70/ It shall be an official policy of our nation to offshore all our burden-to-society long term public aid types, all the long-term homeless that use our nation's homeless resources, and all the adults who are on long-term government financial support, and all the people on long term medical care paid for by the people, and also all the criminals that we want to get rid of for a long time, more than we want to lock them up. These will all be offshored to either some remote part of Mexico, or one of the California islands or to Puerto Rico, or to Africa, or some other location that is appropriate to our nation's needs with regard to this sort burden to society. Also, our maximum security prisons and all our KTPR inmates shall go on Cedros Island near Vizcaino.

71/ To start with, the time limit for declaring someone as a long-term homeless, or long-term welfare recipient shall be 4-years, however, we will wait 4-years from the start of this constitution to start moving people offshore to save on public welfare costs.

72/ The entire island of Puerto Rico shall now be used for housing various sorts of low-security criminals, and problem people, in various forms of housing, and low security prisons and work camps. It shall also offer an alternative for long term homeless people, especially the old, the disabled, the mentally ill, and the indigent. Towards the southwest of the island it shall be more medium security jail oriented. This shall be surrounded with low security jail zone, surrounded with work camp zone, surrounded by a rest of the island where people need permission to enter either the port or airport and there are no small vessels. Also, the seas around the Puerto Rico jail island shall be closed. All the relocated Puerto Ricans get the Cuba rate for their buyout, but they must move to latin America and get citizenship there off the dangerous island on the earthquake fault, and no longer in a US territory. On Puerto Rico, the inmates get a 50-man room bunk or a 3 to a room bunk or a 2 to a room bunk, or if they can get work, then they can rent an apartment. But they are free to walk around in their part of the island. Then they get released to the free parts of the Island, but they can't leave for some number of decades, because that is the sentencing deal, they took. Three decades on paradise island instead of one decade in a glooming prison.

Puerto Rico shall also have quarters for homeless people and offshored long term welfare recipients that can't get off public benefits. These shall have their benefits transferred to Puerto Rico, or one of our other offshoring centers in Africa and latin America, where their money will go much further, if they are going to stay on public benefits, and their benefits don't get trimmed too much.

Puerto Rico's wonderful climate makes it the ideal place for rationalizing longer term confinements under less harsh prison conditions. So we are doing prison reform and we are making time in prison much easier to serve, and then we are going to turn around and use this as an excuse for doubling and tripling the number of years where convicts are removed from society. Also, everyone on Puerto Rico must carry a tracking device and the entire island shall be divided into various security cantonments. All of the seas around Puerto Rico that are west of St. Thomas and east of Punta Cana Puerto Rico shall be closed.

73/ As everywhere else, hard drugs on Puerto Rico will be obtainable for only the cost of watching the required anti-drug media.

74/ Due to the climate, all of the new dorms/ units/ cells on Puerto Rico shall be made from insulated cast concrete with no air conditioning, or heat, or ventilation, except the operable, lockable, secure windows and doors.

75/ There shall be no voting rights for Puerto Ricans, Guamanians, American Samoans, or the people of the Northern Mariana Islands, even if they have moved to the US mainland and even if they have previously voted in our elections. There shall be no voting in any of the areas used for offshoring the homeless and poor. Also, again, there shall be no right of Puerto ricans. Puerto Rico never was a state, but only a protectorate. This status of protectorate did not come with voting rights or migration rights. Also, even US citizens that live in offshore islands, other than Hawaii and US owned Cuba shall not vote in our elections.

76/ Homeless people, like people who have not graduated secondary school shall no longer be allowed to vote. They have to be censused like everyone else on voting day, but they can't vote, unless they have a home. We do this to keep this voting group from interfering with our elections. Besides, these people only care about shelters and food, and once we have those, they are all fine with being excluded from the political system.

77/ Under this scheme for the review of government spending, each Sub-Senator is only approving about \$70,000 worth of spending in each teneth, and this is almost too little to support a bribery or blackmail scheme. Also, bribery, on both sides, will remain a huge felony and there will be sting operations. So it's going to be very hard to bribe Senators into corruptly spending public money. Besides, there will also be the CCS veto.

78/ Government shall not distract itself, and waste its attention on frivolous activities like parties, festivals, parades, celebrations, feasts, catered events, and athletic competitions. Also, where government permits private events to occur on public property, or public buildings, or buildings partly built with public funding or public loan guarantees, or public bonds, government shall get a sales tax equal to 1/2 of the admission price if any, and 1/2 of concession sales revenue. Government shall also get 1/2 of the admission fee and concession income for all venues of more than 10,000 people. In exchange for this, the county recorder shall provide ticket sales/auction services for no added charge. The county shall also provide police security and logistics coordination as needed at no added charge.

79/ Government shall be prohibited from building monuments to great men. Government shall be prohibited from naming any public property or road after any living political leader, or any political leader dead for less than 20 years.

80/ No government money, creditworthiness, or risk underwriting shall be used to build or buy land for giant theaters, arenas, stadiums, or other forms of colosseum. No public land shall be given or sold at a discount for any form of colosseum. If government builds any roads or transportation infrastructure to a stadium, the cost of that infrastructure shall be recovered from that stadium.

81/ No government money or tax breaks shall be given for putting on live performances, live presentations, or live athletics. No government money shall be used for putting on athletic competitions of any sort. Government money may only be paid to performers, presenters and creators if there is no live audience, and the work is recorded, and this recording is posted for all to see.

82/ Except for times of all-out war, and on the condition of large scale infrastructure rollout, the Senate shall not be allowed to spend more money than it intakes in any given teneth or year. Where the Senate cannot manage government spending, there shall be generally across-the-board percentage cuts in government spending sufficient to get spending below tax income lease income and other income. The reason we have a balanced budget rule, is that without this, human nature pulls us into all sorts of foolishness and spending without limit until the entire system crashes. This is a way to make the system last longer.

83/ Wherever practical, Senate spending shall be authorized in one year, and executed in the following year. This is expected to have 3 benefits:

a/ None of the Senators authorizing the spending will have any part of the implementation. Therefore, anyone attempting to corrupt our Senate will now have to corrupt twice as many Senators.

b/ There will be a year to carefully assemble and refine a precise spending plan. This is expected to improve the quality of government services while reducing cost.

c/ Certainly Senators will achieve Senate status by making spending plans more complete and detailed. But they will also achieve Senate status by trimming costs and especially by proving that the previous year's Senate made a mistake and allocated too much money for some sub-program or other.

84/ Most government and institutional theft is from overcharging government where it can be gotten away with. There is also the selling-off of government assets for less than the market value. Therefore the correct terms are "public procurement and asset disposal". Here it should be noted that if there is a static universe of companies that cater to government, they have historically been corrupt and overpriced. So we shall try to stop using these companies wherever practical.

85/ When products and services are purchased for a business enterprise or charity, the UPC numbers shall be forwarded the recorder and added to the relevant account. If this is a third party expenses account, then all the items on the UPC list get compared with regard to average transaction price (for that item). Generally billers shall not be allowed to add more than some pre-agreed percentage over the average price. Also, we shall be especially critical of the money spent at the end of each budgetary cycle.

86/ Government may spend group money in such a way that it disproportionately benefits one group over the rest. However, government shall where practical and fair, recover most of that benefit through the imposition of taxes on the public benefits received. This tax may be imposed all at once if it is small, or it may be spread out over as long as 23 years. Government shall aim to recover more than 80%, but less than 90% of the private benefit to its neighbors from the construction of Government's public infrastructure.

87/ When the people's money is used to build or maintain non-government infrastructure or property, the people shall have the right to their fair share of equity in that thing: This based on the percent contributed by the public and their Government.

88/ All proposed laws and spending by Government shall have:

a/ A cost/benefit analysis.

b/ A cost per expected user analysis.

c/ An expected number of users analysis.

d/ A cost per square meter or square foot analysis where possible.

x/ Where possible, these documents must cite comparable private sector prices.

89/ No government construction project shall be built for more than twice the average cost of similar private sector buildings, or more than 3 times the construction cost of ordinary office buildings. So if the average cost of office buildings is 200 per

square foot, then government shall not be allowed to build any building projects for over 600 per square foot. Also, with regard to government built serious school buildings, these empty buildings built without unattached furniture or equipment shall not cost more than 1.3 times average cost of office buildings. They shall also all be air conditioned so kids can attend school year round. Also, no government school have any athletic facilities, or shop classrooms in it. Instead there must be a nearby separate frivolous activities facility built under a separate budget.

90/ Government shall not be allowed to buy or lease land from the private sector. Instead, Government must use its own land that either already belongs to the people, or land that Government has acquired through lease reversion, or death taxation. Where linear infrastructure must pass through a certain location, government shall replace the land condemned with similar land valued at 15% over the value of the land acquired. Also, no profit from any government initiated transactions (either the condemnation trade or the sale of the property acquired from government) shall be subject to any form of taxation.

91/ Government shall no longer give any money to charities, including charitable hospitals, charitable scientific research facilities, charitable schools. Instead, the Senate shall make an abundance of well connected, centrally located but isolated facilities/rental units for each of the above, and these shall always cost 15% of market rates for non-profit uses. The 15% charge is needed to eliminate people from completely dis-using their space. And the 85% discounted space is thought better than handing out money which will tend to draw crooks. So our subsidies for post secondary education, research, and medicine are delivered in the form of cheap rentals in our completely oversized healthcare centers (just in case of emergency, we want these to normally have individual rooms, but we have 6 beds in each room, vacuum packed in plastic. And we have many times too many offices which will be cheap for people with a registered healthcare company. And government will provide all the backend data functions for our doctors, nurses, and healthcare techs.

92/ The national Senate shall have army engineer crews that specialize in tunneling. One crew shall specialize in 7m train tunnels, one shall specialize in double-wide or 3-m wide tunnels for either double-wide trains or double-wide trucks and cars. There shall be another crew that specializes in aqueduct tunnels. The Senate shall prioritize all the nation's projects, and then the Army engineering crews shall move around the nation digging tunnels for the Army and the people. The army shall also have its own bridge building crews and supply lines for various lengths of bridge. The Army shall also have its own spline railroad crews, and its own interchange building crews that build out all the interchanges nationwide. All of these army builders will work in addition to private companies wanting to bid on the work.

93/ All public retirement account money, and private retirement account money must be held in individual accounts for the individual worker/taxpayer that belong to the worker, but cannot be accessed by anyone (including government) until the taxpayer reaches the retirement age, at which time, the taxpayer gets the money. These individual accounts shall be thought to be a form of bank account that cannot be

touched by Government. They belong to the taxpayer or their heirs. Also, all of the people trying to make individual accounts into giant pools, all these people should generally be presumed to angling to steal it. It's always easier to steal from a giant banquet than an intimate dinner. Pooling people's money should be thought a trick of stealing money and also coercing compliance with government directives.

94/ We shall keep our government organizational divisions small, because this prevents unelected people from shifting money from one purpose to another, as happened in 2024 when our bloated Department of Homeland Security shifted money from FEMA to taking care of illegal immigrants, leaving no money to pay for the hurricane crisis in the Asheville Valley.

95/ Except in the first decade of this constitution, Government must openly discuss all non-emergency plans for years and listen to all fresh Sub-Senate elevated public input. Government plans are supposed to include flow charts for all new government activities as well as integration with other sections of government. In the first few years, Government can take less time, and getting it perfect will not be necessary. We will instead rely on successive approximation to get things right.

96/ Even for new approaches that seem obviously much better, all new policies shall be rolled out in a small part of the nation. There should then be reasonable testing and discussion where the new approach get adjusted and refined and the new approach tried in a couple new places around the nation. Only then after some time refining and testing, only then do we roll out the new plan across the nation.

97/ We shall ponder first law of corruption, namely: "The more they spend, the more they can steal". Namely, the more crooked leaders spend, the more they can steal. And the more they screw up, the more they can do their work over again. And the more they do the job over again, the more they can steal. So we must all be aware of the way that corrupt governments actually have an incentive to spend more and also to screw up. Also that this screwing up by government people is a primary symptom that corruption is going on.

The Coronado bridge is also a good example of the first law of corruption, namely: "The more they spend, the more they can steal". And everyone in government loves more government spending because it means more stealing by the Mafia/ Junta running our governments. This is why corrupt leadership always pick the most expensive approach. This is why they built a huge \$48 million bridge in 1967 (around half a billion dollars today), when they could have spent 1/20th as much money building a short causeway across from downtown San Diego, also conveniently dividing San Diego bay in half.

98/ The Senate shall study the suggestion system of Mazda motor company starting in 1975 and implement the best ones. There should also be this kaizen, or Japanese-style continuous improvement of our government programs under the Senate's leadership and under a system of Ubiquitous/Senate status. The Senators implementing laws in each new year will all be looking for ideas to improve their Senate standing. So there will be lots of eyes looking at everything. Lots of eyes that are highly incentivized for spotting any slight incremental

improvements. This approach will also make organizational sabotage much harder to pull off.

99/ We will have hundreds of groups of Senators managing the design of the various Government upgrade programs. And these will cycle through new Senators annually. So over a 3-year refinement process we will have 3 groups of Senators for each project.

100/ Under the old corrupt democracy, there were two halves of US. Half lived in the heartland/flyover-states, and the other half in tsunami prone areas. These tsunami prone areas were bought up by multi-generational outsiders who paid practically nothing for the deadly land that the locals didn't want.

101/ The national government's budget shall stop favoring the deathtrap coastal areas, and we shall instead move many of our military bases and military supply and storage to the heartland as a matter of obvious strategic benefit.

102/ Nations don't save their way out of an economic situation as easily as when they make more stuff.

103/ With regard to the making of laws, our 100,000-man Main-Senate shall rule in place of the 535-man oligarchic legislature of the old democracy. Also, the executive branch shall be replaced by tens of thousands of randomly drawn jurors from our million-man Sub-Senate. Thus instead of having unelected energy tsar frontmen, and homeland security tsar frontmen, we will have very large Sub-Senate juries to make these decisions, jurors drawn by last-few-digits.

104/ When the Sub-Senate spends the money allocated by the Main-Senate, there should be one Sub-Senate jury that is making preliminary decisions about spending the money. Then there are other juries convened for Drafting work descriptions and bid instructions. And there is another for bidding, and another for management of the building and roll out. Then the operation is done by still other groups.

105/ The size of our Sub-Senate spending juries, like the size of our money-court juries shall vary, depending on the amount of money involved. These juries must be big enough so that corruption gets to be too expensive.

106/ The Senate shall establish no fewer than 2000 specific billing codes for government spending, and at the same time we shall prohibit all forms of general and non-specific billing codes.

107/ All divisions of government must keep track of the number of people they served and what they did for those people, and and how much it costs per government customer for each sort of government service. And this shall especially include police, and the court system.

108/ All government agencies must inform and train the people how to use their agency.

109/ All of the money, the government collects from tariffs and from leasing its properties shall be used to offset tax income.

NR'63. THE INITIAL TAX SYSTEM

1/ To jumpstart the economy after a metaphorical heart transplant, all tax payments shall be suspended until the Senate implements them. We will let the kelp reach the surface and the strong sunlight. Then when X gets past 1 on an exponent curve, then we will start imposing taxes.

2/ The public purse is going to soon spray huge amounts of

money/fuel into the carburetor of the economy. It is going to build new cities and a new rail-based train system, and increase humanity's terra forming abilities by 1-to-2 orders of magnitude. And we are going to need lots more of everything to do that. Getting the economy going again will not be a big problem.

3/ Without a parasite running our government as a feeding mechanism, government will become much more efficient, so it will need less money to do the same thing. Therefore the private sector will tend to rev faster with the same inputs.

4/ Due to a general cancellation of debts, nobody will be in debt as individuals. The people will therefore be able to pay more taxes in addition to their money going further.

5/ Over 80% of debt appears to be to foreigners. Thus the national debt, and interest on the national debt will fall by over 80% after the debt cancellation.

6/ Tier-1 healthcare, will be significantly funded with taxes on luxury healthcare and other healthcare taxes. Taxes on unhealthy goods such as tobacco, alcohol, sugars, carbonated gut-stretching beverages, and mafia drugs, shall pay a large part of the remainder.

7/ There shall be no income tax except for curtailment industries. No longer shall we tax people for working or investing their money, except in curtailment industries. The people shall pay taxes based on how much they spend. Thus we shall become more a nation of thrifty people who work hard.

8/ When people make more money from commodity exchange than they do from either producing commodities or using the commodities, they shall pay a 50% income tax on the excess.

9/ The initial tax system shall start as follows. It can be adjustable up or down with a 60% overmajority from the Over-Senate:

a/ There shall be no income tax.

b/ The sales tax for goods and services shall start at 20%, the same as the UK rate. It may reach 25%.

c/ There shall be a wealth tax as described elsewhere herein.

d/ Property taxes will be higher.

e/ Corporations will pay death tax each year.

f/ The inheritance tax shall be much higher.

g/ Luxury tax will be much higher.

10/ The new tax house shall show each taxpayers total tax paid in each year. It shall also express this as a percentage of income. This way there is less question that the new tax system and new government are better.

11/ There shall be no legal donations to government or to any government worker, or Senator, except to the Senate's general fund. This is so it doesn't look like people are getting bribed or paid off. Also, it can easily be considered attempted bribery for either side to talk about this, and in some cases hint at this.

12/ All tax collectors are required to be agnostic about how much money they collect.

NR'64. NON-REGRESSIVE TAXES

The regressiveness of the tax system will be reduced with the following tax exclusions:

1/ All municipal transit shall be free to use.

2/ Government shall maintain an ever growing public-domain media, information, and software library for free download.

3/ All textbooks and education media shall be virtual and provided by government for free.

4/ Government shall produce self-study instruction media modules for every common trade and profession as well as all popular academic areas. These shall be free to download or stream and shall be translated into all the major languages. A gift of freedom for the world.

5/ After school care, and school meals will be free.

6/ Government shall provide free testing in all professions, occupation, and workplace-oriented academic areas. Employers shall be required to use these cheap, non-corrupt, objective tests instead of expensive, corrupt, and subjective academic degrees.

7/ There shall be no tax on basic food ingredients as explained elsewhere herein.

8/ Government shall provide fixed-line and wireless internet for free.

9/ Voice calling shall be free worldwide.

10/ Tier-1 healthcare shall be free except for the deductible and copay.

11/ Government shall Ubiquitize a large number of drugs. Thereafter, these shall be sold without any intellectual property rights charges.

12/ Each person shall get to deduct 25 square meters of property tax.

NR'65. PUBLIC PROPERTY

1/ Government shall be required to lease sufficient land to meet demand for all purposes including farmland, ranch land, mineral land, township land, retail, warehouse, and other uses, but not including timberland. These leases shall generally have minimal starting fees, and rely mostly on monthly property taxes and higher monthly rent payments.

2/ It shall be a felony to knowingly arrogate public property as one's own, or to deny the public the right to use public property.

3/ It shall be a misdemeanor to crowd the public way in order to make money from slowing traffic.

4/ Government property shall not be bought, sold, leased, or acquired, except upon the approval of a properly sized Senate jury according to the following value schedule:

- a/ Under 1 year's wages, 3-Senators.
- b/ Between 1 and 5 year's wages, 5-Senators.
- c/ Between 5 and 25 year's wages, 11-Senators.
- d/ Between 25 and 125 year's wages, 45-Senators.
- e/ Between 125 and 625 year's wages, 135-Senators.
- f/ Between 625 and 3,125 year's wages, 499-Senators.
- g/ Over 3,125 year's wages, 1199-Senators.

5/ Government shall make clear rules for the management of group assets. Because it tends to be both easier and more profitable to steal from groups, the penalties for crimes against groups shall be higher.

6/ All government property items shall be stamped "GPROP". Valuable government property should have locator chips of various types.

7/ It shall be a crime to be in possession of any stolen government property, even a plastic pen. Government and

the people shall be fastidious about making sure that government and public assets are not arrogated.

8/ Our nation shall guarantee private property rights, but if anything is on the line, it shall be public domain. Government and the courts shall always err on the side of the public domain when drawing the line between the public domain and private property.

9/ Government shall vigorously defend the public domain against arrogations and infringements, both in the future and arising from the past.

10/ In recessions, idle labor should be employed on increasing public infrastructure. When the economy is going too strong, government shall cut back on public infrastructure spending.

11/ Posters and Statues of great men can easily be subverted to increase the power of monarchs and oligarchs, and decrease democratic power. Therefore, our nation shall have no statues of great men on public property. Also, we shall never allow giant murals of our leaders, the way Iraq had giant murals of their dictator Saddam Hussein. On public property, our nation may have statues to the group effort as war memorials, and statues to admirable national traits such as the Statue of Liberty. And we shall allow all sorts of monuments and statues on private property as free expression. Also, war memorials and statues that are abstract or not showing any particular person shall not necessarily be removed.

12/ Just because the beautiful French Statue of Liberty on Staten Island is modeled after images of the Greek goddess of strife Hecate, it shall not disqualify this beautiful statue. It increases its educational value, indicating the way the forces of evil and parasitism seek to confuse us about goodness and evil and limitless immigration of the lowest people in human society worldwide.

13/ There shall be no cube statues or statues or disguised cubes, or inverted cubes. All cube statues shall be cut up into a little pieces and melted down. Everyone involved with choosing to build a cube statue shall be investigated. The inverted cube statue at the September 11 memorial in New York shall be filled in with gravel and turned into a grassy park.

14/ The Lincoln memorial in Washington DC, while named after one man, shall always be considered mostly an anti-slavery monument, rather than a monument to a presidential monarch. The nearby Jefferson memorial shall always be considered mostly a monument to the spirit of anti-Federalism that was so critical to the founding of our nation, rather than a monument to a presidential monarch. So both of these monuments shall always be protected.

15/ We shall note some facts about Abraham Lincoln:

a/ All the world ended slavery peacefully, but not America. Instead America suffered the costliest war in terms of death of Americans even up to this day. Up to 600,000 people died 600,000 Americans died fighting each other to end slavery: The end of slavery that the Middle East benefited from. This was the price we had to pay to Ishtar to end its slavery in the land of the free. And even then, it wasn't until the war was mostly over, that Lincoln free the slaves. Was Lincoln a hero?, Or was he a mole?

b/ Lincoln vigorously enforced the fugitive slave laws, and represented slave owners, and never a slave, a fugitive slave.
c/ Lincoln instituted the first income tax.
d/ Lincoln was the a vociferous advocate of the national Bank of the US, the predecessor of the Fed.
e/ Lincoln proposed a constitutional amendment (called the Corowin amendment), which would have enshrined slavery forever in the US constitution to prevent the war. This amendment was even passed by five states.
16/ The various Counties may require registration to use each municipal park and also for all the bathrooms with the public bathroom app.

NR'66. INTERNATIONAL TRADE & RELATIONS

1/ Ordinary tax evasion deprives government of revenue. Smuggling not only deprives government of revenues, but it also endangers our nation's industry and free markets. Therefore, the budget for anti-smuggling enforcement shall be three times the rate for other forms of tax evasion, tax-dollar per tax-dollar.
2/ At least 90% of the budget for smuggling prevention shall be used for bulk shipments.
3/ All shipping containers entering our nation shall have openable doors on both ends. All 20-ft half containers shall also have a side door on one side. All 40-ft full containers shall have have 2 side doors each one third down the side.
4/ Government shall open and inspect every single shipping container entering our nation, and the cost of this shall be charged to the shipper. Unless and until all shipping containers are inspected there shall be no customs inspection of travelers arriving with baggage. All containers shall also have holes for sniffers and air insertion. At least 2% of containers containers completely unpacked and micro inspected. To assure randomization, on each day, the two last digits of the container conforming to the draw for that day shall be put aside and checked in detail. The cost of this will be born/shared by all shippers.
5/ All containers entering our nation shall have a unique international number and a large bar code on all 6 sides. Shipping Containers shall not have any corporate identity information on them. All they shall have is a confidential number known only to the shipper and the fiduciary shipping system. Every container is a total grab bag. Many will be shipped around empty.
6/ No tax, toll or duty shall be laid on the movement of goods within our nation.
7/ There shall be no sales tax on goods sold to other nations. All goods sold in our nation whether produced domestically or imported from other nations shall pay the same sales tax for that category of good.
8/ Government shall never in any way directly, or indirectly subsidize the importation of anything.
9/ All ports and airports shall be nationalized and the property of the county they are located in. All ports and airports shall be owned and operated by their county government and none may charge any docking, lading, or unloading fees except those uniform fees authorized by the national government.
10/ All ports shall stream live overlapping high definition video feeds for all to watch. All shipping containers numbers shall

be scanned and live streamed along with all relevant information about the importer and container's contents.
11/ Port and dock workers and other people in key industries shall not be grossly overpaid as this makes them obedient to the people that go them their plum job.
12/ Entry authorization shall be checked/administered before passengers board their flights to our nation, and there shall be no immigration checks or questioning for citizens at any airport. Because of this, all conforming arrival immigration at airports must be handled via face recognition cameras and passport scanners. Therefore, there shall be no immigration interviews/ questioning for at least 90% of arrivals. Also, no citizen arriving home shall be subject to any sort of immigration questioning.
13/ Customs inspectors at our nation's airports shall have the right to use imaging tech on arriving bags, and they shall have the right to search up to 5% of arriving bags. But they shall no longer have the right to question citizens about their travels, or what they are bringing back. They may however have import declaration forms, but these shall not require any itemization for goods if the total is worth less than 80 hour's wages. Also, all used and washed non-luxury clothing shall be considered to have no value.
14/ It shall not take more than 5 minutes on average (including lines) to scan one's passport for Airport immigration. It shall not take more than 5 minutes on average (including lines) to go through airport customs inspection unless the arriving person is sent to secondary inspection.
15/ Except where there is evidence of criminal behavior overseas, or travel to the PU, or smuggling, all customs and immigration inspectors shall be prohibited from asking citizens what they have been doing overseas, or where they have been. This practice shall be regarded as a humiliation of free people and an intrusion by government.
16/ All immigration checkpoint staff and all customs inspectors shall wear law enforcement type cams. All primary customs questioning areas and all secondary inspection baggage tables and inspection areas shall have multiple county recorder system overhead cameras and microphones. Cam wearing Sub-Senators shall supervise airport and land border customs inspector at a ratio of at least one Sub-Senator per 4 customs inspectors. Customs inspectors for shipping containers shall work in pairs that are randomly reassigned daily by the Senate. One of the pair is a career inspector, the other is a Sub-Senator. The Sub-Senators shall rotate quickly.
17/ The cost of goods should be generally irrelevant to the assessed value and the import taxes they must pay.
18/ There shall no longer be any diplomatic immunity or special treatment for diplomats in relation to:
a/ Driving or parking violations, parking tickets, fines, or late penalties. Where these go unpaid for more than one year, the diplomats from that nation shall be denied the right to enter our nation.
b/ Crimes committed in front of many witnesses, or clearly recorded on video. Where this is the case, the diplomats shall be jailed and tried like anyone else.
c/ Where a diplomat or their family member causes the death of a person in our nation they shall remain in pre-trial lockup, just like all foreigners that seem to have killed someone. This

due to the flight risk.

d/ Clearing immigration and customs either entering or leaving our nation. All foreigners, including all diplomats and air crew must go through immigration and customs like everyone else.

e/ Charges of smuggling weapons, poisons and drugs.

x/ Also, no nation (no matter how big) may have more than 4 people (plus up to 4 spouses and 8 genetic children) that are subject to diplomatic immunity at any one time.

19/ Some Exhods shall be allowed to communicate with the PU and others will not be allowed. However, all communication with the PU shall be on monitored lines. It shall be a felony to engage in encrypted communication with the PU. It shall be a felony to engage in Islamic money transfers or to send money to the PU without government approval.

20/ Government shall keep statistics on both GNP and GDP, with GNP being the favored statistic. Also, we shall stop using overall GDP/GNP as our primary metric of economic growth, and we should switch to per capita GDP/GNP as our government primary measurement of economic growth because we value the humans of our nation.

21/ The Senate shall have exclusive power over the the printing/coining/creations of money for our nation. This power can never be delegated to any others. Also, there shall never be any binding foreign authority, authorization, or power required to print/Coin/create money in our nation. There should be no foreign authority, or non-Senate authority over the loan obligations and property rights of our nation.

22/ There shall be a tax on money borrowed from foreigners in our nations by citizens, real in fictional. Also, the debts owed by our government and our people shall not be entirely guaranteed to foreigners in times of economic crisis. These may be forced to wait until the economic crisis abates before then can be paid back

23/ All existing foreign aid money payments shall be stopped, and the new Senate shall only send goods as foreign aid. This is because money aid is too likely to be stolen and too corrupting. Instead we shall provide things that cannot be stolen, such as Internet, access, arms, well and water pumping technology, water, filtration, tech, birth control, sex education, water, and sewer pipes that locals will install provided, the people of this nation are not stealing our foreign aid gifts. Every person previously involved in the doling out of money overseas shall be audited for unaccounted wealth, investigated, and questioned.

24/ We shall give no money to nations that hate us or that dance in the streets celebrating our misfortune. We shall also be no part of any international organization that gives money to nations that hate us.

25/ Our nation shall be prohibited from borrowing money from foreigners, foreign nations, and foreign fictional citizens.

26/ All Imported brands must start with the import nation, so that we have Japan-Toyota Germany-Braun, Korea-Samsung, Italy-Fiat, and so forth. Where a domestic brands have been purchased by a foreign company, the brand name must be changed to the nation of the foreign company.

27/ De minimus shall be 15-minutes wages for the purposes of unaccompanied trade. With regard to accompanied trade.

de minimus shall be 10-day's wages.

NR'67. UTILITIES AND SHARED INFRASTRUCTURE

1/ Nobody but the people shall own the market or the path to market.

2/ All ports, passenger airports, shared roads, railroad tracks, rights of way, railroad lands, railroad stations, and all bus stations are hereby nationalized. There shall never be any non-governmental ownership of any of these places.

However, where new privately built airports are less than 14 years old from the first flight to land or take off, the airport may remain under private ownership.

3/ Except for when we try new approaches in limited areas, there shall be no non-government ownership of any electric utility, water supply, water utility, natural gas utility, information line, telephone, cable TV line, fiber-optic line, telephone line, aqueduct, canal, broadcasting property, pipeline, road, railroad, railroad locomotive or transportation infrastructure. All this group infrastructure shall be nationalized, and all shall belong to the Senate and people of our nation. The railroad cars and road vehicles shall however mostly be not government owned.

4/ No shared public infrastructure shall in any way tax or profit from new users connecting to the system. All connections and new users may only be charged at true marginal cost.

5/ There shall be no parking of vehicles on arterial streets where an extra lane, or wider lanes would improve traffic flow. There shall be no special bus lanes where the bus passengers are not at least the number of car passengers per lane monthly.

6/ Nobody, and no community shall profit or boost sales by crowding, slowing, or throttling the pathways of our nation.

7/ Merchants and cafes shall not be allowed to crowd the public walkways, or public squares. Aside from this, however they shall be free to use the sidewalks without permission from, or payment to government. However, if people live within earshot, the the sidewalk must close from 9:00pm to 7:00am unless government allows them to stay open later.

8/ All private use of public right of way, permanent or temporary shall require official surveyors pins. No individuals shall every acquire any right to the public right of way or have any right to compensation for government's decision to alter anything in the public right of way.

9/ The wishes and needs people living or working near noisy arterial routes shall be considered entirely irrelevant in government's decisions about that route. Anyone who elects to live or work near an arterial route must accept any and all increases in traffic and noise along that route.

10/ Communities outnumbered by the daily flow of a through-route, shall not slow or impede that route in any way. Even the presence of schools on through routes shall be secondary to the objective of not slowing through-routes and the exponential shrinking of our communities that results. Better we fence the schools than slow the routes. Communities shall however be free to build high-speed bypass loops around their area. Communities may also build noise walls if they pay for them locally.

11/ The Senate may use eminent domain to acquire assets for public infrastructure. The courts shall no longer have any

jurisdiction in matters of eminent domain, or land condemnation, and especially in the matter of the money paid (or the sufficiency of any kind given) by the Government to everyone in an area.

12/ Public transit and other common transportation infrastructure systems shall be organized to maximize service and convenience to the people, not to maximize profit for government, and definitely not to maximize profit for the people who manage the system.

13/ Government shall have no liability for utility system failures. Government shall have no liability for power lines downed by wind, weather, lightning, earthquake, or flooding. Government shall have no liability for fires caused by a failure of any utility system except windmills.

14/ No utility administration public or private may install or maintain its own lines. All must use open market contractors. No utility contractor shall exceed 5% of any utility's new construction, or 5% of any utility's maintenance.

15/ A 2/3 overmajority shall generally be required to approve of rebuilding existing things. This shall be so for both fictional citizens and for government.

16/ When public utility companies rebuild their infrastructure systems, they must get government permission or the the people directing this may be considered as embezzlers.

17/ The rebuilding of obsolete public utility infrastructure shall not be a reason for renewing ownership rights.

18/ The average daily electric output of each windmill, each solar panel, and all other forms of alternative energy shall be measured by the same devices and metrics as are typically used for diesel electric generators. Then this average daily output shall be divided by 24 to get an average hourly output. Solar panels shall be measured in phoenix AZ and Portland Oregon. Windmills shall be measured at the wind farm near Palm Springs. The value of energy shall be the average wholesale electric cost of electricity in Houston Texas. Then the price of the windmill shall be divided by the value of the electricity and expressed as a number of year the generation device takes to pay itself back, assuming a reasonable sum for maintenance and disposal.

19/ Government prohibited from subsidizing one source of energy over another, except that Government may subsidize hydroelectric, geothermal and coal. The plants in the cities will tend to use petroleum, and the plants outside of our cities, and particularly the remote plants will all burn coal. This shall be thought prudent stewardship for future centuries, so the world's petroleum lasts longer. We shall have perhaps 6 different sizes of standardized coal plant, and 12 different sizes of petroleum plant.

20/ Public utilities are not allowed to do their own construction or have anything to do with instruction on their lines or infrastructure or property.

21/ All public utilities and fictional citizens shall be prohibited from buying any more bird-killing, ugly, energy-wasting windmills. Also, public utilities and fictional citizens shall be required to shut down all existing windmills that cost more to maintain than their power is worth.

22/ All public utilities and fictional citizens shall be prohibited from buying any more solar panels or windmills. Also, public utilities and fictional citizens shall be required to shut down all power facilities that cost more to maintain than their power is

worth.

23/ No solar facilities shall be put on farmland or grazing land. They must all go in places where they will not reduce food output, and not poison good soil, or poison runoff into fresh water resources.

24/ Good Farmland cannot be used for factories. Also, toxic manufacturing must go in coastal areas where the runoff will not contaminate the soil.

25/ Wind and solar power expenditures shall be excluded from the rate base of all fictional citizens and public utilities.

26/ Both government-owned and private utility companies shall not be allowed to build or remodel their infrastructure. All must use the open market for their construction. Where people or communities want to remodel utility common infrastructure, it shall also occur via an open bidding process run by the county which shall charge for administration.

27/ There shall be no foliage less than 3m from power or other overhead lines. Where these are trunk lines, it shall be 5 meters. All counties must trim the trees by all utility lines. This is government's job, not the job of the public utility.

28/ All high pressure gas lines shall have remote and local shut-off and bleed capability. They shall also have earthquake sensors that activate these features.

29/ All new construction with either air conditioning or electric heat shall have 2 electric meters. The air conditioning and heat shall use meter-2, while all the other uses shall use meter-1. Evaporative cooling shall use meter-1. Likewise, all new construction shall be required to use both an inside the house meter (meter-1) and an irrigation meter (meter-s). In the event of a drought, the meter-2 water gets cut first. In the even of excess power use, the meter-2 electric gets cut first.

30/ There shall no longer be billboards in the real world. However local townships and other real estate developments shall be allowed to advertise in the two largest interchanges. Also, while we will aggressively go after vandals and taggers and unauthorized commercial spam signs, we shall always be slow to act and totally forgiving with people who post motivational, or educational, media on walls.

NR'68. PROPERTY CON-DEM-NATION

1/ Linear infrastructure shall include roads, railroads, wires, pipes, channels, communication lines, and other pathways that facilitate group interchange between the people. It is vitally important to the economic health of our nation that linear infrastructure right-of-way acquisition costs and other government property acquisition costs be as low as reasonably possible, so the people may have the best infrastructure, and the best government facilities possible.

2/ All privately owned non-urban land shall be considered location fungible with regard to the construction of new group infrastructure and new communities for the benefit of the people.

3/ Government shall give a reasonable but sparing inconvenience increment when it compels a transaction to acquire land. However, government shall generally be prohibited from paying money when it con-dems land for linear infrastructure. Government may pay money for improvements, but it shall generally not pay money for land. Government shall generally only give replacement land for

the land it con•dems, and this land is supposed to be worth about 15% more.

4/ When less than 3% of a human owner's land in one holding is cut-off or acquired by con-dem-nation, government shall give nothing to the land owners, except where inhabited structures are also involved and located within 5 meters of the new property line. When more than 3% of an a human owner's land is cut-off or acquired by con-dem-nation, government shall give 15% more land of a similar character than it took.

5/ Where a street is used daily by hundreds of cars and the sidewalk is seldom used, Government may close all or part of the sidewalk and force pedestrians to to around. In this event, no money shall be paid to the adjoining property owners.

6/ When a non-urban parcel's access is cut-off by a new linear infrastructure project, government may grant an easement over neighboring land. If this easement is for an area less than 3% of neighbor's land holding, the neighbor shall get no compensation for it. No compensation shall be paid when government runs buried or overhead utilities across non-urban private property.

7/ Government shall give at least 1year's notice when it con•dems land or exercises its rights to run linear infrastructure on privately owned non-urban land.

8/ In all public land con-dem-nations, the base con-dem-nation value shall be the property tax value assessed by the county tax assessor's office. If there is an inconvenience increment, it shall be added to this amount. Thus, there shall be no right to appeal the compensation offered by government.

9/ In non-urban con-dem-nations, government shall pay a standard con-dem-nation rate per square foot for habitable housing structures less than 25 years old, and another for human habitation structures more than 25 years old. It shall pay another square foot rate for non-movable barns, and another rate for non-movable warehouses. For non-urban con-dem-nations, government shall not pay any increment for luxury construction, special facilities, sentimental value, historical value, or views.

10/ Whenever government con•dems property for create group infrastructure, the valuation shall be calculated as if the group infrastructure neither exists nor is planned.

11/ Government may con-dem property up to 40 years in the future by making a reasonably discounted payment today. This shall be called "public curtailment of ownership rights".

12/ Government shall not compensate property owners for the unsightliness, noise, smell, air pollution, or vibrations produced by new or expanded linear infrastructure.

13/ Urban land taxes shall be at least 10x higher than non-urban land taxes by land area. All land that has not paid urban land tax in the past decade shall be considered non-urban land, and therefore a location fungible commodity.

14/ No compensation shall be paid for intentional path squatters, or for property rights that were established to obstruct must pass locations, or sensible bypasses, or for those who crowd a path, or refuse to back away from a path with increased traffic needs.

15/ When urban land is condemned, government need not offer substitute property in that particular neighborhood. Government should however pay 15% over market value as

an inconvenience increment for the owners.

16/ When government con•dems property, it gives fair compensation as described herein. When government nationalizes property, it gives nothing. Nationalization shall generally be considered a thing of penalty for wrongdoing.

17/ In order to maximize the area connected to our nation's road system, all functionally land-locked properties of buildable size and status shall have the right to buy a reasonably-sized flagpole over the generally unbuilt land of their neighbors. Lots over 2-acres in urban places shall always be considered of sufficient size. This flagpole shall be located where government determines the impact to the community is lowest and most consolidated. It shall cost the petitioning parties 3X the going price for land, and shall become public property upon granting. All of the money paid goes to the owner of the easement claimed in this way.

18/ All foreign property ownership or leasing within 5km of a military base shall be nationalized, unless there area is a major city.

NR'69. LAND FOR NEW CITIES

1/ The Public Property Sluice shall plan-out and pre-approve at least 50,000 potential township sites in our large nation. Each of these shall allow a township of up to around 20,000 units. This results in potentially 1-billion units, and an eternal overage of land supply for building. The townships will vary in area, but the average will be around 20 square kilometers. This is about 1,000,000 sq. km., or about 6% of the nation's surface area reserved for township sites. Thus, while we will only use ~1.2% of the nation's land to house our current population, we will have an additional 4.8% in reserve for additional townships. Thus there will be a many-fold abundance of township sites and the price of urban land will no longer sell for any significant premium over farmland. Thus this overage of sites will assure that the price of urban land will remain crushed forever. Also, these relatively sealed townships shall be sited all around our nation, in the nicest and prettiest places our land has to offer, the prettiest places that are mostly between our current cities and in our national parks and wilderness areas.

2/ By plan, the land for the new cities will mostly be far away from existing cities and roads. So the land will be inexpensive to con-dem if we need to augment our public land holdings

3/ In general, only communities of appropriate size will be allowed to access what will be nearly free land.

NR'70. PRIOR PUBLIC LARGESS

1/ All grants and sales of public property, infrastructure, and contracts ever made by the previous government shall be voidable at the election of the Senate.

2/ If the Senate elects that public property or infrastructure, was sold at a price that was wildly below market, it may nationalize the property.

3/ The word largess is from the ancient Greek peacock monster Argus, which had hundreds of eyes. Argus was the symbol of the Sphinx mafia, and one of Argus' greatest powers was that of government largess.

4/ Just as we hold the possession of stolen property and

counterfeit money to be a felony, so too shall it be a felony to be the recipient of largess or super-sweet-deals from either government or from fictional citizens.

5/ Just as it is a felony to both give and receive bribes, it shall be a felony to either give or possess largess.

6/ When everyone would have wanted in on the action, the birds that got the swoop in may be charged with receiving largess.

7/ Largess shall include both grossly below market purchases, and grossly above market sales.

8/ The Senate, shall not be bound by the promises, grants, and obligations of the prior corrupt narrow democracy. Certain prior grants of immigration amnesty may be cancelled by the new Senate as it decides is right.

NR'71. MORE AND BETTER

1/ Our nation shall work for more and better and it shall never encourage less and worse.

2/ Government shall not tax, burden, incentivize, or seek to reduce output in any mineral, raw-material, commodity or industry, except curtailment industries officially elected as curtailment industries by Over-Senate sophoscite.

3/ Government shall never limit the number of companies or service providers in any jurisdiction or area of expertise.

4/ Curtailment industries may be taxed at different rates and means. curtailment industries may be stripped of their property rights, and they may also be forced to transact through national monopolies or monopsonies. The Senate shall also have the right to dock any long tail ownership rights in any curtailment industries.

5/ When fictional citizens fail to increase output in times of profitable shortage and high prices, they may be put under new management, partitioned, smithereened, equity diluted, subjected to special regulations, or taken over by government.

6/ Government shall not encourage, subsidize, pay, or offer tax breaks for people to leave their productive assets unused, underused, or used for some backup purpose like growing trees for lumber.

7/ All government owned buildings of an ordinary nature must be rented at market rates if they are not used for over 1 year.

8/ We shall always support family farming and always try to gently re-establish our base of family farmers. We shall also try to gently drive our inner city poor onto farms.

9/ Government shall neither create nor permit, any perverse incentives that drive people to kill others, harm others, or to separate children from their families, or to commit other sorts of horrible act.

10/ There must be a bias to the creation of new roads, new railroads and adding more connectors. This should be so for all inaccessible regions areas that can be easily accessed. It should also be so for land-locked lots. Also, it should not be expensive to condemn land for new access-ways.

11/ Mountain lumber, and mountain ore. Do they come with Energy to be harvested in the delivery process, sufficient that they can be transported some distance away from the mountains?

12/ Government shall not be allowed to pay people or induce people not to produce food or other key commodities, or to

penalize farmers for growing certain non-drug crops, or to have any agricultural or mining, or commodity programs that are not phased in over several years.

13/ It be a felony for Government people to chop down or order the chopping down, or killing of productive crop trees, and other crop plants, livestock, domesticated insects, etc. without Senate authorization. Animals and bees shall only be culled upon an order by the county Senate. And in all such cases where government commands the destruction of livestock or crops, government shall give 100% fair value reimbursement.

14/ All animals that die and are unfit for human consumption, along with all butchery trimmings, restaurant waste, home waste, spoilage waste, roadkill, shall be ground, cooked and dried and then recycled for use in our fish hatcheries and pig farms. In the townships, every unit will have a grinder/ garbage-disposal that is near the unit's universal connection buss and the township food waste collection system hook-up. We also imagine that our shared township utility plants also have a place for gathering, cooking and dry pelletizing the food waste of several townships.

15/ Government shall not be allowed to command that farmers not grow specific crops, or pay people not to produce food, or pay them to produce less food, or penalize farmers for growing certain crops or to do anything that is not phased in with regard to agriculture and other key industries.

16/ No county government shall ban mining or oil drilling, or refuse disposal, anything that all counties are supposed to do. All environmental, mining, energy, oil, or coal, nuclear energy, or hydroelectric laws shall come exclusively from the National Senate. The term laws herein, includes all regulations, rules, mandates, and government requirements.

17/ All foreign owned businesses with more than 1/3 illegal aliens shall be nationalized. All foreign owned businesses with less than 1/3 citizens and shall be nationalized.

18/ All Chinese owned farms & food processors in our nations shall be shut down, and fair value paid after two years.

19/ All foreign controlled farm interests in our nation shall be nationalized.

20/ It shall be an official policy of this constitution to drive the economy upward to a state where one parent can afford to stay home with their with their young children if they wish.

21/ The Senate shall develop driverless 1-cubic meter self-driving AI-operated delivery/spreading trucks with tank treads for gravel, sand, base, asphalt, and concrete delivery. These will use narrow earthen pathways

22/ The Senate shall develop driverless grading robots that go through each community (every so often) and drag the dirt roads.

23/ Another advantage of switching to uniform vehicles is that we can use robots to replace the tires and the brakes and all the other common things that go wrong in our vehicles, no longer will we really need mechanics.

24/ The Senate shall develop driverless lawnmowers that people push over an area once and then the lawnmower remembers, so that all one has to have to do is put them down and they will mow that area again. So people don't have to hire somebody to cut their grass.

25/ Due to the great material inflection point, the old dichotomy of conservative vs. liberal will invariably shift right

because there is going to be much less need for poor aid, due to the widespread outbreak of wealth.

26/ Wherever we have food service for airports, transit stations, bus stations, festivals, county fairs, ball games, schools, and ports, we shall emulate the Thai system of having far too many hawker stalls, and banning chains so that competition keeps the quality and price up.

27/ All of the people involved with giving away free healthcare to illegal aliens shall be presumed to have been corrupted by foreign interests.

28/ Only certified farmers can use the certified food system. However government shall not prevent the uncertified farmers from selling their produce without government involvement. Provided the food is from their land.

F — VICES

NR'72. ADDICTION, DRUGS AND ALCOHOL

1/ The single most important aspect of our nation's Mafia drug policy is to make sure that the Sphinx Mafia can't profit from the Mafia drug industry. So long as the Mafia is making money selling drugs, it will:

- a/ Spend money advertising, marketing, and enlarging the market for its drugs.
- b/ Have the power to use our people as addicts for their nefarious purposes such as prostitutes and junky assassins/ hashish-ins.
- c/ Be able to control the nature of the drugs and add toxic or erosive additives to harm certain individuals.
- d/ Be able to add addictive drugs to non-addictive drugs such as opiated hashish.
- e/ Be able to market addictive drugs such as opiates to people taking non-addictive drugs such as marijuana.
- f/ Have income from drugs.
- g/ Have a big source of income that offers synergies with other Mafia activities.

2/ Government shall not criminalize the importation, production, growing, manufacture or distribution of any Mafia drug once it has become widely available through criminal enterprise, or once it is the cause of a violent mafia turf war.

3/ Marijuana, cocaine, opiates, LSD, amphetamines, MDMA, alcohol and tobacco shall always be considered as drugs widely available through criminal enterprise.

4/ Government shall license the use of all widely available Mafia drugs, as well as tobacco and alcohol. These licenses shall be free of charge, but they shall require the viewing of anti-drug media under a viewing verification system. This viewing verification system shall use techniques like flashes of numbers and words in videos which must be typed in to assure that the viewer is actually watching. The viewing verification system for written material involves recording the person's face and eyes as they read from a window the shape of a letterbox slit directly under the screen camera. We can also use wider than normal text lines with double or triple spacing between lines. This will exaggerate the head and eye movements.

5/ It shall be a serious crime to:

- a/ Be in possession of a Mafia drug, alcohol or tobacco without a valid license.
- b/ Sell, or give Mafia drugs to those who don't have a license.
- c/ Be in possession of Mafia drugs sold or registered to other people.

6/ For the following Mafia drugs, the license holder must watch the stated minimum number of minutes of the Sub-Senate's anti-drug media each day on average under eye monitoring to keep one's license active:

- a/ Marijuana — 1 minute.
- b/ Tobacco and up to 5 drinks in a day — 1 minute.
- c/ Cocaine, LSD, hallucinogenic mushrooms, ecstasy, and unlimited alcohol consumption — 30 minutes.
- d/ Opiates and amphetamines — 1 to 8 hours

7/ To obtain a new license, or re-activate a license 20 day's worth of anti-drug media must be viewed either all at once or over a number days. To reinstate a lapsed license, 5 day's worth of anti-drug media must be viewed. It is important that there be a delay period of at least 24 hours before re-activating one's license.

8/ The penalty for unlicensed use of Mafia drugs shall be jail time. And this must be enforced so that the drug prevention system works, and people don't scoff at it. Therefore, we shall automatically punish everyone who uses a controlled substance without a valid license by a sufficient amount to ensure that nearly everyone complies with watching the required anti-drug propaganda.

9/ Pre-menopausal mafia drug women and high alcohol license women must have an IUD or birth control implant, or get regular birth control hormone injections in order to obtain a license for cocaine, amphetamines, opiates, or alcohol consumption over 4-drinks a day on average. Such long-term birth control may also be required of pre-menopausal women that consume large amounts of alcohol in binges at bars.

10/ To smother the Mafia drug industry, and to assure that nobody profits from turning people into addicts, no citizen, real or fictional shall cultivate more than 4,000 square meters of any Mafia drug plant such as marijuana or opium. The cultivation limit for tobacco shall be 320 acres per farmer.

11/ Except for Marijuana, tobacco, alcohol and hallucinogenic mushrooms, all Mafia drugs must be processed by an FDA certified drug refining facility. If these drug refining facilities are making fat profits, the certification process must be made shorter or easier, or the Mafia will re-enter the industry at the refining point.

12/ It shall be a felony to act as a middleman between growers and drug processors, or growers and consumers, or to act as a black market drug processor.

13/ All shall know that expensive Mafia drugs are a favorite industry of the Arabs. For through these drugs, especially the most addictive, they not only make money, but they also acquire useful addicts who will frequently do the awful things they are told to do. Therefore, Arabs shall have nothing to do with the Mafia drugs industry. All Mideast, Muslim, and formerly Muslim people found participating in this industry shall be punished under harsh old laws they created for their competition before this Constitution existed.

14/ All shall know that through hashish the Arabs gain a black box. Through this black box they may add in any other drug

they wish, such as addictive opium. Thus they can hook people without them even knowing it. For this reason, the importation, manufacture, distribution or possession of hashish, or incense containing either marijuana or opium shall remain a felony with up to 20 years in prison as a penalty. All marijuana edibles shall be seen as another form of hashish.

15/ Marijuana may only be sold in its natural form without any preservatives, perfumes, or other additives. Also, all marijuana buds shall be sold with the small bud leaves still on the buds. This is so it is harder to put secondary drugs on the marijuana buds. But it also conveniently helps the market eliminate high-yield, low-quality big-bud marijuana. All other forms of marijuana shall be considered as evil hashish and strong penalties shall apply. Also, it shall be the government's official policy that marijuana should not be eaten because the high doses are not good for one's ability to function. Therefore, there shall be no more non-prescription edible marijuana products, and edible marijuana shall be considered a medication that requires a prescription. Also, it shall be thought that whatever smart-drug gold people find in marijuana, that will go away much faster with the significantly higher binge-level doses involved with eating marijuana.

16/ All existing charges and jail sentences relating to mere possession of marijuana, cocaine, opiates, LSD, hallucinogenic mushrooms, and amphetamines are hereby pardoned with immediate effect. Those who are felons only because of possession of one of these drugs shall no longer be considered felons under the law. This list does not include hashish, and hashish offenses are not pardoned.

17/ Government shall log, track and tax everyone's purchases of Mafia drugs, alcohol, tobacco and prostitutes. Spouses, parents, and offspring over age 16 may visit the recorder's office and see this information.

18/ The sharing of one's drugs and one's tobacco shall be a crime for failing to do this, we make it much harder for people to stay off once they have quit.

19/ Everyone gets a receipts for their drug purchases, so the drugs can be matched with a photograph or nano markers. Also, Government may require that chemical nano-markers be added to Mafia drugs to keep the system working as intended. Thereafter, to be in possession of drugs that don't match the nano markers may be evidence of illegal drug use.

20/ Government shall offer free addiction feathering, opiate substitutes, and opiate antagonists to addicts People who check themselves in to government rehab can't leave until they are off the drug for the prescribed time.

21/ If someone has an active amphetamine, opiate, cocaine license, or they have a license for more than 5 drinks a day, that information shall be displayed on the internet for all to see.

22/ Those prescribed opiates by qualified doctors as pain killers must still watch the required opiate addiction media, however they shall only be required to watch 25% as much as a recreational drug user.

23/ To help people clean up, after 2-years of being clean and sober, everyone's consumption shall be removed from the government's database and forgotten. Clean and sober shall be defined as free from all drugs, alcohol, tobacco, and prostitutes.

24/ Nobody but government shall report, or store data on consumption of drugs or prostitutes. It shall be a crime to either offer this information for sale, or to offer purchase. It shall not be a crime to make up fake information of this sort and offer it as real.

25/ Government shall compare the income of all license holders with their expenditures. Once someone crosses over into the realm of the impoverished ad-dict, desperate for a fix, and useful as pawn, they shall be labeled an addict by government, so as to warn the people. Those who use the maximum possible quantities of Mafia drugs, or suffer repeated arrest for public intoxication may also be publicly labeled as addicts by government.

26/ It shall be a crime to buy controlled substances for others, or be in possession of someone else's controlled substance.

27/ All government issued driving licenses and identity cards shall display all drug licenses on them. Some types of vehicle operator licenses shall be suspended while people have certain types Mafia drug license, or have daily alcohol use over a certain level.

28/ If government is dispensing opiates or other powerful drugs to any group, such as veterans injured in war, and the person wants innocuous marijuana instead, then government shall provide a reasonable amount of marijuana instead.

29/ To reduce blood disease sharing among addicts, and also to keep loose needles out of our cities, we shall dispense clean needles with our clean IV drugs. Then when the addicts want more drugs and needles, they must turn in their old needles. If they are missing one needle, their dosage gets dialed down by a tolerable but uncomfortable amount. Those who present used needles shall get fresh new sealed needles one-for-one, no ID required, no questions asked, no payment required.

30/ People shall not be allowed offer drugs and herbs as substitutes for controlled mafia drugs. Those who offer, infer, or suggest such a thing shall be subject to prosecution.

31/ The Senate shall use 1% of total annual smoker mortality as a benchmark for other sorts of mortality in our discussions about public policy.

32/ It should be noted that government will be supplying all the various addictive Mafia drugs to people once they are addicts. So there will be much less money to be made in the ongoing sales of addictive mafia drugs. This is intended to cut the money available for Mafia drug marketing.

33/ In order to get the government drugs, one must first complete the relevant user course(s) and then find the drug on the street. They one must take the street drug and then go in for drug treatment while they are both in withdrawal, and while the drug is still in their system. Also, it shall be a felony if the people who supply first doses advertise in any way, or pay any sort of sales commissions, or pay any sort of touting fee, or if they sell to people who are not licensed, the government being allowed to perform sting operations of people buying Mafia drugs without a license.

34/ Nobody born after 2007 shall be allowed to buy tobacco, or tobacco-related, or nicotine products. Official policy shall be to make tobacco harder and harder to get until it is eliminated completely. It shall be a crime to sell marijuana mixed with tobacco.

35/ This Constitution does not guarantee the right of the

people to appear in public with a blood alcohol content that is over 0.14%. Also, from 6:00am to 6:00pm, the various counties shall be free to limit maximum public blood alcohol intoxication levels to lower levels. The Senate may limit the people's right to appear in public at any blood alcohol level that it elects.

36/ This Constitution does not guarantee the right of the people to appear in public so intoxicated from any source that that they are passed out, or unable to walk normally.

37/ Those who violate the rules of public intoxication may be held uncharged by police for up to 24 hours. Anyone convicted of public intoxication 3 or more times in 3-years in any part of the nation may be sentenced to up to 90 days at work camp.

38/ Drug and alcohol intoxication shall never be any excuse for any violent act or crime. The courts (and everyone else) shall be prohibited from using intoxication as an excuse for any act. The court system shall be prohibited from allowing intoxication or insanity as a defense argument for any criminal act. Also, it is worth repeating that we shall no longer regard insanity as an excuse for any crime. No longer shall we allow this ruse. Everyone who commits some violent acts, and claims to be insane or high or drunk should be treated a little worse by the criminal lock-up system, and never better in any way. The jail system (which includes prisons and work camps) shall have rougher levels of lockup for the people who are insane. The idea that people can claim insanity or temporary insanity and get away with lighter punishments shall be regarded as an Ishtarian ruse from now on. Also, the logic by which we came to allow this absurd state of affairs with psychology/psychiatry, and by which we came to all believe in the climate religion, that shall be thought an example of sophistry, the "sophists" that Plato/Socrates campaigned against.

39/ Taking drugs in public, including marijuana shall remain a serious crime, particularly around children, playgrounds, schools and children's places. However marijuana may be freely smoked in bars, discos, remote places away from children, and in private places without children around. Also people shall be free to smoke marijuana in the same house as children, so long as they do it in another room, away from the children behind a closed door. Also, there shall be no public intoxication rules for marijuana.

40/ Those who lace people into becoming addicted to addictive drugs to gain power over them, these people get two decades in work camp per count.

41/ It shall be the official policy of Government to reduce alcohol consumption wherever practical without prohibition and without fostering a black market for unregulated alcohol. As long as alcohol and tobacco are in common use, 2% of government PSA slots shall be against each of these two activities.

42/ It shall be thought that mixing drinking with socializing in bars starts many people on a lifetime of alcoholism. For this reason, the Senate shall disfavor business activities that serve alcohol to people for immediate consumption, whether they be a bar, a disco, or restaurant serving wine or beer with food. All alcohol served by a for-profit business shall be taxed by at least half of the sales price. Alcohol given away for free by party hosts that do not charge others for entry, or

access shall be free of alcohol taxation.

43/ Injected drugs and dangerous doses of drugs shall only be legally consumed in the government's drug dispensary. Alcohol, tobacco, marijuana, CBD, and drugs, lighters, matches, and other similar things potentially harmful to minors shall not be sold using vending machines.

44/ Those people who have fist fights in drinking establishments or drinking areas or after spectator sport events shall lose their right to go to bars and drinking establishments everywhere nationwide for between 6 and 30 years depending on the circumstances. When people act aggressively, or start fights, or fight while drunk, it shall be everyone's duty to report it. Angry drunks who get into one fight while drunk, or repeatedly challenge people to fights while drunk shall not be allowed to keep their alcohol license.

45/ When people get into trouble repeatedly when they drink, Government may reduce their allowed alcohol intake to the point where the drunken troublemaking stops.

46/ Some who have to take certain controlled drugs such as opiates may be required to do so under live video selfie monitoring by the recorder's office. Some will have to take their drugs at the treatment center, and remain at the treatment center on penalty of losing their high-quality, safe, measured dosage source.

47/ All opiates shall be dispensed by government. All prescription opiates shall be taxed, with the tax refunded upon either watching all the addiction media, or the pills being turned back in to the opiate dispensing system.

48/ New drug paraphernalia with no drug residue on it may be freely imported and sold in our nation. Used drug paraphernalia shall not be sold in our nation. There shall be no penalty for possession of used drug paraphernalia, so long as the residue is at an ordinary level for that paraphernalia device. However the presence of drug paraphernalia on a suspect's person while driving a motor vehicle should almost guarantee a drug test.

49/ Drug residue, and traces of drugs shall not be grounds for drug charges, especially when it's on things exchanged-between, or shared-by people such as currency notes, financial cards, furniture, car seats, handbags, wallets, used vehicles, and other things where the micro-amount might be from someone else.

50/ There shall be no right to fly as an airline passenger under the influence of any Mafia drug except marijuana. Used marijuana paraphernalia may be brought on airplanes, but must go in checked baggage. Other sorts of drug paraphernalia shall not be brought on airplanes.

51/ To reduce intellectual overhead, All government statistics about the people shall be expressed in numbers per citizen, per thousand, or per million. There shall no longer be any per 100,000, per 10,000, per hundred, or per 10 crime statistics.

52/ All new agricultural machinery shall:

a/ Remember exactly where and how it was driven in previous years

b/ It can be called by the farmer's navigator app, re-instructed, and programmed for up to 30-days of use.

c/ Interface with the refueling robots.

d/ Be visually smart enough to see what areas have been plowed, and guide the equipment into exactly the right position to plow or harvest the fields.

e/ Shall have ample LED lights and be able to work at in the dark.

53/ Where broken glass is a stubborn problem such as at beaches and parks, no alcohol shall be sold or used in glass containers.

54/ All alcohol purchases must be authorized and pair for prior to the start of consumption. There shall be no right of establishments serving alcohol to collect money for alcohol after it has been served. Where drinking establishments use threat of force or spiked drinks to collect large sums of money from their customers, the law shall treat them just like strong-arm street criminals.

55/ The Senate shall thoroughly investigate Ibogaine (at many different dosages) as an addiction interruption drug. There is good reason to suppose that this information has been suppressed by the addictive drug Mafia.

56/ The people can't be denied anything simply because they appear drunk, without them having the opportunity to take breathalyzer test to prove that they are not drunk.

57/ The following people shall not be allowed to have an alcohol or recreational drug license:

a/ Commercial pilots and cockpit crew.

b/ Bus drivers.

c/ Train conductors.

d/ Surgeons.

e/ Crane operators.

f/ Truck drivers.

58/ The following shall not be allowed to have a recreational drug license:

a/ Police officers.

b/ Healthcare licensees.

c/ Child worker licensees.

59/ All Commercial pilots and cockpit crew may be subject to breathalyzer tests and finger prick blood tests when the clear airport security. All bus drivers may be subject to similar testing whenever they are pulled over.

60/ All should ponder the simple and eternally valid advice of Isaiah 5:11: "Woe unto those who drink in the morning and who stay up late at night drunk on wine. You may enjoy music and drinks at your parties, but you will have little regard for goodly/godly words."

61/ If there is a special drug enforcement agency at all, it shall have nothing to do with air travelers, or people traveling around our nation in automobiles, or trains. Also, aside from airport-style security checks, there shall be no policing of the contents of people's bags at airports and train stations.

62/ The Senate shall study the effectiveness of the addiction interrupting drug Ibogaine. It shall do this in at least 500 patients for each addiction of: opiates, alcohol, cigarettes, cocaine and meth amphetamine. What are the initial upsides and what are the initial downsides?

63/ Many people screw up their brains with alcohol and brain trauma sports, so they don't have their wise years in the second half of life, and they don't produce wise ideas for their people.

64/ Marijuana may only be sold in bud form, and it must be sold untrimmed. Trimmed marijuana buds and buds with missing leaves shall be illegal to sell. This is so it is harder for people to deal in large amounts, and also harder to add other drugs. This also favors community production over large

scale production. It also helps people to discern the low-yield small smart drug Sativa buds from the high-yield, couch-lock Indica buds.

65/ All edible marijuana products shall be banned because:

a/ The doses are much higher and the effect only comes from an overloading of the organs, which can't be good for the health.

b/ People regularly eat edible marijuana products by mistake.

c/ Children are likely to eat them.

d/ As with hashish, it is much easier for dealers to add other addictive drugs and get people hooked on the other drugs by putting them in the edible.

66/ All bars and discos shall have:

a/ ID scanning and recording of everyone that enters.

b/ Casino style video cameras to document drugging of drinks and sexual abuse of patrons.

67/ Everyone with an alcohol license over a certain level may be required to use a breathalyzer to stay within some ideal BAC range determined by the Senate.

68/ The people cannot be arrested for underage consumption of alcohol or marijuana. This shall now only be a citation offense.

69/ The legal blood alcohol limit for people merely walking around drunk and harming nobody shall be set as high as possible. This unless they are regular drinkers.

70/ Government shall no longer have the right to tell the people that they cannot drink alcohol on any public property beach or 5,000-year floodway, or any popular highpoint public look out, or mostly deserted public parks between the hours of 9pm and 9am. However, glass containers shall be prohibited.

NR'73. TOBACCO & SMOKING

1/ Tobacco, which is sometimes called the devil's weed, is the definitive Ishtarian product, and a symbol of everyone's enslavement to Ishtar. It is addictive so we can't stop, it gives nothing of benefit, and it causes great harm. It is also widely supported thousands of times each year by valuable product placements ads in the media that have no other apparent reason for existing. Every time some idol holds a cigarette in the media that is Ishtar at work.

2/ Tobacco kills some 7-million people a year worldwide. It is the most easily preventable causes of death and suffering for mankind. For this reason, the Senate shall enact regulations designed to harass tobacco users with the objective of wholly eradicating tobacco use in our nation.

3/ There shall be no smoking in any indoor public place, or in any public or shared vehicles, or any place where shared vehicles stop. There shall be no smoking in any school, medical facility, office, multi-user building, shop, indoor or outdoor shopping center, restaurant, cafe, eating or drinking or dining patio, bar, hotel, covered walk, queue, or any business open for walk in customers, or within 10 meters of any of these places.

4/ The terms: "smoking", "tobacco", "cigarettes" cigars, and similar terms, shall include all tobacco, tobacco derivatives, tobacco substitutes, tobacco smoke, tobacco vapors and any airborne or inhaled substitute for these things. The term shall be as inclusive as possible and shall include all tobacco and

nicotine inhalation and delivery technologies that currently exist or may come along.

5/ Except for existing tobacco (and tobacco-like products) addicts, there shall be no tobacco licenses for those under age 18 today. In 2026, the minimum age for tobacco licenses shall be automatically raised to age 19. In 2026, the minimum age for tobacco licenses shall be automatically raised to age 20, and so on. Eventually, by the year 2096, nobody under age 90 will have a tobacco license and we will have almost totally phased out all use of tobacco and tobacco like products around that time.

6/ Tobacco and alcohol related healthcare shall each be a separate budget items. Each of these two items shall be entirely paid by various taxes and license fees on that product be it alcohol or tobacco. It shall be noted by all that prior to this Constitution, the worldwide cost of tobacco-related healthcare was over four times the revenue of the tobacco industry. This is just the hospital bill and does not include the pain, suffering premature death and loss of productivity.

7/ The tobacco industry is hereby nationalized to the extent the government wishes to claim ownership.

8/ All tobacco and Mafia drugs shall be sold through licensed dealers. No dealer shall have more than 300 registered customers, or charge any markup on the tobacco they distribute. All government payments to dealers shall come when customers quit and stay clean for the prescribed time.

9/ After being paid, and before handing over the merchandise, the dealer shall have 60 seconds for anti-tobacco exhortations either in person or by video. To start, the per-purchase limit shall be 200 cigarettes per visit to a tobacco dealer. Similar limits shall apply to Mafia drugs and alcohol, so that the person must constantly have to go and buy supplies and receive their dealer exhortations.

10/ The word "tobacco" shall be cancelled, and the term "cancer leaf" shall be used instead. All commercial operations involving tobacco, including the signs, store displays, packaging, and all other marketing and advertising must stop using the old term tobacco by 2024.01.01. After this date, anyone involved with selling, exchanging, or advertising cancer leaf products labeled as tobacco may be charged with selling illegal drugs. Also, the words "Cancer Weed — Cancer Weed" must be printed continuously in 12 point text down the length of each cigarette.

11/ All existing tobacco brand names and manufacturer names shall be nationalized and shut down. No tobacco makers shall any longer be allowed to have any brand names. All the fetching old tobacco names such as Kool, Lucky Strike, and Marlboro shall cease to exist as trade names and business identities in all categories. As with all nationalizations, the tobacco companies shall get nothing in return for what was nationalized. Once all the tobacco product and manufacturer names have been nationalized, all tobacco products must be sold in the same Senate-approved packaging with one of the following 11 names randomly and proportionately printed down each cigarette on both sides, and on each package face: Stink Mouth, Fast Cancer, Early Death, Coffin Nails, Die Young, Don't Ever Start, Slow Painful Death, Self Hate, Shit Breath, Cancer Leaf, and you won't be able to stop. Tobacco and tobacco derivatives and artificial tobacco chemicals, and drugs that are like tobacco shall not

be sold under any other brand name than these 11 brands with their evocative and pro-social names.

12/ On tobacco packaging, the manufacturers name shall occupy exactly 5% of the package's external surface area. The term Cancer Leaf shall occupy no less than 15% of the package's external surface area. The other 80% of the package's external surface area shall be covered in images of the most revolting and repulsive tobacco disease imagery the Senate can find. These images shall change daily for all cigarettes manufactured on that day. The word tobacco shall no longer be used, but only "cancer leaf", or "tobacco, the cancer leaf"

13/ It shall be against the law to cover anti-tobacco imagery, or to keep cigarettes in another package.

14/ Tobacco products shall no longer be allowed to use slogans or say anything about for their cancer leaf. They shall not be allowed to describe tobacco as natural, organic, healthy, healthier, pure, fine, clean, clear, smooth, tasty, mild, light, gentle, roasted, American, Turkish, lucky, pleasurable, or less harmful.

15/ The production, distribution, importation, possession, sale and consumption of cigars, pipe tobacco, flavored tobacco, menthol tobacco, clove tobacco, chewing tobacco, mouth soaking tobacco, tobacco pouches, and shisha tobacco shall be prohibited in our nation. The penalty for selling any of these shall be a 30-day shut down of the store, or 30-days in jail if there is no store. The penalty for smoking cigarettes improperly and the penalty for smoking a cigar anywhere shall be one teneth in work camp. The goal is to entirely eliminate cancer leaf use with the passing of current generations. Also, the reason we eliminate smoking outside on bar patios is that smoking cancer leaf is infectious and we want to eradicate it.

16/ The copy for anti-tobacco ads is a tricky thing. Therefore, all anti-tobacco copy, must be approved by the Over-Senate after public comment.

17/ Until smoking is eradicated, at least 5% of all PSAs on transit and government owned billboards shall display anti-smoking PSAs. At least 2% of all government PSA boards shall remind people to be careful with their backs. Another 2% will tell them to avoid head knocks. At least 5% of all government PSA boards shall tell women to think about their line and the future of mankind when they have a child.

18/ The Senate shall require that an annoying form with a large number of data entry windows be completed with every tobacco purchase. These forms shall also display shocking images of tobacco illness for each data entry window. Tobacco may only be purchased by licensed users that have filled out the forms and viewed the required amount of anti-tobacco ads produced by the Senate. These ads shall rotate depict no less than 50,000 people shockingly disfigured by tobacco related illness.

19/ All residential buildings shall be either smoking or non-smoking. The Smoking buildings must pay government a fair sum for the added fire risk.

20/ Video that clearly depicts someone smoking when or where they should not smoke shall be sufficient to convict people who test positive for tobacco use.

21/ Regarding marijuana and hashish mixed with tobacco, it shall be a crime with high fines to sell this stuff, or give it

away, or use it in public. We shall completely prohibit and punish this stepping-stone to tobacco addiction. Also, when people say that marijuana is a steppingstone drug. This isn't about the user, it's about the dealer, who now has an opportunity to put other addictive drugs in with the marijuana. And this is a much bigger problem with hashish and edibles, and situations where there actually are identifiable drug dealers.

22/ Marijuana shall not be smoked or around schools, or play grounds, or day care centers, or ice cream shops or other places where children gather, or play. This echoes the way other adult vices like gambling, drinking, and sex are supposed to be hidden from children.

23/ There shall be no tobacco marketed as "natural" or "bio". No tobacco or tobacco derivative, or tobacco substitute shall contain any other drugs or therapeutic plant.

24/ There shall be no smoking in building courtyards, or on any sort of walkway, or any place where people are regularly walking by, or within 20m of any frequently opened door to an enclosed space.

25/ No bar for the mixing and service of alcohol shall be visible from the street or adjacent sidewalk.

26/ Where people are smoking tobacco in a non-smoking indoor places in open defiance to signs, other people shall have the right to do the following and it shall neither be considered a crime, nor provocation for self defense:

a/ Grab or knock their cigarette out of their mouth or hand as long as the smoking person is not harmed.

b/ Splash the person with a cup of water to the face.

NR'74. ANTI-GAMBLING LAWS

1/ The word gaming shall no longer be used to describe gambling. Only the word gambling shall be used for gambling.

2/ The term gambling shall apply to all casinos, gambling places, horse races, gambling cities, gambling areas, gambling equipment, and gambling references

3/ There shall be no gambling between 11pm and 6pm anywhere in the nation.

4/ There shall be no more slot machines.

5/ There shall be no everywhere online gambling available in our nation.

6/ Government shall regularly infiltrate sting illegal gambling operations and illegal "pink-slip" races, and cock-fights. Where assets are discovered, government shall seize them. This shall include all gold, diamonds, valuable jewelry, cash and other valuables at the premises. Of which the police officers and deputies involved with the operation shall get 20% of the assets seized in the raid. In general, the officers of the police department shall get 20% of the proceeds value of all assets seized from the Mafia when police makes raids and arrests. The definition of Mafia shall also include small street gangs of 5 or more people.

7/ No agreement concerning gambling or gambling debt shall be legally valid in our nation. If the casino operation fails, or the casino operators run-off, or the operators simply refuse to pay out money, those who lose out shall have no legal right to use the police or the courts. Also, they may be charged for unprovoked violence if they harm anyone on account of the casino's refusal to pay. There shall be no financing of

gambling on any level, and this shall include margin debt for market accounts. Those who lend money to gamblers shall have not right to collect on their debts. Those who make clearly self-serving decisions on behalf of a fictional citizens, including those who gamble with FC money for their own private upside: These shall be considered as if they're stealing the money. This is why we have conflict of interest rules for both Government and the nation's fictional citizens. This is why we encourage our Government and fictional citizen leaders to ask for a ruling if they are uncertain of whether there is a conflict of interest or not.

8/ Those using force or threat to collect on gambling debts or gambling promises shall be viewed by everyone, including the law, as baseless extortionists working for organized crime. Thus all the rights of self-defense shall apply to these collectors as if they were organized crime extortionists.

9/ Gambling debts shall not exist under the law. All personal bets where someone says: "I bet you \$1 or \$1-million shall be unenforceable. It shall be a crime to threaten people over such debts, or call for people to pay a gambling debts, or to inform other people about such debts.

10/ There shall be no anonymous gambling. All gambling facilities shall use the Government's tax reporting system for all gains and losses. All gambling gains shall be subject to a 20% income tax.

11/ Everyone entering a gambling facility, making a gambling purchase, or making a gambling redemption shall have their identity, face and finger prints verified by government

12/ Government shall allow people to make binding renewable oaths not to gamble for any period of up to 5 years in the future. After this, they shall not be allowed to enter any casino in our nation, or any cooperating nations.

13/ All gambling operations shall pay a special income tax of at least 20% on the net proceeds of each gambling facility in each day. All tills must be counted each day. Those participating in illegal gambling either as facilities or as customers shall suffer double penalties for both illegal gambling and tax fraud.

14/ There shall be no advertising or product placements for gambling. Each mention of gambling or casinos or anything related to these in the media shall be heavily finned.

15/ There shall be no bank or teller machine within 1-km of a casino.

16/ The law does not protect the gambling machines, gambling tables and casinos from vandalism. These things shall be considered, as having no value under the law. We shall not have fugitive slave laws where the government protects enterprises engaged in unscrupulous things.

17/ There shall be no gambling activity in the final 10 minutes of each hour the gambling establishment is open for gambling.

18/ Where people work for many-customer sin businesses like strip clubs and gambling dens, and similar sorts of businesses that are illegal, but also in the middle of town, businesses that should hide, but many people know about them, these people may be charged with conspiracy to corrupt government.

19/ The media shall not be allowed to report on lottery or gambling winnings except when they are improbable, and the media is reporting on probably fraud. There shall be no media

about lotteries or gambling in general. All should be considered ads in support of gambling and heavily fined.

20/ There shall be no more sports betting because the bookkeepers so commonly corrupt various sports.

21/ All gambling places including casinos, sports betting places, and horse race betting shall be presumed to be fixed, and government shall not enforce any honesty rules in sporting events, and not only that, it shall prohibit sporting events that people may gamble on from enforcing rules against the players throwing the games. However, if a slot machine says that a person won, even if it was hacked, the casino can't say otherwise, or it must pay a 10X penalty for attempting to scam its customers. This shall be so no matter if the slot machine is broken or hacked.

22/ There shall be no way to wire money from a person's financial system accounts to any casino, or related business, or to within 200m of the property of the casino.

23/ Where people make bets on some matter that has not been proven beyond a shadow of a doubt within 30-days, neither party wins and the bet expires unresolved.

24/ When bets are won on a linguistic trick, or a technicality that most people overlook, they shall be thought to be merely for amusement. It shall be a crime to take betting money, or expect to take betting money based on some kind of deceptive trick. For example, if someone says: "I bet you a thousand dollars that I can do between three and four hundred pushups". And they do 4 pushups, this shall not be considered an actual bet, but a joke.

25/ Where people defame others or threaten others for not paying or not conceding defeat for either a joke-bet, or an unresolved bet, the defaming person should be regarded as a scumbag.

26/ The penalty for killing illegal bookmakers shall not exceed 4-years in prison. The penalty for killing people trying to collect on a gambling debt shall not exceed 2-years in prison. However these factors must be clearly evidenced in order to be valid excuses for killing someone.

27/ This constitution's prohibitions against gambling shall be applied in the broadest way reasonably possible, and it shall include all sorts of activities that pay people money or valuables for winning. This shall include carnival games and vending machines that award stuffed animals for hitting something. It shall also include people getting a payout for making a hole in one. It shall also include raffles and lucky draws.

NR'75. HARMFUL PRODUCTS AND ACTIVITIES

1/ Neither Government nor any fictional citizen shall do anything that helps popularize, advertise, glamorize, or encourage significantly harmful or statistically harmful products or activities. Government shall tax statistically harmful and often dangerous products and activities. This shall include mafia drugs, alcohol, tobacco, tobacco substitutes, excessively fatty foods, excessively sugary foods, gut-stretching carbonated beverages, gambling, ground meat, head-injury sports, ingestibles containing high levels of caffeine, or ingestibles sweetened with high levels of fructose. Government shall create policy and taxes to discourage the consumption foregoing things.

2/ Government shall not provide intellectual property protection for any mafia drug, alcoholic product, tobacco product, tobacco substitute, burned inhalant, sugary beverage, gambling facility, or any ingestible that is more than 1/3 sugar by caloric content. No packaging for any of the foregoing may feature any watermark or hologram or other difficult to reproduce anti-counterfeiting measure.

3/ There shall be no IP protection or right to monetize media that depicts, describes, advertises, glorifies, or suggests smoking, vaping, alcohol intoxication, gambling, the use of Mafia drugs, dangerous stunts, trapeze, first-person shooter situations, shootouts, martyr situations, suicide situations, homosexuality, or transsexuality.

Also, there shall be no mass-shooter games where people kill shoot and kill large numbers of humans, aliens, creatures, or animals. Vehicles, blocks, airplanes and the like are however acceptable.

4/ If the Sub-Senate elects, it may strip media (including videos, video games and interactive media, text, and still images) of its IP protection and profit rights for any of the following. Where advertisers do any of the following, their advertising spending may be subjected to a fine of up to ten times their advertising spending, or its imputed value:

a/ Glorifying or sensationalizing senseless violence, gun-fighting, gun-toting, car chases, martyrdom, kidnapping, aggression, crime, and especially murder.

b/ Depictions of tobacco use, drug use, alcohol use, or gambling.

c/ Encouraging racial divisions.

d/ Glorifying low BMI actors or models.

e/ Glorifying a slacker lifestyle.

f/ Attempting to change social customs, breeding practices, or sexual practices.

g/ Glorifications of democide, acmecide, or dystopian futures.

h/ Glorifying homosexuality, or transsexuality.

i/ Devaluing parenthood, or parental relations.

j/ Presenting a heuristic guide for criminals or wrongdoing, such as the film Nightcrawler.

k/ Acting as child propaganda, such as the film Dear Wendy.

l/ Leading weak-minded people into committing crimes.

m/ Educating criminals on how to avoid being caught, or how the justice system gathers evidence and identifies suspects, or how to be more effective as criminals.

n/ Presenting sex acts, or nudity between the top of the armpits and the top part of the legs above the of the person while they stand.

o/ Presenting or suggesting violence against children or women, or ritual violence, or large amounts of blood.

5/ If any media is stripped of its IP protection it shall be considered to have been stigmatized. However not all stigmatized media will be stripped if its IP protection rights.

6/ Stigmatized media shall not be downloaded, but may only be streamed. No stigmatized media shall be distributed by download in copyable format, and all stigmatized media must be streamed. Those streaming stigmatized media to others shall be required to verify that the primary viewer is over age 18. Those under age 18 shall not be allowed to watch stigmatized media. The distribution of stigmatized media to minors shall be a crime, as shall be the possession of cached stigmatized media files by minors.

7/ Everyone's time spent watching stigmatized media shall be logged. This shall be kept secret, except for those who grant access to others. In matters of criminal complaints this stigmatized media use data shall be available to the courts. Also if someone is watching stigmatized political media, and is accused of a sex crime, the stigmatized political media should have no bearing. Also, when more than 5% of the people access media that the Senate has stigmatized, that makes this media important, and the importance largely cancels-out the stigmatization.

8/ All mass packaged ingestibles (Herein this term applies to all foods, drinks, flavorings, supplements, and non-pharmaceutical comestible) shall list their sugar, salt, carbohydrate, fat, and drug content per 100 grams of dry weight. No other weight shall be used other than per 100 grams. The vague term sugar shall no longer be used in the ingredients for food and drinks, but must instead be listed as glucose, fructose, maltose, high-fructose corn syrup and the other 50-or-so commonly used types of sugars and sweeteners. For the health of the nation's diabetics, all sugars must be listed, and listed correctly, and incorrectly listed sugar amounts can lead to the product(s) being recalled by the Senate.

9/ The Senate shall try to limit sugar use overall, while at the same time, driving the use of glucose instead of fructose and all the other sweeteners. The sweeter the food, the more sugar tax it pays, but among the sugars, glucose has by far the lowest tax rate.

10/ Government shall tax all comestibles that contain:

a/ Maltose in any amount.

b/ Sugars over 8% in total. This shall include all sugars, including all naturally and artificially occurring sugars.

c/ Any amount of non-sugar artificial sweetener.

d/ Over 4% fructose by dry evaporated weight, or over 8% Sucrose by dry evaporated weight.

11/ Fructose is mildly toxic. It is not good to eat too much fructose, just like it is not good to drink too much alcohol. For this reason, refined fructose, and synthetic sugars containing fructose, such as high-fructose corn syrup shall not be added to any ingestible. No sugar added to food shall be more than 40% fructose.

12/ As a group, artificial sweeteners seem to be problematic to our health. All seem to have harmful side effects. Therefore, we shall pull all artificial sweeteners for 10 years until the Senate can properly study them. Then the healthy, artificial sweetener, shall be re-introduced to the market, pending a final decision, around 15 years out. The terms sugar, sweetener, sweetened, unsweetened, and all similar terms shall be all-inclusive, and shall include all sugars, sugar-like chemicals and sweeteners to include all sugar substitutes, artificial or natural. Therefore products labeled as sugar-free may not contain any fructose, glucose, sucrose, dextrose, maltose, lactose, honey, or any other sugar like ingredients. Unsweetened products shall not contain any sort of added sugar or any artificial sweetener. We shall pull stevia from the market for 10 years, until the Senate can properly study the stuff for a link with autism in pregnant women drinking the stuff

13/ All ingestibles (this includes all beverages, powders, satchels, and pills herein) shall display caffeine content on

their labels in milligrams if more than 0.5 milligrams of caffeine is present. If other stimulants are contained, then their stimulant effect must be equated to caffeine according to a Senate approved formula. There shall be no more hidden stimulants in any ingestibles.

14/ All comestibles must display how much of the various sugars they contain in grams per 100grams. Where the sugars exist in disaccharide form, their labels shall show the component monosaccharide mass in grams.

15/ All beverages shall list on their labels the amounts of trace minerals they contain in milligrams. per liter. This shall include hydrocarbons, SO₄, HCO₃, calcium, sodium, potassium, magnesium, and fluoride among other minerals the Senate may add to this disclosure list. The Senate shall also establish acceptable levels for chlorination of tap and bottled water.

16/ Adult multi-vitamin pills shall not be allowed to exceed the dosage a 50kg person's body can absorb in one meal. Children's multi-vitamin pills shall not exceed the dosage that a child of the listed age can absorb in one meal. Calcium pills shall not be allowed to exceed the dosage a 50kg person's body can absorb in one meal.

17/ The term tobacco shall include all tobacco, all tobacco derivatives, all forms of tobacco, all tobacco substitutes, and all substances that contain nicotine, regardless of the drug delivery method

18/ As a safeguard against mass poisoning, no kosher or halal foods may be imported, produced, traded, sold or consumed in our nation.

19/ No portion of the tobacco genome or the genome of other probably carcinogenic plants shall be added to food crop genomes due to the high cancer risk and the low reward. Transgenic plants containing any artificially inserted portion of the cancer-causing tobacco genome, or any other extremely carcinogenic plant shall not be grown, possessed, or sold in our nation.

20/ There shall no longer be intellectual property protection for seeds and cuttings of special plants, or animals. Instead, we shall switch to a system where usage is tracked, and the new seeds and new cuttings that are used a zillion times over get zillions in Ubiq reward money. Once the seed, cutting or animal is sold, there shall be no right to progeny for the seller. All of the Chinese pandas and their progeny shall belong to whoever's paid for them or rented them. And they shall no longer be the property of the People's Republic of China.

21/ There shall be no seeds that are bred or engineered to be resistant to herbicides or insecticides. Bio-engineered sterile seeds shall be prohibited because:

a/ This gives the Seed companies too much power over the world's food supplies.

b/ It creates a situation where seed companies can make piles of money sabotaging free market farmers with pests and diseases.

c/ Due to the hidden genetics aspect, is too hard to figure out who is doing what.

22/ The Senate shall conduct short and long term studies of the toxicity of the 20 most common herbicides, and 20 most common insecticides with regard to:

a/ The gut bacteria of humans and common livestock.

b/ Overall human lifespans.

c/ Bee populations.

d/ Other reasonably suspected toxicity.

23/ Until herbicides are shown to be harmless:

a/ They shall be banned from use in our nation and banned from imported foods.

b/ The Senate shall push the use of laser weed killers instead of herbicides.

24/ No chemical or pesticide or herbicide companies shall be allowed to sell seeds, or have any subsidiary or partner selling seeds.

25/ For the sake of diversification of the seeds that modern civilization is based upon, no company or party shall sell more than 1/1,000th of the nation's seeds, including all partners, subsidiaries, and connections. No breed of crop or animal shall account for more than 1/1,000th of the nation agricultural output for that species. Also, no more than 2% of crop seeds by cost shall be imported. The Senate shall impose tariffs on imported crop seeds that are sufficiently high to assure that no more than % of crop seeds by cost are imported.

26/ Chrysanthemum, tobacco and other insecticide plant genes shall not be added to other plants due to the risk to bees. Non-plant genes shall not be added to plants. All existing manmade or "GMO" plant lines containing genes from either chrysanthemum, or tobacco, or any other insecticide shall be eliminated entirely. All GMO seeds and plants shall be sterile so the genes can't spread. All GMO seeds and plants that kill any bees shall be recalled and eliminated entirely.

27/ There shall be no intellectual property rights for GMO or transgenic crops. The marginal increases that these have produced have proven to be essentially worthless to the people.

28/ no candles may be burned in any public place, including any church unless entirely made from beeswax. It shall be thought good for agriculture to have expensive bees wax.

29/ The following restrictions shall apply to all aromatic products made, sold or brought into our nation, including personal products brought in by tourists:

a/ No synthetic aromatic chemicals, animal secretions, animal parts, animal byproducts, or animal derivatives shall be added to any perfume, cologne, soap, shampoo, hair product, lotion, skin cream, aftershave or other body product, or clothing detergent, or building/vehicle cleaning product.

b/ No foodstuff, skin produce, hair product, or body product shall contain any non-digestible synthetic aromatics and flavorings.

c/ The FDA shall ensure that no products contain any synthetic aromatics. All use of synthetic aromatics in foods beverages or body products shall be considered food adulteration.

d/ The vague terms fragrance and flavorings shall not be allowed in any list of ingredients. Instead the actual chemical fragrances and flavors must be listed. Also, a permit shall be required to add any fragrances to any product. No perfume maybe imported into our country and it shall be a felony to import perfumes, even in small amounts. It shall also be a crime to use perfumes in large amounts.

e/ There shall be no advertising or media in support of or glamorizing the use of perfumes or colognes of any sort

whether they are natural or synthetic.

f/ All animal gland musks shall be banned as barbaric.

g/ It shall be a crime to sell or use prohibited, artificial hormone disrupting perfumes, artificial flavors and other artificial aromatics. All businesses selling these things (even if hidden in a product) shall be shut down for 30-days on the first offense. All individuals selling these things shall be jailed for 5-years.

h/ Government shall not provide any sort of intellectual property protection for perfumes, colognes, synthetic aromatic chemicals, burned aromatics, tobacco products, and tobacco substitutes.

i/ All synthetic flavorings or aromatic chemicals added to any food or body product or something that will come in contact with people must be approved by the FDA after a decade of study. It shall be considered felony food adulteration to use even traces of synthetic aromatics in any any food especially but also in body product and household goods including air fresheners, detergents, cleaning products, soaps, shampoos, or anything else that will go in people's homes.

j/ There shall no longer be any ingredients that are considered to be GRAS, or generally recognized as safe.

k/ The Senate shall compile detailed rules for prohibited flavors and criminal penalties for using these in food.

Synthetic vanilla, synthetic/fake chocolate, vanillin, and synthetic marijuana perfume for example shall be prohibited.

l/ Burned aromatics such as incense, non-psychoactive hashish, and tree sap of various sorts, shall not be imported, sold, or used in our nation. This especially includes incense used in religious services, due to the way these goods are normally and historically wildly overpriced, and used to siphon-off money from religions to Arabia's empire. It shall be a felony to import any forms of tree sap into our nation, especially those that were ever used in religious incenses. The religious use of Frankincense, hashish, myrrh, tree sap, and candles shall be prohibited at all religious ceremonies in our nation, and our land of the free. However we shall encourage the growing of these things to jam those who would have a high priced monopoly.

m/ No perfume or burned aromatic shall contain, tobacco, or tobacco derivatives, or byproducts, or other plant based ingredients known to be carcinogenic.

n/ Those who use perfumes, colognes, or other perfumed products in any workplace shall be sent home. Those who reek of perfume shall not be allowed on elevators and shared transportation, such as aircraft. Everyone who applies any form of perfume or lotion on an commercial aircraft shall spend 3 days in jail. Everyone who uses a vaporizer on a commercial aircraft shall spend 60 days in jail

30/ All synthetic aromatics and synthetic food flavoring shall be banned without limit. This shall especially include the following chemicals and all chemicals like the following: vanillin, guaiacol, benzophenone (diphenylketone), ethyl acrylate, eugenyl methyl ether (4-allylveratrole, or methyl eugenol), myrcene (7-methyl-3-methylene-1,6 octadiene), pulegone (p-meth-4(8)-en-3-one), pyridine, styrene, dihydrocoumarin, Estragole, Safrole, Isosafrole, Thujone, Isothujone, ethyl methyl ketone, ethyl-3-phenylglycidate, Methyl beta-naphthyl ketone, p-Propylanisole, diacetyl, Acetoin, musk-ketone, galaxolide, ethylene brassylate,

helvetolide, tonalide, ambrettolide, habanolide, muscenone, exaltolide. 2-methylbutyl acetate, iso-amyl isobutyrate, ethyl cinnamate, methanthranilate, ethyl a-methylbutyrate.

31/ Except for foods for long term storage, Non-digestible additives in total shall not exceed 0.5% by weight, and all non-digestible ingredients use must be individually disclosed on the ingredients list. No soaps, detergents, soils, titanium, shall be added to foods. Certain plant fibers, and cellulose, while not really digestible shall still be considered digestible when sold as an ingredient of high-fiber food.

32/ All ingredients used in all ingestibles and skin and hair products shall have and use one Senate approved name only, and the easiest name for the consumer to understand. Where little known ingredients are used, the Senate hazard rating must be used parenthetically after the name of the novel ingredient.

33/ We shall use the mortality of a pack of cigarettes a day for 40-years as a benchmark for toxicity. Then the Senate shall graph all sorts of drugs intake levels, nutritional deficiencies, overdoses, sports and other activities with regard to the mortality of a 1-pack a day cigarette habit. The Senate shall do the same thing with the various treatments and recreational drugs/ These shall be put on posters and required in all medical offices.

34/ The Senate shall carefully study how often people working and living with lead-based paints and asbestos suffer from lead poisoning or asbestos related severe health problems. This shall include the people who demolish lead or asbestos buildings of the various sorts, and the people who do paint preparation. What percentage of children living in lead/asbestos housing have abnormal and excessive levels of lead, or signs of asbestos related health problems in their bodies?

35/ The Senate shall study the detrimental health effects of the various solvents and volatile organic substances used in building and remodeling homes. Then the Senate shall take reasonable action to curtail the use of the truly dangerous solvents.

36/ Leaded fuel shall no longer be allowed, even for use in aircraft.

37/ The people must use disposable paper tissues to blow their noses. The use of washable snot-rag handkerchiefs shall be prohibited.

38/ It shall be allowed to spit in planted areas and sinks, but not outside on any public street or walkway

39/ Mildly toxic odorants shall be allowed in burning gases, however the Senate shall make sure that all these do not break down into other toxic things.

40/ It shall not be allowed to sell insecticide mixtures, and all insecticides must be sold separately. We must realize the degree to which our insecticides have been sabotaged by the same people that used crop pests and plagues to enslave ancient Rome. When we look at pesticides we still hear about the DDT disaster. But was this an honest mistake, or sabotage of one of the greatest things ever for the cause of more and better? There are so many mammal non-toxic pesticides. The Senate shall assure that the non-toxic pesticides get used, and that the mammal-toxic pesticides are banned.

41/ All insecticides that are considered generally non-toxic for

humans, such as chrysanthemum related pyrethroids shall be be lightly scented with the oregano oil. The various insecticides that are considered toxic to people shall be scented with phosphenes. Fungicides shall be scented with lavender if harmless, and a different phosphene if toxic.

42/ Standard household screens shall be upgraded so the frames weigh 10 times as much as they do today. and the screen material shall be pulled tight against the more robust frame. The screen material shall be made of a material (like cotton) that synthetic chrysanthemum tea concentrate binds well with. People will pour their insecticide concentrate into buckets with water and then use a T-mop on a telescoping pole to wipe bug poison on the screens every so many months. Thus the bugs that would have otherwise entered the house all die from exposure to the screen insecticide. All of these screen are also supposed to have burglar alarm wires. They all come out in the winter and are often replaced with same size storm panels.

43/ No agreement to purchase alcohol or carbonated beverages, or any form of beverage shall be valid in a court of law. There shall also not be any more intellectual property rights for beverages, including the name trademark protections.

44/ All drugs and all all products with psychoactive compounds in them, or stimulant drugs, or opiate-like drugs in them must get approved before it can be introduced to the market.

G — PUBLIC PROPERTY & PERMISSIONS

NR'76. GEOLOGICAL SURVEY

1/ The oceans have a mass that is around 3 billion times as much as mankind, so mankind is microscopic in comparison to the true scale of our planet. Thus we realize that underground minerals cannot be scarce, and mankind has enough of every underground mineral to last for tens of thousands of years at current use levels.

2/ A free people must know where their most economically viable minerals resources are and have an accurate estimate of their resource wealth. Therefore, government shall systematically survey, assess, estimate, and map the entire nation's territory with regard to both underground minerals and potential agricultural output.

3/ Government shall commission at least 1,000 standardized, containerized, universal mining mineral testing labs.

4/ Every known gold bearing river bed in the nation shall be drilled to bedrock at least every 5-km as accessible. Those with the richest gold deposits shall be drilled in more locations. Once we have done this, we shall estimate the nation's riverine gold reserves and locate their origin.

a/ In the Ishtarian doom and gloom book Megathreats, we see a lie about Death Valley, being a ridiculous place to look for gold. But it's not, and it's protected by national park. And it's just the sort of place we would think has gold, next to the California gold country, and near the many mineral mines of Nevada. And nobody would care about the mess created by mining in this wasteland place. Therefore, we should carefully drill Death Valley

b/ We shall drill all of the stream beds, coming off the high Sierra. We shall carefully map the way minerals are deposited in both Death Valley and the great Salt lake so we can find other rich exposed seafloor deposits around the world.

c/ Isn't it strange that we have both a Yreka California and a Eureka California. The small town is hidden and confused by Coastal town the large coastal town that's also north of the

central valley. Yreka looks like it might have gold. We should drill the nearby streams looking for gold.

5/ Every sandy shoreline in the nation, existing and ancient shall be drilled every 5-km to start, so we can know where our oil is, and so we can accurately estimate our nation's oil reserves. All portions of the nation shall be surveyed, including our national parks and military bases.

6/ All existing and prior mineral mines and oil fields shall be assayed and mapped by the nation's geological survey.

