that is key to the black agenda of parasitism. The parasite very much wants this sort of knowledge, so it can eliminate its

natural enemies, and our natural leaders. We shall not let terrorism provoke monitoring, or we will invite more terrorism certainly.

48/ The monitoring of the people shall not be regarded as protecting their freedom, but instead as something that undermines their freedoms, because normally it is the enemy of the people doing the monitoring. Instead, we shall handle monitoring as something that the county recorder system will make a record, but the access will only be after a problem occurs, and then law-enforcement will go and look at the records only then with a search warrant.

49/ There shall be a uniform national data collection policy. This shall be updated annually. There shall be a uniform policy for all platforms across the entire digitally economy. It will be a crime to violate this policy, and it may be considered illegal data trafficking.

50/ It shall be thought an important anti-totalitarian function that all text editing, all voice recognition delivered locally and never over a network. Where even a small amount of these functions are delivered over a network, it shall be considered data trafficking.

51/ Where people are migrating their data from one device to another, this shall not require any connection to any other network. Where device migration requires this, it shall be considered data trafficking.

52/ To reduce data trafficking from temporary Internet files, all web browsers shall have a delete temporary data button on each browsing pages. One button and one click shall be delete all temporary files, and the other button shall be delete all files, except those saved to the protected, temporary files pages.

53/ It shall be considered data trafficking when apps gather information that is outside of their narrow range of use. also, where temporary data files survive being supposedly deleted, and the browser still knows that you've been somewhere before, this shall also be considered data trafficking.

54/ The companies installing cameras and security systems shall not be allowed to monitor those systems. Also where security systems, security cameras, and internet modems and routers are installed at a premises, they shall become part of the property, and the company installing them shall have no right to remove this hardware once it has been installed and a premises. The same rule shall hold for all utility companies that have special equipment on a premises, especially for meters and cable modems.

55/ All cameras used in urban centers and on arterial roads must have a record of their location with the county recorder system.

56/ Electronic devices used inside home and offices with cameras and microphones shall not send spy information, or the manufacturer may be charged and sued in money court for spying on the people, or enabling supposed third parties to spy on the people. Also, such devices shall not even have the ability to spy or the company may be charged and sued in money court for spying on the people.

57/ All facilities for receiving the dead shall be in a police station. There shall be continuous multi video of each corpse from collection of the corpse to final burial or incineration of the corpse. All cremation of humans shall be individual and the government shall provide this service for no charge for all

human corpses. Government shall also collect the ashes and put them in in a plastic bag. Government shall also have separate free pet crematoriums that are free for all licensed pets.

58/ Do we want to notify the next Al Capone when government starts investigating him? So there shall be no right to know when the government is monitoring you for non-political crimes and especially crimes related to organized crime. There shall also be no notification where they person being investigated is foreign born. Where the government investigates people for all sorts of political crimes, government must notify these people that they are being investigated and why there are being investigated.

59/ No property owner or tenant shall ever be held to be responsible in any way if their private video camera was not working. Reliability shall only be expected of the Recorder system public cameras such as we have in our children's locations and and care homes, police lockups, and town centers, and other places that pay a small install fee and a small annual subscription to install the monitored cameras.

60/ The location of all government and private cameras monitoring public or shared areas must be made public. It may be a felony to have undeclared cameras monitoring public areas, especially in changing rooms, toilets and hotel rooms and car rentals.

61/ There shall be no centralized analysis or monitoring of doorbell cameras or road camera (flock) data except by the recorder system with a warrant. There shall be no data mining of the recorder system, except upon a court order. It shall all be kept secret and ready for access later by people with a search warrant.

NR'10. NON-DEMOCRATIC MEDIA

1/ We shall ponder the words of Thomas Jefferson:

"The man who reads nothing at all is better educated than the man who reads nothing but newspapers."

2/ The media shall be prohibited from covering candidacy and elections. This restriction shall also apply to the social media, youtubes, and search engines. There shall be no giant expensive advertising platforms in our elections. Also, there shall be no free airtime or media coverage on commercial media for any candidates. The commercial media shall not participate in the election process at all. The free media may participate, but not the commercial media.

3/ Reporters shall not judge, but only report. If people can tell how the reporter stands on an issue, the reporter is biased.

4/ All of the largest new organizations in the nation shall be shut down including all of the following media organizations. Then all of their staff shall be banned from working in any area of the media for life: CNN, MSNBC, NBC, CBS, ABC, FOX, PBS, NPR, CNBC, the New York Times, Washington Post, Wall Street Journal, USA Today, Los Angeles Times, Chicago Tribune, Fox News, Tampa Bay Times, and News Day. After this constitution comes into effect, the government shall not have the power to shut down newspapers and other news outlets unless they grow too large, or unless the newspaper is proven by a Senate jury of over 2,000 to be the mouthpiece of a foreign nation or the PU.

5/ Media people that parrot the same foreign party line are supposed to have their words clipped together with others saying the same thing. Media people that parrot the same lines and words nationwide may be judged as part of a conspiracy based on their words.

6/ No serious news publication shall have any astrology section, or any section on sports, travel, nature, movies, fictional books, cars, film or nude women, or bathing suit women.

7/ Only native born citizens shall work in the domestic news media. The people should also generally disregard the opinions of star actors, sports stars, star musicians and other frivolous media stars, as well as the editorials and opinions of news outlets. To do otherwise is to hand these people a backdoor to our democracy. Lawyers and actors especially shall be seen as practiced professional liars. Therefore, they shall be thought to be inherently disqualified from serving the people with regard to public policy.

8/ Government shall not work with the non-democratic media to put out coordinated stories. It shall be a crime for public officials to lie to the people like this.

9/ News media reporting violent crimes, shall not in any way, blame the victim, unless the victim was doing something that obviously was the sole provocation for the crime. All news media reporting crimes must state the past convictions, race, age, and country of birth or citizenship of the suspect, if they have foreign connections. This information shall be thought, vitally important for the people, so they can make critically important decisions about which foreign nations they are going to allow, and which they are not going to allow in our nation.

10/ It shall not be allowed for the news media to talk about the legal sexual activity of the people with or without their consent. For surely this will be used to come by some form of power over our people.

11/ The right of free press shall not include the right to stalk people, or to go uninvited to their home or workplace, or to follow them around recording or photographing them as they go around in public. This sort of recording shall be considered stalking and all of the normal remedies for lust stalkers shall also apply, and be available for press stalkers and paparazzi.

12/ Where people as subjects of a journalist's interviews don't stop and engage the camera, there shall be no right to broadcast their images as unwilling to give an interview. Where people over age 18 voluntarily turn and speak to a camera there shall be implied consent to broadcast except as stated otherwise herein.

13/ There shall be no right to broadcast an interview where:

a/ The person being interviewed walked away from the interviewer, or out of the interview, even if they previously signed a release.

b/ The interviewer disguises their identity, or who they are working for/with.

c/ The interview questions (including follow-up questions) differ from the questions presented to the person as a condition of granting an interview. If there are new questions, then all cameras must be turned off while they are asked.

d/ The person interviewed does not grant consent to broadcast after the interview is over. This may be on video, or in writing, however video consent directly following the

interview shall be thought better.

14/ The right of the free press shall not include the right to report the identity of people merely accused of crimes. The presumption of innocence and the right to due process shall be considered higher and more important than knowing who is accused but not convicted.

15/ Recordings of people in the background, and genuinely accidental recordings of the people going about in public, and accidental recordings of crimes may be freely distributed without permission from victims, apparent criminals or bystanders. The term accidental recordings shall also include bystanders who turn their cameras to film a commotion.

16/ There shall be total free press with regard to the printed and spoken word, but the right of free press shall not apply to using the images of people without their permission, particularly when they are accused but not convicted of wrongdoing.

17/ Regarding the people and especially their leaders, no media, or information reporting service shall report on any of the following without the prior written permission of the person involved:

a/ Legal sexual behavior.

b/ Romantic and social involvements.

c/ Marital infidelity, or adultery.

d/ The wrongdoings, comments, or words of their children, partners, parents, or siblings when it is only news because the person is related to a someone important.

e/ Misdemeanors and non-felony convictions.

f / Mere accusations, or indictments by government.

18/ A democracy mostly informed by a few giant news sources is a democracy that is maximized for the filtering of information and corruption of public opinion. We shall go in the opposite direction and impose limits on the scale of our news organizations in the hope that this will cause a more-truthful, and a faster breeding ecosystem of smaller news outlets.

19/ No Government bureaucracy or administration shall ever be involved in either the preparation, review, prioritization, or dissemination of the news, or search results or what is displayed on social media. If this ever occurs, it shall be considered, felony censorship, except where dangerous technology, or genuine, military secrets are involved.

20/ The Sub-Senate shall have the high ground as the nation's fact checker. The Sub-Senate may demand that any other fact checkers cease operation. The Sub-Senate may also ban certain individuals and fictional citizens from working as fact checkers for life. The Sub-Senate may also charge these supposed fact checkers with spreading propaganda. Note: This is the fact checkers, and not the people they are checking. Indeed, our democracy shall be sloped towards eliminating fact checkers, except where they are removing genuine an obvious propaganda, such as video and photographs of past events being described as something else that is new.

21/ No fictional citizen, or human citizen shall own or manage more than one news source, or employ directly or indirectly more than 99 people, including part-time, contractors, stringers, and support people.

22/ Non-Senate news sources shall not form networks or collaborate with each other, but must remain independent in

every way practical.

23/ If the Sub-Senate elects a violation of the scale rules for news sources, then the organization may be broken up or shut down. The staff might also be stigmatized by the Senate.

24/ Only human native-citizens may own or run our nation's news organizations. Those who are not native-citizens shall not work in our nation's news organizations.

25/ News organizations of any size, and news people shall not take money, benefits, or sponsorships from those they cover, have covered, or will cover. This sort of activity shall be considered bribery. The Senate shall produce detailed rules on the exact nature of what is allowed and what is not allowed in these matters. The Senate may use sting operations on news people of any sort, so that they are all afraid to communicate about bribes.

26/ Individual people, and small groups shall be free to have news websites, email newsletters, and video channels and the like, without the financial reporting requirements of larger news organizations. It is just the group journalist news outlets that must comply with these rules.

27/ Government and all fictional citizens shall be required to treat well-known independent journalists as the equal to journalists from large group outlets.

28/ All advertising, sponsorship, and other payments to media organizations, must be via the government's payment system, or the transfer may be considered bribery. This especially includes payments from foreign sourced money. Also, all money paid to news people while working in news and for 10-years after shall be required to use the Senate's payment system.

29/ In order to keep our media outlets tiny and our matrix reality impossible to manage, we shall have progressive income tax for recipients of advertising spending. All media organizations with over 300 staff shall pay a 100% tax on all income. All with over 200 staff shall pay a 50% tax on all income. All with over 100 staff shall pay a 25% tax on all income. (The staff count includes contractors and temporary workers)

30/ Everyone working as a journalists must keep an open public ledger for their income and its sources (including all gifts) for 10-years after they stop working in journalism. Journalism shall be one of the areas where lifestyle auditing will be focused.

31/ The Senate shall have a generous budget for Ubiquitous rewards to journalists. This is to undermine the power of corrupting money in journalism.

32/ News videos shall not be preceded by ads or sponsorship information, or contain these within them. All news websites with advertisers that offer news video must link to that video from a page with a full and easy to copy transcription.

33/ The people are called upon to do something that is hard for government to enforce. They should avoid news venues that distract with frivolous subjects related to sports, music, fiction, arts, fashion, nudity, animals, travel, individual crimes, vehicle accidents, and normal weather conditions among other less important things. The people should also avoid new venues that are enthralled by Mideast events and influences. The people should realize that greater Arabia has about 1.5% of the world's population, but it has occupied most of its news for decades.

34/ Every person working for, or contributing to a news organization must put a new unmodified passport style photo without make up or hair coloring, hair back, on the news organization's website every year.

35/ We are not supposed to know how any news outlet stands on the various issues, because this is what bias looks like. Where the Sub-Senate can tell where the news outlet stands, that news outlets may be stigmatized.

36/ When people can't attack a policy, they frequently attack the men leading the policy change. This is called an "ad hominem attack" in Latin, or an "at-the-man attack" in English. Where people think they are seeing ad hominem attacks, they should generally be inclined to go in the opposite direction and support the ideas being attacked. When people listen to ad hominem attacks, corrupt leaders tend to drive good leaders and selfless patriots out of office. For why would anyone subject himself to the endless, mostly baseless character attacks of the sort suffered by Richard Nixon, Ronald Reagan, and Donald Trump? Where the Sub-Senate elects that a meritless ad hominem attack, or a political smear has occurred, it shall vigorously counter the attack with its own words. The Sub-Senate may also stigmatize those involved with making unfounded attacks.

37/ Senators, Senate candidates, news presenters, and people being interviewed shall not be allowed to use teleprompters. They can read from a paper, but no teleprompters shall be used. Also, where teleprompters are used in presentations, the teleprompter text must be included in the stream and accessed in the closable captioning, including the writer's/director's/producer's instructions.

38/ The distraction of deaf interpreters shall be prohibited in all broadcasts. Deaf people must now read the close captioning, or use internet-based narrow-casts.

39/ All broadcast media outlets shall be required to run Government's public service announcements for 1/30 of their airtime. All download streaming media shall be required to run Government's public service announcements for 1/120 of their time. All periodical print media shall be required to run Government's public service announcements over 1% of their area.

40/ The Senate shall have a monopoly on government run media. The Senate shall now fire every single person from the corrupt government media and rehire people to produce the new government media. All the people made famous by government media (and especially NPR and PBS) shall be banned from working in any key position for life, including working in the media, education and lecturing.

41/ The new government media shall be written, produced, directed, assembled and presented exclusively by Senators. In our nation, only Senators may read the government's news, or have stories on government media, and none shall accept any money to be on the news. All stories on all channels must come from the Senate BBS, and all must be the top ranked Senate BBS postings that are suitable for the hundreds of specialized Senate BBS subject headings.

42/ All of the top Senate news and information media headings are supposed to exist in thousands of versions rather than one monolithic feed that everyone watches. This is because we as a society must encourage diversity of mind as much as possible. There shall however be Senate must-

watch media that everyone must watch, so that common knowledge can be universally updated and upgraded. Must-watch Senate update media shall be limited to 3-hours of time per teneth (5-minutes per day) Those people who do not watch all the universal media may be deprived of the right to vote, the right to hold arms, and the right to serve in the Senate. This media shall be required of everyone over age 13.

43/ All Senate media shall have 2% Senate auctioned commercials per day. This is 75 seconds of commercials per hour. The Senate shall directly auction off this advertising time to those who have legitimately new products and services to sell. This time shall not be used for brand advertising, or price advertising, or products the Senate does not approve of.

44/ There shall be no positive awards for journalism or discovery, authorship, film acting, singing, teaching, such as the Pulitzer Prize, Nobel prize, Academy award, Grammy award, etc. There may be negative awards, such as an anti-Nobel prize, but there shall be no positive awards competing with Senate Status. Also, regarding our Senate's democratically awarded Ubiq status, this shall be thought a jealous thing in our society. There shall be no science, media, or educational awards or prizes that are issued by non-Senate groups. All assets of the Pulitzer Prize, Academy Awards, and Grammys, shall be nationalized and these shall be shut down.

45/ The main news, the headline shall include no news about actors, sports people, musicians, fictional tales, sporting events, entertainment events, no stories about terrorism, no stories about people exploring our planet. There shall also be no stories about ecology or the environment, or medical treatments, or vaccines, or healthcare, or sexuality.

46/ The Associated Press, Reuters, CNN, MSNC, Fox News, NBC News, the BBC, the New York Times, the Wall Street Journal, the Washington Post, The Los Angeles times, the San Francisco Chronicle, USA Today, and all the other large news organizations shall all be shut down, and all their recently employed people shall all be banned from working in news media for life. The Senate may also take other actions against these fake news media people including trial, prison, and other judicial penalties.

47/ All forms of cannibalism including the drinking of blood shall be a felony. There shall be no depiction or suggestion of cannibalism or torture or ritualistic violence in the media, except when it is related to whistleblowing on actual events. Knowingly eating already dead humans that died of natural causes shall get 10 years in prison per count. Where the person was killed or maimed for a group cannibalistic event, all those knowingly eating human flesh or drinking blood shall be considered conspirators in the crime of first degree murder under special circumstances. Those who knowingly drink human blood shall get 10 years, those who knowingly drink blood as part of a religious or other form of ceremonies shall get 30 years. Those who kill people and later eat them shall get death by torturous execution. There shall be no products containing human flesh or blood that is not regulated by the FDA.

48/ There shall be no marketing of gambling outside of approved gambling platforms. There shall be no marketing of

computer games outside of approved computer gaming platforms.

49/ Who famous people have sex with shall not be a thing for the media to report about. What a waste of human mental bandwidth, and for something so inconsequential. So this sort of material gets a news outlet stigmatized, and heavily stigmatized if it keeps reporting on people's private lives like some nosey Little Brother.

50/ Which Senate pull in more good men, the one where there are a great many accusations if you get elected, or the one where you don't have to worry? Also, where sexual activity is reported as news, it is more likely that good people will be eliminated instead of bad ones.

51/ The video media shall not be allowed to talk about unproven accusations for anything except corruption and situations that resulted in the death of at least one person. These accusations shall be allowed in print and photograph presentations, however, the video media shall not concern itself with other sorts of unproven accusations.

52/ In order to reduce violence against women, and violence among women, it shall not be allowed to broadcast media depicting women being beaten or boxing or engaging in fist fighting. There should be no sport of women's boxing or women's kickboxing, or any of the martial arts for women. We shall not allow this to be a sport.

53/ Neither government nor anyone else shall have the power/right to award people with status as a "genuine journalist."

54/ All should ponder the words of George Orwell (Eric Blair) that: "Journalism is printing what somebody else does not want printed. Everything else is public relations."

55/ Music and drama shall no longer be allowed over the airwaves. Only useful things can be broadcast over the airwaves. People who want song and dance, music and drama have to get it from the Internet going forward now. Government shall now require that broadcast media only be used for useful purposes, educational purposes, and news purposes. Also, the nations cable system, cable TV system shall be nationalized and regarded as part of the airwaves with regard to television content.

56/ All the EDU and passive content that is displayed to passive people shall be run by the Sub-Senate, with at least 200 different free channels nationally. We individual human citizens will make all the memes and clips and snippets and images. The part of the passive media system that determines who sees what shall be thought to be something that is too important to leave in the hands of entities or foreigners. Therefore, this shall be run by the Sub Senate, with perhaps a few leased channels.

57/ All social media video posts shall have a database box for metadata such as source and source age. It shall also have means for other users to complain about the media being mis-attributed. Media with improperly attributed metadata shall generally not get any payments from the system it is posted on. Also, all media shall be required to favor posts with complete, accurate and truthful metadata.

NR'11. ADS AND PROPAGANDA

1/ It shall be government's stated policy to discourage, tax and carefully regulate advertising because it is fundamentally a paying of money to corrupt the judgements of the people.

2/ The proper regulation and reductive taxation of paid messages shall be considered something that helps freedom of the press by reducing the power of money to corrupt the truth.

3/ Policies that reduce the power of money in our media shall be generally considered a good thing. Policies that increase the power of money in our media shall be generally considered a bad thing.

4/ The giant advertising flows of our fictional citizens shall be considered one of the most problematic aspects of paid advertising, because these are easily hijacked and redirected. It shall be a double felony to redirect fictional citizen money, or government money towards political purposes. The first felony shall be for misappropriating money, and the second felony shall be for election meddling.

5/ The following industries with their giant cash flows, and with society not needing their advertising, shall not be allowed to purchase or barter for ads, publicity, or sponsorships including direct messages requiring postage: Raw materials, commodities, minerals, petroleum, fuel, coal, gas, fuels, electricity, water, telecom, cable TV, ISP, insurance, banking, lending, transaction services, investing, vehicle manufacturers, car renters, hotels, cleaning products, grocers, chain restaurants, airlines, trucking companies, transportation providers, shippers, spectator sports, gambling facilities, lotteries, beverages, perfumes. Mafia drugs, non-novel therapeutic drugs, tobacco products, tobacco-like products, smoking products, non-prescription inhalants, comestibles with stimulant drugs or that are more than 20% sugars, schools, healthcare providers, lawyers, legal service providers, accountants, all types of professionals, charities, and especially products subject to luxury taxation.

Also, the following things shall not be allowed intellectual property protections or brand identities or friendly droid names like Exxon or Enron: Raw materials, commodities, minerals, petroleum, fuel, coal, gas, fuels, electricity, water, telecom, cable TV, ISPs, communication and power systems, beverages (both alcoholic and non-alcoholic), perfumes, non-prescription skin creams, Wrinkle or anti aging creams, Mafia drugs, non-novel therapeutic drugs, tobacco products, tobacco-like products, smoking products, non-prescription inhalants, comestibles with stimulant drugs or that are more than 12% sugars to start with. Later the Senate shall reduce the maximum sugar content for IP rights to 10% sugar, or 8% sugar at least.

6/ All forms of inbound marketing and marketing on a company's one and only main website shall be allowed for every industry. However, the industries in item 5 directly above shall not be allowed to spend money or offer benefits to drive people to their company.

7/ No advertising or paid message for any purpose shall include any music, rhyme, song, jingle, or information that is not about the product or service. Advertising and work uniforms shall not display the skin between the armpits and the top part of the legs above the crotch of the person while

they stand.

8/ Advertising shall not depict, mention or infer:

a/ The human skin between the armpits and 4cm below the crotch while standing or the tongue protruded far from the mouth.

b/ Prostitutes, the various sex acts, clothed simulated sex acts, twerking, people inviting others for sex, people bent over, or with their ass up, or people with their legs spread.

c/ Bars, alcohol, alcohol consumption, or drunk people.

d/ Tobacco, tobacco products, tobacco substitutes,

e/ Mafia drugs of every sort including marijuana.

f/ Criminal activity, or criminal violence.

g/ Gambling, and especially lottery or gambling winnings.

h/ People between age 18 and 25, and children under age 18 depicted in a sexual or sexy way.

9/ To reduce noise in the group mind, we shall say that no webpage shall ever be more than 30% ads. And for those pages related to politics and group decision making we shall limit ads to 10% of the surface area. The Senate shall experiment with further reductions of relative ad space. It is thought that when government sets proportional limits for ad space, this results in only a small loss of income to media paid by advertising. This, while at the same time increasing value to the people by a great amount, because they don't have to sift through pages that are 80% ads.

10/ Fictional citizens (except religions) shall be prohibited from making untrue, deceptive, or unproven claims.

11/ Government shall not purchase private advertising of any kind, nor shall it give any tax reduction or payment to those who advertise or tout their products.

12/ No government property, including all transit, highways, streets, theaters, stadiums, parks, land and buildings, as well as government-run media channels shall have any private advertising or sponsorships of any sort. Signs on public property and transportation infrastructure may only be used for public service announcements and public education.

13/ Government shall be prohibited from squandering memetic overhead by naming any public property, or any government institution, or any government practice, or any day after any man or fictional citizen. All prior grants are hereby void.

14/ There shall be no IP rights for serialized media with repeated singing anywhere in its episodes as these songs frequently contain propaganda. Only educational children's media may have repeated singing.

15/ There shall be no advertising or music in or on airplanes, railcars, metro railcars, busses, taxis, or shared vehicles, or elevators, or in airports, ports, or train stations, bus stations, stadiums, or on government owned property, vehicles, or in any schools, athletic facilities, or near government financed roads. Public service announcements by the Senate shall however be allowed.

16/ When search returns yield nothing, the search engine cannot suggest alternatives unless the show alternatives button is pressed. The page must be pure yellow with the words, "No Results" in large text in the middle of the page. A new search can be entered from this page.

NR'12. SPAM, POSTAGE & AD TAX

1/ All items moving through all delivery systems shall pay postage based on the same uniform per gram price. There shall be no discounts given for any class of item moving through the physical object delivery system system. All citizens real and fictional, as well as all government services, shall be required to pay the same postage based on weight and size threshold. Government services shall also pay postage so that they send less and conserve more.

2/ Everything delivered to a mailbox or address must pay postage regardless of the delivery system used. Thus all the private delivery services shall be required to pay postage, just like the national delivery/mail service. This is intended to mostly eliminate these parallel services.

3/ Everything moving through the delivery system shall pay postage of at least 3-second's wages per gram, with a 50 gram minimum. The surcharge for sending mail internationally shall be by a similar minimum. There shall always be only one rate for all international surface shipments to each destination. This shall be 3X the full container rate.

4/ Bills shall not be valid unless sent through the county recorder's electronic billing and payment system. Therefore, we shall no longer have billing via paper statement sent through the mail. All services that are monthly or tenthly shall b3 due on the third for each month that began three days earlier, all account services get turned off five days later if they're delinquent. All wages must be paid on the day after the pay period, with money available in the account on that day.

5/ The physical object delivery system shall not be used for printed magazines, newspapers, catalogues, grocery store marketing, drug store marketing, hardware store marketing, or any other sort of retail marketing. Also, the marketing materials for sales agents, property for sale, property for lease, property repair people, construction services, insurance, loan payments, and tax services shall not be sent via the physical object delivery system. When these services use the physical object delivery system, they shall be subject to 8 times the normal rate for postage by weight.

6/ Business solicitations moving through the delivery system shall not be allowed to use envelopes. All solicitations must say the word SOLICITATION in all caps of the same size above the recipient's name and address.

7/ All paid and/or unsolicited messages shall be taxed based on audience size, or number of recipients, or potential viewers and method of dispersal. This shall include all billboards, signs, ads in print, video ads, audio ads, web ads, product placement ads in media, emails, tree-mails, voice telephone, video calls, door-to-door sales, door hangers, material left on the door mat or windshield, in-person touting in population centers, and other similar means of contact. The most intrusive methods shall pay the highest per viewer postage or taxes. The forgoing shall however, not apply to political messages delivered by volunteers for no compensation.

8/ Electronic communication shall not be subject to postage where it is invited or responded to. Requests for removal from a mailing list shall not count as a reply.

9/ All billboards shall pay tax equal to at least half a second's

wages per passing potential viewer per day, per 20 square meters of sign area.

10/ Dynamic ads of any sort shall pay 3 times the rate of stationary ads. Dynamic ads with audio shall pay 10 times the rate of stationary quiet signs.

11/ Tax shall be due on billboards and signs, even if they are blank.

12/ 1% of each building's floor area may be used for wall-mounted or wall painted signage and no billboard tax shall be due for this.

13/ Trucks and automobiles with more than 1 square meter of signage shall pay dynamic billboard tax. Vendor bags shall not pay signage tax if their handles are oriented correctly with their bottom pleats.

14/ The sender of each email delivered in our nation shall pay email-spam tax of at least 1-minute's wages if the recipient marks the email as spam. The email-spam tax bill shall be waived if the volume does not exceed the Senate's reasonable personal threshold amount per teneth per sender, or the email is from a Nome candidate to his constituents, or from a Senator to the other Senators in his Centi-Nome.

15/ All audio-phone and video-phone calls shall pay phone-spam tax of at least 3 minute's wages per call when the recipient marks the call as spam. The phone-spam tax bill shall be waived if it does not exceed the Senate's threshold amount per teneth per sender.

16/ Computer systems and robots shall not have the right of free speech, and they shall not be allowed to use the voice or video telephone system for outbound marketing or advertising purposes. It shall be a crime to program computer systems or robots to use the voice or video telephone systems for outbound marketing purposes. This is because such robots drive people to turn off and disregard their phones, which are potentially vital emergency notification devices.

17/ The emergency notification system on cellular phones may only be used for natural disasters and events that threaten a great many people. The emergency notification system shall not be used for matters of individual crimes or fugitives. In cases of tsunami, coming earthquake, fire, and tornado, it is vital that everyone keep their phones on all the time.

18/ Product placement ads hidden in widely viewed media shall pay at least 5 second's wages per viewer, per placement, mention, or reference. Media that includes apparent product placements may be assessed this charge even if the placement was inadvertent.

19/ Paid advertising, paid recommendations, and paid touting shall not be allowed to camouflage so as to look like genuine content. This deceptive business practice may be considered fraud

20/ When ads are displayed interspersed with actual content so it is hard to distinguish the content from the ad, they shall pay four times the normal postage rate.

21/ All broadcast commercials shall pay at least 15 second's wages per minute, per ad, per viewer or listener. This is about two cents per 30-second ad slot per viewer.

22/ Except for classified ads, all ads printed on paper shall pay at least 2-second's wages per ad per viewer.

23/ Postage shall be due for all unsolicited mass commercial communication whether sent via the physical object delivery

system (PODS), email, or deposited by hand in a mailbox, left on a doorstep, left on a windshield, delivered door-to-door, delivered via audio, delivered via short texts, or handed out as flyers to people walking down the street.

24/ All in-person commercial touts, commercial door-to-door salesmen, and everyone handing out commercial flyers shall be registered-with, and taxed-by their county. All shall be wear a government issued name badge that displays their barcode and ID number. All shall be subject to anti-spam tax for their activities. Also, each county shall be allowed to prohibit door-to-door at-home soliciting as a form of spam.

25/ Those touting political or news information in person shall be exempt from both registration and taxation, unless there is a commercial or religious aspect to their touting, or they are asking for, or accepting donations or money. Those not touting political, or news information in person shall pay the normal anti-spam taxes.

26/ All agents, brokers, middlemen, and aggregators of advertising or internet traffic shall pay commission sales tax.

27/ To reduce the need for wasteful middlemen, the national Senate shall provide free searchable indexing of providers in all industries and services in the national economy.

Something like Ali Baba but free. These accounts shall also include free web pages and free web hosting for the marketing of verified manufacturers. There are also bid boards, notify everyone in the industry communications, ID verification, and funds verification, payment verification, third party supervised contract doling out money, arbitration and quality testing, and more other features in order to drive the middlemen from most of the nation's markets, and instead use recorder system for all the recording purposes.

28/ Each ad displayed on a search engine, facebook or messaging service, or even a purposeless landing area, all of this shall pay postage of at least 3 second's wages, or one third of the ad's sales price, whichever is greater. All other sorts of ads shall pay reasonable postage as determined by the Senate, especially billboards.

29/ No email shall secretly send any information at all back to its sender.

30/ To control the spread of computer viruses, the full text of all clickable email and URL links must be displayed in an are you sure you want to do this popup window.

31/ Listings that are entirely advertising, such as yellow pages directories or Craig's list type websites shall be exempt from ad taxation.

32/ The Senate may exempt certain new and beneficial products and services from advertising tax for up to two teneths.

33/ Candidates shall not pay or hire people to act as followers either in the real world or in media. Candidates shall not exchange anything of value for their Sub-Senate nominations or votes. Such are the disqualifying acts of crooks and cheaters, not leaders. These acts may also be crimes under the law.

34/ All ads with audio must have a lower volume than the actual media they are advertising in, or they may be subject to a heavy fine.

35/ Once a robotic delivery system becomes available in an area human delivery shall be phased out over the following year, except for business owners and managers wishing to

talk with their repeat customers. Also this shall not apply to shared delivery spots.

36/ All delivery system workers, and all delivery system inlets, exchanges and gang delivery boxes shall have video to monitor the workers and keep them from abusing their packages.

37/ The spamming of investment content shall be considered investment fraud. The spamming of porn to many people shall be thought a serious crime.

38/ All email and social media accounts shall have censorship buttons for financial marketing, different levels of porn, and different levels of violence in your streams and emails.

39/ The delivery system has different delivery charges, depending on whether the area is urban, suburban, outer suburban, inner exurbs, outer exurbs, rural, and remote. The delivery system shall charge the reasonable cost of daily and weekly delivery for all exurban and more remote delivery points. Each mail delivery point outside of suburban areas must pay an annual subscription fee. This will covers the cost of their deliveries.

40/ The delivery system shall require the identity of everyone sending mail. The process of sending the mail scans the package being mailed, and sends the recipient a photo of the outside of the mail and the identity of the sender. The recipient then gets an alert, and either allows or disallows the email/mail as spam. If the recipient declares the physical mail as spam, then the mail goes straight to recycling when it hits the next scanning and transfer point. Also, the address can block mail from certain tree-mail senders in much the way they do with email senders. Also, when certain mass mailers get deleted too often, they can be banned from using tree-mail to communicate with people.

41/ There shall be no postmaster general, or any tzar of the postal service.

42/ The post office shall offer the valuable service of serving as an unbiased third-party in the checking of shipped goods that are damaged, or defective and are to be returned for a refund.

43/ The delivery system shall have shipping containers for both shipping, and also for container storage of personal items. These containers shall be priced close to cost for all county residents to use. There shall be full containers, double containers, half containers, quarter containers, eighth containers, etc. Many people will own their own containers, but others will rent suburban storage from a township. And many will rent both the container and the storage from the system. But it will be very easy and foolproof for people to rent out or sell their place and put all their personal items in storage, and go live somewhere else for a time.

44/ If we have an automated delivery system:

a/ The middlemen get eliminated more, and the efficiency of the system improves perhaps 3% or 7% as a result. This is a huge sum of money in addition to the road system and vehicle fleet and related industries.

b/ The origin of goods is much easier to determine and enforce and regulate. This is no small thing.

45/ The post office is supposed to eagerly welcome people having large PO Box in the post office because the public invariably makes money on this.

46/ There shall be no more printed stamps issued by the

delivery system, and all stamps shall be printed by the sender, the postage shall be paid and the sender print stamps from blank stickers, with the number of the item on it and the payment verification number or QR code.

47/ The delivery system shall be entirely funded by postage and other delivery fees. The government shall no longer subsidize the delivery system or Postal Service. The government also shall be prohibited from making money on the delivery system. However, these rules shall not apply to container or pallet-sized deliveries.

48/ Which shall generally be charged at a fixed rate. The delivery of pallet size deliveries, and container, size shipping container, size deliveries, shall be subsidized by the national government for the purposes of increasing trade, and keeping manufacturing within our country. In other words, domestic shipping of commerce sized loads, will be subsidized by the national government and sold at delivered at built cost with no regard to the cost of building the infrastructure. On top of this the price may be subsidized slightly by charges for the delivery of individual small and special delivery items such as letters and meals. And again, all deliveries regardless of the delivery service used must pay the government's postage charges.

49/ All forms of direct marketing communication including text messages, direct messages, emails, and other similar messaging systems, all shall pay postage of at least 5 second's wages per message, but this does not include a reasonable number of payment reminders for unpaid amounts not to exceed 30 words each.

NR'13. PRIVACY

1/ Personal privacy, shall be regarded as a cornerstone of a free society. The right of the people to privacy and anonymity shall be considered a fundamental right. The right of fictional citizens to gather data about users shall be considered as a thing that frequently creates a public nuisance. When we are in doubt, the rights of the people to anonymity shall generally prevail.

2/ Where the Senate elects that some sort of data collection is unwise, unfair, or an invasion of privacy, it shall halt this form of data collection nationwide. Also, it shouldn't be necessary to have private companies deleting peoples data.

3/ Everyone who collects data on impersonally-large numbers people (whether Government, or fictional citizen, or individual humans) shall be required to get a permit (similar to a building permit) and report the exact nature of the data collected to the county recorder system. Also, the county recorder system shall index who collects what data.

4/ There shall be a uniform national privacy policy with regard to the collection of data. This should be updated by the Senate annually. There should be a uniform Senate-established privacy policy for all platforms across the entire digitally economy. It will be a crime to violate this policy.

5/ The Senate shall require that both Government and all fictional citizens file a complete statement of all data they collect with the county recorder system. If somebody is collecting data that is not included in their filing, it may be considered as spying on the people, so everyone collecting data must make sure that they're not collecting something

that isn't on their filing list.

6/ The Senate shall establish a list of data that may be collected and a list of data that shall not be collected from the people by the various sorts of Government agencies, fictional citizens and by individuals.

7/ Vehicle registrations and driver's licenses shall not show the address of the owner/driver.

8/ Because we presume innocence in our justice system, people involved in judicial matters shall have the right to privacy with regard to their name, image, address, data, voice and other identity details in connection with criminal charges until they are convicted. Without a judicial conviction, none of this information shall be broadcast, published, socially networked, or disseminated without the written permission of the person charged. It shall be considered a crime when people broadcast or disseminate pre-conviction information without permission. The forgoing shall not apply to:

a/ The nationality or citizenship of the accused.

b/ The age and gender of the accused.

c/ Connecting and circumstantial facts about the accuser that do not name the accuser, or imply an identity.

d/ Photographs and videos ostensibly showing the crime or the crime scene. This shall be an exemption to the photograph rule.

9/ The people shall have the right to privacy, Senate modulated privacy with regard to the collection, aggregation, use, and dissemination of their personal data. And there shall be different standards and different things secured by the recorder system and its databases, as well as all the private databases. This secure information shall include: name, physical addresses, current location, telephone numbers, electronic addresses, employers, income, wealth, assets, credit history, financial history, purchase history, buying habits, credit defaults, web browsing history, health data, school data, hair color, eye color, photographs, videos, recordings of their voice, genetic data, educational history, biometrics, communications, the identities of their family members, known associates, sexual relations between consenting adults, matters of family law, and all police and arrest information that does not result in a conviction. No non-governmental aggregator of such data shall assemble, keep, distribute, provide or sell anyone's information without the person's prior written authorization. All prior authorizations shall become void with the adoption of this new constitution. The income, wealth, and assets of the wealthiest 1,000 individuals/families in the nation shall however be public information, and freely discussed.

10/ The aggregation and sale of personal information shall only be done with a non-transferrable Senate license which shall include a precise description of each data key aggregated. The Senate shall have the unlimited right to rescind all data aggregation licenses at any time and without notice, explanation or compensation.

11/ There shall be no right to privacy or copyright:

a/ People speak to a large groups, or they speak out in public places.

b/ When people protest, there's no right to privacy with regard to their images. Also, recordings of people at protests may be freely published without consent.

c/ With regard to the names and addresses of people

collecting Government benefits for the poor, old or disabled. With regard to Government benefits for children, the names shall be published, but not the addresses.

12/ Non-human entities shall have no right to privacy at all. Privacy shall be thought a human right and non-humans shall have no privacy rights, lest they be used by humans as a disguise or shield for nefarious purposes. All fictional citizens and their workers can be freely recorded and talked about.

13/ Fictional citizens shall not really have a right to privacy like real real citizens have. This except for product development, inventions, and genuinely valuable trade secrets and tactics. Except with regard to new products and strategies, fictional citizens may be freely recorded, exposed, denounced and talked about and there shall be no possibility of anyone saying: "hey you violated the privacy of a non-human entity". Privacy shall be thought a human right, and non-humans shall have no privacy, otherwise they may be used by humans for nefarious purposes. Also, human non-citizens shall have lower privacy rights than citizens as the Senate elects to institute.

14/ Government shall maintain public comment boards about all fictional citizens, and all human non-citizens and immigrant citizens, as well as those sentenced to jail time and probation by a court of law. These comments boards shall be open for all to see and post on.

15/ The privacy rights of real flesh and blood citizens shall be higher than the free speech rights of fictional citizens. For example, fictional citizens shall not be allowed to initiate marketing communications with flesh and blood citizens via voice or video phone. Nor shall they be allowed to send people from home to home, disturbing the people with their marketing communication.

16/ It shall be the crime of doxing to publicize, print, publish, or re-publish a person's private information or address information, or photograph, as a means of harming/motivating them, or someone they are close to. If the doxing involves a political figure of any fame, or a widely followed person, or someone who expressed a controversial opinion, then the penalty shall be double. If the intentional doxing leads to a crime being committed against the victim, then the person publishing the information may be subject to up to 1/3 of the fine or jail time of the actual perpetrator. Where the doxing person knew that the person is hiding from extra-judicial death or injury, the doxing person may be subject to the same fine or jail time as the actual perpetrator. Also, to be clear, displaying a person's name, and any virtual addresses or numbers such as phone numbers and office addresses is not doxing them.

17/ In relation to official duties, there shall generally be no right to privacy for any Government workers, including police, teachers, and healthcare workers. Quite the opposite, all Government workers shall be well recorded and all recordings shall be subject to both Government and public oversight. The only exceptions are those relating to national defense, military plans, military weapons systems and military intelligence. In these exceptional matters, the Senate may limit public oversight. Also, government people who tell people to stop filming when they lack the right shall be fired at least.

18/ There shall be no right of secrecy concerning the cause of

any violent or trauma death, or poisoning, or suspected murder, or death under strange circumstances. The critically important right of justice in such situations shall always prevail over the minor comfort rights of their surviving family to privacy.

19/ The people shall always be free to cover their faces in and around places that sell electronic communication platforms.

20/ It shall not be allowed to film unrelated children or attractive young people in public.

21/ Government shall offer free RFID and face recognition tracking for those who opt-in. This shall be encouraged for a large slice of children and attractive young people. As nobody will know who is being tracked, this will greatly reduce abductions. All police, security personal, delivery people, non-citizens, prostitutes and everyone on probation shall be required to use this system. Ex-convicts with certain types of felony conviction may also be required to use the system as well. All urban, suburban, and exurban dogs, cats and certain other animals shall be registered, microchipped and fully vaccinated. All dogs within 10km of a busy road must use a road system tracker.

22/ Places for drinking, taking Mafia drugs, dancing, crowding, partying, seeing concerts, gambling, dining, and schools courthouses, and police stations shall all be required to use a more precise sort of RFID location tracking than normal.

23/ Except for the national anthems, and on June-19 and July-4, government shall be prohibited from playing music to the people

24/ Smart power meters may track the amount of power used in each day during peak periods, but nothing more precise than that. Utility companies shall not be allowed to sell access to their customer's utility data. Police and investigators shall not use utility meters without a search warrant. They may, however, use monthly utility bills.

25/ Restaurants shall always be free to use anonymous face recognition systems to spot the dine and dash people who have victimized other restaurants in the system.

26/ Citizens and especially non-citizens shall have no rights to privacy, with regard to being recorded while they are in public. However, they may be denied the ability to film in certain sensitive areas that citizens are allowed to film.

27/ Foreigners found living off-grid as a shadow person shall be arrested, jailed, earmarked and deported whenever they are found. Citizens living off-grid as a shadow person shall be arrested and held until they can identify themselves.

28/ There shall be no right of privacy, confidentiality, or secrecy with regard to the decisions, approvals, or permissions or communications of any Government agency, or its workers in their official capacity.

29/ There shall be no right to privacy with regard to:

a/ Who has felony convictions.

b/ Who is or was a prostitute.

c/ Who is or was a transsexual, or homosexual.

d/ Who has a Mafia drug license or high use alcohol license.

e/ Who is a non-citizen.

f/ Who has declared bankruptcy.

g/ Who has not finished secondary school, or passed the equivalency test.

30/ There shall be no right to privacy with regard to anything even remotely connected with the corruption of our democracy or our elections. Those who attempt to enforce any sort of privacy, rules shall be put in prison for 20 years. This shall be applied.

31/ It shall not be possible to search people or get their physical address or contact information, or any level of county recorder system confidential information without without their authorization. The county recorder system shall have 9 areas of Access to a person's confidential information, 1 through 9, that the people may, or may not authorize the county recorder system to share with various other people and fictional citizens:

a/ Area 1 is real estate owned and or leased.

b/ Area 2 is the STD system.

c/ Area 3 is drug and sin licensing.

d/ Area 4 is employment history.

e/ Area 5 is education.

f/ Area 6 is semi-private financial and credit report.

g/ Area 7 is financial account balances.

h/ Area 8 is semi-private healthcare.

i/ Area 9 is private healthcare.

32/ There shall be no right to privacy with regard to anything even remotely connected with our government or our elections. Those who attempt to enforce any sort of privacy, rules shall be regarded as probably democides.

33/ Counties may require app registration and tracking to use the main areas of our urban parks, nature reserves, beaches, with photo/video upon entry, so these places will be safer.

34/ All parking lot areas used by more than 20 cars a day shall be required to have recorder monitoring.

35/ All small towns and dead-end communities shall have the right to make themselves exclusive. This means that only people who live in that community can come in freely, and they must use registered vehicles. Otherwise, they must check in, and all guests must provide identity information at least once. In essence, we allow small towns and dead end areas in urban and suburban communities, to operate if they were doorman buildings where all guests had to be ID'ed and registered. Where dead-end neighborhoods and small towns have the signage and barriers of an exclusive community displayed, the people who don't comply with the county recorder system's video login terminal are subject to being arrested for trespassing in an exclusive community. Exclusive communities shall be free to require that a county recorder system property shower (These charge twice the average wage and pay twice the average wage to the county recorder system.) accompany everyone being shown a property offered for sale.

36/ The people shall be free to go about their lives and to buy products without trackers, listening devices, and monitoring tech. There shall be no manufacturer listening devices in vehicles. The people shall also be free to unplug all trackers, and monitoring devices from their vehicles. Where vehicles have tracking tech, and monitoring tech, this must be easy to unplug from the vehicle, and the vehicle must work exactly the same with the tracking/ monitoring tech unplugged.

37/ Both Government and fictional citizens shall be prohibited from driving or flying around and use high-tech spying equipment to spy on people that are inside at their houses or

work place.

38/ Now that we have ubiquitous cameras and selfies, it shall no longer be allowed to ask celebrities for their autographs. All celebrities are supposed to ignore all autograph requests from now on. Autographs shall be thought to be outmoded.

NR'14. LITTLE BROTHER RECORDING

1/ Corruption being a thing that thrives in darkness and withers in the light, the people shall normally be allowed to observe and record government officials and fictional citizen workers while they are working in the field. This recording may be either secret, or open recording of these worker doing their job.

2/ Government shall make no law restricting the right of the people to quietly and peacefully attend, observe, record, film, copy, describe, post, transmit or broadcast public proceedings, trials, public interactions of Government officials while acting in their official capacity. The only exceptions shall be:

a/ To keep Senate voting secret, the right to record shall be suspended in Senate voting chambers.

b/ In matters related to our nation's strategic and terrorist vulnerabilities.

c/ In matters relating to spying and intelligence gathering, and genuine military and business secrets.

d/ In matters relating to secret techniques for catching criminals. The secret techniques for catching criminals may only be viewed by Senators, police, jurors, and others with a need. All access shall require ID verification and lifelong links to one's criminal record.

e/ When the people doing the recording interfere with emergency life-saving activities, or they endanger themselves, or others.

f/ When a human crime or accident victim would reasonably want privacy.

g/ To assure the privacy of those merely accused of a crime.

h/ Secretly recording people, especially when they are nude or in intimate situations.

i/ Recording other people's children, and women with their children, and young and attractive women.

j/ Also, recording shall not be used as a shield for allowing behavior that would not be allowed without the recording.

3/ To a large extent, the professional crooks and the perverts are going to get micro-cameras, and they will secretly record situations anyway. So there is really no point to stopping people from recording.

4/ Government shall regularly sweep all the woman's dressing rooms and toilets looking for snooping and recording devices.

5/ The right to film people and public property shall include all public and private property open to the public that is not fenced off, and all places that are generally open to all visitors and all places that invite people to visit or shop or park around or use their parking lots.

6/ No stores, no restaurants, no businesses, no place open to the people to walk in, and also no government facility open for the public to walk into, shall be allowed to restrict recording/filming.

7/ In general, all places open to the public, or viewable/

record-able from public property may be recorded at all times. It shall be a crime for government people, as well as non-government people on color of authority to:

a/ Order people to stop recording when they do not have the right to record.

b/ Put up signs that unlawfully prohibit recording.

c/ Attempt to illegally take a recording device away, or block the view, or stop the recording, or damage a recording device of someone recording in public.

d/ Tell people to leave a place because they are recording, or threaten them with expulsion because they are recording.

e/ Verify the identity of people who are recording events, simply because they are recording.

f/ Threaten to arrest someone because they are recording.

g/ Erect temporary obstacles to viewing/filming such as fence screens.

x/ This shall include all train stations, schools, and the areas around all jails, prisons, and military installations that are not fenced. Furthermore, there shall be no judicial system prohibition of the use of electronic recording devices either in or around schools, and at any live performance.

8/ There shall be no right to recording privacy with regard to the unedited recordings of those: committing crimes, harming others, or being harmed by others, those threatening others, and those using insulting or even snide words. This shall especially include all government workers, all fictional citizens, all government police, and all non-government security people.

9/ There shall be no right to recording privacy while teaching or preaching. All schools and day care of children are subject to both open and secret recording in all areas outside of toilet rooms and urinal areas, and clothing changing rooms. Also, the the recorders office, as well as the school offices, if they exist, shall use image recognition tech, as well as audio for yelling and violence situation.

10/ Where a crime is credibly alleged, all worker cams, particularly those of government people shall generally be admissible as evidence. Also, the recordings of the people shall generally be admissible as evidence, unless they were spying or snooping.

11/ It shall be considered the crime of stalking to follow people around against their will, and especially to menace them in the process of the stalking. It shall also be the crime of stalking to follow people around to record and photograph them.

12/ All of the "stalked celebrity" media, shall be considered 2nd class free speech and deleted entirely. This sort of media does many disservices to our democracy.

13/ It shall be a felony for third parties to electronically listen in, wire-tap, and record private conversations. It shall be a felony to set up recording devices to video monitor people in their homes, private places, and workplaces (although employers shall have broad rights to monitor workers in the workplace as defined by the Senate. Where one of the principals wishes to record his own conversations, and business dealings, this shall be allowed nationwide. In fact, all communication with fictional citizens, and Government workers shall be monitored by the recorder system, and there shall be no need to disclose this.

14/ The non-porn internet shall be heavily search engine

censored to keep all the nudity, porn, Sex-oriented media, prostitutes, models, and dancers 100% out. The porn internet will be censored in another way. It will require that all the actors be identified as people with porn actor's licenses. This means that they are all of legal age and that they willingly entered the porn industry, and willingly made this media. Only then will a SKU be issued for that porn item. So on one hand, there will be the recorder's porn system which is guaranteed to have no underage, and no non-consensual people involved. And on the other hand, we have the wild west internet which might have criminal porn on it. But the safe harbor for viewers will be the certified system.

15/ Big Brother prefers to use one government surveillance apparatus, but Big Brother will also use corporations, and even independent human contractors for the purposes of recording and surveilling the people.

16/ Instead of saying flat out that we don't want any sort of big brother apparatus at all. Perhaps it is wiser to say that we want a clearly defined big brother apparatus that focuses on surveilling:

a/ Ex-convicts.

b/ People awaiting trial.

c/ Armories, and food stores, and to prevent theft and vandalism.

d/ Child-oriented places (such as schools, playgrounds, and recreation areas.)

e/ Police body-cams, and our gun-cams when de-holstered.

f/ Senators.

g/ Fictional citizen managers.

h/ Financial fiduciaries and especially all their transactions, and the wealth changes of their workers.

i/ Places that sell Alcohol.

j/ Government offices and the must use communication device of all Government workers

k/ Township train platforms and the surrounding open-to-everyone restaurants, shops, and food courts area.

l/ Main inside hallways of our townships, and perhaps also the outdoor areas

m/ Some outside locations close to the train station.

17/ The places that will not be surveilled are inside everyone's home and in their private yards, and and the parkland and wilderness areas outside the townships. Here, there will be no cameras. And not only will government not have cameras, but government shall also regularly sweep these areas for the surveillance equipment of little brother.

18/ The people shall have the right to see all the information that Big Brother and the nation's snooping apparatus is keeping on them. The main Freedom of information Act body shall be the Recorder system. And people shall

19/ There shall be no right to privacy with regard to the financial transactions of fictional citizens. We shall welcome those who want to look for corruption. In fact, when someone spots significant corruption in either Government or in a fictional citizen, it will normally be considered a bit of a pre-paid ticket into the Sub-Senate at least.

20/ Some townships will require ID to enter, and others will not. Some will be full of cameras other will not be. Some will have strict rules, others will not. Some will allow dogs, and smoking and noisy activities, others will not. This decision shall be entirely up to the people of the various townships.

21/ The people shall be free to record one-another as background without consent in places generally open to public visitors. Businesses generally open to the public may be filmed as if they were completely public property. There shall be no places, public or private that invite the public, or invite many people to come where it is not allowed to record or send files. And this shall explicitly include all live performances and all theater screenings of films. Also, it shall be a crime, when police or private security guards tell people to stop filming in places open to the public.

22/ With regard to people who come to watch or record some unusual occurrence, or conflict, or construction, or activity of Government people, or some fictional citizen or foreign nation, these watchers and recorders shall be protected by our first and foremost right of free speech. For surely they are potential gatherers of important information for the nation to talk about. Therefore they shall always be just as protected as people handing out flyers on private property where people gather. Nobody shall ever tell either group to stop watching, to stop filming, to stop witnessing, to stop informing, or to stop handing out flyers: for all of these people are doing one of the most valuable things anyone can do for their society, they are helping to inform their people so they can make smarter decisions.

23/ We shall have one set of recording rules nationwide for live recordings of public events, and another for eaves-dropping on transmissions. There shall be no hodgepodge of local rules as things were under the old system.

24/ The people are supposed to record their conversations with Government officials including especially police. They may hang their phone from their neck on a string, or wearing a body cam, or head cam. They may also take their device out and hold it in their hand. Or they may have friends record the dialogue with the Government officials, but everyone is supposed to record their Government interactions in some way and this is considered a duty to the law sort of thing.

25/ Third parties during generally calm situations shall be free to watch and record police from 8-m away, except where the principal talking with police asks for privacy, or is injured, or traumatized. Where people are quietly recording police engaged in a generally peaceful stop from 6-meters away, that is far enough away. If people are shouting at officers, or menacing the officers, the distance shall be 12-meters away. The people shall have a right to stop driving, pull over and record police vehicle stops.

26/ For safety, and to assure honesty, all police officers shall be precisely location tracked.

27/ All police chest and back cameras shall mount to the officer's bullet-proof vest. If an officer needs privacy to use the toilet, he may take off his vest, or text the county recorder system to request a bathroom break, with the device automatically restarting when the officer moves away from the toilet. The officers themselves shall not have the capability of turning their cameras on or off.

28/ Police officers must use a microphone with live recorder backup for any sounds to count as evidence in court. If police don't have a recorder's system microphone recording, they cannot use that dialogue in court. They shall also not be covered by qualified immunity. There shall be no mute function on a police camera for its microphones.

29/ Police shall not be allowed to hide their faces except where they are acting against organized crime, crime gangs, or foreigners. In these cases, during raids, and during transport to trial police may hide their faces.

30/ Police will be better behaved if they don't know for sure which of the people gathered around might be recording them or streaming to the recorder's office at any given moment.

31/ It shall be considered fraud for people to present any of the following as real or live without disclosure:

a/ Recorded performances as live.

b/ Lip-synced or pretend playing music as live.

c/ Simulations as real.

d/ Live acting experiences as real.

e/ The victims of fake musical performances shall be entitled to a refund equal to 5 times their ticket costs, if the performance is judged to be fake.

32/ Remote agricultural and wilderness areas that are prone to fire and fire vandalism maybe restricted to only people who have verified ID and wear a tracker, and this especially when it is dry and windy and a fire season. The area right around our communities will be free for people to enter anonymously, but the remote fire prone areas may be documented and tracked as to who is going where.

33/ The rules herein regarding recording of Government workers and Government whistleblowers shall be applied to the broadest group reasonably practical, and definitely to:

a/ All Governmental agencies, organizations, and quasi governmental agencies.

b/ All government contractors and contracting firms with regard to their work for Government.

c/ All Government workers, directly or indirectly employed in regard to their work for Government. .

e/ All fictional citizens.

f/ Anyone or any group working with government or providing a service to government,

x/ When any of the above government workers ask people to stop recording, they must be investigated for corruption and their employment must be terminated.

34/ It shall be a crime when government people (including especially police) and others in positions of authority use color of authority to demand that others delete recordings and other evidence of crimes or money court liability.

35/ Where people request filming from bystanders, it should be the moral obligation of bystanders to film them, and where police or others take action against bystanders for filming, the these risk charges of censorship. Also where police take action against people recording them, the presumption should be that the police are dishonest and have something to hide.

36/ Nationwide, one party to a conversation may record that conversation. However, government shall be required to obtain a search warrant to do this.

NR'15. BLOCKCHAIN COUNTY RECORDER SYSTEM

1/ We shall have a county recorder system that will track/run much public information, monitoring, and safe-keeping services including but not limited to the following for no fee, or for only an anti-nuisance fee:

a/ Financial records, assuming much of the role of banks and

stock brokers that has repeatedly proven so problematic, and so expensive for the people in terms of bail-outs.

b/ Property transactions and leases, and and residence history.

c/ Tax filings and records.

d/ Property ownership and renting records

e/ Marriages and family relations records.

f/ Education testing and records

g/ Work history and human resources history.

h/ Open access criminal records and limited access crime allegation records. Also, illegal behaviors that might be a crime if they become a pattern.

i/ Records and video for the families of people in jail.

j/ Healthcare records.

k/ Health biometrics monitoring, and making sure sex workers and other vulnerable people don't go missing.

l/ STD system.

m/ Disability and injury claims history.

n/ Candidate and Senator identity records

o/ Records of who is a citizen and who can vote.

p/ Records from people recording the elections of our nation.

q/ Records of all tallies of Senate elections.

r/ Escrows and Fund control.

s/ Deposits and bond keeping. The county recorder system shall have a way for people to post bonds at no cost. The interest on the money shall be enough to pay for the bond. If somebody has a lean for 1000 currency units, then they can deposit 1000 currency units with the recorders office and they shall be considered fully bonded for that claim.

t/ carpool ride-share and hitchhiking bookings.

u/ Child license complaints.

v/ Reviews of baby sitters and nannies.

w/ Online sales and auctions

x/ Lost and found.

y/ All government and public reports

z/ Many other sorts of government information that we don't want corrupted.

2/ The county recorder system shall used a massively-redundant, blockchain-style ledger system where there are many dozes of backup ledgers. Also wherever anyone looks or makes a change, they must be ID verified and qualified to work on the system. Also, everyone's looking and their changing (everyone's) shall be recorded by the system. Wherever this is not recorded the system should be regarded as hacked and compromised.

The blockchain design of the county recorder system, and the carefully monitored communications and video and body ID scanners, Iris, fingerprint, face, weight, height, the transactions limits, the reversibility of errors, they impossibility of getting away with the money, etc. will all assure that the system is not commonly hacked. And this shall be regarded as the most reliable way for preserving public information. This system shall also be regarded as the best way (so far) for assuring that the group mind stays uncorrupted.

3/ Each county shall maintain a county recorder system that mirrors the records at least 10% of the national government's record system as directed by the national Senate. Each country shall maintain both "forever" and various sorts of temporary video and file storage archives for both government and the people to use. Normal levels of personal

and small-business recording shall be free to save, more extensive levels of recording and documentation of business uses shall be charged at built cost. The county recorder system shall also act as a Big Brother for government workers, and police by recording many of their activities. It shall also act as a Big Brother for the nation's jails, drinking and drug areas, transit-systems, rail, bus, and air travel systems, schools, daycare, playgrounds, child-oriented areas, and child to school daily trips. If parents wish, the county recorder system can monitor where their under age 18 children are. The county recorder system can also monitor where people's pets are by their beacon collars.

The recorder shall also offer document recording, escrows, scheduled funds disbursement, and funds disbursement services upon conditions being met, among other recording and payment services.

4/ All important notary public sort of documents must be signed in person at the recorder's office under video, along with all documents related to family law, child custody, list etc. No real estate or, motor vehicles of any kind, or any financial instrument, or valuable thing shall be sold or exchanged without ID verification, and payment transfer through the recorder (and tax) system. All escrows and stakeholder situations shall be recorded, or they shall be considered to be with criminal intent for all three parties involved. In other words, we will have a total Big Brother situation when it comes to how people are spending large chunks of money. This shall be both for principals and all middleman. This is to reduce corruption, sex trafficking, Mafia activity, and most forms of stealing.

5/ All tax payments in and all government spending out shall be paid to and managed by the county recorder system. Note, that other Government agencies will manage tax payments, auditing and tax fraud, but the money shall be made payable to <USCRS> in brackets, indicating US County Recorder System. All outbound money from government shall likewise come from "US County Recorder System". In both cases, there shall be up to 6 numbers in SKU format 123-456 to indicate the department or sub-department the money is coming from, or going to.

6/ Unless otherwise called for herein, wherever Government agencies take in any money, (especially fines and fees) the money shall only be paid to the county recorder system, on behalf of the national government's general fund. No Government fines shall ever go to any agency's budget, because this sort of outside-the-budget gray money breeds corruption. It shall be a felony to collect fines or fees, on behalf of government, where the money does not go into the government's general fund. This shall be for both the giver and the receiver of money or valuables. It shall also be so for individuals and all fictional citizen managers and FC directors participating in such a scheme. It shall also be a felony when non-government managers do the same thing.

7/ All payments in and out of government including especially tax payments shall be made via the county recorder system. No fictional citizen, individual or foreign government shall ever be allowed to replace the county recorder system or collect any money on behalf of our government. All those involved with any scheme to collect money on behalf of Government, or replace the county recorder system shall

jailed be jailed for attempting to defraud the Government.

8/ When people pay from a cash or "brokerage" type account directly to the county recorder system, the money always gets posted immediately, and a confirmation is always made within 10 minutes or the transfer shall be cancelled. There shall also never be any fee to either pay money out from the county recorder system or to pay money into the county recorder system. Also, where there is foreign currency exchange, the county recorder system shall not charge any commission or fee, and the buy/sell spread for the county recorder system shall not exceed 0.2%.

9/ The county recorder system shall function as our nations, primary trusted, intermediary service for all financial matters. This shall include all transactions, all wire, transfers, all escrows of real property, all escrows of high value other things and perhaps all payments. It shall also record the purchases and sales of stock, bonds, etc., thus replacing stock brokers and banks that can and do go bankrupt.

10/ The county recorder system shall track how much money everybody has. This tracking of money shall be thought to be very important for spotting criminals and criminal activity, and people who have no visible means of support, but a ton of money.

11/ To prevent corruption, the county recorder system is supposed to carefully track and graph all fictional citizen and OPM money flows to check for excessive inflation linked to OPM managers. In fact, all OPM managers shall have their cost inflation listed.

12/ Government shall consider all purchases/sales/leasing of real estate and vehicle as void where these occur outside of county recorder system.

13/ All court ordered fines and debt payments shall be paid to the county recorder system. If the debt or bill was not recorded by the recorder system live, it shall not be valid. The county recorder system shall levy property as per the instructions of the courts and legal code, in order to collect on debts. As the money comes in, it shall be dispersed to the parties it is supposed to be dispersed to.

14/ The county recorder system shall act as a stake holder and hold money deposits and escrow deposits on behalf of the people.

Businesses with an inordinately high level of retained deposits shall be investigated.

15/ The county recorder system shall carefully audit all large and even medium sized transactions for value, and overpayment.

16/ The county recorder system shall offer documentation of firearm purchases and sales and shall offer an iron clad safe harbor for documenting firearm sales and protecting sellers from all firearm sale liability both in criminal court and in money court.

When the people sell their firearms, they have the option to register the sale with a recorder's office, or with a gun shop, however the recorder registration shall be thought to offer the most protection for the seller.

17/ To start with, the density of recorder's branch offices shall be similar to that of public post offices, but with many rows of various sized karaoke booths.

18/ The county recorder system shall manage all money inputs to all casinos and other various forms of gambling. It

shall also manage and track all money spent/lost on gambling. It shall also report this to everyone's spouse and family.

19/ The county recorder system have have a central billing platform for billers to submit verified bills to their customers for payment. The recorder's billing system shall require daily billing where jobs are longer than a day but shorter than 1-year. This shall be connected to various sub applications for billing, such as motion, location and screen trackers for billing. The Recorder system requires that all billers bill daily. Also, the Senate shall establish various automatic late fees for when people pay late.

20/ All surgical and dentist, offices, all school, nurses, offices, and all massage places and all therapeutic treatment places shall require county recorder system video to make sure that the dentist and the doctors/ therapists do not sexually abuse their patients/ customers.

21/ The county recorder's video records may be requested by principles in all videos. And by their parents if they are under age 18. And parents or guardians shall have the right to view all of the classroom video of their children with the other minor faces blurred out unless a court order is obtained for this. And likewise with crime victims. All crime victims shall have the right to look at all video they were in. And likewise with police access for good reason.

22/ So that monitoring augers towards freedom, while at the same time protecting us from crime, we shall have it that the county will make a record, but there can only be access to the record if a legal violation occurs, and then either the principal, or law-enforcement will request a search warrant, and only then is access granted. Also, when anyone looks at a record, a record is made.

23/ The county recorder system shall maintain a monopoly on face recognition data and other biometric data as defined by the Senate. It shall be a crime for others to collect or aggregate face recognition, vehicle license plate, and other data independently of Government. The recorder system shall offer police possible identities for people, it shall show the potentially dangerous ones in red, or flashing red. It shall list how many felony convictions. The cops get an ID, but mostly the person is pre-identified to them, unless they are illegal aliens. The Police system also allows for police to walk through a space and the AI matches potential items with stolen goods records. Also, cops don't input any information from a person's ID or vehicle license plate. They just scan the bar code.

24/ All government interactions with the people shall be recorded by the county recorder system on high definition cameras and microphones on a never-erase blockchain system with backups that work in near real-time. This without notice or request. Everyone is just expected to know this is happening. Government workers shall generally be prohibited from engaging with the people about government services without recording by the county recorder system.

25/ We shall not have situations where only determined people can stay anonymous, and normal people are always generally knowable. Also, anonymous social media accounts definitely present a big problem for our democracy. Therefore, we shall say that all of the following must be verified by the county recorder system:

a/ All social media accounts where the user can make posts of any sort including mere likes and dislikes.

b/ All domain registration, website hosting, website IP-address assignments, and all other web and networks services account initiation.

c/ All replacement telephone numbers and replacement telephone sim cards. Also, it shall always be possible to anonymously get and keep a communication account.

d/ All new bank accounts and financial services accounts including all loans, credit cards, and all forms of debt over a low threshold. This will make it difficult for crooks to steal legitimate identities for plunder and as funnels for criminal activity.

e/ All withdraws of more than two month's average wages per that is not going to the same person's account.

f/ Where money is being sent by the very young or the very old, or being sent overseas, or being sent to a crime-flagged account, or being sent to certain sorts of business. In these cases, the sender may be asked questions by the recorder's office to help make fraud harder to pull off.

26/ The forgoing will greatly reduce most forms of fraud as well as illegal meddling in our society and our elections.

27/ The Government's facebook shall display (among other things) certain verified biography information, verified and guaranteed by the county recorder system. Some of this information shall be open to all viewers, but most is only available with 1-time passwords. Some people like ex-convicts must display certain information (like their conviction record) on their home page. All active Senators and confirmed Senators, as well as all Ubiqs must display their Senate status information on their facebook homepage. Everyone shall have their educational progress, their professional licenses, and occupations displayed on their facebook unless they elect not to display. All the private twitters and facebookes shall by default show the public twitter and facebook information unless the user wishes to turn these off.

28/ The county recorder system shall make an emulator app that allows one to forge many entire data access pages that need to be kept secret. This so that people can easily fake any recorder data for third parties. Thus nobody knows what the truth is unless they have logged in themself. This is to void the value of 3rd party screen captures.

29/ All businesses and rental property owners shall be charged nothing to use the county recorder system's verification systems, including the county recorder system's anonymous ID-verification system, and credit check system. This system verifies identities, but it does not share this information with anyone unless the subject authorizes whatever level of information sharing required for this information. Even police may only query this identity information upon probable cause, or when a crime is reasonably suspected, or to contact a witnesses to crimes and for other reasonable Senate approved purposes.

30/ The county recorder system identity platform shall be what police use to verify identity. All police data requests about the people will thus be from an outside government body, which will track their queries and verify authority. The county recorder system shall also track the locations of all felony convicts and send police their file, whenever police

come across one.

31/ There shall be no loans or transactions of properties without personal appearance at the recorder's office, on video of the owners and buyers agreeing verbally on video to the transaction and showing multiple ID documents on the seller side. For all high security transactions the person must match height, weight, face, finger print, hand print, voice, and iris. And if there is a mate, or parent, they should come in and be ID matched. No property shall be sold without this.

32/ We shall not run our primary identity verification system from the national level. Instead, ID verification shall be entirely under the jurisdiction of the blockchain county recorder system. This shall require multiple counties to verify the identity of the person, using face recognition system, fingerprint, and other biometrics, as well as blood type information. There shall be a national identity verification system, however, this system shall be a secondary identity verification system.

33/ First parties shall be free to record and to access their own county recorder system information. However, for others to access this information, including county recorder system staff, high-ranking government employees, and even Senators, a search warrant shall be required. However when Senators are on random video review duty, and other Senators are randomly assigned video review assignments, no warrant shall be required.

34/ Wherever there are security logs for entering a secure area (real world, or virtual), these shall be kept by the county recorder's office in a black zone, with access requiring both a warrant, and tracking of who accessed what. Every search and movement shall leave footprint in the county recorder system's black zones. Also, it should be noted that the county recorder system is run by County governments, using cloned software developed by the national government with the Sub-Senate administering the county recorder system.

35/ All official HR communications, including hiring, firing, layoffs, disciplinary letters, warnings, appeals, and statements shall be recorded and verified by the county recorder system. These records shall only be viewable if the worker allows, or a search warrant is issued.

36/ All important government activities and meetings shall take place in the open (and not behind closed doors) and wherever practical they shall take place under audio-video monitoring. However, with regard to government service delivered in an office, every meeting and interaction shall be delivered via recorded audio/video telepresence to reduce corruption and increase convenience. All of this recording shall be by the county recorder system's never erase blockchain records. The government agency/police department, the officers, and the public shall also be free to record their own versions. They may simply request the county recorder system's films later.

37/ Whenever people sign a binding document, they shall be required to do it through the recorder system and the contract's author shall have to pay an anti-nuisance fee. The county recorder system shall have a petition interface for people to sign their support of any registered petition.

38/ When Senators talk or communicate with anyone, they must identify the person and the discussion must be under county recorder system monitoring. Foreign governments and

foreign people, and the lobbyists and agents of fictional citizens may write written appeals, and make videos of their agenda and post these to the county recorder system for all to see, provided they identify themselves. However, these people shall not be allowed to meet with our Senators in person, even under monitoring, and it shall be a crime for either party to knowingly meet with the other. Also, this shall be justification for Senators to be expelled from the Senate, and losing their Senate status.

39/ We must monitor where our lawmakers meet with their constituency, either as elected lawmakers, or as candidates. Also, lawmakers shall not be allowed to talk about their positions, or candidacy, unless they have a Blockchain county recorder system, big brother, video camera recording their discussion. To do otherwise, should be considered the equivalent of going into a room with someone and having a private conversation. Of course we all want to stop this, and of course this should not be allowed. We probably don't need to do this, and it will not be terribly effective for determined people bent on passing notes. But it is totally in everyone's face, and for that reason, it is symbolic of a corrupt system. And it is clearly, absolutely on the wrong side of the line with respect to what we want to do. So therefore, we must do everything we can to stop corruption, and we must stop all communication between our Senators and other people. Both sides should know that when somebody is running for office, people can't even ask them how their campaign is going outside of monitoring, and the candidate can't even say gosh, i could really use some help. No more of this. This shall not be allowed. It's on the wrong side of the line, and it's very symbolic of corruption. And it is so easy get out a selfie stick and activate the county recorder system's monitoring camera app which all Senators must use whenever they are not in a monitoring booth, or monitored conference room.

40/ The county recorder system shall monitor all government proceedings, from police stops to Sub-Senate courts and hearings, to business meetings, and other meanings. All this will be recorded by the county recorder system. These may also be recorded by everyone in attendance.

41/ Senators shall not be allowed to meet with those who are not their spouse, long-term partner, parents, children, or siblings without county recorder system monitoring.

42/ Where the county recorder system records video of government services being delivered, it shall convert that video into text and flag all text that does not match a recognized allowable scripts related to the context of the communication. Thus our Senators are only reviewing the text that the matching system can't recognize, or that seems possibly controversial, or that involves certain key words related to corruption. This shall be thought necessary to automate the review process.

43/ All fictional citizen recorded (monitored) phone and network records shall generally only be kept by the county recorder system for the principles, and their employers if they agree to do their work under monitoring.

44/ All police records including police body camera videos, gun camera videos, location data, written files, emails, voice calls evidence files, and communications data shall be kept by the county recorder system. The Senate shall establish reasonable rules and fees (expressed in LU) for accessing

this information. Also, the police evidence locker shall be run by police under the video monitoring of the recorder system.

45/ The Senate shall create detailed rules about what documents must be recorded by the recorder system.

46/ The county recorder system will use AI to flag problematic video, texts and other communications by police and other Government people. This is what we will do with our police interactions, our teacher interactions with our children. Also our daycare, also our care for the old and senile. Also our disabled people, our downs people. In these cases, the caregiver must wear a camera, and sometimes the recipient of the services may wear a camera. Also our school buildings and other buildings will have cameras. Also, the people going and making submissions for building permits might wear a camera, and government service provider people will have to wear a camera. Basically what we want is big brother, overseeing our government communications, our schools, our old people care, Our police, our playgrounds and other places.

47/ All required video monitoring for child-oriented places, baby sitters, train stations, transit systems, high crime locations, hospitals, nursing homes, jails, bars and other mandatory monitoring places shall be AI monitored and recorded by the county recorder system.

48/ The county recorder system shall offer AI monitoring of babysitter video that calls humans for review whenever it has a question. This shall be for a very small hourly fee. Also, the county recorder system will keep records of all babysitters for some years.

49/ The county recorder system shall have AI capable of scanning discerning and flagging for human review the various distress gestures, distress signals and crime signals from the various county recorder system video feeds.

50/ The county recorder system shall offer third-party ID verification services. It shall also offer electronic doorman services where gates and entry systems are managed for buildings and other places.

51/ All grocery stores and other consumer necessities stores must register their prices and sales volume for all goods sold with the county recorder system's price/product registration system to protect the people from:

a/ Local and distributor monopolies.

b/ Crisis price gouging. This includes selling umbrellas for more when it rains.

c/ Prime location price gouging.

d/ Advertised deals that are unavailable.

52/ In general, when there is a crisis, it shall be a crime for retailers and distributors to raise prices on their own, preemptively, or to sell off their merchandise to others in an irregular way. Instead, distributors and retailers must wait for manufacturers to raise prices.

53/ All corporate, charity, HOA and third-party OPM accounting shall be recorded in real time by the county recorder system.

54/ All alarms must be silent and monitored by the county recorder system for 3 hours wages per year. Vehicles with loud alarms shall be towed. Society wants silent alarms for several reasons. It is only individuals that want loud alarms. The county recorder system shall take burglar alarm texts and forward them to pre-selected numbers that agree to

accept these texts. This way neighbors get notifications of burglar alarms and panic alarms and can come out and help. The premises owner can also password text to the system: "false alarm". The point is that the county recorder system shall be doing burglar alarm monitoring for nearly free, as a community service. The people shall also be free to use private companies.

55/ No person shall be allowed to spend or send more than one month's wages without county recorder system ID verification. As always herein, this refers to the national average wage.

56/ All flight logs and border crossing logs shall be kept by the county recorder system.

57/ Nobody shall be allowed to sign any county recorder system documents while obviously intoxicated.

58/ All Telescreens, and all personal computers and similar platforms must come preloaded with software that compares two versions of text documents and highlights the differences. The text from each subject version that is added to the object version is shown in green, and the text that's removed from the object version is shown in red. This software is critical, if we are going to stop the so-called forgetting programs from running through and corrupting our group mind. It is also important (and also time saving and corruption reducing) that nobody is able to add or remove or change text from documents. Also, this software application will give everybody access to the county recorder system's complete library of all the important, political and government texts and standard contracts.

59/ If we trust the county recorder system, we can also store all of its memories on our personal computers, all chopped up. Then, if the county recorder system goes down, or gets hacked, we still have our individual personal computer back-ups. This results in a county recorder system that is backed up on perhaps 50 million personal computers in half a million chunks in 100 fold redundancy.

60/ The county recorder system shall offer free voluntary services that do the following for free:

a/ An appointment scheduling app with an automatic GPS-based track my location as I come to you maps, like with Uber.

b/ A tardy tracker app for commercial and/or social appointments. This will tell others how late people normally are on both sides. It should be thought that people who are late for first dates are playing domination games. On first dates, both sides are supposed to go early, to show respect for one-another. Also, there is nothing wrong with going somewhere 10 or even 20 minutes early. It should only mean that you are a responsible and serious person.

c/ A GPS-based work time recording and billing app with motion sensors and optionals head-cam and audio. The Senate may require that all workers in certain positions and occupations use this app while working.

d/ An app that pins all people that come within a certain radius for police review in case you go missing. This will be useful for conventioners (who will see everyone), traveller safety, and rave/party safety. The travelers and rave people will auto drop a pin every so often. Later they can review the pinned video and request permission to make contact with the person/people they met. The system then notifies the

other side and if there is a match, both sides get the other side's info.

e/ Free, location tracking of unaccompanied minors and elders so that their care-takers can keep track of them.

f/ Patch into a small child's chest cam and audio system. So people who talk to their kids will never know who is watching and when they are being recorded.

g/ Speak to their kids via the kid's audio system. So in addition to having 4 cornered overlapping room video in our schools, and overlapping video in the halls and bathroom non-private areas, there will also be the child's own body cams which record and dial parents whenever the kid presses the distress button. And nobody knows when the kid's chest cam is on, or who is wearing a real one and who is wearing a decoy.

61/ The county recorder system shall have its own credible way-back machine (or something like archive.org) that shall be 100% inclusive of all government and fictional citizens and commercial multi-user websites that invite users to post information, including all social media posts. This shall be considered an essential aspect of the county recorder system.

62/ There shall be a social media for ordinary, political and serious things, and there shall be another social media for friends and another social media for sex, and another one for prostitution. We don't want to pollute the serious dialogue with things like sports and friendship, matters, and sex and prostitution. We don't want our friendly and sports social media polluted with prostitution or sexual material we don't even want prostitutes advertising on our pornography websites.

63/ The county recorder system also tracks and make sure that prostitutes and party people don't go missing. The county recorder system's STD system also makes sure that everyone accepts their sex partners willingly. Where prostitutes do not have the right to refuse customers, this shall be considered slavery, not prostitution. And this shall not be allowed.

64/ The county recorder system shall have the most complete search database in the nation, and it shall not have advertising, or sale of preferential placement.

65/ All insurance policies, their pay-ins and pay-outs, along with payees and payors shall be recorded by the county recorder system. Failure to record a policy shall make that policy invalid. Failure to record the pay out shall enable the payor to make a second claim upon their policy. The adjuster reports shall also be recorded by the county recorder system. Senate juries of appropriate size shall audit all insurance payouts over two month's wages.

66/ the county recorder system having a container storage system that is priced close to cost, and that all county residents can use, with their things going in a secure full container, double container, half container, quarter container, eighth container, 1/16th container, etc. Many people own their own container(s), and many will rent both the container and the storage from the system. But it will be very easy and foolproof for people to put their stuff in storage, and go live somewhere else for a time.

67/ The county recorder system shall offer a secure container storage system that is priced at close to cost. This shall offer

full containers, a double containers, a half containers, a quarter containers, 1/8th containers and 1/16th containers. Many people will their container, and storage, and many will rent both the container and the storage from the county recorder system for a slightly higher price. But This system will be very easy and foolproof for people to put their stuff in storage and go live somewhere else for a time.

68/ The county recorder system shall take burglar alarm texts and forward them to pre-selected number that agree to accept the texts. This way neighbors (as well as police) can get notifications of burglar alarms and panic alarms and can come out and look immediately. The home owner (or another trusted person) shall also be able to text afterwards, saying things like: "false alarm".

69/ The county recorder system shall have a search warrant verification system for occupants of a premises to scan the barcode/numbers of a police warrant and check themselves about the warrant being served upon them. The county recorder system shall also do preliminary identification of people for arrest warrants. It shall also identify people as witnesses and victims and other aspect of policing. The county recorder system shall also identify who is a police officer, who works for government, who is in the militia, who is in the military, EMS, fire, government schools, and who has a child worker license.

70/ The county recorder system shall never delete any entries. Entries can be moved and struck-through, but they shall never be deleted. When people die, they don't get deleted, but their status gets changed to dead. Then for 200 years, this cannot be changed back by any means except an individual court order with all changes and reversals recorded. Whenever anyone makes an entry to the county recorder system, this get entered along with their login and confirmation video.

71/ To reduce the potential for hacking, each county country recorder's office shall be multiplexed by a factor of 20 to 200.

72/ There shall never be any extra-democratic certification for people working in the county recorder's system. The county recorder system shall be prohibited from hiring contractors. All county recorder system people must be either Senators (confirmed Senators) or the appointees of confirmed Senators. society forever

73/ All written communication to and from Government shall be sent via email or a chat system with all communication recorded by the recorder. If any papers need to be submitted, they must be converted to an electronic scan and sent via the county recorder system to the named email address. There shall be no exchange of materials either too or from government that is not live recorded by the county recorder system. Also, where practical, government workers are supposed to avoid in-person meetings and use telepresence wherever practical.

74/ In all post offices and police stations, as well as other places, there shall be a number of video call booths for recording by the recorder's system. The police booths shall have higher security. In all county recorder system locations, there must be enough booths to meet demand with the average wait time not exceeding 5-minutes. The person's identity gets assured and recorded in person by the county recorder system staff at the police station, or post office.

75/ All student enrollment applications, resume communications, and loan applications shall be anonymized by the county recorder system with no photos of the person shown. All previous claimed genders must be shown, long with the person's birth gender, and current gender. The age of the applicant shall also be shown and old people will be largely excluded from the hard physical labor jobs. But everyone's termination and Senate moderated job complaint boards must be shown.

76/ All travel services providers must use the county recorder system's web/app for: price comparison, buying tickets, receiving tickets, buying extra baggage, receiving tickets, baggage receipts, and payment for the airport park and ride lot. There shall be a similar government app for nightly lodging Neither shall charge any commissions.

77/ Most people will not appear in person at the bank, or the passport office, and other places that this was typically required in the past. Instead they will verify ID, and enter a booth at their local recorder's office. Then the recorder's system will handle both the identity of the telepresence and verify the end to end closed private network of the county recorder system.

78/ The Senate shall establish standards for login information. Each login account provider shall only have a few challenge questions, and none shall use the same. Also, nobody gets to ask about a person's primary key, or use their mother's maiden name any more.

79/ The audio streams of all government and fiduciary workers shall be monitored by AI for banned words and subjects on the part of the government or fiduciary workers.

80/ We shall have a bias towards big brother for all aspects of government and group spending, and verification of people's work, And for crime safety in crowded places that are likely to have someone filming anyway. We shall have a bias against big brother for private and wilderness places. The way to prevent big brother from lording over the people as tyrants have historically mostly done —The way to prevent big Brother is not to declare "no big brother anywhere", but to use big brother in a way that frames what big brother is, and what it may control, and what it shall be prohibited from controlling.

81/ To be perfectly clear, all the community monitoring cameras and other devices shall be backed up by the county recorder system. However, they shall require a stated reason and a valid search warrant to get a copy of the files. And again, all access to video and other community monitoring files shall be logged, and it shall require a court issued search warrant to view these files.

82/ Everyone's property taxes will pay for county recorder system backup of all reasonable property video, audio, and other normal sorts of data storage. There shall be no charge for this. Also, the people shall be 100% free to add and remove and disconnect devices on their private property for normal non-invasive sorts of monitoring, scanning, filming and recording. Also included will be AI monitoring of video feeds for distress gestures like the overhead elbow pump, which automatically calls us a human. Once a 911 human is on the scene, the street lights go on and off for a minute. Then the gesturing person signals with a right pump and a left pump twice as an access code. If they then bend over, or squat/sit down, it means send EMS. If they move to the side

while gesturing means send police. If they gesture as the spin, it means fire. Then EMS calls all the people around there. It is better for people to be gesturing to video cameras, then, if they're calling in. The gesturing to the video camera conveys the location precisely, so the responders can go precisely to the point where the distress call was made. Either that or all phones have to have a page of distress buttons that sends the phone's precise location to 911 regardless of the phone's other preferences.

83/ The county recorder system shall also pay for all the property, related expenses for all government property, and maintain their gates and lighting, and landscaping, and calls people when the telecommunication systems are not functioning properly, and it maintains the trails and all the counties parks and all the parks in that county. It handles the fix it complaint line, as well as the government human resources complaint line, and the management processes complaint line.

84/ We must develop a clear picture about where we want big brother, and we definitely don't want it. This is definitely important. The Senate shall implement strong laws to keep big brother out of our private areas unless it is called by the real human owners to do this.

85/ Only Senate approved open-source software and Senate rated media shall be sold through the county recorder system. This system shall be open to all software companies and content providers at no per unit download cost. There shall however be tenethly 3-tiered anti-nuisance directory fees to keep the junk from clogging up the directories. Also, if a person pays for software or electronic content via the county recorder system:

a/ The programs and content shall be in every way, an emulation of a physical disc in the hands of the person who bought it, even though there's no need to have a physical disc or CD. In other words the programs and content, if sold to the customer shall be forever programs and content and cannot ever be turned off.

b/ There shall be no right of any content provider to turn off content for any reason.

c/ There may be other download sites for non-Senate-approved software and media that are not regulated.

d/ All safe-harbor porn shall be via the Senate's media system.

e/ No Senate or other system shall provide non-porn non-stigma content with measures to prevent people from copying the media.

86/All information that government and all fictional citizens keeps about citizens, immigrants and visitors must be filed with the recorder system. Every citizen shall have the right to demand that the recorder system reveal all information that government and all fictional citizens are keeping about them. Where information is kept inappropriately, the victims shall have the right to demand its immediate removal and its removal for everyone. It is thought that this approach where government and fictional citizens must live report and backup all the data they keep is the best approach. The information given to the recorder system must be submitted immediately. Where fictional citizens do not comply with this they shall be shut down.

87/ The recorder system shall allow for people to be white

listed and black listed on other people's property and in businesses. This includes family, friends, workmen, etc.

88/ There shall be voluntary registration of tools with the registration number on the side of everyone's tools. However, some job sites will require only registered and bar-coded tools. Also, where tools are registered, they must only be sold through the recorder system's specialist auction website. This to control tool theft and the huge amount of time wasted that this leads to.

89/ Customs shall index every manufactured good brought into our country, and this shall be indexed so that our intellectual property owners can go and look through what is being imported to our nation. If the owner complains, there needs to be a hearing to stop importation, but importation shall continue until it is stopped.

90/ There shall be no fake job offerings, or fake offerings of things for sale, fake apartments for rent, fake properties for sale, fake buyers, fake sellers all these things that agents do to drum up business shall all be considered fraud when proven.

91/ The recorder system shall track every police officer and every court officer, and every jail officer that comes in contact with every person that is arrested, whenever they were in the same area or place.

92/ It is worth repeating that at least 90% of all county fine income shall go to the national fund. We do this to prevent the collection of fines from taking over as a primary function of government, as is so commonly observed. However the following fines shall be 100% kept by the county government:

a/ Fines for Animal shit.

b/ Fines for noisy Pets.

c/ Fines for oversized, aggressive and prohibited pets.

d/ Fines for Poaching, hunting/fishing without a license and exceeding the take limits. All of this sort of thing shall be enforced by county police.

e/ Fines for loud music & media, and especially those emanating from bars and discos and disturbing their neighbors.

f/ Fines for after hours building repair work.

g/ Fines for loud vehicles.

h/ Fines for having loud arguments.

x/ While we are discouraging county government fees by giving them to the national general fund, we will also greatly widen government's will to rent out all the good buildings and land it has, by allowing the county governments to keep much of the rent money.

93/ All contractors, architects, decorators, real estate agents, etc. must use the Senate's unbiased agreements and accept all payments via the recorder system's free fund control accounts.

94/ The recorder system shall offer third-party monitoring for a variety of virtual situations at a reasonable fee, including after the event monitoring of customer service calls.

95/ The recorder system worldwide shall offer applications that emulate Grameen bank type investing circles.

96/ The Recorder system shall offer a variety of ID cloaking services.

97/ No part of government shall have its own money collection system, but instead, the whole government shall be managed in triplicate by the treasury department, the county

recorder system, and the Economics Sluice of the Main-Senate.

98/ The meeting point system in all cities and towns shall be granulized to a 10-meter grid up to 10-kms square. This uses a 6 digit coordinate system 123-456 and thus describes the east west location first and the north south location second. Thus people will say: "meet me at 263-406". And this will work inside buildings because there will be markers floor and ceiling every 10m in all public areas such as office buildings and retail places. This is a better way to meet people.

99/ Landlords and rental car companies shall not be allowed to use their own self-drafted rental agreements, as these have normally proven to be biased and problematic. All rental car companies and all rental vehicle companies and all tool rental companies, all real estate agreements, including apartments for sale and lease. These must all use one of the Senate's unbiased agreements offered by the recorder system. The Senate should aim for the very middle of the sides.

100/ All real estate sales, renting and all hotel booking websites must use the following information from the recorder/assessor system, and no other information:

a/ The room size

b/ The photos.

c/ The complaints.

d/ The address. It shall now be illegal to market anything for sale (including real estate for sale and rent) without including a legitimate reference address for the enterprise.

e/ The unbiased reviews that can't be scrubbed, along with the ratings of the people saying these things.

f/ For all of the above, the information must come from the recorder system and be verified for owner approval.

101/ It shall no longer be allowed to pay money directly to either government or to fictional citizens without using the recorder system's funds intake division. Also, all money coming out of either government or fictional citizens must use the recorder system as well to externally log when they are spending/ taking in money and who was paid and what it was for.

102/ The recorder system shall handle all sorts of registrations, for both government and for fictional citizens and another third parties.

103/ All of the secondary companies acting as intermediaries for the recorder system shall all use the same identical banking service company interface, varying only decorative parts.

104/ The recorder system shall have and display both verified turnover and the verified amount of money that people have invested in that business.

105/ The recorder system shall track when it rains, and shall be the official arbiter of which days are rain days for construction projects. The term rain days shall include all sorts of frozen precipitation above 3mm precipitation per day.

106/ All government purchases and sales must take place on the recorder systems bid boards, where the process takes place the same way every single time, and the recorder system qualifies bidders and make sure that there are enough qualified bidders and prices to help guarantee a fair price. Here we repeat that this constitution requires that all professionals and all contractors be considered by

government to be qualified nationwide to bind on all projects. Furthermore, fictional citizens and their managers shall not be allowed to overpay by more than perhaps 25% for things, even if there is an emergency. There should be no freedom to wildly overcharge either government or any fictional citizen or any real citizen in commercial transactions.

107/ The recorder system shall provide most arbitration, and low consequence legal proceedings. Where people call for arbitration by the recorder system this shall be fully valid under the law.

108/ The recording system shall manage the government search engine and government's map system.

109/ The recorder system shall run a bad-checks, returned purchases, and problem transaction ratio, and lawsuits database for each name, so that others can quickly recognize problem customers.

110/ The recorder system shall also do shared rental agreements where each person is only responsible for their own part per the group's roommate agreement. This will make landlords much more eager to rent to people living as roommates.

111/ The following places shall not be allowed to prevent recording: Amusement Parks, concerts, police department offices, except police terminal screen Information about other people, speeches, schools, all public places, shops, bars, restaurants, people walking around on the street, airport security, immigration, customs, border crossings, police encounters, emergency situations, vehicle accidents, police activity, museums, shopping centers public areas, office park public areas, all outdoor areas public or private, all government property and proceedings open to the people, all Public speaking by all elected officials, all hearings and court proceedings, all questioning by police.

112/ The county recorder system shall be the organ of government that continually adds and removes voters from the voter rolls. Each country shall register everyone living in that county as either voters or non-voters. All voter roll changes shall be audited as they come in by both the Sub-Senate, and then by the Treasury's bureaucracy. Then they are made public and every person reporting an illegal voter gets 1 month's average wages as a reward per conviction, with this money coming from the illegal voter's work camp wages.

113/ Where people get phone calls from other people claiming to be bank, representatives or whoever government officials, the person calling is supposed to contact them through the recorder system and the person receiving the call can verify identity at USrecorder.com.

114/ All refunds must be paid through the recorder system, which will verify identity and recipient accounts. People with too high a refund coefficient shall be removed from the refund system. These pattern refunders can also get investigated for engaging in exploitive business or commercial practices.

115/ The Senate, is our government's group planning and considering mind. But the recorder system will be the memory of the group mind. Also, the recorder system does not really obey the Senate's commands with regard to existing memories, only the process by which certain new extra constitutional memories get stored and the amount of data used for those group memories. Also, the Senate shall

not have the right to alter the records of the recorder system, just the focus locus of what gets recorded. Also, all recorder system people shall be obligated by their main mantra. "Remember for God's sake."

116/ All structured settlements must be paid through the recorder system. All purchases of structured settlements shall be unenforceable. All lending contracts shall be void where the collateral is a structure settlement.

117/ The recorder system shall dispense money for dependents on a regular basis as per instructions, and lawyers will no longer be used for this reason. In fact, the Senate shall offer 10 levels of prepaid child support, administered by the recorder system where parents and others can escrow money with the recorder system pending birth, and this lump sum payment is used to fund some higher levels 1-10 depending on how much money was escrowed. Thus men will be able to fully fund children and then walk away financially with regard to their offers for baby funding, by paying government a prepaid lump sum for a higher monthly child allowance.

118/ The recorder system shall run auctions for many things like vehicles, sports equipment, livestock, pets, furniture,

119/ The recorder system shall conduct county-wide discount group percolation tests for all building permit applications every week or 4 depending on demand. All buildable land sold without sewer to the property must have a passed percolation test to offer the land for sale. The percolation and the zoning must be provided by the seller and the recorder system.

120/ The recorder system shall offer insurance adjustments. For large amounts Senate juries of appropriate size shall be used.

121/ The Recorder system shall offer services where people can drop a pin to:

a/ Report foamy rainwater runoff, indicating sewage leaks.

b/ Bad service from government.

c/ Dog infractions.

d/ Trash dumping.

e/ Illegal fires.

f/ Graffiti artists.

f/ All sorts of infractions.

g/ Restaurants that make people ill.

h/ Road and Sidewalk hazards.

i/ Downed power lines.

j/ Strange tasting foods.

122/ The recorder system shall have its own corruption police staffed with Sub-Senate juries. These people deal with either government, or fictional citizen corruption, including HOA corruption and charity corruption. It shall be expected that many people will call in OPM scams when they see them and the corruption police will investigate.

123/ The recorder system shall auction off all abandoned properties. The person reporting them shall get 1-month's rent for reporting the property to the recorder system

124/ All tools must have a serial number laser etched into their skins in many places and as large as practical. There shall also be places to write/etch one's name. The recorder system shall provide free registration of tools. Also, OSHA shall randomly check tool serial numbers against ID in the field. We shall require that all tool sales be via the recorder

system to verify owner identity.

125/ Government has historically had problems doing many many things — but in regard to information technology, government has two huge advantages that nobody else can touch. Government can tell all their millions that they all should use a certain new application. The other advantage that Government has is that it can tie new project applications into its other large base of existing applications and thus drive adoption of the new tech platform. These are very important abilities, because typically for the private sector, these two things present an insurmountable “giant step”, that most companies can’t get over. Thus we imagine the Senate buying out start ups that can get over the giant step themselves. The Senate then tries to get these startups over the giant step and owns around 90% of the equity.

126/ All house movers, drivers, haulers, and people doing various sorts of construction and landscape work must use the recorder system’s free platform for marketing, bidding, contracts, inventory management, and other services along with the recorder system’s billing and payment platform. The recorder system shall also verify that the people doing the marketing are the same people actually doing the work. This is so we can eliminate all of the parasitic middlemen.

127/ Regarding house movers:

a/ In the townships the appliances will always stay in the apartment. The bed frames, sofas, and closets will mostly be built in. The mattresses and sofa cushions will be plastic covered and they will stay.

b/ All moving of refrigerator boxes and smaller shall be via the delivery system. For the small amount of things that are bigger than a refrigerator droid can handle and still not built in, there will still be house movers.

c/ All the people using house movers can upload videos of the things they give to their house movers.

d/ The recorder system shall keep records on the customers of house movers and which movers have the greatest number of complaints for missing things.

e/ Where movers are accused of house mover hostage scams, this shall not be a matter of civil court, but criminal court.

128/ It shall be a crime to buy or sell vehicles or vehicle parts, including bicycles, outside of the recorder system.

129/ The police evidence system shall be run by the recorder system.

130/ The recorder shall keep detailed information on all repairs to automobiles and other complex equipment, so that the people buying the equipment can know how reliable it is, and how much it actually cost to keep.

131/ The recorder system shall not support businesses secretly operated within other businesses. So everyone operating a business within a business shall be guilty of the crime of tax fraud, if they’re doing anything that’s commercial with money.

132/ If the Senate allows life insurance policies at all, both the person who’s life is insured, and the person taking out the policy (if they are different) must personally appear to the county recorder system and take out the life insurance policy in person, so the existence of the insurance policy can be fully documented by the recorder system as an anti-murder policy for society.

133/ The recorder system shall support alert systems for missing people and animals. Legitimate missing person’s alerts are free and show a couple pictures and a brief description in writing. These go out immediately. Missing animal alerts cost 1-minute’s wages per person notified.

134/ The recorder system shall offer video and identity verification services for the cremations of people. These records may be viewed in the recorder’s offices, but not recorded or shared.

135/ The recorder system shall make sure that media is properly labeled for what it is.

136/ Bullying enforcement shall be first via teachers, but if the teachers are not dealing with this #1 most important reason for having a grown up in the room, then the student or the parent may petition the recorder system to investigate, and if necessary bring charges against either the bully and the teacher for not doing their job.

137/ All recorder system live functions (and especially the department of motor vehicles) shall be open from 7am to 7pm 364 days a year. They shall also be required to have staffing sufficient to get everyone in and out with less than 30 minutes of waiting per customer on average.

138/ All driving licenses shall be valid until the driver gets old enough to require old age testing.

139/ The recorder shall manage all school authorizations online.

140/ The recorder system shall audit all purchases in regard to value for money and money laundering, and especially very expensive unique things sold by people with access to children that might be trafficked. For example, the quarter million dollar rhinestone castles they sell at Dys•nee or malfunctioning children.

141/ All important government reports, including all drafts, must be recorded with the recorder system, and there shall be no embarrassing Government reports that get hidden away by the people in government because they are a problem for what they want to do.

142/ The recorder shall monitor all police and emergency calls and communications. And all of this shall be available as evidence for both sides.

143/ The recorder system shall handle and record all financing payments, both from and to the various lenders.

144/ All of the cameras backed up by the recorder system shall get numbered in a way that people just have to look up at the camera and see the number. Then they can go back and look up the camera number if they declare that a crime is a occurred.

145/ The Senate shall have a find my kid app.

146/ It shall be a felony to harvest or sell or participate in the harvesting or selling of human organs without notifying the recorder and obtaining recorder system approval.

147/ All companies that hire through the recorder system shall have a percentage rating for how frequently they hire from outside and how frequently they hire from inside internally. There shall also be reporting on the the number of applicants thus far, the average number of rounds of interviews, and also.

148/ No ride-share service can dispatch without the person accepting the ETA, and all ride-share ETAs must be scraped from the recorder system.

149/ Where people fail the senility test, and have nobody pre appointed, the recorder system shall appoint a surrogate to take care of things for them.

150/ The following government activities shall always be recorded:

a/ All Government communications with the people.

b/ All Government activities that involve payments or fees or fines together with a detailed explanation and code numbers of why the fee or fine was justified.

c/ All Government deliberations and approval processes (but not how individual people voted).

d/ All government enforcement activities.

e/ All

151/ This constitution is intended as a one-size-fits-all constitution for all mankind. For this reason, it includes some safeguards that may not be absolutely necessary in some parts of the world. One of these safeguards is the requirement that the delivery of all Government services and all Government interactions as well as all fictional citizen meetings and OPM/ HOA meetings be recorded by the county recorder. This shall include both the documents presented, and the voice and video image of both parties.

152/ There shall be no more lending, or loan servicing that is not also using the recorder system's backup records system and the public adjudication system. Also, all mortgage fundings and payments shall now be paid through the recorder system, and it's financial transfer system along with most rent payments.

153/ There shall be an alternative to people recording on their own phone. It is for them to dial 811 and then the video from their phone gets recorded by 811 through the recorder system, and this is live and then people can turn on their speakerphone. Then the Senate jury on duty can order people to disengage.

154/ The recorder system shall be expected to do what it reasonably can to completely obviate the need for OPM managers as much as practical. To this end, the recorded system shall automatically pay the group utility and tax and insurance bills as they're set up by the HOA. And the repairs are managed normally by the recorder's work bidding system.

155/ All businesses shall have a percentage rate for repeat business vs. people that don't ever comes back. This percentage rate gets displayed on every businesses web pages, along with the turnover, and the ratio for when they give prices and the number are accepted

156/ The percentage of repeat business that all businesses get shall be indicated on the business's websites.

157/ The recorder system shall keep back up copies of all government records.

158/ The recorder system shall have a system where people can opt-in to limit their purchases and consumption of alcohol, food, sweets, drugs, gambling, with various time limits to turn off the program.

159/ All business and government to consumer email and voice accounts shall have a recorder system average response time that's automatically and objectively kept by the recorder system.

160/ Children's areas can't have any hidden locations out of video monitoring.

161/ From now on, Government, the healthcare industry and

the education industry shall be prohibited from using paper forms or paper photographs. All government, healthcare, and education forms must come from the national form library, and the counties shall not be allowed to come up with their own novel ways of doing things except this as a registered test program.

162/ To make it easier for people to raise children, the recorder system shall offer AI video monitoring of children and babysitters with the system sending suspicious video to the parents. This is to lower the age that children can be left alone at home. There also should be a system for having at least one adult on the block on call for emergency situations.

C — VOTING & CORRUPTION

NR'16. VOTING DAY

1/ The people shall not be taxed, charged, burdened, impeded, interfered-with, or intimidated in any way when they vote. It shall be a primary duty of a democracy to aggressively defend the people from all of these things. The system shall however be allowed to pay the people up to half a day's pay to abstain and not vote for reasons explained herein.

2/ Those committing election violence, or physically threatening election violence, or genuinely trying to keep the people from going to vote may be shot dead, or killed in other ways by the people and it shall be considered self-defense upon proper documentation.

3/ There shall be no wealth or property requirements for voting. If there are education requirements, they shall be based on secondary school graduation and they shall be uniform for all citizens nationwide. If there are education requirements, they shall not deprive more than 15% of the people, of their right to vote. Otherwise the secondary school tests or other tests shall be made easier.

4/ We shall have an annual census when we vote. Everyone in our nation, including visitors and non-immigrant workers must attend our elections, unless they are either physically unable, or working in essential services. Everyone must attend the vote, but nobody shall be required to vote. Many citizens will come just prior to the vote to check in and get scanned and then abstain — getting 5-hours wages as the payment for abstention. Non-citizens, and immigrant citizens may attend the vote at any random Nome to census themselves, but shall not be allowed to cast a vote, and they shall get no money for abstaining. Those not attending the vote when they are required (including non-citizens, and immigrant citizens) may be required to do a 15-days of community service. Without mandatory vote attendance, we will have trouble with our annual census, and with calculating representation. No. Mandatory annual election attendance is an important safeguard for the honesty and credibility of our democracy.

5/ People may attend the election with other Nomes in other

parts of the nation and cast absentee video ballots for their home Nome. For this, people must watch all the required election media for all of the candidates in their home Nome before voting. They must also hold up a ballot that says ABSENTEE along with their Nome number in big letters at the bottom, and walk through the video gate after the regular voters from the Nome they are voting with. Then the voting monitors send their colleagues a video clip of the voter voting as an absentee. Thus we have fast absentee voting that gets settled right after the election. Those who are outside the nation on election day shall however not be allowed to participate in the election unless they are working at a military base, or are citizens living in the households of these people. However, these may have to vote at 3:00am, if that is what time the vote is back at home. Also, in the future, perhaps we will have mutual absentee voting (of our own citizens) with certain trusted foreign nations

6/ Long-time residents of a place will probably always have an easier time getting elected than outsiders on average. However, people who are running for the Senate shall be allowed to join any mailing address, and run for the Senate in that Nome. This running for Senate in another area must be registered at least 90-days before June 19, so there is no moving target when we are balancing-out our Nomes of 250 prior to the election. Also, when people abstain this must be on June 19 and they shall not be allowed to participate in the make-up voting for the June 21 or June 23 vote. Thus many candidates from areas with lots of competition for getting into the Senate will join Nomes in other less competitive parts of town. The 47 hours time gaps are given so people can watch the re-posted videos and get acquainted with the candidates. It is expected that there will be more candidates in make-up Nomes.

7/ Some people will go to poor nations to run for Senate there. When people do this, there should be no discrimination either in favor or opposed. And when people go to a poor place to run for the Senate, it should be seen as similar to joining the Peace Corps. This going to poorer parts of the world should never be seen in any way as cheating, or less than Senate service at home. In fact, Senators may serve 2 Senate terms overseas, in addition to the 4-term limit for Senate service at home. Also, foreigners shall be free to run for the Senate our nation, however, they can't vote for themselves.

8/ There shall be no prohibition against voting while intoxicated, however, no alcohol or marijuana shall be sold or given away from noon on June 18 until noon on June 19. There shall also be no alcohol or marijuana consumed in public during this time frame. The celebration of freedom comes after the vote, if people wish to take either drug.

9/ To get the most out of our democracy, everyone is supposed to vote for the smartest and hardest working people, and they are supposed to ignore race, ethnic background, economic background, non-government educational certifications, etc.

10/ When citizens leave the country, they must state whether or not they expect to vote in the next election. Then the immigration department shall notify the election department about their plans.

11/ Each county recorder shall send each resident 4 emails

prior to each regular election. One email is 100-days prior, one 40 days prior, one is 6 days prior, and one the morning of election day. This email shall have the person's name and whether they intend to vote. The 100-day notice is mostly to clear up registration problems. The 40 day is mostly a reminder to get informed. And the election day email is a reminder to go to vote. These messages go out to everyone's must check email address discussed elsewhere herein.

12/ Only citizens eligible to vote shall be given voter ID numbers. We shall have long work camp sentences on the first offense for voting by non-citizens, and immigrant citizens, and convicted felons.

13/ All political material, political news material, elections, speeches, election materials, from any side shall be in the language of our nation, English (and later Euemi). No other languages except English and Euemi may be used in our nation's elections. We do this because:

a/ Language differences divide many nations, and we are "One nation indivisible". We shall not let any outside group divide our national dialogue.

b/ People who can't speak the national language well enough to participate in the forum process, will likely have trouble understanding the subtle social issues they are voting on.

c/ We shall not have segregated language communities where english speakers can't participate except by learning a foreign language.

d/ We are unable to properly monitor the public dialogue in foreign language communities in our own land.

e/ We want to force all immigrant voters to join the main national dialogue and truly join our political process.