7/ The geological survey shall be administered by each county Senate over many years. Both the lab technicians and the sample collectors shall be the children of full citizens born in our nation, and living for more than 10 years in that county, and none shall have any Mideast ancestry or ties.

8/ Government shall give rich annuities and Ubiq status to those who discover rich new mineral deposits before the national survey does.

9/ We shall call this mapping of our nation's resource wealth the US Geological Survey. The old US Geological Survey shall be renamed as the old US Topographical Survey. All shall note how the idea of government mapping all of our nation's mineral wealth was proposed before — but the idea was subverted into a topographical survey, not a mineral survey. We shall not allow this to happen again.

10/ Once we have even a rudimentary geological survey, there will be little benefit of allowing people to claim underground resources as their own private property. For this reason, all underground resources are hereby nationalized and made the property of the people of our nation to the extent that any county Senate wishes to claim ownership of them, and make them into a mineral extraction reserve. The owners of nationalized underground mineral resources shall receive no compensation for this change in how business is done.

11/ In order to maximize output, most mineral deposits shall belong to the various counties of the nation, but the national government may make the richest into national mineral extraction reserves if the infrastructure development costs are so great they require national underwriting.

12/ The extraction of natural gases which would otherwise propel oil out of the ground shall be prohibited until the oil is also extracted.

13/ The results of all drilling and exploration shall be kept in the county recorder system database, and may also be kept in private databases. No portion of the nation shall be off-limits to exploratory drilling except urban areas. Even suburban areas and National parks shall permit exploratory drilling for underground minerals. This particularly for the Everglades and all the swamp areas near the gulf and Pacific coast.

14/ All grants and leases by the prior democracy for conservation lands or other forms of non-use shall be subject to cancellation or nationalization by the new government. No land owned by government shall be categorically off-limits to mineral extraction.

15/ All mineral lands access shall be by a standard agreement created by the Senate to assure that no hazards or nuisances are created from mining activity. As long as the mine is in one of the nation's active commodity extraction reserves, whatever permissions there are to start a mine,

they shall not be allowed to take longer than 60-days. The fact that the old system took over a decade for this should be regarded as clear evidence that our nation was totally corrupted by foreign mine interests. Never again shall we allow any government permissions to take over 60 days for any industrial or mineral permission. Also, again, all of our nation's richest mineral and energy lands should be open for extraction.

16/ Mineral mines shall not be thought to be particularly dirty so long as the rainwater-runoff is kept out of the waterways. Smokestack industry should be thought, much more polluting and dirtier than mines that have managed rainwater runoff. Also, this constitution recognizes that mines in our age of earth moving equipment are mostly surface mines. It is also thought that we will have soon have mining robots to follow veins and dig in much more dangerous situations.

17/ The people who were trying to get us to close our mines, and indefinitely-slow our new mines from opening. These are the same people who were selling us their over-priced minerals, their over priced oil, and their over-priced steel. They want our domestic producers to have very high costs from a variety of sources because that seems much more natural, and believable as an excuse. So at the same time, their foreign producers have low prices, so they are able to sell us and ship to us their overseas steel and turn a profit on it. And at the same time, they weaken our industrial base, so that they may overrun us, and conquer us.

18/ People using national parks, or public wilderness or foraging area may be required to carry a tracker/gps/phone. But in the 90% of the woods everywhere else nobody has any requirement to wear a tracker unless you're carrying a firearm. People may also be required to take pictures of all of their take. They may also be required to obtain a fishing license and/or a game license, which shall have no charge unless the wildlife take must be limited. Where alien species have invaded an area, the government may pay for each animal removed, and delivered to be ground up into cooked dog food. Non-citizens shall not be allowed to hunt or fish in our country, and those that do shall be locked up for a year and then deported.

19/ Soon there will be almost no animals dying as road kill. And all of our communities will be sealed by fences from the wildernesses of our nation. Thus the wild take will be much higher.

NR'77. MINERAL EXTRACTION RESERVES

1/ Government shall make the richest, easiest to access, least toxic sources of every mineral available for free public mineral extraction, reserves. People may take what they want, so long as they follow the rules, clean up after themselves, and properly move their fair share of the cover-strata and tailings. It shall cost nothing to use a mineral extraction reserve and taking any quantity of mineral ore out of the ground. No tax, fee, or charge shall be due for using a mineral extraction reserve.

2/ Government shall build railroads, roads and utilities to its mineral extraction reserves. It shall also allow refineries, mills, worker housing and common town amenities to be built upon the routes in designated places free of charge. Government

shall also provide regular environmental monitoring free of charge.

3/ Except for reasonable clean-up bonding, and identity registration, no tax, fee, charge, approval, permission, or insurance shall be required to extract minerals from a public extraction reserve. However, if a mining company is not obeying the rules, by say taking too much ore and not enough cover, it may be denied access to that mineral extraction reserve.

4/ Any County-Senate may designate up to 2% of public lands in its jurisdiction as mineral extraction reserves at any one time.

5/ To incentivize the counties to maximize the nation's mineral extraction reserves, 90% of all government revenue from mined minerals shall accrue to the county they came from. This shall be so regardless of whether the site is privately owned, a county extraction reserve, or a national extraction reserve. It is vitally important that every government jurisdiction benefit from maximizing commodity output so that Ishtar can never make money minimizing our mineral output. Also, there shall be no national regulation that limits where the commodity extraction reserves go, or the amounts of the various commodities they can produce.

6/ Where the Senate approves an area for a commodity extraction reserve, the courts have no jurisdiction in the matter, and it shall be a felony where the people of the court system usurp power here.

7/ Due to safety issues as well as cost, government shall discourage the use of dangerous shaft mines and encourage the use of safe and economical open-pit mines. If expendable burrowing robots make shaft mines practical for that mineral, great.

8/ As we deplete and use up the most superficial, accessible, and economically viable minerals in each location, government shall smooth the surface, add run-off contouring, restore the topsoil and replant with native flora, provided the site is not used for construction.

9/ All national mineral extraction reserves shall be approved by the national government. All county mineral extraction reserves shall be approved by the county government. The national government shall have no input or jurisdiction regarding county mineral extraction reserves, except to establish reasonable uniform limits to mine pollution.

10/ The government approval process for the government's new mineral extraction reserves and oil fields shall not exceed 45 days before the matter is ready for a vote by the County Senate.

11/ On mineral extraction reserves, drillers shall have the exclusive right to pump oil from wells within 1,000m of their exploratory well for 7 years from when they hit.

12/ All portions of Imperial county shall be pre-approved as a national mineral extraction reserve. All portions of the San Joaquin valley south of Fresno and more than 20-km east of the California aqueduct shall be pre-approved as a mineral extraction reserve for oil drilling. This shall not include land within 2 miles of a community, or land that drains into the Colorado River at a slope of more than 0.2%. It shall not include close border security zones. Any licensed driller may drill public lands in these areas upon filing a mineral claim. Private lands in this area may only be drilled if the surface

rights holder grants permission with the county recorder.

13/ In all mineral extraction reserves for oil drilling, an unlimited number of wells may be drilled for free by any licensed oil driller who cares to show up, claim a 1-km radius drilling site for up to 7-years, drill a well, obey the rules, and take the oil away. There shall be no further licensing or approvals or fees. No drilling permit and no fee shall be required. However, the driller must accurately locate his well and document its depth and results with government, and must clean up any mess.

14/ Because petroleum is mostly a shallow thing, our nation's mineral extraction reserves for oil drillers will mostly involve shallow wells that are not under much pressure. We may limit the depth of the wells we drill if gusher blowouts become a problem. We can always come back later and drill deeper.

15/ Because our first petroleum extraction reserves will be mostly in wasteland areas, not much environmental harm is going to be done if there are spills. Also, government shall provide spill monitoring and flip remote shut-off switches for no charge.

16/ No special engineering or toxic clean up license shall be required to scoop up contaminated oil or send contaminated soil tests to analytic laboratories.

17/ The national government and the various county governments shall never be required to pay any fine for any environmental pollution. Those who take minerals from mineral extraction reserves and cause pollution may be required to pay a reasonable fine, nothing more, nothing less, and this only when they do not comply with the environmental laws. So long as our oil drillers comply with all of the government's required precautions, they shall only have to clean up their mess.

18/ It shall be considered election fraud when the officers, or directors of fictional citizens abuse their power by favoring one candidate over another, one political ideology over another. FCs shall be prohibited from giving money, aid, or promotion to charities. They shall also be prohibited from advertising matters that are no concern of their business. Individuals and company directors that violate this paragraph may be jailed.

19/ When a mine or other mineral extraction facility closes down and ceases operation in our nation, the land and equipment shall automatically become the property of the national government, which shall be prohibited from selling off these assets, but must lease them to the highest bidder.

20/ All environmental right to know laws shall be satisfied if the information is posted on the Senate's right to know website.

21/ The national government's geological survey shall drill densely around and below all once valuable mines and study what minerals they find, and document what they find for all to see.

22/ All old abandoned mineral mines are hereby be nationalized. Unless there is an extreme toxicity or access problem, these shall all be made available to all serious mining proposals to be shared using reasonable guidelines.

23/ No Indian lands shall be off limits to the new US geological survey. All mineral rights to all Indian land are hereby nationalized. Also, once we've done our new geological survey, we should all pause to marvel at the way

our richest mineral lands were all hidden from use in places we could never mine: In our precious, sacred nature reserves, and our precious sacred Indian reservations.

24/ As a general rule, pollutants that remain in the environment for thousands of years are in general quite inert and not particularly reactive or toxic. On the other hand, pollutants that are highly reactive tend to react and go away quickly. The idea of highly reactive toxins that remain for a long time is almost entirely chimerical and a fraud that has been perpetrated by Ishtar and its OPEC.

25/ The main data center for our nation shall go around ice cold Lake Superior, and the electricity to power it shall be from coal and not oil. The plants will be some 1300km away on the Cape Cod peninsula, so all the coal smoke blows out over the salty, and highly corrosive, and uninhabited Atlantic instead of contaminating the land. The Eastern shore of Cape Bretton Island will also be a major coal burning power generation center. And once tsunami vulnerable Florida is evacuated, the hilly area 20 to 40 km north northwest of Ocala shall be another unlimited coal powered electricity generation area serving the Southeast parts of the nation. All of the electric plants in these areas must use smoke stacks that are at least 100m tall on land that is relatively higher above sea level. Vizcaino, Panama, Manteo/Roanoke island will also be an unlimited coal burning area. The far end of the Mississippi river delta will be another coal burning area. Also the northwest end of Vancouver Island may be used if there is not enough hydro-electric power in the region.

26/ The two most ideal locations for dirty smokestack industry around the lower-48 part of the US shall be thought to be:
a/ the western Baja California peninsula which is pretty useless for other uses due to cost of bringing in water.
b/ The east coast between the Carolinas and Nova Scotia. Basically we will move all our cities from the downwind coastal areas and then we will move our polluting industry there instead.

27/ For ease of understanding, we will divide the Baja California peninsula into 12 parts"

a/ The upper 2 parts will be for housing on the Mexico side of the US border.

b/ Parts 3 will be for non-toxic Mexas industry.

c/ part 4 will be for housing.

d/ Part 5: semi dirty industry.

e/ Part 6 is for dirty industry,

f/ Part 6a is for ultra dirty industry on the Vizcaino peninsula (also Punta Eugenia).

g/ Parts 7-10 are buffer zone.

h/ Parts 11 and 12 are the La Paz and Cabo resort areas.

x/ The part sizes will vary, and Vizcaino shall be thought of as a peninsula on a peninsula and not in a line with the main count.

28/ The Senate shall support research into using volcano snails, and genetically modifying these to refine iron and perhaps other minerals without using heat or energy.

29/ To be clear, private ownership of land and structures does not come with the right to pollute that land. All polluting industry and dumps and storage sights for toxic waste must use the government's toxic waste reserves.

NR'78. MINERAL BUSINESS

1/ No privately owned mine, mineral right, or oil field shall own or produce more than 1% of the nation's demand for any mineral or raw-material, or commodity. No individual or group or company shall own more than one privately owned mine in our nation. Also, if they have mines overseas, they shall not own any mine in our nation.

2/ Only government and the flesh and blood citizens of our nation may own oil and mineral lands in our nation. No citizen shall not be allowed to own more than 500 acres of separated mineral land. If more than 500 acres are discovered to be owned or controlled by one person, then the richest mineral lands shall be confiscated by government.

3/ In our nation, no foreigners shall own the following either directly or indirectly via shares:

a/ Mines and mineral extraction equipment.

b/ Mineral transportation infrastructure.

c/ Mineral refining and processing infrastructure.

4/ There shall be only one type of mineral right that may be separated from the surface rights, the right to drill holes in the ground to extract petroleum or natural gas. All other sorts of mineral extraction shall require full ownership. All existing separated mineral rights that are not for petroleum are hereby void.

5/ Only licensed human oil drillers that are full citizens, born in our nation may hold separated mineral rights, or enter into contracts for the purchase of separated mineral rights. No separated mineral right shall be owned, transferred, assigned, sublet, given to others, optioned, used as collateral for a loan, or owned by more than one person (or married couple) at a time. No person shall hold more than 2-square miles of separated mineral rights land at a time.

6/ With regard to land with separated mineral rights, all grants beyond 17-years shall be void. If the grant is already over 17-years old, it is hereby void. This 17-year period includes all renewal, all forms of extension, and all forms of separate mineral rights ownership.

7/ All deed restrictions regarding subsurface minerals or mining that are over 20-years old shall be void.

8/ Royalty rights on mineral extraction shall be unenforceable. Mineral royalty payments exist primarily to keep mineral lands out of production.

9/ All imported crude oil shall be subject to a tariff of 2.5 hours wages per barrel, All refined fuels such as gasoline, kerosene, and liquified natural gas shall be subject to the equivalent price per liter. Hawaii and our non-littoral islands and overseas military bases shall get their oil from overseas. Also, in the coming fuel glut, our nation shall buy up approximately 8% of the world capacity in fuel tankers and keep them in an empty, clean, and non-explosive state on large drainable V-shaped concrete pools for future use. This purchase should happen after the price falls out, around the time when large numbers of oil tankers are being scrapped. The price paid shall not exceed 15% over scrap value. We shall use these ships to help other nations around the world to live free from energy price scams in the future.

10/ The law of capture shall always apply to petroleum. The right to drill a well in one piece of ground is the right to suck as much oil as one can from that point.

11/ Each county is supposed to have 4-months of fuel storage underground in tanks the size of several railroad tank cars. These shall all be at least 200m away from each other and have 2m tall berms at the 100m point. Thus there will be no more catastrophic fires at our fuel storage facilities. Also, this is a good idea for civil defense.

12/ When people report a smuggling gang, they are supposed to be generously rewarded and given a new witness protection identity. They shall also be given safe island housing if they want it. Such tipsters are not supposed to be sent into danger to gather more evidence. With anonymous tips, the tipster shall be anonymous to the person being complained about, and the public, but not to police or the courts, who shall investigate the tipster first. And then, if the tip proves valid, then an investigation shall be made. Never shall any investigation based on an anonymous tip be formally opened without evidence, or witnesses.

13/ No mining or oil drilling company shall diversify out of that industry and engage in any other sorts of business.

14/ Mines shall generally not be required to move cover soil to back where it came from. They only have to re-plant and re-landscape in a way that looks roughly natural. However if there is a problem with pooling water, or extremely toxic runoff, the mine must be resurfaced so that this is not a problem.

15/ There shall be no refining/processing of minerals/ores in or near areas that will cause contamination on good land. All refining and processing shall be on designated badlands, too dry to have real soil, and too far away from irrigation water to sustain irrigated farming. This shall be where we refine and process all our ores.

16/ All mining on good lands shall have upstream water diversion and catchment to survive a 5,000-year storm for their entire watershed. There's plenty of areas that are too dry for crops where the minerals can be railed to other similar badlands areas. We shall try to use these areas as our source of minerals, even if the other location has up to 1% purer concentrations.

17/ It shall be thought a very anti-war and anti-crisis thing for all the rich nations to keep 3-year's need for copper, and pig iron, and aluminum ingots, and various other non-perishable commodities. We will also let people come and inspect all the 50 KG ingots. open for public inspection

NR'79. GOVERNMENT PERMISSION

1/ All new dirty industry shall go in a variety of new industrial zones that are some distance from where people generally live and work. The Senate shall make a very long list of industrial activities that are always allowed in these zones where there is abundant land and it is rented out cheaply by government. If someone wants to start doing a pre-approved activity in an industrial area, they shall not need any pre-approval from government. There shall also be some case-by-case industrial activities. But generally almost all industry (except for the dirtiest) shall already be pre-approved in most industrial areas.

2/ All of our new townships, utility plants, rail lines, interchanges, highways, and new linear infrastructure shall now be on a new web of public lands all on the cheap

\$10,000/acre land in the middle of nowhere today. This land will be bought-up by government as a later stage of the great reapportionment.

After this, more than 2,000 people will be able to get together and fund a utility plant, and a rail connection to a rail system. And once they have done this, they can petition government as a group to grant them a certain suitably sized township site that their group reserved for a year by paying the reservation fee. So instead of granting people 40 acres of remote land, it will now grant them 1/40th of an acre of currently remote land in a township center, or 1/4 acre of currently remote land in a township periphery. At this level of compression, urban land becomes infinite and worthless given current human populations. And this is a principal objective of this democratic constitution as it struggles to create a more utopian or eutopian land of freedom, a land of the people, by the people, and for the people. So there will be no land costs for Americans to buy a home in their land. So nobody will have to borrow money any more to buy land for their home. Thus we will eliminate yet another parasitic feeding tube and greatly prosper as a result.

People will only have to pay for their factory-made building blocks and the cost of delivery and positioning. And this will cost much less than today because all of it is made mostly by machines and transported by machines with very little human time invested. So there will be no land cost, and the building will cost less than half as much as hand assembled built buildings today. Also there will no longer be any government permissions beyond that of authorizing a township of a certain size of up to perhaps 50,000 units in a particular place according to a nationwide plan, where we have ten times as many township lots pre-planned as we have households today. This again is to crush the cost of land forever in the land of the free.

3/ When Government approves some new environmentally dirty industrial activity as acceptable in a given area, this shall generally be considered approval for other near identical industrial uses in that same part of the country and for the following decade at least. Also if the follow-on users in the same area are nearly identical to the approved user, then Government must have a greatly abbreviated approval process. Also, where Government denies approval to similar users, Government must also give a good reason why it is denying approval for this other nearly identical economic activity.

4/ There exists a long history of Government regulation limiting the number of participants in countless industries, so that the people who get Government permission can make a pile of money. Then Government people can corruptly take fat bribes for permission to enter that industry that is highly profitable due to the government regulation. So corrupt Government officials love to strictly regulate business activity and licensing and make it as hard as believably possible to get approval from government. In fact this sort of super strict regulation (and its exceptions) should be seen as a hallmark of corruption regardless of the excuse. Also, any place in the economy where Government limits the number of market participants be thought to be probably corrupt.

5/ When it comes to government regulations of industry, our nation shall err on the side of being libertarian, with as little

government intervention and regulation as possible. Regulations kill industries and they stifle growth and competition and weaken our nation's economy.

6/ Business identity registration fees shall have an anti-nuisance fee of 1-week's pay annually. Aside from this fee, those starting businesses or building structures shall not be charged any fees, nor unnecessarily delayed, unnecessarily questioned, or unnecessarily inspected by government.

7/ Regarding all government application forms for economic activity, or business activity:

a/ All must be filled out together in one bunch of online forms, even if there are multiple departments reviewing the documents.

b/ All users shall only need to enter their tax ID number and all the address and contact and other basic information shall then propagate throughout all forms in the application package.

c/ Government applications for economic activity shall not require more than the minimum amount of information necessary.

d/ All such government application forms for economic activity, or business activity shall be the exclusive domain of the Senate, and all unelected bureaucrats shall be prohibited from creating even draft application forms to help the Senate. This is because these bureaucrats are biased towards making the application process as lengthy and intimidating as possible, so that the people either do not bother their government office with their silly requests for economic activity, or they are more inclined to exchange something for bureaucratic permission.

e/ The old government permission application forms shall be entirely deleted and the Senate shall start over with new permission forms.

f/ The application forms must be as simple as possible, and all application fields that are seldom used must be deleted.

8/ Government shall not burden industry with any regulation that is unnecessarily time-eating unless there is good reason.

9/ No government procedure or requirement shall come into existence or be cancelled unless it has been elected by the Senate.

10/ All government agencies shall be obligated to have comprehensive wikis, that include an answer to every relevant question yet asked about that area of government. These government wikis shall be created and managed by the Sub-Senate, and not the government agency. It is thought that the process of wiki creation is a vitally important part of the Senate properly regulating its unelected bureaucracy.

11/ Except for open to all national mineral extraction reserves and inter-county-linear-infrastructure run by the national government, all approvals for the following infrastructure shall be at the county level:

a/ All mines.

b/ All oil fields.

c/ All oil refineries,

d/ All factories and mills,

e/ All power plants,

f/ All water plants,

g/ All municipal heating and or cooling plants,

h/ All building or construction approvals.

i/ All land parcel divisions and subdivisions.

j/ All ports and airports.

k/ All other industrial, distribution, shipping, commercial and hazardous uses.

x/ No government approval process, including all sub-approvals, for any of the foregoing shall take longer than 30 days to process. Also, the required information to make a submission for government approval shall not take longer than 30 days to assemble.

12/ Once a County Senate has voted and ruled to allow some business activity, that decision shall be final unless the Nation Senate intervenes in less than 30 days. Also, there shall never be any court challenges to any Senate jury decision for allowing any economic activity. This is because all courts shall be regarded as inferior to all Senate juries. • • • The idea of some un-elected appointee judge halting a large commercial project that has been approved by an elected body shall be regarded as one of the most corrupt practices of the old 1789 democracy. Indeed, this judicial appointee backdoor power over our elected democracy was never even called-for by the 1789 constitution. This power was entirely usurped by foreign would-be monopoly interests (and via a corrupt court no less). So after Marbury, foreign interests had the judicial power to temporarily eliminate competitors from our economy, and stage their various price hikes called as “embargoes” or something else. These foreigners frequently got their well documented “Epstein Island” pedophile front-men appointed as judges. The pedophile slaves would actually eagerly do whatever difficult they were asked to do, because if they worked with alacrity, not only would their secret remain confidential, but they would also normally get some “pizza slices” as a bonus. Pizza symbolizes time slices with sex trafficking victims. This judicial power from a mostly corrupt judiciary, delicately employed, was key to eliminating competition from US oil drillers for long enough to have had several trillion-dollar parasitic oil embargoes called as 1973 embargo, Iranian revolution, Iran/Iraq war, Saddam war-1, Saddam war-2, subprime crisis, or called whatever.

13/ In general, and where practical, environment polluting activities shall be located in remote areas that are not rich in life. Also, environment polluting activities shall not be located in, near, upwind, or upstream from populated areas. No county shall have the right to put polluting activities near the edge of its territory, but also near a population center in another county. This should be regarded as the main job of national oversight of dirty industry regulation by the counties.

14/ For all mineral extraction reserves located within 5-km of another county, they shall be required to get the neighboring county's permission, and all starting conditions shall be obeyed unless the neighboring county agrees to changing them.

15/ Sewage runoff, garbage, and fumes from one county's polluting facilities shall not flow into another county without the other county's consent. This clause shall however not apply for air pollution from facilities more than 30-km from a county line/border.

16/ All environmental rules shall be created at the national level, but all environmental enforcement shall take place at the county level.

17/ Pollution mitigation policy being a weakest-link-in-the-chain sort of thing, no county shall have the right to set its

own pollution policy. Pollution policy shall be the sole domain of the national government. Also, the national government and its pollution policies shall be prohibited from considering the ridiculously expensive air pollution needs of the fools who choose to live in smog-inversion basins like Los Angeles.

That these places experience smog inversions, that shall not be Government's problem, or anyone else's problem. In fact, we shall stop concerning ourselves with urban air pollution in today's cities entirely, because we will all move to townships with no polluting uses inside of town, and additionally there will be central air towers.

18/ In order to have some super clean living areas, we must concentrate our pollution elsewhere. The national government shall designate some underpopulated, remote, wasteland places with little runoff as environmentally dirty areas with lower pollution standards.

19/ Government shall not impose environmental restrictions without clear need as shown by well-understood, easily reprovable and quantifiable science.

20/ To help with national competitiveness, government shall provide all environmental testing, checking, reporting, and environmental impact reports it requires at no charge, and within 15-days.

21/ As with all of the national infrastructure projects called for herein, all sealed pipe, and rail transport infrastructure projects built or designed by the national Senate shall not be subject to county approvals or county court lawsuits. This is because s are 5 to 50 times less polluting than using roads and trucks.

22/ All fecal effluent from non-urine flushes is supposed to be heated to sterilize it, and then mixed in with local dead soil and mulch to make planting mix. We shall either use railcar tanks, or a national pipeline systems for pumping the nation's industrial waste water from inland to where it can be disposed of in either the deep highly corrosive and diluting ocean or a lifeless dead-end, or end of the line lake reserved by the Senate for this function. But to prevent dumping, this shall be provided by government at no private cost for un-diluted waste.

23/ No linear infrastructure or commodity extraction reserve shall ever be the subject of any mandated environmental studies or lawsuits.

24/ No environmental reports shall be required for the construction of rail-based townships, new communities, or rail-based municipal metro systems, or intercity railroads, or bus stations, or rail bridges, or rail tunnels because the rail system is so energy efficient and non-polluting by nature. Also because rail doesn't kill wildlife at anywhere near the rate of automobiles. Environmental impact reports shall be required for all manufacture, use and warehousing of toxic chemicals, as well as places that endlessly burn things, places like power stations and incineration plants.

25/ All existing laws concerning supposedly ozone depleting but energy-efficient CFC and HCFC refrigerants shall hereby be repealed in 180 days.

26/ Government shall not be allowed to regulate down hole heat exchanges except in areas where this may create an artesian spring, either to the surface, or one to below the surface. Also, no make sure they are properly closed, so nobody can fall in to them, as happens so often with old

wells.

27/ Government shall have no power when a business decides to close down in certain areas due to high crime levels, low sales, or some other problem.

28/ Businesses must notify when they go out of business. They must make a report to the county recorder system that they're going out of business, otherwise they may have more liability for claims. Then the county recorder system shall notify the search engines, and the Internet services that the businesses is no longer at their location(s), and they should remove all mentions of it, so nobody else goes there.

29 All government actions must preserve life and limb, and cannot endanger life and limb, greater than it preserves this.

30/ Where farmers have bought a reasonable amount of diesel fuel to run equipment to farm, the farmers shall get a 90% tax refund on their fuel taxes paid. This tax refund shall be based on the farmer's actual expenditures on fuel, up to a limit based on their crop output and the Senate's average output to fuel conversion for that crops nationwide.

31/ Government permission shall never be required to collect and use rainwater under any of the following conditions.

Nonetheless, Government may still tax these uses:

a/ Would otherwise be wasted, or flow into a water system that has plenty of water.

b/ Involves water amounts under 20 acre-feet per year in the generally non-irrigated parts of our nation, or the parts of our nation that do not have any water shortage. This is the water of about 180 people.

c/ Involves water amounts under 2-acre-foot anywhere, provided the water is used for household uses, and/or for dry farming, and/or for livestock watering. This is the water of about 18 people.

x/ The water collector shall be required to make sure the water does not stagnate or breed mosquitoes, or get wasted.

32/ All new water well regulations shall be written at the national level and enforced at the county level. There shall be no county-level regulations that are not on the national menu established by the Senate.

33/ All state and local water use laws of the old system shall be void after 180 days and these shall be replaced by a single national code of water laws written by the Senate. This code shall address all sorts of water use zones like Super-desert, Mid-desert, semi-desert, low chaparral, high chaparral, Cedar forest, Cedar and dry oak, mild over abundance, extreme overabundance. etc.

34/ Until the Senate passes new water use regulations, all farmers shall be allowed to use all well and riparian water on or directly adjacent to their own land for the time being until the new Senate says no, or the farmers in that area organize to allocate the water. However all water allocation payments shall accrue to that county's (or those counties) and shall be used on the water storage and movement systems of that county or those counties.

35/ Well and adjacent riparian water use by small farmers that is less than 2 acre feet of water annually, and this water is not located in a desert shall never be regulated by Government

36/ In places where there is abundant stable groundwater to meet everyone's demand, government shall not regulate how much water individual farmers take from the ground. In places

where there is nearly enough groundwater to meet demand, government shall not regulate uses under 40 acres, or under one acre foot per day. Only in places that truly don't have enough water, my government actually regulate all users, and here water shall only be charged at a rate necessary to balance supply with demand. Furthermore, Government shall not charge any fees for farmers to obtain farming permits in places where water is scarce, and these shall issued once per 10 years to reduce the amount of waste associated with the application process.

37/ No permits or fees shall ever be required to use well or riparian water for watering animals grown as livestock. Waste water management may however be require if the livestock are kept in pens, but if the animals are grazed over many acres, or on public grazing land, there shall be no regulation of animal toilet wastewater.

38/ Government shall be required to support people generating energy with high up streams.

39/ Government shall published detailed guidelines on where water can be diverted for energy and where it cannot.

40/ The following people shall not be allowed to participate in any process of deciding on zoning, placement of linear infrastructure, or approval for building projects:

a/ Those that are not on title as a property owner in the immediate area.

b/ Those over age 65.

c/ Those who are under age 21.

d/ Those who are opposed to all construction and urbanization.

41/ No government permission shall be required to farm previously farmed land, or to apply Senate approved pesticides, or to harvest crops, or to sow non-GMO seeds, or to plow their fields, or to sell non-GMO foods at market, or to buy/sell non-GMO seeds, or to select to grow one crop instead of another.

42/ All government decisions to approve or not, and to convict or not shall be made by elected Senators serving in a Senate jury of sufficient size.

43/ The following is a transcription of some 1973 British government propaganda from the British Broadcast Company/Thames, titled "The limits of Growth". This authoritative-sounding propaganda came out just before the Arab Oil Embargo. It has been added to this constitution because it is the truth, but because it is a lie, a hoax that the people must prominently note. Also of note are the foreign sounding grammar mistakes: "Growth is explosive. population now doubles in 30-years. Man now uses twice as much energy as he did 15 years ago. And industrial production has nearly trebled in the last 15 years. During this program, men on the Earth will consume 200,000 tons of petroleum, and 200,000 tons of coal, produce 2,000 motor cars, and use 400 million kilowatts of electricity. If we use known stocks at present rates, there will be no copper left in 2008, no zinc in 1995, no tin in 1989, and no mercury in 1985. There will be no silver, without which we cannot make films in 1987. Today we consume more than yesterday. Our children, if they live as we do, will use up resources more than twice as fast as we do. Our grandchildren might need twice as much oil as we found in Alaska, just to meet their increased needs for one year. Such growth threatens to use

up all the resources the Earth has to offer us. Such are the enormous needs of the industrial society and progress. The industrial revolution has consumed vast quantities of fossil fuels for example, and now there aren't many left. And it is as simple as that. If you have a kind of society which is going to eat the very planet we are on. Eat it up, consume it, you will find there is nothing left. Our industry, the way we make things, attacks the fabric and stability of nature, the ecosystem on which all life, including man depends...It has been developed to exploit the ecosystem, without taking into account its continued existence. And our new technologies tend to disrupt ecological cycles, to break them. To intrude harmful unnatural materials on them. And therefore to destroy the basis of its own existence. Because of that, we are on a suicidal course..... We are faced by dilemmas. Industry cannot exist without the raw materials it must use up. Nor can it function without the natural world that it may be destroying. So great is our progress that it may push the earth to its limits, and beyond. We threaten a confrontation with nature. Progress to that confrontation is speeding up. What we're really being told is that although nobody knows for sure exactly when it will happen, or exactly what risk is the greatest risk man faces. ...Scientists are fairly unanimous in saying that man does face extremely important risks. With global population doubling every 33-years [note how this is repeated], when resource consumption is doubling every 20-years, no long term view of mankind can proceed without first forming some preliminary answers to these questions. Professor Dennis Meadows at a conference in Washington to mark the publication of his team study for the Club of Rome, The limits to growth. It concludes that economic growth always generates a crisis. That the road to riches is the road to disaster. Even if we solve problems like pollution, growth within a century or so would lead to widespread famine and social chaos."

NR'80. ENERGY POLICY

1/ Our nation's #1, head and shoulders above the rest energy policy is also a great way to reduce war on Earth. It is simply to make sure that we always have plenty of oil including all of its sub-tasks. We must always have many many places to drill for oil in and around our nation. We must also have plenty of oil drilling rigs and plenty of pumps and plenty of rail tanks for moving oil around the nation. We shall also charge built cost for moving and keeping fuel tanks in the rail system. We shall also have a merchant marine of mothballed oil tankers standing ready to bust any oil market shenanigans for decades.

2/ The Mideast obviously dislikes the coal that competes with their oil racket, and they have struggled to make coal seam much more dirty and toxic than it is. They have also struggled to get the world to use the dirtiest forms of coal. We shall openly and repeatedly study the emissions of the various forms of coal in comparison to oil and natural gas. We shall take all the main pollutants and put them on a bar graph, expressed in terms of pollution relative to energy output. This should have add on bars for ash disposal.

3/ We shall value the longevity of our planet's stored energy resources above energy emissions in remote areas

especially. We shall also consider that in the future our gasoline vehicles will be used almost exclusively outside of our township suburban areas. So there is is little point to having any but the energy-cheapest emissions mitigation measures.

4/ Safer diesel fuel will be used for ground transport vehicles. Diesel #1 shall be for for motor vehicles, diesel #2 shall be for stationary uses. Diesel #3 shall be for remote stationary uses. And back to the top, kerosine with its high energy to weight ratio shall be used for aircraft. The gasoline will be put in pipes like the other fractions and then used to drive township generators and direct drive systems closer in to the townships. There will also be power from more remote coal-fired power generation plant clusters, as well as hydro-electric system that will feed the grid and often even produce surplus energy for part of the year.

5/ We shall switch to diesel vehicle fuel given:

a/ The large number of gasoline vehicle fires each year, and the lower explosiveness of diesel fuel.

b/ The greater fuel efficiency of diesel engines.

c/ The greater longevity of diesel engines.

d/ The greater energy density of diesel fuel.

e/ Our improved ability to adapt diesel engines to substitute fuels, so they are more crisis friendly.

6/ The volatile gasoline will mostly be used in urban and suburban and other vehicles not vulnerable to collisions and tank puncture. It will also be used in new townships utility plants. These will go near where the utility lines enter the suburban zone of each township. The fuel storage tanks shall be underground and each township shall have enough fuel storage in 10 tanks for a year's normal need. Where the township plant burns coal, this may be stored instead of oil.

7/ Coal and dirty oil powered heating and electricity generation will frequently be burned in remote plants many miles from any township. These will tend to be up hill and have tall smoke stacks. There shall be no prohibition on township utility plants burning coal if they are at least 4km away from the nearest township. No later township shall be added less than 3km from a coal powered plant. To be clear, our government shall favor coal and sour oil in its remote power plants in contrast to the ways of our old government which constantly implemented policies to favor its foreign oil-selling masters.

8/ The various counties shall create new standardized open source fueling bays along the nation's highways, and they shall collect 1.5% of all sales for building out the infrastructure. All gas fueling booth tenants shall be real human citizens and fictional citizens shall not be allowed to be fueling booth tenants. Also, no tenant shall have the greater of one fueling bay, or 0.5% of the fueling booths in any county. The counties shall make sure that there is always an over-abundance of fueling booths so that some remain empty. Also, the underground fuel tanks shall go in zig-zag fashion, and be far enough apart that there cannot be a chain ignition.

9/ By 2032.01.01, coal shall not be delivered or burned anywhere the buildings touch. By 2037.01.01, coal shall not be burned anywhere there are more than 15 dwellings per acre. By 2040.01.01, coal shall not be burned anywhere there are more than 10 dwellings per acre. By 2045.01.01,

coal shall not be burned anywhere there are more than 5 dwellings per acre. By 2050.01.01, coal shall not be burned anywhere there are more than 2 dwellings per acre. However, coal burned a safe distance from these areas shall be much more tolerated than it previously was.

10/ Where practical, all new coal plants shall be built on high ground. This should be more than 5km from a community. These plants shall also have very tall chimneys to reduce the coal smoke pollution levels for nearby residents. Scrubber tech may also be required if this can be shown to efficiently reduce pollution in a meaningful way for the people living nearby.

11/ The mining and sale of coal shall not be taxed in any way. Only coal burners shall be taxed, and this tax shall only be a function of the number of people affected by their coal emissions. Remote coal burning plants shall pay no tax.

12/ The long term and worldwide effects of coal emissions are almost non-existent. These effects shall not be a consideration in taxing the use of coal. Only local and regional effects shall be considered as important.

13/ World supplies of coal are many times that of petroleum and natural gas. In millennia to come, mankind may eventually run out of easy-to-reach petroleum and natural gas. Therefore, we shall not squander these potentially scarce things on community power generation, heating, or cooling plants. At no time of the year may petroleum or natural gas be used for regular community power, heating or cooling, except on islands.

14/ To encourage the use of coal, we shall allow coal users to be more polluting than oil users, provided they are making their pollution far enough away from population centers.

15/ All oil and natural gas purchased by municipal utilities shall pay a national sales tax of at least 50% to encourage a rapid conversion to coal, geothermal, and pipe hydroelectric.

16/ The burning of the more sulfuric coals and oils may be prohibited by the Senate in densely populated regions and valleys of the nation, or nationwide.

17/ All oil, natural gas, and mineral sites, facilities and equipment shall be nationalized to the extent the national Senate wishes to claim ownership. Then all of these assets shall become the property of the county they are located in. As in all such nationalizations, the various county Senates shall inform the national Senate of all the potential government energy and mineral assets, then the national Senate shall decide what it thinks will be better managed by the county Senates.

18/ All well drillers, and mine operators shall be licensed at the county level according to national standards. These shall be required to post a reasonable clean-up bond, the minimum reasonably justifiable considering the new streamlined regulations for clean-up with no unreasonably expensive regulations.

19/ One of the first orders of business for the new Senate shall be the revision of our nation's environmental laws. All existing environmental regulations, and all regulations concerning the nation's energy industry and manufacturing shall expire 60 days after this Constitution comes into effect unless the Senate elects to replace them sooner. No new environmental or energy regulations shall be imposed on any part of the oil, coal, natural gas, mining, geothermal,

electricity generating, power transmission industries except when the Over-Senate ratifies the vote with a 2/3 overmajority.

20/ The use of per-well approvals shall be prohibited. All approvals shall be for drilling areas, and these areas shall generally be no less than 50 square kilometers.

21/ Until our nation simply runs out of the various sorts of fossil fuels, the Senate shall assure that there are sufficient mineral extraction reserves to meet domestic demand. There shall also be no less than 100 pre-approved oil fields in the nation at any given time.

22/ No well drilling equipment supplier shall produce or furnish more than 1% of the nation's well drilling equipment. Nobody shall supply more than 1/500th of the nation's oil supply. Aside from this, government shall not limit to the number of wells that may be drilled by any driller, or in any oil field.

23/ No person or fictional citizen shall own, control, or manage together more than 1/500th of the nation's oil industry, or its coal industry, or its natural gas industry, or its geothermal industry.

24/ Due to how fast crude oil breaks down, it shall not be considered toxic waste. All oil drillers shall however be required to clean up their spilled crude oil and deliver the oil and soil to either an asphalt plant, or designated location that is already naturally polluted with crude oil.

25/ There shall be no specialized education required to clean up oil spilled on the ground as anyone can tell the difference. Those who test soil for oil contamination shall be prohibited from doing oil clean-up work, or partnering together. When vehicles crash and their propellant fuel tanks leaks, this shall not be subject to environmental regulations.

26/ Government shall establish realistic acceptable levels for non-natural oil contamination of soils in various depths and hydrology zones. We will be much stricter for oil spilled near our fresh water ways than with oil spilled in deserts and places that are naturally contaminated with surface oil.

27/ All petroleum refining facilities and fueling stations shall where practical be located in places where the land contours (natural or manmade) create dams that prevent spilled petroleum from getting into any waterway. And this absolutely includes rainwater runoff systems.

28/ All counties shall continually and redundantly monitor all their active oil fields to make sure there are no oil spills occurring. This monitoring shall be provided free of charge to drillers so that liability and energy prices may be as low as possible.

29/ All oil facilities within 500m of an occupied residence shall use vapor recovery systems like in the nation's service stations, which are frequently located closer than this to residences. No new oil well shall be located less than 300m from a group of residences, or less than 100m from a single residence. Government shall no longer require vapor recovery systems at fueling stations.

30/ Everyone approved to drill for oil must post a cleanup bond of 20 years pay to obtain a license to drill in pre-designated drilling zones that are a safe distance from a fresh water aquifer, or sufficiently sized catchment berms exist. Those with a license to drill in pre-designated drilling zones within spill range of an aquifer must post a bond of 500-year's

wages.

31/ In order to stimulate oil exploration and output we shall say that when private property owners lease their land to licensed oil drillers, they shall not be held financially responsible for cleaning up the spills of those oil drillers, and they shall never suffer any penalty from the environmental compliance system. The licensed driller shall bear all the liability and cost.

32/ All oil extraction reserves must have a designated oil dump site located in a place that is preferably already naturally contaminated with crude oil. These dumps must take all oil contaminated dirt free of charge to reduce illegal dumping, one of the greatest threats to a safe and uncontaminated environment. All dumps of every type shall be owned by the people and none shall charge for disposal.

33/ Government shall not charge anything for waste disposal including most toxic waste because we want to reduce illegal dumping. Concrete, asphalt, demolished buildings, construction site waste, furniture, vehicles and household waste and all parts thereof shall not require special dumpsites. All this shall be considered ordinary waste. oil sludges and byproducts shall be considered moderately toxic waste, but it shall still be taken for no charge by the public, for it is the public's problem to deal with.

34/ The public property sluice of the National Main-Senate shall determine the most optimal locations for the nation's garbage reserves. These shall be the places where rain water run-off is least likely to get into groundwater and crops that will be consumed by people. We shall not line these landfills with plastic because the idea is folly. However where it is wet, we might cover our dumps with rows of plastic to keep 95% of the water out of the ground in these locations. Garbage shall be compressed into Bricks in communities and moved by energy efficient rail to remote dump locations where the bricks can be stacked up.

35/ When oil or oil-contaminated dirt is moved in trucks, the drivers must call at least 2 hours in advance in case Government wants to inspect or monitor.

36/ All sales of fossil fuels in our nation shall be posted on the Senate's energy use tracking website. Both sides of the transaction shall do this. It shall be considered a national security imperative to accurately track the nation's fossil fuel output, imports, exports and consumption. We shall forever be on watch for the corruption of our energy use monitoring system.

37/ At a convenient date, we shall impose a national end-user sales tax of 20 second's wages per liter for diesel fuel, and 1-minute's wages per liter for gasoline and aircraft fuel. On 2024.01.01, There shall be a national end-user sales tax of 40 second's wages per liter for diesel fuel, and 2 minute's wages per liter gasoline and aircraft fuel.

38/ If the Senate declares a predatory pricing emergency, it may temporarily credit part of the fuel tax to domestic producers, however in no event shall it ever reduce, thwart, foil, fail to enforce, or counteract the tax on imported liquid fuels.

39/ For as long as our nation exists:

a/ We shall try to keep tankers and especially oil tankers out of our waters, so we never have to worry about smuggling.

b/ We shall try to never import oil and to always have an

oversupply which we shall sell with government subsidized merchant marine delivery and navy backup for war zone oil deliveries. This is just a thing we do to keep war from ever being profitable anywhere on earth.

c/ Where any nation or group of nations causing problems to raise the price of oil, we shall do what we can to ramp up our oil output and ruin the market for this Mafia.

d/ All imported oil (if we can't keep it out) shall forever be subject to an import tariff of 2-hours wages per barrel at importation. This money shall be used by government to buy up and mothball our nation's oil industry in the event that global oil prices collapse. Otherwise we will see endless problems in the oil industry.

40/ Given the great harm that smuggled oil has caused our nation, there shall be no hidden or sub-surface pipes within 20km any of the nation's ports, or any of the nation's land borders. Also, no imported fluids shall flow via pipes away from any of the nation's ports or borders. All imported fluids shall only be permitted to leave the ports and borders of our nation on rail-based containers.

41/ When a standard dry-weight railcar for fluids enters or leave the nation's borders and ports it shall pass over scale. All fluids entering our nation shall pay a fluid import tariff of not less than 45 second's wages per liter.

42/ The national government shall indemnify all rail carriers for all accidents involving properly shipped domestically produced fossil fuels moving in government certified containers over the nation's rail system. For this reason, no rail carrier shall charge any risk premium for, or discriminate against liquid fuels. This rule however shall not apply to imported fossil fuels.

43/ Wherever practical, we shall switch to using rail based tanks for moving crude oil and fuel. For military, strategic, crime, and smuggling reasons, we shall no longer use pipelines for moving oil or fuel. Instead we switch to using easy to track, hard to sabotage, hard to bomb, hard to skim from, rail based tanks for moving fuels. Also, all the fuel tank steel-frame stands shall have 2-positions: one for the empty tank and one for the full one. The transport device will drop off the new full tank, connect it, disconnect the old tank and then lift off the old tank. There will be no more time-wasting moving fuel from one tank to another.

44/ Our nation's entire rail system shall be open to moving crude oil and fuels without special permits other than the certification of the fuel transport tanks for carriage of flammable fuels. And this shall never involve any charges or fees. Also, instead of transferring fuel to in-ground tanks that can easily leak without detection, we shall just drop off the tank. It is thought better for society that all many remote people have fuel tanks that will power their live for a year or three at a time, per fuel delivery. The same approach shall also be used for robotic delivery and replacement of septic (plumbing waste) tanks, and also for fresh water. From the rail head we imagine either trucks on roads fetching these tanks or perhaps we will use tank trucks to carry much heavier loads off road on mere tracks for their sort of vehicle, tracks that are impassible by 4-wheel drive vehicles.

45/ All rail based communities shall have all their fluid fuels supplied by rail based tanks. Also, except in remote locations, all fueling stations are supposed to be on the rail

system.

46/ Gasoline and other explosive petroleum distillates shall not be imported into our nation due to their volatility.

47/ Wind energy is a dumb idea because it normally takes several times longer to pay back the windmills than the windmills last. No windmill that has been shut down shall however be dismantled or scrapped. They shall stand as monuments to the power of the matrix and the power of parasitism in a corrupt democracy. There shall be no new wind energy projects by government or fictional citizens or any spending on these, or on buying electricity or using generators to power windmills.

48/ Government shall no longer be allowed to either tax coal in any way, or have burdensome regulation of coal plants, especially those that are far away from urban areas, and most of all those in areas designated for polluting coal burning industry. Government shall no longer be allowed to subsidize wind energy, solar energy, or electric battery vehicles. Also, all of this sort of spending by government should be regarded as synonymous with corruption for all eternity. To be clear, the term subsidize includes all government money, all tax breaks, tax credits, and all freedom from regulation, all burdensome regulation. All existing subsidies, hand-outs, tax breaks and tax credits shall hereby be void. All agreements and laws regarding non-production or non-use of coal or other fossil fuels, or non-output of carbon shall hereby be void. All carbon and carbon trading related charges, fees, and regulations are hereby repealed in their entirety. However, government shall give more money for research into pipe hydroelectric, geothermal heating, geothermal power generation, and better ways to burn coal.

49/ The Senate shall carefully investigate black lung disease to make sure that it happens in all coal mines and nowhere that is not around coal. Also that it is as bad and common as people say. We shall have massive coal plants on the Cape Cod Peninsula, where the emissions will blow harmlessly over the ocean. And where we have emissions from coal burning over the ocean, there shall be no need to have any emissions control mechanisms.

50/ Except for the often visited parts of Yellowstone, no hot springs or geothermal area shall be considered off limits to geothermal energy projects. All hot springs, no matter where located shall generally be considered an important clean energy resource. This is because one geothermal plant can provide almost unlimited heat and electricity for hundreds of miles in every direction. We shall build a higher dam and pipe hydroelectric on Lake Yellowstone. Every geyser and every pool of a hot water in the nations shall be tested for a mineral content. Every source in the nation.

51/ All obligations, agreements, credits, loans, leases, mortgages, taxes, and tax breaks, related to wind, solar, or other forms of so-called alternative energy except geothermal, nuclear, and burning of biomass are hereby void.

52/ It shall no longer be allowed to burn living biomass as fuel. This must be recycled as fertilizer.

53/ It shall no longer be possible to lease property for any sort of energy project, alternative or conventional, and especially for wind and solar projects. Energy land must be purchased.

54/ When alternative energy doesn't work as promised, the

customer shall be seen as the primary victim, and the people holding the loans on the equipment that doesn't work shall be seen as the secondary victims with the makers and sellers as the victimizers. The makers and sellers will have normally fled with the money, while those who lent money for energy projects shall suffer the biggest losses of their money.

55/ Where solar panels are installed on a roof, it shall not be possible to repossess these for non-payment.

56/ All existing debt for failing alternative energy and school debt shall be cancelled.

57/ All utility companies must be publicly owned.

58/ Carbon dioxide shall not be considered a pollutant any longer because the CO2 theory of climate has been conclusively refuted in its entirety, just like the ludicrous idea of the earth being flat. All government regulations and incentives, together with all private agreements concerning carbon emissions or the burning of one sort of fuel instead of another are hereby void. All laws, regulations, and agreements relating to carbon, carbon emissions, carbon output, carbon trading, or carbon sequestration are hereby void, and no law concerning any of this shall be valid or enforced ever again.

59/ Oil shale may be crushed and burned in a natural state, but it shall not be used to make liquid oil. Oil sands may be burned in a natural state, but shall not be used to make liquid oil.

60/ Public utilities may sell their power for different prices at different times, but the most expensive shall not be more than 33% more expensive than the least expensive.

61/ After 2024.01.01, no municipal or regional electricity generation plant may burn imported fossil fuels. After 2026.01.01, no municipal or regional electricity generation plant may burn natural gas or petroleum unless located inside a community.

62/ The following utilities shall have the right to buy electric power wholesale at no more than 10% over generated cost less line loss:

a/ The rail system.

b/ The electric grid.

c/ The compressed air system, if any.

d/ The hot-element and steam system, if any.

e/ Government buildings and services.

f/ All township plants.

g/ All internet server farms.

h/ All manufacturing facilities.

63/ We shall learn from the 1906 San Francisco earthquake and fire. Natural gas shall not be delivered via street pipes in neighborhoods of wood homes in extreme earthquake zones, particularly where the units are less than a few meters apart, and brush/pine/cedar fires are common.

64/ The use of gasoline in vehicles is not only a fire hazard, but it also limits our options with regard to the crude oil we can refine into fuel. Therefore, by 2027.01.01, no ground transportation vehicle with 3 or more wheels shall be sold that burns gasoline. All shall be diesel fueled. Gasoline may only be used in aircraft and equipment.

65/ All patents that in any way relate to the oil and coal industry and diesel engines are hereby cancelled. No new patents shall be issued in these areas for at least 5 years.

66/ No Government permission shall be required for licensed

drillers to drill for:

a/ Petroleum in petroleum extraction reserves.

b/ Solid minerals up to 200m down in non-waterway locations.

c/ Gold, diamonds and other heavy minerals up to 15m down in river beds and salt lakes.

67/ The education for shallow mineral drillers of less than 200-meters shall be as follows. It shall take no longer than 200 hours of study time and 4-weeks. At least 50% of the people in the course must pass. There shall be no limit on the people enrolled in the course. Once the education is completed, the applicant shall bring the diploma and a spillage bond for 5-year's wages to the county licensing department. Thereupon the applicant shall be given a license to drill for minerals, including oil.

68/ Only the flesh and blood, native-born citizens of our nation should be allowed to drill for minerals in our nation. These will not be allowed to operate more than one drilling rig at a time.

69/ Very long and wide truck borne drill rigs may be driven on the nation's roads without a permit between the hours of 11pm and 6am, if their certified size will fit on their route.

70/ All new township plants shall keep a year's supply of liquid fuels on site in extra transport tanks. This shall be thought a matter of both disaster preparedness and also a thing that discourages war for OPEC profit. For similar reasons, we shall have it that All facilities that burn coal shall be required to stockpile at least a 1-year stockpile buffer of coal on site. There will also be many many fuel moving tanks in remote parts of the nation due to the way we are not doing fuel deliveries, with the tanks very often dropped off for a season or a year. Thus, even in time of war there will always be an abundance of fuel tanks in our nation.

71/ The most important aspect of preventing oil market scams is eliminating all government permissions for the process by which people are allowed to drill oil wells. There shall be no permits required for licensed drillers to drill oil wells in areas designated for oil drilling. The second most important aspect of preventing oil market scams is limiting the fines and liability for spilled oil to realistic levels.

72/ Government shall not impose any taxes, fees, charges, deterrences, or burdens on the so-called fossil fuel production industry, to include petroleum, coal, oil sands, oil shale, natural gas, and all other preserved bio energy. Government shall only tax consumption if it taxes fuels. This is because taxes on production has the disadvantage of:

a/ Favoring foreign producers over domestic producers.

b/ Lowering tax income for no reason.

73/ The national government shall drive for ultimately establishing a per capita finished fuel reserve amount that corresponds to not less than 180-days fuel use for the nation. This shall be thought both a national defense, and disaster preparation measure. And all counties shall be required to keep their share of the nation's decentralized finished fuel reserve. Given the switch to diesel engines, these fuel storage tanks will be significantly less explosive than gasoline.

74 After 2028.01.01 dangerous and inefficient gasoline powered passenger vehicles shall not be sold in our nation. After this time, we will switch to more abundant, less

explosive diesel fuel.

75/ If our nation decides to use battery (electric) vehicles in great numbers, then all fueling stations shall be required to offer two types of standardized, pre-charged, degradation tracked, robotically swapped vehicle battery packs. Also the Senate shall establish a maximum range for electric vehicles, that range shall initially be 50km until the Senate decides to change this.

76/ Our nation shall encourage the use of compressed air vehicles for small trips, due to their low cost, light weight, cleanliness, simplicity, and how the storage medium lasts forever.

77/ Each Centi-Nome armory shall have enough 7-meter petroleum-tank rail-cars sufficient to move 500 barrels of fuel at one time. These tanks will be assembled from obsolete trucks. The newest tank trucks shall still get used for remote truck delivery of oil. The next oldest tank trucks will be mothballed as emergency oil trailers and mothballed trucks. The next oldest tanks will be repurposed into backup civil-defense rail transport tankers.

78/ In times of war, or oil price problems, all refineries in the nation may be required to operate around the clock, 168 hours a week. However, during normal times, our nation's refineries shall generally operate no more than 40 hours a week.

79/ Each oil extraction reserve shall be supposed to have its own oil refinery that is located at least 20-km from any nearby large community. Each refinery must be located on the rail system, so that it can directly refill the rail-based oil tankers. Also, all refineries shall be built spread-out, and built with high, tilt-up, bolt-together (handball court style) concrete bomb walls so that the refineries are less vulnerable to air attack.

80/ Our nation (blessed with abundant oil fields as it is) shall be prohibited from importing either crude oil or refined oil distillates such as gasoline, kerosine, and other fuels and petroleum based lubricants.

81/ For each refinery built in either Cape Cod or Baja California, we shall build a copy in our nation's heartland far from the bomb vulnerable coastal areas. These heartland refineries shall operate 11 hours a day, every other day. Oil is just too strategically important not to have 3 or 4 times the potential output that we need.

82/ For reasons of economic and industrial security, we shall have it that all de-commissioned plants and factories shall become the property of the county they are located in. There shall also be no moving of these. All counties must keep the roofs waterproof for 25 years before scrapping them.

83/ The court system shall no longer have any power or jurisdiction in matters of energy policy, or environmental policy, or over the closure or penalization of any industrial plants or factories.

84/ To help assure our nation's energy independence, government shall have a special Ubiq fund for automating the drilling of shallow exploratory oil wells in alluvial soils.

85/ No petroleum, or petroleum distillates, or natural gas, or other fluid source of energy shall be imported into our nation.

86/ Due to fire hazard, hot burning lightbulbs, such as halogen lightbulbs may not be sold after 2027.01.01. All few figure fixtures must use like-fitting LED replacement bulbs. All

new lightbulbs shall last at least 50,000 hours, except in hot or vibration heavy, or other extreme conditions. The Senate shall raise this lifespan as high as reasonably possible, provided this does not increase energy use to power the lightbulbs. This rule about lightbulbs shall be seen as a metaphor for the entire economy where reasonable. Also, hot halogen and xenon lightbulbs shall no longer be used in aviation. Cool LED bulbs must be substituted.

87/ Only brushless motors may be sold in our nation.

88/ Where there isn't enough electricity to meet demand, the price shall go up to the point where supply and demand balance. However, all of this allocative pricing shall be considered an allocation tax, and all allocation taxation revenue accrues to the general fund of the nation. It shall be considered profiteering if anyone other than government collects allocation taxes.

89/ We should focus on:

a/ Energy savings over energy generation. In our cities we will have 50cm of insulation all around all of our heated buildings, with almost no bridging. In our transport system we will use long shared trains on steel wheels instead of individual wind-plows vehicles on wasteful rubber tires for all urban places.

b/ We shall focus on using the sun's energy for water and space heating, and for lighting, more than for electric power.

c/ We shall burn our nation's abundant coal to power our electric metro rail systems, and to power our cities from remote downwind power plants. We shall use scarce fluid fuels for our nation's hybrid intercity trains that will have both motors and engines.

d/ Our aircraft, and the vehicles in remote areas and our earth movers, these will continue to use various sorts of liquid fuel.

90/ No power plant shall ever do any cooling except for overheating emergencies.

91/ All power grids shall have a price for reliable electricity, and also another price for slightly unreliable electricity.

92/ Regarding the power grid:

a/ The Public Property Sluice of the national Senate shall design and build a new super-efficient, 21st century power generation and distribution system for our nation. This system shall use new and different voltages with maximally efficient AC current used in high voltage intercity transmission, and safer DC current used inside our buildings.

b/ For all railroad, roads, and other linear infrastructure, including utility lines between communities, the only source of authorization for the routes shall be the Public Property Sluice, and its linear infrastructure committees and juries. No other entity, Government or non-Government shall have any jurisdiction over linear infrastructure (roads, railroads, and utilities pipes and electric and communication lines) between communities in our nation (including even small aggregations of buildings). Also, the PPS shall optimize and design the inter-community infrastructure as a plan for 100,000 points of connection, and then give away leases for the construction of new townships. The new intercity infrastructure system shall go where the national Public Property Sluice finds it is most optimal and useful. Then there shall be no challenges in the judicial system of any decision of the Public Property Sluice.

c/ Government shall be required to allow the replacement and upgrading of inefficient, outdated, or just old linear

infrastructure.

d/ Government shall be obligated to support the private construction of new community linear infrastructure. For this reason, there shall never be any fee for applications to obtain permits or build new community linear infrastructure, or replace old community infrastructure.

e/ The townships shall be linked via the national linear infrastructure system. They shall all connect with the new national 7m gauge rail system, the new national power grid, the new national fiberoptic communication system. The connecting rail lines however need not be 7m.

f/ The new power grid, rail system, transit systems, stations, railcars, freight handling systems, warehouses, fiber-optic communications, bridges, road electronics, and everything else that government does shall be made in great numbers to minimize cost. There shall be upgrades, but all shall use interchangeable, ubiquitized, or open-source designs for all equipment.

g/ All parts of our new linear infrastructure systems must be made domestically of exclusively North American components, north of the Panama Canal.

h/ To be clear, this Constitution guarantees the right of communities to build the group linear infrastructure they need on the intercity agricultural land, nature land, and wasteland between communities. And there shall be no local approvals or inspections, cost, or environmental approvals of inter-community infrastructure systems. No county government shall even be allowed to express any opinion about where the new inter-community infrastructure systems go. Almost everyone will get lucky. A few people will be displaced, but they shall all be compensated.

i/ A minimum 150-meter wide strip of public land shall exist for all intercity rail lines. The inter-community utilities mostly running alongside the viaducts. And for civil defense perhaps 60cm thick, cast concrete is poured on a ribbed steel pan as a roof and under our new rail lines, which themselves might be housed in a concrete tube, that can easily be added later, placed along the side of the raised viaduct.

j/ The inter-community linear infrastructure shall all be owned and managed by the national government with local county sub-administration. Utility companies shall no longer own any inter-community linear infrastructure, except when they build a new system and for 17-years thereafter.

k/ When Government builds linear infrastructure, it shall install all the bridges and grades, and then it pays by the meter for each system group installed.

l/ Having a rail system of spokes allows government to have many short lines being built at once all over the nation. Also perhaps, there can be 4 companies building each quadrant of a pair of rail lines.

m/ The utility companies as intermediaries will be mostly eliminated.

n/ The national power grid and fiber optic communications system and most other inter-community infrastructure shall be owned by the national Government and managed by the PPS. The grids shall be operated by the national government as a free public service, like the highway system and the national train systems. The national government pays for the construction of the new inter-community infrastructure, and then gives away access (except for reasonable allocative

charges where there remains scarcity). The county government and national power grid shall buy power from suppliers and sell it at a slight mark-up, as the old utility companies were supposed to do.

o/ The people shall pay the full cost of connecting to the grid, and for all individual repairs. Where groups are connecting to the grid, such as in townships, the township pays for all connections and servicing. The county recorder system handles all government and public utility billing and payments.

p/ All linear infrastructure systems over 20 years old shall be nationalized by the Senate to the extent the Senate wishes to claim ownership.

q/ The idea of wind power, and shifting peak power loads east/west to minimize peak loads shall be seen as a costly chimera. The old rate-base focused utility companies are full of dumb ideas like these that exist only to increase the rate base and maximum tolerable profit of the utility. Also, this waste here should be seen as a great window on seeing just how inefficient parasitic economic feeding is.

r/ If we ever find ourselves with regulated utilities again, we should be very careful disqualifying expenditures from the rate base, particularly stupid investments in things like alternative energy.

s/ Given the insignificant cost, and great benefit for civil defense in time of war, and natural disaster, all utility companies must have enough conventional oil, coal, or gas burning power capacity to entirely power their grid at 125% of peak summer capacity. The renewable energy is a supplement that is used in preference to the other energy sources. However, there should be no subsidies for renewable energy, and utility companies shall not be allowed to charge any more for renewable energy.

t/ For reasons related to civil defense, all new fuel storage facilities and power generation plants (including especially nuclear power plants) must be at least 200 km from the ocean.

u/ There should be no taxation of fossil fuel production, of freight railroads, or passenger rail roads. Government may however, charge anti nuisance fees for those using these resources wastefully.

v/ Government shall develop systems for harvesting natural seeps of methane.

93/ The Senate shall completely re-write the laws of mineral rights, particularly the laws of oil and natural gas ownership and extraction.

94/ Where there isn't enough electricity to meet demand, the price must go up to the point where supply and demand balance. This is the #1 reason why public utilities are superior to private utilities. It is because all the allocative pricing becomes a tax where the electric company is owned by government, but it is profiteering when the industry is owned by private companies.

95/ America has plenty of oil and minerals and we must make it easy to drill and open new mines so we can be rich again instead of dependent on foreigners and on the road to ruin.

96/ Government shall do nothing to encourage one type of fuel, or one source of power and slow the adoption of others. This only creates dependence on foreigners and exploitation by foreigners.

97/ We shall disfavor the use of hydrogen as an outdoor fuel because of its low energy density.

98/ All refrigerant laws related to CFCs and HCFCs shall be repealed and the Senate shall make new rules about these.

99/ We shall have an experimental electric discharge system with Tesla lightning rods at Toro Peak, and all along Toro Ridge. These will feed into electric lines that ground deep into the planet and perhaps the ocean.

100/ Methanol shall not be used as fuel because its flames are invisible.

101/ Both government and all fictional citizens shall be prohibited from installing new wind energy facilities. Also, there shall be no more new windmills, which are a problem for both views and bird populations. Government shall be prohibited from subsidizing any form of energy over the others.

102/ It shall be official policy not to waste scarce fluid fuels such as petroleum and "natural" gas on municipal power generation except during times of extreme summer heat, or extreme winter cold, not exceeding 3 weeks each per year. Instead we shall use remote coal burning plants for this. No utility may use super expensive wind, or solar energy in its rate base.

103/ The Senate shall use X-prizes to develop a number of coal mining robots that will be used in underground seam coal mining without removing the capstone. It shall be considered a national security imperative to develop low-cost coal mining robots so that the free world, and especially our own nation never has to worry about being blackmailed by foreign energy providers ever again.

104/ The Senate shall also develop roadkill pickup droids. These will be dispatched from the roadkill menu item of the recorder system's reporting page. Using robots for this purpose shall be thought to be more plague hygienic.

105/ All electric trains must be powered by coal unless they are being used in super remote places. In that case, they can use diesel fuel.

106/ It shall not be allowed to burn coal in any urban or suburban areas.

107/ The national government shall develop telescoping robotic ground drills, capable of drilling as deep as possible without any people changing the pipe sections. These shall be used for both oil and water wells.

108/ Hybrid petroleum/battery vehicles have a number of advantages:

a/ We can have zero-pollution, electric-car only zones in our city centers.

b/ We can power our fleet to some degree using our nation's abundant coal.

c/ The nation will have many back up generators if there is a blackout. We might have plug in points where the hybrid cars power the electricity grid during a blackout.

d/ Have a way to sleep/camp in in trailers where heating and air conditioning must be powered.

e/ We also imagine radiator bypass valves that alternately pump hot engine coolant through a radiator that is inside our trailers.

109/ If there is ever an oil tanker boat glut, we shall buy and keep many of these on our great lakes enough large oil tankers to transport 150-million barrels per day as it means of

keeping Ishtar's OPEC from ever rising again. We will use these mostly to transport Venezuelan, Cuban, and other Latin American oil, as well as our own oil for the life of these ships.

110/ Our nation's energy policy shall include

a/ The seizure of Venezuela's oil fields and guarantee of their safety using our military. Then we shall bring Venezuela's oil back into production and give 75% of sales proceeds to the people of Latin America on a per capita basis.

b/ We shall oil explore the entire coastline from Tijuana to Guayaquil Ecuador, and from Macapa Brazil to the US border by Matamoros, helping our neighbors to discover their oil and bring their oil into production.

c/ Once we have Venezuela's oil back in production, we shall use our submarines to close the Persian Gulf and later the Red Sea. This will force all the world's shipping to use our Panama Canal instead. So long as we keep pumping American oil into the global market, Arab and Russian power becomes impossible. Also, Chinese power wanes.

d/ We want every enlisted man in the Marines and the Army to spend 2-weeks being training in oil drilling, and 2-weeks on distributing arms to oppressed people, so our nation will always have lots of people to run our critical oil industry, and to hand out guns.

e/ We shall buy Cuba and relocate all of its people and bring Cuba's immense oil fields on line.

111/ Utility companies are not allowed to experiment with alternate energy, and where they do, it shall not be added to the right base rate base

112/ We shall build rail lines from the top 20 Central American and North Amazon oil fields to the Pan-American rail line. In times of crisis, we may give away oil transportation for free: both from the oilfield to the rail system and from the rail system to our allies facing oil being used as a weapon on them.

113/ The Senate shall reevaluate all government mandated emissions controls on vehicles and what percent of the engine's energy they cost, and how many problems they cause. Then, the Senate shall decide which sorts of emissions controls are excessive and shall be deleted, and which we shall keep. Then all of the vehicles will have this new, relaxed and energy efficient level of emissions cleaning required. Also, under the new township system, and artificially slow semaphores, it will always be quicker and easier to leave one's car at one of the 2 peripheral parking lots than to drive in. It shall be thought that emissions controls were made intentionally over-strict, so they would increase oil consumption and oil sales for OPEC.

114/ There shall be no solar farms on good farm land, or where the runoff will get into good rivers. for this practice seems to ruin the ground with toxins.

115/ All government subsidies and payments for so-called alternative energy such as wind and solar and for battery electric vehicles shall be considered as corruptly obtained. All existing payments from government shall be halted immediately, including ongoing payments.

116/ Except for 80%-off work-spaces, 80% off worker apartments, and 80% off server space for startups and new production lines, there shall be no government subsidies of industries. And especially, there shall be no more subsidies

for using one type of energy over another. However, it is anticipated that many townships will require that all single wide vehicles (normally with a round trip range under 10km) emit no pollution to the community, by either burning hydrogen (producing water), or using a stored energy source.

117/ Now we wake up to the propaganda bluffs of the Mideast, to use oil as a weapon, to close off the Persian Gulf, to close off Red Sea. These are not really threats as much as they are bluffs. These bluffs exist so we don't see out power to use these three ways to gain complete domination of the Mideast and Islamic world. And this is how we will drive the total evacuation of the Mideast, when time is right, when we have means to move these people and a place to move them to. First we shall start throttling shipping through the Mideast, while we are also making sure that the world always has an energy glut situation. We will assure the energy glut situation by bringing Venezuelan, Cuban, Mexican, and Central American oil into production, and helping this oil to come to market in Europe especially, but also Japan and the rest of east Asia. In other words, it shall also be our nation's energy policy to use oil as a weapon against the Mideast, so we can slowly drive all the people out of this eternally troublesome land of no resources.

118/ To be perfectly clear, it shall be the official policy of our nation that we are not phasing out fossil fuels. We may elect to do this in the future, but now we are not doing it. The phasing out of fossil fuels shall be thought to be a fake matrix idea brought to us by OPEC.

119/ In order to keep the Mideast from ever rising again, we shall drill our entire coastline for oil, starting in our bays around kelp. But we shall also use our marines to and go and drill for oil on all gulfs and bays down the Mexican and Central American coasts and down both coasts of Colombia for oil with our without the permission of the local government. We shall do the same on Cuba, starting on the north shore. And we shall do the sam in Venezuela and all of the north shore of South America. And whenever the output declines substantially as happened in Venezuela. Then the Marines shall seize control and then get the oil field up and running, and then rent it out with the income going to the local nation's economy that it is located in. Again, we do this to keep the Mideast from ever rising again.

120/ We shall go out of our way to completely destroy the price of oil long term, to completely ruin the possibility of OPEC ever rising again. And in this way, this is how we will dominate the Mideast and force them to abandon Islam. You know they were converted to Islam by the sword, and they will be converted away from Islam by the sword likewise. This will be our strategy for the complete elimination of Islam on Earth. This plan will leave the world's Muslims in a state of total poverty until they go along with our plans and defect and defecate in their book.

121/ Right from the start, the Senate shall designate at least 100 of the nation's high-up mountain areas for the operation of new clean-coal, tall-smokestack power plants that will both produce less coal smoke, and they will also spread this smoke more widely away from people. Then we will use this electricity to power our transit system, our battery electric vehicles, and our compressed air vehicles. We will also heat and cool our super insulated townships with either plant

electricity, or super-insulated steam pipes. Also, everyone knows that super-insulation matters a lot more than what type of heat we use. We may also use places where the air pollution blows out over the ocean and doesn't cause any harm due to the oxidative salt and vastness of the oceans.

Oceans shall be considered far better than land because the ocean allows for the complete dilution of pollution whereas on land, this is not occurring. Instead the pollution does the opposite. It concentrates in the waterways that are some of our planet's richest habitats. The rivers of the world shall now be thought ideal for getting water and food. The deep oceans shall be for dumping waste due to their oxidative salt and vastness.

122/ There shall be no more offshore oil drilling projects started until 2050.01.05.

123/ According to Barak Hussein Obama in 2016, tail pipe emissions are 1/100th of what they were in 1972. Therefore, it shall be thought more important that we focus on increasing fuel efficiency, than we worry about eliminating super-expensive and hard to remove long-tail levels of pollution.

124/ As CO2 is now thought to be harmless, there shall be no more anti-pollution measures taken to reduce CO2 emissions.

125/ The Senate shall hold an inquiry to figure out whether our nation's vehicle tailpipe pollution policy was driven by California, which was driven by Los Angeles, where a great deal of industrial pollution was dishonestly labeled tailpipe pollution.

126/ Government shall not be allowed to discriminate either in favor or against one sort of vehicle propulsion system: Be it gasoline, diesel, electric or compressed air, unless one sort of car is significantly more deadly than the rest. Government shall not support or subsidize any particular form of transportation propulsion tech except that it shall run electric lines for trains, and electric vehicle charging stations, and to run compressed air stations if compressed air is used for vehicle propulsion. Government might also run electricity for heat storage steam vehicles if they are used.

127/ The national government shall build a new national system of at least 10,000 vehicle fueling stations right next to our new rail system at all communities in sufficient capacity to meet demand. In these, government shall charge 2% over the then current rail-head-delivered fuel price, for fuel distribution services. This system shall have its own short-distance pipes from the rail head. Like all other construction called for by this constitution, all of these new truck stops shall be exempt from all pre-construction permitting environmental reports.

128/ Neither government nor any utility company shall charge any fees for connections to any utility systems. Only the actual cost of making the physical utility connection may be charged. However, builders shall always have the right to install their own inspected utility infrastructure on their own property, and their own easements, and in the streets adjacent to their property in the broadest definition.

129/ An 80% overmajority of the Over-Senate shall be required for the Government to lease linear infrastructure. Also, no lease of linear infrastructure shall be for a period of more than 12-years.

NR'81. THE COMMONS AND COMMON WEALTH

1/ Government shall not encourage or subsidize the non-production of food, or any other resource or commodity except in curtailment industries.

2/ All grazing on public land is charged by the head/year. This is to reduce over-grazing and excessive soil erosion and long term output degradation.

3/ All livestock grazed on public lands shall be required to use a GPS-based, electro-shock and sound based herding device to move them over the land in the best way possible. Everywhere gets grazed, and nowhere gets overgrazed and suffers soil erosion. These devices shall be as humane as practical, however, these animals are all destined for slaughter, and their mild discomfort and fear shall not be considered important.

4/ In order to maximize food stores as quickly as possible, at least 80% of public lands suitable for non-irrigated farming and ranching shall be leased at market prices.

5/ Each type of land shall be auctioned off in parcels a bit on the small side of output-optimal for that type of land. The periods shall correspond to the optimal inter-fallow periods for non-irrigation, non-terraced land. When irrigation or terracing is required, the government shall try to lease the land for 20 years on the condition that certain terracing, and or certain classes of irrigation systems have to be installed for the leasehold. Once the auction fee is paid (if any) and the irrigation equipment installed, the farm shall be considered fully paid for 20 years. If there are no offers, then the property may be offered for 50 years. If there are no takers, then the property may be leased for 70 years.

6/ All the plots in each area shall have similar expiration dates, but the areas shall have staggered expiration dates. This is so the auction workload can be spread out efficiently, and also so there is a steady supply of lots coming up for auction.

7/ The Senate shall do what it can to help bring semi-desert and sloping land into cultivation. It may grant development leases of up to 99 years for those who create terraces, plant orchards, or plastic-bag orchards, or plant timber on suitable land that would otherwise go to waste. When extraordinary and valuable expenses like this are the case, The counties may lease human-sized parcels of land for as little as \$1 per acre, however the tenant must keep the land in production as a condition of their lease. The counties may also sell the land outright. However, where semi-deserts are not going to be used for irrigation, they shall be left alone as habitat and shall not be used to forage animals and ruin the fragile topsoil.

8/ We shall develop our nation's ability to produce all the valuable tree harvests we can, especially the olive, dates, frankincense, myrrh, cinnamon, nutmeg, and other tree harvests that the Mideast has traditionally sought to monopolize. We shall also be mindful of how Ishtar has traditionally girdled and burned the trees of their competitors, so we shall remain ever vigilant and over-plant.

9/ We shall harvest our old forests that have aged to the point of becoming a fire hazard first by cutting many broad fire breaks. This particularly with our Phoenix forests of cedar and pine, This so we minimize giant catastrophic fires. Where great forest fires have recently raged, government may

replant with less fire-prone species. Also, all cedar and pine forests shall be phased out in all urban, suburban, and exurban areas nationwide over the next 14-years. Approximately 7% of these areas shall be cut every years. We shall also establish a national system of fire breaks that coincide with our transport routes so that people can evacuate in greater safety. We shall design our new township train lines with fire this fire break system.

10/ We shall be generous with our Ubiq awards for new cultivars and agricultural robots.

11/ Except for military bases, national commodity extraction reserves, and national government lands with more than a 1% building coverage ratio, all public lands in the nation shall be administered and rented out at the county level, even if it is owned by the national government.

12/ To foster a max-out situation for government-managed common resources, the county shall keep half of the tax, fee and lease revenue it generates from all government property in its jurisdiction.

13/ Except for for the 1/10th pie slice kept for nature reserves, Government must lease all publicly owned land suitable for grazing or grassing certain types of livestock. These shall be renewable 6-month leases with a minimum rent of 2-hour's wages per head. Government shall have an overabundance of lands for quarantined pig farms and government shall enforce all pig farming quarantines. Except for for the 1/10th pie slice kept for nature reserves, Government must lease all publicly owned farmland suitable for planting in that year, provided the annual rent per acre per year is more than 2 hours wages per year, with soil sustainability and pesticide rules enforced by the county and with fines sufficient to stop a tragedy of the commons. Those who lease publicly-owned farmland must plant the land in the years and seasons prescribed in the lease, with one of the stipulated crops. Those who fail to do this shall lose their lease unless this was due to poor weather or economic shock.

14/ All government property shall be leased according to standard clauses for that type of property. Without recorded permission by the appropriate government people for a lease, or for a particular activity on a government leasehold, no permission shall be considered to exist.

15/ The use of public property and infrastructure shall be encouraged by government wherever practical. Then government shall charge market rates for the use of the public property. Where there is not enough to go around, government shall levy additional allocation fees so that demand is balanced with supply.

16/ With an eye to ancient Rome, and as an anti-famine civil defense measure, we shall say that no person, family or fictional citizen shall:

a/ Own, control, or option more than 2,000 acres of prime farm land in our nation. Thus for example: someone who owns 250,000 acres shall see 248,000 acres of his land nationalized and then made available for public auction for its highest and best purpose.

b/ Produce more than 1/10,000 of the nation's: Eggs, chicken, beef, pork, corn, wheat, or rice or operate more than 1% of the nation's butchery capacity for chickens, beef, or pork. Store, option, or sell more than 1/10,000th of the nation's meat, or grain.

c/ Grow, store, option or sell more than 1/1,000th of the nation's planting seeds or fertilizer.

d/ Own more that 200 dwelling units, except for the builders/ developers of these units, and then, after two years of ownership, the county shall get 1% equity per teneth, so long as the developer owns over 200 dwellings. Renting housing is not supposed to be an investment strategy for large conglomerates and ultra rich people.

x/ On the Hawaiian islands, no person, family, or fictional citizen shall own more than 1 acre of land. All holdings over 10 acres shall be nationalized. However, the prior owner shall be allowed to pick which acres he will keep. A reasonable amount of former tribal lands shall be preserved as open space by the county of Hawaii. Also, on the Hawaiian islands, new townships of more than 5,000 units shall be allowed to own up to own up to 10, square kilometers, provided that at least half of the units are occupied by full time residents. New townships of over 2,000 dwelling units shall get one square kilometer of land per 4,000 units or part thereof. The townships themselves shall be given the land by government, for the ongoing tax income that sustains government. Also, the green belts between the outer suburbs of the townships shall not count in this calculation, but the outdoor yard areas shall be included. Further, the attached row house lots in the outer suburbs of Hawaiian townships shall not be larger than 130 square meters, and at least 10% must be light wells.

Three story row houses shall always be allowed in the suburbs of Hawaiian townships. On the big island, the townships shall be entirely run by hotel operators on leased land. For hotels, the minimum density shall be at least 150% of that of the permanent resident townships to get a 25-year land lease. (6,000 units per square kilometer of land). Also on the Big island, there shall be at least 200 township sites that average three-square kilometers, which are made available for leasing and development. All shall be accessed via bicycles and at least a pair of rail lines, one high and one low, with at least 12 connector lines between the two rail lines. The big Island shall also allow apartment and row-house townships of regular Hawaii density as defined above. Also, on all islands, all the residential uses get first priority, and only when the residential uses have all the water they need, only then shall agricultural uses get any water. Also, this rule is above any environmental regulations.

17/ We shall recognize no special un-replaceable location or view, or length of coastline, beautiful view, that is in the hands of individuals. All of these rights to special places, expressed or un-expressed by Government shall belong to the people collectively, and individual rights shall only exist where the township, or the county government is leasing the property for up to a life estate. However, in general, the most truly remarkable rooms and apartments in the most incredible locations must be rented out nightly to maximize their enjoyment and benefit to society. All of other land owned by the people shall now be considered fungible with regard to con-dem-nation and forced sales to build townships, suborbs, and exorbs, and and linear infrastructure for the new urbanism around each transit node. In whatever case, the owner of the condemned property when paid in money shall get 115% of the property's worth. If unimproved land is being condemned, land-for-land exchanges must be used and the

exchanged land should be worth 25% more. Where orchards are condemned, it shall also be for 115% of the orchard's value. Where there is mostly unimproved land, where the old or small buildings are almost of almost no consequence to the value of the land, government shall be required to only use land for land exchanges. Land for land exchange shall be regarded as almost infinitely better with regard to corruption. Government shall never pay money for unimproved land. It shall always substitute land. Because of the 125% surcharge with regard to land for land exchanges, there shall be no right to appeal this. All remote houses and other minor structures under 1,000 sqm. that are not in townships shall be subject to condemnation by the square meterage of improvements. Thus government will never be paying exorbitant amounts for linear infrastructure right of way acquisitions, or for township and suburbs and exorbs sites.

18/ Our nation shall sensibly build and hold at least a 2-year food stockpile. Building this stockpile shall not be done in a way that increases hunger among UM member nations, or nations that have entirely cleaved away from Ishtar. Building this stockpile shall however be done in a way that increases hunger among PU nations and those who have not cleaved away from Ishtar and Islam.

19/ Government shall encourage the sharing/lending of knowledge, housing, lodging, vehicles, equipment, tools, workshops, and resources because it will make us all richer. To this end, the judicial system shall offer a fast and easy arbitration of claims involving excessive damage to shared/lent property. The only cost shall be reasonable anti-nuisance fees. Also, those who engage in the short term renting/lending of equipment and vehicles shall have no liability for the injuries/accidents of people using those shared devices, unless the equipment was previously damaged or improperly maintained in a way that led to the injury/accident, or the user was not licensed/certified for using the equipment/device.

20/ Each county recorder's office shall offer the following intermediary and information services, among other services if requested for a nominal fee:

- a/ Real estate and vehicle registration and taxation administration.
- b/ Identity verification for voting, law enforcement, financial identity, travel, and other purposes.
- c/ Paid process of service for legal notifications, and verification of service by recording the actual contact video with the person in real time. Also the recorder offers notification by required-to-check email accounts. All personal legal notifications, must be recorded on recorder's office audio video to be valid.
- d/ Verification of pending lawsuits.
- e/ Certification of government actions including search warrants, outstanding arrest warrants, and pending court matters.
- f/ Escrow services and money sending services.
- g/ Secure collection and recording of important documents and deliveries.
- h/ Asset location tracking.
- i/ Location tracking of people and children. (optional)
- j/ Video camera monitoring. (optional)
- k/ Monitor a variety of electronics and send notice if parameters are exceeded. (optional)

- l/ Monitor personal biometric data such as comes from heart monitors caloric intake, sugar intake, etc. (optional)
- m/ Moderated local advertising and auction website.
- n/ Moderated local facebook and twitter.
- o/ Local user rating system.
- p/ Local sharing systems.

21/ The following sorts of legal notice shall require 60 days prior video-recorded service of personal notification in the real world in order to be valid.

- a/ Deprive someone of real property holdings.
- b/ Deprive someone of more than 3 months Pay in Court.
- c/ Reduce child custody rights.

22/ Consider our old fake democracy and our old fake land of the free. This fake democracy once actually went out of its way to help slave owners by chasing down and returning the people who fled slavery. Now, in a similar way, our new democracy will go out of its way to help resource sharing. And this shall not only be about underground minerals and knowledge. Businesses that share places, buildings, equipment and furniture. (so long as there are no extreme and hard to solve safety issues) the public shall insure and provides below market financing, and low down-payment financing for shared facilities and shared equipment. Our democracy shall also provide a wide range of recording, payment, deposit management, and conflict resolution systems designed to facilitate sharing businesses.

23/ Government shall not discourage the sharing of resources unless there is a clearly stated and reasonable reason and at least 2/3 vote in favor of it.

24/ Government shall have and enforce reasonable rules and penalties for those abusing the common weal, as well as those abusing private property that is shared either for goodness sake, or as part of a commercial enterprise.

25/ Those who accidentally pollute the commons shall pay a fair and reasonable deter-hence for their abuse, nothing more and nothing less.

26/ All use of the commons shall be by government permit, this permit acknowledged or not.

27/ The principal objective of government regulation of the commons shall be to maximize output over the long term. Nobody shall take so many fish that the harvests are not of optimal size, whether the fish be real or metaphorical. However up to that point, government shall work to encourage use of the commons.

28/ Given the insignificant cost, government shall pay for spawning and distribution of fish and sea animals to maximize the nation's marine harvest. We may do likewise with slopes that will support woods to harvest for lumber.

29/ No kelp forests shall be trimmed to less than 50cm above the surface at high tide. This clause is intended both literally and metaphorically, such as with electronic shepherds preventing the overgrazing that stunts the growth of the plants.

30/ Agricultural resources shall not belong to those who leave them unused or significantly under-used for long periods of time. Good farming acreage not suffering from drought or interruption in its irrigation waters shall revert to the county government unless properly used at least 2 year in every 8.

31/ Land tax shall be high enough to prevent disuse and neglect of both urban centers and its farmlands. There shall

be no tax breaks for keeping areas forested that can also be used as valuable farmland.

32/ Our nation shall have a national land use and asset audit every year as part of the mandatory annual national census. National monies paid to the counties shall be calculated based on the the number of citizens able to vote. Minor children, elders too old to vote, non-citizens, and immigrant citizens shall not be used in the calculation, as these shall have no right to representation in our government. Also, all rolls of the people, including especially voter roles, shall be audited annually by large Sub-Senate juries, and all changes fully documented for the people. The head and shoulders first reason for government to hold a census is to double-check and verify voter numbers by parallel process.

33/ All habitat lands, nature reserves, national parks, and county parks:

a/ Must be in places that are generally unsuitable for human use. And this especially when this land has a valuable mineral deposit of some sort, or it is at the ideal elevation for townships.

b/ Shall never be made off-limits to the people except due to safety.

c/ Shall never be made off limits to drones or core drilling.

d/ Shall be cancelled if they are protected due to migratory birds.

e/ Shall be cancelled if they are coastal and there are multiple layers of protections. For here is a lie that tells the truth like a compass and here is where our nation's best oil fields are.

34/ Ishtar has for centuries struggled to institute laws that place the best lands and navigable waterways of its hosts off-limits. After all, the Magna Carta has 63 paragraphs and 6 of those paragraphs (48, 47, 31, 44, 33, and 23) are about either the king's administration creating royal hunting reserve that the people can't use, or others blocking the use of rivers in various ways. With this in mind, we will say that no more than 10% of our nation's useful good lands in any category shall be made off-limits to human use as anything like habitat, nature reserve, or national park.

35/ In the Magna Carta of 1215AD, there are 6 mentions of the people taking back their public property that was either made off-limits to private use, or taxed and regulated by wardens. There are also 5 mentions of the rivers being clogged with fish farming fences which seem to have prevented inland shipping and hindered the English ability to trade in competition with the ancient international shipping monopoly of the Mideast. So we should all recognize these as tactics of the Mideast, and that we don't ever want to have a situation like what existed under the Magna Carta:

a/ Magna Carta, 48

"All evil customs concerning forests and their wardens, foresters, and sheriffs, along with river-siders and riparian rights holders, and their keepers, shall be immediately investigated ... and completely and irrevocably abolished and never restored."

b/ Magna Carta, 47

"All of the forests that were created in our lifetime shall be immediately cancelled, and likewise with the riparian areas/ rights that were placed under royal control in our lifetime." [This section gets at the way that Ishtar always claimed lands

and rights as it could so that these could be later sold back for corrupt parasitic profit.]

c/ Magna Carta, 31

"Neither the crown nor its bailiffs shall take any man's forrest for camping, or for other purposes, except with the owner's consent."

d/ Magna Carta, 44

"Those who remain outside a forrest/ wilderness area [owned by the king] shall [no longer be called before the forestry court]"

e/ Magna Carta, 33

"All fish fences shall be entirely removed from the Thames and the Medway rivers, and throughout the whole of England except the ones on the Sea Coast." [Here we imagine that the inland waterways of England were made impassible by Mideast sponsored fish farming fences. Then this prevented people from using the many rivers of England for shipping goods that would compete with the Mideast sea shipping monopoly.]

f/ Magna Carta, 23

"No person and no town shall be fined for building bridges across the riverbanks." [Here we imagine a situation where people friendly to the Arab fronting mafia bought up all the riverfront land for many miles and only allow people to cross the river if they paid money to the mafia.]

Here are some other parts of the Magna Carta that are worth considering in relation to this constitution:

g/ Magna Carta, 7

"After the death of her husband, each widow shall have the right to her inheritance and separate property immediately and without difficulty. Nor shall she be require to pay anything to recover her dowery or for her separate property, or for her inheritance which she and her husband held on the day of his death." [Here we imagine Mideast fronting appointees intervening and obtaining property for allowing widows to inherit property from their deceased husbands. In India the Mideast made it the custom for widows to throw themselves on their husband's funeral pyre, so all the family property and the orphan children would go down the drain to the Mideast parasite.]

h/ Magna Carta, 10

"If anyone borrows from the Jews [the fake Jews fronting for the Mideast] and dies before the debt is paid, the debt shall not incur interest for as long as the heir is under age" [Apparently this was a problem and a way for the Mideast to get more money when borrowers died.]

i/ Magna Carta, 11

"If anyone dies and owes a debt to the Jews [the fake Jews fronting for the Mideast], his wife shall have the right to keep her dowery, and pay nothing towards that debt. And if there are surviving children of the deceased who are under age, their needs shall be provided for by the dead man't estate, and the debts are to be paid from the residue. except the service [rents/feudal obligations] owed to their lords, Debts owed to others besides Jews are to be dealt with in a similar manner." [Again, apparently this was a problem and a way for the Mideast to get more money when borrowers died.]

j/ Magna Carta, 13

"The city of London shall have all its ancient liberties and customs. both on land in in the water," [This pro-ishtarian

paragraph shows us that it is important to realize that Ishtar participated in the writing of the Magna Carta, just like it participated in writing the 1789 US constitution.]

k/ Magna Carta, 23

"No person and no town shall be fined for building bridges across the riverbanks." [Here we imagine a situation where people friendly to the Arab fronting mafia bought up all the riverfront land for many miles and only allow people to cross the river if they paid money to the mafia.]

l/ Magna Carta, 24

"No Sheriffs, police, coroners, or bailiffs shall prosecute on behalf of the crown." [In other words, there must be a separation of police and prosecution.]

m/ Magna Carta, 30

"No sheriff, bailiff, or anyone else shall take any free man's horses or carts for transporting things, except with the Free man's consent."

n/ Magna Carta, 36

"Life and limb shall not be taken as a result of a brief inquest," [In other words, everyone shall have the right of due process in all court matters of importance.]

o/ Magna Carta, 38

"Police shall no longer be allowed to charge people by their accusation alone, and without credible witnesses being brought for this purpose."

p/ Magna Carta, 39

"No man shall be arrested, imprisoned, deprived of property, outlawed, exiled, or in any way harmed or gone against, except by the legal judgment of his peers in consideration of the laws of the land."

q/ Magna Carta, 40

"To nobody shall the right to justice be denied, sold or delayed."

r/ Magna Carta, 41

"All merchants shall have safe passage in and out of England, and through England both by land and water, and to buy and sell without all evils removed according to ancient custom," [This seems to have been very important to those foreigners.]

s/ Magna Carta, 42

"Everyone shall have the right to leave our kingdom and return by land and water, safe and secure, except for convicted felons, except in time of war, and except for the people and traders of the nations we are at war with." [This seems to have been very important to those foreigners.]

36/ No shipping company shall handle more than 1% of the nation's international shipping. And no foreign nation shall handle more than 6% of that nation's shipping.

37/ In our nation (directly or indirectly) there shall be no foreign ownership, leasing, or contracting of agricultural land, agricultural output, or agricultural businesses. A reasonable amount of foreign agricultural contracts traded by genuine foreign buyers for their own use, shall however be allowed. All foreign contracts are however subject to cancellation by the Senate in the event of a food supply crisis.

38/ Government shall not establish or allow roadless areas. It shall be thought to be government's duty to make sure that all parts of the nation are accessible by roads or railroads. We shall learn from the Magna Carta and say that no area made off-limits as wilderness under the previous government shall

automatically remain off limits.

39/ It shall not be allowed for government to restore good farmland to wilderness habitat. In fact, government must go in the other way, and encourage the use of all good farm land for growing food.

40/ No pledges or promises of any part of our nation by the previous government as collateral shall be valid. No pledge or promise by the previous government shall be automatically valid under the new system.

41/ All of our suitable remote coastal beach areas that are not being used by many people, and are not near a river outfall, or a toxic area shall be opened up for shellfish piling farming. We shall insert piles/poles into the sand and then harvest the shellfish with "wire-stripper" scrapers on robotic arms attached to boats. The EPA will regulate the zones and keep people from farming the polluted and toxic zones. The south end of Baja California, Australia, Somalia, and many islands worldwide will also be suitable for this sort of farming. The origin of all the shellfish shall be guaranteed by government.

42/ Cuba should be about low cost clean shellfish, stingray, and other farmed fish, All of which are raised in clean healthy bays free of any sewage, and far from any sewage discharge, port uses, or oil drilling.

43/ All sewer outfalls for Cuba and Hispanola go on the north side of the island, and in the case of Cuba, west of Cayo Santa Maria. So all of the south coast and all of the north coast west of Cuba will be entirely sewage free. And this will be something that Cuba sells to tourists. Or maybe we use giant Cayo Santa Maria bay as a sewage treatment area. We breed and grow some high-yield inedible form of shellfish here, and then we harvest and grind up the shellfish for animals or fish feed. Thus everything remains pure.

44/ The secret to krill farming is that we have to bring down the populations of all the animals eating the krill in certain highly productive areas by some 50% to 80%.

45/ We shall farm Bison venison, elk and other grazing animals on our public lands for harvesting and consumption by people.

46/ We shall cull predators in various places, so that there is more meat for people to harvest. For example, the baboon and hyena population in Africa might be reduced like the wolf populations elsewhere. Thus there is more meat for humans to eat with less impact to the environment. Our nation shall be run by and for the people, and for their benefit, and not for the animals of our land. We shall take care of the animals, but we they shall not be our primary objective.

47/ We must learn from ancient Rome and say that large "latifundia" agricultural businesses shall not be allowed to operate as farms and ranches in our nation's agricultural systems. They shall also not have any role in our energy industry.

48/ Government shall not be allowed to impound livestock or declare farmland off limits for use except when it is probably diseased, and there is actual evidence of this, in either the livestock or the crops.

49/ There shall be no undercover rangers.

50/ All new animal antibiotic restrictions shall be phased in worldwide so there will not be a meat shortage.

The plan for antibiotic use in animals shall be:

a/ We shall re-evaluate all our failed antibiotics and find the

ones that are unfit for human consumption because they have too many adverse events for humans and also the drugs that cause organ damage in some users. Our prohibitions on antibiotic use in livestock might not apply with these drugs that are not completely fit for human use.

b/ We will switch to free range grazing on public lands using electronic shepherd tech using direction electric shocks and sounds to drive the animals efficiently and prevent over-grazing.

c/ All of the government grazing lands shall be mostly fenced into group use cantonments that are sustainability certified for a fixed number of cattle, sheep, buffalo, etc. every year, or every couple years. Grazing rights for these tracts are auctioned off every so many years in a completely staggered time scale.

51/ We shall regard our nation's alluvial flatlands as belonging to the humans of the world for soil sustainable agriculture where this is practical. Most of these lands get wiped out by floods every so often. We shall also view all the rare places where we can store fresh water as belonging to humans. We shall also view all the rare places where we can have high townships and high terraced agriculture (particularly in the tropics) as belonging to humans. We shall also view all the best township sites, mine sites, and oil drilling sites as belonging to humans. Raised or fenced rail viaduct/roads land shall also be viewed as belonging to humans. In affect, we humans will take much of the worlds grasslands and land suitable for agriculture. But for most of the the rest of it, we will only take one percent or 3% of the worlds land. And no longer will there be interactions between humans on this land with wildlife due to changes in the way we will live. If people want to go out into the wilderness they will encounter wild animals. However, if they stay in the townships, and only use viaduct transportation, there will be no interaction, so the humans and the animals can occupy the same space essentially. Actually, the humans will occupy no more than 3% of the wildlife space.

52/ We shall mostly phase-out prophylactic antibiotic use in livestock. Where animals need antibiotics for individual and herd prescriptions, this shall be approved by the local Senate. Meat yields are expected to decline with the end of prophylactic antibiotic used. However, this is thought better than squandering the miraculous power of antibiotics for humans on livestock antibiotics.

53/ All veterinary and livestock antibiotics shall be managed by a division human pharmaceutical distribution system.

54/ To encourage manufacturing in our country, at least half of all county governments shall provide a remotely located spray booth exhaust and filtration system in a remote area. These areas shall also rent laser dresser booths. This is for everyone who wants to do spray coatings, which have historically been a key way to block the conduit to domestic manufacture on the grounds of ecology and cost.

55/ It shall be considered fraud to assert or infer ownership rights over land and property that you do not own. This even for matters of claiming trespassing on nearby land that is not owned by the inhospitable resident.

56/ Where there have been two or more reports of questionable assertions of property rights from Government

shall clearly mark the property lines as feasible and using official verifiable signs.