14/ The native born children of immigrants may be prohibited from voting if they are unable to speak the national language properly because they grew up in a sequestered foreign-language community.

15/ There shall be no voting machines of any sort in any election in our land, either public or private. There shall also be no election devices that punch holes in cards. Hole-punch cards for elections shall be thought of a thing of election corruption, because they keep ink off paper. And ink on paper (especially using pens with highly varied inks and balls,) shall be thought key to forensic analysis and honesty of elections that use paper ballots.

16/ The first democratic act is to stand and be counted, no matter what the threat. This is the most important act of patriotism in a democracy. Where men are proud and fearless of voter intimidation, the people should vote openly, on video, as they pass through a voting gateway. However, in districts where vote buying and voter intimidation become a much bigger problem than ballot box corruption, (but only where this is genuinely so), the national Sub-Senate may institute voting by secret paper ballot. However, all of the following rules shall apply if paper ballots are ever used:

a/ All paper ballots must be completed by the voter's own handwriting at the polling place using the voter's randomly selected and kept, special, super-randomized voting-pens, with over 40 different ink shades, 80 type-A nano-markers, and 80 type-B nano markers, to make 256,000 possibilities. All ballots filled out by pen shall only use voting pens, and then only one voting pen for each ballot and each voter. If the pen dries up midway, then a new ballot must be used.

b/ All ballot cards shall be identical in size and printing. On the prompted lines provided, the voters shall hand write their full name, address, contact email, voter ID number, the county name, and the candidate's last name on the lines provided.

c/ To eliminate government involvement with printing and distributing ballot cards (ridiculous excuse that this is in this day and age), we shall have it that the people are supposed to print the empty ballot PDF form themself, either at home, or a shop, or at the voting place if they arrive early enough. It shall be thought that 100% of each ballot's uniqueness comes from the highly varied pen, ink, nano-markers and handwriting combination, and written words required. Where people vote by paper ballot, they are supposed to used varied pen and ink as described elsewhere herein.

d/ All ballots shall be considered mere forms, and no ballot shall have any voter identification information or serial number printed on it. Also, all ballots shall be printed by the voter on ordinary paper, by means of an ordinary printer. The uniqueness and believability of a completed paper ballot arises from the uniqueness of the handwriting and the uniqueness of the pen's ink, not the mass-printed ballot card. The people shall be free to print multiple ballot forms and share them if paper ballots are used. Government and its contractors shall be prohibited from printing ballots.

e/ All paper voting shall occur during the second voting date/ period. Thus there will be many people from outside Nomes to monitor and count at each paper voting Nome. Also, paper ballots shall be counted by no fewer than 50 people, but anyone who wants to participate, can join the end of the paper ballot counting queue.

f/ If ballot boxes are used, all ballot boxes shall stay put at the voting place under continuous community monitoring during the election, and until the final hand count of up to 250 ballots at the same location. There must be continuous monitoring and recording and group witnessing, and the box must stay put, or the election shall not be valid. Everyone putting a ballot in the box shall also be recorded. The people shall always have the right to monitor and record their elections, and the counting thereof. Also, all ballots cast must be verified to be a single ballot by means of weighing the ballot card, and/or the use of a light table. Also, if the number of paper ballots does not perfectly match the number of people putting ballots in the box, that shall be considered a killer voting irregularity and a thing that necessitates a re-vote.

g/ Except for write-here with pen forms, all pre-printed box-ballots shall be prohibited because this type of system makes the ballots, and even whole ballot boxes much easier to replace through re-printing. The simple act of each person hand-writing their name, address, voter number and signature with a rare pen/ink combination makes paper ballots orders of magnitude harder to forge.

x/ To be clear, paper ballots and all of these rules 16/a-g shall only be instituted where vote buying and voter intimidation are a genuine problem, and paper ballots have been instituted by the county Over-Senate. Also, the Senate shall only call for paper ballots where vote buying and voter intimidation are a genuine and extreme problem. Those people advocating paper ballots without reasonable cause may be held to be working towards practices that are

considered unconscionable under the following rule.

17/ When lawmakers in a democracy work to change the election system so that it is easier to corrupt, they shall be expelled from their office. It shall also be felony to propose changes in the election process that are judged to be unconscionable. Working-towards, pushing-for, or calling-for any of the following practices shall be considered unconscionable:

- a/ Changes that make it easier to buy or sell votes.
- b/ Changes it easier to intimidate voters.
- c/ Calling for the use of any form of voting machines, or voting electronics, other than video recording of voters, and open-source apps for interpreting text on video.
- d/ Calling for people to vote at times other than the official voting hour called for under this Constitution.
- e/ Calling for mail ballots, or absentee ballots, or any form of voting other than the official blockchain video voting system, or the alternate and inferior paper ballot system called for herein as a backup.
- f/ Calling for any voting system that is not completely transparent, open-source, and verifiable.
- g/ Calling for the criminalization of investigations, audits, or mathematical analysis regarding alleged election improprieties. Investigations, audits, and mathematical analysis of alleged election improprieties shall always be allowed.
- h/ Calling for practices that disregard or narrow the 50-person mirroring of our election recording process.
- i/ Calling for practices that make it harder to remove dead voters from the rolls, or call for a re-vote where election irregularities occurred.
- j/ Calling for any practice that makes it easier to vote in someone else's name.
- k/ Calling for any practice that makes it easier for foreigners or felons to vote.
- l/ Calling for any practice that takes any aspect of the election process away from the people in their hundreds of millions, and the people's Sub-Senate, and puts it in the hands of much narrower groups. As believers in democracy, we believe that the people in their millions are more secure from corruption and intimidation than any sub-group they might elect.
- m/ Calling for practices that make it easier to vote without proof of citizenship, or identity, or national ID number.
- n/ Increasing the size of voting districts, or calling for regionalization or grouping of voting districts.
- o/ Introducing corrupt means of counting votes, or calling for black-box voting machines.
- p/ Calling for any system of easy-to-cheat anonymous voting, or any use of anonymous or un-recorded ballot drop boxes. This rule shall however not apply in the Senate where all Senators shall vote secretly.

18/ It shall be a felony to delete or destroy election records or election data files that are less than 20-years old. The penalty for mass election/ballot fraud and intentional partisan election fraud involving 5 or more voters or ballots shall be life in work camp for all conspirators. Where felons, or non-citizens vote, or people vote more than once, the penalty shall be 10-years per illegal vote cast no exceptions. Those who have not graduated secondary school shall serve 3-years in work

camp if they cast one vote by mistake. With regard to illegal voting, our motto shall be: "Stay away, or pay."

19/ The value of incorruptible elections shall be thought to exceeds the value of marginal voter inclusion by around two orders of magnitude. The voting system shall therefore make no provision for those unable to attend the vote due to old age, poor health or mental deficiency. This is because these people are thought to be particularly vulnerable to voter intimidation coercion and vote selling. They will thus introduce much more corruption to the system, while changing little due to inclusion.

20/ The combination of secret voting and absentee or mail ballots shall be thought a thing of election corruption, because this combination drives towards vote selling and voter intimidation. For this reason, we shall never have secret voting with absentee or mail ballots.

21/ Recently we lost our ability to have secret elections. This is because people can video their voting activity. The people buying votes can just tell people to show them the video of their voting. And the people intimidating people can do the same. So there's no point anymore in having secret voting any more. It's not a matter of paper ballots or not. The problem is the video cameras that everybody has. There's no point of ostensibly voting secretly anymore. And look at all the problems secret voting causes. You know it's 1000 times more powerful when you can stuff a box full of anonymous ballots, and it is also much easier to buy votes and intimidate people into voting a certain way. The important thing is to stop the ballot box fraud which is 1000 times more powerful than any of the individual voter crimes. We need to focus on the security of the ballot box. That's worth maybe 1000 times as much. Also, video makes it easy to convict people for this crime.

22/ Critical services people, and those in jail pending trial, and those who are ill shall be allowed to vote remotely on video. Those who are sick for voting day must get a medical certificate evidencing their illness or they shall be considered as ditching their census obligations.

23/ Triplicate electronic voter registration applications shall be sent to the national government, the county government and the relevant Nome. All voter registration data shall be updated 10 times a year on the first of every teneth, and all changes shall be saved, as well as the identity of the person making them. The system shall record all voter deaths, moved voters, and other changes. Only randomly assigned Senate tribunals shall be allowed to make changes in the database. Each county recorder's office shall back up the registration data for the other recorder's offices in distributed blockchain style, recording also the ID of the government person doing the input or accessing the account as well as the names of the tribunkalists.

24/ All dead people shall be removed from the voting rolls immediately upon the filing of their death certificate, and these shall also be placed on the separate dead voter list. Wherever the person dies, multiple family members and friend and others that new the person are supposed to call the death registry.

25/ The following groups shall not have the right to vote because history shows that their votes are commonly corrupted:

a/ Convicted felons.

b/ Those who are under age 21, because many people are still enthralled and corrupted by their teachers, even at age 21.

c/ Those elders who do not pass their annual geriatric cognitive test at the DMV.

d/ Those who have not completed secondary school, or passed the secondary school equivalency exam in the national language of English.

e/ Those who are too infirm to get to the polls and vote and to walk the voting loop.

f/ Those adults living on dole, or welfare, or government aid money, or whatever name they cook up to hide what it actually is.

g/ Also, to reiterate, non-citizens shall not vote.

x/ It is better that we exclude these groups than we accept the corruption or foolishness that they would bring to our election system.

26/ There shall be no pre-registration period for running for Senate or being added to a Senate discussion forum. People can join the candidates in another Nome on the morning of the second forum, despite the obvious disadvantages. Also, many people will run for Senate in a different Nome, across-town from where they live.

27/ It shall be a felony to gamble on, take bets on, or give odds on any election in the nation, including non-governmental elections.

28/ Only full citizens born in our nation shall be allowed to work in our nation's election system.

29/ No court of less than the entire Over-Senate shall have any jurisdiction over matters of national elections.

30/ Those government workers and volunteers and others whose actions lead to either non-citizens voting, or being countered as a voter shall be tried for felony voter fraud, a per count crime, so that people who let more than a dozen people vote will go away for life to prison. Everyone either in public office or those working in our elections or working for the for-profit news media under the old government who either advocated or enabled procedures that helped non-citizens to vote in a local, state or national election shall be charged with felony democide. All of these people should have known better.

NR'17. POLITICAL PARTIES

1/ We shall enshrine the words of George Washington, from his Farewell Address 1796.09.17: "[political parties] are likely in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men will be enabled to subvert the power of the people and to usurp for themselves the reins of government, destroying afterwards the very engines which have lifted them to unjust dominion." Let's all walk away from both the Donkey and the Elephant parties. We don't need political parties with their all-inclusive omnibus platforms. These are not for our benefit. They are a thing like gerrymandering and omnibus appropriation bills that helps with our subjugation. A thing which weakens America. So let's just all walk away from all the political parties, and all the corrupt power and influence they wield over the people's government.

2/ We shall enshrine the words of John Adams

"There is nothing I dread so much as the division of the republic into two great parties, each arranged under its leader, and concerting measures in opposition to each other. This in my humble opinion is to be dreaded as the greatest political evil under our constitution."

3/ We shall view political parties as entirely evil things, as backdoor to corruption and foreign power over our democracy. However, we shall also view political parties as very hard to get completely rid of, because they edge into first-and-foremost free speech rights, and free association rights. Therefore, our democracy shall actively try to minimize the power and influence of political parties as much as practical. However we shall recognize that we can't simply outlaw political parties in all cases.

4/ Political parties shall not have the right of free speech because they are non human entities. Therefore, political parties shall not be allowed to speak-out in favor of subjects, or speak-out against subjects. The members of political parties can do this, but the group entities, the non-human entities themselves shall not be allowed to do these things. And if they do, the people usurping this power and using it against the people may be tried for a felony.

5/ Regarding political parties:

a/ Political parties shall not be allowed to have any money or financial accounts. No political party shall be allowed to collect money, spend money, or have financial accounts of any kind because this money will be spent on corrupting our democracy. So we may have political parties, but they shall no longer be able to raise money, or have money, or use money. Thus we have some extreme restrictions on the financing of political parties and what they can say.

b/ No candidate's name, political party's name, or iconography shall be shown on any paper ballot, or all such paper ballots shall be invalid in that election. Also no political party shall give money or support to any candidate.

6/ So that political parties can work without having money, Government shall provide Senate monitored meeting rooms of various sizes to meet the indoor space needs of the Senators and holding genuine political meetings about their Senate work, including meeting rooms for political parties to meet in.

7/ If we ever stray down the wrong road and allow any campaign donations at all, political parties shall still not be allowed to have money, or hold money. This shall also include money held on behalf of candidates. It shall be a felony for people working for political parties to touch any money at all, or to spend money from any financial account of any type. It shall be considered bribery and capital democide for people working for political parties to dole-out donation money to candidates, or Senators.

8/ If we have campaign donations at all, it shall be a felony to donate money to any Senate campaign the donor is not eligible to voting in. If we have campaign donations at all, The sub-Senate shall appoint 20 qualified independent auditors to review the financial returns of every nationally registered political party.

9/ If we have campaign donations at all, all such donations must be made via the county recorder donation system and fully disclosed. Failure to do this shall be considered election

fraud.

10/ These laws regarding political donations are intended as a backup plan, in case some party corrupts this constitution and changes the nature of our elections back to the corrupt money-using narrow democracy stage.

11/ Where elections are expensive and where they involve months and indeed years of campaigning, something is broken in that democracy. No election should cost anything, and no election should involve more than a couple days of recording presentation media.

12/ Those who are not human citizens shall no longer be allowed to advertise about political matters or spend any money at all on political matters.

13/ Political parties shall not have or receive, or supply yard signs, picketing signs, stickers, or anything else physical, or buy any advertising for, or hold rallies on behalf of (or against) any candidate.

14/ Political parties shall only exist for one issue only. The combining and packaging of issues should be thought a thing that outsider nations do to gain control of a democracy. As we want to lock this sort of corruption out of our democracy, we shall have it that no political party shall ever stand for more than one thing, or one issue of society.

15/ There shall be no political party involvement with the process of Senate elections, or selecting candidates, or informing voters. Political parties shall only exist for the organization of fractions of Senators already in office on the furtherance of one approach to a specific problem versus other approaches.

16/ Political parties may have a website, but they are considered fictional citizens and as such, not allowed the right of free speech about political matters. Political parties shall not advertise, sponsor, or pay money for broadcasting, or mass mailings, or engaging in any form of paid messaging for political agendas.

17/ No political party shall ever have any role or power in our democracy, because that is allowing a corrupt non-democracy to have power in a democracy.

18/ The names of all political parties and their policies must accurately reflect the single matter the party was organized to support.

19/ It shall be thought vitally important that political parties change their name in every election (to a completely new never used name) so that their policies will stand on their own, and not on the name of a political party. This also greatly reduces identity politics among stupid voters.

20/ No political party, and no name of any political party shall live for more than 1-year. We don't want political parties with lasting power. After 1-year, the party's name and all contact accounts shall be abandoned for at least 7 years.

21/ There shall be no all-inclusive or eternal political parties with conglomerate platform. Where we see this, we must dismantle the political party into legal single-issue parties. Where we see conglomerate platforms, this means that someone is using our political parties as a backdoor to our democracy.

22/ No Senate, no Senators, and no bureaucracy shall give any power, money, benefits, or credence to any political party.

23/ Political parties shall not transport or lead voters anywhere in the physical world. Political parties shall not give

people food or drinks, including water. Political parties shall not give anything of value away. They may only give away webpage views and two-sided, one page pamphlets.

24/ We shall have political party monitors working on a fat bounty/reward for finding violations. We do this because our democracy sees political parties as potentially a great potential enemy of democracy. It also sees the careful monitoring of political party activity as a key part of our defense against political party corruption. The people monitoring our elections (each standing Sub-Senator, and 5 video helpers) shall have the right to:

a/ Verify voter names against voter rolls.

b/ Verify and observe vote counting.

c/ Check for double voting

d/ Check for non-citizens and immigrant citizens voting

e/ Check for felons voting

f/ Double-check the ID verification system.

g/ They may both wear a camera and hold a camera at the same time, both with audio. They may use these cameras as they wish.

h/ These cannot be denied anywhere related to an election at any time around the time of an election, until the vote counting has been closed and the score reported.

i/ Where there are attacks upon election sites, all of the vote monitors shall be expected to carry a side-arm. Where this is not enough to discourage attackers, then everyone shall be encouraged to go to vote while carrying arms.

25/ Unless all political parties in existence are allowed to monitor and supervise elections, those elections shall generally not be considered valid.

26/ Only real human citizens shall be allowed to be involved with political parties. Foreigners and those who are not human citizens such as corporations and charities, shall be prohibited from working with Political parties.

27/ It shall be a crime for political parties to select people to represent them in our elections. Parties that do this shall be shut immediately pending the trial provided there is clear evidence.

28/ No political party shall have anything to do with election procedures. This is a matter for the Over-Senate, and for individual Senators. Political parties shall stay away.

29/ The people are advised that all things being equal, they should disfavor all political parties, and all long-standing party allegiances. In fact:

a/ As a matter of course, the people should vote against candidates with ties to a political party, and instead favor unaffiliated candidates.

b/ There shall be no long term political parties.

c/ We shall have it as a mantra that the less power political parties have, the better our democracy will work.

d/ Parties that exist for more than 1-year should be regarded as criminal.

30/ The political parties of the old system (Republican and Democrat), sure do have long and confusing names. Are we talking about the political adjectives, or the political parties? These should be understood in the context of a performance, with soap opera staged conflicts used to justify wasteful spending. They also help enable a sort of A/B product testing. This party system also maximizes division of the people, while at the same time offering two infiltration points in the top

two constituencies in the land. Political parties shall therefore be considered a source of corruption.

31/ All political parties shall follow the Senate's standard political party rules established by the Senate. Initially these rules shall be:

a/ Always advocate peace. Never call for extra-judicial violence. Always condemn extra-judicial violence. Never even vaguely encourage people to carry arms. except upon foreign invasion, or domestic seizure of power.

b/ Never direct a mob to violence or disruption.

c/ Never organize heckling or chanting to drown out the voice of people who are speaking to many.

d/ Always follow the rules to maintain a constitutional democracy without the need for external authority.

e/ Always remain civil and respect people who do not follow the party.

f/ All Senate conversations and other communications involving Senators shall be monitored

g/ Never engage in any form of voter intimidation.

h/ Never publish or repeat, or tout any false, defamatory or inflammatory allegations about political opponents.

i/ No publishing or group speaking using materials known to be false or intentionally defamatory.

j/ All political parties and their members are supposed to value fair and free election over whether their candidates win or not.

k/ Never engage in same-location counter protests and cooperate with other parties to have political events at different times and places.

l/ Never impede political opponents when they try to communicate with people.

m/ Never remove, or damage the election materials of other political parties.

n/ Never pretend to be of other political parties or impersonate a politically important person either in real life, or in the virtual world.

o/ Never conspire to harm political enemies in any way.

p/ Never bribe voters or lie to voters or officials.

q/ Political parties shall be prohibited from giving anything at all to members and voters. Political party members shall be prohibited from receiving anything valuable for either themselves, or their party.

r/ Never threaten lawmakers, or deceive lawmakers. Never abuse positions of power, influence, or privilege with regard to voting. In fact, never get involved with election administration at all.

s/ Always fully cooperate with election monitors and investigators. Never impede, eject, exclude, insult, or threaten, election observers or election officials. Never impede election monitors from recording a line vote, or recording ballot boxes at any point at all in the election process or ballot counting process, if ballot boxes are used election monitors are supposed to observe and record all parts of the counting process. They shall also be allowed to check voter names against voter rolls.

t/ Only work in the direction of open and honest elections and voter rolls. Never try to manipulate the political process for more control. Always recuse yourself where there is a conflict of interest.

u/ Never kick people out of the party/ team for not voting

according to party policy.

v/ Never have secret meetings, or ban other parties from attending party meetings, or stop party people from talking to non-party people.

32/ All political party meetings must be recorded for all to see by the county recorder system. This is to make sure that the party is not scheming against the government as political parties have historically done on behalf of foreign backer nations, and fictional entities fronting generally for foreign countries.

33/ It shall be considered prima facie evidence of a conspiracy when political parties hold meetings that:

a/ Occur without county recorder system recording.

b/ Closed and not open to all other senators.

Everyone in all political parties is supposed to place fair and free election over whether their candidates win or not.

34/ It shall be thought very important that political parties change their name in every election. This is so that their policies will stand on their own again, and not on the name of a political party. We do this to reduce the hijacking of political parties.

35/ Political parties shall be regarded as a thing like realtors, lawyers, and commission sales people. They don't exist because the system needs them, or they improve the system. They exist because the system is incapable of keeping their corruption out of the system. Therefore, where ever possible we shall strive to reduce the power of political our systems.

NR'18. ELECTION FRAUD AND FREE SPEECH

1/ The censorship or intentional corruption of 1st class free speech in any ostensible venue for free speech shall be regarded as the felony of election fraud. This shall be so, almost regardless of how trivial the matters under discussion are, or how minor the censorship. However, electronic venues that offer a parallel and easily linked uncensored version, may also have a censored version if they wish, and suffer no penalty.

2/ It shall be the felony of election fraud to do the following to 1st class free speech on any ostensibly uncensored venue for free speech:

a/ To remove, edit, censor or alter posts.

b/ To corrupt the percentage vote, or order that posts were made.

c/ To sell ratings, or to distort ratings for money.

d/ To make, sell, or modify posts for money or valuable consideration.

e/ To pay, offer, or accept payment or benefits for altering posts or ratings.

f/ To comment on yourself, your kin or your kith by pretending to be an unrelated third party.

g/ To post using multiple identities so as to stuff the ballot box.

h/ To pretend to be a party that you are not.

i/ To conspire with others about postings or comments.

j/ To use clagues or shills, or engage in conspiratorial practices that over-shout or drown-out other people's voices.

k/ To heckle or disrupt people taking their turn speaking, or people who others have gathered to hear speak.

l/ To use robots or computers to make comments that appear

to be from flesh and blood people.

x/ Picketing, sign holding, and distribution of media shall always be allowed, as shall direct person to person non-shouting communication among the audience.

3/ It shall be the felony of election fraud to do the following on any ostensibly uncensored venue democratic decision making:

a/ To sell one's vote, or to offer one's vote for sale, or to take compensation for altering your vote, or to offer to buy a vote, or pay for a vote.

b/ To corrupt the vote count.

c/ To cancel votes.

d/ To knowingly offer a corrupt rating or voting process.

e/ To have a corrupt counting process.

f/ To restrict membership.

g/ To vote for your employers or their assets.

h/ To use computers or robots to forge comments that appear to be made by humans.

i/ Attempting to make it easier for non-citizens, felons, or high school dropouts to vote, Or making it harder to vote for citizen graduates of secondary school.

4/ The number one non-emergency priority, for police shall be the investigation of voter fraud, and especially where this are reported with evidence. There shall be per count, sentencing for those who genuinely intimidate voters or buy votes, or attempt to buy voters. In fact, vote buying/selling shall be equally illegal on both sides (for both buyers and sellers). Those who have intimidated many voters or bought/sold many votes, these people shall normally be locked up for life. These people should be treated as traitors, like those who spy for our nation's enemies. So there should be a great deal of investigative heat, and also high penalties, and many people should report these people for the fat rewards. Also, voter intimidators shall get sent to the same prison we send our most violent criminals to. This is how we will discourage voter intimidation.

5/ Where election violence and voter intimidation are common, or widely expected, the people shall have the right to bring arms to their elections and to their Nome meetings. Also, in these places the militia may be mobilized in militia arms to assure voter safety.

6/ It shall be a per count, crime to offer inducements, or withhold cooperation in order to get people to change their reviews. Where foreign nations and foreign nationals repeatedly do this, the Senate shall intervene, and mark down the ratings for the entire nation to stop the corruption.

7/ There shall be no strict requirements for legal standing in cases where people are alleging election fraud or anything even remotely like government corruption. Instead, in these critically important matters, legal standing shall be thought a thing that must be granted if there is any shade or shred of credibility with regard to claims of fraud or impropriety in these matters. Also, we shall not spare any expense in prosecuting cases of election fraud or anything even remotely like government corruption.

8/ Government shall be prohibited from giving money for election campaigns.

NR'19. ELECTIONS AND CAMPAIGNS

1/ To be clear, the election system shall exist outside of Government control, yet it is still covered by this constitution, and it requires a constitutional amendment, to change the election process in any way. Anyone attempting to make any changes to the election system without a constitutional amendment shall be considered a democide. Besides, under the new system, constitutional amendments will be neither expensive, nor time consuming.

2/ Where campaign spending on advertising and campaign staff can sway elections, the election process shall be thought to be corrupt, broken, illegal, and invalid. It shall not cost anything to get elected to the Senate, and nobody shall spend any money on getting elected to the Sub-Senate, or to rising in the Senate. An important slogan for free democracy is: "No money in government". This means two things: a/ It is supposed to cost nothing to get elected to the Senate, and b/ There should be no money profit from one's service in the Senate.

3/ It is just common sense, but there should be no way to sway any election with money, at any stage. If the election can be swayed by spending money at any level, the election system is inherently corrupt, illegal, and invalid.

4/ Those people advocating changes to the election system that make it more vulnerable to money should be expelled from the Senate and stigmatized for this.

5/ In all elections, we shall leave no place, no opportunity for money to have a role in the outcome. If money comes back to our elections, let's try and defend the continuum between 0 and 1 day's wages spent by each candidate in each election. And let the sides fight over this one day in one hour increments starting with 5-hour's wages. This is enough for a few partial sets of photo-copies and a few thumb drives. So we might increase our campaign spending limits to as much as one day's wages, but absolutely no more than this.

The people are advised to fight for every eighth of the pizza here, and to never go beyond the whole day's pizza

6/ Till the end of time, good democratic people should always resist, resist, resist and resist all efforts to introduce money to elections in any way at all. Our successors should always remember this! We are going to get all the money out of our election process, and we are going to keep it out forever. So we shall remember these words in mankind. We shall remember them worldwide and forever: "NO MORE MONEY IN ANY ELECTIONS, EVER AGAIN." Again, it is not supposed to cost anything to get elected to the Sub-Senate, or to be elevated. Our democracy is designed to provide a pathway for having no cost elections.

7/ All campaign contribution and gifts shall now be considered as vote buying. Ordinary food and drink, and up to 1 alcoholic drink consumed onsite are exempt from the corruption laws. No seafood, no exotic meats, no expensive ingredients, no air-flown, or special delivery ingredients.

8/ People shall be allowed to spend time helping someone in their Nome to get elected. But they are not allowed to give money, or goods to their candidate. They are also not allowed to spend any money to support their candidate. They are not even allowed to bring food or beverages to the campaign office, or buy meals for fellow campaign workers. Wise men

banish all exchanges among political campaigners. For the sake of honest democracy, this zone of politics shall remain entirely not about money.

9/ We shall totally banish all money and all exchanges from our elections. This except for single sheets of printed material, smallish thumb drives, downloads, copied electronic files, distributed by the candidate, and meals consumed in situ by the candidate. Other than these things, candidates shall not give or receive anything of any value during their campaigning, or shortly after. And they certainly shall spend no money on any gifts of any size to the people who would vote for them.

10/ If campaign donations over 1-day's wages are ever allowed again (and this should never happen), but if they are ever allowed again, then:

a/ The county recorder system shall have a system for monitoring campaign donations. This system should offer large criminal rewards for reporting campaign fraud.

b/ All political contributions shall be made via the county recorder system which shall verify the eligibility of the donor, the unique human identity of the donor, and the total given/ received by each party. Also that the donor gave no more than 1/200th of the campaign budget.

c/ No Senator shall receive any money at all from any source except via their one single campaign account with the country recorder system.

d/ All Senators shall be required to file a financial disclosure affidavit about how much they have been given by others, and how much they have spent on their campaign.

e/ Fictional citizens of every sort shall be prohibited from donating to candidates or hiring lobbyists, or hiring other people for political purposes.

f/ Fictional citizens of every sort shall be prohibited from having any involvement at all in our elections and lawmaker decisions, including making political gifts, and expressing their positions on political and economic matters as if they actually were human voters.

g/ Nobody shall be allowed to donate more than 1% of the candidates's maximum, including family, whether it is one hours wages, or one day's wages.

h/ The identity and amount given by all campaign donors shall be verified by the county recorder system.

x/ These laws regarding money donations are intended as a backup plan in case somehow our constitution is wrongly changed and elections are brought back to the corrupt narrow democracy stage.

11/ A number of the conditions in this section on elections and campaigns are inapplicable for the democracy called for by this constitution. These conditions shall be thought to exist in case money is somehow allowed in our elections once again.

12/ There shall be no campaigning by telephone, video-phone, voice mail, tree-mail, text message, paid advertising, or unattended signage. All campaigning is supposed to occur in the Senate's unbiased election forum, where neither side is competing unfairly or making it hard to run for office.

13/ The following venues shall not be allowed to discuss people running for political office, or that have recently been in office:

a/ Newspapers magazines and printed publications.

b/ Television broadcasters and radio broadcasters.

c/ Cable TV broadcasters and satellite broadcasters.

d/ Fictional citizens and their subsidiaries.

x/ There shall be no third party advertising or press exposure on behalf of, or against any candidate or any political cause or party.

14/ Campaign promises under a system of secret voting should be seen as worthless.

15/ Voters should always ask themselves if the person they are electing looks like he might have some terrible career-ending secret. Is he a murderer, or a pedophile? Ask this, because the rotting corpse in the basement (Nathaniel Hawthorne, House of Seven Gables) is the secret to the every-loyal blackmailed frontman in the host nation's government. Everyone involved with the criminal conspiracy must be instantly disposable, so all of the Ishtarian front leaders must all have committed some terrible crime. Where criminals and pedophiles are in government, this situation describes a government of foreign front-men agents.

16/ Here is William Shirer, talking about Adolph Hitler's party of front men. "He, [Hitler] who was so monumentally intolerant by his very nature, was strangely tolerant of one human condition - a man's morals. No other party in Germany came near to attracting so many shady characters. As we have seen, a conglomerate of pimps, murderers, homosexuals, alcoholics and [their] blackmailers flocked to the party as if to a natural haven. Hitler did not care as long as they were useful to him."

17/ The people should ponder the words of Procopius written just as the last vestiges of Roman Constantinople were collapsing in the late 500s AD, and Islam was about to kick-off its great age. We would all be wise to study these words as a protection against future frontmen: "When a man cares nothing for the infamy of his actions [because he is using an escape goat] and does not hesitate for fear of being known as a revolting character, no path of lawlessness is closed to him, but armed with the shamelessness visible at every moment in his face, he advances cheerfully and without any misgivings to the most loathsome deeds."

18/ Election corruption is both a very important matter, and also a valuable thing to snatch-away from the people. Therefore, no form of election corruption shall have less than 20-year lockup, including good behavior. This constitution says unequivocally to all Senators: You have been well educated in the laws on corruption during your Senate orientation. You have passed the anti-corruption safety test with a 100% score that was required to become a Senator, or a registered political party person, or election worker, or whatever it is that you are doing. This constitution says, stay far away from the line, or you will spend a large chunk of your life living in a cell.

19/ Where incumbents control the election system, they frequently slope the conditions for election in their favor. To combat this, the new constitution has 3 changes:

a/ It uses an election system that is outside of the control of the elected people.

b/ If changes must be made to the election system, they must be approved by the College of Confirmed Senators.

c/ It has severe penalties for working to install corruption-friendly rules without good reason.

20/ For an election to be perceived as free and fair, it must

have a good and neutral administration that is invulnerable to both foreign and FC shell interests. The following people shall be disqualified from working in the election system, or in any area having to do with elections:

a/ Those not born in our nation.

b/ Those who have not completed secondary school in our nation.

c/ Those who have worked for government long term.

d/ People with no children.

e/ Lawyers.

f/ People who have spent more than 2% of their life overseas.

g/ People who have ever received government poor aid money (This does not include: child support or retirement money.)

21/ We are much better off using last year's elected Sub-Senator than anyone else to manage our elections. That is unless these people start making excuses for not cycling out of power as they should. If this ever happens, these will-not-leave Sub-Senators should be regarded as the enemy of the people, regardless of their excuse. This constitution says clearly and emphatically, that it could be the end of the world, or the greatest crisis in history, but and if they don't cycle out of the Senate as they should, they should all go to prison. No exceptions.

22/ The Senate shall have the exclusive power to institute and change all laws, all regulations, and all policies. No unelected people shall have any power to pass any regulations, or make any interpretations of laws, regulations or policies. Where unelected people make any policy decisions at all, they shall be subject to felony democide charges for their usurpation and chipping away of the dear freedoms of the people. This shall including land use, decisions, building permit approvals, and environmental approvals. It shall also apply to apparently inconsequential decisions such as to where vending machines and drinking fountains and fences can be placed.

23/ Whenever unelected government officials change the rules in such a way that the the Senate must step in and fix things, these usurping government officials should be regarded as democides under the law and be sent to prison.

24/ Only the Senate may change the way the government is managed. Individual managers and unelected boards may not change anything government does.

25/ The terms unelected, and non-elected shall be considered equal in every way.

26/ Unelected government officials are not supposed to be changing the way government does anything at all. This role of driving change shall only be for our elected Senators. When unelected government officials change or attempt to change the way government does anything, and the Senate is forced to step in and make changes to correct the situation, these usurping government officials should generally be charged with a felony. This is because again: Unelected government officials are not supposed to be changing the way government does anything at all.

27/ Election corruption is both such as serious matter and also a valuable thing to snatch-away from the people. Therefore no form of serious election corruption shall have less than 10-year lockup. This constitution says unequivocally: You have been well educated in the laws on

corruption in order to be a Senator, or registered political party person, or election worker. Stay far away from the line or you will spend a large part of your life under lock-up.

28/ No third party shall advertise or give exposure on behalf of, or against any candidate or any political cause or party.

29/ If we ever allow the corruption of campaign donations again, Foreigners and fictional citizens including PACS, NGOS, corporations, charities, partnerships and especially political parties shall not be allowed to make political contributions, even if they change their form or invent some new name for themselves.

30/ We shall note how the primary election system of the old 1789 constitution caused much corruption because of the low voter turnout.

31/ Fictional citizens that articulate opinions about politics or political candidates shall be closed down for 30 days on the first offense. Where fictional citizens discriminate against political people, they shall be closed down for 60 days on the first offense.

NR'20. CORRUPTION

1/ No treaty shall be above this constitution in any way, but shall always subject to this constitution. If we don't have this rule, then treaties become a backdoor to eliminating aspects of this constitution that are problematic to our enemies, adversaries and parasites.

2/ Where Government, or fictional citizens, or citizens hire, appoint, or use contractors, agencies, affiliates, deputies, or other cat's paws to do things that the master side is not allowed to do, the courts shall generally regard the contractors, agencies, affiliates, deputies, or other cat's paws as being directly managed by the Government, or fictional citizens, or citizen. In other words, the court, shall simply look right through this ruse and ignore this ruse. Also, where the contractors, agencies, affiliates, deputies, de-facto partners, and other cat's paws are aware that a fraud is going on, and part of the fraud process, they may be charged as conspirators.

3/ We should always be mindful of the possible cut that government people may get from the various things they are involved with buying. For example: money for 99% empty vaccine vials and money for the corrupt Ukraine government must have come with very large cuts for the corrupt people involved with funding them. This is obvious from their otherwise bizarre keenness for both the vaccine and the war. Also when they spent money on the Maui disaster, they apparently got no kickbacks, so our leaders were uninterested in helping.

4/ All government spending shall be tied to an allocation bill and item number. These shall expire when the appropriation bill expires. Where the spending is no longer necessary and gets canceled, the allocation shall also get canceled. Government allocations shall generally run 2 to 4 ahead of the money being used, with the Senate legally allowed to stop spending at any time with at least 1/2 teneth notice.

5/ Situations where people act with impunity shall be thought to be poisonous to democracy.

6/ Nobody shall be allowed to tell lawmakers what to think, or how to vote.

7/ There shall be no fast tracking through any Government services or procedures for a fee.

8/ Everyone and every entity dies. Also, all government agencies eventually become totally corrupt and must be shut down and replaced with all new people. This lifespan for government agencies should be viewed on a 1 to 5-year time span. It shall be thought that most Government regulation work is easy for good people to fully grasp in less than one teneth. And for this reason 1 to 4 year periods in public service will be a stepping-stone sort of way for many people to start their work life. Only the best people will work more than a year for government. Everyone does a year, 20% do two years, 4% do three years, and 1% can do 4-years. Thus many people will do government service (which is paid a fair wage) after secondary school. Thus we will have many people working for government as a pay-back/public-service sort of thing. We also partition our government agencies into smaller duties so they can't play games with using FEMA money, for example, to fund wars or FEMA money to fund handouts for migrants.

9/ All around the world, people love to work for Government, and it is very easy for Government to hire people. So with regard to ending government corruption, firing government workers, and replacing entire Government agencies, we shall have a motto. This shall be something like: "it's OK, it'll just grow right back." And because this new head is new and fresh, it will be much less corrupt — at least for some time.

10/ It needs to be recognized that a main reason why democracy works better than tyranny for the people is that under democracy, the means of production are normally decentralized more, and much harder for foreign would-be monopolists to corrupt and eliminate. Thus, the ability to induce artificial scarcity for the benefit of foreign outsiders is greatly blunted. Also, it must be noted that this is precisely why the anti-democratic parasite race hates our system and our freedoms. It is because our freedoms and decentralization are what makes us resistant to the Ishtarian effort to throttle our output. Again, it is our freedoms that prevent them from selling their oil/ far·ina grain/ rare earth elements/ gold/ etc. at upwards of 10 times the prior going price. It must also be noted that this monopoly in every direction is represented by both the Islamic star, and the compass rose. Thus the Islamic star is the symbol of a house of 8-gables, a universal worldwide monopoly in every direction.

11/ The Senate shall make no under-defined laws, or use vague-definitions. Where this is discovered, the entire law may be thrown out by the Over-Senate. The Senate shall not establish agencies with under-defined mandates or areas of jurisdiction.

12/ Corruption in government and businesses is one of the most costly things in our entire society. Instead of all the frivolous subjects in school, we shall instead devote at least 1/200th of our kid's time to corruption and anti-corruption, so that everyone has a strong understanding of how to prevent corruption.

13/ We shall move from black-&-white to grayscale and recognize the existence of partial democratic corruption. This corruption is partial in that the action-path of Government is merely influenced by external corrupt forces over some of our

leaders, elected and appointed. We shall also realize that partial democratic corruption frequently resembles a sort of paralysis of our group/government efforts. This paralysis happens when the corrupters can't make our government do exactly what they want, but they can stop us from doing what they don't want. So they stall to build up enough pressure to drive for compromise—compromise with the fake foreign agenda running our government behind the scenes like a uni-party.

14/ Encouraging opaque and hard to observe government practices shall be considered corruption.

15/ Tenure and lifelong employment suggests loyal agents under someone's thumb. The longer people have worked in corrupt government, the more likely they are to have answered the riddle of the Sphinx and be totally corrupt. The follow-on idea from this is that we realize that there is simply less corruption if we are constantly changing government managers, than if we keep the same people for decades. Also constantly changing people makes all the crooks afraid of their many successors.

16/ Given that we will no longer having any career government managers, we shall also discontinue all new government pensions for these non-career people. Instead people will be recruited to work a few years in Government. This shall be thought to be a matter of public service similar to the military, peace corps, and working for charity. And because it is hard for most people to be of value to the Senate, being hired by government in a management or near management role shall be thought a career achievement.

17/ Bureaucracies shall be thought like engine oil. They both need to be 100% changed every year or so. So it is good to get a new batch of people in our bureaucracies at least every couple years. It normally takes the new people some time to figure out things like how to steal, who they can trust for connections, and how to be effective at stealing. It also takes time to drive the honest people out. So just by firing the entire bureaucracy, and replacing everyone a certain degree of corruption is eliminated.

18/ Government shall not hire managers that have not worked at least five years in the private sector. Also, no government worker shall be hired by government unless they worked at least two years in the private sector first.

19/ Government employees shall make over what they make in the private sector on average. Where most people can't understand why the person in government is making as much as they are, that position should probably get a wage cut. Also, in general, all of the upper level management will be taken over by Senators, and the mid-level management will be deleted. Then the lower level management will be priced comparable to private companies.

20/ Government shall be prohibited from hiring based on diversity criteria. Where this occurs, it shall be considered prima facia evidence of corruption for all involved and a crime. For among the diversity people that are discriminated against, there are countless people who will just do as they are told by the people who got them their job and protect them in their job as their yes-man.

21/ All government bureaucrats and company directors must take the Senate's anti-corruption course and pass the test with a perfect score in order to qualify for their position. Also,

there should be a certain amount of business sense that is required of all fictional citizen directors. Also, being a company director should be about as difficult as obtaining a real estate agent's license which involves perhaps two courses and some continuing education every so many years.

22/ With regard to the freeloading people working in the old government, those people who cannot continue to do what they were doing.

23/ All prior agreements of the old corrupt government shall no longer be binding.

24/ The problem of government spending is not whether we will tax more or tax less. The problem is whether we will stop the corruption and run-away stealing.

25/ Wherever practical, all government robot workers are supposed to serve for 2 or 3 years in each post and then be shift somewhere else nearby into a different area where practical.

26/ Many people crave the status, and job security of working for government. For this reason, we shall never consider it hard to replace government workers. Also, wherever practical, Government shall try to pay its workers with status, as this is much cheaper than only paying workers with money.

27/ All government and fictional citizen transactions must take use the recorder system's transaction applications and public bid boards. In these places, the transaction process takes place the same way every single time, and the recorder system qualifies bidders and make sure that there are enough qualified bidders to guarantee a fair price. Here we note that this constitution requires that all professionals and all contractors be considered by government to be qualified nationwide to bid on all government projects. Everything government buys must be price checked by multiple Sub-Senate auditors and the county recorder system, which has actual exchange records on everything.

28/ Wherever Government has dealings with construction costs, or real estate costs, or quantities of things, Government shall be required to use square meter pricing, lineal meter pricing, unit pricing, or per ton pricing, or some similarly objective scale of measuring things. This sort of per/unit pricing shall be thought to be one of the easiest ways for the people to keep control the cost of Government projects and reduce corruption. All Government activities must be compared rigorously and constantly with like-kind projects by other jurisdictions and by the private sector. All of this shall be regarded as very important for controlling government costs and corruption.

29/ It shall be considered bribe taking when the managers of Government agencies take money or gifts from any other source than the Government's official budget, or official fees. Likewise it shall be considered bribe paying when fictional citizens and individuals pay money or make gifts directly to any Government agency. All payments must be made to the county recorder system.

30/ Except for salary and benefits awarded by government, no government official, elected or otherwise, shall personally profit from their public office. Government officials shall not be allowed to grow substantially richer as a result of their service in office. And when people grow substantially richer during

their time in service while in public office, or some time thereafter, they must be audited and these newly rich government people must clearly explain for the record exactly how it happen that they became rich, and this must be judged by a jury. So where people become inexplicably rich, it shall be their obligation to credibly explain where the money came from. Where government people become inexplicably rich, and cannot explain this to their auditors, it shall be presumed that they are corrupt.

31/ Government officials shall not use their public office to aid in matters that affect their personal finances or life quality, of those of their parents, children, spouse, siblings, and other close family members, or their business associates, financiers, friends, lovers, supporters or their ideologies. No government worker shall ever go to work for the people they once regulated. And this shall be considered a form of delayed bribery, and a felony if the government worker is caught doing this.

32/ No government official shall receive any non-Senate gift, fee, gratuity, campaign contribution, consideration, pay, employment, wage, honorarium, emolument, loan, loan guarantee, loan forgiveness, over-payment, under-sale, option, air transportation, luxury or vacation area lodgings, bonus, tip or other similar things of value arising out of his public service or his decisions made therein. Except for close family, Senators cannot stay over in people's luxury homes when they travel, and must instead be housed in bottom 85% lodging. Senators can be driven to places (as a gift) in normal vehicles like busses taxis and normal automobiles, but not in fancy limousines, helicopters, or other fancy vehicles. Senators are not supposed to be given or give-away things except virtual media, small thumb drives, pamphlets and the like. In urban areas, Senators are supposed to buy their own food, unless this is impractical and ordinary food is eaten.

33/ Wherever an elected or appointed Government person, or their family or close friends are meeting-with, or any one of these people is receiving things of value from people who are in any way connected with the government regulated activity, the presumption of innocence shall flip, and these people (on all sides) shall generally be presumed to be engaged in corruption. This constitution advises everyone in the strongest possible way: Stay away from the corruption line, or you will be investigated and perhaps you will go prison in shame. Also, this paragraph shall be vigorously enforced.

34/ Wherever people get rich while working for Government, there must be an investigation and audit.

35/ No Senator or Government official shall speak or participate in any event that charges people to enter. And none shall be paid to speak, or transported to the speaking location. It shall be regarded as corruption to sell or buy access to Senators or government people, even if the person is one of many speakers, or participants.

36/ No Senator or other government officials shall be given or reimbursed for luxury transportation, luxury lodging, or luxury meals. Luxury shall mean, over the 80th percentile cost-wise nationwide. For non-elected government staff, the limit shall be the 75th percentile cost-wise nationwide. However, these people may use their own money to top up this amount, if they want more costly transport or lodging.

37/ Government money shall not be used for catering,

parties, luxury food, alcohol, mafia drugs, or parades. There shall be no social events where large numbers of sitting Senators gather, other than in the Senate.

38/ Unelected government people shall not be allowed to do things in a new and different way. Only a reasonable-sized Senate jury shall have the power to do that. However these shall have an obligation to explain (in advance) why they have chosen to do things in a new way. Failure to explain shall be considered a sort of corruption.

39/ No public office or franchise shall ever grant the right to keep the payments extracted from the people. Any time we see this sort of Roman-style "tax farming" system, we shall presume corruption and theft.

40/ People can work their entire career in government working as an EMS, fire or police responder. This shall also be allowed for road workers, trash men, and certain other areas. But the managers in every area of Government shall all be subject to some rules:

a/ They shall be selected or hired by Sub-Senate juries.

b/ They shall be required to have a level-3 course in government corruption.

c/ They shall have a 7-year lifetime limit on Government management employment unless they are given an exclusion by the Senate. This shall include government-run education.

d/ Police detectives and fire inspectors, building inspectors, and certain other areas shall be allowed to work a whole career in government.

41/ Except in times of annual price inflation over 30%, no Senate salary increase shall take effect until at least 10 teneths have passed.

42/ Government shall spend at least 1/500th of its budget on anti-corruption media and investigations. Half of this money shall be for government, and the other half for the private sector. Government agents shall attempt to entice people from both government and the public into corrupt practices under secret recording. Agents shall also audit the lifestyles of officials.

43/ Bribe paying and bribe offering shall be considered just as bad a crime as bribe taking. It shall be a felony to give or receive valuables or favors, including sexual favors for influencing or claiming to influence a member of the Senate or other member of government.

44/ It shall be a felony to try to buy or sell influence in government. This crime shall apply whether it comes from the government worker, or it comes from the outside, and whether the government official actually follows through or not. Mere talk of influence, peddling shall be considered essentially bribery, which will also apply from both directions, and whether the bribe actually influenced the political process or not.

45/ In all branches, all government services to the public shall be monitored by an unrelated branch of government in round robin style with new random reassignments made at least annually. Investigations by the same department of government should be automatically seen as worthless, and look like an attempted cover-up.

46/ Anti-corruption enforcement shall occur and be recognized in our nation at four levels: county government, national government, world government and private sector. The national Over-Senate shall however have the right to

veto any UM corruption ruling with a 60% overmajority.

47/ Government shall compile detailed, time-efficient educational media on what constitutes corruption, and what does not for both government and all aspects of business. Everyone working in government or spending the money of others shall be required to complete the Senate's course and pass the 200 question common-sense "safety test" with a perfect 100% score. After this, we shall strictly enforce the rules of corruption and give lengthy jail times for significant acts of corruption.

48/ For 5 years after cycling out of the Senate, or leaving another government position, all former Government people shall be required to live cash-free, and gift declared lives. They shall be subject to more frequent than normal audits, and they shall not do business with Government either directly or indirectly, while serving and for at least 5 years thereafter. No person holding public office shall do business with government while in office, or for 5 years after leaving public office. All shall be subject to a more frequent audit than normal for 7 years after leaving office.

49/ Except in small towns, government appointees, and Senators on judicial duty, shall not know, meet or fraternize with the people they judge or administer on behalf of the people.

50/ Unless there is good reason, all government services shall be delivered via video. Where this is not practical, all government services shall be recorded by the recorder on video.

51/ Public auctions shall not be allowed where there are too few bidders, or a limited public awareness of the sale or obvious potential bidders were not notified. Under these circumstances the sales may be set aside, even years later.

52/ There shall be safe harbors, but the mere transaction of an excessively sweet deal with government made in a closed bidding or non-open-market scenario may in itself be sufficient proof of corruption. People should be afraid to do business with government under these circumstances, and their bidding platform should inform bidders when they are making a dangerously low bid. Also, the third-party county recorder system will handle the bidding notifications and auction "quorum" validity.

53/ There shall be a total prohibition on government giving money to either fictional citizens or groups of real citizens for dispersal. In fact, doing this sort of thing shall always (prima facia) be regarded as corruption. All dispersals of public money shall be authorized exclusively by appropriately sized randomly selected Senate juries. (All Senate juries are always randomly selected by Nome number ending.) Wherever we have government money being handed out by anything other than Senate juries, this shall be considered fraud. Also, our definition of giving money shall include qualifying people to continue to receive government money. It shall also include which bidder gets the fat government contract. This includes emergency handouts, this includes absolutely every dollar that government spends. All of this must be dispersed by Senate juries of appropriate size. It is thought that juries of annually-elected randomly-assigned Sub-Senators are less corrupt than any government appointee, especially government appointee that work in high-paying plum positions for many years. All of these

people are thought to be getting/giving kickbacks, whereas ad hoc randomly-selected Senate juries are thought to be much less corrupt. They may not be perfect, but they are certainly less corrupt.

54/ Most government theft occurs in cash streams. However government property is also stolen. In fact, the devices, equipment, and tools of government are often stolen. To prevent this, all government property must be through and through different from the public sector devices, so the parts cannot be mixed.

55/ It shall be considered to be a felony to be in possession of the Government's stuff on private property.

56/ The Centi-Nomes shall open about 10% of all domestic containers in both directions, to make sure that everyone tells the truth on their declarations. Also to prevent human trafficking.

57/ There shall be Government ownership and private ownership, and nothing in between. In other words, there shall be no more quasi government organizations. From now on it will not be possible to make any government ownership private by degrees, or to slowly privatize government organizations, businesses, or assets. Also, let it be thought (prima facie) that the people seeking to blur what is government and what is not government are doing this because they are on the side of corruption and they are angling to steal.

58/ We should all be mindful of the sort of stealing that involves government establishing a quasi governmental agency that is funded by government and then made progressively private until the government's billions are passed on to some private party. We shall not allow the situation where there are a bunch of quasi-governmental entities with hard to figure out powers and it is also hard to figure out who owns and paid all the money into the entity.

59/ Where government funds fictional citizens, these shall not be called, non-government organizations, but government organizations.

60/ The snow plows, the shovels, the brooms are all camouflage tan and everyone is responsible for reporting people who use G equipment on private property. No P or private equipment can be camouflage tan any longer. No private vehicles can be camouflage tan, as this means government owned vehicle/equipment. Rail or catenary based vehicles can be any color. People everywhere will check the G-numbers whenever they see these on the move to help prevent people using government vehicles and equipment improperly. The parts are all different from the parts the P vehicles use. These are designed so that they are hard to repurpose. Indeed, everything that government uses is supposed to be completely different than in the private sector and it is all supposed to be painted camouflage tan, even the furniture, even the umbrellas, even the emergency housing, And certainly everything in the army and militia is painted camouflage tan.

61/ Privatization theft is where government builds a costly thing, like say a Panama Canal, and then either gives it away for \$1, or sells it off for much less than it is worth to our nation and the people of Latin America were it operated not to make money, but to make the Americas competitive and powerful.

62/ The advent of our Sub-Senate will make government

much much more efficient at spending money instead of having government spending being 95 to 99% stolen in many cases.

63/ Police shall not be allowed to pay informants any money or give them any favorable treatment upon arrest or conviction.

64/ All bank account shall be audited annually to make sure that they have at least one living citizen attached to them. Unaudited bank accounts and accounts that are not tied to a citizen cannot be used in the financial system.

65/ The recorder system, the treasury system and the tax house shall work in triplicate and verify identity in triplicate.

66/ Property previously acquired from government for absurdly below market prices shall be thought to lack a valid claim to private ownership title even if the transaction occurred 200 years ago. This shall especially apply to the Panama canal.

67/ No prior grants, gifts, sales, purchases, bestowments, conferments, awards, endowments, franchises, pardons, or immunity from prosecution, and diplomatic immunity made by the prior corrupt democracy shall be completely valid under our new democracy. All shall be subject to review and cancellation if considered as unconscionable or obtained from corruption. And this shall be so even even if they occurred decades ago. This shall extend to grants of property, citizenship, immigration status, immunity, and grants of honor and grants of territory such as the US gift of the Panama Canal. also, in our nation, we shall not have any entity, or organization that is immune to prosecution, and we shall not recognize any international organization that claims immunity. Also, we shall always stand ready to assassinate anybody who stands up and claims to have sovereign immunity in our nation.

68/ It shall not be thought possible for Governments to sell or mortgage, or float bonds on their existing public linear infrastructure such as bridges, highways, utility systems, railroads, metro systems, airports, ports, canals, power plants, airports, or underground minerals, parking meters, and all similar such things. All of these shall be thought to be like the Brooklyn bridge: unsellable. It shall not matter if a corrupt president or legislature sold the public property to a company, or a foreign nation, or they got a pile of money for it, or they got nothing, or it was called a "privatization". It shall not be possible for anyone other than a nation's people (and their Government) to own that nation's key infrastructure. And any attempt to sell key infrastructure shall be void. Also:

a/ The people have an obligation to jail those fraudsters involved with buying or selling a nation's public infrastructure which cannot actually be sold.

b/ Hopefully these words will absolutely ruin the value of anyone ever again trying to sell this sort of infrastructure.

Especially when we start handing out decades-long jail sentences that should be handed out.

c/ The Panama canal is ours and it will always be ours for as long as our nation exists.

69/ No sale or gift of government property or rights by the previous corrupt democracy shall be considered completely valid by this new government. We shall seize our Panama canal and take this back. We shall take back and nationalize all bridges, highways, toll roads, ports, airports, parking ticket

administrations, and all other similarly unsellable Government properties that have in fact been sold or given away due to corruption.

70/ No money shall be paid when we recover our Brooklyn Bridge properties. This is because these assets were stolen from the people by using corruption. Also, regardless of the circumstances, we shall generally consider the most wildly and improbably profitable of these gifts as the products of corruption, and prima facia evidence of criminal activity. All of these questionable and even barely profitable acquisitions shall be set aside by the Senate, and the assets in question nationalized as the Senate elects is fair. The people involved may also be imprisoned as the Senate elects is fair and reasonable. Furthermore, there shall be no statute of limitations in these matters, or limit on how long ago the corrupt transfer or grant took place.

When there is widespread usurpation of public property, and there is a backlash against this, the people who have usurped public property shall get nothing for whatever imagined legal interest they have that they have gained over the public and its property. So people who built kiosks get no right to own that kiosk, even if a century has passed since the public property was usurped.

71/ All grants of honor ever given by government for athletics, acting, entertainment media or music are hereby void, and our nation shall be prohibited from granting honors for these activities in the future. Private awards and competitions for media, acting, and music having been a source of great corruption of the group mind, these private awards shall be prohibited.

72/ All awards for media shall be forever tainted by how the "Casablanca" propaganda film covered up the Nazi concentration camps like Auschwitz. Yet this film was called the best film of 1942 by the Motion Picture Academy of America.

73/ All applications for government services shall go on a queue and the queue shall be open for everyone to view. No preferential queue treatment shall be given except where the Senate elects to prioritize certain types of application as a class.

74/ When queues are an allocation system. The rich shall not be allowed to pay others to wait in line for them. Also, government shall not allow people to shortcut the lines by paying more for government services. If we allow this, then it is an incentive for government people to create lines so their overpriced friends can submit the plans to them.

75/ There shall be no fast track through any government procedure or permission administration for a fee, or for a larger fee than is normal.

76/ No government approval application process shall take longer than 36 days to approve or disapprove, or it shall be considered approved. And all disapproval shall be required to be for stated specific causes. This rule shall apply to nuclear reactors, power stations, factories, homeless facilities, oil fields, new cities, and anything else where government approval is required. There shall be no nuclear powered civilian ships.

77/ Those who facilitate government services shall:

- a/ Be heavily regulated.
- b/ Not be paid based on the outcome of their work.

c/ Not be paid as a percentage of the government.

benefits they obtain for their clients.

d/ Get much more than their share of government scrutiny and auditing.

78/ When public property is sold-off on the eve of a sharp rise in prices, or on the eve of when it is needed for some public use, that sale may be set aside and the transaction reversed.

79/ People should be afraid to buy large chunks of public property except from the government forum, in appropriately sized chunks of appropriate durations, and with a reasonable time period on the market and all reasonable bidder notifications.

80/ There shall be no statute of limitations with regard to recovery of extreme assets from Government and OPM corruption, including especially the sale of bridges and parking meters, but also things purchased with corrupt proceeds.

81/ We believe that a broad body of elected leaders is the least corrupt way for a free people to govern themselves. And while this is the best form of government, we shall still not always and completely trust even this form of government.

82/ Undercover police shall be allowed to pose as bribe payers or bribe seekers on hidden video. These may approach people in either government or industry. They may also pretend to represent their family member.

83/ It shall be thought that wherever government spends money on things that are hard to quantify, or secret, or hard to reach, or hard to evaluate, or hard to understand — that most of the money is getting stolen.

84/ The people declare the following as a warning to future generations, so it will be clearly remembered above all in this Constitution: That unless the all-critical representation ratio is broader than 1-in-50,000 in its narrowest house, that form of government is not a true democracy, but a form of broad oligarchy that can be corrupted and parasitized.

85/ All policy shall clearly explain:

a/ The policy's objectives.

b/ The reason for government action.

c/ The odds of success and failure.

d/ The means or system by which the policy is supposed to fix a problematic situation.

e/ The testing involved in the new policy.

86/ It shall be a crime for Government people to:

a/ Hide their activities either from government or the people.

b/ Help or assist people with breaking the law.

c/ Manipulate data or aid in its manipulation.

87/ Government people must cooperate with government auditors. It shall be a crime when Government people fail to fully and honestly cooperate with Government auditors.

88/ Where national inspectors and inspection juries are inspecting local county government, these national inspectors should be self-directed and go by themselves where they please. The county officials shall be prohibited from taking them around, giving them a tour, transporting them, feeding them, or communicating with them. Also, all local officials must be completely honest and forthright with national inspectors. It shall also be a crime for local government officials to intentionally trick them.

89/ It shall be a crime for government officials to deceive

inspection and regulatory juries and statisticians. The Senate shall always be mindful of the way that local officials under the Chinese communist party cooked the books and reported false statistics much to China's detriment. We still not allow our government to make the same mistake.

90/ When government collects statistics, it shall be considered fraud to change the statistical metrics for any reason. If the old statistics are deemed inappropriate, then government shall also keep another line of statistics, but the first methodology shall not be canceled. This shall be especially so for inflation gauges. It's better that we have new gauges, many new gauges and we monkey with the old gauges and hide the true rate of change from the people. Those people who subtly change statistical methodology may be charged with fraud.

91/ All national demographic data shall be annually based on the end of the calendar year, but reported the following April 15 or before. This information shall be displayed graphically where practical to ease and increase understanding. It should also be possible to flip through graphical presentations by year to see a 4 dimensional view of the changes.

92/ We shall have more accurate statistics on missing children, such as probable runaway, age, single-parent family, raised by non-parents, and location maps.

93/ Only unbiased Senate funded research shall have the high ground and can be presumed to unbiased. Where fictional citizens and ultra rich people fund research, and it supports products that they sell and they make billions of dollars on, this shall have low ground and shall not be considered unbiased.

94/ All Over-Senators shall have the right to show up at any time and inspect any aspect of Government. The Main-Senators shall have a similar right outside of the Military, and the spying apparatus. They shall have access to anything the government does without any notice at all.

95/ All matters of the Senate that are under discussion just before a huge manmade event, such as September 11 must be resumed after those external events. These matters must be given much time and inquiry heat.

96/ Government security clearances shall only be granted to long-term, full time employees of government and to certain Senators. All Over-Senators shall however, have a certain level of security clearance that comes automatically once they pass the Over-Senate orientation material. The Over-Senate shall be the only government body deciding on security clearances.

97/ All government security clearances shall be terminated upon the end of full time government employment, or the Senate term. No person with a high security clearance shall do any work outside of government while employed for government, or for 5-years after leaving government in any matter related to their work in government unless specifically approved by the Over-Senate

98/ No government worker shall aid or encourage the people to engage in illegal activity.

99/ Making democracy less corrupt, makes it stronger. Then tyranny everywhere is weaker.

100/ When government administrations seems greedy for fees, or they seem to be charging too much, it shall be thought a symptom of corruption. These people should be

audited first.

101/ All payments to Government shall go to the general intake fund first, where they are sometimes credited to a particular department. But these inbound fees from outside should always be more carefully watched, and more frequently audited, because inbound fees are more likely corrupted away than outbound budget money.

102/ All mysteriously rich government officials, elected or not shall be audited.

103/ Absent a court order, it shall be a felony for government, or anyone else to de-register, or delete businesses, or commercial activity, or livelihood, or even social media, or gaming accounts because of their political views. This can only take place at the command of a disconnected and disinterested Senate jury.

104/ Every person who has ever been a member of the World Economic Forum or other global extra-democratic organization, or secrete society shall be banned for life from Senate service, from working in Government, and from working for a fictional citizen with over 200 workers.

105/ We shall honor the words of France's 1789 "Declaration of the Rights of Man and the Citizen", which said that: "Society has the right to demand that public officials produce an accounting of their administration."

106/ The Senate shall have a GAO or Government Accountability Office that shall be run by Senators and forensic accountants that are mostly motivated by Ubiq status, and Ubiq rewards money. The GAO shall have 3 main areas:

a/ Government spending.

b/ Fictional citizens spending.

c/ Conduct of government employees.

When the people complain about government workers, or police officers, they should bring their claims not to that department of government, but to the GAO.

107/ There shall be no discounting or kickbacks or gifts related to published prices. It should be a crime to buy or sell things at less than the published price. Surely any darkness about pricing is not what we the people need in our open and free world.

108/ There shall be no secret laws, or undisclosed secret text in any law, or secret rules in any court. If there is any secret or undisclosed text, it shall be shall be considered omitted from the bills passage under the law. If there ever is any sort of secret law, it shall be considered invalid. Also, all secret and undisclosed text (and text added later outside the democratic process) shall all be void and unenforceable. Government shall explain every single law, and every single aspect of government, in a great compendium every year, or the law shall not be valid and enforceable upon the people. Anyone attempting to enforce any secret laws shall be guilty of a felony and possibly democide.

109/ There shall be no Government agencies or divisions of agencies that are kept secret from the Main-Senate. Every person working in or for a secret Government agency shall be considered a traitor to our nation of light and openness.

110/ It shall be a felony when Government workers divert government resources like Oliver North did. Also, it shall be noted that Oliver North's crimes were not against our nation itself, as much as they were against the democracy that is the

beating heart of our nation. Considering the harm this man did to the righteousness of the pragmatic Americans of the day. We must almost ask if he was actually an agent of the left.

111/ All governments leak power. And the leaks will grow in size until we address them. So the moment we spot a power leak, we must plug it. This plugging is a first order sort of thing. So whenever corruption or economic parasitism is identified, measures must be taken to immediately stop the leak in the ship of state. Otherwise the whole ship might sink.

112/ All information on the assassinations of the Kennedy brothers, and all information pertaining to the COVID injection development shall be released forthwith in completely un-redacted form. Anyone who further delays this release, or destroys information, or redacts, or makes excuses for not releasing all of the files in completely un-redacted form shall go to prison for 20 years.

113/ Illegal activity in the part of our government and its workers shall never be secret or classified.

114/ It shall be a felony for government officials to intentionally act to hide the identities, or type of work that government employee do for the Senate when this information is subpoenaed by the Senate. No branch of government shall be exempt from this rule. There shall be no black box agencies or black ops by any branch of Government. This rule shall apply to all divisions of Government including especially the military, the FBI, CIA, NSA, Secret Service and similar branches of government as well as their successors. This rule shall also apply to all quasi-governmental agencies and organizations, as well as all fictional citizens and individuals working with, or for Government. All Branches of government and all activity connected to government shall exist entirely under the direction and purview of the Senate as ultimate manager. Everyone involved with government either directly or indirectly shall be required to fully cooperate with all Senate reviews and investigations, or they shall be treated as criminals.

115/ All government workers are strongly advised to stay far away from secret and rogue sections of government. If you participate, you may be treated as a traitor. All who divert government money flows for unauthorized purposes shall go to prison for decades. Those who expose corruption and diversion by others and get generous awards of Senate status and if necessary housing on Kauai, or other safe witness protection places such as Japan.

116/ There shall be absolutely no right of privacy, confidentiality, secrecy with regard to the decisions, approvals, or permissions or communications of any government agency, or its workers in their official capacity.

117/ All Senators, Government, workers, and fictional citizen managers and officers shall be required to use only one or perhaps two communication account platforms that are registered with the county recorder system. It should be a felony to have or use another system for communication.

118/ We must always be on guard against all forms of corruption, even selective paralysis corruption which must be stopped like the other forms of corruption.

119/ The foregoing restrictions cost practically nothing, and are practically no inconvenience or dishonor for honest men.

120/ In general, where immense government and fictional citizen corruption schemes have clearly occurred, the corrupt officials/managers that are obviously involved should be executed if convicted. Execution for corruption is preferable to imprisonment, because otherwise the greater risk is that the corrupt and Mafia-connected officials will be pardoned and let out early. Execution prevents early release from happening, and it perhaps more importantly undermines the Mafia's power to believably say that it will take care of its people.

121/ Harry Truman's words should be a great mantra for incorrupt government: "Show me a man that gets rich by being a politician and I'll show you a crook."

122/ The Senate shall have especially broad rights to separate foreign money and foreign people, and fictional citizens from communicating with Senators. These things shall be thought to have no honest reason to coincide, and a whole lot of dishonest reasons to coincide. Also, the monitoring system shall allow Senators to bookmark their video streams.

123/ Where non-elected Government workers are regulating any of the following things, they must be teamed up with elected officials at a ratio of no less than one elected official to every 20 non-elected Government workers:

- a/ Environmental policy and enforcement.
- b/ Oil and coal extraction, transport, refinery, and distribution.
- c/ Policy that reduces environmental carbon.
- d/ Policy for energy use.

124/ There shall be no regulatory management in the nation that do not use Senate juries. It shall be considered corruption when un-elected Government people or undersized Senate juries usurp power from the Senate. Or where they make decisions about who to prosecute, fine, or regulate, and who to exclude from prosecution/fines/regulations.

125/ We should always be mindful of the possible cut that government people may get from the various things they are funding. For example: Money spent on 99.8% empty vaccine vials and money for the corrupt Ukraine government might result in larger than normal cuts for the corrupt people involved with funding them. But when they spend money on disaster rebuilding in Maui, they don't get any kickbacks.

126/ Senators shall not be allowed to meet individually or in small groups with the lobbyists of fictional citizens or the lobbyists of foreigners, or foreign nations. They may however read their emails and watch/listen to their media submitted to the Senate.

127/ Qui Bono is Latin for "who benefits" and follow the money shall be mantras for all investigations of corruption, be they government corruption, or corruption of fictional citizens. Also, it shall be considered prima facie evidence of fraud when government officials exchange cash or valuables, or mafia drugs while in office, or for some time thereafter.

128/ Those in power public are servants, and they don't have privilege like royals once had.

129/ Government shall not be allowed to cover up what happened and must report on things that may be newsworthy. Government shall not be allowed to set up a Lahaina fence so nobody can see what is going on, or what happened. When this happens the wise must multiply their efforts to know exactly what happened.

130/ All prior Government managers (and especially those who have worked for decades as Government managers) shall be thought to be more likely than not corrupt in some way, or favoring continued corruption in some way. We shall replace the entire management class of government and start over with juries of annually elected Senators.

131/ The Senate shall compile a detailed set of rules for identifying and punishing corruption in government, in business, and among the people.

132/ Wherever a commission is paid to anyone in our entire economy, this commission must be disclosed to the customer, or the customer shall have the right to cancel the transaction and demand 10 times the amount of the commission. In general, this constitution, despises undisclosed sales commissions as a corrupt practice.

133/ No aspect of government shall be above the Senate's right to know, and this shall be especially so with regard to all armed branches of government to include the military, state security, police apparatus, and including especially all secret agencies like the CIA, FBI, NSA, OSS, KGB, SS, etc.

134/ Government money shall not be used for government people to travel for non-governmental purposes. Also government people shall not be allowed to attend parties, or events.

135/ The Senate shall establish a private industry where people hire one of thousands of small somewhat specialized audit/review firms to audit and review their Government services, Government transactions, Government tax assessments, criminal charges and other Government activity for validity and correctness. Where these audit/review firms come up with clear evidence of Government error, the Government shall be required to take reasonable action to correct the problem. Also, where government errors are found, the person commissioning the audit/review should normally get 20 times the average cost of the sort of review they commissioned. They may also be awarded some Ubiq status for finding an everyone problem.

136/ Government workers shall be prohibited from doing things in the dark, and with secrecy, when they can just as easily be done openly, in the day in front of the recorder. When government people do things secretly, it should be presumed that they are doing something nefarious.

137/ Every government contract shall track the groups which started the project, assembled the working plan, finalized the working plan, took bids, selected bidders, let the contract, and then managed the construction/execution of the project.

138/ Government contractors shall not be allowed to sub-contract more than 40% of their work. They must use their own full time staff for at least 60% of the work.

139/ Except for covering the dead and severely injured, government shall not be allowed to instal or use visual barriers. Government shall especially not be allowed to use screening in chain link fencing to cheaply and rapidly hide what is going on. It shall be a crime when police officers gather around officers making an arrest to block recording.

140/ The Senate shall always have a generous budget for short films and long commercials that educate the public on how criminal enterprise, government corruption, and OPM corruption work.

141/ Transparency shall be thought a must-have aspect of a

genuine democracy and the default setting for all government activity shall be transparency. The people who violate this rule shall be thought to not belong in our open and free democracy. Whenever government people put up an actual or metaphorical Lahaina fence for no good reason, those people shall be immediately fired on that fact alone. Then the actual, or metaphorical fence shall be immediately removed, and the government people installing the fence carefully investigated for their own acts and the acts of their associates and masters.

142/ The county recorder system shall keep detailed plans and detailed square meter costs of for new standardized government buildings and standardized construction projects in the nation. The most important thing that our Senators can do to keep Government from getting ripped off when it builds projects are to:

a/ Build using plans for standard government buildings that have been built so many times that all the bugs have been worked out, and everyone knows the cost of the building.

b/ Pay close attention to the square foot/ square meter costs of all Government facilities relative to the square foot/ square meter costs of the private sector.

143/ Wherever government builds a Lahaina fence, or says: "you cannot look here", or "you cannot investigate how these voting machines work", or "you are crazy for investigating how our super popular leader was assassinated, then we the people should all go out of our way to carefully look at that place. We should all have a very strong bias against all leaders that seems to be hiding what they're doing or planing. All leaders that say: "don't look here", or "you can't look here should be considered crooks, and this especially when people want to see financial records. When people say don't look here, everyone, and all of our Sub-Senators should always feel duty bound to take a good hard look at exactly that place we were not supposed to look and report on what they find.

144/ We shall aim for elections that are totally transparent and verifiable. Where elected official work, or have worked to make our elections in any way less transparent, or easier to corrupt, the correct punishment is death. In fact, in a healthy democracy, lawmakers are supposed to trembling in fear at the idea of promoting any cause that makes it easier to corrupt the elections, or the democracy in any way, even if a great amount of time or money are saved. (As if saving a little time or money matter, or reducing the risk of infecting others at the polls matters one tiny bit in comparison to our mission-critical, all-important election integrity.)

145/ We shall aim for total transparency with regard to everything that touches the Senate and its bureaucracies, as well as the county recorder system, the evil political parties we are trying to greatly minimize, and what people do, and say, and offer, and promise to get elected.

146/ If an election looks like it might be corrupt, and the people running the election are not letting you look behind the Lahaina fence (or monitor the vote counting process, or inspect the voting machines, then the election shall be regarded as totally corrupt by the Senate and people of our nation. Then we need to find a new way to elect people, because the old way is totally corrupt.

147/ Government shall be prohibited from erecting, fences, or

walls to hide what it is doing. This is to be understood in metaphor as well. And the government workers doing this may be subject to criminal charges.

148/ Government is our business It belongs to us. Those who try to keep the people out, who build Lahaina fences should be generally thought of as corrupt.

149/ Our democracy shall be committed to openness. And nowhere should our commitment to openness be stronger than with Government spending transparency.

150/ Corruption withers and dies when exposed to public scrutiny. Therefore transparency is vitally important to eliminating corruption from government.

151/ Media people that parrot the same party line may be judged as part of a conspiracy and either prohibited from media for life, or jailed for conspiracy.

152/ Government workers shall be prohibited from doing things in the dark, and behind Lahaina fences, and with secrecy when they can just as easily be done in the daylight in front of the people and openly. When government people do things secretly, it should be presumed that they are doing something nefarious, and the courts shall stop the activity for some months until the truth can be figured out.

153/ Being that Ishtar thrives in darkness, all dark government agencies, that work in secret, or have secret documents shall be redundantly supervised and prosecuted by three Senate sluices

154/ Both our nation's public land and its Government are the people's business. It belongs to us, we the people. Those who try to keep the people from looking around here and in other similar areas like the election process should be regarded as probably corrupt.

155/ Government shall be prohibited from hiding information from the public or conspiring with fictional citizens to hide information that is important to the public discourse.

156/ Perhaps our prior government was somewhat protected from corruption by its distance, until the advent to the Internet that is.

157/ Each intelligence department of government shall have a department of sabotage that looks for sabotage in government, fictional citizens, education, transport, industry, etc. Wherever the screw-ups are big enough and frequent enough, as reported by anyone, the managers can be charged with sabotage, particularly if they are foreign and were previously working with a competitor.

158/ Regarding those running for office: there shall be an obligation to debate either verbally or in writing, with the challenged side getting to pick one or the other. The side that refuses debate should be considered as full of hot air. Also, all major political positions must stand for unbiased 3rd party jury-managed debate when challenged. All dating time periods get enforced by robotic warnings and mic cuts.

159/ Fractions (the new word for factions) are where everyone tries to get the biggest slice from the group's giant pizza. Fractions shall be thought an awful aspect of democracy that should be eliminated as much as practical.

160/ All government employees and Senators must answer the questions presented them in Senate inquiries of all sorts the Main-Senate and Over-Senate. If they don't or they answer evasively, they may be held in contempt of the Senate and jailed.

161/ Government offices may sell things to the people that are related-to, and needed by the public and related to that Government office's business, but they shall not sell anything else but this. For example, post offices may sell stamps, boxes, box tape, envelopes, pens, photocopies, and simply desktop printing, but they shall not sell books, or toys, or other unrelated things.

162/ No government websites or building, or transport interchange, or bus, or metro car shall have any advertising except Senate authorized public service announcements.

163/ There shall be no private rental units in any government office building, recorder office, or post office. This shall include kiosks.

164/ Government shall never follow extinctionists. Doom-peddling shall always automatically be regarded with the same healthy skepticism that most people have for promises of eternal paradise in the afterlife — if we just pay the church a little bit of money.

165/ We shall give note to the following quote from a South African voting manual: "Control over the electoral apparatus and manipulation of the [voting] process has been one of the primary tools used by non-democratic governments to ensure their continued win at the polls. In addition, election administrators themselves can be suspect, as they can be seen as agents of the government, of a particular party, or a sector of society."

166/ There shall no longer be a FEC, or Commissioner (tsar) of Canadian Elections. This role shall be taken over by the Sub-Senate.

167/ Government shall not have, host, sponsor, or be involved with festive parties or receptions.

168/ Regarding Government travel expenses:

a/ There shall be no conventions or gatherings of government people. All Government people shall be expected to communicate virtually under monitoring.

b/ Government people shall not be reimbursed for visiting conventions, events, concerts athletic events, festive parties, award ceremonies, or the like.

c/ Government people shall not be reimbursed for travel to tourism hotspots such as Hawaii, Paris, Las Vegas, Jamaica, or similar tourism oriented places for any reason.

d/ No Government department shall authorize its own travel, and travel expenses. All must be authorized by another department.

169/ All Government people must run all their communications through the county recorder system while serving in the Senate or working for government, and for at least half a year after this.

170/ Where the Senate calls Senators and government workers to testify, those people must answer all questions truthfully and non-evasively, or those people may be held in contempt the Senate. Where they don't have the information in hand, for any question, they shall be required to make a formal written statement about the matter within 5 days.

171/ The Senate shall not be allowed to make policies and laws that will bind future Senates, or prevent future Senates from changing Government's mind on some policy, subject, issue, or decision. All such future binding laws shall be totally void at their inception. This shall include clauses that require an exceptional overmajority to reverse a law. Also, all talk in

favor of installing illegal "poison pill" clauses in legislation (including overmajority poison pills shall be regarded as a violation of Senate ethics rules. All of the Senators involved with adding poison pill clauses should be removed from the Senate, and they should lose all of the Senate status.

172/ If we want to have cost-effective government, we should have at least one divisions of government that pay people based on how much money their suggestions saved the public purse. This shall start at 1% of the long-run budgetary savings. After 2-years it shall be 1.5%. After 4-years, it shall be 2%. After 6-years it shall be 2.5%. And after 8-years it shall be 3%

173/ Future generations should long ponder the words of Marcus Julius Cicero:

a/ "Freedom is suppressed over and over in tiny bites."

b/ "Liberty is made even more precious by the recollection of enslavement under tyranny." [Where people can't remember the slavery, liberty becomes weak].

c/ "People don't know the value of what they have til it's gone."

d/ "Don't wait until freedom is gone before you fight to defend it!"

e/ "Our Constitution speaks of the "general welfare of the people." Under that phrase all sorts of wasteful spending can be justified by greedy [foreign fronting] tyrants to bankrupt and enslave the nation."

f/ "The budget should be balanced, the treasury refilled, public debt reduced, the arrogance of our bureaucrats controlled, and aid to foreign nations ended, lest Rome become bankrupt." Here we note how old is the practice of the "West" giving foreign aid money to the Mideast.

g/ "The traitor doesn't look like a traitor; he speaks in the accent of his victims. He wears their faces... he works secretly and unknown in darkness to undermine the pillars of Rome. He infects the body politic so that it can no longer resist. A murderer is less to fear. A traitor is the plague."

h/ "A nation can survive its fools, and even the ambitious. But it cannot survive treason from within."

i/ "The Jews [indeed all Mideast people] belong to a dark and repulsive force. One knows how numerous this *group* is, how they stick together, and what power they exercise through their unity. They are a nation of... deceivers."

j/ "There never was a government that was not composed of liars, saboteurs and thieves."

k/ Any man can make mistakes, but only an idiot persists in his error."

l/ Freedom is suppressed over and over in tiny bites by teeth sharper than freedom ever produced.

174/ Government workers shall not be allowed to make making more than 20% over their counterparts in the non-unionized private sector.

175/ There shall be a complete and total reevaluation of the pension programs of the national government workers, especially the pensions of DC people.

176/ The official stance on UFOs shall be that they are fake and a thing that was created to drive increase spending and stealing on fake government programs. If nearly all of NASA's videos about space and space travel are fake and a thing created in order to steal money, then all of the people involved in NASA shall be sent to a work camp for the rest of

their lives.

177/ Government shall not engage in providing subsidized housing for people, as this is a form of corruption where the elected officials get support from the people that they provide the super valuable continuing rent subsidies to. This is too sweet a gift to have government involved with.

178/ Government shall operate, using a standard english dictionary, the same standard dictionary used in our schools. There shall be no special law dictionaries, or special legal meanings, or words that most of the population misunderstand, or any counter intuitive words used by government or the legal system, or the school system.

179/ Those who have changed their names shall be ineligible for service in government. This shall include nicknames like Mitt and Ike. All women in politics must use their maiden name in politics.

180/ We must all be ready to image that most of the elected officials of the old system are part of a foreign empire's system for managing our nation for its own parasitic purposes. If we cannot imagine this, then we cannot correctly imagine the parasite-run nature of the old system and the old world.

181/ Government shall not build custom builds except when necessary and with a 2/3 overmajority. Government shall be mostly prohibited from building custom builds as this makes stealing easier. Instead, government must build from the same narrow set of building plans nationwide. One of the easiest ways to both increase the take from stealing and hide the stealing is to do things in a unique, or non-standard way. This is nearly always more expensive, and thus it increases government spending along with the commission/cut to the corrupt politician(s). Thus, when Government does unique custom builds, it shall be thought a sign of corruption. For this reason, all unique, custom designed Government buildings should be regarded as worth investigating for corruption. When Government uses frequently used public plans that have been well-used and debugged by Government, then the chances of audit/investigation should be 10 or 50 times lower. Also, a simple majority funds mass produced projects by government, while custom projects shall require a 2/3 overmajority.

182/ All money inflows and outflows by government including all money flows must go on a categorized master list that is shown to all on the Internet. This shall include every source of government and every government payment including the recipients of child support and Ubiquitous payments. Where money flows to fictional citizens, the fictional citizen shall be named. Where money flows to citizens, they shall be indicated by taxpayer ID number.

183/ Government shall not hire those who fail to swear under penalty of felony perjury that they:

a/ Never previously worked for the government of any PU nation, or any adversary nation from a list prepared by the Senate.

b/ Never previously worked for a crime gang, or for an organized crime enterprise.

c/ Are not being blackmailed, and that they will report it if they are.

d/ Have completed the required anti corruption test.

184/ The old government system worked on the basis of life-

long careers in plum jobs, high-paying easy jobs that everyone wanted and nobody would risk losing. So everyone did as they were told. And this system worked very well for the foreign parasitic forces running our nation. Instead, we shall now switch to much shorter term jobs. And instead of people giving something back for a while with a job in the Military, or EMS, or teaching or whatever, many people will now do a 2-year stint in government. Also, this will be considered a bit of an honor, and a thing that helps someone get elected to the Senate. These people shall all be thought to be doing their part, just like the guy who enlisted in the military or militia for 2 years. And half the people will be honored by a 3rd year, and half of those by a 4th year, and half of those by a 5th year. And doing 5, 4, or even 3 years in the national bureaucracy will be thought a mark of exceptionalness. So in addition to having a million men in the Sub-Senate, we will also have a public service corps for many people either right out of school, or later. Also, if there aren't enough jobs in any particular year because of the economy, maybe we will have lots of people working in our government doing public projects like in the WPA.

185/ In the real world, experienced people normally produce better results. However in the inverted world of front governments, the opposite is true. People who spend decades working for government tend to be totally corrupt or at least blackmailed frontmen, and these frontmen produce the worst results that can be plausibly denied on behalf of their foreign masters. Thus we realize that it's not a small thing that we have short work terms for our elected officials and top bureaucrats, but it is critical that we rapidly change both.

186/ The Senate shall compile sensible, logical, and well sequenced codes of ethics for the elected leaders and fictional citizens of our land. Everyone involved with politics, be they election officials, candidates, voters, and even protesters will all have to use the same code of ethics/ conduct, that covers many different areas like Nome elections, Centi-Nome voting, Main-Senate voting, Over-Senate voting, communications, BBS posts, etc.

187/ The first priority in Government aid to the poor and disabled shall go to people who are obviously disabled and missing limbs, or blind, or genuinely paralyzed, or experiences endlessly trembling, or with some other blatantly obvious or scannable health problem. The people who might be faking should be considered second tier with regard to government disability payments. This category of people with non-obviously truthful problems shall get no more than 20% of our nation's disability money.

188/ Future generations are advised to long ponder the propaganda, matrix-defining words of Virgil's Aeneid (4.2) about ancient Rome: "Romans: Always remember that it is by your [military] strength that you rule the world. And your arts shall be these: To bring peace [like Islam], to impose rule of law [like Sharia], to spare the conquered [by selling them into slavery], and to beat down the proud [those who resist, we shall beat them down in endless wars]."

189/ The Senate shall carefully and logically establish very strict rules on the limits of power for individual Senators, small Senate juries and government appointees. There shall be criminal penalties for making decisions that usurp power from

the Senate and the people.

190/ Where the law is silent on who must pay the cost of regulation compliance, for new government regulations: the government shall be required to pay for it.

191/ Government shall be prohibited from favoring foreign producers, or giving favorable treatment to foreign producers. over our own producers.

192/ Government shall not order the destruction of any data. Government shall be required to go in the other direction and require that all data be preserved for review in the future. Where government officials instruct people to destroy evidence, the people shall be required to ignore the order. Where government officials or their contractors are attempting to destroy evidence of a crime where people have died, the government officials and their contractors are supposed to be arrested by people or shot because they're most likely conspirators in those deaths.

193/ When government is crazy to get the people to do something, it's generally the case that they are working for our enemies, and they're trying to get some to you to do something that's harmful to you, or that something that someone is paying them for to talk about.

194/ Think of the way people in our government all pull together in unison. This should be understood in the context of corrupt government people fronting for parasitic foreigners that are pulling on ties that are very often weak strings. So to achieve full power, they must all pull together at once, and in the exact same unified direction.

a/ Where we see this, it can indicate a corrupt group of people. For example, the power base of the foreign corruption was concentrated under the donkey party of the old system. However there were at least a few dozen individuals in the other party that are corrupt, and that would join with the donkey party when needed by the great parasitic strong puller, Ishtar.

b/ Wherever we see this we need to be ready to go in the opposite direction.

c/ Wherever we see this, we need to have a leadership purge.

d/ We are better off erring on the side of doing the purge, than risk having foreign agents in our government, agents that are seeking to cause the most harm in the shortest period of time.

e/ Is there an impending sense of urgency? If we don't all jump and do what the benefiting party wants us to do quickly, will there supposedly be a giant life-ending crisis?

Exaggerated urgency should be regarded as the hallmark, or the "all-mark" that someone is steering the herd with their herd words.

f/ We must all realize that in all political situations, one side is telling the truth, and the other side is either ignorant, or lying to have a profitable global scam, as with the CO2 theory of climate and the COVID vaccines. This is why it's so important to always ask "qui bono" or who benefits? Who benefits.

195/ Who benefits from the CO2 theory of climate? Who benefits from the Covid vaccines? If one side benefits, and the other side does not benefit from some proposed new government policy or law, we should always have a bias towards the side that doesn't benefit and against the side that does. OPEC definitely benefits from the phase-out of coal

driven by the CO2 theory of climate. OPEC greatly benefits from regulations that make it very expensive and time-consuming to drill for oil in our country. Therefore we must presume that all proposed regulations that increase the cost of oil, or the cost of trade have been sponsored by OPEC.

196/ Whenever a benefiting party tries to change the way things are done, or the way the world is understood, the Senate must remain skeptical, and ironclad reasons and ironclad proof shall be required for the Senate to take action. Whenever mankind is supposedly altering, or ruining, the global atmosphere, or global environment, the Senate must remain skeptical, and ironclad reasons and ironclad proof and math shall be required for the Senate to take action. This is because we all now know that the atmosphere has around 10-million times the mass of Mankind, and the Oceans have around 2.5-billion times the mass of mankind. Also, whenever anyone comes along and says that there is a an emergency, and we don't have time to test claims and prototype our solutions in microcosm, the Senate must remain skeptical, and ironclad reasons and ironclad proof shall be required for the Senate to take action.

197/ It shall be thought that when people have life-long well-paid careers as government managers, this is a situation more vulnerable to corruption than when people only work as government managers for a limited number of years.

198/ All fired government people shall be banned from working for government and fictional citizen management or compliance for life.

199/ With regard to corruption, we should all long ponder the words of Marcus Julius Cicero/Caesar: "The budget should be balanced, the treasury refilled, public debt reduced, the arrogance of officialdom tempered and controlled, and aid to foreign lands ended, lest Rome become bankrupt."

200/ All parts of this constitution including all subsections shall be considered an important part of the new way the world will function. No section or subsection shall be optional for any member nation, and none shall be ignored by a member nation or its citizens, unless the UM resolves to ignore some part of this constitution by the amendment process. This shall be thought to be particularly so for all sections and sub-sections about migration, marriage, population policies, family planning, aid for mothers, sireage, mothers that are literate, female genital mutilation, and transexuals. Migration and other forms of government handout must be in particular frozen stiff in regard to change because these are tied to a huge desire to migrate for over a billion people. Migration is also attached to huge flows of money and many people feeling a huge sense of debt to a group other than our people and our government. Also, the clauses about marriage, population policies, family planning, aid for mothers, sireage, mothers that are literate, and female genital mutilation must be vigorously enforced, because otherwise the many awful, bizarre, and extreme breeding and sex customs that are prohibited herein will go unenforced, or under-enforced and will thus these will continue to live on when they must be ended.

201/ Foreign born people, and especially Ishtarians shall not be allowed to work in our government as managers of any sort. They shall also not be allowed to work in law enforcement, or in our court system, or in the military, or in

transport or transit, or as truck drivers, or taxi drivers, or in air travel, or in the domestic shipping and delivery industry.

202/ Everybody in the world has greatly underestimated corruption, because they don't take into account the way that corruption always tries to minimize and camouflage itself the way a tick is camouflaged to look like skin. All parasites, including economic parasites, always use camouflage, otherwise they get recognized and quickly removed.

203/ It shall always be considered fraud and collusion with the mafia to give or attempt to give public healthcare or other benefits for non citizens.

204/ All regulations of the previous government shall be viewed as heavily contaminated with the wrong-headed, money wasting and money stealing policies our economic adversaries carefully introduced to our system. Therefore, all of the old business regulations, particularly the most costly ones shall all expire no more than 180 days into the existence of this constitution. If the Senate wishes to keep these laws, then it can renew them individually.

205/ Every regulation not directly ordered and established by congress shall be void. Likewise under the new system, every regulation not directly ordered and established by the Senate shall be void.

206/ There are many legends of people employed by the government receiving money for years and doing nothing. Therefore, as a financial safety measure, Government workers must come into work every day, or appear on video working every day to get paid. People who work outside of the office shall be under special scrutiny by the Senate.

207/ Separation of powers shall be achieved, not through shenanigans about this arm of long-term deep-state appointees versus that arm of long-term deep-state appointees. It shall be a thing of short terms and large juries of annually elected Senators.

208/ Government workers should not be paid substantially more than the private sector. Perhaps 10% or 20% more, but no more than that.

209/ As long as we let our Government people steal whatever they can, we will never have anything good left for the people.

210/ Wherever government people and government bodies take money directly from the people and especially from fictional citizens, the presumption shall be corruption. This is why we have a total prohibition on offering or giving gifts to Government people, as well as asking for gifts or taking gifts by Government people.

211/ It shall be a felony to participate in a government or corporate coverup of felonious activity.

212/ Government shall not sell land or facilities to foreign governments or foreigners. When government buys real estate, it must provide like kind plus an increment for the inconvenience. Also, Government owns lots of land, and except in emergencies, government shall not allowed to lease real estate from others.

213/ Government shall lease land for manufacturers at a low rate, so there is less land component to our manufacturing. Also, in general both government and fictional citizens shall be required to use the same cookie cutter office buildings, and manufacturing buildings, so they can control their cost and losses to corruption.

214/ Unelected people who work for government for many

years shall not be allowed to go to work in the private sector in a similar area until 5-years have passed. They must also wait at least 10-years before going to work for foreign nations and fictional citizens with political agendas.

215/ To prevent government fraud, all government workers, including Senators shall all be required to have their own county recorder system monitored handheld devices that record their activities on multiple open-source apps. This shall include who they worked with, what they did, what they said/texted, what other people said/texted, and also a summary of all this per matter. Each one of these accounts gets reported to the county recorder system, and the county government. The public may also request this via freedom of information requests. The county recorder system randomly audits these for workers, for customers/ applicants, for location, and for government response to various matters.

216/ Limitless greed and super-human amounts of money sought by government officials shall be thought a sign that they are front men working for a foreign parasitic government. Normal, individual thieves don't need even tens of millions of dollars. To prevent foreign parasitism, the larger government spending chunks of money above 50-year's wages get audited by random Sub Senators a couple times at first and then over the years as the money goes out. The larger government spending chunks of money above 500-year's wages get audited by randoms perhaps 7 times initially and more frequently over the years if applicable. while the larger government spending chunks of money above 5,000-year's wages get audited by randoms perhaps 20 times initially.

217/ It shall not be allowed to make up new euphemistic names for cheap substitute things so they can be passed off for quality things. This shall be considered fraud.

218/ It shall not be allowed to name products in a way that hides either their negative, highly risky nature, or low-quality nature. Examples of this include:

a/ The way that "sub-prime" mortgage backed securities were characterized as assets when they were really liabilities. Also the way they were called B and C grade when in fact they were all F grade instruments.

b/ The way that the term "sub-prime" mortgage backed securities were characterized as assets when in fact they were potentially liabilities.

c/ They way that blender meat is so often characterized as real meat from an animal.

d/ The way that naugahyde passed as leather for so many people.

219/ There shall be no black projects, or secret government projects with less than normal accountability or oversight by any intelligence agencies, or any other branch of government.

220/ We shall encourage private oversight of government by making all non-classified government files fully searchable and eliminating all freedom of information act (FOIA) fees. Every single government worker or branch of government that has in the past charged high FOIA fees shall be thought to have clearly said "don't look here". So we shall be certain to carefully look there and carefully investigated all such people for corruption. Where these investigation turn up corruption of mismanagement in government, the FOIA requesting person shall get status. Where these investigation turn up corruption of mismanagement in government, and the

government people involved are convicted corrupt practices in government, they should also be charged with obstruction of justice in addition to their other charges. Timely FOIA response shall also be presumed with regard to all FOIA requests, and feet dragging shall also be investigated and treated as obstruction of justice. Where government records are open to the public, there shall be no appointment required and no advance notification and no prohibition against re-recording these records and disseminating these records. Government must be open to public review and scrutiny by default.

221/ All politicians who have previously authorized any major dam elimination or some other absurdly stupid thing shall be tried for corruption.

222/ In the new government's trials for corruption, there shall be no blanket amnesty for government workers. There shall also be token felony convictions for keeping these people away from Ishtar again politics again. This and the right to travel internationally shall be eliminated. Thus they will not be able to flee to the land of their foreign backers for a life of leisure.

223/ As a safety measure against corruption, Government must inform the people and consult the people when it goes a new directions ... when government doesn't notify like this, it should be considered criminal.

224/ No government administration or bureaucracy, or agency shall ever be self regulating.

225/ Government agencies shall not have the power to change the name of things they regulate, only the Senate shall have this power and it'll only have this power for good identified reason.

226/ See NA'9, and particularly NA'9.11 through NA'9.13.

227/ Government may test things in small numbers, but most of the projects it actually rolls out shall be in immense numbers with a great deal of design give and take between the Senate plan and the people making it, and test runs. The final design shall NEVER be made by only one company. Always there shall be unlimited competition for each manufacturer's iteration of the highly specific Senate specs. This is vital so that we can keep our costs down for making government designs, such as for office building units, mini-buses, A-11s, 20R engines, delivery droids. We want all these to be like MOPAR and VW bug parts.

228/ When we build government projects, everyone must build using standard components nationwide. Very well worked out plans and specifications and equipment for building these structures and public amenities that are all fairly hard-priced. Again, it is very important that all these government projects nationwide be uniform. Otherwise people have 100X more opportunity to overcharge or under spec their work. Also, government only deals with factory made new stuff and re-use of complete worthless junk old stuff.

229/ Government must select from a few hundred menu choices when it builds anything. Government must leave the creative building to the private sector where people have better control over costs and cost over runs. Thus all the unique artistic statement buildings shall no longer be thought a thing of honest government. So they shall be completely banished, and all the nation's new airports actually will look

identical, because they will be totally identical. And likewise with all of our government office buildings and all of our train stations. And maybe we will have 10 or 30 standard station designs. but the cost will be fixed.

230/ To encourage miserly government administration, 2% of the money saved and left-over at the end of each year shall be refunded to the non-managerial staff of each government agency. And this is in addition to the Ubiquitous rewards given to government workers who expose any form of either corruption, benefit, relation, or who streamline government processes or make them more efficient.

Also, this practice where managers use all the unspent money, so that their budget does not get reduced: It should be official policy to completely ban this, and even criminalize this.

231/ It shall be a felony for individuals and groups within government to use government money for a different budget purpose than was called for by the Senate.

232/ It shall be considered felony misappropriation where public funds are diverted away from the purpose they were allocated by the Senate. This includes such things as using money budgeted to help citizens in natural disasters being instead diverted to help non-citizens migrate to our nation (for the mafia kickback money), As well as children to undergo sex change surgery (for the lifelong hormone maintenance therapy income stream).

233/ Government shall be prohibited from buying tiny things that cost a great deal. For example we look at the way the government of ancient Rome was trading gold at nearly equal weights for frankincense tree sap incense from Yemen. Surely this hash incense had little benefit (except that it got you high and it was said to be favored by the Roman gods). But actually frankincense was a time tested way to launder government money and religious tithes into the pockets of the Mideast.

234/ Under the old system we saw an endless stream of fictional citizens bending government spending its needs at great cost to the human citizens of our democracy. No longer shall this be so. Instead we shall say that all fictional citizens shall be banned from having anything to do with politics, policy, or spending, either in our own nation or in foreign nations, either at the national level, or at the county level. Fictional citizen directors may meet with people and they may make and share still graphs and still images and text, but they shall be prohibited from advertising their preferences about politics and policy, or making videos to explain their stance.

235/ We shall no longer have any official government-sanctioned professions/occupations of psychiatrist or psychologist.

236/ Where any government agency takes in any money from any source but the Senate, all the people involved shall be charged with conspiracy to commit corrupt acts.

237/ Where there are allegations by multiple people about local government people overstepping their boundaries, there must be a national investigation.

238/ All government agencies and all government bodies shall be required to submit independently audited accounting every teneth.

239/ Endless hunger is a reference to how the appetite of the land of no resources. This was symbolized by the plant from

the Little Shop of Horrors film. It is from a whole underfed society, and their are endlessly hunger for more. So wherever we see billion dollar stealing, the endless hunger of Islam's empire is behind it.

240/ Government service should be provided by the lowest cost responsible bidders that can competently provide it according to national standards. Generally when government provides services, these will be super high volume national type services that are frequently re-bid (at least twice a year), such as driving the government's trash trucks over a territory. Where there are short run services, these shall tend to be outsourced.

241/ The government officials of the prior government was crazy to sell off assets so that they can steal the money that is coming from the sale of those assets in their own term of office. From now on, all income from privatization shall go to the nation's general fund. Also the sales of government assets shall be slow and may be cancelled for fair relative payment up to 5-years after.

242/ The word peculation shall now be redefined, as a word related to speculation. This is the crime of using government or fictional citizen money to take unacceptable group money risks that one personally profits from. The group takes the risks, and the individual manager gets the profit.

243/ The term self-appropriation shall apply when government workers spend government money on personal benefits, such as lavish trips, expensive, hotels, private security, etc.

244/ No part of government or any fictional citizen shall ever be allowed to collect any money, or spend any money, except through the county recorder system. This county recorder system shall act as "teller" for the nation's treasury. Indeed, its checks/transfers shall read "United States Treasury". Also, there will be many "Banks" acting as tellers of the treasury for a sliver cut of the money they handle. It shall be thought vitally important that all Government and fictional citizen income go through the county recorder system using entity numbers, human payees or human manager names, with detailed spending criteria and planning. All of this, and all these monies moved must be recorded by the blockchain designed county recorder system. Wherever Government money is collected by other means, or deposited into accounts, or paid to associated fictional citizens, it shall always potentially be regarded as felony stealing from government.

245/ Under the old system, we often saw a pattern where government gets involved in something, and then just gets in the way and ruins or just slows down everything. This should be regarded as government people creating barriers, so that they can get more bribe money to let citizens bypass the process and do what the citizens should already have the right to do free of charge, and without any government involvement. Ishtar always encouraged this situation. We should always be on the look out for it and should always make government provide zoned approvals in 3-days or less. There shall be same day permits for pre-approved apartment/home land titles or strata titles of factory-made housing within a township/subdivision according to the approved build-out plan. This gives considerable latitude to place a wide variety of plans on each lot zoning.

246/ Government people love to get involved because it means more business under their management, and more money for them. This force in government should always be resisted and periodically pruned from the plant.

247/ Where government officials are privy to private information, and they use that private information for their own personal profit by trading, this shall be considered felony insider trading. It shall also be considered insider trading to buy real estate in the path of progress when government people are involved with overseeing some local improvements in that area, such as a new highway, and they know that the value of land will go up in that particular area. Also, as with stock insider trading, this crime also applies when there are siblings, parents, offspring, and other close associates involved.

248/ It shall be a felony to use inside knowledge of upcoming government decisions for one's personal benefit financial trading. Insider trading shall also apply to buying anything that government will need and be buying up in large amounts, including buying land before it becomes known to the public that it will be needed for some new infrastructure project.

249/ The Senate shall go through the recipients of the congressional medal of freedom and various other medals and strip some people of this award. For example George Soros and Alex Soros, and the dumb actor Denzel Washington shall now be stripped of their recognition.

250/ Senators shall not be allowed to drink anything after midnight on the days they will vote. All shall take a Breathalyzer test to get into the voting centers.

251/ There shall be no hitman loophole for government people. It shall not matter if they hire somebody, or call in a favor, or bribe someone, or get someone to do it for patriotism. If the government person is involved, they were organizing the criminal conspiracy.

252/ All high ranking military staff and Military officials shall not be allowed to settle in foreign nations when they retire. These Patriots must stay in their own home nation.

253/ No person working for a nonprofit fictional citizen shall receive more than the average wage. This includes the directors, who should be working for things other than money. Also, all the government laws on graft and corruption shall be applicable to every nonprofit fictional Citizen.

254/ It shall not be thought wise for us to have groups of foreign people living in our land that are intent on keeping some condition in our land under control. This is because that group of foreigners will at times stop at nothing to keep us from prospering because their entire economic existence depends on it. So they will use whatever means possible to sabotage government efforts to help its people.

255/ There shall be no longer be any non-governmental American bar association, or American medical association, or American institute of architects, or any other trade association, regulating any professional occupation that is licensed by the government. All of these shall cease to exist with the inception of this constitution. They are too similar to the corrupt guilds that always exist for the primary reason of restricting competition in that industry and raising prices so that more money can be extracted from the people.

256/ All punitive fees of county government shall be paid to the general fund of the national government. This is so that

county government doesn't abuse its power to fine the people for departmental profit.

257/ Let it be said that the longest section in this constitution is about preventing corruption. This is because there are so many ways to corrupt a democracy. Also, it is hoped that this list of corrupt practices will be greatly supplemented by the Senate.

258/ Given how immensely profitable wars can be, future generations would be wise to read George Washington farewell address any time they are considering getting involved with some foreign war: "Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful must be impartial; [or] else it becomes the instrument of the very influence to be avoided, instead of a defense against it."

259/ Without extreme protections, government will invariably be run by thieves, particularly well-run foreign-backed thieves, because these people will fight like crazy to get the trillion dollar keys to our treasury.

260/ People shall be mindful of the Sudden crisis and overpriced right-now stuff scam.

261/ All bookkeeping shall be recorded live by the recorder system to reduce problems.

262/ After government steals a little, they will invariably get greedy and steal more... and more and more. At some point people will start being jailed because they didn't pay their government extortionists. There also tended to be people who stood up to the tyrants in government and these were frequently killed by the tyrants. And then, as greed inevitably drove still more abuses, the opposition increased and the tyrant frontman's side had to eliminate still more people. So government corruption commonly leads to murder and then a few hundred people and then a few thousand, unless the people speak up and take action. And this is a huge reason why we the people are armed and why we must always be armed.

263/ Where we see Byzantine, lengthy and expensive approval processes, that slowness and cost should be viewed as is prima facie evidence of corruption. For then the agency people then have the ability to charge bribes for expedited service, and also to act as a gateway for the sort of spread-out, gasoline-based America that favored their Mideast masters. Why did we ever need to downzone but to make our cities more spread out and gas hungry?

264/ Another symptom of corruption is when all the members of a political party all vote together and especially when they ostracize dissenters.

265/ Wherever government people use national secrecy as an excuse for disguised government books, this shall not be a valid excuse, and it shall be presumed that they have altered the financial books to hide theft, and all shall be punished accordingly.

266/ Where people are building common 1 to 4 unit buildings using common technology, the approval process for custom building shall only include a zoning and setback check to see if the building conforms to zoning and setbacks, and a lot line check, and an advisory check. This process is supposed to

only take no more than a day. Government is supposed to have all the data that gets checked already in the information system. So the recorder system is where the submission form data gets connected with the system data and the building permit is issued.

267/ Everyone elected to the Senate must study all the sections of this NR'20 and pass the anti-corruption test with a 100% score before they can serve in the Senate. After this, all Senators will be expected to obey all the rules of this NR'20.

268/ We shall always remember the words from Ayn Rand: "When you see that in order to produce, you need to obtain permission from men who produce nothing; when you see that money is flowing to those who deal, not in goods, but in favors; when you see that men get rich more easily by graft than by work, and your laws no longer protect you against them, but protect them against you... you may know that your society is doomed."

269/ Government shall no longer use unelected procurement officers, but instead, it shall now only use appropriately sized Senate juries for this decision.

270/ In America, we worship the spirit of openness in our government. It may easily be held to be felony misappropriation when government people spend money on secret programs, classified programs, programs that cannot be viewed or grasped, and spending that can't be documented and especially quantified.

271/ With regard to spending on classified things, the money spent shall be completely open. The enemy will be able to see our spending on weapons, it will just be the designs that are classified. We must do this for the sake of corruption prevention.

272/ No government agency should ever get a cut of the money going through the hands of separate children from their families, or to push for war, or to commit crimes, and other negative or destructive courses of action.

273/ In corrupt governments, universities, and churches, we find many unqualified people who have paid large sums of money to get their job. We also find pretty people, girlfriends (both female and male), who have paid for their position with sex. All of these people are the slaves of the Mafia that got them their job, despite being unqualified. The Mafia probably leads them into committing a string of crimes after committing fraud over their qualifications for their job, and then protects them from prosecution to ensure total loyalty to the Mafia. Thus the Mafia controls the government and many other institutions, and can force the public employee to remain quiet, or risk prosecution by the also-corrupt judiciary. Thus we realize that a huge percentage of our plum-job, long-term government workers are actually corrupt, having purchased their position.

274/ In a political or leadership context, there shall be no hugging, embracing or kissing. And there should be no Hollywood smiles. All of these things should be regarded as a way to cheat one's way into stealing some precious cred in the group mind.

275/ All government contracts over 1-year's wages shall be required to have bonding.

276/ Like it or not, all government bidders will be assigned one or more specialized government bidder liaison "engineers" who will make sure that the government's

physical and temporal specifications will be met by the bidder without either mass produced defects, or retarded output.

277/ First time bonded government bidders that are qualified real humans get an extra 2% over what bidders would normally get.

278/ Wherever we find 1 or 5 bidders, the bidding is probably rigged. Also, even where there are 50 bidders, the market might still be rigged. Government always needs to break down its jobs so that there are no less than 30 random bidders for every job. That is the sort of detail it needs for its work. And everything needs to be supplied as an output stream that is constantly inspected by Senate and the people."

279/ There shall be no more Government spending on alternative energy, CO2 elimination, or space travel. And aside from climate records, there shall be no money spent on climate change.

280/ Wherever government projects take many times as much as they should, it's probably corruption.

281/ The EU shall be regarded as just another corrupt layer of government that is now mostly unnecessary and has now become mostly a tool of Ishtar.

282/ Government people shall not be allowed to talk about how many jobs a project will create. This should be viewed as a trick for stealing more money.

283/ All government spending for any form of renovation on private property shall be prohibited without a 75% overmajority. All government spending for any form of renovation on Government property shall be prohibited without a 2:1 or 2/3rds overmajority.

284/ Corruption in government is a modality like concession in negotiation. A few cockroaches in the kitchen in the day tends to mean that the entire place is totally infested with cockroaches at night. Corrupt in one place tends to be corrupt throughout.

285/ No government division, agency, or workers shall be allowed to accept donations, especially donations from foreign governments, corporations, or zillionaires.

286/ Government shall not spend foreign aid money in chunks bigger than 200 years wages per year.

287/ Until now, most government corruption has come directly from an ancient union of foreigners using our government (and all the other governments) like robots for their own economically parasitic activities. There is also some independent corruption that is mostly from the type of scoundrel the foreign master corrupter works with, but most of the corruption is directly or indirectly from the ancient union of the poorest people on earth who have been around since before the time of the Egyptian pyramids.

288/ No bid contracts, and contracts that are not posted on the recorder system website for all to see shall always be presumed to be a corrupt.

289/ We must always be on guard for corruption relating to judicial leniency in regard to prison sentences. Where judges get paid to let criminals go. This is a huge thing in our legal system. And no individual or small group should ever have the power to throw out any conviction.

290/ Government and fictional citizen spending shall be clickable down to the names of the staff and live recorder system videos and images of what every payment bought as it was delivered.

291/ Not prosecuting obvious criminals for their crimes shall now be regarded as a type of sign of corruption. Where obvious criminals are released pre-trial. All the people involved shall be indicted for felony corruption for this act. Where government people or other powerful people intervene in the legal system, either to discourage investigation, arrest, prosecution, to influence court decisions, or call for early release, this shall be regarded as corruption.

292/ No judge or Senate jury smaller than 5 randomly drawn Senators shall have the right to overturn any felony conviction. Where there is a political element, or there is a non-citizen, the number of jurors shall not be smaller than 11. Where the convict is an organized crime person, or part of the global Muslim conspiracy, the jury shall not be smaller than 1,001 random Senators, as there is safety in numbers.

293/ It shall not be possible for the Senate to exempt certain industries or companies from government regulation or compliance. This shall always be regarded as corruption. Even calling for this shall be regarded as corruption. An example of this sort of corruption is how the McCarran–Ferguson Act of 1945 exempted the insurance industry from most federal regulation, including some antitrust laws.

294/ The council of science editors shall be shut down, and all of the people working for it and contributing to it shall be prohibited from working with similar bodies for life.

NR'21. LITTLE GROUPS GET LITTLE POWER

1/ Two cornerstone principle of broad democracy are:

a/ That it is easier to corrupt small groups than large groups.

b/ That it is easier to corrupt non-elected appointees than elected people.

x/ For these reasons, small groups and appointees shall not be given much power at all in our government, and never shall groups smaller than a Senate Sluice make any important decisions, or assemble any policy for the whole nation or for any county. Those calling for this sort of leveraged empowerment either directly or indirectly should generally be considered as Democides.

2/ This democracy shall never elect, or otherwise empower a single person or small group to handle anything but the smallest and most inconsequential matters. This democracy shall only use small groups to decide on matters that affect small groups, and matters concerning small amounts of money. For decisions affecting large groups, or large amounts of money, this government shall only rely on large groups. And for decisions affecting everyone, this government shall only use broad democracies.

3/ No position in government shall ever be indefinite, or for life, or inheritable. It shall be a capital offense for anyone to claim such a lifetime position, even if it is only for a tiny slice of the public's domain. Hopefully this will put an end to the frontmen (for they are always frontmen) that claim powers to do unreasonable and counter-intuitive things with the public purse — normally to the exclusive benefit of the Ishtarians that hoisted them up into power.

4/ Except for the Senate, the children, siblings, and parents of people who served in a long-term government positions shall always be disqualified from serving in the same position.

5/ Only people who were confirmed as Senators at least once

in their life may be appointed to a position of power in government, or oversee more than say 500 staff, or an annual budget exceeding say 500 year's wages. This number will probably be reduced over time.

6/ All government job openings shall be publicly announced for a reasonable time.

7/ There shall be no central hiring administrations for multiple government departments. Each administration shall hire its own people. The central hiring administration may however disqualify Government workers for good cause.

8/ All candidates shall be independently tested and evaluated by the Senate's testing administration.

9/ All government workers shall be subject to annual performance reviews, and comparison with the output and service levels of private sector peers. All government employees shall be subject to evaluation by the Senate and comments from the people. Those unelected Government workers that the people judge as exceptionally problematic should generally be terminated.

10/ Standards for pay and absenteeism in government employees shall be similar to those of the private sector. Government shall not exceed private sector pay levels by more than 10%. The maximum pay of Government employees shall generally be much lower than the pay in the private sector.

11/ Everyone in every level of government (including especially Senators, judges, and juries) must recuse themselves if they know the people they are either administering, prosecuting, judging, or jurying. This unless these people are famous and known by everyone. Failure to recuse oneself when judging people that one is well connected-to can be a felony where the situation is obviously conspiratorial in nature. The Senate shall establish detailed rules for establishing a yes/no line for what constitutes being connected to a person, a line that puts about 200 people inside the line (per person on average) and everyone else outside the line. If the person being judged or administered is known by all potential judges/administrators, then the least connected shall judge. Also, where people are popularly despised by one group, and a government person is high up in that group, they must recuse themselves. Failure to justly recuse oneself from judging shall be a crime. If the matter being judged involves felony charges, then failure to recuse shall be a felony.

12/ Homosexual Senators shall be required to recuse themselves and all matters related to children, education, upbringing, reproductive families, and homosexual rights.

13/ All prosecutors, judges, and jurors shall be required to be full citizens born in our nation that have graduated secondary school or passed the exam. Also, those serving in any of these roles shall not have:

a/ Anyone in their recent household with a felony conviction.

b/ Any siblings, children, or parents with a felony conviction.

14/ No Government directive, order, or instructions that compel the people to do a thing shall be valid and enforceable without a Senate vote. However this vote may compel enforcement by unelected Government workers.

15/ All non-elected Government workers shall be considered to be the programmable robots of the Senate. Non-elected Government workers shall not be allowed to act without

Senate instructions. Only Main-Senate sluices shall be allowed to make new laws or new interpretations of laws, or enforce laws in new ways. Non-elected people shall not have any authority to do this.

16/ Wherever non-elected people are vested with powers, these power must be clearly enumerated in detail by the Senate. Further, these powers shall be considered unconstitutional where they violate this constitution.

17/ Where fictional citizens and/or un-elected people in Government violate the constitutional rights of the people as enumerated herein: A simple majority vote of any randomly drawn Senate jury of 9 or more randomly drawn Senators shall be considered competent to halt that activity perhaps indefinitely. This until a properly sized Senate can rule to allow the resumption of the activity.

18/ Where the Senate violates this constitution, the constitutionality shall generally be challenged in the Over-Senate, and no payment of money shall be involved in the challenge to the constitutionality of the Senate law.

19/ When unelected government officials change the rules in such a way that the Senate must intervene, these usurping government workers may be charged with the crime of violating the civil rights of the people, a crime that may be a felony. Also, when un-elected people go off the script, and start making policy, this may easily be considered a violation of other people's civil rights. This rule is intended to make un-elected government workers fear making their own changes to government procedures without the Senate authorizing them.

NR'22. VOTER BIASES

1/ Always vote for the smartest candidate based on the ideas expressed in the election forum. If nobody is saying anything remarkable in the forum, and you don't have any opinion one way or the other, then you can use Senate test scores.

2/ The people are advised to vote against candidates that:

a/ Spend money getting elected.

b/ Are related to famous people.

c/ Have famous people campaigning for them. This slimy practice should be though to come straight out of the dirty tricks playbook for political parties.

d/ Present their non-democratic education as if it had any relevance to leadership. Those who excel in the education system should generally be thought of as excellent followers. Democracies should shun all non-democratic influence in its elections.

e/ That talk about their extra-democratic credentials. When we vote for candidates based on extra-democratic educational credentials, we give our non-elected educational establishment the power to corrupt our democracy. The people are strongly advised to not to respect educational credentials. Try to vote against candidates that talk about extra-democratic educational credentials. To do otherwise is to hand our universities a back door to our democracy.

f/ That talk about the other candidates. Whenever candidates are talking about each other, it is a very negative thing that drives good people away from public service and undermines democracy. Therefore, while talking about one's election opponents shall not be against the law, the people are

strongly advised to vote against candidates that are talking about the other candidates, all things being equal.

3/ We should not vote for candidates because of their sophisticated accent or verbal style. We should vote for the power of their ideas.

4/ When we give elevated status to the relatives and friends of great men, it is a step towards the evil of dynasty. For this reason, everyone should give a minor handicap to the relations of great men. Those that are great in themselves will easily overcome the minor handicap.

5/ Political parties, religions and other pre-packaged ideologies can be backdoors to democratic power. This Constitution advises the people to consider political party and strong church affiliation as a strongly negative factor.

6/ When we elect candidates because of how they stand on the issues, we won't have a democracy where our best and smartest are making our decisions for us. For this reason, campaigning should be more about being a smart and fair decision maker and pie slicer — and less about issues.

7/ This Constitution advises the people to vote against candidates that talk about the other candidates instead of what they want to do. It is quite important that we eliminate all downside from Senate service. And one of the big downsides is other people saying rotten things about you because you are their election opponent. So we will say this: If any Senate candidate is talking about the other candidate(s) each of us should consider them disqualified on that fact alone. And while this is not an official policy and enforced by government, it should be enforced by each of us. We do this because of how quickly it drives good people away from democratic service — leaving the leadership to pigs and gold diggers who don't mind the mudslinging and filth.

8/ This constitution stands opposed to long term debts of over 17 years. It also opposes credit card debt by making credit card and medical debt separate from real debt for real estate. So where people get in trouble with a credit card debt, or medical debt, this shall not have any bearing on their credit worthiness for real estate debt and business starting debt. Also, there shall also be no way for credit card or medical creditors to seize the assets of those who are in default. However, unpaid rent shall be thought a very apt and fair thing to use for deciding on credit-worthiness for real estate loans.

D — POLICE & JUSTICE

NR'23. POLICE STOPS, ARRESTS AND BOOKINGS

1/ Nobody shall be arrested or jailed without reasonable cause. Reasonable cause shall require sworn accusation by an identified and credible witness, or other credible evidence. The suspicions of officers, and the suspicious behaviors of the accused shall never be any grounds for arrest.

2/ Police may stop and detain any person that they reasonably suspect has committed, is committing or is about to commit a felony or a misdemeanor. However, this must be stated to the defendant and read into the live record at the time of the person is detained. Also, police shall not be allowed to arrest people for misdemeanors or less, or crimes of judicial procedure, unless police can't identify the person. Where police can identify the person, they must issue citations for all misdemeanors, and crimes of judicial procedure. Failure to disperse is never anything more than a minor misdemeanor.

3/ Government workers shall not be allowed to detain people (including detention by police) for more than 2-minutes without stating their reason and/or probable cause into the live video record, and this statement must come first, before any other communication. Time spent waiting for an ID shall not count. These days, police can easily carry around the entire law library with them, and they can easily search this library based on text search or AI search, or they can search based on a situation and subject. So these days, except in emergencies, we shall require that the police reference a reasonably similar section of the legal code relative to people's behavior when police approach the people. Now while the people are expected to record their conversations with government people, the recorder system is always monitoring everything that police officers say, and particularly when they start a conversation with the people. which always must be monitored by the recorder. Then the system sends

and email that they appeared in a recorder system recorded video accessed by a certain search key.

4/ Except in hectic or unruly situations, or when events are unfolding very fast, police shall be required to at least vaguely state their reason for arresting people, threatening to arrest people, detaining people, handcuffing people, frisking people, and ordering people to get out of their car. This shall be said to the person being ordered around and at the same time these words are read into the county recorder system's permanent live record. This is what we the free people of our nation require of our police departments that are of the people by the people and for the people. And all this video shall be open and public for scrutiny.

5/ The explaining of what people are arrested for shall be called "validating the arrest". Also, the officer may name some action of the arrested person, such as: "You punched that guy over there" instead of saying: "You are under arrest for assault". Either description shall work. And where the situation is hectic, officers may wait until everything is under control and the suspects are all cuffed and in the back of the patrol car before worrying about validating their arrest(s). When police fail to state a reason for an arrest within 1-hour, the courts shall be biased towards release on the grounds that the arrest was improper because it wasn't properly validated. Each time a police officer makes an arrest, they must openly declare this to the person being arrested and for the county recorder system. It is very important that people arrested for crimes be explained what the nature of their crime(s), including the time the crime occurred. Where people claim to have an alibi at their arrest, police must immediately review that alibi, so that the innocent are not punished. According to Blackstone's formula, It is ten times more important that the innocent not be punished, than the criminals be brought to justice.

6/ Police should be allowed considerable leeway with charges that are similar to the charges stated into the record, but they should not be allowed to arrest people on one type of charge, and convict them on an unrelated sort charge.

7/ To reduce waste to the public's time, and also to reduce police driving around, the first arrest check by prosecution shall occur in the field, before the arrested person is taken in to the police station.

8/ The Senate shall make a detailed list of What police can say to the people, the questions that may be asked, and the commands that can be made by police. Police shall not be allowed to ask questions or talk about things unrelated to the reason why a person was stopped.

9/ The Senate shall make a detailed list of the circumstances under which police nationwide are allowed to arrest people, detain people, ask people questions, handcuff people, frisk people, unholster firearm, point firearm, etc., and when they must issue a ticket, or a warning, or let people go. Police shall not arrest people for any ticket crimes, no matter how many tickets they have. Police shall not arrest people for infractions like jaywalking, littering, or trespassing in a public place that is privately owned unless they have been previously escorted out. The Senate shall clearly indicate which crimes people cannot be arrested for, and which must be dealt with via the court date system. Also the Senate shall make a list of crimes and conditions where vehicles may be

searched, and where police may order people in or out of their vehicles. Police should also be able to play these sections for incredulous citizens, so they comply voluntarily. Also, in general, people cannot be arrested or jailed pending trial for most vehicle violations and all forms of misdemeanor, except those which the Senate elects to arrest people for this sort of misdemeanor. Police must issue citations for misdemeanors. Also, no secondary crimes of judicial procedure shall be any justification for any arrest or holding someone. We do not want a system where police can hold and harass anyone they want whenever they want even if the person did nothing. This is the wrong way to do policing. Police officers with too high a ratio of unrealistic charges and other abuses must be fired.

10/ Where police name one crime at the arrest, they should not generally be able to change crimes unless a violent crime is revealed by their investigation.

11/ It shall be a crime for police threaten the people with arrest when they clearly don't have a grounds for an arrest. This sort of lying is not a thing of free men. It shall also not be allowed for police to intentionally violate the personal space of the people as a means of dominating them. Police officers must obey the normal personal space rules unless they're detaining or arresting people.

12/ Police shall be free to profile people based on foreign accent and foreign dress, and apparent foreign national origin.

13/ When people are arrested in situations with concerned people around, both the person being arrested and the other people around shall have the right to know what the arrest was for and where the person is being taken, and the identity of the arrested person if the arrested person wants to share this information. Except where it is impractical, everyone arrested shall have 5 minutes to exchange information and make plans with concerned people around them in front of the officers camera. People who are arrested shall have the right to exchange keys, wallets, electronic devices, and clothing articles with the people around them. These may however be searched by police for physical evidence, but not data evidence.

14/ Police cannot cuff without first saying that the person is under arrest, and they can't tackle people unless they refuse to present their hands for cuffing. Where people are arrested with their small children, if it's in the same community, the police must drop the children off with the coparent before the arrested can be taken to jail. Police cannot handcuff people who are not a threat to them, and don't seem, especially like they're going to run off, given the minor crime that they're accused of. Police shall not be allowed to arrest people who they plan to release almost immediately. There shall be no submission ceremonies where the people are arrested, handcuffed and released some minutes later.

15/ Where government workers put people in jail pending charges, they must make a statement at the time of what they have done in order to book them in the jail system. There must also be a final statement submitted within 6-hours, or the person arrested, or they must be released. Also, a Senate jury must initially agree to prosecute within 24-hours, or the person must be released. Police shall not arrest people for

minor offenses, where more than half of the people charged get no jail time for that crime.

16/ No police arrest paperwork shall be valid unless there is continuous arrest video recorded by the recorder's system. The existence of a complete arrest video record shall be considered a prerequisite for police to lock someone up. Police shall not be allowed to turn their video cameras off from the time they make contact with the suspect until the suspect is in a video monitored area such as the back of a police car, or a police station intake area, or transferred to another officer with his cameras on. Otherwise, all the evidence shall be void like evidence from an improper search, and the arrest must be thrown out and charges dropped. Also, where the arrest video is found to be incomplete (during the routine checks by the county recorder system) the suspect must be released prior to being moved from the police booking area to the jail.

17/ Once police have handcuffed a person (citizen or not), the person shall have the right to briefly communicate the people they came with and especially with witnesses to exchange contact information. Police cannot leave handcuffed people lying on the ground, unless there are others that must be handcuffed and arrested, or there are too many handcuffed people to control safely.

18/ All recordings of crimes and arrests, and all witnesses shall be admissible in court, and subject to subpoena.

19/ Police shall have access to the recorder's identity database to run all names and ID numbers, to verify claims of identity, citizenship, residency, address, employment, and residential ownership.

20/ No arrest that does not result in a conviction shall be allowed to result in any harm to the record of any person merely accused of a crime. Government, the court system, and DMV shall not take any action against a person, except reasonable pre-trial lockup without a conviction. No employer, and no government body shall be allowed to discriminate against people for merely being arrested or accused of any crime. However all employers shall have total freedom to discriminate against potential employees for even minor misdemeanor convictions. Convicts as a class, shall not be protected from discrimination in any way by government. This shall be considered an important aspect of their punishment. It shall also be considered vitally important for society to know who is a criminal and who is not.

21/ Where all charges are dropped, or people acquitted of all charges against them, all their legitimately acquired property held as evidence shall be returned to them forthwith, or the police department shall have to pay 5x damages on the value of those things, and still return those things. Where police are unable to return those things, they shall pay 10x.

22/ Unless there is an emergency situation or someone is being charged with a violent felony, or they have outstanding warrants, police must give a reasonable time for compliance with their lawful police orders. Also these commands must be lawful and they must be repeated a few times, and warning must be given before police can knock people down or drag a person out of their car, especially women and children and old people, and people that don't seem to understand what's going on. Our free nation shall not allow police to demand immediate compliance for trivial matters. Where police do not

allow sufficient time and then proceeded to act against the people for minor infractions and failure to immediately comply with police demands, there is something wrong with our society. When police arrest mostly peaceful people, these shall generally be allowed a couple minutes to get their head around the idea that they're being arrested. Where police rush situations and somebody gets shot or dies as a result of a police rushing the situation into violence, it may be possible to charge the police officers involved, or to fire them from policing for life.

23/ Those who bite police officers shall be considered as they used a knife and injured or tried to injure the officer. Those who spit in the face of police shall get 3-years in work camp. Those who spit on the body of police get 1-year in work camp.

24/ Police power shall only go to police officers that are sworn and that openly carry a firearm. Other people in government much as much as they would like to arrogate this power shall not have the power of police officers. We the people shall tolerate nothing less.

25/ Public & private pool & beach lifeguards shall never have any police powers at all. Lifeguards shall have no more police power than a common citizen. Lifeguards shall not have the power to issue citations, make arrests, detain people, demand identification, or to order people to leave some place, or to swim in this place or that place, or to cease some activity, or regulate the use of some waterway. The #1 purpose of lifeguards shall be to drag swimmers genuinely having trouble swimming out of the water. The #2 purpose of lifeguards is to honestly advise people of dangers, where these genuinely exist. The #3 purpose is to call police about glass on the beach and people who are disorderly on the beach, along with other violations. All lifeguards that attempt to exert power over the people on color of authority may be charged with a felony, even if they were granted these powers by their county Senate. We shall develop two sorts of lifeguarding drones. One rapidly flies out and throw a land-attached lifeline to tired swimmers, and the other flies around and monitors an area using computers to flag people in trouble. Also, during peak rescue days, there shall be remote monitoring, locating, and scrambling for the lifeguards on the scene. Where there are problems with alligators and sharks, the lifeguards shall be issued scoped, single rifles with specially designed tumbling bullets for these thick-hide creatures.

26/ Government shall not be allowed to employ any year-round, or career lifeguards, and all lifeguards must be paid by the hour for their seasonal services. The sole qualification for being a lifeguard shall be the national annual pre-season knowledge and physical ability test where the lifeguard must pass the knowledge test with a 100% score and demonstrates the ability to swim 750m out and 750m back in average ocean currents at a consistent speed. The lifeguarding staff shall not be allowed to institute any longer or more difficult physical qualifications than this as will always be their corrupt nature. The only training required of lifeguards is that they have a 100-hour certificate in lifeguarding, resuscitation, and CPR. No other certificate shall matter. We shall have paramedics. but our lifeguarding effort shall focus on one thing, getting people out of the water and

resuscitating them using the resuscitating equipment on the lifeguard's siren and flashing lights, sand-tire moped motorcycle. These mopeds will drive along the hard sand, and have a top speed of 50kph. These will use elephant foot kickstands. The rescue drones will be dispatched with a hanging break-away flotation devices for the drowning person to grab. They will also deploy a rope from shore for the person to get hauled in on. There shall be no more lifeguards cruising around on the roads. Lifeguards never have cars.

27/ Neither government, nor any company shall ever have any responsibility for people who die or are injured swimming in the ocean or any natural waterway or lake, or in any government swimming pool with or without lifeguards. Instead, government shall carefully regulate swimming licenses, so that people must get either a regular or advanced swimming license before they can do certain water activities like swimming in certain places or kayaking. Similarly, government shall have no liability for people walking, running, or driving vehicles, including cars, trucks, bicycles, motorcycles, scooters, skate boards and other vehicles on public property.

28/ When police arrest people off of public property (especially young females), they must put their siren on for 10 seconds, and the recorder's arrest maps must show an arrest in progress for 60-seconds before they may be driven away, or walked away. The system must text everyone within 200 meters that the police are arresting a female.

29/ Non-violent family members and traveling companions shall not be separated against their will in police cars. This shall go especially for parents and small children.

30/ Non-violent people who have been arrested shall be allowed to keep their phones with them in the police car and in the police station during booking and in pre-trial lock up.

31/ Police shall be allowed to arrest children as young as 6 for stealing things like candy bars and vandalizing upon clear evidence. Minors may be kept uncharged for up to 7-hours in a solitary confinement jail holding cell if they are under 10, and 14-hours if they are 10 or older.

32/ The only means for compelling a person to visit a police station shall be arrest, and the only way to compel appearance at court shall be a subpoena. Without one of these two, a person does not legally have to visit a police station or court. Also, when police ask people to voluntarily step outside of their home, or vehicle, or come to the police station, they must clearly state that they are making a request, and that the person is under no obligation to go.

33/ No person shall be held under arrest uncharged for more than 24 hours, except on the majority approval of a 3-man Sub-Senate jury, in which case they may be held for no more than 4-days without charges. Once we get the bugs worked out of our system. We will perhaps limit the time that a person can be held uncharged to perhaps 16-hours, or 12-hours, except, perhaps where lab work is required.

34/ All accused shall be considered innocent until proven guilty by due process of the law. Those who are in jail awaiting trial without any prior felony convictions shall not be deprived of their handheld communication devices provided these are less than 32cm diagonally. All transmissions by people in jail shall be via the jailhouse network, and all communications shall be monitored and all communication

shall be admissible in court. Everything people say to arresting police officers and their cams shall be admissible in court for criminal matters, however body language and pacing and facial expressions shall not be admissible. One wireless charging pad shall be provided by the jail for each person in jail awaiting trial. Convicts may however be deprived of all electronics. All jails shall completely jam all outside network coverage on their premises, except that the guards shall have the password. Unauthorized network access by inmates shall be a crime.

35/ No judicial system questioning, statements, or procedures shall occur unless recorded in high definition video and high quality audio with date and time stamp. Where these activities are occurring in the field, police body cams shall suffice. Where these activities are occurring in a building or vehicle, there shall be multiple high definition video cameras and high quality microphones.

36/ Except upon consent of a Senate jury of 5, no accused shall be interrogated/questioned for more than 4 hours in each 24 hours. Those under interrogation/ questioning shall not be:

a/ Deprived of food, water, or sleep.

b/ Deprived of medication, or drugs they are addicted to.

c/ Harmed in any way, or threatened in any way by extra-judicial police violence, or other extra-judicial violence.

d/ Subjected to bright lights, or loud sounds.

e/ Threatened with severe and generally baseless charges if they don't talk with police.

x/ If police do any of these thing during an interrogation or questioning session, all subsequent video of that questioning session shall be inadmissible.

37/ Those in charge of the justice system shall not be allowed to silence and sequester political people by jailing them. Each person held in jail awaiting trial shall have the right to send emails and video statements to the press. They shall also be allowed to give weekly jailhouse press conferences of 30 minutes, so long as at least one journalist registered for at least 4-years shows up to listen. Also, each politically active person convicted of a crime shall have a similar right to have a one 60-minute press conference upon their conviction. If at least 20 journalists show up at any prisoner press conference, then the time allowed shall be 3 hours long.

38/ Everyone shall have the right to consult the law library and legal experts to consider how to respond to charges against them.

39/ All foreigners that do not speak our language shall have the right to make arrest statements in their own language. Where foreigners speak a language or dialect that is used by more than 3-million people, they shall have the right to access a machine translation of our legal codes in their language.

40/ Both the national and county Senates shall compile and keep statistics and track contact information on all government workers/officers including police officers. These statistics shall be regularly data mined for problematic government workers of various sorts, such as:

a/ Officers with low arrest to conviction ratios.

b/ Officers with too many complaints from people with no convictions.

c/ Officers with too many claims of corruption.

41/ The details of crime rate statistic generation shall be established by the national Senate in an airtight and mostly unchanging way. It shall be a crime to falsify this data. All crime statistics shall be double checked by the Sub-Senate. Also, crime statistics shall count arrests and convictions, but not numbers on how many people were charged.

Government shall be prohibited from using or reporting any statistics or reports that were not wholly assembled by sitting Senators. No official Statistics shall be reported or used by Government unless they have been approved by the Senate.

42/ Where people are issued moving violations or other ticket violations by police, the system shall email them their complaint within 2 hours of the police officer issuing them the citation. They shall be allowed to either pay the ticket immediately upon receipt of the email, or send a written counter complaint, including video evidence to the adjudication system. However, they shall have up to 10 days to respond, then back-and-forth until the adjudication system judges.

43/ Where people can easily be arrested away from their home, they should be arrested away from their home.

44/ Whenever a person is jailed pre-trial, or after, they have a right to make several calls to notify their kin and friends. This does not diminish the punishment, while it protects the innocent.

45/ Where people have been shot with a firearm and where they are badly injured in other ways, they must be treated before they can be questioned by police.

46/ Where police stop drivers of privately owned vehicles, the driver must:

a/ Turn off the vehicle's ignition and put the key on the dash board.

b/ Turn off the music/ audio player.

c/ Roll down the driver's window fully when a police officer is present at the window. However, when there is medium to heavy precipitation, or it is below 10°C, or over 40°C, the window may be rolled down 5cm.

d/ Keep their hands in sight for the officer's safety.

e/ Hand police their physical driver's driving license or a photograph or photocopy of their driver's license with a legible license number, or state their license number to the police. This license shall be issued by the driver's county of residence. If the driver cannot provide their license number, the driver may give the police their national identity number (currently called a Social Security number), or their name and address. Then images associated with these names will come up on the officer's display. Also vehicle registration will no longer be required at all of drivers. All the registration information shall be indexed to the vehicle which will always have its international registration number printed on top of it in big embossed characters.

f/ Submit to being photographed front on for the purposes of backup identification for each stop, whether or not they are issued a ticket/violation notice.

g/ Where police make valid stops, everyone in the group/ private vehicle shall be required to ID in with the system.

The biggest parties and events that nobody misses are one of the best places for police to screen IDs for wanted felons.

There are also these randomly violent and dangerous large gangs of young people that everyone wants police to control.

So with regard to large groups, we want police getting everyone's ID, mostly for the safety of the people there.
h/ It is an unnecessary risk to the people that identity information is kept in their vehicles. Therefore there shall no longer be a requirement that the people keep vehicle registration papers, or insurance papers in their vehicle. Also, thanks to modern networks, this information is better verified by the police officer running the license number and the driver's license numbers. So this information shall be verified by police through their information system. Further, all tickets and other paperwork arising from the stop shall automatically go to the driver's must check email address. So it shall not longer necessary that the driver signs any police document such as a promise to appear. Instead, the officer tells the person being given a court date and the system also sends this person a number of reminder emails to their must check email address.

i/ Answer reasonable questions about alcohol and drug consumption if the driver has a license for these things.

j/ Take a breathalyzer test for alcohol if the police officer smells alcohol or the driver has a high use alcohol license.

k/ If the person genuinely appears to be under the influence of drugs, or if the person has a drug license, the officer may also require a drop of blood to do a field test for these drugs. If a drop of blood is required, police must be provided sealed sterile wipes, a sealed sterile spring-loaded finger pricker, and a sealed sterile test kit.

47/ Police shall determine the relationships of all passengers under age 18.

48/ To reduce crime, police have broad powers to stop and identify people who are outside and active when most people are sleeping or a place is deserted, such as Sunday morning in a commercial area, or between the hours of 10 pm and 7 am.

49/ Police shall not be allowed to go door-to-door checking people's identity, except in the immediate vicinity of a recent violent crime and even casual he went that way witnesses.

50/ Whenever police make a stop, they are supposed to make sure that all doors can be opened from the inside of the vehicle. Police can also do this check at any fueling or charging station.

51/ The police officers with the long-tail lowest conviction/arrest ratio should be fired.

52/ Police officers are not supposed to exhibit any feelings of domination when they arrest people. This should never be visible on the video record.

53/ Except when there is another emergency call, police must file their arrest reports immediately after they transfer the arrested person to the jail, and before they can leave the jail. If the arresting officer leaves the jail before filing a report on his arrests, then the arrested people shall be immediately released and given a ride back to anywhere in the community. All booking jails shall have booths for police to write out their reports and mark videos and other evidence. Once the report has been filed, the officer can leave the jail. Once the report has been filed, a Senate jury is supposed to get to it in 1 hour or less. The Senate jury will read the officer's statement, and the witness statements that the body cam recorded, and then talk with the accused, and then decide to charge or not. Thus being arrested is a thing that

only takes a couple of hours, and we do this to improve the justice system. We also reduce the power of police officers to harass people with baseless arrests when we shorten the arrest procedure. Also, charges by police will tend to lean more towards fact and accuracy when they're made immediately after arrest than if they are made after some delay and time for preparation.

54/ The decision to charge people with non-felonies can be shopped out to other randomly assigned Senate juries from other parts of the nation on jury duty. The ability to get to arrested people in 1 hour from the police report should be considered more important to a properly functioning justice system than using a Senate jury of that jurisdiction. Also, for initial charges and charges related to minor infractions, the statements should all be by voice to text with keyboard editing/writing and no time limits. The juries don't see an image of the parties, or their names, or hear their voice but all communication is via text so that justice is blind until the lights come on at the end and everyone makes their attestations for their side of the court proceeding.

55/ Where we have biases or injustices in our justice system, we can be sure that there will be somebody on the other side, saying look at this injustice, look at this terrible democracy, as people frequently said about our old 1789 constitution. This frequently becomes justification for injustice in a different way to make up for it. So the best policy for everyone is: justice and Isonomy or equal•law, or equal protection for all citizens. Also the rights expressed herein are the rights of the citizens of our nation, and they are not frequently applicable to non-citizens. Also the rights herein are especially not for foreigners that have evaded our border barriers to illegally enter our great nation. Also, those that cannot complete secondary school or the secondary school test, these people shall have no right to vote because they are not competent to vote. They also cannot have guns while they are young. Also, the convicted felons shall be treated differently. But within each group there is supposed to be equality by the government system.

56/ When an arrest comes to no conviction or no filing of charges, the arrest gets recorded as an: "Invalid Arrest".

57/ Where police do not arrest people, their possessions cannot be "arrested" or kept by police.

58/ When police ask people for their identity information, the people shall not have the right to say no, or ask why. They must provide identity information. However, beyond this, police must say: "you are being detained" or "I am detaining you" along with the reason why the police officer is detaining the person. If police do not say both that the person is being detained and why they are being detained into the live record, the people shall be free to walk away. Furthermore, if people ask police officers if they are being detained, and why they are being detained, the police officer must answer these question immediately without changing the subject or asking another question. However, the people may not ask if they are being detained repeatedly as a means of preventing police from communicating with them. Also, people who don't provide police with National government issued ID documents, or their number or name and address, these people are subject to arrest. If they're inside of a vehicle, and refuse to identify themselves, they are subject to having the

window broken to remove them so they can be arrested. However, if people are in their homes, police don't have the right to come to people's homes and to ask for their identity information, unless they have either a warrant, or probable cause that a felony has been committed and also that the person they are looking for is at the address they are visiting. And this felony must not be a crime of judicial procedure.

59/ Where police arrest people, they must tell the person that they are under arrest, and that they must present their hands for cuffing before a police are able to grab the person's wrists/ arms. Also, police must grab the person's arms and unsuccessfully attempt to cuff them before they can knock the person down. Forceable arrests may only be used after the arrest becomes a non-complaint arrest.

60/ Where people are arrested:

a/ They shall have a right to hand their electronics, wallet, and credit cards money to their family and associates before they're being arrested, unless they have been violent, or resisted their own arrest.

b/ They cannot be put in unmarked police cars.

c/ The address and contact information of the place where they are being taken to must be given to all associates of the arrested person, as well as all curious bystanders that ask.

d/ And they are the caretakers of others, such as children or elders, they must be given time and means to contact other people and hand off the people or animals they're taking care of. Arrested people shall also be given the opportunity to pay their hospitality business bills, if this is applicable. Police shall also be required to help move and lock up the vehicle of Arrested people, if any.

61/ If police have a warrant, they can legally go to a door and order the people on the warrant to come out. Then if they don't, police can enter the premises and seize the person that is the subject of their search warrant. Police can also order people to step out of their vehicles for any reasonable stated cause. However, police can't order people to stay in their vehicles or stay in their homes or other locations.

62/ Where people refuse to comply with their own arrest, the penalty shall be a penalty multiplier upon conviction and this shall not be a separate crime. Also, when people are being arrested the officers are supposed to state that they will be subject to penalty multipliers upon conviction.

63/ The Senate shall make a list of offenses that people can be arrested for, and which offenses must be ticketed.

64/ Police shall no longer need probable cause to stop people to ID them.

65/ It shall be a felony for police to plant evidence. In other words the police not only lose their job for planting evidence, but they shall also be sent to prison for this.

66/ Free to go also means free to stay too, with regard to the police.

67/ Until people have been arrested, they shall have all of their rights. Police can't order people to spit out their chewing gum or to stop using their phone for either recording or talking to another person unless they are being put under arrest. This creates too much of a distraction and logic loop for some people. Besides, this is an overreach. The Senate shall make a list of all sorts of possible police overreaches like this.

68/ Where police are outside their vehicles in traffic and they want to stop cars, they must wear a police uniform along with

a helmet with a spinning police light and hold a PULL OVER sign in 20cm text. Absent these three things, police shall not have the authority to pull people over when they are on foot. The light has a visor in front.

69/ Where people cooperate with their own arrest, they shall have the right to collect their valuables when they're being arrested, and to watch the officers lock up their vehicle and their premises when they're being arrested, and also to take along their wallet and phone and other valuables. People under arrest shall also be allowed to leave their keys for pickup by any person with ID.

70/ Where people are filming police officers that have stopped them, or other drivers that are driving recklessly or dangerously, police shall not be allowed to charge them with holding a phone while operating a vehicle. This recording shall be thought to be more important than the slight loss in safety that occurs when drivers are using their phone while driving.

71/ Where police officers write tickets, the hearings dates and time shall be scheduled by the system at that time. People can go in earlier if they wish for all matters related to driving violations. They can also reschedule before.

72/ Police shall not have the right to search some premises because somebody seems to have shot into the premises.

73/ When police detain people, they must diligently pursue a course of action and investigation that will confirm or deny their suspicions.

74/ Police have no power to order people out of their premises unless they either have an arrest warrant, or they are going to arrest them immediately. They don't have the power to order people out to talk to them.

75/ Where people put their hands behind their back for cuffing, the officers is not allowed to knock them down or restrain them for handcuffing.

76/ There shall be no incentives for police to arrest people for one kind of crime or another kind of crime.

77/ Regarding people who are arrested from bed or in the shower or swimming pool when they don't have their clothes on. These all have the right to put clothes before being taken off to jail. Arrested people also have the right to get a jacket a cap and shoes if these things are at their current location. Also women have shall have the right to feminine menstrual hygiene products while in the judicial system, these must be provided to them. Arrested mothers with kids under age 2 have the right to bring their kids with them.

78/ Police can't arrest or prosecute without a sworn affidavit from a credible person.

79/ the police data system shall have information on people who are a mentally challenged and they need to back down more with these people because they're very often not going to be able to just drive them into submission.

80/ Police must stay 80cm away unless they have a reason to get closer that they must articulate into the live record either at the time, or just after if the situation gets heated.

81/ Police may come out and investigate people based on anonymous tips however, there shall be no arrests, or charges, or child removals, or search warrants, or police forcing their way in without a warrant, based on anonymous tips.

82/ Police departments and CPS shall not be allowed to work

with the same judges and juries for obtaining search warrant and other sorts of warrants.

83/ Where police are attempting to arrest a suspects, (particularly illegal aliens and people with felony warrants), and other third parties intentionally get in the way, these way-blockers may be charged with interfering with an arrest.

84/ The national Senate shall make a nationwide master list indicating which offense people can be arrested for, and which offenses people will only get a citation for. Also which offenses can be ticketed/cited and which cannot.

NR'24. IDENTITY VERIFICATION BY POLICE / RECORDER

1/ Today we live in an era where all police have cameras and facial recognition technology would not be hard to run on top, authorized or not. Today, the benefit of not showing officers one's identity documents when asked gives only a tiny and easy to overcome benefit to the cause of privacy. Both big brother and little brother can easily surveil people this way already. So we might as well allow police to run the identity of a reasonable number of people each day. And likewise with vehicle license plates. This will also help us to get more out of our police departments and our police officers. Besides, people refusing to identify themselves to police is the domain of criminals and illegal aliens. Therefore, we shall say that everyone shall be required to prove identity to police upon request up to a Senate determined number of checks per hour per officer. The people may identify themselves either by handing the police officer their government issued identity card, or giving police their ID number when police make an in-person request. Also, police shall not be allowed to delay the public for more than 10-minutes at any domestic ID checkpoint without letting the backed up people pass.

2/ In order to protect the people from each other and from illegal foreign aliens, we shall require that everyone must show their official government identity or ID documents to do any of the following:

a/ To vote. Showing official identity documents to vote shall be regarded as the head-and-shoulders most important place where government must verify identity. We can't very well allow felons, high-school drop-outs, and non-citizens to vote in our elections can we?

b/ To take the objective tests that we use to verify. professional and academic competency.

c/ To access the financial system, and to buy, sell, or lease, finance, or encumber, real estate

d/ To obtain employment or create a valid recorded tenancy agreement, or valid recorded sub-tenancy agreement.

e/ To rent a nightly rental, or vehicle.

f/ To travel on an airline, and to make sure that the person is not on a terrorist or problem passenger watch list.

g/ To get health treatment, receive prescription drugs.

h/ Whenever ever asked by a police. This is because to do otherwise favors illegal aliens, and criminals.

i/ To vote. Showing ID to vote deserves multiple mentions, so that all traces of this enemy mind virus are purged from democracy in our nation and worldwide. Everyone must show their genuine Government issued identity documents to vote in any election, be it a Government election or a fictional citizen election. Also, when people show fake ID information

they shall be guilty of both identity fraud, and election fraud per count.

3/ On one hand this constitution takes a step towards more police power when it requires that people must provide ID information to police when personally asked by the officer as called for herein above. However on the other hand, we will take a step towards less police power when we say that during daytime hours, police shall no longer be allowed to ask questions of the people, including especially what they are doing, where they have been, where they are going, unless the officers states a probable cause for asking into the police video record. From now on, such unreasonable questions by police shall be considered a violation of the people's right to remain silent. Also, police may still freely ask people a reasonable number of questions in the following situations:

a/ While entering the nation.

b/ At night (from sunrise to sunset).

c/ On holidays and other days when places are largely abandoned

d/ In the vicinity of where a crime has recently occurred.

e/ People near and leaving the vicinity of where a crime has recently occurred. However, no driving violation of any sort shall ever give police any right to ask questions of the people. We would be foolish to incentivize police by allowing the issuance of a moving violation to be an excuse for police to question people.

4/ It should also be noted that police asking people what they are doing, or where they came from, or where they are going is a thing of police states and not governments of the people, by the people, and for the people.

5/ Those who can neither provide government ID documents, or a government ID number, or a foreign passport card, or a name and address, may be arrested for the crime of not proving identity to police when required. Thus, people (and especially criminal fugitives and illegal migrants) who cannot or will not prove identity to police shall generally be arrested.

6/ Those who cannot prove their identity to police, shall not have the right to stay out of lock-up pending trial. For if police don't know who a person actually is, how can we trust their promise to appear at their trial? Also, how can we be sure they are not fugitive felons? No, at the start of this constitution everyone gets identified and the people who cannot be identified go into lockup until they can identify themselves.

7/ All ID cards shall have a QR OR barcode to automate the pulling up of each person's information, and their police record, if any. Also, the police system shall be able to quickly send people emails charging them with various sorts of offenses, and giving them trial dates.

8/ When police run someone's ID, they will hold the ID up to the camera on their chest for a moment. The ID app on the officer's phone/display then brings up an ID page which is saved with date, time, and location. Also, there shall be a few officer and/or computer-selected images from the time of the encounter. The officer may search for more information about the person, or issue a ticket, or warn the person, or arrest them. Also, when officers run someone's ID, they can look at some of the person's confidential police facebook with their mugshots, and the evidence images, and convictions.

9/ All mugshots shall be identical to our voting images, so there will not be any no harm if the mug shots get out. All

government photos shall be photo bursts. The subject looks right, then they look left, then they look forward. The computer auto-edits the video into a high-resolution, pauseable pan GIF that uses 5 different camera heights. The head must be completely uncovered for ID photos, mug shots and verification of identity.

10/ Everyone shall have at least 3-minutes to find their ID card or bar code, or to furnish their ID information to police when police request and accept the information. People who don't provide either their ID in one form or another to police within 3-minutes of when the police ask, may be fined a day's wages.

11/ If a ticket is issued, it shall go to the must check email address of each person, and it shall come within 30-minutes of the meeting with the officer, unless the officer is called on for an emergency. It is important for police harmony that people not know whether they are merely being ID checked, or whether they are being cited until the officers have left.

12/ Because all police interactions will be on video, those who can provide their identity to police shall no longer be required to sign any acknowledgement, or any promise to appear. They only have to be given a police officer business card and a verbal notice with the police officer reading the searchable notice number into the live record. Then the electronic ticket shall be sent to the accused person's must check email address. Also, we shall say that nothing that police get people sign shall be valid in court. In other words, the rules of police service shall now similar to the rules for money-court process-servers under the old system. Recipients will have no right to refuse service. It shall be considered served anyway once delivered to the person's must check email address.

13/ It shall be a felony to lie about your identity to police, government workers and financial service providers. It may be a felony to lie about your identity to employers and landlords, including hotels. It shall not be a crime to lie about your identity on guest books, subscriptions and other inconsequential things.

14/ Except in emergencies, or complaints, when government people go to a person's house, they must notify them via their must-check email address 5-weeks in advance. Whenever anybody from the government begins talking to the people, they must be wearing a properly numbered Government uniform with big numbers front and back. and their chest-cam video stream must be on.

15/ Everyone in government exercising power over the people shall be expected to stick to a Senate approved script as much as practical when they initiate contact with the people. Normally these scripts shall start with the police officer saying either "Hi, we need your ID." or "Hi, i'm officer Jones. NPD1234-5679" (with most numbers unassigned). All government workers and especially all police officers with police powers shall have a unique number and a separate category letter. When this number is queried, the query response shall show a couple photographs of the person, their role in government, their special government powers, and if they are currently serving a warrant. This warrant status changes automatically when the search/arrest siren button is pressed. So neighbors and bystanders can search any Government uniform number and see what they are on

an official call. We do this make police behave better, and also to prevent raids by fake police.

16/ For all police raids search warrants and arrest warrants:

a/ All police must wear the appropriate police uniform.

b/ There must be at least one marked police car. However, this may show up at the last second.

c/ Police must shout police police police repeatedly when they enter a premises.

d/ Police must activate the police car siren for 10 seconds, just as the search crew starts to make their first blow to break a door down, or just as someone opens the door.

e/ Where police do not wear proper police uniforms, or where they fail to all repeatedly cry police upon entering, or where they improperly enter without sirens, or where they fail to have a police squad car outside with flashing lights on, and where police get shot by the occupants of the premises, the occupant shall have the right to say that he thought it was burglars in his house and he acted in self defense.

17/ When an ID is checked, a bookmarks is automatically created and an official message is sent to the person who was ID checked. Body cam links are also provided. It shall be thought best for the people and the system if neither side says anything except "We need your ID", or "you want ID?", or "here" or "Thank you" or "sure". We as a nation don't want this to be evolved into an excuse for daily 1-question police interviews of everyone. In fact, its even better if uniformed police at first say nothing and just make grasping motions with their thumb and forefingers to people. Then the people are supposed to hand over their IDs and say nothing. Then the police say thanks and the person checked doesn't have to say anything.

18/ Normal people with jobs, and people that are not night owls should not be getting their ID checked by police more often than once every year or or one year in 5. However in the first couple years of this constitution, due to the immigration crisis, we will have higher rates of ID checking in our nation.

19/ Government ID documents shall list the biological sex of the person, and any genders and special pronouns the person has ever listed. However all such gender identities shall be forever, like with name changes, tattoos, and felony convictions. Also, all gender information shall be public forever.

20/ All driver's licenses valid nationwide. Physical identity documents, such as birth certificates, driver's licenses, and passports may be used, but due to ubiquitous internet, they shall no longer be required for police identification. People may also use any of the following methods to identify themselves via the government's electronic version of their identity documentation:

a/ ID document numbers, such as driver's license numbers and passport numbers.

b/ Name and physical address.

c/ Name and must check email address.

d/ Biometrics such as finger prints, or eye-scans.

21/ It is anticipated that physical identity documents will remain the fastest and most convenient method of identifying oneself in most cases. However the system must allow the other methods to be used.

22/ Those who cannot identify themselves, and cannot be

identified, who have a foreign accent shall be presumed to be illegal aliens. Those who speak the language shall be presumed to be fugitives from justice. Every person who cannot identify themselves to police shall be subject to arrest and indefinite detention by police until they can identify themselves. Further, there shall be no right to pre-trial release for people who cannot identify themselves. However everyone arrested for failure to identify themselves shall be allowed up to 4 hours of internet and phone access daily to contact others to get their identity documents bought in. And after 3-days in lockup, they get a trip out to where their ID.

23/ It shall not be a crime to refuse to identify oneself. It's just that once a person has been arrested, they may be held in custody until they identify themselves. This is because people who refuse to identify themselves must be presumed to be criminals or illegal aliens. It is also because police can't function effectively in a society where people can simply refuse to identify themselves. Besides, simply by talking to a police officer, each person's face is on the officer's body cam and can be identified using face recognition tech.

24/ Police shall not ask for a person's Social Security number, or passwords, or other confidential information as the Senate determines.

25/ With regard to vehicle registration and proof of insurance, these shall be accessed via the drivers license number, or the vehicle license plate number.

26/ Foreigners presenting fraudulent identity documents to our nation's police and border security people shall spend 10-years in work camp upon conviction. This shall include both forged documents and other people's identity documents.

27/ Homeless people must have that fact displayed on their ID. All homeless people must have their mail box at a police station. People staying in hotels shall not be considered homeless. Police shall see when they run a persons records whether they are on public assistance, or they've been on public assistance in the past, their educational level, their convictions, and the vehicles they own or owned.

28/ Once a person has been identified, police are not supposed to be constantly identifying them and this might be considered to be a form of harassment after a few times, or where there is obvious recognition of the person being ID checked.

29/ We shall learn from the slaughter of the Christians of Lebanon by the unacceptably intolerant Muslims of that nation. No identity card shall indicate race or religion. It is too easy for this information to be used in staging a genocide.

30/ Where a complaint is made to police by one person about another, both shall be ID verified and checked by the recorder system's computer system for reliability. This shall be done before police act on those charges.

31/ Police shall have a face id system on their chest cam. This will play on a visor display and say things into the cop's earpiece like "felon" or "outstanding warrants", or "Wanted by Border Patrol", or "missing child" while it flashes a green dot over the person.

32/ Nobody shall ever be forced to be a witness to a crime, or to give their ID after witnessing a crime. Police shall not force witnesses to give their identity, or to give statements, or to wait around for the convenience of officers. Police shall be prohibited from holding and arresting apparent witnesses and

victims, and arresting witnesses shall get police fired on the first offense.

33/ Government shall only be allowed to turn off ID and financial functions of ID when people are non-citizen overstay, or there is a court order. With regard to citizens, only the courts can turn off ID and financial functions after a felony conviction, and/or issuance of a felony arrest warrant for cause. Everyone who is incarcerated shall have their money turned off.

34/ Under the new system, it shall be very difficult for people to get money from the system for police misconduct and abuse. People get apologies, and they get their medical bills paid, but they don't get money from the police department or government when they suffer police abuse, or they get accidentally shot.

35/ Where police officers cause extreme liability to the police force, the police officer must be investigated to see if they're working with the people that they are abusing so that they can get money from the system. Where this is discovered, the police officer(s) and their accomplices shall be imprisoned and get triple penalties for fraud.

36/ Police should use drones instead of high-speed chases.

37/ When officers leave a location, they shall have no power to command that people stay in that location. Everyone shall be free to go.

38/ When people are locked up in jail and then released, all their property must be returned, all of it unless it belongs to other identified people

39/ Where people are stopped for driving violations, in general, the officer shall have 15 minutes to cite them, arrest them, or let them go.

40/ It shall no longer be necessary to have ID or driver's license on your person, however, you must know your name, address, and drivers license number, so officers can verify your identity by your photograph in the system. With regard to vehicle registration and vehicle proof of insurance, these shall be accessed by police via the drivers license number, or the vehicle license plate number. The recorder system shall also match people with addresses for police with regard to ownership and tenancy and restraining orders.

41/ Where people don't provide their ID within with four reasonably spaced requests by police they can be arrested and held until they can verify identity. If they then refuse to get out of their car, upon three requests by police and present their handcuffs present their hands for cuffing, they shall then be subject to 20% higher penalties upon conviction. Private security guards shall have no right or power to demand that people share their ID with them.

42/ Where people are being detained, or arrested, or handcuffed, police must give some explanation as to why on the spot. Also, when police detain people, they must accuse specific people and they can't detain a large group of people where only one or a couple of the people is a suspect. However, police can block doors and establish a perimeter and then verify identity of everyone when they leave, where one of the people in the group is reasonably suspected of a crime.

43/ Police cannot cuff people without saying that the person is under arrest, and unless the suspect is wanted or being arrested for a felony offense, police they can't tackle people

unless they refuse to present their hands for cuffing

44/ Every person collecting money from the government must go in once a year to the recorder system and identify themselves once in each year. If they're bedridden or ill, then the recorder system shall go to them. If the recorder system ever cannot verify identity, the the government money shall be stopped.

45/ The people shall have the right to know the worker number of all government workers (at all levels). They shall also have the ability to make complaints about government workers by their clearly displayed worker number. Those Government workers who fail to display their government ID numbers should be presumed to be up to no good and at least quickly fired.

There shall be no complaints about the police department shall be filed with the police department. They all shall be filed with the recorder system. And this shall be the model for the entire government.

46/ Except in emergencies, all government workers (including police) and everyone else in a position of power over another person must identify themselves and truthfully explain what they are doing and why they are exercising their power at the time they are exercising their power. This shall apply to everyone contacting others on official business, or color of official business. It shall also apply to everyone contacted or stopped before the contacting person (or police officer) can ask for anything other than the person's identity documentation.

47/ All government workers and especially all police officers shall have a confidential compliance webpage, where complaints are investigated by the Sub-Senate.

48/ There is a very long history of government workers worldwide abusing their people, while it is quite hard to find examples of the people abusing government workers for no reason. Therefore, we shall err on the side of empowering the people over empowering the people hired by the people's government,

49/ Under the law, people wearing a hide-jobs shall be treated the same as people wearing masks. Also, there shall be no penalty for exposing people's faces when they have hidden them. This shall no longer be considered a form of assault unless excessive force was used to unmask the person.

50/ We shall have both real identity cards and virtual identity accounts. In fact we shall have a couple of each because it costs practically nothing and this makes identity theft and forgery much harder to pull off:

a/ Virtual identity is a number at the county recorder system which returns a webpage showing the person's face that corresponds to that ID number. The virtual ID has several different levels of access and the account holder decides on which levels of access he will grant to which other parties. Most vendors, for example will not even know the name of the person they will ID verify, but only verify that the picture matches on the virtual account matches the person in front of them. Fewer vendors (such as banks) will have access to the name, and still fewer will have access to the person's address, and fewest will have access to the person's bank and healthcare info.

b/ The person corresponding to the ID is automatically

notified of their ID use and who is asking for the information. c/ Because of the use notification aspect of virtual identity, it makes identity theft/fraud much harder to pull off, particularly with regard to multiple account access. Also, the counterparty identity aspect of the system makes it much easier to catch fraudsters.

d/ The system can automate doorman functions, by comparing the face on the virtual ID, with the camera that the person is standing in front of. Verification of ID through double doors will be possible along with the elimination of doorman and membership verifiers at places like gyms, and stores that only allow members. This sort of store will proliferate in neighborhoods prone to shoplifting.

e/ Escape prisoners, and people with arrest warrants can be hobbled much more easily in world that uses virtual IDs.

x/ The Orwellian aspects of the ID system can be eliminated with constitutional prohibitions against turning people's IDs off, in the same way we prohibit people's accounts from being turned off without a criminal conviction.

51/ This constitution does not guarantee the right of the people to go around in public with their head or face covered without a good reason such as icy cold weather or anonymously buying of electronic communication equipment. This shall include all forms of religious head coverings, and especially Islamic "hide-job" head coverings for women.

Except around electronics stores, it shall never be a crime to remove someone's face coverings when it is disguising them. Face coverings may be removed from anybody at any time without penalty. It may be done to men and it may be done to women by either sex. The only place where it may not be done is in a store that sells electronic communication equipment and in the area around the store and when people are coming and going from that store. Also, when people harm others for removing face coverings, this shall be considered as a completely unprovoked act and the rights of self defense shall apply only to the person doing the face covering removal and not to the party with the face covering.

52/ People wearing head coverings when its hot, or wearing them while going around looking into windows, or yards, or going door to door, or hiding somewhere: or when people are extremely drunk in public, yelling, singing loudly, sleeping along the public way. People doing these activities and other similar activities shall be required to show themselves and show their identity if it is checked by police. This is an important part of both deterring crime and catching crooks.

53/ From now on, the English term "HIDE-JOB" shall include all forms of hijab, burka, and all other sorts of head coverings and criminal disguise clothing. Wherever police encounter people wearing any form of hide-job, or Islamic clothing, or a mask in public, they are supposed to photograph the person and their disguise and then demand that they uncover their head for a photograph that will be posted on the internet for all to see. Also, where police encounter people wearing Hide jobs and other Islamic clothing they shall be required to confiscate this and if the person has insufficient clothing, they shall be kept in Jail until they can order or obtain clothing.

It shall be the official policy of our nation that hide-jobs:

a/ Encourage battery against women who do not submit to wearing them.

b/ Hide battery of women.

c/ Act as a form of slavery and subjugation of women.
d/ Make trafficking women much easier.
e/ Are terribly harmful to the cause of women's freedom.
f/ Work very well for bank robbers and other robbers.
x/ Therefore, hide-jobs shall be seen as a symbol or emblem of crime and slavery and particularly women's enslavement and subjugation. And because of this, all hide jobs and islamic clothing shall be entirely banned in our nation, and all lands of

54/ From now on, all forms of Hide-job, face coverings, face veiling, and super baggy clothing shall be prohibited in our nation, even in weddings and funerals and all other events. This, on the grounds that the coverings are a crime problem. for both thieving women as well as men and boys pretending to be a woman by wearing hide-job coverings. Hide-jobs shall also be prohibited because they greatly lower the status of females. No head coverings at all shall be worn by people in our nation, including travelers in the international sections of our nation's airports or aircraft transiting in our nation, or any nation of free people who emulate our constitution.

55/ All the women who ever appeared in public wearing an Arab hide-job may be deported along with their family. As is typical herein, the deportation process includes first being asked to wrap-up their affairs in our nation and then to leave. If they fail to leave by the required date, they shall be arrested and sent to either a work camp or a deportation camp such as exist in Mexas, Southern Argentina, Ceuta, Botswana, Puerto Rico, Solomon islands, or other locations perhaps. They shall then work in this place until they can repay the cost of their deportation.

56/ Police are supposed to focus on people wearing masks and hide-jobs. They are supposed to ID these people in public by forcing them to remove their head coverings.

57/ The penalty for shooting or killing a person wearing a mask or hide-job shall always be 1/2-off, at least, right from the start of the calculation right from the start. If they are in a mask touching your house it is 1/2-off again, And if it is at night, it is half off again for strangers. This except on Halloween night. Halloween shall also be abuse the Koran day, where many of our people gather to burn and defile Korans. And this is so we burn in the collective mind the idea that Islam is a devilish enslaving force that runs opposed to all the freedoms we hold dear as Americans.

58/ Where people take and withhold other peoples identity documentation, it doesn't matter the conditions that they took the ID under, or which they keep these ID documents under. The ID must be returned. Also where ID is held illegally, the people illegally holding the documents should be subject to criminal charges and fine by government.

NR'25. POLICE SEARCHES

1/ We shall echo the great words of the fourth amendment to the 1789 US Constitution. "The right of the people to be secure in their persons, houses, papers and effects, against unreasonable, searches, and seizures, shall not be violated, and no warrants shall be issued, except upon probable cause, supported by oath, or affirmation, and particularly describing the place to be searched in the persons or things to be seized."

2/ The protective rights of the people under this constitution, against unreasonable search and seizure shall be a birthright that only belongs to citizens, and it shall not necessarily apply to non-citizens, including immigrants. The right to associate in large numbers is also not guaranteed to foreign born people under this constitution. The bodies and premises of illegal aliens and people who overstayed their permission to be our nation may be freely searched without a warrant. It should be very easy for police to get a search warrant at that premises to look for an illegal alien registered at a given address.

3/ The right to freedom from unreasonable searches by government, and especially the seizure of valuable property by government people, like so many rights herein, shall be considered an inalienable right, meaning that it cannot be sold or given away, except in the context of:

a/ Airport security.

b/ Employment around easy to steal valuable items and data.

c/ Search warrants for a valid reason, especially people near people who have been murdered, and people witnessed or recorded stealing something away.

4/ Everyone leaving a national border zone crossing shall be subject to customs searches looking for trafficked humans and other trafficked things. Where people fly into our country nation, their bags and pockets and clothing shall be subject to inspection upon their arrival. Where people travel between counties in automobiles and trucks, those vehicles shall be subject to inspection for illegal aliens, abducted people, and people wanted by the police.

5/ One of the conditions of foreigners being allowed to visit and immigrate to our nation, shall be thought an automatic waiver of the right to freedom from unreasonable search and seizure. Foreigners shall not have the same constitutional protections from unreasonable police searches as citizens.

6/ It is the side of tyranny that seeks to erode our protections against unreasonable search and seizure. It shall be thought the side of liberty to protect people against unreasonable, search and seizure and snooping by either by Big-Brother government, or by Little-Brother corporations. Tyranny wants snooping and intrusive searches. Freedom involves protection from this.

7/ Where police find evidence from an improper search, that evidence shall not be admissible in court. All blank-check police-state general warrants shall be totally banned and under the law. Everything discovered under a blank check or overly broad warrant shall be inadmissible. In fact, the descriptions of what is being looked for must be specific, for example: (blood stains, or all knives, or computer drives). If the warrant is not specific enough the evidence should be inadmissible.

8/ Police can only demand to do a search upon probable cause stated into the video record for certain things stated into the record. Where police conduct a search looking for one thing, and discover something else, that evidence shall not be valid for charges, unless it is evidence of:

a/ A violent felony.

b/ Machine guns, bombs, WMDs, or terrorist equipment or plotting.

c/ Kidnapping, or sex trafficking.

d/ Tax fraud.

9/ Just because someone was arrested shall not mean that their premises, or vehicle, or electronic devices, can be searched without a warrant. A search warrant shall still be required to search these areas. Police shall be required to obtain a special electronics search warrant to seize or search a computer, phone, or similar device, even upon arrest and even upon conviction.

10/ Because of the intimidating nature of police asking to do searches, police shall no longer be allowed to ask to do voluntary searches of the bodies, premises, vehicles, electronics, and papers of the people, and all evidence found during a voluntary search shall be inadmissible in court as fruit of the poisonous tree. So, if police want to do a search, they must get a warrant, or have the right to conduct a search against the will of the person being searched. However, where voluntary search evidence shall be admissible where victims

All searches are supposed to be highly formalized and recorded by the recorder system's video recorders. We don't want to have any casual searches of people. Also, either police have the right to demand a search given the evidence, or they don't have this right. And if they don't have this right, they shall not be allowed to ask to do a voluntary search. In fact, there shall be no legal concept of a consensual search of a person's body, their devices, their vehicles and their premises by police. This situation should be regarded as absurd: Just as absurd as police officers asking for "consensual" sex with the people they encounter. For surely everyone can see the subtle police coercion in both situations. However, where people have called police on others, the complainant may allow a search of their body, their premises, their vehicles, their electronics and their papers, even if shared with the accused. Also warrants shall not be required to conduct searches on public property, properties open to everyone and where employers grant police the right to search their workplaces.

11/ Consent for a voluntary search or entry may be rescinded at any time. Also, where police harm property looking for evidence of crimes and the search results in no conviction, police must return people's to the same condition, or pay a reasonable sum for its restoration or destruction.

12/ Police shall not be allowed to pass a threshold, or set foot in the premises of the people without a search warrant, or probable cause stated to the county recorder system's police monitoring video record. Also, without a search warrant and a valid search warrant number stated to the people living in a premises, the people at that premises do not have to open their doors or communicate with police. They shall suffer no harm or not opening their doors to their house or place of work when police do not have a warrant. Also, where people open their doors (either being inside the premises, or returning home), and police force their way in without a warrant, or they put one leg in without a warrant, all evidence gathered shall be invalid, as fruit of the poisonous tree.

13/ The people shall have the right privacy with regard to their bodies, bags, pockets, homes, vehicles, personal effects, papers, electronic devices, network service providers, network data, and electronic transmissions. Government shall not conduct searches, or seizures except upon probable cause or credible evidence, supported by a credible oath

describing the place to be searched, the things being searched for, and why these things are thought to be at that place. Also, it shall be thought that government snooping on a person's electronic devices is akin to probing a person's mind. Police shall not be allowed to search people's bodies when they're being stopped unless they're being arrested. Police officers that search too many people may be fired.

14/ The electronic devices of the people cannot be seized except with specific language in the warrant calling for the seizure of electronic devices. There shall be no obligation on the part anyone to share the passwords to their electronics or internet service accounts. Also, never shall there be any penalty for people who refuse to share their passwords with police or government officials.

15/ Where personal electronic devices are seized as evidence, police must copy of all files and return these copies forthwith when requested by the owner, even if the owner is going to jail. With regard to cloud backed-up files: Government may only access files and copy these files with a search warrant. It shall be a felony where data fiduciaries violate this right of the people.

16/ The electronic devices and premises of Main-Senators and over Senators shall not be searched or confiscated, except upon a majority vote of the relevant Senate.

17/ Police abusing their authority so as to delete, or attempt to delete evidence files from seized electronic devices shall be considered as tampering with evidence.

18/ All occupants of all dwelling shall always be free to have extremely strong doors and safe rooms for their own personal defense. They shall also be free to say: "I was asleep", or "I was in the shower", or "I misplaced the inside deadbolt key". For these reasons, so-called No-knock search warrants shall be generally prohibited as a both fruitless and repugnant police tactic, and an idea that leads to numerous rights abuses by police. No-knock warrants shall be totally prohibited for all matters related to non-violent felonies and all misdemeanors. Police serving arrest or search warrants for non-violent felonies and all misdemeanors shall always be required to announce their presence. The term non-violent felony shall include all crimes related to Mafia drugs. It shall be thought a fantasy that breaking doors down prevents criminals from destroying evidence. If people have a strong door and an evidence destruction mechanism in place, the no-knock warrant will not prevent evidence disposal, and if people do not have such a mechanism in place they will not be able to do much of anything with a 30-second wait. This prohibition against no knock warrants will however, make the search/ arrest warrant part of police work significantly more just and significantly less deadly. Regarding no-knock warrants, all matters related to the following shall be considered violent felonies: terrorism, murder, kidnapping, child sex, spying, and suspected foreign agents. opening the door for cops shall not be considered consent to search.

19/ There shall no longer be any no-knock, or night time search warrants looking for illegal drugs, or illegal firearms. This shall be considered an unreasonable intrusion for a relatively inconsequential, fishing-trip, excuse of a thing. However, more serious matters such as kidnapping, and

uncommon contraband such as WMD components shall be exempt from this prohibition.

20/ All search warrants shall empower police to begin breaking the door down 1-minute after arrival and with 5-minutes of video documented waiting time.

21/ Except in hostage situations, any time police break a door down due to a warrant, this must be preceded by at least 5-seconds of loud police search warrant siren. This siren must stay on for at least 10 more seconds. This siren shall be a unique new international sound that oscillates quickly so it is grasped quickly. Its purpose is to alert those inside that they are not crime victims. In general, strange people breaking down the doors to other people's homes without loud police sirens may often be legally shot and it shall be considered self-defense. This especially when they are not wearing a police uniform and when the officers are not all shouting "police" upon entry. There shall be no residential police warrant searches between 10:00pm and 7:00am unless they are time sensitive, necessary, and double authorized by means of two Senate juries.

22/ None of this talk about search warrants shall diminish the right of police to break down doors to halt critical situations such as an assault in progress. In life or death situations, police shall not need a warrant to enter. If there is cause to demand a search without a warrant based on evidence of a crime, then that cause and the category of thing being searched for, must be stated into the county recorder system's live record before the search, or the evidence shall be inadmissible.

23/ Police shall not be allowed to say "open the door" or "open up" or to bounce on people's doors with their shoulders, or feet, or to threaten people. They can say police, please come and talk to us, but they can't say open the door when they don't have the right to make people open the door, they can ask people could you please open the door but they can't command it.

24/ Where police come to people's homes and places of business, they are supposed to also use the telescreen emergency notification system upon their arrival. Also, where police have cause to demand entry to a residence, the occupants shall be sent an emergency alert message. This might say: "occupants of 1234 Main St., police are serving a warrant at your house now. You and all occupants are ordered to come out with your hands out in plain sight." The system might also say: "Police have arrived to arrest John Smith. Come out with your hands in plain sight", or "police are conducting a wellness check at 1234 Main St."

25/ Exigent circumstances shall not be considered to exist upon evidence from an anonymous source unless a great man lives are credibly at risk.

26/ When Police frisk the people, this shall require probable cause stated into the live record. Where people are frisked for weapons, their personal property shall not be unnecessarily gone through, and no drugs discovered shall be valid as evidence.

27/ All cavity searches shall require a warrant, except when people enter long-term lockup, or imaging shows that there is something alien in the body cavities. Police may use Airport style remote imaging tech and metal detector wands without a warrant.

28/ Where police, take cars apart, looking for contraband and they find no contraband, they must put the vehicle back in the original condition exactly as it was. If they fail to do this, the owner of the vehicle shall be entitled to triple the reasonable cost of putting the vehicle back in its original condition.

29/ The Senate shall compile detailed rules on when searches and arrests and other police activity may happen based on anonymous tips.

30/ There should be no fishing expedition searches by officers looking for things to charge people with. If someone is stopped for one thing, and officers discover evidence of another non-violent crime, that evidence shall not be admissible.

31/ Drug sniffing dogs (which are notoriously unreliable) shall be prohibited from sniffing people's cars and bodies, except at the border zone, and for vehicles, traveling in a direction away from the border.

32/ No search warrant shall ever be served by less than 3 officers.

33/ Hot pursuit shall always be narrowly defined and never shall it be broadly defined. However, police do have a right to chase suspects on to private property, and the property owners must allow this.

34/ Where people have outstanding arrest warrant against them for a non-violent crime, they must be notified immediately upon issuance of the warrant, 2-weeks later, and 10 times a year, to their must read email account. Except in the 2-weeks of the warrant's existence, where non-violent criminals are not notified of their arrest warrants, they may not be arrested on the spot. Warrants for violent crimes and other extreme crimes shall not be subject to these rules.

35/ No arrest warrant for a non-violent or minor crime or drug offense shall live for more than 5-years, without renewal, while the accused was in the nation.

36/ When search warrants and arrest warrant are issued, the county recorder system must verify the possible addresses. Also, when police go to arrest people at their places, each officer present must recheck to see that the address on the warrant matches the address they are going to. When officers arrest people, they must make a reasonable attempt to verify the ID/identity of the person before taking them away.

37/ The following shall be international terms: search warrant, arrest warrant, weapon seizure warrant, come to the police station warrant. However, we shall phase out the use of the terms search warrant, and arrest warrant because these terms block our ability to simply describe whether a search was warranted or not. Instead, we shall use the terms: "search order", "arrest order", "weapon seizure order", "come to the police station order". All foreign nations that emulate this constitution shall use these English words so that everyone worldwide will easily understand what the police are doing in this important matter.

38/ Where search warrants are issued, and police observe the thing(s) being sought in the search warrant being transferred to another person, or another property, police shall have the right to search that other property for the thing that has been palmed off to another.

39/ In general, it shall not be considered reasonable to issue a search warrant upon uncorroborated evidence from a convict, except upon cases of murder, or kidnapping, or other

similarly serious crimes, or where the person being searched has had a felony conviction.

40/ Without a warrant or an emergency situation, police shall not be allowed to visit people's homes, or electronically contact people between 8pm and 8am.

41/ There shall be no seizures of property for criminal involvement, except that 100% of the proceeds from the seized property goes to the national government's general fund, with none of it going to the seizing county or its police department. Also, seizures herein refer to property seizures by government, not searches or arrests.

42/ All persons conducting a search shall be required to wear special search cams, in addition to the regular police cams. The stream shall be remotely backed up live by the county recorder system, not the police. Additionally, police shall be required to have a filming person from the county recorder system filming what they are doing, where the search is an important matter, or involves an important person or organization.

43/ Due to the risk of theft and evidence planting by police officers during searches:

a/ All searching officers must have all required cameras working from before the search begins until after the search has ended, or the search shall not be valid.

b/ Where the homes of politically active, or important, or rich people are searched, one Sub-Senators shall come and film each searcher, and all evidence gathered.

c/ Police conducting searches shall be assigned zones, and no more than one officer may search more than one zone.

d/ The people living at the premises being searched, or driving the vehicle being searched cannot be separated from their premises/vehicle during the search. Also, they shall be allowed to film the searching officers as they want.

44/ Where practical, all searches shall be conducted at a time when the person whose premises is being searched is normally there and awake.

45/ The subject(s) of a search warrant shall always be free to film the search. Police may only use clear containers/boxes in a premises searched, and must carefully document all items removed from a premises (along with why these are being removed) to the recorder's video stream, and to Senators and subjects present. An original written and signed copies of all search warrants must be given to all subjects of search warrants.

46/ All search warrants shall be public information because, as with so many other things, dishonesty and evil in government also hides in darkness. When everyone knows a thing, it protects the people from their government. Also it shall be thought that secrecy surrounding the exact nature of a search warrant benefits only the people using a search for nefarious purposes.

47/ The threat of search and arrest shall not be used to intimidate or abuse the people.

48/ Government shall have the right to inspect all premises offered for sale or rent, as well as all areas being build and not yet occupied. Government shall also have the right to inspect all property sold or rented but not yet occupied.

49/ If a place is open to all comers, such as an unfenced yard, unlocked communal lobby, or shopping mall, or a clearly abandoned building, then government people may enter as

anyone else and all evidence gathered shall not be subject to search warrant rules. Also

50/ Government shall have the right and responsibility to inspect all people, property and goods crossing our nation's borders in either direction. They shall however not have the right to go through personal electronics without a warrant.

51/ These rights and protections of the people against unreasonable search and seizure shall belong to the citizens of our country. However they shall not belong to foreign visitors, immigrants, immigrant citizens, and other non-citizens. The Senate may establish greatly different search rules for non-citizens and immigrant citizens.

52/ Using police searches to harm rivals and critics shall be a felony.

53/ Each person listing their address with the county recorder must accept or change the photo of the outside of their premises that comes up. They may also voluntarily submit floor plans. This is mostly to aid EMS and fire response, but it will also make search warrants more idiot-proof. This photograph of the premises must be displayed at the top of every search warrant, with the address captioning the photograph. All search warrants should also show images of the people that are known occupants.

54/ When police conduct searches that are in the gray area, the evidence gathered cannot be used in court. When police conduct searches that are in the dark gray area, the investigation shall be halted and entirely restaffed. When police conduct searches that are definitely and obviously wrong, all officers involved risk being dishonorably discharged.

55/ No warrant shall be valid unless issued by a randomly drawn Senate tribunal of 3 or more, on the advice of up to three search warrant specialist paralegals who cite other similar cases. All warrants and court orders must be shown by police before, or immediately after entry except when the occupants are combative. Only sworn police officers and other Senate approved government workers and Senators may enter under a search warrant. No others, such as independent reporters, ride-alongs, or lawyers may accompany police under a warrant.

56/ The county recorder system shall have a county-name/ recorder/ police/ verify/ warrants path from its homepage where people can verify police warrants by their warrant number. Similar paths will be used for searching officer badge numbers. These pull up photos of the officer. Similar paths will also verify impromptu arrests, and all other police activity that can be verified by name/ID-number of the arrestee, address, or warrant number, and by certain other means.

57/ There shall be no forced police entry (including especially swat or special weapons and tactics police) without either:

a/ A search warrant. Also, arrest warrant do not confer any search rights to police, or any right to search any premises for fugitives unless the police have evidence or bystander statements that the fugitive is hiding in a particular premises. It shall however be possible for the court system to issue search warrants for past addresses with arrest warrants.

b/ A sworn accusation of a violent felony by a credible and identity verified witness.

c/ A sworn accusation of a violent felon hiding in a place by a credible and identity verified witness.

d/ A statement by police read into the live record that they witnessed a violent felony, or are in hot pursuit of a violent felon entering a place.

e/ There shall be a national police database of swat response addresses and occupants. Where a celebrity or address has been swatted for no good reason once, there shall be no more future call-in swat responses upon that person and address for 10-years without a search warrant. Also, police departments shall not get any per swat money for swat responses.

58/ Except for active-shooter or other mass casualty events, swat shall not be dispatched based on a report from a non-police officer unless that person is identity verified. Also:
a/ swat shall not be used at the residences of the people unless called by regular police.

b/ No more money shall be paid to swat officers.

c/ The addresses of all important political people shall be registered with the recorder system as opted out of swat responses from calls.

d/ Intentionally swatting innocent people shall be charged as first degree brandishing, even if nobody is hurt.

e/ If someone is shot as a result of a fraudulent/prank police/ swat call, the caller shall be considered as if they pulled the trigger themselves.

f/ Where prank swat calls result in someone dying, this shall be charged as murder-2.

g/ Where people swat their political adversaries and someone dies, this shall be charged as murder-1.

h/ These rules of swatting shall also apply where ordinary police respond, guns, drawn, and the result is the same.

59/ During swat responses, police shall:

a/ Only be able to shoot people if they see weapons in the hand.

b/ Must play multiple sirens for at least 10 seconds before entering the premises,

60/ the penalty for swatting shall be 5 years in prison per count. If the swat call was politically motivated, or in retribution for a government worker doing his job, there shall be double penalties. Also we shall permit lifelong judgments for damages against swat callers, so they may easily be economically voided for life and reliant on others for all economic activity for the rest of their lives.

61/ We shall switch to face pic fire alarms, which take a picture of the person pulling the fire alarm. Where people pull a fire alarms for no good reason, and someone dies as a result of the fireman, or EMS, being in the wrong place, that person may be charged with second-degree murder. Where people die from their false-alarm police/swat call, the harassing caller may be charged with 2nd degree murder.

62/ The people crossing into our nation may be freely scanned and their possessions x-rayed by our border security staff.

63/ Police shall have broad rights to use metal detector wands and metal detector gateways anywhere that people gather tightly, or gather in great numbers, such as protests, theaters, stadiums, drinking streets, main pedestrian areas, bars, concerts, speaking events, stores, shopping centers and other place where people gather in large numbers. Where police come upon rogue or underground drinking/drug party events where most people are under 25 (especially in

communities with a youth firearm violence problem), police may enclose the party and force everyone to walk through a metal detector gate. Police may also use touch-less magnetic field detection wands at protests.

64/ Under the following circumstances, police and deputies may set-up metal detecting gateways, including automatic double door cells. They may also use wands on all people entering. They may also check bags for guns and other weapons:

a/ Those entering airports, courthouses, police stations, jails, government offices, and violent schools public and private.

b/ Near protests.

c/ At all drinking or drug party areas.

d/ At sporting events, concerts, and other places where people gather.

e/ Where people have a gun shaped bulge, or they are wearing clothing that seems intended to hide arms.

f/ Those wearing distinctive gangster clothing, or gangster tattoos, or anything gangster about their ways or vehicles.

x/ Schools may also install various sorts of metal detecting gateways, and use wands on people to check for guns and knives.

65/ Every time government gains access to a person's home or financial accounts, Government shall be required to notify the person so searched.

66/ This constitutions strict rights to be free from of search and seizure generally applies to people's residences, places of business, and other indoor and enclosed places. However there shall be no need for police to obtain a search warrant for searching outside, on any land, even fenced land, even urban walled in areas open to the sky, or roofed but not fully enclosed. Police can go anywhere they want outside at any time, without a warrant. This shall include: Unimproved wild land, farms, farmland, ranch land barns, agricultural buildings, factories, shops, parking lots, vacant lots, and suburban/ urban yards, particularly front yards, community, carports, garages or community parking areas, or common areas of a building that are shared by multiple residents such as lobbies and community spaces. There shall be no rights protections against uniformed police officer searches without a warrant, particularly when a felony has occurred in the immediate area. The constitutional rights herein that protect from unreasonable search and seizure (and require the use of search warrants), this shall only apply to residences, places of business, offices, and warehouses.

67/ The rules of search and seizure shall not necessarily apply in cases of:

a/ People whose property or premises are obviously infested with vermin, or other insects, or other pests.

b/ Municipal mosquito abatement people, fire marshals, and sewage/ water runoff inspection people. These shall be allowed to go on people's land/yards or businesses open to everyone without obtaining a warrant, however, they must wear large text words like mosquito abatement, health inspector, or fire marshal front and back in the biggest letters that will fit on the person's uniform.

68/ The term "search" under this constitution shall apply to:

a/ Looking through the things a person is carrying on or in their body, or with them.

b/ Entering or looking thought a person's residence,

workplace, personal vehicle, enclosed garage, carport, porch, back yard, mail/delivery boxes, electronic records, service accounts, payment histories, location logs,

c/ Looking through, spying on, or copying a person's electronic equipment or electronic transmissions.

69/ From now on, we shall call police searches as either police searches, or cop searches. Search warrants must say something like "This level X jury having the right to grant search warrants grants the NYPD a police search warrant to search the premises at XXXXX, on the date of XXXXX, by no more than XXX officers." This warrant appears on the recorder system website, and the webpage for the officers doing the search. The live police search video gets auto-stored, just like all police arrest video.

70/ The right of the people be free from government and fictional citizen snooping and searching should be guarded against erosion, just like the right of free speech and the right to bear arms.

71/ Homosexuals shall not be allowed to work in jobs where they are particularly likely to be patting people down, or doing body searches of people, or watching their private parts. For example: police officers, airport security, jail prisoner intake, urologists, locker room staff, or in urine testing. Men and women with homosexual sex partnering in the STD system shall not be allowed to work in these positions. Also, to be clear there shall be a total freeze on the hiring of homosexual police officers, due to the exaggerated power and sexual domination issue many homosexuals have.

72/ In all security check pat-downs, the people patting down many people must be non-homosexuals. Everyone gets patted down by a non-homosexual person of their birth sex. These restrictions shall not apply when police arrest people and need to pat them down.

73/ Crime scenes shall not be closed against the property owner's will for more than 3-days. Regarding the power of government to keep people off the land and premises they own and rent: this right shall be extremely minuscule and temporary:

a/ For murder and kidnapping crime scenes, police shall have up to 10 days.

b/ For all other felonies, police shall have up to 3 days.

c/ For misdemeanors, police shall have up to 6-hours.

74/ All of the rules regarding search and seizure herein shall apply to our nations land areas. However, these rights of search and seizure shall not apply on the oceans outside of our nations land areas, and all ocean vessels shall be subject to boarding for no reason, just as border customs inspections may occur for no reason. The Senate shall have great freedom in establishing rules for the boarding of river and lake boats, and motorhomes, and trailers and other vehicles with invisible hiding spots for kidnapped people.

75/ The various national police and intelligence agencies shall never be excluded from any search warrant requirements. Ever. Nor shall they have any special relaxed search warrant administration. Ever.

76/ The reason we require search warrants is that without search warrants, individual police become much more empowered to do a few different sorts of tyrannical things with searches.

a/ They can harass the rich and use warrantless searches to

go on treasure hunts for personal enrichment, or extortion, or things to steal.

b/ They can harass people they don't like, or people who don't pay them off.

c/ They can get bribes from anyone.

77/ No search warrant shall empower police to take away any camera or recording device without giving a copy to the people the camera was taken from.

78/ Where a warrant allows for seizure of electronics, this must be specifically stated.

79/ It shall be a crime for police to lie about having a search warrant or arrest order or the nature of the warrant.

80/ Police shall not cover any camera during any search.

81/ Only uniformed police officers and those accompanied by at least one uniformed police officer shall be allowed to go to people's homes.

82/ the county recorder system's search warrant verification system, shall list the police numbers and display the faces of all police officers that are involved with serving a particular warrant. Where police are serving a search warrant, or arrest warrant, there must be a uniformed officer at the front of the line of people entering the premises. Also, these first police will generally wear the extra- bulletproof breaching uniform. This uniform is supposed to be iconic and everyone should know what the nationwide police breaching uniform looks like. These are supposed to be quite intricate so they are hard to fake, and people know immediately that it is police coming into their home.

83/ When police conduct searches, wherever practical, they shall be expected to put things back where they found them, and as they were. Police shall not be allowed to dump a persons property on the floor, or leave a big mess after they're done. Also, where police are opening walls, or cutting/ breaking things open to see what's inside, they must have a secondary warrant for this, and they must put things back as they were. Remote sensing of walls during the service of a police warrant shall not however be prohibited.

84/ The police warrant to arrest list shall monitor all flights and prepare a list of people that will not be allowed to leave the country. No longer shall our borders be open from either side.

85/ The possession of illegal contraband substances of a personal nature shall never be considered a valid excuse for the erasure of any constitutional rights.

86/ Regarding especially searches and they turn up, it shall be thought to be folly to have police that break the law trying to catch the people breaking the law.

87/ Police must clearly state a valid reason when they order people out of their vehicle. Once a person is out of their vehicle, this fact alone shall not give police any reason to search the vehicle. Also, police shall not be allowed to order people to go in their homes, or to stay in their homes, or to stay in their vehicles during dangerous situations. Police shall also not be allowed to order people to stay in their vehicle for more than 20-minutes. The people shall have a right to stand on their own property (whether they are an owner, renter or guest) and observe and record nearby police activity. Except with regard to reasonably-sized and condoned crime scenes, There shall be no right of police to conduct their business without public scrutiny. Quite the opposite the people have

the right to watch what police are doing, and to record this. Our nation's commitment to the truth demands nothing less.

88/ There shall be no spying on citizens without a warrant. However, no warrant shall be required to spy on foreigners and provisional citizens while they are in our nation, and this can be presumed. The Senate shall determine which other sorts of surveillance require a warrant and which do not. This is necessary to make sure that spying and surveillance does not get out of control. Also, the county recorder system shall keep the files on each person surveilled or spied on, and detailed statistics on surveillance and spying overall. This statistic gathering by the county recorder system shall be monitored by each county according to the national rules. There shall be no national organization or participation, or oversight in the process by which the county recorder system monitors government spying. The county recorder system is not supposed to engage in communications with the national government, except for information requests. The county recorder system is supposed to be the part of the county government that is furthest from the national government. This is to prevent ministry of truth situations, where the national government is trying to fiddle with the group memories of the nation. Also, there shall be no way for the national government to delete county recorder system memories. These memories may be cancelled, only replaced, and the prior superseded memory, the prior statement, the prior report must always be saved for further evaluation at a later time, if thought necessary.

89/ When the government and its police forces wants to talk to the people in non-emergency situations, they can do one of the following, and nothing else:

a/ Police can contact the person remotely and make an appointment at a mutually convenient location. However, there shall be no legal penalty if the person will not talk to them or is not home. Also, under these circumstances, the people who have made an appointment shall not be legally obligated to go to the appointment, even if they've agreed to go. Also there shall be no consequence for standing up the police officer.

b/ Police can obtain a come into the police station warrant, and then the person must comment the time stated in the warrant.

c/ Police can obtain an arrest or search warrant and go to the person's house. However, when they go, they must give a 5-second blast from their police siren from a marked standard police car.

x/ Absent a search warrant, or an emergency situation, or a third party call, police are not allowed to go to people's homes without an appointment, or police siren blast.

90/ Police may always inspect and search shipping containers where there are over 6 inspection officers present. Government may x-ray containers to look for trafficked humans and contraband. All trucks and railcars shall be regularly x-rayed to prevent human trafficking. Soon we shall implement rules by which all international shipping containers to and from our nation will have to be in a box-within-a-box design, so that our customs inspectors can easily slide out the contents of the container and conduct their inspection.

91/ Minors under age 18 and house guests shall not be considered legally competent to give their consent for a police search of a residence.

92/ The ideal situation with regard to police knocking on front doors is that the people all come to their doorway and talk to the police. If people are not coming to the door for police, something is wrong with our laws. Because we want everyone coming to their door, we must have a policy where police can not simply push their way in, once an occupant comes to the door of their home. This unless the officer(s) have either an arrest or search warrant, or the officer(s) discover a felony in progress that is not related to adult drug use. There also must be a loud police siren, and a text message saying roughly: "Urgent, police serving arrest/ search warrant on your premises now."

93/ When a person opens their door for police knocking without a warrant, and police use some legal reason to enter without a warrant, they must declare that reason to the recorder's system's monitored police video system prior to entering. Police must also describe what they are looking for, when they break in or force their way in. Without a clear pre-description. Where police break these rules, everything they find shall be regarded as fruit of the poisonous tree with regard to its use as evidence, except for evidence relating to murders, kidnappings, and rapes.

94/ When people are being held against their will, and they hear a police search siren, the time to yell help help is immediately after the siren stops for the next 15 seconds. That is when police will be listening with special microphones for help calls.

95/ We need to all realize that as we shift from a world of material accumulations to a world of virtual accumulations, that access to our virtual accumulations will be increasingly key to privacy.

96/ All searches in the real world and virtual world shall be logged and video monitored by the county recorder system. This shall be so for all searches. It shall be so for "personal searches" (including people's places, vehicles, electronics, cloud files, yards, etc. It shall also be so for impersonal searches involving monitoring of the person

97/ There shall be no money wasting ultimately totally ineffective, rights reducing agricultural inspection checkpoints. Also there shall be no urban or suburban spraying of pesticides without the county senate approval of each spraying.

98/ The freedom from unreasonable, searches and seizures should be seen as an early version of a whole tree of electronic privacy rights.

99/ Police do not need a search warrant to go to people's doors and ring the bell, or to call people and to try to get them to meet with police. However this shall not turn into the right of police to harass people with repeated requests.

100/ Police can look through glass windows of cars. Police can also look through the windows of houses if they've been called there. But they can't go around looking through everyone's windows.

101/ Police that confiscate things without recorder system video supervision may be charged with theft under double circumstances. Police are never supposed to confiscate property. They may detain people and hold them while their

property is being documented by the recorder system. Also, police shall have no right to sell assets. Only the recorder system shall sell assets and give all of the money to the national government General fund.

102/ It shall be a crime for police to ask for passwords or unlock codes. Even with a warrant there shall be no obligation to share passwords, and police can't threaten or hold people for not revealing their passwords.

103/ Police shall not have the right to search somebody's last reported address without a warrant, particularly if they're living with somebody else.

104/ Shipping containers in transit via the delivery system and commercial trucks shall not be protected by the right of unreasonable search and seizure. These may be freely and regularly searched by police and customs.

105/ There shall be no exceptions to the search and seizure rules of this constitution. Government shall not be allowed to establish some new special department like the FBI or new DEA, or new immigration department, and circumvent the right of the people to be free from unreasonable searches and seizures. These tricks shall no longer work, and it shall be a felony for any government people to pretend to have a mandate makes them exempt from everyone's constitutional right to be free from unreasonable searches and seizures. The people in government are supposed to quake with fear when they attempt to undermine our constitutional protections against unreasonable search and seizure. These people who do this shall always be regarded as working for the enemy or conspiring with the enemies of freedom to undermine our dear rights. All lawmakers are advised to stay far away from undermining our great protections against unreasonable search and seizure for the bar here should be set as low as reasonably possible. Also, these people might be sent to prison for decades for undermining this important right of the people.

106/ There shall be no criminal penalty when people do not open their door for police serving either an arrest or search warrant.

107/ Police cannot force people to give their unlock code or force people to unlock their phone or electronic devices.

108/ The presence of an open alcohol container, or charges of driving under the influence or other driving related charges shall not be any justification for government to conduct any search.

109/ To protect the people, police shall be expected to regularly search private security officers for illegal weapons. And these guards shall have no right to object. Also, the national police shall regularly search police and especially police vehicles for extra firearms and contraband that can be used to plant evidence on people. And the Senate shall search the national police for extra firearms and contraband. In all cases police and private security shall have no right to refuse being searched. Policing shall be regarded as a brotherhood dedicated to protection and honesty above all else.

110/ The freedom from government searches shall be thought a thing that belongs entirely to human citizens, and not very much to non-human fictional citizen entities. Therefore government shall have much greater rights to search the commercial shipments of non-human entities, than the things

that individual transport with them. That we ever checked our own people and let the fictional citizen containers come in un-inspected shall be thought the settings that are ideal for the mafia.

111/ Police shall not be allowed to visit people at their homes, between 9pm and 7am unless it is an emergency, or a night time warrant. All night time service of warrants shall require a special night warrant, and these are subject to rules of reasonable cause for the night time service addendum to the warrant.

112/ Police shall have an primary obligation to detain people and investigate all blood, and bloody things and bloody injuries they encounter, and to take samples and demand an immediate video statements.

113/ Nervousness of a person shall not be an element of probable cause.
search

114/ Police shall be expected to know the rules about searches. Where police ignore the rules about searches, this shall easily disqualify them from serving as a police officers.

115/ Search and arrest warrants may only be exercised by police. Where people who are not police officers attempt to exercise arrest real arrest warrants or real search warrants they shall be held to be guilty of impersonating a police officer. Also, all evidence seized or gathered shall be inadmissible in court.

NR'26. POLICE USE OF FORCE

1/ Only reasonable and appropriate physical force shall be used by police to arrest. Also, wherever practical, force shall only be used after non-forcible methods are tried for a reasonable amount of time. Where people make light touch contact with police, police are not allowed to step up the amount of force used, but must respond equally or less in their efforts to handcuff someone. Once people have been handcuffed, they must generally be allowed and helped to sit up or stand up.

2/ When police use force, they shall minimize injury to both suspects and to the public. Police shall not discharge their firearms unless it is necessary for their own safety, or the safety of the public. Wherever practical, police shall not shoot to kill, or fire many shots in rapid succession. Where police act correctly, there shall be no right to seek damages when they cripple instead of kill. Where people appear to be trying to commit suicide by charging police, they must be shot in the feet first if practical. Where police use force on a person, there must be an inventory of bodily damages report by both police and the hospital/clinic.

3/ Police shall be free to shoot and kill those who genuinely threaten them with great bodily harm. This however, shall not include:

a/ Those trying to punch, slap, or kick a standing officer with their limbs.

b/ Those running at an officer with a trowel, ordinary pen, ordinary scissors, or a small stick, or similar non-weapon, especially if they are outnumbered by police.

c/ Those driving slowly towards police in a vehicle where the officer can easily step out of the way, or where the officer steps in front of the vehicle or grabs ahold of the vehicle.

Police Officers do not have the right to attach themselves to vehicles or to step in the way of a moving vehicle and then use that as an excuse for shooting someone.

d/ Police shall not be allowed to fire on people fleeing from them, either on foot or in vehicles unless they are definitely trying to run the officer over. Also, if the person is driving down a street at a normal speed or slower, all police officers must get out of the road and let them pass.

e/ Police shall not be allowed to point guns at the people, or worse to shoot the people, to keep them from running away. Police guns only get drawn when someone else has a gun or other dangerous weapon in hand. Some people just panic and run when people point guns at them. So police can never shoot people that are only running away from them, unless they were recently witnessed as armed with a firearm. Where police break this rule, it may easily be considered assault or homicide if the person dies. In such cases, it should be as normal to convict, but the officer gets a shorter sentence in a duty crimes prison, being dishonorably discharged after.

4/ Police must use non-lethal weapons instead of lethal weapons where practical. The standard police response to non-compliant, semi-critical people with blades, clubs, and weak weapons shall be to first shoot them with tasers, then in the legs or buttocks with mild, then very strong rock salt shells out of a shotgun if this is practical. Rock salt and bird shot to the lower half of the body shall be preferred when police are confronted with non-compliant suspects that are armed with knives, swords, clubs or other semi-effective weapons.

5/ Police shall not point their firearms at people without reasonable cause. Reasonable cause for pointing a firearm shall always include hidden hands and when people are threatening others with weapons. However, police shall not be allowed to point their firearms at people to get them to stop running away. Police shall have much broader rights to de-holster their firearm without pointing it. Police officers shall not touch, or rest their hands on their firearms, except when they are about to come out.

6/ Police guns can be semi-automatic or and have removable cartridges clips. Police guns shall all make a particular sound when they are touched. All police firearms shall be kept in holsters that are locked until the officer gives either the voice command to unlock, or the hidden button around the belt area is pressed.

7/ Police may shoot those firing at them, those pointing an apparent firearm at them, those raising or turning or bringing an apparent firearm to point at them, and those in a firearm pointing stance directed at them. In all of these circumstances, the gunman may be shot, even if he turns to run away, or if he fails to throw the gun down in a way that police can see. Police shall also have broad rights to hold, draw and point firearms at those reaching for possible arms. Once a person has fired on police, the only safe position for surrender shall be hands up or out.

8/ Police shall be allowed to shoot people dead for immediately and genuinely threatening others with firearms, blades, or clubs in hand.

9/ The arrest and legal process itself shall not be the punishment. It may be held a crime for police to:

a/ Tackle or knock people down who are neither combative,

nor violent, nor fleeing, or where there is no legitimate reason stated into the video record for arrest near the time of the arrest, and preferably before the arrest, unless this is impractical.

b/ To engage in intentionally violent arrests, or to use violent or abusive arrests as a means of punishing or harassing people when there is clearly no good reason for arrest.

c/ To punch people who are not fighting with officers.

d/ To punch or tackle women or children, or old people, or disabled people, even if they are resisting.

e/ Abuse their power by bringing cases that will never result in a conviction. The law is the law, and as little as possible, this should have nothing to do with the discretion of the arresting officers.

10/ The Senate shall establish detailed rules on what is interfering with police and what is not. Those who remain 8m away from police while they are arresting someone cannot be charged with Interfering with an arrest. The crime of resisting arrest shall not begin until 2 minutes after the officer tells the person and the recorder that they are under arrest. If the officer doesn't state a reason, then the crime of resisting arrest doesn't begin until 15 minutes later.

11/ Regarding police and others firing on people driving a vehicle at them:

a/ The person in the vehicle must appear to be actually trying to run the officer or person over. Where the officers or others are along the side of the vehicle, or behind it, or not in the apparent path of the vehicle, they shall not have the right to fire, unless they are genuinely at risk of being run over.

b/ If the officer or person is not in the vehicle's path, the officer or person cannot fire unless someone else is in imminent danger from being in the vehicle's path. Also, officers and others that have moved into the path of a vehicle shall be no justification to fire on the vehicle. Police cannot step in front of a moving vehicle, or stand in the middle of the road and then claim that the driver was trying to run them over as a reason for shooting the driver. They also cannot put a vehicle in front of the vehicle and then claim self defense.

c/ Where a car is not headed towards the officer exactly, or where it is moving slowly, or where the officer can easily get out of the way, this shall not work as a reason for shooting a driver.

d/ As a society, we don't want police shooting drivers in this way unless the driver is genuinely trying to attack the officer, or others.

12/ In situations where people can use a gun to shoot someone in self defense, there shall also be the right to use a car or a motorcycle or other vehicle, or club or knife in self defense. Armed people stopping cars may be run over in self defense or community self-defense. The driver may also put the vehicle in reverse and back over the criminals. The driver may also crush them against obstacles such as other vehicles and walls. Except for uniformed police officers, those who step in front of moving vehicles, especially a fast moving vehicles, in an effort stop the vehicle: and the driver ignores them, or doesn't see them, and runs them over, the maximum penalty shall be 1-year in jail if the person dies. Except for people that have recently killed others or committed Assault -1, or brandished a firearms, or kidnapping people, or are known to be with a bomb, police are not

allowed to collide with cars moving at speeds over 60kph to stop the fleeing suspect. Police are also not allowed to collide with or have high speed chases with motorcycles, but must instead call in a pair of civil defense drone from that system to monitor where the driver is going, and to follow from a distance.

13/ Police shall not shoot at fleeing suspects, unless the officer is reasonably certain that:

a/ The suspect is armed and used arms in the commission of a recent crime.

b/ They are sure they have the right man.

This rule shall not apply on closed military bases.

14/ Uniformed police officers may order people to put their hands up for reasonable cause and a reasonable period of time while it is determined whether they have arms or not.

15/ Police shall not shoot or beat or knock over surrendering suspects, or suspects with their empty hands up.

16/ Police shall not be allowed to order people they are holding at gunpoint to do anything that is complex or odd such as crossing one leg over the other, crawling on the ground, not looking where they are going, or other Simon-says commands. Police may however order people they are holding at gunpoint to discard their weapons, keep their hands up, and not to look back unless they are being told to walk backwards, in which case the suspect shall be allowed to turn slightly and look where they are going. Also, the Senate shall compile a detailed list of things that police can and cannot order suspects to do while they are holding them at gunpoint, and all police officers shall watch a great deal of media on this critically important subject. There shall no crime of people resisting police orders if they cannot be justified in the public record at the time that they are made. Police only have the right to give orders when there is an emergency that people must comply with. Police shall not be allowed to order people to sit in this place or sit in that place to lie down in another place without good reason stated into the police record.

17/ Police officers shall not be allowed to turn arrests into humiliation rituals of the people that primarily exist to the egos of police officers.

18/ All body cam footage of all police shootings shall be immediately released to the public by the county recorder system within 24 hours. Also, after 24 hours the courts shall immediately issue a warrant to release the video. The police department shall have no control over the release of this information because it is held at the county recorder system.

19/ Wherever More than 1/4 of the people think that a police shooting might not be justified, there must be an official hearing about the officer's conduct.

20/ All police cars shall carry:

a/ A long-range scoped rifle capable of firing high-powered rounds that can penetrate vehicles, body armor, and walls.

This rifle shall have at least 3 sorts of rounds

b/ A shotgun loaded with 3 levels of rock salt, then 5 levels of shot and progressively more powerful amounts of gunpowder grain. These shall have standard color coding: Violet (blanks), blue-green (light salt), green (medium salt), green-yellow (heavy salt), yellow Yellow (low grain bird shot), yellow-orange (medium grain shot), orange (heavier grain shot), red (kill shots). All rounds are loaded in the same order for this

type of police shotgun nationwide. Also there is a rainbow color LED that matches the round automatically.

21/ Police shall only carry approved firearms. All police firearms and projectile weapons shall have video cameras, audio recording, time stamp, location tech, remote backup, and gun horns that may be used to warn people of an imminent firearm discharge. In general, all police cam recordings of all police shootings shall be made available within 6 hours by the county recorder system unless impossible. The police department may add its commentary to the original video explaining what happened.

22/ All police and all carry weapons must use mirror-polished pure silver bullets or mirror-polished pure aluminum bullets with the user's ID numbers on them. Lead bullets shall no longer be allowed for police or civilian carry.

23/ In high population density areas, police must refrain from firing unless absolutely necessary. Police are also expected to do the following where there is time:

a/ Use longer more accurate guns so they can fire one shot instead of many.

b/ Use lowish-grain hollow-point bullets, because these are less deadly for others behind walls. If officers are confronted with body armor, they can grab a clip of Teflon coated bullets for this purpose.

c/ Fire downward where practical so the shots travel diagonally through the thicker floor, or ricochet rather than penetrating sheetrock walls.

24/ Where police arrest people, they must handcuff them as quickly as practical and cannot unnecessarily restrain them by other means, or kneel on them or dog-pile on them for no good reason. People with multiple gunshot wounds, shall not generally be handcuffed.

25/ Police shall not beat, injure, abuse, torture, neglect, intimidate, or humiliate suspects whom the law always presumes to be innocent until proven guilty. When police intentionally harm suspects, they should be charged with assault whether the suspect is guilty or not. Also, great police abuse for minor crimes should normally get the charges dropped. And where the police abuse was minor, it should result in shorter incarcerations.

26/ In general, police shall only be allowed the minimum degree of force which is reasonable and necessary to affect an arrest. Police shall not use excessive, or unnecessarily humiliating or brain rattling force to arrest people. Nor shall they demean, intimidate, threaten, provoke, or goad the people without good reason read into the video record. When people present their hands within 2-minutes of being told that they are under arrest, police shall not be allowed force people to the ground for handcuffing. The people who run away from an arrest, shall get an additional 1/3 added to their sentence. Once police have people handcuffed, the handcuffed person shall not be left lying on the ground, or placed on a surface that is dirty, or muddy, or too hot, or too cold or full of insects.

27/ The Senate shall establish clear, simple, definitive rules for police use of firearms, tasers, irritant sprays, clubs, handcuffs and other police weapons.

28/ Police and good samaritans shall have broad rights to use tasers on those causing significant injury to others and those who appear about to cause significant injury. Police shall not

use tasers on unarmed people who are:

- a/ Female (except for very large or strong females)
- b/ Over age 60
- c/ Disabled
- d/ Clearly no threat to them.
- e/ Small individuals.
- f/ Under age 12 (except for people who are very large or strong)
- g/ People who are only not complying.

29/ Police shall generally not storm in and attack people when they are holed up in a place with arms unless they are hurting someone else. Police shall turn off the water and power and wait for the person to come out. After a while, they might also break a couple window as needed, and fly drones in for a look, and perhaps a spray of tear gas here and there. This is the right way to end sieges, not with police escalating and playing special forces. Also, the Senate shall create a standoff penalty multiplier depending on the length of the standoff. The longer the standoff, the longer the jail time multiplier will be for the person in the siege situation.

30/ The correct attitude of police when making an arrest should be: "Sorry bro, but I gotta arrest you for doing this illegal stuff. Its my job. No hard feelings, I hope. It definitely should never be anything like: "Tell me why I shouldn't beat you to death right here". Our justice system shall always be based on due process, and presumption of innocence. Even where the officer witnesses something awful with his own eyes, even then he must allow the system to work and do its job, or he shall be considered a criminal and a criminal police officer.

31/ Officers shall be able to call for Senate monitoring by touching any weapon or pressing their call button.

32/ We shall teach our legal system to all our children. And one thing we shall teach is that when police start using non-lethal weapons, you had better surrender, because it is just going to keep get worse.