57/ There shall be an easy to recognize white-background and black non-serif text style and a 16-digit sign number on all official government signs. Only Government approved signs may use the official government sign styling. Unofficial signs and road striping shall all use a pink background and serif text, and may be ignored. It shall be a crime to either install unofficial signs that counterfeit the design of official signs, or to attempt to enforce non-official signs. Also, wherever there is a government regulatory sign, it must state a section of internet searchable code in order to be a valid sign.

58/ All official signs shall have a bar code and a SKU number, so people can easily use an App to verify that they are real. Signs that are not real shall be rapidly removed by the county in the same way it paints over all its graffiti.

59/ Government shall tax but not regulate the sale of food directly from farmers to their customers, including local buying groups, provided all the farm-side workers are at least first cousins of the same family. Siblings, parents, children uncles aunts, cousins, grandparents, grandchildren. Thus farmers will want to have many children again. Especially in consideration of the free educational media and free basic healthcare for all children. Also, the 25% foreign worker income tax will amount to a subsidy for having children running farm equipment (and watching edu videos at the same time).

60/ The people shall always have the right to build at a ratio 1,000 square meters of roadside food markets or restaurants, or shared unit centers, or warehouses, where they want on land holdings of 10 acres and above.

61/ Regarding highway off-ramps, all shall allow commercial space, where there is a series of islands that are rows of shops with a delivery alley between them. It is all rather like a WiFi icon. All this land shall be owned by the people who shall lease it for maximum return every 15 years, subject to reasonable inflation clauses. This land, shall always be thought of as belonging to the people, because its value comes from the peoples highway. The people collect the rent on this land, and no one else. Also, Government shall provide low cost video surveilled parking lots at all highway intersections and also, a covered farmers market in good lands near population centers, where this is feasible. People leave their produce out and there is perhaps only one payment person watching the operation for the entire community.

62/ The genuine orphans with nobody shall first all be sent to rural farms with large families of similarly aged kids. No more than half as many orphans as birth children.

63/ Most of the farmland will be rented out by government to anyone with a farming license that takes 4 junior-high school courses in farming. Government will also lease scheduled time slots for use of public tractors. Many children over age 13 will work plowing their own rented fields watching edu media.

64/ Each county shall rent out plowed and broken up fenced video secured fields in and near its urban and suburban areas for vegetable gardens.

65/ Government and its USDA shall not get involved in any

way with personal gardens or small farms of less than 5-acres, except when there is a universal Senate-authorized cull of chickens or other livestock animals due to a livestock plague that is actually genuinely killing or greatly harming livestock or people. small farm stands... zoned for animals

66/ Government shall have no power to regulate the collection or distribution of rain water for use in growing crops. Collecting rain water shall always be legal and shall never require either a permit or a fee paid to government.

67/ County government shall support farmers markets and shall designate at least one lot of sufficient size per 100,000 residents, for farmers to sell their crops directly to consumers. Also, farmers and ranchers shall always be allowed to sell their produce on country roads directly to customers who want to buy their food. Government shall not get involved with this micro commerce that helps our nation's small farmers to prosper

68/ It shall be considered felony fraud to say that you own some thing, when it's in the public domain, or owned by another person. This especially includes beaches, shores, lookouts, parkland, and their public access routes. Also, there shall be no obligation to prove that the nearby resident knew that land adjacent to their property was not theirs, if they are acting belligerently to the public and wrongly alleging trespassing, or if they erect a fence on property that is not theirs. In these cases the nearby property owner may be tried for usurpation of public property, or the lesser crime of trespassing. Furthermore, there shall be no private ownership of land in any tsunami zone or 500-year flood zone. Also, there shall be no walls erected to stop any form of water erosion. There shall also be no dumping or building up of dirt along any river-way or coastline, and this especially in areas of erosion.

69/ Except for reservoir water, hazardous waters, rip currents, river rapids, waterfalls, and other killing currents or hazards (like cliffs), Government shall not regulate which sections of any navigable waterway or beach people can swim in, or venture on. There shall be no use fees for any parks, nature reserves, scenic location, beach, riverbank, or sidewalk in the nation.

70/ All leases of government raw land and waterways shall permit public hiking and swimming on the leased land more than 20m from any structure. All government rules including fish and game rules shall be revised by the Senate. All fishing licenses and hunting licenses shall require the use of the fish and game take reporting app. Once the take has been reported it may be butchered in the wild, and the steaks or fillets brought back. All open boats and all closed boats less than 12m can be freely boarded at any time by fish and game inspectors looking for illegal hunters and illegal fishers, human traffickers, and people who are clearly drunk or high on a boat, but no more. Fish and game are supposed to use wildlife cameras to estimate animal populations. They are also supposed to bring down predator populations to increase the hunt take, and to minimize food stress in wild predator populations. This leaves more prey animals for humans. So Fish and game is supposed to optimize the population stable take for hunt take, and the system is also supposed to show which areas have the highest populations. So wild populations can be culled/ eaten in an balanced and ongoing

sort of way. Also, there should probably be quarantines for hunters and mandatory factory processing and cooking of the meat. Where we seek to eliminate invasive species, foreign species from a certain place, the key shall be held to build game fences, and nets so that we can work in blocks to remove the species.

71/ Except in a genuine food crisis where there is expected to be by far not enough food to go around, or when we are going into such a genuine food crisis:

a/ The people shall have a constitutional right to eat meat if they wish and if they can afford it.

b/ Government shall not encourage the people to eat less meat. Quit the opposite, government shall encourage the consumption of a reasonable amount of meat in the daily diet.

c/ All school and government meals must include a reasonable amount of meat.

d/ All chain stores and chain restaurants with more than 20 outlets shall be required to offer dishes with meat.

x/ All non-traditional sources of protein, including all invertebrate protein sources shall require 10-years of study in order to obtain a sales permit by the Senate.

72/ As long as most people are eating meat, we can suffer around a 50% loss in our agricultural output, and nobody will starve. For all we have to then do is temporarily delete meat consumption during the food shortage. This freedom from famines shall be thought to be one of the principle advantages of eating meat. It is also the main reason why malignant Ishtar struggles to further vegetarianism. You see in societies that eat meat, they always have a 50% buffer in their food supply, because they can switch to vegetarianism. Therefore, Ishtar cannot stage a food crisis. But if the country is vegetarian, then Ishtar has much greater ability to stage food, crisis, and extract all the wealth from a nation. In other words, eating meat prevents a version of the Arab oil embargo but with food instead of petroleum. Therefore, it is a national security imperative, that every nation continues to eat meat.

73/ Government shall be allowed to say no swimming because it is genuinely dangerous, or because people will drink this water. But other than this, Government shall not have the right to regulate who swims where on public property, or what they do in the ocean when they're swimming.

74/ Amarillo seems to be a Red Indian name meaning yellow. Yellow as opposed to green or brown. It is the semi-dry yellow area between the Rockies and the green half of Nebraska, Kansas, Oklahoma, and Texas. Amarillo was a region and not a city. But the name is Ama•rio, which looks like the Spanish translation of the Indian name love•the-river. It had this name because the many rivers coming off the eastern slope of the Rockies would bring water to the area in the dry season. We shall put many many new townships on the eastern slope of the Rockies. From Coahuila to the Carlsbad to San Antonio to Amarillo to Austin, Amarillo to Dallas, Oklahoma, the Northwest Arkansas highlands. Missouri, Kansas, Nebraska, Iowa, Minnesota, the Dakotas, and all of the highlands of the Regina/ Saskatoon/ Edmonton area. In these areas, as with so many others, all the public land shall be open to settlement for townships of more than 2,000 units. Also government must provide sufficient and

optimal interchanges for townships here. Maybe 300m up to 2,000 meters elevation is ideal for township settlement.

75/ We shall have these massive in-person display warehouses so that people may make better comparisons about products. And these displays will also display imported appliances, however, this will require payments of fees. This is so that people know all the products available to them. But there will be these warehouse stores for more common things, like mega huge:

a/ Our nationalized Home Depot goods up to 20x the current floor area, in co-located specialized warehouses. We do this as an incubator thing for building related goods.

b/ Ikea goods 20x in floor area due to furniture showroom value. Again, this is an incubator thing for domestic output of furniture.

c/ Kitchens/baths marketplace, with upper stories for too many small offices so that everyone licenses to do this sort of work can have an office and there is an always surplus of contractors to get an office.

d/ New apartment sales and new townships.

e/ Medical equipment superstore.

f/ Pet super store.

g/ Everything electronics store for electronics gizmos.

h/ Outdoors, travel, fitness and baggage, athletic shoes and equipment everything.

i/ Vehicles everything.

j/ DIY electronics and robots. This is totally subsidized for space where people are even making repairs, or experimenting by themselves.

k/ Art supplies.

l/ Office supplies.

m/ Outdoor furniture and trailers.

n/ Non-luxury apparel.

o/ Pipes, wires, hoses and ropes.

p/ Construction metal tubes, rods and sheet.

q/ Lumber yards including specialty lumber.

x/ We will have perhaps eight of the biggest of these. Then we will have perhaps 80 smaller ones. Then we will have perhaps 800 stores at our nation's interchanges.

xx/ All of these distribution categories shall belong to the people so that the people are not subjected to for-profit companies to run these marketplaces. We do this to improve market access costs for our makers, and to help drive for consumer variety. None of these display or selling warehouses are supposed to make any money, and the national government builds out the national spaces as vanilla envelopes and white box spaces. What companies do is rent out one space in either the 8 universal display showrooms, or the next 70, or the following 790 stores. The 8/80/800 spaces are all identical spaces throughout the system. So companies will have identically sized and shaped spaces in this system. All displays are built on casters and wheeled in and out when they end their tenancy. No tenancy shall exceed 7-years. This warehouse system will be cost saving for industry, while at the same time, it will be moderately profit making for our nation's government.

76/ Livestock grazed in fields should be grazed in natural grass lands. Meat should not come from grasslands created by cutting down woodlands. Privately owned woodlands can however be cut down by owners, and this especially in flat

areas prone to flooding to grow crops, and orchards, but the people shall not cut hillside woodlands to graze animals due to the soil erosion issues this creates.

77/ Nobody, human or fictional citizen shall own or control more than one 1/50,000th of the nations needed desert and dry area irrigation water.

78/ Government shall have a 24 hour convenience store, alcohol store, and tobacco store franchise where it franchises these stores in addition other convenience stores and alcohol stores, but not tobacco stores.

79/ The Senate shall use X-prizes to compile a national GPS maps of places where fishing and hunting are allowed, and where they are not allowed, and what take is allowed and what forms must be submitted, and what payments are required. We shall try to use this system to help eliminate invasive species.

80/ The Senate shall offer X prizes for developing a number of robotic devices, or components such as the following:

a/ Self guided lawnmowers that mow an entire neighborhood's lawns after being driven through once.

b/ Coal seam mining robots. This is a rotten job that gives so many people around the world coal mining diseases. Unlike men, these can be abandoned in the event of coal seam cave-ins. This not only reduces costs and the number of people doing this poisonous sort of work, but it also allows us to get more coal from our mines.

c/ Shelf-restocking robots, and palate delivery robots.

d/ Robots for cleaning our public bathrooms, and hotel room toilets that are all built the same robot-cleaner friendly way.

e/ Floor "mopping" and vacuuming robots.

f/ Pressure washing robots.

g/ Robots for fueling vehicles, and refilling tires.

h/ Tree climbing robots that have mini-chainsaws and cut down fruit and branches.

i/ Remote operated lobster arms that pull branches into an attached chipper behind them like a mouth. These are especially useful in forest fires.

j/ Doorman automation.

k/ Neighborhood owned robots for mowing lawns and vacuuming up leaves.

l/ Fast moving robots for ripping up brush in fire situations that are both dangerous and smokey.

m/ Cleaning our public bathrooms that are all built the same robot-cleaner friendly way.

n/ Robots for planting shrubs and making planter berms

o/ Robots for drilling foundation holes and setting the form cages in the right position.

p/ Robot hydro-seeding vehicles for grass, and other small shrubs from seed.

q/ Robots for clearing and washing dishes in restaurants.

81/ This constitution shall stand entirely opposed to family succession in politics, whether it be children, brothers, spouses or parents or cousins. We shall have no none of this sort of monarchy thing in our country.

82/ Just as we will have a system for rewarding people for creating valuable media that draws traffic online. We shall have a similar system for people who draw real world traffic such as viewpoints, cafes and stands on our roads, and also hiking trails and hiking facilities.

83/ To support off-grid camp houses, among other things, we

shall push drone tech into making a number of inexpensive remote operated drones for lifting. There shall be quarter-ton and half-ton drones for camping and cabin supplies mostly. There shall also be 1-ton, 2-ton, 4-ton and 8-ton drones, at least. These will bring plywood and styrofoam SIP cabins (and other structures) into the woods. Some will bring in cement for mixing into interior thermal mass floor panels. We shall try to allow this sort of remote camping in as many places as possible without any need for a permit. Also this sort of camping never comes with any ownership rights, even if the person lived their for an entire lifetime. However it is supposed to always be for less than one year if it is free of charge. Except for 2 dogs, no animals can be kept. There is no taking of animals, or farming. All trash must be incinerated in a safe spark arrested stove. The standard-sized floor panels may however be stacked up and left. People making a mess might lose their right to get a camper's permit in the appropriate class.

Not having a human on board the lifting device is a huge thing because instead of it having to be this kind of aircraft reliability and expensive quality, the thing can be made from ordinary manufacturing and with plastic and magnesium. So the heavy lifting drones will be cheap and capable of lifting off-grid cabins made from Styrofoam sips. Also for lifting concrete for making the concrete for the interior floor, and for thermal mass or maybe most people will use plastic gravel trays under the floor, but inside the insulation.

84/ The Senate shall have x-prizes for Ai lifeguard drones that people can also wave down, and direct to other people having trouble. Or maybe people will wear a wireless signal bracelets. The Senate shall also have X-prizes for paired riveting robots of various types.

85/ The interior department shall establish an interstate cattle droving highway system, broad open land highways perhaps a kilometer across, with watering and feeding stations selling feed at no more than 10% over the going rate in the periphery, and no more than 50% in the center. The droving highway system is shaped like a bunch of Japanese war flags and they all converge on the nation's 300+ slaughterhouse zones, where all the slaughterhouse, meat packing districts are for beef, buffalo, sheep, etc. Government provides this land for free to the rancher's cooperatives and other entities including for profit companies that own the various robotic butchery plants at the nation's various meat packing districts. So the system is designed to not have any bottlenecks possible. So then meat prices will stay low.

There will also be electronic droving equipment on check out by the system. And the butchering robots remove the electronic shepherd collar and put it in the mail and the system automatically returns them to their owner. They have a barcode on them and they get returned without any for free by the system. Perhaps these charge \$5 per animal sent through the system plus standard (slightly overpriced) feed costs. These collars will make creepy sounds and electric shocks and emit fresh hay smell and fresh water smell and manage where the animal goes, so that they don't get into it into any dangerous situations and so they move with sufficient speed to prevent overgrazing. It also sends messages about left behind animals. This is so that small ranchers have means to easily and cheaply drove their

livestock to market. These will tend to be located near interchanges, and it will be mere hours from the slaughter of the animal to when the meat is used by the nearby robot food prep kitchens. And it is all robots and none of them cost anything for a share of their infinite time. Ultimately we will push towards a grain and canned food stored in everyone's home that almost never get used, while at the same time, people are getting Singapore hawker food and its equal from the delivery system. And this food is both made and delivered by robots. These use woks shaped like narrow backhoe scoops and two broad spatulas, one from either side.

Also, again, there must be a rule about interchanges that only uses that have a genuine reason can go there. This is certainly above all for uses like hospitals, healthcare, EMS and police, but it will also include showrooms, double-cost fair grounds with a 50% special sales tax, the double cost drinking zone with a 50% special sales tax, fresh food prep kitchens, and delivery oriented fresh food businesses. It shall be thought a thing of enclosed Ishtarian trade paradises to allow other uses, and especially people paying special taxes or special rents for the right to be there. The interchanges will also be a bit of a permanent Tivoli fair grounds with overpriced restaurants and everything twice the normal price with Government auctioning off the fair ground concession spaces every 3-years.

86/ The national highway system shall establish at least a few thousand free dirt parking lots for trucks on our interstate system. These should go near all the large truck stops and they should have free parking for both trucks and other sized vehicles.

87/ For all of the nation's prime and scarce surfing spots our motto shall be: "If you're not actually riding the waves, you can't surf the spot." So all the people using the nation's scarce prime surf spots shall be required to get licensed as capable of getting waves, and they also have to get waves. Otherwise they need to leave the place to people who are actually using the scarce public resource. Also, with regard to similarly scarce cliff diving, rock climbing, kayaking, and other similar low capacity shared wilderness spots, a similar approach shall be used to filter public access. After this, if there is still too much demand, the scarce access slots get auctioned off, with all the the proceeds going to the national treasury.

88/ The Appalachian area, the Ozark national Forest, the Choctaw Indian reservation, and all the other scarce highlands east of the Rockies rise, shall all be made available for townships at a safe elevation where the air is always cleaner and cooler. All of these scarce mountains of America's eastern-half shall be considered ideal for townships and less than 1% should be off limits due to any nature area.

89/ The people shall have the right to have and use any unused land in the nation that is of a suitable elevation for scattered rail-based townships, and this shall include all wilderness and parklands. They shall also have the right to buy suitable elevation land currently used for agriculture for its current value as agricultural land.

NR'82. PUBLIC AND PRIVATE PROPERTY

1/ Nobody but the people shall own the market or the path to market. And to take this a step further, we shall say that there shall be no non-governmental ownership of any roads, railroads, bridges canals, tunnels, transit systems, pipelines, power grids, wired communications networks, cable TV lines, telephone lines, water systems, etc. The only exception shall be for developers of new linear infrastructure projects, and they only get a maximum 24-years from breaking ground, and 20-years from opening. Although they generally will get the land for free provided they complete the project in a timely manner.

2/ We shall now upgrade our conception of government of the people by the people and for the people. From now on, the people shall own all underground minerals and linear infrastructure over 20-years old from opening.

3/ All existing linear infrastructure and all underground mineral rights shall be nationalized and then constitutionally deleted as classes of privately owned property.

4/ The Senate shall be required to charge anti-nuisance, or nominal fees for the following linear infrastructure:

a/ Using the road system: (A reasonable vehicle registration fee.)

b/ Using the national transit system: (A card costing two day's wages, which can be switched off at any time for bad behavior.)

c/ Minimum charges for railcar towage (so that nobody runs empty railcars around because it is so cheap.)

d/ Leasing land at a commodity extraction reserve (This shall cost enough that groups don't monopolize or cartelize all the good spots. Also, if there is not enough capacity, and a market is need to allocate scared resources. In that case, and for those specific times, government may tax usage, but only at those times and places. And then all the money shall go to the general fund of the nation.

5/ All outdoor land owned by the Senate and People and all open roads and their unfenced open area frontages shall by default be open for the people to walk on and visit. However, where property is totally fenced up to 160cm with chain link, and locked, then jumping the fence shall automatically subject the fence hoppers to arrest on charges of trespassing. Also trespassing signs and barbed wire fences shall impart no property rights or protections under the law, and barbed wire fences shall not count as fences under the law.

6/ We shall not be road poor like Indonesia. Great wealth accrues to our nation for having abundant transport capacity and road frontage. We shall have laws that help land-locked property to join the various infrastructure system, including the road and railroad systems.

7/ All railroad, canal, and highway lands and structures are hereby nationalized and given to the counties. All ports, airports, shared roads, bridges, railroads, railroad-owned lands, railroad stations, and bus stations are also hereby nationalized and given to the counties. Any attempt to privatize or claim ownership of any of the foregoing shall be void, and the people trying to buy or sell the public interest shall be guilty of fraud.

8/ All utility and railroad land and easements are hereby

nationalized and given to the county governments to the extent they wish to claim ownership. All such land and easements may be freely used for linear infrastructure benefitting the people.

9/ Government shall have an easement to run linear infrastructure, including roads, railroads, super-highways, pipelines, aqueducts, power-poles, giant electric towers, communication lines, electric lines as well as geothermal heating pipelines, both above ground and below ground, on all privately owned non-urban land in the nation.

10/ County government must comply with the national government's instructions regarding easements for the linear infrastructure of the nation.

11/ Government shall build railroads to maximize the amount of well-connected land for all purposes. All parts of the nation that are in any way useful shall now be connected.

12/ Government shall be prohibited from giving land to citizens to build public linear infrastructure. Instead, government shall pay to build the linear public infrastructure on public land, and then it shall own and operate the infrastructure itself. Then government shall be prohibited from ever selling this infrastructure.

13/ When government grants use rights to agricultural land, the land shall only be occupied by bona fide users. The land must be occupied by the registered users continually for 5 years before the users shall be able to sell their rights. During this time, the users shall not sell, lease, transfer, mortgage, use as loan collateral, or substantially abandon the property. Also, the users may be required to document that they live for at least 300 days a year on the property.

14/ All government land leasing shall take place on the county level, and no more than 640 acres of farmland may be leased in a single lease. Also:

a/ Non-citizens, and immigrant citizens shall only be allowed to bid on farmland that no full citizens wants to lease. Where our constitution is emulated by new UM nations, this clause shall be considered applicable.

b/ Those who lease farmland and fail to bring sufficient output to market considering the richness of the soil, these people shall have their farmland leasing license cancelled.

c/ New farmers that did not grow up on a working farm shall only not be able to rent more than 320 acres for their farm.

15/ With regard to privately-owned wilderness and cropland, we shall err on the side of sharing this with a universal passage easement. Those who own wilderness areas shall not be allowed to stop other people from walking across their land on the way to somewhere else. They can fence their land however, and this may stop people if it can. There shall be no right to walk in other people's fields, although paths on farmland may be used. Also for people hiking on another person's land without authorization, the land owner shall have no liability for the hiker. This we must do for the sake of sharing.

16/ As we would all prefer a world of sweet smelling roadside orchards, we shall have high penalties for sealing fruit from roadside orchards, as with all forms of travel-related crime. For minors the penalty shall be 3 day's pay. For adults the penalty shall be 30 day's pay. Farmers and farmer's markets shall always be free to sell their produce directly either from their land or from a truck parked in any open lot or along the

side of the road in any place that does not cause a road hazard.

17/ Government shall not have any liability for people who get run over because they were standing in or near a street. Also, heads up shall be the rule for pedestrians in and near streets. Pedestrians walking along a vehicles-only road or crossing against signs may be held responsible for accidents that they cause.

18/ The right to record unusual and fleeting events occurring in the street shall be considered to be a matter of free speech and free information, so the right to stand in the street and near police shall be a rather protected right that is hard for police to take away.

19/ The minor offense of illegal crossing of a road shall not exist where no vehicle had to slow down, or where the vehicles stopped to allow the pedestrian to cross.

20/ Obstructing traffic for commerce shall be a misdemeanor offense. This crime shall not apply for those handing out printed political material.

21/ Government shall now have an online GPS based system for determining what places are public property and what are private property. This system shall also show all conditions for the use of public property: quiet times, where do people park? what are the parking conditions? Is there a parking fee? dogs walking? camping allowed? Where is the nearest toilet/trash can? are fires allowed? is fishing allowed, is hunting allowed? What is the maximum take? Are there species government wants eliminated? Is it a family beach, a party beach, or a nude beach?

22/ In our nation, there shall be no such thing as a private beach or shoreline along any:

a/ Ocean-shoreline.

b/ Salty-water ocean-inlet-shoreline.

c/ Navigable river.

d/ Lake over 5 square kilometers in area.

All of these shoreline areas shall be public property from now on. All of these areas shall from now on allow unfettered, unharassed, unrestricted, unfenced public access, without any threatening signs or people who fraudulently claim ownership rights over the public shoreline property or public waterway. Where people claim ownership rights over public property near their property, or their dwelling and excluding passers-by from the public domain, this shall be regarded as the crime of arrogation. Where arrogation is recorded on video, the arrogating person(s) must spend 3 days in jail on the first offense and 30 for subsequent offenses. And this absolutely applies to hotel staff, private security guards, and residential neighbors, regardless of who directed them, or how old or senile they are. The foregoing shall not include military bases and controlled access border zones. Also, the entire beach and nearby ocean area between the Hotel del Coronado and the Monument Rd. border line shall be closed to the public.

23/ Any schemes to charge people for accessing public property (or attempting to charge people) shall be considered fraudulent and void of legal effect. This is because most of this sort of charge will just get stolen by government people anyway. Also, wherever we see managers that are crazy for these little fees, we should presume it is because they're much easier to steal. Also, all the government people, condo managers, and other managers that have been crazy for this

sort of extra fees, all should be audited to see if the payments equal the reported payments.

24/ To keep government people from arrogating public property, even for a day, we shall say that police threatening to enforce trespassing rules on what is obviously public property should be fired on their first offense. Also, the right to make a citizen's arrest on public property or property open to the people shall supersede the right to charge those people making such a citizen's arrest.

25/ Regarding the people living along waterway shorelines that own property that is in a public-access flood zone, these people shall have no right to block or harass people for using the public waterway access as so many private owners so commonly do. Where owners do this, they shall be presumed to know the extent of their property and their lack of rights with regard to other people traipsing on the public access shoreline. As such they may be charged with usurpation of public property.

26/ While the counties shall be free to build and lease out boat docks and piers as they elect on public access shoreline, non-government people and fictional citizens shall not be allowed to build docks or piers in the flood zone. Also, the national government shall have no jurisdiction over the shoreline development of any county except that it may require the county to develop its mineral-rich coastal area for a commodity extraction.

27/ Occasional visitors to private properties shall have an obligation to use the main entrance and come to the front door if one is obviously presented. Where there is a clear yard in front of a house and a paved walkway, guests must use the main walkway to approach the house. If this walkway is gated and locked, even with a 90cm tall fence, people may not enter or walk the front yard or reach the door unless invited.

28/ Police are supposed to avoid communicating with people who are expressing their first amendment right to free speech about political matters. Police must stay away from people peacefully exercising their right to free speech, or they may be charged with violating the rights of the person expressing their right to free speech. The foregoing, also certainly applies to private security guards who will suffer double the penalty that police officers suffer when they violate the first and foremost right of free speech about political matters. Regarding police officers that are dispatched to investigate, arrest, or harass people merely expressing the right of free-speech: These must stay at a distance or they may be charged. No matter their orders, they must stay away or they may be charged.

29/ Trespassing on property open to the public must be based on genuine disturbance caused by the trespassing person. Politely disseminating or gathering media information shall not qualify as creating a disturbance. Where people are disseminating political material on commercial property open to the public, there shall never be any arrest or jail time for any charges of trespassing. Also, on commercial property open to the public, the management and security guards shall not be allowed to even request that people disseminating political material leave.

30/ It shall be thought impossible for public property and private property open to the public to become considered

private with regard to free speech rights. It shall also be considered very easy for private property to become considered public with regard to free speech rights. Also, there shall be no right to trespass people in places open to the public, where the trespasser is alleging a serious crime and waiting for police to arrive. The trespassing gets put on hold until the police arrive.

31/ While people have extremely broad rights to trespass on private property open to everyone for the purposes of free speech and political purposes, they shall have no right at all to remain on private property while selling things or soliciting for commerce. In fact, where people are vending to people using the outdoor seating of restaurants (whether this is on public or private property), these may easily be charged with trespassing, as well as illegal ambulatory vending.

32/ When the staff of a premises or business that is ostensibly open to everyone who wants to come and use the business or premises, such as a shopping mall, grocery store, restaurant, bar, book store, library, hotel, etc. When the staff of such a premises or business wants someone to leave they must state a reason. And this reason cannot be a citizen's political views, their race, or bad blood with the people who work there.

33/ Police shall have maps of their districts that show which areas are public property, which areas are private property open to everyone and which areas a purely private property. Police should be dishonorably discharged for wrongly enforcing trespassing rules on public property.

34/ Property owners and their tenants shall have no self-help trespassing remedies on any unfenced land, or un-gated roads or un-gated driveways. Instead, the police must be used for any problem situations.

35/ When people have previously been granted consent to enter private property, or have paid for the right to enter and are not breaking the law, and not significantly bothering anyone, it shall be thought to be nearly impossible to bring charges of trespassing against them. Also, where this is the case, and these people are gratuitously harmed by bouncers or security, then the establishment and the bouncers/security shall be subject to double penalties, and they may also be sued in money court.

36/ The Senate shall establish detailed rules of trespassing in at least all of the following places:

- a/ In people's homes.
- b/ In people's private yards.
- c/ In residential common areas.
- d/ In shopping malls,
- e/ in schools.
- f/ In gyms.
- g/ In restaurants.
- h/ In bars.
- i/ In sports stadiums,
- j/ At dance parties.
- k/ On government military bases, and similar government places where entry is strictly controlled.

37/ Where people are trespassed on places that are open to everyone, the people doing this must state a reason, a credible reason. No trespass on private property open to the public may survive for more than two years. No person in any place generally open to the public shall be arrested for

trespassing unless they have been cited and fail to leave after being cited. Also, all trespassing in places open to the public shall be regarded as the lowest sort of misdemeanor, with the lowest penalties.

38/ There shall be no stopping people or arresting people for trespassing on unfenced or unwallled property without the trespasser being told to leave by the owner, resident, or police. Signs shall be of little effect in this matter.

For police to enforce charges of trespassing on private property where the owner has not previously told the trespassers to leave, there must be a gated and fenced/walled area. Also, if there is any unattended gap in the fencing, even for a moment, or a security door is broken, then the area shall be considered completely unfenced for the purposes of trespassing charges. All unfenced areas adjacent to a street shall generally be considered public property until they are fenced by the owner. Where it is impossible to determine whether the property is public or private, the property shall by default be treated as public property. Barbed wire shall not count for trespassing fences except in rural livestock areas. Only metal such as chain link or more expensive, and solid walls, and solid fences that are at least 90cm tall shall count as a trespassing fence in a front yard. In all other areas, the trespassing fence shall be at least 160cm tall.

39/ All public land shall be considered to have a public easement in the favor of the people, and no official or police officer shall be permitted to cancel or overrule the rule, except where the land is properly fenced for trespassing.

40/ It shall not be possible for government to sell, lease, or borrow against the following group assets of our nation. This sort of sell the Brooklyn bridge transfer may be re-nationalized and canceled for no payment at any time by the Over-Senate upon a simple majority vote. Private debts secured by the following sorts of asset may also be cancelled at any time by the Over-Senate upon a simple majority vote.

- a/ All bridges, highways, and rail lines and rail systems.
- b/ All communication lines and systems.
- c/ All water and electric systems and all other linear assets benefitting the people of a nation
- d/ All Underground resources, especially oil, natural gases, coal, and mineral ores.

e/ All forests and agricultural resources.

f/ All ports and airports that host commercial aircraft with a capacity over 20 seats that sell seats to individual passengers.

41/ Just as no arm of Government is allowed to sell the Brooklyn Bridge, no arm of Government may grant leases for the Brooklyn Bridge. Similarly Government shall be prohibited from granting leases (even part-day leases) on our nation's public right-of-ways, its streets, and sidewalks and parks — where only ticket buyers or invited people may enter. Nor shall government have the right to say where the people must obey special temporary rules either passed by government or by some lessee that has paid-off government for some days. If the Brooklyn Bridge is to be closed off for a time for a special event, then the public property must be open to everyone. Public right-of-ways shall never be restricted from public access for any reason, or for any lease, or for any

special event, or for any street scene, or any Republican national convention such as occurred in Milwaukee in 2024.

42/ There shall be no leases of government property or rights for longer than 17-years including all renewals. There shall be no fixed rate leases of government property or rights for longer than 5-years. All leases of government property of assets longer than 5-years shall be inflation adjusted, so that the leaseholder does not make a pile of money on what turns out to be an underpriced government lease.

43/ Where privately owned commercial properties invite all visitors who care to come in, and where they act and present themselves like public property — such as with the common areas in shopping malls, airports, train stations, and similar places — these places shall be considered as public property with regard to trespassing during the parts of the day they are open to all visitors. In these places, it shall not be possible to charge people with trespassing, or to eject people at will without either being a genuine nuisance, or engaging in commercial activity.

44/ Tertiary school campuses, theme parks, amusement parks, shopping malls, office parks, and other fictional citizen zones shall not be allowed to make any rules or laws subject to police power. The laws on campus shall be exactly the same as the laws off campus, and the laws inside Dys•nee land shall be exactly the same as the laws outside Dys•nee land. Also, there shall be no special police departments for any of these places. There shall only be the county police and the national police.

45/ Tertiary school campuses shall not be allowed to close themselves off from the public as they so commonly try to do. Matters of 1st class free speech on a tertiary school campus shall always be a legitimate reason to be on that campus. In order to charge visitors with trespassing on a tertiary school campus, the person must have no legitimate business at all on the campus.

46/ It shall not be allowed to camp on private property, and all owners shall be allowed to trespass all squatters. This shall include people living in cars.

47/ With regard to commercial parking and commercial vehicles parking in passenger vehicle lots, Parking rights shall only apply to commercial vehicles with a commercial delivery or pickup relationship at that location. Also, no commercial parking, either in a parking lot or on a public street shall be for over 2 hours without special authorization.

48/ This constitution abhors the idea of jailing people for trespassing on public property, or on private property open to the public, where people are not truly disturbing others.

49/ Trespassing at private events such as weddings and funerals, and crashing parties of fewer than 200 people shall be considered easy to prove and punish.

50/ When people offer their property for sale with a sign on the property, visitors shall have the right to stop by and talk to the people at that place. Where the buyer of a piece of property meets a principal before the agent, the agent shall have no right to a commission regardless of what any realtor contract says.

51/ Looking into occupied residences shall not be considered trespassing but prowling or peeping. Where people go around pulling on other people's door knobs/handles, trying to get

into buildings or automobiles, this shall be considering attempted breaking and entering.

52/ The crime of loitering shall be defined as lingering, remaining, or prowling on privately owned property without invitation or reason, and under circumstances that cause alarm or concern for the safety of the people or property in the vicinity. Those people loitering on private residential property and unaccompanied by an owner or tenant of that property shall subject to charges when an owner or tenant of that property complains and they do not leave, or they come back. This shall especially apply to all residential lobbies, porches, stoops, and yards.

53/ The county recorder system shall have a GPS map service that locates people and lets them know whether they are on private property or public property.

54/ Where no sidewalk exists, people still have the right to walk on either the edge of the street, or on the edge of private property. Also, people cannot fence their property directly up to the street, they must leave at least 3 m for people to walk.

55/ Different rules for trespassing may apply:

a/ After dark.

b/ Where people are shouting out and announcing their presence.

c/ For service people, fire, police, recorder, family, and friends.

56/ Due to the reapportionment, government shall no longer be allowed to provide individual housing or housing vouchers as public aid. Government may only provide shared 50-person same-sex dormitories, and 4-family mommy dorms as public aid. Also, all mommy dorms are built adjacent to the schools, so the children can come and go as they like to their family's corner. We will always have plenty of bunks.

57/ It shall be a crime to trespass or attempt to trespass people anywhere either on public property, or in a place that invites all comers for commercial gatherings or marketplaces of any sort. The white elephant that nobody can touch is when they are only handing out flyers and thumb drives and showing screen presentations, and talking to people about non-commercial political or societal information. The only exceptions are where people are eating at a table in public. If they are eating at a table, every form of tout including political touts shall be required to leave them alone. But aside from people dining at tables, all forms of political sharing shall be regarded as a total and forever sort of white elephant that nobody dares touch, or get in the way of. This, out of respect for the truth and their freedoms.

58/ Private security guards and police shall be expected to never approach any political speakers, except to rescue them, or ask if they need help. In fact, all private security guards and police shall be expected to protect all political speakers in the same way they would protect women from men forcing themselves on them. And never should they say anything even remotely directing or threatening or authoritarian to people who are sharing political information.

59/ It shall not be possible to trespass people outdoors on public property that is not 100% fenced with permanent fences or a water barrier, and with entry controls such as we see on military bases or doorman/receptionist government office buildings.

60/ The rules of heckling shall definitely apply in Senate

proceedings.

61/ By default all public lands shall be open to the people rather than closed to them.

62/ Trespassing shall never be a felony. It's only a basic misdemeanor and people generally can't be jailed for it. They can only be fined.

NR'83. NATURE AND INDIAN RESERVES

1/ No land shall be set aside as closed human-free habitat for more than 10 years in a century, nor more than 2 years in a decade.

2/ There shall be no fees or permits to visit or access any public facility, museum, park or nature area in the nation.

3/ If the nation's richest, cleanest, and easiest to exploit deposit of any mineral is discovered in a habitat area, or natural park, then the Over-Senate shall weigh the costs and benefits of keeping that particular patch of land as parkland, or substituting another with similar surface characteristics.

4/ All nature reserves shall have at least one lodging and visitor village of sufficient size to facilitate use by the people.

5/ The Senate shall build rail-accessed, non-industrial townships in the nation's most beautiful places including some national park locations.

6/ Only the national government may eliminate protection for national parkland. The counties shall manage all former state parks in their jurisdiction.

7/ All special laws, citizenship, and jurisdictions for the descendants of the indigenous peoples are hereby abolished and void. All tribal land ownership rights shall be converted to 70-year pre-paid leases for that tribe. All shall be under the jurisdiction of the county or counties they are located in. All such lands shall be held in common by the tribe unless a majority of the tribe opts for dissolution and partition of tribal property.

8/ All rural land shall permit the sale of vegetables, grain, and meats, provided there is a safe approach and drive-away zone from the road.

9/ It shall no longer be against the law to pull off on the side of the road in a national park. Indeed the park service shall facilitate this by providing ample paved and unpaved shoulders at our national parks. If this results in not enough roads and parking, the park service shall make enough. Also, all national parks must have their roads and parking expanded until they are at capacity for no more than 30 days a year in peak period.

10/ All national park service staff and all fish and game officers that were in the top half for the number of citations issued in the past 3-years shall all be fired and banned from government service.

11/ Regarding all national parks and national wilderness areas in the nation:

a/ All citizens shall have the right to carry a special public carry firearms loaded with registered bullets if there are bears, mountain lions, alligators/crocodiles, or illegal border crossers, or border desperados, or border gangsters, or people repeatedly go missing.

b/ All citizens shall have the right to enter the main drive-through portions of our national parks and wilderness areas free of charge and day park. However overnight parking,

wilderness camping, and township sites shall be each charged at the rates set by the national Senate. Also, there is supposed to always be an abundance of remote township sites To encourage this abundance the government is going to give away the best sites for townships in our national parks that get subscribed and placed with over 5,000 units. Except for the top 1,000 most desirable of these sites, they are all going to be given away for free to every citizen that places a unit.

c/ All of the national park areas with townships shall be serviced by rail and a permit only and emergency backup roads. All the hotels, stores, ranger stations, and apartments will go in the townships and there will be rental income to the national treasury for this.

d/ We conceive of our national park townships as having tall walls (with exits to the surrounds after changing into/out-of sanitary hiking shoes). and the only way in or out for almost everyone is a raised or enclosed rail viaduct. And maybe there are 8 townships on that rail line, each with 25,000 people, So this is 200,000 people sharing the cost of building the rail system from the interchange.

e/ The national government shall come up with designs for a park service campground centers. One of of these designs will be for RV parking and have RV hookups. It will also have a food store and good coverage for people to buy their RV parking with free utilities online directly from the treasury. The other design is for people who are camping out of vehicles. These get patios with edge hooks. There is a men's group toilet, a women's group toilet, A men's shower area with midsections covered by walls, A woman's shower area with midsections covered by walls. A campground food store, a couple of food hawkers, swings, slides, and glass on 2-sides day care, and a parking fee machine.

f/ Our national parks shall also have a large number of nearly free (15 minute's wages) bunk bed dormitories, where 50 people share a sleeping dorm together. There are Padlock lockers and recorder system video and ID key cards to get in. These dorms will be oriented towards young adult summer vacationers who don't have vehicles and can't afford camping equipment. Other dorms will be totally free but far away from our vacation hotspots but on government wild land and oriented to homeless people.

g/ To reduce traffic congestion, the national Park service shall operate a network of 2m free trains between the township stations in the national parks and various scattered wilderness access points.

h/ We will start making these facilities slowly and refine our designs. Then we will have perhaps 10 prototypes for each design. Then we will make 100, then perhaps a second 100. Then we will make the other 10,000 micro campgrounds which may be clustered around water sources and sewer lines.

12/ The national Park service shall have no jurisdiction over regulating continued farming in any area. The national Park service shall only have jurisdiction inside national parks for nonagricultural areas. Also, the NPS shall not have any jurisdiction at all outside national parks or over the paved roads passing through national parks, except to regulate speed limits and unsafe driving practices in a normal way for middle of nowhere roads. National Park Rangers shall be

governed by the same rules as police, and they shall have no special rights beyond ordinary police, however, they shall have no jurisdiction outside of a national park. Also, all national parks shall have at least 6 entrances that are open every day of the year where ice is not a problem. No national park shall charge for entry, or charge for wilderness passes, or mandatory guided tours. All shall be open year-round unless they're just completely impassible. All shall have sufficient lodging inside and outside the parks to meet demand.

13/ Regarding the new rangers, 20% of rangers shall have grown up on a farm. 20% shall be experienced hunters. 20% shall be experienced fishermen, 20% shall be retired police. And 20% shall be landscapers that keep the trails in good shape.

14/ We shall build monorails with splines over large parts of our national parks system, and many other hill locations. These will use 1meter tall, 30cm I-beams and they will use the height of the beam and traction splines to give stability to the transport bed that rolls on top of the monorail. This will transport heavy, slow moving loads that are up to perhaps 3m (10ft) wide. Thus we will conquer much more of our environment for potential human use.

15/ The Entire buildable highlands area from Cleveland National Forrest and Anza Borrego Desert State Park to the south, and the San Jacinto wilderness to the north shall be available for homes and townships, even though this land is still on the violent pacific plate.

16/ Given this immense amount of erosion that occurred in the Grand Canyon, and the large closed areas, the floodway is probably full of gold. The Grand Canyon shall now also be known by its Indian name: Kaibab, or the Inverted Mountain(s). Kaibab does not mean mountain lying down, it means inverted mountain in Paiute. Also, this tribe does not seem to be the Paiute Indians, but the Kaiute Indians. The overabundance of Paiute mentions in "Western" media makes one think that someone is modifying the problematic word from Kaiute to Paiute. Also, clearly, Ishtar is a Kaibab, an inverted mountain, and the myth of Mohammed and the mountain is about a Kaibab or an inverted mountain.

17/ The beautiful Kaibab national Forest area and parts of the Grand Canyon shall now be made open for new rail based townships construction. In fact, Also, all of the pristine highlands in Arizona and the entire rest of the country shall permit rail-based township development, with no area off limits to a small self-contained rail-based township in the middle of the mountain wilderness. The entire green area around the Kaibab forest, both the north rim and the south rim of the Grand Canyon shall be made available for township development. And likewise with all the green areas heading up towards Salt Lake City, including Brice, Zion park, Grand Canyon and all the other parks, but not including places that are visible from the most visited parts of the parks. Also, from now on, energy saving rail lines and rail based townships shall not count as ruining a view, in much the same way that ugly solar farms and windmills didn't previously count as ruining a view.

18/ National Park areas cannot close, except when the roads are are impassible and when the roads are being repaved.

And then only for the maximum of maybe 30 days in 10 years, while there are workers doing the repaving work.

19/ Regarding all government owned ports and marinas and national park hospitality areas, and government owned truck stops, hotel zones, camp sites, and other commercial areas owned by government, these places must be divided for either long term leases or nightly rentals and then put out for bids on the county recorder system's leases for bid area.

These leased on 20-year transferrable, multi-re-sellable leases. All the housing and hotels in the national parks, and all the camping must be around a township rail stop, with no road vehicles involved. All existing leases longer than 10 years shall be converted to 10-year leases.

20/ There shall be a new dam below where the Green river joins the Colorado river. Then The entire Island in the Sky district will have water. Over 120km up on each river.

21/ We shall dam up the San Juan river just below Medicine Hat, and use the water all around the Bluff valley in southeast Utah. So there will be room for many more settlers here.

22/ We shall stop wasting water on simulated floods for some imagined benefit to the Grand Canyon ecosystem.

The eco system of the Grand canyon must surely be quite flexible, surviving total multi-year droughts, and getting hundred of times more water.

23/ The 20km island between the Colorado river and the San Juan river shall be for human settlements. The Rincon loop shall be irrigated and made into an oasis, including perhaps the Mesa in the middle as well as the canyon rim all around

24/ It appears that both the Glen Canyon dam and Hoover Dam can be up to perhaps 30m higher. We shall investigate how much this will cost and how much more rainy season water can be impounded into the dry season. Also, perhaps we will run both lakes as 80% for annual impounding and 20% for water reserves. So 60% of the annual flow will be cheap, then later in the summer another 10% will be moderately priced and then 10 % will be expensive and 20% carried over to the next year.

25/ The trails in our national parks shall be routed by the various counties and shall be in the density range defined by the national Senate.

26/ Each national park with over 500,000 visitors a years shall operate its own loop busses and rail lines, and if there is more than one bus route, then at the convergence will go the tourist town with hotels and longer stay rentals. And also with plenty of bunk-hostels and outdoor camping areas. And at the center will go the grocery stores and much of the overage of hawker stalls, so many that at least 1/3 are always vacant. This overage in the number of stalls is key to making sure that the park restaurants are all offering food at a low cost. The only requirement is that each is manned throughout the entire high season. And many of the remote spots will have hostel beds, crash cells and even hotel rooms, as well as lots of camp sites and RV sites in places al over our national parks. With everyone in the parks on septic tanks.

NR'84. SPECIES PROTECTION AND HABITAT

1/ The world's precious few fresh water rivers, and especially the rivers in dry areas that need the water. These shall always be thought to belong entirely to man, and where men

need the water, there shall be no cries about animal habitat, or animals harmed by their river going dry or a dam being built. All toilet waste, waste water, and all industrial area runoff must use the waste water discharge system so that no harmful runoff enters the fresh water system.

2/ Animals are zoologically organized by kingdom, phylum, class, order, family, genus, species, and sub-species. For all Government legislation concerning the genetic diversity of the biome:

a/ The definition of a species shall be a gene group of living organisms that is capable producing non-sterile descendants in the wild. If they can breed together, and produce viable offspring, they shall not be a separate species under the law, but mere cosmetic variations of the same species, or a sub-species, like the various races and colorations of people, dogs, and cats.

b/ The definition of a sub-species shall be a subdivision, or a specific variety of a genus.

c/ All endangered species protections by Government and all others in the nation shall use the population of the species, and not those of sub-species varieties.

d/ The Senate may elect to grant protection for various species varieties by single vote. However, this shall not be granted for mere coloration, or behavioral variations.

e/ Only the Knowledge Sluice of the national Main-Senate shall have the power to determine what a species is and to set endangerment levels for various species.

3/ The Senate shall quantify the number of genera on earth, and the number of genera that have gone extinct in each of the past 50 decades.

4/ Given how the prior narrow democracy was corrupted by a parasite that struggled to hide our nation's wealth of resources, all wildlife habitat, parklands, nature reserves, and all other protected areas shall be perforated and re-evaluated by the Senate as to whether or not they will stay protected or be developed into mineral lands.

5/ The Senate shall cancel the status of at least 20% of the nation's parkland and nature reserves. From now on the most beautiful parts of our nation shall be zoned for rail-based townships with wildlife walls around them and their access roads and railways. Raised viaducts shall be considered walled for this purpose.

6/ Species protection laws shall not apply when while animals stray into urban or suburban areas. However, all communities are supposed to have animal walls around them, with projecting pairs of walls for some miles for all the roads entering the community.

7/ Where fast growing communities lack sufficient land area due to adjacent parkland, nature reserve, or military base, the Senate shall close down the most useful portions of that parkland and sell it off for use for human communities.

8/ There is little point in protecting habitat that is in any zone that:

a/ Is in any holocene tsunami flood zone, or holocene volcanic eruption area.

b/ Will be covered in a glacier when the Holocene interglacial era ends and the next ice age begins.

9/ All existing Government prohibitions against human interaction with dolphins and other marine mammals (such as petting them, or brushing them with a push broom, or

removing barnacles using proper techniques shall be void.

10/ No national park, nature reserve, or Government owned wild lands shall ever be completely closed to human entry by law. All such closures shall only be advisory.

Except for fenced reservoirs, All portions of our nation's national parks and nature reserves and public lands waterways shall be open for the people to hike on, and explore. It shall be thought vital that all portions of the nation be open to exploration and non-invasive prospecting so that our nation's true mineral wealth can be discovered.

11/ Game rangers shall be responsible for protecting wildlife from poaching, illegal taking and fire hazards. They may also intervene to prevent park users from harming each other. In general, game rangers shall not be allowed to approach or question hikers unless they have evidence of wrong-doing. However, they may ask for ID. And the various remote parts of the national parks will require people to verify ID to enter and the people in these areas will be able to look up the photos and facebook pages of all the people in their neck of the woods.

12/ The Senate shall cull many predators to between 1/2 and 1/8 of their natural levels. This will reduce foods stress and help assure that the predators don't start eating people. The Senate shall also be free to eliminate all dangerous predator species from the wild in certain areas.

13/ Everyone using a public wild area, a national park, or nature reserve area shall be required to use a telescreen so their location can be tracked. There shall also a mesh network function for seen on the trail where everyone sees the ID of all the people they have crossed paths with on their hiking. This also gives people the ability to call for help to nearby hikers if they get injured. Also, to begin with. all park areas and hiking areas and wilderness areas with over 100 visitors a day shall be required to have data coverage. Later the Senate shall lower the threshold.

14/ The Senate is supposed to take the most beautiful township sites in the nation and make them available for use by everyone. Many of these "park-town" township locations will be in national parks, hence the appellation "park-town". But none should be inside any well publicized view anywhere.

15/ The world should replicate the beautiful cliff-hanging walkway in the Huangshan mountains of Anhui province China.

16/ We shall have some bee free zones in our deserts and on some islands for people to grow seedless and unfertilized fruit. The seeds really don't matter because all this sort of fruit is grown with cuttings spliced onto root stock, and the seeds of this kind of fruit will not turn into a tree that produces the same sort of delicious fruit.

17/ No form of cattle, pig, sheep, goat, bovine, canine, feline, chicken, turkey, quail, pigeon, or insect shall be subject to species protection, or habitat requirements.

16/ No species (plant or animal) introduced by man shall ever have any protections in any area it was introduced to by man. For example there shall be no regulation of cutting down eucalyptus trees anywhere in North America, because all these trees were introduce by man from Australia.

18/ There shall be no government protections for migratory bird habitat. It shall no longer be allowed to have special wild habit lands for migratory birds. This is because the birds will

simply fly somewhere else that they feel is safer and nicer. All existing migratory bird habitat status is hereby cancelled.

19/ The Senate shall establish clear, numerate, logical easy to follow new rules, so everyone can quickly figure out when a species is endangered, and where we have a non-endangered species.

20/ Tree spiking can be considered attempted murder of loggers.

21/ The Senate shall produce a detailed national map that centers on the user. This map shall show where and when fishing and hunting are allowed nearby and where they are not allowed, and what the take is.

22/ Where people merely are trying to pet and get close to protected animals, the fines shall not be high, and the crimes never more than low-end misdemeanors.

23/ Regarding the National Park service:

a/ Neither the agency, nor the people working for it shall have anything to do with enlarging the system.

b/ At least half of the people working for the NPS must come from a farm.

c/ The NPS shall only have jurisdiction inside national parks and then it shall not concern itself with anything but park maintenance.

d/ All the hotels, RV parking areas, rental campsites, retail stores, grocery stores, marinas, restaurants, cafes, etc. in our parks shall be auctioned off on the government's one-and-only website for auctioning all the public property off. (Gaukt.gov). This shall include land and buildings and surplus goods. Also, when this website sells stuff off, it shall be required to use lot sizes that always err on the side of being too small. Super-human lot sizes in auctions should be regarded as a thing that reeks of corruption.

e/ All the rentals within the national parks main road areas shall be are all leased for up to 20 years, with a deposit of 1-year's rent required. All of the grocery stores shall charge 15% over their regular system-wide prices.

f/ The National Park service is supposed to fully cooperate with all of its neighbors including the people building and living in townships located inside national parks.

g/ The National Park service must accept and cooperate with new fenced rail lines and new fenced highways that pass through parks.

h/ The national highway patrol police shall enforce speed limits in all national parks.

i/ National Park rangers shall be governed by the same rules as police, and they shall have no special rules beyond those of police officers, however, they shall have no jurisdiction outside of a national park. Also, no national park ranger shall have any extremist environmental views, or have engaged in any sort of environmental terrorism in the past. All of these people shall be considered unfit to be Park Rangers.

24/ All wilderness parks and all unfenced sections of all wilderness parks shall be open for visitors 24 hours a day, year round with no ability of park managers to close the park.

25/ It is the strangest thing the way we have to be so careful about human activity taking some species extinct. While at the same time we can't get rid of many invasive species really.

26/ No net fishing shall be allowed on fresh water except for salmon, permitted fish farming, and eliminating invasive

species, and where permitted as a regulated annual catch / harvest amount.

27/ A world where transport takes place on raised or fenced rail viaducts is a world where the entire land is habitat, except for the walled areas that 95% of humans occupy.

28/ Habitat should not be about money or land that people can use. It is about land that nobody can use except for inert walled communities served by raised or fenced rail viaduct.

NR'85. WATER, SEWER & FIRE PROJECTS

1/ Where water is scarce, it shall be sold at the same price by volume to all users according to which month the water is used in. Agricultural and industrial users shall get no discounts. To do otherwise with scarce desert water is to increase water scarcity. During times when water is being wasted on the ocean, there shall be no allocation pricing for water.

2/ Government shall help assure that the nation's fresh water assets are not squandered, or spilled into the oceans or brackish areas, benefitting nobody. To the maximum extent reasonably possible all soon-to-wast river water shall be redirected by the public wheel to good dry lands where it is needed.

3/ The need of humanity to use the world's fresh water shall come before the needs of wild animals living in river outfall habitats. If need be, we will build artificial habitats with artificial watering troughs for these animals. Government shall not compel that any valuable fresh water be used to preserve any river outfall habitats.

4/ In areas with a water shortage, Government may prohibit the growing of certain thirsty crops by means of irrigation. It may also restrict and ration agricultural water in other ways. Government may also tax all water use at the same rate per hundred cubic meters. Government may also charge different taxes for water depending on what plants it is being used to grow. Other than this, government shall have no control over what food crops farmers can grow or otherwise incentivize one crop over another. Government shall have no right to limit the water used by urban and residential and commercial uses, so long as there is any water being used for irrigation, agricultural first and urban second. Only after all the water use for farm uses has been cut shall the water for commercial uses and residential uses, be cut, unless that is to water lawns. During water shortages, Government may easily prohibit the use of water for golf courses and lawns, because the grass will grow right back. Gray-water may however be used. Government shall not be allowed to regulate the washing of personal and family vehicles, except that it may require the water be symbolically turned off in between wetting the vehicle for soap, and rinsing it off. All the especially soapy waste from car washes shall be transported all the way to the ocean via pipe.

5/ Except for freshly imported species of plants, government shall not dictate how and when people plant seeds or irrigate their crops, or which species they may plant or how much land they may plant. Government may, however, mandate reasonable fallow intervals, where this is needed, and where this is agreed-to by the farmers living in the area. Government shall not regulate fertilizer use, except near

rivers and places where it is washing into drinking watersheds. Except in a global climate emergency like the next Tamboura-like volcano eruption, government shall not have the ability to curtail fertilizer use by more than 2% in any year, nor shall it reduce oil output by more than 2% in a year.

6/ Nations get into big trouble when there aren't enough farmers. It is much easier to ramp up output in a crisis if we have lots of small farmers we can turn into large farmers by adding some land and some equipment. So to help have lots of small farms and farmers around, we shall give some advantages to small farms under 1,280 acres, advantages like:

a/ We will charge a 10% income tax on all the farms over 1,280 acres.

b/ We shall have greatly streamlined farm compliance for farms under 640, and 1,280 acres.

c/ We train people, and finance people so they can rent farmland and go into farming.

7/ All water allocations and water rights under the old system shall be recorded and tabulated by each county recorder. Where agricultural users intend to use their water, they must declare that fact in advance, and pay the appropriate water allocation tax if any. They must do this before the wet season, so all the water can be used, none will be wasted, and no fields will get wasted for lack of water.

8/ Regarding water and runoff:

a/ Government shall be prohibited from mandating that any water at all be squandered on saltish habitats, or giant dry area lakes, as this is surely a fools errand of OPEC and its corrupt lawmakers.

b/ All water rights that have been going for several years unused or under used, or used to grow alfalfa or rice in the desert shall be nationalized.

c/ All water rights owned by foreigners and fictional citizens shall be nationalized.

d/ All reasonably sized water rights owned by small sized and medium sized citizen farmers shall remain the property of those farmers.

e/ All water rights under the old system shall be re-evaluated by the Senate, and shall be subject to total or partial cancellation if the Senate finds this just.

f/ Nobody shall keep water rights where they don't have enough land to use these.

g/ Water rights shall not exist apart from property rights. Also, only if someone has both land and needed water rights, may they sell the water rights.

h/ Government shall not regulate the superficial capture of reasonable amounts of surface water for farming less than 10 acres.

i/ Government shall not allow intensive livestock farming in upstream areas next to fresh water, where the excrement will pollute the water system.

9/ Government shall protect all stable underground aquifers that will not rapidly dry out if there is a multi-year period without rain. All existing rights to use stable underground aquifers shall be subject to cancellation. However, this shall not apply to underground aquifers that will dry up in one year and underground aquifers not currently being depleted by use.

10/ During droughts, and whenever urban water users all

being told to cut back on water use, both agricultural and urban users shall pay the same rate by volume for water in each region. This rate shall be raised in order to balance supply with demand.

11/ Where and when there is a genuine shortage of water, the Senate may impose reasonable allocative taxes and water use rules with regard to the use of river, aquifer, and well water.

12/ Nobody shall be allowed to buy up any self-replenishing water rights and either not use them, or squander them.

13/ Where water replenishing itself on a yearly or nearly yearly basis, and it doesn't take centuries or millennia for the water to accumulate in that location. This water may be freely used and sold for growing optimal crops. Where the water is otherwise going to waste, and there's plenty of water, nobody shall ever be charged for using the water. Only where there's not enough water for everyone to use should this water be taxed to balance supply with demand. Also, where people buy/own water rights that are being wasted, they shall not be allowed to exclude others from using the water they don't use, if the others have a good use for the water and they do not. And if there are multiple people who can use the water, the Senate shall judge which use is best. They shall also not be allowed to pollute agricultural water, particularly agricultural water in deserts and dry areas.

14/ All of the high elevation water of the Rio Grande and Colorado rivers shall be put in pipes as high up as practical to reduce seepage and evaporation of the precious water—and also to generate electricity to propel the water to where it can be used to produce the most food. Also, the Rio Grand's water shall be regarded as more of an urban and industrial resource rather than an agricultural resource, although the surplus may be used for agricultural purposes.

15/ We shall examine all the dams in our nation looking for dams that can be made bigger. We shall also look for other catchment locations, particularly underground water impounding locations so we can better balance wet and dry season needs. Near White Rock overlook and Los Alamos National Laboratory (elev.1700m) is a good location for a dam because of its elevation. The Pecos shall have a water impounding dam near Iraan Texas at ~680m. There might be several deep and slow-evaporating impounding dams on the Rio Grande near the Big Bend area (elev. 800m).

16/ Hoover dam, Theodore Roosevelt dam, Lake Mead and many other desert dams shall be treated exclusively as water resources, not energy resources. Also Lake Mead shall be a bit deeper and used to impound water for seasonal consumption.

17/ It is the strangest thing the way the Canadian River has the name it does, given the way it is nowhere near Canada. But the name "Canadian River" is the perfect name for blocking understanding of how this river, which is about 130 miles northeast of the Pecos River (and about 1,000 ft above it) can be diverted into either the Pecos region, or the dustbowl area for no energy inputs. Also, the name Dustbowl is a misnomer, because this area only occasionally only lacks water from rain. Thus when we need water, we will divert it from the Pecos system into the so-called dustbowl area, and at other times, the water goes into the Pecos River for use in the Pecos desert. The Canadian River incidentally has

almost 23 times the water of the Pecos.

We might build a large airtight pipe from the Canadian River, down the Pecos and settle people on the "shores" of the Pecos if it is feasible.

18/ The Canadian River, the Arkansas River, the Platte Rivers, and some smaller rivers in between shall all be captured in mini reservoirs as high as possible and then put in hydro-electric pipes. Then these pipes shall be forked and run eastbound roughly 100km apart towards the Missouri River or one of its tributaries.

19/ To the maximum extent possible, we shall use all of Colorado's mountain water in the surrounding dry areas to create a D'an•ver a real new beginning for these dry regions. If feasible, we shall divert the upper Arkansas River, curiously named the "Texas Creek" into the Rio grande basin by means of a tunnel and cut at around 2,800m elevation near the northwest corner of the San Isabel National Forest. We shall run an inverted high pressure steel pipe via Poncha Springs, with a low-point at around 2,400 meters.

20/ The 5 west Texas rivers, the Canadian, the Red, Brazos, the Texas Colorado, and the Rio Grande shall all be renamed as follows:

- a/ Panhandle river (was Canadian, confusing),
- b/ Oklahoma river (was a duplicate Red River),
- c/ Waco river (Brazos is easy to confuse with Rio Bravo an alternate name for the Rio Grande)
- d/ The Austin river (was a duplicate Colorado river)
- e/ The New Mexico river (was Rio Grande but it isn't a big river)

All of the above rivers shall be used for irrigation water as they come off the Rocky mountains and the neighboring highlands. No portion of their water shall be allowed to flow out of where there isn't usually quite enough water, and flow into places where there is more than enough water. The South Platte River shall be used entirely for irrigation projects in Eastern Colorado. The un-diverted portions of the Arkansas River shall be used entirely in East Colorado and west Kansas. The Canadian River, the Red River, the Brazos River, and the Texas Colorado River shall not be allowed to flow from where water is scarce into areas where it is abundant, except in during times of flooding.

21/ The national government shall provide irrigation infrastructure for moving water to irrigate the "dust bowl" lands that are a bit too dry to grow crops. These are areas that fail occasionally in some years without irrigation. Also, these areas shall generally not be heavily resourced so as to conserve their soil.

22/ The Dust Bowl area was centered roughly on the Oklahoma panhandle. And depending on the definition, it was an area almost the size of Kansas and Oklahoma combined. Great attention should be focused on how this once very productive area was removed from our nation's farmland inventory. It should be noted that the confusingly named Canadian River runs right through the Oklahoma panhandle, thus making it harder to understand projects to utilize this water either in Texas or Kansas. Instead the water flows from dry western Oklahoma (where it is needed to bring a large swath of land into production, to wet eastern Oklahoma where it is not needed. Then the water of the "Canadian" river flows totally wasted into the ocean. Wherever we have

panhandles and kooky-shaped borders, we should look for some valuable resource that is being hidden. For example, the Idaho panhandle has 3 big lakes, and several large rivers such as the Snake river, the Salmon river, the Saint Joe river, the Clark fork of the Spokane river, the Coeur d'Alene river (the heart of an awl river which is on the I-90 route that pokes through the mountains between Montana and Spokane). Why are all these water resources jurisdictionally separated from the dry areas of eastern Washington state and western Montana? Thus we see that panhandles only makes our nation's water assets harder to develop. Also, wherever we have names like Slovenia and Slovakia, Austria and Australia we should also look for something being hidden.

23/ This Dustbowl area shall no longer be thought of an example of an area that mother nature has reclaimed from foolish humanity building houses on the sand of a shoreline. Instead it shall be viewed as yet another example of any reasonable excuse being used to remove land and resources from use.

24/ The Dustbowl areas shall also be thought of as a laboratory for us to learn how to cope with the effects of variable rainfall on agricultural output. Here we shall build water movement trunk lines from Colorado's eastern rivers, and then we have mid-sized lines to the various areas, and also systems to irrigate some crops. But the entire dustbowl area shall be brought back into production by government through land leases, the construction of irrigation trunk lines and mid-sized pipes, roads, railroads, power, and other systems. All the areas around the National Grasslands of Kiowa, Rita Blanca, Cimarron, and Comanche shall be used for farming once again.

25/ None of the water of the Little Colorado River (now renamed the Navajo River) should be flowing into the main Colorado River (except perhaps in the wettest year in 10). All of this water should be used before it reaches the main Colorado River.

26/ The Columbia River watershed, and its tributary, the Snake River, with a combined flow of 2.6 Niles of water shall have a system that uses pipe hydro-electric systems for its upper tributaries, and water catchment dams as high as practical. Also, the deep, narrow, high elevation channels of the Snake River make it ideal for water and energy storage. There are many beautiful green flat valleys east of Highway I-5 in Oregon. These valleys shall all have rail access to the railroad that runs near highway I-5. This area shall include the western slope of the coastal mountains, and the parts is near Klamath Falls, Sunriver, Bend, Madras, Diablo mountain, Hart mountain, and perhaps as far east as Plush, Oregon. Eastern Idaho is one of the most perfect places in America has for irrigated farming. It's perfect because of all the water we dump on the surface over 90% of it just goes right back into the water table and gets recovered downstream. So this is about one of the most perfect places we have were using our water and building the green surface area of our planet, so that it sequesters more carbon if you believe in that junk, but if you believe in it, you should want to have the area of our planet that is green maximized. And if you happen to be sympathetic to the poor people of the world, this is another thing you want to do. But instead, we have officials turning this place this wonderful place into a

toxic cobalt mine. That is not usable for growing food going forward if we pollute it. So why are we trading Eastern Idaho for a cobalt poisoned area? I tell you. It's because our government people are corrupt, and they have been corrupted by foreign interest that hate us that want us not to succeed, so that we are more reliant on their imports. It's all the countries that are crazy about exporting to us and selling us their stuff for nothing. Do you think they're getting the better part of this deal? Or are they trying to eliminate us again? With their latest front Empire.

27/ It shall be the official policy of our nation that no water from the snake river should be allowed to enter the Columbia river, which is way too much water for anybody to use. Zero water from the snake river the Columbia river. To this end, there shall be a new dam at the northeast end of Register Road, American Falls, and the reservoir raised to around 1355m from 1324m. This will result in about a 10 fold increase in seasonal water storage capacity. Also, there shall be new large dams:

a/ Near twin sisters on the Columbia river near lake Wallula.

b/ West of Benton city

x/ All around the lake Columbia area, on the Columbia river will go a lot of high energy computer activity, such as AI and server Farms, due to all the hydro-electric power available.

28/ Every traitorous person who has previously worked to dismantle the snake River hydroelectric dams in the ridiculous name of helping salmon (which already have perfectly good fish ladders,), or voted in favor of this completely irrational and unconscionable dismantling of our nations hydroelectric infrastructure (on behalf of OPEC) shall be tried for felony treason. If they are found guilty, they shall imprisoned as a traitor in a work camp for the rest of their days. Let this stand as a warning for all the traitors and useful idiots, that if they harm our nation in the name of anything, including ecology, they may lose their freedom for the rest of their lives. In our nation, our government builds things. And we only dismantle things when they're broken or no longer working. We never take perfectly good equipment and destroy it in the name of some foolish reason and those that go backwards like this: It shall be very easy to consider them traitors and lock them up for the rest of their worthless lives

29/ There shall be no discharging of mineral processing water into any river, or into any river watershed All must be either directly discharge offshore in the ocean in a location that is not commonly harvested for fish, or discharged into a low place where there is no runoff.

30/ Stable groundwater shall not be used for mineral extraction. Stable groundwater is precious in the event of global drought. Also, it is a problem where the refined materials get back into the watershed water table and cause pollution that prevents the water from being used for farming. Therefore, our preference should be that the waste water courses directly into the ocean and not via any river.

31/ There shall be no mining of water intensive minerals in areas that need the water to grow food. There's plenty of areas that are too dry for crops where the minerals can be transported to the refinery area.

32/ It shall no longer be possible for fictional citizens to own mineral rights or water rights separated from land rights. All existing mineral and water right owned by fictional citizens

shall be nationalized. Fictional citizens may however lease mineral rights for a time no longer than 20 years and water rights for a time no longer than 10-years and then only when they must build out significant irrigation systems.

33/ Chemical companies shall not be allowed to engage in mining or mineral refinement, or petroleum refining.

34/ The Senate shall study how and under what conditions it is worth damming up some rivers for nutrient settlement purposes, meaning that we use our dams as a way to generate fertilizer soils to replace soil's lost to erosion. Maybe we should be doing this with the Mississippi for fertilizer for the drier. poorer areas to the west. There shall be no environmental impact reporting for harvesting alluvial soil. The water entering the oceans shall be considered totally wasted, even though it produces some limited sea life.

35/ Lake Isabella (766m) shall be expanded until it can hold all the water from the wettest 9 of 10 years. The Kern River shall be put in pipes starting at Lake Isabella. Some of the rivers flowing into Lake Isabella shall be damed higher up and the water sent via inverted siphon and tunnel into the China Lake area / California City area. Also, there is a point on the eastern Kern River at about 2,300m that can be let into the valley to the east with a tunnel that is less than 3km long. This shall be done to bring precious water to a desert area with no water.

36/ The various tributaries of the Owens River shall be put in pipes starting at Lake Crowley, which should be enlarged. Owens Lake shall remain entirely bypassed except for temporary water impounding.

37/ "Baker's field" shall be renamed Kern. And the upper Kern River shall have a western and eastern fork. Lake Isabel shall be renamed as Kern Lake. Kern Lake shall have multiple basins. Pine Flat Lake shall be greatly enlarged and renamed as Kings River Lake.

38/ The the San Joaquin River (the main river between the Kern River and San Francisco bay) shall be renamed as the California River. The San Joaquin valley shall now be the California Valley, north and south of San Francisco bay (California bay). The California River shall have two forks, north and south. The Fresno River shall be the Madera River. The Mokelumne River, Dry Creek/ Sutter Creek, and the Cosumnes Rivers, with their confusing names and confusingly located Middle fork shall be renamed as North Lode River, Middle Lode River, and South Lode River. The American River shall be renamed the Sacramento River, and its northern fork shall be the Auburn River. Apparently someone wanted to muddle the names of the rivers in this place to keep the gold hidden.

39/ The flattish and gently sloping areas of the Eastern slope of the California Valley at elevations between 600 to 2500 meters shall be generally open for construction of townships. Also, the many pretty places for towns in and around the California mountains shall generally be open for construction of townships. As normal, at least 10% of the prettiest, most accessible lands with the nicest views and the nicest climate, and with the lowest possibility of landslide or flooding shall be reserved for townships.

40/ We shall have a Lake Tahoe right City as a model for other places. there is a ring railroad around the lake, with many townships up in the hills a safe distance above the lake,

but none along the axis of past sloshing visible from the topography.

41/ None of the fresh water from the Truckee River shall go into the saltish and unusable Pyramid Lake. Also, No water from either fork of the Walker River should be flowing into the desert at all, or into too salty Walker Lake.

42/ The entire Reno basin shall be drill perforated for gold and silver. We should note how this portion of California's gold country was hidden in Nevada. Napa, Sonoma, Petaluma/Santa Rosa Valleys shall, all be drill perforated to determine how much oil is there.

43/ Technicolor topographic maps make it is easy to see the erosion of where Lake Tahoe and Portola Lake regularly overflowed to the west due to earthquakes. The erosion is obvious from the topography. We should be drilling the alluvial areas where this floodwater enters the waterways below for gold concentration, like the flat Yosemite valley (which has 10 steep, high energy rivers/creeks flowing into it, and thus seems to be a gold catchment area.) Also of note is:

a/ The name Yo-semite.

b/ The way this place became America's 3rd national park after its first Yellow-stone (like Yellow-metal, or golden-stone)

c/ The way Ansel Adams picked this park to be the subject of his famous nature photos.

x/ We shall drill at least 20 deep holes around the 14km Yosemite valley for gold. Especially where the rivers come in. Then we shall sluice this material looking for gold and other heavy minerals. Then we can start talking about excavating the valley for the gold and massive reservoir that we can build with a 350meter mouth (near the Wawona Tunnel), that is at 1,200m in elevation. The gold will probably pay for the dam and more. Also, perhaps we will only talk about this when gold prices strengthen up. It is totally free money for us after all.

44/ In the book Megathreats, we see a lie about Death Valley being a ridiculous place to look for gold, but it's not, and it's protected by a national park, and it's just the sort of place we would think has gold, next to the California gold country, and in consideration of all the gold mines in Nevada. Therefore we shall repeatedly drill (perforate) and trench and sluice all of the stream beds, coming off the mountains of California on both the west and east side and in California, and Nevada. We shall look for gold in all these streams to find our richest gold deposits, so that we may destroy the value of gold.

45/ We shall make a dam and increase the height of Lake Tahoe to increase our seasonal stocks of fresh water. And because the Lake's area is 496 km², if we increase its height by 100m, the result will be 50 cubic kilometers of high energy (1,900m elevation) water in a desert. This is about 5/9ths of the Nile's annual flow. This water will transform the entire Reno desert area, and it will give a climate-independent source of water for the California valley. Also, we shall increase the height of Lake Tahoe by 200m if this is practical. We should also move Truckee and all the other affected flood-zone communities. (which are all vulnerable to Lake Tahoe tsunami floods considering at the areas topology).

46/ The Portola basin is ideal for irrigated agriculture. If necessary, we might take the North Yuba and drill a tunnel to the Portola basin.

47/ The following salty eco-systems shall not get any species

or ecosystem preservation protections and shall not be preserved. The water being wasted on these places should be used elsewhere in the nearby desert to increase the green area and bio-yield from our planet.

a/ California: Eagle Lake, Honey Lake, Mono Lake, Owens Lake, Goose Lake.

b/ Nevada: Carson Lake, Carson Sink, Franklin Lake, Pyramid Lake, Ruby Lake, Walker Lake, Winnemucca Lake.

c/ Oregon Lake Albert, Harney Lake, Malheur Lake, Silver Lake, Summer Lake, Goose Lake, the Warner Lakes.

d. Utah: Sevier Lake, and the Great Salt Lake.

48/ The Eastern portion of the San Francisco bay shall be closed off at the 1.5km wide straight located near Crockett. Here we shall use a flood-gated concrete dam structure that is around 20m high, and everyone living in the flood zone shall be relocated, including both Sacramento (elev. 12m) and Stockton (elev. 8m) Over 99% of the time, this structure will remain closed and used to keep the bay's sea water out of areas to the east. However, we will also have water release valves in the dam that will enable us to drain the freshwater, Sacramento part of the bay of its toxic salt water and thus leach-out and wash-out the salt contamination from the Sacramento side. The natural accumulation of water on the Sacramento side of the dam will thus in some years entirely cleanse the Sacramento side of the dam of its salt contamination. The distance from Colusa to Patterson is some 210km, and this entire area is under 15m above sea level. Thus when Sacramento Lake is flooded, water from our new lake can be provided almost entirely by means of gravity and trenches to over 10,000 square kilometers of farmland. Also, given the San Joaquin valley floods of 1862 and 1936, we shall:

a/ Widen and dredge the "Crockett Straits" so the California Valley can drain better during storm years.

b/ Move all the people living in the Sacramento valley below the flood line. This evacuated low-lying land will enable us to impound all the California valley's runoff for irrigation and rice farming.

c/ Be able to raise/open steel plates across the entire Crockett dam to increase flow-through of flood waters.

d/ Note that the California valley is essentially a burst lake, and that the edge of this lake is probably full of gold.

49/ By constructing a 20-meter tall earthen mole near Lemoore CA, the Basin west of Corcoran California (80km south of Fresno) can be used for backup water impounding during flood years and also for rice farming. A similar thing can be done with the basins south and southwest of Bakersfield and the basin south of Mendota CA. The Bakersfield basin has the advantage of being uphill from the entire southern portion of the California Valley.

50/ If practical, the "California River" shall be shifted east towards the higher eastern edge of the flat California valley. This will enable gravity to carry the mountain runoff water to the entire valley because the western side of the valley is normally lower. Also some high land on the western edge of the valley can be irrigated by means of inverted siphons from higher collection points on the eastern side of the valley.

51/ As normal, all projects called for by this Constitution shall be excluded from all environmental regulations and all environmental impact reporting. However, where we turn

wilderness into farmland and townships and housing, 15% of the areas shall be preserved for habitat area. This however, shall include nearby slopes that are not fit for agriculture.

52/ All reservoirs in the nation in places with insufficient capacity shall be re-evaluated for expansion. All reservoirs in the nation shall be re-evaluated for flood hazard in case of dam failure.

53/ Remarks about micro water impounding are intended for places shedding perhaps a tenth of a cubic kilometer per year on average. They are not meant for property developments, or even whole townships. Government shall never require worthless nano impounding of water from anyone. There shall be no Government requirement of impounding water on private property unless it already occurs. Government shall require permits for building large ponds above others, and draining wetlands.

54/ We shall stop measuring corn by the bushel. In Thailand, one finds cob corn with kernels that are around three times the height of American kernels. This is why we must switch to measuring the net edible weight of corn instead of measuring bushels of cob corn. Corn shall not longer be measured in bushels. Instead we shall use "new bushels", which are 20KG of dry corn grain. This is to encourage a corn genome that is more kernel and less cob and husk. Also, it shall be up to the individual farmers to process their own corn into grain before sale.

55/ No family, and no citizen real or fictional, shall own more than one agricultural processing plant, or grain mill. Community-owned agricultural raw commodity processing plants and mills shall pay no tax and must distribute all profits each year back to the users.

56/ The flat well watered parts of southeast Missouri, eastern Arkansas, eastern Louisiana western Mississippi, shall all be developed into an more of an American rice bowl area where all of the land suitable for rice and other forms of flood agriculture is used for that purpose. Here we shall construct open culverts around the valley edges that use gravity to move all the water down stream and into the fields. And likewise for the following other areas:

a/ The Liberty valley of Texas (near Houston)?

b/ The Alexandria valley of Louisiana.

c/ The Mobile/Tupelo/Montgomery valley of Alabama.

d/ The Albany valley of western Florida.

e/ The Sawanee River valley near Valdosta.

f/ The Jesup valley of Georgia.

g/ The Augusta valley of Georgia.

h/ The Camden/Columbia valley in South Carolina.

i/ The Wilmington valleys in North Carolina.

j/ The Fort Smith valley in western Arkansas.

57/ At least we shall settle-out the nutrient particulates from our rivers here as much as practical. We might even mine this soil as fertilizer. Also, only Japanese varieties of white Rice shall be grown in California and only Thai Jasmine varieties of Rice shall be grown in our southern rice belt. All other types shall be prohibited. Mexico shall also grow Thai rice. In the Lake Nile Basin they shall grow only Basmati rice.

58/ If we decide that the Great Salt Lake is too much of a flood hazard, we should keep runoff from entering the lake. Overflow from the various Utah lakes should go to the area to the west. Also Logan, Pineview and Morgan valleys should

be sealed so storm water from these places doesn't enter Salt Lake. Also the dry lake bed to the west slopes towards the Great Salt Lake. The slope however is very slight and a small berm between some hills can keep the storm water from running into the lake. Utah shall now be spelled Eutah.

59/ The Virgin River shall also be dammed around St. George, and raised to around 850m elevation. Then this elevation energy will be used to propel water into the desert downstream. The dam at US 89 near Page shall be enlarged to increase seasonal water impounding capacity here at perhaps 1200m elevation.

60/ Dam(s) shall be constructed on the Green River between the White River and the town of Green River at an elevation of ~1,400m. Dams shall be built above Grand Junction Colorado, on the Gunnison River (near Delta) and Colorado River (between the towns of Palisade and Parachute). Another dam shall be constructed near Mexican hat. Another dam shall be constructed near Red Butte.

61/ All of the rivers in the Dallas, San Antonio, San Angelo, Wichita Falls, area shall be impounded as high up as practical, so that more energy can be collected, so that the water can be pumped further out into the desert where it is needed.

62/ There shall be a dam on the Ohio River near Gloconda or Big Rivers State Forrest for setting out the nutrients from the Ohio River in wet season. There shall also be other dams in the Ohio valley area for flooding the land and using water to leach toxins out of the many polluted areas of the Ohio valley area, so they are pollution safe for farming. We shall do many experiments with flooding the land and using additives as a technique for washing out industrial contaminants.

63/ The Mojave River shall be dammed on the north fork above Victorville at around 950m. There shall be another dam at Victorville. There might be another dam around Barstow and the burst lake to the northwest if the soil here is not too salty for storing water. No agricultural water should go further than Barstow. Also if the Lucerne basin isn't too salty, it can be used for water impounding.

64/ The Sea of Cortez tsunami flood zone should not have communities. This is the area centered around Yuma. Many valleys here can be terraced, to drive the seasonal floods into the ground, and also to impound some of the water. Also there is probably petroleum here.

65/ We shall build overflow dams starting about 35km upstream of Yuma. Then when the Colorado River fills, we will capture all the water before it enters the ocean. The water will be diverted, inverted siphoned, or electro-pumped back up the various valleys around this area, and perhaps also to the Phoenix valley and parts in between. We shall also do a similar thing with the flat Rio Grande valley in New Mexico, so we can drive the seasonal flood waters into the soil around the river valley for water storage and use.

66/ The Fargo valley (Northern Red River basin) shall be developed for cool weather flood farming where this is practical. The flood planes of the following nearby rivers may also be developed for riche farming: Mississippi, Missouri, Platte, Arkansas, Canadian, Red (Southern Red River), Ohio, Tennessee, and the Illinois River. Also the Columbia River near Yakima, and Kennewick. Also the Tacoma Eugene valley.

67/ The vast circulating in 3D, high-mass, salty-and-corrosive oceans shall be thought the ideal place for disposal of industrial waste water. We will try to use areas where the currents carry the dirty outfall water into the lifeless areas of the mid ocean. Senate approved evaporating pans and underground injection locations may also be allowed. This is thought better than allowing the toxic materials to linger on the thin biosphere surface of the planet, in our own own ecosphere.

68/ We shall build a national trunk wastewater pipe system that as a model for the rest of the world to follow. The lines shall be as follows:

a/ The toxic industrial water from as far as Chicago, Toronto, Cincinnati and Washington DC, we will pump out to near the tip of the Labrador peninsula.

b/ The toxic industrial water from Texas, east Mexas, and most of Mexico shall be pumped to off Puerto Vallarta peninsula where the sea currents will carry the waste across the Pacific in the highly corrosive sea water and diffuse the wast. Due to prevailing sea and air currents, the area west of Highway 200 and Southwest of Puerto Vallarta is the Mexican mainland's ideal place for dumping pollution into the ocean and for dirty industry on shore.

c/ The toxic industrial water from Southern California, Arizona, and west Mexas will be pumped to Vizcaino or where the favorable ocean currents will carry it away.

d/ The California valley shall have a waste water pipe system from Yreka to south of Bakersfield with the outfall pipe running around the north side of the bay from Novato to Petaluma to the northwest beach on the Point Reyes peninsula.

e/ The Columbia River watershed, and the Fraser River watershed, like so many other river basins around the world shall have a parallel waste water pipe system. All of our new community wastewater shall use a system like this for dealing with sewage apart from industrial and salty agricultural waste water.

f/ There shall be a very large system of wastewater discharge next to the entire Mississippi basin, so the waters of "Old Miss" remain reasonably clean. This pipe shall outfall near Venice LA, via 11 peninsular outfall points. Also, all of the wastewater from the eastern Rockies and western Appalachians flows into this huge waste-water system of America's agricultural heartland.

g/ The Rio Grand/ Pecos system shall have a parallel waste water pipe system from above Taos to the ocean.

h/ The Colorado River basin shall have a parallel waste water pipe system, so it can support communities anywhere along its route.

i/ Down the Connecticut valley from Saint Johnsbury and Montpelier with the outfall going in the ocean near Point Judith.

j/ From Belafonte past Williamsport and Harrisburg to the ocean.

k/ From Cumberland past Hagerstown to the ocean.

l/ From Covington past Roanoke to the ocean.

m/ From Marlon, to Bristol, Kingsport, Morristown, Knoxville, Chattanooga, Birmingham, and Mobile to the ocean.

69/ The national government shall test 2-pipe toilets with a flapper valve for separating unsalted very nutrient rich brown

waste from the salty yellow waste. It shall also experiment with showers that start out in salty-yellow-water-mode and later change to garden-recycling-mode. But the brown waste is supposed to be composted locally for ornamental plants and then maybe after some decades for crops. The yellow water either gets dumped in the salty oceans, or it gets used for dry season irrigation of plastic pot trees with big planting berms and salty waste water disposal heading to an already salty area.

70/ There will be many projects for carrying industrial wastewater to the ocean where it will be diffused:

71/ All national governments, all around the world should provide backbone and inter-community waste water disposal for free as a basic tax-money service. They must also cooperate with their neighboring nations where watersheds are split.

72/ Also, as much as we are going to these place for air polluting industry, we are also going to have areas that we want to minimize air polluting industry and even coal burning. This shall apply to the entire California valley along with the Los Angeles Basin and the Coastal areas of San Diego, and all the areas west and upwind from the California valley between Santa Barbara and Santa Rosa. There shall be no polluting industry and no coal burning in this area and the Vancouver to Eugene low coastal areas. However coal plants shall be allowed high up on nearby mountains at over 1800m elevation.

73/ Where practical and where the water is needed, no water shall enter the ocean. Also where practical government shall use lakes to settle-out the plant nutritious sediments from our nation's river water.

74/ All water allocations and water rights under the old system shall be reevaluated by the Senate.

75/ Fire breaks shall be seen as free. This is because they generally make the land useful and valuable, and can be leased as a result. Therefore, we re-imagine all of our nation's forests as an irregularly shaped patchwork of woodlands separated by broad firebreaks for roads, and utility lines, and land for lease. Also, we shall frequently build our new woodland townships in the middle of our fire breaks and in wide areas in our fire breaks.

76/ All of the fire prone portions of our nation shall have a fire break at least every 10 miles. These are firebreaks that are wide enough to prevent flames leaping in the strongest dryer winds ever recorded for that area. Also, the US Mexican border shall have a 2 mile wide fire and illegal immigration break. All fire breaks shall be re-planted with noncombustible plants such as cactuses, succulents, and certain crops that don't readily burn.

77/ All urban, suburban an exurban hydrants for fires and their reservoirs must be fully pressurized and full of water before any agricultural water can be used. Fires shall always get top priority over all other water uses including hospitals, which shall be expected to have stored water.

78/ Each new outdoor fire hydrant in a mid-rise or high-rise area shall have 1" quick release attachments on the top of fire hydrants so that hose drones can couple with the hydrant and pull their hose up high and spray water in through a broken window to put out fires. Also all new buildings shall have steel flag-pole inserts for the drones to broom-stick into, and

this will bear their weight while the hose fills and the drone puts out the fire.

79/ Where buildings are destroyed by flood, that area shall be off limits to future construction, including the replacement of the building damaged by the flood. As a safety measure against arson being used to acquire land, where entire communities burn to the ground, others shall not be allowed to come in and assemble large lots for real estate projects.

80/ When we imagine townships, we imagine them able to go 12-months by themselves, due to their local water and thermal storage systems. The local water storage is pumped out into surface storage and refilled whenever thermally advantageous. The design is cellular, so each cell gets cleared in each cycle. Also the various cells are of different temperatures. The water system can also be pumped into a pipe system around a township to put out forest fires through a robotic directional sprinkler system. The system might also also be used to control dust around the town, and also to chill the environment late in the day with a light simulated rainfall.

81/ Our task is not to make our wastewater safe for drinking. It is to make it safe enough to deposit miles offshore, in a valley to the deep and 100m down. The heavy stuff will fall to the sea floor and get buried. Much of the waste will be oxidized by the oceans, and carried off to sea. The stuff that floats to the surface will be helped to breakdown by sunlight.

82/ We shall have a new dam around Havasu wilderness zone for more water impounding. This will cause both Havasu and Needles to be flooded for the wet part of the year, at least. Also Parker dam should be raised for more water impounding. Then we use the Blythe and Gila basins for farming. There is also a place on the Gila River southwest of Oatman mountain that will allow for a dam and the seasonal impounding of water in the Oatman basin and Painted Rock reservoir.

83/ There are dozens of places for additional dams around Southern California. Also, many of the existing dams in Southern California would appear to allow for bigger higher dams that will impound more water.

84/ When we build damn projects, there shall be no neighborhood input and no ecological challenges based on habitat. This is because there are plenty of habitat areas, and plenty of neighborhoods. There are just not enough places to impound water, especially in the desert, especially where it's high up and being used for energy resources as well as water. It's just foolishness to have any consideration at all about ecological or local considerations of dams, and also especially where the areas below the dams are existing tsunami zones. Here in these tsunami zones there shall be zero ecological consideration. This is because everything just gets wiped out when there is a periodic tsunami. Everything in the tsunami zone shall be considered opportunistic habitat and bird habitat.

85/ Large portions of Santee can probably also be used for water impounding. Lake Hodges apparently can also be raised. Also, with all of the lowlands being evacuated, we can build earth and dams for seasonal water impounding to carry the water from the rainy season several months into the dry season, also using underground impounding, and the series of earth and dams to use the whole valleys for water impounding.

86/ Elliott Mountain near Oxnard can also apparently have a reservoir. There are many many locations for reservoirs around Southern California and many opportunities to enlarge existing reservoirs. If we're going to continue to live in Southern California on the Pacific plate, we should invest in these water impounding resources. The Valencia California basin can also be used for earthen dam impounding of water.

87/ There is another opportunity for a dam around Malibu Canyon Road south of crater camp. Like so many canyons near the ocean in Southern California. This was this valley was cut by tsunami action so nobody should live in this area where we can use this land for a reservoir. We imagine much of the runoff hitting the San Fernando Valley being pumped via some kind of inverted siphon over or through the hills, to lower elevation locations about 5 to 25 miles away from where the San Fernando Valley runoff comes from. Also, from West Hills to Burbank, all of the hillside water coming into the San Fernando Valley can apparently be diverted into the Malibu Canyon reservoir, as well as Thousand Oaks and Simi Valley. This could be a huge reservoir for seasonal water. Pumping of water from the Colorado river and other parts of California hundreds of miles from Southern California should be regarded as a fake Arab idea that was intended to increase oil use and pollution.

88/ When there are storms and fresh water is being wasted on the ocean, those upstream shall have a right to take any water they want at no charge and keep it in tanks, ponds, pools, and to flood their fields. And there shall never be any charge for taking water in these times. So we imagine a situation where people don't normally have the right to divert water from our waterways. However, in times where there is too much water and there is water being wasted in the ocean. Everybody has the right to come to take the water and divert that water at no charge. And even to go on other people's land to do this.

89/ With regard to regular food, feed crops, and other regular crops like cotton and hemp, Government shall not have the power to tell farmers what they should grow and how much, or how little they should grow. Also Government shall not have the power to tell farmers that they must buy any permits or pay any fees for grow any food, feed, tea, cotton, or hemp crops. Government can only limit the farming of drug plants and harmful plants.

H — ECONOMIC

NR'86. ANTI-MONOPOLY PROTECTIONS

1/ It shall be recognized by everyone that the short-term efficiency gains that monopolies/oligopolies brings are utterly insignificant in comparison to the huge long-term incremental cost increases and foreign market manipulations that monopolies lead to. In other words, over the medium and long term, competitive markets, are vastly more important than economies of scale. We shall not allow economies of scale to become an excuse for creating a monopoly.

2/ Ideally, there should be no monopolies or oligopolies at all that are not owned by the people. The people and their government shall be mindful of the way that only one private monopoly in one key commodity can drain the entire economy. For example, petroleum in 1973-2021.

3/ Many people grasp that monopolies/oligopolies have immense long term value to their owners. Most people fail to consider the other side, and how that value comes from the exploitation of the masses, exploitation of the people. Therefore, as far as the people are concerned, monopolies are a hugely costly thing that should be avoided, except with regard to new products. Also, monopolies are things that provide handles/controls on nation's industry for foreigners to manage our production and destroy it, so that they may replace our production. Here we need only reflect on the way that OPEC power over our oil companies was the main thing that led to the Arab Oil Embargo of 1973-1977. It is also the main thing that ruined Venezuela with its #1 largest proven oil reserves in the world to become a total political and economic failure as a nation.

4/ Government may grant monopoly rights with regard to new things, be they inventions, discoveries, authorship, development, improvements, manufacture, commercialization and the like. However, Government shall not grant or allow any privately-owned and unregulated monopoly in any other case unless it is extremely costly to do otherwise.

5/ When government grants or permits a monopoly, or market-limiting franchise for something that is not new, that

monopoly must be regulated by the Senate and be subject to the shortest terms practical and in no event longer than 17 years.

6/ Again, the benefits of industry consolidation are short-lived and small in comparison to the long term and huge cost of monopolies and oligopolies.

7/ No party shall acquire its competitors and come to have more than 20% of any county market or more than 1% of the national market as measured by sales. Companies may however grow their business above these levels.

8/ The Senate shall monitor industry consolidation in the nation. The Senate shall divide or smithereneen enterprises that grows to the point where they become capable of exerting monopoly or market power.

9/ Government shall inspect and pre-approve of every merger and business acquisition valued at over 500-years's pay including those divided into parts to circumvent this rule.

10/ Any domestic producer that makes more than 1/2 of 1% of the national supply of any common raw material may at the option of the Senate be smithereneened. The Senate may grant reasonable exemptions for uncommon raw materials.

11/ The money raised from the auctioning-off of smithereneened monopolists shall be considered fair compensation for the party that was smithereneened. As a penalty for abuse of monopoly power, government shall keep a percentage of the money raised by the smithereneening process.

12/ When government pays fat profits to a monopoly, it can be corruption.

13/ Wherever practical the Senate shall attempt to keep our nation from being dependent on imports of any essential goods that we could just as easily make here.

14/ If there is only a slight cost increase for having more plants making the product our nation needs, then the Senate shall limit plant size so the nation has a more competitive supplier ecosystem. We shall consider it fine if we have to pay a bit more for 500, or 50 national suppliers than 5, for surely the healthier supplier ecosystem will evolve faster.

15/ Wherever practical, we shall say that no essential product shall be made in less than one plant per 20-million people nationwide. Wherever practical, we shall say that no essential product shall be made in less than one plant per 5-million people nationwide. Etc.

16/ Cartel agreement shall be unenforceable. Also the Senate shall award generous rewards to those who report illegal cartel activity.

17/ The Senate shall have the right to set prices in all industries run by a monopoly, cartel, or other form of commercial or trade paradise, natural or made by government that prevents competition.

18/ When businesses and industries start doing any of the following, they start to lose their right to exist as unregulated and autonomous businesses. They also start to justify regulation and/or confiscation by the Senate and people:

a/ Limiting output to increase price.

b/ Producing an excessive share of the market for any commodity, raw material, or important component.

c/ Driving all or most competitors from the market.

d/ Taxing nearly everyone with their products.

e/ Operating without significant levels of competition.

19/ To assure the highest quality food for the best prices we

shall avoid the single kitchen cafeterias of the Ukrainians, and instead use Singapore-style management of the food production, with around 20 individually owned hawker restaurants sharing seating on a first come first serve basis.

20/ No restaurant supply company including franchise suppliers like McDonalds shall supply more than 0.2% of the nation's restaurant food. A broadly constituted market for restaurant suppliers shall be thought necessary to maintain a functioning market in this industry. And we all definitely want a properly functioning market with maximum variety and competition here in the restaurant supply industry. Also, the restaurant supply industry shall now use the general delivery system and refrigerator box droids for things that must remain cold. There will be general suppliers and specialized suppliers, and the general suppliers shall be prohibited from having any sort of exclusivity agreements or incentives where they monopolize some aspect of restaurant supply. Also, all restaurants shall be required to use at least 4 suppliers. To be clear this is in addition to the 0.5% limit above.

21/ There shall be no patents or trademarks for restaurant dishes, frozen food dishes, dry dishes, or canned food. The Egg McMuffin is 100% about abuse of corporate scale and monopoly power, and 0% about culinary advance. Also, the name McDonalds that was so carefully built on aggressive prosecution of name infringers. This name shall be prohibited as shall the name Disney. These two companies shall have to get new names in addition to whatever changes that shall be required of them. The name X shall now be Twitter again.

22/ All monopolists and oligopolists and all fictional citizens that are above the maximum sizes here in shall be broken up forthwith if this is practical. Then the human shareholders in these monopolies/ oligopolies shall get their fair share of the resulting micro companies produced by the breakup. These new micro companies shall be first managed by local people, designated by the county, not by the monopolists/oligopolists.

23/ We shall have a Rockefeller rule that all private shipping and delivery systems shall be open to all at equal cost and service levels.

NR'87. REAL ESTATE SALES

1/ The county recorder system shall have the most complete database of real estate offered for sale, or offered for lease or rent. All real estate must be listed for sale on the county recorder system for overbid for 96 hours in order to transact. Nobody shall offer or market a property for sale or lease that is not listed with a county as for sale.

2/ The county recorder system shall have the right to clone any technology or IP for presenting, organizing or searching through information about real estate and other items for sale. The county property database shall not be outdone in any way by any other database with regard to completeness of information, functionality, records access, mapping, or ease of use. All good features shall be cloned by the county recorder system.

3/ The fees for listing on the county's real estate for sale database shall be either 2 hours wages per item per day, or 10 hours wages per item per day, or 50 hours's wages per item per day, paid in advance by the owner. The more expensive listings shall get only get a better exposed, and

exclusive marketing location. To initiate a listing, a seller must pay for 4 days of listing and an inspection that costs a day's pay. The money that an owner pays for listing, marketing and inspection shall not be included in the price.

4/ The recorder's office shall sell real estate through decaying-price auctions where every day, the price is lowered by 0.1% until the property is sold. Those who start too high must pay marketing fees for longer, or lower their price faster.

5/ The charge for transaction (escrow) and title insurance shall be one half percent (0.5%) of the eventual sales price. Properties listed for sale with the recorder may be withdrawn at any time prior to receiving a valid offer, but listing fees once paid shall be non-refundable. Also, the withdraw will be seen on the property's record forever. If the seller withdraws the property after receipt of a valid offer, the withdraw fee shall be 3 percent of the offer, and this shall be paid to the party that made the offer.

6/ Only the recorder's office shall warrant or insure the title rights of property owners, and government shall be required to do this as part of its 0.5% transaction fee. The statute of limitations for making real estate title claims with the recorder shall be 3-years.

7/ To reduce underpriced sales, all real estate must be listed as for-sale on the county recorder's for-sale database for at least 4 days before a binding sales contract can be created.

8/ To reduce underpriced sales, we shall say that the listing price on the recorder's database must be within 2% of the contract price, or the listing price must be changed, and another 4-days must pass before the sale can proceed. During this 4-day period, the seller shall be free to accept other offers provided these are at least 1/2% over the previous bid. On each new accepted offer, another 4-day period starts.

9/ All county recorder's offices shall have a system where people from the public can be notified of all new listings in certain areas, or matching certain price or other parameters.

10/ The recorder's office shall use specialist building inspectors to both inspect at the property, and all government work records and survey records. These inspectors shall fill out the listing forms, locate the property on a map, link to the plat maps and surveys. They shall also find links to comparable sales. They shall do everything except enter a price, and sign the listing form, which the owner does before they do the remainder. Non-government property inspectors and listing inspectors may also be used.

11/ All owners of all real estate advertised for sale must personally come in to a recorder's office and read and sign the sales forms at the recorder's office.

12/ All sellers on the county recorder system's property for sale website must list their name and contact information for buyers that wish to contact them directly and avoid communicating with their salesperson if they are using a salesperson. Where a salesperson is being used by an owner, the county recorder system must also send notice of all offers and all communications to the owner to prevent information filtration by dishonest salespeople.

13/ All offers to buy or lease real estate property shall be made to the recorders office, and no real estate sales person shall be allowed to receive any offer to purchase. Again, this is to prevent information filtration by dishonest salespeople.

14/ No real estate sales contract shall be valid until all buyers and all sellers identify themselves at one of the county recorder's ID verification and multi-shot video witnessing rooms.

15/ The recorder shall identify parties, supply all necessary standardized forms, intake offers, validate contract signing, serve as title insurer, escrow, pro-rater, and also perhaps act as optional loan agent for relatively identical units upon request of the parties. The recorder shall also serve as arbitrator for many sorts of disputes where one side is obviously wrong.

16/ The county recorder shall maintain a list of people who register as interested property buyers in the various areas. This list shall be made available to all at no cost. This list shall include a no agents option and it shall be a crime for third party agents to contact people who have opted for no agent contact.

17/ All contracts for the sale of real shall be in the form of one verbatim-identical unmodified print document signed by both parties. This document shall be read and signed at a recorder's office. The only difference between the parts shall be the signatures, initials, dates, and thumbprints. There shall be no modifications to a real estate contract either before or after the signatures, or the contract shall be void.

18/ No contract for the purchase or sale of real property shall be valid if written in offer-counter-offer format.

19/ No real estate sales contract for a residence shall live for more than 30-days unless extended by both buyer and seller. Once the 30-days have passed, the contract shall automatically be considered expired.

20/ No real estate sales contract may be assigned without the written permission of seller. No agreement to future assignment of a real estate contracts shall be valid. In all sales contracts, the sellers shall have an inalienable right to disapprove of any and all buyer name changes, including those for misspellings.

21/ Real estate sales contracts that call for sellers to make or pay for unspecified, indeterminate, or unlimited repairs or modifications to a property shall be unenforceable. A maximum dollar amount must be stated for the cost of all seller work, or the amount shall be zero.

22/ There shall be no intellectual property rights for contracts. All contract wording may be copied freely.

23/ All real estate sold by homeowners as principals shall generally be sold as-is, and buyer-beware, without any warranty of any kind, except those granted in writing by the seller. However, all real estate sold by, or through a professional sales agent, dealer, or builder shall be sold with certain basic warranties under the law that are binding upon both the seller and the professional sales agent/ dealer/ builder. Generally it shall be presumed that the professional has a more complete and detailed understanding of the condition of the thing he is dealing in, and he shall have some liability for failing to adequately disclose the property's condition. This shall apply whether the agent/ dealer/ builder was the owner or just a party facilitating a transaction.

24/ In order to form a valid real estate sales contract, a completion date must be stated in the contract. When property is sold as land, this date shall be no more than 180-days in advance. Where property is not sold as land, this date

shall be no more than 30-days in advance. If the transaction has not been completed by the stated date, or the statutory time limit, the seller may either terminate the sales agreement unilaterally and keep all money paid by the buyer, or move ahead with the transaction and close late. However, once the statutory time limit has passed, closing shall always be at the option of the seller.

25/ Profits from real estate owned for less than 90-days shall pay a 60% income tax. Profits from real estate owned for less than 180-days shall pay a 30% income tax. Except for this anti-middleman tax, and other transaction based fees called-for herein, Government shall be prohibited from taxing the purchase or sale of real property in any way, and must generally offer real estate transaction services for 0.5%.

26/ The word realtor shall hereby be a descriptive term for anyone with a government license to broker and deal in real estate. This term shall no longer be a trademark. There shall be no trade association, industry advocacy group, labor union, lobbying group, or industry advertising association for realtors, commission salespeople, or lawyers.

27/ All buyers searching for property without a realtor or agent shall have the right to be credited 100% of the commission offered to realtors/agents representing buyers.

28/ No agency agreement for real estate shall be created except in writing, and none in writing shall live for more than 60 days. If a property is not under contract by that time, the listing agreement shall expire in its entirety.

29/ No real estate sales agency company shall have more than 50 employees. No person shall own more any portion of than one real estate sales agency company. Fictional citizens shall not operate real estate sales agency companies.

30/ All stores that use commission sales people must display that fact on all entry doors in 8cm letters, saying "Commission sales people" in clearly visible letters. It is thought that this change will both mostly end the use of commission sales people, and favor small businesses. Where there are sales contracts, all sales commissions must be disclosed on the signature pad in double the regular size of the text. Failure to disclose commissions appropriately shall be considered fraud. It shall also give the counter-party the right to cancel the transaction after the fact for up to 10-days. When the total commission on any sale exceeds one year's wages, the sales commission shall be subject to double commission sales tax. No sales commission shall be included in the stated price of anything that sold. Sales commissions shall only be stated as extra fees that is due after the sale, as has been the custom in Germany for example. Also, no escrow shall ever pay any real estate commission, but this shall be paid by either the buyer or the seller after the transaction has completed as stipulated in the contract. However, because no real estate commission agreement shall be enforceable under the law, this payment of real estate commissions shall always be optional.

31/ Supply-side marketing grows due to an arms race effect. It will function exactly the same whether we have 5-thousand workers doing it, or 5-million. Therefore, everything sold by commission sales people, or a commission listing service, or a commission auction service must pay commission sales tax of at least 33.3% on the transaction fees. This includes all real estate, automobiles, furniture, clothing and everything

else sold by commission sales people or via a commission sales listing service. Where people pay money in advance for marketing services and this fee is conditioned on a sale, a commission sales tax of at least 33.3% shall be due on the transaction fees. Where people pay money in advance for marketing services and this fee is non-refundable, no commission sales tax shall be due. Also, where commission sales tax must be paid, it must be paid by the third party intermediary, and any attempts to transfer this tax back to the principals by agreement shall be void, and may be considered fraud.

32/ The use of a realtor shall never be considered by the courts as reducing the seller's liability in any way for any real estate transaction.

33/ All agreements regarding sales commissions shall be recorded, and like all recorded documents, open for public viewing. It shall be a crime to either work as a commission sales person, or hire commission sales people without recording the agreement.

34/ No agreement to pay any sort of sales commission, or third party marketing fee, or similar payment relating to the purchase, sale, or marketing, of real estate, vehicles, or other products shall be enforceable in our nation's courts.

35/ The use of net commission agreements shall be prohibited for real estate sales.

36/ No real estate commission, or agents commission, or listing fee may be included in the stated price of a property for sale. No realtor or agent shall receive any commission for incomplete sales transactions even if this is called for in a contract. It shall be considered fraud when realtors and agents have this sort of clauses in a real estate sales contract.

37/ No offer to purchase property shall include any payment or check to escrow unless and until both parties agree to the contract.

38/ All on-site signs advertising property availability may only say "for sale", "for lease", "for rent", or "available". Then interested parties can go to the county's website. Realtors shall not be allowed to co-market their services on property signs.

39/ Brokers shall only do business in their own name.

40/ Realtors are not allowed to band together and share client information, while keeping that information secret from the public. Such activity shall be considered anti-competitive and a felony.

41/ Government and the nation's financial institutions shall be prohibited from paying commissions or fees, or similar charges when they sell or purchase real estate or businesses.

42/ There shall be no sight-unseen buying or long leasing of real estate. Everyone buying or selling real estate must visit and walk the entire property with the representative of the recorder's office and the prior owner selling the property. The principles must meet at the property before the recorder can allow the transaction. The only exception is for illness or old age, with a doctor's certification. This rule exists because it greatly reduces the power of salesmen, because it is fair, and finally it is a beneficial headwind against the hoarding of real estate by the massively wealthy.

43/ The county recorder system shall also offer free and

expensive:

a/ Job postings and resume postings.

b/ Real Estate sales and leasing.

c/ Nightly rentals.

d/ HR background checks.

The goal is for government to do with HR placement agents the same thing it did with real estate agents.

44/ The county recorder shall have a index of all the plumbers and all the air-conditioning repair men and all the painters and all the everything, with the average price per call and the average time spent on each call.

45/ The county recorder system shall also monitor tele-medical data according to manufacturer set levels and alert levels.

46/ All search queries of the county recorder system are made through a different government agency, the independent auditor of the county recorder system. This system verifies authority and need for the information. thus marketers, aggregators, stalkers and criminals are not allowed to snoop around on the county recorder system. Also, every inquiry gets recorded, so police can run the inquiries of all the names associated with the case. Also this system probably tracks, but does not censor inquiries about certain things like how to potentially harm others and how to get away with crime and that sort of information. Also, this system keeps its own backups, and this adds another layer of security. It shall be a felony to hide your identity or help people hide identity on recorder inquiries.

47/ It shall be a crime for people to lie about their identity to government, to financial service providers, to employers, and to people they have major financial dealings with. It shall not be a crime for people to lie about their identity as the author of political media, non-financial matters, or minor financial matters such as waiting lists, restaurant reservations, social situations, parties, political writings and similar inconsequential matters. It shall not be allowed for business people and especially real estate developers, and building contractors to do build projects under multiple names and entities, as this encourages people to make low quality buildings. It shall also not be allowed for builders and developers to sell property and then lease it back.

48/ The Senate shall abhor sales of incomplete building projects as this tends to lead to dishonesty and abuses. Therefore, builders and property developers shall not be allowed to take in money themselves for incomplete units. All of this money shall be held by the county recorder system until the unit is totally finished and ready for move in. The term substantial completion shall be regulated and reasonably determined by the Senate and the third-party county recorder system from now on. Also, the standard of what constitutes completion shall now be uniform across the country, and it shall be explained in detail by the Senate. Also, property developers and builders and their agents and managers shall not have the right to sue buyers in money court for failure to complete the purchase of any property sold while not yet complete. Regardless of what the purchase and/or sale agreement says, all buyers shall be free to walk away at any time from their purchase of all incomplete buildings, be they new construction, or remodel projects.

49/ Regarding all existing timeshares and fractional

ownership properties:

a/ The owners of each timeshare property that sold its first unit more than 3-years earlier: These owners may vote at any time, with a simple majority, to liquidate the timeshare, or to find a new manager. In this vote, the shares owned by the developer shall all count as 1-vote.

b/ Timeshare developers and organizers and their successors shall have no right to sue timeshare buyers in money court for failing to pay their service fees. All buyers/owners of timeshare and fractionally owned property shall be free to walk away at any time without liability to the timeshare developer.

c/ All existing timeshare developers and organizers shall be investigated by the Senate. If fraud is discovered, the Senate shall punish the criminals in proportion to their multi-victim crimes.

d/ There shall be a right of buyers to rescind all timeshare contracts for any reason without stating a reason for up to 30 days. It shall be a felony for sellers to collect advance deposits prior to 30 days after the timeshare is sold.

e/ All timeshare contracts must be though the recorder system to be valid.

f/ No timeshare management company shall have any involvement in the sale of timeshare time slots, or collect any fees for this.

50/ To drive for more competition on price in the real estate agency industry, we shall have decimalization of commission rates. Also, it shall not be allowed to have any real estate commission that is between 0.95% and 1.05%, or between 1.95% and 2.05%, or between 2.95% and 3.05%, etc.

51/ All real estate agents shall be required to renounce or put their real estate license on hold for 180-days prior to closing a contract to buy or sell property for themselves.

52/ Under the old corrupt democracy, the realtors corrupted the system with regard to extension of purchase and sales agreements. They made it so that it was quite hard for sellers to get out of an agreement (which normally resulted in a commission for a realtor). Instead, we shall go in the opposite direction now. Now we shall say that if a purchase and sale agreement is not completed by the date stated, and both parties don't agree to an extension, then the transaction and escrow automatically terminate at the end of the day during the day's end reconciliation of changes to the files. Also, under our new system, we shall say that the court system shall have no jurisdiction or right to extend any purchase and sale agreement for any reason. This will not be something that the courts shall have any jurisdiction or power to do going forward. In fact, nobody shall have this power to extend a purchase and sale contract when one party doesn't want it.

53/ All real estate purchase and/or sales agreements shall have the address of the property and the words "This agreement shall expire and drop dead on DD/MM/YYYY" printed just above each signature block. After this date, the buyer shall have no right at all in the property.

54/ Where sellers are supposed to do some thing, or to repair some thing, or obtain some thing under a real estate sales agreement: If the seller fails to do this by the time the purchase and sale agreement expires, the buyer can either accept the property as it is, or walk away from the deal. There shall be no right of either party to extend any purchase and

sale agreement for any reason including non-compliance of the Seller. Also, no part of the justice or court system shall have any power to extend purchase contract dates for any reason. Also, we shall also be mindful of how under the old system contract extension lawsuits were possible due to lobbying by realtors and lawyers. Under the new system purchase and sale contact extension lawsuits shall not be allowed.

55/ Regarding real estate agents working by the hour:

a/ these shall be required to bill each day separately, and there shall be no obligation to pay real estate agents for multiple days of unpaid bills.

b/ The county recorder system's real estate purchase offer system must be filled out by principals or their employees or families. Real estate agents shall not be allowed to use the county recorder system's real estate purchase offers system.

c/ The recorder system shall delivery all real estate purchase offers. Real estate agents shall no longer be allowed to present offers to buy property.

d/ The recorder system shall provide detailed comparable sales information at no cost as a self-service thing for everyone at no charge.

e/ Disclosure forms shall be a thing prepared by certified disinterested home inspectors, because realtors are biased.

f/ Realtors shall not be allowed to bill for meals or travel time.

g/ All hourly real estate agents must have a stated hourly rate. They must also clock in and wear a chest cam with audio while working. Government shall not limit the hourly rate for real estate agents.

h/ The Senate shall be thought to best serve the people by striving to make real estate agents as relevant as travel agents.

56/ The term Real Estate shall now be replaced with the word Realty or Real•ti, which looks similar to the name Is•real.

Apparently, neither one is real and it is a big part of the Mideast struggle to make them real. But from now on land and buildings that are privately owned shall be called realty.

NR'88. LIMITS ON FOREIGN OWNERSHIP

1/ It is much harder for foreign economic parasites to participate in the economy of host nations that impose reasonable restrictions on foreign ownership. Foreigners and foreign nations shall not be allowed to own or rent land, including farmland, mineral land, or timberlands, or water rights. They shall not own slaughterhouses or meat processing plants, or crop processing plants.

2/ Economic parasites are heavily reliant on long-term artificial disparities in national currency and wage values between rich and poor nations. These disparities cannot exist for long if the money flow is all in one direction. Money must be sent back for something to keep its currency and labor costs from rising. And we have no real need to borrow from foreigners in our nation. So we will prohibit the foreign ownership of our nation's bonds and blue chip stocks. We have no need to borrow from foreigners. This only keeps our currency over-valued and makes our workers noncompetitive in the global economy.

3/ Economic parasites typically sell slave-produced goods in competitive and price-sensitive industries. This however

frequently leads to currency inflation in the parasitic or export-led economy. To prevent this, they must send money back to the host/target economy. And to do this they typically purchase assets that are not particularly price sensitive, things like debt, commodities and real estate.

4/ As a matter of national economic security policy, the rights of foreigners to participate in our nation's economy shall be limited as follows. Foreigners, be they human, fictional, or governmental, shall not:

a/ Own our government's bonds.

b/ Own any form of private bond.

c/ Own any form of loan or debt in the nation.

d/ Own any form of option, derivative or asset that is leveraged by more than 5-to-1.

e/ Own equity in any of the largest 1,000 companies of the nation, or in aggregate (all foreigners from all foreign nations) own more than 20% of our nation's capacity in any industry or industry niche.

f/ Own any mutual fund or similar asset assembled from other assets.

g/ Own real estate in our nation, except one reasonably sized residence.

h/ Participate in our nation's commodity futures markets.

i/ Automatically be considered legal creditors in our nation, especially if they become the creditor side in a debt crisis.

j/ The foregoing shall include proxies, agents, agreements, assignees, contractors, corporations, trusts, lawyers and any other means of holding ownership. It shall also include all layers of sub ownership, and shell corporation.

k/ Immigrants may own assets of up to 200-year's wages. Immigrant citizens may own up assets of up to 500-year's wages.

l/ Those renouncing our nation's citizenship shall have the right to own assets for the rest of their life.

m/ Immigrants may own shares in the companies they founded, provided these companies do not own any of the above items.

n/ Foreigners shall be allowed to invest and purchase equity in our nation's small and start-up companies. All voting rights for small company shares owned by foreigners shall however be assigned to the Senate, and the Senate shall vote as it sees fit.

5/ No foreign nation including its real human citizens and its fictional citizens shall own more than 5% of our nation's capacity in any industry nationwide. This shall include the single nation of Islam, and this shall not own more than 5% of our nation's capacity in any industry nationwide.

6/ It shall not be allowed for foreigners (real or fictional citizens) as well as foreign nations to own, hold, option, or pledge our nation's government debt, or shares in our nation's top 1,000 blue chip companies, or top 1,000 blue chip company debt. Foreigners may however own equity and debt in our nation's smaller companies, smaller than the top 5,000 companies. Also, all healthcare, drug, insurance and financial companies in our nation shall be considered blue chip, and no foreign ownership shall be allowed.

7/ Those who lend money despite not having a valid recorder system agreement shall generally not have any right to collect if the other side doesn't want to pay. Also, under the law, it shall be relatively easy for people borrowing from illegal

unrecorded, strong-arm money lenders to shot these people and call it self defense.

8/ Where the tax house discovers that government bonds or blue chip stocks are owned by foreigners, these shall be seized by the tax house. Thus our nation is financially underwritten by the inherent cred of our people, and no nation that does this will ever go bankrupt on foreign debt machinations from Mecca again.

9/ Non-citizens and immigrant citizens shall not be allowed to work in lending or foreclosures in our nation.

10/ There really is no need for any rich-half nation to have foreign investment at all in their government bonds or blue chip companies stock or bonds or other instruments. And there are very good reasons not to allow this, having to do with currency exchange rate manipulation, a thing that helps hide the effects of economic parasitism. It is just so important that we prevent the re-lending of stolen money if we are going to keep Ishtar out. This one thing doubles or quadruples Ishtar's money flows and money corruption power. Also, foreigners must never be lending on real estate in our nation as this is a way to legitimize foreign ownership of property taken back by the lenders in an economic crisis.

11/ Foreigners shall be permitted to have cash accounts in our nation. But foreigner-owned accounts shall charge interest on foreigner-owned deposits. This interest shall be the greater of 1% per teneth, or twice the Senate's official inflation rate. This shall be the only fee.

12/ Each exchange of foreign currency shall pay an anti-sloshing tax of 3 per-mil (0.3%). In times of economic crisis, this tax may be doubled. All international sloshing taxes shall be collected by the sending nation. Also, in times of domestic economic crisis, the Senate may impose up to a 3% transaction tax for all exchange traded financial instruments sold during a time of crisis.

13/ We shall hinder foreign predatory pricing and strategies for killing domestic output and creating dependency of foreign producers. We shall do this by saying that with regard to debts in our nation expressed in foreign currencies, the debtor/borrower (which includes our national government) shall have the option to repay in either our national currency, or the foreign currency of the creditor/ lender based on either the conversion rate that existed on the day the loan was created, or the conversion rate that exists on the day the loan/bond is repaid.

14/ Where foreigners and foreign companies own assets in our land, they shall not be allowed to use our domestic lending system to obtain loans on those assets.

15/ All leases and ownership of raw land and farmland and mineral land shall be nationalized. All leases of warehouses and offices by foreign companies shall expire in 10-years.

16/ Where our nation becomes dependent on foreign goods of any sort, the national government should make it a top priority to rebuild that industry.

17/ Our nation shall be prohibited from importing all of the following:

a/ Grain, except rice.

b/ Fertilizer of any sort.

c/ Crude oil and refined oil distillates.

d/ Coal and coke.

e/ Finished steel, pig iron, and iron ore.

- f/ Finished aluminum or aluminum ore.
- g/ Finished copper, or copper ore.
- h/ Radioactive materials.
- i/ Opiates and other addictive drugs.
- j/ Firearms, war weapons and war equipment.
- k/ The most used 300 drugs.

18/ Government shall never favor foreign producers over domestic producers, and never favor foreigners over citizens.

19/ Government bonds exist to transfer and diversify systemic risk. This does not really occur effectively with 10-year bonds as this will only get us from 1929 to 1939. So government bonds shorter than about 15 years shall not be issued and government bonds shorter than 20-years are unadvisable.

20/ Only goods that are more than 50% made in our nation of US made components shall be allowed to be called made in the USA. Everything else should be regarded as imported.

NR'89. ECONOMIC CRISIS MEASURES

1/ The economy shall be regarded as a construct that is expeditious for the fulfillment of our nation's material needs. No aspect of the economy shall be regarded as sacred, or beyond modification. If the economy is severely malfunctioning, then the Over-Senate shall have the right to modify the economy's parameters in any way it elects.

2/ When there is excessive demand for key ingredients, such as during an industry crisis, or during times of inflation, the Senate shall have the right/ability to lengthen everyone's work-week by a percentage in that industry, and force the use of day-halving, and force industry producers to increase output. This is especially supposed to happen when the demand is either coming from abroad, or it appears to be unnatural and a market manipulation.

When there is not enough demand, or where super low priced foreign goods are driving our key industries out of business, The Senate is supposed to use tariffs to keep our domestic key-industries alive. The Senate is also supposed to step in and intervene and keep all the factories and production facilities in key industries from being liquidated as parts. The Senate should also ban all manufacturing equipment under 20 years old from being exported. Also, if we are using consumption taxes all over our economy, then consumption tax discounts and deductions will offer much stronger incentives than income tax deductions.

3/ The right to life, limb, and sustenance are primary things that are sacred to free men. The right to wealth is a thing of secondary importance. The right to extraordinary wealth is a thing barely of tertiary importance.

4/ The right to one's freedom shall be considered an inalienable right of all human beings. This means that people cannot sign-away, mortgage, or loose their freedoms as was allowed under the primitive and largely fake Roman "democracy".

5/ An ultra-rich sliver of the population shall not have the right to drive the rest into down the drain poverty. Where a debt crisis is expected to bankrupt more than 1/6th of the population, the debt structure must be re-worked so this will not happen.

6/ The Senate shall not permit the economy of our nation to be debilitated by a debt crisis in time of deflation. Once a

debt crisis has been declared, the rights of creditors may be reduced in any way the Over-Senate finds expeditious including a reduction of the amount of principal owed.

7/ Foreign investment shall be seen as something that is:

- a/ An unnecessary thing for a mature economy such as ours.
- b/ The potential cause of much harm.
- c/ A way for foreign parasite nations to gain power over host nations.

8/ If the Over-Senate declares a debt crisis with a 2/3 overmajority, then the principal of all non-government debts and all lease payments in our nation may be reduced across the board by any ratio or any sensible blanket formula the Over-Senate elects. The Over-Senate may also elect to do the same thing with government debt, however a 75% overmajority shall be required for modifying government debt. The Over-Senate should do a similar thing with lease payments. These adjustments should happen in smaller repeated increments, rather than all at once.

9/ Likewise if the If the Over-Senate declares an inflation crisis with a 66% overmajority, then the principal of all non-government debts and all lease payments, in our nation may be increased across the board by any ratio or any sensible blanket formula the Over-Senate elects. The Over-Senate may also elect to do the same thing with government debt, however a 75% overmajority shall be required for this. The Over-Senate should do a similar thing with lease payments. These adjustments should happen in smaller repeated increments, rather than all at once.

10/ When the economy recovers, the Over-Senate shall act fairly in reinstating the original debt and lease amounts. All existing and would-be creditors of the people of our nation are hereby put on notice that in the event of an economic crisis, your principal may be discounted for some years until the economy recovers.

11/ The Over-Senate shall have the power to elect economic time-outs with a 75% overmajority. In an economic time-out, the Senate elects a number of days where where the clock stops for loan payments, and rent payments.

12/ Except for new township sites, Government shall not sell off public assets in time of debt crisis to raise money. Instead, it must dilute the money value of everyone in such times, for the scarce money suffers from being too valuable anyway.

13/ By the flation of debt, Government shall try to assure that no more than 10% of properties are lost in times of economic crisis.

14/ There shall be no longer be bonds that are convertible to equity. No existing convertible bonds can be converted.

15/ No new class of derivative in the stock market or out of the stock market may come into existence without Senate approval. The Over-Senate may elect with a 75% overmajority to cancel any or all classes or categories of derivative at any time. It may also halt trading retroactively and reconstruct accounts.

16/ If the Senate elects to bail out any of the nation's companies, The stock should suffer a heavy dilution or total forfeiture in favor of the nation's accounts. And if this isn't enough, first the shareholders get wiped out, and then the bond holders do.

17/ No new financial derivative shall result in leverage greater than 5-to-1. Any derivative found to be of greater leverage

may be voided at the election of the Senate.

18/ When property is seized for debts and sold, all proceeds over the debt, must be refunded to the owner of the property that was seized. However, the calculation of the debt owed when property is seized shall always include an added 10% surcharge for legal costs, court costs, and procedural costs when the seizure is uncontested, and a 20% surcharge when it is contested. Only the county recorder system shall seize property, auction property, collect sales, proceeds, and disburse funds from sales of seized property.

19/ All shall realize that growth itself frequently becomes the largest industry. So when growth goes away, local economies can shrink by up to 25%. The realization is key to reducing the harmful effects of the boom/bust cycle. For when growth rates exceeds a certain percentage of the economy, it always becomes unsustainable and a bust becomes certain. Therefore, we realize that moderated national growth is key to managing the boom/bust cycle.

20/ Where the Over-Senate declares an economic emergency, it may elect to:

a/ Halt imports or exports or both.

b/ Flate the nation's debt.

c/ Cancel all or some options and/or futures trading for a time. When this happens, the buyers/owners of options will see their the value of their options going to zero, as they would when a counter party goes bankrupt, only perhaps a bit more often.

21/ All forms of rent control, and rent stabilization shall be regarded as related to communist property seizures, and a thing that is completely unconstitutional. Except in a huge life disrupting war, there shall never be any price caps or any form of rent control.

22/ To prevent food crisis, we shall have it that Beef, pork, chicken, turkey, salmon, and shellfish shall not be imported to our nation. It is vitally important that our economy provides the excess amount of grain to grow animals, as a matter of national food security policy. If we are growing these creatures, we are always producing twice as much grain as we need. So if there is a global food crisis, if there is a giant volcanic eruption, or some OPEC shenanigans with food (as ancient Rome repeatedly suffered from), and we lose half of our food output, we will still be fine if we cull our animals and switch to eating grain. With regard to the shellfish and salmon, trout, catfish, tilapia, and other freshwater fish, we do not want to import this from other countries because we will see our fish imports coming from filthy places and nobody wants this. We want safe fish that nobody has to worry about.

23/ We will no longer have a FDIC, due to changes in the nature of money, deposits and loans. Also, under the new system, all deposits in a government insured or certified depositories shall be guaranteed to the individual citizen depositors and not to any fictional citizen or foreigner, or financial business. Likewise, the SPIC only guarantees the assets of citizens, not the assets of fictional citizens, including the fiduciaries themselves. This is so that in the most severe financial crisis, the fictional citizens will all die out, while the real human citizens will tend to be much less harmed.

24/ Except in times of national emergency, or super high inflation, the Senate shall be prohibited from increasing spending by more than 1% per bill.

25/ The Senate shall be required to create all money and for this reason, it shall always remain a net creditor, and the Senate shall no longer be allowed to borrow money, but only to raise taxes. This paragraphs is supposed to have the same effect as a balanced budget amendment.

NR'90. LOANS

1/ We shall ponder the words of John Adams:

a/ "There are two ways to conquer and enslave a country. One is by the sword and the other is by debt."

b/ "When economic power becomes concentrated in a few hands, then political power flows to those possessors and away from the citizens, ultimately resulting in an oligarchy or tyranny."

2/ We shall ponder the words of Thomas Jefferson:

a/ "The end of democracy and the defeat of the American Revolution will occur when government falls into the hands of lending institutions and moneyed incorporations."

b/ "A private central bank issuing the public currency is a greater menace to the liberties of the people than a standing army. We must not let our rulers load us with perpetual debt."

c/ "I place economy among the first and most important virtues and public debt as the greatest dangers to be feared. To preserve our independence, we must not let our rulers load us with perpetual debt. If we run into such debts, we must be taxed in our meat and drink, in our necessities and in our comforts, in our labor and in our amusements."

d/ "No generation has a right to contract debts greater than can be paid off during the course of its own existence."

3/ The world has suffered repeated costly economic bubbles that stem from low down payments on real estate and consumption loans. To help reduce the frequency and severity of these bubbles in the future, all financial institutions shall be prohibited from making loans on real estate where the down payment is less than 20% of the purchase price. Except for private loans from parents, grandparents, uncles, aunts, spouses, co-parents, and children, there shall be no secondary loans that take the down payment below 20% of the purchase price. Also, in all purchase money financing were the buyer is receiving a credit for a real estate commission or other thing, this shall be added to the down payment and shall not be used to offset part of the down payment. Furthermore, no purchase money loan shall be for longer than 20-years. With regard to loans on real estate that is not exchanged between unrelated parties, owner equity on institutional loans shall not be less than 25% of the assessed value, all the foregoing rules about offsetting monies also being applicable.

4/ Everyone borrowing institutional money for real estate must show a reasonable source of income or deposits for making their regular loan payments according to the stricter well-established, long-term banking customs of qualifying buyers.

5/ Balloon payments shall be regarded as a practice that multiplies the numbers of foreclosures, recesses markets, and helps drive waves of foreclosures, with financiers accumulating great numbers of properties in financial crises. Therefore, all forms of balloon payments, and higher than regular monthly/tenethly payments allowed on any loans.

6/ Non citizens, and people with a bankruptcy, or a a large amount of unresolved defaults on their credit report over half a year's wages shall not be allowed to borrow money in our country. He who declares bankruptcy shall never borrow again from the system. This shall be the penalty for declaring bankruptcy. Also, no lender shall be allowed to consider a minor default under 10% of a year's wages, or total minor defaults under 30% of a year's wages as a genuine default. If we allow this, then we empower many corrupt business practices like what scumbag rental car companies and scumbag cellular company salesmen commonly engage in.

7/ The county recorder's property value shall be relied upon and used for all loans. This is intended to make the real estate transaction process much faster, cheaper, more transparent, and less corruptible. Each county recorder's office shall be required to follow national valuation guidelines for all real estate, and the national bluebook for all vehicles. Where vehicles are unique, or real estate is hard to value, the county recorder system shall always err on the low side in determining valuations. The county recorder system shall have the power to veto the valuations of any recorder's office and fire any or all of the staff if it judges that valuations are being calculated incorrectly.

8/ The county recorder system shall calculate all the payments and all of the amount due, and all the remaining balance for all loans as a neutral third-party. The county recorder system shall also calculate and adjust the adjustable rate loan payments. The county recorder system also records ownership transfers of loans and assumption of existing loans by subsequent borrowers if any.

9/ The county recorder system shall initiate the foreclosure process on behalf of lenders automatically and for free based on non-payment of regular loan pay-off payments. However, the county recorder system only initiates the process of filing for foreclosure. The lenders must follow through and complete the foreclosure on their own, paying the county recorder system for the remaining processing of the foreclosure. The county recorder system also records the condition of the property just before the start of the foreclosure process and compares this with the condition records from when the current borrower took possession of the property. The county recorder system also documents the property's condition at the end of foreclosure. In these matters of foreclosure, the borrowers and their tenants and other occupants shall not have any ability to refuse entry to the county recorder system's officers. All must comply, and allow the county recorder system to enter their property and record its condition. Also, where there is vandalism, or abuse committed against the property acting as security: where the people in foreclosure damage their property, the third party county recorder system shall be the sole arbiter of the property's condition and decline in valuation caused by the borrower's abuse. And where this harm is great, the county recorder system shall have the power to force people in foreclosure to immediately leave the property serving as security for a loan.

10/ There shall be no loans where the lenders has possession of the title to the property pledged as security for the loan. All must go through the county recorder system's foreclosure process to get possession of the title to the

property. This shall be so for all forms of secured loans.

11/ Lenders that seize property without going through the foreclosure process of the legal system shall be guilty of a crime and may be required to pay extreme toxic waste level penalties to those who they have wronged and to the the Government's general fund. This is because lenders are all expected to know exactly what they are doing legally, for lending is inherently a thing of precise legal rights after all. This shall be so for both real estate lenders and also vehicle lenders and other sorts of lenders wrongly foreclosing on things like vehicles and furniture.

12/ Lenders shall not be allowed to bluff and lie about their powers under the foreclosure process and this shall be a fineable crime for lending companies as well as a criminal offense for individuals working for the lender.

13/ It shall be thought wise that systemic risk for a large financial crisis is a thing of lender losses, and not borrower losses. Therefore, if lenders cannot foreclose due to a foreclosure backlog, which is due to a financial crisis, they still cannot have possession of the property until they can foreclose, or until the borrower turns the property back to the creditor, or abandons the property.

14/ Nonresponse to matters of foreclosure shall only count where the borrower was properly served official notice to their must check email address by the county recorder system. Legal service by ordinary mail shall not qualify. The person must be properly notified in order for the laws of not answering to apply. In other words, lenders cannot send borrowers a single letter to an old address and then say: "Oh well, you didn't reply and for this reason your have forfeited your rights to the security asset you have had for many years".

15/ In all foreclosures, it shall be the county recorder system that auctions off the security assets, not the lender.

16/ Vehicle reposessor's shall no longer be allowed to show up and take foreclosed vehicles as this practice both leads to violence, a sense of injustice, and theft of vehicles by tow truck operators. Vehicle reposesses shall however be free to boot vehicles or not. But in order to tow away a vehicle, the police department must send an armed parking enforcement officer to meet with the tow truck. Also, when a borrower does not return the vehicle in good condition, when the vehicle must be repossessed, or the vehicle has been excessively damaged, this shall go on the borrowers, permanent credit report for life. Also, where police must be called to repossess a vehicle, they shall get 2-day's wages for the service which may be added to what the borrower owes for the repossessed vehicle. Where borrowers default on one loan, resulting in a vehicle repossession, they shall not get another loan of any sort until they repay their defaulted loan and all penalties and fees.

17/ All residential real estate loans shall be approved or denied within 6 work days or less.

18/ The use of amortized, or "never-dying" loans shall be prohibited as being contrary to economic freedom. From now on, all loans shall pay simple non-amortized interest on the amount withstanding. No new vehicle loan shall be for more than 6-years. No used vehicle loan shall be for more than 3-years. All existing amortized loans shall now convert to non-amortized loans. Also, no l loan shall exceed 20-years in

length. Loans for longer than 20 years shall be thought to be things of shadow slavery. In 2040, this shall be reduced to 15 years.

19/ All fixed rate lending shall be taxed at 1% to 2% as the Senate determines. We do this to discourage financing that is not subject to the governments interest-rate modulations.

20/ The day that government changes interest rates, shall be the day that rates change for all variable rate financing. There shall be no delay for this powerful tool of the Senate to modulate the economy. The prime lending rate shall be the rate that people pay for conforming real estate loans in non-hazard areas. This should be considered the prime rate.

21/ All repayments of principal and interest shall be at the same ratio throughout the life of the loan, unless the borrower elects to repay the loan early as is always every borrower's right. There shall never be any fee, penalty, or other charges for any early repayments on any loan.

22/ No loan term shall exceed 20-years, as such is contrary to economic freedom and hands power to those who profit from economic downturns.

23/ No new loans shall be assumable.

24/ There shall be an 80% sales tax on loan application fees

25/ All loans and other debts and equity must be recorded and use the recorder system's blockchain forms to be legal and valid. This system shall automatically check and flag to make sure that no lender charges too much, or has excessive fees, or charges excessive points, or any other usurious abuse, or corrupt practice. Those convicted of participating in the attempted enforcement of unrecorded debts shall be considered Mafia loan sharks and may get 20 years in lockup. There shall however be no prohibition or special taxation or fees for private lending, so long as it is recorded.

26/ No loans shall be callable at the whim of the lender, or in a financial crisis. All loans must use one of the Senate's many standard loan agreements.

27/ When a loan holders or loan originators experience a disproportionately large number of their debtor defaults, the problem shall be presumed with them. They shall be presumed to have engaged in predatory lending practices and their loans may be written down accordingly.

28/ No lender shall acquire title to any property through the foreclosure process. All real estate taken back from defaulting debtors shall be held by the county and sold through the county's auction system. If there is a severe economic downturn, and many counties acquire a glut of foreclosed property, particularly small farm properties, the national Economic Sluice shall decide what to do with this property in the various regions. Government may:

a/ Slow or speed up the sale of this property.

b/ Offer special loans to existing owners or new buyers.

c/ Write down, write off, or defer the amount owed on the loans.

d/ Leave some or all defaulting borrowers in possession of their property.

x/ In general however, economic downturns and waves of foreclosures shall not be allowed to lead to the consolidation or fragmentation of ownership more than the Senate decides is an ideal ratio range for the property sector that is affected.

29/ The Senate shall offer online marketplaces for various sorts of lending at no cost other than the county recorder

system's low loan recording and transaction processing fees. Others shall also be free to offer this sort of service.

30/ With all secured loans, there shall be no personal liability beyond the security pledged.

31/ There shall be no more amortization of loans and all loans shall be paid according to a simple interest payment scheme.

32/ Except in extreme economic downturns, foreclosure and evictions shall take no longer than 90 days from payment default to getting the occupants are out. Having slower processes only increase the cost of housing and housing loans for everyone.

33/ Only durable goods such as vehicles, appliances, durable furniture, real estate remodeling (but not painting or floor, coverings, or cleaning) may be financed. Also, nothing shall be financed that is worth less than 60-hour's wages. Where nondurable goods and goods worth less than 60-hour's wages are financed, the loan shall not be enforceable, and non-payment shall not count on anyone's credit report.

34/ There shall be no loans to non citizens for anything except real estate. There shall be no loans to non-citizens for real estate with less than a 25% down payment.

35/ Those people who have not passed high school math shall not be allowed to enter into mortgage situations or loan situations without using a certified objective loan advisor.

36/ Where people make deposits into banks, and those deposit clear and are paid to the bank, the bank shall be required to them remove all holds on those deposit monies. Also depositories shall not be allowed to lock accounts, or prevent people from withdrawing some of their money once they have reasonably proven their identity. Where this occurs, unnecessarily for no reason or no good reason, the people shall be entitled to damages from the bank. Furthermore, banks must stay a reason for doing what they've done, and if they don't state a valid reason, when they hold peoples money, then they should be fined by the government to make sure that this does not occur any longer.

37/ There shall be no exemptions to the rules based on some novel sort of lending, so these rules herein apply to all forms of lending.

38/ Except for tax liens, there shall be no loans or liens that survive bankruptcy.

39/ The recorder system should eagerly support the people sharing money with each other and making personal loans. However there shall be some rules to this:

a/ Everyone making or receiving personal loans shall be required to record them.

b/ Before any loan is finalized and the money transferred, the lender shall be allowed to see the lifetime lending history of the person they are lending to, along with all their loans not repaid.

c/ It should be considered to be shameful when people never repay the personal loans they take out in their youth. Real lenders may use this personal loan information in deciding about creditworthiness.

40/ It is supposed to be considerably harder to repossess second half mortgages, especially in the final quarter.

41/ There shall be no more payday loans or paycheck cashing services.

NR'91. BANKING AND CREDIT

1/ According to Benjamin Franklin, the real cause of the American revolution was the prohibition on the colonies issuing their own money.

2/ It shall be a life in prison offense (like counterfeiting) for anyone, but the national government to issue currency in the name of our nation. This shall be so even if permission is granted by an act of the Senate.

3/ All money creation by people other than elected national democracies shall be viewed as counterfeiting. Those plotting to create any system of non-national currency shall be regarded the same way as those plotting to overthrow our democracy for a foreign nation. In other words, they generally get executed for treason. In other words, dear leaders of the future, you must stay away from this line, or you will be called a corrupt traitor. The only party that shall be allowed to issue currency is the national government of our nation. And no leaders gets to even talk about any other source of money, for they are advocating secret counterfeiting.

4/ We shall ponder the words of Thomas Edison: "If the government can issue a dollar bond, it can issue a dollar bill." We shall also ponder the words of Thomas Jefferson: "I believe that banking institutions are more dangerous to our liberties than standing armies [in times of peace]."

5/ We shall ponder the words of Thomas Jefferson from 1816: "If the American people ever allow private banks to control the issue of their currency, first by inflation, then by deflation, the banks and corporations that will grow up around will deprive the people of all property until their children wake-up homeless on the continent their fathers conquered. The issuing power should be taken from the banks and restored to the people, to whom it properly belongs. I sincerely believe that banking establishments are more dangerous than standing armies, and that the principle of spending money to be paid by posterity under the name of funding is but swindling futurity on a large scale."

6/ We shall ponder the words of Andrew Jackson, just before he ended the charter of the 2nd iteration of the Bank of the US. (The 3rd iteration is called the FED.)

"I too have been a close observer of the doing of the Bank of the United States. I...am convinced that you have used the fund of the bank to speculate in the breadstuffs of the country. When you won, you divided the profits amongst you, and when you lost, you charged it to the bank [which the people had to bail out]. We shall also remember the words attributed to Mayer Rothschild: "Let me issue and control a nation's money, and I care not who makes the laws." We shall also remember the words of Benjamin Franklin: "The refusal of King George to allow the colonies to operate an honest money system which freed the ordinary man from the clutches of the money manipulators was probably the prime cause of the revolution."

7/ We shall ponder the words of James Madison "History records that the money changers [money chargers actually, central bankers] have used every form of abuse, intrigue, deceit, and violent means possible to maintain their control over governments by controlling money and its issuance."

8/ The nation's treasury and central bank shall be entirely

owned and operated by the national government. Nobody except the Senate shall have any control over the nation's fiscal or monetary policy or the issuance of currency, or the rates of interest charged. There shall be no treasury, or Fed or central bank, or money issuing institution institution that is not entirely controlled by the national Senate. Any ownership in these not currently held by the national government is hereby nationalized.

9/ The national government shall have a monopoly on issuing cash and negotiable financial instruments in our nation. It shall be considered counterfeiting for fictional citizens, banks, religions, and other groups to issue cash negotiable notes, or currency, including crypto currency.

10/ Our great nation has plenty of creditworthiness for any need it will ever have. And because of this, we shall back our currency with nothing more than the faith and credit of our nation and its inventive and industrious people. Therefore, our nation and its Senate shall be prohibited from borrowing money for any reason at all. If Government needs money, it shall create money on its own, based on nothing more than the value of our nation. We shall no longer borrow money at interest from anyone, be they national governments or a multitude of bond holders. And there shall never be any parasitic fantasy of interest paid on the national debt. This is the domain of parasitism. Instead, the currency shall degrade slowly at around 2% annually, and this shall be a sort of 2% wealth tax on the nation, funding a huge part of our national government.

11/ Only the Senate shall flate our nation's debt. Only flate-proof debt (which pays a 1 to 3% tax on each fixed rate payment) shall be shall not be flate-able.

12/ All of the nation's financial administration shall be under the Economic Sluice of the Main-Senate. There shall be no other body or committee making national economic decisions for the people.

13/ Only our national government shall be allowed to issue currency in and for our nation. We shall have no federal Reserve, or consortium of non-government entities usurping this vitally important aspect of government financing and taxation, for surely this is unjust and a huge exploitation of the people.

14/ To reduce the cost of government borrowing, among other reasons, we shall say that only deposits made with the national government or its agents shall be insured and protected by government. We shall no longer have this huge transfer of public money to private banks arising from private lenders being insured by the public purse. We shall have insured deposits without limit (and in inflation-proof labor units) but these deposits shall only be with the national government's depository.

15/ Government shall not limit the size of its insured depository accounts because government wants to maximize deposits in accounts that pay little or no interest but are entirely protected against loss and inflation. On top of guaranteeing that deposits made with government will not be lost in a financial crisis, government shall also guarantee that they will be protected against inflation by denominating all government deposits in labori, also called labor units, also called LU, These notes shall be denominated in hours of labor at the average national wage.

16/ All government transactions, and all real estate transactions, including leases shall be denominated in labor. And because of this, there will be much less payment of interest (or no interest at all) because the value of a labor unit will automatically match inflation.

17/ Only the national government shall have the power to lend money on insured deposits. No bank, or fictional citizen shall take in insured deposits and then lend the money at interest without the participation of Government. All banks shall serve as agents for the nation government's money supply with regard to lending. These may be agents for other lenders, but they all must be agents for government lending as well.

18/ Government shall be prohibited from monopolizing banking and lending. Government shall only monopolize the very large niche where government insured-deposits are used to fund loans of a fungible or commodity nature. This includes assets such as purchase and placement of prefabricated dwelling units, township commercial centers, township utility plants, township land acquisition if applicable, miles of rail lines, miles of road, miles of utility line, and certain types of capital equipment. And here this monopolization shall be limited to establishing detailed standards for conforming loans in the various categories. Also, the Senate may allow up to 10% of government insured deposit lending volume to be used for non-conforming lending, unless this proves problematic.

19/ As measured in terms of purchasing power parity, it will cost depositors a bit to keep their labor unit denominated maximally safe in government insured accounts. However the inflation-adjusted cost will be lower than the cost of keeping money in a bank under the old system. Thus our Government (and not the privately owned scam banks, or their scam Federal Reserve) will make a couple percent as the nation's depository, instead of paying to borrow money. The county recorder system shall nonetheless have a voluntary, and optional marketplace for private lenders that do not wish to use the Government as depository.

20/ The promise by government that each person will get the number of hours of labor back that they put in will not be so keenly by rich stable nations as poor corrupt ones.

21/ To begin with, those legally in our nation and with less than 5-year's pay in their depository accounts shall pay government no fee to keep their deposits.

22/ When an enterprise calls itself a bank, it shall be uninsured. When an enterprise calls itself a depository, it shall be an agent for insured deposits made with the nation's treasury. If an enterprise calls itself a depository, it shall be engaged in the business of taking in insured deposits as agents of the nation's treasury. To fund these fronting depositories, the treasury shall pay a small amount per transaction.

23/ Banking enterprises have a long history of going bankrupt in large numbers during economic downturns and leaving the people with the bill. Money deposited with anyone else but government shall not be insured by government.

24/ Only money deposited with a national treasury through a nationally chartered depository account shall be both inflation guaranteed (because it is denominated in labor units) and insured by our nation's national government. Citizens who

want to make sure their money will be there in any crisis should deposit it with the national treasury via an official depository, for these deposits always get paid in full first in a crisis. Government may charge interest for this valuable financial assurance. Government may also pay interest on these accounts if necessary.

25/ In order to make uninsured investments with OPM managers, people shall be required to have at least 2-years average wages deposited with the national government in an insured account. Once this is done, the investor shall be given his investor's tax ID number and permission to make uninsured investments with his excess funds. This requirement shall not apply for people using their money to start a business of their own, or a business in a closely held partnership.

26/ The institutions that lend money on behalf of the treasury shall be called government lenders. Government lenders shall take in the standardized government applications, and order a valuation from the county recorder. They shall also do preliminary borrower verification, and help disburse loan funds.

27/ When government or its subsidiaries lend money to the people, collateral value, and hence maximum loan amount shall be determined from the lower of:

a/ The county's assessed value.

b/ An out-of-county re-appraiser's statement of updated value.

c/ Unbiased out-of-region Senate appraisal of values.

28/ When inflation is a worry, Government is supposed to cut back on its lending activities. Government may also supposed to increase down-payments among private lenders, and flate debt among other methods for curbing inflation.

29/ Government should always discriminate between real estate consumption lending, and capital investment lending in industry. The former shall always be taxed, the latter shall never be taxed and may be subsidized by the consumption lending.

30/ Private debt obligations shall not be traded or circulated as currency.

31/ There shall be an 80% sales tax on all non-government loan application fees, and a 50% sales tax on all non-government loan origination and escrow fees.

All new real estate loans shall pay a 0.35% application fee to the county recorder system for appraisal. They shall also pay a 1.2% loan origination fee to the underwriter of the loan. All loans shall be non-amortized.

32/ No financial institution shall handle more than 1/200th of the nation's financial needs, or more than 1/10th of the financial industry needs of any county.

33/ All banks shall be required to mirror and backup the accounts of at least 10 county recorders as assigned by the treasury.

34/ As almost all unregistered currency transactions will be eliminated from our nation's banks, there will be much less need for special bank security or cash safes. As there is no credibility imparted by the bank, there will be no need for fancy structures. Thus we imagine many of our consumer banking needs compressed into a customer support desk, perhaps combined with other features of life like post office and local government services office.

35/ Domestic credit and debit card use shall not be charged at more than the the greater of 60-second's wages, or 0.3% of the purchase. International credit and debit card use shall not be charged at more than the the greater of 90-second's wages, or 0.5% of the purchase. This shall include all charges and fees associated with the account, including all vendor, buyer, forex and intermediary charges. Also, all charges on all credit cards shall pay daily interest on the account total, with no grace periods used.

36/ All international exchanges for credit and debit cards, as well as bank accounts must be at the international TT rates. No bank may charge more than 1-hours wages plus 0.2% for foreign exchange transactions.

37/ Checks may only be used to debit funds from a deposit account. Checks shall not be a valid and legally enforceable way of incurring debts. In other words, the checks that credit card companies frequently send to people shall not be a valid way of establishing debt, and the credit card companies shall not be allowed to collect anything on these if they are foolish enough to offer them. The people may use these annoying, exploitive, pray-on-the-elderly checks and they do not have to pay for them.

38/ Credit card shall not be allowed to charge annual fees, or other use fees where the cards are not being used in that month or that year.

39/ All checks shall only be deposited in full into financial accounts. Banks shall be prohibited from cashing checks, or offering less cash for deposits. If cash is to be withdrawn from an account, it must be a separate transaction after the check clears. Post dated checks shall be legally valid, and these shall not come into validity until the date indicated on the check. Checks with any alteration at all shall not be valid, even if the change is initialed.

40/ Where people have overpaid the amount due on their accounts, the overpaid money shall not be refunded unless and until the account holder agrees to the refund, or the account is closed by the account holder. Where fiduciaries and utilities and other payees refund money from accounts prior to the refund check being actually cashed by the refund recipient, this shall be considered fraud. In such cases, the fraudulently refunding side may be taken to court and forced to pay 50 times the amount of the fraudulent refund.

41/ All transaction system must support 8-digits below the decimal point to facilitate the efficient searching of transactions by their cents amount.

42/ The Senate shall establish detailed rules on when banks and others will be allowed to freeze monies in accounts.

43/ Credit card companies shall not be allowed to use paper checks for transactions. Where fictional citizens (including especially credit card companies) send checks to people without specific customer request, and these are used, the financial company shall have no right to collect the money when/if these checks are honored.

44/ No credit card debt may be sold more than 4-times without expiring.

45/ All banks and all credit card companies shall be prohibited from using the physical object delivery system for sending marketing material and regular statements.

46/ Credit cards may charge interest, but they may not charge late fees, or compound interest. All credit cards must

have one interest rate for all unpaid balances, and this must charge 10% of the annual rate per teneth or prorated part thereof in simple interest. All credit card payments shall be due on the 3rd day of each teneth for the previous teneth. All credit card interest accrues from the time of purchase.

47/ All existing student loans shall be cut by 80% with immediate effect. In the future, there shall be no more loans for tuition, or school fees, including on-site housing fees. All these things do is drive up the cost of education for no good reason. Also, all the endowments of the various schools, colleges, and universities shall be nationalized and used to make up for the reapportionment losses that human citizens suffered elsewhere in the system.

48/ There shall be no late fees for credit card or automobile debt. No credit card debt shall accrue interest at a rate more than 60% over prime.

49/ All credit card and payment accounts shall allow for the account holder to block any inbound recurring payees forever or for as long as the account holder wants to block that payee. Also, where this happens the account that the debit request is from shall be notified and under the law they must stop requesting money in this way.

50/ Payment card, and credit card companies do not get to write their own rules. The Senate writes the uniform rules for all payment card and credit card companies, and they all must obey in the same way. People who have not passed the Senate's 30-minute course and safety test on credit card debt shall not be allowed to get an account.

51/ No charge to a payment account shall go through until the account holder accepts it on the app, or waives the right to do this on small charges or charges up to a given amount.

52/ No business shall acquire the right to use its own discretion in debiting the accounts of their consumer customers unless those accounts were prepaid to the business.

53/ All businesses invoices shall incur interest at one half of the average credit card interest rate starting on day two.

54/ No loan or new revolving credit account shall be binding unless the person appears in person at an assessor's office to verify their identity. The recorder's fee for this verification service shall be 1-day's wages to discourage the financing of small purchases. And as normal, this shall be 1-day's average wages for the nation.

55/ All regular payees must be in a separate section from all other debit payments in

56/ All payment card and credit card accounts shall have six separate sections:

- a/ Regular periodic charges
- b/ Irregular charges
- c/ Contested charges and money credited from vendors
- d/ Money paid by account holder to credit card account
- e/ Pending charges.
- f/ Where new charges to the account are made after the last payment, these must be shown in a special area called "late charges from past billing cycles" and show the payee and date.

57/ All credit cards must have detailed information about the nature of the thing purchased, and the name and address of the vendor. Where the purchase is for air, travel, bus, travel, train, travel, taxi, travel, etc., this must be indicated. Where

it's for groceries or restaurants this must be indicated. This must indicate online fees, as well as the type of online fee. However where firearms are purchased, the transaction shall be called either "tools", "clothing", or "sporting goods" as the buyer requests.

58/ Credit card companies shall not be allowed to increase credit card limits without the account holder's permission. Also, where the account holder requests a lower limit, the credit card company must obey.

59/ Businesses shall not be allowed to charge extra fees for using credit or debit cards or for different means of payment.

60/ All credit card companies shall offer an app where:

a/ The credit card company pings the user's phone to make sure the phone is in the same location as the card being used.

b/ The cardholder can notify the credit card in advance via video where they say that they are about to make a purchase of a certain amount at a certain vendor.

61/ The Senate shall produce detailed rules for trial offers agreements and their cancellation. For the cancellation of all trial offers, the county recorder system shall act as intermediary. Hard to cancel trial offers may be subject to multiplier penalties. Also, nothing may be advertised as free when it later turns into a paid service. In that case it shall be called a "free trial".

62/ It shall not be allowed to buy or sell things that inherently have no value (like non-fungible tokens) for huge sums. This shall be regarded by the Senate as a form of fraud.

63/ It shall be a crime to lend money without recording the loan with the recorder's office. Where people fail to repay personal loans from apparently close people, the loan may be considered a gift and taxed accordingly.

64/ Government shall not limit the right of free people to spend their money anywhere they want unless they are individually convicted of a crime under due process.

65/ All tax payments and government fees shall be billed, and not taken without an individual court hearing and due process.

66/ Banks shall not be allowed to sell investments. People in banks shall not be allowed to earn commissions from selling financial instruments.

67/ While foreigners may own real estate in our nation, they shall not be allowed to mortgage or borrow against that real estate, using our nation's banks.

68/ At least one branch and at least 1/3 of the branches of all banks in each community shall be open at least 11 hours a day 7:30am to 6:30pm at least 364 days a year. There shall no longer be bank holidays except for voting day.

69/ The recorder system shall allow people to:

a/ Notify them about all transactions on all their accounts.

b/ Lock down all their finances for periods of time and later unlock them.

c/ View a ledger of all their assets and tax payments and to see what is due and what has been paid.

70/ All ATM and remote financial logins shall end in a number. Entering the ending number below the real pin will also work and gain access, however it will also send a 24-hour distress call.

71/ There shall be no joint financial accounts for people until they have been coupled for at least three years, or they have

a child together under any conditions.

72/ In all financial transactions the tax ID numbers of both sides get recorded along with the amount and the description + imagery of what the money was for. Also, 80% of the audit budget here shall be spent on goods and service that are the highest priced, because this is where the money laundering happens.

73/ The Senate shall make a list of what sorts of things kids can buy at what age. Also, what sorts of things other can buy for them.

74/ We shall ponder the following ringer of a quote attributed to Thomas Jefferson and which was surely a problem for parasitic interests: "The country is headed toward a single and splendid government of an aristocracy founded on banking institutions and moneyed incorporations and if this tendency continues it will be the end of freedom and democracy, the few will be ruling...I hope we shall...crush in its birth the aristocracy of our moneyed corporations which dare already to challenge our government to trial and bid defiance to the laws of our country. I sincerely believe that banking establishments are more dangerous than standing armies." [Masterful and anti-Ishtarian quotes like this that turn out of be spurious speak of documents and sources that were disappeared by Ishtar and the same bunch of people fact-checking and labeling things as spurious.]

NR'92. BUNDLED DEBT

1/ All foreign owned bundled debt is hereby nationalized. No bundled loans in or from our nation shall be owned by foreigners.

2/ All debtors shall issue their debt in 10 classes in order of who gets repaid first. The 1st class debt gets paid first, 10th class debt gets paid last, and more often gets totally wiped out. Mutual funds of 1st class, and 2nd class, and 10th class debt shall be allowed for certain types of debtor. Also funds of certain types of borrower shall be allowed. But there shall be no other derivatives or re-divisions or mincing of debts that is legal and enforceable.

3/ When debt is cut in deciles like this, it will produce a surplus over the value of the undivided, disordered, risk non-diffused loans. This value and the market where it is bought and sold shall belong to the people.

4/ Insurance of loan repayment shall not be enforceable in our nation. If we allow this practice, it gives a false sense of security that aggravates the severity of the worst financial storms.

5/ No new loan bundle may cover an urban area that is more than 30-km across in any direction. No loan bundle may cover a non-urban area that is more than 300-km across in any direction.

6/ There shall be no options, swaps, derivatives, or bonds guaranteed for bundled loans.

NR'93. FINANCIAL

1/ All trading exchanges in the nation are hereby nationalized. All exchanges shall be operated by the Senate, and all exchange fees and transaction fees shall accrue to the people. This is in addition to the anti-sloshing taxes the

Senate may elect to impose.

2/ No trading exchange shall handle more than 10% of the nation's financial transactions, or be located in a known earthquake or tsunami flood zone. No county or metropolitan area shall host more than one exchange.

3/ Purchases or sale of real estate, expensive assets, vehicles, intellectual property, stock, business ownership shares, bonds, debt shares, and any derivatives thereon, shall only be considered sold and conferred if they are traded on, or recorded on, one of the Senate's exchange platforms. No purchases or rentals taking place anywhere else shall confer legal possession.

4/ All financial exchanges in the nation shall be open 365 days a year. None may be open for more than 30 minutes a day, during the international trading period, from 09:00am to 09:30 New York time.

5/ Fictional citizens shall be prohibited from paying other companies, or short-term employees to market their stocks and bonds for sale.

6/ All shares in all fictional citizens shall be equal, with equal voting rights, except that shares owned by government may be of a higher and more dominant class. All existing preferred shares shall now automatically convert to normal shares.

7/ No publicly traded company shall issue stock or bonds, or buy them back, less than 14 days after these actions were authorized.

8/ The national government shall run the financial markets for the benefit of the small disconnected investor. To this end, it shall gently discriminate against large investors and especially insiders. Those who have wealth over 500 year's wages must irrevocably schedule their sells 1 day in advance or more. Those who have wealth over 5,000 year's wages must irrevocably schedule their sells 3 day in advance or more. Employees and those who own more than one per-mil of a publicly traded company, must irrevocably schedule their trades more than 18 days in advance. The rules of this paragraph shall include parents, children, siblings, spouses, and close associates of insiders. Also, all trades placed in advance must go through at the market price at the beginning of the day's trading.

9/ There shall be no mark to market accounting as this aggravates booms and busts by making the boom times looking better and crisis times look much worse. Future generations are warned that mark to market accounting made the economic crisis of 2008-2009 many times more severe than it otherwise would have been. All assets must be accurately valued (marked to market at the end of each teneth) in all FC financial statements, and all investment statements.

10/ No non-government investment fund, company, or trading house in the financial markets shall have assets in excess of 100,000 year's wages, or collaborate with its peers. No company investing in other companies shall issue stock.

11/ The Sub-Senate shall manage a number of investment funds, some of which shall will be insured by government in some ways

12/ No investment fund shall charge more than 0.5%-per year for its services, or charge more than this amount as a buy or sell charge.

13/ The national government shall charge a 1-per mill anti-sloshing tax on all financial market transactions including those for investment funds. Therefore, the round-trip tax will be 2-permil. This is intended to:

a/ Discourage short-term trading.

b/ Squeeze out front-running market-makers.

c/ Squeeze out parasitic arbitragers.

d/ Stabilize prices.

e/ Raise profits for long term investors.

14/ Those who broker, handle, or manage investments for others shall not trade their own portfolio either in their name or in the name of others. Everyone who collects, solicits, infers or takes in money for investments shall have a government web page with their verified education, employment history, curricula vitae, annual income for all years in their life, photograph, and contact information. All of their personal investments and customer placements shall also be shown on this page, along with all their commissions and other remunerations. This page shall also include the comments of past investors that have lost money investing with that investment manager.

15/ Only the Senate shall rate debtors and debt. There shall be no private rating agencies. To do otherwise is to leave the system open to the sort of systemic risk that caused the financial crisis of 2008-2009.

16/ Primary financial derivatives may exist, however, the dynamics of tertiary and even secondary derivatives being beyond the full comprehension of nearly everyone, these shall be wholly prohibited. Any derivative class elected secondary or tertiary by the Over-Senate may be elected unenforceable and worthless after the fact.

17/ Loans may be bundled, and the whole sold as shares. However there shall be no derivatives on debt or bonds, or bundled loans.

18/ Options and futures shall not exist for individual companies, or their stocks or debts. This is due to huge synergies with insider trading, and market manipulation. potential for abuse by would-be monopolists, as well as their relative lack of purpose for honest investors.

19/ Options and futures shall not exist for any minerals that come from the ground, except when delivery is taken more often than not. This is due to their synergies with market manipulation, and relative lack of purpose for honest investors.

20/ Margin lending shall be prohibited for three reasons:

a/ It tends to aggravate bubbles.

b/ It tends to drain off profits from prudent investors.

c/ It creates a trap for novice investors.

21/ There shall be no protective stop-loss orders where people sell their financial instruments upon the price falling to a certain point. This practice aggravates market blow-ups. It also gives people a false sense of security. Alerts are allowed, just no pre-programmed selling where price falls cause further selling, automatically. Automatic selling shall be considered computerized trading, but not automatic buying on either side, or automatic selling when the price rises above a point. It is just the computer-enabled selling upon price falls that shall not be allowed, as this creates market crashing feedback loops.

22/ Investment funds, fictional citizens, and people subject to

wealth tax may be prevented from selling, or selling short, or holding or trading derivatives that undermine market values during periods of extreme financial volatility.

23/ Where the clearance price moves by more than 2% from the prior close of trading, this price shall be indicated to all, and then 60 minutes later, when everyone (including new participants) have had the opportunity to reconsider and re-enter their trades, then the market in this issue clears 60 minutes late.

24/ All publicly traded companies shall make all non-emergency announcements after markets close, and at least 2 hours before they open again.

25/ Due to the potential for fraud, publicly traded companies shall be prohibited from:

a/ Buying back their own shares, however, they may petition for public dissolution, where the Senate sells off divisions and hands out the cash to shareholders.

b/ Declaring special dividends. They must instead increase their regular dividends, or keep the cash.

26/ Starting on revelation day, all existing options and futures shall be frozen in time until the Senate can decide on a just course of action for them. Those whose inherently risky derivatives expire as a result of this freeze shall be out of luck. After this, all fictional citizens (including banks, insurance companies, mutual funds, hedge funds, and government insured financial institutions) shall be prohibited from buying, selling, or owning financial derivatives of any kind.

27/ There shall be computerized execution of human-placed trades, but there shall be no computerized trading for profit. Both the purchase price and the quantity sold must be entered by humans. The Senate shall also impose a human-scale size limits on the amount that can be entered in one single trade.

28/ All non-human account holders must place their trades before the market opens each day. Nobody shall both buy and sell the same or a similar financial product in the same day.

29/ The Senate shall always keep in mind that our fictional citizens frequently serve as a front for economic parasitism. Also that every market advantage we give our nation's fictional citizens over flesh and blood citizens is potentially an advantage for economic parasites using those fictional citizens as frontmen.

30/ There shall be no trading of volatility as a financial instrument.

31/ Except for commodity futures, no financial instrument purchased on a financial market shall confer liability in excess of its purchase price.

32/ No fund holding stocks, bonds or commodities, or other assets shall charge more than five per mill per year for its services, or more than one per mil as a transaction charge.

33/ All investments shall be open to all investors. The maximum cost of a share in any company shall not exceed one day's pay.

34/ For all accounting purposes, only one master ledger may be used. This ledger shall be required to include all transactions, There shall be no more multi ledger accounts where balances can be hidden. All fictional citizens and financial services providers must have a master ledger for

each account. Any transactions made off the master ledger shall be held to be fraud.

35/ Three column accounting shall be the norm for all accounts involving multiple charges and payments. There shall be one column for charges, one for payments and one for the net amount after that transaction. All financial services must use three column accounting. And all debts and credits must appear on the master.

36/ No investment fund shall invest money where it will sway political, environmental or social decisions, as this is a corrupt practice and a back door to our democracy.

37/ All payments to another's account that involve over 1-day's wages must be accepted by the recipient at the time it is sent. Credit balances shall not be refunded except with the agreement of the person they are being sent to.

38/ Where a billing support doesn't reply, after 3 attempts 4 to 7 days apart each, it shall be considered a default.

39/ Payees must submit their transactions to the county recorder system before the transaction can be completed.

40/ There are sorts of control that we want our government to have over our economy/ financial system, and there are kinds of controls that we don't want the government to have. We want government regulating interest rates for example, so that the economy doesn't overheat with inflation, or crash in a deflationary crisis. This sort of control enables the people to cooperate for the betterment of all. On the other hand, we don't want government micromanaging our business activities where government permission is needed for any form of real world economic activity — because everything requires a permit and this hinders the entire economy. So we want government to have lots of control over the overall condition and rules of the economy, but not to have much of a micromanagement role.

41/ The Sub-Senate shall review both the nation's history and the world's history to compile a history all past monopoly scams and a history of all financial bubbles. The Over-Senate, the nation's wisest body shall protect the people from monopoly scams, bubbles, and all forms of parasitic feeding on our economy. The Over-Senate may set-aside any transaction and seize its proceeds if the transaction is elected as either above or below market.

42/ Insider trading may be proven by extreme returns in the stock market where people are exposed to information. in general, anybody who has a relative in a company or a friend in a company shall be prohibited from trading in that company, and everybody should know to stay away. Where people spread untrue rumors in order to take advantage of a market, it should be considered, the equivalent of insider trading, and the gains of these people shall be set aside, and then they shall be fined 3 to 30 times the amount of money they would have made by the scam.

43/ Financiers and lenders may be held responsible for the economic activity they fund if this is obviously criminal.

44/ It is thought wise for the least corrupt nations to offer SEC/ financial services to other nations because this is not just another profitable industry, but it is also a thing that will help with economic development. It will also help build the size of the foreign economy orbiting our nation's economy.

45/ The term mortgage is from Mort•G•age = die•big•time. This shall now refer only to loans that are excessively long,

longer than 20-years, a loan that pays the anti-usury hypocrites back for over 20, or 30, or 40-year or sometimes longer. From now, if it is called a loans, it must be for 17-years or less, and all mortgages shall be 20 years or longer.

46/ In order to prevent 30 year mortgages from becoming the norm in the real estate market, and from the being built into all the prices in our real estate market, we shall by statute limit our standard real estate loans to 18-year payoffs, and no longer. Where longer payments are typical, markets adjust and free people wind up being wage enslaved under 30-year and 40-year mortgages. Therefore, the Senate shall intervene and make the normal payoff period from 15 to 20 years. taxing 20-year loans by a bit and 25-years loans by twice as much and 30-year loans by twice that. With 40-year loans and interest only loans taxed at twice the rate of 30 year loans so that nobody ever opts for a 30-year loan for anything.

47/ Where people starting businesses suffer setbacks and are exploring their options for selling out, this shall be thought to be the second most important place for BBB people to get involved and offer help. Also, the recorder system is supposed to have free listings for this area. There shall also be means for Government and creditors to step in with regard to stunned businesses that are not responding or adapting to some setback, and have no plan to deal with a setback that will prove fatal to the business if not adapted to.

48/ Where loans are deflated due to systemic deflation, and the loan expires prior to the reflation, the debtor shall be regarded out of luck, and yet another victim of a poorly-timed financial decision.

49/ Everyone who collects, solicits, or takes in money for investments shall have a government web page with their verified education, employment, and curricula vitae, annual income for all years in their life, photograph, and contact information. All of their personal investments and customer placements shall be shown on this page, along with all commissions and remunerations.

50/ There shall be no dark pools or off market exchanges of marketable securities, be they stocks, bonds, options, or any other securities, or securities-like financial instruments. There shall be no trading of financial instruments that is not taking place on a financial market out in the open, where the ownership of both sides can be tracked to its source by the government, and the prices paid can be tracked by the government. To do otherwise shall be considered felony fraud for all involved.

51/ Fictional citizens shall not be allowed to trade in our asset markets including our stock markets, bond markets, and options markets. They may however invest in our markets provided the assets are held more than two years. They may also trade in and out of our markets provided they pay a 20% income tax on their profits, with no offset for unprofitable trades.

52/ All foreign made equipment and software shall be prohibited in our financial system.

53/ No financial asset brokers/ originators/ depositories shall be exempt from government regulation. Also all financial instruments offered in our nation shall be available to everyone in our nation to buy.

54/ Computers shall not establish, set, modulate, or adjust

prices in financial markets, in online stores, in real world stores, for travel services, or other sales venues. All forms of dynamic pricing shall be prohibited for consumer goods less valuable than a non-luxury automobile. All vendors must sell to everyone at the same price and terms. All vendors must sell their wares for the same price all day each day. Prices for consumer goods can only be adjusted overnight.

55/ No account login shall ever be required to pay a bill.

56/ The Senate shall have the power to regulate all forms of financial asset and debt instrument, or currency, or anything similar to these things. Also, it shall not be possible to create new forms of financial instruments, financial assets, or debt instruments without Senate approval (For example crypto currency, debt swaps, or so-called sub-prime collateralized debt obligations.) There shall be no right of anyone to challenge the Senate's right to de-platform any class of financial instrument or any company, or any financial system offering. This includes all bonds, all stocks, and all cryptocurrencies, and all forms of currency domestic, and foreign transacted in our nation or with our nation's banks and brokerage houses, citizens, or fictional citizens.

57/ Financial anglers/scammers love to dream up new financial instruments, but the Senate must always be wary that it is another Sub-prime scam that stole trillions from our nation and its corrupt government. For this reason:

a/ The Senate shall be required to approve of all new forms of financial instrument.

b/ The senate shall always be super wary and slow with new financial instruments. It should take a decade or two for these to come into use.

c/ All shall realize that financial instruments are the easiest way to steal trillions.

d/ There is generally little need for new financial instruments and a massive risk is that the new financial instrument is a scam, particularly if it is hard to understand.

58/ The Senate and its SEC shall have the power to regulate any and all forms of financial asset, debt instrument, investment or currency activity. It shall not be possible for any new form of of financial asset, debt instrument, investment or currency to come into existence without the permission of the Senate and its SEC. Also, before the new financial instrument is rolled out, it shall be studied, tested for over a decade before it can be rolled out in for trial general use in up to 10% of the nation for at least a decade.

59/ The SEC shall be entirely restaffed.

60/ There shall no longer be any commissions for financial sales people or bank or broker staff.

61/ The Senate shall compile all new GAAP accounting for our nation.

62/ There shall be a presumption that unused/parked funds are a selfless thing that helps everyone else by just leaving the money in the system, even if they are collecting no interest. So the system welcomes it when people do not use their money, and the system should never punish parked money in any way except for erosion under the forces of constant inflation.

63/ There shall be no offshoring of a financial services, including especially call centers.

64/ Only buyers can borrow money and finance purchases. Sellers shall not be allowed to finance sales using third party

lenders. Where this occurs, the seller shall have the option of reneging on the on the sale at any point for up to 10 years and reclaiming their assets if they wish.

NR'94. CONTRACTS

1/ The following sorts of contract clauses shall not be enforceable by the side that wrote or selected the contract:

a/ Clauses that are misunderstood by more than 10% of Sub-Senators reading them.

b/ Contracts where over 10% of Sub-Senators don't understand that they are a party to a particular sort of contract and bound to that contract.

c/ The contract seems to say one thing on casual reading, but on careful study say another thing that is beneficial to the authoring side. Also, where this is judged to have happened, it shall not be a crime, but the judgement shall go in the person's or fictional citizen's permanent record.

d/ It is fine print that cancels-out the meaning of any name, title, or heading.

e/ It is fine print that cancels-out the words of a company representatives, or salesmen that are recorded telling prospective clients things different from what the contract clause says. Also, all sales pitches and sales people communication may be freely recorded by customers without the permission of those making the pitch.

f/ Where the name, title or description of the contract strongly suggests that a thing being sold is much more valuable than the thing actually being purchased. For example we shall no longer have any sort of insurance that is called "ALL RISK" unless it actually is all-risk. In other words, no longer will be allow insurance to all itself all risk when it typically excludes a large variety of risks, such as the way today so-called ALL RISK insurance typically excludes: earthquakes, war, government seizure of property, government destruction of property, wear and tear, infestation, pollution, nuclear hazard and market loss.

2/ Hidden, small, and hard to see signs and notifications shall not in general have any force or power. Having a tow-away sign far away in the back in a parking lot shall not be considered legal notice. Likewise, fine print and boiler plate and other contract sections and terms that are normally signed without being read, these shall have almost no power over the people signing them, and this especially with regard to consumer contracts and unusual contract stipulations that seem to have been agreed-to without actually reading the consumer contract. The Senate shall generate acceptable language for all So-called adhesion contracts. These are the "take-it-or-leave-it" contracts that fictional citizens use with the public. If the business does not use Senate approved language, then the contract will not be enforceable.

3/ For contracts over 500 words, the party that drafted the contract must show proof that the other party actually read the contract. For contracts under 300 words, all signatories shall be presumed to have read the contract if they accept it. This rule shall include to all addenda, rules, attachments, titles, general conditions and all other supplementary information attached-to, referenced-by, or included in a contract. All of these documents shall be included in the word count. When contracts reference the Senate's standard

provisions, those Senate standard provisions shall not be included in the word count.

4/ Where evidence of a pattern of abusive business practices exists between people engaged in a contract, either party may petition the court to annul the contract. However, where no cause exists, the losing side must pay the winning side for its reasonable legal costs.

5/ No contract shall be valid for more than an amount equal to 3-day' wages unless it is publicly recorded. Oral agreements shall not be enforceable unless they are video recorded to the camera generally according to the required basic contract text for that sort of oral agreement.

6/ Brokers, crooks, and exploitive business people frequently abuse contract assignment clauses and straw men to trick people into giving them free sellable net-price purchase-options on valuable assets. Assignment clauses also help billionaires and giant fictional citizens to hide their economic activity from the market. For these reasons, and perhaps others, we shall ban all contract assignments, and especially for asset purchase contracts, tenancies, professional services, and fabrication or manufacture.

7/ Where agents, brokers, salesmen, lawyers, or other advisors or consultants or sales people use contracts with illegal assignment-friendly contract terms, and then attempt to use this illegal language to deceive their fiduciaries into establishing a broker/middleman situation, or secret profit for the broker, this shall be considered felony fraud.

8/ Where all parties agree to an assignment, all of the middlemen involved must sign a strictly enforced anti-perjury affidavit with the county recorder system for the assignment in order for the assignment to be valid.

9/ The county recorder system shall charge 2-day's wages for all assignments.

10/ When fictional citizens are assignees under purchase contracts, both sides of the sale shall be required to re-consent to the county recorder system before the assumption is finalized and becomes valid. Also, the people shall always be free to discriminate against fictional citizens and favor human buyer/sellers.

11/ All contracts shall be required to use one of the Senate's standard contract clauses for the following:

a/ Force Majeure.

b/ Entire agreement.

c/ Severability.

d/ Counterparts.

e/ Waiver.

f/ Governing law.

g/ Notifications.

h/ Succession and Assignment prohibition.

i/ Auditing.

j/ Subcontracting.

k/ Time to complete and time of the essence.

l/ Term of contract.

12/ When entities change hands, all open transactions and escrows automatically get cancelled, any charges and costs shall be the responsibility of the side changing hands.

13/ In order to accelerate output and advance national competitiveness, the Senate shall allow and support reasonable, and non-predatory contract clauses calling for payments of liquidated damages for delay and slow progress.

These clauses shall generally be enforced by the money courts, where an upper limit to the damages is stated, Early completion bonuses shall likewise be generally enforceable.

14/ In general, all consumer contracts must use one of the Senate's form contracts for their classification. Those who do not use one of the Senate's many form contracts or contract clauses (where one is available), these people must pay 3X the regular adjudication fees if there is adjudication.

15/ The following matters shall not be the subject of a binding contract, and no clause concerning the following matters shall be enforceable in the nation's courts or under any arbitration agreement. Further, it shall be a felony for any fictional citizen or extra-democratic mafia to attempt to enforce the following matters outside the justice system. Also, government shall aggressively and vigorously defend the people from any Mafias or fictional citizens that arise and exert government power in the following matters:

a/ People shall not be considered properties. The sale or transfer of people in slavery or forced labor, or a situation where they are prevented from leaving a place. This term "prevented from leaving a place" may be due to either locked doors, or remote location, or an unknown location, or not being allowed to contact others electronically, even if they previously agreed to this.

b/ The sale or transfer of children outside the government adoption system. People doing this shall be presumed to be child-sex enslavers.

c/ All matters relating to gambling, gambling debts, lotteries.

d/ All matters related to sales commissions.

e/ All matters of live performances in front of a large audience, be they for music, sport, acting, or talking.

f/ All matters related to sport team membership and acting. This includes professional athletes and professional actors that fail to show up or perform as required.

g/ All matters concerning the exclusive right to publish, own, repeat, or talk about any real, or ostensibly real event. Nobody shall ever be allowed to buy-up the rights to talk about any true, or ostensibly true event.

h/ All matters related to confidentiality agreements, and non-disclosure agreements. These things are the very definition of darkness in the group mind. How can we allow such things when we are committed to light and truth? The only exception is for our military secrets, which shall be as narrowly defined as reasonably possible.

i/ All non-disclosure agreements shall be unenforceable, including those signed years and decades ago. And even if they have taken money to stay quiet, people shall now be free to tell all about dishonest activities, and this especially for pedophile priests, adverse drug reactions, and crooked leaders. Government shall have no business trying or enforcing any confidentiality agreement where people try to hide and censor information.

j/ All matters of celebrity sponsorship and payment for celebrity sponsorship. This shall be regarded as a corrupt thing to be minimized by government.

k/ Supplemental agreements demanded by one side. This shall include supplemental contracts and amendments demanded by one side, as well as user agreements signed after purchase. Also, software use agreements shall only be

valid if signed before the purchase of the original software, or the upgrade.

l/ Non-compete clauses for workers, except where the worker is paid at least 3X the average wage. However, no non-compete clauses shall live for more than one years.

m/ All commission sales agreements and all agreements for introductions to people.

n/ All agreements concerning money substitutes such as gold silver platinum diamonds gemstones, crypto currency, sexual favors, or other things as a substituted for money.

o/ All agreements made under duress.

p/ All matters where people agree to have sex, or make pornography. Everyone shall have the inalienable right to change their mind about sex at any time under the law and this right cannot be sold or traded away.

q/ All agreements and transaction where the government's sales or transfer tax was not paid.

r/ All purchase contracts involving financing where the down payment that is less than 15% of the total purchase price including all extras and required charges.

s/ Contract clauses calling for arbitration by non-government arbitrators, as these tend to be biased in favor of the side bringing the arbitrators the business.

16/ Nobody shall sign a document on behalf of another unless they are the parent of a minor or a recorded guardian, or they have a recorded 1-year power of attorney document. It shall always be a felony to sign other people's name except where permission or court awarded authority was granted, or where parents or guardians are signing for minors.

17/ Regarding contracts and minor children: No contract signed by any minor, or the minor's parents/guardians on the child's behalf shall survive the child's emancipation to adulthood.

18/ All loan/mortgage payments, rent, utilities, and HOA fees shall be paid to the recorder's office which shall charge the receiving side 0.1% as a transaction fee on mortgage payments, and a 0.2% fee on the other transactions listed. Payments made in any other way may be denied by the recipient, and shall not be used to satisfy the conditions of any recorded contract, including loan repayment contracts.

19/ The Senate shall establish standards for what sorts of professional and businesses practices must be quoted in advance, and how they must be quoted. Once we do this, it shall be the business's duty to accurately describe the scope of work to be performed on the contract. If there is ambiguity, the customer gets the benefit of the doubt and the work shall be done as part of the contract.

20/ When no specific price is agreed on for a product or service, then no payment shall be due, and government shall have no role in compelling payment. If the price is vague and the product or service was delivered unpaid, this will often be a big problem for the seller.

21/ When a business offers a menu of goods and services and that menu implies a price range, the business cannot exceed that implied price range on similar goods and services without prior written agreement stating the price to be used.

22/ The Senate shall try to institute standard pricing in the various industries as practical. Standard pricing shall have location multipliers for the entire world and shall exclude impractical demands. Under this scheme, people can agree

by contract to pay either standard pricing, or some multiple of standard pricing for standard services. The Senate shall encourage standard pricing wherever practical to reduce gouge-&-skim fraud in both government and industry.

23/ When there is a going open market price range for certain products or services in an industry, businesses that greatly exceed that range for a product, shall be required to get special permission in advance where the biller explains why the work or items to be provided are so expensive relative to standard charges for similar things. Also, where OPM managers that exceed standard pricing for that city, the board must ratify their request with a 2/3 overmajority.

24/ It shall be a crime to enter a retail businesses premises as a customer and try to poach its clientele for another profit making enterprise. These people shall all be seen as violating an implied condition of entry. However, customers may be freely approached about matters of a political or public economic nature.

25/ It shall not be allowed to market goods or services as limitless, or without limit, when they actually are limited in some way, such as the speed of delivery, or the quality of the service is reduced after a certain point.

26/ The Senate shall conduct research into what sorts of contract clauses cause the most problems with the court/ adjudication system.

27/ As all Senate communication are required to be monitored (including communications with constituents, other Senators, and anyone else), the idea of confidentiality agreements with Senators and the Senate is absurd.

28/ The term S-coms shall refer to communication in either direction with the Senate. All S-coms shall be monitored, and it shall be a crime to meet with a Senator outside a monitored zone.

29/ Regardless of what any contract says, everyone shall always be duty bound to obey the law, and report illegal activities, just as the people shall be duty bound to protect people who report illegal activity.

30/ It shall be a felony to threaten and harass people for disclosing illegal activity.

31/ This constitution reiterates the idea that all contracts must be for legal things and contracts for illegal things are void.

32/ No contract for a nightly rental property shall exceed 500 words. No contract for a weekly rental shall exceed 1,000 words. No contract for the rental of a consumer vehicle shall exceed 500 words.

33/ When people work/bill on time and materials, they shall be required to wear a cam and use a billing clock application, unless they already have a long-term relationship with the customer. Both the county recorder system and the tax house shall keep backup copies of everyone's financial records on all assets and liabilities including real estate vehicles stock bonds loans shares share purchases on purchases major furniture items major home improvements construction and corporate expenditures.

34/ The maximum potential liability of all contracts must be stated. This excludes enforcement costs which shall never amount to more than double the total liability without the enforcement costs.

35/ There shall be no magical documents where people cleverly trick others into either waiving their inalienable rights

or agreeing to some restriction of their inalienable rights for some consideration or no consideration. It shall be considered fraud to use contracts that deprive people of their inalienable rights, or deceive people into thinking they either do not have some inalienable right, or have waived an inalienable right.

36/ Where money-back guarantees are offered and the money is not refunded for generally undamaged goods within 10-days, the liability shall be 10-times the cost of the consumer good or service. Where the price of the good or service is trifling, the courts shall be free to use up to a day's wages as a base amount. No money back free trial guarantee shall be longer than 30-days.

37/ Where free trials or subscriptions are offered, there shall be no automatic switching to a paid subscription. Instead, a bill must be sent out by the side offering the free trial, and the side accepting the free trial must make a payment to start the subscription.

38/ Where a party to a contract inserts an obviously unenforceable clause into a contract, or writes a contract with an obviously unenforceable clause, and then uses the legal system to enforce that unenforceable clause, the entire contract may be held void against the party trying to enforce that obviously unenforceable clause. Also the courts may fine the side attempting to enforce an obviously unenforceable clause.

39/ All extra charges, and all vaguely specified charges shall be considered matters of civil law. Thus all businesses shall have to use the civil law system to collect them, and the criminal law system shall have no jurisdiction with regard to any extra charge other than the listed price. It shall never be a crime to fail to pay extra fees, tips, service charges, cover charges, booking charges, cleaning charges, and especially supplementary charges that are subject to Mecot.

40/ It shall not be allowed to have form contract clauses that are un-enforceable. These clauses are not simply unenforceable, but they shall completely undermine the credibility of the side benefitting from them.

41/ Bills for uncomplicated things, such as medical procedures and professional services that are not billed within 40 days should generally not be collectible, except for certain circumstances, listed by the Senate.

42/ The following sorts of contracts may be cancelled by the principal talent at any time.

a/ Contracts for agents and representatives

b/ Contracts for a share of your income as a actor or musician or sports person.

c/ Contracts for the sign away rights to collect income from royalties.

43/ The following industries and industry niches shall be required to used only Senate approved contracts:

a/ Stock brokers

b/ Investment intermediaries

c/ Banks and lenders.

d/ Financial clearing houses

e/ Real estate brokers

f/ All fiduciaries.

g/ All depositories.

h/ All consumer contracts

i/ All builders selling dwellings.

j/ All pre-fab home placers.

k/ Others as added later

44/ Every bid that each contractor makes shall be recorded by the county recorder system along with the bid instructions and the prices of other bidders. Thus future customers will be able to see prices for recent jobs and also see which contractors throw-out absurdly high bids.

45/ Contractors shall also be able to legally promise their customers in a binding way, that they won't start any new jobs until they've completed the job that they contracted to at that time.

46/ Every person in escrow to buy real estate or vehicles or machinery, shall have the right to perform the customary and normal inspections on that type of thing in escrow. Also, where no escrow exists, all people buying real estate shall still have the right to perform reasonable inspections at the start of escrow or the purchase contract. Where sellers do not grant buyers permission or access to perform inspections, the buyer may:

a/ unilaterally cancel the escrow or purchase contract for this reason alone.

b/ later sue the builder or developer or property owner seller to recover any losses that would've been revealed through an inspection.

c/ inspect the property anyway, if they can gain access, and suffer, no consequences for this.

47/ Minor Clerical errors shall not be applicable to ownership of property, deeds, or mortgages where the intent is clearly something else.

48/ The format for signature pads, paper and virtual shall be: "I agree as the Human-Person, PRINT NAME, to the attached SUBJECT contract RS1234-123456789012-2019 with the following other(s): PRINT NAME(s). I agree to obey this contract and all of the Senate's standard contract clauses for this sort of contract. Then below is the signature pad.

49/ In all contracts, the word DAYS shall be defined as calendar days and there are 365.25 days in the year. All references to rain days shall be defined by the recorder system's third party rain day monitoring system. It shall not be possible to have other contract definitions of these terms.

Also it shall not be possible to define contract terms in counter-intuitive or even unusual ways, and all contract terms defined in counter-intuitive ways shall be void. Also, where contracts have unusual or imaginative text, especially in contracts on the well-worn path, the burden of proof shall be on the authoring side in all court proceedings and other proceedings about the contract.

50/ Under the old lawyer-friendly 1789 constitution, written contracts were relatively easy to modify and even void with oral statements and actions. Under this new constitution, it shall be considered impossible to modify or void a written contract with the words that people speak, and very difficult to do this with actions. This shall be so unless these contract modifying words are said directly to a recorder system video camera as a official identity verified recorded statement. Also, given the ease of today's technology and using the recorder system, we shall have it that all unrecorded oral statements shall always be inadmissible in money court.

51/ Where goods are created and made and money and organization and labor and materials must be brought

together in extremely complex, time-consuming and financially risky ways, contracts for exclusive dealing and pricing shall be eagerly enforced by the financial system and contracts shall be generally enforceable. However, where contracts are for common commodities, or the seller in the relationship is only marking up the price of the goods, or dividing up shipments, repackaging, or changing labels, or even re-painting or re-decorating the goods, purchase contracts can be cancelled up until delivery of the goods.

52/ All contracts between manufacturers, middle-men, and end users must contain an affidavit of commercial role, where each party must state under penalty of perjury that they are either a buyer, seller, or middleman. This will create a chain of ownership record for all goods that will mostly eliminate unauthorized parasitic middlemen in commerce. This will also mostly prevent piracy.

53/ The recorder system shall be constantly monitoring the activities of our nation's fictional citizens.

54/ Regardless of what any contracts says, all zillion dollar fictional citizens shall be required to be honest with others, and to be good citizens. Where fictional citizens act deceptively or exploitively, Senate juries may set aside, cancel, or redesign their contracts, property rights, and business practices. This may occur up to a year after the deceptive or exploitive behavior by the fictional citizen.

55/ When a person agrees to buy something in a recorded contract, and then fails to complete the transaction as stipulated, he shall lose the deposit he put up. However, he shall never be forced to close the transaction or pay any more money for failing to close the transaction. And if the seller refuses to transfer the property, the recorder system shall be required to transfer the property without their signature. This is in sharp contrast to the old system under the old 1789 constitution that favored lawyers and realtors over principals in property transactions.

56/ Where people repairing and modifying vehicles and buildings enter into agreements where they get paid money to diagnose a problem, and give a price to remedy, that money and that agreement shall not be enforceable under the law and in the nation's courts.

57/ If there's no price agreed to for a service, and the bill comes afterwards, no money shall be due under the law. A price must be agreed or there's no obligation to pay. This includes doctors, lawyers, and all occupations.

58/ It shall be a crime for service providers to collect payment prior to giving a price for the work or a price determined by some sensible metric. Also, there shall be no obligation to pay on agreements where a person agrees to pay money for another person to give them a price on some work. No vehicle repair or modification person shall have the right to impound vehicles left for diagnosis if the customer does not want to pay for the diagnosis. No building repair or modification person shall have the right to collect on charges for visits where the work/job is viewed.

NR'95. NO CRIMINAL CURRENCIES

1/ All seigniorage, or profit from coining or creating money shall belong to the people and their national government. Anyone issuing currency, or interfering with our nation's right

of seigniorage may be charged with counterfeiting. Only the national Sub-Senate shall have the power to issue money (and create money/ legal tender) as a debt by the people of our country. No county, fictional citizen, or other entity shall have its own currency or scrip. Also, no citizen, fictional citizen, foreigner, foreign nation, or international body shall issue currency or scrip in our nation. The Fed shall be abolished, and all foreign owned debt and bonds void unless honored by an act of the Senate. In other words, our nation shall create all of its own money for free. And this shall be regarded as one of the most fundamental sovereign rights of each nation. Everyone involved with taking this right away from our people shall be subject to the possibility of being executed.

2/ The use of anonymous and untraceable non-Government crypto currencies and gold, platinum, silver, diamonds, foreign currencies, bearer bonds, and other anonymous stores of money shall be outlawed as a form of money laundering because they facilitate other crimes such as:

- a/ The payment of ransoms for kidnapping.
- b/ The payment of ransom for ransomware software.
- c/ The hiding of assets and profit from taxation.
- d/ Money laundering.
- e/ Corruption of elected officials and company managers.
- f/ Black market economies.

x/ It shall also not be allowed to bring undeclared gold, platinum, diamonds, silver, etc. in or out of our nation without filling a tax form at the border crossing.

3/ It must be noted the way that anonymous crypto currencies create a situation where people can be tortured for the purposes of obtaining their crypto-currency password and stealing their crypto-currency fortune, and police will have no idea who got away with their money, or that it is even missing.

4/ It shall be considered the felony of money laundering to use or offer services relating to anonymous black market electronic "crypto" currencies on or after revelation day. All who later use crypto currencies or NFTs shall be considered as having criminal intent. Government shall conduct sting operations to prevent the use of anonymous crypto currencies.

5/ Government shall watch to make sure that no new criminal currencies appear either domestically or in a foreign nation. If a criminal currency appears, Government shall be required to take criminal and/or military action against it and all money launderers using it.

6/ Instead of having anonymous paper currency notes, or anonymous crypto-currencies, we shall in the coming years phase in a system that electronically tracks everyone's transactions so that all transactions can be subject to financial forensics. It is thought that this will greatly reduce all forms of illicit commerce, street crime, organized crime, Mafia drugs, robbery, sex/child trafficking, and prostitution, as well as corruption of government and fictional citizens and other sorts of crime. Eliminating cash will do these things, while at the same time it will cost honest transactions almost nothing. Also, the recorder's system will keep the records private, unless police come with a search warrant.

7/ The new digital money shall emulate and simulate the system as it existed under paper currency notes, except that true anonymity of spending shall no longer exist, and the tax-

house and police shall be able to forensically investigate all spending with a search warrant. (who transacted the money, and how much they got and what was exchanged) This will make us all more secure with regard to thieves, robbers, kidnappers, and the like.

8/ In all cases where people in power or government appropriate or block the money of various people, it shall be treated like counterfeiting, and the perpetrator sent away for decades, and without exception or excuse. This may also apply to the foot soldiers in the financial system, and government, as well as the directors. Also, earned money cannot be:

a/ Turned off without a felony conviction and an individual court order.

b/ Used to control the spending and activities of the people.

9/ There shall be no expiration of money, or dictating what people are allowed to buy, or how much they are allowed to buy.

10/ Regarding earned money, as opposed to government aid money:

a/ It shall never be turned off without a felony conviction or a money court judgement. And then, everyone shall have the right to keep a homestead amount that is off limits to all creditors. Also, those who illegally confiscate, or block a person's money may be charged with felony misappropriation.

b/ It shall never be restricted by Government people with regard to what people can spend their money on. Neither Government, nor anyone else shall dictate what a person can and can't spend their money on, or how much of their earned money they can spend on certain things, or how much may be spent in any time period, unless the person themselves programs the system for this of their own free will. There shall never be any pre-approval, pre-permission, pre-review by government, or social credit scores, or social credit system for spending one's own money.

c/ Parents and guardians shall be free to limit and approve of the spending of their minor children.

11/ Neither Government, nor anyone else shall prohibit certain adult citizen from accessing their earned money, or financial accounts, or spending this money how they see fit, while other adult citizens are allowed to buy the same things. It shall be a felony for government officials and other to attempt to limit the people's access to their own money due to their: income, employment, unemployment, school grades, school progress, education scores, political activities, political affiliation, political party membership, free speech activity, writings, environmental footprint, pollution footprint, conduct, behavior, social standing, or social credit score. The only exceptions shall be:

a/ Firearms and ammunition purchases by those not allowed to bear arms for reasons explained in R'2 herein.

b/ Purchases of alcohol, tobacco products, prescription drugs, or Mafia drugs, without a valid license.

c/ Pharmaceutical drugs without a prescription.

d/ Excessive purchases during time of shortage and cost bubble that are presumably for resale and speculation that the prices will go up.

e/ Dangerous goods such as dangerous chemicals, explosives, poisons, and similar things which are off limits to

nearly everyone.

12/ We shall first ban anonymous physical currency notes for use to purchase air travel, real estate purchases, loans, rent payments, transport services, taxis, hotels, vehicle rentals, cruises, restaurants, bars, discos, alcohol, tobacco, shellfish, steaks, healthcare services, or licensed Mafia drug purchases. Then we shall ban currency notes for apparel, vehicles, fuel, luxury goods, gambling, prostitutes, models, exotic dancing, hair work, manicures, massages, shellfish, steaks, live events, tuition, and all sorts of business spending. After some time we shall phase out cash first on the big island of Hawaii, and then, some time later, in Michigan. After this, the Sub-Senate shall vote on phasing out cash via the relevant optional constitutional clause herein.

13/ The only exception to the e-money system shall be ID and signature verified checks and payment-guaranteed, travelers-checks for use in crisis situations where people can't reach the financial system. These checks must however include the names of the parties, and were used to buy, and they shall not be legal tender for further endorsements and transactions. In other words, they must be banked in for account credit by the recipient named on the check.