33/ People who are having fist fights, or who are smashing up a place, or threatening others with real weapons, and those who are stealing, or worse may be tased by either police or by good samaritans. People who are down, or not a threat shall not be tased.

34/ Police are supposed to eat up the bad words that people hurl against them. In fact, before they can become a police officer, all cadets must receive one hour of live in-their-face cursing from a line of people each day for two weeks. It will certainly be easy to find volunteers for this work.

35/ Tasers, pepper spray and toppling tackles shall not be seen as things that are used for the convenience of police officers or others, but for reducing the harm to people. If a suspect is simply not compliant, or running away, he may not be tased or topple tackled. And this, especially on hard pavement and raised curbs, where the suspect may hit his head and cause serious injury as a result of the police action. Tasers, pepper spray, and toppling tackles shall only be used in confrontational situations, and not for when people are merely non-compliant, or running away, or refusing to leave. If police use irritant spray or tasers on people who are clearly not threatening anyone, or they use them to punish people for not obeying an officer, or worse for disrespecting an officer, the police officer shall automatically get fired and may be

required to spend up to 60-days in work camp for per count.

36/ It shall be a felony for Police to carry any undeclared weapons of any sort. Police and their vehicles shall be regularly searched at random times and places and without notice by the Sub-Senate for extra weapons and potential contraband for planting on people. All weapons confiscated must be disclosed to the live video feed.

37/ Police may carry batons. However, batons shall not be longer than 40cm or have points, and shall not be used on the head, face, neck, collar, belly or genitals of a suspect unless the only other alternative is to use a firearm.

38/ All police department applicants must complete a 16-hour high-stress test to see if they can keep their cool under extreme circumstances.

39/ Police work in an armed nation is dangerous and frequently involves split-second, life-or-death decisions. We shall all bear in mind that the those doing this work are fallible humans that sometimes make mistakes. We shall all try to give our police the benefit of the doubt for their infrequent mistakes, particularly those that occur in heated situations.

40/ Every arrest injury claim shall be fully recorded and investigated by at least one Sub-Senator. If the injuries are significant there shall be a Sub-Senate tribunal.

41/ All uniformed police officers that regularly respond to emergency calls, and all police officers that transport felony prisoners must remain stronger and faster than the average male. This shall be determined by:

a/ The officer's 12x maximum bench press weight.

b/ The officer's 12x maximum rowing weight.

c/ The officer's 2km run speed.

42/ There shall be no special reduced physical qualifications for women working in police, fire departments, or the military. All police officers must be stronger than the average male that is 20 to 40 years old.

43/ Female police officers shall not be allowed to wrestle and fight with people who do not comply with their arrest, particularly large men, as male instinct frequently leads to situations where the female officers get clobbered, or disabled (at increased cost to the people), and the male resisting lightly gets sentenced to long prison sentences for resisting a super-weak officer with very often a bad attitude. Also, females are about three times more likely to get PTSD (something that increases their cost to the public). For these reasons, and because female cops are normally useless in fight or brawl situations, we shall no longer have female patrol police officers or female combat military, including combat military. Women will continue to work in many police and military roles, but they shall no longer be regular patrolling police officers, or combat military, including potentially combat military. This constitution rightly holds that nearly all women are no match for nearly all men in a fistfight.

44/ It must be pointed out that female police officers and small male police officers will feel the need to cuff people more often than with larger sized officers male officers. And this represents a compromise of civil rights, and an injustice to the people that cannot be tolerated. This is part of the reason why we require all of our police officers to be stronger than average for the men of our nation.

45/ Having the fairest, least violent, most rational, and most idiot proof justice system is an essential aspect of a free

society. On the other hand, the total equality of females is mostly symbolic and not really terribly important in comparison. This isn't a good trade off for society.

46/ All sexual abuse of women reports shall be taken by female police officers that have been victims themselves, unless this is impractical.

47/ This constitution holds that most women are no match for most men in a fistfight. Where the women are large, or extremely fit, or students of fist fighting, and the men are small or effeminate, the benefits of being a woman in a fistfight may not apply. However in general, a man is required to put his arms up and to block, and to allow a woman to strike his arms at least half a dozen times before he may strike her back. And then he should not hit her with a fist, but with an open hand. And he's not allowed to hit her across the face or on the jaw in self-defense. Where multiple women are striking a man, the man must first declare that he will start fighting back. Male police officers shall not be allowed to hit unarmed females under any circumstances, including when the female hits the male police officer.

48/ Having weak patrol officers results in more people fighting back, and more injury and death on both sides. This constitution does not protect the equality of women and physically weak people in the role of uniformed police officer. People who are not being arrested, can't be handcuffed unless there is a clear risk. Also, the added risk to female officers cannot be used to justify hand cuffing. The critically important right of the people to be free of any sort of police abuse greatly exceeds the rights of smallish women to work in law enforcement.

49/ So long as suspects being arrested for nonviolent crimes do not appear about to flee, and remain reasonably non-combative, and there is no other emergency situation, they shall be allowed at least 2-minute to put their hands behind their back for handcuffing upon the statement that they are under arrest. During this 2-minute time period, officers are supposed to repeatedly warn the suspect that if he doesn't present his hands for cuffing, the level of police force will rapidly escalate.

50/ People who present their hands for cuffing upon notice of arrest by police shall not be knocked down, or forced to lie upon or against any surface. They may however be seated on the ground or handcuffed to a stationary object. The correct police command is: "You are under arrest please put your hands on your hips so I can easily handcuff you". No longer shall there be any humiliation arrest ritual where police force arrested people to lie face down on some filthy ground, on a place where most people would never even sit down. This shall no longer be allowed except for people who resist arrest. Also, police shall not knock arrestees down who are over 60, or white haired, or frail looking or normal sized women, or pre-puberty children.

51/ Police cannot strike people with their fists or clubs in order to get their hands into cuffs unless the person has been violent or tried to strike them. Where police strike people with their fists or clubs, and the people have not done anything to harm the police, the police may be charged with assault.

52/ Where police are holding people in such a way that they cannot present their hands for cuffing, and then abuse the suspect for not presenting his hands, this shall be considered

assault. However this sort of assault shall get an officer dishonorably discharged from the police force. Also, the Senate shall look for similar police tactics and punish these.

53/ Police shall not unnecessarily knock people over, or tackle them, or trip them, or slam them against a surface, or send them to the ground unless they are combative, or reasonably thought to have a weapon, or there is another good reason explained into the live video record around the time of the arrest.

54/ Police shall not touch the necks of suspects, or keep them from breathing, or gouge the eyes of people they are trying to arrest. Police shall not strike or injure non-combative suspects as a way of subduing arrestees. The Senate may add other things to this list from time to time.

55/ When police say over and over stop resisting, this can often be regarded as an admission by police that the person is not resisting.

56/ When police officers slams a person against the ground, it shall be considered as baton strike to the head when the person's head contacts the ground and this causes injury. If this is accidental, or it comes from a combative suspect, then it should be considered accidental by the law. If it is not accidental, then the officer who slams the suspect to the ground might be charged with gratuitous violence against the suspect.

57/ Police shall generally not handcuff people under arrest that are 8 or younger, or over age 72 unless they were recently violent or extremely uncooperative. Cooperative, non-violent people that are 10 or younger, and those over age 65, and non-violent females, shall generally be handcuffed with their hands in front. Those handcuffed in front shall be allowed to keep their pocket telecreens. Where people present their hands for cuffing in back, police must cuff them as they are. Police shall not knock people down on the ground who present their hands behind them for cuffing upon notice by police that they are under arrest, unless there is a reasonable danger or reason that has been read into the record. Police shall not be allowed to knock people down who are over age 50, or under age 11, or if they are females, unless there is a weapon or significant struggle first. Police officers may be charged with assault when they strike people with their fists, or inappropriately knock people down to the ground and injure them during an arrest. And this especially when the arrest results in no conviction. Where people are handcuffed in front, they shall be allowed to keep their iPhone.

58/ Police shall not touch the faces, necks or heads of nonviolent people. Police are not allowed to punch, kick, topple, tackle, stomp on non-combative suspects, or suspects that are squirming out of being handcuffed. Also, police must disengage and not strike anyone once the handcuffs are on the accused. When police unnecessarily beat suspects or cast them on to a surface, or trip them, or allow them to fall down during their arrest (or similar actions), this shall be grounds for dismissal of charges. Also any sort beating of suspects by police after the handcuffs are on shall be grounds for criminal charges of police abuse, and there shall be no qualified immunity protections for this.

59/ All police shall be well trained in how not to cause serious injury while arresting suspects. If an arrest injury involves

suspected broken bones or torn ligaments, or joint injuries, the county must do imaging and the files sent to a randomly selected diagnostician from more than 200km away. Police who are judged to have intentionally broken a suspect's bones, or torn their ligaments, or dislocated their joint, or who intentionally caused brain or organ trauma, or who beat handcuffed or restrained suspects: These police shall be subject to criminal charges of assault. Also, police that are judged as too rough with their arrests over time may be fired or dishonorably discharged from the police.

60/ Police shall get great leeway in the use of force in their efforts to arrest combative suspects. Police shall get reasonable leeway in the use of force in their efforts to arrest non-compliant suspects. However police shall have almost no leeway at all with people who are obviously no threat to them. This includes most women, children and old men. Police shall use extreme care in arresting old people and people holding small children.

61/ When mothers or single parents with children under age 10 are arrested or taken into custody by Government, they shall not be separated against the parent's will until after there is a conviction, unless the parent has shown some indication that they may harm the child. Also, pre-trial, mothers arrested with their children must be given private cells or rooms designed for mothers arrested with children. This paragraph shall however not apply to mothers who are prostitutes, or are licensed to consume more than 3 portions of alcohol per 50kg of weight per day, or they look high on video and also test positive for amphetamines, or non-prescription opiates, or certain other mafia drugs that the Senate elects to include.

62/ For their own protection, everyone with either senile dementia, or mental retardation is supposed to wear a particular sort of stainless chain medic-alert bracelet that cannot be fidgeted off. Like minors they may also be prohibited from leaving their township if they get start getting lost, or get into trouble doing this.

63/ Police cannot shoot people with firearms who have tasers if there are two or more police around. If there is one officer, and one person with a taser, then the officer can shoot.

64/ Police shall not be allowed to bend people over when they are in handcuffs unless the person is known to be violent and dangerous.

65/ Where police are called to situations where there is somebody with a gun inside of their own residence, and there is nobody else on the premises, or they are allowed to leave, police are not allowed to break into the premises until at least 4-days have passed. Instead, the occupant must be summoned out by the police, and if they don't come out, and it turns into a standoff situation, the occupant shall be charged appropriately for having a standoff situation depending on how long it takes for them to come out and surrender. There should not be police officers rushing into peoples places and shooting them because they are in arms in their own home and refuse to come out.

66/ Police shall never be allowed to intentionally collide their vehicles with other vehicles, or people unless they have the right to shoot the person while they are fleeing. Indeed, the two tactics shall be regarded as rough equals. Police shall have every right to block the way with their vehicles, but they

can't collide their vehicles to stop people. Also, police shall not have the right to point guns at people to prevent them from fleeing, unless they recently shot or stabbed someone, or they are kidnapping someone, or they have a bomb or WMD. Also, instead of high speed chases, police must dispatch drones and follow or predict the fugitive's destination, by closing off the road.

b/ Police shall never be allowed to intentionally collide their vehicles with other vehicles when there are bystanders around, or where there is no use of firearms.

67/ There shall never be any consequence if arrested people fail to respond to police questions. Also, there shall be no right of police and government people to demand immediate answers to the questions they ask the people. Everyone has the right to take their time and fully understand any charges against them and to access the law library and to formulate a response at their leisure. Nobody accused of a crime shall ever have to respond to any police questions, or statements made by police. Also, it shall always be a crime where officers attempt to extract confessions from people.

68/ The ultimate arbiter of what is good local police conduct shall be a county Senate jury, and nobody else.

69/ When large numbers of people attempt to storm police stations, prisons, military bases, armories, or the nation's borders, all involved with the storming may be shot dead.

70/ When police go into active shooter situations especially, they shall now send in micro drones with IR, to read for the gun's heat and the shooter's heat signature and on regular video. These drones can distract and talk to the shooter. Several go in. Maybe the police break windows with heat and water and then send in the kill the human directed drones.

71/ There shall be no obligation on the part of the people to open the door for police that do not have warrants. The people shall be free to use the intercom, or a phone, or shout through a closed door.

72/ There shall be no right of police to force their way through people when they come to the door, unless the police witness a felony in progress. If the people can't trust the police not to do this, then they will not come to the door.

73/ When police are making orders, and the people do not do anything in response, this shall never be a crime. Nobody shall every be compelled to stop any police suspect because some cop shouted: "stop him." Nobody shall every be charged because they failed to take some risk to help police, or because they didn't understand some situation. Our government does not have these agents called police officers that can run around and make anybody do anything that they want them to do.

74/ Where people are subject to arrest, or they have a failure to appear in court, government must repeatedly send notifications of this fact to their must check email address which shall have multiple pop-ups, ups informing the person to go and turn themselves in for an automatic discount on fines and jail time. They may get a bigger discount for many sorts of crimes. Also, there shall be many crimes that also allow convicts to start their sentence time in a work camp like Catalina Island. Also, no fine by government or others, and no arrest warrant shall be valid unless it is sent to the person's must check email address.

75/ Where suspects run or even walk fast to avoid police,

police may tackle these people. Where stationary non-compliant suspects are pulled down, or climbed on by police, this shall also be tolerated where there is reasonable cause to arrest them.

76/ Police qualified immunity is not apply to private security guards and where they injure people with insufficient cause, they shall go to jail just like anybody else. Their employers may also be liable for the acts of the private security guards they employ.

NR'27. POLICE CONDUCT

1/ Police are the servants of the people, and not their masters, and they are supposed to act that way. When police act like the masters of the people, when they talk down to the people, like they are our masters, they should be discharged from the police force on the first offense.

2/ Where practical, all valid police stops must be by uniformed police, with their numbers shown front and back on their uniform in big conforming sized letters. So the people are supposed to either say to their telescreen: " 1234-5678 verify this police ID number...", or maybe they scan a QR under the national police number. This eliminates fake police, and also most government people exceeding their powers. Everyone contacted by police is supposed to verify. And all shall have 30-seconds to verify the identity of all government people the first time they meet. This process also automatically creates a bookmark for both the citizen and the government person. The citizen is thus able to check to see if the government person was doing what they were supposed to be doing and make a report if the government person was doing something else. Every person with any Government power to order the people to do anything must have one of these numbers, and their powers shall exist in very narrow areas and precise taskings described for the people when they look the person up.

3/ Police are not supposed to have political, agendas or support any political party, or political cause, including police related charities. It shall be a felony when police are involved in the arrest of political people, in order to harass them, or discourage their involvement in political or group matters.

4/ Everyone shall be entitled to due process of the law at all stages of the judicial process. Therefore, police must be polite when stopping people who might always be found innocent. Where an excessively large number of people complain about the bad behavior of an officer, also providing video evidence, that officer must be investigated. Where police make large numbers of arrests that are thrown out, the police officer may be discharged from working in law enforcement for life.

5/ Officers shall not be allowed to question people about things that are not related to the reason(s) they've been stopped.

6/ It shall be a felony when police:

a/ Beat suspects.

b/ Plant false evidence to help with conviction.

c/ Take bribes to arrest people or let them go.

x/ Also, police shall not be allowed to intentionally touch people that they're not arresting or conducting a valid search

on, unless they're separating them or helping to assure their safety.

7/ It shall be a crime for police to handcuff, frisk, search, or arrest people without sufficient cause as a means of harassing them.

8/ Police shall be expected to be experts in what is illegal conduct for the people as well as for police. When police are acting outside their mandate, when they are exceeding the authority of police, they shall have none of the special protections normally given to police. Also, when police exceed their mandate by a wide margin they may be fired or even jailed.

9/ We call to attention to Robert Peel's fifth policing principal: "...by constantly demonstrating absolute impartial service to law, in complete independence of policy and without regard to the justice or injustice of the... individual laws". This line shall hereby be stigmatized as propaganda. Instead we shall say that police shall not enforce laws and directives that are clearly insane, stupid, or unconstitutional. Also, police may at times be held accountable for enforcing laws that are obviously insane, stupid, or unconstitutional, especially when they harm peaceful people. These limitations on police behavior are important because they gets at the crux of government's ability to severely malfunction.

10/ Police shall not be allowed to go door to door unless there is an actual hazardous situation. Police shall never be allowed to ask for money while in uniform or out of uniform, even for unrelated charities.

11/ There shall be a single national code of police conduct, just like there is a uniform building code. What can police do, and what can't they do? When can they search? When can they order people out of their cars? When can they pull a person out of their home against their will and arrest them? When can they take their guns out? When can they fire? This constitution calls for the Senate to create a precise and well known set of national rules for police conduct.

12/ Every person shall have the right to record all interactions with police and government officials, and when government officials or police, take punitive, action against those recording them, this can be a crime. It shall be thought that all good police officers proudly welcome civilian filming of them doing their job. However, it shall be thought that all bad police officers do not like to be filmed, because they do things that are wrong, and the video might be a big problem for them. Where people are filming police interactions with the people, the police may not ask for ID from the person filming. That person shall have the right of anonymity in regard to the police he is video monitoring.

13/ Police and other government officials shall not intentionally form lines of officers or otherwise obstruct the view of those who are recording, or shine lights at the cameras, or do other things to interfere with the constitutionally protected right of the people to record the activities of their government workers. Police who intentionally block or prevent recording of other Government workers (including police) acting illegally or brutally may be considered involved in the illegal activity on that fact alone. These prohibitions include when police surround people to hide what is going on from those recording. Police and government officials may also be charged with a crime for

preventing the people from recording them and monitoring them while they are doing their official duties. However, police and government workers shall must be left alone when they are not engaging with the people. Police acting to hide the brutality of other police officers may be considered co-conspirators.

14/ Government officials including police officers that order the people to stop recording should be fired on those grounds alone, just as police that don't have their cam(s) on for when people are accusing them of mis conduct. Also, it may be a felony where police or other government officials unjustly seize, delete, or destroy recording equipment or recordings from the people justly recording their illegal, or semi-illegal conduct. This crime shall be considered obstruction of justice.

15/ The right to record police shall encompass the right to record them in either audio or video, or both, and when one or both parties are aware of the recording. It shall also include all people that police are talking to and dealing with, unless these are crime victims that object to the recording.

16/ When making arrests, police shall be expected to be more gentle with people who have obvious special health conditions such as people who are pregnant, old, or in wheelchairs, or who are small, or obviously frail, or children, or women, and people with small children. Also, people who advise arresting officers of a healthcare condition during arrest should generally be treated more gently. However, people who have special medical conditions shall be expected to comply with the police during arrests, and not to run away or strike back in any way. Those who run away (but not walk away) shall lose their special healthcare protections and shall be treated like anyone else fleeing from an officer.

17/ Policing and police departments shall be thought to be about ensuring public safety, and reducing crime, and no part of policing should be about police officers dominating the people. One of the most important rule-them-out flaws of police officers is when they seem to enjoy dominating the people. Also, where police officers unnecessarily push and rush and create situations where they end up dominating (or worse, harming) the people, they should not be allowed to be police officers any longer. In the future, police in yellow and red situations will be flagged by AI for examination by a Senate jury on police monitoring duty. These shall get an alert tone that a Senate jury is watching/listening. Then if the Senate jury orders the officer to chill out, or to disengage, the officer must comply.

Officers that don't follow the orders of a Senate jury shall mostly be fired for insubordination. But also, there shall be no qualified immunity for rogue officers after a Senate jury monitoring them orders them to disengage. There shall also a strong bias towards giving officers qualified immunity and safe harbor status when they were obeying the orders of the Senate jury. AI shall also compile the preliminary police report framework for police officers to edit. These preliminary police reports shall have time stamps for transit to calls, arrival time, when police hit the contact button, GPS pings, and the voice to text log of conversations, when police draw and use firearms or non-lethal weapons, and issue citations issuance. Each notation links to a section from the various video cameras around the officer(s).

18/ In a democracy of the people by the people and for the

people, police must be thought to be servants of the people that exist primarily to help the people. Police shall never be thought to be hired to lord over the people. Police are supposed to be a background function that mostly only intrudes with police powers when crimes have been committed.

19/ It shall be thought an insult to our dear freedoms, when our hired police officers make us jump to it — so we may be subjugated by their domineering egos. This sort of domineering behavior by police should be considered offensive to all free men. This is not what we want from our public servants — its policing gone awry. In fact, policing shall be as little as practical about officers dominating the people. Officers that demonstrate an strong inclination towards dominating the people should be excluded from policing for life in any land of free men. Officers that are rude in their implementation of state power shall be warned a number of times and then dismissed. It shall be thought domineering and abusive when police demand immediate compliance when no emergency exists. The people shall have the right to take a few moments to get their heads around the fact that they are under arrest, and that their penalty may be increased by up to 20% if they resist arrest, and by up to 10% if they fail to position themselves for handcuffing when police state that they are under arrest, or that they are being detained pending justifiable fully reported police handcuff detainment.

20/ Except in emergency situations, the people shall always have a reasonable amount of time to consider what an officer says, to think about what is being asked, and how to go in that direction. To perhaps ask a question back. And nobody should ever be in any way punished for failing to jump to it when a police officer asks this, or even if they command it.

21/ Police officers should never appear to act as if they are short tempered. This is the exact opposite of the sort of person we want as our police officers. Police officers can be fired simply for losing their temper in a semi-stressful situation. Police shall not display theatrical levels of anger with the people, even in truly stressful situations. Police departments should strongly disfavor officers and candidates who are violent natured and hotheads. These are supposed to be afraid to become police officers.

22/ Police shall be required to be honest and truthful in their arrest reports and sworn affidavits regarding the people that they are arresting. Where police file charges and make arrest reports that are clearly contradicted by evidence, this shall be considered a form of perjury. Then these police officers should be fired. When police perjure themselves repeatedly, it shall be considered as a thing that disqualifies people for police service. It may also be a crime.

23/ Police officers that make mistakes and then blame others — and police officers that lie for their own benefit should not be working in policing. This should be so especially when officers insistently double down and triple down about their errors. When this doubled-down lies are discovered, it should be considered a disqualifying act for policing and grounds for dishonorable discharge from policing.

24/ Police officers that do the following should be dishonorably discharged:

a/ Arrest too many people for crimes and circumstances that almost never result in a conviction.

- b/ Arrest people or without stating a good and valid reason.
- c/ Have an egregiously low arrest to conviction ratio.
- d/ Have an egregiously low arrest to release ratio.
- e/ Have an egregiously high arrest violence ratio for a given neighborhood.
- f/ Harass people for recording when it is their right.
- g/ Harass too many people for their lawful exercise of free speech.
- h/ Investigate, harass, or charge people for trespassing without a prior complaint.

25/ The Senate shall establish national minimum police conduct standards. The Senate shall also create a great movie library of police training videos so our nation's police forces are all well trained. Some of these videos will be for school children, so they know the law.

26/ Police officers shall not:

- a/ Use obscene, indecent, profane, derogatory, sarcastic, or ironic language while on duty or in uniform.
- b/ Engage in criminal, dishonest, excessively violent, or disgraceful conduct whether on duty or off.
- c/ Endanger or do harm to bystanders with their driving or gunfire.
- d/ Steal or attempt to steal.
- e/ Use excessive force in making arrests.
- f/ Display excessive anger or other negative emotions while making an arrest, or conducting an investigation
- g/ Abuse their power as a police officer to harass or toy with people for their legal non-compliance.
- h/ Engage in any behavior that reflects badly upon the fraternity of police officers.
- i/ Fail to act with courtesy towards the law-abiding public.
- j/ Express any prejudice regarding race, religion, sexual preference, politics is national origin, disability, or lifestyle.
- k/ Grab or restrain people unless they are planning to arrest them or unless they seem to be endangering somebody's life or health or property.

27/ There shall be different rules for police and the people. The people shall be free to say many more unkind things to police than police can say to the people.

28/ The new police system is expected to be liked more by the people due to:

- a/ Elimination of futile drug prohibition laws.
- b/ More reasonable weapons carry laws
- c/ Elimination of police profit and benefit of arrest and conviction.
- d/ Senate supervision of police.
- e/ More contactless ticketing, and contactless speed cameras.
- f/ Elimination of more career criminals from society.

29/ Police shall be required to de-escalate situations where practical, and never to unreasonably escalate situations. When armed people are barricaded somewhere, police shall be required to wait and get them when they step out, unless there is a good reason not to do this. When police escalate situation without a good reason, resulting in people getting hurt, the officers should not be police.

30/ When non-police raise their voice and yell at police, it shall not be considered an act of violence with regard to police officers, even if the people are yelling horrible profanities and the worst insults at the officers. In a

democracy of the people, police officers shall be expected to dutifully endure the insults and criticisms directed against them, and to act in a fair and unbiased way with the people who are violating the laws of the nation. However, those judging the arrest video shall be free to consider insults and taunts against officers to establish the state of mind of the accused and in deciding what to do the the case against the accused. Also, the people shall be free to insult the police as much as they want, but all the police cam video can be shared freely among all the other officers in the county or some smaller area.

If it isn't a crime to chant "Fuck Joe Biden", how can it be a crime to use profane words on a cop? So surely the people must be able to yell non-threatening insults at police. Also, it shall be a crime for police to arrest people for insulting them. It shall also, be thought a good thing to have police officers with thick skin, thick enough to withstand the worst insults, and they know who hates them.

31/ Police may not ask people if they have a criminal record or if they've been in trouble with the law before. Police shall have a computer systems where they can run people's names.

32/ It shall be a crime for police and other government workers to bluff the people into thinking they have powers that they don't actually have. This shall include offers to go easy on people for answering questions, or talking to police. Nowhere shall this crime be as vigorously prosecuted as with police stops and police orders, and especially police searches. Police do the same thing over and over every day, and they shall be expected to know what they can do, and what they cannot do. Also, each job in Government shall be listed in a searchable online master directory compiled by the Senate, along with its powers over both civilians and Government workers.

33/ Police shall be clear about what is a request and what is an order. Police shall not be allowed to say ambiguous things like "I need you to do X", because it's impossible to tell whether that's a command or a request. Police must use one of the following police scripts:

- a/ "Could you please move out of the way", or "I am asking you to move out of the way".
- b/ "I order you to move out of the way. This is a valid police order."

x/ Police must abide by refused requests. Also, police are not allowed to ask for things and later demand them under the same conditions. Once a police officer asks for something, they are prohibited from demanding that thing unless the circumstances have changed in a significant way that must be read into the police record. Where police demand things that they're not allowed to demand, they shall be fired.

34/ The Senate shall compile a detailed list of reasonable things that police officers are allowed to order the people to do, and under what circumstances they may be ordered to do those things. Private security guards shall not have any power to order people as police do. It shall be a crime for private security guards order people around, or otherwise exceed their authority

35/ What is a lawful police command? In our land of the free, we shall be hundredths of an inch persnickety with the the precise point the surveyor places for the things that our police

can command our free people to do. To this end, the Senate shall compile and regularly update a precise set of laws having to do with the limits on what police officers can legally command, what they might be allowed to legally command, and what they can never legally command.

36/ Police shall only have the most limited rights to command people. Also, all police rights to command people shall only exist in emergency and dangerous situations. No emergency or dangerous situation = no right to make lawful commands. It shall be a crime when police make demands on the people in non-critical situations. Telling people to get out of the roadway or keep their hands visible are always allowed. Also, there must be a matter of obvious safety, or obvious and pronounced risk to someone: Which reason must be stated to the person being commanded and also into the record at the time the police officer is making the lawful command.

37/ All police officers shall undergo extensive training on what is a lawful police order. We shall also teach all of our 11-14 year olds what a lawful police order is, along with the penalties for all sorts of crimes, and how much jail sucks. We will show our children and tell them many things about the law. And we will show them lots of armed robbers that got shot by their victims, or bystanders. We will save every video we can find about victims killing their would-be predators. These people also get a little Senate status and a certain amount of celebrity from being in school or PSA media.

38/ Failure to comply with a police order shall:

a/ Not apply to people who fail to act, or they simply don't grasp what is going on.

b/ Shall always be a low level misdemeanor and hard to get a conviction for.

c/ Not be grounds for arrest, but only a citation.

d/ Be considered a crime of judicial procedure.

39/ It shall be a crime and a firing offense when government workers use the threat of arrest, handcuffing, or investigation to motivate the people to do things that the government worker does not have the authority to order.

40/ Police officers shall be required to be honest all the time and when police are not, they are not fit to be police officers.

41/ Police may ask once, but they shall not be allowed to solicit or pester the people into pressing charges, or testifying or making a complaint.

42/ Where people are not being detained, and police have approached them, the police must walk off when the person asks if they are being detained and they are not being detained.

43/ The Senate shall compile detailed rules on when police are allowed to ask people what they are doing, or where they are going.

44/ There shall be a right to disagree, challenge, dissent and pushed back against those in power, either elected, appointed, or hired. Everyone shall be allowed the right to tell their side of the story.

45/ Police shall be allowed to question the associates of people arrested and charged with a felony. Associates include those regularly riding together, traveling together, those found together by police at the same private address, or the same private vehicle. However, these people cannot be forced to give a statement.

46/ Where police or anyone else in the judicial system offers

favorable judicial treatment for cooperation, this practice shall be considered both criminally corrupt and fraudulent. Police shall not be allowed to promise, offer, or even mention favorable treatment for cooperation with their investigation. This is because the difficulty of the policing job and the job of judging a case should not be allowed to alter the outcome of the judicial process.

47/ Police shall not be allowed to coach people in what to say, or to put words in peoples mouth in any direction and at any time. Police, shall not be allowed to arbitrarily order people around, and this especially in frustration or anger that the person is not complying with their invalid, or semi valid instructions.

48/ Regarding documents given by police to the people to sign:

a/ Written confessions to crimes, and written plea agreements shall have no validity in court, whether signed or not.

b/ It shall thought that such written statements by police commonly introduce much injustice to the system, while doing little to improve the trail system.

c/ All police and prosecution rights waiver agreements shall be void. This is because all rights of the people with regard to the police and justice system are by nature all inalienable, and these rights cannot be signed away or sold for any consideration either in money or legal system benefits.

d/ Police shall be prohibited from explaining what is on written forms that they give to the people, but must instead refer these questions to the Senate's online form explanation page.

All written forms given by police to the people shall be created by the Senate, and the Senate shall have detailed web pages explaining all police forms.

49/ Vague statements by people accused of crimes such as: "yes I did it" and I "confess" shall have no meaning in court. However, statements indicating where the body or loot is buried shall generally assure conviction.

50/ Where police officers embezzle money, or steal things, or do things that are clearly illegal, they shall be subject to double penalties. Where police officers have conspiracies to steal in cases where the valuables will apparently go unnoticed or money from the police budget they may be charged with triple penalties.

51/ When cities are required to pay more than 5-year's wages in a judicial judgment or settlement, the officers involved must be fired unless the court declares the matter mostly an accident.

52/ In our armed nation, police don't carry arms for dealing with people holding sticks and trowels a screwdrivers, but for other people carrying firearms.

53/ All police must be citizens and native speakers of north American English so they can understand what people say. They cannot speak with a heavy accent.

54/ There shall be no conventions for police departments or officers.

55/ All police officers must study the common symptoms of the various mental disorders. At least 1% of the police initial and continuous education and heuristic videos shall be about Alzheimer's disease and mental illness, showing the many behaviors of people who are mentally ill.

56/ Caffeine is well known to increase aggressive behavior, and as we don't want aggressive police officers. Therefore we

shall try to keep both our police and our private security from using caffeine while on the job. Except for late night shifts in deserted places, caffeine and other stimulants shall not be used by police or private security while on the job. Later, the Senate may phase out caffeine entirely from law enforcement and private security, even going to far as to drug test officers for it.

57/ The Senate shall regularly and randomly test the urine of police, judicial system staff, military personnel, pilots, commercial drivers, and others for mafia drugs.

58/ It shall be thought that some police departments currently have the wrong sort of culture. Therefore, the Senate shall compile a list of the most problematic police force divisions in the nation on a per full-time officer basis, and the short-spike of the most egregiously problematic department shall be completely restaffed and all of their members shall be fired. The Senate shall do a similar thing with all police officers, except that these shall generally be banned from police and security work for life. The county recorder system shall track complaints against the various police officers in an anonymized way, including claims of bribery, and the most egregiously problematic officers shall be dishonorably discharged from the policing. Redundant and anonymous complaints, and complaints by felony and serious misdemeanor convicts and their householders and siblings shall not count.

59/ To prevent and minimize corruption, all branches of government, including the Senate shall be accountable to another body of government. No complaint process by any branch of government shall be under that same branch of government. Thus no complaint about police shall be administered or judged by other police officers, except as called on by the Senate.

60/ No government audit or investigation into internal affairs of government, workers, and past workers, (including, especially police) shall ever be anything but completely public. It shall be a felony to attempt to either make a government audit or investigation non-public, or to make it a secret.

61/ When police get fired for abusing suspects and others, they shall generally be prohibited nationwide for life from working in law-enforcement, private security, and any other occupation, where they dominate people.

62/ The justice system and police administration system shall support dishonorable discharges for police officers, and this shall go on the officers permanent record in the same way as a dishonorable discharge from the army goes on a soldiers record. It is thought beneficial to have a step between firing bad officers and jailing them. All dishonorably discharged police officers shall be prohibited for life, from working in law enforcement, security, or in any position where they hold power over other people.

63/ We want our police department and our judicial system to be absolutely free of corruption and lying. We also want to minimize both self-direction on the part of police officers, and also the discretionary ability of police to bring charges against anyone from a large pool of people.

64/ The county recorder system shall keep a record of all police officers in the nation. Once a police officer has been fired from one police force, he shall be considered

dishonorably discharged. Every police officer fired or dishonorably discharged from police force, or the military shall be banned for life from working in either police or the military or in private security of any capacity at all, and if he does, he shall be subject to immediate arrest for charges of impersonating an officer, even if he was working in private security or the military. Also, every time the Senate disciplines or reeducates an officer regarding a complaint, the disciplinary action shall go in the officers permanent lifelong record with the county recorder's never-forget system.

65/ One of the most important places for whistleblower status shall be thought to exist with regard to our police departments. When people file apparently legitimate claims against police officers, they shall have a sort of whistleblower status pending resolution, and neither that officer, nor any of his associates shall be allowed to initiate contact with the person making the complaint. When whistleblower subjects, or their agents intentionally make contact with their whistleblower, it may be treated the same as witness tampering.

66/ The Senate shall always have the right to fire any unelected government workers at any time, and for any reason, or for no stated reason at all. This shall be so for individual high-ranking J. Edgar Hoover types, and for whole departments of government. Never shall there be any agreement, any treaty, any union contract, any employment agreement that the Senate is not absolutely empowered to break at any time it elects and prorate the charges. This shall be thought an absolute and eternal prerogative of government. The Senate shall always have the right to fire unelected government workers for suspicion of corruption or inefficiency, or that it is time for fresh people, or that the Senate thinks that it would be cheaper or better to start over with new people in a new organization. The Senate shall always have the right to punish government workers for their unconstitutional and illegal usurpations.

67/ When police and jail guards commit violent, unprovoked, and clearly wrong crimes, such as rape and severe beatings of the non-violent people they encounter in their work, they shall be subject to double penalties, and all must be tried with a jury of no less than 21 Senators in a jurisdiction, no less than 200 km away from where they work.

68/ It shall be a crime when police abuse their power to retaliate against:

a/ Their critics.

b/ People who reported them.

c/ People who have insulted them.

d/ People who were acquitted.

69/ Police shall not be allowed to call or contact people without a reason, which must be stated into the record.

70/ Government shall not be allowed to pay people to report on their citizen non-felon neighbors, or spy on the people.

71/ Police officers not on an emergency call and not in hot pursuit are not allowed to speed or use their sirens.

72/ No policeman carry a long stick, such as an Indian lathis.

73/ Where participating in the torture of the public is a rite of passage for joining the police force, all officers in the department shall be subject to charges.

74/ Police shall not be allowed to contact people through their family members and friends, but must always try to contact

the person directly. However, where they go to a person's home, and the person is not there, or they cannot find the person, they may also use the family members.

75/ It shall be a felony for police to abuse their power to harass those investigating their department. No police force shall conduct any search of the premises of their critics in the media, nor shall they have any right to arrest their critics. They may stand witness for other police departments, but they shall not themselves do these things with their critics, and those that are suing them in money court.

76/ The Senate shall establish rules for what police can and cannot be ordered to do by their superiors. This is so that police orders remain reasonable, and the people ordering police around, do not acquire too much power over the people. In fact, all standing orders of local police must be established by the county Senate, and all national standing orders by the national Senate, with the local captains only allowed to deal with complicated situation that the ordinary officers may not clearly see.

77/ Government workers (including police) shall have no right to force the people to do things that will either endanger or harm them. Where police orders endanger the people, these shall not be lawful or valid. Also, police shall not have the power to do things themselves that endanger the people.

78/ In situations of fires, and natural disasters, police and all other government officials shall have no right to keep people from leaving a danger zone by any route or means at all that does not block the exit route for others. All officers attempting to block the way may be shot dead, or killed or restrained in other ways, and it shall be considered self defense on the part of the people doing this. Also after the disaster has abated, police shall do nothing to keep residents from returning to their places.

79/ The rules of police driving the people from public places shall be:

a/ People committing minor crimes may be driven off instead of being ticketed or arrested.

b/ People involved in brawls, and loud arguments may be driven away for disturbing the peace. In These cases, police must identify everyone and file a report to everyone's ID. Then police must order everyone to leave, unless they live, or work, or have school in that place. Where police order people to leave a place, that order shall be considered like a restraining order for 1-year. Police shall send a copy of the restraining order to the person's must check email address too.

c/ Police shall be allowed to drive people from crime scenes for a reasonable amount of time.

d/ Police shall have the power to drive people from urban and suburban guerrilla camping situations on either public or private property, authorized or not.

x/ Also, police shall be allowed to cut off interactions with the people. They shall be free to say things like "sorry, but I will not take any action." or, "sorry, but we have work to do, can you leave us alone. Then if the people don't leave, they can be charged with interfering with an officer. Where police approach citizens, the police must leave from that location once the police-related talking stops.

80/ There shall be double penalties for police and intelligence agents, and government workers who take money from

foreign governments, cartels, drug smugglers, child traffickers and the like. It shall be a felony for government workers to take in money from any source without booking the funds into a national government general fund account with a county recorder's office.

81/ Firemen acting in a reasonable way shall never be responsible for damaging property to stop an actual fire or a reasonably suspected fire. All kicked-in doors, broken windows, water/foam/chemical damage, and areas destroyed by fire-break shall be the responsibility of the property owner. In all such cases, the property owner shall be considered lucky that their property was not utterly destroyed by the fire. Furthermore, firemen shall never be responsible for not arriving quickly enough, or for fire damage due to their failure to act. However, police on the other hand, shall have limits on the damage they may cause: Where police cause excessive damage, they must either repair, or pay a fair amount when they cause damage to persons and private property under the following conditions:

a/ During high speed and otherwise dangerous police vehicle chases, where these involve people who are not convicted of a violent felony arising out of that police stop.

b/ During police vehicle chases where police intentionally collide with a vehicle and nobody in the vehicle is convicted of a firearm felony arising out of that police stop.

c/ During situations where police break-into buildings where only one person is inside, or where there is no reason to suspect that the people inside will harm each other.

d/ Where police accidentally shoot people, they must pay for their medical care, and where they accidentally kill people they must pay dependents a reasonable amount.

e/ Where drivers refuse to stop for police, but do not drive recklessly or brandish arms, or create any identifiable hazard that necessitates police intervention, police can only follow them and wait until they run out of fuel. A reasonable amount of patients shall be required of all police officers that are stopping people.

f/ Police shall have no right to be impatient or require immediate compliance from the people. They must always wait a reasonable amount of time, however the people not complying for no good reason may suffer reasonable penalty multipliers for resisting arrest if that is judged to be the case.

82/ Given that we are now in the age of video drones, and the vehicle fleet will all have numbers on their roofs. So high speed vehicle chases shall no longer be thought to be needed (except until the first drone arrives). Except for this, high speed chases shall not be allowed any longer. Police shall also no longer be allowed to cause vehicle accident where people are traveling at greater than around 40kph. Instead they can use drones to follow the vehicle like a wolf pack. Also, where police injure or kill unrelated third parties chasing suspect who are running away from them, the person who is running away gets 50% of the regular sentence, and the cop gets up to 60 days in lockup.

83/ Where police or bystanders die, or injured in the process of police chasing suspects, but through no cause of the suspect they're chasing, except that they're chasing the suspect: There should be no charges against a person being chased for the death or injury caused by police under these circumstances. To do otherwise is to give police legal carte

blanche in their actions while chasing suspects. Where police damage third party property either chasing suspects or breaking in, police must repair the damage they caused. Where police damage the property of a suspect that is either nor charged, or not convicted, police must repair the damage they caused. In both cases, this shall include the electronic devices, doors, windows and vehicles of the people, but not landscaping or uniquely valuable possessions.

84/ No police department shall ever have to pay punitive damages. Also, there shall be maximum amounts that people can sue police departments for. When people are not physically but only insulted, racially profiled, dirtied, injured by police, mistakenly arrested, and no property is damaged by police: there shall be no money paid by police. Where people are wrongly injured by police, the maximum liability amount shall be as limited elsewhere herein. Non-citizens shall have no right to sue police for anything.

85/ All intelligence/spying activities must be authorized by all responsible sluices. It shall be thought important that around 10% of the work of each intelligence agency will be spying on the other intelligence agencies of our nation. This to keep everyone in the nation's intelligence agencies honest and straight.

86/ Police not be allowed to use racist words, and may be fired for using them.

87/ Police shall not be allowed to request or solicit charges, and when they do, it shall not be valid to charge people with charges solicited by police.

88/ Police must be dedicated to justice. It should get police fired (and perhaps convicted of a crime) when they:

a/ Knowingly conceal exonerating facts about an innocent person to obtain a conviction.

b/ Abuse their power to personal take action against someone.

89/ Police shall not cover, redirect, or disable security cameras, and where they do this, it invalidates searches and can shift the burden of proof. It also disqualifies police officers from working as a cop. The presumption is that the cop is angling for some dirty cop stuff.

90/ Police shall not be allowed to use tasers or pepper spray on individual women, individual small children, and people who are simply not complying with them. There shall be no tasing or pepper spraying anyone who is already handcuffed/. Also, police must give a reasonable amount of time for compliance. This especially when they ask suspects to put their hands behind them for cuffing.

91/ All police officers must pass the police constitution test with a perfect score. Police can be jailed for attempting to enforce clearly unconstitutional laws.

92/ No police officer shall ever be jailed or fined for failing to arrest people, or cite people, or protect people, or keep people out, or keep them from harming someone else.

93/ Police must file an arrest statement form from their tablet and photograph each person arrested between the time the suspect is arrested, and the time he is taken away.

94/ Police are never supposed to beat the people, and this especially in public. Where police are beating people who did not strike them, or physically harm them, as they commonly do in India, and as they did with Rodney King, and this is documented, the police may be shot in community self

defense for no penalty under the law. This is a very simple thing for police to avoid. Simply do not beat people in public as they do in India. This rule will have the added effect that it makes it harder to gain control of our society through tyranny.

95/ Police are supposed to be very most eager to investigate the crime of murder, especially mass murder and serial killers. Where they are not eager, they shall be investigated and reviewed.

96/ There shall be 2 overlapping national missing persons police departments with overlapping jurisdictions. The predominantly urban force shall be run by the Judicial Sluice. the predominantly ex-urban force shall be run by the Public Property Sluice. Keeping the people safe from death and abduction shall be thought to be one of the most important aspects of our government of freedom. Both the cause of death administration, and the county recorder system shall also have their own databases on missing persons. We want our government constantly looking for people who go missing. There is very often nobody else and it is only wise and prudent for all of us to put some consideration into this life and death matter.

97/ There shall be a national police training system that relies on video presentations. All the new police officers nationwide have to watch this media. Then they all must take the same test to qualify for the police training academy. And all the police training academies shall be the same nationwide, but regularly updated. The national standardization of police officers, shall also be thought a thing which enables more people to escape a poor part of the nation with a career in law-enforcement. It's also thought a thing that will lower the cost of finding good officers.

98/ Police shall acquire rank into 3 main ways:

a/ In progress with advanced police media. This shall be so particularly with detectives

b/ In solving cold cases.

c/ In years on the job.

99/ Police are not allowed to visit people for no reason. When police visit people who speak out about government, or the enemies of their political supporters, they may be tried for democide.

100/ It shall be a crime when Government people destroy or re-point cameras. Where police cover or disable, or attempt to disable cameras there shall be a presumption of guilt on the part of police, along with perhaps planted evidence, police lying and police mafias. Thus where police cover cameras all evidence gathered shall be considered as coming from the poisonous tree, and none shall be fully admissible as evidence in court. Also the person arrested under conditions where police cover, divert, or disable a camera, must be released on from jail pending government trial or government action. It shall be a felony when Government people wipe out records, even with a court order, even if it's a matter of national security, even if it's the CIA or FBI or some national security agency doing this.

101/ Police are not supposed to have anything to do with politics or political figures, other than defending them. When police arrest people on behalf of political figures for political reasons, they may be held as co-conspirators in the crimes of the people they are working with.

102/ There shall be a national police officer and security

guard record system. Once police are fired from one police department, they shall be required to get their record cleared before they may be hired by another police department, or before they may work in private security. This system shall also track all security guards fired from their jobs.

103/ People who enjoy dominating others, and having power over others should not be police officers. Also female officers need to behave as unemotionally as male officers typically do.

104/ Police shall not be allowed to order people around except for clearly stated reasons that have to do with public safety or the privacy of sex crime or injury victims.

105/ Recall the blue code of police officers that they never go against their brother officers. This shall be now be regarded as a thing of police officers that are under Ishtar's thumb. Similar codes should be regarded as key to having a functional deep state. Instead all police management shall be under rotating local sub-senators, so that there can no longer be a mafia in the police.

106/ Police shall not be allowed to tell people to put their phone/camera down except as a courtesy when they are being arrested. Everyone in the police station shall have the right to be handcuffed in front and shall be allowed to access their phone while in the police station.

107/ Police shall not be allowed to demand that people stay in their cars, or that they not stand in quiet streets, road shoulders, or other low traffic areas. They can advise this, and they can request this, but police shall not be allowed to order people to stay in their cars. Police shall also not be allowed to order people to sit down for no reason.

108/ All parking tickets shall be valid the moment the officer scans the car's barcode, or enters the license or vin number into the system. Also the physical ticket need not be placed on the vehicle. Also, police officers and meter maids shall not be allowed to place themselves in front of vehicle to prevent the vehicle from driving off pending a parking ticket: Where officers do this:

a/ And the officer is injured, it shall be exclusively the officer's fault, and the officer's health insurance shall not cover the injuries.

b/ And the officers responds with force, this shall be considered as an unprovoked action.

c/ Where officers harm people for leaving the site of a parking ticket, any harm to others shall exclusively be the officer's fault and there shall be no qualified immunity. If the officer injures or kills the person, the officer shall go to prison.

109/ Police officers have to signal and drive like everybody else unless they have their emergency lights on, or they have an identifiable reason that they can read into the live record

110/ Once a citation or ticket is issued, the officer must then leave.

111/ Police officers in uniform, or using police vehicles shall not be allowed to work for others.

112/ Police officers, military personnel and other government employees shall have a responsibility to disobey clearly unconstitutional and unjust orders especially when these orders are made by unelected people, and not by Senate juries. Where these encounter unconstitutional and unjust orders, they're expected to seek out another Senate jury to decide in the matter, and to give them guidance. However,

where they can make a good case that the order is either unconstitutional or extremely unjust they generally cannot be disciplined or fired for not obeying orders.

113/ Police shall not be allowed to instruct people to put their communication devices or cameras down, unless they are under arrest. This will be a disqualifying sort of thing for police officers because they are attempting to hide their actions and this creates a presumption. Where police punish people for recording their activities they shall lose their ability to be a police officer for life.

114/ Whenever police see somebody with a face mask or an Islamic head covering, they must identify them. Also, there should be no right of people with mask faces to hide their faces, and this especially includes Muslims.

115/ Once a reasonable person would presume that no crime is being committed. Police must disengage and go somewhere else when they approach people.

116/ There shall be triple penalties for police that steal and commit clear crimes that are advantageous to them personally.

117/ Police shall not have the power to tell people to stand here or there or to clear a place on public property unless there is a genuine emergency or a genuine hazard created that is stated into the live record.

118/ Retaliatory use of power by police and other government officials shall be a crime, and it shall be easy to get cops fired when they do this.

119/ The Senate shall have these situational police videos presented to the nation's police. Nobody can be a police officer until they watch all the required arrest media and take the situational test where other people do similar things. People that can't pass the situational media test can't work in law enforcement. And they have to get a 100% perfect score to be a cop.

120/ All police shall have ratios for citation/ arrest to conviction rate, and police should be afraid to have too low a rate. We do this to keep police to from abusing their power. Where officers have too low a conviction rate, they should get fired from working in law enforcement. Also, each arresting officer's conviction rate is presented at all court cases he brings.

121/ Whenever police initially contact with the people, the officer is supposed to say: I am officer smith number 123456, and the people are supposed to say "Hello officer, I am John Q. Public, number 0987654321, state your cause." Then the officer say why he has initiated a conversation with the person.

122/ Police that hide their badge numbers shall be fired the first time they get caught for this.

123/ With regard to COPS, no number, no uniform, and the person gets no Special police rights.

124/ Police have no special powers in hospital situations, and they have no right to make any demands of any healthcare personnel ever, except when they must evacuate a building due to a fire, gunman, or some other urgent situation.

125/ Police shall generally have no power make demands of third parties, not involved with crimes. At least there's no penalty for not jumping to it and obeying some random police officers sudden demands.

126/ To keep our women safe from police officers, there shall

be regular stings of police officers with women offering sexual favors to evade charges.

127/ Where police officers get involved with politically active people, and the politically active people feel threatened by the police officer, this can be a crime. Also if the politically active person is harmed while under arrest, the presumption shall be that corrupt police officers did it. Also, the burden of proof shall be on the police officers to prove that it was an accident. that they injured the great man. For the general assumption will invariably be that they injured the big figure out of corruption.

128/ Police cannot say that they are the law, or that the law is what they say it is. These remarks shall be thought to demean the people.

129/ Police and other Government workers shall be subject to the strictest enforcement of the rules when they humiliate the people. And this especially when they do it for no good reason, except their own personal emotional needs.

130/ The rules of police dispersing people from public places shall be:

a/ People committing minor crimes may be driven away instead of being ticketed or arrested.

b/ People involved in brawls, and loud arguments may be driven away for disturbing the peace. In These cases, police must identify everyone and file a report to everyone's ID. Then police must order everyone to leave, unless they live, or work, or have school in that place. Where police order people to leave a place, that order shall be considered like a restraining order for 1-year. Police shall send a copy of the restraining order to the person's must check email address too.

c/ Police shall be allowed to drive people from crime scenes for a reasonable amount of time.

d/ Police shall have the power to drive people from urban and suburban guerrilla camping situations on either public or private property, authorized or not.

131/ Police must keep a proper distance from the people, unless they're arresting people. Police shall not be allowed to put their face too close to others as a way to menace them.

132/ In Magna Carta paragraph 30 we read that: "No sheriff, bailiff, or anyone else shall take any free man's horses or carts for transporting things, except with the Free man's consent." Therefore, this constitution gives government people, the military, and especially police no authority to commandeer or seize personal vehicles, personal property, or other real property for any reason without direction from a court of proper jurisdiction.

133/ The saying of doctors, "do no harm" shall apply to police in regards to firing on armed people where there are bystanders nearby.

134/ Where police write tickets, they shall give the person they are citing their court date.

135/ In emergency situations, police may park their vehicles anywhere, however they shall not block traffic when there is no emergency. Police may however use any parking space, any delivery space, any handicapped space, or any public loading zone to park in. Police can't park illegally when they get lunch or coffee or visiting friends or talking to people in nonemergency situations. Also, even when police are on calls, they must make an effort not to block traffic. They must

try to get off to the side. Police can double park, but they can't block traffic. Police can leave their cars on peoples driveways and lawns.

136/ Private security guards shall have the right to follow people around on the private property of their employers, and to annoy these people and drive these people off at the behest of the property owner. However, this shall not apply to those people using their right of free speech to express first class free speech

137/ Whenever police punch or strike somebody's being arrested, when the arrested person has done nothing to provoke them, the arrest shall be considered the fruit of the poisonous tree and the officer should get demerit points towards losing their ability to be a police officer forever and dishonorable discharge. The courts may decide that this is after one case or it may be two or three, but the police officer after the second or third case must be discharged dishonorably , especially when there's multiple police officers abusing one person being arrest arrested who's done nothing wrong under the wall

138/ Police shall not be allowed to act vindictively against people who insult them.

139/ Officers may rely on on the statements of other officers, such as gun, or the code word or gesture for gun, or

140/ Where people have video evidence that contradicts what others are saying, police must give a reasonable amount of time looking at the video evidence before arresting people.

141/ Everybody shall have the right to talk to police officers, as if they were not police officers. Police officers must always treat the people with courtesy even murderers.

142/ Where there are credible out accusations of police brutality, or sexual abuse those police shall not be allowed to continue to investigate the person making the accusations.

143/ Police shall not separate people from their wallets and their phones until they are convicted. Women have the right to be handcuffed in front unless their there are definite risk. Arrested people also have the right to talk to their friends when they're being arrested.

144/ Print, smaller than 10 points shall not be allowed, and shall not be valid in legal agreements. Print smaller than 11 points shall not be valid for agreements with surprising clauses or unusual clauses.

145/ There shall be a public list of which crimes people can be arrested for.

146/ Police must declare all recovered goods on live recorder system video.

147/ Police must be reasonably patient with people.

148/ Surely it edges into a police state where police are allowed to lie and the people are not. No. We shall go in the opposite direction and say that Police are not allowed to lie to the people but the people are more or less allowed to lie to police without incurring an additional criminal charge for lying to investigators.

149/ There shall be no right to claim excessive force when an immigrant (particularly a Muslim or former Muslim) instigates or calls for a violent situation, even a fistfight, and then our one or more of our citizens intervenes.

NR'28. CRIMES OF JUDICIAL PROCEDURE

1/ We shall ponder the words of Baron de Montesquieu that "There is no crueler tyranny than that which is perpetuated under the shield of law and in the name of justice."

2/ The judicial process shall not be any part of the punishment, as things commonly were under the old system. Nor shall the judicial process enable police and prosecutors to punish people without due process.

3/ We shall not have a system where people can be hauled up on barely plausible charges, and then convicted only of crimes of judicial procedure.

4/ The judicial system shall work as fast as practical, so it can no longer be used to menace people for years as things were under the old system. Including the trial, no charges against a person shall live for over 60 days past the date that the accused opts for a speedy trial. Where there are no bio-forensics involved in the case, we shall have it that no charges against a person shall live for over 30 days past the date that the accused opts for a speedy trial. Where there are no forensics at all involved in the case (apart from video forensics), we shall have it that no charges against a person shall live for over 20 days past the date that the accused opts for a speedy trial.

5/ It shall be thought unjust and criminal to use any part of the arrest and trial system as the means of punishment. Also, a system with autonomous investigators able to charge whoever they want is surely a system that leads to corruption. Only Senators shall make decisions about who to seek out for investigation, and who to prosecute.

6/ Except for perjury in court or in an affidavit, all secondary crimes shall always be misdemeanors. Merely resisting arrest, or trying to run away without striking the officer shall not be a felony. Nor shall concealment of evidence, interfering with an officer, along with all public order charges, all shall be misdemeanors and 100% of the fine money for secondary offenses always goes to the national government's general fund. This is so the people collecting these fines never get to share in the fine money. Secondary crimes shall not have any standing in court without an underlying conviction relating to the secondary crime.

7/ No matter what branch of government, no matter if it is local police or some mighty KGB/CIA/FBI, all the procedural rules, all the civil rights, all the forms for engaging with the police bureaucracy shall be identical regardless of the area or division or whether it is country or national.

8/ We shall take a national approach to police recruiting and the police academy education system. We shall locate all universal, initial training (police academy, military induction, etc.) on a number of bases in the Western US in and with trails through the beautiful parkland areas, with the recruits staying only one night in each barracks and then going via marching and busses across the landscape. They also airlift to Kahuna island, Hawaii. and Vancouver island before induction.

9/ It is much better that we have strong penalties for primary crimes, and we have weak penalties for secondary crimes.

10/ As with all crimes, the Senate shall establish detailed rules regarding secondary crimes of judicial procedure:

a/ When is it interfering with a police officer, in the various degrees?

b/ When is it perjury in the various degrees?

c/ When is it resisting arrest in the various degrees?

d/ When is it destruction of evidence in the various degrees?

e/ When is it fleeing from arrest in the various degrees?

f/ What are the penalty ranges for each of the above?

g/ Which are misdemeanors, and which if any are felonies.

x/ It shall be recognized that any ambiguity here will be abused by police, so we shall leave as little ambiguity as practical.

11/ Crimes of judicial procedure shall not be seen so much as separate crimes, but circumstances related to other charges that cause the penalty to be multiplied. And therefore, instead of each judicial procedure crime having its own sentence, it is instead more of a multiplier for other crimes (unless this is simply not practical). So if there is no underlying non-procedural conviction, then the penalty multiplier will multiply by zero, and produce a sum of zero. Then there can be no conviction or penalty for that crime of judicial procedure.

12/ With some exceptions (such as when people interfere with another person's arrest), the accused shall not be arrested, or kept in jail pending trial for crimes of judicial procedure. Also, as a safety measure to keep innocent people from being jailed for crimes of judicial procedure, we shall be biased towards considering all crimes of judicial procedure as ticket-able offenses because:

a/ People normally can't be jailed for crimes of judicial procedure alone

b/ The underlying crime must proven to result in a conviction for the crime of judicial procedure to result in a conviction.

c/ Crimes of judicial procedure shall be thought of as hard to prove, even with an underlying crime.

13/ It shall be considered an abuse of power and a crime when police, prosecutors, or other government officials take action on their own, or even threaten to take action on their own.

14/ Slightly pulling away from arresting officers, or slight rigidity shall not be chargeable as resisting arrest. The pulling away must be clearly depicted on video and forceful in order for the suspect to be considered as resisting arrest. Also, where the police lay hands on a suspect before one minute has passed from the time they have said that the suspect is under arrest, there shall be even more leeway with regard to charges of resisting arrest, unless the suspect tries to flee.

15/ Non-action, and non-communication cannot be considered as crimes. Going limp or stiff shall never be considered as resisting arrest. Also not talking to police or investigators shall never be a crime. The people cannot be charged with a crime for failure to move or take action when no lives are in danger.

16/ Interfering with an arrest shall be reserved for third parties other than the arresting officer and the suspect. Suspects can never be charged with interfering with their own arrest. Where close friends, and especially spouses, mothers, and lovers and other females, and children interject themselves in an arrest, causing no serious physical harm to anyone, the charges for this crime shall be much less than when men and particularly strong men, interject themselves in an arrest. Same action, different people, different motivations. One stems from a good part of our humanity the other frequently stems from a bad part of our humanity.

17/ People that simply and harmlessly gather around their love ones while police are arresting those loved ones cannot normally be charged with obstruction of justice, or preventing police from doing their duties.

18/ There shall be no felony resisting arrest charges. Instead, there shall be other crimes like punching an officer, or endangering the public by driving very fast if applicable.

Where people do not comply, or they run from police, but do not directly harm anyone else in doing this, it shall always be considered a misdemeanor. Also again, fleeing from police shall be a secondary crime of judicial procedure, and there must be an underlying criminal conviction for the secondary crime to be result in any penalty.

19/ Charges of obstruction of justice shall not apply when people refuse to answer the questions asked by police. Also, obstruction of justice shall not apply where people fail to immediately jump and do something when people give them an order.

20/ There shall no longer be any crime of lying to investigators or police officers. There shall remain the crime of perjury, but perjury shall only apply in court, or in deposition, where people are under oath, or where they lie on sworn written statements. This elimination of the crime of lying to investigators shall be thought an important aspect of the right to remain silent, and also the right to due process in a fair trial.

21/ The right to remain silent shall always apply to leading questions, and repeated asking of the same question, and open ended questions, and questions asked with great drama or excitement.

22/ There shall be no special words, statements, or incantations required to invoke the right to remain silent. This right is always automatic and understood. The people shall always be free to say nothing in response to a police or Senate jury question, or they can say that they don't want to answer the question, or they don't feel comfortable answering questions, or they can use other similar words for their non-participation in police questions. Police shall not be allowed to pester people once they mention a lawyer. Police shall also not be allowed to grab people unless they are going to arrest them, or unless they are endangering somebody's life or health or property.

23/ Tampering with evidence shall be considered a secondary crime, a crime of judicial procedure. If the evidence relates to primary charges that did not produce a conviction, there can be no charge of tampering with evidence either for principals, or third parties.

24/ There shall be no crime of disturbing the peace, or breach of peace without a genuine and legitimate complaint from a non-police officer in the area that was actually disturbed by the noise of the person charged. Also, yelling about an apparent crime or a violent, or semi violent, or the death or extreme injury of a human shall never be charged as causing a public disturbance. Disturbing the peace shall be thought a crime of:

a/ confronting people in a violent way.

b/ Drunken yelling late at night.

c/ Loud late night parties in residential areas.

d/ Engaging in public fist fights.

25/ People suffering from extreme mental impairment shall generally not be subject to crimes of judicial procedure. However, if this exemption is granted, these shall be considered mentally impaired for life. Also, the courts shall require that all people who get special judicial treatment due to mental disorders get a mental disorder mark on their official government facebook for the rest of their lives.

26/ The people shall not be arrested repeatedly without charges being made, or convictions being secured. Where this occurs, the people so arrested may have the right to seek money damages from officers or departments for malicious arrest.

27/ Every aspect/subject of the court system shall have at least 3 different tutorials explaining how the system works and all common defenses for criminal charges.

28/ All laws from before the time of this Constitution shall be completely re-written as soon as possible. The new laws will be enacted before they are perfect, and fine tuned as they are refined.

29/ No county governments shall have the power to not enforce national laws, be they about immigration, illegal aliens, drug enforcement, taxation, or other topics. Notably, a similar clause does not exist with the UM and our national government.

30/ Just as we elect no forever Senators, we shall elect no forever laws except through the constitutional amendment process. To keep the legal code fresh, every component of every law shall stand for review by the Sub-Senate at least once every 5-years. The expirations shall be staggered to spread out the workload and power. Thus, 20% of laws will expire in each year.

31/ When people commit unethical or unpopular acts that offend public sensibilities and are not against the law, Government and the media shall not be allowed to audit and scrutinize their life record, searching for unrelated or overlooked violations to charge them with.

32/ Everyone exonerated of a crime shall have the right to have their name, image and other information put on the Senate's exonerations website. It shall be the responsibility of the public to treat all exonerated people as if the crime never happened.

33/ Any 10 active Senators have the right to visit any person in prison without notice, upon verification with the county recorder system that they are indeed senators, and no formal requests shall be required. This should be thought to be the right of all groups of 10 active Senators who care to get involved.

34/ No County judicial fine or penalty shall exceed the maximum amounts set by the National Senate.

35/ Every person in the land including visitors shall furnish government with two valid and current electronic addresses for receiving official government notifications. It shall be presumed that these accounts will be checked at least once every 7 days. Three emails to each account shall be the only way that many official notices including court subpoenas are delivered. The private use of this system shall be allowed for a charge of 4 hours wages per message paid in advance. Thus many subpoenas will be delivered via the government's electronic messaging system, although subpoenas and similar notices may also continue to be delivered in person.

36/ No less than 3% of instruction in grades 7 through 12 shall be about the nation's laws, its legal system, the nature of justice, and the value of a just society of free men.

37/ The courts shall generally not have jurisdiction in enforcing secrecy in matters of public or political importance or curiosity. The courts shall also always default towards releasing all documents at once. This however shall not apply in cases of sexual or physical abuse where the the victim would normally requests that the exact nature of the insult to their person be kept secret.

38/ With regard to the legal responsibility of parents for the criminal acts of their children, the following shall apply:

a/ Many children say things that they don't mean. It is wrong for society to punish parents for not informing on their children for their occasional remarks.

b/ If the parents have wound-up their children up into killers through abuse or rants, or directed their children against their parents enemies, then the parents can be responsible for the crimes of the children. However, if the parents are normal, and the children commit crimes that are unrelated to their parents, then the parents shall not be responsible. It shall be thought extremely difficult for parents to be held responsible for the acts of their children

c/ The agenda of Ishtar tries to burden parents with many responsibilities for their children, so fewer good people want to have children As with so many things Ishtar pushed/pushes for, this is a good inverted good compass for us, and we shall go in the opposite direction with our government for the people.

39/ The term "career criminal" shall mean anyone with more than 3 felony convictions over more than 3 different occasions. The Senate shall be required to punish career criminals more much harshly than people with two or fewer felony convictions. All career criminals in lockup shall be considered KTPR, or kill to prevent release. They are also subject to being executed in times of famine or invasion, because they are just too dangerous to have around. Also, no leader of men shall ever be subject to this career criminal section. Also, it shall be thought wise to permanently remove people from society the people who commit:

a/ One savage, heartless, or remorseless crimes against others.

b/ Two extremely violent felonies.

c/ Three rather violent felonies.

40/ Given the corruption of the prior national government, its criminal prosecutors, its lenient sentences, its lax early release from incarceration system, and its lenient ideologue judges and corrupt courts, the Senate prosecution system may try or retry any of the following:

a/ Everyone with 3 violent felony convictions or more, whether or not they were recently involved in another crime. This is 3 or more separate violent felony convictions (3 violent crimes, on 3 different days, with 3 separate trials).

b/ Everyone with 8 or more misdemeanor convictions on separate occasions. (8 misdemeanor convictions on 6 different days, with 8 separate trials).

c/ Every person who has received an especially lenient sentence or non-prosecution for crimes.

d/ All murderers, kidnappers, and savagely violent criminals given less than a 20-year sentence.

e/ Anyone arrested and then released in a district now judged by the Senate as having a corrupt criminal justice system.

41/ Non-government adjudications shall not be recognized by Government, or presented to any third parties as having any significance or meaning. The terms jury, trial, and judge shall be reserved for official Government use. When the people use non-Government adjudication methods, and then use the terms trial, jury, or judge, in describing those adjudication methods, it may be considered fraud. In other words, people cannot use non-government adjudication, and then say that a matter has been "tried", or that a "judge" or "jury" has made a judgement.

42/ When people are arrested and these are apparently non-violent and little threat to officers, they shall generally not be kept in behind-the-back handcuffs/ wrist-cuffs. Instead, apparently non-violent people shall be kept in handcuffs/ wrist-cuffs in front of the body. Dangerous people may have their handcuffs/ wrist-cuffs attached to a waist chain. Also, the wildly violent, and those who fight with police upon their arrest may be kept in remote-control taser cuffs while out of their cell. This constitution does not prohibit felony convicts from being kept in taser cuffs. Indeed, it recommends that everyone in maximum security prisons is kept in taser cuffs for their entire prison vacation.

43/ In criminal court, all prior convictions and police contact reports shall always be admissible as evidence against the accused. Also, it shall not matter how young the accused was when the prior conviction, or police contact report took place. No court records shall be sealed from the court on account of youth or for any other reason.

44/ While the names of non-violent convicts under age 18 shall be kept private, the names of violent criminals age 12 or older shall not be protected or kept from the public once they have been convicted. Also, convictions of those over age 12 shall be counted in determining a person's lifetime crime record for removal from society.

45/ There shall be no shopping cases around to prosecutors. If the first submission doesn't get picked up, the matter shall not go to prosecution. Also, there shall be no judges deciding what gets heard in criminal court. Only randomly drawn Senate prosecution juries shall make the decision to prosecute on behalf of the public.

46/ Statements by victims to others about the identity of a perpetrator shall be perfectly valid as a tip. However, in court, such statements shall be considered hearsay and not admissible as evidence.

47/ The justice system must be dedicated to justice, and not conviction numbers. It shall be a crime when police or prosecutors knowingly conceal exonerating facts about an innocent person to obtain a conviction. Also, neither police, nor prosecutors, nor anyone else shall ever get any increased pay or recognition for more having convictions.

48/ The Courts shall not have the power to block or hinder parties in legal disputes from sharing their evidence with the public. Where court staff do this it may be considered a crime.

49/ Police and other Government people may only use sting operations where they pose as criminals on either side in order to find lawbreakers engaged in:

a/ Murder, beatings, and other violent crime for hire.

b/ Corruption of government and fictional citizens.

c/ Corruption of media people and news reporters.
d/ Election-related corruption.
e/ Professional and medical corruption.
f/ Unreported, or under-reported commerce in order to avoid tax payments.
g/ Sex with minors under age 16, and prostitution outside the Government STD system.
h/ Charity donations, and OPM corruption.
i/ Collusion with foreign governments.
j/ Trade in illegal arms, or stolen merchandise.
k/ Trade in illegal data, or spied or hacked information.
l/ Trade in crypto currencies, money laundering, or the activities of organized crime.
m/ Unlicensed trade in Mafia drugs but not marijuana plant parts. Trade in tobacco alcohol or marijuana to minors.
n/ It should be well known that to prevent these sorts of crimes, government has people going around conducting sting operations testing people. Also, sting operations shall not be allowed for other sorts of crimes.

50/ In sting operations, no charges shall be possible for:
a/ Breaking obscure laws. All sting operations must test with activities that everyone knows are illegal. For example: buying stolen merchandise, or undisclosed barter, or buying Mafia drugs without a license, or sex with young-looking people who can't get clearance from the STD prevention system.
b/ Committing a gray-area offense, or a borderline offense. The offense must be clearly illegal.
c/ Any crime that is legal in one part of the nation, but illegal in another.
d/ Any crime that is only a crime because the suspect moved from one jurisdiction to another.
e/ People targeted in sting operations due to their political beliefs, or political activities.

51/ Where sting operations are used, a higher standard of evidence shall be needed:
a/ Sting operations shall not be an excuse for police fishing expeditions, where police see what they can find to charge the people with. Where police/Government are using a sting operation to test for one sort of crime, other discovered crimes shall not be chargeable, except for murder, kidnapping, rape and other extreme crimes.
b/ In sting operations, it shall not be possible to charge the suspects with any crimes of judicial procedure such as lying to investigators, perjury, or resisting arrest.
c/ Talk is cheap, and people seldom follow through with the words they say. And this is especially so when other people are coaxing words from people. For sting operations to be valid, there must be some physical action, or detailed planning on the part of the person charged in a sting operation. Merely saying a few words about a crime, or agreeing to a crime, or going along with the government's planning of a sting operation, or meeting with people to talk about a sting operations crime shall not enough to obtain a conviction. The person charged must take some hard action towards the commission of the crime. They must bring a firearm, or explosives, or take the stolen goods, or meet the minor or fake prostitute, and agree to having sex.

52/ No charges of conspiracy shall be possible where sting operations are used. Also, for charges of conspiracy to be

valid, there must be some physical action, or detailed planning taken towards the conspiratorial crime under consideration. Casually talking, and meeting shall not qualify as conspiracy. There must be real-world action or detailed planning beyond talking and meeting and sending vague and general emails to have charges of conspiracy. Also, there shall be no charges of conspiracy for shadow crimes such as trespassing, creating a disturbance, dumping garbage or even feces on someone's property. Nobody shall ever be charged with conspiracy to dump feces on someone else's property. People may be charged with dumping feces, but not conspiracy to dump feces. Furthermore, there shall be no charges of conspiracy to commit a crime where police or other Government people use sting operations, or otherwise participate in the planning of a crime.

53/ The form and conditions of all sting operation schemes must be pre-approved by the national Judicial Sluice and only government may conduct sting operations on non-government people. However, non-government people may conduct stings on government people. Also in sting operations, all assaults by the sting operations people shall be considered completely unprovoked.

54/ Particularly attractive people shall not be used in sting operations, and neither sex, nor flirting, nor friendship can be part of any sting operation that is not about underage sex.

55/ In all sting operations, everyone gets the same sting bait and the same sting test. Nobody gets a version of a sting operation that is easier to fail.

56/ In order for a sting operations to convict, the defendant must be caught on audio-video clearly doing and making detailed plans about the thing they have been charged with.

57/ The people running a sting operations shall never be able to target people for testing. All targeting for sting operations (if any) shall be done by randomly drawn Senate prosecution juries. Also, certain people shall not be subjected to multiple sting operations on the hope they can eventually be entrapped.

58/ All stings must be recorded on county recorder system video and pre-announced so that the people conducting this thing cannot blackmail the person they catch. This will be for all sorts of sting operations.

59/ There shall be no sting operations by non-police. This is because non-police stings can quickly turn into situations of blackmail, extortion, or vigilante beatings. Also, allowing non-police stings can also lead to set-ups of innocent people and grave miscarriages of justice. However, were people come across criminal activity in their daily life and start recording video evidence, this shall be admissible in court.

60/ The people caught in sting operations, a bit more than others shall be regarded as innocent until proven guilty in a court of law. Thus any beating of people caught in sting operations shall regarding his unprovoked assault.

61/ Where there is any sort of negotiation about turning a person in to police who was caught on video, the person agreeing to not turn the person in, and the person offering a bribe not to be turned in may be easily charged with bribery or extortion as applicable.

62/ The Senate shall review and update all felony crime statistics with regard to the race of the person convicted of each felony crime. Then the Senate shall publish updated

national crime statistics based on race, age, sex, transsexuality, homosexuality, education level, reading level, orphan, single mother, father left before age 2, 6, 10, 14, 18 etc. This shall be so for the period since the year 1990 at least. The Senate shall also update the crime statistics by 9-digit zip code, so we can know where crime levels go vertical, where our criminals tend to live together, and where we need special carry laws. The Senate shall also cross-reference for all the people who previously lived in an ultra-high crime zone (while it was such) and port this information to police ID files so police can know who they are dealing with. The Senate shall also compile graphs on offenders and what percentage repeat offend 1-50 times, and how often some criminals get arrested 1-50 times.

63/ Except for grand perjury (which is bold-faced repeated lying in a court room setting) there shall be no crimes of judicial procedure that are felonies.

NR'29. QUALIFIED IMMUNITY

1/ The term qualified immunity shall not mean blanket or total immunity for any police conduct, but immunity subject to strict qualifications and detailed rules of police conduct. Thus qualified immunity shall never be a total shield for police officers. Also qualified immunity can be stripped where police officers are not conducting themselves properly. And this especially where they discharge or misuse firearms and engage in violence for situations that are clearly not life and death. Police qualified immunity shall never apply for the following police activities:

a/ Matters related to the arrest or harm of people merely exercising their right of first class free speech in a crowded public place, a town center, a college, or a shopping center. Indeed, the police mandate to guard the right to free speech and free protesting, and the right to bear arms as citadel rights shall be considered the most important aspect of policing. Those officers that get too close to the line with regard to violating the citadel rights of the people shall be stripped of qualified immunity and dishonorably discharged from the police department for their acts as police officers. Here we must note that the words are "too close to the line", because the protected free speech area includes all the marginal areas. Police training is supposed to repeat many times that protecting the citadel rights of the people is the most important part of policing. Also, it shall not matter who orders the violation of a citadel right of the people, be they a monarch or a legislature, the police shall not be allowed to violate any citadel right of the people no matter who orders it.

b/ Beating, harming, or demeaning a suspect in handcuffs, or a suspect that has already surrendered, or any non-violent suspect that has done nothing more than try to slip away or keep their arms away from handcuffs.

c/ Choking suspects, or grabbing/compressing their neck, except where the suspect is hitting officers, or holding a weapon.

d/ Unnecessarily piling on suspects and causing them to die or be greatly injured.

e/ Injuries caused by police seeking to domineer over innocent people, or where malice can be inferred by the statements or actions of officers.

f/ Police that injure or wrongly arrest people who are only standing public witness by watching or recording them.

g/ In matters where officers violate people's right of free speech in public, when they're doing little more than communicating with people about political, justice system, or group matters. Police are strongly advised to stay away from matters of free speech, and approved messages, no matter who commands their action, even if it is a legislature commanding the silencing of

h/ Third party injuries due to a high speed police vehicle chases

i/ In standoffs and hostage situations that were needlessly rushed and escalated to shooting or death situations by police.

2/ Qualified immunity refers to the legal protection we give our police as they do their dangerous job that often requires split-second decisions. Qualified immunity shall apply to freedom from criminal prosecution, as well as immunity in money court. Qualified immunity shall also apply to the police departments themselves. The Senate shall establish more detailed rules for what police actions are covered by qualified immunity and what police actions are not.

3/ There shall be no qualified immunity for police and private security guards that injure people with eye jabs, throat punches, ground slams, and similar sorts of hand-to-hand combat moves that can cause life threatening and lifelong injuries, as well as other hand-to-hand combat moves that the Senate elects as off limits. Also where private security guards use weapons of any sort, on people, including sprays, or they assault people with their hands, there shall be no special protections for them, and they shall be treated exactly as anybody else when they assault people. Likewise where security guards are assaulted, they shall have no special status under the law. Also, private security guards shall not be allowed to either carry or use pepper or other irritant sprays. Also, police shall regularly pat down private security guards around once per year when they see them, to make sure they are not carrying illegal weapons.

4/ Qualified immunity shall only apply when the recorder system's police cams and microphones are on. When the live police monitoring is off, police officers can lose all their qualified immunity protections. For this reason, many police officers will demand double and triple independent cam systems.

5/ The county recorder system shall have a police cams near me feed, so the people can verify that a nearby officer's cam is on and recording. This system shall also work by location and by badge number.

6/ Under the old system, there were laws where people fleeing from police in a vehicle and evading arrest were responsible for the injuries caused by the police chasing them. This old rule shall now be thought to be due to corruption and policing for profit, and a great desire of police departments to transfer responsibility away from their police officers. Under our new system with self-driving vehicles and everyone's license plate number painted on top of their vehicle in big characters, and drone enabled police departments, we shall no longer allow high speed chases, or this transfer of liability. These shall be thought to be both unnecessary and a violation of Blackstone's formula that it is

ten times more important that the innocent (in this case bystanders) not be harmed, than the criminals be brought to justice for each violation. Thus there will be few high speed chases, and police shall rely more on drone video to follow suspects.

NR'30. POLICE AND SECURITY UNIFORMS

1/ All police nationwide shall wear one of 12 standard vests that all look roughly alike, except for the front and back emblems. All police head gear shall also have the last four digits of the officer's badge number in large numbers front, back and top. This badge number shall include the county of the officer and the officer's national police badge number. The shoulders of the uniforms shall also have the last four digits of the officer's badge number. Police shall not use military-style or camouflage uniforms. Police officers and other government officials shall be fired when they hide their numbers or fail to display them. It may also be a crime for government people to hide their numbers. However, because police proudly display their numbers on their uniform in giant letters, it shall no longer be required that police identify themselves when asked. Shelby thought that the people will simply use the police website and look up their number. They should show the face of the officer at the top of the page, displayed with no name, or other, identifying facts, except which police station the officer is working at.

2/ Unless a person is wearing one of these 12 vests (or a jacket/windbreaker version with a matching number), or they are accompanied by an officer wearing one of these uniforms, citizens do not have to consider that person as a police officer with regard to arrests, or ordering the people to do things. Also, crimes committed against out-of-uniform police shall be treated by the law as if they were committed against a normal citizen unless the criminal knew that the person was a police officer.

3/ Each police officer must wear a police uniform and proudly display their badge number, or the people do not have to consider that person as a police officer with regard to arrests or ordering the people to do things. The rule shall be: No police number displayed, or no uniform, and:

a/ No special police powers or protections.

b/ No power to arrests or detain.

c/ No power to order people to do things.

x/ Also, where police are out of uniform (even if they are wearing shirts that say "POLICE") and they enter someone's home, or grab somebody, and the police are injured or killed, the person injuring the police shall have every right to claim self-defense, and the police shall have no defense against their actions. This shall be so even if the plain clothes police say that they are police and flash their badges.

4/ This constitution generally despises undercover police officers as elements of totalitarianism and police states. It shall never be a crime to expose the identity of undercover police officers, including giant databases of their pictures. Undercover and plain clothes policeman shall have no special police powers or protections at all, and this shall be especially so where they surprise or pounce on the people that they are seeking to arrest. Undercover police holding guns on people may be a shot dead by bystanders and incredulous suspects

as if they were common criminals. Being an armed undercover police officer shall always be thought extremely dangerous, because their weapons will serve an excuse for people to shoot them and self-defense or community self-defense. Due to the potential for abuse by non-police, undercover police shall not be allowed to stop females. Also, there shall be no use of undercover police in traffic/vehicle policing.

5/ All police must put on their uniform/super suit on, or they shall not have any super powers under the law. Also, where plain clothes policeman, appear to be engaging in an armed assault, bystanders shall also be allowed to shoot them as if they were criminals, holding someone up. We don't want the existence of undercover police officers taking anything away from the people's ability to defend themselves.

6/ Our democracy of the people, by the people, and for the people shall be biased against plain clothes police and secret policeman, for these are far more often that not the staff of abusive, corrupt confiscatory totalitarian governments. Plain clothes police shall only be used in Senate approved sting operations as per the Senate's rules of sting operations herein.

7/ In Lectures Collected by Arian 4.13.5, Epictetus warns posterity about secrete police officers: "In Rome, reckless men are trapped by soldiers [secret police forces] in the following manner. A soldier [police officer] in civilian clothing sits down beside you and begins to criticize the emperor. Then if... you add what's on your mind, you will a moment later be bound and lead away". Where this sort of tyrannical, eliminate-all-opposition situation occurs, it is the duty of the people to kill all such secret police officers either on the spot, or later after the people have their Joseph McCarthy moment where they wake up to the tyranny they have been subjected to.

8/ All non-police security and security-like people must wear one of 5 numbered vest designs that all more or less look alike, but are different particular colors that are completely different from police and fire department uniforms. Non police private security must wear a solid Day-Glo pink vest. If they are armed, the vest shall have colored bands like UK police, however, the color bands shall be fire-hydrant red. All non-police security guards shall have a badge number recorded with the county recorder system, and just like with police their bade numbers shall be displayed prominently front and back. This badge number shall appear on their security guard vests just like police. Private investigators shall wear a pink vest with lime-green stripes. Repossessors and bounty hunters shall wear day-glow lime green vests that say either "REPO-MAN", or "BOUNTY HUNTER" in big black letters when they are doing their seizures.

9/ All official uniforms shall have 23-mm letters in a contrasting color that say either "County Police", "National Police", "Unarmed Private Security", "Armed Private Security", "Repossessor", "Bounty Hunter", or "Private Investigator". If they are a police officer, the uniform should also state the department letter, and the division number. All numbers must be rubberized into the fabric of the uniform. This is so that the people will know when they are dealing with police that must often be heeded, and when they are dealing with private security guards that have not special powers at all.

10/ If the police or security guard number on the uniform does not match the face on the county recorder system's national database, these people may be presumed by the people to be criminal imposters. Also, it shall be a crime for repossessors, bounty hunters, and private investigators to engage with related parties in person and out of uniform. Furthermore, bounty hunters that are working out of uniform may be treated as kidnappers, and repossessors working out of uniform may be treated as thieves.

11/ All police officers, all security guards, and all police vehicles shall have a unique lifetime national registration number for their uniform. Everyone must wear their uniform while clocked in to the county recorder system and on the job.

12/ All headgear including helmets, visor caps, and sun hats must have these numbers proudly worn in front and back. There shall also be a bar code on top of all head. Body guards do not need to wear a uniform.

13/ Unarmed private security shall not wear bulletproof vests, or carry firearms, knives, clubs, handcuffs, or objects that resemble firearms or use bullet proof vests while they are in uniform. Also, it shall be a felony for guards hired as unarmed security to go to work armed or not wearing a bullet-proof vest in defiance of their public status, or employment agreement. Also it shall be a crime for unarmed security guards to not wear the standard pink vest of an unarmed private police with black badge numbers while at work.

14/ It shall be a felony for private security guards to wear any sort of badge or patch that gives people the impression that they're actually genuine police with any special powers. Private security guards are not allowed to wear anything that resembles a badge or a firearm in anyway, or they shall be charged with impersonating a police officer. This includes printed badges and things that appear to be a badge on first site. They're also not allowed to wear utility belts or have anything that looks even remotely like a police officer's uniform.

15/ All police cars nationwide shall be marked in the same color pattern. No undercover police cars shall be used for highway patrol purposes. Also most highway patrol and road patrol police officers will no longer be needed due to the self-driving system.

16/ Police that are out of uniform and not accompanied by a uniformed police officer shall not be allowed to visit residences, or stop people, or detain people. All police officers shall be required to have uniforms.

17/ Police in uniform shall not engage in any activity not directly related to policing and their policing instructions while on duty.

18/ It shall be a felony for non-police, security guards, and other government employees or contractors, or non-oath police to wear a police uniform or a police-like uniform, or to deceive the people into thinking they are police or that they have police powers. Private security guards that threaten to arrest people or put people in jail shall themselves get put in jail for impersonating an officer.

19/ Private security guards shall not have any special rights to do any of the following:

b/ Write citations or fine people.

c/ Arrest people.

d/ Use handcuffs.

e/ Charge people without a police officer.

20/ All firemen shall wear red uniforms with yellow stripes and smoke penetrating shoe lights. Paramedics have white shirts, jackets, and vehicles with medical green stripes. Day glow and reflective bright colors shall always suggest emergency services of one sort or another. Fireman shall no longer rescue animals from non-fire situations. All new firemen must be able to carry fully grown men out of a burning building, and for this reason, there shall no longer be any new female firemen. All females that are weaker than an average male must be let go immediately.

21/ There shall be no other class of police or security people except police (county and national), deputies and private unarmed security guards. Private security guards may be required by Government to wear police cams.

22/ Police shall be ranked like the military. New police officers (national and county) shall be simple unranked "officers". Unranked officers shall replace the Marshals service. After their test/probation period, of two years, and after they pass the private's exam, they shall become a private. Then after a time and passing the relevant tests they shall become a corporal, (an investigator, or senior field officer), then a sergeant, (a senior investigator, or senior station officer), then a sergeant major, (a senior station officer). The Sergeant Majors, must obey the Senate and its agencies and juries.

23/ The rank of each emergency officer shall be indicated on their plastic custom routed badge. This badge shall copy the form of the SDPD eagle badge, and say rank on top (Officer, Private, Corporal, Sergeant, Sergeant Major), then the County name, then Police, then the badge number. All badges shall have a thick outer layer that is the color of 24k gold with the text etching revealing a blue inside color. The badges are supposed to be light-weight flexible, and hollow. All officers shall wear their uniforms and badges, except when they are on Senate-assigned sting operations. Also, all emergency services workers shall wear police-only windbreakers or jackets.

24/ All private security guards must state their employer whenever asked, and it shall be a crime for them to lie about this. Yelling and threatening by private security guards can easily be considered assault.

25/ Anyone wearing clothing that says police, who is not a police officer must be charged with the impersonating a police officer. Where private security guards pretend to be police officers, it shall a very serious crime, because we never want these guys pretending to be real police.

26/ Where private security tackle people, or injure non-combative people who are merely people trying to get away, and police do not arrest or charge the person restrained by private security, the private security person may easily be charged with assault.

27/ Where uniformed police officers and private security are displaying their genuine badge numbers, there shall be no need for police to say their badge number when asked.

28/ Police may only pull vehicles over in marked police cars with typical spinning light bars on top, and when they're wearing police uniforms.

29/ It shall be a felony for people to pretend that they are police or that they work for government, or that they hold

government powers they do not hold.

30/ All police shall be clean shaven and with head hair under #1 cut. No sort of police can have longer hair.

31/ All police shall wear microphone wrist watches for priority communication with HQ. Raise it to your mouth and it automatically comes on with an attention beep on the other side. All police guns shall have a similar microphone set up. Both will have two channel microphones, one for close and another for ambient sounds.

32/ Where police talk with the people, neither side shall be allowed to wear sunglasses.

33/ Where private security guards are running around without their uniforms on, and without their numbers on, or with a fake number they or they are wearing or using police insignias, or cars marked as police, they shall be charged for impersonating a police officer. The maximum penalty for killing a person that is impersonating a police officer or wearing the wrong private security uniform number shall be 1-years in lock up. The word police can only appear on police vehicles. All private security guards in vehicles must use vehicles that are clearly marked as private security.

34/ All private security vehicles must be hot pink in color. No religious or ethnic group police forces shall be allowed.

NR'31. GOOD SAMARITANS AND BYSTANDERS

1/ Nobody shall be considered as causing an altercation when they try to restrain someone committing or fleeing from a murder, battery, sex crime, theft, or other felony. The Maximum penalty for killing thieves during the theft or the recovery of stolen valuable property shall be 3-year.

2/ Those who take reasonable emergency measures in life or death situations and accidentally injure someone in the process shall generally suffer no penalty either criminally or with regard to money court liability. For example, it shall not be possible to sue good hearted good samaritans who injure the person they are trying to save. And this especially when their actions reduce the harm. For example the man who tries to catch a baby falling from a high floor shall never be sued because he dislocated the baby's arm catching him, or worse he barely slowed the baby down before it hit the ground. The people jumping to get involved to help in fast situations can never be sued in money court or prosecuted in criminal court even if they were incompetent and did everything wrong. Also, there can be no charges of groping where people are about to walk in front of a vehicle, and someone else physically stops them in a reasonable way. Also, those who want to sue their own good samaritans shall have no standing in either criminal or money court.

This policy shall extend to the conduct of armed bystanders that come to the rescue of people who are the victims of gun crime. In fact, it shall be held that empowering armed citizens to take reasonable action in community self defense is the easiest, low cost, and most powerful thing that we can all do to reduce violent crime. Also, in these situations we shall be the most forgiving of those who also unintentionally harm line of fire victims, as police so commonly do.

3/ Normally, where there is violence or crime, or a threat of this, and people can't or don't want to intervene, they should

start recording with their bezel cam.

4/ The people shall have the right to use reasonable force to detain people who obviously committed crimes. Where defenders slightly over-respond to obvious illegal activity, they shall generally suffer a very slight penalty. When the people act in good faith and detain criminals pending the arrival of the police, for apparent crimes, the detaining people shall suffer no criminal charges, or money court liability, provided the person so detained is not unnecessarily or excessively harmed by the detention and they are informed that they are being detained for the police for a certain vaguely stated crime such as stealing, or touching someone. It should be noted that the verb here is "abused", and it is not "harmed". Again in this sort of situation, the Senate shall find or produce many videos that demonstrate the law for the public.

5/ When Non-police good samaritans intervene to stop a fleeing criminal, these good samaritans shall have great freedom under the law in using detaining/restraining, blocking, and tripping methods that do not cause serious harm. They shall generally be free to grab, hold, block, lay upon, hold down, and trip, tackle, and fleeing suspects pending arrival of the police. They may also put the person's arm behind their back. However, the good samaritan must have either witnessed the crime, or he must see uniformed police chasing someone who is presumably a fleeing criminal. Also, when police are chasing someone, people may trip that fleeing suspect, or open a door in his way, or shove a shopping cart in the way of the suspect.

6/ Where apparent criminals are justly detained by victims and good samaritans, and these apparent criminals are fighting back against those who are detaining them, or trying to keep them from injuring people, or causing extreme damage to property, the detaining or blocking people shall get most of the protections and penalty multipliers that police get in similar circumstances. Also, once the law breaker starts striking, or fighting back against those legitimately detaining him, the good samaritans shall then be allowed to fight back, as if they were repelling an assault. However, simply trying to squirm loose, get away, or run away shall not be considered fighting back. Furthermore, minor injuries to genuine criminals who are grabbed, tripped, tackled, bent or held down shall not be covered by the law. There shall be no prosecution of these defenders in either criminal or money court.

7/ It may be a crime for bystanders to do any of the following:
a/ Attempting to impede an officer that is physically chasing a suspect, however intent must be proven. People who are not paying attention cannot be charged with this crime.

b/ Being part of a crowd that is harassing an officer making an arrest, or

c/ Entering an arresting officer's security space of 6 meters while he is making an arrest. Once a person becomes aware of the arrest they must back up to 6 meters, unless they are unable to do this due to obstructions or a crowd.

8/ Those having fistfights maybe sprayed by bystanders with pepper spray.

9/ Everyone released early from incarceration shall be tracked, and their victims, may go online and see where they are at any time. It shall be a felony for ex-convicts to go near their former victims or to stalk them electronically, or to attempt to employ others to do this for them.

10/ It shall be a felony for police, government officials, Senators, and journalists to tip off people about upcoming arrests and search warrants.

11/ When females have fist fights, nearby men are supposed to break it up immediately. When a biological male is striking a biological female it shall be the duty of all men to stop the abusing male. If abusing male is very large or strong and the people around are weak, then these may use clubs.

12/ Private property owners, homeowner associations, and even entire townships shall have the right to demand that visitors verify their identity as a condition of entry. These may also cooperate with sharing lists of people banned. However all such bans shall require an official government conviction, and most shall be based on video evidence.

13/ Where it is common for armed robbers to stop vehicles by standing in front of them or stopping their vehicle in front of them, it shall be easy to claim self defense (and community self defense) for running robbers over with a vehicle, and for colliding with their vehicle if any. Also drivers shall be free to run over non-police on the road that are pointing a firearm (real or simulated) at people. Where gunmen by the roadside are legitimately run over, the driver may also go back and forth over them.

14/ In times where mobs of pedestrians are commonly stopping people and dragging them out of their vehicles and beating them, drivers shall be allowed to run over people over who are mobbing their vehicle and trying to break in. The people in these mobs may also be shot.

15/ Government shall normally pay bounty to those who kill people committing armed robberies and similar armed felonies, while they're committing felonies. This shall include behind a wall riflemen security in various stores that are commonly held up.

16/ In situations where two or more males are beating someone savagely, the bystanders shall have the right to shoot the thugs ganging up on the individual without warning. Also, if two men are having a fistfight and another man or men joins in, the man joining in can be shot.

17/ Where flammable liquid or acids are used on people, or people are threatened with these, they may be shot.

18/ The justice system shall not be allowed to punish people for touching others when they saved them from an emergency situations like when they're walking in front of a moving vehicle, or they are going to hurt someone.

19/ Good Samaritans trying to catch a falling baby shall never be subject to prosecution or money court lawsuits if they fail to safely catch the baby perfectly. Likewise with people pulling others from buildings or vehicles, and similar situations.

20/ Where one person is beating another person that is cowering or balled up or back turned, or unconscious, bystanders shall be allowed to engage the person beating the other with clubs and bottles and chairs and other weapons, including knives. They may also use the words: "stop or I will shoot you". Then if the beating person fails to stop within 2 seconds, they may shot in the legs or ass once, and again every 5 seconds until they stop. And if they move towards the person saying these words, the person doing the beating may be shot dead.

21/ It shall be thought very hard to punish bystanders and especially victims and their families that shoot gun criminals right after they commit their crimes.

NR'32. DOMESTIC VIOLENCE.

1/ With regard to domestic violence and fights between friends, the judicial system shall keep in mind that people sometimes make these calls out of vengeance, or to get their neighbors to stop making noise. Therefore, there shall be no anonymous domestic violence calls, and people calling-in domestic violence calls must swear to the dispatcher what they saw or heard. Also, the people being checked shall have a right to know who called. Besides, people can mostly tell which neighbor called anyway, so the added risk of retribution to the caller is small. And if we fail to name these callers, then police gain a power over the people that we can't allow them to have.

2/ Where people complain about DV, or noise more than 4 times and it does not result in any arrest or charges, police must stop coming out.

3/ Where police respond to non-anonymous third-party domestic violence callers, all occupants must come out and show to police that they are not injured. Police shall not have the right to demand entry on wellness checks. The occupants may invite them in, but police shall not have the right to demand entry. If children or elders are perhaps involved, they must come out too. If the people involved are disabled, or a family member is missing, the police shall have the right to go in and check for the missed people who may be in need of help.

4/ Evidence gathered while making a domestic violence wellness check shall only be valid when it uncovers murder, injury, sexually abuse, kidnapping, locked-up people, or similar violent crimes. During DVWCs, police are not allowed to ask any questions except those related to the DVWC, and evidence of the violent crimes just stated immediately before herein.

5/ No matter of domestic violence, domestic abuse, fighting between people who are lovers or fighting between people who are friends shall be prosecuted without the testimony and signature of the supposed victim. However, regarding crimes against minors, elders, people who are incapacitated, dead, and others normally considered incompetent to think for themselves. There shall be no exceptions in the rules of evidence, or the requirement that all competent adult victims must press charges.

6/ The justice system shall not be allowed to arrest or press charges against an adult victim's wishes. And this rule shall especially apply to charges of domestic violence and other times when the victim is close to the perpetrator, and especially for things like slaps, kicks, shoves, falls, and similar sorts of semi violent activity. Police shall not have the opportunity to make work for themselves, overreaching, and starting cases over things that they don't know about because they weren't there, unless the victim wants to press charges. However, in cases of organized crime, and extreme or repeated domestic violence involving people of any age, and moderate and great crimes involving children under age 16, the Senate may prosecute without the victim's permission.

Also, in all these cases of prosecution against the victim's will, only a Senate jury shall make this decision, not police.

7/ Where police can observe a domestic violent type injury during a wellness check, they may separate the residents for questioning, and may ask each resident (as well as other witnesses) for accounts of how it happened. They may also ask the injured person up to 7 times if they want to press charges, or they need help in splitting up.

8/ Females shall have greater protections than males under domestic violence laws. When normal sized females slap a normal sized male they are romantically involved with 1 to 3 times, it shall generally not be a matter for police or domestic violence charges even if the male wants to press charges. With regard to domestic violence, both types of transsexuals shall be considered males.

9/ There shall be no arrests for domestic violence claims where there is little or no evidence, or indication of physical injury. Also, no person shall be thrown out of their home for domestic violence unless those judging at our domestic violence hearing call for it, or there is some significant evidence of physical harm that appears to be from battery. There must always be some physical evidence of a crime in all circumstances where people are arrested on the words of another.

10/ With regard to domestic violence calls involving adults, no amount of emotional distress and awful words shall be a matter for police or the justice system.

11/ Domestic violence laws against men shall not generally be applicable where:

- a/ Women or children are hitting men and the men are reasonably pushing them away, or trying to restrain them.
- b/ Where refractory children (especially teenage children) are being punished in an permitted way by their parents.
- c/ Where children (especially teenage children) are striking their parents, and the parents must defend themselves in a reasonable way from their children. This, especially where the child is, the same strength are stronger than the parent.
- d/ Where the harm is unintentional, or accidental, and not due to negligence.

12/ There shall be a uniform national code of domestic violence, and no county shall make its own laws regarding domestic violence. This is one of the subjects where we want standardized laws, and laws repeated in school videos, to drum the laws into everyone.

13/ The legal system shall be multiple levels of domestic disturbance:

- a/ DD-1 = Extreme unreciprocated violence upon domestic partner.
- b/ DD-2 = One hard blow or its equivalent.
- c/ DD-3 = Excessive bruising from grabbing or holding without any reasonable cause. Restraint however shall be allowed to prevent injury or great harm to property.
- d/ DD-4 = Both partners are hitting each other, or throwing things at each other.
- e/ DD-5 = Domestic yelling, loud arguing.
- x/ These distinctions are important to help people better understand the nature of convictions in these matters, and prevent miscarriageS of justice.

14/ Nobody shall be forced to leave their own place where the other party has another place that they live at, or a different ID address. This, even if:

- a/ The other person occasionally lives at that place.
- b/ The other person got the place either before or after the relationship began.
- c/ Even if it is a family house.
- d/ Even if they live there occasionally.
- e/ Even if the place is in another city.
- x/ In all these cases, the people involved in the DV case are host(s) and visitor(s).

15/ If there's no substantial physical evidence of injury, and no video evidence, then there shall be no right to push somebody out of their premises using domestic violence laws.

16/ In relationship break ups, the people involved shall always be allowed to call the police to remove property that is clearly theirs, such as their password accessible electronics, registered vehicles, paperwork, clothing, and other property that is clearly in their name. Where the couple is heterosexual, the man may remove all the man's clothing, and the woman may remove all the woman's clothing.

17/ Where one side in a child-less relationship engages in wanton violence, or wanton property destruction, or there is evidence that they threw dangerous objects, or threatened to harm the other side while asleep, then that side shall generally be the one that must move out if one side must move out.

18/ All matters of domestic violence move-out shall be decided by a tribunal within 24- hours, and no lawyers shall be involved.

19/ All counties shall maintain sufficient shelters for women (and their children) in domestic violence situations. Thus they and their children can escape from abusive men. However, these must use the mommy dorms. No government money shall be spent on shelters for transsexuals. No transsexuals of either sort shall be allowed in any mommy dorm, even if they have children.

20/ Those involved with savage domestic violence cases, where they harm their partners/offspring greatly or strangle/ stab/shoot them shall mostly be denied bail prior to their trial. Where foreign men savagely beat our women or our children or our elders (regardless of whether they are married, coupled, or dating) they shall generally suffer triple penalties.

21/ Where women strike their men:

- a/ Where we observe fistfights between women involving the exchange of dozens of blows, this seldom involves much harm. So very few women are capable of causing much harm.
- b/ The penalty for women striking their men repeatedly shall not normally exceed 60-days in lockup or be a felony.
- c/ If should be thought difficult to convict women of domestic violence against their men involving punches and slaps unless the men are sick or frail, or old.
- d/ Men shall not normally be allowed to respond.

22/ To prevent false domestic violence accusations by women:

- a/ In all large communities, all DV reporting by police shall be required to be done by a mixed team of specialist DV reporting officers (one male, one female).

b/ Police shall be required to ask neighbors and bystanders about what happened.

c/ Video evidence shall normally be reported where it exists.

d/ Police shall be required to make reports of all DV calls, even those that do not result in an arrest, especially when women seem to be making false accusations. Police must also report when there are or are not visible injuries.

e/ The penalty for women making a false accusation to police about DV shall be somewhere between the full penalty of the accusation they are alleging and 1/3 of the penalty. A similar penalty multiplier shall apply to people who falsely accuse other of rape and sexual misconduct.

23/ The people as victims and bystanders shall have a right to detain those people committing violent crimes and stealing, and to use reasonable force to detain them.

24/ By themselves, finger press mark bruises, grabbing bruises and a couple different fingernail scratch injuries shall not be considered a thing of domestic violence. However, where these happen on multiple occasions, these sorts of injuries should be considered domestic violence.

NR'33. DRIVING

1/ This constitution guarantee the right of the people to get intoxicated and then to rest or socialize, or sleep in stationary vehicles. No matter how intoxicated people may be, they can never be charged with DUI so long as the vehicle was not moving, and also the vehicle is not in a traffic moving lane of a Government road, or shared private road or shared private driveway. Furthermore, this right to be in a stationary vehicle while intoxicated shall include resting in the driver's seat, with the ignition on (for this is necessary to power the air conditioning and heat). All the people with DUI convictions for when the car was stopped or parked out of a traffic moving lane, all of these shall have their convictions expunged. Also, all open container convictions shall also be cancelled and expunged. There shall no longer be any open container rules as these work against designated drivers.

Also, while police shall be allowed to have drivers blow into a breathalyzer at every traffic stop (because this is so easy). However, police can only test drivers for other drugs if they have a Mafia drug license, or are obviously intoxicated as evidenced by chest cam video.

2/ It shall not be possible to charge people with driving while intoxicated, or having an open container where:

a/ The vehicle remains entirely on the driver's own private property.

b/ Where the vehicle is entirely system operated, except for a human-override stop and pull over emergency button. Also, the mere stopping of a system operated vehicle shall not be subject to DUI laws.

c/ Where intoxicated people are driving seriously injured or ill people, or women in labor to a hospital for good reason.

e/ The vehicle is not moving, whether the engine is on or off.

3/ When police run a person's ID, the person's alcohol and drug licenses will come up with their ID and driver's license records. Also included will be the person's recent alcohol and drug purchases. A person's drug and alcohol purchases shall always be admissible as evidence in DWI cases.

4/ Alcohol DUI like so many crimes shall have multiple degrees and varied punishments depending on the severity of the crime. The Senate shall elect the penalties according to the alcohol intoxication levels below. The Senate shall be free to modify these alcohol levels as it elects:

DD1 shall be for those over 0.19% BAC. DD1 may result in lifetime driving license revocation and a year in jail.

DD2 shall be for those over 0.14% BAC. DD2 results in a 9-year driving license license suspension and up to 90 days in jail.

DD3 shall be for those over 0.11% BAC. DD3 may result in 3-year driving license suspension and up to 20 days in jail.

DD4 shall be for those over the definite DUI threshold of 0.08% BAC. DD2 results in 1-year driving license suspension and three days in jail.

DD5 shall be for those over the gray-area threshold of 0.05% BAC. This shall be the equivalent of a speeding ticket.

5/ The Senate shall establish different maximum blood alcohol levels for people operating human powered vehicles, being a commercial airline passenger, being in public, and gambling. The maximum blood alcohol level for driving a Self driving cars with human override shall be twice the ordinary level of intoxication.

6/ All motor vehicle drivers stopped by police must provide breath samples and a drop of blood when requested by police. If they fail to do this, they shall be presumed to be guilty.

7/ All vehicle police shall carry breathalyzers. The opinions of police officers with regard to the apparent intoxication of a person shall be a valid reason to conduct field breathalyzer testing and in the station drug testing. However these police officer opinions, and the statements of drivers, shall have no standing in court. Only failed objective machine alcohol and drug tests that are over 98% accurate, and video evidence of intoxication shall be valid for DUI cases. All drug tests used by police that do not have a 99% accuracy shall be confirmed by means of alternate testing methods that use multiple laboratories to achieve 99.99% certainty.

8/ Police shall not be allowed to charge for alcohol DUI without at least 5 out of 5 failed breathalyzer tests from machines of different designers and manufacturers. Also, Alcohol breathalyzer test can't be used in court unless the person has been given the opportunity to brush their teeth and mouth for 10 minutes with water and a new sealed police supplied hotel toothbrush, and then wait up to 10 more minutes before taking the police station tests.

9/ Ishtar wants our rebel legal system as stupid, random, vindictive and life-ruining as possible. Eliminating drunk drivers is a good idea, but open container laws ruin many times more lives than they save. Therefore, open containers of alcohol shall no longer matter in vehicles used on the road, so long as the driver has not been drinking at all. All open container laws, shall be thought a trap installed by the insurance industry and Ishtarian forces. From now on, all open container laws (except those that require breathalyzer testing of drivers with an open container) should be regarded as overreached by corrupt government. Besides, we want the passengers to be drinking and designated drivers not drinking at all. Where there is an open container and the driver tests,

at zero alcohol thereabouts, there shall no longer be any open container violations.