14/ Without currency, there can be no bank runs.

15/ To emphasize what it means to turn off a person's money, we shall have court-ordered de-monetizing of convicts as a criminal justice system punishment. Here, the convict's money is turned off, and they are forced to work for their housing and food at a cashless facility of their choice. Either that, or they must find someone to front for them in the economy. Also, we have this punishment on the books not so much for its efficacy, but to indelibly mark this sort of treatment by government as what it is — a sort of criminal punishment and a sort of imprisonment that must be reserved for those convicted of serious crimes under due process.

16/ There shall be no levying of funds or property, including e-money accounts without a fairly administered individual public trial. This trial must using due process, and long-established rules and penalties. This trial must also have legal notice to all parties, formal judgements, and a court action applicable to one person alone. There shall be no group trials. Also, the court must be in the jurisdiction of the defendant. It shall be a felony to circumvent these requirements and levy funds or turn off access financial accounts off without due process. Those in power who violate these rules shall get 2-years per count. There shall be double penalties for those who abuse their power to go after political adversaries in these ways.

17/ Earned money shall never be:

a/ Turned off for citizens without a felony conviction or a money court judgement.

b/ Spending restricted among citizens by Government to further some political agenda such as the folly of carbon trading.

c/ Used by Government people to frighten the people into submission to their power.

d/ Used to control the spending and life activities of the people.

x/ Government people doing any of the above may be charged with a felony.

18/ When government or fictional citizens, or others illegally freeze or illegally seize the money or accounts of their

political enemies, or those opposing their policies, without due process, it shall be thought akin to the crime of illegal jailing one's political enemies. In fact, the penalty shall be roughly half of the penalty for the illegal imprisonment of political enemies by those in power.

19/ Even the Senate is not allowed to monkey with individual people's finances.

20/ The culture of a Government agency or body is based on history. Only the Senate may change the way the historical way that government operates. Only the Senate may change the way the law is administered, and alter the cost of government services. Only the Senate may change government charges, penalties and punishments. Individual managers and unelected boards may not come in and change anything government does. The workers are supposed to disobey.

21/ The Senate shall establish very strict rules and limits on the power of small groups of Senators and small groups of Government appointees. There shall be criminal penalties for making decisions that usurp power from the Senate and the people. Those who abuse their Governmental or fictional citizen power to deprive the people of their assets, including mere delays to accessing to their financial accounts and purchase ability without due process — these people may be charged with a felony.

22/ Financial institutions shall generally be required to pay toxic waste sized fines for abusing their role as an unbiased intermediary and fiduciary. Where fictional citizens engage in this practice, the civil court penalties shall be in proportion to FC size. Where FCs dare deprive real citizens of equal treatment due to their politics, the FC (and often their directors and board members) shall have huge fines, toxic waste sized fines, similar to those of offshore oil drillers that have large oil spills.

23/ When government, fictional citizens, or others deprive a person of any of the following without due process, it shall be a felony. This shall be especially so when when done by government officials, fictional citizens, employers, or educators to limit free speech, or opposition to their policies. It shall be a felony to cancel the following without due process:

a/ Government services such as: driving licenses, vehicle registrations, mail service, drug or alcohol licenses, passports.

b/ Public utilities such as electric service, water service, telephone service, email, and physical object delivery services

c/ Financial system access such as access to loans and lines of credit.

d/ Family access: interfere with custody of one's children, or access or custody of one's children or spouse, or attempts at canceling personal relationships.

e/ Technology or network access such as: social media access, communication platform access, computer application access, website access, domain registration.

These shall not be turned off or jammed or hindered without a court order applicable to that person alone.

f/ Intervening to get people fired, or disciplined by their employer.

g/ Intervening to get one's educational status reduced, or a person expelled from an educational institution.

h/ Housing access, such as getting tenancies or loans terminated.

i/ Intervening to tarnish a person's good name.

24/ To de-centralize the payment system, and have a payment system free from abuses, we shall say that no payment intermediary shall transact more than 1/500th of the nation's payment transactions, or dollar amount and each citizen shall be free to use several or many financial intermediaries.

25/ Government shall not stop the people from spending their money on any particular thing. However, Government can use the payment system to know what people are spending their money on for taxation purposes, and for reasonably disinterested criminal investigations. Further, it shall be a felony for government people to use the payment system to launch attacks on their political adversaries, and especially their personal adversaries and third parties for payment.

26/ For accounts denominated in labor units (LU) there shall be no expiration of money or inflation. For currency accounts there may be inflation. All forms of money shall however be subject to a progressive wealth tax as applicable and explained elsewhere herein. Government shall not have the power to command that people use their money or lose it.

27/ Except for convict earnings accounts, unearned government aid money accounts, non-citizen accounts, and minor-child accounts, Government shall not limit what people can buy with their own money, or how they can spend their money.

28/ When purchases are made using the cashless money system, the seller sends a bill request to the system using their buyer's barcode, or account number, or their electronic version of these. Then the system bills the buyer's chosen device(s). Then the buyer accepts or denies the debit. But both sides, and the recorder then get instant transactions and records, and there shall no longer be paper receipts. Also, the buyer gives no ID information to the seller through the exchange process. The seller does not find out the identity of the buyer through the purchase process. Yet, there may be other ways to the seller to identify their customers.

29/ All payment accounts and credit cards shall:

a/ Have a customer established threshold amount for 2fa approval of ordinary charges.

b/ Have a different and lower customer established threshold amount for 2fa approval of charges by difficult vendors and industries.

c/ Permit the turning-off of recurring charges made by vendors.

d/ Offer the ability to block all future payments to a particular recipient/biller as of some user entered date.

30/ No third parties shall keep databases of what people buy, other than the county recorder systems non-aggregated debit-oriented purchase records. However, if someone is accused of a crime, the recorder's records can be queried by police and the courts like a bank transactions can be queried. It is just like how we will allow our cellular records to be stored, but the tracking of our location occurs only get aggregated with a warrant upon credible accusation of a crime. All of each person's purchase can be found out by

police, and by the tax house if either can get a search warrant. However, there shall be no compact, or compiled databases to gain access to, and it shall be a felony to copy the county recorder system's databases.

31/ All charges must have the seller's name, and address, and web address as appropriate, the nature of the goods or service, and the date and time of the charge. Payers, particularly group and company payers may also require that a photo of the person making the charge is also taken by the payment system via the seller's terminal.

Whenever an e-charge is made, the charge amount must be shown in large letters all the way across the screen, and upon discharge going through, a notification must go to the payers notification account.

32/ All children shall have a financial account number assigned at birth along with their national ID number. Relatives and friends shall therefore be able to give children amounts of money in this account, and buy things for this account.

33/ All barter transactions must be assessed, and the county assessor may charge up to twice the average wage per hour for this assessment service.

34/ All agreements concerning the purchase, sale, deposit, guarantee, option, safe-keeping or insurance of any cash substituting fungibles, or potentially fungible materials shall be unenforceable. Our nation shall take all reasonable steps to discourage the use of fungibles instead of currency.

35/ No foreign government or fictional citizen may be involved in any domestic transaction or any record keeping of financial transaction information in our nation.

36/ The government's account system shall automatically generate everyone's initial tax statement and tax bills at every level, subject to private auditing, private CPA calculation private objection, and private appeal. Also, the taxpayer must check the tax bill for major errors and income source omissions, such as missing accounts, payees, or cash income. The taxpayer must also check the total income amount from each source to see if it's grossly understated in the government's tax statement and bill.

37/ Government shall provide applications and technology so people can accept money at temporary businesses and temporary jobs, garage sales, lemonade stands, and on the spot charities. All money paid to beggars must be paid to the account listed on the beggar's begging license. All donors to all beggars shall see the beggar's daily, tenethly, and annual begging income prior to transferring any money to the beggar.

38/ Those spending more than 2-hours wages on behalf of someone else who is not a registered dependent shall be required to enter what the money is for. Otherwise, it may be considered as black market dealing when people are inaccurate here.

39/ Except for people in jail, no person's earned assets be banned from use for ordinary groceries, rent, loan payments, insurance, or utility bills.

40/ Account holders shall be free to limit their payment account so they cannot purchase alcohol, tobacco, mafia drugs, sweets, luxury goods, etc. The courts may also do this instead of sending a person to jail.

41/ The county recorder system shall have a monopoly on auctions, so we can be sure that things are being sold at a

fair price and there is no money laundering going on. Also, the county recorder system shall track all art sales for the same reason. The high priced art market shall be considered a thing that exists mostly for the purposes of money laundering and illegal transfers of money, such as what the Biden crime family engaged in. All artworks selling for over 1-month's wages shall be taxed at 100% for the amount over the 1-month's wages level, thus doubling the price. All art transaction may be halted by the museum system, and the artwork condemned for twice the agreed-upon transaction price. This is 150% for the artist and 50% for the buyer who does not get the artwork because the museum system bought it. The high priced art market shall be considered to mostly exist for the purposes of criminal money flows, such we saw with the Biden crime family. When other hard to value things are transacted, and this system can be reasonably emulated/modified to work, we shall emulate and modify. When we can't do this, we shall use computer programmers and Senate appraisers to appraise each transaction.

42/ There shall be no anonymous purchases or sales of anything, and transacting on behalf of other shall be a crime (household and houseguest sharing allowed). Some payers/payees, and some types of transaction will remain secret, while others will be public knowledge. For example, all transactions with government, fictional citizens, and OPM managers will be totally open for everyone to view. Regarding personal accounts, some people will have open accounts and others will not. But the crime algorithms will see, and they will pull people up for unexplained wealth and tax fraud.

43/ It should be noted that existing cryptocurrencies are non-anonymous, or pseudo anonymous, and all spending is open to everyone. This while the new currency will offer privacy for everyone except the user and the county recorder system, which will require a search warrant to view the encrypted spending files. So only people with the search warrant will be able to access the data of the spending.

44/ Bank safety deposit boxes shall no longer guaranteed or protected in any way by government or the legal system. However, at the main police stations the county government shall maintain walk in safes for valuables and arms, with boxes therein, and inventory treasuries where deposits are recorded and also video monitored and catalogued and recorded by the recorder system. This will serve to both guarantee the safety of valuables while at the same time find criminal assets. Also, it should be noted that everyone's safe deposit box inventory has been secretly recorded by the Ishtarian parasites.

NR'96. PRECIOUS METALS AND GEMSTONES

1/ Government shall be prohibited from buying precious metals and gemstones, or using them as as money, or holding them as bullion without selling at least 1% of reserves each year. The finding and valuing of these mostly useless rare minerals shall be seen as a thing of total human folly fostered by an eternal parasite that no longer exists.

2/ Government shall be prohibited from holding or displaying so-called precious metals and gemstones in its museums.

3/ Except when the material is to be used up in industrial purposes, contracts that call for, or allow payment or delivery

of precious metals and gemstones shall not be enforceable.
4/ No institution involved in trading or brokering stock, bonds, or mutual funds shall be allowed to trade precious metals and gemstones, or obligations related to the transaction of these things.

5/ Our nation shall incrementally divest itself of all precious metal bullion reserves and museum gemstones at a rate of 3% per year until 2030, and then 2% per year until 2033, and then around 1% per year, thereafter, thus flooding the market for over a century.

6/ No contract for the purchase, sale, deposit, option, safe-keeping or insurance of non-industrial precious metals or gemstones shall be enforceable. Likewise with black-market crypto-currencies and secret unrecorded agreements

7/ Precious metals and gemstones, and crypto currency, and all other criminal currencies shall generally have no legal standing in criminal matters. If these things are stolen, misappropriated, or counterfeited, this shall not be a thing for the police or the justice system to get involved with. This constitution is attempting to shut down the value of these things. Nonetheless, all sales of jewelry containing gold, platinum, palladium, diamonds, rubies, sapphires, or emeralds, and titanium shall be subject to at least a 20% luxury tax on their sale amount.

8/ Free people are supposed to shun precious metals and gemstones as evil things. It is best if no new wedding rings or other jewelry is made from these things. Stainless steel is best if you are going to wear jewelry. The people are advised to use surgical stainless steel for their partnership or wedding bands if they need to use wedding bands at all. Free people are supposed to shun gold and platinum and diamonds as symbols of Arab parasitism and slavery, and secret treachery and exploitation.

9/ The richest diamond lands in the nations shall be nationalized and made into mineral extraction reserves. Also, Government shall remind everyone about how millions of diamonds were fished out of the ashes of Nazi concentration camps and then many were sold for new wedding rings.

10/ It shall be the official policy of the nation to prevent gold from being used as a criminal currency. To this end we neither want to mine all our gold, nor do we want to produce a steady amount. Instead, we want to suddenly and at irregular announce the opening of a new section of auriferous river to gold mining every 1 to 10 years, so as to destroy the ability of criminals to use compact gold as a store of value.

We will extract the gold from our streams by first drilling and sampling and locating the best gold bearing river sections in the nation. As Ishtar typically hides things under the sacred and profane, we expect the main Yosemite valley and the closed parts of the Grand Canyon have some of the best deposits. Then we will sluice the richest areas that have gold. Although perhaps in the Yosemite valley we will just show people our core data unless we need some gold in a crisis. But once we dig up a section of river and sluice the material, we can redeposit the tailing materials a bit downstream. And this is how we destroy the value of Ishtar's gold, its golden lifeblood for thousands of years.

11/ Also, all around the world we should all now look at anonymous gold as an ancient tool of manmade financial crisis, as well as the main lifeblood of the devil/ Ishtar, and

evil on earth. Instead, the path of goodness and freedom from parasitic powers is to switch to 100% domestic management of our nation's money creation process. Then only the people getting the assets in trade for the creation of money. No longer will there be any Arab-frontmen Rothschilds stealing from their management of our treasury.

12/ Each river channel in our nation, shall be sampled every 5km by core drill, and the samples sluiced for gold and other heavy minerals. Special attention shall be given to tracing concentrations back to their motherlode deposits. Special attention shall be given to the idea of quantifying how much gold exists buried in our river valleys.

13/ The river beds and waterways of the following places shall be drilled to bedrock every 2,000m:

a/ The rivers east of Bakersfield, Fresno, Sacramento, and Redding.

b/ All areas of California that have been hydraulically mined.

c/ The area around Yreka California.

d/ The rivers of Yellowstone national park.

e/ Suisun Bay and various waterways to San Pablo bay.

f/ At the foot of the mountains where the water in the various streams slows down.

14/ Regarding shipwreck and buried treasure:

a/ If it was government property, it shall always be government property.

b/ If it was stolen, ownership rights shall only be valid for only 70 years.

c/ Insurance company ownership rights shall only be valid for 30 years, then their ownership rights devolve to the discoverers.

d/ Convicted felons shall have no right to buried treasure.

x/ There shall be no special taxation, fees or charges relating to buried treasure and shipwreck treasure provided archeological excavation on video is permitted to document the discovery. There shall be no prohibition on using metal detectors on public property, or magnet fishing on public property.

NR'97. FINANCIAL ACCOUNTS & TRANSACTIONS

1/ The money in personal accounts of any sort shall only be blocked, frozen, suspended of access, or taken away by the courts, and then after a trial subject to the rules of due process, and subject to the bankruptcy limits stated herein. Anyone who unjustly interferes with a person's right to access to their personal accounts be they a natural person, or fictional citizen, or government worker/agency should be put on trial for fraud.

2/ In order to preserve faith in the financial system, there shall be the strongest toxic waste sized penalties when FCs abuse their powers and illegally restrict personal accounts when they do not have the right to do this. Also those company directors and company staff who pollute the financial system in this way shall quickly find themselves subject to prison time for abusing their power and the credibility of the financial system.

3/ It shall be considered a form of democide for infrastructure companies (including financial and transport infrastructure, and including company directors and managers) to harass their customers for their political/public words or deeds.

4/ People may have supplementary non-personal accounts that are restricted in a variety of ways, such as government poverty aid accounts, private poverty aid accounts, ex-convict incarceration work money accounts, and child support accounts, however, these accounts shall all be considered non-personal accounts.

5/ Neither Government, nor any anyone else shall have any say over what citizens can buy with the money in their personal accounts, or where and how they can spend their personal account money. Personal accounts can even be used for illegal activities, however, the person using the money for illegal purposes may be held to account afterwards and tried for the illegal use.

6/ People with substance abuse problems, gambling problems, mental health problems, and budgeting problems may voluntarily establish restrictions for their personal account(s) where money is reserved for necessities and the remainder of their income trickles out at a fixed rate. The courts shall not have the right to compel people to use restricted accounts except where people have been convicted of a felony and sentenced to more than half a year in prison, or where they have a high use alcohol, opiate, or stimulant license that leaves the person dysfunctional. Also, where a court restraining order exists, and the restraining person has moved to a distant place, the restrained party may be restricted from using their personal account near the restraining party.

7/ All spouses shall have the right to immediate pre-division of shared/community assets and accounts upon filing for divorce. Spouses that withdraw all the money in their shared/community assets accounts prior to a divorce shall be penalized by the courts for taking this illegal self-help measure.

8/ Where transport providers, financial institutions, payment platforms, and similar infrastructure, terminate the account of a customer, the customer shall be allowed at least 90 days to move on.

9/ Each person shall have the right to access their financial accounts with only their face, thumbprint, signature and number. Cards and electronics may be handed out, however, they shall not be necessary. The people shall have the right to have multiple accounts and accounts hidden from spouses and family if they are over over age 16.

10/ Personal checks, travelers checks, money orders, and serialized name-printed cash notes may be used by the people provided they are ID verified at issue and tied to a citizen's identity, and the recipient cannot use them for further subsequent legal tender except in a crisis. Grocery stores, pharmacies, emergency care, and similar critical services shall be required to accept checks and other sorts of emergency transaction money.

11/ The Senate shall review and revise the FINRA rules so as to eliminate all conflicts of interest between brokers and the investing public.

12/ No bank or stock broker or financial account holder LIST OUT MORE FINANCIAL ARES shall handle more than 2% of either the dollar value or customer accounts in the nation for their sector. This shall be thought the easiest way to prevent the too-big-to-fail situations that plagued the old system.

13/ Due to a long string of abuses, stock/investment brokers

shall no longer be allowed to hold, exchange, or trade financial instruments on behalf of their clients. Instead, the trades shall transact via the county recorder system. Also, stock brokers and stock brokerages that execute trades shall not be allowed to trade their own accounts.

14/ There shall be no swaps or baskets of securities sold. All stocks may only trade in their own name on the open market. Those attempting to trade outside of the open market shall be considered frauds and maybe be charged with securities fraud.

15/ There shall be no exchange traded funds that hold exchange traded stocks.

16/ Only real human citizens shall be allowed to short stocks. No party or group working together shall short more than 1/2 of 1% of any company. No short position shall live for more than one year without being entirely closed and reopened at least on the day after their last short positions were covered.

17/ Due to a long string of abuses, stock/investment brokers shall no longer be allowed to participate in the short selling of stocks or other exchange traded financial instruments. Instead, the county recorder system shall take over this rather profitable and mostly idiot-proof niche. There shall be no broker lending of stocks to short sellers.

18/ The county recorder system shall serve as our nation's universal depository for everyone's shares. This system shall halt trading in CUSIPs that don't have at least 25% of shares available for short selling based on capitalization and regardless of the float. We do this in order to reduce the potential for pump-and-dump conspiracies, and also to reduce lending fraud based in falsely pumped-up shares. This is also intended to disincentivize the practice of having small floats to inflate value.

19/ All financial instruments shall be held in segregated accounts within the county recorder system, and brokers and brokerages shall not have any access to transfer or encumber these securities.

20/ The county recorder system as depository shall hold all mutual fund issues and the stocks of the largest 150 companies for a 1% annual fee. The fee for holding the issues of the following 850 stocks shall be 0.5% per year. The fee for holding smaller issues shall be 0.2% per year. These fees are in addition to the other taxes herein.

21/ It shall not be allowed for investment funds to charge more than 0.75% per year in total fees for any account, including the fees for buying and selling shares.

22/ In general all easy to manage veins of gold like the margin lending and stock shorting business, the stock holding business, the blood plasma and fractioning business, and the fetal cell harvesting business shall be run by the Senate for the income. Golden businesses like these shall not belong to any fictional citizen for over 17-years, and they may in fact be ubiquitized earlier than 17-years.

23/ It shall be a felony for brokers borrow against their customer's money and the 1000-year's wages rule shall apply to all conspirators/ beneficiaries that risk client money to make personal bets.

24/ We shall have stocks and bonds, but no preferred stocks or bonds. We shall also have options on stocks and bonds. And we will have commodity futures. But all the other fancy financial instruments that have become popular in recent

decades shall be deleted so that the system is fairer, easier to understand, and harder to cheat and manipulate.

25/ It shall be thought that many thousands of randomly assigned Senators are the least corrupt and hence least expensive way, and the best way to manage our nation's financial clearing houses, payment systems, stock markets, depository system, county recorder system, power system, internet lines, server farms and all the other uniform nationwide group infrastructure systems.

26/ Under the law, if depositories of any sort (Banks, Stock brokers etc.) use assets belonging to depositors to secure a debt and then default, the creditors shall have no claim against the misappropriated/stolen assets. To do otherwise is an absurdity. It is to always allow all depositories to gamble with bag-man partners to steal customer assets. No. This sort of thing where through whatever mechanism or shenanigans the depository is causing the depositors to loose assets shall be void for the purposes of collections.

27/ Those who have lent money to fiduciaries based on unallocated deposits shall have no right to collect due to their foolishness.

28/ Where any fiduciary depository has transacted any unallocated borrowing or lending or their equivalent, or reinvested depositor money in any way, that fact alone shall be sufficient to charge all involved with attempting to pull-off a fraud and stealing client money.

29/ The term "too big to fail" shall now refer to a situation where there is a bailout and all shareholder equity in the company gets wiped-out.

30/ All fictional citizens shall be required to submit a master balance sheet and master profit and loss sheet that shall include all items. There shall be no off-balance sheet transactions or items on these master sheets. Any omissions to a master sheet, whether declared or referenced, or not, shall be considered fraud as if the money was stolen by the people creating off balance sheet transactions and their criminal partners. Also master sheets may have child balance sheets and child P&L sheets within them. However, they shall not be allowed to have any grandchild sheets or more distantly related sheets.

31/ We shall nationalize Vanguard. Then the national government shall take over the function of all the index funds and diversification funds. We shall nationalize BlackRock, State street and any other entities doing much the same thing. Then we shall apportion this as described herein.

32/ When people overpay their bills and accounts, the overpayment shall not be refunded, except upon either the request or agreement of the payor, or when the party holding the money ceases operations.

33/ All matters of bank and account fraud shall be the responsibility of the bank, except where the account holder can be proven to have either cooperated with the fraudsters, or they were extremely careless with their login information.

NR'98. DEBT

1/ No citizen shall ever be jailed, forced to serve the public, or otherwise deprived of their freedom on account of bankruptcy, money court liability, or unpaid debt, including child support. To do otherwise is a form of slavery, and our nation stands

opposed to all forms of slavery.

2/ Debt being an ancient tool of economic parasitism and enslavement/slavery, government shall not institute policy or taxes that financially incentivizes the people to become debtors. Quite the opposite, government policy shall have financial policy and incentives that encourage people to minimize their debt.

3/ Lenders shall not be allowed to advertise and encourage the people to go into debt. Lenders who advertise and encourage the people to go into debt shall suffer significantly reduced rights to the repayment of the money they have lent or brokered.

4/ Lenders shall not be allowed to pay any commission or incentive to those who prepare or bring them business. Lenders that engage in this practice shall suffer reduced rights to the repayment of the money they have lent.

5/ Intentionally damaging collateral before a repossession shall be seen under the law as a sort of theft, a prison crime, if the damage is large and certainly not an accident. If we don't say this, we as a society get so much more waste for absolutely nothing.

6/ Debts to one's employer shall be unenforceable under the laws of our nation where the employer has more than 8 employees. Nobody shall ever come to be in debt to their big-business employer for any reason, and those who dupe the ignorant into such an idea shall be considered enslavers under the law.

7/ Nobody shall ever come to be in debt because of the actions of others including the actions of parents, siblings, or relatives. Those who dupe the ignorant into such an idea shall be considered enslavers under the law.

8/ New debts over 1-week's wages that are not recorded by a county recorder's office shall not be enforceable under the law.

9/ The Senate shall establish a ceiling for interest rates and all loan fees to protect the people from predatory lenders.

10/ When a person voluntarily records a vow of limited wealth (a "volwist's" vow), it shall be just as binding as a court or tax judgement. **zebra**

11/ Heavily discounted debts cannot transact for less than 1/4 of their face value.

12/ No person shall ever be forced to make good on the financial obligations of their parents, children, or siblings, unless they signed a third party debt guarantee agreement.

13/ The money court trail lawyers of the old system (paid on commission) along with the agenda of Ishtar have heavily distorted the way our system works with regard to debt and bankruptcy, and greatly for the worse. From now on, court enforcement of financial obligations shall about recovery of financial losses from financially healthy people, and no longer about driving people into down-the-tubes poverty (or pro-verti). Therefore, the following Bankruptcy seizure limits shall apply with regard to debt obligations and money court seizures:

a/ Liquid assets of 1-year's wages per pre-existing person in each household (up to 5-year's wages) shall be off limits for money court seizure.

b/ Personal residence equity of up to 3 year's wages per pre-existing person in each household (up to 10-year's wages for a family) shall be off limits for money court seizure.

c/ Two personal vehicles of ordinary value, furniture, non-luxury-clothing and personal effects shall be off limits for money court seizure.

14/ The following rules shall apply with regard to the freezing of assets by the money court system for pending trials:

a/ Obtaining a judgement of that size in favor of the plaintiff must be at least 80% certain. Where the case could go either way, there shall be no freezing of assets.

b/ Twice the amount of assets protected by bankruptcy seizure limits cannot be frozen.

c/ If a defendant has an ongoing business, the business' assets cannot be frozen by the court system.

15/ When there is not enough money for a FC to pay obligations, we shall prioritize as follows for equal classes of debt. Each class gets paid off entirely before the next category gets paid.

a/ First comes tax obligations.

b Next are recorded debts to the national government and its treasury.

c/ Next are recorded debts to the county government.

d/ Next are recorded debts to small human domestic investors.

e/ Next are large human domestic investors.

f/ Next are domestic fictional citizen investors.

g/ Next are small foreign individual investors.

f/ Next are large foreign individual investors.

g/ Next are foreign fictional citizens.

h/ Next are large foreign national investors.

16/ Ishtar constantly struggles to eliminate the middle class of its host societies. Then it struggles to thin the upper class until there is nothing but its frontmen at the top of its host's society. At this point, the parasitic Ishtarrians become rich and powerful, while the host's people becomes poor and weak. One of the great shortcuts to this state of affairs is when many people lose their homes in some Ishtar-generated matrix financial crisis and become tenants. This is why we see in so many debt agreements where the owner is confusingly called a tenant. It is because this confusion helps turn a free society of homeowners into one of serfs/slaves where everyone must carefully guard their tenancy owned indirectly by Ishtar. In order to prevent this, we shall say that from now on, all purchase and loan agreements shall refer to the owners/buyer/borrower of property as the owner, and no other term shall be used. If any other term is used for the owner, the loan documentation shall be considered unenforceable and the borrower need not pay back the debt. Also, where terms other than owner are used to describe the person that is generally regarded as the owner by nearly everyone in our nation, the other terms shall be understood as owner.

17/ In our land of the free, we shall allow no form of slavery or nexum. A nexum was a Roman contract where people pledged their freedom as collateral for a loan. So if they couldn't repay their loan, they would not merely go bankrupt, but they would become a slave. And in our land of the free, all contracts pertaining to slavery shall be void, and this is especially so for any sort of debt bondage nexum, or any contract that even resembles a debt bondage nexum. No person in their body, or any of their rights or freedoms shall ever stand as collateral for any loan. Nobody shall ever

become a slave, or lose any of their inalienable rights due to a debt owed.

18/ The maximum cost to any borrower for debt consolidation shall be 3% of the debt consolidated including all fees. Also debt consolidation interest rates shall not exceed the average rate of the debts consolidated.

19/ Loans for the purchase, renting or use of luxury goods, shall not be enforceable and the borrower need not pay the money back.

20/ Vehicle manufacturers and their partners, associates and dealers (if they exist in any form) shall not be allowed to originate loans, but these loans must be originated by entirely unaffiliated third party financiers.

21/ No loan shall require that the borrower maintain any form of insurance.

22/ It is recommended that the people stop viewing enslavement as an all or nothing thing. In truth, there are many shadow forms of slavery and many matrix slave realities based on debt and group enslavement. The following shall be regarded as forms of slavery that the Senate must work to minimize these in our society

a/ Amortized (non-dying) principal and interest repayment schedules.

b/ Overlong loans longer than 20-years.

c/ Vehicle loans longer than 5-years.

d/ Divorce penury fostered by Mideast interests to keep our best men from leaving more than their share of offspring as society needs, and as is perfectly natural for a society. Thus we have a legal system that gives women more than their share in spousal support, alimony and child support. It also uses insanely overqualified and overpriced lawyers to argue about family matters.

e/ Excessively high interest rates and non-compliance penalty fees.

NR'99. PAPER MONEY AND LAVORI

1/ While our nation continues to use anonymous paper money as legal tender: it shall proudly honor the pioneers that made our nation great, and not any of our past 4-year monarchs. We shall honor our pioneers on our nation's currency aegis because many people in the world will regard our currency and our nation more highly, when they are reminded of its many inventors and givers.

The gifts of these great men are the gifts of democracy and freedom and the shared group spirit of America, the land of the free. Each man (or pair) shall be in the center of one side of the bill as follows. Below Patrick Henry's portrait it shall say "The true father of the American Revolution" and "The first man to speak publicly in open defiance of the filthy English monarchy."

The notes shall be as follows:

\$2,000 Patrick Henry & Thomas Jefferson

\$500 Wright Brothers & Neil Armstrong (or A.G. Bell)

\$100 T. Edison & Steve Jobs

\$20 Jonas Salk & George Marshall

\$5 William Knudsen & Henry Kaiser

\$1 There shall no longer be paper \$1 notes, but only \$1 coins the size and weight of a US quarter, but made of non-corroding nickel. 20% of all Kennedy/ Lincoln \$1 coins

shall say on the Lincoln side: "Killed to restore the foreign-run FED". And on the Kennedy side: "Killed for trying to stop the Vietnam war and oil embargo". After 5 years, we shall make other coins that have a variety of warnings to posterity about Ishtar and its sphinx economy, so that when the coins are found in millennia to come, they will warn about Ishtar and weaken the group spirit of Ishtar forever.

2/ If currency notes exist, the design must be changed and all the old notes voided at least every 3 years (2027, 2030, 2033, 2036 etc.) so people don't hoard cash from criminal activities like in the film American Gangster.

3/ Our government shall try to keep one Labor Unit is worth one hour's average wages except in times of crisis. It shall be considered an important thing that one Labor Unit be worth 1-hours wages for the average person because:

a/ It makes people realize that money is really time.

b/ It makes people better understand the value of labor, the true cost of goods and the extent of debts.

c/ It makes it hard for economic parasites to flate and manipulate our currency as a way of profiting from our labors and trade.

4/ To create a headwind for crime, corruption parasitism, to tax torpid capital, to increase net tax revenue, to enable negative interest rates and deflation without debt crisis, the Senate may aim for a stable annual inflation rate of up to 10% for its non-LU secondary currency.

5/ The French slogan: "liberty equality, and brotherhood" shall appear on all currency notes and all military and police uniforms. As well, these words shall appear on all bonds, and virtual bonds, and other financial instruments of the government, as well as all entry points to our nation below the words. Welcome to America.

6/ The Senate shall be prohibited from modifying the basket of goods in any CPI once it has been created. If the Senate an old CPI has become outdated, it may create a new CPI with a new name, and ask people to change to that new CPI, rather than hiding things by tampering with an existing CPI.

7/ The Senate shall start keeping track of the following basic component's price index or BCPI:

1 piece of 2x4x16' building lumber.

3 sacks of cement.

6m of #5 rebar.

1 interior plywood 4x8 x 3/8".

3 gallons of gasoline.

2 gallons of diesel #2 fuel.

3 gallon of milk.

24 medium eggs.

10-kg of pasta.

10-kg of rice.

2 whole chickens.

1-kg of coper wire.

NR'100. SOCIAL COSTS AND INDUSTRY

1/ One of tyranny's greatest competitive advantages is that it does not burden its industry with social costs. Free nations must not exaggerate the value of this competitive edge by shifting social costs onto their industry. Instead they must go in the opposite direction and try, wherever practical, to liberate their industrial base from all social costs. This should

include government reimbursing private industry for the realistic cost of government compliance. If we fail to do this, we support tyranny by helping it keep its competitive cost edge.

2/ There shall never be any fee or taxes to start any business, including toxic businesses. There shall never be any lengthy government or other approval process that takes longer than 60-days to say yes or no to the business or manufacturing activity, or the new construction. Further, detailed plans shall not be required by Government, and all approved plans shall be entitled to a reasonable amount of leeway in their final version that is actually built out.

3/ There shall be a right of all employers to hire people based on talent and merit. All laws that prevent businesses from hiring people on merit shall be void.

4/ Until businesses can hire people based on merit, and start new faculties without an unreasonably difficult Government approvals, our nation's manufacturing sector will be doomed to circle the drain until finally going down the drain.

5/ In our nation, no employer shall ever be allowed to pay any sick leave, maternity leave, healthcare benefits, unemployment insurance benefits, pension fund benefits, or worker's compensation insurance for non-dangerous work. If Government elects to have these things, then our Government must pay for them. Employers shall be required to pay worker's compensation insurance for dangerous work.

6/ The Senate shall regularly inspect the processes of all domestic businesses with regard to labor safety, product safety, output quality, and polluting byproducts among other things. So long as a business complies with the Senate's business rules, so long as it does not actively seek to hide information from its Senate inspectors, and so long as it complies with the reasonable demands that 2/3 of the randomly drawn Senator inspectors elect to make, it shall generally be held innocent of wrong-doing.

7/ Workers and contractors that destroy their work for nonpayment shall be treated just like random vandals.

8/ The Senate shall establish a bonding system for those who participate in our new bonded supply chain system.

9/ We shall aim for a third path between a command economy and a capitalist economy. This shall be called a monitored economy, where the central authority's main function is monitoring the mostly "free" economy and making sure that people are honest with each other and all transactions are recorded properly and the taxes are paid. Thus we can have a complicated tax system that functions automatically on computers in the background. In other words the tax system is complex but it's only complex behind the scenes like a complicated website. The users just use the economy and the system automates all the complexity behind the scenes.

10/ Government shall neither create nor permit, any perverse incentives that drive people to kill others, or to separate children from their families, or to commit other sorts of horrible act.

NR'101. NATIONAL COMPETITIVENESS

1/ There shall be no income tax because income taxes put a nation's producers at a dis-advantage when competing

against nations without an income tax.

2/ All non-money benefits paid or given by employers shall be assessed and taxed.

3/ All goods and services sold in our nation shall pay sales tax, and this shall be regardless of where the goods were made.

4/ Employers shall be prohibited from paying for unemployment insurance. Government shall not harm the competitiveness of the nation's industrial base when it can so easily finance this insurance in other ways.

5/ Employers shall be prohibited from paying for their worker's health care. No insurance company may sell health insurance to employers or employee groups.

However, in dangerous job categories, employers shall pay for insurance for job-related injuries.

6/ All domestic workplaces are subject to inspection by government, and all shall be required to obey its reasonable instructions regarding worker safety, health, product safety, and environmental pollution.

7/ Those working doing dangerous jobs may be required to wear cameras and other monitors.

8/ Employer-managed and employer-paid pension funds shall be prohibited. All existing monies shall now be paid out to the employees.

9/ Government shall provide environmental testing and reporting free of charge to all manufacturing businesses that require testing.

10/ Government shall not require plastic-lined dumps or charge for waste disposal. All dumps shall be owned by the people.

11/ Government shall prohibit the sale of chrome-plated products regardless of where they are made. Government shall also prohibit the sale of other toxic, short-lived, and bad-idea industrial processes as well, regardless of where they are made. It is both bad industrial policy, and bad environmental policy to do otherwise.

12/ All mass produced products and all service providers shall display their name and UPC. It shall be the crime of fraud if anyone but the final consumer removes or hides the manufacturer and origin information of any mass produced product.

13/ To encourage the proliferation of good ideas and good business practices, government shall maintain objective comment, complaint, and ratings boards for all mass-produced products and service providers in the nation.

14/ Government shall maintain website for selling all classes of manufactured goods offered for sale in the nation. Manufacturers shall have the right to force all others to stop marketing their products on this board. Middlemen shall have no right to list on these boards, unless they substantially add to the product. Government shall only charge reasonable anti-spam fees for this service.

15/ All mass-production products and parts sold in our nation shall have an international manufacturer and product number imprinted upon them. They shall also display on their label a UPC, a Senate useful life estimate, the manufacturer and product number, the nation of origin, the overall weight, and the weight of key components.

16/ The standards for materials included in imported manufactured goods shall not be substantially lower than the

raw materials we make domestically.

17/ The Senate shall rate all major products and services. The Senate may elect to stigmatize any product or service sold in our nation for any reason.

18/ There shall never be any taxes of any kind on rail freight. Freight using the road system shall be taxed by an amount high enough to cover the true cost of the road maintenance the freight necessitates.

19/ The government of the land of the free shall construct at least 20 industrial ring railroad zones such as exist in Berlin Germany, and were a principal cause of the two world wars. Once we do this, our industrial land will cost little more than farmland.

20/ Government shall maintain the nation's rail tracks for no charge, just like it maintains the roads today.

21/ Government shall provide railroad car pulling at cost with no provision for payback of infrastructure development costs or impounding for maintenance.

22/ We shall support our manufacturers by giving them legal advantages over middlemen. Our nation shall work to gently wither its middlemen by giving them slight legal disadvantages in comparison to both manufacturers and consumers.

23/ Automation of human labor shall generally be regarded as a good thing. Government shall not discourage the use of labor magnifying robots or automation that saves human work time. Government shall impose higher taxes where a large component is human labor.

24/ Except in duly elected curtailment industries, no segment of the nation's manufacturing base should be driven overseas due to government regulation of some industrial process.

25/ Industry cannot compete in an environment of heavy government burdens and taxes. Also, industry grows fat and inefficient in an environment of subsidy. The best path is for government regulation is to have no net cost or subsidy to industry.

26/ International trade is a very good thing in small amounts. Therefore, our nation shall encourage international trade when it is less than 6% of domestic manufacturing. However International trade is a terrible thing in excessive amounts as it undermines our nation's industrial base and its ability to defend itself in war. Therefore, our nation shall impose various taxes to keep international trade from exceeding 20% of domestic manufacturing. This shall be so both across the economy, and in all strategic commodities and potentially military industries.

27/ Government shall work to assure that the nation's industry can compete in an environment of free and fair trade. Government shall act to protect the nation's industry from both predatory trading practices and from nations that use undervalued currencies.

28/ Government shall do what it can to prevent cartels and fictional citizens from practicing targeted predatory pricing, from driving our producers out of business, so they may jack up prices to exorbitant levels later. If the Senate elects that predatory pricing is occurring, then it shall be required to take action to protect the nation's industrial base. If we fail to do this, we will see our nation's industrial base undermined by the forces of parasitism as so many of our democratic progenitors have suffered.

29/ Where predatory pricing leads to dependence on essential imported goods, the Senate Shall repeatedly try to get domestic production going again.

30/ The Senate shall try to prevent essential product from being made in less than one plant per 10 million people nationwide, unless the Senate specifically votes that this is impractical.

31/ If the Economic Sluice elects that predatory pricing is occurring, government shall nourish that industry by either increasing tariffs, or lowering the sales tax rate for domestic producers, or both. If this is still not enough, the government shall step in and protect the nation's strategic production capacity by blocking liquidation of assets. These strategic assets shall be mothballed by government for decades if need be. No mineral, raw-material, key commodity, or key industry shall be excluded from this protection. Government shall also register the key people working in these industries so they may be later drafted to re-start the industry themselves, or to train others to do so.

32/ The Senate shall be required to give rulings regarding unclear regulations, so the entire government legal code can be as crystal clear and intuitive as possible.

33/ To drive the economy towards labor productivity in inflationary times and tight labor markets, the Senate may impose a tenethly per-capita tax on each worker employed in any of the nation's tight labor market areas. This tax may grow to as much as 20% of the average wage.

34/ The right of workers to not be harmed by their employment, and their employers shall be considered the first right of workers. We shall not compromise this right for national competitiveness as some nations do.

35/ The money society spends on making media to prevent injuries (and especially on-the-job injuries) should be around 1/4 of the money we spend on treating and providing care for those injuries, in each category. We shall aim to be the paragons of worker safety for rest of the world to emulate.

36/ Many people will be awarded Ubiq status for being smart enough to be the first to see and report a dangerous situation.

37/ The Senate shall operate a nearly-free stockless open-to-all physical goods showroom system of "limitless size" for all north American manufacturers. With criminal charges for middlemen posing as manufacturers. The goods on the short spike for traffic, the goods that many people come to look at go in every single show room nationwide. The medium traffic goods are displayed in every county. The low traffic goods are only displayed in the showroom centers associated with regional voting centers. But there shall be no food or beverages in the interchange area, except at the periphery of the secure zone of the healthcare area. We want to keep our cities decentralized for everyone's benefit. Its only healthcare and police, showrooms, and specialized emergency responder techs that go inside the interchange. Also, around the interchange goes the local warehouses and the fast local drop-ship.

38/ For reasons of military defense and fire safety, We shall intentionally spread-out our nation's warehouses into small buildings that are perhaps 10m or 20m wide and 50m long, and 5m tall, one long warehouse after another for perhaps a couple kilometers per side of each loop, fanning out from each interchange and its 100% robotic shipment handling

system. So the warehouses are part of the shipping system, and the shipping system itself has storage capacity. Ishtar and our nation's companies may want lean warehousing (because it leads to supply crisis-es and occasional fat crisis pricing) but we the people want fat warehousing and stable prices. These public delivery system warehouses shall all have minimum 30cm thick tilt-up concrete walls and 40cm thick cambered roof panels. Floating (unattached) cambered concrete roofs are much more resistant to overhead bombing and should be the norm, along with a multi-layer of varied welded wire mesh suspended on arms a varied distance 30-200cm away from the roof. Also, in our cities and largest interchanges, along with the critical core of the rail system and the zip trains should also be covered similarly for reasons of strategic bomb resistance. There should also be always open vents at the eave areas to vent bomb blasts. The reduced size strategic units are also around 12m apart minimum. A central delivery/ supply system offers many advantages, however, military strength isn't one of them. Also, the goods in the warehouse system are supposed to be all mixed up, like on a computer hard drive, with the critical goods scattered among the less critical things.

39/ The civil-defense food warehouses of the townships shall all be township based and open to all citizens for inspection, and adequately insulated and refrigerated/ frozen. The food warehouses shall all be located in the central basements of our townships and hard to reach in an attack due to the concrete floor(s) overhead.

40/ In all warehouses, the outside of the shipping box never says what's inside the box. And all quarries about box numbers can only be made by approve staff and everything that they search gets logged.

41/ The new hospital buildings at the interchanges shall be owned by the people, and there shall always be a 50% surplus of offices and areas for new healthcare facilities. And there will be outer wings that will be rather like older airport hallways and their gates. And healthcare providers will park their 7m wide railcar offices. We will have various sorts of group medical center (up to say 40 doctors) at our interchanges, but that should be the limit in size.

42/ We shall delete most for-profit hospitals, and other healthcare middlemen. Instead the government will build out new hospitals and healthcare rental areas at and near the interchanges. And there shall be twice the amount of floor area as the current healthcare office system uses. And the county governments will buy and run the expensive equipment. The far away parts of the medical center get rented to physiotherapists, dietitians, dentists and other non core healthcare people. However if there is a crisis, they may be required to give up their space to emergency uses.

43/ The best non-emergency doctors paying the highest procedure taxes go on the other side of the platform from the new 2nd locations of our 34 Regional voting centers. The money they bring in shall be used to increase the care offered for 90% off to all who need it. Also, these 34 special healthcare areas shall not treat infectious diseases, and they shall require a doctor's script to get in.

Companies will put their equipment in various railcars than can go around to various interchanges for a time. Also, within the extra large healthcare area, infirm people will be able to

take various sorts of slow, self driving electric vehicles.

44/ There shall be no standard business licenses for felons. Felons can only have businesses in certain industries, and with each customer acknowledging that they have a felony conviction. Everyone doing business in our nation must pass our nation's business practices test to get a business license. We shall have 4-levels of qualifying business license, each with progressively more study required:

a/ Junior business license. Valid until age 18 (1-weeks of study)

b/ Basic adult business license (2-weeks of study)

c/ Management business license. (1-year of study)

d/ Consulting/expert business license. (5-years of study)

45/ In order to make it easy for people to dip a toe into doing business, everyone shall be allowed to engage in business under their own name and national ID number without registration. Also, it shall not be allowed for people to do business under multiple names to avoid repetitional harm for misconduct, or to avoid being found.

46/ In order to prevent the extreme public nuisance of name shedding, and the bad business behavior this practice leads to, it shall not be allowed to change one's name, or business name, or establish sub-names, or temporary names. Also:

a/ This rule includes all business owners who marry. These people must keep their original pre-marriage names in marriage.

b/ The only exception to the name change rule is for the witness protection program.

c/ Where people establish a business that fails, and the same group (or a similar group) goes on to establish a new business, that new business must be named in a d/ Roofers and other sorts of business prone to low quality work and name shedding shall be required to use the name(s) of the business owners for life.

e/ All businesses shall have a year of establishment included in all advertising and marketing material, wherever their name is displayed.

47/ All elements of the insanely costly Americans with Disabilities act and all other existing Government and fictional citizen protections for disabled people shall be repealed, cancelled, and void with immediate effect. If the Senate wishes to reinstate any of these laws or rules, then it may. However, the 100% self-driving and curb-less design of the new townships, including especially their central tower shall be thought to be enough in and of itself.

NR'102. EMPLOYMENT & DOLE PAYMENTS

1/ We don't want to have a pleb underclass making political decisions. We read over and over again about how in ancient Rome, there was a frequently-rioting pleb underclass substantially dependent on government subsidized grain and caesar/kaiser rolls. This was because the teamster/taxi mafia controlled the price of land transport on the super narrow and super congested Roman roads. So it was cheaper to get the expensive imported farina (far-in-eh?) which was supposedly from Egypt, but actually it mostly came from "Scythia" land of the scythe (today Ukraine). Thus Rome was frequently mastered from outside by foreign grain and oil suppliers, vegetable oil suppliers. Again, We absolutely don't want to

have a pleb underclass making political decisions. If we allow this, they we give their masters much power over our nation and our government.

2/ In Rome, the masses of poor plebs frequently drove the government into buying boatloads of grain from supposedly food-rich Mideast interests at multiples of the going price. Obviously, we must try to go in the other direction and never let our poor be a tool of foreign domination. This is why we shall now change democracy (all democracy) so that the all the people getting government money for poor people (but not including child support money), all these people shall lose their right to vote and their right to protest. And this shall be so for 7-years after ending government aid money. Democracy shall no longer include the parasitic feedback loop where dole recipients are actually allowed to be a constituency.

3/ It shall be thought a flawed democracy where the people receiving government money because they supposedly can't work also have the right to vote and protest and participate in that democracy. If we allow this, then these people become a single-issue constituency in our democracy, a constituency that can be exploited in a coalition by immortal foreign interests that will always be there. Here we note the way the slave sates in the 1787 "constitutional convention" of the United States signed on to just such a coalition. This coalition absurdly enshrined slavery in the prototype constitution of the land of the free. History records that this devil's trade involved the critical support of the slave owning state delegates in exchange for instituting a new centralized or federal constitution that had only 91 lawmakers instead of over 2,000 lawmakers that we had prior to 1789. If we allow poor dole recipients to vote, then they will only care about increasing the money that they live off of. They will then be ripe for any scheme that comes along that offers them more money: for example confiscatory communism, or unbalanced trade, or dumb loans or foreign aid gifts. Allowing felons to vote leads to a similar single-issue groups, a constituency of convicted felons and their families that only want criminal leniency, and to hide what they have done from the world.

4/ While we may be stingy or generous with our benefits to the people who are not working, it shall be thought foolish to allow long-term dole recipients to vote. Therefore, every person that has lived on public dole money (but not including child support money) for more than 7-years of their adult life shall lose the right to vote in our nation's elections. This however shall not be applicable to people who were under age 18 at the time the dole payments were made.

5/ We shall have a robust national dormitory shelter system in peripheral areas for homeless people and for disaster evacuations. All bunk bed mattresses are plastic covered.

6/ Those collecting welfare, public aid, insurance money shall never get more or less money depending on where they live. The poor are supposed to live in the cheap areas, and the ones that don't shall get no more money.

7/ Citizens on long term disability benefits may live overseas in a cheaper foreign nation such as Mexico, or Jamaica, or Thailand and collect benefits while living overseas. However, their benefits must be reduced by 20% if they live overseas.

8/ It shall be the emphatic opinion of this constitution that poor dole recipient people do not belong in our cities where

they become nuisances. They must be relocated to exurban areas and rural areas and wilderness areas. So around half of our nations dormitories for the homeless and disaster refugees, and youth-hostelers will be in remote wilderness areas. These will have communal shared picnic dinners every evening to connect these commonly disconnected people better. Some places will tend towards otherwise homeless people, some will tend towards traveling youth and national parks and a day's hike between, some to elders, some to refugees. To start, we will have beds for maybe 1% of the population in our nationwide dorm system, or around 3-million beds to start. There shall be no charge for citizens to use the dorm system. Foreign workers and tourists using the dorm system shall have to pay 1-hour's wages per night each. We shall expand the system to whatever is needed. These dorms are so cheap and so pro-social, and so beneficial to raising the living standards of the poor, and so self-policing, that we shall shift all of our efforts at aid for the poor into this system where the poor are housed in dormitories with big lockers. And we welcome travelers and refugees who want to mingle in. And where there is a disaster all the regular dorm residents have to move on and make room. There will be desirable and less desirable places in the system and when there is a disaster, the regular transients shall be expected to move on and make room for refugees.

9/ There shall be no long-term assistance for poor people who live in our nation's top-half most expensive areas/communities, and all aid recipients shall be required to move to a bottom half community if they are going to stay on public assistance more than 1-year in their lifetime. Also, all the people who live in expensive areas and who are on public aid: these people shall not get the place that they're living in due to the reapportionment, but a less valuable place shall be substituted.

10/ Those who are scrape by on government aid and disability payments shall be allowed to move to less expensive countries so their money goes further. In fact, Government shall encourage this and require the offshoring. It shall be thought wise for government to offshore our homeless housing, and long term welfare and disability aid to poorer places such as Puerto Rico, Mexico, and West Africa. This way we can pay people less and their money can go further and eventually maybe we can just cut them off overseas for being a dole leach.

our nation's longer term welfare housing.

11/ Everyone on welfare, for over 4 years must now be moved overseas after 12 more months of collecting welfare. They must go to Puerto Rico, or West Africa if they are going to keep collecting their money. Also, on Puerto Rico everyone eats at the prison cafeterias, while in Africa, they get ingredient stamps for the commissary. If they want to continue to get government money after 12 months, they must move. Also, the amount of payment will be considerably less overseas because it is cheap to live in these places.

12/ We shall also use our new federally condemned portions of Puerto Rico as an alternate place to deport foreigners to. Also, to be clear, once we pay each of the Puerto Rican people living in a Puerto Rican county 1-year's US wages, they shall be required to leave and go to some other part of Latin America to live and become a citizen of. Puerto Ricans

shall no longer have the right to vote in our elections or enter our nation.

13/ It shall be thought better if we offshore much of our long-term medical and old age care to overseas, rather than we bring in many low-quality care givers. Also, this will mostly be the last resort care paid by government and insurance, and the dark star ignored people.

14/ The disability payments system and all insurance companies must support those who are clearly injured if they want to stretch their money by living somewhere cheap.

15/ To be perfectly clear, people who are not born in our nation shall always be prohibited from receiving any form of dole money from government. It shall be considered felony fraud when non-citizens accept government dole or government child support money under any circumstances.

16/ Regardless of the above, many poor people will be helped by the following new benefits:

a/ All children (and their food preparer) shall get fed through either ingredients stamps, or a school meals program.

b/ All children get a standard housing voucher amount.

c/ All internet media for children must be approved by the Senate and is all free to watch.

d/ All learning materials used in schools must be ubiquitized and free for everyone to use.

e/ Schools will be open for much more of the day due to voucher system requirements. Thus children can be sent to school up to 13 hours a day. This is thought to be much better than letting them grow up on the streets. Thus working parents will save a great deal on child care.

f/ We will have healthcare that is mostly free of charge for people under age 21. This is funded by taxes on small bang for the buck healthcare procedures like plastic surgery.

g/ We will have free transit, so poor people can get around and go work for free.

h/ Housing will be much cheaper going forward due to land reform and factory made buildings.

17/ We shall now stop providing food stamps that people can spend as they like on almost any food in the grocery store. Instead we shall provide our poor with ingredient stamps that can only be used for food ingredients such as: frozen chicken legs/ thighs, and no other meats. They can also buy frozen butter, fresh milk, medium eggs, fresh +10-lb. bag potatoes, fresh +5-lb. bag carrots, fresh bag +10-lb. onions, fresh cabbage, fresh bananas, wheat flower, corn flower, +5-lb. grits , +10-lb. rice, rice flower, domestic dry unflavored noodles, dry domestic lentils, beans, and split peas, low cost vegetable oils, frozen corn, frozen peas, frozen spinach, formula, baby food, and diapers, and this is the complete list of everything that needy people will be able to buy with their ingredient stamps. It is by intent that the ingredient stamps foods mostly need preparation. The need for preparation is a critical aspect of using ingredient stamps instead of using food stamps that can buy things like sugar drinks and crisps. Allowing only economical foods that need preparation will:

a/ Get many people off government food aid, because they're too lazy to cook.

b/ Cut how much money each recipient needs by a factor of 3 at least.

c/ Let us enlarge the system with the per-user savings.

x/ Except in same sex immigrant camps, ingredient stamps

shall not be used by people who have foreign accents.

18/ Each county government shall make its own fresh baby formulas and sell these to mothers for only 20% more than the price of cow's milk. Only fresh milks shall be used in making this formula. No powders shall be allowed. Some varieties will not have cow milk, or soy, or wheat, etc.

19/ Except for whole milk for children, and baby formula for small children, all beverages and beverage mixes shall be ineligible for ingredients stamps.

20/ People that have been receiving Government poor aid for longer than 90 days (not counting government payments for children) shall not be allowed to keep any sort of pet if they are going to remain on government aid for the poor. Those who are blind and paralyzed shall however be exempt from this rule. Ingredient stamps shall not be used to buy any products with any sort of container deposit. Also, people with a BMI that is over 25 shall get 25% less ingredient stamps, and those with a BMI over 30 shall get 50% less ingredient stamps.

21/ Government shall no longer give any money for the poor to obtain housing. Government shall have dormitory shelters for the homeless, but by design these shall involve at least 50 bunks per room, (except for mothers of young children).

These are not supposed to be nice. In fact, they are supposed to be not nice and noisy, and lack privacy. And they are supposed to be used only instead of sleeping on the streets. And most of the time, the homeless are going to have to take a special early morning, and late evening bus to and from the remote dorm location to the town. This is intended as a way to climb out of homelessness. It is also a way for our cities to more easily absorb new people and thus remain more competitive. Also, the temperature is always set a little too cold in the winter and a little too hot in the summer if there is chilling. The bathrooms must always be shared. This is so people are driven out of these free public housing places.

This is how we keep the freeloaders from clogging up our disaster assistance housing. This is how we get everybody in our country off the streets, because the homeless will live in them and they will take the bus out to these dorms, which are not really worth anything because they're not nice and they're far away. But if you really need housing, they're a godsend.

22/ Everyone that receives government aid (either money, or ingredients stamps, or free medical treatment, or homeless sheltering, or any form of government aid or insurance, or subsidy for the poor or needy: All must not only be ID verified by the county recorder system, but they must sign a oath of identity and citizenship. They must also sign an oath of disability if applicable. Lying in either case shall be a felony.

23/ When people steal from the welfare system, they are not cheating overall society. They are stealing from the needy, because the welfare system has a limited budget, and all the money stolen is for people who really need it. Therefore we shall have double penalties for this crime. And when illegal aliens steal welfare money from our needy, they shall suffer triple criminal sentences in work camp paying our poor back 3-times over for what they stole from them.

24/ The penalty for faking disability to either government or to the courts shall also be 10-years. This shall include people who work while collecting disability, and people who are recorded jumping around, and exceeding their supposed

disability to a significant degree.

25/ Job destruction and re-creation shall be considered the right approach to long-term national competitiveness, national wealth building, and full employment. Keeping and sharing jobs that already exist shall be thought to be the foolish approach of ignorant luddites, and short-term thinking that is bound to fail every time a new batch of fools fall for it. When technology ruins the market for something by automating its production, this should be considered a good thing, not a bad thing as the legendary Luddites of Nottingham so foolishly held.

26/ Government shall focus on making jobs, rather than mincing over the rights of people terminated from the various commercial enterprises of our nation. Government shall default to giving employers the broadest possible rights to fire workers at the employer's convenience. However, Government shall strive for accuracy, transparency, and justice in recording why and when people are terminated from their jobs and to give accurate reviews of the employers doing the firing.

27/ Government shall try to have the least burdensome laws practical concerning hiring and firing workers. Hiring, firing and employment shall not be taxed, charged, or burdened in any way by government, government mandates, or any third-party fictional citizen such as a labor union, insurer, or other source. Except for wages owed, and contractual obligations, neither government nor any third-party fictional citizen such as a labor union or other body shall not compel employers to pay anything to anyone when they hire, fire, or lay off workers.

28/ There shall be no employer-paid unemployment insurance benefits for people employed for less than 30-days regardless of the circumstances. Thus when employers are wrong in taking a chance by hiring someone, all they will lose is the cost of training and getting the new person up to speed. They will not be burdened with the cost of paying unemployment benefits for trying people out. To do otherwise is to tax industry for taking a chance and hiring people. The cost of training and integrating new workers will largely keep this policy from being abused by employers to evade unemployment insurance costs. Also, unemployment insurance should not be regarded as a thing for short term workers.

29/ To make the nation's labor force easier to employ, government shall track the employment history of all workers. Government shall also attempt to maintain and audit objective employment comment boards and objective worker ratings for all workers who want to be rated. It shall do this to encourage the hiring of good, hard-working people and help to make the people more hard working.

30/ Government shall establish detailed rules for worker conduct, employer conduct, and also for the hiring and firing of workers. However, government shall not intervene, unless the laws or an employment agreement has been broken.

31/ To help reduce unemployment, we shall say that in most cases, government and the courts shall not impose huge fines on employers for the unpredictable and one-off misdeeds of their employees, unless the employer's instructions, statements, actions, or omissions in some clear way caused the problem. When government or its courts do

fine employers for the misconduct of their employees, this amount shall generally approximate the employee's pay. And the only time they shall go near bankrupting the business shall be for violations that are repeated in the face of formal notice by government. In recent decades this sort of fine was used by our foreign competitors to eliminate competition from our nation. Instead, under this constitution, the penalty for business misconduct shall only be a reasonable deterrence, so we can save and protect our businesses from destruction by foreign competitors that seek to be highly-profitable monopolies.

32/ Government welfare benefits to adult men and adult childless women are supposed to be difficult, annoying, time consuming and a bit humiliating. Homeless dorms are supposed to be devoid of privacy, completely asexual, regimented, inspected, tracked, video-recorded, time-wasting, noisy, and perhaps a little bit worn-out and ugly. Those receiving public benefits shall be required to use location tech and go for counseling and haranguing as a condition of their government aid. Those recently released from incarceration, and those with opiate and amphetamine drug licenses may also have to do these things.

33/ As a condition of receiving public dole money, the recipient shall give up all privacy rights with regard to their personal consumption tax spending account and other financial accounts. Also, both people on recently released from incarceration, and people receiving government benefits may be required to watch a certain amount of government propaganda and skills media in order to collect their benefits.

34/ Government shall not spend money primarily to "create jobs". Government may however spend money for useful projects that just happen to create jobs in times when jobs are needed.

35/ Each person receiving government unemployment insurance, or adult welfare (but not child support payments for conforming children), or public disability payments, or private disability payments must use a 24-hour location/movement tracker and be subject to auditing by auditor scouts working on a commission for finding fraud. These auditor scouts shall not be allowed to call, contact, or knock on the doors of the people they are auditing. The auditor scouts may however move in next door and follow people to record behavior that indicates disability/welfare fraud.

36/ Each person getting government unemployment insurance, or adult welfare benefits must also check in on 5/7ths of days between 6:00am and 9:00am at one of the county recorder system's handprint check in kiosks.

37/ After 4 weeks, unemployment benefits shall decline to 75% of their maximum. After 8 weeks they shall decline to 50% of their maximum. After 12 weeks, they shall decline to 25% of their maximum. After 16 weeks, there shall be no unemployment benefits.

38/ Government shall focus on national competitiveness and the creation of wealth rather than the sharing of the wealth that exist. Wealth sharing shall only be a safety-net, and a short term one at that. After one's government-paid unemployment insurance runs out, the only other means of public support shall be in the county homeless dorms.

39/ The workers of our nation shall be guaranteed the right to a mechanic's lien when they are not paid. In the event of a

legal dispute, the employer can post bond or other reasonable guarantee for the amount in dispute with the court until the dispute is resolved. Mechanics that file liens excessively may be prohibited by the court from using the mechanic's lien process for some years. Also, there shall be no right construction or maintenance workers to take away what they built, once it has been installed and added to the property. It shall be a crime to do this. Contractors must rely on the mechanic's lien process and shall not be allowed to come back and smash up their work. This is always considered vandalism.

40/ Those working in lifting and stooping jobs shall get back X-rays prior to starting their work and once every 2-years. If these X-rays show disc compression or other lifting related problems, then these people may not work in a lifting or stooping job. In general, due to the cumulative, preventable, and hard to verify nature of back injuries, no worker injury payments shall be paid for back injuries resulting from lifting or stooping. No worker injury payments shall be paid for repetitive stress or back injuries that come from desk jobs, or office work. Fugitive injuries, and injuries with no significantly objectively observable symptoms shall not be covered by worker's insurance. All prior back injuries shall be audited if they are going to continue to be paid. The Senate shall produce disc-compression standards for all back-related injuries. Those who are on permanent disability and unable to work shall also be considered as unable to leave their house to go for walks, to travel, or to go shopping. Where they do these things, they may be disqualified from continued receipt of benefits.

41/ The OSHA shall compile detailed safety and anti-injury media for all occupations. All workers shall be required to watch all relevant safety media for their occupation. All workers must pass all OSHA safety tests with a 100% score in order to be covered by worker's injury insurance. No worker may be punished for refusing to work outside his certified safe area. When people in a non-lifting job (such as a desk job) injure themselves lifting or stooping on the job, it shall be considered their own fault. Those who have played American football shall no longer be allowed to work in lifting and stooping jobs, and when they do, any back injuries shall be considered their own fault.

42/ All employers, even casual employers, shall be liable for worker injuries when they employ workers that lack the appropriate OSHA safety certification(s), or pay wages outside the government's wage payment system. Also, all private insurance policies shall be unenforceable for employment paid outside the government's wage payment system.

43/ Injuries to trained and OSHA tested people using government approved and inspected machines and worksites shall generally not be the responsibility of the employer, unless the employer has asked the employer do something dangerous.

44/ OSHA shall charge nothing for worker certification, or for inspections of factories and other workplaces where the same thing is done day-in and day-out. However, OSHA shall charge twice the average wage for custom construction job-site inspections, and inspections of workplaces with highly variable working conditions. Where OSHA inspects remodel

construction worksites, it shall inspect the site twice as often as new construction sites.

45/ All employment recruitment and placement people shall pay the prevailing commission sales tax on their income from making employment placements. Regardless of contract stipulations, no employment recruiter shall be paid anything until at least 90 days after their placements start work. If the new employee quits or is terminated for any reason before this time, no payment shall be due to the recruiter. Where the work period is for less than 90 days, the recruiter must still wait 90 days to be paid. This constitution considers commission recruiters and especially worker poachers as an economic nuisance that should be gently pushed out of existence by the legal system. They shall not be prohibited, but only discouraged by the system.

46/ No employee severance package shall be payable until after 6-months of employment. No employee Government unemployment benefits shall be payable or receivable until after 30-days of employment.

47/ People receiving government aid money for being poor should never get any cash or cash-like money to spend as they like. Instead they can only get non-transferrable, non-cash benefits like ingredient stamps, rent vouchers, school vouchers, children's cards that can only be used to buy certain sorts of things in limited amounts for certain children. Also, we imagine cash cards that can only be used on certain universal SKU numbers.

48/ Government shall be free to prohibit public benefits recipients from spending their Government aid payments in certain areas. In general, Homeless people shall not be allowed to use their digital money in urban areas, unless special approval is granted because they are working in those areas sufficiently justify spending money. Those receiving Government aid may only spend their money on appropriate purchases such as food ingredients and basic healthcare products, and never on alcohol, tobacco, beverages, snack foods, sweetened foods, premade foods, and nutritionally expensive foods or any form of beverage.

49/ Those people living on public or private dole/aid found selling or trading the things they buy shall be barred from government aid for life. They may also be charged with public benefits fraud. Government shall have sting operations that attempt to lure dole/aid recipients into selling or trading their dole goods. Government shall also pay rewards for tips and video evidence of aid fraud that lead to convictions.

50/ All recipients of public benefits for the poor shall be required to have their bank-accounts/cash-card-accounts inspected weekly by the public benefits computerized eligibility system. Also, the public benefits department shall be allowed to know and examine everything the recipient of public aid spend their money on.

51/ Adults living on public or private dole/aid shall not be allowed to have a drug, alcohol, or tobacco licenses, or use/engage in these things. They shall also not be allowed to have a prostitution license.

52/ Government aid money, shall never be taxed, as this hides the true cost of the government aid.

53/ Government bunk barracks shall be free to live in, provided you are either going to school full time, or you are doing 2 hours of military fitness training a day, or you are

clearly disabled, or you are over age 60. Except for bunk barracks, government shall no longer be allowed to build, buy, mandate or subsidize new affordable housing for the people. Government bunk barracks are also supposed to be remotely located and inconvenient, but free and normally plentiful. The bunk barracks system will also be used for disaster housing and as under 25 youth hostels.

All other affordable and poor housing must come from the abandoned, and mostly worthless buildings of the nation. Except for homeless dorms, government should not be building any new housing for the poor. All affordable housing shall either be in new or old 50+ to a room dorms/ barracks, or mommy dorms. Government shall be prohibited from building new housing for the poor except 50-person dorm rooms.

54/ Everyone on government aid for more than 2 years shall be expected to move to housing in other, more abandoned parts of the nation. Those on government aid for more than 4 years shall be expected to move to Puerto Rico, or Ecuador or Central African Republic, where it will be cheaper to give them money. All existing laws and policies concerning affordable housing shall, be removed from the legal code.

55/ Government shall no longer force builders/developers of any sort to make any provision for affordable housing anywhere in our nation. No real estate development project (Government or private sector) shall require any fee, charge, deposit, or provision for affordable housing units. All existing government agencies providing affordable housing shall be shut down, and the staff fired and banned from government employment for life. All existing laws and policies concerning affordable housing show, be removed from legal code.

Furthermore, with regard to housing policy, government shall not restrict any construction in any way to achieve its aims. Instead it must exclusively rely exclusively on payments, subsidies and bonuses to builders to achieve its aims.

56/ Government shall only be allowed to provide certain things for people who are needy:

a/ Free ingredients for food preparation.

b/ Free land for building townships.

c/ Free education and free benefits for children.

d/ Abandoned buildings in abandoned parts of the nation, buildings that are not being used by citizens and are sitting empty. Note, this does not apply to prime locations and even average locations.

57/ Not including the money we pay for retirees and socialized child support, in no event shall the number of people on public assistance exceed 20% of the number of workers. Also, this number shall initially be set at 10%. Here we note how ultra-corrupt South Africa has an in improbably massive three to one, or 300% leach ratio.

58/ The main flaw with public retirement money shall be thought that it is just too much money, and it is too tempting for lawmakers to give-away, or use (for the kickbacks or to please their blackmailing masters). This sort of raiding shall be thought to be the main reason why public retirement funds like the Social Security Administration do not work, and also the main reason why they will never work over the long-term. This is because lawmakers will always figure out an excuse to spend and steal the giant fund of everyone's retirement money. Therefore, it is always wiser to have everyone

manage their own retirement monies under the rules of the national government.

59/ It shall be a misdemeanor to collect either government or fictional citizen aid and then sell that aid or those goods for money. Where this occurs, that person shall get locked out of the aid system for life in addition to any work camp or jail time they get for the fraud.

60/ Only citizens shall be allowed to use government or fictional citizen food banks.

61/ The court system shall not have any jurisdiction in matters of hiring and firing and wrongful termination, and sexual harassment, and all employment related conflict resolution at cost. Instead, it shall be OSHA administrators that manage this via written claims and responses. Also, employers may be force to pay people up to a few months of their pay when they were wrongly fired, employers shall never be forced to re-hire or reinstate people.

62/ All government aid programs except those related to socialized child support shall have a random home visit at least once a year for all recipients.

63/ There shall be no utility programs where light users are subsidized by heavy users. There may however be lower rates for light users.

I — HEALTH — FAMILY — WOMEN

NR'103. HEALTHCARE ALLOCATION SYSTEM

1/ Because demand for healthcare is inherently infinite and the supply of healthcare resources is inherently limited, the healthcare industry eternally suffers from shortage conditions. To reduce this eternal shortage, the Senate shall make a comprehensive list of all standard treatments and procedures that are known and accepted. Then based on observable, measurable evidence and repeatable results, the Senate shall rank these treatments in terms of cost effectiveness for the various age groups and risk classes of patients. At the top will go the least expensive treatments with biggest pay offs (the “big-bang” treatments). At the bottom will go the most expensive treatments with the smallest payoffs (the “small-bang” treatments):

a/ Low cost, big-bang procedures shall be provided by government for free, and the doctor shall be paid entirely by government except for a minimum healthcare co-pay of 10%. All of this co-pay shall be paid from the patient to government. The Senate shall however waive this deductible/copay for prenatal care, people under age 25, recommended vaccinations and other treatments it elects to encourage. Except for these conditions that the Senate elects not to tax, it shall be thought necessary that people as patients must always come out of pocket by at least 10% in all insurance policies.

b/ Medium-bang procedures shall be untaxed and unsubsidized, and the doctor shall keep all of the money he charges the patient.

c/ High cost, small-bang procedures, shall be taxed and the government shall get most of the money and the doctor shall get only some of the money.

d/ For no-bang procedures, like cosmetic surgery, the government shall get nearly all of the money, and the doctor shall only get a tiny part of the money.

2/ All taxes from luxury healthcare procedures shall be applied to expanding the coverage of the least expensive big-bang procedures with the biggest payoffs. In addition to this, government shall allocate a sliver percentage of GNP.

3/ Care herein shall mean all procedures, treatments, and other forms of medicine. As follows are the various care levels and their taxation. Insurance policies shall only be sold for Tier-2, Tier-3, and Tier-4 healthcare. What is covered and

how much is to be paid by the policy holder shall be decided by government, not the insurance company.

Tier-1a healthcare = highly cost-effective care that shall be paid by government with no deductible or co-pay.

Tier-1b healthcare = highly cost-effective care that shall be paid by government but with a 10% co-pay.

Tier-2 healthcare = moderately cost-effective care that shall neither be paid by government, nor taxed.

Tier-3 healthcare = slightly cost-ineffective care that shall pay low luxury sales tax.

Tier-4 healthcare = moderately cost-ineffective care that shall pay moderate luxury sales tax.

Tier-5 healthcare = highly cost in-effective care that shall pay high luxury sales tax.

4/ The Healthcare Sluice shall be the ultimate arbiter of what tier a procedure is for the people in various age groups and risk classes.

5/ Tier-1 healthcare shall only use ubiquitized drugs and other forms of ubiquitized healthcare IP. Later Tier-2 healthcare shall only use ubiquitized drugs and other forms of ubiquitized healthcare IP.

6/ People shall be assigned an overall health score that represents their age and any risk classes. This shall take into account all the tobacco, alcohol, mafia drugs, and sugar they have logged. This may also offer activity monitoring for those who want to raise their healthcare score in this way. There may also be daily charges for excessively torpid people. All the forgoing will be combined into a single 4-digit, xx.xx number that will act as a coefficient for one's age.

7/ Those who have been habitual smokers or alcohol abusers, mafia drug users: Those who are old, diabetic, torpid, obese, or big sugar consumers: All of these groups may see lower healthcare scores. These will tend to see lower healthcare scores at a younger age.

8/ Many ailments will be listed in many sub-categories with great precision in regard to age and other risk factors for patients.

9/ Government shall be generous with healthcare coverage for those in the first 2/3 of life, and it shall be miserly with healthcare coverage for those in the final third of their life, and especially those who appear to be near the end of life.

10/ Government shall provide the most cost effective treatments, such as vaccines, prenatal care, and basic children's healthcare for free to all citizens with no deductible, or copay. For the next group of treatments there might be a deductible and a 10% co-pay, while the least effective, luxury treatments might be taxed at over 800%.

11/ All cosmetic surgery and cosmetic treatments shall pay luxury sales tax, except that:

a/ This shall not include people disfigured in genuine accidents, or medically necessary excisions of body parts, but shall include people with self-inflicted injuries.

b/ Cosmetic surgery of the thorax, abdomen, pelvis related to childbirth shall not be taxed.

c/ Post child-deliver cosmetic surgery to a woman's reproductive organs, belly and breasts shall also not be taxed as a luxury, even if it is done multiple times, and even if the mother had a caesarian birth. Also, post child-delivery reconstructive surgery to the womb area and vagina shall always be included for free with the cost of child delivery.

d/ It should be widely known that in most cases, mothers generally have vaginas that are a bit smaller than they were born with. Women that have not had children shall not be allowed to have vaginal tightening surgery.

e/ Double breast augmentation surgery and vaginoplasty shall not be available to women until after they have had a child.

f/ To be clear, all hair transplants, hair restoration creams, hair restoration and prevention drugs, and hair removal/elimination procedures (which shall be performed exclusively by technicians) shall be taxed highly as cosmetic luxury healthcare.

g/ People over age 50 shall pay an extremely high rate of luxury tax for cosmetic surgery unless there was a medically necessary excision or genuine accident.

h/ It shall be a felony to inject cosmetic fillers into people that do not come from the person's own body. Also, no form of cosmetic filler shall be allowed on the healthcare billing system, and as such payments shall not be collectable under the law. However, the payer may legally demand a refund for any reason if they provide proof of payment and credible evidence of this sort of healthcare fraud.

i/ There shall be no limb lengthening surgeries.

12/ Taxes shall be due for all luxury healthcare procedures whether performed in our nation or in another nation. It shall be the crime of tax fraud for citizens and other taxpayers of our nation to obtain luxury healthcare procedures overseas without declaring them, and without paying luxury tax on them. The Senate may prohibit certain sorts of medical procedures that consume too much of our scarce medical resources.

13/ Government shall charge 20% sales tax on all insurance sales. However risk pools with variable tenethly bills shall not however be taxed. Risk pools shall however be regulated to assure that they properly diffuse risk, but they shall not be taxed. Also when buildings burn in fires, the owners shall have the right to rebuild them using the original materials and methods. All they have to do is notify government which checks to make sure the repairs are done correctly. Allowing this will greatly reduce the cost of rebuilding in most cases.

14/ Few things increase healthcare costs like making them 100% free to the patient. Only procedures clearly necessary by consensus shall be tier-1 healthcare.

15/ It shall be the official policy of our nation to eliminate insurance wherever practical due to the waste and the cost increases that it causes. To this end all insurance monies shall pay a 20% sales tax right off the top. Also, anyone calling for a reduction in this tax should be regarded as a corrupt.

16/ To help eliminate the use of health insurance, the national government shall give each citizen a credit card account with a limit equal to 1-year's average wages. This card shall pay 1% over the most common real estate loan rate for healthcare debts. However, the account can only be used for tier-1 and tier-2 treatments and drugs.

17/ To determining the healthcare bang for the various procedures, the Senate shall take into account all relevant lifestyle and health factors. No risk group shall be able to lobby for exemption. Our government shall be run by reason and cold logic everywhere, especially here with healthcare. Maximize shall be our mantra, and we shall allow no

healthcare risk group to cheat the system. The only exceptions shall be:

a/ Mothers of children under age 7 shall get 1.5 times the normal amount of healthcare resources.

b/ Birthing complications shall be counted as involving two people, a new person, and a breeding woman, so they shall be allocated 2.5 times the normal pro-rata share of scarce healthcare resources.

18/ We shall not squander the scarce time of our expert doctors doing the work of technicians. We shall train healthcare specialist technicians in a variety of narrow areas including certain narrow areas of diagnosis. We shall maximize the use of specialist technicians in healthcare. Medical procedures that can be done nearly as well by specialist technicians, must be done by specialist technicians. This includes early screening, initial diagnosis, and minor cutting procedures done under local anesthesia. This also includes prescription of limited drugs related to the technician's narrow range of specialty. When the nation's know-everything doctors do the work of technicians, they shall only get paid technician's wages.

19/ The Senate shall set the standard compensation levels for all widely performed healthcare procedures. All healthcare providers must charge a consistent and declared across-the-board multiplier on these amounts at all of their healthcare facilities. There shall be no discounted or negotiated prices for healthcare services.

20/ Government shall maintain a national healthcare payment system for all healthcare services, including pharmacy, dental, psych counseling, physiotherapy, massage, chiropractic, and lawyers. Everyone paying or getting paid for things even remotely related to healthcare must use the government's national healthcare payment system for all transactions. This includes all health and bodily insurers and all insurance payments on any side. It shall also include all lawyers and all court mandated payments for injuries. In our nation, it shall be felony tax fraud to buy, sell, or offer healthcare services except via this system. Also, where young and attractive people do a massage that is some part of the treatment, or the massage is done in private, the services shall not be on the healthcare system, but the prostitution system.

21/ The full cost of all healthcare charges and optional permutations must be agreed to in advance in writing on the national healthcare payment system except where this is simply not practical due to an emergency or complications, or other reason. This shall include all third party services such as testing and imaging.

22/ We shall calculate how much healthcare spending is associated with each risky activity listed at the end of this paragraph. Then we shall try to figure out how much each ski jump, each cigarette, and each hour spent playing football costs. We will do this for all the risky behaviors and lifestyles, and sports and other activities like drinking, drug use, obesity, etc. Then we shall require that everyone engaging in these risky activities pay a reasonable healthcare insurance fee (in advance) for engaging in these dangerous activities. Thus the more dangerous activities will not survive once the high cost of injury is priced into the sport. Some of the activities/sports are: skiing, water skiing, hang gliding, acrobatics, doing flips,

tumbling, parkour, bicycle stunts, skateboard stunts, football, soccer, basketball, boxing, wrestling, ice hockey and each of the various martial arts such as Taekwondo and all other dangerous activities. Also, injuries from power lifting with free weights, Lacrosse, downhill skiing, ice hockey, bobsledding, mountain climbing, gymnastics, volleyball, cheerleading, bicycle racing, and motor-cross, among all other high risk sport activities. All of these dangerous activities shall have an injury insurance fee that shall be due for each hour that people engage in the sport. This is so the government works to drive the most dangerous sports out of existence. Also, all crazy mountain biking and other sports and stunt videos shall be stigmatized if they drive the public towards taking extreme risks for the purpose of making videos.

23/ No non-smoker shall be compelled to pay for any smoking related healthcare. All healthcare for illness related to tobacco in the current year, shall be entirely funded by tobacco and tobacco substitute taxes in the current year. Likewise, all healthcare for alcohol related illness shall be entirely funded by alcohol taxes.

24/ All rail interchanges shall have a new major hospital (but not the infectious disease hospitals). These will be owned by the county government. Then the various county governments shall all lease space directly to doctors and groups of doctors and their office managers (who will work for the doctors and groups of doctors). Also, there shall be no Fictional Citizen ownership of hospital buildings. Large FCs shall only have limited rights in regard to owning and operating hospitals and other clinical operations.

25/ To lower the cost of hospital care, and assure capacity in times of crisis, the Senate shall provide at least 10 hospital rooms per thousand people spread around the nation. These may will generally be single occupancy, except in time of crisis, however all rooms shall support 4 beds in a crisis, with at least 90cm between beds. Next to each room we shall have a closet for our extra beds on wheels and beddings. These are folded up and stacked up one on top and right next to the room for when they are needed. We will foster an over-supply situation, not even counting people sharing rooms.

26/ The hospitals at our rail exchanges are going to be several times larger than today's hospitals, which serve some 55,000 people each on average. These hospitals shall be owned by the various counties, which shall rent patient hotel rooms for 2.5 the nightly rate for hotels in the 80% percentile. The county shall also least medical offices and exam rooms, lab rooms, ICU rooms, operating rooms, rehabilitation rooms and medical office rentals in the various hospitals run by the various counties.

27/ The Senate shall standardize ubiquitized versions of all the most common healthcare equipment and software that it has no IP protection and has standard designs that can be manufactured by anyone. We shall do this for all healthcare equipment such as: MRI and CAT scanners, dialysis machines, EKG, EEG, surgery room kits for standard rooms.

28/ In general, the hospital equipment, the expensive hospital equipment facility shall be owned and maintained and secured by each county. There must always be an abundance of healthcare space and equipment and emergency techs in case of a mass casualty event. This overabundance is also very convenient for managing

healthcare costs. For one thing, it allows us to phase out the ripoff private hospitals that have arrogated an exploitive intermediate role between patients and doctors. At the start of this constitution, all for profit hospitals shall pay a special 5% income tax. At the start of year four, they shall pay a 20% income tax. At the start of year five, they shall pay a 30% income tax, and so forth until year 12, when there will be a 100% tax.

29/ Where healthcare equipment is still expensive or scarce, (for example in Africa) the expensive equipment shall be made available 24/7 to the public. Also, in all of these 24-hour places, there should be a replica of the equipment/room so people can practice getting into the scanner, and being scanned. This way the time slots can be smaller. The people working in imaging healthcare where there are not enough time slots shall buy up to 100 daily 1-patient time slots to allocate the scarce equipment.

30/ When people go to the infectious disease clinic, they shall take a private car, not the train system.

31/ Regarding psychotherapy and mental counseling:

a/ This constitution regards formally educated psychiatric and psychological talk-about-your-problems counseling as over 95% fake, and an industry of charlatans and quacks.

b/ The only test for being licensed as a talk-about-your-problems psychological counseling therapist shall presume 2 years of full time college study with no thesis. Further, this study shall focus on the more practical and measurable goal of getting people to be more functional, rather than the less practical and harder to measure goal of getting them to feel happy or good about themselves. The people who work at getting people to feel happy or good about themselves shall be called soothe-sayers, and shall not have any qualification.

c/ All talk-about-your-problems psychological counseling therapists, regardless of their education level shall be called counsellors, and the term psychologist shall no longer be used. Talk-about-your-problems psychological counsellors shall not bear any title and shall be referred to by their first name, or their first and last name, or the title counsellor.

d/ All talk-about-your-problems psychological counseling costing over twice the average wage per counsellor shall be subject to a luxury tax of 66%. Each counsellor shall be available 16 hours a day, every day to their patients, however emergency phone consultations shall cost twice the usual rate.

e/ There shall be medical doctors (psychiatrists) that prescribe drugs for psychiatric patients, however, these shall not be allowed to provide outpatient counseling for patients. They also can't meet with out-patients more often than 4 times per teneth, or more than 10 times per year. So Pych drugs from doctors shall now be a thing almost entirely about people institutionalized in mental hospitals.

f/ Talk about your problems psych counsellors shall not be allowed to refer people to psychiatrists. All communication between Psychiatrists and counsellors must be in recorded writing or video files via the healthcare system.

g/ All counsellors, and psychiatrists shall be required under the law to report criminal evidence, admissions of felonies, and planned felonies. They must also truthfully answer questions in court about their patients if subpoenaed. There shall be no occupations where people confess their sins or

crimes, or fantasies to another person in secrecy. All these jobs shall be thought of as fake, intelligence gathering operations.

h/ When the courts refer an individual that has harmed others for psychiatric evaluation, this evaluation shall be done by a panel of special criminal psychiatric experts, normally retired career police officers with a supplemental 1-year education in these matters.

i/ The courts shall have no power to order political figures, politically active people, political writers, and rich and powerful people to undergo court-ordered mental health evaluation or treatment.

32/ This constitution shall be of the opinion that most forms of mental illness comes from not enough struggle in one's life. So this constitution holds that the easiest, cheapest, and most effective cure for what ails people's minds is long hours of hard work where people can't think about their troubles. Then after some time, they forget about their old self.

33/ At the start of this constitution we have over 18% of GDP being spent on healthcare. This is far far too much, and nearly twice the going rate.

34/ The first 2% of GDP we spend on healthcare will certainly have a big bang for the buck. And if we spend 4%, this too will certainly have a big bang for the buck. But beyond 4% of GDP, where is the point of diminishing returns exactly? At what point does added increments of spending stop materially increasing longevity and comfort? The Over-Senate shall be required to annually adjust where the point of diminishing returns is for healthcare spending. And this shall always be expressed as a percentage of GDP. How much are we extending people's lives with our healthcare system? Given healthcare's fastidiousness about studies and statistics, why are we not told what the statistics say about each procedure? It is thought that the budget for healthcare spending will go below 10% in the future, and perhaps below even 9%.

35/ Day-halved schedules shall be thought to be doubly important in healthcare, so that expensive equipment and facilities are used twice as much, and also so that ordinary healthcare services are available 11-hours a day, every day where there is sufficient nearby population. If too many healthcare facilities are open on one set of days and not on other days, then the Healthcare Sluice shall step in and assign days to ensure that most healthcare services are available 11 hours a day, every day, at some nearby interchange, 8am to 7pm.

36/ Some of the money for disaster preparedness shall fund a corps of on-call people who have completed the half-year training for serving as a backup emergency triage and stabilization nurse. These people will get part-time pay for keeping up to date on the training and for possibly being activated based on how far away they are from a crisis situation.

37/ With building ownership, all spending goes into two categories: Ordinary expenses and capital expenses. In the national healthcare budget, there shall be a similar mutually-exclusive division between our treatment spending and our long term care spending. All of our tax revenue from taxing small-bang treatments shall be spent on bigger-bang treatments, not on long term care. Long term care shall in

fact, not be considered part of the healthcare system budget-wise. Instead it shall have its own budget as "Long-Term Care"

38/ Our first priority will be to get and keep our short-term healthcare system the way we want, and not worry so much about the long-term care side of things. The short term care side of things should be regarded as terribly important for government to get functioning correctly. The long term care side of things should be thought of as an impossible task for both man or for the governments of men, or any institution because the needs and wants are quite infinite and the costs prohibitive.

But we will also create a similar allocation system for longer term care. However, long term care, shall not be considered to be really government's responsibility, in the way that ordinary healthcare is. In fact, long-term care for elders shall be thought a thing that government shouldn't provide much of — except of course where people have paid in money, and this money is being credited back to them. This is so that people will work more and either save for their retirement, or they have children as an alternate retirement strategy.

And we should not underestimate or minimize this important source of pro-vid•hence for mankind. Mostly eliminating long term care from the public menu, this will make the people work harder and provide better for this themselves. It will also drive many to have children that will take care of them when they get old. This is not the domain of government, this long term care. And the elimination of long term care from the public menu augurs toward a better society where government does not include old age and disability pro-vid•hence, except for combat wounded, be they military or police combat. However, government shall generously invest in care robotics just like it will generously invest in robotics for awful and demeaning jobs. Government shall also generously invest in machinery and robotics for preparing fresh ingredients into dishes. Also, Government shall be required to establish offshore facilities for our nation's long term care obligations.

39/ Instead of having a bunch of hard to understand terms for the various sorts of doctors and nurses, we shall have 20 levels of medic, with 1-5 being technicians, 6-10 being nurses, 11-15 being physicians, and 16-20 being 2-levels of specialist, medical teachers, and two levels of researchers. We shall have six different kinds of nurse, nurse-6, nurse-7, nurse-8, nurse-9, nurse-10, with nurse-6s being assistant nurses. Nurse 7s are low-level regular nurses, and nurse-10s being a nurse practitioner, equal of the lowest level of doctor, doctor-11.

40/ The Senate shall run an automated universal healthcare booking system where people make appointments to all doctors using an online login interface — with their personal data, billing data and medical history already entered. Then there will be no forms or data entry after the system registration. All of this data shall be presented in a standard format for all patients at all healthcare providers. Healthcare providers may view the patient data as permission has been granted by the patient. Healthcare appointments made more than 30 days in advance must pay an extra sales tax of 3%.

41/ No, patient check-in shall involve more than scanning

one's ID. The system shall have all patent history based on up to 4 levels of access. There shall be only universal Senate-approved conditions for:

- a/ Authorization to do procedures.
- b/ Cost of procedures.
- c/ Risks and disclosure of information.
- d/ Rights waivers.
- e/ Tissue use.
- f/ Disputes and litigation.
- g/ How to contact/remind the patient.
- x/ To preserve all-critical privacy with regard to second opinions, everyone shall have the right to give a fake name and pay cash in advance for their treatments and tests. In fact payment in advance should be the norm for all healthcare consultations and tests

42/ All sleep studies and similar semi-medical treatments and testing shall be done by technicians after a half-year course of study.

43/ The Healthcare Sluice shall produce detailed videos on all medical procedures from the standpoint of the various people involved in the procedure including both healthcare providers and patients.

44/ Most basic initial emergency trauma-care shall be provided by Government for no charge. However, trauma care for all of the following sorts of injuries, from the following activities shall not be paid by Government. Where an injury is from one of the following, the injured party shall be given critical care (but no more) and then billed by the public, and this bill shall exist as a tax lien on the injured party. Also everyone engaging in one of the following sorts of activities must have a license, and to get a license, the health/injury insurance must be paid:

- a/ Motor vehicle and electric vehicle accidents.
- b/ Bicycle accidents.
- c/ Injuries while intoxicated.
- d/ Basketball, football, ice hockey, soccer and other ball-sport injuries.
- e/ Stunt related injuries.
- f/ Parkour, jumping, and rock climbing injuries.
- g/ Skateboarding, roller skating, and scootering injuries, or injuries from using a vehicle with wheels smaller than 40cm.
- h/ Racing injuries.
- i/ Motor vehicle accident injuries where the driver of the vehicle carrying the injured person was intoxicated.
- j/ Skiing and snow boarding.
- k/ Other sorts of injuries the Senate may want to later add.

45/ The public shall provide free injury and death insurance for all public transit, trains, public busses, public mini-busses, and all system-operated vehicles with coverage amounts equal to that of individual vehicles. All individual vehicles including cars, motorcycles, bicycles, skateboards, e-scooters and the like shall require private insurance so that the true cost of the mode of transport is paid by the user. Also, individual vehicle insurance shall be required to pay a taxed at 200% over and above the cost of healthcare. This is so that the personal pain and suffering caused by each vehicle's injuries can be more viscerally perceived by potential users. The money generated by this useful tax shall be used to offset other government expenses and shall especially not be used for injured parties.

46/ Our nation's dermatologists shall be for people who have clinical conditions of the skin such as rashes, eczema, skin cancers, and the like. We shall not allow these doctors to be distracted by non-medical commercial opportunities created by the credibility of their medical license. Therefore, all dermatologists shall be prohibited from selling (or recommending, co-locating, or co-affiliating with others selling) non-medical, and non FDA approved cosmetic treatments such as the following:

- a/ Wrinkle treatments.
- b/ Skin rejuvenations, or tightening potions.
- c/ Skin peels, scrubs, washes or abrasions.
- d/ Skin tightening surgery.
- e/ Cosmetic injections.
- f/ Skin cleaning, or any other form of non-medical procedure.
- x/ We shall have technicians for diagnosing and freezing areas of skin, doing biopsies, and doing simple excisions. So the field of dermatology will have about 80% less cash flow going forward.

47/ Urologists shall not be allowed to take new patients for the treatment of STDs, or urinary tract infections, or bladder infections, unless the patient was referred by another doctor. Instead, UTIs, bladder infections, and STDs get treated by either a general practitioner, or a UTI/STD technician working with the opt-in STD testing and information system.

48/ We shall have special Government run infectious disease clinics using outdoor pods for those with colds, flues, viruses, fevers, and are probably ill from an infectious disease. This shall include all diarrheal illness. Thus our hospitals will no longer have especially sick (infectiously sick) people in them. Our infectious disease clinics should be small but very expandable. This gives us the option to send more pods on rail cars from all over the nation in cases of localized outbreaks.

49/ We shall have 6 types of clinic/hospital:

- a/ Communicable diseases. These have a large setback and are never co-located with other healthcare facilities. We don't want the people with communicable diseases around everyone else. So these people get their own facilities that are served by vehicles with easy to sterilize interiors.
- b/ Birthing and newborns. These are next door to our hospitals, but not in them. Birthing centers have most sophisticated equipment, but not as much as a hospital. Birthing centers may send patients down hallways to the regular hospitals for surgery and unusual testing.
- c/ Trauma and other emergency care should be totally central and located at our new interchanges.
- d/ Schedules surgery and recovery should be remote.
- e/ Medical consultation can go anywhere.
- f/ Immune deficiency should be remote and spread out and away from all the other places.

50/ In general, the expensive hospital equipment facility shall be owned and run by the county, and the county shall also own the office space around this. So the radiology equipment and remote imaging center will be owned by the county and provided at built cost. The operating rooms which shall be greatly excessive to ordinary demand, these shall be owned by the county as well and leased at built cost by the hour to qualified doctors. The surrounding office space shall also be leased at built cost to doctors. All of this to kill off the private

hospitals entirely.

51/ There are supposed to be enough ubiquitized MRI machines, CAT scan machines, and other medical equipment that 90% of the time, everyone can get this sort of care immediately on a walk-in basis. This is so that during times of crisis, we have enough capacity of this sort of equipment.

52/ There shall be two sorts of medical school. Over 80% of doctors will go where people chosen for their ability to follow and implement the Western medicine model. Less than 20%, the top students shall go to a school where they also learn to better adapt the standard medical protocol.

53/ Medical accuracy can't beat inclusion.

Until everyone is being treated for all long-established procedures, it is hard to justify requiring specialists or even doctors doing those procedures. Whatever lives the expertise saves, getting everyone treated normally helps many more people.

Step 1: Everyone gets treated or screened.

Step 2: We squabble about the qualifications of the healthcare people doing the treatment.

54/ Those who are incarcerated shall only get Tier-1a healthcare. They may also buy higher tiers of healthcare if they or their family can afford it.

55/ All testing swabs shall be sterile and shall contain no DNA or anything except cotton or paper. It shall be a felony to swab people with swabs that secretly contain drugs or other chemicals, including preservatives.

56/ Mid and late career healthcare professionals shall always have some of the most extreme rights of free speech in relationship to their area of expertise. It shall be a felony to censor mid and later career healthcare professionals that have dissenting opinions, and this especially so when the censorship is a matter of public health policy, or it comes from drug/ treatment companies, or government.

57/ The Senate shall ban many types of plastic surgery and injections. However, women shall generally be allowed to do all of the common post childbirth cosmetic procedures they want, to their to their vaginas, belly areas and breasts after giving birth. Lip injections and other collagen injections shall be prohibited. Also, in general, the Senate shall heavily disfavor cosmetic surgery.

58/ Senate healthcare juries shall decide on organ harvesting, who gets the organs. They shall also decide on all the medical decisions that are not clear-cut and by the book.

59/ Emergency room staff and the healthcare intake gatekeepers shall all live in 1 to 4 bedroom apartments (depending on family size) within 100meters of their emergency room. These staff all get free high end lodging, however these professions are also on-call 24 hours a day, every day of the year. Thus if there is a sudden disaster, each hospital will be able to instantly triple or quadruple staff. Each major hospital shall also have an apartment building within 300meters where doctors with trauma certificates and imaging people, and certain others get subsidized housing in exchange for being on call for disasters.

60/ Patients enter their healthcare system ID number and other pre-visit information. Then they go for whatever pre-treatment tests are required, if any. Then they make their appointment, and then they pay the appointment fee in order to make their appointment. Then they get assigned a room

and a time to meet their doctor. But doctors do not need any employees to either get to this point, or to record the visit, or to handle patient charges or billings for additional services. At the medial offices, the patient scans their ID card to enter the building and to get into the building section, and to get into the final office.

61/ For the sake of efficiency, the healthcare system shall favor tele-medicine over in person medicine, and it shall attempt to gently drive people into using tele-consultations first (often solving the problem), wherever this is feasible.

62/ Where treatment is by the hour/minute, the medical treatment time clock shall start the moment the consultation video shows the doctor asking the patient about their problem in the examination room.

63/ All the examination and non-surgical treatment rooms shall work like a membrane, with two doors. Patients enter on one side of the room and leaving on the opposite side of the room. The doctor has a multi button remote controller. Towards the end of the prior patient's visit. He presses the button to call the next patient to the inlet door. This unlocks the exit door and the prior patient leaves. Then the doctor presses another button and the screen calls the next patient into the doctor's office, also unlocking the door and flashing the patient number. A recorder system bill for additional services gets automatically sent out the moment the patient leave the doctor's examination room. So it will be much easier and cheaper to set up shop as an independent doctor, or a group of doctors.

64/ There are two approaches for offering inherently scarce healthcare resources. The first approach is where the system uses expensive insurance, cost multiplying lawyers, and overpriced doctors to compensates patients for bad outcomes. The second approach is where all procedures are offered without warranty. The Second approach is much less expensive, perhaps half of the cost of the first approach. Therefore, we shall now adopt the second approach and then we will be like the other developed nations of the world in terms of total national healthcare costs in proportion to GDP.