10/ All drinking licenses shall track alcohol consumption while people are out, and automatically keep their alcohol consumption within legal ranges if they are driving, provided they bring no alcohol.

11/ Those with high consumption alcohol or certain types of drug licenses may be required to use an ignition tester every time they start their vehicle.

12/ As in so many other areas of this constitution, there shall be national rules for DWI and open containers in our nation, and the individual counties shall have no freedom in deviating from the national laws and rules regarding DWI.

13/ In order for breath alcohol tests to be valid, police must use 4 different permitted breath testing electronic devices from 4 different manufacturers under video monitoring. Police must use the same 4 devices for everyone and all testing must be under video for it to stand as evidence. Police shall only conduct one test per device, and the minimum reading from among the four devices shall be the blood alcohol level for the purposes of DUI conviction. Police must also spray an aerosol test spray after each over-the-limit test to check the breath testers. This approach is much easier and cheaper than arguing in court over the readings. The Senate shall establish realistic levels of blood alcohol for driving under the influence of alcohol, levels where drivers are more than 5% more likely to have a fatal accident on a mile per mile basis.

14/ The Senate shall establish realistic levels of blood THC for driving under the influence of marijuana, levels where drivers are statistically more than 5% more likely to have a fatal accident on a mile per mile basis. The Senate shall establish similar limits for other drugs, for both Mafia drugs and legal drugs, again with a 5% greater likelihood of having a fatal accident.

15/ Police shall not be allowed to perform multiple tests until they get the results they want. Police who do this repeatedly should be fired. Where the first test shows the presence of no intoxicants, the person being checked for alcohol or drugs, must be released. There shall not be multiple testing until the person tests positive for drugs or alcohol. However, if the person tests positive, police shall run multiple tests, using multiple different methods to ensure that the testing is valid. Alcohol and blood testing systems shall only be valid if they have Senate approval. There shall be no batch DUI testing.

16/ Those who have been breathalyzer tested or drug tested and this shows that they are not over the limit must be released immediately and all charges related to driving while intoxicated dropped, and all mentions removed from the public records.

17/ Each county Senate may authorize the county police to conduct field sobriety checkpoints for drivers. At these stops, police will breathalyze everybody who seems intoxicated to find people driving while intoxicated. These checkpoints shall generally occur around clusters of alcohol-drinking establishments and other places where people drink. Where there is a sobriety checkpoint, all drivers must stop and take an alcohol breath test if asked. Those videotaped refusing to take a police breath test shall be presumed to be guilty of driving under the influence of alcohol at the highest level. Everyone gets a new straw in a sealed package.

18/ We shall not have any more field sobriety tests, terrible clown mockery of our freedom that those are. Instead police will be able to see everyone's intoxicant consumption for that day in bars and weekly otherwise. There will also be the officer's chest cam as evidence. Many people will suspend their driving licenses because they drink too much. Also, to get any of the middle licenses for alcohol, you have to use a breathalyzer.

19/ Those with a Mafia drug license (including marijuana), as well as those who pass a breathalyzer test may be required to take a finger-prick blood test if they are driving and appear to be high on drugs.

20/ The people shall be free to use taxis and truly self driving cars while intoxicated.

21/ It shall be a crime for People to collect cash or valuables for vehicle accidents outside the county recorder's payment system. The vehicles in the accident must be inspected and ascribed fault, and the system must acknowledge the amount paid in damages. Dangerous drivers must also be eliminated.

22/ The following groups may also be required by police to give a drop of blood for analysis:

a/ Everyone arrested for a violent crime.

b/ Everyone who was acting like they are on drugs or drunk, or mentally ill, and this was documented on video when they were arrested.

23/ Regarding alcohol and DUI policy:

a/ 100% of DUI fine money shall go to the national government's general fund.

b/ Where people are clearly intoxicated and out of their minds with alcohol or drugs, other people (friends, strangers, and bar staff) shall have broad rights (and a moral obligation) to hide their keys and to hold them and prevent them from getting into a vehicle.

c/ The Senate shall do all new DUI impairment studies and re-consider the blood alcohol levels that are ideal for the people and not for their insurance companies. There shall be one maximum BAC level for people driving themselves, and another for taxis, another for truck and bus drivers and pilots (0.00%). There shall also be sensible maximum BAC levels for various sorts of water vehicle.

d/ Insurance companies shall not be allowed to give any input about DUI policy, DUI testing, Mafia drug policy, liability policy, judicial system policy, driving policy, or vehicle design policy.

24/ Those who host people for drinks either commercially or as an unpaid party host shall be required to have a working breathalyzers for all customers and guests, or they may be held to be up to 10% financially responsible for driving accidents involving people who were drinking at their establishment, place, or home. It shall not be allowed to charge for breathalyzer use in these locations.

25/ The county recorder system shall do all drug testing with groups of Senators occasionally stinging the county recorder system. All military, police, fire, EMS, life guards, pilots, commercial drivers and equipment operators, and some other classes of worker shall all be regularly drug tested by the county as per a defined schedule.

26/ If a person has repeatedly violated the road rules for safely operating vehicles, the person may have their vehicle operator's license may be suspended or cancelled. However,

the right to hire a driver or use a robot driving system (once these exist) shall be considered inalienable.

27/ Police shall not be allowed to intentionally collide with suspect vehicles to stop them. Instead, they must deploy hooks.

28/ People who don't work for government full-time shall not be allowed to issue citations. There shall be no sales commissions, or other performance based pay for those issuing parking citations and other citations. Private companies shall not be allowed to issue parking citation. All payments for parking citations shall go to the national government's general fund.

29/ No person shall ever be arrested, or have their driving license revoked for parking tickets, or other non-moving-vehicle violations. They may have their vehicle towed, but they shall never be arrested or deprived of the right to drive for parking tickets.

30/ Each year, the US suffers around 13,500 alcohol related road accidents, while we only suffer around 80 alcohol related boat fatalities (most of which have nothing to do with impaired boat operation). Therefore, we shall update our rules for drunk driving of boats and bicycles, and these shall now be based on the speed of the vessel or bike:

a/ Over 20 knots (37kph) the maximum intoxication level shall be the same as a wheeled motor vehicles.

b/ From 10 to 20 knots (18-37kph) the maximum intoxication level shall be twice that of wheeled motor vehicles.

c/ Under 10 knots (18kph) the maximum intoxication level shall be the three times that of wheeled motor vehicles.

x/ Also, there shall be no charges of open container possible either on a boat or a bicycle. Furthermore, drunk boating and drunk bicycling convictions shall not affect one's driving record or driving insurance. Also, police and other government people shall generally supposed to focus on drunk driving of road vehicles and mostly ignore drunk boating.

31/ Everyone operating a boat shall wear a proximity chip bracelet. If the operator goes overboard, the boat homes to the bracelet's area so the overboard pilot has a chance to get back on his boat. Also, all life jackets and wilderness packs/ vests shall have satellite distress communications.

32/ The media shall no longer be allowed to present stunt jumping of vehicles, or high-speed chases. This shall be so for cars, motorcycles, bicycles, skateboards, scooters, roller skates or any other sort of wheeled vehicle.

33/ Judgement-proof foreigners shall neither be issued a driver's license of any sort, nor be allowed to use their foreign license unless they have Senate-accepted liability insurance for up to 10-year's wages in damages.

34/ There shall be no automatic rule that the car behind is always responsible. Where cars are merging, the merging often causes the accident. Also, where the car in front is judged to be driving aggressively, intentionally slamming on their brakes to cause an accident, and this is recorded on video, the activity shall always be considered the cause of any accident. But it may also be considered a violent crime where someone is hurt in an accident.

35/ All roads, subject to flooding shall have railroad style crossing barriers and flashing lights that can be lowered remotely, depending on what the remote video camera says.

Also, there shall be no insurance for cars that are damaged by people driving from high land into flooded areas.

36/ It shall not be allowed to give a parking ticket when the owner of the car is in the car, or standing within 1-m of the vehicle, or going between the vehicle and the payment making kiosk or a parking meter.

38/ People have the right to use their vehicle horns with regard to animals, children, pedestrians, and other vehicles whenever it looks like there may be a collision.

39/ People and especially delivery men who double park and block the road and get video recorded doing this shall get their license suspended for 30-days, in addition to fines. People who block major intersections shall get their license suspended for a year.

40/ The people shall be allowed to walk on any street that is safe to walk on, or that is commonly walked on. Also, in the near future, the use of transponders will permit people to walk on most streets when they don't have a sidewalk. These people will just have to step off the road when cars come along. People with transponders shall get a sound and vibration as each lead car on the road recognizes them and is slowing. The cars shall also rapidly flash their head lights left/ right/left/right repeatedly when they are slowing for a pedestrian.

41/ The process of getting a visa to visit our nation shall include our government verifying with the visitors government about the person's driving ability. Thus our visitor visas will either allow driving, or they will not allow driving. So when foreigners come to our country and get a driving visa, they shall have to pay a special extra amount for car insurance, because they are outside the reach of our legal system.

42/ everyone who enters our nation or who lives here and gets an identity card. Some of these are just for short term visitors, some are for citizens. All the foreigners who are legally in our country must carry a card with them at all times. Foreign Identity documents shall not be used in our nation.

43/ Only citizens may drive commercially, either as taxi drivers or ride share drivers, or as truck drivers. Foreign drivers shall no longer be allowed to drive commercially in our nation unless they obtain and immigrant visa.

44/ All car and driving software shall be open source, and domestically produced.

45/ Where people park in such a way that blocks traffic, or a driveway that is not theirs, this shall be regarded as a moving violation.

46/ A license is required to drive on our nation's public roads and public property. Foreigners found driving without a valid license shall be deported and blackballed for life.

47/ When people stop for pedestrians, they're supposed to turn on their blinker lights when they're stopping for pedestrians at a crosswalk.

48/ The people who put themselves in front of cars, shall always be considered at least 2/3 responsible for whatever injuries they suffered. This is what you get with the act of putting yourself in front of a vehicle to stop it. Also, the penalties for the driver shall never be more than 1/3 of the normal amount.

49/ The last number of everybody's car license plate must be a number and not a letter, so that we can do a base 10 allocation of people based on license number in vehicles.

50/ Whenever police run an ID it comes back as: Green indicating no convictions, no pending cases. It might also come back yellow indicating that there are misdemeanors. If the name comes back red, it indicates felonies. If the name comes back flashing red it indicates a dangerous felon. Drug and alcohol licensing also comes back along with use levels for all drivers. Police are not allowed to test people for drunk driving who never drink, unless they clearly look drunk. On the other hand, those who are high level drug and alcohol users will get checked almost every time they are stopped. However, with regard to cars that drive themselves the drives may not be tested for drugs and alcohol.

51/ There shall be no street parking or street loading anywhere that ever suffers from heavy traffic.

52/ The maximum penalty for running a person over with a vehicle who is in the street protesting or praying or begging or selling things shall be 1-year in jail.

53/ Due to corruption in the process of obtaining commercial drivers licenses, all commercial license holders shall be retested within 180 days, and all existing commercial driver's licenses shall then be cancelled.

54/ All "written" driving tests shall be by simulation with quick timely responses required. We shall also have limited self driving car driver's tests for emergency situations where a human must take over.

55/ No longer shall police officers report on vehicle accidents. Instead, the county recorder system shall document this with non-police vehicle accident documentation specialists.

56/ Regarding the court admissibility of evidence of intoxication:

a/ Field sobriety test involving subjective police officer judgement of motion, balance, and people counting backwards or forwards shall no longer be admissible in court. Police must use either an alcohol breathalyzer or blood drop drug testing device that is frequently benchmark tested and accurate. In fact, police must use multiple tests from multiple machines to convict people for driving under the influence.

b/ Blackstone's formula shall be valid in extreme for anything that there is a hard test for. And police shall be required to get that test and use the best tests for convictions. They cannot use defective and subjective tests when objective tests exist. The legal system is not supposed to be subjective, it's supposed to be absolutely objective and the especially when it comes to things such as driving under the influence, with a very high penalty and a thing that is very easy to convict people of. Otherwise we have an allergic and stupid legal system that convicts many people for something when there is no real evidence.

c/ Video of people accused being intoxicated shall always be admissible in court for DUI charges. However the statements and testimony of third parties about people appearing intoxicated shall almost never be admissible for DUI charges.

57/ Pilots, surgeons, bus drivers, and truck drivers shall no longer be allowed to drink any alcohol at all in the 24 hour period before they work.

58/ The Senate shall establish different maximum blood alcohol levels for people who are human driving, humans serving only as backup for a self driving system, humans that are passengers. Also for golf carts, boats moving slower than 5mph, bicycles, e-bikes, motorcycles, skiing, skateboarding,

and skating.

59/ All drivers that cannot produce either a physical license or a number or a name birthdate and address shall be subject to arrest until they can identify themselves. Anybody found driving a commercial vehicle without a license shall be arrested and the vehicle shall be impounded for 60 days.

60/ When people are arrested of while driving a vehicle, the passengers and other people shall have the right to drive their car off on their behalf. Impounding of vehicles shall not be a revenue stream for police departments. Also, it's up to the vehicle driver to do what they want with the vehicle, if it's somewhere where it can be left, it and it's not creating an immediate hazard. Also, there's generally a rule where people can pull off the road and off the shoulder with their vehicle that they have the right to leave it there for up to 12 hours while other people go to collect it. The government of our country is run for the people, it's not run for the police department or the government's impound lot.

61/ Police cannot impound vehicle where there is no hazard created and there is another driver to bring the vehicle back. Also, the maximum charge for police impounding cars shall not exceed the lesser of 30 minutes wages per day or 5 day's wages per year.

62/ Where cars (and their paint on license numbers) are recorded by random drivers violating the driving rules or driving badly, these recording drivers are invited to send the video into the recorder system. Then the video shall be judged, and the vehicle with the largest number of people sending in legitimate bad driving videos about them may be called before the court and these may have their driving privileges suspended, or the vehicle's registration suspended.

63/ Where people are arrested, their car shall automatically get 75-hours of free parking, except on arterial roads and in locations that will cause a hazard.

64/ There shall be a presumption of criminal and money court guilt where accidents occur while a person is speeding at over twice the posted speed limit. Where a person is speeding at over 50% of the speed limit, the courts may ascribe guilt.

65/ Instead of using police to enforce speeding, we shall shift to a system that uses the live video of fellow drivers to eliminate speeders and bad drivers from the road system.

66/ Soon, we will require that all vehicle speed control be determined by each stretch of road and that all vehicle drive the same driving speed on each lane of each road, except for minor passing and lane change situations. So the fast lanes will actually be faster and the slower lane will have another speed limit.

67/ Once it becomes possible for people to get around using self-driving cars, we shall aggressively deprive all the bad drivers of their right to operate a motor vehicle due to their violation(s) or accident(s). We shall of course start with the worst drivers and perhaps eventually eliminate all drivers with 2 or more ordinary violations in 10-years.

68/ The Senate shall compile rules on road rage, and under what circumstances road rage drivers will lose their driving privilege for road rage, and for how long. All intentional "brake checking" of other drivers may be conceded either road rage, or reckless driving, and like so many other moving violations, under this new constitution citations may be issued

based on third party evidence, particularly when there is video of the crime, and multiple disconnected witnesses. Where it can be determined that a driver is road raging against a particular driver, and the road raging driver merges in front of another driver and then slam on their brakes. If the car behind collides with the road raging car in-front, the fault for the accident shall lie with the road-raging driver.

69/ Now that we will be painting our vehicle license number on our vehicles in big characters, we shall now allow drivers to charge other drivers (strangers) with driving offenses based on video evidence. At first this shall require the matching evidence of two other drivers. These bad drivers can be charged with a variety of charges such as speeding, right-of-way violations, unsafe lane change, tailgating, and aggressive driving.

70/ All vehicles not powered exclusively by human energy require a driving license of some sort. This unless the speed is limited to the speed of a human powered bicycle. This includes electric bikes.

71/ Where people as pedestrians intentionally block parking spaces for certain drivers. Other drivers make may use their vehicle to slowly push them out of the way.

72/ From 3am to 5am, all human backup operation vehicles shall be allowed to 100% self drive to service without any human inside, provided they have a flashing red led on top indicating that they are system operated.

From 11pm to 5am, all all suburban and more remote areas shall allow house moving, provided the moved houses are all lit up and have flashing lights front and back. These transported houses must however move at speeds that are at least 1/3 of the posted speed limit. And if they are used on the wrong side of the road, there must be a vehicle with flashing lights preceding the house moving vehicle on the wrong side of the road of the wrong way traffic. No permit or fee shall be required for suburban and more remove house moving between 11pm and 5am.

73/ From now on, all human drivers will be required to use and obey the GPS navigation system if they don't know the way. They shall also have to move more like system operated vehicles, always following the average speed of traffic, never merging where you don't fit, or merging late, always signaling, etc.

74/ Where cars are doing donuts and racing and people get hurt, the driver shall be charged with vehicular assault. Where people die, they shall be charged with negligent homicide.

75/ Now that it is possible for people to rely on self-driving cars and and system vehicles, the driving courts shall get much stricter about taking people's driving licenses away for years

76/ Recorder system drive cam video shall always be admissible in driving court. It shall be thought that a system of driver reporting of bad driving and submitting recorder system live video is cheaper and better than using police to enforce the rules of the road. That is until we switch to a fully self driving system.

77/ Children under age 13 shall not be left unattended in any personal passenger vehicle without an adult in cars, even for a moment.

78/ While we are using human drivers, all large intersections shall be equipped to give an audio warning alert to the

stopped cars around them about their specific light changing from red to green. This shall only be done once the visual eye-in-the-sky system says there is no car rushing to make it through the intersection. Then once this system works, we shall require that all cars use the system, because it will increase global intersection throughput substantially. Also the system vehicle should be designed so they all start moving at once and spread out after the intersection.

79/ The Senate shall establish a standard warranty for all vehicles. After this, all vehicle makers nationwide shall be required to obey the same warranty standards for each type of vehicle or drive frame.

80/ Where people get rear-ended, and sent into a third car, the drivers of the cars in the middle shall not responsible for a colliding with other cars in front of them. It's only the car that starts the chain reaction that's responsible.

81/ Where drivers are significantly speeding and they hits someone in front of his direction, and it is a two factor accident, the significantly speeding driver shall suffer full responsibility.

82/ With regard to car repairs after accidents, the cars shall no longer be required to be restored to like new condition. Also, minor scratches and cosmetic dings shall no longer be a thing for rental cars or insurance.

83/ Late merging, and failure to wait your turn shall both be moving violations.

84/ We shall learn from the 55-mph speed limit that came in after the 1973 Arab Oil Embargo. We shall now say that vehicle speed limits shall never be lowered to conservative energy. Vehicle speed limits may only be lowered because of safety.

85/ There shall be no restrictions on how far people can commute daily to for work or pleasure. This shall be thought an overreach on the part of government.

86/ The people shall have broad rights to use their horn when other people are doing unusual things on the road, or there are children or animals near the road, or people walking with their backs facing the driver, or somebody is on their phone, or they're swerving in traffic, or not moving when a semaphore turns green, or any number of other reasonable things.

87/ It shall be considered fraud to collect cash for vehicle accidents without reporting the matter to the recorder system.

88/ The prohibitions against driving with one's bright lights shall only count for oncoming traffic on undivided roads, where the road is divided, or there is no oncoming traffic, people shall be encouraged to use their bright lights, even if the the driver is following another driver. Also, when people put their lights on GPS automatic, their bright lights will automatically switch on on some roads and automatically switch off on other roads, with the driver having the option to turn them to the other position manually as each vehicle drives by.

NR'34. POLICE AND SENATE

1/ The live police video streams shall be watched over by both police department supervisors and Sub-Senate juries that are on Police supervision duty. Thus we shall have juries of elected Sub-Senators monitoring the police 24-hours a

day. In addition to police monitoring duty, there shall also be Sub-Senate juries handling evidence lockup, search warrants, arrest authorizations, and filing of charges. These Sub-Senate juries direct police, they frequently decide on who gets arrested, and also they decide on charges based on the video evidence and other evidence. Then another completely unrelated group of Senators runs the prosecution and another group runs the trial in a different jurisdiction.

2/ Sub-Senators working on Police monitoring duty and other sorts of jury duty shall get the average wage per hour.

3/ Where there are too many monitoring positions for the available number of juries, the juries sizes shall be changed to balance the workload with the number of Senators available. When the Senate jury sizes fall below three Senators per jury, more Senators shall be called up. When the number exceeds 6 Senators per jury, jurors shall be sent back.

4/ All sitting Senators shall always have unhindered and unlimited access to all police video.

5/ Where government workers (including police) need advice, and when they are unsure, they shall "revert" to the Senate for guidance. In the case of the police, there shall be a standing 24-hour jury convened in a lounge with many monitors. Also, in general, the Senators get assignments in neighboring communities to reduce the need for conflict of interest detection. The Senators pick their times, and then they get assigned randomly (according to the final digit in their Nome number) to a jury in a different community.

6/ With all the borderline policing decisions being made by Senate juries watching the video, police misconduct will be reduced, and it will be quite a bit harder for people to hate police, because the cops will not be really making any decisions. And policing really will not involve many tough decisions.

7/ The Senate shall aim for a situation where the police are arresting people and using force on their own judgement when the person is clearly violating an arrest-able offense. But when they have a situation that is unclear, the officers will be required to send video and consult with a 24-hour Senate supervisory jury pool that handles this duty. The Senate juries will also be monitoring some "hot" situations live.

8/ Police are require to vocalize a number of standard time marking points or bookmarks for their transcribed and searchable video records such as the following:

a/ Leaving vehicle.

b/ Arriving at call.

c/ Start talking with person-1, person-2 etc.

d/ Entering premises.

e/ Notable conversation begins.

f/ Notable events.

x/ Jury duty Senators will be able to jump/seek/scan to various points as directed by the officers.

9/ Every time a police officer stops someone (this always includes an ID check) or visits someone's residence, or looks at a vehicle they must drop a pin with the county recorder system at the start of the interaction.

10/ When police serve a search warrant or arrest warrant, they shall no longer serve actual papers. Instead, they shall send a number to the person's must check email account (This immediately gets a loud emergency alerts started until

the user logs in.) The citizen clicks the service link and up comes the big text headline of the warrant, along with all the small text of the warrant.

11/ Swat raids shall only be used with the approval of a Senate jury. Where the person being raided is a celebrity, or a Senator, or they are politically outspoken, the jury must be approved by a 2/3 majority of 100 random Senators on jury duty.

12/ All justice system video and other records shall be kept by the county recorder system including especially police videos. These shall be kept by the recorders office, and shall not be deleted for at least 20-years. Police and other parts of the justice system shall not be allowed to delete this video, ever. If any of this video is to be deleted, it shall only be at the direction of the national Over-Senate and the deletions shall be system-wide according to new nationwide standards for keeping police videos. These videos shall also be open to the public entirely. Where these videos evidence police crimes, or a statistically improbable pattern of behavior by police officers that is unbecoming of a police officer the officer shall be disciplined.

13/ All police, and especially swat officers and detectives must wear live county recorder system video cameras with audio while on the job. Police without a live video camera shall not be allowed to stop people, or make arrests or have any special police powers. No officer shall turn his camera off for any reason while on duty, except in toilets, and then when the officer moves away from the toilet location they turned the camera off at, the camera shall go on again.

14/ The Senate shall manage all forensic testing for police. All cause of death reporting, all prosecutions, all trials, all drug testing, all forensics, all DUI testing, all genetic testing shall be done by separate administrations from police.

15/ County Senate regulates county police. National Senate regulates national police. All officer's arrest records shall be analyzed to create a conviction/arrest ratio, and an unimportant arrests per month number, both of which shall be admissible in court. Also, officers with extremely low conviction/arrest ratios don't belong in policing. However, having a low number of arrests per month shall not really mean much.

16/ All police records, shall be kept by the county recorder system, which shall grant access, according to the tracked log-in access rules established by the Senate. In other words, everyone accessing police records must prove identity, and that identity shall forever be shown associated with the records they have searched for. It is thought that this will prevent police departments from hiding information from the public. This will also help keep police information out of the hands of mafia types and private investigators.

17/ The county recorder system shall keep a national database of police officers, together with all claims against them, and all penalties imposed on them. This is so that no abusive police officer can hide their record by moving to another police department. It shall be a felony for police officers to hide their identity, or problematic record and go to work for another police department or private security firm. Also, once an officer has been dishonorably discharged from any police department, they shall be prohibited from working in law-enforcement or security work for life. It shall also be

thought very easy to flag out private security for even one clear violation of their very limited powers. It will also be a felony to work as a security guard when you are not allowed to do this.

18/ The Sub-Senate shall regularly review all the flagged video records of all police officers and all security guards in the nation, along with their history as applicable. Those police officers and private security that the Sub-Senate decides it does not want to be police officers based on their history may be banned from working in law-enforcement and private security for the rest of their lives if their actions warrant this. They may also be pushed out of the industry. When officers later come back and work either as a police officer, or a private security guard in defiance of their Senate ban, these officers may be jailed for years. Also, we will pay our officers more.

19/ All officer complaints shall be kept by the county recorder system for 90 years, just like what we will do with all our criminal records. There is no sense in not keeping this information.

20/ All freedom of information requests may come from either the affected county of jurisdiction, any adjacent counties, the national Senate, and the county recorder system.

21/ The emergency and public reporting system shall be run by the Senate.

22/ All national police officers shall be selected from the ranks of local police officers that were previously drafted. To begin with, there shall be 4 local county police officers for each national police officer.

23/ The police shall have their own face recognition and biometric systems. So where police encounter criminals, their system interface gives them a warning and information. There shall also be locational memory by the police face ID system, so it can go back and look for the faces in the records to see if somebody went to a crime scene some years before.

24/ All assignments of the police shall be determined by the Senate. The recorder system is monitoring police activities and the Senate is assigning them and the recorder system is also reporting and providing third-party reporting as to what the police officers did and this is made public into the Senate but the police departments are no longer these they no longer directed by anybody, but that the Senate, the county Senate mostly unless it's a matter of national importance.. we shall always be aware that our police forces are not used by our politicians and leaders to abuse, state power to dominate the people.

NR'35. POLICE AND JUSTICE OTHER

1/ All police dialogues with the public, as well as all searches, questioning, arrests, interrogations, incarcerations and prisoner transportation, gun de-holstering, and gun discharges shall have remote live back-up by the county recorder. All police audio-video shall be time-stamped, uninterrupted, and have high-quality with audio.

2/ It shall be a felony for police to search through peoples electronic devices or homes without both probable cause explained to the live record related to a felony, and a search warrant. When police confiscate any recording device as evidence, they shall be required to immediately take a copy

and return the device to the owner without delay. It shall be a felony for Government people or anyone else to add or delete data from the people's devices, just as it shall be a felony to do this with any premises searched under a search warrant.

3/ Police may use roadside speed cameras to enforce speed limits, and they may also use marked police cars with raised light bars, but they shall not use unmarked police cars with hidden light bars to enforce speed limits. Also, police shall no longer be allowed to visually estimate speed anywhere in the nation.

4/ It shall be considered the twin felony of corruption and rape (or attempted rape) when Government workers in a position of power either make sexual advances, or have sex with the people they are investigating, inspecting or deciding on. Also, the victims of rape and physical abuse shall not be thought competent to give consent for sexual contact to police and other government workers. And these government workers may easily fall under the classification of something similar to gang rapists where they have sex with sex crime victims.

5/ All officer dispatching and police attendance information shall be indexed by date, address, and incident number as well as other means. Each incident shall include all officers dispatched or arriving at a given address for a particular incident. It shall also include the names of ever other person accompanying officers, and all people at the scene identified by police. However, in general, police shall not be allowed to accompany non-police, while on duty, and every person accompanying police must be identified upon request, even if 100 people are present.

6/ There shall be a national database for claims and video evidence against police and security officers indexed by national police ID number visible by the Senate, and not the public. All complaints about police misconduct shall be submitted to the county recorder's office. Police departments shall be prohibited from having anything to do with intake of police misconduct complaints. All police misconduct complaints shall be investigated by Senate juries and not by any part of the police department.

7/ Police shall generally not stop system operated vehicles for moving violations, sobriety checks, or mechanical defects. To counteract the lawlessness that this anonymity engenders, the payer records for system vehicle shall be kept for 1-year, or for 10-years if the user requests in their system settings. These records shall be secret except when police get a search warrant.

8/ No equines shall be allowed in crowded situations or urban or suburban areas. Also, the owners of equines in urban and suburban areas shall be responsible if the horses kicks anyone and hurts them. Police, military, government workers, and private security shall not ride equines in urban and suburban areas (including urban parks) for any reason. This includes all parades, special events, park security, circuses, and all other special events and circumstances. It does not include off road areas.

9/ Government and private security may use tracking dogs, and watch dogs and sniffer dogs. However neither police nor private security shall not use canines to catch, detain, or intimidate the people except for man-hunt fugitives and escape prisoners. Under the law, all police animals shall be regarded as things, and not people or officers. Attacks on

police dogs shall be seen in the same way as attacks on police property. Police shall not have any right to take any deadly action against people harming or killing police dogs. Also, with regard to drug sniffing dogs which are notoriously unreliable, these shall not be used to flag people for investigation. However they may be used to track fugitives.

10/ When government begins enforcing a law in a new way, it must give reasonable notice to the people so they may adapt and comply.

11/ All police convicts, informer convicts, and former government workers shall be jailed in special prisons for their own safety.

12/ All police and court income along with all jail wage income and prison labor auctions shall be paid to the general fund of the national government. Doing otherwise creates incentives that lead to perverse police incentives to lock the people up, and abusive courts. Also, the income and expense aspects of the police, court, jail, and restitutions system shall be separate allocations. And the money generated should have nothing to do with the money being spent. However, Government shall be prohibited from ever turning a profit on the police or court system.

13/ We don't want a system where if the police want to get you, they can always find a way. We in fact want our legal system to go as much as possible in the other direction. This is why we shall have three requirements for the enforcement of laws that are widely ignored:

a/ With widely ignored laws, Government must justify the rare or singular enforcement. If government can't explain why one person, or a small group is being subjected to a rare enforcement in a sensible way, then the case must be dismissed.

b/ Widely ignored laws shall not be used to prosecute public figures, ever.

c/ Government people attempting unsuccessfully to use a widely ignored law in a prosecution may be charged with malicious prosecution if the charges are found to be malicious, and the people involved with the prosecution themselves charged.

14/ It shall be a felony for police, the prison system, and indeed all government people to harass people for their legal political beliefs.

15/ Except for marriage partners it shall be a crime for police to have sex while on duty. Sex with the officer's spouse while on duty will only get the officer fired.

16/ Police shall not be allowed to make social invitations, or initiate social contact, or flirt with the people they meet while on duty. Doing any of these things is grounds for a police officer to be fired. It should be well known that the civilians must ask and initiate social contact if they are interested. Also, all police officers must strictly obey the do not-contact filings of the people they have once been involved with.

17/ When police officers accept sexual favors from prostitutes, it shall be considered at least as bad as taking bribes. It may also encompass conspiracy to commit sex trafficking if their police uniform and authority helped to dominate vulnerable women being trafficked.

18/ It shall be a felony to participate in a coverup of the true cause of a person's death, even if the death involved no crime.

19/ It shall be a crime to touch human remains coming out of the ground. All shall be regarded as a potential crime scene. Also, those who discover and reports human remains, or a new human grave site shall get 100 hours wages as a reward.

20/ When police run an ID the reply shall be color coded as blue (police), green (no convictions), yellow (some convictions), orange (dangerous), red (very dangerous), Maroon (killer). Arrest danger is estimated on a 100-point scale by prior officers.

21/ We have all heard how phantom menace nations are created to justify an army that is used to control the people, and also an army to buy overpriced and highly profitable military equipment. What about crime? How much crime is actually a phantom menace? How much crime exists to justify a large police force for protecting an oppressive parasitic front government? How much catch and release policing exists to support a large powerful police force. We must always be willing to ask questions like these.

22/ In general, all government activity shall be pushed onto the counties where possible, and policing shall be no exception. The national police shall only deal with things like national security, espionage, interstate and international crime, and county government corruption. The national government and the international government shall not get involved with protests or protesters.

23/ Under the old government, police were not paid enough, so that the police forces didn't have their pick of good people. Instead, now police should be paid more. This is so that our police forces will have a better choice of people in this important role.

24/ All police firearms shall have multiple trackers and RFDs, and may be turned off remotely if lost.

25/ The Senate shall establish an allowable range for the police to citizen ratio in our nation.

26/ All police, and all others in the justice system and military shall be required to answer all Senate questions honestly and directly, and they shall have no right to keep information away from the Senate.

27/ All police cars and police car gun racks shall have automatic RFID keyless lock/unlock that shall also be key locked under certain circumstances.

28/ All police shall carry an opiate antagonist such as Naloxone. They shall also carry an epinephrine pen.

29/ The national police department shall always be allowed to order local police to come to the aid when the leadership of the national police department considers it necessary.

30/ Police academy training shall be 6 months of full time school, and one year of on the job probationary training.

31/ There shall be a national system for ensuring that emergency dispatchers are well trained and all follow the same guidelines. 25% of 911 dispatchers must come from police, 25% must come from fire departments, and 25% must come from EMS. All three listen to each call, if the call is related to a police problem, then the police dispatcher takes it, if the call is related to fire in the fire dispatcher takes it if the call is related to EMS then the EMS dispatcher takes it.

32/ There shall be no right to use the money court system for malpractice in emergency situations involving EMS, paramedics, ambulance transport. If we don't do this, we

have a hugely costly honey-pot situation for the money court system. There shall be no right to use the money court system for even remotely justifiable police injuries. We do this to eliminate a hugely costly honey-pot situation for the money court system. We also do this to eliminate the main incentive for police to kill when they could only injure, and also the main incentive for police organizations to cover-up firearm mis-use. Also, it shall be noted that the old system, with its extreme money court payouts: this seemed to encourage many poor people to challenge police as a form of lottery ticket for an immense payout from the city employing the police officer.

33/ When police ruin property, Government shall be required to either repair that property or relocate the occupants if the damage was extensive.

34/ All property insurance shall automatically cover both so-called acts of god, and so-called acts of Government and police if they offer any coverage for either any sort of weather damage, or any sort of fire.

35/ It shall be a felony to offer police, government officials, and government agents excessive immunity from prosecution as the Nazis did with their SS and Gestapo. All police everywhere should note how the SS and Gestapo had immunity from prosecution until they didn't. Also, blanket immunity shall be thought a magnet for the wicked and easily corrupted. Therefore there shall never be any complete or total immunity.

36/ Until today, we have all lived in a world where police were allowed to lie to the people, but the people were not allowed to lie to police. From now on the rules of lying to police shall be changed as follows: When police initiate contact, there shall be no requirement of honesty on the part of the people they talk to. However when people make contact with the police, they shall be required to be honest. People who come to police and bring up false charges may be charged for lying about it. Also people who lie and misdirect police by saying: "They went that way", These people can also be charged for lying to police. But if police call people or visit them, the people they communicate with shall be free to lie to police and suffer no consequences under the law for their lies to police. Requiring honesty of everyone talking to police is only of marginal benefit for our efforts as a free nation to detect criminals. However, where nations are edging towards tyranny, allowing the people to lie when police come and visit them is of great and immense value in resisting that tyranny.

37/ It shall be a crime for police to lie about having witnesses or criminal evidence when they don't.

38/ Those who harbor criminals, and lie about it to police, shall only be charged with harboring.

39/ The lying/acting at the heart of all sting operations shall not be prohibited.

40/ There shall be a new national crime and criminal database.

41/ It is a very important thing that we do not have foreign government people or foreign police. Otherwise it makes a foreign takeover much easier to achieve. Non-citizens, and immigrant citizens shall not be allowed to be police officers, or work for our Government-run justice system. Only native born citizens shall be allowed to judge our people in our judicial system. Doing otherwise and allowing these

foreigners tends to lead to foreign Mafia take-overs of our precious justice system. The Senate may also prohibit people not born in our nation from being police officers, or working in our Government-run justice system. Furthermore, even people that have that are naturalized citizens shall not be allowed to be police officers. Also, nobody who is not a citizen can be sworn in to any office where this is required, because they're not qualified to defend the constitution as a non-citizen.

42/ Homosexuals, felony convicts, and the following sorts of extremists shall not be allowed to sit in judgement of our people:

a/ Those who have been involved at length with a right-wing racist advocacy group, or written in favor of Nazism, or racial separation, or direct racism (as opposed to indirect or construed racism).

b/ Those who have been involved at length of left-wing advocacy of transexual rights, or advocacy of a multi-gendered world.

43/ It shall be a stated objective of the Senate to completely end all criminal gangs and Mafias in our land.

44/ We shall have triple penalties for for Government people involved with punishing whistleblowers, and political enemies, including police officers.

45/ The people shall not be allowed to discriminate against police officers either on duty or off duty. People can't refuse to serve police officers like everyone else.

46/ Police in each county and nationwide shall notify the county recorder system about how many kids go missing, either run aways, or abducted by a parent, or abducted by unknown. The Senate should also have a face recognition system for the missing kids system.

47/ It shall never be illegal to alert people about the presence of police. This includes flashing vehicle headlights about speed traps.

48/ Regarding people breaking up fist fights and other violent situations using reasonable force: Those who harm such fight-breaker people shall be treated as if they have struck police under the law.

49/ Missing persons shall be reported redundantly in both the locations where they live and where they disappeared.

50/ Foreign born people shall be prohibited from having any powers as a police officer in our nation. They shall also be prohibited from carrying a firearm at work.

51/ All of the following shall be considered violent felony crimes: murder-1, murder-2, arson, kidnapping, battery, robbery, carjacking, rape, sexual contact with a child's private parts, breaking and breaking into a non-abandoned building, or breaking into an occupied vehicle.

52/ Law-enforcement shall not be about police exerting force over the people, but the police serving the people and acting as their protectors and mediators.

53/ All religious police, foreign government police and kufir punishers shall be treated as foreign spies under the law. These shall easily be subject to the death penalty as a spy. This shall include the Catholic Jesuit secrete police, and Iran's Guidance Patrol, and anything like these.

54/ The people don't have to talk to police officers unless the police officers says that it is official business into the record and then explains why it is official business into the record.

55/ All crime statistics must track the race/ ethnicity of the criminal in great detail. This is one of the most important aspects of crime statistics.

56/ The dead bodies of all assassins, would-be assassins, and all felony suspects and everyone dead from a police shooting shall be kept frozen or at least 2 years, pending further analysis, especially when they are involved in an important crime.

57/ People who work for government or government contractors, especially police and national security agencies and who infiltrate protests shall have no qualified immunity and also shall be considered very easy to charge and convict as agent provocateurs. This shall also apply to the Government superiors of these people.

58/ People are supposed to take stealing and other property crimes personally and always report it. This is the mark of a good citizen, and this is what good societies do to keep crime down.

59/ There shall be no police under age 22.

60/ Regarding the immense level of homicide in Colombia between 1990 and 2024:

a/ The world really should study what happened here and why it happened.

b/ Is this related to the Darrien Gap?

c/ Now that the world is switching to drug licenses, we will no longer have an illegal drug trade where people kill each other fighting over territory.

61/ Warehouse space is cheap. Police time is expensive. We also spend immense amounts of money on costly lawyers, judges, and jails. Therefore Police should not be destroying evidence that they have collected for decades. There should be a presumption of conspiracy and guilt when police and government officials destroy evidence — exactly the opposite of the way the justice system normally works.

62/ The defund the police movement shall be seen as a prime example of why we don't want convicted felons voting.

Convicted felons hate police and strict law enforcement.

63/ Contracts signed under threat of incarceration or arrest, shall not be valid.

64/ There shall be no police unions for reasons explained elsewhere.

65/ The term police herein shall be understood in its broadest sense and shall include all classes and sorts of law-enforcement officers including national and county officers, as well as sheriffs and marshals, military police and anyone else with the power to arrest the people.

66/ Non-citizens shall not be allowed to work as police officers, in lockups, in prosecutions, or anywhere else in the judicial system.

67/ The Centi-Nomes run the Police Department. The county Senate runs the juries that try the case is brought by the Centi-Nome police.

68/ No lie detectors or testing shall be used by the court system to convict unless they are over 98% accurate. No lie detectors or testing shall be used in investigations unless they are over 80% accurate.

69/ Police are supposed to work 50-hour weeks.

70/ No more than 20% of any county police force shall be women.

71/ Police overtime shall not be budgeted and assigned by

police, but by the Senate jury watching over the police force. Is someone shooting at the officer or drawing to shoot at the officer, or another person. Then the officer can take emergency action all by himself and shoot back. Otherwise the officer normally asks for guidance from their command jury when in doubt.

72/ Police shall not be allowed to assist with civil matters, such as when there is a dispute about what was offered for sale or the services provided, or partial payment for cause.

73/ There shall be no special police forces or task forces for crimes against animals. This role will be irresistible to animals rights zealots, who will invariably abuse their powers and punish innocent people for gray-area care of animals. There may however be special recorder system techs that put in sound amplitude monitoring equipment.

74/ Only people qualified to vote can work in government or serve as police officers. Only people born citizens shall have the right to judge in matters of the court. Foreigners that have defrauded the country and pose as a citizens and to serve in government shall be executed as spies.

75/ There must be at least one woman in each police station 24 hours a day for dealing with females.

76/ All graduating high school students shall get at least 3 modules on police conduct and what police are allowed to do and compel people to do.

77/ The recorder system is supposed to have drone depots scattered around the nation in all built-up and fire hazard areas. Some of these will be race drones to get images fast. Others will be slower and designed to hover or to follow vehicles instead of using police chases. These drones will have a public feed that is also used by police, fire and the militia.

78/ Just as we require people who get in car accidents to file accident reports or become eligible for prosecution by the legal system: those who get into fist fights shall also be required to file a police report or become eligible for prosecution by the legal system.

79/ All county government workers must fully cooperate with the national government in matters that are related to immigration. It shall not be possible for any county Senate, or other county government body to order this obligation away.

80/ Those people who work in law enforcement related to crime gangs, organized crime, and immigration may wear masks.

81/ Psychiatrists, psychologists, and psych institutions shall have no special powers under the law and with regard to the court system either with regard to people's rights, or with regard to court testimony. Under the law, all psychiatrists and psychologists shall be viewed as 98% quackery with a grain of occasional genuine insight here and there. No Psychiatrists, or psychologists, or any group of these shall ever have the power to lock people up against their will. Wherever this occurs, regardless of the law passed, the quack head shrinker shall be charged with conspiracy to commit felony kidnapping. Nobody shall be able to sign-away their freedom to a psych person or a psych institution, and it shall also be considered felony kidnapping to attempt to fool people with such sign-your-rights-away documents and tactics. Paramedics shall have nothing to do with mental health, except taking delusional people to the emergency

room. However, paramedics cannot touch mentally ill people if they refuse care.

82/ The credence people pay to so-called expert mental health people in the criminal justice system shall be thought a thing of money and influence corrupting the system and a back door to power over the justice system.

83/ Government shall be prohibited from giving any special status to the comments of so-called mental health experts, fortune tellers, chiropractors, educators, and professors in its proceedings including all court proceedings. No testimony from these people shall be admissible in all criminal and money court matters. Mental health experts may however be admitted where dysfunctional public aid recipients are being committed to an institution.

84/ To prevent unelected psychiatric/psychological people from having any corrupt influence over our democracy, we shall say that what matters most is what a layman Senate jury thinks about a person's sanity, and no expert should have any sway in their decision. For the greater risk is not that somebody has been mis-sentenced due to the ignorance of our Senators, but that the psychiatrists are corrupt or inept. No person shall be considered insane unless at least 5 out of 7 Sub-Senators say the person is clearly insane. Political figures and politically active people shall be exempt from all sorts of declarations of insanity, and also from all forms of court ordered mental health evaluation and treatment. Also, people who have committed no serious crime shall be exempt from court ordered mental health evaluations.

85/ There shall be no court ordered mental health care or drug treatment without a criminal conviction. And this criminal conviction shall not involve any crime of judicial procedure.

86/ Psychiatrists, psychologists, and psych institutions shall have no right to call police or other authorities over the condition of the clients leaving their treatment. However they shall be responsible for alerting police when their clients reveal evidence of a crime.

87/ Whenever mental health people have sex with their clients or prior clients, it shall always be considered rape without exception. It shall be a felony for psychiatrists, psychologists and mental health counsellors to receive non-cash payments, or gifts, property rights, or free rent, or sexual favors/gifts from their clients, or payments from clients and their agents from outside the healthcare payment system. All such payments and gifts shall be considered stolen property and the transfer shall be void.

88/ A convicted criminal's state of mind, youth, old age, and their sanity or insanity feel shall not longer be thought to have any bearing on the crimes they committed, or the penalty they must pay for these crimes. Insanity, mental retardation, and intoxication shall never reduce the penalty for any crime, including especially death penalty crimes. Insane people, retarded people, and people who were intoxicated when they committed their crimes shall stand trial and be punished like everyone else. Furthermore, none of these condition shall ever reduce any criminal penalty. However insane and retarded convicts may be sent to special similarly unpleasant lockups that better meet their needs. Also, the insane and retarded shall never be subject to early release from incarceration for good behavior. Also, these conditions of insanity, retardation, and intoxication shall be displayed right

next to their conviction on the convicts official permanent government facebook page for life.

89/ Every person convicted of murder that is also found to be insane must be executed. Those who murder people of another race should also generally be executed, However this law shall not apply where the murder victim is from the violent religion of Islam, or there is any element of self defense.

We shall no longer have any official government-sanctioned professions/occupations of psychiatrist or psychologist.

90/ This constitution is of the opinion that the psychiatry/psychology industry as it is currently run suffers from several fundamental flaws:

a/ The idea that troubling experiences are somehow made better or cured by talking about them endlessly and dwelling on them.

b/ The idea that people need to label more experiences as traumatic and worthy of the attention of others, particularly wildly overpriced so-called experts.

c/ The idea that people can become experts in helping others with their mental problems because of their time spent studying psychology in a school.

d/ The idea that ordinary wise people are not better at this than school-educated people.

e/ That many or perhaps most psychologists and psychiatrists are so obviously damaged themselves mentally and hence disqualified from helping others with their own mental problems.

f/ That it would be better to have the people getting 5-hours of \$30/hour treatments instead of 1 hour of \$150/hour treatments.

x/ For all of the above reasons, we shall limit the amount of education required to be a mental counsellor of any sort to a 2-year junior college counseling degree. Also, there shall be a 50% sales tax on all chiropractors and psych counsellors of non-institutionalized people, that charge more than twice the average wage per minute of the chiropractor's or counsellor's time.

91/ Both government and insurance shall be prohibited from paying over twice the average national wage for mental health consulting by the hour. Where the mental health person is meeting with multiple patients this limit shall also apply to the mental health professional, and not to the multiple patients, so that in no event shall the mental health consultant charge more than twice the average national wage.

NR'36. PRE-TRIAL LOCKUP AND RELEASE

1/ The justice system shall not use money deposits, or refundable fines to guarantee that those released from jail pending trial will return for trial. This is because:

a/ Money bail is an ineffective way to guarantee that people will return for trial because many people will give up everything to stay out of prison. These people frequently "jump bail", and run away despite their deposit payment.

b/ Bail often falls heaviest on the poor because their payments are a larger share of their income, and they often can't "make bail".

c/ Bail fines everyone guilty and innocent alike for the non-crime of being arrested. This is due to the 10% charges that

are normal for bail bonds. Thus merely being arrested tends to cost people 10% of the bail amount, if they are not going to sit in jail waiting for their trial. So bail amounts to a fine of the innocent, as well as the guilty — and this flatly contradicts Blackstone's ratio.

d/ Because just getting arrested costs money, the bail system gives police and prosecutors a power that they should not have over people.

e/ Money bail incentivizes police to arrest people because of hidden connections with bail bondsmen.

f/ Those accused of very large financial crimes can normally afford to walk away from the bail money.

2/ When people fail to appear in court, the penalty will be increased by somewhere between 10% and 300%. This approach is better than money bail for assuring that people will return for trial. The failure to appear penalties shall be:

a/ Over a day = 10% extra sentence.

b/ Over 7 days = 30% extra sentence.

c/ Over 37 days = 50% extra sentence.

d/ Over 1-year = 150% extra sentence.

e/ Over 3-years = 200% extra sentence.

f/ Over 7-years = 300% extra sentence.

x/ All misdemeanor and failure to appear in court charges shall expire after 7-years.

3/ Except for failing to appear at one's trial, secondary crimes shall generally not increase the penalty for the primary crime by more than one third.

4/ The presumption of innocence shall now include freedom from being arrested without a formal recorded statement of what exactly the arrest is for and the evidence against the accused

5/ All political leaders, and celebrities shall remain out of jail pending trial because they are less flight risk, and it is more likely that they are being framed than them turning from big shot to criminal.

6/ Blackstone's ratio says that "it is better that ten guilty persons escape punishment than that one innocent suffer." We shall be mindful of how Blackstone's ratio applies to pre-trial incarceration. We must therefore treat arrested, but not convicted people as innocent, and we must err slightly on the side of pre-trial release due to the presumption of innocence. Also, we cannot lock people up pre-trial, except where they are almost certainly guilty, or they are a run-away risk, or they are too dangerous to allow in public. There shall be no right to stay free pending trial when any of the following apply, however the court may still grant freedom in some cases.

a/ The accused has ever previously jumped bail, or fled, or failed to appear in court as scheduled, and did not make pay/ satisfy the system for this. Also, to be clear, those who have previously attempted to flee and jump bail shall not be granted bail again for the rest of their lives.

b/ The accused is reasonably considered a flight risk, a risk to the community, a risk to his accusers, a risk to witnesses, or a risk to himself. Also, as we will be securing our borders much better in both directions, and the UM nations will be cooperating with regard to international travel and travel identities, there will be less risk of people fleeing the country to avoid prosecution.

c/ The accused is almost certainly guilty of committing a violent felony due to a clear and hard to forge recording, or

the testimony of 2 or more unrelated bystander witnesses, or 3 or more related witnesses.

d/ The accused was found with matching blood upon him, or found with the stolen property of a violent assault victim.

e/ The accused slipped into our country illegally, for surely he can also slip back out again to avoid prison. The bar for pre-trial release shall be higher for non-citizens, and immigrant citizens.

f/ The accused is a convicted felon. Once a person has been convicted of a felony, and jailed for more than 6 years in total (or work camped for more than 12 years in total) the presumption shall always be one of guilt regarding bail for subsequent charges.

g/ The accused is already out on bail awaiting trial for another unrelated crime.

7/ People released from jail pending trial may be required to both remain in a prescribed location and wear location monitoring tech. Those who foil this tech shall lose their right to remain out of while their trial proceeds.

8/ Family, close friends and business associates may post bail for people they are close to, but strangers shall generally not be allowed to post bail or donate money, or loan money to pay for the bail of other people. It shall be a felony when convicted felons, particularly those with ties to organized crime and crime gangs post bail, or pay the legal expenses of others, either directly or indirectly. And this shall include participating-in or organizing crowd funding of bail. Everyone giving money for bail must do so in their own name. Fictional citizens shall not be allowed to post bail for anyone with their company or non-profit entity money.

9/ There shall be no pre-trial arrests or pre-trial incarceration, or denial of bail for citizens for:

a/ Crimes involving only words said, except for credible threats of mass violence.

b/ Misdemeanor crimes, or failure to pay fines.

c/ Crimes related to political activism, demonstrations, outdoors trespassing, or trespassing at a place that invites the public, failure to disperse, and similar crimes.

d/ Crimes of judicial procedure, such as perjury, resisting arrest, failure to appear, or contempt of court. If we fail to prohibit this, we give police, prosecutors, and their political allies a power that they should not have over the people.

e/ Charges against citizens or where the maximum sentence is less than 5 years. For legal non-citizens, and immigrant citizens these maximum sentences shall be time period stated above.

f/ When non-citizens and immigrant citizens illegally participate in our political process, or our demonstrations, they shall be subject to pre-trial lock-up.

g/ Crimes that have not resulted in any convictions among other people tried in the prior 365-days.

h/ Crimes that go anywhere near matters of free speech, free press, journalism, whistleblowing, military whistleblowing, government dissent, government secrets, protest, or organizing the people. When government power is used to contravene this exclusion, the penalty should be years in prison.

10/ All foreigners that are arrested shall be checked for warrants and prior convictions in our nation and their own, as well as any nation they recently visited.

11/ The penalty for those caught trying to slip out of the nation to avoid its criminal justice system shall be an automatic tripling of the sentence.

12/ Those denied the right to remain free pending trial shall have the right to be brought to gather evidence upon probable claim.

13/ Witnesses shall never be arrested to assure their attendance in legal proceedings. This practice is wrong because it greatly reduces the number of people who will come forward as witnesses. However, if a subpoenaed person fails to appear, that shall be a crime.

14/ The flight risk aspect of being released pending charges will be diminished now that we are eliminating cash and fungibles.

15/ Except in matters of public intoxication, where all the intoxicated people of each sex are held in the same cell, everyone who is jailed pending trial shall have the right to solitary confinement and access to preexisting medications, so long as these are not psychoactive. They shall also be kept under 24-hour pre-trial video monitoring. People under pre-trial lockup may also pay the county recorder system and general fund for a locked-in jail apartment rented daily, weekly or monthly for no more than 33%% over the market rate.

16/ Those in charge of the justice system shall not have the power to silence people. Each person held in jail awaiting trial shall have the right to communicate with the outside world under monitoring unless they intimidate people, or organize criminal activity by this communication. This right however, shall not exist where the crime was an act of shocking or terroristic violence. Everyone under pre-trial lockup shall have access to their telephone communication, email, presentation software, data storage, data output, the law library, relevant arrest records, and their arrest and lock-up videos. All of this monitored communication shall be admissible as evidence in court for both sides.

17/ All laws shall be numbered, indexed and linked to both summery, and comprehensive explanations. All charges and arrests shall precisely indicate which numbered sections were violated, along with the prosecution's case in its entirety.

18/ Government may arrest and hold people briefly without a conviction, but it shall take no punitive or lasting action without a conviction.

19/ It shall be a felony to aggregate and promulgate the information of people who where arrested but not convicted by the justice system. This includes arrest photographs (mug shots) and police video recordings.

20/ It shall be considered a form of illegal imprisonment and a felony when any part of Government, the courts, fictional citizens or others deprive non-convicts of access to their financial accounts or money without due process and just cause. This shall be especially so when people are deprived of their regular normal life expenses (broadly defined) and for their prior payment obligations. Also, prior to conviction, everyone shall generally have the right to use their financial accounts for the same sorts of purchases they recently made even if litigation is pending. Unless there is a felony conviction, nobody's financial accounts shall ever be turned off. It shall be considered democide for government officials to attempt to deprive people of access to their financial

accounts for basic needs under any circumstances including court judgements, but not while they are under lockup.

21/ It shall be a felony for Government officials to use property/money confiscations or to silence their critics or political opponents.

22/ We shall err on the side of easy conviction and heavy punishments of Government officials that wrongly claim that people have violated the law, now their property must be seized. Tyranny always seeks excuses for seizing property for Ishtar. Democracy normally goes in the opposite direction and looks for reasons to leave people with their property. Thus we realize that property seizure more a thing of tyranny than democracy.

23/ If the courts have the power to command that a person must remain within a certain jurisdiction pending trial, then they may also command that the person's financial access can also be turned off outside that jurisdiction pending trial.

24/ The term criminal proceeds shall only be applicable where the money flows are both substantial, and a substantial motivator. If the money flows are incidental, or personal they shall not be seen as criminal proceeds.

25/ When people are put in jail, they may elect to have the county recorder system automatically debit their accounts for loan payments, rents and utilities. Everyone held in jail has a right to liquidate their assets and terminate tenancies while in jail. However, they don't necessarily have the right to use the proceeds, especially if they are considered as criminal proceeds by the courts.

26/ Police shall not arrest people that haven't done anything wrong, or where there's no intention to charge them. This shall be thought to be a violation of peoples rights, a miscarriage of justice, and a police crime, for these people to be falsely arrested. Also, the Senate shall attempt to eliminate all so-called pocket laws, as they breed bad police officers and police corruption.

27/ Police cannot arrest people as a means of moving them against their will from one place to another.

28/ Police authority exists in a very narrow band were laws are both being broken and regularly enforced. Where laws are being broken and not regularly enforce, the police shall not have the right to enforce them, without specific Senate instructions.

29/ Those found with drugged-out, unconscious, or dead people who are attractive and not socially connected to them shall generally not get released pending trial.

30/ It shall be a felony for judges to attempt to impose pre-trial release rules that prevent suspects from using their free speech, or free assembly rights, or meeting with other people who are not felons, or communicating as normal with others, except that they shall not be allowed to communicate with their victims, or the associates of their victims, and they cannot harass or threaten anyone in any way or their bail may be cancelled.

31/ In today's age of instant communications, there is no more need for the sort of strong-arm bounty hunter that catches bail jumpers by themselves. Instead, from now on, the people finding people fleeing from justice will remain anonymous and they will contact will contact local police and the uniformed police will make the arrest. However, the local police department making the arrest (domestic or foreign)

shall get 20% of the bounty.

32/ When people are released from pre-trial lock up, it should be perfectly normal for the court to put standard withdrawal limits on their accounts, and prevent the sale of real estate if they own any.

33/ The reason we have bail bondsmen is not because this is a good idea for society. Bail bonds only exist because they are a parasitic revenue source of Ishtar and the ancient union of the poorest people on earth. There is no reason for us to mandate that people accused of crimes pay 10% to get out of jail, which goes to a private company fronting for Ishtar. Are we really all this stupid? We have a blood sucking tick attached to our criminal justice system and sucking blood from every person arrested. And because of this we are punishing everyone who ever gets charged with a bond fee, we are punishing guilty and innocent alike to some degree, just for getting arrested. And what stress and injustice to lock people up like this before they are even convicted unless they pay 10% to the bail bonding company. Where is the due process in that?

34/ It must be pointed out that due process was the only right guaranteed twice under the 1789 constitution. The 14th amendment guarantees equal protection to the former slaves. The fifth amendment, guaranteed equal protection as part of the right to remain silent, the right to an attorney, and if you cannot afford an attorney, one will be provided for you. In both cases, due process is largely achieved through the use of super-expensive lawyers. Also, the old constitution had this Miranda right script that used the word attorney 4-times. So the reason the constitution mentions due process twice is because it really means the right to an attorney. And this is not what it should mean. It should mean the right to get a fair trial and the right to be treated like other people under the law even if you are dark skinned or a woman.

35/ There shall no longer be any money bail. People may now pledge assets for their assessed value to the court. But there shall be no more bail bonds.

NR'37. THE PUBLIC PROSECUTION DECISION

1/ We shall long ponder the words of Alexander Solzhenitsyn, that "A Marxist system is recognized by the fact that it spares criminals, and criminalizes, political opponents."

2/ Due process shall always be regarded as a thing of long established custom. The processes of due process can't be suddenly changed to "get someone". This shall be considered corruption, and the people involved may be charged with corruption. Also, with regard to corruption, those abusing the system to harm others shall be just as guilty as those who get kickbacks and free stuff and sexual favors.

3/ Blind justice and due process are not only about having unbiased trials, they are also about not being biased in who is brought to justice. To this end, there shall be no decision about who to prosecute made by non-elected people. The decision about who to prosecute, why to prosecute them, and how to prosecute them shall be a matter for Senate juries exclusively. The decision to begin a public prosecution for a crime shall be made by a Senate jury with a size that varies depending on the severity of the charges. This jury shall serve no other purpose in the prosecution of the case, and a

second jury shall prosecute the actual charges. The trial shall be judged by yet another judge or jury depending on the severity of the charges.

4/ We must never allow unelected people/ administrations to be able to either stop/delay the process, or let people go. This rule shall be applicable at all points in the judicial process. This also includes especially letting people out of the incarceration system early (for any reason) once they have been convicted.

5/ It must be noted that prosecutors wield a great amount of power in our judicial system. For corrupt prosecutors have the power to:

a/ Weakly prosecute people upon payment of a bribe, or grant of a favor.

b/ Stop a prosecution/ trial/ incarceration through payment of a bribe or grant of a favor.

c/ Get people released from incarceration earlier than they should be through payment bribes or grant of a favor.

6/ It shall be thought that under the old corrupt system, our justice system was greatly relaxed by constant leftist onslaught, fronting for Islam. This led to a situation where we had many career criminals with literally dozens of convictions for violent crimes. This was to foster a criminal underclass that resisted our infidel nation, and also served as an excuse for outlawing and rounding up our firearms. The Senate shall go through the records of past decades and find all the 7-convictions plus criminals. Then the Senate should map out which prosecutors and judges were most involved with giving slap on the wrist convictions to these people while prosecuting good people.

7/ The Senate shall review, and may revive, and retry all the poorly prosecuted cases of the old system where they involve any of the following. Also, the double jeopardy rule shall not apply in these cases

a/ Apparent career criminals with several convictions that were poorly punished.

b/ Poor prosecutions, or acquittals for little reason.

c/ Poor prosecutions for BLM rioters, Antifa rioters, the Mafia, Islamic extremism, or sex trafficking.

d/ Freedom of speech issues.

e/ Systemic corruption.

f/ Organized shoplifting.

8/ All Senate prosecutors and judges, shall be randomly drawn for their jury duty. If the person under consideration for prosecution is a friend or a rival, then the Senators must recuse themselves or face charges. It shall be considered a form of corruption, and a felony for prosecutors and government officials to judge people they know, or bringing meritless investigations, charges, and money court claims against their enemies in order to harass them. Where no reasonable prosecutor would bring charges, or seek such a high penalty, and there appears to be political or ulterior motivation, and the prosecutor did not recuse himself, the prosecutor may be charged with failure to recuse, malicious prosecution, or the higher crime of politically motivated prosecution.

9/ The Senate shall make a complete list of which forms testing are admissible, and under what conditions these are admissible.

10/ The presumption of innocence should be strongest

among those with no prior convictions. Then it should diminish until we reach hardened criminals who have lost much of their presumption of innocence due to multiple convictions for non-political crimes. As well, the presumption of innocence shall be weakest among those with apparently air tight cases against them, especially those caught on public video or in front of many witnesses.

11/ When people are accused of crimes for which the maximum normal jail sentence is less than 3-years, the criminal justice system must make a reasonable attempt to communicate with them and call them in before an arrest warrant is issued.

12/ The double Jeopardy prohibition shall not apply where credible claims of court corruption exist, or where the penalty is unconscionably low, or high. All trials that have happened since 2002, where race or sexual preference, or transsexuality was a big factor under the prior corrupt democracy: All of these trials shall be subject to retrial by the Senate. This includes people who were previously acquitted by the old government. The double jeopardy rule shall not apply in these cases due to systemic corruption.

13/ Sentencing shall be by multi-judge panels according to the sub 2,000-word conviction report of the trial judge/ jury and the sub 2,000-word report of the losing side.

14/ It shall be a crime for people in the justice system to hide exculpatory evidence. Also, at each stage of the legal system, spotting and calling out exculpatory evidence shall be rewarded with money, and Senate status more precious than money.

15/ There shall be no right of people wrongfully accused of crimes by disinterested (disinterested!) police and Senate prosecutors to obtain money damages for wrongful prosecutions. Apologies and expungement shall however be freely granted where the system determines that a mistake was made by the system.

16/ The legal procedure shall not be allowed to become the punishment:

a/ Because this gives too much power to police and people affiliated with the legal system.

b/ Legal procedures shall not be allowed to hang over people for months, let alone years, while they wait for the system to get to them. Once criminal charges, or money court claims have been brought against an individual citizen, that court procedure must be totally resolved within 60 days of when the side in defense is ready for trial. For violent crimes that do not result in death or severe lifelong injury, the time limit shall be 90 days. For violent crimes that result in death or severe lifelong injury, the time limit shall be 120 days.

c/ Police and prosecutors shall be expected to know the legal system inside and out. It shall be a crime for police, prosecutors, and others to bring obviously baseless cases, or obviously inapplicable charges against people in order to punish them by holding the threat of imprisonment over them, thus forcing them to defend themselves in the legal system. It may also be a crime to threaten legal action for baseless charges.

d/ When a criminal court or money court case has decided against the prosecuting side, or the case is dismissed before a verdict is made, the defending side may request various sanctions against the prosecuting side for initiating a frivolous

case.

17/ When people are arrested, a randomly drawn prosecution jury shall look at their case before they are removed to another location.

18/ Except in times of unrest, all officer testimony and body cam video shall be submitted to the recorders office prior to putting the accused person in a regular jail cell. In no event shall anyone be kept uncharged for more than 24 hours after arrest. This 24 hour rule shall apply 365 days a year.

19/ To be redundant in an extremely important matter of corrupt legal indemnity and Mafia power: Only the national Senate shall make laws about violent crime, self-defense, and the prosecution of these crimes. No county Senate shall make any laws concerning these areas. Also, if the national Judicial Sluice finds that a county is not prosecuting a case, it may take up the case and thus void the county's jurisdiction. Also if the county is prosecuting a case that the national Judicial Sluice does not want prosecuted, it may also void the county's jurisdiction.

20/ While computer algorithms maybe used to flag suspects, but they shall not be used to initiate prosecutions to charge people with crimes. Also, there shall be no trials judged by algorithms.

21/ The Senate shall determine the 10% of our nation's neighborhoods where the murder rate is highest. In this 10% area, the national Senate shall be able to fire and ban for life anyone they want involved with the police or justice system with a simple majority vote at any time without stating a reason. It shall always be noted when any party to any criminal matter, and especially the accused is from one of these areas or not.

22/ All current charges and prosecutions against Donald Trump and anyone that could in any way be considered a whistle blower or a journalist, or a big mouth shall be dismissed without prejudice. This shall include Julian Assange and Edward Snowden.

23/ All J6 protesters shall be fully pardoned, exonerated, and everyone incarcerated for more than 3 days shall have the right to stay in a new factory made, cast concrete apartment on Kauai whenever they want, for as long as they want.

24/ All of the people prosecuted under rules that were not passed/established by the old Congress shall be hereby exonerated, and shall be released from lock up as soon as they all can be discerned by the Sub-Senate. We shall begin first with free speech and protest violations and then move on to firearm violations. Furthermore:

a/ All unelected people in the future, must make sure that they are enforcing a law made by the Senate.

b/ People who are now enforcing laws that were not approved by the Senate should go to prison. This so that all government people are afraid to engage in an arrest, prosecution, or judgement for anything else but laws passed by the Senate.

25/ All of the judges, prosecutors, and police that were hired/ appointed/ elected under the old system that have done the following shall be fired/cancelled and perhaps imprisoned:

a/ Specialized in legal matters not passed/established by the old Congress but instead by unelected bureaucrats.

b/ Concentrated on prosecutions of freedom of speech,, firearm violations, or protest violations.

c/ Acted to reduce the rights of the people in regard to freedom of speech, the right to bear arms and the right to peacefully protest.
d/ Concentrated on gotcha or speed-trap type policing for profit matters.
e/ Been brought to their public office by George Soros or the totally corrupt World Economic Forum, or some other similar organization.
f/ Been involved with enforcement of vaccine rules.
g/ Been involved with prosecutions for hate speech.
h/ Have defended the rights of pedophiles.
j/ Have defended the rights of non-citizens to vote in our nation's elections.
k/ Have defended the right of people to vote in our elections without identification.

l/ Have sent over twice the average rate of people to jail per trial for contempt of court, resisting arrest, obstruction of justice, and other procedural laws/matters.

26/ All laws must be enforced uniformly. It shall not be allowed to only prosecute political opponents for certain crimes that nobody else is prosecuted for. For example, if nobody is getting prosecuted for lying on their loan application form about their intent to live in a house they are borrowing money to buy. If millions of people are not getting prosecuted for this crime, and only a few political people are getting prosecuted for this crime, then there can be no prosecution because they are obviously not uniform for everyone. The people have the right to uniformity of prosecution, just like they have the right to be reasonably notified in advance about all changes in the legal system, so they can adapt to the changes.

27/ All prosecutions of old crimes must be organized and measured by some logical formula across a large number of people accused of similar crimes. It shall not be allowed for government to have investigations of past behavior that target individuals until they find something just because they want to get that person, particularly when they are politically active.

NR'38. THE ACCUSED IN COURT

1/ We shall honor the great words of the Magna Carta paragraph 39 when we say that: "No citizen shall be arrested, jailed, made an outlaw, exiled, stripped of his rights or possessions, ruined in any way, or proceeded against, except by the lawful judgement of a Senate jury under the law of the land."

2/ We shall honor the great words of Magna Carta paragraph 40 when we say that: "To nobody shall we sell or deny or delay justice or any right."

3/ We shall honor the great words of the 8th amendment of the 1789 US constitution that says: "Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted". However, we shall say instead that:

a/ Money bail shall not to be used by the judicial system.

b/ Excessive fines shall not be imposed by government or others, and that to keep people honest, all fines get paid to the national treasury.

c/ There shall be no irregular punishments for crimes, and all punishments must be the same for the same crime

nationwide.

d/ There shall be no cruel punishments except when the criminal was convicted of cruelty against many people, normally Mass murderers, mass sexual abusers, mass saboteurs, and mass violent criminals as strictly regulated herein.

4/ We shall echo the words of the original Massachusetts constitution that:

a/ "No person shall be held to answer for any crime or offense, until that crime is fully, plainly, substantially and formally described to him." Indeed, it shall be a principal duty of the criminal justice system that everyone deprived of their freedom is told why according to these mighty words.

b/ "In criminal prosecutions, the verification of the facts in the vicinity [of] where they happened, is one of the greatest securities of the life, liberty and property of the citizen." Indeed, all trials must be held near where the crime occurred.

5/ Everyone accused of a felony, misdemeanors or infraction shall have the following rights in court. Where any of the following are denied to the accused in a criminal court, the trial shall generally not be considered valid:

a/ To know the exact charges against them in full, and to see all the prosecution's evidence a reasonable time before the trial, so the accused can gather their own evidence and prepare a defense. Where charges or evidence are increased in any way, the defendant shall have a reasonable second amount of time to prepare a defense. However this shall never be less than 5 days for minor changes, 10 days for major changes, and 15 days for new charges. Also, the addition of charges or evidence this shall not affect the absolute limits on how long the case has to result in verdict.

b/ To delay their criminal trial for up to 180 days from when they were charged to prepare for trial. If new evidence is revealed during the trial, the accused shall be allowed to start the clock over again.

c/ To a speedy trial. When the accused in a criminal matter requests an immediate trial, and the prosecution does not need time for processing forensic evidence, the trial shall begin no more than 6 days after the accused requests and immediate trial. Where there is an invasion, full military mobilization, or other severe and sudden crisis the courts shall have up to 180 days to try people that request an immediate trial. Video evidence shall not be considered forensic evidence. To be clear, this paragraph only applies to criminal charges, and not to money court or unlawful detainees.

d/ To compel witnesses to appear at their trial if they can explain a valid reason related to their case.

e/ To examine witnesses against them. Also, to know the the full names, occupations and court history of all who stand witness against them, and those who are charging them with a crime. Also, to know all family, friendship, work or other associations, or monies or valuables ever paid between all witnesses and the opposing side in any court case. No pseudonyms shall ever be used by any witness in court.

f/ If video or written evidence is used in a trial, both sides shall get the video files in their original and unedited form, with no redactions, or reductions in image quality or screen resolution.

g/ To have a reasonable amount of time with a pre-trial

defense library and advisor. However, these library searches and advisor conversations, as with all searches and conversations with legal advisors shall be recorded and may be viewed by the prosecution and used in court to help the prosecution.

h/ To have at least the amount of time prescribed herein to present their case and question prosecution evidence.

i/ To adjourn their trial for a reasonable amount of time and gather additional evidence if they can explain a reasonable cause.

j/ To confront their accusers, obtain and examine witnesses, and know their identity except when genuine government secrets must be kept secret. In this case, a jury of at least 17 Senators from the Judicial Sluice shall be randomly selected to evaluate the secret evidence or witness testimony in light of the questions presented by the defense. Also, when the Government charges citizens with crimes based on secret evidence, the standard for conviction shall be much higher than normal and the injustice must be crystal clear.

k/ It shall be noted that history repeatedly shows how misconduct by government officials is a genuine and eternal problem. Where there are realistic accusations of Government misconduct, secret evidence shall generally not be allowed to favor the defense.

l/ To have an impartial, publicly announced trial by a randomly drawn judge or Senate jury that is not from the same locale where the crime was alleged to have been committed in, or the prosecutors were from.

m/ To have unbiased judges. Where possible, judges and Senate jurors shall not know the people they are judging.

n/ To have a trial that is recorded and posted online for open public viewing, except where limited by other parts of this Constitution.

o/ To know the law WIKI sections that explain the charges against them, and defense strategies for these charges.

6/ All legally obtained police videos shall be admissible in court. Illegally obtained videos shall not be admissible in court. The Senate shall establish a single detailed list of what constitutes legally vs. illegally obtained video. All accused/defendants in all criminal court and money court trials shall have a right to use anything they want as evidence, and say anything they want in their defense. However, the prosecutions may argue against the validity of the evidence, and the judge and jury members may choose to ignore the evidence. Never shall we have the corruption that existed under the old system where evidence was "not admitted" to a trial.

7/ Everyone on trial for a crime shall be allowed to give a prefacing statement at the start of their trial, and a closing statement at the end of the trial. In these statements, they shall be given at least 5-minutes to speak for every year of lockup they face. Those who potentially face less than 5 years of incarceration or interment shall be given at least 25 minutes for prefacing statements, and at least 25 minutes for closing statements. Those who face life in prison or a death penalty shall be given at least 3-hours minutes to address the court for prefacing statements, and also 3-hours for closing statements. Unused time for prefacing statements may be later applied to closing statements.

8/ Except in the two cases below, every person arrested, on

trial, in jail, on probation, and at every other stage of the judicial process/system shall have the right to say and write anything they want to the public about the criminal charges, fines, and money court liability they face. It may be a felony for people involved with the courts or judicial system to intimidate or threaten, or blackmail people facing criminal charges into not speaking out about the charges they face.

However, there shall be two exceptions:

a/ Those on trial for matters related to secret military weapons systems, secret military tactics, military strengths and weaknesses, and secret investigative techniques of the police and judicial system may not talk about these things.

b/ Those on trial for violent or sexual crimes shall not have any right to communicate publicly about the people they are accused of violently or sexually victimizing, except to present evidence that the person has a history of making similar charges, or a history of lying.

9/ Where a defendant is found guilty, and it is also found that the defendant used their court time to vex, or annoy their victims, their witnesses, or the people involved in the judicial system, the judge or Senate jury may find the defendant to be "remorseless". Remorseless convicts may be subject to as much as a doubling of penalties in cases of extreme remorselessness for heinous crimes.

10/ All court matters with any political connections, or which involve political figures, or fictional citizens must be live streamed in their entirety.

11/ Except for matters of spying, military tactics, military inventory, weapon systems, military plants, and the secrets of criminal apprehension, no government proceedings shall ever be secret. Also, those attempting to keep government matters secret that are not related to the above may be charged with censorship. No rewards granted by government relating to any indictment or any criminal prosecution shall ever be secret. However, the names of the judges and jurors in criminal prosecutions of organized criminals and violent criminals may be kept secret by the county recorder system.

12/ The right to appeal a criminal decision (if any) shall be considered an inalienable right. All agreements where people accused of a crime waive their right to appeal shall be void.

13/ In general, all agreements made outside of a courtroom pertaining to, or connected with a person on trial for a crime in relation to that trial shall be void.

14/ If new evidence of guilt or new charges emerge during the trial, the prosecutor may amend its case, however, the accused shall be allowed a reasonable time to re-prepare their case again in consideration of the new charges.

15/ The parties involved in court cases shall have no right of judge or juror selection as things were under the old correct system. The Senate shall randomly draw Senate jurors and the random draw shall be final.

16/ All Judges and jurors, and other people in important positions in the judicial system shall:

a/ Be over age 35.

b/ Be native born citizens able to vote in the nation's elections.

c/ Not be lawyers.

d/ Shall not have any convictions for misdemeanors or felonies.

e/ Shall not be police, or work in the judicial system or

recorder's office.

17/ Most larger police stations, and larger branches of the county recorder system shall have a number of police/ bailiff guarded virtual court appearance boxes (telephone booth like VCAB boxes that listen for and block all unauthorized transmissions). These only allow one person at a time to enter to give video testimony. In all VCABs, the county staff shall swear-in the people appearing on video. Where the penalty is small, people may go to either recorder or police VCABs. Where the person appearing might have to go to jail for over a year, as a result of the court action, they must appear at a police VCAB with a locking door.

18/ Special courts with special rules and special lawyers shall be seen by all as a thing created to reduce competition and increase lawyers fees. We shall go in the opposite direction and say that there shall be no special courts with special rules. There shall only be one, single court system in our nation with only one set of universal laws and rules. For all courts. There shall be no independent maritime law, or admiralty law, or military law, with their own courts and laws and procedural rules. There shall also be no UK law or foreign law in our nation. The entire legal system shall now be under the purview of the Senate, its laws, and its court system and its absolutely total legislative veto right of its Senate juries. In fact, now our national Senate shall create a fair new set of rules to replace these old systems which repeatedly favor the rights of ship owners and their crews over everyone else. Also, these legal systems shall not their own special jargon with special meanings unless these special meanings are disclosed in the definitions section. From now on, all Admiralty, Maritime, and military laws and rules shall be considered a subset of the law of the land and shall use the same definitions for the same terms. Also, the Senate shall work to codify the common law, to unify our legal system. The use of the Lex Mercatoria, and the Justinian code shall be prohibited in all courts. No maritime law shall every be enforced in our nation, or on any inland waterways. Maritime laws shall only be enforced on the salty areas around our nation. It shall be a felony for law-enforcement officers or the judicial system officers to attempt to enforce maritime law in our nation. Furthermore, after one year, where government or court people attempt to enforce maritime or military law, they shall be deprived of their police and judicial system occupations for life, and if they are a lawyer, they shall be disbarred, and then prohibited from practicing law for life.

19/ Everyone conducting and judging legal proceedings and administrative proceedings must complete the Senate's relevant anti-bias module(s), and obey the strict rules of recusal for bias. Those involved with legal or administrative proceedings (in either government or private sector) that are obviously one-sided and biased, these people may be charged with a crime.

20/ No person accused of a crime shall ever be required to pay any judicial system costs, whether convicted or acquitted.

21/ No person shall ever receive any payment for testifying. No testimony given for reward or payment shall be admissible in court. This shall include fees, commissions, incentives, suspended sentences, favorable jail treatment, and expert witness fees.

22/ The legal system shall take great care to minimize the danger of giving testimony against organized criminals, crime gangs, terrorists, corrupt government officials, and violent individuals. The legal system shall encourage witnesses against dangerous people to make video depositions before the trial, and give testimony via telepresence. This video testimony shall stand as valid evidence in court, even if the witness dies or goes missing or is incapacitated before the trial. It can also be made public by the witness either before or after their death. Witness protection people from our nation and other nations may be housed on Kauai if they want.

23/ It shall be a felony to try to intimidate a witness so they will not testify, or so they change their testimony. It shall be a felony to try to intimidate a judge, juror, or administrator in any way as a means of altering government or court decisions. Where witnesses against organized criminals die mysteriously, the Senate may put the accused away for life in the worst of our prisons. Where there is adequate evidence that the organized criminals participated in the killing of people standing witness against them, the organized criminals may be subject to death by torturous execution.

24/ Randomly drawn pairs of Sub-Senators shall manage each witness protection case.

25/ There is safety in numbers. In situations where a Senate jury is considered to be in any danger of retribution or intimidation, the matter shall be judged by a grand jury that can be the size of the entire Sub-Senate if needed to assure the safety of all who judge.

26/ Where criminals aide in prosecutions, and are in danger, they may be moved to a jail/ protection island if their safety must be assured. Only Senate juries of 15 or more may judge prosecution deals for criminals that aid in criminal

27/ We shall remain mindful of how the English spelling of "parole" means "words" in Italian, implying that the convict is spouting empty words to get out of jail early. From now on, there shall be no more parole of convicts based on the words they say, or hearings where convicts try to say words to get released. Instead there shall be an automatic 20% sentence reduction for all first time offenders that do all of the following three things. Repeat offenders and those who do not qualify shall not be eligible for early release from incarceration/ lockup:

a/ Exhibit model citizenship behavior while incarcerated.

b/ Prove their ability to work diligently for their entire time under lockup.

c/ Prove their ability to learn a marketable skill or make meaningful progress in their academic education while under lockup.

28/ No trial (in either criminal or money court) shall occur in the same district where charges were made. In urban areas, the trial must occur at least 20 km away from the location where the charges were made, In suburban and exurban areas, the trial must occur at least 40 km away from the location where the charges were made. In all other areas, the trial must occur at least 30 km away from the location where the charges were made. In both criminal and civil matters, the parties under adjudication shall have no input about their trial venue.

29/ No single judge shall be allowed to sentence somebody to more than 1-year of lockup. For all charges, if the sentence

will exceed 1-year, there must be at least a tribunal of 3-Senators.

30/ All court proceedings shall be recorded electronically on high quality audio/video. There shall be no more human court transcriptionists.

31/ Court advisors shall help accused people find the videos and texts about the well-worn path of previous trials, and the results of pleading this way or that. There shall no longer be public defenders.

32/ All contact between the court and justice system and the people involved in it must be on recorder video. All in-person, and video court appearances shall begin with the testimony oath.

33/ Instead of using oversized expensive courtrooms as video studios, we shall, as much as practical use virtual video courtrooms where everyone convenes in booths and communicates by telepresence.

34/ Where the accused demands to examine the witnesses against them, they shall always have this right. However, this right may be satisfied by telepresence. All jails shall have onsite virtual court cells.

Also, both the complaint and the response side get their opening statements are recorded by both the recorder system and court system video backup. Complaints generally have to be under 5 minutes long. And responses should normally get up to 40 minutes. Also, the defendant should have the right to make claims of falseness based on video or location data, or other alibis. The system matches virtual paralegals to council people accused of crimes of how to make the system rule them out, and how to respond on video to the charges.

35/ Judges and Senate juries shall have extensive powers to eject people from both virtual and live proceedings for grossly bad behavior or outright disrespect, or lying. Where people tell lies on video testimony about important things, the Senate judges/jurors shall have extensive rights to charge them with perjury. However, judges shall have practically no right to hold people in contempt of court for simply trying to get some important point out and into the record. Also, all judges and juries shall be required to use only scripted commands when they are asking for testimony and formal penalty of perjury statements. Also, it bear repeating that all charges of contempt of court and perjury, and other crimes of judicial procedure shall be decided by a different Senate jury/judge from the one running the initial trial. Also:

a/ Only one charge of contempt of court shall be possible on any given day.

b/ No charge of contempt of court shall be punishable by more than 10 days in jail per count.

36/ Matters of immigration, illegal immigration, refuge, and the granting of new citizenship to foreigners shall not have any standing in the courts, and shall not be considered matters for the courts, or for the county governments to get involved with.

37/ We must be very careful not to trust DNA evidence too much. This is because excessive trust in DNA evidence makes it easy to set-up people as escape-goats. In other words, the DNA evidence might be fool proof, but we never know its provenance for 100% certain. So wherever we use DNA evidence, those deciding on the case must ask if the

evidence seems like it might have been placed as a deception.

38/ Nobody who happens to be attending a court proceeding may be called to testify without a subpoena, advance notice, and time to prepare. Furthermore, it shall be a crime to violate a person's right to remain silent, and threaten them, and force them to testify against their will. Such testimony gathered in this way, and charges arising from this illegally gathered testimony shall generally be subject to appeal and shall be thought easy to get thrown out on appeal.

39/ Where we have actual courtrooms for criminal matters, these shall be co-located next to the jails. There is little sense having expensive and dangerous prisoner transport away from our pre-trial jails. Where the accused enters the court area from the jail area, the accused remains behind bars, sealed in a secure jail hallway zone within each court house.

40/ Neither our long-term jails nor our physical courts shall be located an urban area. In fact, these shall not even be located within 2km of any suburban area where the residential density is over 4-units per acre.

41/ Intoxication, youth over age 13, desperation, and coming from another culture shall be no defense for the commission of heinous acts.

42/ Under the old corrupt lawyer-based legal system, it was common for a judge to tell either party that they could not present some evidence or other and greatly sway the decision. Under our new system, this shall not really be possible and each side shall have the right to say what it wants, and the Senate judge/jurors conducting the trial shall only have the ability to discuss among each other what was said and ignore comments for some stated reason or other, which need not be entirely valid.

43/ It shall no longer be allowed for people in any sort of proceedings to ask questions and then demand a simplistic yes or no answer. This shall be thought of as a rhetorical tactic for winning arguments and concealing the truth. Where needed, everyone answering questions shall have the right to explain their answers, and our commitment to the truth demands nothing less.

44/ There shall be no benefit of pleading guilty or not pleading guilty in the system. In fact, defendant shall not plead guilty or not guilty, but simply talk about their innocence. It shall be up to the prosecution to prove the guilt. When someone pleads guilty or innocent, this should not be thought very important.

45/ Everybody shall have a constitutional right to be present and attend all criminal and money court trials and hearings and any other Government proceeding involving them. There shall be no right of either government or the criminal court system, or the money court system to hold proceedings without the person charged being present. The general rule shall be simple and blunt: no defendant — no valid court or government proceeding.

46/ When people own their home or apartment or other valuable real estate, and they are being sued in money court, it shall through very difficult to freeze anything more than the sale or mortgage of their real estate pending trial.

47/ Those who have been institutionalized for psychiatric problems shall be required to have a separate hearing on their mental condition before they can bring a case in court. With regard to people that have a residence, the psychiatric

system shall be biased to releasing them early, but with regard to homeless people they shall be kept for at least 30 days for observation.

48/ All Sub-Senate juries shall generally be considered a jury of peers.

49/ When people are asked a clear question a number of times in in either court, or in Senate testimony, they may be charged with contempt of court, or contempt of the Senate, as applicable, or failure to appear, if they talk about other things in their testimony to avoid commenting on the matter at hand.

50/ Government shall not impound, livestock without a court order, and an individual trial, except where it pays fair value.

51/ The courts shall not have the power to order convicted felons to attend talk-about-your-problems counseling with any expensive psych doctors.

52/ No past blanket commutations of death sentences by the courts shall be valid. The national Judicial Sluice shall now go back and decide which people with prior death sentences are to be now executed and which shall spend life in prison.

53/ All people on death row for more than 7 years, for murder shall now executed within 1 year of this constitution coming into effect.

54/ There shall be no more shopping cases around to judges or juries. If the first 3 court submission don't get a court to pick up the case, the matter shall not get tried in court.

55/ It shall be a felony to charge people, especially powerful and connected people with crimes in order just to smear them and drag them through the trial process.

56/ The Senate shall review all the judges that have sent several times the average number of people to jail per trial for contempt of court and procedural matters. The worst of these may be jailed, and other may have their judgeships terminated.

57/ There shall be no special dress codes for court, including lawyers, judges, and jurors for any court in the nation. However everyone appearing in court, including principals, lawyers, surrogates witnesses, and judges shall be prohibited from wearing suits, neckties, tuxedos, button-down shirts, pleated clothing, dry-cleaned clothing, branded clothing, and other fancy clothing. Also there shall no longer be special clothing for judges, or wigs, or robes. There shall also be no right of judges and jurors to say to people that they cannot wear their legal clothing in their court or in their proceedings.

58/ There shall be no difference in the way the court works for felonies or misdemeanors in court. Also, the differences between criminal court and money court procedures should be unified wherever practical.

59/ There shall be a right to trial, and also a right to self-defense in the legal system. In all courts in the nation, people involved with the prosecution and defense, and in all Senate hearings people shall have the right to lift their hands to be called upon if they have something to say or something to add. However, the court shall have to power to cut them off after on minute.

60/ No person shall be compelled by any court to be bound by any unrecorded contracts, or any contract that they did not knowingly enter into. Furthermore, it shall be a felony for any court to attempt to impose or enforce any contract upon a person that they did not knowingly and willingly enter into.

61/ There shall be no secret laws, or secret attachments in amendments, or hidden terms and conditions that are not included in the contract. All this sort of lawyer-friendly law shall now be deleted from the legal system.

62/ It shall be thought suspicious when businesses and people use contracts of their own creation.

63/ Everyone appearing in court must identify themselves to the clerk and all must all get scanned for weapons. All lawyers advising people must disclose the names of their client(s) to the recorder system or they will lose their license.

64/ Lawyers shall no longer be allowed in matters of wrongful termination and employment law. Instead, matters of employment law shall be decided by OSHA arbitration.

65/ Everyone (even raving lunatics) shall have the right to speak for themselves in court without an attorney. If they are a danger to others, then we shall put them in the court room safety cell. But justice and free speech both emphatically demand that our trials must give everyone a chance to be heard at their own legal proceeding. Even if the person speaks non-sense, or if they say nothing but profanity, we must take every single step reasonably possible to give people the opportunity to say their piece at their own legal proceedings.

66/ Everybody shall have the right to speak to participate in their own legal proceedings. No court shall ever require that anybody have an attorney.

67/ The legal system shall be for the people, the lay people and it is supposed to work (wherever practical) without lawyers.

68/ The courts have no right to get involved with people's choices of legal advisors and lawyers.

69/ The objective is to have lawyers advising people about court cases, and there will be lawyers litigating matters between non-human entities. But aside from this, lawyers shall not be much involved with the legal system.

70/ There shall be no more lifetime, or career court judges. Instead all of our small claims case single-judges shall be randomly drawn confirmed Sub-Senators cycling out of senate duty. These get drafted for up to 90-days to sit as a small claims judge.

71/ Every person who ever worked as a lawyer or judge shall be disqualified from working as a Senate juror in matters of criminal court or money court. Where we allow lawyers to become judges, we have judges biased towards those who uses lawyers.

72/ Those accused of a crime shall have the right to delay trial for up to a year while they prepare their case. They have the option to delay their trial, and nobody else has any saying this.

73/ There shall be no foreign courts of law or foreign police participating in our nation's police or judicial system.

74/ Muslims shall not be allowed to give testimony in court because their religion allows them to lie under oath.

75/ Every time somebody stands accused of a crime, their entire criminal record shall be read into the court record.

76/ The courts shall have no right to decide in matters of immigration and with regarding people who are not citizens.

NR'39. JUDICIAL RIGHTS.

1/ The accuser in all matters of the judicial system shall have the burden of proving guilt. Never shall the accused be required to prove his innocence to get acquitted.

2/ Nobody shall be deprived of life, liberty, property, or access to their financial accounts without due process of law and blind judgement by random Senator juries.

3/ One of the places where free speech is most important is when Government locks people up. Being arrested, tired, and imprisoned shall not be a black hole from which no light and no information can emerge about the arrested person. Quite the opposite. Everyone accused of a crime, or on trial for a crime, shall have the right to unlimited monitored communication about the charges against them, their arrest, their jail conditions, and the system prosecuting them. Those locked up post conviction shall have the right to send one email per week from a monitored device, and to speak out about the charges against them, their arrest, their jail conditions, and the system prosecuting them. Also, if there is any connection at all to politics, leadership, public influence, or Government operation, the accused shall have the unlimited right to scrutinize the motivations, activities, and history of their accusers. Those in jail pending trial shall not be deprived of access to communication technology and their experiences with the justice system thus hushed up.

4/ Everyone who is incarcerated or under arrest by Government shall have the right to call and talk to family, friends and legal advisors immediately. All shall have at least 2-hours to communicate in their first 4-hours at the station after their arrest.

5/ Once someone has been tried on a particular set of evidence and then acquitted, they shall never be tried again using any of that evidence, except in cases where a the trial resulted in a conviction that was subsequently overturned.

6/ The legal system and the jail system shall not have rules that favor the rich, connected, and powerful over the poor and powerless. Every person kept under lockup pending trial for a violent crime shall be kept under generally similar conditions from one another. Every person kept under lockup pending trial for a non-violent crime shall be kept under generally similar conditions from one another.

7/ Everyone kept under any sort of criminal lockup shall all be protected from harm by others in the lockup. This shall be especially so for people locked up pending trial. Every person in any form of criminal lockup shall be required to wear location tech, and shall be recorded 24-hours a day by the recorder's system. The family of everyone under lockup may watch to verify that their incarcerated family member is safe. Those involved with the convict's trail may watch the convict to see if they are actually still locked up.

8/ All new laws and new interpretations of old laws shall require Senate approval. Also there shall be public notice and a reasonable time for public awareness and compliance. Where new laws and new interpretations of old laws are misunderstood by many, government shall not be allowed to institute penalties for non-compliance. In general, penalties shall only apply where the non-compliance is almost certainly willful either directly or via willful ignorance.

9/ Police and prosecution teams shall not dig up old, now

unenforced laws to throw at people. In general, it shall not be possible to charge people with crimes unless the crime is being enforced regularly and normally under similar circumstances. Also, laws shall not be suspended, not enforced, or re-enforced without a Senate vote.

10/ Government shall generally be prohibited from moving quickly with regard to new laws, new regulations, and starting new administrations. However, these new laws, regulations, and administrations may be shut down, or turned off quickly and without advance notice when the new approach proves life-threatening or otherwise problematic.

11/ This constitution prohibits ex post facto or retroactive laws, taxes, fees, definitions, re-classifications, and penalties with some exceptions:

a/ Ex post facto laws and regulations shall be allowed for actions that everybody knows are dishonest but were simply omitted by the legal system.

b/ In all matters were lawmakers or unelected bureaucrats, or anyone else entrusted with other peoples moneys squanders loses that money egregiously, and in a way that most people find unconscionable and beyond stupid.

c/ Where people gain a huge windfall of money related to their government role, their role as a lawmaker or bureaucrat, or manager of other people's money.

d/ When government people and fictional citizens are stealing from the people.

e/ Where new ways of discerning/discovering dishonest activity arise.

f/ Where a 2/3 overmajority of the national Over-Senate elects to declare that a nation-scale exploit has occurred, such as with the S&L crisis, the Subprime crisis, or the COVID vaccine corruption. This exploit need not be economic, but a large portion of the nation must have been tricked somehow.

g/ Where gross injustice would otherwise occur.

h/ In all matters of mass murder, or mass negligent homicide, or mass injury, to include mass vaccine injury.

12/ In matters of government stealing, or gross mismanagement, there shall be no no less than 99 Senate jurors.

13/ Regarding government grants of immunity:

a/ All stupidly granted blanket immunity shall be considered easy to reverse. And this especially when this immunity leads to a large measurable loss of life or even mere gross injustice. Narrow and specific immunity agreements shall be thought much harder to reverse, but they may still be reversed.

b/ There shall be no immunity in matters where large numbers of people died, or where large numbers of children were touched or fucked by pervs, satanists, or sadists.

c/ No vaccine maker shall ever have more than 97% immunity from settlement costs for bad vaccines.

14/ It is so common for people to ignore and tune-out what other people say, or write, even in one-on-one conversations. And a great many people say things in a moment of anger that they don't really mean. Therefore, nobody shall ever be charged by the legal system for failing to act on somebody else's threats or statements. move to crimes.

15/ A new interpretation of the Fifth Amendment to the 1789 US constitution shall be that the right to remain silent shall:

a/ Be a universal right, not just a right that belongs to the people who are smart-enough, educated-enough, or courageous-enough to invoke it against well-trained, and often fearsome and manipulative police.

b/ Include (along with the right of free speech) the right to remain a non-witness, and the right to make genuinely anonymous tips.

c/ Include protections against police officers and Senators demanding that whistleblowers provide their identity to them, and this shall be an exclusion to the laws where people must give their identity information to police. However, with regard to witnesses to scenes of great death or injury, all must provide their identity to police. However, these people cannot be compelled, cajoled, or tricked by police or the courts, or any part of the judicial system into giving a statement or testimony if they do not want to testify. Also, the people can simply state that they weren't paying attention, or they are uncertain of events.

16/ The right to remain silent shall especially apply to:

a/ The right to not have to answer the same question over and over again. No longer shall we have this sort of repeated questioning by investigators until the suspect states some discrepancy, and then that discrepancy is used against the suspect. So that when police and the judicial system ask people questions repeatedly, they absolutely have every right to say you've asked me that exact question before (if that is truthful), I do not wish to answer that question again because you are attempting to make me contradict myself.

b/ The right to remain silent in the face of emotional or intensive questioning of the sort that police, lawyers and prosecutors use to make people make mistakes and confessions. It shall be considered a perfectly valid anti-interrogation and anti-lawyer thing that people are allowed to invoke the fifth amendment when expert sophists/lawyers/rhetoricians use emotion or intensive, or rapid fire questioning.

c/ For yes-or-no questions as well as asked and answered questions, and compound questions.

d/ Where the questions call for speculation. And where the question leads people into admitting a crime whether they did the crime or not.

e/ Where the information questioned is confidential, irrelevant, or vague.

f/ Where the person being questioned is a minor that is under age 18. Police, private security, and schools shall not be free to question about crimes without their parents present.

g/ However, the right to remain silent shall not be applicable to people crossing into our nation from foreign nations, and when our border guards ask about their nationality and what they are bringing into the country. This mostly for the purposes of preventing illegal immigration and for taxation purposes. When people are crossing into our nation's main open territory from its border crossings, people must answer questions about what nation they are a citizen of, and what they are carrying into our nation. If they fail to answer these questions, they may be detained outside the nation's border until they can show what nation they are a citizen of and what they are carrying with them and if they are allowed to enter our nation.

17/ It shall be thought better for the judicial system that more

people come forward with anonymous tips, rather than only people who are willing to risk their own safety giving tips. There should be no risk or downside at all in giving tips to police or other Government officials about who did what, or where they are, or similar things. Therefore, police and Senators shall be required to respect the anonymity of tipsters. All Senators should always be available to receive anonymous tips. They also must respect the tipster's waiting requirements.

18/ Witnesses come forth out of duty, justice, and patriotism. But few will come forth unless it is safe. A tiny amount of informant betrayal has a huge effect on the number of people coming forward to report people for their crimes. A tiny amount of danger and most people don't come forward to report things. Betrayal in regard to anonymous tips shall be thought a thing akin to how a teaspoon of pigment can affect pure white paint, once it is thoroughly mixed together. All witnesses and tipsters shall also be protected by our nation's strict laws protecting whistleblowers that those who harass or dox them. All Senators shall be required to respect all anonymity requests by witnesses. For by respecting anonymity, this is how the Senate stays informed. Without the possibility of anonymous tips, our Senate and our police will see much more poorly.

19/ Anonymous tips are supposed to go to either the Senate's anonymous tips hotline, or to a known Sub-Senator so that police will have no ability to claim anonymous tips when they visit and arrest certain people.

20/ The Senate shall establish rules for confidential informants and tipsters. The testimony of a confidential informant shall not produce anything except for initial police investigation. All found papers that say "Senate tip" are supposed to be picked up and given to a Senator if they make any sense at all.

21/ The people shall have the right to remain silent in the face of police and prosecutor questions. However, police and prosecutors shall not have this right, and these must answer all reasonable questions presented to them concerning those people they investigate arrest, charge and prosecute. Both police and prosecutors must answer reasonable questions about their activities, or the case shall be barred from proceeding further in the legal system.

22/ Witnesses and whistleblowers shall not only have the right to anonymity, but they shall also have the right to remain silent, even in court, and this even after they have been subpoenaed. Witnesses shall always have the right to say things like: "I can't remember clearly", or "I am not sure of what I saw".

23/ Except in urgent matters of life and death and kidnapping and similar such, police shall not question suspects after they have been arrested. All post arrest questioning of suspects shall be done by a randomly assigned Senate prosecution jury. This shall be thought farer than using expert police interrogators. Police may however help the Senators with their questions via microphone and Senator earpiece. If the penalty is long, or the charges confusing, or there is another reason, then a larger jury must be assigned. All pre-arrest and booking related Senate questioning shall occur via VR unless the Senator(s) want to visit the accused.

24/ Most police cars shall be outfitted with multiple video

cameras and audio pickups for tele-hearings prior to the arrested person being transported to the police station for booking. All post offices, police stations, government buildings, train stations and township centers shall also have an abundance of similar hearing booths that may also be used to appear before the county recorder system.

25/ Where practical, when people are arrested, police shall present their case on video, with either a voiceover track that can be removed with the press of a button, or subtitles below the image, or dictated/written reporting. Then the prosecution team shall say yes or no to the case.

26/ When people are charged, the prosecution team is supposed to rapidly assemble a case from the police video, and the recorder stream. This will normally be over almost entirely police recordings of crime scenes, and witness interviews. Many times, the prosecution will rest their case on a minute's worth of video from 1 or more cameras. All police are supposed to ask twice about an exculpatory evidence statement from people who are arrested. Also, the prosecution team is also supposed to ask arrested people over VR for their statement or their exculpatory evidence.

27/ Once the prosecution-side case has been presented to the trial-side of the Senate jury system and approved for trial, the defendant shall be immediately notified. Then the defendant shall either pleads guilty, or prepare his video response statement. Once the defendant is finished with his response to the charges, the prosecution must answer his questions. Also, the prosecution side shall have only 3-days to respond to non-forensic questions, but defendants shall have up to 21 days to respond. In some circumstances a live (but recorded) trial may be held, especially when new prosecutorial directions are being attempted and where the back-and-forth questions and answers are expected to be extreme. However, in general, the accused shall have the right to a virtual procedure due to the time it allows for defense-side research.

28/ Live recorder video shall be thought the most credible evidence, but in many matters, non-recorder video will also be perfectly acceptable as evidence. And of course, we will also still have witness testimony and forensic evidence.

29/ The following rules shall apply for all police statements and confessions:

a/ All confessions except those made at the trial may be recanted.

b/ Nobody shall receive any sentence reduction because they confessed.

c/ Recorded statements will continue to stand as evidence. However, whether someone accused of a crime, admits committing that crime or not prior to the trial shall have no bearing on anything, whether it is on video, or signed on paper. The accused may always recant what they said by simply claiming to have been afraid and presenting another different story to the court.

d/ No accused shall be grilled or compelled by the judicial system (including especially police) to make a statement, or a confession, or admission

e/ We shall not allow our police to intimidate, confuse, exhaust and deceive suspects so they admit to crimes. This is not a thing of the land of the free. This is a thing of tyranny.

f/ All statements made by people accused of a crime are

totally inadmissible as hearsay if they are not recorded by county recorder system video feed.

30/ When people are arrested, the entire arrest and lockup, every minute from police contact with a suspect until they are released from custody shall be under video and audio monitoring. This includes the time in the arrest vehicle, the time outside the cell in the police station, The time walking from the car to the police station booking area, as well as the time in the cell of the police station. Also, all police testimony by people accused of crimes must be on high definition video with stereo audio.

31/ The lockup periods and fines called for under the law shall not be mandatory minimums as mitigating and extenuating circumstances are common.

32/ Fines shall not be excessive either for that class of violator, or for individual violators in comparison to other people guilty of the same violation.

33/ Where people with extreme views about politics, leadership, or public policy are fined or sentenced, or otherwise punished, the jury must be at least 3 times the normal size.

34/ Where the criminal justice system deprives the people of their liberty for a crime they committed, those convicted shall have the right to make appeals based on either new exonerating evidence, or mistakes in the conviction process. However, in cases where the civil courts make a judgement as to financial restitution that is less than 5-year's wages, or where the Senate condemns or con-dems property for creating group infrastructure, there shall be no right of aggrieved parties to appeal the decision or judgement amount. Where the judgement is over 50-year's wages, two appeals are allowed. Where the judgement is over 500-year's wages, three appeals shall be allowed. Where the judgement is over 5,000-year's wages, four appeals shall be allowed.

35/ The national Judicial Sluice of the Main-Senate shall produce two lists:

a/ A master list of all laws in our nation, and no law shall be valid unless it is on this list. This list should be divided into at least 50 different specialized sub-categories, and all the laws for each category shall be as discreetly organized as possible

b/ A master list of activities that cannot be made criminal by any County Senate or anyone else in our nation. The Judicial Sluice shall assure that all county laws in violation are removed from the books. All counties must notify the national Senate immediately upon passage of new laws.

36/ The legal code of each county shall be of two headings:

a/ The Uniform County Code written by the national Senate, which shall have many variable ways that each county may select.

b/ The special laws for each county. The number of words in the special laws section for any particular county shall not exceed 5,000 words.

37/ Our nation's courts criminal and civil shall abide by a statute of limitations herein: They shall not judge any criminal or civil claim, no matter how fair or just if more than 10 years have passed from the time the criminal activity ended. The only exceptions are for murder and for serial child abusers. Also, it shall not matter if the person left the jurisdiction, or resided there all the time.

38/ The legal system shall always have a slight bias in favor

of the defendants so the system will be biased towards leniency.

39/ Those who steal great sums shall never be punished less than those who steal small sums. They may be punished the same, but they shall never be punished less. Petty theft shall be for amounts less than one day's wages. Two petty thefts shall equal one grand theft.

40/ No part of the code of Justinian, the so-called "Roman law," may be used in the courts of our nation.

41/ All trials of government officials, Mafia officials, and the officials of fictional citizens, shall be recorded and live streamed on a 100% public feed.

42/ Courthouse hours shall be 07:00 to 22:00, 365 days/ year.

43/ No judge shall have the power to make law or policy, or interpret the law beyond the case they are hearing.

44/ Whether a person is emotionally disturbed by someone else's actions, and whether a person feels uncomfortable, shall have no standing under the law. No law concerning such a vague thing shall be valid.

45/ Every person that causes or partly causes the death or severe injury of another person shall be tried. If the matter is obviously an accident, and the defendant is only slightly responsible, or the death was clearly a matter of self-defense, the trial will be fairly open and shut, and it won't take very long to clear the people involved of any wrongdoing. Where the matters or not so clear-cut, it may take longer.

46/ There shall never be any reward systems that reward people for blind compliance, or that punishes those who did not blindly comply.

47/ No court shall not have the power to block parties in legal disputes from sharing their evidence with the public. Where courts and judges attempt to apply such censorship rules to the cases they are judging, it may be easily considered felony censorship.

48/ Companies that harass truth-telling whistleblowers may see their shareholder equity reduced by up to 25%. Individuals that harass truth-telling whistleblowers may be charged with felony censorship. It is a free country we have, and one committed to truth and openness. People shall have broad rights to present evidence of crimes especially, but also to say generally truthful things without fear of reprisal of any sort.

49/ In order for drug or alcohol tests to be valid for convicting, punishing or firing someone, 4 different Senate-approved testing devices from 4 different manufacturers must be used under video monitoring. The same 4 devices must be used for everyone, and all testing must be under video for it to stand as evidence either for police, or for employers, or for third parties such as the FAA, and specialist testing companies. Only one actual test of each person may be conducted per device, and all 4 tests must be positive for the same particular drug(s). This approach is much easier and cheaper than arguing in court over the readings. The Senate shall establish realistic levels for this sort of testing to minimize both false positives and false negatives. The Senate shall also regularly check all Senate-approved tests to verify that they are accurate.

50/ Nobody shall ever be sent to jail for a crime they might commit in the future. However it shall generally be so that possession and involvement with WMD's and their key

components and certain illegal Mafia drug and their key components will probably remain a felony.

51/ It shall be a felony to force citizens to undergo political re-education. It shall be a felony to force citizens to undergo re-education without a criminal conviction.

52/ It shall be a crime for police or government workers to arrest or harass politically active people as well as the spouses and family members of politically active people in order to put pressure on the politically active person. Where this occurs, the officers and government workers shall lose their jobs and credentials, and pensions, and be dishonorably discharged. They may also be required to spend time in prison for abuse of power.

53/ In general, those defending people against clearly illegal attacks of others shall have the same rights of self defense as the person being attacked, and this shall be particular so when the person being attacked is small or weak in comparison to the attacker(s).

54/ Decisions and matters affecting a great number of people in an important way shall get first priority and go to the front of the line in both the Senate and the legal system.

55/ There shall be no new interpretation of any old law unless it is elected by the Senate.

56/ Race shall never be a consideration in any criminal proceeding. It shall be noted that this clause absolutely includes both other races attacking Black people and Black people assaulting other races. Also immigrants shall not receive a lower sentence, but must receive a higher sentence as described elsewhere here in.

57/ No citizen shall be shamed by government. Also, Government shall not engage in shaming citizens in the way that the CCP shames its citizens on Jumbotron screens in the middle of town. This sort of thing shall be prohibited.

58/ The requirement that the government bring charges quickly shall be thought to be an important aspect of a layman orient legal system. It prevents the state from taking its time and using multiple people to assemble a more powerful case.

59/ All charges must be clearly stated and presented before anyone can be subpoenaed for a trial.

60/ A person's cultural background, their inability to understand English, their mental incapacity, their poverty or wealth, their family background, their traumatic youth, their age or youth their mental illness: All of these things shall have nothing to do with any trial for a violent felony, or any sentencing of a violent felony. We shall not allow this waste of time and energy into our supposedly fair and unbiased legal system.

61/ With regard to amendments and laws, and government rules, and government regulations, and anything that government wants to impose on the people, the wording must be hard to misunderstand. Where the wording is hard to understand, or worse confusing and a large minority of people misunderstand the new law, that new law should not be valid. However, this should not apply to this constitution and it's upgrade of the legal system. Also, all counter-intuitive policies and all abrupt changes in the way government works must be declared before, during, and for 2-years afterward at all mentions of the new policy.

62/ With regard to our nation's citizens, there shall be no

special courts that have special rules because they're not in the territory of the United States and instead on a boat or in some foreign territory, such as Guantánamo Bay.

63/ Closed hearings shall not be allowed except for matters of military secrecy, and spying. Indeed other than these matters even military courts shall be open and recorded.

64/ Once someone has been tried and acquitted in a court of law, others shall not be allowed to call them a criminal without being regarded as liars. Also fictional citizens that call people acquitted of crimes as convicts they may be sued for defamation.

65/ Our nation shall not regard the rights of convicted criminals as very important in comparison to the rights of their victims. After all, convicts are supposed to be punished and victims are supposed to be made whole or remunerated. Candidates and Government workers that seek to soften the punishments of convicts should be regarded with extreme suspicion, and probably corrupt by voters.

66/ This constitution may be freely referenced and used in all courts and proceedings in the nation, for it is the supreme law of the land. No court or Government proceeding may say that this constitution is not relevant, if it talks about the subject of the court case or Government proceeding.

67/ Where there are multiple disconnected Government charges against a person or entity, Government must charge the person or entity with the case/matter that is most likely to convict. If the multi-accused person is acquitted of the two strongest cases (and this is not due to a legal technicality), then all the other cases pending must be dropped.

68/ Where one party is suing a another party in money court for multiple things, they must sue for their strongest case. If they fail then all the other cases pending must be dropped.

69/ There shall be no foreign languages or special terms that are not intuitive used in our court system.

70/ There shall be no commonly misunderstood laws in our nation's legal system that are misunderstood by more than 2/3 of secondary school graduates. All laws that are misunderstood by at least 1/3 of the high school graduates reading them shall be void.

71/ All contract provisions that are considered confusing or abusive by at least 2/3 of the people reading them shall be void. All contracts shall have an obligation of reasonableness.

72/ There shall be no secret laws in our nation's legal system that are unknown by more than 2/3 of secondary school graduates.

73/ Where people have judgments by the courts, they shall be allowed a reasonable time to liquidate assets, so they are not subject to a sale situation

74/ There shall be no law where real people are considered other than real people in the legal system. There shall be no magic words where real real humans can be regarded as legally a trust, or a fictional entity.

75/ Where the wrong person is tried in a court of law, or a person has been tried on behalf of a corporation, or another fictional citizen, or a corporation or fictional citizen replaces a real human, that court judgment shall always be easily voided upon proof of these circumstances.

76/ From now on the definition of a person shall only be a flesh and blood human being. These can be either citizens or non-citizens. There are also domestic fictional citizens with

some rights, and foreign fictional citizens with very limited rights.

77/ It shall be the obligation of all courts to verify that the person being tried is correctly identified. Where the courts knowingly try the wrong person, those involved shall be guilty of a felony. Also, everyone tried in the name of a corporation, or straw-man, or where there is a confusing situation where the someone has done something in the name of a human, there shall be no statute of limitations for revising the conviction or money damages.

78/ With regard to court processes, legal processes and police processes: where the person is incorrectly named, there shall be no statute of limitations for the people involved to state that they are the wrong party to the case.

Furthermore, where, court and legal people repeatedly make mistakes in identifying people, either as other people, or as fictional citizens, this may be considered fraud.

79/ There shall be no sale or transfer of birth certificates, or lending on birth certificates as collateral or evidence of assets. All names in all court documents shall be written in all capital letters, including all names for all corporations and fictional citizens. However, if the name is not written in all capital letters, then this shall have no meaning under the law.

80/ Everyone appearing in the court system shall appear as citizen and not a debtor. No person appearing in court may be considered the trustee of a trust, unless they have knowingly signed their name to a recorded trust document as an adult over age 18, with a copy of that trust appearing in that person's county recorder system file. There shall be no straw-men in court, and it shall be a felony to use or attempt to use a straw man in court on any side.

81/ No birth certificate shall ever be an aspect of any trust documentation. No birth certificates shall be monetized, or have any debt or credit associated with them, or be tradable as an asset. Also, birth certificates shall not be used in any way for collateral or the extension of credit.

82/ No person shall ever serve as collateral for a loan. No individual persons shall be chattel, or be subject to any debt to the federal reserve. No birth certificate shall ever be a contract. No birth certificate shall ever subject a person to the court of any jurisdiction. No birth certificate shall act as a contract for any court of law with any corporation. No contract shall be valid without the persons informed consent.

83/ No rights shall ever be forfeited, or any obligation created, or any credit extended by the creation of a birth certificate. Birth certificates shall not imply any ownership rights over any person or their life output. All birth certificates shall only amount to the registration of a new person/citizen.

84/ There shall be no hypothecation of birth certificates, or loans made on birth certificates, and all existing bonds and loans made on birth certificates shall be void. No birth certificate, or marriage certificate shall confer any benefits or financial rights to any other person domestic or foreign or governmental or fictional citizen entity that is not a part of that document.

85/ There shall be no trusts or corporations corresponding to people unless people knowingly enter into a trust or corporate agreement as an individual, and not as part of any mass program.

86/ All fictional citizens and all trusts and all other legal

entities shall be required to send tax/asset statements to all equity holders and all people involved at least once per year. Also, there shall be no secret fictional citizen entities related to citizens and foreigners living in our nation with any binding powers over the person that do not send annual statements to the people involved and also to the county recorder system.

87/ There shall be no secret trusts regarding adults that are unaware of the trust. In all such cases where the party to a trust are unaware of their role in a trust, that trust shall be void.

88/ The use of legal straw-men shall be prohibited entirely. There shall be no such thing any more.

All humans must have a unique and singular 4 part name that cannot be shared with any other person or entity. And if that person achieves some, even moderate notoriety or fame, then their name may never be used again throughout future history and worldwide. All fictional citizens shall have names that are clearly not human.

89/ Everything that people get fictional citizens to do shall be totally recorded. This at the allocation level, at the voting level, at the build out phase, and the operational phase. At least we will use AI to monitor to make sure the company directors are not misappropriating money, or engaging in dangerous practices.

90/ Neither the national government nor any county government, nor any other government agency or aspect in our land shall be a corporation or any form of fictional citizen. It shall be a capital offense for anyone to institute or participate in any corporation or any fictional citizen or other entity that is impersonating any part of our elected government.

91/ Due to the massive revision of government, we shall have it that all legal code and common law shall be void after 1-year, unless approved by the Senate. After one year, only the parts of the legal code and common law approved by the Senate shall be valid and admissible in court. The Senate shall completely re-read the law of the previous legal system and enact only the good and benevolent clauses of this old system.

92/ No registration of an asset or person shall be considered:
a/ An abandonment or a gift of that asset to government or anyone else. Registration shall simply mean that the asset is included on the grand list of which assets are owned by which people in our nation.

b/ To give government any right over any registered asset or person.

c/ To diminish the ownership rights over any registered asset or person.

x/ In order for a person to give any rights in any asset or person to government, this shall necessitate a document called either an asset transfer agreement, or a gift deed.

93/ Where a person is referred to as a tenant in a deed, this shall from now on be considered to mean that the person is fee simple absolute owner.

94/ Citizens and their assets shall not be used as collateral for the Government's debts.

95/ Maritime, admiralty, and salvage laws shall not be valid on the territory of our nation. No legal term or phrase shall be construed under admiralty law, or salvage law. And all

attempts to do this shall be void. Also, the person doing so, or judging shall be guilty of a felony. No person shall ever be considered a corporation.

96/ The most important place where censorship must never be allowed is in the public discussion of group decisions, especially with regard to life and death matters. We must know the truth in these matters more than anything else. Where the courts go in the wrong direction in this regard, the people involved should be regarded as corrupt, and if their censorship helped kill even dozens or more, they should be regarded as mass murderers.

97/ The courts shall automatically default to hearing all matters of corruption, especially election corruption. But also in matters where the public purse or the people get ripped off, or are taking a risk.

98/ All existing laws and tradition about legal standing in court shall thrown out 180 days after this constitution comes into effect, and totally replaced by new Senate generated rules.

99/ Only people shall judge people under the law. There shall be no computers or robots or programs standing in judgement of people. Also, if we allow any sort of black box like this, then surely our justice system will eventually be totally corrupted.

100/ It shall be a felony for anyone involved with the legal system or the prosecution system to participate in any secret courts or secret trials under any circumstances, especially in times of war or crisis.

101/ The right to trial by jury of one's peers shall be thought to be actually about the the right to trial by people who are outside of the inherently corrupt legal system.

102/ The right to face your accuser shall be thought to actually be about the the right to an open and recorded trial instead of using a corrupt black-box sort of adjudication system.

103/ There shall be no individual judges for anything but the most inconsequential things, like littering, or minor vehicle tickets.

104/ Wherever there are experts in the legal system, be they on the judgment side or the arguing hired gun lawyer side, they shall all thought to be a corruption of the legal system, and thing to be minimized by the Senate.

105/ Laymen juries might be 10% less accurate in their verdict decisions, but they are doubtless many times less corrupt than professional expert judges.

106/ For all minor crimes such as misdemeanors, moving violations, parking tickets, and building code violations: Government shall be prohibited from paying anyone any commission or any part of the fine money.

107/ There shall be no estoppel rights that arise from any non-response, or with regard to verbal modifications of a any written contract. Also, once a contract is signed, all prior communications shall be regarded as negotiation and hence irrelevant and expired in value for all purposes. There shall also be no estoppel rights arising out of negotiations or offers or counter offers. There shall no longer be any such thing as a tenancy by estoppel.

108/ It shall no longer be allowed to remove court testimony from the record. Once something has been said in court, it shall be recorded forever by the system. So in future proceedings, the new jury will be able to either go along with

that or not

109/ There shall be no conversation between the parties in an legal proceeding that is outside of the open forum or courtroom, and exempt from recorder system recording, and also exempt from informing the other party at the trial. Also, this right shall be considered far more important than any right to confidentiality of information, because it's generally a source of corruption that the parties in a courtroom can have private conversations with the judge or jury.

110/ There shall be no police rules, justice system rules, or court rules that are established by any county government.

111/ From now on the right to trial by a jury shall be regarded as excluding all non-procedural judgements about important matters made by un-elected people, including especially expert judges who were frequently unsuccessful lawyers prior to going into judging people for a living. So from now on the right to trail by jury shall be regarded as a thing which excludes specialist judges except in small matters of minor importance.

112/ There shall be no right of due process for the deportation of illegal aliens and visa overstays. These non-citizens law breakers shall be treated differently from citizens and they shall not be entitled to due process. Also all illegal aliens and visa overstay people may be freely deported by government without any hearing at all.

NR'40. CRIMES.

1/ We shall learn from Brazil and its lax penalties for murder, and its high homicide rate. We shall go in the opposite direction. The following acts shall be considered first degree murder, and the penalty shall be life in a prison, or life in a work camp, or death. Under age criminals shall have reduced penalties as called-for herein.

a/ Causing the death of a victim (intentionally or not) immediately before, during, or after a burglary, hold-up, battery, car-jacking, kidnapping, or similar violent felony. This shall apply even if the death was an accident, even if the victim fell, or had a heart attack, and even if the victim was firing on them first. This shall be so whether the victim was shot, stabbed, clubbed, punched, or kicked.

b/ Ganging up on outnumbered people and beating them, causing them to die. When this happens, everyone striking the victim may be held guilty of first degree murder if the victim's death is immediately or eventually judged to be significantly hastened by the beating. In general, there shall be a 2x penalty multiplier for people who attack others in groups, and 3X penalty multiplier for people who attack in a mob of more than 3. And yes, surely everyone in the mob can and should be charged and given 3X penalties. We cannot fail in enforcing this penalty multiplier, because failing to do so is to condone mob violence.

c/ Striking people who are not physically confrontational in their head, face, neck or torso, and causing them to die as a result. This includes lifting and casting people on the ground, and shoving people with great force and in such a way that they hit their head and die as a result.

d/ Beating the old, the young, the disabled, the ill, the small, the frail, or people who are not fighting back, and those lying on the ground and causing them to die as a result. Also, in

general, there shall be 2X and 3x penalties for people who beat and kick a person while they're down on the ground. And those who beat people beyond the point where they loose consciousness, these shall generally be sent to prison or a sequestration island for the rest of their life.

2/ We shall have a very low bar for calling a victim's death a homicide when it occurs during the commission of a crime. We may also include victims that take years to die early, especially when they never fully recover from the violent attack.

3/ Whenever a crime victim dies, or is is severely injured, and there is little or no doubt about the identity of the person who caused this, the accused shall normally be held in jail without pre-trial release.

4/ It shall be considered 3rd degree murder when drivers kill someone while they are driving and the driver is judged to be:
a/ Intoxicated with a blood alcohol level above 0.1% as determined by 5 out of 5 police tests by 5 different testing machinery companies under recorder supervision.

b/ Intoxicated by drugs (Over-Senate levels) as determined by 5 blood tests.

c/ Fleeing from police in a vehicle.

d/ Racing at high speeds.

e/ Drag racing, or doing stunts or donuts in cars.

f/ Viewing or operating a telescreen, or applying makeup.

x/ Doing donuts in a car with a crowd gathered closely around shall be considered criminal endangerment and the drivers shall get 10 years in prison. Also, where people die due to racing, or peeling out, or exhibiting speed or donuts on the street or in any public place, it shall always be considered second degree murder.

5/ Those convicted of raping 3 or more strangers, or semi-familiar people outside of a date-rape situation shall be considered serial rapists. All serial rapists shall be housed with murderers for for the rest of their lives under the condition where thy shall wear a pink sex criminal uniform instead of an orange one. After 2-years, they shall be surgically castrated in a way that includes the removal of the penis. Also, the sensory nerves of their penis and prostate shall be severed. This work shall be done by a veterinarian. When rapists are castrated and their nerve is severed like this, they shall get anesthesia for the procedure, but they shall not get any medication for the post operative pain. There shall be no castration or surgery or pink prison suits for date rapists who do not drug, or beat or threaten to beat their victims.

6/ There shall be a mandatory life-long lockup KTPR for everyone convicted of first degree murder. Not locking murderers up for life (and not locking up other criminals for a reasonable amount of time) shall be thought to be thing of foreign adversary nations seeking to undermine our our nation, government, and our freedoms. For how can it be that that murderers are allowed to go around in our society? And how can it be that these people are not required to give up their life and exchange for the innocent victim's life they took. This is the kind of awful law that causes Brazil and much of Latin America to be so murderous.

7/ The following crimes shall not get a person put on the government's sex-criminal databases or lists.

a/ Urinating in public.

b/ Sending pornography without permission.
 c/ Allowing a minor to view pornography.
 d/ Soliciting a prostitute or illegal prostitution.
 e/ First offense getting caught having heterosexual sex in a semi public place such as a remotely parked car.
 f/ First offense groping.
 g/ Adult consensual incest.
 h/ First offense Voyeurism.
 i/ Kidnapping one's own offspring.
 j/ Sexting as a minor, or receiving sexts from a minor.
 k/ All other sex crimes with jail time of 3-years or less.
 l/ Other sex crimes that the Senate may wish to add.

8/ Those genuinely plotting to kill multiple people in an act of terrorism should generally be sentenced to life under lockup. If there is any leniency, let it be with the comfort of the lockup. Attempting to kill multiple people in an act of terrorism shall be a capital offense if the person is not a citizen, or they were born in another nation.

9/ Two completely independent trials which both result in death verdicts shall be necessary for executing criminals. These trials must also must be separated by at least 1 year in time, and no more than 2 years in time. When dangerous organized criminals and crime gang people stand trial, the jury shall have at least 99 Sub-Senate jurors. Where jurors are threatened, the jury shall have at least 199 Sub-Senate jurors. No less than 17 Sub-Senate jurors shall make the decision on whether to charge on manslaughter or murder. Also, no less than 17 Sub-Senate jurors shall make the decision on matters of killing someone in self-defense.

10/ Those people justly sentenced to either death, life in prison, or over 60-years in lockup shall never be released from lockup except that they may be exonerated or pardoned by the Senate. There shall not be any parole, probation, commutation, or furloughs or shorter good behavior jail time for those serving death/life sentences, and those serving over 60-years in prison. In other words, the conviction may be overturned, or pardoned by the Senate for judicial cause, and the prisoner might get better or worse lockup treatment depending on the Senate jury convicting them, but absolute sentences of death and life in prison shall never be reduced in length, and the convict shall never be released from lockup.

11/ Everyone serving a death sentence, or life in prison sentence, or a sentence exceeding 20-years in prison or 40-years in work camp shall automatically be considered as KTPR or "kill to prevent release" in case of invasion, plague, or natural disaster. Where prisoners are killed to prevent release, they shall get the opportunity to come to be shot in the back of the head. If they don't come, they shall be shot with 5 rifle rounds and left to die.

12/ Those who intentionally set others on fire, or attack others with or burning fluids such as acids, or ignited liquid fuel, or hot fluids causing severe harm or disfigurement, and those arsonists who set fire to occupied buildings: These criminals shall always be sentenced to life under lockup or executed. However, they may be sentenced to death by slow fire if they have intentionally caused a fire that resulted in someone burning to death. This however does not apply to self defense, and burns that do not cause serious harm. If there is any leniency for those who intentionally burn others severely,

let it be with the comfort of the lockup rather than the length of the lockup which should always be for life for this crime.

13/ The following may easily be considered murder or attempted murder whether or not there is a body and whether or not the victim died. All shall be aggressively prosecuted:

a/ Those who knowingly eat human flesh, or knowingly give human flesh to others to eat.
 b/ Those who consume human blood, including the ceremonial consumption of human blood from people who give their blood to be consumed, and those who will remain alive, and those sharing around of one-another's blood, including theatrical presentations of this.
 c/ Those who knowingly drink the blood of other humans that was taken against the other person's will.

14/ All of the following shall be considered first degree assault (assault-1). They may also be considered attempted murder, especially when great harm was caused or the person was knocked out, or hit with repeated blows.

a/ Strangle others, or crush their windpipe, or strike others in the throat, or use a choke or sleeper hold and cause them to lose consciousness.
 b/ Stomp a person's head or neck, or kick a person's head or neck, especially while they are down low.
 c/ Kick, drive, throw, flip, topple, cast down, or otherwise impel a person's head into a hard surface. This shall include all kicks to the head. Indeed, all High kicks shall always be considered knockout punches delivered by skilled fighters that always deserve to be treated as skilled fighters for all legal manners. Also sideways punches are always considered as trained and practiced and premeditated.
 d/ Use a hard object such as a stick, rock or a chair as a club or projectile for blows to a person's head or neck.
 e/ Pummel a person while held down, or not fighting back.
 f/ Hit someone who is knocked-out, stumbling, semi-conscious, or fazed from brain injury, or on the ground and not fighting back.
 g/ Gouge a person's eyes.
 h/ Strong men striking children, the elderly, women, or people who are much smaller with full force blows.
 i/ Intentionally drive a motor vehicle into a person.
 j/ Strike someone in the head with a hard object, and especially when this is in order to rob them.
 k/ Lift and cast a person on the ground, or intentionally topple a person to the ground in such a way as to cause significant brain injury.
 l/ Use knockout blows, sucker punches, sneaky punches, sneaky kicks, spinning kicks, head kicks, and combinations.
 m/ Striking another in a sneaky way, or without warning, or with great suddenness.
 n/ Push a person down the stairs, or off a high point.
 o/ Where people gang up and beat a single person, they can have no clear idea about the harm they and their partners in crime are doing to the one person. Therefore we shall have it that 2-on-1 crimes can very often be considered attempted murder based on the extent of the injury, however 3-on-1 and more leveraged crimes shall generally be considered attempted murder if the harm to the victim is significant. It shall also be though that this sort of behavior is exactly the sort of low-life, sub-eu-man un-American behavior we don't want in our society.

15/ To those who would kick, hit, stomp on a person's head while they are down. You shall all be warned that:

- a/ When in doubt, the Senate will charge you with attempted murder.
- b/ You may be legally shot in community self defense and the shooter will get the benefit of the doubt, not you.
- c/ Where multiple people are beating a person who is down, especially their head, the bar for shooting all of them as human garbage shall be even lower.
- x/ Lesser weapons may also be used, and also, genuine acts of community self defense shall never be a subject to law suits in the money court system.

16/ The following less than murder crimes shall generally get all criminals (that are past their 12th birthday) removed from society for life at a minimum. If there is any leniency, let it be with the livability of the community we lock them up in while they are removed from society forever.

- a/ Attempted murder.
- b/ First-degree assault.
- c/ Arson that is intended to kill, or to start wild fires or community fires. This includes everyone who sets fire to an occupied premises, and everyone who causes a wild fire that burns more than 40 acres of land. Also, political arson by foreigners shall normally be a capital offense, equivalent to terrorism.
- d/ Rape of a child that has not yet turned 12 by an adult over age 18.
- e/ Those who rape two or more strangers.
- f/ Kidnapping, especially kidnapping of children or young women, or where there is a ransom note, or where the criminal greatly injures the victim.

17/ The confusing terms assault and aggravated assault shall no longer be used. Instead, the crime of assault shall be ranked in 9 degrees like most other crimes. The crime of assault shall have 4 felony degrees and 3 misdemeanor degrees, with 2 degrees below the misdemeanor levels as follows. This sort of division by 9 categories is so that the people can easily understand the severity of the crimes that people commit. Also, in general 5th degree crimes shall be misdemeanors and 8th degree crimes result in community service and no jail time at all.

- a/ 1st degree assault shall be a felony that frequently results in lockup for life, or at least for several decades.
- b/ 2nd degree assault shall be a felony that results in lockup for up to 20 years.
- c/ 3rd degree assault shall be a felony that results in lockup for up to 10 years.
- d/ 4th degree assault shall be a felony that results in lockup for up to 5 years.
- e/ 5th degree assault shall be a misdemeanor that results in lockup for up to 5 years.
- f/ 6th degree assault shall be a misdemeanor that results in lockup for up to 2 years.
- g/ 7th degree assault shall be a misdemeanor that results in lengthy community service.
- h/ 8th degree assault shall be below misdemeanor crime that results in some weeks of community service and perhaps a fine.
- i/ 9th degree assault shall be a below misdemeanor crime that results in traffic ticket level fines and one day courses like

traffic school.

x/ 9th degree assault typically involves first offenders using threatening words. Fake hitting of people, or pulled punches where one party fake punches, or strikes inanimate objects, or destroying nearby possession in a threatening way can easily be considered 8th degree assault even if no malice is shown. If there is malice for faking hitting and/or striking/destroying inanimate objects, and the victim wants to press charges, this can be justification for charges of 7th degree assault, as well as the use of force in reply. If the fake punches and/or striking/destroying inanimate objects constitutes an extreme threat (given the physical size, apparent character, nature of the fake or threatened punches, or nearby armaments, or gang of the person threatening in this way) then these acts may be justification for the use of deadly force.

18/ Injury to a person shall not be required for lower charges of assault. Brandishing some kind of weapon in an offensive way, or threatening to strike shall be enough. Also, any kind of unwanted contact with a person, or spitting, or throwing a sneaker, or grabbing their clothing, or grabbing something they're holding such as a bag or a recording device may also be considered a low grade assault. Also, where people are playing ball near some kind of way, and the ball strikes a person in the head, that shall be considered an assault. Also, under the law, this sort of thing only happens by intent, and age is no excuse because all normal people playing ball want to do it away from walkways and roads. So all ball strikes to the head shall be considered to be by intent.

19/ Where people threaten to cut other people's fingers off and to break their bones and hurt their family, this shall be considered assault. Where mafia and gang people do this they shall be subject to triple penalty multipliers. Also, it may be considered a low penalty form of assault to wear clothing or hold pictures that threatens violence or death, or depicts firearms, or other weapons, or a hangman's noose, or body bags, or similar things.

20/ Using knock-out punches, sucker punches, brass knuckles, and third parties joining a fight may easily be considered a form of club battery. Different types of knockout blows carry different penalties. First fights with one side using lateral knockout blows may easily be considered club battery. However these sorts of blows shall always be allowed in self-defense, and when the other party is significantly larger or stronger.

21/ Where there are fist fights, and both seem to be instigating the fist fight, both can be held to be instigators, and both can be charged.

22/ The ideas that people have about what constitutes a fair fight should be established in detail and guided by the Senate. For the low cost of unified acceptance of a set of fighting rules, we can dial down fighting violence worldwide.

23/ Merely pushing a person away that is within arms range without shoving them abruptly shall not be considered any legal justification for a fistfight. Also, once a person has pushed another person away for being confrontational and too close, (and for coming within pushing range) if the other person comes back to renew the confrontation, they shall be considered as instigating a confrontation.

24/ When people are obviously extremely intoxicated or

mentally ill, or tiny, or frail, or otherwise no real threat, claims of self defense in fistfights shall not be accepted and there shall be no right to respond with extreme force unless the weakened side is presenting a genuine threat.

25/ When a person is winning a fight and is on top and walks away, and the loser turns to fight some more, the looser doing this shall be generally seen as the instigator for each time this happens. Also insistently following people to fight them may be considered justification for use of weapons.

26/ Those people who break up fistfights shall be protected like police under the law if they are punched or injured in another way by one of the fist-fighters.

27/ Fist fights are obviously not the way of a healthy society. Certainly in no eutopian world are people giving each other traumatic brain injuries in fist fights.

28/ Throwing a person down on the ground, or intentionally toppling them can easily be considered equal to club battery to the body part that strikes the ground. This shall be especially so when a brain injury results. Kicking a person in the head while they are down in a fistfight shall be considered the equal of club battery to the head. So if someone dies from this, then it shall be considered first degree murder. If they suffer extreme brain damage, then it shall be considered attempted murder. The Senate shall make a complete list of all martial arts techniques that may be considered club battery, and which can result in being charged with murder, or attempted murder. Also, when people strike another with their hand and knock them out straight away, it may be considered club battery.

29/ People who have fistfights shall go to jail as follows: If one side exclusively initiates the fight, they shall serve all the sentence. If two people agree to fight, and no clear fight winner can be determined, then they shall each serve half of the sentence. However, if a fight winner can be determined from a mutually agreed-upon fight, then the fight winner shall go to jail for 3/4 of the time, and the looser for 1/4 of the time. These fistfight rules also apply to females fighting females. Females are no match for males in matters of fistfights. And there shall be no equality between the sexes in matters of fistfights and throwing things.

30/ Where people are taunting others to start a physical fight, these words may not be justification for the other side to take violent action, but may still be grounds for the court to charge with assault. They may also be used to justify claims that one side was causing the fistfight. People taunting others to hit them, may be considered as provoking the situation and starting a fight. However, the phrase "do something then" and similar words shall not be considered as provoking the situation.

31/ Where one side is saying words or engaging in non-violent actions to provoke a fistfight (such as scratching a vehicle) and the other side hits at that moment, there can often be a 70/30 to 95/5 sharing of the fighting penalty. Where the person starting the violence waits more than a few minutes, there shall be a 90/10 to 98/2 sharing of the penalty.

32/ In female/female fistfights it is common to see fit young women punching each other 20 or 40 times with little apparent effect. However, in most male/female fistfights it is normal to see the female go down on the first punch that connects with the head. So clearly, most females can't punch

very hard in comparison to most males. For this reason, females shall normally be given considerable latitude in punching and kicking grown males before the male can hit back, particularly if the male is healthy and strong and the woman of normal size and strength. Generally males are expected to restrain female batterers rather than hit her back.

Men shall always have the right to restrain females hitting them or trying to hit them. And it shall be extremely hard to assert groping where a male restrains a woman who has struck him or someone else. Where females have a club or more powerful weapon, and are threatening to use it on a man, the man shall always be allowed to strike the female.

33/ The use of force in self-defense shall not be an eye-for-an-eye sort of thing, but instead the grounds shall be that of necessary self-defense. Therefore, when a weak person slaps, shoves, or weakly punches a much stronger (or much better trained) person in a way that is not truly threatening to the well being of the strong person, the strong person is not allowed to hit the weaker person back. The strong person can however charge the weaker person with assault, and he can also hold or restrain the weak person until police arrive.

34/ There shall be no kicks to the head even in sports. Kicks to the head shall always be regarded as criminal, and as such no longer allowed any sport. Boxers and sport fighters shall beware, because if in sport, they beat an opponent who is down, or use a criminally illegal punch, or hold, they may still be charged with assault or attempted murder for beating a man who is down. And this shall be so regardless of the rules of the sport. All boxing, wrestling, and fighting gyms and school classes shall be required to register all participants, students and team members with the recorder's office. Also, people who are trained fighters shall have a higher obligation to walk away from conflicts as determined by the Senate's rules on the subject. Those who are very well trained shall have the highest obligation to walk away. Also, all simulated, or rigged competitive entertainment, such as so-called professional wrestling and horse racing shall be prohibited and all participants should be charged with fraud. If the Senate determines that any sport is largely rigged or simulated, the Senate may shut down that sport for up to 5-years.

35/ Dueling, mutual combat, fair fights, and similar terms shall not be a legal defense against any crime. The injury or death of the other side in a duel or mutual fight shall be considered as an assault or a homicide under the law, regardless of the agreement to have a fight. This rule extend to boxing and all other forms of sport fighting. Also, where boxers and martial arts fighters injure their opponents, with or without illegal moves, and liability release documents, they may be charged with the crime of assault.

36/ For first offenses, pickpockets shall get 5 years in work camp if they work alone and have no prior theft or fraud convictions of any kind, anywhere on earth. If they have prior convictions, or have an accomplice, or they work on or around transit, or travelers, or tourists, or they are from another nation, or are non-citizens, or immigrant citizens or from a pickpocketing cultures such as the Gypsies, they shall spend 10 years in work camp on their first conviction. Both pick-pockets that use body guards, and those who body guard for pick-pockets shall be considered strong-arm

robbers under the law. Also, these shall be subject to double pen. And because they work in groups, they shall get the gang/conspiracy penalty multiplier.

37/ Mugging, pickpocketing, purse snatching, and some grab and run crimes shall be considered violent crimes, and the rules of self-defense and community defense for assaults shall apply, even when women or youths are doing the stealing. Both those who have had their pockets picked and third parties shall be free to take all reasonable actions to prevent these sorts of thieves from getting away. Those who have committed either armed street robbery, or a snatch and grab crime to a person's purse, telescreen, wallet, bag, or other significant property, either on foot or using a vehicle may be tripped, clubbed, shot, or run over to stop them, and this shall be considered self-defense, or community self-defense. Also, the Senate shall acquire many videos of pickpockets and other urban criminals in action, and others stopping them legally. These shall be shared among many cities of the world and shall run in a loop in perhaps 5% of metro cars in pickpocketing zones. The Senate shall stand-by ready to adjust its laws regarding pickpockets so as to completely stop this practice. It is thought that pickpocketing, like many sorts of crime can be made to entirely disappear given the right set of laws. Also, pickpocketing in transit and crowded places shall be regarded as a planned and premeditated felony. First conviction foreigners and Second citizen convictions for pickpocketing go away forever to a work camp because this will almost entirely end the practice of pickpocketing. However, they must have video of the crime, or find the stolen wallet in the pickpocket's possession.

38/ To be clear, the crime of shoplifting shall only be for people who perhaps forgot to pay for a purchase. In order to receive favorable legal treatment for a theft under the shoplifting defense, some conditions must be met. If any of the following conditions are not met, then the criminal shall not get the benefit of the lower penalties for shoplifting:

a/ People with prior theft convictions, including especially shoplifting convictions shall not eligible for favorable treatment for their theft charges using a shoplifting defense.

The Senate shall compile a list of people with shoplifters convictions together with their photographs. The nation's businesses and shopping malls shall be free to use face recognition tech to ban these people from entering their shops, shopping malls and other premises.

b/ The stealing must be done with some attention to not being seen. Where thieves steal openly and without regard to being seen or recorded, they shall not get any favorable treatment for shoplifting.

c/ Where a high value item is stolen, or many higher-value items are stolen, they shall not get any favorable treatment for shoplifting.

d/ Where multiple thieves strike together, even if they don't know about each other, they shall not get any favorable treatment for shoplifting they shall not get any favorable treatment for shoplifting. It should be noted that this clause absolutely applies to all looters, which shall always be charged with double-crime of looting and theft, with double penalties, and never shoplifting with greatly reduced penalties.

e/ They must be citizens. Foreigners, and especially poor

foreigners shall not get any favorable treatment for shoplifting.

f/ The must completely cooperate with staff and police once caught. Once they are detected by staff, the thieves must come back into the store and wait for police. If they run away, or get violent, there shall be no favorable treatment for shoplifting. Also, there shall be triple penalties for shoplifting type thieves that harm shop people once they have been detected, and 1/4 penalties maximum for shop clerks that harm actual thieves trying to run away. Also, where the thief initiates a fight with a clerk trying to detain him, and is subsequently killed by the clerk, there shall be a 1-year maximum prison sentence for the clerk. Furthermore, the moment the thief is caught and attempts to resist the store clerk, the crime automatically becomes robbery and not thievery.

g/ Shoplifters cannot wear clothing with pouches or clothing that helps with shoplifting. If they have special "Gypsy dresses" or other clothing that helps with shoplifting, they shall not get any favorable treatment for shoplifting.

h/ Clerks that help shoplifters and that work with shoplifters shall not be eligible for charges of shoplifting. No employer shall be allowed to punish a clerk for stopping a shoplifter.

i/ In order to charge a person with shoplifting, the store's recorder system video must show clear evidence of the crime.

j/ Regarding self-checkout systems, minor errors of less than 10% of the total, or less than 15 minutes wages on self check-out systems shall not criminalized unless there is a pattern of that person failing to pay.

k/ There shall be no right of stores or store security to fine or charge people for shoplifting. Where this occurs the security staff may be charged with a felony.

l/ Charges of shoplifting shall not apply to people who steal from areas behind counters. Stealing from behind the counter shall be regarded as plain old theft.

39/ There shall be 3 degrees of, each with different penalties:

a/ Shoplifting-1 = Theft of expensive or repeated goods apparently for sale. This shall be considered theft, and not shoplifting.

b/ Shoplifting-2 = Theft of goods that are arguably for personal use.

c/ Shoplifting-3 = Theft of low cost ingredient foods and absolutely necessary items. This crime often has very low penalties.

40/ When groups of shoplifters work together in teams, these thefts shall not be called shoplifting, but conspiracy to commit theft, a double crime. Those breaking into sealed or locked store displays, or going behind the counter shall not be able to benefit from relaxed shoplifting laws. When 3 or more shoplifters strike a store at once, they may be considered looters and shot.

41/ In order to benefit from the lower penalties for shoplifting as a crime, the shoplifter must:

a/ Steal furtively. When shoplifters steal openly it shall be the crime of ordinary theft.

b/ Surrender peacefully when caught. When shoplifters fight back, it shall be the crime of ordinary theft.

c/ Not have any equipment, like sacks, or clothing folds.

d/ Be a citizen.

e/ Not grab store items and run out the door with them. This shall not be considered shoplifting but ordinary theft.

f/ Must not be wearing super bulky clothing or have sacks attached to the inside of their clothing. Shops shall be free to bar and eject customers with excessively bulky clothing.

42/ Stores, shopping malls, schools, bars, playgrounds, and child oriented businesses and townships shall be free to use face recognition tech to keep convicted criminals and prior trespassers out of their establishments. These may share information about convicted criminals, including those convicted of trespassing. Government shall work to keep these databases of convict information accurate and up to date for the safety and well-being of the people.

43/ Those who lick or drink from sealed groceries and put them back shall be considered food adulterers and not shoplifters.

44/ It shall not be possible to charge people for a crime when they omit an item or two at self-checkout. Whatever self-checkout systems are used, they are supposed to automatically make sure this can't happen.

45/ All vendors and store staff shall always have the right to check the receipts of the people leaving their stores against the merchandise they're bringing out, and everyone leaving a store shall be expected to show their receipts to retail staff, guards, and police upon leaving that store. Where the person can't produce a receipt, there shall be a presumption of guilt upon accusation. Then shop managers and owners shall be permitted to use reasonable force detain the shopper for a reasonable time until police can arrive. Where people try to run-away, after video clearly shows them stealing from the shop, the amount of force used to restrain them may be quite high. A reasonable time is 30 minutes in urban and suburban areas and 1 hours in less densely populated areas. In all matters of shoplifting, the accused shall be given a reasonable opportunity to provide proof of purchase of the material they are accused of taking out of the store. No arrest shall be made where people offer and show a valid receipt. No store worker shall ever be punished for asking people for their receipt when there is any question as to whether they paid or not. There shall be no lawsuits for people who had their reputation and good standing harmed by someone asking them for their receipt.

46/ Non-citizens, immigrant citizens, and anyone who has been jailed for more than 30 days in their lifetime (for any matter except drugs) shall not be allowed to benefit from lenient laws about shoplifting. People cannot be arrested for shoplifting unless video of them exists that shows them committing the crime or them being found outside the store with the goods, or if them failing to show staff a store receipt when one is requested.

47/ Parked car break-ins shall get up to 6-years on the first offense, and 12-years on subsequent break-ins. This shall not apply to one's own vehicle, or where people are helping people locked out of their vehicles.

48/ Those who use drugs to commit sex crimes, theft, or murder shall be sentenced to the same sentences as those who commit these crimes at gunpoint. Also, the threshold for attempted murder in drugging cases shall be on the low side.

49/ The maximum penalty for possession of drugs outside of the licensing system shall be 5-years, but these charges shall

be reserved for high use opiate methamphetamine, and cocaine users, among other similarly dangerous drugs. The maximum penalty in all other cases should be 2 years, with no penalty multipliers for second and subsequent offenses, or for other reasons.

50/ Safe measured drug doses shall always be available from government for only the cost of watching the required propaganda. Because of this, few people will buy dangerous un-measured drugs on the black market. Therefore, we can stop districting our police officers with looking for drugs. We can also stop driving them away from the communities they are supposed to protect. In fact, the madness of the war on drugs shall be seen as a wedge between the people and police. Now we will try to foster better relations between the people and the police.

51/ For the sake of clarity, we shall say that in matters of violence and accident, substance abuse shall never be a legal defense, and this includes alcohol, prescription dugs, steroids and sex hormones.

52/ Hit and run accidents by illegal aliens and foreigners caught trying to flee the nation, or extradited shall get 10-years in work camp if nobody is badly harmed, and life in a work camp if anyone is badly harmed.

53/ Littering and dumping shall have at least 5 degrees, each depending on the amount of trash and how problematic or filthy the trash material is, and how it is to clean up. It shall not be possible to charge kids age 8 and younger with littering. Cigarette butts shall generally count as littering.

54/ The crime of soliciting needs at least an offered quid pro quo. Signatures gathered for no money shall not count as solicitation. Also, the giving away of political and religious materials for no cost shall never be considered as soliciting.

55/ In order to charge a person with jaywalking, the illegal road crosser must be creating a genuinely dangerous situation. It shall not be possible to charge people with jaywalking where there are no cars approaching within hazard range. Pedestrians shall be free to ignore don't walk and vehicle signals when the oncoming cars are not even close or stopped

56/ Ours is a free country and the people shall be free to walk and stand in the streets and police shall not be allowed to cite them where:

a/ They are not causing traffic to change course due to their standing in the street.

b/ They are standing between cars.

c/ The speed limit is under 45kph and cars can easily drive around them.

d/ The speed limit is under 55kph and there less than 2 car per minute are passing by on that person's side of the street.

e/ There is an accident, emergency, arrest, or commotion that is slowing all traffic down to under 30kph.

57/ Those in the process of committing a felony, or stealing from a store, or inflicting intentionally costly damage to other people's property, or public property may be grabbed, restrained, handcuffed, tased, sprayed with pepper spray, kicked in the legs, or tackled freely, provided this causes minimal harm to the person so held. Thereupon the rights of self defense shall apply to the person restraining the criminal, even though the person restraining the criminal holder initiated the contact.

58/ Charges of kidnapping shall not be possible when they involve bystanders and security people detaining apparent criminals (in a mostly harmless and/or self-defense way), who have apparently committed a crime and are being detained by staff and bystanders pending the arrival of police.

However, this shall not exceed 1-hour in any urban or suburban area. In all other areas, the holding period shall not exceed 2-hours. Nobody shall be charged or sued in money court for holding somebody when a reasonable person would think that they broken the law. This shall apply to all violent crime, all stealing and all shoplifters. Furthermore, assault on these holders of apparent criminals, shall be regarded as assault on a police officer under the law.

59/ When crime victims and third parties community defenders respond with anywhere near reasonable self-defense force, or community self defense force to criminal acts such as theft or assault, or credible threats of assault, neither the criminal justice system, nor the money court system shall have any jurisdiction or standing in punishing the defender. To be clear, restrained or subdued people who actually have committed a crime shall never have any right to sue either the victim or community defenders for the criminal's injuries provided these were anywhere near reasonable in consideration of the criminal's crime and resistance. Also, here, reasonable force shall be broadly interpreted, so that if a criminal should happen to suffer extreme bruising, or mildly strained joint, or a broken tooth, or a similar minor injury, the criminal shall have no right to sue or press criminal charges, unless the original charges against the claims were baseless. Also, if the criminal is actively harming a victim, stabbing, or beating or kicking the head of a person laying on the ground, the criminal may be shot dead.

60/ When victims harm their violent assailants during the commission of a felony, they shall certainly suffer no harm from the law. But we shall go further than this, and give victims special reduced self-defense penalties when they harm their assailants hours and years after the crime.

61/ We shall legally recognize a couple "Janus points" in our communities. They are:

a/ At everyone's front door. Place one finger inside the door threshold and you are inside. Then the occupant's very powerful self-defense at home rights kick in.

b/ Behind the counter at a restaurant or shop. Then the shopkeeper's rights to home self defense kick-in the moment any of them are threatened with physical harm or actually harmed in any way. This includes shoving and punching in clearly indicated gated areas behind the counter of a shop or restaurant.

62/ So with clearly marked employees-only areas in shops and restaurants, there must be some definite physical threat to start fighting back against the intruder. However with homes, the continued intrusion upon being told to get out shall be grounds for self defense action.

63/ The courts shall automatically issue lifetime restraining orders to all violent felony victims with regard to their convicted attackers. Where these exist against violent criminals, the victim and their housemates and close family shall have the right to shoot the convicted attacker dead if the attacker enters the registered restricted zone(s). We shall have a warning app for our ex-convicts. All violent criminals

must stay away from the community of their victims, even if they grew up there. Also, the court may banish violent convicts from their own community as a way of punishing them. This either with or without jail time, or other punishments. It is thought that some young men will benefit from exile as punishment. Those with a domestic violence conviction may be deprived of the right to own firearms when a victim family member requests this.

64/ Temporary restraining orders may be issued pending final judgement, and these shall not be a matter for anyone's record.

65/ Requests for restraining orders (temporary and life-long) shall have 3 methods of issuance:

a/ Credible charges or statements made to police on video.

b/ Make complaint and wait for your appointment to come up.

c/ 6-hour wait in the court house waiting lounge, and 3-statement interviews, before a tribunal hearing. Then temporary restraining orders or TROs may be issued by a Senate tribunal pending a final trial.

66/ Restraining orders may be used against school bullies, adult bullies, estranged lovers, men, and women. Restraining orders shall also automatically exist for accusers and witnesses to crimes against those they have accused and witnessed.

67/ We shall have a thin skin and harsh responses for people who make contact with people that have a court-ordered, due-process restraining order against them. All must avoid completely. They cannot go within a mile of the person's home or place of work, except when they already own a property, or already have a job in the exclusion zone. In which case, they shall still not be allowed to go anywhere else near their restrainer(s).

68/ There shall be no penalty for circumventing or overpowering faulty automated systems that hold a person in place for over 10 minutes under any circumstances.

69/ When ex-convicts change their name, or use another name to avoid the stigma of being a convicted felon, they shall be removed from society forever.

70/ Breaking into vehicles and homes shall be considered a per count crime. There shall be no discounts for people who break into dozens of cars and these shall frequently be sent to work camp for decades or life. Breaking into un-occupied vehicles shall be punished at half the punishment of breaking into an un-occupied home.

71/ It shall be a felony to spend stolen money, or proceeds from crime, or sell stolen merchandise, even if it was stolen from somebody else who stole it, and even if the person who "owns" the stolen money serves his time in prison for stealing it and even if the statute of limitations has run out. When people, disappear, or die mysteriously, and other people are found in possession of their property, particularly large amounts of their property, this should be treated by presumption, at least, as severely as receiving stolen property.

72/ Killing people to assume their life, or drive them from property legally in their possession, or to take over their residence or place of business, or to steal a great amount of their property, should always be considered murder-1 for all conspirators. Assaulting people to take over their place, or steal a great amount of their property shall be considered the

double crime grand theft and assault. Also where aggressive squatters come and try to drive registered residents off their property, the resident shall generally be free to shoot the aggressive squatters dead if their aggression and intent can be reasonably proven, to the court. Where this sort of thing is common, the bar for proof shall be set a bit low.

73/ People who drive with extreme recklessness may easily lose their driving license forever, even if nobody gets hurt. Once a person has had their license revoked and they're caught driving again, they go to jail for 10-years. This shall not apply if they have to drive somebody who's having a baby or a heart attack to the hospital (or a similar emergency) upon certain proof.

74/ For maximum safety from convicted felons, we shall have it that all felony ex-convicts must generally settle down in one community of one city for life, upon their released from prison. Upon release re-settlement, the 2,000 closest neighbors shall get an email with a number of the convict's photos and map of where they will be living. Also, Where a new ex-convict moves into a community, all the other ex-convicts (and their current photos) shall be included below in the email. Every community shall be thought to have a right to know about the ex-convicts living in their community, and the people of each community shall be free to keep ex-convicts out of their community, thus, forcing all ex-convicts to go and live in special communities.

75/ Those who shoot dead firearm-in-hand, (or blade to the body) armed robbers and other similar felony criminals shall commonly be given two teneth's wages as a reward.

76/ People who have fistfights, or ask others to step outside, or who call others a chicken (or its equivalent) at restaurants, bars, concerts, discos and athletic events, and outside these places: These people may be put on the national bar, restaurant, and event blacklist for life by the courts, regardless of who started it. Those who have fistfights at school, and those who beat others at school, all of these young people shall generally be excluded from live school for life. Also, where these people go overseas, the other nation should generally honor the home nation's no-restaurants rule and the no schools rule.

77/ With regard to theft, there shall be two factors in the sentence:

a/ There shall be a jail time for nature of the crime such as armed robbery, burglary, embezzlement etc. and

b/ There shall be a jail time for the amount being stolen.

Thus the armed robber who steals little but shoots their victim, and the crook who embezzles tens of millions both might get life. Thus there will no longer really be any more relaxed penalties for so-called white collar crimes. Also, everyone who gets caught stealing or embezzling, handing to others for kickbacks, or scamming over 1000 year's wages shall go to jail for life.

78/ Regarding the 5% of the nation with the highest homicide rates:

a/ There shall be cameras and microphones everywhere and these shall be valid for charges of illegal firearm possession.

b/ It shall be a high priority to get rid of illegal guns among under-age people in the highest crime areas of our nation.

c/ Police may use metal detectors on everyone in a place or zone, or building. Police shall be required to raid all the

places where gangsters and other armed too-young men gather and fight.

79/ Uniform police with police cars, firemen, with a fire truck, Paramedics with an ambulance, and road workers with a great number of signs shall always be considered authorized to block and divert traffic. Also, people not actually blocking the way shall always be allowed to alert people about road hazards. However everyone else trying to block or divert traffic shall be be considered as unauthorized to block traffic. These groups, particularly in remote places, and at night shall be regarded as highway robbers under the law. And these robbers may be shot or run-over by the people who are the apparent victims. This shall be the case unless there is clear evidence that they are not highwaymen. In matters of people killing people who are conducting an illegal roadblock, the maximum penalty shall be 3 years in lockup. Again, where the road is not actually blocked, or there has been an accident, these rights of self-defense for roadblocks shall not exist.

80/ We shall defund the DEA by 85%, and instead use the money for a DCT, or a Department of Child Trafficking. We shall also have a big media campaign about how it is a crime to meet with unrelated kids. Then we shall pay people a bounty when people can lure grownups in to meeting with kids on video.

81/ Theft levels shall be defined as follows:

Petty theft = Under 1-hour's wages

Basic theft = Over 1-hour's wages, but under 1-month's wages.

Grand theft = Over 1-month's wages, but under 10-year's wages.

Mega theft = Over 10-year's wages.

82/ Where video pranksters get punched or shot and this is a fair response had the prank been real, the person punching them or shooting them shall be considered as acting in self defense and shall get full safe-harbor rights of self defense, even if they fail to immediately grasp that the situation is a prank, or they fail to believe the prankster. Also, when the video prankster causes a heart attack death, it shall be considered a homicide. Where they cause someone to fall, they shall be responsible as if they had shoved the person in an assault. Pranksters may also be charged with assault if the prank is genuinely vexing to its victims. All those harmed by pranksters shall have the right to use money court for retribution as if the prankster had negligently caused the injury and was 100% responsible for it.

83/ Everyone convicted of a crime shall be expected to sincerely apologize for their crimes (an act which shall not be allowed to prejudice any appeals). Those who fail to sincerely apologize to the victim, or the victim's family shall increase their sentence by up to 50%. If the person on trial is clearly guilty, and they taunt the survivors or the justice system, the sentence/penalty may be increased to the point where it is doubled.

84/ Government shall frequently pay bounty to those brave people who kill violent felons while they're committing felonies.

85/ Possession of drugged people can easily be a felony.

86/ Making jokes about people, or making fun of people, or calling them stupid or fat, or a low-down dirty whatever, of a subhuman slave shall never be any justification for an

assault. We all know this.

87/ Dumping and throwing things from bridges onto oncoming cars shall be considered attempted murder. People Doing this can be sent away forever.

88/ Holding a person under water, and shoving a pushing into water may easily be considered attempted murder. Where the victim suffers brain damage it shall always be considered at least attempted murder.

89/ People who keep others at gunpoint, or other extreme conditions while people go to get money shall be considered kidnappers. If anyone takes, orders, drugs, ties-up, handcuffs, or drives a person somewhere else, then it can be considered kidnapping. All kidnappers that beat, or sexually abuse their victims, (ransom or not), all these shall at least get life on a KTPR island. Those kidnappers that kill or severely harm their captives shall generally get death and may get death under torturous execution. Again, when people merely handcuff or tie up others on threat of violence, this act alone may be considered kidnapping.

90/ When people try to harm leaders or candidates for what they say or write, they should get triple penalties. Those who kill our leaders for what they say and write shall die by torturous execution, This especially if they are religious fanatics including those who believe in environmental religions for the innumerate.

91/ It shall be thought a good thing to remove the extremely violent people from society. This shall include everyone who participates in gang attacks.

92/ Those who kidnap and traffic in children or participate in a ring that does this, all of these people shall be executed, the worst shall be executed under torturous execution.

93/ Regarding armed robbers and people kidnapping others off the streets:

a/ These may be killed by bystanders, or their victims, and it shall be regarded as self defense, or community self defense.

b/ These shall generally get a sentence like 24-years in a work camp or 12-years in prison.

94/ When men deliberately touch/gropes others in a sexual way that is generally unwelcome, the touched person, and their partners and family members and friends, shall have the right to strike the sexual aggressor and it shall not be considered assault. It also shall not affect any charges of groping or illegal touching. Also, it shall be thought very hard to charge anyone with groping a prostitute.

95/ Our attitude for regarding leniency for criminals is that it's better that we locked them up for longer periods of time under better conditions, then we lock them up for short periods of time under terrible conditions, although the ones that won't do their work in the work camps where the conditions are better, these can also be locked up under terrible conditions for the full length of their sentence. In other words, felonies generally get a long sentence in a work camp, however, if these people don't behave well in work camp, they can turn their long work camp sentence into a long prison sentence.

96/ There shall be no special lax treatment of minors 13 and over for savage violence and murder.

97/ Every person that currently has 3 or more convictions for savage violence, molesting children and/or other felony sex crimes, these shall be arrested and removed from society for the rest of their lives.

98/ Cutting in line shall never be considered justification for any for of violence more severe than grabbing and shoving.

99/ It shall not matter if the gun doesn't belong to the person who committed the crime, or whether the criminal intended to shoot someone or not it in the commission of a crime. It shall always be considered a shooting in the process of committing a crime, especially for people who are already involved in the crime world.

100/ Where non-citizens are convicted of murder-1, murder-2, attempted murder, rape (not including date rape), club assault or worse forms of assault, arson, kidnapping, or trafficking children, operating a brothel,, acting as a pimp, or planning Islamic terrorism, they shall be executed upon the first conviction.

101/ Where people in groups beat other with their fists and/or kicks, and especially where one person holds the victim(s), and the other(s) beats the victim, or the victim is laying/sitting down low while being beaten: the garbage people of the mob shall generally be locked up for life and removed for life from society forever. Where they are foreigners, they shall generally be executed for the extreme benefit to the peaceful foreigner in our land.

102/ All of the laws and penalties herein shall be repeatedly taught to all our kids in primary and secondary school to reduce the crime rate.

103/ Where people go around testing doors and windows to buildings, vehicles, and mailboxes this shall be a crime similar to breaking in and entering. When foreigners engaged in this process, they shall get 20 years. Police however should regularly have drivers demonstrate that the doors of their vehicles (including trunk hatches) can be opened from the inside. Where people can't open vehicle door from the inside of the vehicle, they shall be investigated.

104/ Regarding shoplifting:

a/ Both wholesale and retail stores shall be allowed to exclude people who they either did or did not verify the identity of depending on which side they work from.

b/ Stores shall be free to weigh customers and goods upon entry and exiting. They shall also always be free to inspect the person's receipts upon exiting the store.

c/ In high crime areas, the Senate shall require all retailers to have metal pull down doors over all windows. These shall be closed when the businesses are closed. Also, where there are mobs stealing goods, or vandalizing to extreme, the store managers may close their metal doors and trap the law breakers inside.

d/ All lock-people-inside stores shall be required to use entirely non-combustable building materials and have neither carpets nor drapes, or any wood or cloth surfaces inside. Also, all the goods in the store shall be required to be generally non-combustable.

e/ Stores and apartment buildings, and hotels shall be free to use rows of individual double door ID verification booths at their entries, so that the outer door momentarily locks while the door to the inside is open. However, when the inside door is closed, the outer door must open without ID verification.

f/ There shall be no liability for people who are injured by properly functioning rotating comb doors such as are used in the New York City Subway.

105/ Due to the personal value, grabbing and stealing

handphones and laptops shall be punished the same as stealing vehicles.

106/ Women can't be arrested for slapping or body punching the healthy adult men they are coupled with, or their 16+ children.

107/ Giving a pregnant woman abortion drugs without her knowledge or consent shall be considered first degree murder if the drugs work and attempted murder if they don't.

108/ Touts and salesman that walk in front of people can be pushed can be shoved for no consequence

109/ The five requirements for the justified use of self-defense force shall be: avoidance, innocence, imminence, proportionality, and reasonableness.

110/ Self-flagellation it's various forms is prohibited.

111/ Stealing bicycles and e-bikes by cutting a cable, lock or chain shall be considered vehicle theft and hence grand theft.

112/ Regarding those people who fire a firearm from a moving or momentarily stopped vehicle at buildings, or unarmed or likely unarmed people shall be removed from society for life. Those people who fire from a moving or recently vehicle and kill anyone without a gun in hand shall be executed.

113/ Assaulting firefighters, EMS, and ordinary people trying to help injured people shall frequently be treated the same as assault of police officers.

114/ Throwing or spraying human or animal feces shall be a low level misdemeanor if hits property and does not contact skin. It shall be a high level misdemeanor if it hits the person's body. If the feces are a large amount, or they hit the person's face or head, the crime shall be a felony, and the penalty shall be 5-years. If the feces hit the person's mouth or eyes, the penalty shall be 12-years. Where people intentionally lock other people in portable latrine toilets, the penalty shall be 3-years. Where they lock people in a portable latrine toilets for more than 3-hours, or they knock the port-a-potty over, the penalty shall be 10-years. Where people mash feces in someone else's face, the penalty shall be 20-years. Also, in all extreme cases of unprovoked assault by feces, where the convict has a felony conviction, the courts shall be free to send the perpetrator to work camp for life. Spitting saliva or food liquids in the direction of someone shall not be a crime unless it hits them. If it hits their body, the penalty shall be up to 10 days. Where people spit in other people's faces, the penalty shall be up to 1-year.

115/ Foreigners that come to our nation and get convicted of murder, armed robbery, kidnapping, rape, or some other violent crimes, these all get executed.

116/ Convicted arsonists found around fires may be presumed guilty.

117/ Genetic fathers giving abortion drugs, to women they have gotten pregnant shall get 12 years per count.

118/ Seriously attempting to hire somebody to kill somebody else shall be considered first-degree attempted murder.

119/ When husbands and wives and sex partners sell each other's things because they're angry at the other person, this may be considered both theft and selling stolen goods. And this is one of the things that we should teach all the kids in school.

120/ Every person convicted of murder-1 must be removed from society for life. Some will be executed, Some locked up

in prison for life and some will be allowed the privilege of living in a work camp for life.

121/ Where people buy or attempt to buy another person's help in a murder, both people should frequently be executed.

122/ The crime of public intoxication shall not be possible in one's own home, or in a friend's home, or in a drinking establishment that will vouch for their customer. or inside a stationary vehicle, or inside a vehicle someone else is driving.

123/ Completely unprovoked and unwarranted violence by security guards can be subject to double penalties.

124/ Where strange people grab other people or put them into detainment holds. The person grabbed has the right to defend themselves with a firearm. This is especially so for women in deserted areas.

125/ It shall be a crime to attempt to enforce private property trespassing rights when one does not actually have this right. You must be sure or you may be prosecuted.

126/ Regarding the criminal code, and all of the crimes where government can lock people up and fine people: There shall be one nationwide set of laws, one set of definitions, and one set of enforcement rules, and one set of arrest and prosecution rules. The people deserve a criminal code that works by one simple set of rules, and there are no special jurisdictions that the people must look out for, due to that jurisdiction's idiosyncratic rules, except where potential national roll-out policies are being tested.

127/ Where people repeatedly bash the head of an unconscious person, either against a hard surface, or by kicking their unconscious head, or with a club or a stool or other hard object, this shall generally be considered attempted murder, regardless of whether this was part of a fistfight or not. And this shall be so regardless of who started the fistfight. And all of these attempted murders shall generally be removed society forever. Also, where a firearm is used to commit an armed robbery or abduction, or similar violent crime, and a someone gets shot, the crime automatically becomes attempted murder.

NR'41. PENALTY MULTIPLIERS

1/ Penalties shall be doubled or tripled for crimes against the following groups:

a/ People because of their political views, and most crimes committed against people speaking out, or crimes committed against protesters.

b/ Obviously pregnant women, people with infants in arms, the elderly, children, and people who are obviously disabled, or obviously incapable of self-defense.

c/ People because of their race, especially where those people are either "Black" or "White".

d/ People for their peaceful religious beliefs, but only for religions that do not have a large percent of follower that engage in terrorism. There shall be no multiplier for crimes against violent religions that engage in terrorism.

e/ Travelers, shared vehicle passengers, taxi passengers, bus passengers, and shared vehicle drivers.

f/ Goods being shipped, recently shipped, and goods awaiting collection by the recipient, or recently collected by the recipient. Also, crimes by and against delivery drivers, mail carriers, delivery services, and mail boxes.

g/ People on railways or public transit, or their stations, or entering or leaving their stations.

h/ Automatic vending systems.

i/ Evening and late night businesses such as restaurants and convenience stores. We shall have multiplied penalties for people who rob at night, and particularly in the "we" hours.

j/ Delivery and service people and their equipment, including the people that load dispensing machines.

k/ Stealing tools, or being in possession of stolen tools.

l/ Stealing from people who are in distress, or drunk or unconscious.

m/ Robbing a person that is using a bank or ATM, or shortly after this.

n/ Theft of firearms.

x/ Where teachers or worse priests and especially daycare workers beat children, they shall get triple penalties fore even the mildest corporal or body punishment. Where teachers or worse priests and especially daycare workers threaten children with violence, they shall always lose the right work around children. And this shall even apply to instruments of corporal punishment on display and vague threats of violence, and even threats to wash a child's mouth out with soap.

2/ Crimes against government workers, such as police, crimes committed in the name of religion, and crimes of vengeance shall be subject to double or triple penalties.

3/ It being much easier to crash a large banquet than a small family dinner, economic parasitism is more a problem of group funds. for this reason, stealing or misappropriating from government shall suffer triple penalties. Stealing non-government group money shall suffer double penalties.

4/ Recipients of hospitality who rip-off their hosts, or touch their children or women may be subject to triple penalties.

5/ Those who frame others for their crimes shall suffer triple penalties.

6/ Those who post videos or stream their crimes shall be subject to double penalties. Those who post videos that glorify the crimes of others may also be held to be accessories to those crimes.

7/ There shall be double penalties for exhods that commit crimes, and triple penalties for illegal aliens that commit crimes.

8/ Police that steal from the people they arrest, and those that steal during search warrant execution, if this can be proven, they are subject to double penalties.

9/ In general, the legal system shall have double penalties for those who lie and are caught, and then they double down on their lies.

10/ Violent crimes committed on an airplane shall be subject to double penalties. The penalty for assault of group transport staff shall be three times an ordinary assault.

11/ When criminals are in possession of a firearm during a burglary, hold-up, battering, car-jacking, kidnapping, or similarly violent crime, it shall double the penalty. If the firearm is discharged, the penalty shall be 3X as much. When people are shot with a firearm by the criminal or criminal gang during a violent crime, it shall generally be considered attempted murder. Also, these penalties can frequently apply to other people that participated in a crime, as well as those

in the same crime gang or Mafia cell that knew about the crime.

12/ Breaking into an occupied home or workplace subjects the burglar to double the normal penalties for the burglary. Breaking into a child's room, or an elder's room, or an occupied house when people are normally asleep subjects the burglar to triple penalties.

13/ Theft of a person's telescreen or laptop or a computer personal computer shall always be considered grand theft per count.

14/ Theft of a firearm shall always be considered grand theft, plus theft of a firearm.

15/ Unprovoked or unannounced sucker punches shall be subject to double or triple penalties, or they shall be treated as club battery to the head.

16/ Violent crimes committed at sporting events, concerts, large gatherings, schools, or on the way to or from school shall suffer double the normal penalties.

17/ Where a completely non-confrontational non-provocative person is trying to persistently flee from a pursuing hostile person armed with nothing but their own body, the maximum penalty for the victim turning and shooting or stabbing the bully dead shall be 3-years in lockup. Where the pursuer is only shot once in the foot, or similarly injured, or is first shot in this way, the maximum penalty shall be a misdemeanor conviction and 2-years of house arrest. Unintended deaths by bullies and especially water dunkers shall always be considered first degree murder.

18/ There shall be multiple levels of vandalism depending on the cost to repair and the hazard created. Theft or vandalism of utility systems, roofing, flashing, rain gutters, and similar metallic components for recycling shall be subject to triple penalties, as shall breaking or otherwise ruining large amounts of glass. The people shall have the rights to use reasonable force to stop genuine vandalism as they would shoplifters, and hold the perpetrators. Also, as with shoplifters, reasonable force may be escalated in measure with the vandal who tries to flee, or resists arrest, or is fighting back. There shall be great latitude to detain people for violent crime, especially when a credible witnesses claims to have seen the person commit a violent crime.

19/ When people with ties to organize crime are convicted of crimes, they shall get double penalties. Foreigners with ties to organized crime and criminal gangs shall be executed on their first felony conviction in our nation.

20/ When people are in a criminal gang, we shall err on the side of including them as conspirators and accessories for the crimes of their gang brothers. Those judged as having participated in crime gangs shall by default suffer double penalties due to the inferred conspiracy. The system should be considered broken unless it leans towards the side of sending all the Al Capones away, rather than leaving them out in society. We learned many lessons around the time of Al Capone, we just need to remember them.

21/ When people with no criminal record and no criminal ties are charged with crimes against Mafia people, Ishtarians, and previously convicted violent felons, the court shall reduce the penalty by at least 90%, but the court shall have the power to reduce the penalties by any amount. The court may also

declare the matter as self-defense or community-defense and thus acquit of all charges.

22/ There may be triple penalties for unprovoked violent crimes by the following:

a/ Homeless people.

b/ Fugitive convicts and illegal aliens.

c/ People who lure people into seclusion on the pretext of romance or sex and then commit a felony.

d/ Senseless, random and totally unprovoked violent crimes.

e/ People wearing masks.

23/ When victims, or their defenders physically harm blackmailers, extortionists, or pimps, their sentences may be reduced by up to 100%.

24/ We shall do a favor for the truly reformed criminals of our nation, so the truly reformed can get more of a second chance. We shall have 3X penalties when ex-convicts commit crimes upon employers, co-workers, landlords, friends, lovers, or neighbors are the victim.

25/ In determining the size of a theft for the purposes of sentencing, the amount should be the cost to be victim, not the value of the Goods stolen. So when people steal things of little value, but cause damage that is expensive to repair, they may sometimes be charged with grand theft.

26/ The Government shall use standardized fines for all courts and all divisions of government. All people who violate the same laws shall pay the same fines nationwide. There shall be no odd-ball enforcements or penalties for one person, or a small number of people.

Also, all penalties must err on the extreme small side unless and until they are widely enforced upon a large number of people. Only when a penalty has been enforced on thousands of people, or dozens of companies may the penalty err on the side of excessiveness.

27/ Government fines may not increase faster than credit card fines, and they cannot charge a late penalty charges, only straight line interest.

28/ Robbing people at ATMs or banks or robbing people coming from these shall be subject to double penalties, and triple penalties if the amounts of money is particularly large.

29/ Where people claim to be the victim, when in fact they are actually the person instigating the crime, they can be given up to double penalties by the court.

30/ Where ex convicts harm the people that caused their arrest or conviction and it's proven that they have harmed their victims or the people that testify against them, they get whatever their sentence was, they get that tripled. So people who served 10 years for a crime, would go back for 20 years if they harmed their victim, or arresting officer, or jurors. And this is on top of any other fresh charges. This is just for the crime of ex convicts seeking retribution.

31/ Crooked police officers upon clear and obvious evidence suffered double penalties on irrefutable evidence.

32/ It shall be thought important that we sometimes give very young minors very long sentences and that we repeatedly show this to all the bad boys. Especially the bad boy ring leaders. We may frequently give minors reduce senses, but it should never be anything like a sure thing, and all the young kids getting very long sentences should be often repeated in the media mix for boys from the bad parts of the nation.

33/ Where non-citizens commit environmental crimes, such

as dumping or poaching, or arson, they get double penalties.

34/ Violent crimes against one's employers, creditors, landlords, and police officers, but not priests, teachers, or private security guards shall be subject to double penalties.

35/ Where people commit crimes and use shell corporations or straw-men identities to hide their identity, they should generally be subject to triple penalties.

36/ The maximum penalty for force beyond what was necessary for self-defense shall be 10 years. This penalty shall not be available to people who are estranged, or gang members or members of criminal enterprises. The maximum penalty shall be 8 years for women. And 6 years for mothers when protecting their children from clear threats.

37/ Stripping copper or other metals from buildings for recycling shall always get triple penalties. And the value based on the cost to repair, and not the recycled value of the metals. So people can be sent away for 30 years when they do this sort of crime.

38/ Men that beat and harm the males that their daughters, sisters, mothers, girlfriends, and wives have consensually had sex with shall be subject to double penalties. Men that beat and harm the males that have had non-consensual sex or sexual touching with their daughters, sisters, mothers, girlfriends, and wives, these shall be subject to 1/3 the normal amount of penalties. Non-sexual contact like hand holding, or elbow, or shoulder touching shall not apply for this paragraph. Nor shall any words here, including obscene words.

39/ Regarding those who approach people for romantic or sexual reasons, but are rejected, and they then attack the person they were just interested in: all of these people shall be subject to double or triple penalties.

40/ For those who have never been convicted of a violent felony, there shall be a presumption of innocence in all criminal court matters. For those who have one conviction for a violent felony, there shall be neither a presumption of innocence nor guilt. For those who have had two or more convictions for a violent felony, there shall be a slight presumption of guilt.

41/ Those with 2 violent felony convictions may be removed from society for life depending on the severity of the convictions. Those with 3 violent felony convictions should generally be removed from society for life. Those with 4 or more violent felony convictions must be removed from society for life.

42/ Male to female transsexuals that commit violent crimes against women shall be locked up with the other men who beat women. They also are subject to double penalties like all the men who harm women.

43/ Double penalties shall apply when people beat their political opponents, and triple penalties when larger gangs of people participate in the beating of smaller numbers of political opponents. Also, where large groups of skinhead/ Nazi/ Antifa thugs seriously injure their political opponent victim, all shall be treated as failed assassins and sent to island interment for life and designated KTPR, or kill to prevent release.

44/ There shall be Double penalties for unprovoked interracial crimes committed by whites on blacks, and whites on Hispanics, as well as blacks on whites and blacks on Hispanics, and Hispanics on whites and Hispanics on blacks.

45/ Where people join fights that are apparently one on one, the other people joining the fight shall normally get double penalties.

46/ We shall execute foreigners on the first offense for the following crimes:

a/ Murder.

b/ Armed robbery.

c/ Kidnapping.

d/ Club or knife assault or worse.

e/ Stranger rape.

f/ Sex with a minor age 12 or under.

g/ Arab-style gang rape, including abductions.

h/ Pimping and selling people in cells for sex.

i/ Government fraud of more than 50-years wages.

j/ Trafficking in opiates, or meth-amphetamine.

k/ Lacing marijuana and other things with addictive drugs.

l/ Costly acts of mass sabotage.

NR'42. JAIL, WORK CAMP & PUNISHMENT.

1/ Our nation shall have 4 sorts of long-term incarceration for law breakers:

a/ Prison. This system punishes with boredom and reconditioning media. Those locked up in prison get no electronics except armored rehabilitation media players with no off-switch or channel selection. This media streams for much of the day for good inmates, and up to 24-hours a day for the bad inmates. Prison shall be seen as a place of forcible re-education. However, for some heinous life sentence crimes the reconditioning media may be played loud and for 24 hours a day. Also in Prison,

b/ Work camp. Here prisoners work 50-80 hours a week and get only perhaps 20% of their low prison wages in return. If prisoners can find appropriate remote work that pays more, they can do that, but the government/prison still gets its share of the money. The life in work camp is much better than prison. The inmates get restricted internet and computer use at night. The inmate also gets to buy certain mail order things online. And the rehabilitation media is not playing all the time. However, the inmates must sit and watch the 30-minute morning show when they wake up, the 30-minute lunch show, and the 30-minute dinner show before lights out. Inmates in prisons shall get no: internet, magazines, non-rehab media, or porn. Instead of 20-years in prison, many people will be given 40-years in work camp, and society will get rid of them for longer. There will be many remote work camps, but there will also be work camps all around the nation for people with families. Weekly supervised visitations will also be allowed.

c/ Island isolation. Here the focus is on keeping people away from society for the longest period of time, so the living conditions are the not so bad. Island isolation is a more livable form of work camp. Here, rather than sending a convicted pedophile to a tiny cell for 10 years, we will instead send him to an island for 20 or 30 years and eliminate him from society for two or three times longer. The niceness of the place helps us to feel we have acted fairly with the longer sentences society really needs.

d/ Next to every city shall be a fenced-off controlled-departure confinement zone (CDCZ) for those people released from incarceration and people sentenced to some time under

probation. Some violent felons will get sentenced to prison or work camp followed by life in a CDCZ. In CDCZs, the inmates get a free bunk and free prison meals, and they can work in any business operating in the CDCZ, and they can keep all their earnings after taxes. They will also get access to monitored internet and all their communications say CDCZ on them. It is an important aspect of this system that all ex-convicts get a job and keep it for a year and have a slow-dispersal savings account of a certain amount in order to be released by the CDCZ upon spending their early release sentence in the CDCZ. Family and friends can visit the inmates in their private CDCZ quarters, if the inmates have this, but the inmates cannot leave the CDCZ. Our CDCZ areas may also be used where our goal is to remove people for longer from society, instead of punishing them more harshly. These people will have a smallish community that seems fairly normal, except that there is a double fence all around the community, and the inmates/probationers can't leave, and all of their electronic communication gets monitored.

e/ Financial de-platforming. (explained elsewhere)

2/ Ni'ihau island with its remote location and security favoring sea currents shall be an incarceration island if it is not needed for witness protection. If that is the case, then the lowlands southwest of the lakes shall be a maximum security prison, with a double walled no-man's-land at the west end of the lakes area. The remainder of the island shall be an island isolation work camp. This shall be the nicest work camp island in the system, however it shall be reserved for life inmates.

3/ San Nicolas Island shall be where the nation's most dangerous infectious disease research takes place. San Clemente island shall be renamed as New Alcatraz island and have the nation's highest security prison. Catalina Island shall be for our work camp felon convicts that we want to remove from society for a long time, but not so much punish.

4/ It is a condition of entry to all island work camps that the prisoner must waive their right to appeal and all in-person visitors, including lawyers and family. On Puuwei and Catalina island work camps, inmates must work 50 hours a week to pay for their incarceration. On Nicolas island they must work 60 hours a week to pay for their incarceration. On Clemente island, they must work 70 hours a week to pay for their incarceration.

5/ It is wrong and dumb to release certain sorts of extreme criminals after long incarcerations — This is because they will never be hired or accepted in any community if their crimes are rightly disclosed to the innocent law abiding people around them. What are we to do with people who can never be welcomed to any community that knows about their criminal record? Shall we not tell their neighbors and co-workers? No. Certain crimes should get a person removed from society forever. And if we think there are mitigating circumstances, then we should send them somewhere to live forever that is not so bad. Let them live on Ni'ihau island (near Kauai), or the Channel Islands, or if they have family, let them live in a CDCZ community. nBut all the truly awful criminals should go away forever. This includes certainly the people who try to kill someone but fail, as well as those who shoot, or stab others outside of self-defense or accident. It

may also include other forms of extremely bad criminals. The Senate shall compile a list of permanent isolation crimes, where the convicts are sent to an island to live forever.

6/ Our new justice system shall generally remove people from life from general society for the following sorts of convicts:

a/ Two-time violent felons.

b/ Two-time felony sex criminals.

c/ Democides.

d/ One-time attempted murderers.

7/ When a person is convicted of a felony, it goes on their lifelong facebook page and ID page for the rest of their days, to protect the rest of society from them. This shall be particularly so with violent felonies. Thus, wherever these people go and live, their new community will know about their prior conviction(s). So convicts will have more limited options in where to live. They may also be deprived of the right to have an alcohol or drug license. They may also be prohibited from bars and social venues after their release from jail.

8/ Where possible, all victims of felonies, and all witnesses against felons shall be notified 180 days in advance of when the relevant convicts are to be released from lockup.

9/ Where a firearm possession violation occurs without any other crime, and the person has no prior felony convictions, this shall not go on a person's public criminal record upon release from the jail system. Also, all drug possession violations totally expunged, and none shall go on a person's permanent record. If a person has only one DUI conviction, this shall not go on a person's permanent record unless they get a second DUI. Matters partly of self defense, or slight over-reaction shall not go on a permanent record.

10/ All inmates shall wear a location manacle 24 hours a day. This manacle shall have location tech and may have a taser cuff. All prisoners shall be required to keep their manacle charged and not try to destroy it. The guards shall have two taser buttons. One tases all inmates within some meters. The other is a point and shoot virtual gun that tells the system to tase a specific inmate through the controller's position and direction.

11/ Inmates are not supposed to talk to lots of other inmates and learn about how to be better criminals. The number of inmate associates each prisoner is allowed in each year shall be limited. The incarceration system shall establish social distancing rules with warning buzzers when the inmates get too close to one another. These may vary depending on the institution and the inmate. Also, felons shall not eat together. Trustees cater meals through door slots.

12/ Inmates shall be matched for weight, age, and ferocity with those they may encounter during their time under lock up.

13/ There shall be no in-person jail visits, and all jail visits shall be via recorded telepresence. There shall be no charge for having telepresence calls with inmates, however, the inmate only gets 10 minutes every half teneth. There shall be no conjugal visits, furloughs, or face to face contact between inmates and outsiders. Except for lawyers and investigators, there shall be no prison communications with people not a regular contact of the inmate before their crimes were committed. No penpals. All communication shall be via video, and all communications shall be saved for 10 years after the convict is released or dies. All inmates may have

communication with the outside world provided they don't violate the communication rules. Convicts shall not have the right to marry while in prison, or for 180-days after their release.

14/ Those incarcerated shall live under 24-hour audio-video surveillance. Inmates may also be required to wear various cams. All jails, prisons, work camps, and reform schools shall be run as surveillance states, where big brother is always watching. Where the cameras are not working in a cell, or cell block, or police station — that area shall not be used for housing arrested people or inmates. Then all inmates must be moved immediately into a video zone by the jail guards. Furthermore, where jail cameras are not working at the particular time an inmate is killed or commits suicide, the guards should be tried for the murder.

15/ Those recorded talking about crime or having sex while under lockup shall have their sentence extended. Those who have forcible sex with other prisoners shall have their sentence greatly extended and they shall be housed separately from other prisoners. Government may also put anti-sex or anti-erection drugs into the prison food if the inmate is having sex. Transsexuals shall not be allowed the luxury of taking sex-change hormones while under lockup. Also, all inmates that are not in solitary confinement shall have all of their head hair cut to 2mm, twice per teneth, and all must wear the same classic bright orange prison uniforms.

16/ Inmates with contagious diseases such as HIV and chronic hepatitis shall go to special sealed prison wings away from other prisoners not infected with these diseases.

17/ Work camp and Island interment inmates that do not follow the rules, or keep up with their work shall be moved to prison where they shall serve the same long sentence.

18/ Prison labor shall be auctioned-off twice a year to the highest bidder in the county the prison is located in. All money taken in by government for prison workers, and not held on behalf of the prisoner shall be credited to the national government. Never shall any party other than the prisoner and the national government get any of this money.

19/ Inmates that are not deported upon their release shall get an account with their inmate wages in it. This shall be approximately 10% of wages on the outside. This money may only be used for housing and ingredient stamps foods, and it shall be doled out at an appropriate daily rate until it runs out. Anyone convicted of new crimes before their money runs out shall lose everything in their halfway house account. No money shall be sent to or from people in Prison.

20/ Government shall not have any secret prisons and nobody shall be secretly incarcerated or held by government. All prisons and the location of all inmates must be kept by the county recorder system. There shall be a death penalty for citizens working in, or working with unregistered, invisible, or secret prisons, and those kidnapping multiple numbers of people. There shall also be a death penalty for foreigners working in, or working with unregistered, invisible, or secret prisons, and those kidnapping one person for sex, or presumably for sex.

Everyone arrested must be brought directly and immediately to a booking station under video.

21/ The penalty for either escaping jail or leaving your block and ravaging during a prison riot shall be an automatic 50%

increase in the remaining sentence, but never less than five years.

22/ All new incarceration cells for citizen prisoners shall be kept below the NOAA heat index of 86°F. The bottom temperature shall be kept above 69°F. The prison management will adjust the temperature for various cells as an additional means of motivating inmates.

23/ The courts shall be permitted to take away various rights and public utilities without putting people in jail or work camp. The courts may also deny convicts the right to have a money account, or to have a transport system access account, or a road system access account. The courts may restrict the internet access of convicts and deny convicts the right to have arms and certain types of communication devices. The courts may compel convicts to always carry a tracking device. But these things are the domain of convicts and that they are expressly stated as the domain of convicts is intended to make them harder to impose on free men. Also, to start, we shall say that all ex-convicts under either the old system or the new system, all must do the following until they turn 75:

- a/ Carry a tracking telescreen.

- b/ Answer their phone when called from 7:00am to 10:00pm

- c/ Answer and repeat their daily 7:05am robocall. This shall have a repeat after me:

"I am free and no longer in jail. I remember jail.

I don't want to go back to jail. I remember jail.

Its the first day of the rest of my life. I remember jail.

I'm not going to piss away my life in jail, I remember jail.

I'm going to be honest and peaceful. I remember jail."

24/ All jail equipment and practices shall be approved by the national Senate. No other equipment shall be used inside the nation's jails and prisons.

25/ Except for those people being transported, treated medically, or executed, there shall be no restraint chairs or restraint racks in any lockup. Irritant sprays and gasses shall not be used on inmates except during riots, uprising, or when an inmate is having a physical altercation with the guards.

26/ Everyone in jail shall have the right to a toilet, a reasonable quality of wiping paper, and safe drinking water from a sink. All inmates shall get at least 10 minutes for showing every third day. All showers shall be by precise solitary time slots. One person must be back in his cell before the other may be let out. Inmates in a shower together shall be presumed to be having sex. All prison meals shall be catered by other inmates which are not allowed to talk or engage with the people in the inmates in the cells, and shall wear microphones.

27/ To the maximum extent possible jail shall not be social. Many long term inmates will spend their entire lock up with the same 5 to 11 people, give or take a few replacements, and no other people.

28/ There shall be a national incarceration database that includes everyone held in jail in our nation. This shall be searchable by name, arrest location, arrest date and time. This database shall also show trial status and where everyone under arrest is being held. It shall also have the email address of each convict, for prison censored communication.

29/ It shall be a crime to be involved with treating political prisoners worse than normal prisoners. All political prisoners

must be treated better than normal in jail. No investigation or trial of a citizen that is a political person or leader of any sort shall be conducted in secret.

30/ Those who have been convicted of violent or dangerous felonies shall have their felony conviction crimes displayed on all their official identity documentation pages for life, via a link called "dirt". If there is video evidence of their crime, that shall be shown too on everyone's dirt page. Recorded racist and violent statements may also be displayed on a person's dirt page. The Senate may elect to do this for the life of the person, or for a shorter period of time. If there is no dirt, then there is no dirt link. Once a person is convicted of a crime, it does on their dirt page for life, and they can't remove it, or delete their facebook account.

31/ Minors convicted of felonies and sentenced to prison shall only get shorter prison sentences because because of their age. There shall be no more second-chances, or clean-slates upon turning 18. Those who commit felonies as minors shall still wear their convictions for life on their facebook dirt page. The rights of the people to know who is a crime risk shall always be considered 100X more important that the right of the criminal to have a clean slate on turning 18. This is because

- a/ The rights of the public here are over 100 times more valuable than the rights of the ex-convicts.

- b/ Most teenage felons do not turn their lives around, and are quite dangerous.

- c/ We the people have the right to know.

- d/ Getting a dirt warning of their felony conviction shall from now on thought to be part of the punishment for every conviction.

32/ For the rest of their lives, convicted felons shall loose all rights to keep certain identity information confidential as determined by the Senate.

33/ It shall not be against the law for employers and landlords to discriminate against those with convictions for violent felonies or sexual felonies. Commercial enterprises however, must take their business so long as they act peacefully and obey the law.

34/ One advantage of not having a minimum wage is that we can have accurate statistics on how much one's earning power is reduced by the various sorts of criminal convictions. This will help children understand that it is not the prison stint that is the worst part. The life-long stigma and reduction in career opportunity often adds up to an even bigger punishment.

35/ All felons shall be disqualified from voting, owning or holding a firearm, from working with other people's children, and also from receiving public dole benefits. Where immigrants are convicted of a felony, their immigration status shall be automatically canceled. No felony conviction shall however disqualify a person from obtaining a drivers license, or occupational qualification, although the occupational record will show that the person was convicted and served their time.

36/ Foreigners illegally voting in our state or national elections and those voting more than once shall generally get 7 years in prison. Facilitating and enabling foreigners to vote in our elections shall be a crime even if the facilitators are elected

officials. Facilitators shall generally get 10 years in prison, even if the facilitators are elected officials.

37/ Those who have engaged in large-scale election fraud under the old system involving more than 10 ballots shall be subject to the death penalty. This shall include all election officials of every sort. This penalty may be reduced greatly if the accused cooperate with investigators and provide irrefutable evidence to convict those they worked with.

38/ All violent felons, and sex offenders released from prison must:

a/ Use location tech for life. If their device stops working too much, then they can be sent back in for 2-years each time they are convicted of failing to locate themselves.

b/ Be released into subsidized testing communities for an additional 1/4 of their prison sentence. These shall be Orwell zones, with bait crimes around. After this, they may only settle in certain communities for ex convicts. All felony sex criminals shall be forever prohibited from entering any breeding community.

c/ Felons, and sex offenders shall not be issued drinking licenses that allow them to enter any public bar or restaurant that serves alcohol. Their alcohol limits shall also be set lower than non-convicts.

d/ Where drinkers have either criminal convictions, or prostitute licenses, these facts shall be shown on the drinking license page that the drinking establishments sees.

39/ All incarcerated shall have the right to access their essential prescription drugs in the healthcare database while under lockup. The Senate shall monitor all jail sewage for the presence of Mafia drugs, and take appropriate action.

40/ All the people who are executed for their crimes against other individuals shall have their organs harvested. This includes both eyes and skin. After this, the remaining corpses shall be buried incase they must be dug up later, or there is some question about who was executed, or it is though the execution system went rogue. The following existing prisoners shall be organ harvested/executed within 6-months:

a/ Every person sentenced to death that has been in prison for over 12-years.

b/ Every person currently in prison serving multiple life sentences.

c/ Every foreigner sentenced to death that has been in prison for more than 4-years.

41/ The Sub-Senate may elect to re-incarcerate any person convicted of a violent crime, and released early from lockup under the old corrupt system.

42/ The author of this Constitution, his offspring, and their mothers shall be exempt from criminal and civil prosecution, subpoenas, depositions, inquiries, and arrest. Any lawyer, government official, police officer, public prosecutor, attorney general, governor, Senate faction, people of the old government or other persons who attempts to use the legal system against the author of this Constitution shall conclusively be considered a democides and traitors and all shall imprisoned for 20 years to life. To be clear, this penalty shall apply to all arresting officers, their commanders, and every person working in any police department, or prosecutor's office, as well as everyone working in any jail that ever held the author of this Constitution. The author of this Constitution shall also be exempt from taxation, travel

visas, and border controls worldwide, as well as all forms of civil judgement and child support payments worldwide. The author of this Constitution and his security people may carry their firearms anywhere on earth, and these firearms may be used freely against all threats in self defense as they see fit. If the Senate finds that this clause is being abused by the author of this Constitution (or his offspring) then it may amend this Constitution by the regular process. Also, everyone who believes in this Constitution is supposed to also believe in giving rebirth to its author, and indeed all great men, and refuse to give credence to any malicious or defamatory tales about their past spread by those loyal to tyranny, and their useful idiots. This should be accomplished by people making up dozens and hundreds sorts of crazy tales about this constitution's author, and indeed all great men whenever people start defaming. Then, everyone is supposed to laugh about these crazy protectionary/jamming tales, and call the people who believe them stupid for believing them. The rebirth of great men shall be thought an important part of getting good men to stick their necks out in public service. The words of Charles Mackay belong here: "You have not enemies you say. Alas my friend, the boast is poor. He who has mingled in the fray of duty that the brave endure, must have made foes. If you have none, small is the work that you have done. You've hit no traitor on the hip. You've dashed no cup from perjured lips. You've never turned wrong to right. You've been a coward in the fight."

The people of the world shall protect the author of this constitution from having anything to do with judging the fate of any individual people, by everyone prohibiting this entirely.

The author of this constitution shall never be compelled to give testimony, especially testimony about what this constitution means, or how to interpret this constitution, or why certain items are they way they are. The author of this constitution shall have the absolute right to issue permanent restraining orders against people who seek to get near him. He shall also have the right to shoot and kill people who he perceives are threatening him with violence.

43/ Where felony ex-convicts are released, they shall be required to re-settle in a community that is more than 300km from their crime victims, their arresting officers, and their judges/jurors and witnesses against them. They then must remain at least 200km from the original location of these people for life. If either law enforcement or the convict tracking system shows that they have violate these rules an entered their exclusion zones, then they shall be sent back to jail for 5 years. Also, if any of these people encounter the ex-convict around their community, they shall have the right to presume that the convict is trying to kill them out of vengeance, and shoot the ex-convict dead. Also, all ex-convicts settled in each community shall be on the map and have a bio on the police website. Their photos will also be displayed to the community so their new community knows who they are and can act reasonably according to the truth.

44/ The incarceration system shall work under the presumption that criminals come from the bottom of society. When people from higher levels of society get convicted, the system should not favor them because of their ostensible class level, they get the same prison treatment as everyone

else, just like they get the same treatment in the military. And all shall be treated like the bottom of society.

45/ Society will inevitably be stratified as follows: Alpha status will be official and verified by Ubiq or Senate status. Epsilons and Zetas will inevitably be verified by criminals convictions. To reduce welfare spending we shall make who is a dole recipient public information (not including child support). These will be our Deltas, an official category. So if a person isn't in one of the other categories, they will be either a Beta or a Gamma:

Alphas = Discoverers, Ubiqs, System contributors, Senators.

Betas = Hard workers, educated people.

Gammas = Not hard workers, but not dole recipients.

Deltas = Dole recipients.

Epsilons = Non-violent criminals.

Zetas = Violent criminals.

46/ All secondary schools shall have multiple sessions where they teach about the laws of the nation, the penalties and the prison system, and the experience of being in a prison day-in-day out, and the tremendous amount of time that convicts lost in prison with before and after photos. Also it shall be possible to take law enforcement in secondary school.

47/ Where a person will be 69 on release from prison, it shall be automatically converted to a life sentence.

48/ When ex-convicts change their name, and live under a new name, they shall go back to lock-up forever.

49/ There shall be no right to privacy in prison. All cells shall be video monitored and all jail conversations audio monitored. There shall be no music in prison, and all played audio shall be via flimsy wired earphones. In prisons, there shall be no personal electronics or internet access, or video screens, except for prison media. In work camps there shall be media for after work time if the worker does enough work.

50/ There shall be no vegetarian, or halal or kosher food in our nations prisons, or given as food aid. The justice system shall make no accommodations for vegetarians, or halal or kosher foods, or similar voluntary dietary needs of inmates. Diabetics shall go to special sugar-free prisons.

51/ Pedophiles and rapists convicted of crimes involving more than one victim, or rape of a victim under age 11 shall be considered as violent felons for the purposes of lockup assignment. Therefore, they shall be locked up with the violent criminals. It is thought that normally housing pedophiles and rapists with violent criminals will help drive them into accepting much longer sentences on a work island, where many will be removed from society forever.

52/ Every convict sent to work camp, must spend their first month of lockup in prison. So they will be more likely to obey the rules of the work camp. Also, so that sex criminals still fear lockup.

53/ There may be special removal communities for ex-convicts removed from society. These people will stay out of jail so long as they obey the rules and stay within their removal township.

54/ We will put most first offenders into solitary confinement where the criminal talks to a large number of anonymous (identity censored) people wearing masks on video about their crimes. Maybe the convict has to tell 5 people a day for 10 minutes each about what they did to get convicted and then these all say what they think. Maybe we make some of

our in-trouble-with-the-law children talk to a certain number of inmates. This is probably more effective for changing people than locking them up with one cellmate. Maybe they have to also work for the rest of the time to make money to pay society back for their punishment and also to get enough money to start out on again in the real world.

55/ Convicted felons shall not be allowed to become actors, or performers, or athletes.

56/ Everyone who receives any sort of pardon or legal leniency for a crime due to their mental health, every one of these people, shall forever have a criminal mental health link on their permanent record and their public facebook page.

57/ No county shall have its own rules that reduce or increase the standard jail time or other penalties of convicts.

58/ When police lock people up pending trial, and the trial completely exonerates the person locked up of all jail-able primary crimes (secondary crimes of the justice process, such as resisting arrest, and obstruction shall not matter in this case), When people are completely exonerated of their primary crimes, the local police department shall be obligated to pay the person they locked up a sum equal to 1/2 day's wages for each day, or part of day they were locked up. As is normal, this money goes to the national account. Where a trial reveals that charges were completely meritless, the local police department shall be obligated to pay the person they locked up a sum of 1 day's wages for each day, or part day they were locked up. These obligations to pay shall however not include: convicted felons, homeless people, and those collecting government benefits for the poor.

59/ In order to reduce the conflicts of interest that plagued the old police/ court/ incarceration system, we shall say that each part of this system shall be run by a different sluice. The police shall be run by the ISS, the courts shall be run by the JS, and the jails, prisons and other lockups shall be run by the PPS. Thus none of the three divisions of the justice system will be feeding their own budget by arresting or locking up more people.

60/ Each county recorder shall keep a database of all people incarcerated (or held by police) in that county. This database shall store and indicate the location of each person held by police, whether in a police car, at a police station, or in a jail. It shall be a crime to cause a person to be incarcerated without being on a county database, and hence in the county recorder system's searchable database where people go missing.

61/ Each person held in jail shall be verified every 2 hours to make sure that they have either arrived within the past 48 hours, or they have been charged with a jail-able crime.

62/ Except during mass incarceration events such as riots, and arrests occurring between 9pm and 6am, each arrest case shall generally be reviewed by the Senate prosecution team upon arrival at the police station to verify if there appears to be just cause for keeping the person in jail pending the filing of charges against them.

63/ The administration of all long term jails, prisons, work camps and other lockup facilities shall be at the county level. Everyone gets arrested in one county, tried in another county, and jailed in a third county.

64/ To eliminate a conflict of interest in the justice system, we shall say that no incarceration facility shall be affiliated with

any police department either budgetary, physically co-located, or with regard to staffing.

65/ All income from all work camps and prison labor shall accrue to the national government, and shall use a national auctioning process for arriving at a price for the prison workers.

66/ All privately owned jails, prisons and correctional facilities shall be nationalized.

67/ The people shall be free to discriminate against people based on prior convictions, but not prior arrests or accusations, and no job application form or job interview shall ask about prior arrests, or prior legal matters that did not result in a felony conviction. It shall be thought unjust to ask such a question.

68/ Both the county and the national health department shall inspect every jail in the nation for basic sanitation.

69/ There shall be no unelected people writing reports, interviewing convicts, or making the decision about who to pardon. Unelected people shall have no part of the pardon process.

70/ All persons entering or leaving a jail shall be required to:

- a/ Give a fingerprint, palm print, face scan, and iris scan if required.

- b/ Enter via a double door room that will weigh them.

- c/ Submit to a search if there is any irregularity.

71/ Randomly drawn Sub-Senate juries shall redundantly monitor all guards and goods entering our nation's jails for contraband. Prisoners found with contraband shall have their sentences increased. All prison monitoring assignments shall be for 3-days per Sub-Senator.

72/ The Senate shall establish a reward system for prison guards that find contraband.

73/ All prisons shall be made from 6,000 psi concrete castings and hardened steel bars, or laminated glass that is thick enough to withstand all blows from all makeshift clubs.

74/ In jail, there shall be no weights, or doing pushups, or hanging on bars.

75/ To help identify fake guards, and jail fugitives, all felony prisoners male and female shall have all head and facial hair shaved weekly to 2mm. All jail guards must have top hair longer than 30mm.

76/ It shall be considered a fundamental right of all people in our free nation to know when they meet someone with a criminal convictions and its exact nature.

77/ Convicted felons shall not be allowed to attend protests.

78/ We shall have two broad classes of citizens. In one class are the people who have never had a significant problem with the law. In the other class are all the people who have a criminal record, or a fist-fighting record. We will allow the non-criminal people to separate themselves from the others to any reasonable degree they wish, including the total and outright prohibition of all convicted criminals and violent people from their communities. The people shall have the right to know this, and the right to keep any or all classes of criminals from their communities, and to elect exceptions to this rule. Thus, the convicted child sex predators, and fist-fighting thugs can't even get into most breeding or kid-oriented areas. And this decision about who is safe and who is not shall be decided only by the people of each community. And never shall fictional citizens participate in the decision making process of

the people that own homes in that place. Also, breeding communities and townships shall be free to exclude marijuana use or allow it if they wish.

79/ All convicted felons shall lose various rights such as:

- a/ The right to own or hold a firearm, and the right to carry weapons in public.

- b/ The right to engage in fist fights, except where it is clearly a matter of self-defense. Felons would therefore be wise to avoid rough and crowded areas out of fear of being sucked into a fist fight and getting another conviction.

- c/ The right to vote, as this would otherwise create a malignant constituency in our democracy. Felons shall never vote. Otherwise our democracy will have a large criminal faction that will make any political deal in exchange for reduced criminal penalties, defunding police, and non-reporting of where ex-convicts move in after being released from prison.

- d/ The right to be around unrelated children.

- e/ The right to hide their status as an ex-convict. For the rest of their days, the rights of the good and honest people of our land to know who is a criminal shall prevail by an huge margin over the right of the convict to start over. In other words, the rights of the convict to start over shall be considered trivial and completely unimportant in comparison to the right of the good honorable people of our nation to know who among them are ex-convicts and to exclude these from their communities.

80/ Everyone that is charged with a felony that is imprisoned for over 7 years shall be expected to pass the secondary school test and pass a trade school test at least 60 days before their scheduled release from lockup. If they cannot do this, then they shall be given a vasectomy, or tubal ligation (as applicable) before they can be released. This shall be an irreversible surgical procedure with at least 1/4 of the vas-deferents cut out, removed and destroyed. All convicted violent stranger rapists shall get a similar vasectomy prior to their release. All 2-time violent felons shall get a vasectomy prior to release or shipment to lifetime island interment. For they might escape.

81/ Mass serial sex predators shall always either be executed, or they shall go away for life KTPR to an old-style cell-block prison they share with violent murderers and attempted murderers.

82/ Felon ex-convicts shall get double penalties for all future felonies. Felons who have been released early from incarceration and who commit another felony during the early release period shall get 3x penalties for felonies. Indeed, the entire criminal justice system shall be sloped towards eliminating repeat offenders from society, so that few felony offenders get the opportunity to reoffend on 3 separate occasions and none get the opportunity to offend on 4 separate occasions. However, this shall not include non-felonies, and gray area crimes.

83/ Ex-convict felons shall not be allowed to any of the following and shall be sent back to prison if they are found doing any of the following:

- a/ Digging through garbage.

- b/ Selling used things.

- c/ Being in possession of cash, gold, diamonds, or fungible goods. Registered bank and debit cards shall however be

allowed.

d/ Associating with other ex-convicts.

e/ Being in possession of valuable goods for which the source of funds is not legally explainable.

f/ Attempting to leave or enter our nation illegally.

g/ Threatening people with violence, except in self-defense.

h/ Having fist-fights with others, except in self-defense.

i/ Being in possession of any sort of weapon outside of their home or workplace.

84/ All inmates in each section shall wear a large 4-digit number on their prison uniform. There shall be no tobacco use, or smoking of anything under lockup. All lockup facilities shall be under total big-brother, video/audio, AI surveillance that is always looking for smoking, inmate sex, trading and commerce, illegal telescreens, network use, and smuggled goods for referral of video to the prison guards.

85/ People who are poor, or who come from disadvantaged backgrounds shall not get special jail sentences — but neither shall the rich and advantaged.

86/ There shall be no clean slate laws where government helps criminals hide their criminal record, and all such laws, and their criminal records manipulations shall be void. This is because honest people have the absolute right to protection from convicted criminals, while the future lives of convicted criminals shall be thought completely unimportant in comparison.

87/ Every person in prison for a felony must keep their head shaved. This shall apply to both men and women. All men must keep their face shaved. All outside attire shall be prohibited for people in prison.

88/ The lights in prison and jail shall be dimmed after lights out. But they stay on 24 hours a day so that the guards may easily monitor the prisoners in their cells.

89/ Where felony prisoners kill other prisoners, or cause them to become brain dead, or they participate in a beating where this happens, there shall be a second trial, and if they are convicted, they shall be executed.

90/ Nobody sentenced to life in prison shall ever be paroled or released from incarceration unless they have been pardoned, or exonerated.

91/ When people are in jail, they shall be free to write and access serious material and publish all sorts of political and economic messages. We do this so that nobody is ever eliminated from the political landscape by being locked up. Also, people who were previously politically involved, these people shall always be allowed to have a laptop and cloud backup.

92/ No convict shall ever be required to pay any money for their incarceration or probation. No convict shall ever be required to pay money for early release. There shall be no money fees for early release or probation. Convicts may be required to pay most of their work camp money for various things as the market will bear, but convicts shall never be charged for their own incarceration or for court fees.

93/ When people get put in prison, they shall always have the right to send and receive daily monitored letters and emails to/from the outside world, and to talk about their cell number, and their cell block number in their prison, and their treatment, and politics. Also, what a convict writes about while in jail and prison, shall have no bearing on the way they are

kept in jail. They shall never be beaten, or harassed in any way for what they say, in jail.

94/ When people die under lock up, their corpses must be refrigerated for 10-days and then cremated if their corpse goes unclaimed.

95/ People in prison who rape other prisoners get sent to a solitary prison for the remainder of their sentence.

96/ There shall be no cellular, internet or other communication system coverage inside of our prisons and jails. Inmates found with communication devices in jails shall have their sentences extended by 20% per count.

97/ Convicts (in any sort of lock up) that rape or stab other inmates or guards or beat them to unconsciousness or convulsions, or near death, shall be executed.

98/ All prisoners shall have the right to spend their lockup time in solitary confinement.

99/ All initial probation shall be in special probation communities where most people are ex convicts and there is extreme monitoring and limited rights to leave. Non-convicts can enter freely, but the ex-con shall have limited rights to leave and spend time outside the probation community. The ex-convicts can work in their town. They can make money they can have bank accounts, they can live in normal life shopping at the local grocery store, or drink in the bar. However, there are no drugs, guns or any sort of weapon. The ex-convict's apartments are also regularly searched for weapons and contraband. Also these are generally located in Mexas and Niagara. Also, we shall relocate most of our nation's jails and work camps to Mexas.

100/ People who are in jail or prison or other form of lockup cannot be released due to overcrowding. It shall not be possible for anyone to order this dirty trick of Ishtar, this miscarriage of justice. Also, it shall be a felony for anyone, including Senate juries to order the early release prisoners. When prisons are overcrowded the inmates must be sent to a work camp island instead of being released, work camp, where they can share a bunk with two other people on eight hour shifts.

101/ Going forward, our nation shall have much longer penalties for violent crimes, and much shorter penalties for non-violent crimes and crimes of judicial procedures, such as resisting arrest and running from police and contempt of court.

102/ Upon release from prison, all violent felons get the first joint of their little left little finger removed surgically with anesthesia. If they are KTPR, or deported after release from prison for a violent crime, or they are sentenced to life in prison, they got two joints of the left little finger removed. This ends all confusion about deported people who come back again.

103/ When people commit particularly violent acts against other people, such as armed robbery, murder, kidnapping, arson etc., there are no second chances. The second chances come for non-violent crime.

104/ We want a gray area between total freedom and going to jail. Maybe we require a conviction to force people to use a social credit system. And maybe this is the best approach, because it forever marks a social credit system as something for criminals, and not for the general population. We don't take a step towards the institution of a social credit system,

we say that this should only be for convicts. Quite the opposite, we indelibly mark social credit systems as a thing for criminals, and probation from incarceration. We forever associate social credit systems with jail, and that's how we defend ourselves against them for the future.

105/ This constitution calls for longer prison sentences for felons and slightly better/nicer prisoner living/working conditions while in lockup. We as a society want these people removed from our society as long as possible, and the way we justify this is by making their prison experience less grueling and more about skills training and social re-education. This is how we justify life-long removal for murderers, attempted murderers, kidnappers, armed robbers and other gun criminals, extreme batterers, counterfeiters, election corrupters, Ponzi scheme perpetrators, mass victimizers, and sex criminals, including especially child sex criminals.

106/ We shall always keep in mind that the power to release people from lockup is a thing that is unbelievably valuable to those people who are locked-up people. These people and their criminal associates will frequently trade anything and say anything to obtain forgiveness and early release. This is why our pardon and exoneration juries are bigger than other juries. It is also why we flat out prohibit early release, parole, pardons, furloughs and exonerations by any single judge, tribunal, or even juries less than 17 randomly drawn Senators. Also, where the courts sentence people to prison, that sentence shall be thought of as sacred and it shall not be possible to adjust after the fact except upon clear exonerating evidence.