65/ Everybody shall get triage within two minutes of arriving in an emergency room. Triage occurs before check-in.

66/ We shall divide what is now called healthcare into 2 division: Division-1 is cures. Cures get their own separate funding, and organization, and they are also considered to be high priority. Division-2 healthcare is treatments, and long term care. So we are going to totally fund and give priority to division 1 healthcare, but at the same time, we are going to try to phase out and offshore as much public spending and insurance payouts in division 2 healthcare as possible.

67/ The well worn path is a key element of many industries like passenger airlines, early education, and healthcare. In fact the well worn path is everything we want from all of these areas. And while airlines and education do not normally result in disputes, healthcare services frequently do. So because of the well worn path in healthcare, we shall now stop using lawyers and the money court system for healthcare disputes and instead start using specialist healthcare paralegals to settle healthcare disputes. Some will specialize in coverage, some in billing, some in misdiagnosis, some in poor outcomes within procedures and some for deviating from standard healthcare procedures. Also, all common healthcare

procedures on the well-worn path must standard pricing, and they're not allowed to deviate from this pricing.

68/ Emergency and infectious disease healthcare of children can be authorized with one parent signing, but the signature of both parents shall be required for all other healthcare matters.

69/ There shall be no imported drugs (including Mafia drugs) that do not pay a 50% sales tax as a customs duty. Our nation must maintain its independence with regard to the medical treatments it requires.

70/ Those who care for our physical health shall not be allowed to report to government about mental health as this is a potential backdoor to political power.

71/ No general writing about medicine by declared lay people may be considered practicing medicine without a license.

72/ All of the best tooth sealing and filling materials shall be ubiquitized so that the people don't cut costs and use cheap substitutes instead of using the real thing.

73/ Those who vaccinate other people without permission, especially children and elders. She'll lose their license to practice medicine and to work with children.

NR'104. TREATMENT TRACKING SYSTEM

1/ There shall be a national treatment database where all of the following are tracked and checked-for in each patient.

a/ Current and past drug prescriptions.

Potential overdoses

Prescription drug abuse

b/ Patient Health syndromes/diseases.

c/ Predictable Adverse patient reactions.

d/ Predictable Adverse conflicts between drugs.

e/ Prescription drugs returned for refund/destruction.

f/ Mafia drugs used.

g/ Tobacco used.

h/ Alcohol used.

i/ Sugar intake.

j/ Documented exercise.

k/ Nutritional supplements.

l/ Overall patient health rating.

m/ Other surgical and non-surgical treatments.

n/ Consent to treatment.

o/ Information and disclosures.

2/ If we have such a national drug tracking system, there will be much less remembering on the part of both doctor and patient. This will make everyone smarter with regard to their prescription drug use.

3/ All prescriptions shall be made through the unified national prescription system. No healthcare provider may steer patients to any pharmacy, or have any dealings with any pharmacies or drug companies. The prescription system will then send the patient a copy of the script and a QR code. The patient will then forward the QR code to their pharmacy of their choice. Then pharmacy technicians will fill the prescription and send an all-ready alert to the patient. Then before the patient picks up the prescription, they will have to have watched the drug instruction video if any. Then the patient pays for the prescription, and verifies ID. Then the patient gets a second bar code/ number and gets the prescription from the pharmacist.

4/ If a patient, or a person on prescription drugs experiences any fever, rash, or other symptoms they report it to the system. If they just started on a new medication a week earlier and their symptoms exceed parameters, they may be told to stop use and see their doctor again.

5/ Under this system both excessive prescribing and excessive use will be easy to spot. Also, all prescriptions and reactions will be available to all subsequent doctors and pharmacists working with that patient without omission or error. Under this system, many commonly harmful self-service drugs such as paracetamol will no longer be fully self-serve, but will be dispensed by a pharmacist's assistant after checking the person's drug and alcohol record, and whether they have watched the Senate's tutorial for that drug.

6/ To reduce drug use where we want drug use minimized, and to get the unused prescriptions out of circulation, the system will give 90% refunds for certain unused drugs, which are destroyed upon return by the user. The ability to do this is yet another advantage of ubiquitization.

7/ When a new prescription is entered, the system asks if the patient if they wants to use their default pharmacy, or if they want to use another one nearby, all nearby prices shall be displayed. Prescriptions, once in the national prescription system may be used at any pharmacy in the nation that either carries that drug, or that can order the drug. If the pharmacist has any questions, he is supposed to contact the doctor's office by any means except fax. The use of ridiculously antiquated faxes in medicine and pharmacies shall be prohibited entirely as soon as practical. All prescriptions at all dosages shall use a uniform SKU# for that drug and dosage.

8/ Most prescriptions go out directly by the doctor's orders and are filled according to the patient's instructions in the patient's app. Sometimes the patient must have a video call with a pharmacist, or a live consultation, or an education video must be watched under view monitoring before the prescription can go out. Except for first use, and commonly abused drugs, there shall be no prohibition on prescriptions being mailed from pharmacy to the patient, this especially for older, disabled, infirm, and contagious patients.

9/ There shall be three levels of dispensing non-specialist pharmacy: primary, secondary, and tertiary. All interchanges shall be required to have a primary pharmacy, all townships shall be required to have a secondary pharmacy. Tertiary pharmacies are for ships and office parks and remote micro-towns and the like. The primary pharmacies normally use the package delivery system to deliver to the secondary pharmacies, however in emergencies they may also use other ways. It shall not be allowed for non-pharmacists to visit primary pharmacies.

10/ Pharmacies shall be prohibited from selling homeopathic and placebo drugs except with a prescription.

11/ All medications still justly on-patent, and judged as effective by the Senate, and taken long-term shall be ubiquitized. All medications that are off-patent, or unjustly on-patent (like synthetic insulin) or they are judged by the Senate as ineffective, shall have their patent rights (their IP, or intellectual property rights) cancelled.

12/ All patents for all existing psychotropic and psychiatric drugs, and especially drugs prone to psychotropic recreational abuse shall be cancelled. This shall include all

serotonin drugs, all amphetamine-like drugs, and all psychoactive therapeutic drugs. None of these existing drugs shall have any IP payments associated with their sales price from now on. All of them shall have their IP nationalized and they shall be cheap, and nobody shall ever make any money on prescribing them.

13/ Due to widespread toxicity, ineffectiveness, super-extreme cost, kickbacks, and abuses by the pharmaceutical industry regarding cures for cancer, all current cancer (including all forms of chemotherapy and radiation treatments) all IP rights shall be cancelled.

14/ All existing IP for treatments of chronic late life diseases and health conditions shall be nationalized so that the Senate can tell in an honest way, which ones are valuable in which ones are not. The pharmaceutical industry has proven itself to be wholly deceptive, and for that reason shall be considered as betraying its mandate to help the people. Also, the people who are involved with faking the reliability of drugs or vaccines that are actually harmful maybe charged with crimes against humanity.

15/ No opiates or synthetic opiates, or addictive drugs shall be allowed to have patents or any sort of IP protections.

16/ Where opiates or other addictive pain killers are typically dispensed to a patient, and the patient wants marijuana instead, the patient shall have the right to take marijuana instead of the other more addictive and deleterious pain medications.

17/ Everyone over age 70, and those with extremely painful terminal health conditions shall be allowed to take opiates without listening to the anti-addiction propaganda otherwise required when healthy people opt for these licenses. All hospices shall be required to dispense opiates and have dosage technicians available around the clock

18/ There are already far too many things to remember in healthcare. Therefore:

a/ All drug brand names shall be cancelled and only the generic names and manufacturer names shall exist going forward. Where doctors recommend or prescribe a drug or cream, they may only give the generic name. Where pharmacists fill prescriptions, they shall only show/use the generic name on the label. All drugs must use their one generic name forever. This name must be easily pronounceable for English speakers. There shall be no more names like Xifaxan allowed. No drug patent or drug name protection shall be valid for more than 15 years.

b/ All drugs shall be known by their international generic name and co-referenced in the system using the international 10-digit SKU-number of that drug's generic chemical compound. The first 4 numbers indicate the family of the drug, and the last 4 numbers indicate which drug in that family. The middle 2 numbers indicate how dangerous the drug is. All pills sold everywhere on earth shall have uniform numbers in them or on them, indicating what drug they are, their dosage, and expiration.

c/ All prescription drugs shall be referenced by both the generic drug name and the SKU-number of that drug/ dosage scheme. All drug names shall be both easy to pronounce, and easy to spell, and there shall be no names like TAMIMOGENE LAHERPAREPVEC, IDARUCIZUMAB, or ISAVUCONAZONIUM SULFATE. Also, in no industry shall we

squander our mental overhead on complexifying names or words like these.

d/ There shall be no trademark protections for individual drug names other than the generic name. The use of brand names for individual drugs shall be prohibited by the healthcare system. Indeed, the prescription system shall not have a data entry window for drug brand names, or for specifying any particular drug manufacturer. The drug manufacturing company shall have its brand name, but the drugs themselves shall only have one name, the generic name. To do otherwise is to unnecessarily complicate healthcare for no good reason with duplicate names. The practice also helps drug companies to hide the immense harm they cause from time to time.

e/ No manufacturer may offer any drug in any name but its generic name and number. All patients shall have the right to select any approved drug manufacturer they wish for their drugs without the prescribing doctor's involvement.

f/ The various drug manufacturers and distributors may charge different prices for their drugs, however, the money paid to the pharmacist for filling a prescription shall be the same regardless of the prescription amount. We do this to eliminate pharmacist bias towards expensive drugs. Also drug makers cannot charge more in one nation or location than in another. Here we note the way the drug Sovaldi for Hepatitis C is \$4 in per pill in India and \$1,000 in the US.

g/ All prescriptions shall be entered to the healthcare system. Then the patient will find a pharmacy. Then the pharmacist uses his side of the web application to download the prescription. Thus there will be no calling of doctors, because the system will not allow ambiguity of input.

h/ Pharmacists shall never give any gifts to the doctors that are prescribing drugs. Drug manufacturers and distributors shall never give anything to the pharmacists or physicians dispensing their drugs.

19/ Generic drug manufacturers shall have no liability for the drug chemicals they produce, so long as they are the proper chemicals and pure enough. This includes all drug manufacturers of ubiquitized drugs.

20/ All existing intellectual property rights including trademarks for replacement insulin are hereby nationalized.

21/ All existing intellectual property rights including trademarks for all HIV drugs are hereby cancelled.

22/ DUTS shall support mandatory drug use accounts for people required by the courts to stay on certain medication regimens. This shall be accomplished by the patient taking their pills on video via the app. Mandatory drug use shall only be required by individual court order and as a result of a criminal conviction. Mandatory drug use shall always be a thing like jail and never a thing that can be required of free citizens.

23/ Only the manufacturers of prescription drugs shall market their prescription drugs over the Internet, or via email, text message, or telephony, and all such marketing must be approved by the FDA during the first few weeks after the drug's approval. Mafia drugs shall not be marketed in any way by anyone. It shall be a felony to market drugs illegally.

24 It shall be a 20-year felony to sell counterfeit pharmaceutical drugs. It shall be a life-in-jail felony to sell drugs laced with dangerous drugs, opiates or other Mafia

drugs including synthetic cannabinoids. This includes laced marijuana, all forms of non-pharmaceutical hashish and other extracts.

25/ Everyone selling marijuana buds as a middleman shall be registered and shall be required to test each batch and send it for drug contamination testing prior to sale. Middleman marijuana traders shall be carefully regulated, while growers selling their own marijuana shall be much less regulated, provided they have no non-family employees.

26/ All drugs must be sold under the same name internationally, and for the same price to all customers nationwide and internationally. No pharmacist shall ever make any markup or profit other than the national standard dispensing service charge for each prescription filled. There shall never be any marketing incentives, or profit-sharing or other corrupting fees paid to pharmacists.

27 Opiates that are commonly abused shall not be dispensed by pharmacists but by the Mafia drug dispensing system. This way all medical opiate users will see with their own eyes how people get addicted when they pick up their pain medications. They will also watch the same anti-addiction media. All prescriptions shall be valid at all pharmacies (or all Mafia drug dispensing dispensing houses as applicable), once the prescription has been entered into the national drug use tracking system. With drugs that are related to addiction and abuse, refills must be dispensed as instructed. Where drugs are not subject to abuse, refills may be dispensed all at once if the patient requests.

28/ All prescriptions shall be to be entered into the system before the patient leaves the office, so that any errors can be detected by the patient while the patient is able to deal with them in person.

29/ All valid prescriptions shall exist in the prescription system. It shall not be a crime to keep prescription medication in other containers provided the medication originally came via a prescription. The possession of old prescriptions shall not be a crime. It shall be extremely difficult to prosecute people for driving under the influence of domestically prescribed prescription drugs that are being used according to the directions on the domestic prescription.

31/ Doctors shall have a duty to warn patients of any risk associated with the treatment they are receiving, as well as ensuring that they are receiving treatment without coercion, from either government, employers schools, or anyone else, including family members. The Drug use tracking system shall work for all sorts of patient information, disclosures, acknowledgments, and risk release documentation. In fact, this system is supposed to replace all communication between healthcare provider and the patient including the billing.

32/ The Senate shall ban or control all harmful drugs commonly abused by body builders and people trying to lose weight.

33/ The Healthcare Sluice shall monitor all healthcare providers an treatments for a variety of negative outcomes including the death of patient. Where the Senate finds excessive negative outcomes, it must investigate.

34/ Government shall have voluntary pharmaceutical audit technicians that visit people's homes and inventory their home medicine cabinet for pharmacists to review.

35/ No healthcare professional shall ever suffer any harm for documenting or exposing any factor in related to general patient health. Those who attempt to harm healthcare professionals for documenting or exposing factors related to patient health may be punished under the anti-censorship laws.

36/ The Senate shall keep detailed information about all credible treatment studies. Also, in order for studies to be valid for public use, the Senate must approve of the methodology of the study, either in advance, or after the fact. However, approval after the fact can be denied for any reasonable reason.

37/ All drug inserts shall have a dosages overtime chart including average time to maximum dose, average dose after 30 minutes, 1-hour 2 hours, 3 hours, etc., and when the dose falls to 10% of maximum.

38/ The healthcare sluice shall track the 500 most common drugs and all side-effects and health conditions associated with their use in an objective and unbiased way under the supervision of thousands of Sub-Senators for each drug.

39/ Gigantic companies are the way of darkness and hiding information, not the way of openness. Therefore, it shall not be allowed to have drug development companies developing more than one unrelated drug at a time. It is also thought that investors can diversify better by buying multiple 1-drug companies. Also, there will be no synergies of marketing expenses because of the way we will restrict drug advertising and distribution.

40/ All Drug production shall be under the control healthcare sluice. The drug companies will develop drugs, conducting their own initial tests for investors, and for Senate attention. Then the Senate will test the drugs, and then (if approved, or ubiquitized) the Senate will make the drugs, and distribute those drugs, using the nationally owned pharmaceutical distribution service.

41/ The prescription system shall have a way for people to log into their account and add people authorized to pick up prescriptions, accept deliveries of medications for them.

42/ The treatment tracking system shall also track all use of psychoactive drugs particularly knock-out drugs administered to patients. We shall always be mindful that hospitals and clinics are not drugging patients so they will remain longer and pay more money to them.

43/ Except for opiates, there shall be no prohibition on sending drugs through the mail or delivery system.

44/ The extremely profitable field of Serotonin Re-uptake Inhibitors (profitable for drug companies) shall be re-evaluated by the Senate and may be shut down entirely if it is found to be harmful to the people. The Senate shall study SRIs with regard to their statistical involvement with murders, suicides, homicides in our country, and in what percentage of crimes, the killer was taking, or had previously taken SRIs.

45/ The extremely profitable field of lipidology (profitable for drug companies) shall be re-evaluated by the Senate and shall be shut down entirely unless these the lipidology treatments are found to be beneficial to the patients.

46/ Metabolic medicine shall be regarded as still in the dark ages for at least a decade or two.

47/ The maximum that any cancer treatment shall be allowed to cost (including changes of treatment) shall be half a year's

wages.

48/ Only the healthcare sluice shall be allowed to establish official policy for treatments, drugs, hospitals, healthcare education, and healthcare testing,

49/ All use of human tissue, or cloned human tissue, or human embryo tissue in any treatments must be disclosed.

50/ We shall learn from the COVID vaccine fiasco and we shall say that no medical treatment shall ever be mandatory for any adult not convicted of a violent felony. Everyone shall have a constitutional right to flee from treatment even in the middle. There shall be no crime running away from hospital to avoid treatment. And it shall be considered a form of felony kidnapping to hold in people in treatment.

51/ Where people have the freedom to refuse medical treatment, nobody shall have any power to coerce them, not the government, not any employer, and not any school, or medical facility, and it shall be considered a per count crime to force or coerce or trick people to get a medical treatment when they don't want it in the first place. And to be clear, this shall be the rule in all cases where:

a/ Schools illegally demand that students be vaccinated or receive any medical treatment.

b/ Employers illegally demand that workers be vaccinated or receive any medical treatment.

c/ Government people illegally demand that un-vaccinated people be deprived of their rights, such as the right to travel and the right to not wear a mask.

52/ No school or school medical facility shall provide drugs or treatments to students, even if the parents signs off on it, and even if the students allows this. Except for medical schools, schools are no place for providing any sort of healthcare.

53/ Where psychiatrists or psychologists have sex with their patients or former patients, it shall always be considered a form of rape and a felony.

54/ All psychiatrists or psychologists that have every recommended gender transitions to their patients shall have their licenses taken away.

55/ No drug company shall be allowed to make more than one expensive or highly profitable drug at a time. If this ever happens, the Senate shall be required to break up the drug company.

56/ The Senate shall supervise the pharmaceutical distribution system and especially stock and expired drug destruction and verification of destroyed drugs. Black market activity by pharma staff shall be considered a double crime. Where pharmacy staff sell individual doses on the black market the penalty shall be loss of professional status for life and 3-years per count. Where pharma people misdirect or misappropriate large amounts of drugs for black-market vendors then they shall spend upwards of 20-years in lockup.

57/ All drugs must be distributed by the national pharma distribution system. There shall be no other means of delivering prescription drugs to pharmacists and others. This system shall be operated by one set of rules for everyone as determined by the Senate.

58/ All wholesale prices that that all pharmacies pay for all drugs shall be published on the Internet as well as the standard retail prices. All non-generic drugs of a particular dosage shall be sold for the same price nationwide.

59/ Drugs and physician services shall not be charged

differently for insurance customers and for non-insurance customers.

60/ Where they're already exists a drug or a naturally occurring herb that does the substantially the same thing, for example, blocking acetylcholine receptors, there shall be no pattern for any acetylcholine receptor blockers.

61/ The Senate shall test the efficacy and safety of all commonly used herbs and basic chemicals for the treatment of various medical conditions. There shall be no prohibitions against herbs that are not in some way beneficial and that show no harmful effects.

62/ All IP and FDA approval shall be canceled on treatments that are no more than 20% more effective than non-treatment. This shall be considered a statistically invalid justification of the treatment, and all such treatments should not be offered as genuine treatments, but as quackish treatments.

63/ It shall not be allowed to sell or use test kits that are less than 80% accurate. The test must show four out of five testing one way or more consistent results. If a test shows less than 80% consistency, it cannot be sold or used, except where multiple tests are sold together and the person has to take several tests to get a statistical average as a result. Also, government shall be prohibited from using test systems that produce over 0.1% (1-in-1,000) false positives for any matter of any consequence such as forced quarantines. If the test kits are less accurate than this, government shall be required to use multiple test kits to obtain a result that is less than 1-in-1,000 false positives. If the test results determine something of extreme consequences, such as an indeterminate quarantine, the test system results must produce less than 0.01% false positives.

64/ The Senate go through the pharmacopeia and cancel all IP and all FDA approvals for the drugs that have the most severe side effects, and also drugs that are the least effective. If the drugs are truly harmful, then the Senate shall ban them.

65/ Companies that make drugs and their subsidiaries and business partners and business associates shall not be allowed to make vitamins or nutritional supplements or to sell natural herbs, or make any claims about vitamins or herbs.

66/ Multivitamins shall not be allowed to contain over the recommended daily allowance of any vitamin or mineral. If the person wants to supplement with that nutrient, then they should take the individual vitamin for that nutrient.

67/ The FDA shall have one division that regulates food, one that regulates nutritional supplements, herbs and non-prescription medication, and other that regulates prescription drugs. Also, all synthetic insecticides shall be regulated by the prescription drug division of the FDA.

68/ The maximum charge for every drug sold nationwide shall be regulated nationwide. If the drug must be transported in an emergency, then the emergency transport fees shall be charged at market rates.

69/ There shall be no right to bill for drugs that are either not approved by the FDA, or not approved for the true prescribed use.

70/ All CAT scan and MRI machines shall now be considered outside of their patent periods. All IP related to these machines shall now be in the public domain. Government

shall order up around 500,000 of these for the world.

71/ All patents for milled porcelain crowns and fillings tech shall now be considered as expired and outside of their patent periods. All IP related to this technology shall now be in the public domain.

72/ The people shall have a right to know the true and real statistics on how much each treatment actually extends people's lives and improves quality of life.

73/ Only the Senate shall be allowed to make claims about the effectiveness or side effects or ineffectiveness of treatments and the various studies about these matters.

74/ The Senate shall investigate its own statistics for mammograms, colonoscopy, pap smears and certain other invasive testing. This is to see if the net life-extension benefits warrant the procedures. If not, then the testing shall be curtailed from the list of recommended procedures. The Senate shall also study whether lumps should ever be poked and biopsied or it is better to remove the lump and then test it.

75/ No parents shall be required to pay for the medical treatments of their children over age 18.

76/ Each diagnosis menu shall start with a button that says: "Patient looks fine/healthy."

77/ The most important patient confidentiality right is actually the right to get anonymous medical care, particularly tests and scans. Otherwise there's no value in getting additional opinions. So if the person pays in advance for the medical care, then they shall have the right to be tested anonymously. And this is one of the most important patient rights.

NR'105. HEALTHCARE RECORDS SYSTEM

1/ All healthcare providers shall be required to be on track to upload all health records to the national system by 2027.06.01. All files shall be posted on standard forms and formats that are identical nationwide. After 2027.06.01 the entire healthcare systems shall switch over to the government's free universal healthcare records, billing and teleconferencing system. Government shall no charge more than 6% for its healthcare data suite of services

2/ Every person's medical history, prescriptions, allergy information, adverse reaction, and all other relevant healthcare information shall be accessible by their medical ID number (and bar code) in the national healthcare records system. Everyone shall have only one lifelong account on this system. Only healthcare people may access this information and this shall involve the patient checking access authorization boxes when he makes an appointment with the healthcare provider. All access to all patient files gets logged. There shall no longer be any hospital admissions forms filled out by patients. Everyone rolling into an emergency room or medial office will send their healthcare into to the provider and then all the healthcare data propagates to the healthcare provider's system. It's completely unnecessary (an now no longer allowed) to have any the paper work that we see in the old healthcare industry. It's much better to have instant check-in with doctors and delete the middleman hospitals and clinics. Also, all hospitals and doctors shall notify the patients via the recorder system about all treatments offered.

3/ Once we get our national healthcare records system in

order, we shall prohibit healthcare providers from asking patients at their check-ins for any additional information about ID, billing, address, contact, health history information, drug sensitivities and allergies, other than their name and healthcare ID number(s) or bar-code. If other pre-visit information is collected by a healthcare provider, it must be via a supplemental online electronic form approved by the Senate and loaded in the healthcare records system. Where there are multiple post-check-in forms for patients to fill out at a doctor's office, no patient shall be required to repeatedly fill out the their name, address, contact information, etc. but instead the patient's name and national patient number shall suffice. Everyone's healthcare history, allergies/sensitivities, contact, billing, and insurance data shall already be in the system before they use the system the first time. So there shall generally be no health background forms or billing forms to be filled out at any medical office.

4/ The national government shall provide medical record keeping on the national healthcare records system for free and at no cost. Patients shall be allowed to login and self-access their healthcare accounts at any time and at no cost. Patients may also self-copy any or all of their files in they system. They may also self-send these to others. All healthcare data files shall be stored in the PDF format on the the national healthcare records system.

Healthcare providers shall keep no patient data that is not also on the national healthcare records system. The PDF shall be condemned. Patients may also post counter-comments to any entries they disagree with.

5/ The national healthcare records system shall have various levels of access from public, to semi-public, and private pages for their healthcare data. If a patient wants to prove that he has tested negative, for STDs, or been vaccinated for some disease, he can use the healthcare system for this.

6/ The national healthcare records system shall help patients find and compare doctors and their prices. It shall also endeavor to keep accurate reputation ranking for all healthcare providers.

7/ All healthcare staff and companies shall have a lifetime number assigned to them. The number of patients they have seen in their lifetime shall be shown on the national healthcare records system. The percentage of patients diagnosed in each category by each care provider shall be available to Government, along with the recommended treatment in each category. Also this shall be compared with the county and national averages. Providers with exceptionally high recommendation rates for certain procedures shall often be investigated.

8/ Patients needing a specific procedure may search for all providers that do that procedure on the national healthcare records system website.

9/ All X-rays and all test results, and diagnoses and shall be automatically and immediately posted to the patient's account on the national healthcare records system. Patients shall be free to access and download this information once posted. This information shall be kept for all the patient's life by the county recorder's system.

All of this posted information shall be explained in detail, and healthcare providers shall be prohibited from engaging in the practice where they requiring additional visits to simply

explain the results of tests. All health care results must also be sent via email to the address provided by the patient.

10/ The first priority of the national healthcare records system is to make all patient information immediately available to all healthcare providers (especially emergency healthcare providers), and the patient. The distant second priority is the privacy of the patient. The right to privacy with regard to medical records shall be a low bar. The healthcare system may send encrypted information via the email system, and other similarly hackable channels. The healthcare system shall be prohibited from using fax machines. The healthcare system shall also be prohibited from sending bills, marketing material, pamphlets, brochures, and text-only information by mail. There shall be no prohibition on emailing patient files to any patient's email account upon the patient's request. Government and healthcare providers shall not concern themselves with the security of the information emailed to patients if the patient requests that their healthcare information be emailed to a given email address.

11/ The Healthcare records system shall have mandatory pre and post operative educational material for all common procedures. Thus patient education for their procedure will be both before and after treatment, and it will be verified and perhaps even tested for.

12/ Few things more obviously illustrate the stupidity of the current healthcare system like the way fax machines must be used to communicate. No business shall be allowed to use obsolete fax machines any longer, and this shall include healthcare providers. All healthcare providers must communicate with each other and with their patients using the national healthcare records system. All healthcare diagnosis's and results must be filed with the national healthcare records system, so the patient can easily access their account themselves, rather than bothering any doctor's office with getting results.

13/ The healthcare records system shall have a patient notification system. All healthcare providers shall notify the notification system and this shall contact the patient, or handle the voice or video call. There shall no longer be any healthcare privacy declaration and disclosure laws, and all these shall be cancelled. There shall be no privacy documentation papers for people to fill out and for healthcare offices to manage.

14/ HIPAA and PHI shall be entirely repealed and voided as corrupt enemy legislation. The Senate shall make new standards, and no healthcare provider may have its own idiosyncratic, privacy conditions. In fact the Senate shall have the right to prohibit any sort of idiosyncratic bureaucratic procedure it observes among the nation's healthcare providers. In fact, these shall be thought to be limited with regard to having idiosyncratic functions of any sort at all.

15/ The private aggregation of non-anonymized healthcare records shall be a felony.

16/ The recorder's office shall provide AI based remote monitoring of various remote healthcare data feeds and videos. This shall cost 1-hours wages per month, and 2-hours wages per dispatch.

17/ The county recorder system shall have various intake accounts for health donations. These accounts shall include all common classifications of health-related research. These

accounts shall also be available for personal treatment donations. Where the cause is legitimate, the recorder shall apportion and disburse 100% of this money to the classification it was donated to, and generally within a few days of donation. The Sub-Senate shall also make sure that the money will be used for a legitimate purpose before releasing the money. To prevent fraud, those appealing to others for help with the cost of their medical procedures must use this system, and they shall not be allowed to collect any money themselves. Further, all such donations shall be refunded to the donor(s) in full if they cannot be used for the procedure they were donated for.

18/ Because nearly everyone suffers from the same ailments as countless others, it is not a hard thing to assign each possible diagnosis a code. This helps facilitate the due commoditization of healthcare services. It also enables government (and whistleblowers) to use data analytics to spot healthcare fraud more easily. These whistleblowers shall be paid a portion of the healthcare fraud they spot.

19/ Each diagnosis number shall be followed by a hyphen and a system-generated two-digit number. The first of these two numbers indicates the severity of the condition, and the second number indicates the urgency that the patient needs treatment.

20/ The people making a diagnosis shall not be required to explain the diagnosis and its implications to the patient. This is thought to be both a waste of their time and a poor way to educate patients. Instead this aspect of the healthcare system shall be provided via both a free Senate WIKI, and pay-per-minute tele-services technicians. We shall have a class of technicians that specialize in post-diagnosis, post-WIKI, Q&A perhaps for perhaps only a few diagnosis codes each.

21/ All legally recognized medical conditions must be recorded and verified by the identity system in order to be valid. For long term conditions over than 3 weeks, the system must verify the claim.

22/ All universal national changes in medical procedure shall be approved by the Healthcare Sluice, and no other body. The medical associations, academic research centers, clinics and doctors may make recommendations, but there shall be no changes in national policy about healthcare that are not approved by the Healthcare Sluice. The Healthcare Sluice shall also delete all obsolete procedures that should no longer be used.

23/ All medical databases of both Government and all fictional citizens shall be made available to the public for free anonymized data mining.

24/ All healthcare people shall be carefully tracked for how many complaints they get. The ones that get lots of complaints shall be investigated, and if they're found to be incompetent or unfit to work in healthcare, they should lose their licenses. Also, they should lose their licenses if they can't again pass the test for that license as we most on from the old corrupt system. Requiring that professional retake their professional qualification tests is also a good thing to do for professionals that get many complaints.

25/ The AMA physicians institute shall be shut down and replaced anew.

26/ No care facility shall have any right to prevent any person

who is legally competent from leaving.

27/ Physiotherapy has been made overly complex, and unnecessarily expensive as a result. The Senate shall establish more reasonable education and testing requirements for Physiotherapists of various sorts.

28/ HIPPA shall expire in half a year.

29/ All medical authorizations and informed consent issues matters shall be handled by the recorder system, which shall be prohibited from ever having any interest in making money on the healthcare industry. Blanket waivers from healthcare facilities shall not be considered as having any force, and thus they shall be regarded as almost entirely unenforceable. Blanket authorizations shall be forbidden by law. However, the Senate shall have a standard implied waiver for all healthcare treatments.

30/ Patients shall have the right to see and access and download all the information the system has about their health, including their mental health.

31/ All healthcare people (even if they work in a hospital) must bill using their own personal account with the recorder system's central healthcare billing service. And this shall either charge luxury tax, or pay them money for the treatments they provide. The recorder system shall rely on luxury healthcare taxes to fund the limited free universal healthcare system, and it shall not charge healthcare people for this service.

32/ The healthcare system shall not have anything like a single payer for all healthcare services, however, it shall have a single recorder system that is taxing, billing, scheduling, and storing patient data among other things. This system shall be offered free of charge for all citizens and medical tourists. There shall also be various patient-determined access layers for each patient.

33/ To reduce fraud, all healthcare services must be documented on video with the county recorder system. All healthcare procedures must also be streamed live to the recorder system. It shall be a crime to submit bills for work not done, or undocumented treatments. Furthermore, the delivery of most medical treatments must be documented on video, the only exception being where the video shows the patient's private parts.

NR'106. TREATMENTS & FDA APPROVALS

1/ The truthful and accurate reporting of healthcare treatment testing data is simultaneously one of the most life-or-death, one of the most money-weighted, and one of the most fraud-afflicted aspects of government regulation. Great attention by the Senate should be focused here to reduce dishonesty in the approval process.

2/ In all matters where the profit incentive leads to harmful products, our society must remain totally dedicated to openness of information exchange. We should never allow anyone to do anything that prevents the free exchange of information in these matters. Therefore, those people who participate in paying-out hush-money for those killed or severely injured by drugs or other products may be sentenced to life in prison. This is for both participating in both mass-murderer (or mass-injury) and for censorship, if

more people die from the dangerous product that they have helped keep on the market.

3/ Hush money payments shall not be the subject of a valid contract. Under this Constitution, the people shall be free to sign hush money contracts, and take the hush money payment, and then say whatever they would have said anyway. Also if a hush money recipient feels bad about staying quiet, the right thing to do is to take the money, and record everything, and then once they have a strong enough case, come out against the people paying them for staying quiet. Where people offer to pay others not to release video of a crime, the people are supposed to take the money, record the person paying the money if possible, and then release a copy of both videos, if possible. Also, most recorder videos will be live backup on the county recorder system never-erase video that require a warrant to access. So there is no point getting rid of people to get rid of a video. Also, knocking the recording device out of someone's hand does no good. Also, when people take their phone out and start filming for security (There are 3 start to film buttons) this gets automatically uploaded to the county recorder system's ai video review system with human oversight.

4/ Nothing less than scrupulous honesty shall be expected of all those conducting drug trials or working with drug trial companies in roles related to drug trials. All communication and interaction between drug companies and those people in their drug trials shall be required to occur under invasive public video and other monitoring. There shall be no communication at all outside the monitored facility, or the entire study shall be considered blown.

5/ All testing and studies by either government or fictional citizens shall be conducted in public under the recorder system's most intrusive monitoring. It shall be a felony for drug company workers to hide, minimize, or cover-up treatment injuries and deaths in any way. Also, when drug companies act to hide drug injuries and deaths, this may very quickly void whatever statutory immunity from prosecution the company may have. Also, no prior grant of immunity from prosecution shall be valid where the Senate changes its mind and elects to strip the immunity away for cause.

6/ The official FDA studies of safety and efficacy organized by the national Healthcare Sluice shall be what matters for obtaining government approval. There shall be no official drug or medical studies that matter conducted by any private facility, except to get the FDA to:

a/ Do its own pre-approval studies.

b/ Cancel a prior approval.

c/ Do more studies of approved treatments

7/ There shall be no healthcare policy, or treatments guidelines established by any party other than the doctor democracy of the National College of Physicians and the National Senate's Healthcare Sluice. However, the National Senate's Healthcare Sluice shall have the power to overrule the college of physicians with a 55% overmajority and for rational-sounding stated reasons.

8/ All practicing licensed physicians shall have an equal right to vote in the college of physicians. Nurses, non-practicing physicians, non-certified physicians, chiropractors, nurses, all forms of naturopathic physicians, natural medicine treatment people, and other non-MD physicians shall be prohibited from

voting or serving in the college of physicians.

9/ Only the Healthcare Sluice shall have the power to impose health restrictions on the people. The college of physicians shall not have this power.

10/ All new drugs must get FDA approval for their price prior to introduction to market. All existing drugs must get FDA approval for any price increases over the FDA's economy-wide inflation rate.

11/ In times of emergency where many are killed or badly harmed by a new disease, doctors shall be allowed to prescribe off-label treatments that seem to work. However, only treatments approved under the normal FDA approval process may be required by government or anyone else. With all FDA emergency approvals, there shall be no government or fictional citizen compulsion to take the experimental procedure.

12/ Those who have previously worked for the FDA (including Senators) shall be banned from working for, or taking money or gifts from drug and technology companies for life. All prior FDA employees and their close relations shall be regularly audited. No more than 10% of the final decision makers at the unelected FDA shall have previously worked in drug or therapy company management, and all of the important decisions shall be made by the Senate.

13/ Treatment, procedure, and products shall only have the right to exist in the FDA approved healthcare marketplace once they have Senate approval. FDA approval shall also give healthcare providers exemption from liability, provided the treatment/ procedure/ product was delivered and adverse events correctly recorded. Failure to correctly record adverse events may void the manufacturer's liability protection. This shall include all adverse reactions, provided all pre-approval testing and in-use adverse reactions are properly documented and catalogued and statistically permissible on balance compared to the medical condition they are treating. This exemption is the government saying that it has investigated the treatment and found that the treatment has better results (by an indicated percentage) on average than the healthcare problem being treated over the term of study listed on the FDA approval for the stated standard study cohorts. If the Senate thinks a treatment shows great promise, but is not quite ready, this must be stated for the consumer to consider.

14/ The Senate, the FDA, and all drug companies shall be prohibited from hiding information about any of the Senate adverse events categories. Such may be considered felony research perjury. Also, research perjury shall be a career ending crime for every sort of fore-hire researchers.

15/ The FDA shall regulate the claims of healing herbs and conduct and publish studies on all popular healing herbs as to efficacy and side effects.

16/ For child overdose safety, no pills that can cause an overdose shall have a sweetened coating, and all must have slightly bitter coatings.

17/ The FDA shall be required to support the use of simple pure nut butters such as Shea butter and Cocoa butter for dry skin. This and wearing dishwashing gloves for dishes and wet laundry, and extra rinses, and animal or plant derived soaps. And then the FDA shall be required to discourage the use of synthetic skin creams and synthetic makeup. All skin creams

and makeup shall be regularly checked for toxic contents by the FDA. All skin cream and make up shall pay luxury tax of at least 100%. Skin creams and make-ups shall not be allowed to advertise or have sponsorships.

18/ There shall be no skin creams for night time use. These products shall not allowed because they work so forcefully against sex and babies.

18/ It shall be considered malpractice for pharmacies and pharmacists to get involved with discouraging so-called off-label use.

19/ The Senate shall use Pyxis-like robotics to eliminate the costly community pharmacists from the process of getting medications to the people.

20/ The Senate shall set the prices that drug companies can charge for their treatments and cures, and other goods supplied to the healthcare system. Thus the maximum charge for every drug and hospital item sold in our nation shall be regulated nationwide by the healthcare sluice. If the healthcare item must be transported in an emergency, then the emergency transport fees shall be charged at market rates.

21/ We shall not allow people to keep effective cures a secret, so they can sell treatments at a huge profits for a long time.

22/ The Senate shall cap national spending on drugs at perhaps 0.7 to 1% percent GDP.

23/ In order for a drug test to be valid, the drug must be double blind tested against a placebo, under Senate supervision.

24/ There shall be no human trials for any treatment or drug until after 10 animal studies involving over 1,000 animals of various species show that the drug is relatively safe to use in a variety of animals.

25/ No more vaccines or drugs shall be developed, or tested in Ukraine.

26/ There shall be a minimum 12-year human testing requirement for drugs that have to do with frivolous things like hair loss, weight loss, attention focusing.

27/ There shall be a minimum 12-year human testing requirement for drugs that have to do with things that already have proven treatments.

28/ Glitter and aesthetic in no-reason micro/nano particulates shall no longer be allowed. All micro and nano particulate ingredients added to foods and body products shall require FDA approval and shall be prohibited if they are mostly added for cosmetic or inexplicable reasons. Secretly putting micro particles and nanoparticles and things that people consume or put in their bodies shall be considered as poisoning.

29/ The FDA shall regulate and assure the safety of all chemicals and substances that are used in the household, in foods and drugs and beverages, and around the people as well as those released into the air either as a byproduct, exhaust, or intentionally. The FDA shall regulate all toilet paper, laundry detergents, anti-perspirants, lotions, shampoos, and anything that goes on the body.

30/ Antibiotics should be easy to obtain for serious infections, but difficult to obtain for minor infections. Also, we shall investigate whether sinus and pulmonary airway infections are better dealt with by using antibiotic nose drops and inhalers, than oral systemic antibiotics.

31/ There shall be no sales, advertising or marketing of diet or weight loss drugs without at least 10-years of Senate study and Senate approval.

32/ Businesses that sell vitamins or drugs, or similar health products shall not be allowed to advertise.

33/ No drugs or vaccines or treatments shall be approved by the FDA for general use without at least 30 double blind placebo studies of over 1,000 people. Also, in these studies, the groups conducting the studies shall be paid to find fault with the drugs receiving either Ubiq status and cash payments, or FDA approval to sell their drugs.

34/ The FDA shall begin by eliminating all fungicides and herbicides banned in other nations for cause along with those identified herein. Then the Senate shall run test studies by banning all fungicides in 7 randomly chosen communities, and testing how these communities turn out different over the course of a decade. No healthcare fictional citizen shall get involved with these studies.

35/ There shall be a new special class of long-term use prescription drugs where all uses of the drug get prescribed once every couple years (depending on the drug) for use either constantly, or intermittently. Also, under this scheme, most long term drug use monitoring will be shifted over to the recorder system technicians and blood draws to save money and time on healthcare. So people with chronic bronchitis after the 3rd prescription for the same thing from a different doctor can re-medicate themselves to a point. But then the healthcare system is no longer burdened by people seeking oral antibiotics for re-treating an uncured chronic bacterial infection. We are going to do the same thing with most maintenance drugs and slash scarce healthcare resources and costs by over 80% every place we do this.

36/ Healthcare providers shall not be allowed to charge for taking blood pressure, measuring a person's height, or weight or taking someone's temperature. All of these things are supposed to be provided by low skilled people at no charge because there's no special training is required to do them. So they're all included with the price of every exam. Also one supposes that these things are done mostly just to run up the healthcare bill.

37/ The Healthcare Sluice shall elect which medication's require prescriptions and which do not. The HS shall also decide which medication's that are twice prescribed can be obtained without a prescription for the next 4 years without obtaining another prescription. For example antibiotics for a chronic infection.

38/ To reduce the possibility of drugging and poisoning via medication, all pills and especially all capsule medications shall be required to come in blister and foil packaging.

39/ Both the genetics and drug industry are almost totally random. Researchers may have theories about where to look, but the actual finding of sellable apple cultivars from seed and gene-gun individuals, and new drug chemistry is actually a thing of massive testing of totally random variants. So there really isn't much need to have the layer of business reality called drug companies, and it just creates all these business-end parasites that don't add anything for society and cost a great deal.

Instead of this approach, the Senate will have public research labs in the northern midwest in places about an hour

from the nearest airport and with a fairly priced supermarket, drug store, and vehicle repair services, and a hawker center. But aside from this support, there is no reason to be in this place, except for the free lodging, free research lab space, ingredient stamps, and free research supplies for qualified people pursuing Senate approved research plans that might be in pharma, genetics, computers, or any sort of tech or innovation. These people get free space in exchange for a 50% public ownership of what they develop. Some of them will be teams and some will be individuals, but if anyone has an idea and a plan for research or development, and it makes sense to the Senate jury, the inventor can get a way to do their research.

This is how we should be doing all our randomness biotech development. Then, once discovered, upon the Senate picking up their research for early stage ubiquitization, then they might get a "signing bonus" grant equal to several nice homes or perhaps only a small amount if the development is minor. Then as the invention gets used by more and more people, the Ubiq then gets something like a royalty payment per user. So instead of drug companies selling their drugs to the public for \$180 and the development getting \$3, The public is going to buy out the development side for \$3, and pay \$3 for manufacture, and \$3 for distribution and then it is going to sell the ubiquitized now generic drug for \$9 or perhaps \$18.

40/ Once drugs are introduced to the market, they can be marked down, but their prices cannot be increased, except at the level of overall inflation, which the Senate shall set.

41/ We shall allow private hospitals not owned by the county governments. However, at least 50% of all hospital rooms must be owned by Government. Also these rooms shall be big and each shall have 4-beds in it, with only one bed being used, except in times of healthcare or other crisis.

42/ There shall be no more hospital systems. And all the private hospital companies must break up into individual hospitals working as independent financial units.

43/ Workman's comp shall pay no more than than +2% over standard healthcare pricing.

44/ All child birthing and prenatal care for citizens having a conforming number of children shall be socialized and free of charge for the families having the child. This shall include all anesthesia, all caesarian births (which shall be billed/paid at the same rate as natural vaginal births to eliminate any harmful incentives). Also, where births are extremely complicated or where the child is extremely damaged, the system shall encourage abortion as a means of allocating inherently scarce medical resources.

45/ Where generic or non-prescription drugs exist, it shall not be allowed to offer non-generic or prescription drugs that do substantially the same thing. For example all charged prescription drugs that block reabsorption of acetylcholine shall now be prohibited by the system because of the widespread existence of caffeine (which also blocks reabsorption of acetylcholine) and is practically free.

46/ Pregnant women shall not be prescribed any drugs or vaccines that have been linked to birth defects or autism, or other severe conditions. Causality shall not be require with regard to treatments for pregnant women and young children.

47/ It shall not be possible to have a patents for a

pharmaceutical that does substantially the same things as naturally occurring chemical, or off patented drug.

48/ All stimulant use by children shall be phased out, including even caffeine and caffeine-like drugs and natural beans and teas. Also nearly all the SSRI drugs for children shall also be phased out. Also any drug clearly linked to extreme violence shall also be phased out.

49/ The healthcare systems and prescription drug system shall allow account holders to appoint and empower others to look at their healthcare data and to collect their prescriptions.

50/ There shall be some dangerous and serious treatments and procedures that require at least 3 concurring diagnoses and 3 out of 4 diagnoses. Some other treatments and procedures shall require at least 4 concurring diagnoses and 4 out of 5, or 4 out of 6 diagnoses.

51/ Unless there is a conviction and a court order from a Senate jury of appropriate size directing mental healthcare, or care for people who are declared incompetent, everybody shall have the inalienable right to leave all forms of healthcare at will, and this especially includes mental health medical care. Also, it shall be a felony to treat, inject or sedate people against their will or without permission, except with a court order from a Senate jury, or in emergency situations when directed to by a Senate triage jury. This sort of forced or involuntary "medicine" shall always be regarded as abuse and overreach by greedy healthcare people violating their oaths.

52/ There shall be an inalienable right on the part of all patients to leave any medical facility or treatment that they entered into voluntarily, or of their own free will, or that they have awakened in. even if they or someone else signs a document saying that they have to stay this shall be unenforceable.

53/ There shall be no more mandatory or universal vaccinations. No person shall ever be required by others to take any drug, treatment, or vaccine against their will. There shall be an absolute prohibition on the courts requiring non-institutionalized people to take psychiatric medications.

54/ The healthcare system shall not provide care for conditions that have no significant physical manifestation. With these, the greater risk lies in treating the healthy rather than not treating those with undetectable ailments.

55/ It shall not only be illegal, but it shall be considered highly immoral for healthcare people to administer treatments that are not objectively, statistically, and clearly better than not using the treatment. And maybe a little better, maybe 10 or 15% better will not cut it. All treatments must be clearly better: Clearly, noticeably better than not using the treatment.

56/ The group of people who own the treatment, the people who developed the treatment, and the people selling the treatment shall be considered like jury tamperers if they have anything to do with influencing the public policy regarding their treatment. All such communication must be recorded and it can only be about differences in testing methodology when the Senate attempts to duplicate statistical results.

57/ The Senate and not the drug companies, not the insurance companies, and even not the doctors shall decide on what symptoms define what medical conditions, and what the recommended treatments shall be. The Senate is supposed to have its own standards for what constitutes high

blood pressure or high cholesterol, what PSA levels are warnable, what levels warrant drug treatments. What levels can warrant prostate removal, etc. And the Senate shall set its own levels without the input of any drug companies selling drugs to lower cholesterol or blood pressure or any other similar situations.

58/ Nobody of any age shall be institutionalized against their will or forced to undergo psychiatric treatment against their will, including gay conversion therapy and similar mental intrusions, unless they've committed a crime, and they are sentenced to psychiatric confinement as part of their criminal sentencing by a court of law.

NR'107. HEALTHCARE CORRUPTION

1/ There shall be no incentive based pay in the insurance industry, the healthcare industry (to include the drug and pharmaceutical industry), and the rental car industry. It shall be considered felony fraud when either insurance or healthcare staff or board members receive any sort of incentive based pay. There shall be no commission salesmen or sales commissions, or similar incentives. The people prescribing treatments and cures with expensive IP shall never be allowed to sell those treatments or cures, or get money for those treatments and cures. It shall be considered fraud when they do.

2/ The long-established practice of giving and receiving referral fees or other considerations for the referral of patients to specific care facilities shall now be seen as healthcare corruption. From now on, doctors and healthcare facilities shall only be allowed to refer patients to a type of specialist (or sub-specialist), or type of care facility, and not to any specific specialist or facility. This includes specialists within hospitals. Doctors shall not be allowed to ask the identity of referring doctors, and the patients are not supposed to tell, and this shall be considered a corrupt practice. Also, where one doctor refers or mentions the name of another doctor, the second doctor's diagnosis shall not qualify as a second opinion.

3/ Hospital administrators shall be prohibited from talking with hospital staff about increasing sales, by increasing medical services.

4/ Drug and treatment companies shall not be allowed to meet in person with healthcare people except under recorder system monitoring. Where clinical instruction is necessary, that instruction shall be given under monitoring and sales, marketing and money matters shall not be talked about.

5/ All healthcare claims regarding products that are for sale, or those that later become available for sale, all these must be approved by FDA based using FDA conducted double-blind studies. The studies of the people making money on the thing the FDA is supposed to approve: FDA shall not consider their studies to be believable.

6/ Drug and treatment companies shall not be allowed to initiate contact with healthcare providers, or to communicate with healthcare providers except under monitoring. All drug and treatment marketing shall occur in the FDA forum for these things. The FDA forum shall include all approved treatments and all applications for approval. Drug companies shall not give away samples of their drugs. Except for

common antibiotics, hospitals and doctors shall not be allowed to dispense prescription drugs themselves.

7/ No fictional citizen or other party or group may control or own more than 30 pharmacies nationwide, or more than 1 in any county.

8/ None of the most commonly used 300 drugs shall be imported from a foreign nation. If non-public IP is involved, then the drugs must be made domestically and payments made to the foreign owner of the IP. The Senate shall be free to prohibit any or all imported drugs and health products and require that all be made domestically.

9/ The following shall not be imported due to the risk:

a/ Exotic animal meats and body parts and furs.

b/ Dried meats and jerkies of every sort.

c/ Baby foods.

d/ Non-cheese dairy products.

e/ Farmed fish, and especially farmed shrimp and shellfish fresh, frozen, dried, or a component of any food.

f/ Paints and coatings.

g/ The most commonly used 400 drugs/ treatment chemicals.

h/ Hormones for people or animals, including insulin.

i/ opiates.

10/ There shall be no healthcare advertising in doctor's offices. Also, healthcare providers and everyone in their offices or affiliated with their offices shall not be allowed to advertise. There shall be no advertising drugs directly to consumers/patients.

11/ All drugs shall be sold at one price to all users by dosage nationwide. All pharmacies must buy directly from the drug company and there shall be no drug distributors. The maximum price for a pharmaceutical cure shall not exceed the average annual wage per totally cured patient. The maximum price for a lifetime of pharmaceutical treatments shall not exceed half the average annual wage per person.

12/ It shall be a crime for pharmaceutical companies to lobby, advertise, offer benefits or offer bribes or commissions to healthcare providers to use their drugs. It shall be a felony to offer or receive discounts, kickbacks, rebates, reimbursements, discounting secret payments, or gifts to doctors, hospitals, clinics, nurses, pharmacists and other healthcare people for prescribing or dispensing a given drug or treatment. It shall also be a felony for doctors to receive any discount, kickback, secret payment, or gift for prescribing a given drug. Police may pose as either side in sting operations for these things. Drug companies and other healthcare suppliers shall be prohibited from giving any money at all to doctors prescribing or using their goods and services. Doctors prescribing treatments shall be prohibited from taking any money at all from drug companies selling medicines.

13/ It shall be a felony to conspire to suppress valuable discoveries and new innovations that compete with existing technologies. Where these valuable discoveries and new innovations are lifesaving, there shall be a death penalty.

14/ There shall be a proper investigation by multiple Senate groups about all promising treatments, particularly those for cancer and other diseases that are not subject to intellectual property protection, such as fenbendazole, laetrile, melittin, melatonin, chanca piedra, blush wood fruit extract, and Inositol hexaphosphate for skin cancer. All phases of testing

shall be by unaffiliated healthcare facilities under close Senate supervision. And every drug approval process shall be under Senate supervision by randomly assigned Senate juries. Mammography recommendations shall be re-evaluated by the Senate. Apricot seeds shall not be controlled by Government in any way.

15/ Research shall be revived for anti-neoplastons as a cancer treatment.

16/ The American Cancer Society shall be shut down and re-staffed.

17/ It shall be considered as fraud when healthcare people accept gifts outside the healthcare payment system, be they from treatment companies or patients. Also, when healthcare people accept gifts outside the healthcare payment system, the procedures and prescriptions shall have no warrantee.

18/ It shall be a crime for healthcare insurance companies, hospital companies, drug companies and other healthcare companies to generate or promulgate their own public healthcare policy, or lobby the Senate, or to resist Senate directives over healthcare policy.

19/ Insurance companies, hospital managers, drug company people, and government workers that involve themselves in the doctor patient relationship shall be held liable, strictly liable in money court for any harm their policies and mandates cause. Also where the policies of Insurance companies, hospital managers, drug company people, and government workers cause significant deaths or suffering, these people may be held criminally responsible and charged criminally for the death and suffering they caused by their usurpation of the physician powers. This policy change has been made to drive the Insurance companies, hospital managers, drug company people, and government workers out of healthcare policy making, leaving healthcare policy to be the exclusive domain of the Senate Healthcare sluice and the nation's doctors. Everyone else should tremble with fear at the idea of making healthcare policy decisions, and especially dangerous ones that are made for profit from risk transfers.

20/ From now on every certified medical doctor's diagnosis and treatment prescription (within the range of standard medicine and the standard pharmacopeia) shall be thought to have judge-like sanctity. Upon evidence, all medical doctors shall have the power to anonymously or openly charge all third parties with judgement/jury tampering. This shall include all insurance company people, hospital managers, drug company people, and government workers, such as licensing department staff. If any of these attempt to involve themselves with any diagnosis or treatment prescription, they may be charged with judgement/jury tampering, a form of healthcare corruption.

21/ Where healthcare/drug industry corruption or fraud results in mass death for profit, capital punishment shall be easily possible.

22/ Certain sorts of diagnosis shall always be required to get a second opinion, third opinion, or more. Whenever additional opinions are required by the system, the reviewing provider shall not ask the name of the reviewed provider, and the patient is not supposed to offer this information. Forensic analysis of this multiple diagnosis data will help us spot outlier care providers.

23/ To prevent a conflict of interest in healthcare providers, wherever practical, the diagnosing medical office shall generally be independent from the medical office doing the procedure. Medical companies that do diagnostics cannot prescribe treatments or provide treatments, and medical companies that provide treatment can't do diagnostics.

24/ All patients shall have the right to anonymized diagnosis. If we fail to do this then it will be impossible to get a genuine second/subsequent opinion from the medical establishment. It will also be easy for hackers to kill their enemies via unnecessary and incorrect treatments.

25/ From now on, the dental hygienists will also poke for cavities, take X-rays, and also seal children's teeth. If they find a suspected problem, then they will tell the patient that he needs to see a dentist. This approach has 3 of benefits:

a/ Dentists don't waste time doing exams.

b/ The patient is more sure that there actually is a problem that needs to be fixed, and that the expensive filling or expensive crown actually is needed. Also, dental hygienists cannot be located within 100meters of a dentist, or work affiliated with a dentist.

c/ If we let the hygienists make dental apparatuses, then we can increase competition for these things and cut prices for these and for dentistry.

26/ The entry point of our healthcare system shall be a frontline of diagnostic technicians of various specialties that are normally a bit over-supplied so that it is almost always easy to get seen fast. These diagnostic technicians will have a role similar to the the new dental hygienist above. They will tell people that they need to get whatever sort of imaging or testing and then see a doctor of some sort. Then we will save doctor's time and also be more sure that everyone is telling the truth. Non-invasive testing and imaging, and testing of blood draws shall not require a prescription, script, doctors order, or referral. All existing technology for MRI and CAT scan tech over 12 years old shall now be in the public domain.

27/ The Senate shall compile a complete list of procedures such as surgery that require a Senate panel of doctors to approve, and which procedures can be approved with 2, 3 and 4 and 5 doctors.

28/ The various healthcare provers shall mark up goods from the government approved wholesale cost. If the healthcare goods cost less than an hours wages the markup shall 10-minute's wages. If more than an hours wages the markup shall be 15%. Where multiple identical items in total cost over an hour's wage in total, then they shall be marked up by 15%.

29/ The Healthcare Sluice shall operate a discharge review system where all healthcare in-patients for more than 24 hours are monitored independently for discharge by the Senate.

30/ All healthcare treatment companies employing more than 12 physicians shall pay a 6% income tax. All healthcare treatment companies employing more than 100 physicians shall pay a 12% income tax. All healthcare treatment companies employing more than 800 physicians shall pay a 25% income tax. Using business mechanisms by which multiple doctors merely share expensive equipment and equipment technicians shall not be considered as joining the

physicians into one business.

31/ All healthcare providers must state the training credentials of the person that is going to be providing service and the premium (or discount) on standard pricing the facility uses, before a binding treatment agreement may be created.

32/ People who practice alternative medicine, including chiropractors shall not be allowed to use the term doctor or physician, or give any form of medical advice in the media or two a group of people. Nobody shall be allowed to call themselves a doctors of chiropractic, or a doctor of Asian medicine, or a doctor of herbal medicine. They must refer to themselves as either a chiropractor or an herbalist without the words doctor or physician, or they may be charged with impersonating a doctor.

33/ Practicing doctors under age 60 that fail to document at least 1,500 hours of medical work in each year shall pay a 40% income tax on their healthcare system income. Those who fail to document at least 2,000 hours of medical work in each year shall pay a 20% income tax. Doctors over age 60, Doctors taking more than 14 days off work at a time. Doctors that are on-call and that can document work at least 750 hours a year, and doctors that are Ubiqs or Senators shall be exempt from this provision. Also, there shall be an exemption for general practitioner that live in a community of over 1,000 people, and are more than 12 minutes from another practicing general practitioner. If they are more than 24 minutes from another practicing general practitioner, and they live less than 200m from their clinic, both their home and clinic (of reasonable sizes) shall be exempt from property tax. Where the doctor is more than 36 minutes away from another practicing general practitioner(s), the community should be expected to provide a fully outfitted clinic, a suitable doctor's house, and a full time receptionist. Also doctors who simply do not have enough patients shall be exempt from this paragraph. The Senate shall have great freedom in re-writing and tinkering with the previsions of this doctors must work rule.

34/ No company shall provide more than 1/500th of the nation's patient care services. No company shall provide more than 1/200th of the nation's opiates of any sort. The marketing of opiates shall be prohibited, including prescription opiates to doctors and patients. Opiates and other addictive drugs shall not be imported into our nation.

35/ Employers shall be prohibited from providing healthcare services or healthcare insurance to their workers except where the work has specific hazards and only those specific hazards are covered by the insurance. Government shall never have any law that requires or even favors the use of health insurance. Labor unions shall not have anything to do with health insurance and those labor unions that get involved with health insurance shall be closed down on the first offense.

36/ All insurance and all methods of third parties paying for healthcare shall require a co-pay of at least 10%. Also, to prevent billing fraud, the third party part shall never be paid until the patient's co-pay part gets paid. This shall include all forms of both private and government insurance and health plans. Also, where co-pays are involved, and the patient denies the charge based on the fact that they didn't receive the service, the healthcare provider must be investigated.

Where healthcare providers are extreme, short-spike over-billers, they and their staff shall be kicked off the healthcare system for some years, only to be re-admitted on probation. Thus, eventually all healthcare over-billers will get kicked off the healthcare billing system and thus will be unable to work for insurance companies or enforce unpaid bills.

37/ No insurance company shall pay for emergency transportation except in an emergency, and never more than twice in five years. No emergency ground ambulance service provider charges over 3 day's wages for pickup, or more than 5 times the going taxi rate per mile for transportation and waiting. 911-dispatch shall be empowered to have nearby taxis and ride shares drop off their passengers and divert any driver to carry a life or death patient to the hospital. All taxis and ride shares shall have a flashing light and siren for this purpose. 911-dispatch can also ring neighbors with a pre-recorded request to drive you your neighbor in message.

38/ Everyone in every industry loves to do insurance work because the payments are higher—everyone including healthcare workers. It shall be thought that the push for everyone to get insured is about trying to drive more people into more profitable insurance work. It shall also be thought that the easiest way to control healthcare costs is to reduce the overpaid insurance work. We must do this to control healthcare costs and regain our national economic competitiveness.

39/ Government and insurance money shall not be used for cosmetic procedures except restorative surgery from an accident. All cosmetic surgery shall be authorized by at least two randomly assigned plastic surgeons, and then performed by another plastic surgeon unaffiliated with the authorizing plastic surgeon. There shall be no procedures where:

a/ Fat is harvested from one part of the body and injected somewhere else because the person wants to look good.

b/ Chemicals or lasers or abrasives are used to peel the skin to make it look better or younger.

40/ No public policy, hospital policy, or drug selling payment scheme shall reward healthcare providers in any way for hastening the death of their patients in any way direct or indirect. Where such death-for-profit scheme occur, those involved may be charged with conspiracy to commit murder. Note: This shall not apply to assisted suicide, and those at the end of life that a Senate jury has elected as having a near-term terminal illness. However government shall never market or offer assisted suicide to the people as the Canadian government recently did.

41/ Government shall have 12 different levels of standardized healthcare insurance coverage, three sub-classes for each tier of healthcare 2 through 5. No insurance company shall be allowed to offer any healthcare insurance that does not fit in one of these 12 different levels. What is and is not included in these categories should be provided in great detail to the public, and if there is any dispute, it shall be decided by a Senate jury, and not by the inherently biased insurance company.

42/ Wherever healthcare providers bill an insurance company, that insurance company shall be considered the master payor, with regard to unexpected situations and overages. In other words, all insurance companies shall underwrite all overages and incidental expenses associated

with all the healthcare insurance they sell, and people with insurance shall not ever be caught in the middle for extra expenses excluded by the insurance company. There shall be no second-rate insurance companies that commonly leave their policy holders on the hook for expenses that are not covered by the policy, once the procedure has been approved and completed. And to do otherwise is to make the sick worry for no reason. Insurance shall insure, and it shall be required to actually deliver on the total peace of mind and freedom from worry that it promises by calling itself insurance.

43/ There shall be various tranches of care, as defined by the Senate, and there shall be maximum payout amounts, but these are referenced by Senate standard bullet points instead of many pages of legalese that nobody ever reads.

“• 48.2 to 49.2 y/o healthcare (the patient's age)

• 3rd level of care,

• \$800,000 maximum payout,

our company offers this policy for: \$XXX / teneth”

44/ Insurance shall not be qualified by pages of specifics about what is covered and what is not, leaving as few costly situations under the policy as can possibly be gotten away with. All insurance shall be standardized by the Senate, and there shall be several levels of health insurance.

45/ In emergency trauma care:

a/ Healthcare providers shall video document injuries and readings, and if these get a pass by the emergency treatment weighing system, then they may proceed either as public healthcare, or if necessary with payment, or insurance, provided the patient is insured when the hospital runs their ID.

b/ In non-emergency situations, the healthcare insurance company must approve each procedure and become entirely responsible for paying the entire bill related to the procedure or ongoing care for the period described. However, in order for the system to accept this, the someone must agree to pay his co-pay to the payment system.

c/ The healthcare insurer shall be responsible for paying the healthcare provider's entire bill, including all extra charges, with the insurance company turning around and billing the insurance policy holder for any extras. Any disputes over what is paid by the insurance company, and what is paid by the policy holder shall then be exclusively between the insurance company and the policy. holder, and shall no longer involve the healthcare provider.

d/ If the patient will not, or cannot pay for the extras, then the insurance company shall have no right to sue the policy holder in court. Also, they may only cancel the insurance policy after all insured losses are treated or repaired.

46/ People who are over age 70, and those with extremely painful conditions shall be allowed to obtain opiates tax free, and without watching the anti-addiction modules.

47/ All doctors prosecuted for improper opiate prescriptions involving less than 10 patients shall be pardoned fully, and the investigators and their administrations investigated thoroughly.

48/ All equipment normally used in nearly all hospitals and clinics must be ubiquitized. All treatments for lifelong illnesses and illnesses that affect a large percent of the population must be ubiquitized. This is to reduce the value of lifelong treatment franchises, and prevent drug companies from

leaning their products this way.

49/ The ubiquitization process greatly reduces the bias of drug companies to lean their drugs into being lifelong treatments instead of cures. The Senate should thus offer much lower payments when treatments are ubiquitized than with cures. This is because the Senate will also have to pay for a cure when one is discovered.

50/ The Senate shall investigate and consider all current treatment medications to see if higher doses will cure without harm, or with less harm than ongoing treatment dosages.

51/ By the end of treatment, orthodontists must assure that the bite of their patients is as good or better than it was at the beginning of treatment as measured by the number of points of contact on bite markers strips. Orthodontists shall not be allowed to extrude teeth more than 1mm, or grind points more than 0.5mm to achieve this goal. Orthodontists that fail to assure a proper bite at the end of treatment must refund their entire fee.

52/ The senate shall assure that no treatment will be more than 1/3 as much as a cure.

53/ We shall phase out male and lesbian general pediatricians for children under age 10. For under 10-year olds, Male doctors and lesbian doctors may only work in pediatric specialist medicine for under 10 year olds.

54/ Our nation shall never obey or follow the guidelines of any global or centralized health organizations or any non government organization or fictional citizen in matters of healthcare or health policy. This is one place mankind needs to go on separate paths as much as any nation wants, so we have points for comparison, and sensible policy fine-tuning.

55/ Healthcare, may only inject things that they know. Even in the army, healthcare people can't just be told to inject some unknown substance into people. They must be told what they are injecting.

56/ All scientists and doctors shall be required to wear their respective white coats whenever they speak to groups as an expert in their field. This lab coat shall have one 40 sq. cm patch for each sponsor of the doctor/ scientist.

57/ Regarding hospitalization:

a/ The Senate shall have detailed guidelines on who can and cannot be hospitalized.

b/ Senate healthcare juries shall also pre-approve all non-emergency hospitalizations. There shall be no obligation for patients or insurers to pay for non-emergency healthcare that is not pre-approved by a Senate healthcare jury

c/ unless it's an emergency, or a clear case of the person that needs hospitalization, two independent diagnosticians, not affiliated with the hospital must authorize the hospitalization..

d/ The Senate shall pay careful attention to which conditions may be hospitalized for, and which conditions may not.

e/ The Senate shall monitor, which hospitals have the highest rates of hospitalization and treatments for certain procedures. And it shall work to equalize this rate across the entire industry. These hospitalization rates shall be public information.

58/ Pharmaceutical companies shall be prohibited from selling nutritional supplements. All existing brands of nutritional supplements shall be canceled as nearly all are owned by pharmaceutical companies.

59/ In general, government people shall not be allowed to

regulate the industry they previously worked in, or work in an industry they once regulated.

60/ The Senate shall statistically determine what normal ranges are for all blood tests. No pharmaceutical company shall have any say in determining this what is normal. The Senate shall also determine what normal vitamin intake is. And how often people should take whatever supplements they're taking. Senate shall also prohibit supplement pills that gives people over the recommended amount.

61/ All tests and treatments for diseases must be approved by the Healthcare sluice with a 60% overmajority in order to be valid, and a 75% overmajority in order to be mandatory.

62/ All existing laws concerning indemnity for vaccines shall be void with immediate effect.

63/ We should take around 1% of the amount of money our nation spends on healthcare and entitlements and use that money to provide oversight, and conduct investigations, and find fraud.

64/ The Senate shall remain on guard that pharmacies and pharmacists do not usurp any role as a redundant diagnostic hurdle for the people to overcome to obtain their medications. Pharmacies and pharmacists shall not enforce who takes what, or verify any diagnostic information. Pharmacies and pharmacists shall fill the prescriptions of doctors (both on-label and off label), help prevent drug conflicts and reactions, and help people find the governments standard information sources for each medication in the Senate's pharmacopeia. Pharmacists shall be required to fill all common off-label prescriptions without question.

65/ Where government is paying for healthcare, this shall not give government any right to demand that people take any particular medical treatment, or use any particular approach in their treatment. The Senate may however elect to pay for certain sorts of treatment methods and not pay for others, however Government (and insurance providers) shall never pay for acupuncture, chiropractic, or any treatments with a pleasant massage, or any natural herbs, or any herb doctors.

66/ There shall be no IP protection for any cholesterol lowering drugs such as Atorvastatin, and Simvastatin. All of this sort of drug is hereby nationalized.

67/ All drugs shall now be statistically evaluated for life expectancy with and without. All drugs do not significantly increase life expectancy on net shall be withdrawn from the market.

68/ Given the Brazil airplane crash of 24.08.09 that killed Dr. Leo Ferreira, and his associates, it would appear that allowing intellectual property protections for cancer treatments has become a bad way to develop cancer therapies. Therefore, all intellectual property rights for all cancer treatments are here by canceled without limit. Furthermore, the world has huge problems with costly cancer cures and misdiagnosis for profit, as well as unnecessary treatments that are very often fatal in themselves. Also, there are many ineffective cancer cures being widely handed out. Therefore, we shall also have a decade where there shall be no intellectual property rights for cancer treatments. Also, all the companies and people that have been knowingly selling ineffective and harmful treatments for cancer, and all those involved shall be tried in court for mass murder.

69/ To Senate shall reconsider all cancer treatments and halt

the sale of all sickening treatments that are not genuinely life extending by an amount to make up for the sickness induced by the treatment.

70/ Those who jam studies for cures, and prevent cures from coming to market so they may sell their treatments, shall stand trial for mass murder. For example those people who publicly mocked ivermectin, so their conspiracy might sell COVID vaccines for billions, should all be charged with conspiracy to commit mass murder. We shall send a message to the future regarding such activities.

71/ There shall be no intellectual property rights for treatments when we have cures. All IP rights for treatments shall be suspended upon development of an effective cure.

72/ There shall be no longer be any IP protections for any synthetic hormones now in existence, such as synthetic insulin, and Levothyroxine. Levothyroxine is a synthetic thyroid hormone first isolated in 1915. All synthetic hormones are hereby nationalized. Also, a primary reason for deleting insulin IP protection is that we don't need an incentive for people to give our children everyone else diabetes. Ishtar Loves to give us diseases out of hatred and sell us the cure.

73/ There shall be no IP for any psychiatric drugs now in existence. This shall include all SSRIs, and all stimulants. All psychiatric drugs are hereby nationalized.

74/ There shall be no IP synthetic insulin, or Metformin. All forms of these drugs are hereby nationalized.

75/ All proton pump inhibitor IP shall be cancelled.

76/ All tetanus vaccines that impede fertility are hereby nationalized and the IP voided.

77/ The Senate shall evaluate whether or not the many high blood pressure treatments like Lisinopril, Amlodipine, Metoprolol, and Hydrochlorothiazide are actually extending life by a significant amount.

78/ The Senate shall evaluate the role of Boron and Sodium tetra-borate in the treatment of arthritis and osteoporosis.

79/ No longer shall pharmaceutical companies distribute or market their drugs. Now the drug industry will focus exclusively on drug development. Now, due to the strategic and civil-defense nature of pharmaceutical drug distribution We shall institute a national pharmaceutical distribution system where all the standard-supply pharmaceutical drugs are distributed by say 20 national pharmaceutical distributors that get the same percentage share of their output, with all of them competing for volume of the pharmaceutical resupply industry. These will look and act like they are in competition with each other, but all shall be owned by the government.

80/ The pharmaceutical supply system shall work with a chronic oversupply situation at the distribution level, with at least 6-month's supply for all drugs that can survive for more than 1-year.

81/ All drugs that have suffered shortages in the past must be ubiquitized. And when drugs are ubiquitous for market abuses of the past, their ubiquitization payments shall be reduced by somewhere between 30% to 70% because of that fact, alone.

82/ All pharmacies must be open every day. All pharmacies shall be open either:

a/ 24 hours daily

b/ At least 7am to 7pm daily.

c/ At least 9am to 3pm daily.

83/ All pharmaceuticals for distribution shall be kept in sandwiched plastic packs. These shall be kept hanging from what is essentially a turning spring-spiral, goods-drop-to-the-bottom, vending-machine that is about the size and configuration of a elementary-school library. Many packs go on at once during a grocery-like restock, each with a uniquely colored package design for that drug. Also it will not matter if the machine occasionally produces errors. The Krell machine's output will always be double-checked by the pharmacist who will peel off the label from the plastic pill packs and put it on child proof bottles

84/ The pharmacy's Krell machines will go one floor up from the pharmacy so the collection equipment will go in the floor below, and distribution system can work on gravity and slides. Pharmacies will have several standard levels of which drugs they carry in stock: Level-1, Level-2, Level-3, etc. However, even Level-1 pharmacies shall be able to order any drug.

85/ The Healthcare Sluice shall manage the nation's healthcare supply system, so that we always have sufficient supply of drugs and other healthcare goods to treat people, and so there is never a super-profitable shortage of anything. In general, and wherever practical, we shall try to have several factories that compete in each niche. The Healthcare Sluice shall manage the nation's healthcare intake system, its treatment tracking system, its regulatory system, its healthcare worker qualification system, its hospital space system, its healthcare emergency response railcars, and hospital boats, its STD database, and its public education system with regard to health issues.

86/ The drug industry shall be limited to a percentage of GDP in the same way as the overall healthcare industry. The drug industry shall be limited to 0.6% of GPD, but it shall be initially set at 0.3% of GDP. Also, the amount of money that can be charged for treatments shall be limited to 1/4 of overall drug industry income, while cures are can be 3/4 of overall drug industry income.

87/ It must be pointed out that decades long ingestion of drugs produces side effects that take decades to study, while cures are much easier to study over a short run. Furthermore the longer the period of the study, the easier it is to corrupt.

88/ We obviously need unbiased third party testing of drugs. Wisdom dictates that the Senate testing not focus on hard-to-test decades long treatments, but instead on easy-to-test cures.

89/ The prescription drug industry shall now be divided into 7 parts:

a/ Private drug development

b/ Public drug development

c/ Private initial drug safety testing

d/ Senate extensive drug safety testing

e/ Public drug sourcing

f/ Public drug distribution and delivery

g/ Percentage mark-up pharmacies.

90/ There shall be no importation of any of the 300 most common drugs. All must be made domestically.

91/ All FDA approved drugs must be proven to genuinely increase quality of life, or life expectancy over the 10-year medium term by a measurable amount exceeding 5%, once all the medium-term side effects are accounted for. This means that drugs which only extend lives by 4.9% do not get

approved by the FDA.

92/ Once a drug becomes successful, it must be ubiquitized.

93/ To minimize healthcare corruption, one of our first priorities is to minimize the role of the private hospitals as middle-men in our healthcare system. This is because private hospitals provide so little benefit, and cost just so much. So the national government shall engineer an eternal glut of market-rent healthcare space only open to licensed healthcare people, and with nearby expensive tech in the facility. Also, we shall stop hospitals from renting office space to non-employee doctors and other non-employee healthcare people. If they work for the hospital, it is ok, but if they are renting office space from a hospital, that should not be allowed as it is anti-competitive. To this end, we shall use some of our "Resolution Trust Corporation" properties that government takes back in the upcoming economic crisis and give them to the various counties to remodel into healthcare spaces that are rented for a 15% profit to doctors, and small competitive clinics.

94/ All healthcare insurance companies and all other healthcare payers shall be required to use the national government's standardized healthcare information system, and none shall be allowed to use its own idiosyncratic systems or rules. The decision to cover is made according to a lengthy list of conditions that the Government uses to define what conditions get covered and which do not. But the Senate makes the list and the decisions about coverage are a thing of the government as well. And much of the time, the actual coverage will be by government as well, especially the government's DIY healthcare insurance policies.

95/ Where babies are delivered, government shall pay a flat fee. Foreigners giving birth in our nation shall pay the same amount themselves. All baby birthing facilities shall be in a separate nearby building from other hospital facilities. No vaccines shall be given to babies in any baby birthing facility. Every birthing mother in all vaginal births shall be allowed to have a calm support person of her choice. Except in genuine emergencies, healthcare providers shall not be allowed to separate mothers from their newborn babies. Where baby birthing centers do a non-emergency exam on the baby, this must be done with the baby resting on top of the mother. Women giving birth to children shall have the right to manage every aspect of their birthing, without any input from their husbands or baby father's or their fathers or anyone else. Every aspect of childbirth should be up to the mother herself as much as practical.

96/ We shall spend at least 1% percent the money we spend on healthcare and entitlements on rooting out fraud, oversight, and investigations in these areas. This shall include the money we spend on VA healthcare.

97/ Except for birthing OBGYNs, male homosexual healthcare workers shall not be allowed to specialize in areas where they come in contact with the sex organs or the anus. Also, all healthcare workers that work around the sex organs or anus shall be carefully background checked for sadistic tendencies and hypersexual sexual orientations. Here the rights of the thousands of patients shall be thought all important, and the rights of the healthcare person shall be thought utterly inconsequential in comparison.

98/ Healthcare initial appointments made more than one

teneth in advance must pay a tax of 6%. It should be the general practice of all healthcare specialists to offer some after-hours appointments at a 1/3 premium over their normal fees.

99/ The unauthorized medical treatment of children shall be a felony. This shall include all forms of injections, and all forms of vaccination and all drugs given without parental consent. At a minimum, those giving drugs to children without parental consent shall be presumed to be child sex groomers. This shall be especially so for psychoactive and sex-related drugs, such as sex hormones, but it shall apply for all drugs.

100/ All national government health divisions such as the CDC, and FDA shall be shut down and entirely re-staffed with science people from outside the pharma industry, and also no people with ecology-related, or climate-related academic qualifications. All current staff shall be banned from government work, public health work, and Pharma-related work for life.

101/ healthcare people with improvements in the system should first go to the Senate with data suggesting that some drug or treatment is better. They should never go to a drug company.

102/ The Senate shall regulate which surgical and aesthetic procedures will be allowed and which will be banned. It shall be a crime to offer or provide banned surgical and aesthetic procedures.

103/ Long-term prescriptions shall be prescribed by a doctor once every 2-years, and then reviewed annually by technicians.

104/ It is important that every industry be barred from manipulating regulations for its own profit, at the expense of the people. With regard to the pharmaceutical industry, government protections are much more life and death matters. For this reason, the rules of government corruption shall be most vigorously monitored, enforced, and punished with regard to pharma related corruption of government.

105/ The healthcare system shall recognize 5 types of drugs: prevention, prophylactic, cures, occasional treatments, and long-term treatments:

a/ It shall not be allowed to have FDA approved long-term treatments that are not ubiquitized. Where we fail to do this, it creates perverse incentives in the drug development industry.

b/ We shall have a 50% or 2/3 tax on income from long-term treatments, and we shall calculate our ubiquitization payments based on the existence of this tax.

c/ With regard to occasional treatments, the tax shall be about 20%.

d/ With regard to preventative measures, prophylactic treatments, and cures, there shall be Ubiq money, and Ubiq status for the scientific development team in addition to the ubiquitization buy-out money that the drug owners/developers are due. Thus Barry Marshall and Robin Warren would have been awarded perhaps \$250-million each and a huge amount of Ubiq status for their relatively non-commercial cure for peptic ulcers.

106/ The Senate shall establish a maximum lifetime cost (per patient) of all treatment drugs and all cure drugs. To start, the maximum lifetime cost of any treatment drug (or combination of drugs for a single disease or condition or treatment regimen or combination of treatment regimens) shall be one

third of a year's wages, and this shall apply to all treatment drugs currently in use in the nation, as well as all future treatment drugs. To start, the maximum lifetime cost of any cure drug shall be one year's wages. Once this amount has been paid through the treatment tracking system, the treatment user shall have the right to continue to take their drug but only pay the generic drug production cost of the drug to the system. Also, this generic production cost shall not be determined by the drug IP rights holder, but by a competitive bidding process run by the Senate.

107/ In ancient Rome, the public latrine toilets all had a tersetorium or xylospongium, (a shared abrasive sea sponge or loofah. It was called aa terse•orium, or a don't talk about it. It was also an X/Y-low-sponge. These things probably gave many people hepatitis. The Senate shall always remain on guard that this sort of sabotage never happens again. Also, many of the fake matrix things use names with instructions like this.

108/ Except for newly approved, genuinely new drugs in their first two weeks on the market, it shall not be allowed to advertise drugs, or treatments, or weight loss products, or beauty products, or herbal remedies or similar things.

109/ Medical journals shall not take money from drug or treatment companies or hospitals.

110/ Medical staff shall not be allowed to discriminate against patients based on whether or not they've been vaccinated or not.

111/ Everyone at NIH who has been collecting royalties, shall be tried for corruption and fraud, along with everyone paying them. Where this has resulted in a number of deaths, they shall be tried for mass murder and if found guilty, executed.

112/The normal rules of contract law shall apply in healthcare:

a/ Except in clear emergencies where the patient is out of their head, if there is no signed contract, then there is no right to collect. Also, if there is no agreed upon price, there shall be no right to collect on the part of the service provider.

b/ Except in life or death emergencies, there must be a written agreement with an initial price quoted with clearly defined procedures that is signed by the patient to create a binding contract and obligation to pay. This shall be so even for insurance charges.

c/ Except in life or death emergencies, the Senate's form contracts and standard pricing system must be used.

d/ For extras to apply, these must be verified or at least documented on video by a neutral third party verification service such as a testing lab or a county recorder system videographer.

e/ The existence of the medical condition must be documented on video by a neutral third party verification service such as a testing lab or a county recorder system videographer.

f/ Except in life or death emergencies, all healthcare service providers shall be required to state an estimated price for their procedure with extra add-on prices listed for common eventualities.

g/ All charges must be reasonable and obey standard pricing.

113/ All intellectual property rights in all companies that produced the fake mRNA COVID vaccines shall be nationalized. All shareholder equity in all companies that

produced the fake mRNA COVID vaccines shall be nationalized.

114/ The directors, officers and higher ups at all the companies that produced mRNA vaccines shall be tried for their crimes, along with all their bribed/ blackmailed conspirators. This shall include all their conspirators in the media, in healthcare regulation, healthcare management, and pharmaceutical marketing and sales.

115/ The previous healthcare system is terribly corrupt. Therefore, our new Senate shall review all the people who got rich from exploiting the old corrupt system pushing ineffective, dangerous, and overpriced drugs on the people. Everyone convicted of exploiting the healthcare system either as an individual or as part of a corrupt healthcare company shall be jailed and may be both bankrupted and voided economically for life. However, the people that actually discovered/developed new treatments shall be exempt. All the people working for government that got vast sums of money from the people they were supposedly regulating shall suffer the same prison/bankruptcy fate.

116/ The patent periods for new healthcare devices and drugs shall begin only after FDA approval has been granted for each specific use. Due to the age of the devices and patents, all the age of the patents, all intellectual property rights for MRI and CAT scan machines shall be cancelled.

117/ The Healthcare Sluice shall review and re-evaluate all approved treatments and cancel all generally ineffective treatments and also treatments with too many side effects. The Healthcare Sluice may also limit the prices of individual treatments if it judges that price gouging has occurred.

118/ In order to help keep our healthcare system honest, the patient rooms shall be owned and rented by the county, with the healthcare staff getting none of this money. Thus there is no incentive to either hold people in the hospital, or to get them out quickly. Hospital rooms shall be regarded as something that government should make too many of. We should have 3x as many hospital rooms as anyone needs most of the time. Then if we put three beds in the rooms instead of 1, we can increase hospital capacity by 9-fold.

119/ Healthcare providers shall not be allowed to rent rooms or sell food. They shall be required to stick to healthcare. Each hospital shall have an oversized hawkers center. One bunch of stalls is for the hospital workers, and the other hidden bunch of stalls is for patients. All food is delivered throughout the hospital and surrounding doctor's offices by droids free of charge. The Patient food is charged at hotel room service rates plus 20%, with the hospital getting none of this money. The patients pick the stalls, and there are many stalls. So the hospital food is always first quality, as it should be.

120/ The Senate shall determine how often each drug must be prescribed for each long-term condition, so that corrupt doctors do not force patients to visit them unnecessarily many times per year. Also, the Senate shall establish standards for drug refills issued by pharmacists or technicians.

121/ We shall have lower standards for treatments for diseases that are life-threatening, life-shortening, and degenerative, than diseases that are merely a matter of quality of life. The standards for approval of drugs and treatments for non-life-threatening and non-shortening

diseases shall be extremely high, and she require upwards of 10 years of study.

122/ Only the healthcare sluice shall make official guidance on drug treatments and other treatments for doctors

123/ When we see psych guidelines like the DSM-5, we should all be looking mostly at the way this sort of thing is a tactic to undermine our rights. Here is why it needs to be a crime when people using psych experts in court or other places to justify taking people's rights away.

124/ Government shall never be allowed to compel or pay for any universal treatments. Wherever at least 1/4 of the people either has or will take some treatment, it must be ubiquitized for a number of reasons.

125/ Where there is controversy about matters of treatment and nutrition, the Senate shall be required to look at the election results of the nation's doctors about treatment and nutrition policy. All active and retired doctors in the nation must vote or abstain their opinion and advise the Sub-Senate on policies. There shall also be similar separate specialist elections for all the specialties as needed. However, the Senate shall make the ultimate decision, because healthcare people are frequently biased like everyone else. Also, let it be thought that the Senate should not defer to scientists and doctors when lay people are arguing with true quantities or common sense. True numbers and common sense logic arguments should always be considered more credible than any advanced degree or tenured (ten-year) professorship.

126/ There shall be no slimming centers that promise to make people thinner by applying things to their skin.

127/ Groups of 5 or more doctors shall be allowed to experiment with benign treatments where they are confronted with new untreatable healthcare syndromes.

128/ Government shall not be allowed to order doctors to stand down and wait for central command to come up with a treatment for untreatable or largely untreatable conditions.

129/ Hospitals and medical group practices shall no longer be owned by corporations or partnerships exceeding 60 doctors in cities and 30 doctors in exurban and rural areas. This plus a reasonable number of medical and billing support people. All of these groups must be at least 60% owned by their doctors and at least 8% owned by their other staff, which shall all be entitled to their reasonable profit share in consideration of the ownership ratio.

130/ Government shall not allow any incentives, laws, regulations, or practices that drive healthcare people into harming patients, or risking the lives of their patients. Once a significant and credible source of harm or pain is discovered and explained, the laws, regulations, and practices (in relation to the harm must be suspended pending re-consideration in light of the new information.

131/ Where this is a new treatment, we shall be biased towards stopping the new treatment pending re-evaluation. However we shall always be on the look out for corruption from the owners of existing treatments that will be eclipsed by the new treatment.

132/ The government and its FDA (and all fictional citizens and real citizens), shall be prohibited from limiting access/availability to any old drug or treatment that is, or was once widely prescribed in any part of the planet with little historical documentation of harm. The only exception is where careful

testing by at least 50 large 1,000 person studies, all by different groups, and all concur that the harm of the drug is significantly greater than the benefit.

The Senate shall go back and re-evaluate all public domain drugs that were "cancelled" or pulled from the market in recent decades, except those that have been shown to definitely and conclusively harm a significant share of people more than they have helped. Bactrim and Brenzavvy shall be reinstated. Also, both Suramin and Leucovorin shall be made available for testing in severely autistic people who are unable to speak, or nearly unable to speak.

Bactrim is a good example of a perfectly good generic drug cancelled for no good reason, except that it is cost \$10 and it competes with our drug industry selling needless updates of antibiotics for around \$500 that do substantially the same thing for 50 times more money. Another example is the somewhat effective off-patent drug Brenzavvy which was "cancelled" or simply pulled from the market so that super-expensive on-patent drugs like Jardiance, Rybelsus, and Farxiga could be introduced. Here with the pharmaceutical industry deletion of generic Brenzavvy we see why the people at least need their own parallel drug distribution system. For this system would never delete any older drug unless the drug is proven to be definitely harmful and removal is ordered by the Senate. Also, we shall never allow anyone to say that the people do not need their at least their own parallel drug distribution system. This incidentally might function via the delivery system. Here we imagine that each person has secure interior certified mail deliveries that require recorder system ID verification for pickup.

133/ We shall always be mindful of Invention fraud, of people making false claims about new treatments, and we shall as a general policy, not believe anyone except to the point where we can test their claims ourselves. And this will be a procedural precept of our invention funding system. This is a thing that must never be hurried along, even in war. If there is a war or other crisis, the people approving have to work 24/7 in shifts until they can complete the testing. Another source of invention fraud is quite insidious. It involves people working to get existing IP out of the way, so they can introduce a new more expensive solution that they are selling. This generally tends to be not quite as good, because it was frequently the second choice of the first team. So this sort of IP mining is incredibly insidious and detrimental. And as a protection, it should be difficult for new similarly effective drugs to get any IP protection. We should never allow people to acquire IP rights by cancelling/deleting good old inventions so they can introduce new fake inventions for the oversized inventor money. And we shall also aggressively go after any people that use deception to cancel/delete any old proven drugs, so they can introduce a replacement at great profit. Again, we should always be very aggressive in the defense of old effective drugs by would-be fraudulent inventors that are the opposite of real inventors like Thomas Edison, Steve Jobs, or Eli Whitney. So when fake inventors try to delete some golden treasure from our nation's IP treasury, in order for them to sell some fake new invention, future generations should throw the book at them and put everyone in the conspiracy in prison for decades.

134/ Where there already exists a drug that does essentially the same thing as a new drug, there shall be no patent protection possible for the new drug. Where old, out of IP protection drugs have been cancelled and it has lead to a new expensive IP drug being introduced, the IP for the new drugs shall be hereby cancelled immediately. If this causes any company to lose more than half of its revenue, then that company shall be hereby nationalized.

135/ All medical equipment shall be required to be ubiquitized to be FDA approved for universal use.

136/ We shall never have a situation where the insurance companies are managing healthcare facilities. If we allow this, then there is no accountability for the insurance companies, because then they can just fudge their costs and hide how they're really ripping everybody off.

137/ Health insurance companies shall no longer be allowed to participate in the provision of healthcare services or to operate hospitals or to operate HMO's or operate long-term care, facilities, and all HMO's will have to be broken up. All of this shall be regarded as a conflict of interest. Thus it is better if we prohibit it all.

138/ No healthcare company shall employ more than 1,000 healthcare workers.

139/ It shall not be allowed for insurance companies to have their own idiosyncratic rules on what they're going to pay for with their insurance. instead, there shall be 4 different standard paid insurance policies above free healthcare And in each case it shall be a Sub-Senate jury who has the ultimate say over who gets to have what procedures that are paid by insurance.

140/ Insurance and healthcare companies, and OPM managers shall be prohibited from having their own preferred vendors. This is only the path to lower quality service and higher costs.

141/ All health insurance providers must all pay the same amount for all uniform national treatment codes. If the patient uses the Sub-Senate's adjudication system then the system keeps the fee. If the patient is wrong they forfeit their application fee. If they are right the insurance company pays 3x to the government.

142/ Insurance companies shall not be allowed to pay a different price to different pharmacies or different service providers.

143/ Long term care insurance needs to be heavily regulated. And there shall never have any sort of HMO or nursing home sort of situation where the insurance company is also caring for the person, because they will try to kill them quickly.

144/ Insurance shall be taxed when it is purchased. Insurance pay outs shall not be taxed.

145/ The definition of insurance shall be maximally inclusive on the side of insurance providers. And this shall include everything that in any resembles insurance.

146/ There shall be no patents for new drugs that do substantially the same thing as other drugs in existence.

147/ No form of healthcare insurance or healthcare payment system shall involve people giving their property over to the insurance company or the healthcare payer, such as with medicare. There shall to be a firewall between people getting money out of their property and liquidating assets and people paying their healthcare bills.

148/ We want to have a culture of insensitivity in our surgeons, definitely, but also, throughout our healthcare system. The people who we have working in the healthcare system are not supposed to be dwelling on the suffering of the people that they are caring for. This not only reduces the number and quality of the people doing this kind of work, but it also uses up their valuable time. So the bedside manner is not supposed to matter at all in medicine. If the doctor is incredibly abrasive, then he should get somebody to speak on his behalf and if they need to conference, confidentially they can go outside the room.

149/ Medical reality and especially treatment reality and medical and treatment policy shall only be determined by the election of the College of Confirmed Senators, and not any AMA-like organization of doctors. So only the College of Confirmed Senators grants final FDA approval for new expensive drugs, and decides which cheap drugs get recalled because they are suddenly considered problematic for no good reason (for example: Bactrim). Only the CCS shall decide on what is medically real, what is dangerous, what is to be discontinued, what necessitates treatment, how conditions are to be treated, which vaccines are recommended and which are banned. what the prices of the treatment are to be, what is to be adopted, and all other medical policy decisions by the Government. Also, this sort of government approval process shall be thought to be a thing that absolves healthcare people of liability, so long as they were following the established guidelines of our wise-man and incorruptible Senate and its CCS.

150/ Healthcare people shall not be allowed to report pregnancies in females age 16 and older.

151/ There shall be no more lobotomies performed on people that have not been crippled by a physical traumatic brain injury. It shall be considered first degree murder to perform a lobotomy on a person that has not suffered a great physical traumatic brain injury. Where lobotomies are performed on anyone against their will, or without their informed consent, this shall be considered first degree murder. Where surgery is performed on anyone against their will, or without their informed consent, this can easily be considered second degree assault.

152/ Non-physicians and non-nurses shall not be allowed to own or operate medical practices. No Healthcare provider shall provide more than 1/1000th of our nation's healthcare services. No generic drug maker shall provide more than 2% of our nation's generic drugs.

152/ Drug companies and healthcare providers shall not be allowed to make any policy decisions about which treatments are approved and which drugs are not approved for use by the people. Only the Senate shall have this power.

NR'108. HEALTHCARE RIGHTS

1/ Everyone's body shall belong to that person, unless they are a minor child under age 18 and still under a parent's guardianship. In that case the parent shall hold all rights to allow or not allow treatment, except the right to abortion, which shall always be the decision of the pregnant female over age 13. Minors may however petition the courts for intervention for tested and effective treatments that are

potentially life-saving, or needed to treat a clinical pathology. In this case, it shall take 4 out of 5 Sub-Senators, randomly drawn (as always herein), ordering the treatment in contravention of the parent. However, if neither patient nor guardian parent wants treatment, then neither anyone on government nor the healthcare system shall have any right to order treatment. Also, this right to refuse treatment shall be greatest with terminal diseases like cancer.

2/ There shall be no exceptions to the rule of informed consent and everyone shall have the right to refuse treatment, including minors over age 12. Even parents cannot force minors over age 12 to receive treatment, including especially braces and cancer medications. They cannot however refuse teeth cleaning and dentistry. Also, minors over age 8 may refuse psychoactive drugs.

3/ Parents shall have the right to stop their children from having healthcare treatments (and especially plastic surgery and mental healthcare treatments) until they are age 21. In other words, parental consent shall be required for people under age 21 to have plastic surgery and other procedures, including piercings and tattoos. It should be noted the way the corrupt medical establishment previously sought an inversion of these rules, granting children of any age, the right to undergo highly profitable medical treatments of various sorts without parental consent. Also, parents shall have access to their children's medical records until they turn 21. Where people violate this rule, they shall lose their privilege of practicing medicine or whatever it is that they deal with healthcare.

4/ All patients and their insurance companies shall have a right to stop paying once they have attempted to check themselves out via the treatment tracking system.

5/ No patient (no matter how demented) shall be denied access to the treatment tracking system, where they can make complaints and submit camera numbers and time stamps for system review of their care.

6/ Where patients competent to check themselves out are prevented from leaving, police must escort them out. Thereupon if the staff of the care facility shall automatically have a restraining order against going to where the patient lives.

7/ In the case of any infectious epidemic, all geriatric care patients shall be thought better off with their family if they want to care for them. The way epidemics race through geriatric care facilities decimating (killing more than 1/10th) is very well documented and completely obvious. To help extend life, we shall say that all geriatric care facility charges shall get a 50% reduction where the patient goes and lives with his family during the cold season.

8/ Neither Government, nor any little-brother voices shall have any business encouraging people to kill themselves under any circumstances. Wherever our government or our entities tell us to go kill ourselves we shall ponder William Bullein's "A Dialogue against the Pestilence" from 1573: "If a plague happens, it is no great loss. It delivers the poor from their pain and misery into a better world. ... In such plagues our [foreign] poor people benefit greatly. Their loss is our good fortune. When they become naked, we then are clothed against their will. With their alms and doles we are relieved. Their sickness is our health, their death our life." Here we see

the way the parasitic Mideast battens on the misfortune of its various host nations.

9/ Healthcare people shall not have the right to take away people's communication devices or prevent them from using communication devices unless they are genuinely disturbing their shared room roommates.

Healthcare people shall not have the right to keep people from quietly communicating with their loved ones while in care. This includes in person visits which always may be confidential. Healthcare people can request that patients give up their communication devices, but they cannot demand it, except when the patient is being operated on, or scanned, or is consulting with a doctor.

10/ All non-contagious people shall have the right to see visitors during visiting hours which must be at least 6-hours daily, every day.

11/ Nobody shall be handcuffed, restrained, or sedated in a medical facility unless they are under arrest, or they have hurt themselves, or hurt others, or are clearly delirious, or the court orders it. There shall be a right to freedom from restraints including both physical restrains and knock-out drugs used in the provision of medical and surgical care unless clinically necessary and agreed to by the patient. All use of non-emergency and non-essential restraints and knock-out drugs by healthcare people shall be prohibited. Where these are used in emergencies, there must be approval within 12 hours by a Senate healthcare jury.

12/ There shall be a right to a public healthcare audit. Everyone under in-patient medical care, or long-term care shall be audited at least after 6-days, 18-days, 36-days, 72-days, and then quarterly a Sub-Senate tribunal, which as always is randomly drawn.

13/ Everyone receiving government or private corporate disability payments shall be audited around twice per year, unless they are and amputee, or otherwise obviously damaged.

14/ There shall be the right to expect honest information from healthcare providers without any greed bias on the part of the healthcare providers.