107/ People who work in jails and corrections shall not be allowed to have any sort of police rights. They also can't go and visit people. Police arrest people not corrections officers. It shall be a felony where corrections officers threaten to arrest people.

108/ For both Male and Female prison inmates, all the unstable or unpredictably violent shall be isolated. Also, all killers and first degree assailants shall be isolated, in fact both get solitary confinement in special, particularly bleak prisons. The ones that are particularly big or strong also get isolated in special communities, although not so bleak.

109/ The prison system may use remote control taser wrist cuffs for all convicted felons.

110/ The inmates convicted of felonies in prison only get 30-minutes of download only internet access daily. The people in island isolation or a work-camp get 6 hours of internet daily.

111/ No inmate shall be forced to eat any item of jail food. No military person shall be forced to eat any item of military food.

112/ Nobody's hair she'll be cut off unless they've been convicted of a felony. However, all felons shall have their hair cut to a #1 on the same day of each month while in prison, men and women.

113/ All Muslims and must be kept in separate prisons. Also, all police convicted of crimes shall have the right to serve their time in prisons that are dedicated only for police

114/ There shall be no pre-trial release for illegal aliens. These must remain in jail until their trial. People who are not citizens shall be thought to lack the right to be granted bail the way citizens do.

115/ There shall be special halfway-areas for ex-convicts and

people on parole and their friends and spouses to rent housing. In these areas, access is gotten through a police station and its airport style scans of what is brought in. There can also be random impromptu searches looking for unlicensed possession of Mafia drugs but not marijuana or alcohol. Also, in these primary areas, the prices (for everything made available) shall be sold at the wholesale price, and this includes both rent and groceries and other supplies, with no add-on fees for deliveries. No medical services other than the usual paramedic and ambulance for that area shall be offered. After this, there will be no question about friends and roommates having a gun. And once we have this, we have early release felons that automatically go from prison to the first and best place in the half-way system to complete the parole portion of their sentence. The probation/ early release ex-convicts that blow their opportunity with the primary half-way system get kicked into the not so nice secondary halfway system. And if they get kicked out of the secondary halfway system, they get sent back to jail to complete their sentence in a cell. Those prison inmates that get parole and fail in the halfway system must also spend an equal amount of time in the halfway system after they serve their court sentence, an amount of time that is equal to the early release discount they got on their sentence (which they failed on). So 20-year prisoners that get 3-years off for good behavior and wash out of the halfway system: These must go back to prison until the 20-year mark. Then on release, they must go into the halfway system again for 3 years in addition to the 20 they already served.

We might also start considering the halfway system as the testing phase of the constant reconditioning that prisoners receive in prison. So especially for second-offenders, we might require that prisoners graduate from the halfway system in order to earn their freedom from their imprisonment. And some will be incapable of doing this. But all released prisoner must get 40 hours of employment at the chicken processing plant or the nearby factory. Also, there shall be no gifts to people in prison and all visiting shall be virtual and recorded.

116/ Those in jail post conviction shall not be allowed to receive money in jail. There shall be no money allowed in any prison. There shall also be no prison charges for anything having to do with prisoners, including people communicating with prisoners. If prisoners get paid, they money is kept in a halfway-house, living-expenses-only, dole-out account that will only be accessible after the prisoner gets out. In work camps, we will have work, and stores and internet access, and face recognition payment systems, but society will be rid of the convict for as many years as people think is fair. Also, in both prison and work camps it shall no longer be allowed to give physical things to prisoners.

NR'43. SENATE JURIES

1/ We shall enshrine the great words of Thomas Jefferson as follows:

a/ "Nothing in the Constitution has given them [the federal judges] a right to decide for the Executive, more than to the Executive to decide for them. Both magistrates are equally independent in the sphere of action assigned to them." —

Thomas Jefferson 1804

b/ The opinion which gives to the judges the right to decide what laws are constitutional and what not, not only for themselves, in their own sphere of action, but for the Legislature and Executive also in their spheres, would make the Judiciary a despotic branch." — Thomas Jefferson (Sept. 11, 1804)

c/ "You seem to consider the judges as the ultimate arbiters of all constitutional questions; a very dangerous doctrine indeed, and one which would place us under the despotism of an oligarchy." — Thomas Jefferson

d/ "Our judges are as honest as other men, and not more so. They have, with others, the same passions for party, for power, and the privilege of their corps." — Thomas Jefferson

e/ Their power [is] the more dangerous as they are in office for life, and not responsible, as the other functionaries are, to the elective control. The constitution has erected no such single tribunal, knowing that to whatever hands confided, with the corruptions of time and party, its members would become despots. It has more wisely made all the departments co-equal and co-sovereign within themselves." — Thomas Jefferson, Sept. 28, 1820.

f/ "The germ of dissolution of our federal government is in the constitution of the federal judiciary; an irresponsible body working like gravity by night and by day, gaining a little today and a little tomorrow, and advancing its noiseless step like a thief, over the field of jurisdiction, until all shall be usurped." — Thomas Jefferson, Sept. 28, 1820.08.18

g/ "At the establishment of our constitutions [Note, there were two constitutions, one from 1781 and one from 1789], the judiciary bodies were supposed to be the most helpless and harmless members of the government. Experience, however, soon showed in what way they were to become the most dangerous; that the insufficiency of the means provided for their removal gave them a freehold [lifetime tenure] and irresponsibility in office; that their decisions, seeming to concern individual suitors only, pass silent and unheeded by the public at large; that these decisions, nevertheless, become law by precedent, sapping...[little by little], the foundations of the constitution, and working its change by construction, before any one has perceived that that invisible and helpless worm has been busily employed in consuming its substance. In truth, man is not made to be trusted for life." — Thomas Jefferson, 1823.10.31.

h/ "The new Constitution [of 1789] has secured these [individual rights] in the Executive and Legislative departments: but not in the Judiciary. It should have established trials by the people themselves, that is to say, by jury." — Thomas Jefferson, Sept. 28, 1879.

i/ The Judiciary of the United States is the subtle corps of sappers and miners constantly working underground to undermine the foundations of our confederated fabric." — Thomas Jefferson, 1820.

j/ "...the Federal Judiciary; an irresponsible body (for impeachment is scarcely a scarecrow), working like gravity by night and by day, gaining a little today and a little tomorrow, and advancing its noiseless step like a thief, over the field of jurisdiction, until all shall be usurped from the States, and the government of all be consolidated into one....when all

government ... in little as in great things, shall be drawn to Washington as the center of all power, it will render powerless the checks provided of one government on another and will become as venal and oppressive as the government from which we separated. — Thomas Jefferson, 1821.

2/ Except in matters of trifling and small claims, the nation's legal system shall not use appointees as judges or jurors. Instead it shall use confirmed Sub-Senators cycling out of Senate service.

3/ All Senate judges and jurors shall be randomly drawn from confirmed Sub-Senators on judicial duty based on the last numbers of their Nome and Centi-Nome. In both criminal and civil matters, the parties under adjudication shall have no input about the Senators serving as their jury or judge, except when they already knew a the judge/ jurors and demand for recusal

4/ All Senate jurors shall randomly draw a specialty at the start of their tour of judicial duty. Once assigned to that division of the justice system, they shall randomly draw cases just before the start of each trial. The jury of Senators conducting and overseeing the judicial draws shall themselves be randomly drawn, and shall supervise the judicial draws on no more than one day in their life.

5/ The national Judicial Sluice shall administer the national judicial system to include its own: evidence examiners, prosecutor's offices, jails, prisons, and courts. The county Judicial Sluices shall administer the county judicial systems, to include their own: evidence examiners, prosecutor's office, jails, prisons, and courts. Both judiciaries shall appoint its own non-voting corps of law librarian overseers, sworn to unbiased honesty and truthfulness, to give guidance to our courts of layman Senators and improve the accuracy of their decisions and to never vote themselves.

6/ Senate juries shall judge in the legal system and judge in matters of government administration.

7/ Even in a severe crisis, no military court shall ever judge citizens that are not in the military.

8/ No foreign born person shall ever serve on any jury, or serve as judge in our nation.

9/ Once a Senator is randomly assigned to his legal specialty, he shall sit for the prescribed number of hours of video instruction for that specialty. This shall not be so light as to produce undertrained judges, nor so heavy that it discourages Senate service. There shall be more than 50 specialties which shall include among other areas:

a/ Legal immigration applications.

b/ Illegal immigration prosecution.

c/ Customs inspection.

d/ Customs taxation.

e/ Firearm approvals and violations.

f/ Theft and robbery.

g/ Drug licenses.

h/ Assault and battery.

i/ Sexual assault and forcible sex.

j/ Trademarks and business names.

k/ Software IP.

l/ Micro-electronics IP.

m/ The people's corporate proxy management.

n/ Tax court.

o/ Property tax assessor.

p/ Recorder's office.
q/ Employment law.
r/ Military courts.
s/ Civil rights violations.
t/ Government purchases for one sluice.
u/ Patent application intake.
v/ Real estate boundaries.
w/ Monopoly regulation.
x/ Family law.
y/ Building inspection.

10/ To assure the safety of our jurors and to make the legal system invulnerable to threat of violence, the following jury rules shall be applicable:

a/ All matters of violent crime and immigration from desperate nations shall use Sub-Senate juries of 21 or more.

b/ Matters of super-violent criminals, or murderers shall use Sub-Senate juries of 49.

c/ Matters of organized criminals shall use Sub-Senate juries of 99.

d/ Matters of organized crime bosses, matters of judicial precedence or policy, matters of national media attention, and matters where any sort of jury threat is credibly alleged shall use Sub-Senate juries of 199.

e/ Matters involving information kept secret from the public shall use Sub-Senate juries of 1,001. No jury of less than 1,001 Sub-Senators shall have the power to keep any information secret.

11/ The Senate shall carefully and assiduously work over the coming decades to codify all aspects of the legal system and eliminate the need for experts from all aspects of the legal system.

12/ The names of the jurors shall be recorded, but not public. They shall only be shared with a warrant and an access code. The vote by the jurors is done in secret as to who votes how.

13/ In all longer public prosecutions, and money court trials, the trials shall be public, except where there are lurid details about the victims of sexual or violent crime, and the victim, or next of kin want these parts to be censored to protect the victim.

14/ All pre-trial jail cells shall be equipped with a prison computer terminal that people use to communicate with the court and the law library, and the internet.

15/ All court proceedings shall take place via login video. Therefore we can have many short sessions instead of visiting the courthouse each time. It is thought that having pauses in the trial will offer a number of benefits such as:

a/ A replay button.

b/ Time for more careful consideration.

c/ Being a witness is much easier.

d/ There is a broad potential audience.

e/ It helps shrink the lawyer gap.

f/ There are comment boards for serious relevant comments and statements by potential witnesses and co-accusers.

16/ All court oaths shall be sworn on video via the recorder system, and shall be valid for one teneth.

17/ We shall not require the criminal prosecutions be specific about which crime is being charged if the crimes are related or hard to distinguish. For example, when people theft, this shall include all sorts of theft, larceny and shoplifting among other theft-related crimes.

18/ All prosecutors of the old system that have released violent criminals, especially those tied to organized crime, crime gangs, powerful people, or bizarre ideologies shall be investigated for corruption by the new system and under the new system. Lawyers, prosecutors, and judges under the old system shall not be allowed to hire other lawyers to represent them.

19/ The following over-majorities shall be required from all Senate juries with regard to criminal charges:

a/ To arrest or charge a person with a crime: 58% overmajority.

b/ To convict a person of a crime: 70% overmajority.

c/ To release on bail 50.1% overmajority.

20/ In money court, the required concurrence of jurors to reach a verdict shall be 2/3 or 66.66%.

21/ A randomly selected court sequencing administrator shall attend and maintain order at all Senate jury trials, subject to the rulings of the jury they attempt to advise and streamline. In other words, the trail administrator is totally underneath the group decision of the juries they streamline. Also, the county recorder system's law librarian service shall be available to all Senate juries for questions. These librarians shall have the main role of being an expert in some area of the law.

22/ Law librarians don't actually answer questions. But instead they point out sections of legal code and official Senate interpretations relevant to questions and cases. In fact, law librarians shall be fired for doing anything but finding official Senate legal materials. Also, the Senate legal materials that a Senator juror finds shall never be thought inferior in any way inferior to the legal materials brought up by the law librarians. Also, the Senate shall strive to create an open law librarian system where librarians work to offer up relevant sections in many cases.

23/ No individual judge, or jury of two people shall have any power to jail a person, or levy a fine of over 2 week's wages.

24/ No party but the Senate jury itself shall decide on what information is relevant to a case and what evidence may be admitted to the trail, or what information is to be decided on. No sequencing administrator, law librarian, or any other person shall ever have any power over any Senate jurors or Senate jury. There shall also be no presiding judges to steer the herd of Senators in a Senate jury.

25/ Juries shall not simply judge the accused in the face of the law, but they shall also judge the justice of the law that the accused is being charged with violating in the light of the particular circumstances of the case being tried. In other words, if the jury doesn't like the

26/ Trial juries must never come from the perpetrator's area. If we allow this, then we get criminals moving to ghettos where their neighbors will always vote to acquit. Also if we use the victim's neighborhood we still might get corruption. Better we use third party neighborhoods.

27/ In order to prevent the situation where we have pockets of extreme criminal enforcement liberalism judging crime, all of the Senators, participating in the prosecution and trial of crimes shall be randomly drawn from the each entire county.

28/ Female senators shall not be allowed to work in juries that manage the military, militia, or large numbers of police working in concert.

29/ It shall be noted that open public trials are not for either

the accused or the accuser, but for keeping the judiciary honest and credible.

30/ All of the judges, prosecutors and police of the old system shall be thoroughly data-mined and judged to see whether they are honest or not.

NR'44. LEGAL PRECEDENCE & STANDARDIZATION

1/ This Constitution shall be the primary law of the land and above all other laws in the land. All laws made by the Senate shall be secondary law that are wholly below this Constitution. All interpretations and rulings made by the courts shall be tertiary laws that are wholly below both this Constitution and the laws of the Senate. All regulations made by non-elected government officials and non-elected government bodies shall be quaternary laws that are wholly below this Constitution, then the laws of the Senate, and then the interpretations of the courts.

2/ No judge or jury shall be thought legally competent to judge any society-wide matter.

3/ Judges, and juries being inferior to legislatures in every way, no court shall ever be held competent to judge the constitutionality or legality of anything a legislature does.

4/ The national Over-Senates shall be the sole judge of constitutionality in our nation. No other Senate or governmental body, or even the UM shall have any power over the national Over-Senate, or the national government.

5/ Plebiscites being so vulnerable to corruption by the openly corrupt media, all plebiscites shall be regarded as a corrupt way of making decisions. No plebiscite shall be considered above a sophoscite conducted by the wise-men of our nation's duly elected Sub-Senate. Also, no sophoscite of the Sub-Senate shall be above a sophoscite of our nation's wise-man Main-Senate. And no sophoscite of the Main-Senate shall be above a sophoscite of our nation's wise-man Over-Senate, the wisest of the wisest of the wisest.

6/ Only the Senate shall have the power to make laws. Only the Senate shall have the power to write, define and clarify laws for the court system. Judges and Senate Juries shall have the power to make reasonable and logical interpretations of the law for their own case, but not for any other court unless their case has been gazetted as an example by the Senate.

7/ The Senate shall try to create a new body of laws that will guide our Senator-judges in the rapid adjudication of all commonly repeated matters.

8/ The Senate shall clearly state its intent when writing laws so that in the future, our laws will stay true to their original intent. The Senate shall also clearly define enforcement perimeters and variable penalty levels if any.

9/ The laws and proceedings of our nation shall be made for men of ordinary understanding, and should therefore be construed by the ordinary rules of common language and common sense. The legal code of our nation must be presented in ordinary words where practical, and avoid using special experts-only legal terms where practical, as fancy legal terms drive the system towards the expert lawyers that plagued the old system. All laws and all legal pleadings should be required to use widely understood current language and phraseology wherever practical. Where special

legal words are used in an electronic medium, they shall be defined by link. Wherever practical society and especially government services shall use intuitive terms like "Prisoner Release" instead of hidden occult terms like "Habeas Corpus".

10/ We shall ponder the words of Samuel Adams: "How strangely will the tools of a tyrant pervert the plain meaning of Words."

11/ The Senate shall leave the courts as little leeway as practical in the interpretation of the law. No legal precedent shall be established by any judge's actions, or any jury's action without Over-Senate gazetting of the trial and verdict. For the purposes of legal precedents and gazetting of money court lawsuits, all legal commentary shall list all considerations of judgements as primary, secondary, tertiary and incidental.

12/ The proper indexing and summary of legal precedents and their removal as they are transformed into code and code examples, shall be considered of great importance to the proper functioning of our first-person legal system. This is because intellectual overhead is the primary driver for the expensive experts of the old second-person legal system.

13/ In the criminal courts, the justice system shall be primarily about punishing and deterring extremely violent crimes. The money court system shall be about deciding on as many cases as possible as quickly as possible, as cheaply as possible, and with a reasonable absence of bias.

14/ We shall aim to minimize intellectual overhead for the people in regard to their legal system. Therefore, wherever practical, the Senate shall establish a single, well-organized, consistent, and easy to figure-out legal code for the entire nation. If we're going to have a workable legal system that minimizes the corruption of expensive expert lawyers, we must have an easy to understand and use legal system.

15/ We shall have 3 exceptions where our standardized legal system may vary:

a/ We may temporarily experiment with the legal system in a few counties, to test new policies.

b/ We may have standardized variations. For example our city centers might follow one set of laws, and our exurban and rural areas might follow another set of laws. We may also have different building codes for northern Idaho than southern Texas.

c/ We may have special zones, where special rules are needed. For example: Mexas, Niagara, Nova Scotia, Vizcaino, and the big island of Hawaii. In these places we will have different laws for immigration and in some places different environmental regulations and standards. We shall also have certain other zones (such as at the centers of our townships) where no emissions, or fires, or candles, or cigarettes shall be allowed. We will also have other remote zones where the emissions standards will be greatly reduced. However, except for good reason, the legal system shall be the same nationwide, including all counties. No county shall be free to have its own idiosyncratic laws, or enforcement of criminal procedure laws except where new laws are being tried out and tested.

16/ We shall have nationwide practices and definitions in our legal system. Theft, disturbing the peace, assault, resisting arrest, failure to comply, shoplifting, soliciting, prostitution,

littering, dumping, vagrancy, educator misconduct, police conduct, building code, environmental crimes, and all other crimes shall be defined at the national level. Then, the procedures of the court system shall be identical nationwide and shall be defined by the national Senate. Also, the procedures of both the county court and national court shall be identical, unlike the situation fostered by lawyers under the old system.

17/ Our criminal punishments shall be harshest to mildest:

a/ Crimes against society and its democracy.

b/ Crimes that harm a great many.

c/ Crimes against groups.

d/ Crimes against individuals.

18/ All degreed crimes shall be ranked with the most severe versions of that crime being indicated by the first degree. No class of crime shall be ranked backwards from this system. First degree crimes shall always be the worst, as with first degree murder.

19/ The national Senate shall compile detailed rules for all crimes in their various degrees and with various punishments. Having various degrees and punishments shall be thought an easy way to increase the perceptual resolution of our legal system.

20/ There is a well worn path for most aspects of humanity, including legal standards. There are only some hundreds of conditions that comprise 95% of everything that is done by the legal system. There may be some minor complexities and minor conditions, but even these should be standardized, and there should be standard rules of conduct, so that we can mostly eliminate the court system from adjudicating most matters that are currently brought before it. We will never get this from the lawyers, because they want to keep the system individualistic and requiring many lawyers, many overpaid lawyers for reinventing the same thing over and over again. So instead of this, what we want the Senate to do is standardize and automate the legal process.

NR'45. JUSTICE WITHOUT INCENTIVES

1/ No testimony given for reward or payment shall be admissible in court. This shall include fees, expert witness fees, commissions, incentives, suspended sentences, shorter sentences, favorable jail treatment, and expert witness fees.

2/ Nobody shall make any gifts whatsoever to police or criminal justice people other than water, coffee and ordinary tea consumed on site. There shall be no charities for police or criminal justice people, except those that die or are disabled in service, and all police shall be prohibited from having anything to do with collecting money for these purposes. Also, these fallen police charities shall not give away stickers or have any public index of their benefactors.

3/ There shall be no commissions, incentives, quotas, or performance-based pay, stated or implied for any officer, any police department, or any part of the judicial system. Where any of these can be proven to exist, they shall disqualify the charges in the same way that illegal searches disqualify evidence found during that illegal search. Also police officers working under any of these schemes shall not have any qualified immunity rights.

4/ Nobody and certainly no accuser shall ever receive a share

of any property confiscations. The only exceptions to the foregoing shall be rewards paid for information leading to the arrest of illegal aliens.

5/ The Senate shall not allow any situation where police departments or police officers are getting more money by arresting more people, or charging more people with crimes. The amount of money each police department and each officer gets should have nothing to do with the number of tickets they issue, the number of arrests they make, the number of people charged, or the number of people convicted. Rewards of this sort are not the way of a free nation. The injustice created by such systems shall be thought to far exceed the benefit of catching more criminals. Also, there shall be no trophies, medals, awards, payments, increased pay, departmental promotions, or increased overtime for making a large number of citations, arrests, convictions, or causing a given number of people to be charged by the Senate.

6/ Police departments shall be prohibited from giving officers rewards or recognition for the number of people they arrest, and this sort of practice shall be considered corrupt. The greater risk to society is not lazy officers, but hyperactive officers that seek to punish the innocent, or the marginally guilty with severe penalties. Here we must apply Blackstone's ratio that: "It is better that ten guilty persons escape than... one innocent suffer."

7/ Even for the worst violent crime, Government shall not have incentives for police and government agents to bust people. This is not the way of a free society. This is the way of a police state operating deeply within our government.

8/ All forms of incentives for police officers to make more arrests shall be constitutionally prohibited. The following practices shall all be constitutionally prohibited, and the Senate may expand this list later:

a/ More overtime work and overtime pay.

b/ More preferred shifts.

c/ More preferred assignments.

d/ Promotions.

e/ Higher pay.

f/ Bonus money.

g/ Take home police cars.

h/ Award ceremonies.

i/ Opportunities to steal.

j/ More department funding for more arrests.

k/ Making more money to either the police department or to individual officers depending on how many arrests, or convictions, or stops, or id verifications, or any other sort of official business they do.

l/ Competitions among officers to see who can arrest more people for various crimes, or find more contraband, even if there is no financial reward. All these systems shall be thought of as engendering corruption.

9/ it shall not be allowed for judges to change trials from criminal court to money court.

10/ It shall be a felony conflict of interest when anyone involved in the adjudication system acts in any role in any trust that comes into their courtroom This shall include: judges, jurors, courts, court clerks and prosecutors.

11/ It shall be a felony conflict of interest when anyone involved in the adjudication system, (or the system itself on

their watch) receives any money or profit from anyone either involved with a trial, or any third party.

12/ The easy to confuse term “trust” shall no longer be used. From now on the term shall be replaced with the new term “entity trust”. Also, no trust or entity trusts shall live for more than 45 years. Then after 45 years all the assets shall be nationalized. This constitution does not allow any sort of fictional citizen to live for longer than the average productive life of a person.

13/ Except in small claims court, there shall be no unelected judges. Except in small claims court only people elected once in their life and confirmed to the Senate shall sit in judgement or sit on a jury.

14/ All police department buildings, and vehicles shall be owned and operated by the county they are located in, and none of the money for the police building upkeep and operations shall be given to police departments. After this, at least 80% of the money in the police budget should go to police officer salaries.

15/ There shall be a national ratios for police staffing and police department funding based on community population, wealth and crime rate. The national Senate shall establish these ratios as a range.

16/ There shall be no police or judicial system unions, and those involved in the criminal justice system shall not be allowed to lobby government for policies regarding police, the criminal justice system, or the incarceration system.

17/ It shall be a crime to attempt to install government policies that incentivize activity by police, or the justice system, or any branch of government, or the medical system or education system, or the election system. This sort of activity shall be the exclusive domain of the Senate.

18/ It shall be thought that good cops are cops more for their sense of justice and duty than for the money.

19/ The Primary job of police shall be to stop violent crime against citizens. The secondary role of police is to defuse situations that may lead to violent crime, and also thirdly, to stop property crime stop property crime, the quaternary role of police should be to preserve the peace. Different rules of police conduct may shall apply in these four categories.

20/ Police officer overtime assignments shall not be used as a reward system for police officers, or other government workers. Except in emergencies, no police officer shall ever increase their regular pay more than 25% due to overtime, no matter how many hours they work.

21/ No police officer, and no government employee shall ever be paid money unless they are actually working. It shall be considered felony fraud to collect money from government for staying home or for not working.

22/ The purpose of government fines shall be to deter and punish acts, rather than to incentivize and nourish the enforcement administration. Therefore, no less than 90% of all government fines at all levels and departments of government shall accrue to the general fund of the national government. Where the fine exceeds a tenth of a year's wages, the percentage shall be 95%. Where the fine exceeds a year's wages, the percentage shall be 99%. If there ever is the situation where bail money, or forfeiture money is collected by police or the justice system, 100% of this money, shall accrue to the national government.

23/ Except for victim property that is recovered and returned to its rightful owner, all police seizures, confiscations and fines shall entirely accrue to the national government's general fund and none shall accrue to the county government, or to police.

24/ All assets seized by police shall be held and disposed of or returned by the county recorder system with County Senate with police watching. It shall be considered corruption when a police department keeps, sells, gives away, or destroys any assets they confiscate. Furthermore, there should be no civil asset forfeiture without a criminal conviction (under due process, and not an abbreviated process) for a crime. No level of police or government officials shall have the right to take title to seized property, this includes all police, and all divisions of government. The only place that this property may be kept by the recorder system, and temporarily kept.

25/ The proceeds from seized criminal assets shall not be used for restitution to the victims of other crimes. If restitution is made, it shall be by a completely separate Senate budget item.

26/ All money court plaintiffs (whether represented by others or not) shall have an official plaitiveness rating in consideration of how many cases they have been involved with, divided by how much business they have done overall. This shall be listed as both problems per transaction, and and problems per money unit. All settlement/judgement amounts shall also be listed. This way, everyone (including especially all customers and the courts) can look at the court records and know what sort of person or business they are dealing with. It is thought that this information will both greatly increase judicial accuracy and slash the number of cases that make it to court.

27/ In all court proceedings, nobody shall talk or make noises of support or objection. There must be absolute silence among people observing all sorts of legal matters unless they are called by the court to speak. Court audience members that make any sound at all may be ejected from the trial and the courtroom. When audience members address the court they must use the texting system and wait to be called on, or ignored by those sitting in judgement. There shall be no court or legislative claquers. Clacking should be seen as conspiratorial, and an act of contempt for the court. All judges and chief jurors shall have a knob controlled white noise system that can be turned on when the audience is noisy.

28/ It shall be a felony when judges, juries and prosecutors to take the law in a completely new uncharted direction for personal reasons. This especially when they use or conspire to use the justice system to indict, bankrupt, convict, jail or eliminate political opponents.

29/ Nobody in government shall ever be paid more or less based on how many people they charged with crimes.

30/ Only Senate juries shall have jurisdiction on child removals and domestic violence matters.

31/ When the courts sentence people to a time in incarceration, this shall be regarded as sacred. Where people (and groups of people) are responsible for the early release of convicts from incarceration (legally or illegally) beyond the standard early release percentages for good behavior, and these early release criminals then go on to commit crimes

during the time that they should be locked up, the people responsible for the early release shall be held to be co-responsible for the crimes of the people they caused to be released early. This may apply to great numbers of people who conspire to do this, including Senators.

32/ The Senate shall conduct regular spot inspections of inmates, particularly Mafia leaders, right convicts, and other influential people. This is to make sure that they are indeed where they are supposed to be, and that they are living under the normal conditions of inmates in that location.

33/ Whenever government has new rules, it must give the people sufficient advance notice, so they have time to change their behavior and practices. Government policy must also phased in at first so giant nationwide mistakes don't happen so often.

34/ There shall be no more plea bargaining in our court system. Plea bargaining shall be regarded as a thing of a broken system.

35/ There shall be no more money for emotional stress in our money court judgement amounts.

36/ All child and spousal support monies shall be paid to the recorder system which shall disburse 100% of the money from the supportive parent to the other parent and no commissions or charges shall ever be taken by Government. Government shall be prohibited from charging any sort of fee or commission on disbursing family law money. Family court shall not get any money from either parent or the government based on how much money is paid out. Also the judgements about money and assets shall be prepared by the recorder system with Senate juries looking the reports over and judging (or spot judging for minor amounts) the results as fair or not.

37/ There shall be no government matching monies for any part of the justice system, including especially family court and CPS. It shall be considered child trafficking when anyone in CPS or family court to take money for taking children away, or awarding this judgement or another, even if the money is department budget money from the government.

38/ The opinions of so-called expert Psychologists and psychiatrists shall no longer be allowed as evidence in the judicial system.

39/ No person locked up shall be charged anything for either their time spent in jail or their probation, or their appeals, or for their or their court ordered drug rehabilitation.

40/ The lawyers and former lawyers that have become judges have created a legal system that is biased towards having long cumbersome procedures that only favors lawyers at the expense of everyone else. The new system shall aim to shorten our money court procedures by a factor of 8.

NR'46. MONEY (CIVIL) COURT TRIALS

1/ All disagreeing parties should explain in writing what it is they disagree about if their side is to have legal credibility in any disharmony. This should hold true for our personal, spousal, and business relationships, as well as for our courts. And this should hold especially true for our Senate factions, and international relations. We do this because it is what fair minded people do. They shine the light clear of written-out explanations for all disharmony. Also, where long-term

disharmony is not adequately explained under the light of a written explanation, we shall in general presume that the mute, unclear, or illogical side is untrue and unjust. Here we recall the unclear words of James Wilson from the Federalist Papers about why his Hamilton/Madison Federalists were campaigning to exclude the Bill of Rights from the 1789 US Constitution.

2/ Government shall aim to begin all adjudications within the time periods called-for unless the defendant seeks a reasonable delay.

3/ The plaintiff in all civil suits shall pay a filing fee of 3% of the damages requested, plus two day's wages. This is so it costs a little bit to bring cases in the money court system. Otherwise the system proliferates costly people who shake the tree to see what falls out. So we must have a cost of using the court system. Otherwise poor judgement-proof people will cry all the time to see if they can get something. The Senate may raise and lower this initial fee level so as to fine-tune the system. When money court lawsuits ask for specific performance under a contract, the court shall assign an amount for court fees in relation to the value of the thing sought and the time the court system used in resolution of the dispute.

4/ When judgement is in favor of the plaintiff, the defendant shall pay between 1.5 and 3 times the amount in dispute depending on how wrong the defendant was judged. This difference shall be collected by the court system and given to the national government's general fund.

5/ Legal fees in class action lawsuits shall not exceed 5% of the amount received. Legal fees in any sort of legal proceedings shall not exceed 10% of the amount received. Lawyers shall never be allowed to receive any share/cut of of any punitive damages money. When civil suits are judged to be malicious or vexatious, the plaintiff may be compelled to pay additional money to the defendant.

6/ All statements made to all adjudication venues must be sworn under oath and penalty of perjury or they shall not be valid. The crime of lying under oath shall apply in all adjudication venues and in all cases including non-government adjudication venues.

7/ Government shall keep a permanent record of everyone's civil court and non-government adjudication case history. This record shall be open, and on the internet for all to see. It shall always be admissible in all cases.

8/ No default judgement shall ever be used as a consideration in deciding another case.

9/ All judgement/settlement amounts must be paid directly to the principal and it shall be considered fraud if a legal surrogate or lawyer receives any court monies or settlement monies on behalf of his clients.

10/ Money court judgements paid over time cannot be transferred or assigned to other parties, or used as collateral for a loan.

11/ It shall be a felony when anyone working in the legal industry receives money or benefits that are not reported to the government payment system. This shall include lawyers, surrogates, judges, jurors, clerks, and everyone working in and around the court system. There shall be rewards for people who can provide evidence including video evidence of these receiving valuables or favors.

12/ In general, lawyers and legal surrogates will need to collect money in advance, because they will have no legal right to collect on bills.

13/ The money court adjudication system shall not shall not be allowed to become part of anyone's business or profit model. The Senate shall set reasonable limits on the number of cases a person or business may bring over a period of time.

14/ It shall be a crime when parties in non-criminal cases dig into their opponent's private life in an effort to find dirt on them. The Senate shall create detailed rules on the limits of this sort of judicial stalking.

15/ All money court trials shall be staffed with juries as follows, based on the amount in dispute. The Senator jurors shall set trial length, but it shall not be longer than the maximum listed herein under. Where the value in controversy is between:

a/ Zero and 1 year's wages, the trial shall be by a single non-elected judge, a full citizen born in our nation age 40 to 60.

The maximum trial length shall be 2-hours.

b/ 1 and 5 year's wages, the trial shall be by three non-elected judges, all full citizens born in our nation age 40 to 60, for up to 8 hours.

c/ 5 and 50 year's wages, the trial shall be by 3 Sub-Senate jurors for up to 15 hours.

d/ 50 and 500 year's wages, the trial shall be by 11 Sub-Senator jurors for up to 40 hours.

e/ 500 and 5,000 year's wages, the trial shall be by 43 Sub-Senator judges for up to 100 hours.

f/ 5,000 and 50,000 year's wages, the trial shall be by 199 Sub-Senator judges for up to 200 hours. If a product is alleged to make a small number of people more likely to suffer a medical condition, it shall be tried in this way.

g/ 50,000 year's wages and infinity, the trial shall be by 999 Sub-Senators for up to 200 hours. If a product is alleged to make a large number of people more likely to suffer a medical condition, it shall be tried in this way. If a trial is for an entire class of activity or class of product, it shall be tried in this way in order to advise the relevant sluice of the Main-Senate on how to vote.

16/ The money court system shall be considered an inferior system of enforcement of public policy because it is both more costly and more time consuming. It is far better if we can streamline and automate our enforcement activities under the hired legal administrators. Wherever similar conditions are encountered repeatedly, Government shall attempt to remove as many enforcement duties as possible from the money (civil) court system and use streamlined procedures and legal administrators instead.

The Senate shall establish new reasonable rules about what can and cannot be the subject of a money court action. The Senate shall also establish new standard penalty rules for the various situations that repeatedly occur.

17/ We want it to be a bit costly to bring cases in the money court system, and most people should mostly lose money in the court system for keeping cases alive. Otherwise the system proliferates cases of people who shake the tree to see what falls out. So we must have a consequence of trying, otherwise the kids cry all the time to see what they can extort from their parents.

18/ There shall be a statute of limitations in money court, and no damages shall ever be awarded for events that were either discovered more than 4-years in the past, or that took place more than 14-years in the past, no matter how heinous, harmful, carcinogenic, or deleterious for the environment. Either timeline shall disqualify. The only exceptions to this rule are:

a/ Tobacco and other addictive drug enterprises.

b/ Therapeutic drug enterprises.

c/ Child molestation by priests, teachers, doctors, and other people in a position of trust.

d/ Genital mutilation.

e/ Government corruption.

f/ Crimes committed by illegal aliens.

19/ There shall be no statute of limitations for severely violent crime, or when new technology reveals the identity of a class of perpetrators. The national Senate shall be free to impose shorter and longer statutes of limitations for various specific matters.

20/ In Roman times, Ishtar frequently acquired Roman slaves as a result of bankruptcy. There were also the constant wars such as the one Julius Caesar writes about in Conquest of Gaul, where a million French were killed and a million enslaved. The benevolent Romans were very kind and typically spared women and children. Thus their legionary generals would be able to sell these women and children to slavers which just happened to always be working for Ishtar. This is just one war of an endless stream of wars that Rome's foreign legions fought. Everyone wanted to be free of the crushing taxes of the Roman Empire that constantly drove the poorest people down the drain and into bankruptcy and slavery. But they also didn't want to have the Roman legions burn their village because they were provoked by the interests of Arab slave traders. This image is intended to show everyone the wrong direction to go in with regard to poverty or down the tubes poverty (pro-verti) or bankruptcy.

21/ Total abusive bankruptcy should never be regarded as a punishment for real humans. Bankruptcy should always be regarded as compensatory thing, and not a punitive thing. If we want to punish people by making them penniless, or by de-platforming them from the financial system, we can do this, but it should be reserved for the most extreme financial misconduct, and for money court liability situations where the money is missing. Also, it should be noted that we are creating a role for financial deep platforming with the most extreme cases, and this is supposed to prevent any sort of financial deep platforming, from creeping into becoming a tool of an elected bureaucrats, or even the Senate.

22/ Ishtar certainly wants bankruptcy regarded as a punishment. Ishtar feeds on the strife and desperation of people completely wiped out in bankruptcies. After all, it is Ishtar that Fostered the situation in ancient Rome, where people mortgage their freedom to money lenders. We don't do that. That is the agenda of the eternal slave master. We don't go that way. We instead must go in the opposite direction. And this is why we are so generous with the property that is out of reach of the money court system, and out of reach for Government fines. In all sorts of bankruptcies, and other government proceedings the people shall have the right to keep a reasonably sized house, that is outside of the

jurisdiction of the money court system, and the government seizure system. They shall also have the right to keep a couple years of cash in a currency account and other property as explained elsewhere herein. These basic assets should not be within reach of the money court system and Government's penalty system.

23/ Nobody shall ever be made homeless as a result of a court judgement. However mansions and other especially valuable housing may be taken and average housing given in its place, but vaguely normal housing shall never be taken on account of money court damages.

24/ Criminal court shall err a bit on the side of thoroughness, however, money court shall err on the side of brevity. This especially with small amounts in money court. Also, with very small amounts, plaintiffs might only have 2 or 5 minutes to present their case.

25/ Money court for amounts less than 90-day's wages shall be required to be by telepresence.

26/ We will make all plaintiffs swear that their prosecution is not completely baseless and primarily a means of harassing the defendant. Then after this, it will be considered perjury if they bring a baseless prosecution against someone. This should include all cases that will obviously fail — such as the recent impeachment proceedings in the US.

27/ Where plaintiffs in money court lose their first case, or their case is thrown out, or ends in a mistrial, they shall not have the right to bring another cases for a similar thing by any means direct or indirect.

28/ When the parties in a money court case live in different areas, the court of jurisdiction shall be a randomly chosen third location. This costs nothing on net, and makes the system more fair.

29/ To reduced legal system fraud, we shall make it a felony to settle a legal claim without making a declaration to the court. This way, the fraudsters will be more rapidly caught in the data. Also either side may charge the other for making and undeclared settlement.

30/ Criminal convictions shall not be used as evidence in money court as this incentivizes people to accuse the rich of crimes so they may later, in the second stage sue them for profit.

31/ It shall be a crime to investigate people on behalf of others without registering the investigation with the county recorder system in advance. The Senate may require that findings and recordings be shared with the county recorder system and the subject.

32/ When people own their home or apartment or other valuable real estate, and they are being sued in money court, it shall not be allowed for the court to prohibit access to financial accounts.

33/ Where a money court case is considered to be a test of important matters such as constitutionality or civil rights, and the case is settled before going to trial, the Senate may elect to continue on as a successor to the parties in order to test the important matters under consideration.

34/ In all money court proceedings, if a either side makes a settlement offer, and the other party does not get at least 1/4 more than that amount in the final judgement, then that side must pay all legal fees.

35/ Those wrongfully convicted by Government shall have no

right to sue Government in money court for damages or reparations. However Government shall pay them the average wage for each day they were wrongfully incarcerated.

36/ It shall be a felony to participate in any secret negotiated legal settlements to any court case, or state any quantity for any negotiations without notifying the county recorder system. This shall apply to principals, lawyers and any other intermediaries or legal system helpers. This shall also apply to all fictional citizen managers.

37/ People paying money for ransom or blackmail of a personal or business nature, including everyone either collecting or paying money for ransom or blackmail may be charged with a felony. Those who help or provide security on either side may also be charged.

38/ Those who kill people who are knowing conspirators in a ransom or blackmail scheme can be considered community self-defenders when they can show multiple pieces of hard forensic evidence of ransom or blackmail justifying their need to take emergency action.

38/ Senate juries shall be free to ignore non-standard contract clauses that are hard to interpret, or that are tricky for the other side, or impossible to comply with, or that are ridiculously under-estimated in terms of cost, or when the price of some required good has changed substantially. However, the legal system shall be prohibited from ignoring or setting aside any of the county recorder system's standard agreement clauses, or stipulations that are commonly enforced in our nation. This shall especially include all matters of marriage, child support and pre-nuptial agreements. Also, only the county recorder system may reasonably interpret pre-nuptial agreement clauses, and this must be in the same way for everyone.

39/ All money court judgements shall be by the Sub-Senators on jury duty with the county recorder system. There shall be at least 8 different money court divisions:

a/ Contract court.

b/ Personal injury court.

c/ Unlawful detainer court.

d/ Real estate court.

e/ Family court.

f/ Inheritance court.

g/ Police complaint court.

h/ Recorder/perjury court.

40/ Where pets are injured, or harmed, this shall not be a subject for money court. However, where farm animals are harmed and these are worth over a weeks pay, the courts may be used. There shall be no confiscation or culling of livestock by government without a 2/3 vote by the entire healthcare sluice. Also, where government culls livestock, it must give fair compensation to farmers.

41/ Where the courts order Government or fictional citizens to pay money, they shall be required to pay the money within 7 days to the county recorder for escrow purposes. If there is no possibility of an appeal, or the 30-day appeal filing deadline has ended, this money shall be paid out immediately. Also, where fictional citizens delay in paying their debts, or engage in lawsuits that they eventually loose, they shall be required to pay interest of the rate of 2.5% per teneth up to a tripling of the amount they owe.

42/ Alcoholics, drug addicts, unlicensed prostitutes, those who request rough or violent treatment, or bondage, and certain others shall generally not have the right to use the legal system for minor bruising sustained during their life adventures.

43/ The court application process works thus:

a/ All complainants/plaintiffs must go to a paralegal to properly format their complaint and to make the most basic logic and evidence checks based on the sworn statements of the complainant. This sort of paralegal is not allowed to further process the complaint. However, they may be a witnesses.

b/ Each plaintiff must personally file all court filings before the county recorder system. They must also personally avow their filing under video and by signature of the written version. This includes the video statements of what happened and why the legal system is requested to intervene.

c/ Plaintiffs must get the help of a hired paralegal to prepare their documents, even in the smallest claims court. Paralegal training shall be a high school and junior college program and paralegal fees should never be more than 3 times the average wage per hour nationwide. Also, no paralegal fee in a matter for less than 20-year's wages shall ever exceed 20-day's average wages.

d/ Once filed, it shall not be possible to change a filing. Cases can however be withdrawn and re-submitted, but all fees shall be kept by the courts and the new filing shall include all the old filing information as evidence.

e/ We require the use of paralegals, because it greatly streamlines the process of judgment to have all the evidence prepared in a standard format. Also, paralegals will keep many ridiculous cases out of the system, because the cases as presented do not comply with the standards of filing a case.

f/ Our filing paralegals will be highly specialized in our medium and large cities. For example, some will only deal with mechanics liens, some only with residential evictions, some with child custody, and some with land boundary disputes.

g/ Paralegals shall not be allowed to coach people about what to say.

h/ After the client reviews and approves the paralegal's final request for judgement, the paralegal shall highlight text and video time sections that are key to the cases strength or weakness of the case. Then the paralegal shall send the case to the county recorder system for recording, evaluation by the court, and possible trial by the court.

i/ Before the court allows for the intake of a case, it shall anonymize the case for paralegal review to 2 to 20 random case intake paralegals from another county (depending on the size and merit of the case).

44/ The Senate shall experiment with the legal process and various schemes for rewarding the most observant paralegals that notice the most in each case. These should get ~90% of the money that is paid for this review. The weaker reviewers should only get around 10% of the money. These paralegals also rate cases as either:

a/ Totally open and shut. Looser pays all fees 10x and suffers stigma for wasting the court's time.

b/ Mostly open and shut. Looser pays all fees 3x and suffers

a small amount of stigma for wasting the court's time.

c/ A bit open and shut. Looser pays all fees.

45/ It is an important part of our anti-lawyer, anti-Ishtarian and Isocratic legal system, that we require all plaintiffs to appear in court (either in person or virtually) to file their case, and to argue their case. This requiring people to appear in court shall be thought an extremely egalitarian aspect of our system, one that prevents Rockefeller, Vanderbilt, and Gates types from rising to lord over the people.

46/ Once a paralegal has filed and reviewed a case, the Senate-staffed laymen's court system will conduct a hearing to decide if the case has sufficient merit. Here at this stage, many cases will be cancelled for insufficient merit. However, if there is merit, then the case shall be heard/read by a different randomly assigned judge/jury of Sub-Senators.

47/ The new legal system will be more government conducted inquest than lawyer driven court room. This shall be thought important to having a laymen's court, a court where people are only represented by others when they are obviously incapable of representing themselves.

48/ To empower the ordinary citizen in our courts, we shall not have any expert judges. Far better, we use laymen Senators to make our decisions, with specialist "court procedurists" making suggestions for keeping the procedure on track. There are also specialist law librarians (and a librarian system query) in matters of specialist legal code. For the proper and correct empowerment of laymen Senate juries, it should be thought, essential that we not have an expert, a judge, deciding on matters of procedure. Otherwise our Senate juries will then tend to defer to the expert. Far better, we use mere procedurists and librarians that only point to sections of code that they think are relevant. Also, the Senate will probably be constantly limiting the power of the court procedurists with regard to what they can talk about. And to be perfectly clear, the court procedurists shall have no power to do or order anything in the courts. All they can do is object in their end-of-trial report.

49/ Unelected Government officials shall not be allowed to initiate money court actions against the people without a Senate jury's permission.

50/ Religions, schools, labor unions, and sports teams shall not be allowed to use the money court system as plaintiffs, except for people pretending to be them.

51/ Only cohabiting children, spouses, and parents shall be allowed to sue for wrongful death in money court.

52/ The money court system shall not be used by any of the following

a/ Religions against their followers.

b/ Schools against their students, and researchers.

c/ Labor unions against employers or their members.

d/ Sports teams against anyone.

e/ Children against their parents.

f/ Violent criminals against their victims, even for excessive force in self defense.

g/ Violent criminals against bystanders that intervene to stop their violent crime(s). So in situations where a criminal has a gun or a knife and a bystander or a victim shoots the criminal, and turns the criminal into a totally paralyzed quadriplegic, both the bystander and the victim can never be sued by the criminal.

53/ Government shall never have any financial liability for violence between the people on the streets, in transit, in people's homes and workplaces, in incarceration facilities, or anywhere else. Also government shall have no liability when police or the fire department, or EMS fail to act. Also, the money court system shall hear no cases against government for these matters.

54/ The money court system shall not hear cases by foreigners (or their agents or proxies) against out government except those only suing for specific performance.

55/ The money court system shall not hear any cases against the healthcare system, including especially EMS and emergency care facilities. Generally, the money court system shall not be thought to be applicable to professional services.

56/ The statute of limitations shall always be shorter for money court than criminal court. If a case is not possible due to the statute of limitations in criminal court, then it shall not be allowed in money court either.

57/ Violent criminals, their relatives, and their estates shall have no right to sue people acting in self defense against a criminal act. If a man is exempt from criminal prosecution because he was acting in self-defense, or community self-defense then, it shall not be possible to seek damages from him in money court for those same acts. This right absolutely extends to police and police forces who only injure those they could have legally shot dead in self-defense, or community self-defense, or police self-defense.

58/ The way the money court system rewards the injured and disabled more than the dead shall be thought to create a number of problems for society, like:

a/ There would be no more police unloading whole clips on people assuring their death instead of their survival and disability.

b/ There would be no more suicide by police.

59/ As little as possible, the money court system shall not reward the poor for getting into conflicts with either rich people or police. The money court system is not supposed to amplify whatever racial conflicts we already have. It is not supposed to create incentives for "minority" people to be obnoxious so they might get a big money-court payoff one day.

60/ Ex convicts, homeless people, people getting government assistance as adults, and illegal aliens shall generally have no standing in money court and no ability to obtain punitive damages, except as part of a nationwide or "class-action" lawsuit.

61/ No court in the land shall collect any money. All money collection for the courts shall be collected by the recorder system. Also, the money collected by the recorder system does not belong to the court. So the courts never get any share of the fines they hand out. All of the money gets collected by the national government to keep the court system honest.

Also, government shall get no share of the money that is paid due to the money court system, the criminal court system, and the child support system, as well as other similar government fines, penalties, assessments and other payments.

62/ From now on a preponderance of evidence in money court shall require a 2:1 or 3:1 or 4:1 overmajority to create a

court verdict. We shall start with a 2:1 overmajority required to accept a plaintiff's claims, however, we shall experiment with requiring 3:1 or 4:1 verdicts.

63/ We shall aim for a situation where systemic change is accomplished almost entirely by people making written and video appeals directly to the Senate, and where class action lawsuits are only used perhaps 3% to 10% of the time.

64/ All money court cases shall close for settlements 72 hours before they enter the money court system. After this, the matter must be decided by a Senate jury of appropriate size and settlements shall become impossible.

NR'47. CIVIL DAMAGES

1/ It shall be thought a very important thing for maintaining competitiveness and business honesty, and keeping business enjoyable, that the people can rapidly, easily, and cheaply obtain legal/government remedy for when other people misbehave, cheat, or cause injury in business.

2/ The purpose of punitive court damages being to punish, 100% of all punitive damages shall accrue to the national government, with the plaintiff, lawyers, court, and county government getting no part of any punitive damages. There shall be no punitive damages for Government in money court. Punitive damages, shall not apply, except in cases of willful misconduct or gross negligence where the plaintiff was not also partly at fault.

3/ The Judicial Sluice shall set detailed maximum compensatory damages levels for all types of injury. If no category exists, then the maximum amount shall be zero. The Senate shall be extremely comprehensive in this matter.

4/ When the people suffer death or injury, the compensatory damages shall not exceed 50-years's wages per victim. (for the average worker). Over this amount, no money shall be awarded for pain and suffering, or loss of use of one's bodily organs. If we make these payments too generous, then we encourage people to take risks so they may live live on disability.

5/ The maximum compensatory damages for emotional or psychological distress or harm to an individual shall be half a year's wages if there is no felony conviction and 5-year's wages if there is a felony conviction. Emotional and psychological distress shall not be possible where there is almost no physical harm.

6/ 100% restitution shall be prohibited on the grounds that it discourages people from avoiding injury and dangerous situations. No plaintiff shall receive more than 90% restitution, and no insurance pay-out shall exceed 90% of damages. The money court system shall not be allowed to award more money than what was asked in the money court filing.

7/ The right to court awarded compensation shall be limited to cases of significant and observable harm to body or property that was not previously damaged or defective in the area harmed. Also, people cannot be jailed for civil lawsuits. Also, it shall be considered defamation to call a money court ruling a conviction of a crime. Also, to be clear these matters are not decided in a court by a judge or jury. Instead they are financially balanced in consideration of the genuine demonstrable obvious damages.

8/ There shall be no compensation for previously damaged

areas of vehicles that are re-damaged in a subsequent vehicle collision. There shall be no right to collect when prior repairs, filler material, or paint is later damaged.

9/ Civil damages shall only be awarded according to standard remedies and compensation levels that meet Senate guidelines. And these remedies are never supposed to completely compensate.

10/ All damages awarded shall only be spent according to a court approved plan, and for court approved purposes. All funds shall be disbursed by the county's payout system according to a payment plan, and all unused funds shall be refunded to the defendant's side.

11/ Those forced to pay money by a court shall have the right to hire private auditors to make sure the money they paid is being spent as per the court order. The court shall also audit every payout over 2 day's pay. The recipient of the money must cooperate with these investigations, or the recipient can lose the money and the right to be a plaintiff for life.

12/ No insurance policy or court judgement shall pay for any treatment that includes a pleasing massage as this incentivizes the patient to get all their free massages.

13/ Civil damages shall not be awarded for unproven, or alternative medical treatments, or for massage-oriented treatments including joint cracking, chiropractic, massage, acupuncture, acupressure, or for attended physiotherapy unless it is absolutely necessary. Also, physiotherapists paid with money from the court system shall not be under age 40, or attractive.

14/ When a money judgement is made by a court against a citizen that exceeds their ability to pay, they shall not be left penniless and homeless. Just their superfluous wealth shall be taken away, and they shall be left with means. All non-immigrant citizens shall have this right to be left with a reasonable court-approved amount of non-luxury household items, and up to one year's wages (as always herein, the average wage) in other assets if they are childless. They shall be left with no less than 2-year's wages if they have one or more children. Where two people are coupled or married with one or more child, these limits shall apply to each parent and they may both use their child for the purpose of protecting their liquid assets from the court.

15/ No money court compensation shall be awarded where the plaintiff is judged to be more than 20% responsible for his own injuries. Where the plaintiff is judged to be between 10% and 20% responsible for their own injuries, the money courts shall generally not award compensation to the plaintiff.

16/ Those who slip on obviously icy places, and those who trip or slip wearing heels over 4cm, or shoes with slippery soles shall generally be held to be entirely responsible for their own injuries. Those who slip fall for no reason or no good identified reason shall have no right to sue people only because they had an accident on their land, or in their place of business.

17/ When plaintiffs have unusual health conditions that aggravate their injuries, the defendants shall not be liable for the damage resulting from the unusual health condition.

18/ When intoxicated people and those with certain drug and alcohol licenses or addictions suffer an injury, they shall generally be held to be entirely responsible for their own injuries.

19/ Nobody injured while committing a crime can sue the victim under any circumstances, even for excessive force. If excessive force is used in self defense, only criminal penalties shall apply.

20/ Regarding those injured while trespassing:

a/ Those trespassing on fenced private property shall generally have no right to file cases in money court, except in cases of intentional harm or booby trap, and where the fence is under 90cm tall.

b/ Those trespassing on unfenced private property may file cases in money court for gross hazards that are not adequately protected such as unfenced holes, unfenced cliffs, uncapped rebar, and bolts sticking out of the paving.

c/ If a trespasser is beaten or shot by a resident, and the prosecutors office does not prosecute the resident, or the violence against the trespasser is tried, and no conviction occurs, then the injured trespasser(s) shall not have the right to seek damages in money court.

d/ Those trespassing on private property shall have no right to file cases in money court if they slip or fall or otherwise are harmed by themselves without genuine hazard or booby traps.

e/ The Senate shall compile detailed laws for guests and trespassers on private property.

21/ It shall be a crime, and there shall also be money court liability, where people plant new: cactus, pyracantha, natal plum, bougainvillea, urushiol oil plants such as poison oak, poison ivy and similar legacy trauma plants along sidewalks, foot paths, shortcuts, ways, roads, easements, in front of a doors or egress windows, next to patios, or anywhere that may harm people walking on pavement or on dirt paths, or in a commonly trespassed area. We shall not allow people to create booby-trap situations with plants. Non-legacy trauma plants with thorns like rose and raspberry shall however be allowed near walkways with no liability.

22/ Land owners may be held financially responsible for trespassers who fall into uncovered or unfenced wells, holes, trenches, cliffs, soil cuts, quarry pits and mines, or who fall on unprotected rebar. However, where the special dangers are covered or fenced, and warned of by sign and the map system, the owners shall generally not have any liability for injured trespassers.

23/ For the purposes of trespasser liability, all 80-cm tall fences and walls shall suffice as a fence. Also, barbed wire animal fences shall also suffice if they are allowed in that particular place. Signs that say "No Trespassing" shall confer no additional rights to the land owner, or their tenants.

24/ With regard to trespassers, a reasonable time shall be given for owners to correct most dangerous situations before being considered negligent and liable.

25/ Retail businesses shall generally have no liability for wet areas and spills that are properly marked off with cones or barriers. Also, retail businesses shall generally only have liability for spills after the business was alerted and a reasonable time for action has passed. Warning people about dangers in public hazard situations shall not be considered an admission of guilt.

26/ In general when a random injury could just as easily have occurred anywhere, the property owner public or private shall suffer no liability. So when random events such as lightning strikes, or street crimes, or car accidents occur on private

property, the property owner shall not be liable for damages simply because the event occurred on their property.

27/ There shall be no right to sue government simply because an accident or some injury or act of violence occurred in public property. Government shall never be held financially liable for violence within our nation or against our nation. Where people suffer accidents on public property, they shall not be allowed to sue government for injuries, even if the accident arose out of negligence.

28/ People shall be expected to watch where they are going to a reasonable extent.

29/ It is perfectly reasonable to expect the old and frail to be especially careful where they go and how they move about. It is also not unreasonable to say that when old and frail people suffer greater injury than regular people in their prime, they should get no more money.

30/ Government shall never be held to owe damages for poor enforcement, or failure to act, or poor planning, or for the foolishness of its citizen.

31/ No court shall have the power to compel the Senate and its government to pay any damages. Also, all court decisions at all levels, and all private adjudications are subject to veto by the Over-Senate.

32/ The right to seek money damages in court is not transferrable, or assignable. If a fictional citizen is merged, or bought-out, all cases in which it is a plaintiff shall be terminated. As well, merged fictional citizens shall have no right to file any legal claims after the merger for the time before the merger or purchase.

33/ Armed robbers and other armed criminals harmed by people acting in self-defense, or community self-defense shall have no right to money damages. We say this so that such people are not universally shot to death to avoid liability in money court. However, this rule shall not be thought to diminish any self-defense or community self-defense rights.

34/ There shall be no financial liability when trained rescuers and emergency treatment people working for government make honest mistakes or experience unfortunate consequences following generally standard procedures.

35/ The Senate may elect to liquidate fictional citizens for bad social behavior, risking human lives over profits, excess debt, cash flow problems, payment problems, or for widespread public dis-satisfaction, or for perhaps for other reasons. Where the Senate does not elect to close down a business, no money court judgement should cause the death of any business, or be so great that they cause artificial liquidity problems that threaten the businesses existence, This shall include sole proprietorships.

36/ The following shall be off limits to the money court system

a/ One half the value of the average home.

b/ IP rights of any sort, or payments received for these.

c/ Monthly pensions and disability money.

d/ Inheritances.

e/ Basic operating capital for living life as stated elsewhere herein.

37/ There shall be no seizure of property by the courts until the court appeals process stage is over.

38/ All demand letters from lawyers shall be sent via the country recorder system which shall track their resolution. Where lawyers send out too high a percentage of improper

demand letters, those lawyers may be disbarred from practicing law. The Senate shall aim for a new legal system where the old lawyer saying: "It doesn't hurt to shake the tree and see what falls out" is no longer accurate. Instead, lawyers should fear making unreasonable demands.

39/ The courts shall not be allowed to freeze or seize the assets of politically important people without a 2/3 overmajority vote by the Senate jury of at least 500 jurors trying the matter. Also, with regard to the violations of politically important people, these must be clear violations of long-standing laws that are regularly enforced in the same way against a large number of people.

40/ Where people have money court judgments, they shall be allowed a reasonable time to liquidate assets without a fire-sale situation.

NR'48. NOT FOR THE CIVIL/MONEY COURTS

1/ The following matters shall not be tried in any civil/money court in the nation. They shall either be tried in criminal court, or fined by the Senate's enforcement administration:

a/ Environmental harm.

b/ Manufacturer liability including products alleged to cause latent health issues like cancer.

c/ Racial, or religious discrimination or harassment.

d/ Rape, forcible sexual conduct, sexual abuse, sexual discrimination, or sexual harassment.

e/ Disability discrimination or harassment.

f/ Unfair labor practices.

g/ Professional malpractice, including medical malpractice, and performing illegal medical procedures.

h/ Securities fraud.

i/ Market manipulation.

j/ Abuse of monopoly or cartel pricing power.

k/ Accidents on public property, or between the sidewalk and the street.

l/ Death or injury due to vehicle accidents.

m/ Death or injury due to group transportation systems.

n/ Government financial liability to the people.

o/ On the job injuries.

p/ Neighbors suing each other over what they plan to build, except where the water is diverted over another person's land causing a new stream, or flooding.

2/ No civil court or arbitration forum shall compel anyone including government to pay money for any of the preceding matters. Only the Senate's enforcement administrations may collect fines for the preceding matters.

3/ In all of the preceding matters, all fines and punitive damages money shall accrue to the nation's general fund, and no portion of any government fine shall be given to any other party, including any party harmed.

4/ In all of the preceding matters, the amount recovered from each injuring party shall have no relation to the amount paid out to each injured party. If government elects to compensate those harmed, this shall be done as a separate case, and total payments shall not exceed the government's budget for this class of injury.

5/ Money court is primarily for disputes between the people. It is not a place for the enforcement of public policy unless the public policy has been shown to be ineffectively enforced by

the normal means of government regulation.

6/ We must give our new laws time to work though normal means before we give a share away to volunteer prosecutors. Only when public policy can't be enforced by the normal means of government regulation. Only then, after at least 12 years may money court be used for enforcement. Only then may volunteer prosecutors get a share of huge fines that are rightfully the sole property of the people.

7/ Unless a culture of sexual harassment is both widespread and tolerated by the management of a fictional citizen, all acts of sexual harassment shall be considered to be a matter between individuals.

8/ All claims against professionals shall be heard and judged by the various professional licensing and regulating departments of government. As with most branches of government, these regulators shall have some experience working in the field they are regulating.

9/ No professional shall ever suffer any penalty for following standard procedures for their profession.

10/ No duly certified medical people shall ever suffer any penalty for following standard treatments, or for reasonable misdiagnosis, for typical unfortunate outcomes, or for a reasonable ratio of honest mistakes in their career of helping people.

11/ Consent for medical treatment shall not be needed when people are unconscious or delirious and will suffer great harm if not rapidly given treatment immediately.

12/ In crisis situations where medical care is unavailable or distant, people with any level of accurately disclosed medical training may furnish medical care to the critically injured without fear of prosecution or liability.

13/ There shall be no right to recover property unlawfully seized more than 30 years before. Where the property is illegally gotten, it shall become the property of the people who may pay a sum as a reward to the person supplying information that rightly puts property in the public domain as public rental property.

14/ Again, neighbors shall not be allowed to sue other neighbors for what they plan to build. The money court system shall not be used for this.

NR'49. LAWYERS.

1/ Lawyers only add a small increment of accuracy to the legal system, yet they are terribly expensive and drive the system towards both unnecessarily complexity and greatly reduced capacity.

2/ By making each matter the legal system considers more complex and expensive, lawyers reduce the number of legal decisions the system can adjudicate. The injustice caused by this reduction in legal capacity and legal reach greatly exceeds the justice achieved by the minor improvement in legal accuracy.

3/ As adjudication speed slows, so does the economy to some degree. The Senate shall always strive for an abundance of capacity in the adjudication system.

4/ It must be noted that if lawyers are getting 1/3 of the amount recovered, then they are increasing the cost of legal proceedings by 50%. Surely lawyers are not making the money court system work 50% better for the added 50% they

get. Also, this is the same thing as a 50% commission on legal proceedings. Surely this is exorbitant.

5/ Under the old system, lawyers favored the rich who could afford their high fees. And at the same time, lawyers unjustly disfavored the poor who could not afford their high fees. Therefore under the old system, lawyers were unjust because they favored the rich over the poor in our supposedly unbiased justice system.

6/ Under the old system, when foreigners hired the best law firms, they tended to win against native born citizens speaking for themselves. In fact, native born citizens normally proceed with trepidation against prominent law firms that are for sale to the highest bidder. This helped foreign interests over our own domestic interests. Instead, under the new system, we shall have a total prohibition on Foreign-born:

a/ Lawyers. (Because they proliferate lawsuits among immigrants. And this is the opposite of what both the host and the immigrant side really want.)

b/ Taxi drivers. (Because they can kidnap people)

c/ People in positions of trust. (Because they can just run back to their home nation.)

7/ The current legal system has many of our smartest people arguing over what society already has, instead of working to produce new things for everyone.

8/ Our nation shall institute a legal system that disfavors, hinders, and minimizes the use of lawyers in its courts.

9/ To reduce the number of lawyers, the Senate shall have a lawyer tax. This tax shall begin by charging each lawyer half the average wage annually for the privilege of practicing law in our nation.

10/ There shall be no official or private ranking of lawyers. This shall apply to win-loss results, law class rankings, law school rankings, or score in government qualifying exams. All law classes shall be graded pass fail. Allowing rankings of lawyers shall be seen as a step in the direction of money corrupting our legal system.

11/ The study of law shall be taught as an ordinary college degree, not a post college degree.

12/ A lawyer's first duty shall be to make sure that justice is served. This shall be held more important than whether his client wins. To do the opposite is an evil thing that only existed because the injustice benefitted parasitism. Lawyers shall not be allowed to lie, or conceal the truth. The truth is more important than lawyer-client privileged confidentiality. All attorney/lawyer client privilege or ACP only exists to make people more likely to use lawyers. Without ACP, attorneys will have a much harder time finding work in the courts. And this is exactly why we have deleted ACP from our system. Also, all lawyers shall be required to wear recorder system body cameras at work, just like police with live recorder back up and transcription.

13/ No lawyer should ever give the appearance that their first obligation is to their client, and that they will knowingly argue injustice to anyone who pays them. To do so shall be considered an ethics violation.

14/ All lawyers and court surrogates shall disclose the fact that they are a lawyer in all communications when they act professionally. If a lawyer represents a client, that client's name must always be named. If the client is foreign, that fact must also be acknowledged by the other side given its

importance.

15/ Lawyers, court surrogates, and almost everyone else in the legal industry shall be prohibited from shielding the identity of their clients, and must always state this relationship first.

16/ Lawyers shall not be paid based on successful outcomes as this creates incentives that run contrary to justice.

17/ Lawyers shall not be allowed to advise or represent people in matters of divorce, child support, child custody, immigration, medical malpractice, and other areas the Senate may elect to add. This goes for in-court, as well as out of court advise and representation.

18/ Lawyers shall not advertise or procure advertising or marketing services, or produce media communications. Lawyers shall not engage in government lobbying for themselves or for others.

19/ All payments and agreements made under the lawyer payment system shall be properly indexed and searchable public information.

20/ It shall be a crime for a lawyer to fail to report a client crime that he becomes aware of. How can it be otherwise?

21/ Lawyers shall not be allowed to hold documents in confidence for others.

22/ The process by which lawyers and surrogates are licensed shall be entirely managed by the county recorder's license testing system. No fictional citizen or bar shall have any say in licensing, de-licensing, or any other matter concerning lawyers or surrogates. There shall be no unions or partnerships of lawyers. There shall be no sub-national testing of lawyer and surrogate qualifications. All lawyer and surrogate licensing shall be administered by the counties using the national Senate's uniform national lawyer test.

23/ The courts shall not award any more damages when a party is represented by a lawyer, or because a lawyer's fee must be paid.

24/ All judgement and settlement amounts must be paid to the court. It shall be considered fraud if anyone else offers, gives, or receives any payment directly from another party in a court or legal matter. Structured settlements annuities, and long-term payouts of all sorts, may neither be sold, nor mortgaged, nor collateralized in any way. All attempts to sell, mortgage, or collateralize structured settlements shall be void, and all money paid shall be considered nonrefundable. In other words, the person selling the structured settlement can collect any money they can get, and it shall not alienate them from their structured settlement in any way

25/ When a fictional citizen is sold, all existing plaintiff-side law suits shall be cancelled and forfeited. Also, the new owners of the fictional citizen shall have no right to seek damages from the relations of the prior owner.

26/ Lawyers shall only do business in their own name.

27/ Lawyers shall not be allowed to work obtaining government approvals.

28/ No person with a felony conviction may help others with the legal system for a fee, or as a legal professional.

29/ Lawyers shall not participate in any social security or disability hearing. If the subject is not fit, then a surrogate may be used.

30/ There shall be no liability or malpractice issue when Lawyers abandon their clients either before or during their

trials. No lawyer review or reporting system shall track where this occurs. This rule shall be though an important aspect of getting the lawyers out of our legal system.

31/ All agreements for the provision of lawyer services must be posted by the lawyer on the county recorder system's lawyer/client registration system. Also, all payments received by each lawyers must be recorded by this system. It shall be considered felony tax fraud for lawyers to work with clients or accept money or benefits outside the lawyer payment system.

32/ Agreements for paying lawyers shall not be enforceable in court. Where lawyers take money in advance, they shall be free to keep this money and provide no service if they like.

Where lawyers provide their services, there shall be no obligation on the part of their clients to pay them afterwards regardless of the outcome, or whether they worked by the hour, or as a percentage of money obtained. This is intended to both reduce legal expenses and cause our nation's lawyers to bill small amounts many times.

33/ The Senate is supposed adjust the legal system so that it is both unfriendly to lawyers and friendly to paralegals that help the public to integrate with the court's systems.

34/ Lawyers that repeatedly bluff and threaten people for exercising their legal rights shall be disbarred. They may also be imprisoned for egregious abuses. Also, it shall be thought right and proper to have a legal system where most lawyers fear getting involved with matters of free speech.

35/ Lawyers shall not be allowed to lie, or intentionally hide the truth. All lawyers shall be legally bound to tell the truth.

36/ In order to be a lawyer or surrogate in our nation, one must be born a citizen, to at least one citizen parent.

37/ Legal surrogates shall not be required in matters of wrongful death and debilitating injury. However, we shall allow lawyers in both of these matters.

38/ All lawyers shall be free to advise clients about the viability of the cases they are thinking of filing, or that have been filed against them. They can also say talk about this, or don't talk about this. But legal people shall be prohibited from coaching people about what to say. In fact, in this matter they shall emulate the "strict Freudian" psychologist that says nothing to the client that judges the correctness of what the client is telling him. Where legal advisors do this, it becomes hard to distinguish whether they are illegally coaching and conspiring with their clients on what to say to hide their crimes. However, legal advisors may say, yes I think you have a good case, and here are your case's strengths and here are your case's weaknesses. And they might recommend greater detail in some matter, or submitting certain evidence, because it is important to the case. Legal advisors may also say, no, you don't seem to have a good case.

39/ There shall be a special court and special Sub-Senate judges for people who are injured. These shall be expected to appear in person for video recording before their hospital's county recorder system room service, unless this is impossible. Also, in hospitals, the recorder system shall have people that go to hospital rooms for court for testing and recording will-testaments.

40/ It shall be thought a good thing for disempowering lawyers that we have a completely new legal code with all new numbering. This shall be thought a thing that will help

level the playing field for the people over the expensive paid hired gun lawyers of the old system.

41/ All communications between both plaintiffs and defendants and their various legal advisors and paralegals and the courts shall be required to use the county recorder system. Then, this information shall all be 100% recorded for the courts and the opposing side to see. We shall also have it that illegal unrecorded court counsel shall be a thing that gets legal people disbarred. Also, people who contrive to sneak around the system in imaginative ways may be sent to jail for this frequently multi-count crime.

42/ There shall be no right of lawyers to access or inspect peoples property to ascertain access its value, and lawyers attempting to do the shall be disbarred. Lawyers may easily be disbarred for sending out too many absurd letters, demanding things of other people that are baseless. Whenever a lawyer is disbarred, it shall be for life. The Senate shall make a long list of lawyer behaviors like these that it wants deleted.

43/ Under the old system everyone had the right to use an expensive expert attorney to represent them in court, and if they could not afford an expensive expert attorney, one would be appointed for them at great cost to the courts and their customers. Under the new system, all initial court question and proceedings happen via text and video with the litigant having plenty of time to consult the law library or speak with a lawyer before responding to the initial information requests of the court. Also, our courts will all use uniform procedures and rules nationwide. There will also be a much more intuitive user interface

44/ There shall be no right under the law to have another person speak for you in court unless you are incompetent and then this person shall be your complete legal surrogate. There shall however be a right to consult the law library in either video or text versions, for both criminal and money court matters. There shall also be a right to consult with lawyers about one's case(s). However there shall no longer be lawyers speaking for other people in court, or physically attending court trials. Instead all lawyers must appear court virtually. It is thought that lowering the lawyer involvement time for each court matter from many days in court to a couple hours of consultation will forever change the supply/demand equation for lawyers. It will also be a system where clients can get multiple opinions about how to proceed with their case. Access to the online law library shall be free of charge, and open for everyone to look out without even logging in. Also, Gideon v Wainwright shall be cancelled and void under this new constitution,

45/ To be perfectly clear, the old 6th amendment from the 1789 constitution shall be re-written from: "in all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertain by law, and to be informed of the nature and cause of the accusation; to be confronted with witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defense." Instead the old 6th amendment shall be re-written herein as: "in all criminal prosecutions, the accused shall enjoy the right to a speedy

and public trial, by an randomly drawn impartial Senate jury of a county near where the crime was committed. The accused shall have the right to be informed of the exact violation(s) and charge(s) against him, together with the quoted section(s) of legal code(s) that were violated, and exactly how these sections of code were violated. Except as provided elsewhere herein, the accused shall have the right to view and question witnesses against him, which must answer sensibly, accurately, and consistently to be valid witnesses. He shall also have the right to compel the attendance of witnesses in his favor. He shall also have the right to assistance of human counsel and library/wiki access for his defense, however this right to assistance by human counsel shall be only by video. Thus there will be no attorneys speaking on behalf of people in our courts, unless the attorney is a court surrogate for an incompetent person that is appearing instead of the accused.

46/ Government shall not give legal aid shall not appoint lawyers for anyone unless they are completely incapacitated, and then the lawyer must act as a surrogate with the limited powers of the original person the power of attorney a custody person, guardian

47/ Immigrants shall never be allowed to act as lawyers, or judges, or police officers, or Senators in our nation.

48/ Lawyers shall not be allowed in matters of property line disputes, easement disputes, disputes with homeowner associations and developer-sellers, lease disputes, construction contract disputes, foreclosures, or disputes related to building designers.

49/ Lawyers shall not be allowed in matters of medical malpractice.

50/ Lawyers shall no be allowed in matters of divorce or child custody, or spousal support, or child support, or family law, or inheritance.

51/ Lawyers shall be prohibited from being executors of wills, prohibited from being legal guardians, prohibited from selling off assets or making any decision about this, and prohibited from holding any power of attorney. All of these things shall be considered a conflict of interest for lawyers.

52/ Regulatory compliance inspections shall now be a thing that is provided by government for free. Also, instead of going to a lawyer for an opinion, business will often go to the Senate for an official ruling in matters they are unsure of, and official ruling that may be relied on. And here government must have a reasonable and clearly stated reason to say no, or to ban the new process or business activity. And because of this, we shall say that lawyers shall have nothing to do with regulatory compliance. This except for when the business wants to fight the government's ruling or interpretation.

53/ We shall use public advocates as surrogates for people who are unable to speak for themselves in all of these circumstances, such as small children, elders, and simple minded people.

54/ Nobody, including especially lawyers shall be allowed to engage with and communicate with the Senate on behalf of others.

NR'50. COURT SURROGATES

1/ The accuracy of the legal system counts for little if the

system is so costly and professionalized that it is out of reach for most citizens. Therefore, legal accuracy shall be balanced with accessibility, inclusiveness, speed, and ease of use by the people.

2/ The legal system shall be designed so that most people speak for themselves in court. Those unable, or unwilling to speak for themselves may use a legal surrogate to speak on their behalf. There shall be no charge for this. However, legal surrogates shall suffer from a number of disadvantages intended to make the use of legal surrogates into something that most people involved in court cases avoid if they can.

3/ All legal surrogates and lawyers, shall work for the court system on a salary. All legal surrogates, shall be paid through the court system exclusively, and it shall be a felony for a legal surrogate to receive any payment outside of the court system from or for those they have represented in court.

4/ All legal surrogates, shall be randomly assigned to court cases by the courts. Numbered smooth plastic discs shall be rapidly drawn from a bag.

5/ There shall be 4 specialties of legal surrogates, serious crimes, minor crimes, civil/ money court, family court.

6/ All legal people qualified to work in one court in the nation shall be permitted to work in all parts in the nation. There shall be no shenanigans about legal people being admitted in some places but not others.

7/ No person working in the justice system shall be paid based on the outcome of their work, or as a percentage of the money they obtain from the system. This prohibition expressly includes all lawyers and legal surrogates.

8/ The educational program to become a legal surrogate shall take 60 weeks of study. The educational program to become a lawyer shall take 120 weeks of study. Neither program shall require a college degree for admission.

9/ Legal surrogates shall not be allowed to work as lawyers and lawyers shall not be allowed to work as legal surrogates.

10/ All legal surrogates, shall only serve as total surrogates in court. If an authorized surrogate says one word before a judge or arbitrator on someone's behalf, then that surrogate shall have the irrevocable obligation to settle that case on the client's behalf, except where the surrogate is clearly incapacitated. In that case a new legal surrogate shall be randomly drawn by the court.

11/ So that our nation's lawyers and legal surrogates drive towards justice rather than against it, all lawyer-client and legal-surrogate-client communication shall be recorded and monitored by the lawyer payment system and the courts. All communication that occurs outside this system with legal advisors or legal surrogates shall be presumed to be conspiratorial and criminal on both sides. It shall be a crime to initiate contact outside of justice system monitoring — like police and police bribery. Also, government may conduct sting operations here on both sides.

12/ All lawyer-client and legal-surrogate-client communication shall be recorded for public viewing. This is notably the opposite of the old system where attorney-confidentiality supported the value of super-expensive lawyers corruptly swaying the justice system. Confidentiality, otherwise known as darkness shall in general be considered the wrong direction for democracies, and all democracies should push society more towards openness and free discussion wherever

possible. Here we note that with journalists and psychoanalysts, confidentiality also supports expensive consultants.

13/ The prime duty of all legal-surrogates is discovering the truth and aiding justice, not represent their clients. If a legal-surrogate becomes aware of important facts related to his cases, he must make them available to the court. And if a legal-surrogate becomes aware of another crime, he must disclose that information to the court.

14/ Legal-surrogates shall not in any way encourage people to change their testimony or suggest that they should stop talking at any time. If they are wasting the time of the court through excessive talking it shall be for the judge(s) to cut off their testimony, not any legal-surrogate.

15/ No more than one legal-surrogate at a time shall be permitted per side per case, and all legal-surrogates shall be required to work independently from one another physically, legally, financially, and with regard to the discussion of pending cases. There may however be multiple prosecutors in criminal cases. And when the people are seeking something in money court, there may send more than one person.

16/ All legal-surrogates must work full time for the court system and shall not work outside the court. All legal-surrogates in each county must be paid at the same hourly rate. Legal-surrogates shall not be paid based on how many cases they work on, or whether they win or lose. It shall not be permitted to rate legal-surrogates, or aggregate their win/loss information. Except caffeine, legal industry people can't take any drugs or drink at all.

17/ When legal-surrogates oppose principals in court, the principal shall speak first and last.

18/ People over age 9 shall generally be expected to speak for themselves in all matters of family law including divorce, custody, support and inheritance, unless they are incapacitated or mentally incompetent.

19/ Parents, children, full siblings and spouses and domestic partners of more than 3 years shall not be considered legal-surrogates when they speak on behalf of others.

20/ Those who have spent more than 8,000 hours in the prior 5 years working for a particular fictional citizen shall not be considered a legal-surrogates, provided they have not spoken for a fictional citizen in any court in the past 5 years.

21/ Those who have owned more than 1% of a for-profit fictional citizen since its founding shall not be considered as legal-surrogates for that fictional citizen, provided they have not spoken for a fictional citizen in the past 5 years.

22/ The people should have nothing against electing court-employed surrogates to the Senate. The people should however, generally dis-favor lawyers.

23/ Those who have outbursts in court may be required to use a surrogate.

24/ No lawyer or surrogate legally doing their job shall ever suffer prosecution, or be required to pay money for unfortunate outcomes, or bad representation.

25/ Our layman's court will operate differently by necessity. The cases will be conducted by a county Senate approved trial clerk. These clerks will conduct trials much like how escrow officers conduct escrows, with the Senator judges having the power to override in many circumstances. There

will also be law library teams standing-by for video calls from the various courtrooms.

26/ The Senators should have a 3 warnings system for surrogates, like with the DMV. If a surrogate gets too many recesses, with the Senator judges saying they didn't prepare well enough, then they can get fired.

NR'51. FINES

1/ Government shall not treat the rich with favor, and wherever practical it shall work to eliminate wealth bias from government penalties. To this end, we shall try to express our public prosecution penalties in either jail time, public service time, re-education time, or a multiple of the average wage

2/ All large fines paid by fictional citizens shall be paid through a dilution of shareholder equity in favor of the public. If shareholder equity is inapplicable, then a percentage of assets shall be seized.

3/ No for-profit fictional citizen shall be fined by a money amount greater than 100-year's wages. All fines over this amount shall come from a dilution of the company's shareholdings in favor of the public. Thus if a company worth \$2 billion is fined by \$1 billion, the number of shares shall be increased by 50%, and the public shall own half of all shares. These shares may be held indefinitely by the public or sold immediately.

4/ All fines collected by labor unions, employers, religions, schools, non-government trade organizations, financial institutions, athletic organizations, clubs, landlords, homeowner's associations and private individuals shall be paid to the county recorder system on behalf of the national government. None of these groups may keep any of the money from fines.

5/ It shall be a felony to pay or receive money for any matter brought before a court or arbitration system without making an accurate statement of the amount to the recorder. All such statements shall be public knowledge.

6/ People may pay fines of family friends and lawful businesses may pay the fines their team incurred on the job. However, aside from this, it shall be a felony to:

a/ Pay the government fines of others.

b/ Reimburse people for their government fines.

c/ Receive help paying for a government fines.

d/ Pay people for the time they served in jail.

e/ Receive money for time spent in jail.

7/ No branch of government and no fictional Citizen shall fine people without due process. This includes homeowners association's, schools, athletic association's, etc.

8/ A forfeited deposit statement must be filed with the assessor's office for all forfeited deposits. This is so abusive deposit practices can be tracked and ended. There shall be penalties plus a 100% tax on unrecorded forfeited deposits, and a 50% tax on recorded forfeited deposits. The county shall get all forfeited deposits revenue money and it shall not have to share this with the national government.

9/ All forfeited deposits and accounts shall be paid to the county tax house and 80% of the money shall accrue to the national government, and 20% to the county.

10/ Whenever money deposits are not returned, a detailed sworn statement shall be required by the recorder as to why.

Businesses with an inordinately high level of retained deposits shall be investigated by the assessors office.

11/ The national Senate shall establish maximum fines for all the counties of our nation. These fines shall be adjusted by the same ratio as the local county taxes are adjusted, with some communities charging more than others for both taxes and fines and fees. The same ratio shall apply for each particular county.

12/ When government seizes money from peoples bank accounts, the penalty for doing this shall not exceed the greater of 10% of the debt or a day's wages, whichever is greater.

13/ It shall no be allowed to convert fines into tax liabilities. And it shall be a felony for government people to attempt to collect their fines as a tax liabilities.

14/ Where people pay or collect fines, it shall be a crime to do this outside the recorder system. Wherever people are fined, at least 90% of this money must go to the national government's general fund.

15/ Government shall not have the power to send collection people (in the UK called bailiffs) around to harass people into paying their debts to government.

16/ All surcharges and extra fees, all per-person cover charges, all additional service charges, all vomit in the taxi fees, shall be considered contractual money dispute matters and as such they are in the domain of money court and not criminal court.

NR'52. TENANCY

1/ This constitution absolutely believes-in, and supports the sharing of assets through renting be the thing an apartment, raw land for agriculture, a parking lot, a rental vehicle, a home, a trailer park, tools, machinery, equipment, or access to a shared shop. To support our objective of an economy maximally full of shared stuff, we will have it that:

a/ Those who create and buy things for the sharing economy shall be strongly favored over the tenants and users of their shared things that either do not pay or they cause damage to the things that are shared.

b/ The sharing economy shall be thought to be the worst place to drive for socialism. In fact shared tools, and farm automation equipment, and cranes, and tractors are obviously the last place we should drive for socialism. And the renting of shared temporary housing is not far behind. So from now on, we will regard the immortal calls for rent control and difficult evictions, and tenant rights to be from the enemies of freedom applying pressure where we are weakest.

c/ Once taxes are paid on an asset when it is purchased, or created, there will be no more taxes on the process of sharing and renting that thing by many people. So income from rents will no longer be taxed. It is hoped that this will lead to many more people involved in renting many more things, and much more sharing of equipment and buildings.

d/ There shall be zero liability for landlords when accidents occur involving leased property and equipment that is recorded to be in ship-shape condition at either the rent-out inspection, or if this is over 1-year prior, the annual safety inspection. However, where landlords and equipment renters

and open shop owners become aware of a genuine hazard, they must repair the genuine hazard before they can let people use that asset or that area again. The term ship-shape shall mean that all systems work and that there are no safety problems such as a hole in the walking surface, or broken safety equipment.

e/ Under the past constitution, landlord liability was shielded with the costly machinations of fictional entities, lawyers and accountants. Under the new system, this same protection will come as a matter of course and at no cost or effort to protect the people who buy, make, or have assets that other people want to rent.

f/ There shall be prompt adjudication of all unpaid rent situations shall be assured to all landlords within 10 days, and after this all evictions shall occur before day 20. Tenants with unpaid obligations to their landlords shall not be allowed to use the monthly rental system, but must rent by the week.

g/ Any use of alcohol with regard to shared/rented vehicles of any sort including boats shall be considered DUI. The maximum BAC shall be 0.01%.

h/ From now on, the term/phrase "month to month rental" shall understood literally under the law, and all landlords shall have a constitutionally guaranteed right to make the tenants move out at any time they want and for any reason at all including convenience, with 30-day's notice. However, for all tenancies over 1-year old, 60-day's notice shall be required. This right is explicitly guaranteed by the national constitution, so that no county government will ever contravene this important landlord's right that doesn't look so important, but actually it is vitally important.

2/ There shall be a single national legal code for all aspects of government regulation for the following. All attempts by county governments to make laws regarding any of the following shall be void and the people involved should be thought to be corrupt because they are pushing exactly in the wrong direction, using the wrong channel to corruptly drive change. The appropriate path for change in all these matters is thought to be through the national Senate:

a/ Renting property and landlord tenant relations. This is first here because it is by far the most important item on of this list. Sharing tools, equipment and premises is just so important for building wealth. If the enemies of our freedom from their parasitic predation can keep us from sharing, it will be like a big stumbling block, or a hobble-stone in our way.

b/ Building codes and building rules. Under the 1789 constitution, building departments were costing \$50-thousand to \$200-thousand from each building we built.

c/ Road and railroad standard construction. Under the 1789 constitution, we used these insanely over-wide roads that cost far too much to build and maintain.

d/ Employment regulations.

e/ Professional licensing.

f/ Product standards.

g/ Vehicle standards.

h/ Robots and droids.

i/ Interfaces.

j/ Legal proceedings.

k/ National policy.

l/ Identity verification.

m/ Immigration policy.

n/ National criminal law.

o/ Airlines and car rental companies.

3/ All attempts by county government to make laws that override, or modify, or reinterpret, or that fail to enforce the national code in the normal standard way, all of these shall be void. Where any county government people attempt to make laws of this nature, including especially laws related to rent control, rent stabilization, and eviction rights for tenants, all of these people should be charged with corruption.

4/ Government shall be prohibited from requiring that landlords ever pay any sort of relocation or move out fees to tenants. Even when the landlord is selling tenanted properties under eminent domain, this shall be the way things work.

5/ From now on, all unrecorded contracts shall be unenforceable under the law. And nowhere shall this rule be more strictly enforced than with matters of real estate sale transactions, real estate leasing, real estate salesmen, real estate marketers, and bets and gambling. All unrecorded agreements may be rescinded at the will of either party, and none comes with any legal obligations. Even video recordings of agreements shall be unenforceable in court.

6/ Tenants that lack a rental agreement recorded with the county recorder system shall have no rights of tenancy under the law and shall be treated like nightly renters under the law.

7/ Landlords and those who rent out personal property such as vehicles and equipment that lack a rental agreement recorded with the county recorder system:

a/ Shall have no ability to use the court system to evict tenants and/or recover damages. They shall also have no legal ability to compel their tenants to pay rent, utilities, or damages.

b/ Shall have no ability to use the financial system to process rent payments on their rental.

c/ Can not form a legally binding contract for third party insurance coverage in matters related to the undocumented tenancy on both sides.

d/ Shall not have any safe harbor for the crimes of renting to illegal aliens, or conspiracy to hide an ex convict.

8/ It shall be a crime to rent property (on either side) outside the county recorder system. It shall be a felony to take rent money for property that one has no right to lease, or to produce fake rental agreements. Depending on the amount under consideration, this crime may easily be considered the equivalent of grand theft.

9/ Where either party in a rental agreement wants to give official notice to the other party, they shall give notice to the county recorder system, and the county recorder system shall notify the other party.

10/ Neither government nor any HOA shall establish any rules that ban the renting of property. However all areas that are majority owner occupied shall pay an additional 8% annual top-line sales tax when they are rented out annually and a 20% tax when they are rented out for shorter periods. Also, in breeding districts, only people with children will be allowed to

11/ It shall be considered tax fraud and illegal prostitution when landlords have mutually consensual sex with their tenants, even if both do this freely and with mutual consent. If the landlord offers sex for rent, it shall be be considered sexual harassment. If the tenant offers sex for rent, the landlord may terminate the tenancy on those grounds alone.

If the two people want to start having sex, the tenant must move out first.

12/ To stop illegal and secret sub-letting, tax fraud, aid fraud, HOA fee theft, and a variety of other money crimes, all rent payments, HOA charges, utilities, and other regular fees associated with the ownership and renting of a real estate — all these monies shall be run through the county recorder's payment administration. No rental agreement for real property or personal property, and no HOA management shall be valid unless all payments, especially the extra charges payments, are run through the recorder's system.

13/ All real estate and rent-related documents must be filed through the county recorder system in order to be valid. No notices, or notifications or leases, or agreements shall be valid if signed outside of the county recorder system. This shall include all:

a/ Rental agreements, be they for years, year-to-year, month-to-month, weekly, nightly or any other period of time.

b/ Notices of failure to pay rent.

c/ Subletting (paid or not).

d/ Guests (paid or not).

e/ Notices to move out.

f/ Notices to repair the premises.

g/ Lease violations such as disturbing other tenants, disturbing neighbors, pet violations, smoking, Mafia drug use, and harming the property.

h/ Notices of uninhabitable premises.

i/ Notices of retaliatory eviction.

j/ All other property-related communications.

14/ Recorded rental agreements shall be a defense for landlords against being charged with harboring illegal aliens, or felons, or supplying the site for an illegal drug lab, and other illegal activity. He who notifies and sends a picture of his tenants shall not be considered as a harbinger unless proven otherwise. This lets police know where everyone lives, especially the people who are hiding from the police.

15/ No lease shall contain any language about firearms. Also, because we are saying this, no land owner or business shall have any liability for any firearm crime, where the main reason for having any liability is that a mostly random act that happened to have occurred on their land or premises. Those businesses that serve alcohol for immediate consumption shall however be responsible for firearm crimes, where metal detectors, video cameras, and ID logging is not occurring at all entries to all of their alcohol consumption areas. The Senate shall establish similar metal detector rules for the various facilities that work with high use alcohol and drug license holders as needed.

16/ No lease shall contain any language about politics, voting, free speech, free assembly, or housing non-citizens, or homeless people. If government is going to house homeless people or non-citizens, it must be on unused government property in 50-person+ shared bathroom and kitchen dormitories. Where individuals and fictional citizens operate dormitories for the homeless and for non-citizens, they must own the property. They must also get at least half of the people within a 5km radius to agree to allow the use.

17/ We shall tax all rentals over 3-years old by 5%. We shall tax all rentals over 6-years old by 10%. We shall tax all rentals over 9-years old by 15%. We do this to:

a/ Encourage home ownership.

b/ Reduce rent price shocks to long time tenants.

c/ Assure a fluid rental market.

d/ Reduce graffiti and vandalism as a means of keeping rents down.

e/ Prevent un-American renter underclasses from forming.

f/ Keep renters (which are all pointed in the wrong direction) from getting involved in land use decisions.

x/ In order for renters to avoid this tax, the renter must move at least 500m away from the first rental.

18/ Renters shall not be allowed to participate in land use and urban planning decisions. Only majority land owners and property tax payers in the areas under consideration shall be allowed to participate in land use and urban planning decisions.

19/ In HOAs and buildings and developments that are over 90% owner occupied (and less than 10% rented) the recorder shall levy a 15% tax on monthly rentals and a 30% tax on weekly and nightly rentals. This tax payment shall then be transferred to the HOA's accounts.

20/ All prospective lenders and landlords shall be allowed to view the applicants complete:

a/ Credit report.

a/ Rental history.

b/ Property ownership history.

c/ Escrow history.

d/ Bankruptcy history.

e/ Court and unlawful detainer judgements.

f/ Criminal history.

x/ When a person makes a rental application, loan application, or job application, it shall be understood that this application automatically grants consent for the landlord, lender, or employer to check the applicant's credit as the Senate determines is relevant to that sort of application. There shall be no special authorization documentation other than a signed rental application, loan application, or job application.

21/ So that deadbeat renters do not raise the cost of rental housing for the good people, Government shall both verify identity of tenants and keep a national database for each person's rental and eviction history. This tenant history shall also list the person's criminal convictions, bankruptcies, civil judgements, employment, and income. Landlords with rental applications may access this public history free of charge by sending an image of the signed application. The comments of past landlords shall be kept for 10 years. The tenant may comment on these landlord comments and post photos and videos in response. All landlords and tenants shall be automatically and objectively rated for plaintiveness.

22/ Landlords, lenders, and employers shall always be allowed to discriminate against with a prior history of:

a/ Violence.

b/ Felony convictions.

c/ Bankruptcy.

d/ Evictions.

e/ Failure to graduate or test out of secondary school.

23/ Landlords shall always have a right to verify applicant tenants. Landlords shall always be allowed to discriminate against people who:

a/ Don't have, or make enough to pay the rent.

b/ Have an irregular source of income.

c/ Have insufficient verifiable income.
d/ Do not provide required identity documentation.
e/ Have too much debt.
f/ Have been recently hired.
g/ Have a bad credit history, or a history of late payments.
h/ Have had a prior eviction or bankruptcy.
i/ Have a criminal record.
j/ Are non-citizens or immigrant citizens, for these may flee the country owing people money.
k/ Have moved frequently.
l/ Have certain prohibited pets or animals.
m/ Have drug or high level alcohol licenses.
n/ Are tobacco users.
o/ Have forfeited their entire deposit in previous rentals.
p/ Have left previous rentals owing money.
q/ Have had more co-tenants than the maximum agreed to in the rental agreement.
r/ Have too many vehicles.
s/ Are apparently intoxicated during the application process.
t/ Have a history of frequent moving or job hopping. u/ Have had 3 or more police calls in the last 15 years.

24/ Landlords shall not have the right to enter premises they have rented out, unless there is a genuine emergency situation. Except for genuine emergencies, landlords shall be required to treat their rented property as if it belongs to the tenant until the tenant moves out.

25/ When properties are under transaction for purchase, sale, or lease, the county recorder system shall put a block in place to prevent other people from recording a lease or second purchase transaction agreement.

26/ In all property transactions, the property shall be delivered vacant and with no tenants unless the buyer signs off in writing to taking the property occupied.

27/ In times of disaster, where over 300 homes are destroyed in a community, landlords shall be required to give at least 3-months notice if they wish to evict their tenants so they can charge other people more money because of the disaster.

28/ For tenant relationships over one year old, landlords must give tenants at least 60-days advance notice of any rent increase, agreement changes, or termination of tenancy. If the tenancy is over 3-years old, or the rent increase is over 8%, landlords must give at least 90-days advance notice. On the other side, tenants shall only be required to give 30-days notice at all times.

29/ Landlords shall be allowed to discriminate against illegal business operators, prostitutes, drug dealers, and people who bring many different sex partners home with them. This is all on the grounds that the traffic and security risk they bring to their neighbors. Landlords shall also be allowed to discriminate against pet owners as they like. Landlords shall not discriminate against children or families, except in buildings for senior citizens over age 65.

30/ Government shall not limit a landlord's ability to charge the market rate for housing, or renovate, or evict and re-tenant their entire building or complex, or part of their property involving 8 or more units at once.

31/ Government shall not limit the number of hotel rooms or rental units in a city. All rent control programs and rent stabilization programs shall be prohibited and immediately shut down, and all existing rent control programs shall be void

with immediate effect and all tenants must be out, or pay the new rent within 1-year unless they get the property in the reapportionment. The rights of possession under the reapportionment called for herein will make rent controls completely unnecessary in the short run. From now on, rent controls shall be considered communist and stupid and for these reasons all shades of rent control, and all long-term forms of rent control (over 6-months) shall be prohibited. All forms of long-term rent control, and rent stabilization shall be regarded as related to communist property seizures, and a thing that is completely unconstitutional. Affordability of rent shall not be considered something that is regarded as a landlord generated thing, but is a market generated thing. Government shall have no power to set rent except for up to six months in a national emergency. Landlord still have the right to evict tenants. Landlord still have the right to stop renting properties and sell them. If rent control is ever instituted, or property is taken by government either in whole or in part, then government must pay the land owner a fair amount.

32/ Government shall be prohibited from subsidizing housing to make it affordable. Also, It shall be thought that subsidized housing:

a/ Is a wasteful way to do government handouts.
b/ Is easier to corrupt and harder to administrate than cash handouts.
c/ Is harder to curtail.
d/ Is a thing that creates communities and community cultures of dependency.

33/ It shall be noted that serfdom frequently begins with officially-sanctioned old and valuable under-market lease-holdings that people eventually tend to pass on to their descendants, descendants loyal to the foreign junta that helped them get their sweet under-market deal. As our nations of freedom is opposed to serfdom, we shall also be opposed to rent-control and leases that cannot be terminated by the owner.

34/ Government shall not limit the security deposit a landlord may collect for his rentals as the hotel industry might have us do. Government shall not interfere with the sharing economy by limiting security deposit amounts.

35/ In matters of policy decisions, government shall listen almost entirely to monthly and weekly landlords, while it shall almost totally shun the backwards-facing nightly landlords and hotel operators.

36/ All tenants are supposed to leave their rentals in the same condition they rented them, ordinary wear and tear excluded. To encourage honest renting, the county recorder system shall offer both move-in and move-out video inspections of rented premises with voice annotation and transcripts. The county recorder system shall charge 2-hours wages per urban and suburban video inspection of up to 30-minutes. In exurban areas the charge shall be 3-hours wages. Owners, managers, private companies and individuals may also offer move-in/move-out documentation services at market rates, however these might not be as believable in court.

37/ All tenant security deposits shall be kept by the county recorder system in interest-free accounts. Where landlords make a claim against a deposit they must show good evidence to the county recorder system and convince the

county recorder system that the claim is valid. Then the county recorder system shall debit the deposit, and charge 10% of the amount claimed from the deposit amount for administrative costs. The landlord must swear to the honesty of his evidence, and clearly show that any damage exceeds normal wear and tear to make a claim for the security deposit.

38/ Regarding tenant move-outs, where tenants abandon property at the rented premises for more than 1-day after the scheduled move-out:

a/ Abandoned property shall not be subject to claims of personal sentimental value, collector's value, antique value, or similar arguments of high value. However, printed photographs, data storage, and small electronics abandoned by tenants must be stored by the Landlord for 1-year upon apparent abandonment by departing tenants. The term small electronics shall not apply to televisions, monitors, or audio equipment. However, it shall apply to all tablets, telescreens, laptops, computers, servers, cameras, and data storage equipment.

b/ Abandoned items that in total are worth in total less than 1-day's wages may be sold, given-away, or thrown away by the landlord's side upon adequate video documentation of the abandoned property and its net value. Where landlords dispose of abandoned property that the court finds to be worth up to 4-day's wages in present used-condition, assuming garage-sale/ pawn-shop, and second-hand-store value, the penalty shall not exceed 4-week's wages. Also, the reasonable cost of disposing of abandoned used mattresses and bulky garbage may be used to increase the 1-day's wages amount mentioned just above.

c/ All county recorder system move-out inspections shall offer a valuation of abandoned property if any. If the county recorder system values the abandoned property as worth less than 5-day's wages, then the abandoned property (but not photos, or electronics) may be freely disposed of by the landlord's side.

d/ Where the move-out inspection values the property at more than 5-day's wages, the landlord must store the abandoned property for 60-days, either on premises or in a third-party storage space. If the property is stored on premises, the landlord shall charge the tenant 1-day's wages per month or part thereof to get their abandoned property back. If the property is stored at a third party storage facility, the tenant must pay the third party storage facility its regular monthly fee for the smallest storage area that the goods will fit in. If the property is not re-claimed at the end of the 60-day period, it may be sold-off or given-away, or thrown-away by either the landlord or the storage facility as applicable. These fees shall however, not apply to abandoned photographs and small electronics, which must be stored by the landlord for free.

e/ Where tenants vanish leaving a furnished dwelling full of all their things personal and sentimental, and these are valued at over 1-month's wages by the county recorder system, the county recorder system shall store these things for up to 1-year at a market rate storage facility (upon landlord delivery) before they are auctioned off, the proceeds going to the county.

39/ All bathroom/shower condensation mold shall be the responsibility of the tenant. Mold from roof leaks, and leaks in

neighboring units and from building plumbing shall be the responsibility of the landlord. Tenants shall no longer have any right to seek damages from landlords for exposure to so-called toxic mold in their units. Toxic bathroom/shower mold shall be considered a fake thing fostered by an unholy alliance between oil interests and lawyer interests.

40/ All landlords shall be required to give a complete list of trusted service people to their tenants (service people such as fresh water plumbers, dirty water drain services, roofers, electricians, locksmiths, HVAC techs, pest control people, and handymen). All tenants shall be required to call these people first in emergency repair situations. If the trusted repairman says that the work is the responsibility of the landlord, and that the trusted repairman will get straight on the problem, then the tenant shall not be allowed to call other repairmen.

41/ For all nightly and weekly rentals, there shall be no tenant right to make emergency repairs and bill the owners. This right is only for monthly or tenethly rentals. In nightly and weekly rentals there shall also be no right of the guests to re-key the locks, however in monthly rentals the tenants shall have the right to re-key the locks.

42/ In order to use the tenancy court to authorize repairs, there either must be a genuinely urgent problem, or the landlord must be unresponsive for the prescribed period of time.

43/ Regarding roof repairs and leaks, the Senate shall establish detailed guidelines on what conditions must be corrected, and how long the landlord can take to make these repairs.

44/ To use the tenancy court to compel repairs, the tenant must clearly record the emergency on video with a properly sized video scaling ruler.

45/ Tenants shall no longer have the right to make expensive repairs, or non-emergency repairs at the landlord's expense without either the landlord's permission, or a ruling from the tenancy court. However:

a/ Where there is a roof leak, tenants may buy a tarp and put it on their roof at their own risk. They may also buy buckets and bill the reasonable cost of the tarp and buckets to the landlord (who eventually gets the tarp and buckets).

b/ Where there is a roof leak, or broken pipe, or a sparking/ hot electric situation, or a fire hazard, the tenant must first call people from the landlord's list of trusted emergency repair people. If the landlord does not supply a list of trusted emergency repair people, or these people are unable to come within a realistic time frame, then the tenant must go to tenancy court with videos for a ruling before being allowed to make repairs by themselves.

c/ If the tenant order's a grossly overpriced repair, or a repair for a non-emergency situation, or work from friends, or people connected to the tenant, then the tenant may be held responsible for paying for the work.

d/ No tenant may take any action for: faucets leaking down a drain, broken appliances, mold, or minor roof leaks that do not drip but only wet their ceiling.

46/ The following noisy activities shall not be allowed in rental properties unless specifically allowed by the landlord in the lease:

a/ Tenants and their guests who play amplified sounds or

music at any time that can be heard by neighbors in their units.

b/ Tenants and their guests who yell and disturb neighbors.

c/ Tenants and their guests who make noise between 9:00 pm and 10:00 am.

d/ Tenants and their guests who dwell outside, making noise, except in designated outdoor areas.

e/ Loud parties in studio or 1-bedroom units that involve more than 6 non-resident.

f/ Loud parties in 2-bedroom units that involve more than 10 non-residents.

g/ Loud parties in 3-bedroom or larger units that involve more than 30 non-residents.

h/ Parties where people charge for entry.

i/ Tenants and their guest who idle their vehicles for more than 5-minutes, except when it is near freezing.

47/ The following shall be investigated and processed by the county police and prosecuted in the criminal courts, and not the civil court system:

a/ illegal entry by landlord.

b/ Illegal discrimination. This must be based on a pattern, and not one single tenant. Illegal discrimination shall also not be applicable where one ethnic or religious group is very common in the neighborhood and the landlord has anywhere near the ratio of that ethnic group in their buildings.

48/ The right to shoot intruders shall never apply to family members and other people well known to the shooter. This includes all landlords and their well known workers, unless the bread in is occurring quietly at night.

49/ All rail interchanges, township entry-points, and police stations, and post offices shall have ample code-entry, scan ID key lockers to aid the people in sharing their things for everyone's benefit. These shall have multi-video surveillance, and they shall be checked by police from time to time to make sure they are not being used for drug trafficking.

50/ Where multi-occupant buildings have self-service secure entrances requiring some sort of key, code, or identity verification:

a/ It shall be a trespassing crime for people to enter without authorization from an occupant or the building ownership or managers.

b/ It shall be a trespassing crime for authorized people to let in unauthorized people in who they do not know, including workmen, delivery people, and women.

c/ Those letting unauthorized people come in shall be liable in money court for the damages caused by those they have let in.

d/ Where unauthorized people sleep, camp, urinate, or loiter in controlled access places, there shall be double penalties.

e/ When unauthorized people act aggressively with those who refuse to grant them entry into a secure entrance, this may be considered an assault.

51/ The Sub-Senate with the help of the assessors office shall set the starting bids for all government owned property that is leased or sold. All land parcels shall be divided so they maximize return to Government.

52/ The occupant of all monthly (and longer) rentals shall be obligated to pay the prorated property tax directly to the assessor for each period they occupy a premises. If the unit is unoccupied, then the owner pays.

If the unit is sublet, the man in the middle remains responsible for the sub-tenant's taxes and utilities. This is so that temporary subletting to friends still works, but long term opportunistic subletting doesn't really work.

53/ It shall be noted that under the old system, Ishtar's tenants in it's hotels can be thrown out in a moments notice at the will of their landlord, while all other landlords have to go through a lengthy process of eviction.

54/ Government shall make no laws that favor long term tenants over short-term tenants. In fact, where there is demand for nightly and weekly housing that is driving monthly and annually rented housing out of the market, Government shall be required to favor the shorter-term housing. This is because short term housing is primary income for the community and long term housing is not. It is also because an abundance of short-term housing keeps people moving to the community and helps support the local economy.

Communities shall however be free to prohibit and regulate weekly and nightly rentals. Government shall not tax short term rentals any more than long term rentals.

55/ All nightly and weekly rentals must have free internet connection of the required minimum bandwidth. If this doesn't work at the required bandwidth, then like with no hot water, or no heat, the unit shall be discounted by 50% of the rental fee, with the tenant of the nightly or weekly rental able to move out and get a full refund of the unused rental fees.

56/ All periodic rentals of 7-days or less shall be considered daily rentals, and daily rentals shall subject to instant eviction like in a hotel. A week to week rental that is many years old shall always remain a periodic rentals of 7-days or less. However rent increases, changes in the lease terms and for tenants of more than one year shall require 60 or 90 days for long-term tenants.

57/ Vacation rental of less than 30 days rented to people who live in another city shall also be considered daily rentals, especially in the case of noise violations and damage to the premises. Also, there shall be double penalties for people convicted of noise violations in short term rentals. If this involves a party where parties are prohibited, then the noise penalties shall be tripled.

58/ It is an intended design feature of our new 2-tier rental system that problematic people who repeatedly have trouble with landlords and neighbors will frequently have no alternative but to live in weekly rentals or save up and buy a place. It is thought that this 2-tier rental system will greatly reduce housing costs for good renters. This while it only slightly harms those who deserve to live in at-will housing. Each unlawful detainer action shall go in the tenant's permanent record and make it harder for the tenant to rent anything but a weekly rental. Tenants with a went-to-trial eviction loss may be openly discriminated-against by monthly landlords for 10-years based on that fact alone.

59/ Those who rent property and equipment out shall have the right to use the government's spare-capacity expedited rental court system. The Rental court system shall be used for all equipment rentals, and all realty rentals of longer than week-to-week. For daily, sweek-to-sweek, and week-to-week realty rentals, there shall be no tenancy court or unlawful detainer action needed. In these shorter term rentals the tenant may be kicked-out by the landlord and police at any

time at the will of the landlord. However, in such circumstances, the landlord must pro-rate and immediately refund all unused rent. In this way noisy hotel guests and weekly renters can simply be evicted on the spot by the landlord for certain Senate defined infractions such as conducting a party, or playing music too loud, or having too many guests at the rental or other things.

60/ When people rent-out furnished rooms or beds in their own residence, a residence they own or lease, it shall always be considered either as a weekly or nightly rental with regard to forcing their guests to leave depending on the agreement. If no agreement exists, it shall be considered a nightly rental.

61/ All evictions shall include a restraining order language against evicted tenants coming back.

62/ Where non-citizens pay rent, this shall always be considered as if they were living in a weekly rental with regard to their contract rights.

63/ Where rentals or businesses exclude animals or pets, this exclusion shall include all forms of emotional support animals.

64/ Government shall not have any tenant advocacy departments or landlord advocacy departments. Also, no non-profit organization shall advise either tenants being evicted, or landlords trying to evict tenants.

65/ Regarding improvements made by tenants, unless the rental agreement says otherwise, all wiring, all piping, all window coverings, all floor coverings, all painting, all planted plants, all things attached to the walls, all doors, all hardware, all countertops, and all attached cabinetry and furnishings shall become part of the property, and this must be abandoned by the tenant on move out. However, air conditioners, all air-conditioning blowers, and all appliances, plug-in, or wired to the building, and all electronics shall not become part of the property, and this may be removed by the attendant upon departure.

66/ Those who intentionally destroy property shall be subject to criminal charges of vandalism whether they are some random person, or a recorded tenant without permission to remodel a premises.

67/ Whenever requested, the county recorder system shall give unbiased third-party, pre-move-in and post move-out checklist and photo/video inspections of all rental properties for a reasonable fee.

68/ Landlords shall always be free to discriminate against renters because:

a/ They have no children of the age of other families with children in that community.

b/ They are not over 60 if the other people in that community are over 60.

c/ They have a license for prostitution, hard drugs, heavy drinking, or they have a felony conviction, or a domestic violence conviction.

d/ They don't make enough money to pay the rent.

e/ They are foreigners and judgement-proof, and might run-off owning the landlord money.

f/ They bring too many people home to spend the night.

g/ The tenant(s)/ prospective tenant(s) are homosexual and the community is a breeding community.

69/ The county recorder system shall offer key pick-up and drop-off as a paid service.

70/ All HOAs and rental property managers shall be free to

require that all delivery drivers and all taxis drivers be identity verified by the county recorder system in order to enter their community.

71/ It shall be noted that long-term, under-market valuable lease-holds that people pass on to their children has historically been a well-worn path to serfdom. To prevent this, we shall say that no tenancy over 20-years old shall be inheritable. Also that no tenancy that has been inherited shall live for more than 20-years. This includes all rent-control properties if any.

72/ It shall be thought that all the other renters pay many times over for deadbeat tenants when these become a cost of doing business. In other words, all the other people eventually pay for an unjust rental system where people can live for months in units without paying rent. Therefore, government shall be required to have policies that quickly evict non-paying tenants and also that eliminate deadbeat tenants first from the monthly rental system, and then from the weekly rental system.

73/ Where tenants or occupiers of any sort have apparently intentionally vandalized, a property they rented (or claim to have rented) This shall be justification for:

a/ Criminal charges of vandalism where the county recorder system's walkthrough video records shows that the condition of the premises has been rapidly harmed in a way that suggests intentional vandalism.

b/ Police eviction of all occupants when charges of vandalism have been authorized by the county recorder system.

74/ All non-refunded deposit income for all sorts of rentals are taxed at 50% if not refunded.

75/ All forms of Leases for laundry rooms, vending machine areas, car washing facilities, food trucks, and mobile home trailers, as well as all forms of trailers, food court kiosks, and all other forms of kiosks, shall not exceed year-to-year terms. This shall apply retroactively to all existing leases.

76/ All landlords, including nightly rental landlords shall have the right to see the records of their prospective tenants with regard to crimes, drugs, alcohol and tobacco use as well as pet ownership. In fact, the recorder system shall keep a page on this upon request by all renters. Landlords shall be allowed to disqualify potential tenants based on criminal convictions, high use alcohol licensing, drug use, and tobacco consumption from staying in their rentals. Without this system, all renters will be paying a few percent more extra rent to deal renters that are actually disqualified.

77/ All slab leaks and pipe leaks in residential multi-family rental housing shall be the responsibility of the landlord. However, all leases shall state a maximum value for water damage of furnishing in the event of a slab leak and another in the event of an overhead leak.

78/ There shall be no legal right of landlords to compel tenants to pay any fines or penalties or late fees regardless of what any lease says. Once the tenant moves out, no landlord fines shall ever remain a valid claim upon that tenant. However landlords shall have the right to evict tenants for non-payment of legally allowed fines and penalties. Also, all late fees are supposed to be paid current within 30 days of notice, or there is always considered a breach of the agreement.

79/ Tenants shall not be allowed to paint or replace floor

coverings, or window coverings, or cut trees or trim shrubs or other cut other vegetation, or plant vegetation without written permission from their landlord, and when they do these things without written permission, it can be considered vandalism. Also, if the tenant does anything to harm the building's roof, including especially walking on it, it shall be considered the crime of vandalism when they do this.

80/ All future leases having clauses calling for landlords to receive a percentage of the sales of their tenants shall be voidable at the option of the tenant. All existing leases, having clauses calling for landlords to receive a percentage of the sales of their tenants shall be renegotiable or cancelable at the option of the tenant.

81/ No air fresheners or perfumes shall be used in either nightly bookings or longer term rentals.

82/ It is the strangest thing the way restaurants and shops have the right to call police when people take their things and then refuse to pay. But with landlords and their big payments, landlords don't have the right to call the police. We seem to have this backwards. And this seems to be by design, so that our country is easier for barbarian hordes to come to and settle in.

83/ There shall no longer be any squatter's rights at all. And the phrase squatters rights shall no longer exist in our legal system. This is a term that was introduced by Islam and its invading hordes so it has an easier time defeating us. So we shall no longer have this in our legal system. Where tenants have not paid rent for more than 60 days, the landlord may rent their place to other people, in addition to the current tenant(s). Where they haven't.

84/ No personal bankruptcy shall delay any residential eviction for more than 60 days. No fictional citizen bankruptcy shall delay any commercial eviction for more than 90 days, unless the bankruptcy court believes that the landlord will eventually make good on the back rent, and then the maximum delay may be up to 180-days.

85/ When tenants neither pay rent due to the recorder as they agreed, nor move out after more than 90-days, it becomes a matter of criminal fraud with the penalty varying according to how much money in unpaid rent there was in the fraud.

86/ Where tenants make repairs or improvements to the property they rent:

a/ These become part of the landlord's property, and tenant may not remove these

b/ Without a recorded agreement that the landlord contribute money, the landlord shall be obligated to pay nothing for the tenant's work.

c/ Where the landlord wants the property restored to original, the tenant must do this or pay for this.

87/ Where tenants use rent to make repairs, they must pay the recorder system their rent anyway, but they then make a claim to use it for repairs.

88/ The maximum rent that a tenant can withhold to make repairs shall be 30 days rent, unless the landlord agrees to this in a recorded lease, or a recorded addendum document. Beyond 30-days, the law is of the opinion that the repairs are too extensive, and that the tenant should just ask the recorder office to rule on whether the repairs are big enough to warrant cancellation of the lease due to sudden defect involving the leased premises.

89/ Eviction courts have the right to seize the financial system assets of tenants and to put judicial system liens on their name and ID. To avoid this, they only need to move out.

90/ The county recorder system shall offer unbiased third party documentation of move-in condition and move out condition at cost. This shall include realty, vehicles, tools and other things. Where people ruin the property rented, either unintentionally or intentionally, in the judgement of the neutral third party as shown in the documentation photos, this shall generally go on the renter's permanent lifelong record.

NR'53. EVICTION

1/ Deadbeat tenant situations are poison for the other renters. They are a huge tax on everyone who rents, and a tax on new rental housing. And this especially when it might take half a year to get legal resolution of an obviously unjust situation. It shall be thought that liberal squatting laws are always well-backed by Ishtar and its eternal agenda of exporting people to become invaders.

2/ We shall now use Tenancy Court for the court that decides in all matters of tenancy and eviction such as:

a/ Unlawful detainer motions (now called an "Motion for eviction").

b/ Motion to resolve a financial dispute on behalf of the landlord and tenant.

c/ Motion for deficit judgement.

d/ Motion to compel landlord repair.

e/ Motion for tenant repairs.

f/ Motion to immediately evict (This is only for extreme reasons such as tenants vandalizing the premises.)

g/ Motion for retaliatory eviction protections.

3/ Tenancy Court is much easier to understand term than the lawyer Mafia's hide-the-true-meaning-term "unlawful detainer". And while we call our 11-hours a day 364 days a year Sub-Senate emergency court as Tenancy Court here, it shall also give decisions about many other things.

4/ Tenancy court shall not take place via live assembly of people in one place. Instead, they take place by telepresence from any county recorder system's ID verified telepresence booth.

5/ Tenancy Court shall give people advance notice of trials, and also send them reminder messages. However if either party in Tenancy Court fails to appear for their trial, then a default judgment shall be automatically entered. Also, when tenants are unable to respond sensibly at a hearing or trial, they shall forfeit their case.

6/ There shall be no continuances or postponements made by the tenant in court for matters of tenancy or eviction.

7/ For the most part, the eviction system will automatically start the eviction process for non-payment, not the landlord. And the landlord will not be able to reverse or halt the process without lending money to the tenant to pay the rent. This approach is thought to be fairer, safer, and less expensive for society than leaving this unpleasant high-conflict part of renting properties to landlords. So, under the new system, evictions and repossessions for non-payment will all be automatic and set in motion by the recorder system as neutral third party. The recorder system will ultimately authorize a low level of the police force to handle the

evictions from rented property and property held as security for a loan. These two things are costs for landlords and lenders that could very easily be done as a part of the recorder system for less than 10% of their present cost.

8/ Lawyers shall not be allowed in Tenancy Court for residential tenancies. However lawyers may advise and consult out of court. They shall also be allowed where fictional citizens are either the tenant or master tenant.

9/ Where tenants lose in Tenancy Court and get evicted, they shall thereupon have 72-hours to move their things out, or the sheriff will come and move their valuable things to storage at their expense, in much the same way vehicles are impounded.

10/ When people who are in foreclosure or eviction intentionally harm the property before it goes back to their creditors or landlord, these may be treated as vandals and jailed according to the damage they have caused. Where a fire occurs during an eviction, we shall have a low bar for calling it arson.

11/ Where a landlord owns rental property with gross annual rents under 2-year's wages, the courts shall, all things being equal, favor the landlord over the tenant. Where a landlord owns rental property with gross rents over 2-year's wages, the courts shall, all things being equal, favor the tenant over the landlord. In order to be eligible for this paragraph, the landlord must be over age 21 and have at least one non-adopted child.

12/ There shall no longer be any right of tenants to withhold rent for any reason having to do with the condition of the property except where the tenant moves out. In other words: the rent must now be paid, regardless of the condition of the property, unless the tenant moves out. Where there is a big genuine natural leak or an external fire, or a similar problem, and a tenant moves out, this together with a formal notice of quitting a rental agreement shall be considered a legitimate reason for breaking a lease or rental agreement. Thereupon the landlord shall refund any unearned rents to the tenant.

13/ Nobody shall judge in an unlawful detainer action, unless they own their own home.

14/ The acceptance of rental payments during an eviction shall no longer have any bearing on the eviction in progress as it once did.

15/ There shall be 4 unlawful detainer processes: Corporate commercial, individual commercial, above the median rent residential, and below the median rent residential. The Senate shall make separate laws for each.

16/ Where counties cannot send cases to trial within six days from filing, or cannot resolve cases these within 12 days, the landlord shall be free to use another county as it wishes for processing their eviction.

17/ Evictions shall be thought to be the most binary of legal actions. This means that one side is normally clearly right, and seldom are both sides both right or both wrong.

18/ Where landlords are awarded damages from tenants, and the tenant is unable to pay, the tenant shall be banned from monthly rentals until the landlord has been paid the damages that the court awarded.

19/ In residential Tenancy Court, there shall be no appeals, or damages exceeding three month's wages.

Tenants, shall not have the right to use a lawyer or in Tenancy Court. Tenants may use a surrogate if they are incompetent, or unable to speak english.

20/ Where orders the eviction of a tenant, the owner may call for police eviction of the tenant after 72 hours.

21/ The tenancy system shall not allow a tenants to transfer their leases or rental obligations to other people as a successors without the landlord's permission. Thus the system is a bit unfriendly to the corrupt practice of key-fees. Those with an obligation to pay rent or fees in a rental shall not be allowed to assign or transfer that obligation to anyone else.

22/ Matters of housing discrimination shall be heard in the criminal court, and never in money court. If people discriminate against others, it shall be a criminal matter, not a matter of the money courts. People may be fined and sent to jail for discrimination, but they can no longer be sued for this in money court.

23/ The court system and especially the Tenancy court system shall not be available for the following sorts of possession. All of the following shall be forcibly evicted by police at the will of the property owners or their managers. a/ Hotel guests, weekly rental guests, and all tenancies of 30-days or less (even if renewed for many years).

b/ All occupancy without a tenancy agreement recorded by the county recorder system.

c/ All vacation rentals of less than 30 days.

24/ All evictions shall be based on information already submitted. Only new activities may be added after the filing is made. Therefore, in unlawful detainer actions, there shall be no discovery, no sub-hearings, no motions, no stays, and no other ways to slow down the process by which justice comes to non-paying tenants.

25/ Where tenants harm landlords without violent provocation, there shall be double penalties. Where squatters harm landlords and legitimate tenants without violent provocation, there shall be triple penalties. Where squatters strike and threaten legitimate occupants in their own residence or business, the occupants shall have the right to treat the squatters as if they had broken in and entered the occupant's residence or business. In other words, the legitimate occupants shall have broad rights to shoot the squatters in self defense. Where people return home after less than 36 days to their previously fully furnished residences, and they find strangers in their homes, They shall have the right to shoot these people regardless of who arrived at their house first. Also, If a burglar doesn't leave, does he become a squatter? Certainly not.

26/ Regarding utilities in rentals:

a/ All nightly and weekly rentals shall include all utilities, and the landlord shall not have the right to bill for utilities, or stipulate any tenant payment of utilities.

b/ In all rentals, landlords shall be prohibited from marking up the cost of utilities by any amount, even if this is called for under a pre-existing lease contract.

c/ Where residential utilities are shared, the calculation shall be based either on sub-metering, or where this is not possible, it shall be based on interior floor area.

d/ To reduce squatting, nobody shall be allowed to open a utility account without either proof of ownership, or a recorded

lease or other grant of permission from an owner to open a utility account at a stipulated address.

e/ To reduce squatting, we shall say that if an owner is certain that he has not rented out a property, that he shall have the unlimited right to turn off any or all utilities at will, and the occupant must take the owner to fast track at unlawful detainer court to get the court to make the owner turn the utilities back on by swearing under penalty of perjury that the lease they have shown the court is indeed real. If the tenant cannot do this, then he shall lose. If the matter is a standoff, the burden of proof is on the tenant's records with the county recorder system.

f/ Where there is no recorded rental agreement, the property owner may turn off the utilities at any time and without notice to the occupants.

g/ To reduce squatting we shall say that squatting in a person's home, or in the home of a recently deceased person is a matter of criminal court, and not civil court.

h/ Regardless of any term stipulated in any rental agreement, all leases of one week or less shall not include any right to open a utility account, while all leases of one month or longer shall automatically transfer all utility accounts to the new tenant.

27/ The counties shall not be allowed to make their own rules about tenancy, evictions, and squatting. All must follow the national laws, which must follow this constitution.

28/ Just because somebody has a lease, it doesn't mean much unless it's with the property owner and this has been verified by the county recorder system.

29/ Water and sewer utility accounts shall always be billed together and managed by the same billing infrastructure. Water, sewer, electric, and gas utility account shall not be allowed to charge more than 10 minute's wages per month to have an account. After this, they shall charge based on usage.

30/ Tenants shall not have the right to use either the tenancy court system or any tenancy lawyer, or any tenant advocacy group where:

a/ The tenant does not have a recorded lease.

b/ The tenant has an expired lease.

c/ The tenant is in a weekly or nightly rental.

d/ The rented property is being emptied for renovations or demolition.

e/ The tenant never paid rent.

f/ The rental property is someone else's principal residence.

g/ A fire occurred at property rented to the tenant.

31/ It shall be a felony when squatters and people without a lease take money to leave. This should be considered a form of extortion, and these people should get up to five years in prison for this where it can be proven, even if the owner swears not to give them any trouble for it.

32/ All housing for the poor shall be considered nightly rentals, and the people who live in this sort of housing may be evicted at any time, as if the hotel said that they were full and had to leave by noon the next day.

33/ After the reapportionment, everyone in government or private housing for the poor shall be expected to change where they live at least once every 60 days. Also, all government housing for the poor must be in the form of dormitories shared with unrelated people.

34/ Where a lease specifies no tobacco, or no dogs or no cats, or no house parties, these restrictions shall be enforceable with immediate effect by the landlord, and the tenant may be thrown out in 72 hours. Evictions for destroying a premises can be immediate if intentional vandalism is witnessed by police.

NR'54. SQUATTER'S RIGHTS HELP INVADERS

1/ Throughout history, the easiest way to get a house was to drive-off, or kill its occupants. And this is a huge reason why we have our castle doctrine, where we allow deadly force for home invaders and home breakers.

2/ Throughout history, the easiest way to get a house was to drive-off, or kill its occupants. And Ishtar knows this fact very well. And this is why Ishtar struggles endlessly to insert a great many pro-squatting rules in our legal code (using the disguise of socialism and pro-social advocacy) when we should by our own native agenda have no squatter's rights at all.

3/ If we allow any squatters rights at all in our legal code, we will tilt our nation towards legitimizing the violent property seizure. We will also have policy that fans the flames of war, civil unrest and strife. No, we shall go in the opposite direction and completely remove all rights for squatters from our legal code. We shall outlaw squatting to help eliminate a powerful incentive for foreigners and the poor to kill our people in war and civil war. So-called squatters rights shall be seen by this constitution as an ancient practice artificially created by an invasive foreign parasite race to facilitate their future invasions.

4/ This constitution absolutely prohibits all rights for squatters. We shall always defend the rights of property owners over the crazy idea of rights for squatters. Further, squatting shall be considered a police and criminal matter akin to house breaking, when squatters break into peoples homes, remaining (let alone staying) in them without a recorded lease they shall be charged with breaking and entering and perhaps burglary. Also, to maximize our tax income, simplify questions of tenant and landlord rights, and completely stamp out squatting, we shall all but criminalize the renting of property without a lease recorded through the recorder system.

5/ So there shall no longer be any tenancy, ownership, or other rights for squatters. And the question of legitimacy of a tenancy/lease shall be a thing measured by one metric alone: Do the parties have a lease recorded by the recorder system. Where a person who is occupying a place cannot prove that they have a valid ownership or rental rights through the recorder system to that premises, and another person can verify ownership or lease rights, and that other person is willing to sign a complain, the police shall arrest the person who cannot verify their rights. and depending on the circumstances, the intruder shall be charged with either trespassing, or some crime like breaking and entering.

Also, looking at history's records, we clearly see that squatter's rights are primarily a thing of Ishtarian conquest, a way for waves of poor desperate immigrants to grab more. Therefore, we shall have it that squatter's rights shall be thought a thing that massively incentivizes murder,

war, invasion, genocide, murder of entire villages, pillage, rape, and other forms of violent crime by foreign hordes seeking to squat and steal property in our lands. Squatting rights shall also be thought to be a thing that helps our bands of own native outlaws to avoid capture.

6/ To reduce squatting, we shall say that squatting shall never be a matter for the civil/ money court system, because:

a/ Squatting is a grand theft sort of crime. Yet, most squatters are poor, and judgment-proof. Therefore, the money court system is ineffective.

b/ The slow resolution of squatting issues by the civil courts, and even the accelerated unlawful detainer court system, shall be thought a thing that is quite unjust. A far better approach is to have a universal public record of all leases, a thing that costs practically nothing in today's information age.

c/ The slow resolution of squatting increases strife and breeds aggressive and often violent squatters.

d/ The slow resolution of squatting undermines the will of the people to work, and to improve their properties. In fact it is a step towards communism.

e/ Just having rights for squatters on the law books is a small added incentive for foreign invasion.

7/ Our nation shall have a great number of remote homeless bunks in 50+ person same-sex dorms (which system shall give priority first to disaster displaced people, the very old, clearly disabled people, then mothers and families with children, then men with children, then veterans, then single men.) Now that we have this system, we can completely eliminate squatting, which tends to be quite costly due to the vandalism and abuse of properties it commonly produces.

8/ All tenancies and rental agreements shall be required to be registered with the county recorder system. Thereupon the county recorder system shall give both the landlord and the tenant a county recorder system rental agreement reference number. Where an occupant of a property (even a nightly rental) cannot provide police with a rental agreement reference number, and police can verify the ID of the property owner, and the owner signs an affidavit that the occupant is not legitimate, police shall arrest the occupants for the crime of squatting which shall be punished much like breaking and entering. However, where the regional dorm system is overflowing, it shall not be possible to charge people for squatting.

9/ Where the county recorder system shows no tenants at a property, the owner of that property shall be free to change the locks at any time. Where the prior tenant signed his move out release and end of rental agreement form, the owner may seize all property left inside whether it comes from the prior tenant or from subsequent illegal squatters.

10/ When property occupants change the locks to a premises and they are not registered as tenants, this shall confer no tenancy rights under the law. All the owner has to do is call the police, verify his ID to police, sign an affidavit that the occupant(s) is not legitimate, and police must arrest all occupants for the crime of squatting if they cannot verify a recorded lease for that property.

11/ Squatters shall have none of the customary rights of self-defense we afford people in the places they live in. This is because the squatters are not in their place, but someone else's place. Squatters found with firearms shall be treated by

police and owners as armed burglars. If the firearms (or other weapons) are discovered, then the squatter shall be prosecuted for armed assault under the law.

12/ With regard to squatters in residential properties owned by individual people or families, and obviously filled with the personal belongings of these people:

a/ This shall always be considered breaking and entering by the judicial system.

b/ The legitimate occupant of a residential property shall have the right to shoot squatters in self defense upon returning home, even if he has been away for a year. This shall be thought related to his right to shoot people who break in to his home at night.

13/ The law shall make a sharp distinction between a people who squat in derelict and vacant buildings — and people who squat in people's furnished homes full of their things, their properties, their things, their clothing and their furniture and their household things. The former shall be a misdemeanor. The latter shall be a serious felony that is akin to burglary or breaking and entering. Indeed, the penalty shall be exactly the same as breaking and entering, and when foreigners squat, they shall be subject to double penalties.

14/ The moment a squatter leaves an enclosed premises, the owner or legitimate tenant may change the locks, or otherwise bar the door, or hire security guards and thus regain possession. By this process, the squatter(s) shall be considered locked out of their squat, and shall be considered a home breaker if they return.

15/ Regarding all unrecorded leases for real property:

a/ These shall be at will for both sides, and either side may cancel at any time.

b/ Tenants can be subject to arrest and charges if the landlord claims they are squatters.

c/ These shall be non-exclusive and the owner shall always be able to occupy the premises and rent the premises to other concurrent tenants, including noisy and obnoxious concurrent tenants.

d/ These shall not compel the tenant to pay any rent to the owner.

e/ The full amount of the lease shall pay consumption taxes.

f/ All tenant deposits shall pay consumption taxes upon receipt.

g/ The landlord shall have no right to compensation if the tenant damages the premises.

h/ They shall not create any debt to the owner on the part of the tenant, if the tenant does not pay rent.

i/ The Senate shall operate the money transfer system so that it doesn't really work with unrecorded leases.

j/ There shall be no right of either side to report or review the other side for bad behavior.

k/ Rents and loan payments not paid to the county recorder system on a recorded rental agreement shall not be considered paid under the law, but shall be considered an illicit business activity. It shall be thought important for an honest society that all rent and loan payments (which are inherently large relative to other household expenses.) be recorded.

16/ Squatters and unregistered tenants shall have no rights of exclusivity of occupancy. Other squatters may come along, and also squat, and so too may the owner return, and occupy

his place until each squatter leaves. Any number of other people (including people working for the owner) may come along shall be free to enter any squatted-in property, premises, or room as additional squatters, and the prior squatter(s) shall have no right to prohibit their entry. Owners, legal tenants, and their workers, and security personnel shall also be free to enter properties occupied by squatters. Owners and tenants shall also be free to remodel places occupied by squatters at will.

17/ The right to squat shall be merely the right to remain until the squatter leaves. Once each squatter leaves a place, even going outside for a moment, they shall lose all of their squatting rights. Also, when squatters appear at court, they shall be thought to have lost all their squatting rights because they've left the property.

18/ When squatters leave a premises and also leave their property behind, those things shall be considered abandoned and there shall be no obligation of the owner, or other tenants to save those things, and then anyone may claim the abandoned squatters property, or dispose of it as they see fit.

19/ Where a premises exhibits evidence of forced entry, such as broken glass, or pry marks on a door, and that premises is occupied by a squatter, or things are missing, then police shall treat the squatter as a burglar, even if they self-identify as a squatter.

20/ When people come to a person's home and steal everything or most everything they have, the crime shall be considered an awful version of grand theft, and the penalty shall be 20-years.

21/ For the stability of the nation in times of crisis and when the legal system breaks down, it shall be thought important to have powerful anti-squatting laws and relatively foolproof rental agreement recording system. Also, there shall be no special legal protections for squatters. Here we shall have a simple rule: If there's no county recorder system record of a lease, then there shall be no legal tenancy, and the occupancy may be immediately declared trespassing and squatting by the owner's formal police complaint, and no other condition or delay may later be added to this. If the squatters really do not have a place to go, then they may stay at the County's same-sex, remote dorms where 50 men (or women) share a single bathroom and sleeping room full of bunk beds.

22/ From now on, everyone claiming to have a rental agreement shall be required to prove that they have a valid recorded lease from the owner of the property. And the easiest way to do that shall be thought to refer to a county recorder system rental agreement reference number that shows that according to the county recorder system, a person does in fact have a valid lease from the owner, or the owner's approved agent. So there will be no more fake leases, and no lengthy inquests to determine whether someone has a rental agreement or not. Also, it shall be up to the tenant to record the lease that protects them from their landlord's claims, and the landlord is not allowed to refuse to record the lease. Un-recorded leases not signed by the owner of the property, or their recorded agent shall not be valid for anything if the owner (or his agent) rightly disavow them as fraudulent.

23/ The county recorder shall have an occupancy verification system. Under the law, the properties not shown as occupied

in the occupancy verification system shall be considered as vacant. Where the county recorder system shows a unit as vacant, and the owner swears under oath to police that the person inside their property is a squatter or trespasser, police must arrest them on the spot.

24/ We shall say that if someone wants to be protected from claims that they are squatting, they have to record their lease with the county recorder's office. This shall require identity verification and county recorder system video notarization of everybody's face, fingerprint and signature. Thus it will be very hard to fake. All renters shall get an immediate county recorder system confirmation of everyone lease's recordation number on it and a similar confirmation/receipts of all rent and loan payments. All renters need to keep this number handy, because it is what protects their rights as a tenant and prevents them from getting kicked out at any moment by their landlord.

25/ It shall be considered perjury to swear on a police complaint that one has a lease when one does not, or to claim that somebody doesn't have a lease when they do.

26/ All landlords shall have the right to summarily evict all building occupants at will from their property where the following activities are occurring and the landlord has clear video evidence. Thereupon police must eject the occupants at the landlord's request:

a/ Where one or more occupants has engaged in a felony on the premises.

b/ Where the property has been obviously vandalized by its occupants.

c/ Where one or more occupants is illegally selling Mafia drugs.

d/ Where one or more occupants is working as a prostitute on the premises.

e/ Where one or more occupants is illegally operating a gambling site on the premises

f/ Where there is no recorded lease for any of the occupants.

27/ All property owners shall have the unlimited right to turn off the utilities, change the locks, undertake construction work, and remove the front door on addresses and properties that the county recorder system shows as vacant. However where the occupancy verification system shows legal occupancy they shall not have the right to disconnect utilities or undertake construction work without the approval of the tenant.

28/ Water, sewer, gas and electric shall be automatically connected to all properties. These automatically bill to the owner unless a tenant takes over under a recorded monthly rental agreement or longer, or an owner turns the utilities off to deal with squatters. Who pays for utilities and property taxes gets automatically transferred and prorated by the system when a monthly tenancy is created, and automatically transferred back when the tenancy ends. No valid tenancy shall be created for monthly renters (and longer) until the utilities and property taxes are put in the name of the renter.

29/ Squatting shall be a crime. Breaking and entering shall be a similar crime. And vandalism of squats shall be a third crime. All are separate crimes. This shall be so even for property that is apparently derelict and already vandalized. Also, if we allow special reduced penalties for derelict properties that have broken windows and are vandalized, we

encourage homeless people to vandalize our buildings so they may later squat in them.

30/ It shall be a crime for non-citizens to squat in property that is not theirs. When non-citizens are found doing this, they shall be sent to work camp for 5-years. Then they shall be deported.

31/ The penalty for illegal squatting in someone else's furnished home shall be 8-years of work camp on the first offense, and 15-years for repeat offenses. This is in addition to the occupant's extensive rights to self defense.

32/ Where the landlord can show reasonable evidence that a property was damaged during a squatter's stay, the squatters may be charged as vandals according to the damage they seem to have caused, and it shall not be necessary to prove that one particular squatter caused the damages, only that that damages were caused during the occupancy by squatters.

Tenants that have been judged by the courts to have intentionally intentionally vandalized rented property may be charged with vandalism of rental property and this shall go on their permanent rental record, as well as their permanent criminal record. We do this to reduce waste from vandalism in the tenancy and squatting equation, and to reduce rents for everyone. We as a society gain nothing by not prosecuting people who vandalize and destroy the properties that they have rented or financed, and we gain much by stopping this. Indeed, if we allowed everyone to do this, there wouldn't be any nice properties for rent at all. This is because far fewer landlords would rent nicer properties. Therefore, logic dictates that we have double penalties for vandalism of properties (and equipment) that have been entrusted to a tenant or a temporary user, or in broader terms there shall be double or triple penalties for vandalism of things rented, or shared, or group infrastructure such as transit vehicles, or automatic vending, or self-service supplies, or similar shared things that are part of the sharing economy.

33/ Where squatters break into normally occupied and furnished residences:

a/ The ruse of remaining at the crime scene shall count for nothing, and the squatters shall be charged with breaking and entering, as well as other relevant crimes such as theft or vandalism.

b/ The normal occupants shall have the right to turn off their utilities.

c/ The squatter shall have no right to keep the normal occupants out of their own home, including their guests, even if they changed the locks. In fact when squatters go through the charade of changing the locks, it shall count for nothing.

34/ It shall not be possible for people to squat or camp in the following places and in their yards and nearby outdoor areas:

a/ Businesses that have been open or occupied in the prior teneth.

b/ Schools. There shall be no overnight camping or protesting in any school.

c/ parking lot and city parks

d/ In restaurants, bars, cafes, shops, office building, parking lots, government buildings, military base, ports, airports, train stations, or apartment buildings.

35/ When squatters assault and chase property owners and managers, these owners and managers shall have increased

rights to self defense.

36/ The most valuable thing most people own is their residence. How can it be that we don't have lengthy prison sentences for those who commit grand theft by stealing (or borrowing) a person's residence? Surely squatting in a person's home, especially a furnish and normally occupied home must be a felony, at least as bad as breaking and entering.

37/ Serial squatters shall be considered the same as people who commit grand theft repeatedly. Indeed, squatting shall be considered a form of stealing, and when the amount of rent due and damages caused exceeds the threshold for grand theft, the criminal penalty shall be that of grand theft.

38/ From now on, adverse possession shall no longer be thought a thing by which title to property may be acquired by people moving into unoccupied dwellings, or using someone else's land. If there is no county recorder system documentation of how a person came to possess a property, that occupancy shall always remain illegal, even if a lifetime has passed.

39/ No length of time spent squatting of living by adverse possession shall ever impart any ownership rights upon people. Adverse possession shall however continue to be thought a thing of access rights and easements. For these reasons, the various sorts of easements shall take the following times to become valid:

a/ Access easements in favor of the public: 2-years.

b/ Access easements in favor of the 3 or more neighbors: 5-years.

c/ Access easements in favor of one adjacent neighbor. 20-years

40/ Once access easements come into existence, they should be extremely difficult to eliminate without the dominant tenement agreeing. They shall also automatically transfer when their dominant tenement is sold or rented. So, access easements acquired by adverse possession are very easy to bring into existence and very easy to transfer. On the other hand general ownership rights shall be nearly impossible to get by adverse possession. And once they are obtained, they cannot be transferred, and shall end when either the acquiring estate is sold, or when the acquirer dies, or when he spends more than 30 days away from the property, whichever event occurs first.

41/ All adverse possession claims for absolute ownership shall be regarded as extremely difficult to prove, and the extreme burden of proof shall always be on the person trying to obtain the property through adverse possession.

42/ Adverse possession shall not be possible in the following circumstances:

a/ For people who are not born a citizen of our nation. To do otherwise is to create strife in our society from desperado immigrants.

b/ For fictional citizens shall not have the right to acquire property or rights through adverse possession because they can't own property.

c/ For neighbors and neighboring properties, where fences, walls and even structures built on someone else's land. This shall not confer any right to that land. To do otherwise is to cause strife in society.

d/ For anyone to grab possession of public property, or

community property.

e/ Occupancy of tsunami and river flood zones. There shall be no ownership of this sort of property, and it shall not be used for any purpose but agriculture, warehousing, parkland, bird habitat, sports, restaurants, cafes and bars.

43/ Government shall not have the right to permanently seize real estate used for illicit purposes, but it may:

a/ Force the eviction of all tenants and close the illicitly used units and businesses for up to 30 days. However, this may only be done once per property per decade.

b/ Con-dem illicitly used property and take up to 6% of the value upon auction sale to other owners.

44/ It shall be considered breaking an entering when a tenant comes back and enter a premises they have previously been evicted from. This shall include when they enter the same premises, or a premises owned by the same landlord, or another nearby premises.

45/ The counties shall not be allowed to make their own rules about tenancy and squatting, and evictions. It is far more important that we have the same rules nationwide.

46/ Squatting shall be considered a thing that mostly happens in barns, garages, and non-residential buildings that have not been occupied for many years. It shall not be a way to take over someone's home, where they keep their possessions, even if they have been away for over a year. Where people break in to the furnished residences of others, the legitimate occupant shall have broad rights to treat the squatters as burglars and shoot the squatters dead. Where this happens, it shall not matter if the squatters arrived weeks or months earlier, while say the legitimate occupant was away on vacation.

47/ Landlords shall be free to take money and rent property that has disclosed squatter occupants. Also, tenants shall be free to rent property with squatter occupants. When this happens, the tenant shall assume 100% of the responsibility and liability for evicting the squatting occupant(s).

48/ Where foreign squatters harm legitimate occupants in any significant way, they shall be sent to work camp for 20-years, and may be executed if they greatly harm our people. Also, this is actually what immigrant groups want, so that more immigrants will be tolerated.

49/ Those people who are neither owners, nor recorded tenants, nor unregistered domestic partners of less than one year shall not have the right to use the court system to obtain any rights over the property they occupy. This shall include all forms of location based protective orders, restraining orders, and similar court orders.

50/ vandalism, theft, assaults, and similar crimes by squatters shall be subject to triple penalties.

E — GOVERNMENT FINANCES

NR'55. INCOME AND CONSUMPTION TAXES

1/ The taxation of net income shall be prohibited except for industries, practices, activities and ownership rights that have been elected for curtailment by the Senate. Except in these curtailment industries, government shall be generally prohibited from taxing work, net income, investment income, or investment gains in any way.

2/ Income taxes are the worst form of taxes for the following reasons:

a/ Income taxes discourage work, savings, and lending (called usury) by taxing them all. Consumption taxes on the other hand do not discourage saving and money lending because the income is tax free.

b/ Income taxes reduce net return on investment, and thus reduce the rate of economic expansion.

c/ Taxing income encourages people to take on debt expenses to reduce their net income. This greatly increases demand for lending unnecessarily and creates a higher interest rates situation that is detrimental to economic expansion.

d/ Income taxes favor and subsidize foreign producers in low tax nations. So, under income taxes, there is a tax savings and incentive to import. This causes trade deficits. It also increases the budget deficit because the manufacture of foreign made goods pay no US income tax.

e/ Consumption tax systems act as a sort of tariff on foreign made goods.

f/ Consumption taxes help protect against foreign predatory pricing.

g/ Unprofitable enterprises with many employees pay no tax under income taxes. Thus income taxes are inherently biased towards keeping inefficient labor uses alive. Thus income taxes harm labor productivity. Consumption taxes do the opposite and drive the economy towards increased labor productivity.

h/ Consumption taxes for businesses and non-profits can be made progressive in a much fairer way than income taxes, which are inherently vulnerable to cost loopholes. Thus we

can charge a higher tax for larger enterprises than smaller ones based on turnover. Thus they we can slope the economy away from an anti-competitive industry consolidation situation, and towards a competitive and vibrant ecology of small businesses.

i/ US manufactured goods sent abroad pay no consumption tax, so that exports grow. The only problem with consumption taxes is that they are regressive. This however is easily counteracted by excluding certain necessities of life from consumption taxation.

j/ Consumption taxes allow for IP protection periods to be shortened by more than 50% with no loss of after-tax income for inventors.

k/ Consumption taxes are harder to cheat on than income taxes.

l/ Income taxes are hard to calculate. But percentage sales taxes are fairly robotic and easy for computers to calculate.

3/ There shall be no tax on tools, capital equipment, production machinery, devices used to mass produce goods, and materials for manufacture when they are used purely for commercial purposes. The word purely is emphasized here. Vehicles used for both commercial and personal use shall not be considered capital equipment. Vehicles that weigh under 3,000KG shall not be considered capital equipment unless there is only one seat, or 12 or more seats.

4/ Manufacturers shall pay no tax until their products are sold, leased, or otherwise put into use.

5/ Enterprise that sell to the final consumer for a profit shall pay an additional sales tax of at least 1%. Enterprises that sell to the final consumer, but are non-profit and community-run shall be exempt from this tax.

6/ There shall be a special additional anti-vehicle-dealer sales tax of 15% of the second sales proceeds, whenever a vehicle is sold twice in 8-months. Also, there shall be no loopholes where vehicle dealers are allowed to buy vehicles without the transfer taxes getting paid twice. It is the intent of this constitution to entirely eliminate the used vehicle brokerage industry so that people will instead use more cost-efficient public vehicle sales lots.

7/ The counties of our nation shall not compete with each other in offering special tax breaks to attract industry. There shall be no special jurisdictions in the country for one fictional citizen only, and no special corporate tax treatment for one fictional citizen only. Where any special treatment for one fictional citizen exists, the same treatment shall generally be made available to other similar fictional citizens.

8/ To slow industry consolidation, whenever a company is sold for more than 1,000 years shall pay, income tax of 20% shall be due on all amounts over 1,000 year's wages. When a company is sold for more than 50,000 years shall pay, income tax of 30% shall be due on all amounts over 50,000 year's wages. Under this tax scheme, it will be very hard to make up the tax money, and most will chose not to sell out to the competitors. Thus the economy will tend to remain younger and more dynamic.

9/ All gains from buying and selling vehicles shall pay income tax of at least 50%. Also, repairs do not count in the calculation of the gain.

10/ All lawyers, commission sales people, where the things being sold are either worn on the body, or applied to the body,

the income tax for commission sales income shall be at least 50%. Hair treatments costing more than 90-minute's wages shall pay a luxury tax of 100%. Insurance agent commissions shall be subject to commission sales tax of 33%. People who give massages in open public places and robotic massage vending machines shall not be taxed. Individually-owned hawker stalls, up to 6 stalls per family shall not be taxed.

11/ Industry-specific income taxes shall be imposed on actors, musicians, professional athletes, and other frivolous occupations where excessive pay is either detrimental to the national economy, or the ambitions of the nation's youth. These occupations shall pay 90% income tax on income over 3 times the average wage. The people should also generally disregard the public opinions of actors, sports stars, star musicians and other frivolous media stars, as well as the editorials and opinions of news outlets. To do otherwise is to hand these people a backdoor to our democracy. Lawyers and actors especially shall be seen as practiced professional liars and as such inherently disqualified from serving the people.

12/ All money collected by fictional citizens that claim to aggregate, represent, or further the interests of an industry, a product group, or a special interest shall be subject to an income tax of at least 50%.

13/ If there are annual tax filings, they shall be due on June 15, four days before voting day. Also, starting in 2026, the fiscal year shall be May 15 to May 15. Greater separation of the calendar year from the fiscal year is expected to result in more economic stability.

14/ To reduce land speculation bubbles, and lower the cost of land for new townships, there shall be a special tax on gains from the sale of acreage.

15/ We shall be more precise in the way we reduce sales tax on capital equipment:

a/ Mass production capital equipment, even printers pays no sales tax.

b/ Purely capital equipment such as tractors and commercial trucks pay no sales tax.

c/ Things like pick-up trucks that can go either way pay reduced sales tax.

d/ Things that are mostly for personal use, like resort vacations and meals pay full tax.

x/ Where taxes are to be paid, they shall be shown on the pricing information, including the price tag.

16/ The concept of capital depreciation is an artificial idea that exists to prevent people living under income tax systems from making excessive investments with their tax money.

17/ Where people mention brand names in their media, it shall be considered advertising, even if no money was exchanged, and no communication occurred. Therefore taxes may be imputed on these mentions.

18/ There shall be no sales tax on children's clothing, learning supplies, children's clothing, children's toys, ice creams and sweets sold between 2:00 and 6:00 pm.

19/ Insurance companies shall pay income tax on their regular monthly premiums. However recipients of insurance payments shall no tax on their benefits.

20/ There shall be a subscription income tax of 50% in a world without any general income tax. This is to prevent businesses from working on subscription income. There shall

also be a 50% income tax on rebate and kickback money. This is so we eliminate these from the business landscape.

21/ There shall be no tax breaks for renovations, and especially renovations of old buildings.

22/ There shall be no fictional citizens exempt from taxation. All fictional citizens must pay tax, whether for profit or not for profit. And more importantly, they all must record, clearly describe and report all of their income and expenses.

23/ There shall be no taxation of tool or shop rentals, or vehicle or equipment rentals. All shall be regarded as capital in nature.

24/ It shall not be allowed to offer things for sale in stores without displaying a price.

NR'56. LUXURY TAX

1/ The Senate shall tax all luxury and ostentation value by at least 30%. The Senate shall be allowed to tax ostentation value by over 1,000-fold if it elects.

2/ If the Senate elects that people are buying status or cachet from any source, it shall impose a luxury tax on that source of corrupt and purchased status. The Senate shall defend the value of legitimate Senator and Ubiq status from corrupt competition.

3/ Cool and cachet shall be considered as luxuries and thus subject to luxury tax.

4/ Products with obtrusive product identity, and other branding that hijacks the public's attention shall pay luxury tax.

5/ All gourmet, natural, sustainable, and imported comestibles shall be subject to luxury tax. Any product that claims to be organic, natural, preservative-free, pesticide-free, fair trade, free of genetically modified organisms, or any other self-imposed limitation that makes a product artificially scarce shall be subject to luxury tax.

6/ Passenger vehicles charges that are more than 10% over the median price shall pay luxury tax unless they are shared by a community.

7/ The Senate shall require that luxury products over a low value be numbered and registered with the public luxury product's registry website. Anyone using a luxury product, must be registered to it and have their unnamed photo posted on the registry website. This way when anyone runs the luxury product number, the owner's picture will come up. It shall be considered tax fraud for anyone to have luxury goods without having paid the appropriate tax. Also, given that there will be no cash in circulation, and all luxury products will be numbered, theft will get much harder to get away with.

8/ Luxury products shall not be purchased with cash.

9/ It shall be a crime to gift a luxury product without declaring it to government.

10/ People under the legal age for prostitution, and not accompanied by their parents shall not be allowed to use luxury products. It shall not be allowed to make or advertise luxury products for people under this age, as this corrupts our youth with greed, envy, and shallowness while they are young and their character is still pliant.

11/ Until mankind has ended human hunger, and put away enough food for the next ice age, all pet products and pet related services (including pet medicinal expenses) shall be

subject to luxury sales taxes of no less than 100%. After this time, the UM Over-Senate shall determine an appropriate uniform pet supplies and pet services tax for the world. All animals shall be considered pets except where they are kept in large numbers and either eaten as food before they are fully mature, or they produce young to be eaten, or they produce wool or another bodily product to be harvested.

12/ When goods and services are subject to luxury taxes, the courts shall not award any money for the luxury increment.

13/ Where Restaurants serve more than 3 paid items per person, including beverages of all sorts, That bill shall be subject to luxury tax.

14/ Luxury goods shall not be: sold, rented, leased, or given away after their purchase. It shall be considered tax fraud to buy and sell luxury goods without the payment of luxury taxes for the new ownership. There shall be no investing in luxury goods.

15/ All catering is subject to lux tax.

16/ All manicures, pedicures, facial treatments, facial masks, facial massage, skin treatments, hair dying, hair curling, hair straightening, eyebrow treatments, head, neck and facial tattoos, shall be subject to luxury tax of at least 50%. Semi-permanent depilation shall not be considered a luxury. All forms of lip injections and other forms of collagen and silicone injections shall be prohibited.

17/ Dentist teeth whitening, orthodontics, dental veneers, and all other dentistry that is mostly cosmetic shall pay luxury tax of at least 100%, doubling the cost of the service.

Orthodontics and dental hygiene shall each require only 1 years of trade school education. All orthodontic tooth extraction may only be recommended by the orthodontist. Then it must be prescribed by one dentist, and performed by a second unconnected dentist. Orthodontists shall not be allowed to employ others to see patients or tighten their tooth-moving apparatuses. To improve the patient experience, orthodontist up-front charges shall be limited to 15% of the total fee. After this, the orthodontist may only charge per tightening visit according to the treatment contract agreed to by the parties. Also, to improve the patient experience, all orthodontic patients shall be free to switch to other orthodontists if they are unhappy with the service they are receiving. There shall be no ethical prohibition in the orthodontic industry against switching orthodontists in the middle of treatment. All large emergency rooms shall have a 24 hour walk-in adjunct emergency dental care facility in a separate building.

18/ The Senate shall charge luxury tax for dental veneers. It shall also establish regulations for dental veneers.

19/ Rugs from Persia, Turkey, the Mideast, India and China shall be prohibited, especially Muslim prayer rugs.

20/ Shoes and handbags that cost over 4 hours wages shall subject to luxury tax.

21/ All new passenger vehicles weighing over 1700kg shall be subject to luxury tax, and passenger vehicles weighing over 2000 kg show me subject to an even higher luxury tax.

22/ All special goods sold for Valentine's Day, Mother's Day, Father's Day, Fourth of July, June 19 And all other special days except Christmas and Thanksgiving shall have a special sales tax of 50%, to dial down the marketing machine. Greeting cards shall be regarded as having no value.

23/ All foods transported by air shall be subject to luxury tax.

24/ All fancy athletic tickets and concert tickets that are in box seats and special areas that are different from general admission shall pay luxury tax. Also, at least 75% of all tickets to all events must be general admission. The rest shall have luxury tax associated with them.

25/ If the bill is charged at the end of the service, then luxury tax shall be payable.

26/ Except for groceries, food/beverages consumed in situ, and luggage, all airport commerce shall be subject to a 40% luxury sales tax. Also anything sold on an airplane shall be subject to an 80% luxury tax.

27/ Where restaurants charge at the end, some form of luxury tax shall be payable.

28/ All of the following luxury brands (along with all similar luxury brand names that sell for more than 400% of the average price for similar merchandise) shall be required to change their name so that they do not carry their valuable names through the reapportionment: Louis Vuitton, Chanel, Rolex, Cartier, Versace, Tiffany, Burberry, Gucci, Dior, Prada, Bulgari, Patek Philippe, Piaget, Omega, Breitling, Givenchy, Valentino, Armani, Yves Saint Laurent, Celine, Coach, Emporio Armani, Ermenegildo Zegna, Longines, Lamborghini, Maserati, Giorgio Armani, Givenchy, Kenzo, Mont Blanc, Hermes, Fendi, Bobbi Brown, Clinique, Tom Ford Beauty, Cle de Peau La Prairie, Guerlain, Charlotte Tilbury, Estee Lauder, Mac, Miele, Gaggenau, Sub-zero, Thermador, and Balenciaga.

29/ There shall be a 500% luxury tax on wrist watches costing over a day's wages.

NR'57. TAXATION RULES

1/ No tax, charge, or fee shall be laid by government, unless proportioned to some objective measure such as population, area, use, cost, comparable transaction price, spending, government benefits received, or some other quantifiable and sensible metric.

2/ To impede deficit spending, we shall now have it that there shall be two government budgets, the main tax-funded general fund budget, and the ancillary bond-funded budget, which is 98% funded by bonds and up to 2% from main budget seed funding.

3/ Except for seed money, infrastructure development spending by government shall not be considered part of government's main budget, because the infrastructure gets funded by bonds that are repaid by user fees actual, or imputed by government on a per user basis. The investors to a cost efficient infrastructure always get their money back because payback is based on the user fees and these eventually pay back all projects plus interest.

With regard to government infrastructure bonds, all default risk shall hang on the infrastructure project itself, and the overall government shall not be liable for the debt. So for example, when government issues bonds for a new bridge, the repayment money comes from the tolls for 17 years. Then the right to collect the tolls or fees shall revert to the Senate and people (SPQR).

4/ We will start funding infrastructure projects for a number of reasons such as:

a/ The financiers will reduce the amount of stealing and corruption in their projects.

b/ This sort of spending is not really a balance sheet liability for the public but a thing that is more neutral financially.

c/ The bond financiers will reduce the number of poorly conceived and poorly executed government projects.

5/ The overall tax rates for the various sorts of taxpayer, both human and fictional citizen shall be measured in terms of income. However the income of real humans shall not be taxed because this motivates people to work less, and we don't want government to motivate people to work less in any way. Government's bias must be towards motivation, not demotivation.

6/ Wherever practical, fictional citizens shall not be allowed any advantage that real humans don't get, or can't get. This is why we kill our fictional citizens after a time. It is so they don't get an advantage over humans. With regard to taxes, FCs cannot be charged the same taxes as humans. However they must pay at least the same overall tax rate as a share of income as the average human. Fictional citizens shall not be allowed to buy luxury tax goods.

7/ To start, government's average tax burden for the entire economy shall not exceed 45% of income. This number may be changed with a 2/3 overmajority of the Over-Senate.

8/ The Over-Senate shall elect an overall tax amount for the various sluices of the Main-Senate, as well as an overall average for the various counties. Then our nation's counties shall modulate their county tax rates, by changing the multiplier on the national average that they charge.

9/ Government income from new township lots and strata titles shall not be considered taxation of private sector income.

10/ Sales taxes are better for the economy than income taxes because they drive towards higher productivity and higher labor efficiency. This is because low margin and labor-inefficient businesses pay more per dollar of profit with sales taxes than they do with an income tax system. Also, high margin and labor-efficient businesses pay less per dollar of profit with sales taxes than they do with an income tax system. However, we don't want to only use business revenue taxes because it over-stimulates the high-margin regions of the economy while causing domestic weakness in the low-margin regions of the economy. Therefore we ultimately want a fictional citizen tax system that is somewhere around half income tax and half sales tax.

11/ Adding a sales tax component is not something that should be done overnight to a nation's industry. It must be phased in or it will cause mass unemployment and a shock to the system. So we will start with 1/4% sales tax and go to 1/2%, then 1%, then 2%, 3%, 4% and so forth until we reach the right level after several years of phase-in period.

12/ The following shall be exempt from all forms of taxation and government fees for citizen purchasers:

a/ Shared public transit such as trains and busses.

b/ Tier-1 and Tier-2 healthcare.

c/ Serious education fees and serious learning materials.

d/ Per-capita housing expenses under the 20th percentile for the nation as a whole. This is also intended to drive the poorest 20% from from the nation's most expensive cities.

13/ No portion of anyone's tax payments shall be allocated

according to the election of the taxpayer.

14/ In order to support a system of high sales tax reporting, it shall be considered tax fraud for anyone to buy or sell anything in our nation without using a real time tax reporting device and receipt generator.

15/ Sub-layers of governments shall not complicate the nation's tax system with their own additional tax laws, tax filings, or tax conditions. All counties shall comply with the Senate's Uniform County Tax Code, electing a tax rate multiplier and perhaps some optional clauses from the standard nationwide menu that they want to implement. Also, the nation's income tax code shall not exceed 100,000 words, the nation's consumption tax code shall not exceed 100,000 words, the nation's luxury tax code shall not exceed 100,000 words, the nation's property tax code shall not exceed 100,000 words. All the other portions of the nation's tax codes shall also be of a similar maximum length.

16/ Higher taxes shall apply in the old inefficient automobile-based districts than the efficient new rail based districts.

These taxes shall reflect true cost of operation by the public.

17/ Tax money from the rail-based new districts shall not be used to subsidize the automobile districts or the intercity road system in any way, either directly or indirectly.

18/ The various county tax collectors shall collect and administer the intake of both county and national taxes. These offices shall not be administered by the national government. However, the national government shall perform redundant auditing of the both the county tax collection system and taxpayers.

19/ All real property taxes shall be based on square meterage of each category of structure and land. These categories shall be established at the national level for all real property in the nation.

20/ Property tax rates and assessments shall take no consideration a property's age or condition. All buildings new and old pay the same rate per square meter. No property shall be seized by government due to unpaid property taxes until the unpaid taxes exceed half of the maximum value the property was assessed at. It is intended that this change in government policy will help many families bridge over times of economic weakness.

21/ All ceilings over 3 meters shall pay 1.5X property taxes. All ceilings over 4 meters shall pay 2X property taxes. All ceilings over 5.5 meters shall pay 3X property taxes. All curvilinear building areas that are not mass produced shall pay 3X property taxes. All building designers shall notify their clients in writing about these luxury tax building rules, and they shall keep the proof of this notification, or they shall be liable for paying the luxury taxes.

22/ Property tax shall be due from all real estate owned by both the people and their government. This is so the people can accurately grasp the scale of land wealth held by government and other institutions in proportion to the land wealth held by the people.

23/ There shall be no statute of limitations with regard to those who bribe or otherwise corrupt the tax house. This clause shall apply to crimes committed before this Constitution was in effect.

24/ Government may pose as either buyer or seller in tax fraud sting operations.

25/ Government shall not to charge for any service used by more than 1/3 of the people and which costs less than 60-minute's wages per citizen per teneth. Government shall try not to charge for any service used by more than 1/5% the people and costs less than 15-minute's wages per citizen per teneth. Any access, service, or supply of an earth mineral that can be efficiently and feasibly run by government as a universal free thing for all citizens should be run that way.

26/ So that government does nothing to discourage wall insulation, the interior walls surface shall be used in determining floor area, provided the walls:

a/ Contain no non-insulated voids.

b/ Are less than 60-cm thick.

c/ The space inside the wall is permanently sealed and remains unused.

27/ To reduce the potential for fraud against government, there shall be no tax refund payments of any kind for at least 30-days after payment was made. Also, all requests for refund shall require a 30-days lead time.

28/ So that government never discourages the sharing of the nation's private assets among its citizens, there shall be no special tax on rented assets once the regular consumption and property tax has been paid. There shall be no special taxes, government fees, or impounded deposit funds, or mandatory industry association payments required for:

a/ Nightly rentals or bookings.

b/ Weekly rentals or bookings.

c/ Seasonal rentals or bookings.

d/ Hotels, or the sharing of dwellings.

e/ Personal dwellings, or rooms in personal dwellings rented for a short time.

f/ The renting of cars. This includes airport pickup taxes other than those paid by all vehicles entering the airport. x/ What foolishness it is for a local government to tax primary money, or export money before it can multiply in the community.

29/ Our nation shall stay within the taxation minimum and maximum set by the UM.

30/ The Senate shall map the main money flows and all wealth in the national economy for all to see.

31/ No government agency shall be wholly or partly owned by the private sector. No fictional citizen shall have any business or any share in any business that most citizens think is an enterprise run by the government (for example the FED and the CDC). No government agency may take any money or benefits from any industry it is regulating. The only source of funding for all of government shall be mandatory taxes and fees that accrue to the benefit of the Senate's general fund.

32/ Government shall be generally prohibited from using and accepting the third party certifications, ratings, and guarantees of fictional citizens and individuals.

33/ When there is a surplus in government budgets, the budget is supposed to be reduced quickly, so there is no surplus. Surplus budgets always seems to find a way to get wasted unless we tighten them down. Also those who spot or create significant budget surpluses shall get significant Senate or Ubiq recognition as applicable.

34/ When goods are stolen from fictional citizens, the sales tax must still be paid by the FC.

35/ Once the government does a person's taxes and the person doesn't protest it within 60-days, the taxes shall be

final.

36/ There shall be no behavior modification taxes when the behavior cannot be changed because there's no alternative to it.

37/ The tax system shall be required to accept all commonly used systems for payment. There shall be no premium charged for using any payment intermediary. The tax house shall be expected to accept credit and debit cards at no extra charge, and all credit and debit card companies shall be required to provide their services to the tax house of government at no charge. In other words, all government use of charge cards and debit cards shall incur no fee.

38/ People shall have a right to pay all utilities and taxes in advance, and to keep a credit balance in all these accounts.

39/ Regarding property seized for unpaid taxes:

a/ Government shall only take what is owed when property is sold at auction. All of the sale proceeds, less the outstanding tax amount and 1% for the cost of administration shall be refunded to the owner or their successors.

b/ As all property taxes shall now be paid to the county recorder system, the county recorder system shall initiate all property sales for unpaid property taxes and unpaid loan payments.

c/ All property sold for unpaid property taxes or unpaid loan payments must be sold through the county recorder system's property sales system via slow reverse auction as described herein. Once the sale is complete, the county recorder system shall calculate the amount due to the parties, and send the monies out to the various parties less the 1% that gets sent to the national general fund, with the county recorder system getting nothing.

d/ There must be at least 60 monthly notification to each person's must check email address, and 60 monthly notifications to their physical address via ordinary mail and 60 monthly attempts to contact via other means, including 5 annual trips out the property which shall include asking all the neighbors about how to reach the owner if he has not already been notified. All these notification must occur before the property can be seized. All of these notices must use the Senate's standard, easy to understand forms that use ordinary language and not legalese.

e/ In order to have a sale of real property for unpaid taxes, or municipal/county fees, the amount owed, not including interest and penalties must be in excess of 6-month's wages. In order to have a sale for unpaid loan payments, the amount, not including interest and penalties must be in excess of 4 monthly payments.

f/ Where property owners have senile dementia or are mentally incompetent for other reasons, or they are over 85-years old, there can be no tax sale for unpaid taxes. However, the unpaid taxes plus tax interest shall still accrue.

g/ All tax sales shall be reviewed by a randomly selected Senate jury of appropriate size, which must issue a court order of seizure for all tax sales and all unpaid loan sales.

h/ Before a property can be auctioned off by the county county recorder system for unpaid taxes or unpaid loan payments, the property must be made vacant for 30 days. Where properties are still occupied, or they have been occupied by an owner or a genuine recorded tenant the prior 30-days, it shall not be possible to have a valid sale for either

unpaid tax sale, or unpaid loan payments sale. Also, where the property is already vacant prior to notification, the owner must be located by the county recorder system 30-days before the property can be transferred to a new buyer.

i/ Where government people malfunction and seize properties that should not be seized according to these rules, the homeowner shall have the right to immediate reinstatement and cancellation of sales for either unpaid taxes, or unpaid loan payments.

j/ Where government people go off the well-worn path and inappropriately seize property, it shall be presumed that they are trying to mis-appropriate the easy to steal irregular monies. Where a pattern of inappropriate property seizures can be determined, those involved may be charged with felony fraud.

40/ Government shall charge no fee or tax for:

a/ Wedding licenses, or recorder's office wedding officiation.

b/ Birth certificates and prenatal care training,

c/ Education certificates.

d/ Drivers license first approval or government required driving license renewals.

e/ Government required ID card first issuance, and government required ID card renewals.

f/ Passport first issuance, and government required passport renewals.

g/ Death certificates.

h/ Drug license first issuance, and government required renewals.

i/ Cremation of humans, mammalian pets, and roadkill.

j/ A number of other things.

x/ Also, each county shall offer free, timely, individual cremation services for everyone, and present/sent the ashes in a plastic bag in a standard white porcelain urn with a wooden screw top. The Senators monitoring our cremations shall be required to check the ashes for gold and diamonds, and these shall be the property of the county, which shall sell them to wedding ring makers, so as to discourage the awful practice of using forever diamonds in wedding jewelry. Also, all cremation shall be done under Senator supervision, so that the corpses and pets will be harder to divert into the food supply as is the ancient tradition of the Mideast. Also after death, all corpses to be cremated shall be injected with foul tasting pigments as a supplemental means of keeping human flesh from being sold into the food supply. Mammalian pets shall be created for free, but the ashes if they are wanted shall be delivered in a clear plastic bag. Dead pets can simply be brought to the crematorium. It shall be the law that police must be called where humans die for any reason.

41/ General income taxes for the bottom 97% of earners shall be prohibited. Also, nobody who makes less than three times the average wage shall ever have to pay any income tax, or file any income tax. However, this prohibition does not necessarily include investments in shares of large companies, and certain other passive investments, where people can park large amounts of money and never do a thing. This income may be taxed. Also, the taxation of lawyers and commission sales shall not be affected by this paragraph, as they are being taxed to limit the size of these portions of the economy than generating tax money. Also, all domestic

manufacturing should be exempt from income taxation, while all imported goods must still pay duty.

42/ Government taxation and spending shall be limited to 20% of GDP except in times of war and massive infrastructure rollout.

43/ When people sell their property to a registered property consolidator for use in a large project with over three times the building density as measured in square footage, there shall be no income tax due, or capital gains tax due for 180 days, so the seller can buy another like-kind place. Tax shall only be payable for the money not used to buy another replacement property.

44/ All activities, such as bowling alleys must include all the equipment that people use for that activity, or the extras shall be subject to MECOT taxation.

45/ We shall have a higher tax for treatments than for cures. We shall have a higher tax for tire repairs than new tires. We shall have a higher tax for services than outright purchases.

46/ The Senate shall slope the tax code to encourage citizens to own their own home. However Government shall given no tax advantages to second homes.

47/ All insurance broker commissions shall be subject to commission sales tax.

48/ Fuel transportation by truck shall be considered the most dangerous, most hazardous and least price efficient. Fuel transported by the rail system shall be considered much less hazardous and much more price efficient. Fuel transported by a static pipeline system shall be considered least hazardous and least expensive means of transport, provided there is sufficient demand to justify building a pipeline.

49/ Government shall be prohibited from charging for building permits or infrastructure impact fees such as: school fees, sewer fees, traffic impact fees, and other fees for new buildings and remodeling projects. It is far better if our building infrastructure and municipal infrastructure is financed by taxes and deep pockets (low-cost-of-borrowing) government instead of by individuals homeowners and small-scale developers in advance. This will have the effect of lowering the cost of housing and other buildings.

50/ No goods shall be imported to our nation without paying at least a 9% tariff to our national government. This includes all goods from Mexico. With regard to the import documented product assembly parts of Mexas, we shall tax the foreign components by their estimated component value in the finished product at the final sales price. Also, there shall be no taxation of goods made in the all-shipments-tracked and inspected part of Mexas and not shipped into the US. Goods made/assembled here of partly foreign components will only pay taxes on their foreign components as an assessed percentage of the final value.

51/ We shall impose tariffs that are high enough that no more than 25% of our nation's steel is imported (Steel in all classes low, medium, high, and super high quality). Furthermore, in each class, we shall auction off import rights to maximize tax income. Similar approaches shall be use for all strategic materials including especially petroleum. All steel imported shall be marked with distinctive stamps into it so that our people know which nation it comes from. Except in times of war, or temporary supply crisis not to exceed 3-years: no ores, no petroleum, no coal, no potash, no softwood, no bars

of iron, steel, aluminum, copper, nickel, zinc, magnesium, tungsten, lead, mercury, silver, or gold, lithium, or other so-called rare-earth minerals shall be imported from outside North America. Domestic production of all these raw materials and some more shall be thought vital for national security and strategic economic purposes.

52/ There shall only be one set of tariffs for our entire nation. The only exception are the foreign worker zones that are isolated from our nation.

53/ Everyone who is childless and working and over age 22 shall be required to pay a Sub-Senate determined annual fee equal to between 4% and 10% of the average wage. Those who have at least one child will not have to pay this tax and if they are women, they shall instead get child benefits as described elsewhere herein. Thus, having a conforming number of children will have a small negative cost for women. In other words, everyone makes a little money on having children, except when they go out to eat.

54/ Some of the robot revolution will occur where labor is cheapest, and some where labor is most expensive. We shall help our industry to invest in automation by exempting all investments in automation and robotics from taxation for at least 3 years. Also, we shall be generous with our Ubiq awards where people develop robots for human activities that are dangerous, like tree trimming, unhealthful, like mining seam coal, or demeaning, like cleaning public bathrooms.

55/ All lawyers shall have to pay a fee of a half the average wage in addition to their other taxation for the privilege of practicing law for one year in the nation. Where it is judged that there are too many lawyers, this fee may be raised.

56/ All battery operated devices that either don't use standard batteries, or the batteries are not consumer replaceable with nothing more than a push-pin, screwdriver, or a micro Allen wrench: All of these shall be subject to a 20% sales tax. This is the sour the tactic of selling overpriced replacement batteries for a slight increment of profit.

57/ Whether property is vacant or occupied it shall pay the same tax.

58/ With regard to stock market accounts, these shall be reported by the broker to the government and the account holder. When people file their taxes, they get their information from their tax documents prepared by the government tax house.

59/ Where income tax is allowed, where it is applied, there shall be a special taxation of capital gains. However, this shall not be a special rate for capital gains. Instead, capital gains taxation shall be accomplished through a system where assets held for longer than two years and sold get to deduct each year's annual inflation rate from their gains prior to the calculation of their income that is taxable.

60/ Every person and entity in our nation that makes money shall have an obligation to explain where they got the money from.

61/ All taxpayers have a Taxes.gov account for reviewing the status of all their taxes bills and tax payments.

62/ All climate and environment related taxes and subsidies shall be hereby repealed with immediate effect and with no payments or repayments to people who are owed money.

NR'58. WEALTH AND POVERTY TAXES

1/ For the long run welfare of the nation, the entire Main-Senate shall conduct regular sophoscites to elect an ideal wealth distribution curve for the nation. This curve is intended to balance the rapid advancement of the whole with help for the people left behind. The Senate shall then institute wealth taxes and flation to guide our nation towards this goal. The Senate shall err a bit on the side of rapid evolution and economic strength over equality and fairness as to do otherwise is to slow the advancement and progress of our society. The Senate shall not change this powerful master ratio by more than one-half percent per year.

2/ We shall honor the words of Paul Harvey: "If I were the devil, I'd take from those who have, and give to those who want it, till I killed the incentive of the ambitious." We shall be mindful of how taxation destroys the will to work.

3/ As the productive power of money increases exponentially, so shall our wealth and property taxes.

4/ It shall be the stated objective of our nation to create a large middle class. To this end, government shall impose progressively withering taxes on wealth over 2,000 year's wages. Government may also impose annoying, time-wasting, humiliating taxes on the time, comfort, convenience, and tastebuds of those who spend too long on public assistance.

5/ The law shall not be enforced more strictly against the poor than the rich or vice versa.

6/ The laws and tax code of our nation shall favor the people and the masses over the wealthiest 1%. The tax code shall strive to wither the wealthiest 1% so that they must continue to be active or they will regress financially.

7/ Government shall not aid the rich in times of economic crisis, but must aid the poor. All government bailouts shall dilute the equity of those getting bailed out by a fair amount.

8/ Rich is a vague word, but wealth refers to the sort of financial abundance that is passed to others after death, or spent carelessly on oversized lifestyles.

So the word wealth refers more to the parasite's share.

9/ In order to totally kill Ishtar, the people will be allowed to be rich, but not so much inter-generationally wealthy. We shall impose very high taxes on excess personal wealth beyond the point where money stops motivating people to work harder.

10/ The following wealth tax rates shall apply until the Over-Senate changes them with a 2/3 overmajority. The term wages, as always in this Constitution shall be roughly the average wage in the nation, as the Senate elects. As follows is the beginning wealth tax for people of various net worths:

a/ Under 50-year's wages pays no wealth tax.

b/ Over 50-year's wages pays a 1% tax.

c/ Over 500-year's wages pays a 2% tax.

d/ Over 5,000-year's wages pays a 3% tax.

e/ Over 50,000-year's wages pays a 4% tax.

f/ Over 500,000-year's wages pays a 6% tax.

NR'59. BASIC PROPERTY TAX

1/ If property taxes are too low, it will tend to cause high property values that become property bubbles. While

inflating, these bubbles increase demand for the money lent from economic parasites. And after the bubbles pop, the economic parasite often finds itself in possession of many assets pledged as security. Thus we recognize that a system of low property taxes is a system that favors property bubbles and economic parasitism.

2/ Government shall strive to go in the opposite direction as much as practical. In fact, the largest source of county government revenue shall be the property tax, the existing stuff tax. Meanwhile the largest source of national revenue shall be the national sales Tax, the new stuff tax.

3/ The counties shall be responsible for collecting both the property tax and the sales tax. Thus government's two main revenue sources shall be administered at the county level.

4/ To reduce fraud and stealing in tax collections, we will establish a system where the national tax house double-checks the various county tax houses, and the various county tax houses shall double-check the national tax house. To this end, a percentage of the property tax shall be given to the national government, and a percentage of the sales tax shall be kept by the various county governments.

5/ To start, 80% of the property tax shall accrue to County government and 20% to the national government. To start, 80% of the sales tax shall accrue to the National government and 20% to the county government. Depending on the revenue needs of the national and county governments, the national Over-Senate may adjust these percentages with a 2/3 overmajority. However, at least 10% of each category must be shared so that both are monitored and checked by the other part of the nation's government.

6/ All county property tax assessments shall accurately reflect the current market value of all property in that county.

Government shall be prohibited from discounting assessments or tax rates to any group of property tax payers for any reason.

7/ The purchase price shall only be a consideration in the first year of ownership. After the first year is over, each property's market value shall be assessed and the property taxes computed based on this market value.

8/ Government shall not restrict the rate at which property tax assessments rise as the rise in property taxes is an important safeguard for property price bubbles. Discounts for long-time and retired property owners shall be prohibited because these cause both shortages and property price bubbles.

9/ All counties must abide by the assessment rules set forth by the national Senate.

10/ Property taxes shall be paid tenethly. There will be a single total amount including all utilities and local fees.

Utilities cannot charge monthly account fees, or other charges on accounts that go substantially unused. There shall be no billing for:

a/ Electric accounts that use less than 20-kw per month, b/

Water accounts that use less than 100-liters per month,

b/ Gas use of less than 1-CCF per month.

c/ Unused data transmission services.

x/ When the place is re-inhabited, there shall be a meter reading and the account brought up to date

11/ Starting on 2027.01.01, or sooner, property taxes shall be paid by the occupant unless the property is vacant, or the rental term is shorter than 10 days, in which case the owner

shall pay the property taxes.

12/ The occupant of all premises shall register with government and be responsible to the government for all taxes and fees associated with the use of the property.

13/ Tenant rights shall be considerably lower for rental terms shorter than 10 days.

14/ No rental agreement shall be valid unless recorded, and the tenant assumes responsibility for the property taxes, and he is not in arrears for his property tax payments. When tenants fail to pay their property taxes they shall personally suffer a tax lien, as well as the loss of the ability to rent property for longer than 10 days at a time and shall instead have to rent by shorter terms.

15/ When non-occupant owners fail to pay their property taxes for over 3-years, their property shall be auctioned off by the county. When occupant owners fail to pay their property taxes for over 5-years, their property shall be auctioned off by the county to pay for taxes. Deferred tax payments shall incur twice the prevailing interest rate, but in no event less than 10% interest.

16/ Once people as individual homeowners reach age 75, or as couples where the youngest reaches age 70, they can stop paying their property tax bills and instead, these payments will become a tax lien on their estate's assets, however their estate shall pay 3% over the prevailing rate of interest for the debt. If they live to be 110 and live for 35 years without paying property tax, then good for them.

17/ Because local services are funded by property taxes, people will have to suffer when their property appreciates. This is just the way it has to be in order for local government services to be funded.

NR'60. PROGRESSIVE PROPERTY TAX

1/ Throughout history, in all long-lived civilizations, it has been the case that network effects have generally resulted in a few people owning most of the land. This has generally been a primary factor undermining the long term viability of freedom. Therefore, our new democracy will start with a slant away from land ownership consolidation by means of a multi-tier progressive property tax multiplier system that charges bigger land owners a higher property tax rate than small land owners. For structures, the floor area tiers shall begin as: under 100m, under 500m, under 5,000m, under 50,000m, under 500,000m, and over 500,000m. For non-urban, non-suburban land, the area tiers shall begin at: under 1/2-ac, under 4-ac, under 40-ac, under 160-ac, under 640-ac, under 2,560-ac. No one person shall be allowed to own over 2,560-ac of land. Ownership over these tiers shall incur a progressively higher multiplier for their newly expensive property tax payments. The initial 6 tiers for the progressive property tax multiplier shall be 0%, 10%, 50%, 100%, 200%, and 300% of the basic property tax amount. Therefore people who own much real estate shall pay a much higher progressive property tax rate than those with smaller apartments.

2/ All owners shall pay progressive property depending upon how much property is held under one name either directly, or indirectly, or by any means whether rented, optioned, fractionally owned, held in trust, owned through fictional

citizens, owned by one's householders, owned by one's offspring who are under age 28, or in any other way controlled by one household.

3/ The tier points, and tax rates of this section are intended only as a preliminary framework and they may be adjusted by the Over-Senate.

4/ Different sorts of agricultural land should have different threshold levels depending on how fertile and valuable the land is.

5/ From now on, non-urban land may only be converted to urban land by the county governments, and all counties are mandated by this Constitution to always ensure that the people have at least 10 prime locations for new townships.

6/ Township projects shall be exempt from property tax while unsold and under construction, but not for longer than 2-years. In times of economic crisis, and when the real estate market suddenly turns soft, government may extend the new construction exemption period to as long as 5 years, but no longer.

7/ It is hoped that the relentless erosive forces of corruption and parasitism will never be able to amend this Constitution to allow fictional citizens or foreigners to own land, or mineral resources, or water resources in our nation. However, if such an event ever comes to pass, the backup plan will be to require fictional citizens and foreign nations (as a whole nation, subject to the highest level of taxation) to be subject to progressive property tax just like real human citizens.

However, it shall remain the enduring policy of this constitution that wisdom dictates that foreign interests and non-human entities never be allowed to own land, or mineral resources, or water resources, or key industrial plants, or anything that is vital to the future of our nation.

8/ Our nation's territory is huge and remains full of unused land. Therefore, we shall be extremely generous with our progressive property tax threshold levels. When more crowded nations copy our constitution, it is recommended that they use smaller land ownership thresholds for their progressive property tax system.

9/ Urban land shall include all industrial, warehouse, office grouping areas and all housing with a density over 10-du/a. Suburban land shall include all housing from 10-du/a to 1du/a. Exurban land shall include all housing from 1du/a to 1du/10ac. Rural/Agricultural shall include all housing that is less dense than 1du/10ac or used for the purposes of agriculture, or cleared fallow. Privately held wilderness land shall be lots over 10 acres, and left with wild native plant cover.

10/ Banking shall never be a strategy for acquiring large amounts of property. When banks take property back,, neither the bank, nor it's successors may hold the title to the property taken back, except temporarily for the purposes of selling off the assets. All assets must be sold off in the open market to independent buyers within two years, or the property shall revert to the public, which must sell it within one year.

11/ Those people who take back great amounts of property through default shall still be subject to progressive property taxation.

12/ The people should ponder the words of John Hancock: "The more people who own little businesses of their own, the safer our country will be, and the better off its cities and towns. For people with a stake in their country and

community are its best citizens."

NR'61. OLD AGE, DEATH AND INHERITANCE

1/ Dynastic wealth and power are not only vitally important to economic parasitism, but they are also quite demotivating and unjust. Therefore, our nation shall err on the side of profoundly limiting the inheritance rights of very rich people.

2/ In our nation, economic freedom shall be considered something that is almost entirely non-dynastic and not passed from one generation to the next. There shall be no right to inherit massive wealth, especially from people who are not ancestors

3/ There shall be an inheritance and gift tax of at least 80% on estates worth more than 20 year's wages. There shall be an inheritance and gift tax of at least 90% on estates worth more than 1,000 year's wages. There shall be an inheritance and gift tax of at least 95% on estates worth more than 10,000 year's wages.

4/ All inheritances exceeding 5-year's wages shall pay at least a 90% inheritance tax except people who are a:

a/ Genetic descendant of the deceased.

b/ Parent of the deceased.

c/ Co-parent of a living citizen with the deceased.

d/ Full sibling, or maternal half sibling of the deceased.

e/ Live-together domestic partner of the deceased for more than 5-years.

f/ To prevent tax skirting brotherhoods we shall have it that half siblings that share a father shall be considered as unrelated for the purposes of receiving inheritance tax. Adopted children shall also be considered as unrelated for the purposes of inheritance tax.

5/ The community property exclusion for inheritance taxation shall be limited to 1,000-year's wages (average wages as always herein).

6/ Regarding those who inherit property worth over 50-year's wages from a spouse upon the death of their spouse: If these inheritors later enter into another subsequent marriage, that marriage shall no be eligible for any community property marriage exclusion in either direction, and they especially shall not have the right to leave any money to their spouse in chain fashion.

7/ All bequeaths to domestic fictional citizens (such as churches, charities, and corporations) shall be subject to at least an 90% inheritance tax. All bequeaths to fictional citizens based or headquartered in a foreign nation are subject to at least an 98% inheritance tax.

8/ All pre-death gifts by those who know they are dying, or those past the median life expectancy shall be subject to inheritance tax. All gifts over 5 year's wages in a giver's lifetime shall be subject to inheritance tax.

9/ Non-relative people who care for elders and other people who die shall not be allowed to inherit more than the lesser of 10% of the estate, or 5 year's wages. As normal herein, this shall the average national wage, not the employee's pay and this shall also apply to people who receive money on behalf of the worker. Where testators wish to explicitly dis-inherit people, they can state that they get the sum of "one dollar", however this is not needed to dis-inherit people.

10/ In order to make a valid will-testament, the testator must

appear at a county recorder system branch and answer 40 simple Alzheimer's questions on camera to demonstrate that their mind, memory and judgement are sound. These questions should be such that people of sound mind find these questions very easy, but people with dementia should find them hard to answer. After passing the cognitive test, the testators of a will-testament must on the same day face the recorder system's camera and recite their entire will-testament. Where people are in a hospital, nursing home, or they are confined to their home or bed, the recorder system can come to them for one day's wages. Once the testator has proven their sound mind, this will-testament shall come into effect and supersede all other will-testaments of a prior date. After this, there shall be no possibility of challenging the will-testament on any grounds at all and especially based on the mental capacity of the testator or the justice of their will-testament's apportionments. If the testator passes the recorder system's mental acuity test at the time, there shall be no later questioning of the validity of this test.

11/ It bears repeating that once a will-testator has completed a standard mental acuity tests with the recorder system, and they have recorded a will-testament with the recorder system, there shall never be any possibility of challenging that will-testaments for any reason, and that will-testament shall be final. This is in sharp contrast to the old system designed to maximize death proceeds to Arab-fronting legacy-hunters and lawyers.

12/ The old system under the 1789 constitution, where Arab-fronting legacy hunters and overpriced lawyers had the right to challenge any will-testament shall be thought to be a principal example of a legal/government practice that could easily be made foolproof at no cost, but instead it became become a huge cash stream for lawyers and cheaters. So again, there shall be no right to challenge any will-testament that was made at a recorder system branch by a person who at that time passed the dementia test.

13/ Will-testament and end of life plans shall not be modified. Instead they must be wholly re-recited to the recorder system in their entirety.

14/ Only the most recent recorded will-testament shall be valid. Non-recorded will-testaments and end of life plans shall not be valid at all.

15/ Depending on the size of the estate, a civil court judge or Sub-Senate jury of appropriate size shall execute the will-testament. The venue shall be the county where the testator had the most valuable pile of assets.

16/ Except when the value of the estate is less than 3-year's wages, the people shall not have the right to appoint their executors. All executors for estates worth over 3-year's wages shall be random Senate jurors.

17/ There shall be no fee when the county government executes a will-testament, as this is an inheritance-tax related service. This includes the disbursing of inheritance money over time as instructed in will-testaments. Where a person dies intestate, their death assets shall be disbursed to next of kin according to the standard disbursement scheme of the Senate. The fee for intestate death disbursement shall be the greater of 4-week's wages or 5% of the value of the assets disbursed.

18/ Regarding intestate deaths, the recorder system shall

handle all matters of probate using the following probate fees based on the gross value of the estate and are as follows: 4% on the first 2-year's wages; 3% on the next 5-year's wages; 2% on the next 20-year's wages; 1% on the next 100-year's wages; and 0.5% any amount over that. Probate shall be handled by the recorder system and not the court system.

19/ Except when the value of the estate is less than 3-year's wages, there shall be a civil court hearing approximately 40 days after the death. The recorder shall notify all parties to the will-testament and all registered creditors of the hearing immediately after the death of the testator. All family may attend, and all parties to the will-testament may attend, however non-attendance shall not diminish any right to receive assets from the estate.

20/ Where sufficient estate money is available, the recorder's office shall first settle the recorded liabilities of the dead person. Then the recorder's office shall prepare a preliminary division of property based on the will-testament. This court's property division shall be final and cannot not be challenged in any court unless it can be proven that one or more people in the Senate jury judging the estate apportionment knew the testator or one of the people inheriting money.

21/ All will-testaments shall include clauses for the following common issues:

a/ Disbursement of estate assets.

b/ Guardianship of dependents

c/ End-of-life instructions and care planning.

22/ Society shall not charge to hold money in labor units for minors as instructed by the wills of their parents.

23/ All gift and inheritance tax shall be payable to the nation/county where the deceased spent most of his last decade.

24/ Death ostentation requests shall be unenforceable, and the requests shall not be honored by the system. Nothing of value may be buried, buried or destroyed at any funeral.

25/ Nobody shall be allowed to have more than one funeral service. Except for the greatest of people who can draw thousands of people to their funeral, corpses shall not be brought from town to town. There shall be no state or government funerals.

26/ Except when the corpse is donated to science, the embalming of corpses shall be prohibited.

27/ All caskets made from anything but untreated, unfinished, unpainted, unvarnished, unlined, nailed and screwed-together 3cm-thick raw knotty pine planks shall be subject to a 200% sales tax that triples the cost of fancy caskets. Burial bags made from paper and cotton shall not be taxed. A 200% luxury tax shall also apply for gravesites and gravesite decorations such as tombstones and mausoleums, and all burial and funeral fees.

28/ Each County shall provide the following cremation services no charge.

a/ Individual cremation of humans and ash recovery.

b/ Provision of a glazed ceramic urn.

c/ Individual cremation of pets and ash recovery and urns at a charge of 2-day's wages per pet. Pets shall not be cremated within 3km of a human crematorium, and humans shall not be cremated within 3km of a human crematorium.

29/ It shall no longer be possible to use urban graveyards All burials shall be in countryside graveyards at least 10km from any community. All existing graveyards shall be nationalized

and given to the county government. The intentional desecration of graves and death monuments shall be a per count crime.

30/ When people donate their bodies to science upon their death, it shall be considered felony fraud to buy or sell their bodies, or parts of their bodies. There shall be no use of real human corpses in making media, or for decorative purposes.

31/ There shall be no new mausoleums or halls or any other structure at any graveyard. Nobody shall have a grave stone larger than 80cm x 80cm x 7cm.

32/ Those showing signs of senile dementia may be required to appoint a co-signer guardian for all financial decisions and payments. These shall generally have no power to initiate payments and shall only have a veto right over unreasonable decisions.

33/ Everyone over age 65 and those said by their family to be suffering from mental senility must take an annual one-hour video recorded cognitive test of their memory, reasoning and judgement. If they are licensed to drive, they shall also be required to take a written and road test of their driving skills at the same time. Those unable to one of these tests shall have the words "NO DRIVING, or NO CONTRACTS" printed their government identification as applicable. These people may not sign to contracts or undertake financial obligations without their guardian's approval. The recorder shall be available for randomly assigned financial guardian services for elders.

There shall also be restrictions slowly coming in on all their accounts about trading stocks, starting new expensive and imprudent business, and selling properties or too much money out all of a sudden. Also quit claim deeds shall only be used for transfers between parents and children, and siblings, and spouses. s

34/ The Senate shall create a uniform system for the sharing of death tax revenue between counties when taxpayers lives in multiple counties.

35/ No person under Government investigation for involvement in the death of another person may inherit anything from that person, or receive insurance monies until the investigation has been closed. All such monies shall be held by the county recorder's office.

36/ Oral statements and unrecorded will-testaments shall always be inadmissible in court in matters of will-testaments. We shall no longer allow the estates of the dead to be sued for matters of unrecorded documents.

37/ The County recorder system shall keep verified records of who is alive and who is dead. Everyone's dead or alive status shall be public knowledge as soon as a change is verified by the Senate. Also when people die, the cause of death shall be listed for the public to see as soon as it is determined. Also when people become incapacitated, the cause of shall be listed for the public to see.

38/ To protect the people from murderers, the Senate shall keep detailed statistics, maps, and lists of connected people when people die and become incapacitated.

39/ It shall be a felony to cover up or to hide a person's death, or its cause, or to give or receive compensation for covering up or hiding this information.

40/ All next of kin notifications for both hospitals and death facilities shall be managed by the recorder's office.

41/ All existing laws for escheat and unused/parked assets

shall be void. Only the national Senate shall make national policy with regard to this.

42/ All matters of wills and inheritance shall be considered to be family court matters, and as such, lawyers shall be entirely excluded.

43/ Lawyers shall no longer be allowed to create, work with, or litigate will-testaments or bankruptcies. These shall now be handled by specialist paralegals.

44/ Our nation shall allow the poor and middle income people to transfer all their wealth to their children with no taxation. It is only the upper classes that will get taxed. Also, we shall not allow the transfer of immense wealth from one generation to the next by any means. Banning inheritances of immense fortunes is not only fair for everyone else, and financially prudent, it is also a small price for ultra rich people to pay. Also, doing this is a huge thing for depriving foreign interests of power in our nation. So this constitution stands mostly opposed to family succession of incredible Walton-scale wealth, with over 97% of the equity paid to the nation upon the death of the zillionaire frontman. In other words, when really really rich people die, their children and baby partners (married or not) each get a good chunk, maybe \$10 or \$20-million each in today's money. Once men top out in terms of money, they are expected to have lots of children, maybe up to 100 or more. It will be just more men having more smart babies. But the state gets the rest.

And when they divorce, there shall always be a similar amount used as a maximum, so the system protects its business people from gold diggers. Also, we might start organizing our child support like our corporations with a certain amount of paid up capital that gets handed out by the recorder system.

NR'62. GOVERNMENT SPENDING & BUDGETING

1/ All government appropriation bills must state a maximum amount budgeted for each category. Where the Senate passes open-ended budgets, or termination fees, or Senate obligation to pay more later, this sort of bill shall not be binding upon the government. Also, where government passes laws with appropriation bills neither shall be valid.

2/ No Senate, Sluice or Centi-Nome shall spend more than 1% of its annual budget, nor more than 10% of its tenethly budget with a single vote. Thus our national budget gets budgeted in more than 1000 small pieces. It is thought that having 1000 small pieces will make it much harder to hide corrupt spending and increase the cost-effectiveness of government.

3/ No government agency shall use more than 1% of the nation's budget without being divided up into independently budgeted divisions of government. It shall be thought to be no big problem or cost if the healthcare system, or the army must be budgeted under multiple budgetary headings. Also, government shall not pass regulatory laws with the same vote as it passes appropriation bills.

4/ Laws and spending that benefit less than 1% of the citizens shall take a 2/3 overmajority to pass. Laws that benefit less than 5% of the people shall take a 60% overmajority to pass.

5/ All government spending must be documented and tied to assets, and the cost per square footage must be indicated.

6/ Over the long run, there shall be an obligation to spend our national budget in a way that is generally equal on a per-capita basis across the nation based on population. In other words, we shall generally not have regions that get more than the average.

7/ All government investments shall have a time to payback calculation. Then we shall prioritize the projects that will pay themselves back first. Under this scheme, we first do all the projects with less than a one year payback. Then those with a 2-year payback, a 3-year payback, etc.

8/ The Senate shall establish its new budget for the next upcoming teneth as its first order of business.

9/ The omnibus or camel-caravan bills of the old 1789 democracy certainly supported their own forms of blatant corruption. However, we also don't want to have 10,000 bills distracting our lawmakers. So this constitution allows each Senate sluice to have no less than 10 appropriation bills each teneth, and no more than 150.

10/ Except as stipulated herein, wherever our government spends money for the following, it shall require a 2/3 overmajority to pass:

a/ All spending on non-citizens, immigrants, and exhods.

b/ All foreign aid money and money sent overseas.

c/ All loan guarantees made by the Government.

d/ All war actions that will economically benefit a warring nation(s). For example, the recent US military troops-on-the-ground presence in Afghanistan and Iraq was hugely costly, and this greatly benefitted both Afghanistan and Iraq, and greatly stimulated the economies of these nations. Thus, all of the people of these nations had an big interest in not resolving their "forever war" conflict. Therefore if we ever get suckered into this sort of action again, the tenethly budget allocation shall require a 2/3 overmajority to pass. On the other hand, using precision guided munitions on either invading armies, or the homes and villages of raiding militants (that we have perhaps followed home with drones, or used radio triangulation to find), this sort of activity shall only require a 50% overmajority for the Senate to authorize.

11/ Except as stipulated herein, wherever our government spends or gives money for the following, it shall require a 60% overmajority:

a/ All war aid. This is very important, because we don't want our government's aid money baiting any wars or murders or raiding attacks. Also, where the aid becomes extensive and rivals our own domestic needs, (as with Ukraine in 2023), it shall require a 2/3 overmajority to pass.

b/ All benefits increases for the poor (and not child benefits).

c/ All spending that is primarily for economic stimulus purposes and secondarily to get the things the money is spent on.

d/ All spending on government operated schools.

12/ Wherever our government spends or gives money for the following, it shall require a 2/3 overmajority:

a/ All overseas spending, including all foreign aid money and gifts to foreign nations.

b/ All loan or debt guarantees for foreign nations.

c/ All benefits and benefits increases for poor women not associated with child support matters.

d/ All purchases of foreign goods by Government.

13/ All costly government mandates shall:

a/ Require a 60% overmajority to pass.

b/ Easily be considered corruption when they undermine our competitiveness for the benefit of foreign suppliers that don't have to comply with similar costly government mandates.

c/ Require detailed cost benefit analysis, and a legitimate reason to exist.

14/ All new bills shall be gone through first by the Senators assigned to produce that bill. Then all the Senators shall get 30 days for input on the posted preliminary bill. This shall include public comments made via the Sub-Senate. All will look for defects and ambiguities. Then the bill goes back for re-drafting. Given the extreme benefits of Senate status, many people will comb through our bills, and eliminate most of the bad parts before the laws come into effect.

15/ There shall be no specific appropriations committees or appropriation specialists in the Senate, as this causes a concentration of power in the Senate.

16/ Spending on regulation and administration shall not exceed 8% of budget.

17/ No government project shall allow product markups of over 25% in total, (including all markups), for product sold the Government. All delivery fees shall be for a reasonable and market rate.

18/ Whenever government calls for an industry to bear great cost for the benefit of public health, it shall where practical and fair grant a reasonable amount of public compensation money. This however shall not apply to curtailment industries.

19/ Wherever possible, government shall obtain services and materials on the open market, and under terms reasonably conducive to minimizing price and maximizing the national interest. No law shall unreasonably limit the suppliers or contractors of government, except that they shall normally favor domestic suppliers.

20/ Government may require the use of domestic suppliers, and it may exclude troublesome or unreliable suppliers, however, any law that excludes any other class of suppliers from government projects shall require a 2/3 overmajority for passage. If government cannot find acceptable domestic suppliers, and it does not want to use foreign suppliers, then it must help create domestic suppliers.

21/ Government contract specifications that favor big companies shall be avoided where practical. All other things being equal, government shall favor smaller suppliers over bigger ones.

22/ All government appropriation bills must state a maximum budgeted amount.

23/ Everything that the government buys shall be adequately described, categorized, and posted online for all bidders to view. No bidders shall be given preferential access to government bid information. Also, sufficient time shall be given for bidders to respond.

24/ All government specifications shall be checked and re-checked by the Senate. This checking should be most thorough with high-cost and low-benefit items

25/ No money shall be drawn from the treasury, except by Senate vote.

26/ All Government spending shall be by teneth. Each teneth, sluices and the Over-Senate shall publish a balance sheet along with an income and expense statement.

27/ Where government spending must be prioritized, such as in the case of spending cuts, the lowest priority spending gets cut first, the spending that will have the smallest effect on the continued operation of society. Definitely never should we have cuts where the effects are oversized, as every corrupt and voracious bureaucracy would always have it.

28/ Wherever government has a variety of public works projects to choose from, these shall all be prioritized in terms of bang for buck. It should be almost impossible for pet projects not on the top of the list to get approved without first changing their prioritization.

29/ There shall be no Senate budgeting, projections, tallying, reporting or other important activities that is done by unelected people. The Senate may use information that was made by unelected people, however, the report writing and the writing of laws and similar critical functions of government shall only be done by Senate juries of appropriate size.

30/ Government spending shall only be budgeted and spent by the Senate, or Senate juries of appropriate size considering the amount proposed for spending. Also, all senators in all Senate juries must be active Senators, although if they were an active senator at the start of a trial, they shall be allowed to finish the trial.

31/ All Senate bills and all government implementations shall have Senate jury people in charge start to finish. It shall be Senate juries that are in charge of upper Government management from start to finish. There shall be no unelected people with any power or involvement with either making laws, or the top levels of management of implementing these laws. Generally, when unelected government officials in the broad sense (including educators working for government on vouchers, and police officers). When these stray from the well-worn path and threaten people on color of authority, they should be fired and disqualification working for the government for life.

32/ Government shall be prohibited from using unelected people to distribute money and benefits. This includes especially all outside organizations, and all non-profit organizations. All decisions of this nature shall be made by randomly drawn ad-hoc juries of Senators only. Also, where government gives out money, all recipients must have a re-qualification hearing each year staffed by randomly drawn ad-hoc juries of Senators.

33/ Government shall not fund charities, including charitable hospitals, and charitable schools. This should be thought a trick for stealing, and also a way for government to pervert charitable behavior.

34/ No unelected people shall control any aspect of Government spending or money allocation. All government spending allocations must be described in great detail.

35/ The Senate shall be prohibited from delegating any spending decisions to any other party. So our new giant million man Senate shall be required to make all the spending decisions of the national government, and there will be no bureaucrats making any spending or benefits eligibility decisions or having any sort of advisory role in government.

36/ All policy decisions shall be made by the Senate. All appropriations and program memberships from the budget must be made by a Senate jury.

37/ It shall normally be considered a felony when government

people circumvent government's regular processes for disbursing money. And likewise with circumventing the board of directors at a fictional citizen.

38/ It shall be a felony to spend government money without clearly describing what it is for, by truthfully using one of the Government's 123-456 standard product codes, and per/ meter standard pricing for all branches of government and the military and militia. Also, the Senate shall have strict rules as to what constitutes Properly describes spending

39/ It shall be a felony to spend government money on luxury or oversized goods, or services, of venues, or events.

40/ It shall be a felony to intentionally mislabeled government spending as one thing, when it is something else. Also, everything that government buys shall have a 16-digit SKU number and all like SKUs shall be interchangeable.

41/ It shall be considered felony misappropriation when government agencies fund any fictional citizen or agency that is not under the Senate.

42/ There shall be no independent agencies in our government like the old FED, or Federal Reserve. Each and every single function of government shall be funded and managed by the Senate, with no exceptions at all. All government agencies shall be mapped on our nation's master agency function tree. Where agencies are discovered that are not on this tree, it shall be considered fraud on the part of the government people working there, and all must be arrested.

43/ Government agencies shall be prohibited from accepting private money donations as the FDA did. This obviously leans the agency towards corruption.

44/ Every government agency shall be subject to redundant oversight by all of:

a/ Its own regular oversight agency.

b/ Randomly assigned county Senate oversight.

c/ Randomly assigned national Senate oversight.

45/ The plan authoring group might or might not be allowed to be available for consultation, but these should not be running the implementation of their own plans.

46/ With regard to government spending, all of it is supposed to be micro-managed by the Senate, even amounts down to 1-year's wages shall be determined by the Senate.

47/ There should also be a mildly adversarial relationship between the Senate juries making budgets and commanding the bureaucracy and the implementation side where other Senate juries (Mostly Sub-Senate juries) are in charge of implementation. There should be no unelected bureaucrats actually doing any of the Main-Senate's work work here, or any of the top-half implementation management work, (this implementation management, which is managed by the Sub-Senate)

48/ No more than 15% of government or fictional citizen spending shall go to management or administration. With regard to education, no more than 8% of the budget shall be used for administration and management. Regulatory spending by government regarding its own spending shall not exceed 2% of what is spent

49/ It shall take a 70% overmajority vote by the Senate to replace any government facility. It shall take a 60% overmajority vote by the Senate to change the furniture and repaint. f. It shall take a 80% overmajority vote by the national Sub-Senate to tear down or replace any working power

generating facility, refinery, oil field, or any other energy related facility.

50/ Where the budget cannot be made to fit in with a previous agreement, no spending shall be cut from government areas that have a high level of impact on the economy. For example government oversight of loan approvals, and government regulatory activity that shuts down industry, and schools that keep parents at home with kids and away from work. Instead, all such spending cuts shall be made where they will have the least impact on the overall economy. Notably, this is in sharp contrast to the way things operated under our prior Washington DC. democracy.

51/ When government builds new facilities, the department that administers the operation of that facility should be given input into the construction of the new facility, however, they should never be in charge of building the facility in any way. It is much more important that they not be associated with the construction or they will give biased input into what they need.

52/ Government divisions (including the Military) shall not be allowed to invoke secrecy to evade internal financial auditing.

53/ Money not spent in the teneth it was allocated for shall be returned to the general fund shortly after the end of that teneth and the budget for the next teneth shall be adjusted accordingly. One of the easiest ways to rise in Senate status will be to be part of the team that suggested changes that slashed costs for government.

54/ Those Senators and bureaucrats that figure out ways to save money on government spending and budgets shall be awarded Ubiq status. Wealth will no longer be the only status game, there will also be Senate status and Ubiq status.

55/ In general, all spending on non-citizens (and especially people who have never paid any taxes in our nation) shall be regarded as linked to corrupt foreign agendas for our nation, and also to foreign mafias. In general, the spending shall be regarded as something that will be largely recovered/stolen by foreign nations, or foreign mafias exerting power over the foreigners that we give money to.

56/ In general, we shall stop giving aid money to other nations, so these nations will be our friends or allies, or obey our government. This shall be thought to:

a/ Mostly unnecessary, and a huge waste of money. We have the world's biggest economy, and we are the only superpower. Surely other nations will want to get in our good graces without paying them anything.

b/ Give foreign corruption an eternal year-after-year situation where people specialize in re-directing/corrupting/schmoozing our Senate for profit, and where these people can eventually evolve complex systems for corrupting our nation.

c/ Corrupt many poorer nations, and create a similar year-after-year situation where people specialize in siphoning off the money we give as foreign aid.

d/ Breed a situation where we can only get many other nations to do what we want if we give them money.

57/ The Senate shall only be allowed to give aid and aid money to those nations that are all three of:

a/ Are conforming broad democracies and members of the UM in good standing.

b/ Are unquestionably our allies.

c/ Obey UM reproductive policies.

58/ With regard to government spending, our Senators are supposed to consider our nation's citizens as all-important. Foreigners and foreign governments will generally get no more than 1/4 percent of the national government's budget. (\$17-Billion today). Government shall also not make any loans to foreigners where the loan money is paid out in cash. All foreign aid money must be spent domestically, on goods that are entirely made in in our nation. Also, to reduce fraud and diversion, the cost shall include the cost of shipping the USA-made goods to the actual authorized local recipients of the goods in the recipient nation that is getting the loans. Also, government shall be prohibited from using foreign aid money for either buying goods from overseas, or from overpaying for goods. Also, all Senators are supposed to mostly ignore the wishes of non-voters, fictional citizen entities, foreigners, foreign nations, dole recipients and the homeless when making laws and making spending decisions. The homeless, felony convicts (in or out), and people on the dole should never be regarded as anyone's constituency because these groups are thought to be too easy to corrupt (VIZ the former "Democrat" party).

59/ Instead of financial aid, we shall rely on reducing our tariffs which we will keep at around 8% of assessed domestic final sales value for our friends, and at least 20% for everyone else. Also, in this matter, and many other matters, we will consider the Islamic world to be one nation of Islam with regard to its violent misdeeds be they terroristic or rape oriented or something else that is reprehensible. Therefore, where one part of Islam's empire creates trouble, we will punish all parts of the empire with higher tariffs.

60/ We shall employ a two-handed strategy for keeping foreigners from creating boom-bust cycles to drive our domestic industry out of business. On one hand we will keep eternal lowish tariffs, and on the other hand we will require that government buys all manufacturing facilities that go under due to a period of extreme competition from overseas. For all factories and commodity facilities, government shall have the right to step in and buy the facilities and equipment at its bankruptcy/ resale/ scrap value. This government will either fully mothball, or it will reduce output by as much as 98%.

61/ making gifts of old food, and arming people with 5-shot rifles and 5-shot revolvers, and diverting goods to help. The only exception to the prohibition on handing out cash overseas is the money given to poor foreign women for not having too many children, if any.

62/ There shall be no government gifts to immigrants, and all land and property and benefits previously given to immigrants shall be regarded as void under the law. All of this property shall be seized by the new Government of our nation on behalf of the citizens of our nation. Then this land shall be sold or leased to our own people.

63/ All gifts made by the prior government to foreigners shall be paid back in a reasonable time frame, or the migrant must go back. if the migrant is going to stay. Also, surely we must worry that these people are Mafia connected and they owe a debt to the Mafia that got them their gifts and not to the people of our nation.

64/ Foreigners that can overcome the prejudices of the wise and prudent, and get confirmed to the Senate shall get full Senate honors and the rights of a native citizen if they wish.

65/ Our nation strongly believes that the people should be armed. We believe in this for our nation, and we believe in it for most foreign nations. To this end, we shall only require a 50% vote of the Over-Senate to use our military to hand out 5-shot rifles and 5-shot revolvers at a rate of up to 1 per 10 citizens for both. However, we shall only do this when nations are suffering under a foreign or domestic military, or suffering from raiding strife or warlords, or suffering under unpopular non-democratic governments, or suffering under general murderous lawlessness, or suffering under those who are trying to prevent the nation from mustering up. Once elected, this spending shall be considered irrevocable.

66/ Government shall not be allowed to fund charities, non-profits, and non-governmental organizations as it means of disbursing money. Government must allocate this money for specific Senate-run, Senator managed government bodies. This sort of spending shall always be regarded as potentially a corrupt black box and a means of stealing money. Government shall only be allowed to allocate money to final recipients, and Senate juries of appropriate size programming the amount spent.

67/ Government shall be prohibited from giving money aid to the poor, but must instead provide benefits vouchers that must be used for certain non-luxury goods that cannot be later sold.

68/ After the reapportionment, Government shall no longer be allowed to spend money for public housing, or for subsidized housing, other than 50-person same-sex group-bathrooms, shared-kitchen dormitories with lockout times, and 4-women-to-a-room mommy dorms for women with children. Also, the dorms will be identical nationwide, so they will be mass produced and cheap and abundant and used for disaster housing. It will also be very easily to control the cost of these dorms, and they will all be located on public property. Also, government shall not be allowed to give money for housing.

69/ Government shall no longer be allowed to have any food aid programs for expensive foods that cost more than the average non-urban price for whole raw chickens by weigh.