15/ There shall be the right to assume that all licensed healthcare providers are providing care that meets national standards.

16/ There shall be a right to refuse to be part of human experimentation and studies. There shall be a right to refuse all arguably experimental treatments. There shall be a right to full disclosure when studies are being conducted. Healthcare people may be charged with assault or murder for pharmaceutical studies conducted on people without full disclosure.

and the right to refuse being the subject of a visits by a team of intern doctors being taught.

17/ Healthcare providers shall not force people to use any particular sort of treatment if there are widely used alternatives.

18/ There shall be a right to not be pressured over healthcare procedures.

19/ There shall be a right to see honest reviews of healthcare providers.

20/ There shall be a right to share one's experiences with the healthcare system, and a right to complain about the quality of the care to anyone who will listen.

21/ There shall be a right to choose one's care providers.

22/ There shall be a right to login and view and copy one's medical records at any time, and to download all healthcare files in a common and accessible format.

23/ Every healthcare diagnosis must use the international standard diagnosis codes.

24/ We shall aim for total transparency with regard to healthcare costs. There shall be a right to a bill that is itemized to the level required by the Senate.

25/ There shall be a right to have technical matters explained and to have technical questions answered.

26/ There shall be a right to be told when something goes wrong with a procedure.

27/ For everyone legally in our nation, there shall be a right to effective anesthesia and pain treatment after painful treatments.

28/ Medical facilities with operating rooms and which provide emergency care, these shall not be allowed to care for patients for more than 18 days. All such long-term patients must be transferred to a long-term facility unaffiliated with the institution providing the emergency care or surgery.

29/ There shall be a right to timely care at appointments. Healthcare providers that are late more than 30 minutes shall have to discount their services according to the Senate's guidelines.

30/ There shall be a right of patients without a cold or flu be free from other patients with a cold or flu at the same clinic. All patients with a cold and flu must either use a special clinic, or use a special room with a door to the outside. Also, the exam rooms at infectious disease care clinics must automatically UV sanitize after each visit. This shall be thought a mere sensible extension of the command to do no harm.

31/ There shall be a right to know the Healthcare worker number of everyone persons providing care. All must log-in to each room with their barcode. Every healthcare worker in the nation shall have a unique 2-letter plus 7-digit number that they must wear in 2cm type over their heart. MD-1234567, RN-1234567, etc. These must all have a scannable barcode on their uniform in addition.

Everyone's emergency data goes on their barcode ID, so EMS can know any special info instantly. Also the person's credit and payment level should also be accessible.

Healthcare uniforms shall be color coded as follows:

a/ Light hospital blue is for general doctors.

b/ Dark hospital blue is for specialist doctors.

c/ Light hospital green is for limited nurses.

d/ Darker hospital green is a full nurse, or supervisory nurse.

e/ Hospital purple colors are for techs.

f/ Hospital yellow is the color of clean up and food service people.

g/ Money people and registration people in healthcare wear no medical uniform.

32/ Those participating in future gender conversion surgeries including office staff shall be imprisoned for 10-years. Those providing or administering hormones shall be imprisoned for 5-years. When these abuses involve minors under age 21,

triple penalties shall apply. However, the Senate may also charge gender transition people, and FGM witchdoctors with sexual butchery and give them life in prison.

33/ Medical facilities may have quiet lights-out times, but they shall not keep patients from communicating with people on the outside. Video calling must be allowed and supported.

34/ The healthcare system shall permit people to obtain care without doctor direction to the maximum extent practical.

35/ X-rays, ultrasound and other imaging shall be available without a doctor's prescription and without any surcharge for this. Patients who suspect they have a bone fracture may go directly to an imaging center before seeing a doctor.

36/ People who wish to check their blood chemistry may go directly to any blood lab or pharmacy which shall draw the blood and provide the results to the patient's healthcare account free of surcharge.

37/ There shall be the right of clinical healthcare providers to speak freely among themselves and to question the consensus approach and consensus narrative. Nobody and no group shall ever be allowed to silence the clinical healthcare providers of our nation for asking questions or stating their professional opinions.

38/ Only the Healthcare Sluice of the National Senate may establish national healthcare policy. No fictional citizen shall have any right to enact mandatory healthcare policy for any worker, any customers, or anyone else.

39/ Except where people are in critical condition and not entirely conscious, as certified by a Senate jury: Healthcare people shall not be allowed to inject them with sedatives or knock-out drugs, or anesthesia without their consent.

40/ Except during emergencies, all drugs administered must go on the patient's chart (backed up live by the recorder) prior to giving the drug.

41/ The people may give others the right to make decisions on their behalf according to the settings at the recorders office. However, without a court order, the people may also log in and change these settings at a later date. People without any next of kin may also appoint non-active Sub-Senators to make these decisions for them.

42/ No conservatorship shall be established except by a randomly drawn Sub-Senate jury of 3 Sub-Senators. Where the ward under the conservatorship has wealth in excess of 50 year's pay, the conservatorship jury shall have 17 Sub-Senators. Where the ward under the conservatorship has wealth in excess of 500 year's pay, the conservatorship jury shall have 49 Sub-Senators. No conservatorship shall live for more than one year at a time. In order to renew a conservatorship, new randomly drawn Sub-Senate jury of appropriate size must convene annually.

43/ The Senate shall offer 12 levels of health and medicine video training for free to anyone who cares to watch them. Level 1 shall be compulsory for all 13 year olds. Level 2 shall be compulsory for all secondary school graduates. Level 12 shall be equivalent to medical school.

44/ Government shall provide free training in every occupation that can be taught via an automated online interface, and healthcare is no exception. However, for healthcare occupations, government shall also provide up to 2-years of clinical training for doctors and up 1-years of clinical training for nurses at no net cost for those who both

obtain the license and practice for 5-years in the field they trained for. All clinical training shall occur in government hospitals and government shall not outsource this to any private medical school.

45/ All high schools shall offer short courses in infectious disease nursing, emergency birthing, trauma nursing, burn nursing, healthcare cleaning and sanitation, elder nursing, and first aid among other useful civil defense healthcare training modules for backup help in disasters. Nursing theory shall no longer be a part of any nurse's required education.

46/ It shall be considered a good thing when a broad section of the people have skills in animal surgery — for these may be needed in an emergency to stitch-up people. Such skills may be hugely valuable in natural disasters. Furthermore, better that we can treat 2X or 10X as many animals than we treat fewer animals with slightly better outcomes due to extreme veterinary surgery training.

47/ All registered nurses shall bear the title of "nurse surname", or "first-name, surname, RN". This is just like how doctors are called "doctor surname", or "first-name, surname, MD". There shall also be nursing assistants NA's that don't get to use a title.

48/ Each hospital shall have a place where the County Senate offers its Medicine related classes. This is so more healthcare workers will stick around after work more often and upgrade their skills. It is also to offer a viable path for enlisted healthcare workers to rise in rank and become doctors, so we have more doctors.

49/ In general, there shall be no right to privacy with regard to statistic gathering of public health information by government about public health where names or identity numbers/codes are not released to the public.

50/ Care facilities shall not prepare their own food, but must all rely on vouchers payable to their township's food courts, which courts must have at least 12 active full time stalls to assure competition.

51/ It is supposed to be easy for old and disabled people to change their care facilities, like changing a hotel. This easy-change aspect is what makes the care home system truly competitive and provides the people with the best care practical.

52/ No matter how bad a person's mind deteriorates. If they can log-in to their account and switch care homes online (15 steps) then the new home shall come and take them and move them.

53/ As a society, the #1 thing we can do to prevent people from dreaming up new ways to cause diabetes is to eliminate all IP on synthetic insulin and other highly profitable diabetes treatments.

54/ The hospices and late life care homes are supposed to all go near the centers of our townships mostly so it is easier to visit people more often. Hospice facilities shall be provided by government for free, with volunteers helping those who are in the process of dying.

55/ All care homes shall indicate the number of minutes each resident gets daily with what care staff. This shall occur according to a schedule and all low-res videos of this work shall be recorded by the recorder for 60 days. The system shall use image recognition to make sure the work is done the same way each day.

56/ Any person, including those licensed to practice medicine, who in good faith provide emergency care or treatment to another in an emergency situation shall not be liable for any money court damages as a result of such aid or treatment.

57/ Those who help overdosing people to get medical attention shall not be subject to charges of illegal drug possession while they are helping the other person to get care.

58/ The Senate shall assemble a uniform code for organ donation to be administered by the Healthcare Sluice.

59/ Only the Senate shall decide on the definition of brain death, and how long people must be apparently brain dead before they are either taken off life support, or their organs harvested. In this subject, all empirical evidence shall be considered. Also, specific standards shall be used for people who are apparently brain dead due to oxygen deprivation beyond certain time periods, and also people who suffer extreme injuries to their frontal brain lobes consistent with a life long vegetative state, among other circumstances.

60/ Brain death shall not be tested using an Apnea brain death test where the ventilator is disconnected. The Senate shall establish better testing procedures for determining when a person is actually brain dead.

61/ The bar for organ harvesting due to brain death shall be higher than the bar for simply disconnecting all support equipment. The Senate shall establish separate standards here for each case.

62/ There shall be an implied trade-off when society keeps brain dead people on life support. The trade-off is that the vegetative person get kept on life support equipment for twice as long as usual, but at the end of that time period, if they have not come out, then they may be used for organ harvesting.

63/ Every person age 18-60 executed by Government for violent capital crimes shall be subject to organ harvesting before the lethal injection is given.

64/ It shall be a capital offense to participate in a conspiracy to harvest organs of people against their will, or to illegally pay people to buy their kidneys or other organs. Also, these organ harvesting conspirators, shall themselves be cut up for their organs prior to their execution. There shall be no foreign recipients of our organs, unless nobody else can use the organ. Stealing, or participating in a conspiracy to steal or mis-appropriate peoples placenta, umbilical cord, umbilical blood, foreskins, or birth tissue shall be a felony, even for the collecting nurses and other people are working in the hospitals. Everyone including especially parents shall be required to give informed consent for this, including knowing how much the tissue will be sold for downstream and what and where it will be used for.

65/ There shall be no organ harvesting or withdrawal of life support without the approval of a random 7-man Senate jury from the Healthcare Sluice. It shall be a felony to engage in human organ harvesting, sales of human organs, or human organ transplantation outside of the purview of the Senate. This sort of activity may also easily be considered as a form of murder, or conspiracy to commit murder if the patient is not ruled already on death's door. It shall be a felony charge for organs received in transplant, or to build charge this into transplantation fees.

66/ All organ transplant organizational staff shall work exclusively for the national government on a fixed salary. All shall be required to live audited cashless lives, and no transplant staff member shall receive any money or rewards outside the system. The Senate shall also attempt to do the same for the staff doing the organ transplants. This shall be thought necessary to ensure the purity of motive of all people working in this easy to exploit branch of medicine.

67/ Each person's consent for organ donation shall be either completely off, or on under some set of circumstances. If anyone turns their organ donation on, they can always turn it off again the same way that they turned it on.

68/ Except in regard to those executed for capital crimes, there shall be no automatic organ donation laws for the people of our nation.

69/ The healthcare sluice shall establish rules for the conduct of doctors while patients are under anesthesia or unconscious.

70/ When there are diseases that are commonly fatal, nobody (neither Government, nor any medical or insurance body) shall order doctors to stop experimenting with their treatments if many doctors report success with these treatments.

71/ All IV services and other nursing services are only billed at nurse rates and there's no hospital cut.

72/ The Senate shall shut down all existing medical and scientific publishers and then aim for a field of at least 300 publishers for medicine and 300 for science. The Senate shall also offer its own publishing.

73/ We shall develop spinal endoscopy as a medical specialty and use non-doctor technicians where practical.

74/ No generally healthy person may get elective sterilization surgery, or take sterilization drugs until they are over age 30.

75/ While the healthcare industry would love the extra business, we shall not consider prosthetics as part of medicine or dentistry. The people who make and fit prosthetics shall not require any training in medicine or healthcare. Prosthetics shall have 4 specialties which shall not be allowed to be performed by any doctor, dentist, or healthcare system provider:

a/ Legs and feet.

b/ Hands and arms.

c/ Face and head.

d/ Dentures, bite guards, and Invisaligns.

76/ To save the people money, we shall say that all custom dental lab apparatuses from retainers, to bite guards, to dentures and the rest, all of these shall now be made in a quantity of of 4. Also, where custom dental apparatus already exists, dental laboratories must accept these patients and clone their apparatus without any approval by any dentist, if the patient/client wants this. This shall include all dentures and all bite guards and similar dental apparatuses. There shall be no IP rights for dentures, dentistry, or individual prosthetics. Also, all bite guards and retainers shall be ordered through dental hygienists.

77/ No hospital shall be allowed to for people after they have died in their hospital. However, all hospitals must keep all corpses refrigerated for up to 10 days at no charge. Also, where people die in a hospital, or they arrive at the morgue, the person's name shall be immediately laser burned into the palms of both hands and their number into the bottom of their

heel in 6 mm text.

78/ There shall be no minimum age for refusing to engage in mental healthcare including drugs for the mind. People of every age, including children shall have the right to refuse psych treatment and involvement with mental health people. The mental health people are not allowed to persist. Also, our nation's democracy, skeptical as it is, shall generally regard intangibles as fake, particularly when people are charging a lot for them, such as what psychs do.

79/ Each person over age 11 shall have the right to refuse medical treatments, except in emergencies where the person will probably die within two weeks. No person over age 11 shall be forced to undergo any medical treatment by their parents, or Government, or some clinic, or some school.

80/ Except for criminal behavior and obviously delusional people who talk to people who are not there and who rant and rave repeatedly, and have trouble staying within the objective common reality, the courts shall have no right to order people to undergo psychiatric care. Also, the term "mental health professional" shall no longer be allowed because it implies special skills where over 95% of the time, there are no special skills.

81/ No minor under age 16 shall be given any psychoactive or psychotropic drugs unless approved by a Senate medical tribunal. It shall be the official policy of this government to make it difficult for healthcare people to give apparently normal children, psychoactive or psychotropic drugs. All prescriptions for psychoactive drugs for minors shall:

a/ Require 3 prescriptions from three different doctors.

b/ Shall only exist for ubiquitized medications that offer no profit incentives.

c/ Never be recommended by educators, or involve educators in the information process.

82/ The term emergency room shall only apply to Senate approved emergency rooms with certain levels of emergency room capabilities (1st tier, 2nd tier, and 3rd tier). Large letters ER-1 to perhaps ER-5 shall be on the signage, and all of the marketing material and directions of the emergency room. There shall be no "urgent care clinics", but only ERs of various levels. There are also walk-in clinics for people who are feverish and ill.

83/ People in emergency rooms hand over their drivers license or government issued ID, and then they get evaluated immediately. People don't wait in pain while they check in. There shall be no business that owns a chain of hospitals or emergency rooms or that acts as a middleman for thousands of healthcare people. lives of people, or improves their health.

84/ Everyone over age 13 shall have an inalienable right to leave or change any treatment or medical approach at will, any time, and with or without consulting their healthcare providers. The word inalienable means that this right cannot be signed away by contract. Everybody shall always be free to leave any treatment, and pay the prorated amount if applicable.

85/ The right to leave treatment shall be considered inalienable, and when people check themselves into a healthcare facility, it shall not be possible for them to sign away their right to leave. All such agreements shall be unenforceable under the law.

86/ The people shall have an inalienable right to change their

treatment approach. The people shall also have a right to leave any treatment they want at any time they want. No agreement concerning a treatment plan shall be binding upon the patient or their family, and all patients shall be free to change their treatment plan at will and at their sole discretion. Either the patient or if applicable their parent or legal guardian shall always have the right to cancel treatment, and not only that, but people shall always have the right to leave treatments in the middle and pay no more than the advance payments already paid. We do this to sour things for quack programs that would draw people into lengthy and expensive treatments. Everybody's always free to leave treatment, and pay no more than what they have already prepaid.

87/ Except where people are ordered to go to a healthcare facility by a court of law for breaking the law and during the stated period of court-ordered confinement, everyone shall have an inalienable right to leave any and all healthcare facilities (including mental health facilities) at any time, with or without paying and settling their pre-paid accounts.

88/ Those using force in an attempt to keep a person in a hospital against there will may be both:

a/ Charged with kidnapping.

b/ Considered as criminal kidnappers under the law and subject to the rules of self defense with regard to the people they are kidnapping or holding against their will, and their community defenders.

89/ No person shall have the power to check another person into a medical facility or mental facility against their will, or keep them in such a place, even if this was previously granted by agreement. Everyone shall always have an inalienable right to leave any medical facility they checked themselves into with their own signature, or where someone else did this. Where other people have checked someone into a medical facility, the person so checked-in shall also have the right to check himself out of. The only exception to this rule shall be for people who are unable to pass the appropriate Senate-administered standard-tests for legal competency to live independently, or a Senate Jury votes 2-to-1 that a person is incompetent in the wake of crimes, or 5-to-1 in the wake of bizarre behavior.

90/ Except upon a court order, or where the person is under arrest, or just out of surgery, no hospital or medical care facility shall have the right to prevent people from leaving their facility. There shall be an inalienable right (a right that cannot be signed away) for people over age 15 to leave any healthcare facility that one checks one-self into, or one's family checks one into. This includes all hospitals, and all places for those with senile dementia, or mental illness. The only way around this rule is to get a court order, upon due process, saying that the person is unable to care for themselves. Also, when a family member checks a patient into a facility, that family member, or the patient themselves, and other similarly close family members shall have the absolute right to check the person out again. There shall be no exceptions to this rule (even in the midst of a raging epidemic) and it shall include all emergencies, all crisis situations, all problems, all epidemics (no matter how deadly), and all homes for the mentally ill and senile. Those healthcare workers holding people against their will by lock or force, or refusal to use a telephone or internet may be charged with a

crime. Facilities that prevent patients/customers from leaving shall be fined and closed down, and the people keeping patients against their will jailed for kidnapping.

91/ There shall be no medically induced comas without either the patient, the next of kin (but only if the patient is incapacitated), or a healthcare jury approving of this treatment. Also, with regard to medically induced comas, there shall be no right to collect healthcare charges against either the patient, their insurance provider, or the estate of the patient where the facility does follow the law perfectly.

92/ Where people die under questionable situations in healthcare facilities, there shall be no payment to the healthcare facility until the cause of death reporting system has made its report. Where healthcare providers are judged to have killed or maimed a patient, there shall be no further payments due to the healthcare provide for that patient, even if prior payments are delinquent.

93/ The Senate shall elect which drugs and treatments the nation's healthcare providers and hospitals may offer to patients. No hospital shall ever make any vaccination or injection, or pill a requirement of entering a hospital or treatment, or continuing with treatment.

94/ The people shall have a right to see true and real statistics from all objective studies on how much each treatment actually extend people's lives.

95/ All healthcare people shall be prohibited from recommending birth control drugs for any purpose except birth control, and especially not to treat acne, or irregular menstruation, or some mild hormonal issue.

96/ No healthcare people shall be required to report consensual sex when it is detected in anyone over age 15 to either government or parents. However all must report consensual sex involving 14 year olds and younger when it is detected.

97/ When people make and appointment for an expert or professional and then don't show up at all, or they are late, they shall still have to pay for the appointment.

98/ Those healthcare people who participate in so-called sex changes and sex change hormone treatments shall be considered exactly the same as the primitive barbarians of North Africa who mutilate the vaginas of their little girls.

99/ All hospital beds shall be required have a hotel safe that makes it very loud noise when it is opened. This will greatly reduce the stress of many patients.

100/ Imaging, laboratory work, and radiological diagnosis shall socialized and charged at built cost. Likewise, the emergency room and triage healthcare system shall be owned by each county government and these shall only charge an anti-nuisance fees for emergency room arrivals.

101/ There shall be no unauthorized examinations of people while under anesthesia. And this shall especially apply to pelvic exams and examinations of women's bikini areas and breasts. Except in remote areas, all of the knock-out anesthesia surgery is supposed to occur next to a hospital, and the entire experience is supposed to take place under recorder system video monitoring.

102/ There shall be no brain scanning without consent. There shall be no hardware capable of scanning the brain that is not sold as a brain scanner. Unauthorized brain scanning shall be seen as a form of rape or a form of felony spying on people.

103/ Memory deleting electroconvulsive therapy shall be prohibited.

104/ Everyone's healthcare credit report shall be separate from their regular everything-else credit report. Landlords, and and those extending credit for the purchase of real-estate shall be prohibited from using healthcare debt as a criterion, for anything. Also where people die, unpaid healthcare debt shall never become a lien on their post mortem estate. This however shall not include weekly or monthly rent paid on the room in the healthcare facility, which must be prorated to the end of the day the body is collected by the family.

105/ No healthcare provider, or healthcare provider affiliate shall be allowed to become anyone's legal guardian, or post mortem executor. It shall be a felony where healthcare providers or their affiliates trick people into thinking that this is the case.

NR'109. CAUSE OF DEATH REPORTS

1/ The life and health of the people being above all else, The Senate and county recorder system shall keep detailed, well-investigated, and unbiased cause of death reports and statistics. We shall take great care to properly label the true root cause of every death. We shall not record any infections of the brain or parasites of the brain is brain tumors, for example. Government shall keep similar statistics on debilitating conditions, their timing, their suspected causes, and lifestyle of the person who died.

2/ For each death, there shall be at least 3 cause-of-death investigators that shall be randomly assigned to go out at separate times as 3X redundant independent investigators. Each shall be accompanied by a Sub-Senator. These people determine all possible causes of death and serious injury that are possible. This process is supposed to begin within 24 hours of death. Cause of death/injury technicians are supposed to have had a 2-year undergraduate program in the various areas of death: diabetics, smokers and drinkers, cancers, blood diseases, long-term care, elders, trauma, epidemiology, vaccines, post-op, kidney disease, firearms, etc.

3/ The COD investigators shall work independently from every other branch of government. Nobody in government is allowed to say one word about their findings, and it shall be a felony for anyone to attempt to threaten, censor, or cancel the judgements of a randomly drawn COD investigator or their Senator partner also making a report, if they differ from the COD investigator they are partnered with. All death certificates shall be tied to a birth certificate, national ID number, and a deceased identity throughout the county recorder system.

4/ Super important John F. Kennedy type people, rich people, and those who die in odd ways, or at odd times may get up to 1,000 randomly drawn COD investigators and a matching number of Senators assigned to prepare a duplicate COD report in parallel, all reports archived.

Less important people like Michael Jackson and Jeffery Epstein might get 200 randomly drawn COD investigators. Where ultra rich healthy people die, or Senators die in office, or a couple years later, they shall get 30 COD investigators,

all of which get money and ubiq status for spotting murders and evidence of who did it that others have missed.

5/ Police go first at all crime scenes. Then the COD investigators come in after the police have left. The COD investigators all go at different times so they don't meet or know who is investigating which death.

6/ For all homicides, we shall keep detailed statistics on motivation, location, type of weapon used, and race of the people involved, and all video records including witness testimony videos. For all deadly vehicle accidents we shall keep detailed statistics on the type of impact, the speed, the motion, the vehicles, the injuries, DUI, etc. For designing a healthy and safe society, this is some of the most valuable user information around. For this reason, we shall endeavor to be as accurate and precise as is practical with our police statistics.

7/ The Senate shall have a poison scale for the relative toxicity of the various treatments in the healthcare universe. This shall be broken down further in categories like liver toxicity, kidney toxicity, gut toxicity, etc. We shall have zero tolerance for mercury and other toxic substances that are on the Senate's off limits list. There shall be no more dental fillings that contain mercury. We don't want to introduce any mercury in our mouths and our bodies at all, and mercury fillings shall be banned entirely.

8/ The Senate shall use all sensible metrics for drug overdose death in our nation: Each drug gets its own statistics each year regardless of how legal the drug is. We shall also report statistics on lacing deaths.

9/ The old government had a big problem with the fraudulent recycling of government identity numbers for dead people. For this reason, all deaths shall now be covered by the cause of death administration. After all, certainly we must have some government administration for this life or death matter. So every death takes one identity number and forever switches it to the dead column in the county recorder system's registry. This is also how we will code our database keys for our ancestry database analysis system. Everyone in the world has a unique 16-digit, identity key 1234-5678-9012-4567.

10/ All vehicle accident records shall be public information, along with the cause of death reports, where people are injured in accidents, the names of the parties. All involved parties shall have the right to investigate those receiving any payouts private or public.

11/ Except for those who are incarcerated, recently released fro incarceration, or awaiting trial, and those who have contagious diseases, nobody shall be prohibited from traveling or going out.

12/ Autopsies, cause of death reporting, drug testing, police forensic testing, and all auditing of these shall be done under Senate supervision. Police shall send requests for these along with their collected samples to the county recorder system which shall forward them to a randomly drawn laboratories or testing facilities in duplicate, so the people conducting the tests don't know the identity of the person sampled, or the conditions the sample was gathered under. The people who investigate people about drug use and drug exposure shall not be the ones that make the decisions about the test results, or the prosecution. There must be due

process with regard to drug testing by police. Police shall not be allowed to pick which companies they use for drug testing or other forensic testing.

13/ The Senate shall compile an atlas of injuries and deaths. This shall be indexed by physical location, as well as type of injury, type of activity, employer, time of year, and other ways as well.

14/ The cause of death system shall keep detailed statistics on iatrogenic deaths (people killed by the healthcare system in various ways). Healthcare people shall be checked annually for how many people that have died under each healthcare person's care. The average age and condition of these patients shall be shown. Also, the death, injury, and success rates for each drug.

15/ When convicted felons known to be associated with organized crime or criminal gang people are killed:

a/ There shall be no cause of death reporting to protect the people killing them.

b/ Police detectives shall keep their crime scene notes on paper and deletable media. They shall not report anything to the electronic systems about the identity of who killed the convict.

16/ Where convicts or those involved with criminal gangs or mafias are killed by the people (in an apparent act of self defense or community self defense) by the people they are threatening or oppressing, police shall identify the criminal as such, but not the person who killed the criminal. Then police shall go before the search warrant court and request a warrant to end and delete the investigation documentation, cremate the body, and destroy the bullet. This is to protect the community self defenders. It is a very important aspect of honest policing that nothing ever be done to help organized crime.

17/ The statistics for people who have died in firearm homicides shall be divided into at least two groups. One group shall be apparently normal people, and the other group should be those who have links to crime, such as previously been convicted of a felony, those who are shot in the commission of a felony or shortly thereafter, those who are drug addicts, those involved with organized crime, or crime gangs, or some other form of criminal activity.

18/ Those who die under suspicious circumstances may be kept frozen by police for up to 10-years.

19/ Senate cause of death reports shall also be required for everyone who dies in police custody, or during arrest.

20/ Mass graves shall not be allowed were less than 50,000 people die in an event. It is simply not allowed.

21/ Where there is a disaster where large numbers of people die. Government must openly-and-democratically assemble a lengthy report on what exactly happened (including all things claimed by at least 1% of the people involved) and how to prevent the disaster in the future.

22/ The cause of death people shall do an ultrasound on all corpses to help reduce illegal organ.

23/ Both the cause of death reporting system and the census system shall redundantly track and keep statistics on all the people in geriatric homes, and all minors under age 18, and everyone locked up against their will with regard to their overall health and when they die and disappear.

24/ The cause of death reporting system shall also record the genome of all felons, along with their birthplace, growing-up area, and race. This is so our nation may have accurate statistics on the source of crime.

25/ The race of everyone arrested shall be stated or re-checked by:

a/ All arresting/reporting officers.

b/ The police station commander.

c/ The county recorder system.

d/ The cause of death system.

x/ Where the race is hard to determine, a Senate jury shall have the final decision. It shall be thought that the accurate recording of criminal race will not only help reduce crime, and crime severity, but it will also help with Senate efforts to reduce crime, and this for practically no cost. Also, it should be thought wise to let the accurate criminal record of all races hang like a stringed placard on that race's neck for all to see. Also, the idea that "the truth will set us free" is not for things we can all agree on, but it is for the divisive issues that we can't agree on, like having accurate race statistics on crime. Also, anything contentious that gets recorded for posterity by government should have a similar system of data verification.

26/ Whenever a person dies in police, justice system, or jail custody, there must be 3 cause of death reports by 3 remote counties.

All facilities dealing with human corpses shall be frequently inspected for improper activities by the Senate cause of death system. Human dead bodies, and body parts, including fetal tissue must be secured and tracked.

27/ There shall be no right to censor, suppress or quash, any autopsy or cause of death report results. All caused of death and autopsy reports shall be public information and open to everyone. For everyone is involved in how their fellows dies. Censoring or falsifying an autopsy or cause of death report shall be an extreme felony, due to the inherent connection with murder.

28/ The cause of death people also reports death tolls in all form of mass crisis. Where there are mass casualty events, the Senate may declare people dead after 90 days, even if there's no body. Otherwise, where people go missing, they may be only declared dead by the Senate after five years. In mass casualty events, the national government should generally declare all the apparently dead people as dead by mass action.

29/ The anti-gun lobby shall be regarded as fronting for the enemies of freedom all over the world. For this reason, only pro-gun people shall be allowed to prepare government statistics. And all the anti-gun people need to remain on the outside looking in.

30/ The people involved with the cause of death reporting shall also establish the genetic origin, the race, and the various life factors of all felons so as to keep a genetic record of all felonies.

31/ Where assassinations of great people occur, and there is any question about the killer, the entire site must be enclosed in a warehouse structure with glass leading in all important directions. There shall be no remodeling or tearing up or touching an assassination site for at least 30-years.

32/ The Senate shall go through all the crime records of the past 50 years and review all of the people who are called

white but actually of a different race. This is because there actually was an organized conspiracy to distort this information. Then the Senate shall publish updated statistics on race and crime.

33/ The first reports about the Tiananmen Square massacre from the British embassy said that 10,000 died. Now the Chinese Communist Party says it's a couple hundred injured. The first witnesses about Auschwitz said that there were 4 million who died there. Now it is less. There is an aspect of recorded history where governments and the media are always working to reduce and minimize and then erode the number of people who died in great wars, famines and other calamities. This happened in the Tiananmen square massacre, it happened in the Maui fires of 2024. It happened in the hurricane Helene floods in North Carolina, and it seems to have happened with the Nazi genocide of Europe in the 1940's. This is yet another reason to have official Senate cause of death reporting.

34/ The following quote Nechemia Obfal of Detroit should be noted: "In July 1942 great masses of Jews were deported from the Warsaw Ghetto. In the beginning we did not know where they were taken to. We were told that they would be resettled in the occupied Russian territories. But the Jews in Kałuszyn as well as in other places had agonizing thoughts: Where was the destination for the hundreds of thousands of the Warsaw Jews? And finally the puzzle was clear. It was the beginning of the end of the last act of our tragedy. All Jews knew then that this was the beginning of the massive annihilation of the entire Jewish population in the infamous extermination factory, Treblinka." [Implying three blinks].

Seven things must be noted about Treblinka:

a/ The worker housing was located a mile down the road from the death camp. So unlike every other Nazi camp in the system, there was no smell. So this is a place of deception, and history records that it is a main places where lambs were lead to slaughter in vast numbers. History records that Treblinka was the second most deadly Nazi death camp.

b/ We read of a fake train station with fake ticket counters here, with probably fake "de-licing". Treblinka was a place of extreme deception, a main place where lambs were lead to slaughter in vast numbers.

c/ We read of great numbers of bodies being dug up in the 2nd half of the war and burned in a great and super stinky piles at Treblinka. Maybe the bodies were not dug up, but brought from elsewhere so that they might be burned for their gold and diamonds, and the death tolls reduced everywhere.

d/ Treblinka is supposedly the #2 most deadly camp in the system. It seems perhaps this it was designed to hide the death, and it was actually the #1 most deadly camp in the system in terms of bodies burned or buried in the place.

e/ The BBC's World at War program had film of Nazis experimenting with exhaust being fed back into busses. This seems like a lie. There is also the way that our own "gas chambers" for pets and convicted murderers kill by mere air removal and asphyxiation.

f/ The Nazi railcars for transporting the concentration camp victims famously had very small windows. The killers could have ultimately realized that they should use air tight steel railcars and cover the windows on departure, so the victims would arrive dead from simple asphyxiation.

g/ The areas around Treblinka are doubtless full of gold and small diamonds, probably at a much greater concentration than around any other Nazi death camp. This will tell us that most of the death happened at Treblinka, and that the Nazi death toll was greatly understated and not at all exaggerated.

35/ All autopsies of all assassinated leaders shall be conducted/viewed by over 500 medical examiners that are not allowed to touch the corpse individually. It shall be a felony to participate in a conspiracy to prevent this from happening. And it should be presumed if the people who are circumventing the rules on the autopsies of assassinated people are conspirators. Also, the corpse must be kept refrigerated for at least 3- weeks. Also there shall be no cremation of people who are assassinated or murdered. Also, those tampering with evidence and venturing into crime scenes of assassinations may also be thought to be conspirators.

36/ All cremation ovens shall be located one story off the ground on a platform with several ovens in a 4-pack or 12-pack design complex. There is only one entrance/exit where all the dead are identity verified before cremation. Where people die in the military they are brought back to their hometown crematorium for services. There shall be no mobile cremation ovens.

37/ Dead people shall in general not be subject to privacy regulations about their cause of death. And this shall be especially so when their death seems to have been caused or hastened by the actions of others, by murderers, by healthcare treatments, by surgeries, by accidents. The living people shall always be thought to be over 100 times more important than the dead, and autopsies shall be required against the wishes of the next of kin where the death seemed like it might have been a murder, or a medical treatment gone wrong, or an infectious disease, or an accident, or the death doesn't make much sense.

Also, we shall have a Kennedy/Kirk rule. There shall be no right to privacy with regard to the assassination of public figures. Where important people, and particularly political leaders are assassinated, their injuries must be recorded in detail for the public to view. Also, the crime scene must be immediately cleared of people and immediately chronicled by over 500 experts in crime scene documentation. Also, where leaders disappear or die under suspicious circumstances, all their contacts, public statements, and writings shall be published.

38/ Every time a person dies or is injured around police, or in the pre-conviction lockup system there must be a Senate inquiry.

NR'110. EPIDEMICS

1/ When small numbers of people are traveling from nations and regions with a highly contagious and highly virulent disease outbreak that is not already endemic in our nation, the Healthcare Sluice shall have near unlimited right to restrict travel and impose reasonable quarantine restrictions. However, once a disease becomes widespread in our nation, there shall be a total prohibition on travel restrictions and quarantines.

2/ Where a highly contagious and highly virulent disease is confined to a city, or a region, the Healthcare Sluice may lock down that city so long as the disease remains both confined to that city and a threat to the nation overall. This period shall under no circumstances however exceed one teneth, and not more than one city shall ever be locked down in this way at a time.

3/ Given that quarantine camps can so easily be repurposed as concentration camps, we shall have a strong aversion to quarantine camps. Also, few things make people hide their symptoms and avoid testing like quarantine camps. Thus having quarantine camps can easily be counter-productive thing for ending an epidemic in the information age.

4/ Wherever possible, people shall be permitted to quarantine in their homes. Also, if special quarantine housing is ever required, it shall be paid for by the public purse. Nobody shall ever have to pay for their own special corrupt quarantine housing.

5/ There shall be no privately owned quarantine camps and once the epidemic is over, great care shall be given to making sure that the quarantine facilities were not purchased for too much money or sold to too little. Also where hotels are used for quarantine purposes, the government shall not pay the hotel more money than it was previously making as a normal hotel.

6/ In quarantine, and during medical care, everyone shall always have the right to:

- a/ Communicate with others electronically.
- b/ Refuse any drug or treatment. Even during epidemics, Government and fictional citizens shall never compel the people to take any drugs, and there shall be both prison time for violators and a death penalty for mass violators.
- c/ Move to another similar healthcare facility.
- d/ Refuse the food they are given and eat food brought to them.
- e/ Order deliveries.

x/ If the person is not conscious, or they have dementia, their family shall have the right to make this decision.

7/ Every person without detectable symptoms of an illness that has not travelled shall have the right to be quarantined in their own home. However, those home bound by quarantine may be required to wear a GPS monitoring device like people under home arrest. No private residence shall ever be seized by government for the housing of quarantined people.

8/ Asymptomatic transmission has never been shown to be the driver of respiratory epidemics. However, asymptomatic transmission has been shown to lead to witch hunts, epidemic insanity, and endless power grabs by those who seek to be the disease czar. Therefore, it shall be prohibited for government to quarantine asymptomatic contacts of those with respiratory diseases.

9/ Nobody but the Over-Senate shall establish any quarantine rules. No Senate order for quarantine shall live for more than one teneth. All quarantine orders shall be elected by the Over-Senate, and shall require a 2/3 overmajority to elect and to renew once the order has automatically expired after one teneth. No other body but the Over-Senate shall establish any quarantine rules.

10/ Without an individual court order, nobody shall be quarantined for more than 14 days.

11/ It shall be a felony to violate these rules of quarantines and shutdowns and illegally lock the people up. This shall include all government officials and police officers. Those in charge of locking up hundreds of people illegally shall be subject to the death penalty.

12/ Where diseases kill less than 1% of the people they infect, or less than 3% of the population over age 50, there shall be:

a/ No lockdowns, or travel restrictions.

b/ No required testing of people for the disease.

13/ Where diseases kill less than 2% of the people they infect, or less than 6% of the population over age 50, the military and militia shall not be deployed

14/ Where diseases kill less than 4% of the people they infect, or less than 12% of the population over age 50:

a/ There shall be no vaccine passports, sanitary passes, immunization passes, or permissions of any sort for citizens to move or visit from one part of the nation to another, or to leave the nation, or to leave or go into any city.

b/ The military and militia shall not be deployed.

c/ There shall be no mandatory vaccination, or mandatory medical treatment established by either Government or any fictional citizen, or hospital. Also, it shall be a crime for either Government or any fictional citizen shall to take away any rights of people who fail to get vaccinated or get any particular medical procedure(s).

d/ The foregoing includes both government and non-government permissions. The foregoing however shall not apply to citizens that are in or about to enter the military, those released from jail on bail, and those awaiting trial for, or convicted of a felony. Non-citizens may also be required to remain within one or more counties as a condition of their visa status, unless they wish to leave our nation.

15/ During fast moving epidemics, the Senate shall have the right to compel universal testing for the epidemic pathogen. However, the pathogen must have been isolated, and the test must be reliable and accurate, and they shall not give more than a 5% false positives or false negatives.

16/ Under no circumstances, including epidemic shall anyone be locked or sealed inside their home, or building without an individual court order for each household.

17/ The following laws, mandates and rules shall be repealed entirely and with immediate effect, and shall not be reinstated except by a 2/3 overmajority of the Over-Senate.

a/ All existing disease mask requirements.

b/ All COVID testing requirements.

c/ All COVID vaccine requirements.

d/ All COVID travel restrictions.

e/ All COVID quarantines.

All healthcare indemnity from the prior government shall be void at the election of the Senate. Furthermore, the directors and staff of vaccination companies shall be subject to criminal proceedings if they knowingly produced grossly dangerous and murderous products due to indemnification.

18/ All charges against COVID lawbreakers and COVID protesters shall be dropped forthwith and all COVID crime convictions and jail sentences shall be pardoned and expunged entirely and forthwith.

19/ When people with a license for injection drugs get their drugs, they shall also get a needle. if they return their needle,

they shall get a new one on their next visit. Otherwise they will have to pay 1-hours wages or media for a needle. The counties shall also be required to offer no-questions asked small-scale needle exchanges for free.

20/ In urban places where the units touch, Government shall have high penalties for those who urinate, defecate or spit in the wrong places. These penalties shall also apply to those who have animals that pollute our urban areas with their urine or feces. The above shall not apply to the cats used to control urban rodents. Where people provide video evidence that puts a homeless person in work camp for public defecation or urination, then they shall get 1/2 of the homeless person's jail wages. Also, secret cameras shall be encouraged by the Senate in urban and suburban places that people commonly use as a toilets, and many of these will be highly profitable for their owners.

21/ All operable windows in all places where there are mosquitoes must have mosquito-proof window screens. Also, in these locations, all doors leading outside of each unit must seal against mosquitoes.

22/ The control of mosquito and tick borne disease in urban environments is a more important imperative than pesticide exposure from our environment. This is because the death and disease caused by mosquitoes is huge and well documented, while the harmful effects of prudent pesticide use in our environment are very hard to find. Also, every county with a mosquito or tick problem shall have a Government abatement program.

23/ Pesticides and herbicides are modern marvels that have clearly resulted in immense increases in agricultural output and also the saving of millions of lives. The Senate shall reconsider all prohibited pesticides and herbicides to judge whether they pose a risk to people that exceeds their benefits. Once the Senate has ubiquitized or approved a pesticide or herbicide for certain types of use, there shall be no right to sue the developers, manufacturers, or distributors.

24/ Low doses of synthetic versions of naturally occurring chrysanthemum pyrethroids shall not be considered toxic to humans.

25/ If Chrysanthemum tea (or a synthetic pyrethroid is shown to both be apparently harmless and also significantly reduce mosquito-borne illness epidemics, then everyone who is infected-with, or a carrier of any mosquito-borne illness may be required to regularly consume chrysanthemum extract or a synthetic version where transmission mosquitoes are common. Also where epidemics are starting to occur, everyone (and all the animals) may be required to take chrysanthemum extract or a synthetic version. Wherever there's an insect born epidemic in a local place, the government should spray the heck out of the area within insecticides as the first way of preventing transmission.

26/ To reduce mosquito borne illness, county government shall repeatedly release male mosquitos that carry a lethal genetic trait when mosquitos are a problem.

27/ All infectious disease treatment facilities shall be required to be in separate buildings away from the other hospital facilities. This includes entrances, approaches and ventilation systems. Birthing facilities shall be in separate wings away from infectious disease facilities. The staff at birthing facilities are not supposed to mingle with the main staff. Neo-natal ICU

(which is supposed to be in a separate building) shall go between the birthing center and the main hospital. Also, Neonatal ICU is supposed to use individual micro rooms for the babies. These shall have synthetic sounds and rocking beds.

28/ All interchange hospitals shall have a large trailer park for rail bungalows used as treatment rooms, patient care and staff housing in case of a mass disaster. These are railcars that also have tires that are able to self propel at 5kph for 5km between charges. A small number of these cars can be shared by the entire nation.

29/ The number of people seen by the healthcare system will increase substantially due to inclusion. Because of this, and because of epidemic preparedness, and because we need an excess to help assure competition in healthcare, all the new hospitals at interchanges should be substantially oversized in comparison to the floor area of today's healthcare system.

30/ The military shall plan to rapidly roll out vaccinations and antidotes, however all vaccine and antidote research and preparation shall be under the Healthcare Sluice.

31/ The Healthcare Sluice shall offer free AI backup monitoring of patient data streams and test results. The Senate will try to notify people that their EKG is becoming unusual, and that they are becoming pre-diabetic and such things.

32/ There shall be feed watcher techs, whose work is to remotely monitor (redundantly) a long scroll-loop of standard "map of the market" patient screens, with all active monitoring in zoomable boxes for more information. These screens also outside the room and near the bed and they blink and sound alarms when there is trouble. There is also a video feed for the care people to have telepresence with the patient. This is to minimize the number of people going around between patients where the people are weak and vulnerable to infection, or infectious. The techs that spots a problem makes 3-day's pay if they are the first to spot something legitimate and they pay 3 hours wages if it is not.

33/ There shall be no birthing facilities in hospitals for infectious diseases.

34/ Those who are sick and coughing or full of snot, or sneezing, shall be required to stay off of public transit, and to refrain from flying.

35/ In all epidemics and disasters, the rights of the living shall take precedence far and above the rights of the dead.

36/ Each genetically modified life form released into the environment shall require Over-Senate approval. It shall be a felony, and it may be a capital offense to release genetically modified life forms into the environment without Senate approval. Also, there shall be no prohibition against our Government using airstrikes or sending people to kill those who are doing this outside the purview of our government.

37/ A permit shall be required to keep disease carrying pigeons in our nation. It shall be a felony to be in possession of disease carrying pigeons without a permit. Pigeons shall be considered dangerous because they both carry human diseases and human disease insects, and because they return to places to spread those diseases to facilitate attacks. The feeding of pigeons in urban and suburban environments shall be a crime. Everybody everywhere is free to kill mice, rats, and other vermin anywhere, and pigeons in any

community as well as pigeons that land on the person's property or their communal property.

38/ It shall be a crime to go near bats without a permit. It shall be a felony to keep bats without a permit.

39/ Only the Senate can order the culling of cows, pigs, poultry and other livestock or authorize the testing of livestock for diseases. No unelected government person or department may say to any farmer that he must destroy his animals or crops. Wherever the Senate culls the livestock t must pay a fair price for that livestock. Also the Senate shall not cull more than 10% of the nation's livestock animals of any species.

40/ There shall be no mass testing using tests, except where the PCR tests are calibrated by the Healthcare sluice and is proved to be reliable. There shall be no mass testing or required testing involving the anus, or where any swab shall be inserted more than 1-cm into the nose. No testing swab shall contain anything but 100% cotton, with nothing else added except cotton adhesive. Those involved with adding any amount of any form of mercury or any self assembling chemistry in any test, vaccine, treatment, pill, or injection shall be subject to a death penalty for experimenting on the unsuspecting public.

NR'111. VACCINES

1/ There shall be no forced inoculations, forced medications, or forced treatments, and it shall be a mass felony to force groups of people to do such things. Even convicts shall have the right to refuse medical treatments. There shall be no covert or secret vaccination people. Those involved may be charged with a mass felony. Also, it shall be a felony when Government officials and fictional citizen staff discriminate against people who refuse medical treatments, including vaccines for infectious diseases, Medical treatments shall always be a personal decision. The reason we don't want mandatory injections is that this could very easily lead to a symposium (a mass sym-poison) situation such as was recorded in Plato's symposium. People must remain behind to kill the murderers, to keep it from happening.

2/ The Healthcare Sluice shall manage vaccine development and authorize use by the public. It shall also decide which vaccines get recommended by Government. However, no vaccine authorization by the Healthcare Sluice shall be binding unless ratified by at least a 2/3 overmajority of the Sub-Senate.

3/ For all vaccines recommended for everyone, or everyone of a certain age:

a/ The IP must be ubiquitized and the vaccine made generic. There shall be no non-ubiquitized vaccines.

b/ The vaccine developers shall be paid based on some portion of the entire nation taking their vaccine, and there shall be no per dose payments.

c/ There shall be no payments or benefits of any sort paid to anyone in the healthcare industry for giving people a vaccine or a treatment.

4/ There shall be no vaccines or universal cutting procedures at birth. If we inject our children stating immediately after birth we will never know if it was genetics or the injections. Whatever risk there is of infection, the risk of vaccine and acmecide is greater. Also, it is important that people are able

to tell when vaccines are changing their children. This is very hard to do when people have never met their children before.

5/ There shall be no injections or immunizations of children at the hospital they are born in. Medical facilities that birth children, shall not also give vaccines or injections. Also, all injected medicines shall be delivered anonymously.

6/ All Government recommended or required vaccines must be ubiquitized so that people can know the truth without drug companies trying to lean the boat. There should be no per dose charges or fees for Government recommended vaccines.

7/ All medical procedures and treatments including all vaccines shall be require open and fair testing by the Senate and multiple agencies in order to be approved for mass use. Never shall a treatment or vaccine that is even 5% as deadly or 10% as sickening as the disease in the short term be allowed by the Senate, for the long term sickness and death due to the treatment will surely be many times higher.

8/ Nobody, no fictional citizen and no government body, and even the Senate shall ever have the power to compel or drive anyone to take any vaccine or receive any medical treatment. Nobody shall ever say: "Get this vaccine or we will fire you." or "we will terminate our business relationship with you", or "we will not allow you on campus". Where Little Brothers do this, the people involved should be put in prison. There shall be no mandatory vaccination requirements for patients or visitors at medical treatment facilities, or for all students in a school, or for all employees of a company. Fictional citizens that dare to involve themselves in vaccinations and medical treatments may be compelled by the courts to pay toxic waste sized fines. And this shall be so even if government recommends or requires vaccinations. The decision about medical treatments of all sorts shall not be the domain of anyone but the person taking the treatment.

9/ Employers, schools, financial institutions, travel service providers, airports, train stations, bus stations, ports, shopping malls, office buildings, and all other similar places/ organizations shall not allowed to verify anything about anyone's health or vaccine status. Also healthcare providers shall not be allowed to deny care due to vaccine status, or vaccinate any sick or unhealthy people.

10/ It shall be a felony to give medical treatments or vaccinate people without their consent or the consent of their parent/ guardian if they are under age 18. It shall be a felony to give medical treatments or vaccinations to people against their will, if the person is age 11 or over. It shall be considered very important that we have a system that defaults to non-treatment of people and especially minors against their will.

11/ When people undergo medical treatments, including vaccines, it shall be considered private information. Nobody else shall have any right to know about this information except for:

a/ Spouses and potential sex-partners.

b/ The vaccine registry.

c/ The STD prevention registry.

d/ Quarantined facilities.

e/ Parents and guardians.

12/ Except for people committed to a psychiatric institutions by a court using due process, with authorization of specific drugs and dosages, psychiatric staff including doctors who

forcibly or coercively give people drug injections or pills may be imprisoned for up to 10 years.

13/ It shall be a felony for healthcare people, teachers, educators and others in a position of authority to treat people, or vaccinate people, or give them injections, or hormones, or vitamins secretly, or against their will, and this shall include the small-scale vaccination of school children without written consent. It shall also be a felony for organizational managers to coerce their employees, students, members and the like into getting vaccinated. If there is any mass secret vaccination, then all those involved shall be treated as bio-terrorists and executed. Also, bio-terrorists shall be subject to execution by torturous execution if the Senate elects.

14/ It shall be a crime to vaccinate others without signed permission. This shall apply to both those jabbing people, and their employers. There shall be no childhood or birth vaccinations in hospitals without signed pre-approval by parents.

15/ There shall be no discrimination against unvaccinated people by either government or the healthcare industry unless this is specifically called for by a 2/3 overmajority of the Over-Senate.

16/ There shall be no required vaccinations for diseases that are not deadly, such as flue and rotavirus. There shall be no mandatory or recommended vaccination of children until 90 days after birth. Where re-vaccinations are called for, they shall always be included in the cost of the first vaccination. We do this to prevent vaccine makers from working for addiction type situations.

17/ No Government vaccination or quarantine recommendations shall be valid unless a 60% overmajority of the Healthcare Sluice elects. There shall be no mandatory vaccine or quarantine requirements unless a 2/3 overmajority of the Over-Senate elects.

18/ All drawing needle bases shall be bright red, All injecting needle bases shall be bright green plastic. If the needle is for both, then the base shall be bright orange.

19/ People who are ill or not feeling well shall not be vaccinated unless they are shown to be ill with the disease they are being vaccinated against and the vaccine is a treatment.

20/ Except in emergency situations, Neither Government nor the medical establishment shall mandate treatments or vaccines that have not been properly tested. Only the national Healthcare Sluice may establish national policy regarding treatments and vaccines. When the Healthcare Sluice makes national treatments and vaccine policies, it must consider all comments by the mid-career clinical physicians worldwide.

21/ It is not possible to deny that game of function research might either cause, or be an excuse for a huge epidemic.

22/ It shall be thought that the motivation for "gain of function" research is to create new diseases to be leaked out. This then creates a market for treatments. Therefore, it shall be thought that people conducting gain of function research are trying to do a sort of biowarfare for profit. Therefore we shall not allow any gain of function research and we shall imprison or execute all the people involved with this sort of mad scientist work. Where any of the following is taking place outside our nation, we shall stop that work using all means

necessary including assassination and airstrikes with great collateral casualties.

a/ Gain of function research.

b/ Nuclear enrichment.

c/ Chemical weapons production.

23/ The Senate shall always maintain great investigative heat and a death penalty for those involved with the development manufacturing and distribution of genetically engineered, contraceptive food stuffs.

24/ The term gain of function shall include making any living thing more deadly, or more harmful, or more debilitating, more addictive, or worse for humanity through genetic engineering, or other means. The term shall include research on addictive drugs, tobacco, and other harmful or deadly plants, micro-organisms, and multi-cellular animal products such as snake venom. Every person involved with conducting gain of function research on pathogens shall be presumed to be developing bioweapons and may be subject to the death penalty.

25/ To further weaken the strategy where companies give away the disease so they can sell the cure, we shall we shall not enforce IP rights for treatments for:

a/ Diseases or infections that are the result of gain of function research.

b/ Injuries caused by vaccines or other drugs or the healthcare system.

c/ Any pathogen that was intentionally developed or spread.

d/ Contagious vaccines, contagious cures.

e/ mRNA technology. Furthermore, all mRNA vaccines shall be prohibited, and all those administering them, and calling for them to be administered may in the future be charged with a felony.

f/ Vaccines or cures are spread by mosquitoes or other uncontrollable natural vectors or sources.

26/ When Government recommends vaccines, tests, or treatments to everyone, the recommended vaccine, test or treatment must be approved by the FDA under its normal approval process. Government shall not recommend vaccines, tests or treatments that are approved as an emergency response. Government can only call these a partly tested response that are the best it has.

27/ In emergency situations with diseases killing several percent of the population, all vaccines must still be shown to be at least 6-times safer than the illness over a 1-year term of study for each age cohort, and at least 3-times safer than the illness over the 3-year term of study for each age cohort.

28/ Government shall only recommend long-tested, safe and effective vaccines for diseases that once ravaged mankind. Government shall not recommend that the people to take experimental drugs, or drugs that have not been properly tested, or drugs with extreme side-effects. Nobody shall be forced to be a human test subject, and anyone forcing others to be a human test subject may be sentenced to death.

29/ It shall be thought inadvisable for everyone to take any particular vaccine — for how would we know if the vaccine was causing a problem then? So there shall be no mandatory vaccinations. Also, Government shall recommend no vaccine until it has been openly tested on at least 5-million people for 10-years. If there is an emergency where millions are dying or injured, this may be reduced to 2 million people for one year

for recommended vaccines. Also, it shall be noted that this recommendation is for the person receiving the vaccination to decide on, and not their employer, or their teachers or educators, or shop owners, or other people who might seek to lord over them with regard to their fundamental right to make their own personal healthcare decisions.

30/ When Government recommends vaccines, tests, or treatments to everyone, the IP must have been ubiquitized. No IP for Government recommended anything shall be owned by private properties. This is so the decision to recommend a medical intervention never directly profits anyone. Otherwise we system becomes inclined towards drug company corruption and bribes and biased public health policy. When government calculates ubiquitization payments to drug companies, the payment shall be calculated based on the estimate of the number of lives saved or helped by using the treatment, vs. not using it.

31/ There shall be no foreign manufacture of vaccines. Vaccines shall contain no toxic materials such as mercury, or anything that accumulates in the body, or that causes anything to accumulate in the body.

32/ The Senate shall set acceptable levels for vaccination injury and death for each vaccine that considers the risks associated with not treating the disease. Vaccine makers that remain a factor of two below these levels shall have no liability for individual bad reactions.

33/ No grant of immunity from civil or criminal prosecution for vaccines or treatments shall be valid unless the vaccine or treatment actually appears to be a better alternative (considering also long-term risks) after clinical trial.

34/ All of the liability shields of the old government with regard to vaccines and especially COVID treatment injection shall be void. In general, and over the long term, only ubiquitized vaccines shall be exempt from liability lawsuits in money court.

35/ Regarding vaccine injury liability, the correct approach is to always make sure the vaccine maker has some skin in the game. So there should be no 100% freedom from liability. Better we have .01% liability, or 0.6% liability, so people involved always have some skin in the game. This is a much better approach than completely absolving the manufacturer of all liability. We should also limit the liability per victim. This new approach will result in more care on the part of the vaccine makers to have safe vaccines, without too much cost to everyone for the unlucky people with long-shot vaccine injuries.

36/ Vaccine manufacturers and their directors and their vaccine development and testing staff may be charged with the deaths their products caused if they both knowingly lied about negative outcomes, and also the vaccine produced extreme excess mortality. Under these cases, vaccine indemnification shall not be considered as valid.

37/ Existing Government grants of immunity to vaccine manufacturers present or past may be voided or enforced in a new way by the Senate if it disagrees with the actions of the old Senate.

38/ It shall be thought that the old vaccine indemnifications of the prior government only relate to money court and not to criminal charges due to falsified research that results in mass death. Also, there shall be no total indemnification for vaccine

makers and all vaccine developers/ makers shall always have at least 5% liability

39/ Government shall keep detailed open public records of all post-vaccination illness claims by the party injured or the next of kin if the injured party can't make a post. If government needs to verify these patient claims, then government shall do so after the information has been posted. It is imperative that we have timely information on this subject. The verification can happen later.

40/ To prevent acmecide of our leaders, all vaccinations of every sort shall be anonymous until after the vaccination is given. The person, or their parents go to get an interchangeable and anonymous vaccine sheet. Then they present this card anonymously at any vaccination center where they get their jab(s). Then after the jabs, then present their ID and the order's bar code. Then their vaccination status is updated throughout the patient data keeping system after the jab is given. No vaccinations shall occur at any school or other place (such as a pediatrician's office) where the children or parents are known.

41/ The Senate shall have two vaccine schedules: Primary vaccines and secondary vaccines. Only long tested vaccines well proven to prevent diseases that once killed or caused lifelong damage to millions shall be on the primary vaccine schedule. New vaccines, and vaccines for diseases that only sicken must go on the secondary vaccine list. Thus the influenza, and rotavirus vaccines will both go on the secondary vaccine list.

42/ Senate shall carefully re-evaluate anew, from the ground up, all Government recommended vaccines. especially those recommended to children. These shall all be re-evaluated based on efficacy and adverse reactions.

43/ In times of epidemic, pre-existing and also too-quickly rolled-out epidemic related treatments shall be ubiquitized for a low-end and conservative value. If the cures look eerily similar to the disease, like the disease was created to sell the cure, then the IP owners shall get nothing. We definitely do not want people creating diseases to sell cures. This shall be thought to be far more important than a one time trampling of IP reward rights.

44/ With regard to vaccines, all of the following must be true, or the vaccine shall lose all of its protections and all of its IP protections:

a/ There must be a complete list of ingredients among the packaging of each vial.

b/ No adverse reactions may be hidden from those evaluating the vaccine, or the people taking the vaccine. A complete list of all test subjects with the name, adverse reactions and contact information must be listed with the county recorder system.

c/ There shall be no performance based pay in vaccine development, or testing. Vaccine developers and corporate vaccine decision makers may not own stock in their company.

d/ The Government shall conduct the actual FDA studies, not the vaccine developer. Vaccine developers shall only conduct pre-trials to get the government interested in conducting its own unbiased trials.

e/ It shall be a felony to hide adverse reactions from those evaluating the vaccine, or from the public. Conspiracy to hide results, or move ahead without proper study with regard to an

excessive deadly or maiming vaccines or treatments shall be a capital offense. Due to the latent and hidden nature of this industry, this rule shall not be subject to the ordinary, ex post facto rules, and these laws may be enforced retroactively, even decades later.

45/ Government shall supervise and inspect all human vaccines, so that there's no possibility that anything extraneous can get inside. Also, no less than 200 randomly drawn Senators shall supervise the production of each vaccine.

46/ Companies that develop, market or promote vaccines cannot sell, develop, market, or promote other classes of drugs. They also cannot merge with companies that develop market or promote are drugs.

47/ It shall be thought unwise to vaccinate newborns, so that the parents can better observe any changes brought on by the vaccine. All children should be video recorded before and after they are vaccinated. There shall be no vaccinations at any birthing facility except for when the mother has been tested, and has a disease that can be passed on to her child.

48/ No vaccine shot contain any amount of toxic elements, such as lead arsenic cadmium beryllium cesium cobalt, thorium, etc., or any extraneous mammalian DNA or any mRNA. All vaccines shall be fully sequenced and open source and this information shall be made publicly available without condition, for all to see for at least 2 years before any vaccine can be introduced or re-introduced.

49/ No vaccines shall be administered in combination. The MMR vaccine shall be separated-out and given at least 60 days apart, so that people can tell which vaccine in the combo is ever a problem. The rubella vaccine is seems to be the problematic one.

50/ Whether or not any person received any particular vaccine(s) shall never be any valid grounds for either government or fictional citizen discrimination. No school or hospital, or similar facility shall ever say to its customers, students, or guests that they may not enter or receive services because they did not get vaccinated.

51/ There shall be no such thing as a vaccine delivered by aerosol. All aerosolized vaccines shall be considered as bio-weapons. This, especially includes aerosolized vaccines deployed secretly.

52/ All common injections and medications given to children in the first two years of life shall now be nationalized, and all of these shall now be generic. Also, all injections and other medications commonly given to newborns shall be included in the single charge for for childbirth. There shall be no more injections or voluntary surgery of infants within 180 days of birth. The curiously named "Vitamin K injections" for babies shall be stopped, unless the Senate elects to reinstate this now generic drug. The names phyllo•qui•none and men•aqui•nones are also quite notable. There shall be no more hepatitis vaccines given to people before age 4. There shall be no more ointments, including erythromycin ointment applied to the eyes of all or most babies. There shall be no universal medical interventions given to all, or nearly all newborn children, for there always must be a control group.

53/ There shall be no vaccines in food stuffs, or secretly delivered vaccines. There shall be no obligation to pay for healthcare disguised is something else. No vaccine shall

impart any rights over the plant, animal, or human vaccinated. There shall be no experimentation with putting vaccines into DNA or RNA. All mRNA related IP shall be nationalized and its use shall be prohibited until it is well understood and the year 2045 has come to pass. No mRNA vaccine shall be given to anyone unless the Over-Senate allows it.

54/ To prevent various marketing scams having to do with unneeded boosters, we shall say that there shall be one price paid per lifetime per vaccine license with the initial jab. Then after this, all boosters must be given away for free by the vaccine company, with the Government healthcare system having mass free vaccination events.

55/ The healthcare solution shall review all existing treatments for efficacy and side effect risk. The healthcare sluice shall decide if the efficacy is worth the risk, the healthcare sluice keeps deciding on this every couple years for all drugs.

56/ All tests for diseases must be approved by the Senate in order to be accepted and valid.

57/ It shall not be allowed to use mosquitoes or other insects or animals to vaccinate people or to infect people, or to deliver drugs.

58/ The 10 points of the Nuremberg code shall be included in this constitution in regard to all human experimentation worldwide.

59/ The regular healthcare system shall have nothing to do with either the vaccine delivery system, or vaccine verification. Next to every hospital and near certain other places, there shall be a vaccine delivery, blood donation, and blood testing center. This place shall be staffed with non-medically trained people, except that they have their phlebotomy, or blood drawing and vaccine injecting certificate. It shall be thought to be wasteful to use medical staff on these purposes. Well, trained technicians, shall be thought adequate. Government shall provide vaccine injection for no charge to all citizens for all recommended vaccines. Government shall also run the plasma and blood bank system, excluding people for certain cause and lifestyles.

60/ Where re-vaccinations are required they shall always be included in the cost of the first vaccination. We do this to prevent vaccine makers from creating any situation even remotely similar to addiction-type situations.

61/ There shall be no more vaccine delivery by medical practices, especially pediatricians. Also, all vaccines shall be done anonymously on the side of the patient, with patient identity verified only after the procedure was done.

62/ We shall long ponder the words of of the exalted Arab leader Muammar Gaddafi: "They will engineer viruses and release them into the public so the [Arab-fronting] capitalistic drug makers can profit from making vaccines. This [will be perceived as] just ordinary business for them". Here we shall note the way Arabs kill their enemies slyly using frontmen (their enemies like us), in a way that they won't be perceived as genocidal murderers.

63/ No vaccine recommended to everyone or everyone in an age group shall be given to the general public until every person involved the the vaccine's development, manufacture, distribution, or delivery has taken the vaccine. Those who fail to take the vaccine shall be permanently excluded from working at that vaccine company for life. Also, the Senate

shall prepare statistics for the public on these quitters/ fired people for each vaccine. Also, all of these people must take the vaccine under both county recorder system video, and the close supervision of an 11-man Senate jury. Senators shall take the vaccine supplied for these people and substituted it for some random vaccines at some random pharmacies or hospitals from another part of the nation more than 700km away. The Senate shall keep detailed statistics on the number of vaccine industry people, including healthcare people injecting the vaccine who refuse to take the vaccine. For all these vaccine industry recipients, the county recorder system shall keep close-up video showing the recipients face and the needle going in, or the pill being taken.

64/ All intellectual property rights to all existing vaccines and approval pipeline vaccines is hereby cancelled. This is due to the corrupt system for vaccine approval and the corrupt practice of absolution from liability.

65/ Where people fake taking a vaccine in the media, this shall be a felony. It shall also be considered bribery for drug companies to pay celebrities to take their products in the media.

66/ It shall be considered mass poisoning to put any amount of mercury (disguised and rebranded as thimerosal) in any vaccine or treatment. It may easily be considered mass murder to put any amount of graphene oxide, or any aluminum, or aluminum salts, or any mRNA, or any self-assembling compounds

67/ No injected vaccine shall be manufactured in animals, animal tissue, or animal cells.

68/ It shall be thought that the following practices will end nearly all of the need for vaccines:

- a/ Breaking up of the world's large bat populations.
- b/ Quarantining all pig populations and the extermination of escape feral pigs worldwide.
- c/ Fencing our communities against wild animals and insects.
- d/ Widespread use of chrysanthemum tea for humans and all other animals in areas infested with insect born diseases.

69/ We shall nationalize 80% of the shareholder equity in all the companies that sold them mRNA vaccines. We shall do this to send a message to the future. We shall also ban all of the high ranking people in these companies from working in bio tech or healthcare for life. For the more egregious violators we shall take away all of their credentials. For the murderous violators we shall put these people in prison for life.

70/ All IP for all vaccines introduced to the market after 2005 shall be void because we can't be sure that of the approval system under the old corrupt FDA. All Vaccines from before 2005 shall be void because they are too old for IP protection. Therefore all existing IP for vaccines shall be nationalized including vaccines for livestock and other animals and insects. All new vaccines for humans and meat/dairy animals such as cows, sheep, goats, chickens, turkeys, etc. must be FDA approved.

71/ Where Government exempts medical treatments from liability, there shall be no right to sell that medical treatment for a fee. That medical treatment must instead be ubiquitized.

72/ All vaccines in the future shall be developed by government, using government money, and government shall own them, and they shall not have any cost.

73/ Vaccination shall never a requirement of the provision of healthcare. No treatment, shall be conditional upon people getting up-to-date with one's vaccines. No healthcare facility shall be allowed to do this.

74/ All forms of treatment shall regulated equally and shall require an equal amount of study, and randomized studies. There shall be no exemptions whatsoever as there were under the old system for nano technology and medical devices. Again, all treatments shall be regulated the same, and there shall be no shortcuts for any sort of novel kind of treatment like mRNA vaccines, or naturally occurring treatments, or lipid nano particles or nano devices.

75/ It shall be a felony to make any self-disseminating, vaccines, or treatments.

76/ The works of Richet and Latipova on vaccines are very interesting and perhaps imply that vaccines do not work.

77/ Hospitals and infectious disease clinics shall no longer be allowed to vaccinate people, as these vaccinations tend to stress already stressed people in the short term, and this is not what we want from our hospitals. So from now on, all vaccinations must be done by dispensing pharmacists and by nobody else. Also, all dispensing pharmacies shall offer blood draws and blood tests.

78/ Even if the patient specifically requests to be vaccinated while they are under anesthesia, it shall still be a medical-license-losing felony for any healthcare person to vaccinate anyone while they are under anesthesia.

79/ All healthcare providers must always get consent for each treatment protocol in-advance of starting that treatment protocol. Also, blanket consents shall be unenforceable. The people shall have the right to appoint a third-party family members and other to oversee each new treatment given, but this right shall never go to the hospital. Every patient in every medical area shall be entitled to declare that they want no vaccines, and all healthcare providers must obey this wish.

80/ The entire vaccine delivery system shall be completely demonetized. All vaccines must be ubiquitized and cost no more than 15 minute's wages per vaccine wholesale. Doctor shall charge no more than 30 minute's wages per vaccine delivered. There should be no incentives and no other payments by government or anyone else to get doctors for delivering vaccines.

81/ As a safety measure to prevent all future mandatory vaccines, we shall no longer recognize vaccine cards as legal documents, but reminders, and it shall not be a crime to falsify vaccine cards, or to lie and say that you have had a vaccine.

NR'112. HEALTHCARE COSTS

1/ With around 25% of the national budget going to healthcare, a 50% reduction in healthcare spending trims 12.5% from the government budget. It also will produce large benefits for American competitiveness.

2/ Healthcare costs will naturally tend to grow and grow without end. This is due to the simple fact that people who are sick and dying will spend any amount of money to get well and extend their lives. Therefore the people shall be thought to need regulation of healthcare prices in the same way they need regulation of utility prices from another sort of

financially rapacious monopolist industry. In other words, the excessive pricing power of the healthcare industry make it a candidate for monopoly and other Government pricing regulation.

3/ Healthcare shall be seen as naturally needing price intervention by government to stabilize prices in proportion to the overall economy.

4/ Over coming decades, we will conquer more and more of our non-healthcare human needs and wants. And as we do this, we can expect the hard physical reality of our own weak and short-lived bodies will grow in size relative to the rest of the global economy. Therefore, we should view healthcare, healthcare insurance, and healthcare funds (an aspect of retirement savings) as economically different from the rest of the economy, and we should expect these segments of the economy to grow faster than the rest of the economy.

5/ We shall establish a nationwide network of county owned hospitals with co-located county-owned healthcare office parks around them. The counties will operate all the shared facilities, the MRI and CAT scanners the x-ray department, the surgery and recovery rooms, group receptionists, billing, collections, and more will be provided by the county or the national healthcare system at built cost, as will the doctor's offices, and treatment rooms all be rented to doctors and healthcare technicians at cost. And we will always have at least twice the number of rooms we need in case of mass casualty events, or equipment failure. We will also have 4 covered beds in each room, even though we will only use 1 bed most of the time. Thus our capacity can be increased 8 fold in the event of a crisis. There will also be an abundance of healthcare worker apartments and hotel rooms with 2 double beds in each room that are directly adjacent to our trauma/ heart attack/ stroke hospitals to expand the number of beds if this becomes necessary due to a crisis. This overage of healthcare capacity that the public might very much need due to crisis situations, it will also forcefully augur towards competitiveness in healthcare.

6/ We are not going to shut down the hospitals per se. We are going to build these alternate public healthcare facilities like x-ray departments, receptionists, and billing and then we are going to start driving our doctors and technicians over there more as business owners, and then as the for profit hospital monopolists decline, we are going to delete the money paid to the hospitals and their shareholders over a number of years.

7/ We shall establish highly detailed standardized worldwide codes and categories for all healthcare procedures. This will allow us to carefully track all healthcare spending in great detail to spot people who are over-treating for this or that. This will also help us spot bottlenecks and also situations for procedural optimization leading to cost cutting. Also improved data resolution enables more of the sort of comparative data forensics that makes people afraid to be dishonest.

8/ To assure that there are always enough people certified to do the healthcare work, the Senate shall strive to make healthcare work, an easy occupation to fall into, starting with 14 year olds still in school. To this end, the Senate shall have free internet education modules and free testing for anyone who wants to go into healthcare.

9/ It shall be a felony for pharmaceutical people to campaign

against, or to have anything to do with the approval/ disapproval of other pharmaceutical products that will destroy the value of their treatments. It should be regarded as a totally shameful and malignant thing for a healer to do this. Thus, they may also be stripped of their license and sent to prison for doing this.

10/ With regard to those portions of the national economy that need to be limited in regard to economic size and profitability, The Senate shall establish "budgets" as a percent of GDP for these. For the sake of longevity, these budgets shall be expressed as a percentage of GDP. Then the Senate shall use variable, industry-specific taxes to control the net-income of these industries/ sub-industries. At the end of each teneth, these taxes shall be calculated, so as to force each industry's net revenue into the budget elected by the Senate. We shall use these taxes for the healthcare system, along with the civil law system, and also for civil law payouts.

11/ In healthcare, these taxes shall be focused on the smallest bang-for-the-buck procedures. Thus the act of limiting the profitability of the healthcare industry will bring in enough money to pay for a tier of big-bang-for-the-buck subsidized healthcare.

12/ To start, the nation's healthcare system shall be set under 11% of GDP. Germany and Austria are 12%, with older populations. The UK is 12%, but it has a broken socialist system with a duplicate private sector healthcare system. France is 11%. Japan is at 11%. Italy is 9%. The US is currently at 18.3% and that number doubtless omits spending and is an understatement. Thus healthcare spending will be cut by about 40% to start (from 18.3% of GDP to 11% of GDP). Later, the Senate shall take the healthcare system down even further, before it is raised in a decade or so due to the coming material abundance of the new system.

13/ The healthcare taxation system shall have a bias towards higher taxes for procedures that use the most doctor time. This way, the healthcare tax system will augur towards abundance of healthcare staff.

14/ The Over-Senate shall be required to establish official answers to the following healthcare policy questions:

a/ How much is all of our healthcare spending extending our lives on average.

b/ What is the point of diminishing returns for healthcare?

c/ Shall we all spend 7 year's wages on average to extend everyone's lives by a few months on average? Shall we all spend two years wages on this?

d/ What is the most optimal percentage of GDP for spending on healthcare?

15/ To start, the national "budget" for the nation's civil lawyer fees shall be under 0.3% of GDP. To start, the national "budget" for the nation's civil judgements shall be under 0.6% of GDP. To start, government business fines shall be under 0.3% of GDP. These budget percentages may be adjusted with a 60% overmajority of the Over-Senate.

16/ It is thought that healthcare has been as a national tax on everyone, and lowering healthcare costs by 7.3% of GDP will have the same effect as a cutting taxes by 7.3% of GDP.

17/ Doubtless also, our wildly overpriced healthcare industry and its many monopolies has raised healthcare costs worldwide. So we imagine that perhaps we will ultimately cut

healthcare spending to as little as 8% of GDP instead of 11% of GDP

NR'113. SUICIDE, EUTHANASIA, AND EXECUTION

1/ The right to a painless suicide shall not be denied to those who have metastatic cancer, or some other form of painful near-certain death as defined by Senate guidelines. Nor shall it be denied to older people who will in all likelihood live under conditions of extreme pain for the rest of their lives. Those who are merely unhappy, or suffer from mere psychological problems shall have no right to kill themselves. Also, chronic pain sufferers shall have the right to the strongest pain drugs if that is needed.

2/ The right to an assisted painless suicide shall not be for the mentally ill, the psychologically tormented, the grieving, the depressed, those addicted to drugs, those who are merely poor or homeless, and those who are not in significant physical pain from an easy to understand physical cause. There shall be no fee or benefit for helping people to commit assisted suicide, but the suicide person shall be given a free drug overdose of opiates at an opiate clinic once the required number and ratio of triage doctors agrees to the patient's request.

3/ Those allowed to commit suicide may also authorize their caregivers to administer dangerously high doses of painkillers, because they are about to die anyway.

4/ Palliative care technicians working in death hospices for the near-term terminally ill shall be authorized to:

- a/ Administer the strongest opiates in the strongest doses.
- b/ Administer opiate overdoses upon reasonable request from a terminally ill patient that is pre-authorized for assisted suicide.

5/ Human life shall not be sacred when the brain stem is dead, or turned to sponge by senility, or when there is no hope of the mind ever returning beyond a faint shadow. If nobody wishes to care for the bodies of people who have been declared brain dead by 7 of 11 Senate jurors, government may humanly euthanize these brain-dead bodies after 18 days.

6/ No government money or insurance money shall be used to pay for healthcare for those who have been declared brain dead by 7 of 11 Senate jurors. Those in a coma for more for more than one year who fail a scan of sugar used by the brain must be removed from support equipment.

7/ Quadriplegics shall have the right to assisted suicide upon a 60-day waiting period. Those able to speak may do so verbally. Those only able to move their eyes must be asked annually, and given the opportunity to petition the Senate for their suicide.

8/ Those with severe health conditions who are physically unable to kill themselves may petition the courts for assistance. There shall be no euthanasia for people suffering from mental illness of grief or non-medical conditions, or conditions that are not near term fatal.

9/ In all cases of assisted suicide, 7 of 11 Senate jurors must agree with the petition. Thereupon, the would-be suicide shall immediately have the right to assistance.

10/ The standard method of execution shall be general anesthesia followed by lethal injection. There shall be no legal challenges against this method.

11/ Starving people to death shall not be considered euthanasia, but torture. Nobody shall be starved to death as a form of euthanasia, instead, they must be given an opiate overdose.

12/ Sub-Senate juries of 9 shall judge all matters of end life euthanasia in people incapable of saying what they want, and almost certainly never to awaken again. A vote of 6 of 9 shall be required to authorize all cases of end life euthanasia.

13/ People with near-term terminal illnesses that are widely regarded as incurable or at least 80% incurable shall have the right to experiment with treatments as they alone see fit. Also the FDA shall allow near-term terminal people to experiment with all reputed cures for their terminal illnesses as they see fit. The right to experiment with treatments shall apply where there is over an 80% chance of death within five years, or a 2/3 chance of death within 3-years. People with near-term terminal illnesses that are widely regarded as incurable and painful shall have the right to assisted suicide.

14/ Every person of every age with a terminal disease may refuse treatment (especially chemotherapy and radiation treatment of cancer) where the success rate of the treatment is less than 2 out of 3 cured.

15/ Where there is an epidemic of a terminal illness, or a disease requiring mass quarantines, major disruptions to society, or more than 1% of society must be locked down, doctors shall be allowed the widest reasonable flexibility by the medical system in experimenting-with, and studying unconventional treatments.

16/ It shall be a felony for anyone, or any group in any position of power to attempt to prevent the right of doctors to experiment with treatments for generally fatal diseases where no treatment exists. Also, to keep people away from the line, we shall have it that where people do this, and their inhibition results in significant excess death, they may be charged with mass murder and punished accordingly.

17/ In all matters of healthcare treatment, all results data shall belong to the public with the patient names anonymized, but their data still public.

18/ The bodies of brain dead people who have donated their bodies to science may be used for surgical experimentation if these people left their bodies to science in their wills.

19/ The Senate shall bank frozen umbilical and placenta tissue for free. The Senate shall get 80% of the tissue for this and the baby/mother gets the other 20% for free. It shall be felony fraud when healthcare people sell or act as an intermediary for birth tissue outside the system. There shall be no Government prohibition on using aborted fetal tissue for healthcare experimentation or lifesaving treatment. It shall be a felony to use fetal or birth tissue in anything other than healthcare experimentation or for lifesaving treatment as defined by a Senate permit. All sales of umbilical cord tissue and placenta shall be recorded, and the mother shall get all of the proceeds. We can't have women driven into home birth for the birth tissue money. Also, birth tissue money is important for making women want to bear children.

All qualified surrogates for others that live entirely within the government's surrogate housing system shall be allowed to sell their excess birth tissue and keep all the money.

20/ We shall carefully study the benefits of leaving the umbilical cord uncut for various time periods ranging from 1 to

perhaps 45 minutes. Does this benefit the baby? How much does this benefit the baby over the child's first 10 years, and beyond? Is there very important, or is the benefit small. What can we use the birth tissues for? Is the benefit very important, or is the benefit small? Once these facts have been determined by means of a fair and open scientific study, the Senate shall make a decision on how long before the umbilical cord shall have to drain into the child, and remain uncut. Government shall also have mandatory storage of a reasonable amount of birth tissues (placenta, umbilical blood, and umbilical stem cells) in 3 locations for new birth in our nation. However, half of this material shall be made available for use by the public under an allocation system based on auctions to the highest bidder. Thus we all have:

a/ Safe and free storage of our own birth tissues for our own future use.

b/ A large amount of this tissue for use in healing others.

c/ A big income stream for our healthcare system, as we auction off small amounts of shared birth tissue for healing people.

d/ The storage of birth tissue shall not be mandatory for babies not born in a hospital or birthing clinic.

21/ The government shall run the nation's blood and plasma system, and run the highly profitable blood fractioning industry. From now on, where people give blood, they shall automatically get a free blood donor's blood morphology panel. This includes all of the common sub-panels. It is thought that giving free blood morphology testing will greatly increase the amount of blood available to the blood bank system. This will also not attract filthy people the way money payments do at the plasma center. In fact, it may allow us to disqualify plasma donors if they are homeless.

22/ The Senate shall establish one price for each sort of dialysis treatment as standard pricing. This shall be adjusted by the weighted average of the standard pricing adjuster in that part of the nation. No dialysis company shall have more than 2% of the nation's dialysis business.

23/ The Senate shall compile detailed rules for when life-support equipment may be turned off, or disconnecting.

24/ The following people shall all be pre-tested as organ donors and shall all be used allow their organs to be harvested:

a/ Those executed by government and are either donors or not donors.

b/ Those who have their life support equipment turned off and they are donors.

c/ Those who are brain dead and are donors.

d/ Those who undergo dangerous surgery and are donors

e/ Those who seem about to die in a healthcare environment and are donors.

f/ Those who will commit suicide, where practical who are donors

25/ Where payments are made for harvested organs, these shall belong to the national government. Anyone else profiting from the harvesting of organs may be charged with 3rd degree murder, for murder by hastening is only just around the corner isn't it?

26/ Everyone executed by government for a violent crime, everyone who commits suicide, and everyone who dies in surgery shall be required to make their organs and skin

available for donation.

27/ A randomly drawn Senate healthcare jury of 5 shall rule in each case where one person's organs are harvested or donated to another person. It shall be a felony for anyone including hospitals, doctors, the prison system, fictional citizens, and natural people to harvest use or traffic in organs not approved by a Senate healthcare jury of 5.

28/ Those who kidnap or drug people to harvest/steal their organs, or to subject them to slavery, or torturous abuse shall be subject to death by torturous execution.

29/ Everyone over the age of 18 shall automatically not be considered an organ donor upon accidental or natural death unless they opt out in for organ donation on their official facebook page. Such opt in status shall be displayed for all to see. People are not allowed to be organ donors for others more than 8 years older than they are. No person under age 16 shall be allowed to be an organ donor.

30/ All income from the sale of organ donor organs shall accrue to the national government so that there's no bias in the healthcare industry towards killing patients to sell their organs. Also, the recipient patient's doctors shall do all the transplantation, and none of these people shall work at the donor patient's hospital or emergency room. Also, the harvesting side shall be paid a reasonable sum for harvesting, but not enough to provoke anyone's greed.

31/ Government shall never encourage anyone to kill themselves.

32/ The following people shall be ineligible for organ transplantation:

a/ All felony convicts.

b/ All non-citizens,

c/ All alcohol and drug addicts that have ruined their organs due to their abusive lifestyle.

33/ The VA shall increase spending on military suicide prevention until it is using a fair amount of money given how many veterans are committing suicide. This shall be thought one of the cheapest ways to prevent death of our veterans. The VA shall however not be allowed to provide mental healthcare. They can provide counseling for transitioning back to civilian life that can encompass PTSD, but they shall not have any overpaid questionably skilled mental health people. Also, anything that a person does with the VA regarding mental health shall not be tracked as mental health, but as counseling.

34/ Everybody who accesses a VA or government file or a sensitive file gets logged, and there shall be an investigation department dealing with who investigates other people's information. Where police or government officials go rogue and access/share this information, they shall be charged with data trafficking crimes.

35/ Each person shall have the right to get a other opinions from multiple other experts (up to 10 opinions at their own expense). Each parent shall have the right to get multiple other opinions from doctors regarding treatments for their child. Never shall their be a situation where one diagnosis from one "expert" triggers any obligation on the parents without having the right to get additional opinions. We would otherwise give our doctors and other experts too much power over other people. Also, there shall be no right of school/ education people to force parents to do anything at all.

36/ If it comes to pass that organ transplantation leads to the old and powerful paying criminals to kill people for their organs, the Senate shall be free to outlaw this practice. Also, where a person has the organs of a murdered person in their body as an organ transplant recipient, they shall always be considered as a conspirator in the person's murder. This should also be regarded as a form of cannibalism.

NR'114. AGE, AND LEGAL COMPETENCY

1/ It shall be a felony when priests have sex with their parishioners or former parishioners that are under age 22. It shall also be a felony when primary, secondary school, tertiary, or graduate teachers that grade or certify students have sex with their current students, or past students that are under age 22.

2/ Parents may cast their children out on their 16th birthday by filing emancipation documents with the county recorder. Children shall be free to emancipate themselves after their 16th birthday, but they must complete the government's emancipation training program and pass the emancipation test. Emancipated minors shall be contractable, and have the right to have financial accounts in their own name.

3/ In 2023, under the old system, 31 of 50 US states had age-16 as the age of consent, and 7 more had age-17 as the age of consent. Under the new system, it shall be none of government's business nationwide if 16-year olds have consensual sex with people who are any age. However, it shall not be possible for 15-year olds to give legal consent for sex with non-peers as defined herein. Also, 14-year olds and younger shall not be able to give legal consent for sex with anyone.

4/ 15 year-olds may only have consensual sex with peers. Those who are age 18 shall always be considered as peers of 15 year-olds, while those who are age 20 shall never be considered as peers with 15-year olds. The maximum penalty for non-peer entirely-willing sex with a minor of age 15 shall be 4 years. When 13 and 14 year-olds have willing sex with peers up to age 17, all parties shall undergo an additional 2X times the normal amount of sex education instruction outside of regular school hours. Those who are age 17 shall always be considered as peers of 14 year-olds, while those who are age 18 shall never be considered as peers with 14-year olds. Those who are age 16 shall always be considered as peers of 13 year-olds, while those who are age 17 shall never be considered as peers with 13-year olds. The maximum penalty for non-peer entirely willing sex with a minor of age 14 shall be 8 years. The maximum penalty for non-peer entirely willing sex with a minor of age 13 shall be 12 years. The maximum penalty for non-peer sex with a minor of age 12 shall be 20 years.

5/ The maximum penalty for non-peer sex with a minor of age 11 shall be life in a work camp and permanent removal from society without possibility of early release from incarceration. Also, all serial child predators shall generally be sent away for life. Sex or sexual behavior with children shall be thought of in the same light as knocking people's heads and causing brain damage in them. People doing these things should tend to get quickly removed from society forever. Repeated predatory, non-peer sex with minors under age 13 can be

subject to the death penalty.

6/ The misdemeanor crime of teenage predation involves males who are age 19 having sex with 15 year old females, males who are age 18 having sex with 14 year females, and males who are age 17 having sex with 13 year old females, particularly the cruel and temporary use of younger females for the sexual gratification of the older males. Where there is a relationship of over 1-month, involving people of these ages, or the younger person changes their mind and calls it off, this crime shall never apply under the conditions above.

7/ The misdemeanor crime of teenage predation shall always apply where 19 year old males have sex with 14 year old females, where 18 year old males have sex with 13 year old females, where 17 year old males have sex with 13 year old females, where 16 year old males have sex with 13 year old females, and where 15 year old males have sex with 12 year old females. However, regarding this paragraph, more severe penalties, including felony predation charges may be applied, particularly for cruel or temporary use of younger female for the short term sexual gratification by the older males.

8/ Those caught abducting other people's children from playgrounds, restaurants, crowded venues and similar locations should generally be sent to a work camp for life and may be executed if they have a criminal record. If they are non-citizens, they can easily be given a death penalty. When children are drugged, or their clothing is changed, or their hair is shaved, these premeditated criminals should generally get the highest punishment when the abductor(s) are caught, even if the child was not yet abducted. Also, where an apparent parent is crying for assistance that a person is trying to abduct their small child, bystanders shall be allowed the greatest freedom in using force to stop the apparent criminal if he is attempting to flee.

9/ The standards for determining whether or not sex was forcible shall be lower when people over age 18 have sex with minors under age 18th. Intimidation, blackmail, deception, trickery, non-violent threats, coercion, abuse of authority, payment of money, or valuables, or just not taking no for an answer, may be considered forcible or coercive sex when it comes to minors before their 18th birthday.

10/ Charges of forcible sex and extreme unprovoked or unwarranted violence upon minors by adults shall be multiplied as follows:

a/ For victims under 18-year olds, the penalty shall be multiplied by 1.25X.

b/ For victims under 16-year olds, the penalty shall be multiplied by 1.5X.

c/ For victims under 14-year olds, the penalty shall be multiplied by 2X.

d/ For victims under 12-year olds, the penalty shall be multiplied by 3X.

11/ The minimum age for smoking marijuana and drinking alcohol responsibly shall be 16. There shall be no marijuana or alcohol licenses or consumption for people under age 16. Licenses for 16-21 year-olds shall only permit limited alcohol and marijuana use calibrated to the levels where the drugs can improve performance. 16-17 years olds can use weekly, 18-21 year olds can use daily at up to this optimal dosage. At age 21, they are adults and can get whatever alcohol and

marijuana licenses they want.

12/ The minimum age for the use of tobacco or tobacco substitutes shall be 19. There shall be no tobacco licenses for people under age 19. Anyone supplying evidence of under-age smoking or drinking that leads to a conviction shall get 10-day's wages as a reward per conviction. This money shall be provided by the penalty fee or jail work of the under-age violator.

13/ The minimum age for military enlistment and lifelong marriage and natural Senate sireage shall be 18. The minimum age for touch-free Senate sireage shall be 16. The minimum age for the 5% most progressive and smartest of young people to donate eggs or sperm for Senate breeding shall be age 13. Girls that become pregnant shall not marry their baby's father until after they turn 16.

14/ The minimum age for using mafia drugs other than marijuana, and for drinking irresponsibly shall be 21. The minimum age for a prostitution license shall be 21. All prostitutes must have completed at least 1,000 hours of legitimate employment in their life in order to get a prostitution license. The minimum age to obtain a porn actor's license shall be 25. The minimum age to obtain a solo nude media modeling license shall be 23. People shall be required to have a porn or nude modeling license if their private areas are shown to an audience or shown in media that is sold or licensed. Prostitutes under age 25 shall be expected to pay a special 33% income tax in addition to the other taxes that all prostitutes pay. Porn actors shall never be allowed to ever work in the regular media once they have been porn actors.

15/ All pornography with a valid 24-digit government registration number per item, and this shall also be considered a safe harbor against underage porn, non-consensual porn, and other charges of illegal porn. Nude selfies and sex images of those over age 18 and sent to another shall not be considered porn unless they are subsequently shared over a network with others. Sending unwanted porn and prostitution imagery to people or leaving this around a community shall be a crime, especially if it is done for marketing purposes or it falls into the hands of minors. All women shall have an inalienable right to all nude images of their nude breasts and bikini areas and of them having sex and the right to remove these images from the safe harbor porn internet, except that those women with a pornography license shall not have this option. Possession of porn depicting people who are over age 18 shall only be a misdemeanor. It is thought that an age buffer zone here is greatly needed.

16/ The minimum age for meeting alone with male school and church people shall be 16, unless they are family. However, for everyone under age 21, the meeting place must be under video surveillance. Minors shall be free to review and share these meeting recordings at will. The minimum age for religious indoctrination, religious instruction, religious school without having one's parent or guardian present shall be 15.

17/ Given that so many young people are focused on frivolous things like dating and partying, and also that they tend to lack experience and make dumb decisions as a result, our nation shall have a minimum election voting age of 25 in contrast to the 26th amendment of the old 1789 US constitution, which made it 18. The Sub-Senate may set the

minimum election voting age to as high as 30, or as low as 21 if elects to do so with a 2/3 overmajority. The minimum voting age shall be set to start at 25. This is mostly so that we have a smarter wiser electorate. Now while the voting age will be 25 to 65, there will be no age limit to the people running for Sub-Senator. So technically, 8-year olds and 108-year olds are eligible for Senate service. The minimum age for participating in the Mustering and propagating of our new democracy shall be 18. Also, to be clear, Senate service shall be open to people of any age if they can get elected. So technically, 8-year olds and 108-year olds are eligible for Senate service.

18/ Models and actors depicted in a sexual, romantic or grown-up, way must be over 21 years old and shall appear that old. No model or actor shall have had plastic surgery, implants, liposuction, fat re-distribution injections, or botox, and their images shall not be altered or manipulated to make them look thinner or younger.

19/ In matters of homicide, kidnapping, armed robbery, unprovoked battery, severe beatings by individuals and ganged-up people, knife crimes, club battery to the head, forceable rape, arson, firearm possession by those prohibited from holding arms, and similar violent felonies, those past their 14th birthday shall be treated as adults, and some younger people may also be treated as adults. Younger means 9 to 13 year olds, and these especially when they are are remorseless, indifferent to their trial proceedings, hate-filled, pre-meditated, flippant, or unreal about their crimes, or they are judged by 80% of their Senate jury as: more likely than not, already on the road to a long life of crime. These shall be housed with their age group, but given sentences appropriate for adults. Remorseless juveniles who commit violent crimes when they are 13 or over shall not have the option of being tried as minors. Once the Senate jury decides that the minor is remorseless, he shall be tried like an adult. Once a jury decides this, there can be no going back on this decision to try these people as adults. It should be thought extremely important that around 3% or 15% of heinous murders committed by very young minors still result in life sentences.

Also, minors don't get life in prison sentences, they get 80-year sentences, and they live with these until at some unspecified date, they get their sentence commuted due to good behavior and their age when they committed their crimes.

20/ In general, crimes committed by young people shall have lower lock-up durations and be more oriented towards education and reconditioning according to the following schedule:

a/ Age 15-18 shall serve 2/3 of the adult time.

b/ Age 13-15 shall serve 1/2 of the adult time.

c/ Age 12 and younger shall serve up to 1/2 of the adult time.

21/ From now on, we shall say that victims rights in violent crimes are all important, and that the rights of criminals do not matter one tiny bit in comparison, even if they are still young.

22/ It shall be thought unfair to the all-important victims when society puts criminals off-limits to proper punishment, simply because they are young, or because they had a hard life. In fact the hard life of those charged with violent crimes shall not even be discussed at their trial.

23/ It shall be thought that low punishments for young criminals drives many young people into a life of crime early: And this precisely because of the lower risk of harsh punishment by society, and sealed juvenile crime records. For these reasons, we shall no longer have either thing. There shall no longer be any special juvenile records for those age 15 and over. All criminal records for those 15 and up shall be kept in the adult crime registry. Also, there shall no longer be juvenile records for those age 14 that have committed violent crimes. Also, there shall no longer be juvenile records for those age 13 that have killed, or committed extremely violent crimes or a gang beating. From now on, the right of the public to know about its garbage youth (and quickly purge these from society) shall be considered much more important than the rights of young criminals to start over when they turn 18.

24/ Juveniles shall get reduced penalties as explained just above, however there shall no longer be sealed records for juvenile crimes, as this hands blackmailers power. All juvenile criminal records shall be published on everyone's permanent Government verified facebook for all to see. All charges shall be shown and explained by the court and their victims if the victims care to make a statement. Also, links to videos and stills of the crime and witness statements shall also be posted. This information shall be required to be accessible via a link on each person's public facebook page, just like adult criminal. This information shall be displayed for the rest of their life, just like adult criminals. Juvenile criminal records shall also be displayed in all background check and credit check matters, especially those for weapons purchase, and firearm possession. Criminal convictions shall have consequences for ALL criminals, even when the person is 12-years old.

25/ The people's right to know shall about criminal convictions involving people they know is vitally important. The quality of life of ex-convicts is completely unimportant in comparison. And this even holds true when 12-year olds commit violent felonies. Therefore, all violent crime committed by people over age 12 shall go on their permanent open public record. And all their accounts shall display their violent crimes. These rules of criminal conviction display shall also apply to all prior convictions under the old system. These convictions shall also be displayed.

26/ Youth over age 12th shall not be a defense against the death penalty. There shall be no prohibition against executing convicts because they were 12 or older, when they committed a death-penalty crime.

27/ No convictions for violent crimes shall ever be expunged from the record, or sealed because the perpetrator was young, or drunk, or insane when they committed the crime. This shall apply retroactively to all convictions of the past.

28/ There shall be separate long-term incarceration facilities for those who are 60+, 59-to-20, 19-to-14, and 13 and under.

29/ Parents shall have the right to spank, but not beat their children. Parents shall not strike their children on the head, face, neck, gut area, or groin area, but only on the arms, shoulders, legs, back and outer buttocks. Parents may use their open hand to spank their children, but they shall not use any hard object or their closed fists except a leather strap such as a belt (but not the buckle) to spank their clothed children who are over age 10. Children can't be spanked for

not sitting still or for wandering off, or for taking their toys out, or other normal activities, but only when they steal things and burn things and play with matches and when they intentionally break things and other things that will lead them to being a criminal or antisocial person when they get older. Also, when parents are spanking their children, they should not be allowed to spank them more than once every 10 seconds, so the parent does not get carried away. Also, for a safe harbor, it is recommended that the parent record the spanking on video.

30/ The law shall give parents the greatest reasonable leeway, with how they punish and raise their children, and our nation's psychs and counselors shall have no input in this matter. Step parents and boyfriends/ girlfriends, teachers and other educators shall have no rights to physically discipline the children entrusted to them. There shall be a much lower bar for child abuse when it is coming from a step parent or boyfriend/girlfriend, or educator than a parent. It shall be a felony for school people to physically punish other people's children in any way. Also, we shall repeatedly teach our children media about the limits of the power of the people at school and other places so their teachers will not bluff their kids into submission.

31/ Everyone over age 70 must pass a biennial cognitive test if they wish to retain their full legal competency, financial sovereignty, right to vote, and vehicle operator's license. Those who cannot pass the cognitive test must appoint a co-signer for their financial matters. This cognitive test must be designed so that over 99.5% of full-time employed people who are between 20 and 50 can pass it on the first try. Those who are over 70 and must take the test more than once to pass it may be required to take the test annually.

32/ The Senate shall produce detailed guidelines for the minimum age at which children can undertake various activities by themselves. These shall be set as young as reasonably possible, leaving the most discretion possible to parents.

33/ No county shall make its own laws with regard to minors, except within the range of possibilities defined by the national Senate.

34/ There shall be no minimum or maximum age for Senate service.

35/ Until a child turns 18 years old, their parents shall be the ultimate judge of what is fit for them unless the parental rights have been taken away due to a court action arising from genuine abuse. Neither any schools, nor any teacher, nor any medical facility, nor any doctor, nor any mental health person, nor child protective services, nor anyone else, shall have any long-term say over the child's life, or health, or medical treatments without a court order addressing only that one child as an individual subject.

36/ There shall be no minors in places that have alcohol, gambling, marijuana, mafia drugs, or that get over half of their income from alcohol sales.

37/ Government shall provide kids cash cards with a variety of parent settings. These cannot buy certain things and certain combinations of things, or exceed on sugar consumption, or spend over the daily limit amounts stipulated by parents. This is to help keep kids eating healthy food and buying healthy things on their own. Also parents get to see an

image stream of all the purchases.

38/ It shall be a felony to give any minor under age 18 any of the following without a parent's or legal guardian's written consent and signature via the recorder system. Even the courts shall not be free to order any of the following unless the minor's life or health are at significant risk.

a/ Medical treatment, drug dispensing, vaccine injection, hormone dispensing, pain pills

b/ Medical examination.

c/ Injections, or vaccines that have not been made mandatory by government in accordance with the rules herein.

d/ Tattooing, or body piercing.

e/ Surgery or anesthesia of any sort, particularly when it involves young attractive girls getting knock-out drugs.

f/ Also, emancipation of minors shall not include medical decisions, unless the parents are living more than 100km away, or the parents do not oppose this when notified by the recorder system

39/ The minimum age for tattoos shall be 21. Where the tattoo is above a medium crew-neck collar, or past the mid bicep, the minimum age shall be 25. The minimum age for pierced nipples, tongue, penis, or clitoris shall be 25. There shall be no tattooing or body piercing between the hours of 9pm and 9am. Also, it shall be a crime to tattoo or pierce people who are obviously intoxicated. There shall never be any anesthesia for tattoos.

40/ Entrepreneurial minors under age 18 shall be allowed to have realistically-sized lemonade stands and landscaping businesses and other similar businesses without need of a business permit.

41/ Adults over age 18 shall not be allowed to strike up friendships with minors under age 16 without parental permission.

42/ Those age 13 or older shall be allowed to read written porn if they want. The mental improvement from reading shall be thought more important than the detriment from thinking about sex too much. The minimum age for visual porn shall be high-school graduation, or age 18, whichever is sooner.

43/ The national police, the local police, and civilians shall be allowed to attempt to lure pedophiles into simulated, or actual meeting with minors, where it is clearly stated that the person is not old enough for contact with non-peer stranger adults.

44/ It shall not be legal for grown-up strangers to talk with apparent minors without dropping a pin with the county recorder system and verifying ID. Also everyone entering a place where people are socializing with alcohol must drop a pin upon entry. Also, many restaurants and other businesses, and especially those for children may require pin-drops to assure the safety of their patrons. The recorder sends and entry pattern to the device, so the person can enter. Also, it shall be thought that assuring the identity of people going to get into group premises is not a thing of Big Brother but of safety.

45/ Parents of non-emancipated minor children under age 16 may always check on their child's only allowed phone to see:

a/ The location of the child.

b/ If anyone on the child's banned list has been nearby the child.

c/ If anyone from the reform school, jail, or sex criminal database has been nearby the child.

46/ Everyone 14 and up shall be allowed to work 20 hours a week long as they are above the 30th percentile with regard to school progress. Everyone 15 and up shall be allowed to work 40 hours a week, so long as they are above the 30th percentile with regard to school progress. Everyone 16 and up shall have the right to work regardless of school.

47/ The Senate shall establish reasonable minimum ages for young people to go out by themselves in urban, suburban, exurban rural and other areas, otherwise there shall be no right of anyone in government to regulate this activity. Also where parents don't adhere to the letter of the law, this shall not be considered child endangerment or be any excuse to take children into the foster care system where they will be hundreds of times more likely to be abused. Instead infractions shall be fined.

48/ It shall be a felony for non-peers to solicit sex from a minor under age 16. Wherever girls under age 16 become pregnant, police must investigate the situation and genetically test and match the child with all of the men that were around the girl. Where the father can be clearly inferred by these genetic tests, and he is not a peer of the pregnant girl, he shall be brought to justice for his sex crimes against minor children based on this evidence. Police shall consider it a high priority to investigate and prosecute all grown men who get underage girls pregnant. Also getting an underage girl pregnant, and then marrying her shall not absolve the grown man of their sex crime against minors.

NR'115. WOMEN AND CHILDBIRTH

1/ Given the existence of various abortion pills, it is futile to outlaw abortions. Nothing society does will keep many women from aborting a pregnancy with the wrong man. After decades of failed drug "wars", we have learned that we will never stop illegal drugs. How will we ever stop illegal abortion drugs? Some women will do extra-ordinary things for the one abortion pill they need. So regardless of the law, many or perhaps most women with unwanted pregnancies will still have illegal abortions with black market abortion pills.

2/ Where abortions are illegal today, women tend to switch over to black market abortion pills that are supposed to be doctor supervised but are not due to the law. So these women have dangerous, unsupervised pill abortions. Again, little is accomplished by making abortion illegal, but this creates much danger and cost. It stops few abortions, but it makes most abortions potentially life threatening for the women having them.

3/ Sex without commitment shall be a right, and entirely legal, and so shall its accessory right, that of abortions. Society has no right to tell its women: "you got pregnant by the wrong man, now you must bear his child and raise his child".

4/ What of our system of population control? How will that work when women accidentally get pregnant one too many times? And surely when our poor families have too many children, and another comes, we must let them choose. Surely when a rape victim, or a 16-year old girl accidentally gets pregnant, we must let her choose.

5/ In our nation, we shall have pregnancy clinics, and we shall have a abortion clinics. The pregnancy clinics are for women who want to keep their children. The abortion clinics are for

the women who want to have an abortion and end their pregnancy. Businesses shall not be allowed to offer abortions or call themselves an abortion clinic unless someone working there is licensed by the national government to provide abortions, and that person is providing at least 5 abortions onsite per teneth. In other words, there shall be no more fake abortion clinics run by people who just want to interrupt and delay women seeking abortions. No county shall establish its own rules for abortion. Only the national government may establish abortion rules. Also, all abortion clinics shall go inside a controlled police zones which must verify identity and keep the anti-abortion protesters out. Police must also keep aborted fetus body parts from being easily sold on the black market. Abortion clinics have no right to sell the body parts of the children that they abort, and all tissue shall belong to medical science. It should be distributed by and sold by the county.

6/ Nearly all babies born before week-22 either do not survive, or if they do survive, they have lifelong problems. However by week 25 they normally at least survive, although commonly with lifelong problems. Therefore, it shall be the law that in the first two thirds of a pregnancy, up to week-26.70 of apparent age, the Mother shall possess total life or death rights over her unborn child. However after this point, there must be some medical reason for aborting the pregnancy.

7/ Prior to the third trimester, abortion shall be both legal and entirely up to the woman. In other words, each female shall have an unlimited right to remove and kill her unborn children while they are still in her body up to week 26.7 of a typical 40 week pregnancy. During this initial 2/3 of a woman's pregnancy, nobody else shall have any legal say or right over a woman's unborn child, not government, not the genetic father of the unborn child, not the husband of the female if any, and not the female's parents. In the final third of a woman's pregnancy, the decision shall require both the woman and the courts.

8/ For abortions in the third trimester of a pregnancy, and after the sex of the unborn child has been determined, there must be some medical cause, such as a slightly increased health risk to either the mother's life, or her fertility, or slightly increased risk of a child born with a long-term care issue, or a significant birth defect. Such late term abortions shall be judged by a jury of doctors and Sub-Senators on judicial duty as to eligibility for abortion. However, the tallest 5% of women shall be allowed to have sex-selective abortions if they want, where they abort their female offspring.

9/ The medical condition called ectopic pregnancy shall now be called non-uterine fertilization. This along with all other forms of fertilization that will never result in a live birth shall not be governed by any rules about abortion for the simple reason that the fertilization is not viable. These conditions and other life-threatening conditions such as: Septic uterus, and miscarriage must always have legal abortions.

10/ Abortion shall always be allowed to preserve a pregnant woman's health, to prevent harm to her organs, and harm to her organ function and fertility.

11/ All hospitals and all female care facilities that provide obstetric care must provide abortions under the circumstances when the women's health is in danger or life or

fertility risk is at risk and she wants the abortion. Or she miscarries, or has septic uterus, or unviable pregnancy, such as ectopic pregnancy, or another condition at risk is her life or the baby is severely malformed

12/ There shall be two types of abortion, intentional, and spontaneous. IA and SA

13/ After all vaginal delivery, all women shall be sewn up a little tighter than before unless they request otherwise. We do this so that mothers will be thought to be more sexy in this way than non-mothers. We do this so that our women are inclined to reproduce. All delivery obstetricians are supposed to be experts at this procedure.

14/ If women don't have offspring, they shall be called Ms. (pronounced as miss). If they do it is Mrs, (Pronounced as misses). And marriage has nothing to do with this. This is all about offspring. And if the woman is the mother of a Senate child, she will be called Majesti, (Ma-gestation) to jam use of majesty for royals. This is abbreviated as Ma.

15/ Girls are not supposed to like boys for what they look like, they're supposed to like them because they're smart and work hard and are committed to doing good.

16/ It is a great thing that medical science can now often tell us when our unborn offspring are damaged and will require life-long care that nobody wants to provide. It is also a great thing that pregnancies that is likely to harm the mother (and often the mother of other current and future children) can be ended. It is also a good thing for society if women can chose not to have the child if she gets pregnant by the wrong man. It is also a good that that sex doesn't always mean babies for women. Also, the prenatal testing requires at least three months, and if we're going to allow women to take advantage of modern medicine and terminate pregnancies that are severely damaged, we must give them at least three and a half months to have an abortion.

17/ We shall begin a child's right to life at the point where nearly all fetuses can survive birth without serious defects. To reduce future argument, we shall use the start of the third trimester as this point in time. After the start of the third trimester, there must be a health reason for an abortion, either some slightly increased risk to the life of the mother, or some evidence of defect on the part of the unborn child.

18/ All abortions shall be free of charge and paid for by the healthcare system. We shall not have people reproducing because they are too poor to have an abortion when they want one. Also, all women shall be given free transport both to and from the nearest abortion clinic, even if they live in a remote place. However, this shall only be from the nearest paved road.

19/ Women who are dilating early may be locked up and prevented from walking around. All women that are dilating early, or about to give birth to a premature baby must take hormones and treatments as directed by their baby doctor.

20/ Surely it is wrong for society to make women bear damaged children and not let them be aborted if this is possible. So pregnant women shall have the broadest rights to abort both their damaged fetuses and to end pregnancies that might harm them the mother. This right to abort damaged children shall exist throughout the woman's pregnancy.

21/ Government shall work to make reproduction as easy and safe and burden free as practical. It is thought that doing this

will increase the desire to have children.

b It shall be a felony to impede, interfere-with, protest, call, email, message, or make contact with women while they going to exercise their right to kill their unborn children. Clinics aborting unborn children (new people) shall not be allowed to council women, or express any opinion about the woman's choice. Also, it shall be a felony for a facility to pose as an abortion clinic when they don't regularly provide abortions. Also, it shall be a felony to impersonate abortion clinic staff when this is not the case.

22/ The nation shall maintain special non-jail 4-person dorm facilities for locking up addicted women who are both pregnant and who also test positive for a list of Mafia drugs. However, this shall only happen on the orders of a Senate tribunal.

23/ When females become pregnant before their 14th birthday, they are supposed to have an abortion because they are too young to have children. Victims of rape that become pregnant are supposed to have an abortion because it is wrong to give the rapist a child. In both cases supposed-to have an abortion does not mean must have an abortion — and the female shall be free to make her own decision. Where a fetus is in the bottom 2% with regard to birth weight, women are supposed to abort the pregnancy. This is however not required. Where a fetus is in the bottom 4% with regard to birth weight women shall be free to abort the pregnancy at any time as she wishes.

24/ No matter how old a female is, she shall always have the final say over ending her own pregnancy. It is her body and her life and it shall be her choice. When a female becomes pregnant, no matter how old she is, she automatically gets treated as an adult in matters of her pregnancy, for this is an adult thing she is doing. There shall be no parental permission required for pregnant females of any age to seek licensed medical help with a pregnancy, no matter how old the female is, and this

25/ County government policy shall not make policy that discriminates against abortion clinics, or women getting abortions, and all such policy shall be unenforceable as with so many things that are contrary to this constitution. No privately owned medical property shall discriminate against abortion clinics. No County shall shut down or issue a citation of an abortion clinic without a court order.

26/ The county recorder system shall have forms for various sorts of pre-birth adoption and support commitments. With these recorded forms, pregnant women may agree to adoption or support payments from the child's grandparents, genetic father, adult genetic aunts, and adult sisters without court approval. All other parties and all relatives with felony convictions or a history of homosexual relations must be approved by the courts.

27/ For all pregnancies, the mother must watch the government's prenatal and child care education videos under monitoring. She must also correctly answer the paying attention questions at the end with a 100% score. unlimited reviews and retests are allowed.

28/ The pregnancy modules above shall be in addition to the required reproductive and child development modules that all female students must take to graduate secondary school.

29/ For all pregnancies, the mother must have timely pre-

natal testing as called for by the Healthcare Sluice. Women who do not comply with the basic pre-natal testing and education requirements shall not receive any of the government's generous child support money for the child.
30/ When prenatal tests indicate conditions associated with mental retardation that is on average as severe as high-functioning Down syndrome, no government benefits shall be given for that child.

31/ Government shall offer free family planning and pre-natal education, sex education, abortions, sterilizations, and all reasonably effective and economical forms of birth control free of charge to all females allowed to work in our nation.

32/ Government shall provide all safe and effective hormone pills and hormone implants and IUD implant birth control for free of charge to all females in the nation (citizen or not) who have menstruated and are under age 45 and want birth control themselves. This decision shall be made by the female herself and nobody else shall have any right to say to a female of breeding age, you may not use birth control. Humanity does this because it is just and it is also the most cost effective way to reduce the birth rate among the poor and irresponsible.

33/ Government shall provide pre-natal testing, prenatal healthcare, and child-birthing free of charge to all citizens and legal immigrants for a conforming number of children. Illegal immigrants shall get none of this.

34/ The following categories of breeding-age females shall not have children, and must remain on long-term birth control such as an IUD or slow-release birth-control hormone implants. Daily pills, condoms, male contraceptives and other forms of birth control shall not be acceptable forms of birth control for the purposes of this rule. Government may check and verify that birth control is being used for the following women. If any of the below categories of women are found to be pregnant, government may require them to have an abortion:

a/ Women with certain types of high use amphetamine, cocaine, or opiate licenses.

b/ Women who are licensed to consume an amount of alcohol sufficient to cause moderate fetal alcohol syndrome for their body weight.

c/ Women on probation from jail, or who were ordered by the court to be institutionalized for mental health issues in the past 2 years.

d/ Women receiving public poverty aid, and women coupled with men receiving public poverty aid. This shall not apply to child support aid.

e/ Females who are mentally retarded in its broadest sense. This shall include all females over age 14 that have not graduated 8th grade or completed the 8th grade equivalency exam. After 2035.01.01, this shall also include all females over age 18 that have not graduated 10th grade.

f/ Certain groups of immigrant, Exhod and refugee females as determined by the Senate. The Senate shall have total freedom in these matters. Also strictness with immigrant behavior should be seen as helping assure that the largest number of people can be accepted.

35/ Government shall provide, free-of-charge, frozen umbilical stem cell storage free of charge, in three sites, for all people born in a hospital or birthing center in our nation.

Also, for all citizens. Government shall not prohibit therapeutic research or therapeutic medicine because it uses stem cells, or aborted human embryo cells. However, all medical use of donated blood, donated tissue, donated organs, placenta, and especially aborted fetuses and stem cells must be disclosed (and acknowledged by a singular acknowledgment form) to all users of all therapies containing these things. No non-medical and non-FDA approved products shall be sold that contain any amount of human flesh or blood, or placenta, or anything from aborted fetuses, or human excretions. There shall be no government ban on the use of stem cells, or stem cell research, or funding for these things.

36/ Newborns voluntarily abandoned by their mother at the place of birth and without a family member to claim them may be given to the next in line for public adoption after any absence. This shall become a final adoption if the birth mother, or birth father fails to formally request the return of their child within 90 days. After this, all parental rights of the birth parents shall be forever abandoned. When mothers intentionally abandon their newborns in a dangerous place such as a dumpster, they may be charged with attempted murder and their parental rights shall be automatically terminated.

37/ Sub-Senate juries shall prioritize families for adoption of unrelated young children under age 12 as follows:

- a/ Highest priority in matters of adoption shall go to married and stable households with one woman, one man and multiple children of their own.
- b/ The next priority shall be married and stable households with one woman, one man, and one child of their own.
- c/ The next priority shall be married and stable households with one woman, one man and no children.
- d/ The next priority shall be married and stable households with one woman, one man and other adopted children.
- e/ The next priority shall be single mothers with children of their own and no homosexual history.
- f/ The next priority shall be single women with no children of their own and no homosexual history.
- g/ The next priority shall be single mothers with children of their own and a remote, or infrequent homosexual history.
- h/ The next priority shall be single women without children of their own and a remote, or infrequent homosexual history.
- i/ The next priority shall be single mothers with children of their own and an established homosexual history.
- j/ The next priority shall be single mothers with no children of their own and an established homosexual history.
- k/ The next priority shall be married and stable households of two women, both with children of their own.
- l/ The next priority shall be married and stable households of two women, with one parent already having at least one child.
- m/ The next priority shall be married and stable households of two women without children.
- n/ Single men shall generally not be allowed to adopt children that are not their own descendants. Uncles and cousins may however petition the court for adoption if they are not homosexuals.
- o/ Homosexual male households and anyone who has ever identified as transsexual or one of the many queer genders (including non-binary, gender fluid and the like) shall not be

allowed to adopt any children related, or unrelated.

38/ It shall not be possible to adopt people as children after their 16th birthday.

39/ The following people shall not be allowed to adopt children:

- a/ Convicted felons and those charged-with, or on-trial for a felony.
- b/ Those with a several misdemeanor convictions, especially involving CPS.
- c/ Those who have ever been institutionalized against their will for mental health issues.
- d/ Those recently licensed to drink more than 4 portions of alcohol per day per 100kg of body weight.
- e/ Those who have had Mafia drug licenses, except marijuana licensing
- f/ Male homosexuals, transsexuals, prostitutes and other forms of sex worker, current or former, even if coupled or married.
- g/ Also, those with credible accusations of child sex crimes, child abuse, or domestic violence shall have their adoption(s) delayed until the matter has been resolved.

40/ It shall be presumed that those seeking to buy, sell, or rent minors, outside the adoption system are doing this for sexual purposes. These people shall be charged with sex trafficking.

41/ Only Sub-Senate juries may qualify adoptive parents and place children for adoptions. The adoptions service shall try to match ethnicity and looks if practical, so the child can have a more normal family identity, and so it is not completely obvious that the child was adopted. It shall be thought that this sort of family identity is vastly more important for children than Ishtarian ideas about gender identity.

42/ Everyone adopting a child shall have their sex and social media history reviewed. The people who never were homosexuals shall be given priority ahead of all former homosexuals in matters of adoption.

43/ We shall look at the big picture with regard to adoption of children, to increase adoption by quality parents. The big picture is that we must minimize risk in the adoption process on both sides. Therefore, all background information from all adoptive children shall be available to the parents where this information reveals abuse or neglect or criminal behavior by the children. This is the best approach because it leads to the highest number of children being adopted by good adoptive parents.

44/ The confidentiality of adoption records shall be thought a thing that helps those trafficking children to evade attention and prosecution for their heinous crimes. Therefore:

- a/ This information should be relatively easy for investigators to access.
- b/ The Sub-Senate shall annually check on the wellness of all adopted children in their county.
- c/ It shall be relatively easy for birth parents to access the anonymized wellness checks at no cost.

45/ All immigrants, Exhods and adopted children shall be genetically indexed to determine where they actually come from, and who they are related to. This shall be repeated annually for a few years by different groups of Sub-Senate testers so that this testing is truthful — because this is so important. It is also important that we compare all our notes with all the other nations of the world.

46/ Only licensed physicians and licensed birthing nurses shall offer child-birth services, and these must offer their services in a location adjacent to a certified operating-room. The training period for a birthing nurse shall be 2-years in school and a 1-year internship.

47/ Women shall be allowed to breastfeed their babies anywhere that they may bring their babies, provided the child has not yet had its 2nd birthday. Women are supposed to cover their breasts from view while breastfeeding a child in public, however there shall be no penalty if the nipple is shown. Also, people who do anything to repress breast feeding anywhere at all may be fined up to 30 day's wages.

48/ No healthcare professional shall ever be forced to perform an abortion, or provide abortion related services if they do not want to.

49/ If we give women bearing children longer paid leave periods, we not only get more women willing to have children, we will also get more quality time spent with those kids. It is not hard to imagine that giving women 2 or 3 years of employment leave at 2/3 of their wage might have no net cost to society over the long run.

50/ All religious schools must teach the government's basic sex education program about how to get pregnant and how not to get pregnant, childbirth, child care, child psychology, child cost, sexual consent laws, sex crimes, porn and porn addiction, STD causes and symptoms and how not to get STDs, the use of the STD system to register partners. There shall be no aspect of Senate sex education that talks about sexual orientation, any aspect of sex pleasure, or that encourages children to have sex except via the discussion of necessary matters of sexual education.

51/ The media shall not present conception, pregnancy, child rearing, childbirth, or child costs in a negative way. Media that does this shall be stigmatized.

52/ There shall be no tax on voucher schools, private day care, tutors, or neighborhood babysitting via the Senate babysitting app. However all transactions must be via cashless exchange.

53/ Neither government or anyone else shall encourage or require or automatically perform any circumcision. All parents shall have the right to choose. Also, all baby circumcisions shall use an topical anesthetic.

54/ No priest, rabbi, or holy man may perform any circumcisions. All circumcisions must use a topical anesthetic. failure to use an anesthetic and a certified healthcare technician shall be a crime. All circumcisions of boys under age 12 shall be taxed at a rate of 80-hour's wages. There shall be no female circumcision without a medical need and a court order. Also there shall be no circumcision of boys unless both parents sign the authorization form with the county recorder system. It is however recommended that the Senate outlaw all forms of circumcision for all ages of people. Circumcision shall be viewed as an Ishtarian ruse to get their slave races to have less sex and work harder.

55/ Nobody shall be sued for paternal benefits without adequate pretrial genetic testing which may be easily compelled by the court. No person can be forced to pay for any child support without at least 5 genetic tests of all 3 people involved by 5 different Senate approved testing facilities chosen by the person who might be required to pay

money for child benefits.

56/ The minimum age for voluntary sterilization surgery shall be 30. Whether or not people have had sterilization surgery shall not be on their STD verification system page for sex partners.

57/ All newborn children shall be genetic tested by the Recorder system for paternity at birth and the results shall be immediately shared with the father or supposed father. Where there is any child support, or the father does not believe the results of the recorder system's free genetic tests, then the father or alleged father shall have the right to demand up to 5 redundant DNA samples and perform his own genetic tests at his own expense. These tests shall be considered a critical right of all supporting fathers, and no court shall ever have any right to exclude any mother or child from this testing. All immigrants past and future shall be genetically tested and their DNA data permanently kept on file. All children born to people who are on the dole must be genetically tested along with their parents if they are going to continue to receive dole money.

58/ There shall be no medical procedures where the genitals are surgically altered for aesthetics. This includes surgery to create fake penises, fake vaginas, bigger genitals, or smaller genitals, except that women who have had children have a right to get restorative surgery to their vaginas either at the time of birth or after.

59/ All births shall include the procedure where the vagina is made a bit smaller than average for no additional charge. It shall not be allowed for women who have not had children to have this procedure where the vagina is made smaller. Also, to repeat, it shall not be allowed for women who have not born children to have cosmetic surgery to either their breasts or bellies, but when women who have had children do this, it shall not involve the payment of extreme luxury taxes. All forms of cosmetic surgery to the penis, scrotum, or vagina shall be prohibited.

60/ When women have sires, and especially surrogate sires, this should be thought to be one of the most virtuous things for a woman to do, more virtuous than any chastity, or any thing done for animals or the environment.

61/ When women become pregnant, they shall have the right to compel their recent male partners to give oral swabs for the purposes of DNA matching. Under the law, the men must comply so the woman can know for sure who the father is. It is unconscionable that women would not know the identity of the father, if there was any question. For surely some women might want to have one man's child, but not the other's.

62/ All women who have miscarriages shall have the right to a prompt and free D&C procedure if this is needed. Also this procedure shall be entirely paid by government, for all miscarriages.

63/ Where women have babies under agreements, no burden or cost that is not in the agreement shall ever be applied to the man. Also the courts shall not be thought competent to add burdens to a man under any child support agreement. This is largely because the society will now be taking care of the financial part of raising children.

64/ All images of women's nude breasts and nude bellies in the non-porn media should be either obviously pregnant or post child birth. Also, we shall try to use the media to

sexualize pregnant women, so that the general perception is that women get very sexy in their pregnancy. Also, all the women's magazines must have at least 20% pregnant models, and 20% women with young children.

65/ There shall be a standard price for all human births with or without anesthesia. And the birthing centers shall be paid this amount plus or minus their multiplier, regardless of how complex the birth is. All birthing centers must take all pregnant women at any time, without considering how difficult the birth will be. These shall be clustered around a county birthing center emergency room.

66/ We must carefully re-evaluate all practices related to women, pregnancy and childbirth because these have probably been sabotaged by the Arab struggle wherever possible. There shall be no induction of labor in women without their informed consent, or their responsible person's consent, unless there is nobody to grant consent, or a genuine emergency situation has arisen. Except upon the special authorization of a Senate medical jury, birthing centers may not do anything to induce labor, unless it is called for in the Senate approved procedures for the induction of labor.

67/ In all births, the baby shall start its live placed in the arms of the mother first, and immediately after birth. The umbilical cord must be allowed the Senate defined time to drain and to give its blood and nutrients and other important things to the baby. The examination of the baby by medical staff shall only check for Senate approved things and this shall occur while the baby is being held by the mother. And again, there shall be no injections of more or less healthy newborns. Nobody shall have any opportunity to introduce any venom, or ven-haemia into the children of our smartest where people can't notice any change (because the child is newborn).

68/ Our new surgical baby delivery rooms shall have around them a bunch of hotel rooms for pregnant women and their families. They shall also have these strap-in stirrup chairs that are open at the bottom. These shall be mounted to a computer controlled fast elevator. The mother will be able to press a button and 2 seconds later there will be an increase gravity at the moment of her peak contraction, so as to help the baby get out. We shall have these hotels above our baby delivery clinics connected by elevators. If there's a complication the emergency delivery room is just down the elevator. These hotel rooms cost three times the rate of a normal hotel.

69/ Doctors shall not be allowed to meet alone with children 10 or younger without their parents present. Doctors are never allowed to send same sex parents out of the room when they're examining their children.

70/ Considering that 2/3 of women give birth within 24 hours of the water breaking, and around 90% give birth within 48 hours, the Senate shall allow C-sections at the woman's choice after 24 hours of labor, and maybe require cesarian births after 48 hours.

NR'116. MARRIAGE AND DIVORCE

1/ The right of parents to raise their children as they see fit shall be seen as a fundamental liberty in our land of the free. The government of the land of the free shall give the people

the greatest reasonable freedom and leeway in how they conduct their family life, how they marry and how they raise their children.

2/ Except for setting a minimum ages, and prohibiting genetic incest (including first and second cousins), government shall not limit or define the nature of marriage and family for the people. Full citizens shall be free to write their vows and marry and have families as they wish, in any combinations, genders, or numbers they wish, provided all parties agree. However to limit the power of foreign brotherhoods, islam, and ishtarian networks, we shall have it that Muslims and former Muslims will not be allowed to have more than one child each for at least two generations. So Muslim polygamy will be impossible. Also, the people shall be allowed to make binding stipulations in their marriage agreements with regard to support levels, sex, offspring, rearing, cooking, and cleaning as a condition of their marriage.

3/ All of the nation's laws and standards for marriage, natural reproduction, artificial reproduction, abortion, birth control, child support and spousal support shall be elected by the national Senate and no county may establish its own laws or standards for these things. All of these senate agreements for family law shall be ironclad as selected by the menu options.

4/ From now on, all new marriages and support agreements must be recorded in writing, or on video and filed with the county recorder system for the agreement to be legally binding.

5/ No co-habitation without a recorded marriage agreement shall ever become a marriage, no matter how long the co-habitation was for. Also, the court system shall be prohibited from hearing the cases of people that are neither married nor contracted to the person that they are suing for spousal support money, or partner support money, or child support money, or alimony. There shall be no court standing for these people who lack an valid agreement. Also, men shall no longer be allowed to sue women or other men for spousal, child, or partner support, even if they're married, or it is called for in a coupling contract. Similarly, women shall no longer be allowed to sue other women for support money of any kind even if they are married or in a coupling contract. The legal system shall only afford support rights to females in heterosexual couplings. Also, There shall be no challenging of the Senate's marriage related standard agreements, or the Senate's child support related standard agreements, and other marriage related agreements. The Senate's standard approved contracts shall provided for free by the recorder system. The terms and paragraphs of these standard approved contracts may be freely mixed and matched. Also, as normal herein, the terms male and female shall refer to genetic males and genetic females, and not to transsexuals or transvestites.

6/ The people shall be free to do the following in their marriage contracts, or not:

a/ Couple with people of either sex for life, or for a fixed number of years. It is thought that some men will marry for a number of years until the children are more self-sufficient.

b/ Call for any property sharing and post-marriage property divisions they wish, equal or not, capped or not. However absent a specific marriage contract clause calling for the sharing of property, there shall be no sharing of property.

c/ Have marriages of child support alone, without any sharing of property between spouses.

d/ Call for any divorce justifications or delay period they wish up to 2-years.

e/ Call for any child support payments they wish. However absent a specific marriage contract clause calling for the payment of child support, there shall be no child support due from either parent for a conforming number of children as Government will pay for this.

f/ Call for any child custody and visitation rules they wish. However absent a specific marriage contract clause calling for child custody, the standard child custody time division percentages shall apply.

g/ Call for any alimony payments they wish. However absent a specific marriage contract clause calling for the payment of alimony, there shall be no alimony due for any new marriages. Also, homosexual marriages shall not be subject to either alimony or spousal support.

7/ Marriage contracts shall not presume child support or spousal support. Absent a separate child support agreement or clause, there shall be no obligation to support conforming children. Also, absent a separate spousal support agreement, there shall be no obligation to support one's spouse. The people shall be free to marry without either child support, or without spousal support. They shall also be free to give child support and partner support either with or without marriage. Also contingent child support agreements for children and their mothers shall be possible and even encouraged before the Child is conceived.

8/ When unmarried people record written parenting agreements, these shall be just as valid as a marriage in all matters of determining child support, custody, and visitation rights.

9/ Government shall not favor married parents over unmarried parents, or have incentives for people to marry or not marry when they have children. Government may however incentivize the people to either have children or to not have children.

10/ Government shall not impose restrictions that slow the time period for divorce.

11/ Every person over age 16 shall have the inalienable right to leave their parent's home and strike out on their own.

12/ A woman's right to choose who will sire her children shall be inalienable, and something that cannot be bartered away in a marriage or by contract. If a husband is unhappy that his wife is bearing the child of another man, his only recourse shall be to seek a divorce.

13/ All marriages and support agreements shall require a license. No marriage license shall be granted except after a one-teneth waiting period, tests for sexually transmitted diseases (if for marriage). If the agreement involves a female partner of child-bearing years, there shall be a pregnancy test. All applicants for a marriage license shall have a right to see the records of their prospective spouse relating to:

a/ Identities and marriage periods of all prior marriages and registered relationships.

b/ Identities of all offspring, parents, and siblings and supported people.

c/ Education progress, and study history.

d/ Debts, wealth, credit history, tax history, and employment

history.

e/ Criminal record, domestic violence record, driving record, court record, alcohol record, Mafia drug license record.

f/ STD system records including all past sex partners and all partners that are prostitutes, as well as all official genders.

x/ These records may also be shown to other sorts of life partners and potential life partners if the subject person agrees to show their private records. All spouses may look at their partner's STD system records whenever they wish, however they may not share this confidential information.

Also, spouses shall get to see their partner's STD system sex partners, including recent partners and prostitutes, but nobody shall not have any power to keep another adult partner from either having sex, or from using the STD system. All they get is the ability to confidentially check their spouse's records.

14/ The STD system shall also report felony convictions, and dating complaints. The STD system may be required to get into certain drinking and partying establishments. Additionally, in the interest of safety, some establishments will opt to keep all criminals out. People can also do this with parties at their homes, and it shall be a separate crime for convicts to violate these rules.

15/ Under the law, each person shall have an inalienable right to have sex with whoever they choose to have sex with.

Under the law, no person shall ever have any control or contractual right over who another person has sex with, or doesn't have sex with. It shall be no business of government or society who grown people chose to have sex with even if they are married. However, married people shall always have the legal right to leave their spouse if they choose and pair up with someone else.

16/ Where marriage contracts stipulate either the provision of sex, or fidelity in writing or by oath, they shall not be valid or enforceable, neither the clause nor the marriage shall be enforceable. There shall be no such thing as a legally binding contract for the provision of sex under any circumstances, including marriage. Marriage contracts shall be void when they have clauses that convey or deny the inalienable right of each person to choose and to leave their spouses, or have sex and offspring with other people. These rights shall always be outside of every marriage and every marriage contract in our land, including foreign marriages that come to out land.

17/ All marriage agreements shall allow mutual access to the STD system. However some marriage agreements will permit clauses where the spouses are able to view each others electronic communications. However, this shall not be one-sided, and if one side has this right the other side shall also have the right to view this information.

18/ Government shall not get involved with who is right or wrong when people divorce. All divorce shall be no fault under the law. Government shall favor neither side and shall be the dutiful slave shall robotically apportion property divisions as per the marriage contract or the standard provisions of marriage. It will then charge the usual divorce fee for the marriage estate valuation, and then it will complete the divorce.

19/ All the following shall be considered grounds for divorce, sex with other people, abandonment of cohabitation, imprisonment, physical abuse, mental abuse, constant

yelling, institutionalization, extreme substance abuse and perhaps other things. The following shall not be considered grounds for divorce: not fun, lazy partner, disagreements, illness, bankruptcy, military service that is away from home jobs away from home, as long as the person returns.

20/ If it ever comes to pass that lawyers have managed to re-insinuate themselves in any aspect of family court, there shall be a 95% tax on both their lawyer fees and the proceeds of any such court action. Family money should be regarded as the treasury of our nation's future and we never want anyone taxing this money, or reducing this money that does not belong, such as lawyers in family court. If a person is not competent to stand for themselves in family court, then a surrogate shall be appointed for them. Family law and especially marriage and other couple breakups shall be thought to have no role for overpriced professional arguers. The Senate shall be required to take whatever measures are needed to keep both overpriced lawyers and overpriced psych charlatans out of the legal system.

21/ Sperm and egg donation shall not be reported on the STD system, even to spouses. Sperm donation shall be totally confidential, otherwise our exalted donors might not be so generous.

22/ All marriage vows shall include a property inventory section prepared from the official ownership and purchase records. This is where the merged and separate property gets listed. It is also where divorce terms, child support terms, and other terms get listed. Assets not listed shall remain separate property. The standards for turning separate property into community property through actions shall be as high as reasonably practical.

Shared marriage accounts shall never become separate, except through divorce. Separate accounts owned by each partner shall never become shared except through a recorded gift of separate property into shared marriage property. All property occupied by the couple in their personal life, their homes, their cars, their furniture, shall automatically be considered shared property. All property not used by the couple, and used for income purposes shall never become shared except through a recorded gift of separate property into shared marriage property. Where separate accounts are used to purchase either separate or merged property, those separate accounts shall remain separate.

23/ Lawyers shall not be allowed in family court, only system assigned surrogates. Also, because lawyers are not allowed in family court, there shall be no right for anyone to demand that the other party to a marriage or child support agreement pay for their lawyer, or legal advice. Family law legal-surrogates for minors under age 18 need not be inferior to principles, however they shall not be substantially superior to principles. There shall be no confidential informants, or accusers allowed in matters related to marriage, children, CPS, child custody, child abuse, crimes by children, or sex crimes. The accusers and witnesses must be known just as with everywhere else in our legal system.

24/ Uncontested divorces shall pay 6% of assets as an adjudication fee. When government must adjudicate a divorce, it charges 50% on assets up to a year's pay, and 15% on amounts over this.

25/ Absent a mutually signed marriage or coupling contract

clause specifically calling for the payment of money for specified reasons, there shall be no obligation to pay anything upon divorce, separation, or de-coupling. Spousal support and child must be explicitly called-for in a recorded marriage agreement or recorded coupling agreement for it to compel the payment of money upon divorce or separation.

26/ The parties to a marriage or coupling agreement shall never have the right to challenge signed and recorded standard marriage contracts, marriage related agreements, or pre-nuptial agreements with regard to the obligation of one side to pay the other money.

27/ No marriage agreement, or other coupling agreement shall confer any child support rights where the child is genetically unrelated to the person paying child support, unless that person adopted the child, or they consented to the female being inseminated by another male.

28/ Absent a specific marriage contract clause calling for the payment of any money, including alimony, spousal support, or child support, there shall be requirement to pay any of these for any new marriages or new children born after this constitution comes into effect.

29/ There shall be no form of alimony allowed under this constitution for new divorces finalized after this constitution comes into effect. Also, no existing alimony required under the old system (under any sort of agreement) shall be valid under this constitution for more than 7-years after this new constitution comes into effect.

29/ No alimony agreement under the old system shall be valid where the women did not bear at least once child from that coupling/marriage. Also, no spousal support or divorce payment shall go on for more than 20 years from either the end of that coupling/marriage, or more than 7-years after this new constitution comes into effect.

30/ Divorce and support payments shall be based on the average wage in our nation and the number of children born. This is so that women have an incentive to have many children and to stay married instead of the incentive under the previous system where they got a big payout for finding a rich man and getting divorced.

31/ There shall be no presumption that divorced people and one's offspring have a right to live at the standard they have become accustomed to. Such a presumption makes our best people reluctant to couple and have many children and leaves our nation to be taken over by its poorer elements who have nothing to lose in having many children. This idea that spouses have a right to live at the standard they have become accustomed to shall be thought an Ishtarian idea, a stumbling block for our land-of-the-free society. There shall no longer be any right to right of divorced spouses and offspring to live at the standard they have become accustomed to. This concept shall no longer be any part of our legal system. Also, there shall be reasonable limits on spousal support.

32/ There shall be no right to use either the court system or lawyers to obtain more support money than the maximum stated in the recorded prenuptial or child support agreement for the couple. The courts shall no longer have any right to say that any stated amount for spousal or child support is not sufficient. All judges that say even try to do this and try to say that the stated amount in the agreement between the parents

is not enough money shall be prima-facia regarded as corrupt and power grabbing and working for the enemies of the free people of the land of the free. These shall not be allowed to undermine or indirectly our best to for making lots of smart infidel babies.

33/ Government shall produce a number of standard prenuptial clauses for the division of property in marriages and non-marriage couplings. Government shall produce a number of standard child custody clauses for when both marriages and non-marriage couplings end. Most of these prenuptial agreements shall not us the court system, but recorder system random juries and binding arbitration. No prenuptial agreement shall use either lawyers or expert judges. All shall prohibit the use of lawyers and expert judges, and none of these standard agreements shall be nullified, either in whole or in part for any reason by any judge or jury.

34/ Where both/all parties to a marriage sign a final divorce agreement, the parties shall have no right to pursue the matter any further in court or in arbitration or using another settlement method. There shall also be no right to ask for more money, or change the terms of the divorce agreement unless there.

35/ While prenuptial agreements may express financial settlement amounts as a fixed amount, or a percentage of income, all divorce agreements shall only state a fixed sum of money, and no percent of income clauses shall be allowed in divorce agreements.

36/ Where there is no prenuptial agreement, it shall not be possible for people to inherit money. So if people are married, but they don't have prenuptial agreement, neither side shall be allowed to inherit anything from anyone who dies before the date of the recorded prenuptial agreement. All prenuptial agreements shall address the following potentialities in some way:

a/ Babies and their support, if any.

b/ Spousal support if any.

c/ Sexual exclusivity, sex with other people and penalties.

d/ Minimum frequency of having sex early and late in the coupling.

e/ Obesity.

g/ Substance abuse.

h/ Domestic violence.

i/ Abandonment.

j/ Imprisonment of a spouse.

37/ No matter how many times a person divorces, or how many children they have, they shall never lose more than half of their income to spousal or child support. We must have strict rules here, so that men are eager to have children, and so that our people do not die out, as they have been dying out in recent decades. Also, this rule shall apply retroactively to pre-existing marriages.

38/ All existing spousal support agreements in excess of three times the average wage shall be reduced to that amount. All existing child support agreements for the children of married parents in excess of twice the average wage shall be reduced to that amount. All existing child support agreements for the children of unmarried parents in excess of the average wage shall be reduced to that amount.

39/ If a supporting parent starts making a lot more income,

this fact shall have no bearing on the amount of money that is paid to the children or the wife or the caretaking parent.

40/ All support agreements shall be judged and enforced by the county recorder system, except where a conflict of instructions occurs and then the courts must judge which interpretation is correct.

41/ It shall not be possible to challenge a premarital agreement as unfair or in error. It shall not be allowed to use shared marital resources for divorce lawyer fees, divorce accounting fees, or divorce investigator fees.

42/ All un-skilled and semi-skilled immigrant groups shall be expected to marry out. South Asians must marry and date outside south Asians if they want to migrate and marry and stay. Even their pre-existing kids must do this. And the same for east Asians, for Europeans, for Africans, for Mideast people. It shall be noted how this:

a/ Greatly increases the willingness of a host society to take in more immigrants. If the females are prohibited from marrying their own people, and having children with their own people, and must marry out in a multi racial society. This greatly boosts the tolerance of a host society to taking in people.

b/ Naturally keeps the standards up for immigrants, with the un-marriageable having to go back or go somewhere else to settle. Thus many immigrants will first migrate to the US or to Europe, but later have to re-settle in Mexas or Andeo, or some other new UM nation because they cannot marry out.

c/ Acts as a cement for attaching new races of people to our society. All the immigrants are married into our multi-cultural society, and in some way they abandon their prior nation.

d/ There is no worry about the creeping takeover of any alien culture in future generations because all the children blend into the mixture in their host nation.

e/ When people marry out, they shall not be allowed to change their religion to that of their partner, or it shall not count. They must remain different as they are supposed to be of a different race.

43/ It shall not be allowed to marry siblings, half siblings, parents and children, grandparents and grandchildren, uncles, aunts, and even first cousins and second cousins shall not be allowed to marry under the law. Where foreigners do this, they shall not be allowed to stay in our nation. We shall discriminate against cultures that don't allow women to go outside, and cultures that give women greatly lower status, and cultures that allow child marriage, and cultures that are intolerant of other cultures. These cultures shall not be allowed to migrate to, or remain in our nation, and all of those that have previously migrated shall be required to leave. This should be especially so for people who have married their cousins or siblings or other family members that are even closer than this.

44/ All children born to first second cousin parents shall be considered non-conforming and these shall get no government benefits. If their parents are from another nation, they must either go back, or be deported.

45/ Foreigners that have moved and have a disabled child that they collect public benefits for, these must all move back, or away, or be deported.

46/ All wedding/marriage ceremony expenses over 1-month's wages shall be subject to luxury tax of 100% with the effect of

doubling the cost of the wedding. This shall include all expenses such as venue rental, food, catering, alcohol, special clothing money for the person marrying the couple, and anyone recording the event, invitations, postage, planners, wedding dresses, etc. Over this amount, all marriage ceremony, wedding clothing, and wedding ring expenditures shall be subject to at least a 100% luxury sales tax so that people squander money less on pomp and ceremony and diamonds, and precious metals that have traditionally been sold by the Mideast. Wedding gifts valued at less than a day's wages from the guests shall not be subject to taxation. The four or less parents of a couple getting married may give up to 2 year's wages tax free in total. Marriage ceremonies that cost over 2-month's pay shall pay 300% tax on the overage.

47/ Everyone photographing, or video recording any event for the hosts shall be required to stream to the the event organizer's website live, posting all the video as it happens. It shall be a crime to work as an event photographer or videographer without doing this for the complete video stream. Also, where people do this, they shall not be allowed to work in the area. Also, it shall be considered fraud when event photographers either refuse to work at the last moment or they fail to post their recordings live to the host's website.

48/ Senate payments for bearing sires and surrogates given up for adoption shall start at:

a/ Any woman and a Surrogate given up for adoption. 3-year's wages.

b/ College mother and a Sire given up for adoption. 2-year's wages.

x/ These children shall be then transferred to adoptive parents for the same payment made to the mother upon careful review of the adopting parents. These amounts will need adjustment.

49/ In matters of divorce and couples breakups, the following shall not be reported by the media:

a/ Words claiming injury and bad behavior.

b/ Unauthorized recordings, transcriptions, or descriptions of couples having disagreements.

c/ The identity of sex partners, or couple's children.

50/ Government shall not discriminate against unmarried registered domestic partners of more than 4-years. These shall be treated as equal to spouses by Government in all social programs at the election of both members of the couple.

51/ For the purposes of visas and immigration, when citizens are coupled with foreigners for more than 4-years and have children together, and have a support agreement, but they are not married, this shall be considered as the equal to people who are married, with or without children.

52/ All joint accounts shall require all signatures to remove more than 1-month's wages, or 20% of the account value in any 30 day period, whichever is greater.

53/ All underage marriages shall be void under the law regardless of the circumstances, and even after the minor becomes legally an adult. No religion or other fictional citizen may condone underage marriage. Also let it be thought that the judicial system is going to come for all non-peers who marry underage people. Even after 10, 20 or 30 years, the people may come for non-peers who marry an underage

person.

54/ Common sense demands that all pre-existing property (From before to the marriage) and all property/assets inherited during the marriage shall always be considered as not-commingled unless there is a specific statement that they are to be mingled. It is only lawyers looking for a bigger share of divorce settlements that are responsible for making the opposite a reality.

55/ All people getting married, and all married immigrants (new or old) shall be genetically checked for family relationship. Those who are second cousins or closer shall not be allowed to either get married or immigrate. All existing immigrants married to their second cousins or closer, including those who have previously obtained citizenship, shall have their immigration status and citizenship canceled. We shall not be a nation of inbred hillbillies. And this goes especially for foreign hillbillies that hate our freedoms.

56/ Muslim cousin marriage shall officially be thought to mean four things that disqualify people from these cultures from entering our nation, let alone immigrating. These things shall also be thought to apply to the relatives of married cousins, as well as all the people from hillbilly areas with the highest rates of cousin marriage.

a/ It means that the females are not allowed to go outside and that's why she married her cousin. We do not want people from backwards cultures like this in our nation.

b/ It means that females can't go outside because they are going to get abducted and turned into a sex slave. We do not want males from these families in your nation.

c/ It means that the females comes from a culture where the men kidnap women and turn them into sex slaves, and have lots of kids with them this way. We do not want lots of degenerate inbred kids like this in our nation.

d/ It means that the people from this culture coming from this nation are the product of generations of cousin marriage and they're stupid and have high rates of birth defects as a result.

57/ Where people marry after finding out that the woman is pregnant, but the woman lies about the man being the father, this shall be by itself grounds for both divorce and marital annulment.

58/ Married people shall not be allowed to do any of the following without their spouse's consent, which consent, once granted may be withdrawn at any time via the recorder system.

a/ Sell, lease, encumber, mortgage, or transfer real estate that is partly in their spouse's name.

b/ Sell, lease, encumber, mortgage, or transfer vehicles partly their spouse's name.

c/ Access, trade, and remove money from financial accounts partly in their spouse's name.

d/ Withdraw more than half of the assets in any account owned by both parties.

e/ Sell or throw away the other spouses possessions.

f/ Borrow money partly in the name of the spouse, especially just prior to a divorce. Where extreme borrowing or selling of assets occurs leading up to a divorce, especially when it is done secretly, the money shall be counted 3X and there shall be no right to obtain any long term support from the other side.

59/ Lawyers shall not be allowed in family law matters, only surrogates. Lawyers that work in family law matters shall not only be jailed, but they shall lose their license to practice law for life. Also, where lawyers are used in family law matters, the system shall be prohibited from coming to a resolution.

60/ Divorce and support payments shall only be based on the average wage in our nation. This is so that women have an incentive to stay married instead of the incentive under the previous system where they got a big payout for getting divorced from rich men.

61/ This constitution allows for polygamy, polyandry, and group marriages for full citizens. However it also prohibits these for immigrants and especially for Muslims and former Muslims, (even if they are Senators or Ubigs) due to the national security threat, and due to the female-enslaving nature of Muslim marriages. All of these found to be living in muslim polygamous families shall be deported. Also, nonconsensual polygamous marriages (at their inception) shall be considered the crime of bigamy.

62/ There shall never be any marriage or sex between step parents and step children, even if the child grows up. This shall always be thought the fruit of a poisonous tree. Sex with step children shall always be a sort of pedophile offense, no matter how old the child gets. We don't want people working with our children, or co-parenting our children who might want to have sex with them, even if it is many years in the future. These are the wrong people to have working with our children.

63/ Where the children of immigrants marry, or have children with their own kind, they shall not have the right to vote.

64/ Where women marry, and there is both a father and step father, or two homosexual fathers, both should walk the daughter down the aisle. Where there was no strong father figure, the mother should walk her daughter down the aisle.

65/ Where one spouse dies and the other lives, and they have more than one genetic child together, all the property of the deceased spouse shall automatically become the property of the surviving spouse without any special government approvals or regulations. This shall also be so where the people are not married, but have a child, if the dead person has put these instructions in their recorder system will-testament. However all such recorder system will-testaments shall be revocable.

66/ The moment, the either spouse files for divorce is the moment that the calculation of assets occurs, at that point in time, even though the divorce itself may take much longer to complete. Also, there shall be no incentives where the parties get any benefit from delaying divorce proceedings.

All divorce settlements shall be final, and as of that point in time. And if either spouse acquires money after this point in time, the other spouse shall not have any ability to change the amounts owed, even if the supportive spouse didn't have enough money. That this ever existed is a testament to the power of the lawyers in the system.

67/ There shall be a slight bias against the side that files first to get a divorce.

68/ There shall be no lawyers involved in family law, and this especially in matters of divorce and child support payments. And this would include alimony, except for how all alimony is now banned in all future divorces regardless of the

conditions, or prenuptial agreement. There shall be no more alimony. Also the name alimony tells us who has always been behind this marriage fee. Also, there shall be no concept of fairness in matters of divorces. There's only the agreement that people made and the fairness in relationship to the instructions of the agreement they made together.

69/ From now on, the phrase "consummated marriage" shall refer to a marriage where the economically dependent parent bore one or more children. All things being equal consummated marriages are supposed to get 4 to 6 times more money than unconsummated marriages. Breakup money is supposed to be mostly about producing offspring and funding them. It is not supposed to be about women who remain childless in marriage. So in the future, marriage will be more about child bearing and much less about gold-digging.

70/ The Senate shall set absolute limits on the maximum amount that can be gotten through marriage and divorce, both with and without offspring and in consideration of the number of offspring.

71/ We should all pause to note how in the land of the free, marriages are these impossible to dissolve strictly monogamous unions involving women that have according to modern norms already wasted half of their fertile years by the time they marry at age 26. On the other hand in the Islamic slave part of the world, the men commonly marry children. Also, in the land of the free, divorce can be ruinous for the man, while in the Islamic part of the world, all a man has to do to divorce his wife is say I divorce you three times and he is divorced from his wife without further obligation. Also, under Islam, a man he can have 4-wives and an infinite number of mistresses, but in the land of the free, a man can only have one wife, and he is obligated to her for the rest of his life. No wonder they so commonly outbreed us.

72/ Under the law, it shall not affect any divorce settlement if one spouse is having sex with other people. Adultery shall neither be a crime, nor a consideration in any matter of the court system, except when it is relevant to acts that are genuinely crimes. All we have to do is look at the Islamic world to see how we definitely do not want adultery to be the domain of government in any way.

73/ In family court, all claims of physical abuse must be documented before the divorce begins, and less than 10 days after the event, or the evidence shall be inadmissible.

74/ Neither the courts, nor the police shall involve themselves with using the power of government for words-only emotional abuse.

75/ Wedding rings are no longer supposed to be made of gold or platinum, or contain any gemstones, and especially no diamonds.

76/ All couples shall choose their marriage contract and prenuptial financial agreements.

77/ All things revealed in family court shall be considered confidential.

78/ All couples that pool money shall have two individual and one joint bank account, making least three accounts. To spend the joint account both people must authorize the transaction. All wages must be paid to the individual accounts and all community property must come from the individual accounts.

NR'117. BREEDING RIGHTS

1/ Whenever women have a conforming number of children, they shall have the right to have those children without any male mutually agreed to. This includes Senators and Ubiqs that makes their sperm available. And the women shall be free to have these children with or without a life partner if they want.

2/ Even if a woman is married, the husband does not own the wife's reproductive choices. Even if a woman is married, she may have children by anyone she chooses. All adults able to breed shall have the inalienable right to breed with whoever they mutually agree to breed with regardless of any prior agreements made.

3/ There is no right to abduct women, or lock a wife or girlfriend up. How barbaric these cultures are. What about the female's rights? of course the female has the right to couple and breed with whoever she wants to do this with.

4/ All the regions that still deprive females of their right to breed with whoever they want, all these this must stop doing this immediately, or you will go to the end of the Exhodos line. And you must stop mutilating girls for the same reason. No free lands want this sort of person in their land. You are wrong, and you must change or you will be sent to some backwater Solo-man Islands, like where all the hate-Arabs will have to go.

5/ Society shall help all women to choose the best sire they can find for their offspring, without being corrupted by the hard realities of financial support. Society shall always pay enough to cover the cost of raising children, provided the mother has a conforming number of children for her education test level.

6/ No person who has donated sperm or ova to a registered bank shall ever be compelled or required to make any payments, or communicate, or do anything else for their genetic offspring. To do otherwise is to discourage our best from donating, and we definitely do not want to do that.

7/ Sperm and ova donors shall have the unlimited right to chose the degree of contact they will accept from their genetic progeny. Those accepting a sperm or ova donation and raising the child shall have the right to chose the degree of contact they will accept between their children and their sperm donors until the children reach age 13, or is finished with school. Finally, the child shall also have the right to limit the degree of contact they will accept with their genetic parent. Unless all parties wants contact, there shall be no contact. The only exception is with the offspring of Senators and Ubiq donors.

8/ Sperm and ova donors shall never be held financially responsible for supporting their donated offspring. This shall be paid by society instead. No sperm or ova donor's name shall go on a birth certificate unless all parental parties agree to do so. Children born of donated sperm and ova have no automatic inheritance rights under the law with regard to their genetic donor parents. These may however be granted later by recorded will. Most sired children will be age 13 before their are allowed to meet their donor parents.

9/ When parents sign birth certificates and other birth documents for their children, this shall not convey any benefits or financial rights to any third parties, including all

religions and the national government. There shall be no lending or hypothecation based on birth certificates, and all existing bonds and loans associated with birth certificates shall be entirely void. This monetizing of birth certificates shall be though a thing down the slippery slope of slavery rather than free men. No birth certificate shall reduce anyone's rights in any way, or transfer any rights in any way. From now, on no birth certificate shall have any hand print or foot print on it or footprint. All of these old ways shall be thought the way of symbolic slavery at birth.

10/ Government shall do nothing to discourage its best people from having more offspring than the rest. It is one of the most important parts of this Constitution that those people who have donated their sperm or ova never suffer any cost or obligation for having done so.

11/ Those married or partnered to a women when she gives birth to a sperm/ ova donor child shall be permitted to be the child's official father if the mother also agrees.

12/ Where human ova are sold or donated, the woman who bears them to life from her womb shall be the legal mother in every way, and shall have exclusive rights under the law. Where a woman is paid to bear the ova of another women or those owned by a man, the side paying shall be the legal parent in every way, and shall have exclusive rights under the law.

13/ Reasonable contracts for birthing surrogates and ova donation shall not only be valid, but government shall enforce them free of charge.

14/ There shall be mandatory visits to doctors and other pre-natal healthcare people for all birthing surrogates and sire mothers according to the Senate's schedule. There shall also be free final month clinics near hospitals for pregnant women who want to stay in a facility for the last month. There shall be steep reductions in public money for women who don't follow the required schedule.

15/ All birthing surrogates and sire mothers must follow the doctor's orders. If the doctor orders that they must remain lying down except to go to the toilet, then they must go to stay in a service apartment and live under video monitoring. Again, steep reductions in surrogacy money will apply for women who don't follow the doctor's instructions. And this shall be enforced by the system, not the genetic parents.

16/ Paid birthing surrogates get:

20% of the money for births after the end of week-30.

40% of the money for births after the end of week-32.

60% of the money for births after the end of week-34.

80% of the money for births after the end of week-36.

92% of the money for births after the end of week-38. and

100% of the money for births after the end of week-40.

17/ All birthing surrogates and sire mothers must give up their alcohol, tobacco and drug licenses in advance. All must pass a drug test before pregnancy, during pregnancy, and after birth. This shall include second-hand levels of tobacco and second-hand levels of marijuana as well as common drugs that are off limits to pregnant women. Again, steep automatic penalties in the surrogacy payments.

18/ Government shall not tax monies paid for birthing surrogacy, ova donation, or sperm donation. Government

shall aid ova and sperm donors by verifying and, guaranteeing their Senate, Ubiq, and other status, as well as their education, health and other data. Government shall also provide escrow services and impartial, rapid adjudication of birthing surrogate monies for no charge.

19/ With regard to child bearing limits, and pregnancy birthing surrogates, the child belongs to the genetic mother, and the birthing surrogate is not counted as having had a child.

20/ All reproductive clinics shall be regularly audited and tested by government in many ways both financial and having to do with sperm/egg fraud. The intentional substitution of sperm or ova by fertility clinic staff shall be considered rape. The standards for female surrogate material donors shall be different for men and women because human leadership wisdom tends to come after the time that it is optimal to harvest human ova. Therefore, the Senate shall conduct testing to find the smartest ova donors by means in addition to Senate service.

21/ The Senate shall offer all necessary services at no charge when women who want to auction off their eggs, Also, these payments by others for human eggs shall be free of all taxes and fees for both the women selling/donating their eggs and the people using these eggs to make new humans. All escrow payments for eggs and sperm shall occur upon the birth of an apparently healthy child.

22/ The Senate should work hard to make it a thing among young women, that the smartest are always invited and paid to donate their eggs for implantation in surrogates to be raised as Senate-surrogates. This is so that there are enough good eggs to meet demand. If there are not enough confirmed Senators that are female and of breeding age willing to donate eggs for Senate surrogacy, the various Centi-Nomes shall elect other women for egg harvesting. These women need not live in that Centi-Nome. They shall be chosen primarily for their intellect. When these women agree to undergo harvesting, they shall be listed on the national sperm and ova donor supply database together with any photos, videos and data they care to supply. If there is sufficient demand for all their eggs, then government shall harvest their eggs.

23/ Government should not be balancing supply with demand here with egg donors, but instead it should have around twice as many egg donors as are needed to meet demand. Once a woman is both chosen by the Senate and say 280 surrogate women (28 days times 10 eggs) then she begins the egg harvesting process.

24/ When a donor's eggs are harvested, they shall be fertilized by the male of the surrogate's choice, or the choice of those contracting with her prior to implantation.

25/ To assure enough high quality Surrogate eggs, the Senate may offer over a year's wages per child born of eggs donated to the Senate. Women shall also be allowed up to 8-weeks unpaid leave from their work or studies. The Senate shall compensate women generously for their eggs when the Senate asks for their donation. This is because public egg donation should always be an honor and great thing, so most women do it when asked. Also surely it is worth the cost.

26/ Government shall generously award Ubiq status to anyone who makes even the slightest improvement in making in vitro fertilization safer, more productive, easier, faster,

cheaper, or more comfortable.

27/ We shall try to find a way to increase the number of eggs a woman can provide from egg harvesting. Therefore, great resources should be expended (if necessary) in understanding how to induce super-ovulation in humans.

28/ Government shall not prohibit or discourage the use of either IVF or IUI fertilization. All doctors, nurses, and specially trained IUI techs shall be considered qualified to perform IUI and use Clomid. For IUI, the use of hormones and the washing of the sperm shall be at the option of the patient. Those who legally provide IVF and IUI services or sperm shall:

a/ Have no liability for malformed babies, or pregnancy complications, or birth defects that have to do with fertilization. There shall be no right to seek court damages from these service providers. There shall also be no insurance for IVF or IUI providers.

b/ Be required to tentatively report all IVF and IUI treatments to the county recorder system in advance of the sperm donation. Once this is reported the biological father shall always be considered a donor with no liability or obligation to the recipient mother, or the child. This shall be so even if the father later has a sexual relationship with the mother.

c/ Have the option to avoid all future contact and support obligations.

d/ Have the right provide their serviced free of healthcare taxation.

x/ Where there is Sireage, or birth surrogacy involved, there shall be no charge for healthy fertile women under age 38 who either get their eggs collected, or go for implantation screening and implantation.

29/ Society shall help its smartest people, and greatest contributors to have many offspring per individual. However, in the interest of genetic diversity, there should generally be breeding caps and a maximum number of offspring, except in the case of the most outstanding intellects and contributors. Therefore to start, we shall have a limit of 500 offspring per Senator, except for the most outstanding 100 worldwide, which may have up to 5,000 offspring each. Also, the most outstanding 10-people worldwide who repeatedly develop new things and new ideas and who change the minds of many may have up to 50,000 offspring each.

30/ IVF shall be provided by government free of charge for woman age 37 and under who:

a/ Want to have sire children by Senators and Ubiqs.

b/ Women who are tertiary school graduates.

c/ Women drafted by the Senate to have children because of some talent, ability, or relation to a remarkable parent or sibling.

31/ To start, it shall be official policy for government to provide egg/ova harvesting free of charge (without any limit to the number of harvest cycles) to woman who are:

a/ Senators or Ubiqs and age 16 to 38.

b/ Drafted by the Senate to have children because of some talent, ability, or are the relation to a remarkable parent or sibling or child, and are age 16 to 38

c/ The most academically progressive 10% of women age 16 to 38. If there are not enough eggs to meet demand, we shall allow the most progressive 12%, 14%, 16%, 18% etc. of women to donate eggs until the egg supply slightly exceeds

demand. There is no sense in not having enough Senate-sired eggs for surrogacy. Where the Senate pays for egg harvesting, it shall get half the eggs immediately. It shall also take possession of all unused eggs 3 years after harvesting.

32/ All Senators and Ubiqs and other men are supposed to donate sperm regularly if requested by the Senate, and all women are supposed to donate eggs if requested by the Senate. This shall not however be required, but it should be considered extremely selfish if you were drafted by the Senate to do your small part. Females drafted to give their eggs shall have the right to later lay claim to their surrogate-born, automatically-adopted genetic-offspring. All they have to do is say they want their child/children back and they can have them. Then they get all the child rearing Senate benefits. They can also send their offspring back to live with their adopted parents.

33/ The county recorder system shall produce many standard adjustable form contracts for all common reproduction and parenting practices in order to make reproduction easier.

34/ Transactions involving the sale of eggs/ova, sperm, stud services, plant seeds, pollen, and other genetic material, human, animal, or plant shall always be tax exempt to encourage good breeding. Transactions involving these genetic materials shall never be subject to any form of taxation including sales tax and or income tax. Also to encourage our best men to have more children, we shall have it that all child support payments under the Senate's reasonable threshold shall not be subject to taxation.

35/ Where the unborn child of a woman is dead or brain dead in the womb, the mother shall always have the right to abort her pregnancy, even at 9 months.

36/ There has never been a patriarchal conspiracy to subjugate women as child bearers. There is only the hard physical reality that women who don't use their 20-year window wisely die out and the only ones that remain are the women that have children.

37/ The hard reality of mammalian breeding is that the males generally pester the females into having sex and babies. And maybe 90-98% of children are born from male initiated sex. So Government should probably focus some of its energies and inducements to have more children on men that women when it is trying to increase populations. And all of these father's inducements should certainly include all the free or nearly free ways that society can give status and recognition to men for getting women to have children. And this must include all the status that can be rustled up around all the pats on the back we can muster. And the dads going along are always free at all local kids activities. And we must also make some sort of at least token payment to the men who father children, who induce women into sex and children and being the primary parent. These we will give 1/2-day's wages per teneth. This shall be the initial amount for all fathers. We may change this, but this shall be the initial transfer payment. 1/72 of our nation's entire GDP will be taxed and given to our nation's fathers for reproducing, to partly offset the time they must spend on parenting. Fathers also get free entry to kid oriented things when they are with kids. They may also get certain tax breaks. This combined with socialized child care costs and a total freedom from paternity payment risk, will make nearly all men willing to have artificial insemination

offspring any time they are asked, even if the women is particularly unattractive. And again, all the people with conforming numbers of children, all get enough to pay for the child, and they get standard children's healthcare paid by government. So kids are supposed to cost nothing, and dads are supposed to get ~\$40 10x per year, per child.

38/ Children from the same donated mother or father shall be allowed to meet their genetic siblings once they turn age 11. They can meet their egg donor mothers at age 13, and their sperm donor fathers at age 14.

39/ Orphanages should have counselors like camp counselors, and they should be more involved in substituting for the structure of parents, and keeping the kids busy.

40/ We shall aim for a situation and mindset where the the best women all feel obligated to donate their eggs to the Senate. That this is a great opportunity for them and their line if they are specifically called upon to do this by the Senate. This needs to be a thing if we are going to get enough of the best eggs for implantation.

NR'118. GOVERNMENT CHILD BENEFITS

1/ Everyone knows that people must provide for their offspring. So we shall not allow our new democracy to do anything so obviously foolish as to scrimp on child benefits. The care and education of the next generation shall get all the resources that are needed.

2/ Where do we set the payment to mothers? To start, we want women to be saying to each other "if you're an average woman, and an average mother, having a child will cost you nothing". It is society's goal to remove money from the decision where women have children. If we want fewer babies, then we lower the overall child support level. If we want more babies, then we increase the overall support level.

3/ Except for those groups discouraged from having children as stated herein, government shall give child benefits to all citizen mothers (including immigrant citizens) sufficient to cover the normal cost of raising a conforming number of children. This shall include education, standard Tier-1 healthcare for children, food, clothing, and housing until the child either finishes, or is pushed out of the education system.

4/ No matter how bad the crisis, no matter what happens to the father, government shall assure that the children of the new generation will be fed, housed, clothed and treated. No woman should ever need to worry about this for her conforming children.

5/ Senate child support payments are guaranteed to come on time every time. Government shall attempt to enforce private child support rules, but it shall not indemnify mothers for those that refuse to pay in a world where people can't be jailed for owing money to others.

6/ Government child benefits shall not consider the income or wealth of the parents, or the cost of living in various communities.

7/ All women shall get government child support if the number of their children conforms. Government shall not discriminate on the basis of who the father is or whether the father is even known. Indeed, the application for government support of a conforming number of children shall not even ask who the father is, or the mothers income. Father's identity shall only

be asked if the woman is claiming eligibility for sireage benefits.

8/ To start, government child support shall be the following percentages of the average full-time wage based on the number and status of the children. The Over-Senate may adjust these percentages at any time for children conceived after that point in time:

1-child by any father—15%

1-child by a Senate sire—20%

1-child as a Senate surrogate child—25%

2-children if one is Senate sired—25%

2-children if both are Senate sired—30%

2 children if one is a Senate surrogate—30%

2-children if one is Senate sired & one a Senate surrogate child—35%

2-children if both are Senate surrogate children—40%

3-children if all are Senate surrogate children—50%

9/ All students over age 10 may stay in the government's student dorms full time provided they behave and make acceptable school progress. In some places and among some parts of society, it may be normal for students over age 16 to stay in the government's student dorms for most of the year.

10/ As long as children make acceptable learning progress, government shall provide all with student dorms, free schooling, and food. The system shall be designed so that at least 25% of each year can make acceptable test progress and enter tertiary school or skilled trade school.

11/ The Over-Senate may elect with a 2-to-1 overmajority to change the amounts, conditions, or categories in this rule 93 on child benefits. The Over-Senate may also elect to pay higher benefits to mothers who score higher on certain objective qualification tests regarding range of knowledge and/or problem solving skills.

12/ The child benefits stated herein shall only apply to children conceived after the date this Constitution comes into effect, and to existing mothers with a conforming number of children that sign their children up for the new child benefits programs. All existing child support responsibilities shall remain in full force until our nation switches over to the new system entirely. Thereafter, the Over-Senate shall decide on a formula for phasing out the old child support system.

13/ It shall be a felony to hide child or make up a child for the purposes of defrauding the child benefits system. A bounty shall be paid to those reporting child benefits fraud by either having undocumented children, or in other ways.

14/ All recipients of government benefits, both the adults and the children shall be required to identify themselves with fingerprint and talk to the camera statements as well as other scans.

15/ There shall be no right to privacy with regard to the identities of people collecting government benefits, including public child support, and all names and addresses shall be displayed on the government website.

16/ Mothers that are graduates of Senate approved colleges may have up to 4-children by any man and receive government child support for all four.

17/ Grown children that don't have Senate or Ubiq parentage shall not be required to pay any portion of their income to their mother. Grown children that are Senate surrogate

children shall be required to give 10% of their income to their birthing surrogate mother from age 27. Children that are sired by a Senator or Ubiq shall be required to give 6% of their income to their mother from age 32.

18/ Women that have children contrary to government rules and still need aid may stay in Mother's dorms:

a/ They shall share a single large bed with all their children.

b/ They shall share a room with 2 to 4 other women and their children.

c/ Each room shall share bathroom and kitchen facilities with 3 similar rooms.

d/ They shall only get ingredient stamps to buy food.

e/ They shall be disqualified from all forms of drug, alcohol, tobacco and prostitution license.

f/ These dorms shall be located in peripheral and inconvenient locations.

g/ No males age 12 and over shall be allowed inside the Mother's dorms.

h/ All children age 12 must instead stay in school dorms.

i/ Women shall be free to move out any time they wish.

j/ Unsterilized women with a non-conforming number of children shall only be allowed to stay in mother's dorms for one month in their lifetime. After this, if they want the free housing, they must get sterilized.

19/ Society shall not do anything to interfere with the connection between having children and late life care of the parents. It is wrong for society to spend its healthcare budget on the sort of care that could be provided by children, had the person had children that remain loyal.

20/ So long as there are many more people looking to adopt children than there are children to adopt, we shall charge an adoption tax, and pass the money on to the females who give their monitored and properly gestated children up for adoption. So in addition to whatever enticements the market brings to females that bear children, we will also take the one time adoption payment that is coming from the adopting parents and passing 100% of this on to the women giving up their own babies, or having surrogates, or sires. Also, we imagine the adoption payments being 2X as much for sires, and 3X as much for surrogates.

21/ No citizenship rights shall occur where foreigners pay our people to bear to their children as surrogates. However where two of our citizens pay foreigners to bear their children, and this is genetically verified, the children shall be considered as citizens from birth.

22/ The Senate shall have a system for sending photos and videos of egg donor children back to the egg donor for her to see here offspring. It is thought that this will increase the availability of eggs.

23/ We shall give our single parents the option of living overseas without any reduction in the amount of money they receive for their children. Some will live in Japan, some in India, some in Europe, some in Africa, but none may live in a Islamic area, or a Islamic enclave in a non-Islamic nation.

NR'119. NON-GOVERNMENT CHILD BENEFITS

1/ This section on non-Government child benefits shall not apply to pre-existing children and to children of people born

later under marriage or parenting agreements that state a higher amount for child support than the standard amount.
2/ We are instituting a standard amount, a standard dollar amount of child support per child in our nation. This rate might vary with the age of the child. It might also vary with the cost of housing in that part of the nation. But the amount should have nothing to do with the income of either parent. And this should be enough to cover the cost of a child for the average parent.

3/ For all future payments and all continuations of existing payments, parents may call for a higher child support amounts. However, these payments must be expressed as a multiplier over Government's standard payment. All marriages and support agreements must contain a child support component.

4/ The Over-Senate shall adjust the standard child support amount from time to time.

5/ When our women have children with people from other nations, or other parts of their nation, they shall get no more or less money.

6/ The supporting parent shall always have the right to look at the finances of the custodial parent. As long as they are paying, they can look to see how it is being spent.

7/ There shall be no lawyers permitted in matters of family law, including child support and custody. If the parties are too young or otherwise incompetent to represent themselves, then surrogates shall be used.

8/ Men may be required to pay a larger share of their income and wealth than women in taxes.

9/ Government shall maintain a database of where all the children in the nation live and what vehicles they are associated with. Government shall also have a report-a-kid app where people report children of an approximate age and gender associated either with an address, or a vehicle license plate or a person at a location. They can also report a child missing from an address. If the address or license plate number doesn't match with a known child, then police are dispatched to verify.

10/ All schools and play grounds shall have fences with sequential doors at the entry/exit points. To leave, the children between the doors must have come in with the others with them. Also, our playgrounds shall also have recorder cams with face recognition tech. This is to keep children from either wandering off on their own, or being taken from the playground by other adults. All urban playgrounds shall also have multiple video cameras.

11/ Playground equipment shall be seen as one of the most efficient uses of public education money.

Thus we shall spend liberally on recorder-video supervised playground equipment and face recognition tech and other security devices for our playgrounds in addition to spending on micro-play architecture. Separate 4.5m swings shall be provided for the brain stimulation of adults and children age 7 and up. Children over age 6 may not use the toddler equipment.

12/ In times of disaster and government breakdown, all men shall be thought responsible for providing food for their children.

13/ Where women have babies under agreements, nothing that is not in the agreement shall ever be applied to the male.

It shall be thought that society has fully taken over the role of providing for children as an inducement for people to have more children. Therefore, no male shall ever have any obligation to financially support his offspring.

NR'120. CHILD CUSTODY

1/ Except where a parent has been convicted of domestic violence, the custodial parent shall not have the right to change their city of residence without obtaining permission from the supporting parent. It shall be a felony for parents to move to different cities without notifying either the other parent or the court if the other parent has a restraining order out on them.

2/ In custody disputes between sober, responsible mothers and everyone else, particularly for children under age 4, the mothers always, automatically get un-interrupted primary custody of the children. But all single mothers should be allowed to spend 1 day in 3 socializing, looking for a new man, without anyone being able to say that they abandoned their children to baby sitters. After 100 weeks of this in a mother's life, then it is supposed to shrink to 1 day in 5. socializing on average. Also, let it be that a parent's wealth and chastity, or lack thereof, shall never have any bearing on anyone's fitness to raise their own children. However, where the mother is dysfunctional, or she has a substance abuse problem, or a very active dating lifestyle, this may be considered as reason for giving primary custody to the father.

3/ Normally custody shall be 5/7ths of days each teneth for the non-felon, non-surrogate mother, non-substance abuse, non-sexy lifestyle, and 2/7ths for the non-felon, non-homosexual, non-abusive genetic father. However, where the father has felony convictions, or is bisexual or homosexual, there shall be no automatic father custody for his children. Unless there is clear evidence of abuse or neglect of children, or the parent is convicted/ or awaiting trial for a felony, no parent shall be deprived of the ability to meet with their children at least 20 time per year. Also, no psychiatric, psychological, or psychological testimony of any sort shall be valid in any sort of court, including family court. No divorce shall cost more than 60 day's wages for both sides (30-days each). Divorces shall not be allowed to bankrupt solvent parents, but are instead supposed to be a fair division of existing assets, rights, and obligations with each side left with equal means of support. This shall not be thought a thing that needs lengthy court proceedings, and such proceedings shall be thought a thing created by the corrupt legal industry to increase profits. Where one parent in a divorce has a high-level Mafia drug license (but not including tobacco or marijuana), and the other does not, the parent with the drug problem may be required to meet their children at a supervised community center. The same shall apply in matters of violent or unstable parents. The answer to custody matters and visitations from irresponsible fathers is more a matter of having supervisory community spaces, like the after-school child care system, and part of the township food court.

4/ All minors under age 18 must be residence and location declared to government. There is no right to be a minor under age 18 and living underground or without a fixed address

unless they are location tracked. Also, multiple addresses are acceptable.

5/ Government shall have a complete list of which addresses are supposed to have children and which are not. All of the 100 closest neighboring addresses may access this information. Every time there is a change, an email gets sent out by the system to all neighbors in that building, or on that block, or down the road as applicable. This system shall only keep and display the ages each address. Not even the sex gets reported, only the age.

6/ When one genetic parent seizes a child that is in the custody of the other genetic parent, and there is no conviction for abuse, and the abducting parent notifies the other parent that they have the child, the applicable crime shall be called "Custody abduction". This shall be a completely different crime from kidnapping. The work camp sentence for custody abduction shall generally be twice the duration of the custody abduction.

7/ Where a woman's males past/present/future get in a fight or a scuffle over anything, the penalties shall be doubled. Where the illegal use of firearms is involved, including illegal brandishing, the penalties shall be tripled. We don't want fighting, but we definitely don't want firearms here. We shall also eliminate all mentions of this sort of conflict from the media.

8/ We want to encourage step-parents to adopt the children of their spouses.

9/ Making parents partly responsible for the crimes of their children shall be seen as something that was purposely fostered by Ishtar and Islam to discourage good infidels from having children. Citizens shall not be punished for the crimes of their children, spouse, siblings, parents, or friends unless they were in some way involved with the crime. Even if the family members got texts, or emails, or saw vague plans and failed to report their family member they shall not be punished. However, parents may be held partly responsible for improperly locked-up firearms used by children. They may also be responsible if it can be shown that they wound-up and drove their child to shoot someone.

10/ Child protective services or CPS shall be a branch of the police. However, no CPS worker shall have any power to arrest or take a child into custody without both a uniform police officer present and a court order obtained by presenting video evidence. Also, CPS must satisfy the normal rules of criminal evidence to take action. All CPS workers must wear a police cam when talking to others on the job (including other CPS officers and police).

11/ Regarding Senate jury access, CPS removals get prioritized ahead of all non-emergency rulings. Emergency The national Senate shall offer a nationwide night jury service for emergency rulings in the wee hours.

All CPS removed children age 14 and younger must stay in police custody for 72 hours before being placed. These must be cared for by female police officers with child worker licenses.

12/ Without a court order, Children shall not be separated from their parents except in in the case of a clear and obvious emergency, and then they shall only be held onsite until a court order from the relevant Senate jury can be obtained

based on the video evidence of the CPS worker.

13/ All CPS workers must have a child worker license. The areas we shall be most fastidious about people having child worker licenses shall be:

a/ CPS workers, head and shoulders the most important.

b/ School discipline people.

c/ Child-oriented healthcare workers.

d/ Orphanage staff and foster care people.

e/ Juvenal jail workers.

f/ Physical education people, particularly where the work near young people showering or undressing.

g/ Any position of authority or power over the lives of other people's children. Either real power, or power that is commonly claimed or faked.

14/ Every person that works with other people's children must have a background-checked child worker license. No person with a child worker license shall have a license for drugs, tobacco, or a high use alcohol. None shall have ever had a hard drug license, and especially not meth amphetamine or opiate license. None shall have been a homosexual or hypersexual, or a person with hypersexual children of their own.

15/ All CPS facilities, schools, playgrounds, orphanages, and foster care homes shall be video monitored by the county recorder system.

16/ No males or hyper-sexual females shall work for CPS. All foster homes/parents shall be married and have at least two children of their own living with them.

17/ All CPS workers, social workers, teachers of minors and other child-related occupations shall be tracked for complaints and rated. The stand-out problem people shall be investigated and perhaps lose their child-worker license.

18/ When educators and school staff call CPS in a clearly retaliatory way, or for no good reason, this shall be a serious crime, that when proven, shall disqualify the person from every having a child worker license ever again. It may also subject theme to criminal prosecution for criminal abuse of power where the harassment is proven in court

19/ It can be considered child abuse when parents bring up their children as someone of the opposite sex, or they do not discourage them from being a homosexual.

20/ It shall not be allowed for CPS or government people to remove children from their birth parents for any amount of marijuana use or for people who drink less than 12 standard alcohol portions daily per 100kg of weight. Also merely testing positive for drugs shall not be any grounds for removal. However, further drug testing shall be required, and if the person repeatedly tests positive, this can be grounds for removal. Soundly sleeping, and sleeping during the day at home, or in a temporary rental shall also not be grounds for removal, even where alcohol and sex are involved. Falling asleep at the beach and failing to supervise your children shall also not be grounds for taking anyone's children away, although it may be grounds for issuance of a fine. Again, there shall be no emergency child removals where a parent merely tests positive for drug use. And this especially includes all babies at birth.

21/ Where parents merely test positive for drugs, this shall not be grounds for removal of a child from their parents custody. This is not an emergency, and it must be decided by

the courts (using Sub-Senate random juries) and not the unelected CPS staff. If there is an emergency, then a Senate jury shall hear the case fast to decide if the removal of the child is warranted.

22/ All of the old policies where CPS got the right to remove more and more children shall be regarded as created by Ishtar so it has more child victims and more under-my-thumb child victimizing sex criminals: more traitorous foreign agents in our government and society. CPS must be run rationally and sensibly or it will be a center for foreign spies exerting power over our nation using pedophile frontmen in positions of power.

23/ Emergency child removal by government is only for extreme and obvious cases of neglect or abuse. Also the courts shall always be decidedly biased towards leaving the children with their parents over putting them in foster care with strangers, unless the child insistently demands to get out of their proven abusive family situation.

24/ Where people are definitely harming their children, by either not feeding them, or excessively beating them, or molesting them, or allowing them to be beaten or molested, this can be a CPS emergency. But there shall never be any sort of emergency for skinny finicky children that don't want to eat with the rest of the family, or they will not prepare and eat the ample food in the family kitchen if they are old enough. It shall be thought impossible to remove skinny kids in an emergency.

25/ CPS and police shall have nothing to do with older boys that get beaten on their backsides by the leather belts of their parents, so long as there is no blood spilled. CPS shall have nothing to do with forcing parents to get medical care for their children.

26/ There shall also be no extra punishment or secondary crimes for people who endanger their family by driving a little intoxicated, and these gotcha laws were probably mostly from the side that did the child trafficking to under-their-thumb pedophile frontmen.

27/ There shall be an option for the recorder system's child custody management system. If a single mom gets arrested, her kids automatically go with who she chooses, be it grandma, or other family people, or her friends and not into the foster care system, our last resort. All non emergency child removals by CPS must be approved by a Senate family court. No emergency child removal by CPS shall be for longer than 72 hours. If CPS cannot get approval from the court system in 72 hours, then they must return the child.

28/ Mere alcohol use in itself shall not be justification for removal of a child. There must be violence, or the parent must be passing out regularly from being drunk, leaving the child unsupervised

29/ Now that we have ubiquitous video, we shall say that all removals of minors, and all isolations of family members must involve video-calling the court system to show evidence and a court-issued temporary removal order must be obtained in order to have a removal. Except for this circumstance, and where all of the minors care-taking people are arrested for a felony, there shall never be any right of either government, schools, healthcare or others to separate children from parents. This shall also include old people and their care-taking children. Where there is clear physical evidence of

abuse, the courts will find it easy to act. Also, to be clear, this right to not to be separated from one's family members shall be considered inalienable under the law, and no agreement or contract to waive this right shall be valid. Illegally taking people's children away and separating families without reasonable cause, or a court order shall be a per count crime for CPS, police and other government officials.

30/ The system must default to leaving the children alone rather than taking them away unless the children request removal.

31/ There shall be no child removals without both a court order and police present. Anyone attempting to remove a child without both a court order and verified police present may be considered a kidnapper and shot in self-defense. There shall also be an inalienable right of people to retrieve their children, elder parents, and other family members from any school, any medical facility, any cult at any time on any day but not during lights out at overnight facilities.

32/ In matters of child custody, the courts shall discriminate against parents with: felony convictions, substance-abuse problems, mental health problems, gambling problems, child abuse problems, child neglect problems, and parents unable able to maintain control of their emotions in court.

33/ We shall lean towards firing everyone in CPS nationwide and starting over with new people, these are mostly video interviewers and editors for a Senate jury, which will now issue instructions to CPS workers and police about their decisions.

34/ CPS cannot remove the child as long as one parent is fit, or there's a grandparent, or cousin, or a neighbor, that parent wishes to keep the child.

35/ CPS shall not have any jurisdiction to get involved with the delivery of any medical treatment to any child. This includes all drugs, all hormones, and all vaccines to children. CPS shall have nothing to do with children who refuse treatments, as well as parents who refuse to give medical treatments to their children.

36/ The worst CPS staff shall be thought to be the ones that are too aggressive with removing children from their families. CPS staff shall have a mandate to stay on the low side. They must exert power on the low side, and when they exert power on the high side, they should be rapidly fired.

37/ All existing CPS people shall be investigated for child sex crimes, particularly those that are homosexuals, or perversion flag affiliated, and all the particularly aggressive child removers.

38/ All facilities for other people's children shall be video-audio monitored, including all: schools, daycare centers, orphanages, foster care, homes, CPS, and medical offices that provide pediatric care.

39/ Our nation shall shut down it's foster care system and instead institute a system where kids are kept in big brother orphanages adjacent to our schools, along with kids that are not orphans. The foster care system whatever its merits is more conducive to adult care-givers molesting the children in care because of its scale. It is better that we use orphanages with multiple adult females, with a portion on constant rotation and some of these Sub-Senators. There shall also be host families that supervise between 10 and 30 kids for each couple plus various female helpers

40/ Where children are suffering from obvious physical injuries, or involuntary malnutrition, CPS shall not require any special permissions to move them to a safe place. However, when there are no physical injuries, a court order shall be required to remove the child. Also, this court order must be by a randomly assigned Senate jury.

41/ All people who work with kids shall use special edu video monitoring devices that use a video and audio search engine to flag kid-workers if they cross some behavioral line. Also it shall be thought a good place for Big Brother, in this zone where kid-friendly adults interact with everyone's kids.

42/ CPS emergency removals shall be exclusively about beatings, sexual abuse, and involuntary malnutrition from lack of food to eat. Other than this, CPS shall not have any power to remove kids from their parents without a court order.

43/ The complex decisions of the healthcare system shall be thought completely outside the abilities of most CPS people. Therefore, they shall not get involved in matters where parents disagree with healthcare providers. Under these circumstances the CPS people shall not get involved until the Senate passes legislation specifically instructing them to get involved under specific circumstances that are allowed by this constitution, and by the Senate.

44/ Only the courts shall have jurisdiction to require that children receive necessary medical treatment. However, each case must be tried separately and the courts must always act with moderation. CPS shall have no jurisdiction in matters where parents refuse treatment for their children or their parents refuse medical treatment. CPS shall have no jurisdiction in matters of healthcare, or with making sure children see a doctor, or they get treatments, or take their medications, or that they attend school, or that they behave well while at school, or in matters related to the gender preferences of children. CPS shall only deal with situations where children are:

a/ Not fed enough food, or they are given unsafe food.

b/ Are beaten, sexually abused, or they are living in filthy conditions (not threadbare, old, or ugly conditions.)

x/ Also, there must be a significant and imminent danger for CPS to remove a child. Where CPS people decides to get involved in matters outside their narrow reservation, all people involved shall be promptly fired and excluded from working with children for life.

45/ Just as with the police, CPS shall keep both a public database of convicted child abusers, and a private internal CPS/police database of accusations and non-conviction reports. It shall be illegal for non-CPS, non-Police to discriminate or take any action based on the private CPS database. However, because mere arrest or charges cannot be actionable, nobody shall go on the public CPS registry without a conviction.

46/ The National Government shall have an abuse-of-power, and internal-affairs division that investigates claims of abusive power on the part of government workers.

47/ Except where abuse is clear and obvious, no searches shall be conducted by CPS without a search warrant. Also, no children shall be taken into CPS custody against their will or against their parent's will without a court order, except where there is significant observable physical or sexual harm to the children, or a parent is recorded either in the act of abusing a

child or admitting to the abuse, or the parent has a prior conviction for child abuse, or domestic violence.

48/ The location of where all removed children are held must be told to the parents. Except in sparsely populated areas children taken by CPS must be kept in the same community. All children take by shall be kept living under live recorder video. The people housing the children on behalf of the system cannot be connected in any way to the CPS person taking the children, or homosexuals, or have any domestic violence or other violence convictions. No person may be held on CPS charges for more than 12 hours without court order.

49/ The courts may sentence people to lifetime isolation from children, or 5-years isolation from children. Then these people cannot ever go around children, or enter a family townships, or other family places.

50/ If a parent (a Valeria) couples with a Humbert-Humbert pedophile who sexually molests her children, then the sentencing jury may also require that the Valeria parent notify CPS about all future partners. Then CPS shall more carefully scrutinize these partners.

51/ That we provide a dormitory housing to kids at a young age will doubtless prevent much ongoing abuse. For the kids will be able to move out at a much younger age and move on from their toxic situations. And they will be around others, so they can make a life break, and more easily move on.

52/ Many of the people living in school housing will be the kids who have an unhappy home life, and there will also be hard working star students who are there for the single and double-room housing. Also, part of being a star student that gets a nice apartment will be tutoring classmates for 1/2 hour for each day you are at school. This is intended to cement a bond between the two groups before the normal kids come in at a higher age. Also, the kids being tutored will pick their tutors and these will get a sort of extra credit that is the deciding factor or in about half of all kids that get a 1-man, 2-man, 3-man, 4-man, 6-man, or 12-man apartments instead of the big rooms.

53/ CPS inspectors rotate so that there is a different inspector every time based in the previous reports.

54/ CPS shall run an anonymized child address verification system where people report children at addresses or associated with license plate numbers, or send pictures or video. CPS shall spend roughly half its time following up on abduction and abuse tips. To be perfectly clear, there should be no right to make anonymous. CPS reports, and all CPS reports shall be anonymized. Where people make harassing or conspiratorial CPS reports, this shall be a felony.

55/ Where minors under age 18 are not disclosed to Government and are living at an unregistered address, the police and CPS shall be free to interview these children and their parents and verify identity.

56/ All real and virtual children's IDs shall have the photos and names of their parents/ guardians and trusted people on them. All IDs for parents/ guardians and trusted people shall have pictures and names of their children on them, as well as spouses, and long term domestic partners, trusted and variously authorized relatives and friends under certain standard authorization codes, and people granted access to one's home, vehicle etc.

57/ To reduce the trafficking of children, all children under age 16 that are traveling between counties and airports must be have all parents verify identity with the county recorder system and approve of the child's movement either permanently, or each time the child is taken out of the nation or engages in intercity travel.

58/ We shall start with the assumption that CPS and foster care/adoption system have many protected pedophiles, abusers, and child traffickers. There were far too many under the old system. And the new system will still probably have its share. We still always remain wary with our government care of sex crime victims and for this reason,

59/ Every person currently working for CPS shall be fired within 12-months and then replaced. All the new CPS people must be grandparents drafted by the Senate. All of the people in CPS and the foster care system and the other child workers with rainbow iconography shall be investigated for child sex crimes.

60/ The foster care system shall be based on vouchers with the kids themselves being able to try a few foster homes. The kids, will be able to make a few appointments for collection and re-assignment if they are having problems with their current foster families. And the people providing foster care for more kids will get more money based on how many kids they have. Also, the foster kids will all be pushed over into the school system as early as possible.

61/ As anti-pedophile measures, we shall:

a/ Ban the sexualized depiction of people under age 21 in the media.

b/ Institute reliable means to prevent kids from looking at porn.

c/ Repeatedly explain the uniform age of consent laws to everyone, and the rewards system for reporting violations.

d/ Have sting operations where police lure people into meeting with minors under age 16 for sex or prostitution.

e/ Investigate all judges, politicians, educators, and people in the media who have worked to normalize or decriminalization sex by or with children.

f/ Prohibit all convicted sex criminals from working or going near other people's children, or working or socializing in places with children around.

g/ Ban strange and unwholesome people from working in children's media.

h/ Ban all media from depicting minors under age 21 involved in romantic relations of any sort.

i/ Ban convicted sex criminals from entering breeding communities.

j/ Have death sentences possible for illegal foreigners that rape our women and children. And where they rape 2 or more they certainly get executed.

k/ Have life sentences possible for adults that abduct unrelated children, and those adults who rape children age 11 or younger, as well as adults who sexually touch many minors, and those trafficking children for prostitution, or sale

shall generally at least get locked up for life.

k/ Have it that pedophilia shall never be considered a sexual orientation, or a disorder. It shall always be a crime.

62/ Police shall be free to do parentage checks of all unknown children they encounter in public with adults.

63/ It is very important that we control our borders in both directions, to prevent our people from being abducted internationally.

64/ The parents of children may log into their county recorder system accounts and enter the names of various people authorized to transport and be with their children. Where minors are staying in hotels, the hotels shall check to make sure the adults they are with are their parents, or are authorized to be with the child. Where police have immigration, sobriety and other checkpoints, they shall also check the ID of children they encounter.

65/ Very nice and kind female CPS investigators shall regularly visit all schools, public and private, as well as other children's activities. These shall vaguely explain what is not allowed for grownups and older children to do, and hand out their cards and ask the children for tips.

66/ The purpose of Child protective services is to protect children from sexual abuse, violent abuse, malnutrition, kidnapping, and nothing else. CPS shall have no jurisdiction over:

a/ Matters of violent abuse where there is no physical harm visible, or practically no bruising, bleeding or physical harm visible.

b/ All forms of psychological abuse.

c/ Where the abuse came from people other than the parents such as someone at school or on the street, or a neighbor, or another situation outside of the parents control.

d/ All matters of healthcare decisions (no matter how reasonable or unreasonable), including especially health treatments such as vaccines and newborn treatments.

e/ All matters where some so-called expert(s) recommend something and the parents refuse (no matter how reasonably or unreasonably). This especially includes all expert recommendations for expensive treatments and always questionable mental healthcare treatment.

f/ All matters of kidnapping and children separated from their parents. Police shall not be allowed to refer kidnapped and unaccompanied children to CPS, but must place these directly to a child care facility.

g/ All matters related to education, including especially the educational decisions of the parents (no matter how reasonable or unreasonable) and the directives of teachers and school administrators.

h/ The travel decisions of the parents, both domestic and international.

i/ Parents efforts to keep their children away from others people, including relatives, legally excluded parents, romantic partners of the minor, homosexuals, criminals, rotten friends, and other bad influences (in the parent's sole discretion), except where the parent requests help to keep the unwanted person away.

j/ Non-criminal religious instruction by parents.

k/ Children who misbehave in school.

l/ All common parenting practices, including all common free-range child rearing practices

67/ CPS shall deal only with removals of children. CPS people shall have no involvement with placing those children in care, as this is an incentive for pedophiles to work in CPS, to gain access to the children they remove. A completely different organization run by random Sub-Senators shall place the children, with random Sub-Senator juries running making the decision. While children are removed, it shall be a felony for the CPS worker to ever go and see that child or to communicate with the people housing that child. Also, parents shall have a right to communicate with their children. There is no right of the child protection system to keep parents away from their own children. Even if they're in foster care. Where children have been removed, CPS shall not have the right to stop virtual monitored parent communication with the child unless there is a court order for this due to harm by the parent.

68/ People not qualified to be a teacher shall not be qualified to work in CPS. There shall be triple penalties for Police and CPS who sexually abuse the people they are supposed to protect.

69/ The Senate shall compile lists of activities that constitute the illegal sexualization of children in a variety of locations and contexts so that society can curtail this.

70/ Using the terms transition, trans, non-binary, (and certain other new transexual-related words the Senate may wish to add later) shall now be considered as grooming euphemisms. These words shall no longer be allowed to be used around other people's children. The Adults using them may be charged with the sexual grooming of minors according to new rules that the Senate may now establish.

71/ Parental rights shall generally be cancelled where parents encourage, or aid in the mutilation or attempted mutilation of the genitals or breasts of their minor children, whether this is for a cosmetic gender-identity sex change, or simply to mutilate and eliminate sexual pleasure, as is unfortunately common in North Africa.

72/ Everyone involved with past gender surgeries or gender-change hormone treatments of minors shall have their academic, teaching, medical, and psych qualifications cancelled, and they shall be prohibited from going near unrelated minors for life. The Senate may also charge gender transition people, and FGM witch-doctors with sexual butchery and give them life in prison.

73/ All child support shall require DNA testing. For all matters of child custody and child support payments (present, past and future), all supposed genetic parents and offspring shall be verified by at least 3 independent court obtained DNA/genetic checks. Also, this verification of paternity shall be the first thing that the parties do in the process of determining paternity and paternal obligations. Also, all existing child subjects of child support agreements shall be randomly multi-tested by the courts within 1-year. If the subjects do not supply a sample, the child support shall expire after 1-year. Where the child is unrelated, then the payments must be stopped immediately.

74/ Illegally taking people's children away and separating families without a court order, or reasonable cause shall a per count crime for CPS, police and other government officials.

75/ There shall be no chaining up of kids, or keeping them at home for more than 1-weeks as punishment, without CPS

approval, or in their room for more than 3-days.

76/ This constitution and its legal system recommend, but do not guarantee visitation rights between grandparents and grandchildren. Also, once a child turns 12, they shall be free to meet with their grandparents if they want and their grandparents want, but their parents do not want this. Where neither parents can take care of the child properly, or both parents have high-use drug/alcohol licenses (not including marijuana), or a record of mental illness, child neglect, or family violence convictions, the grand parents may easily petition the court for custody. However, grandparents shall have no rights against parents, unless the parent is proven to be clearly incompetent by the family court system. Also, where parents have custody of children, they may deny grandparents the right to see their grand children more than once per year on average. However when grandparents have custody, the parents shall have the right to see their children once per 3 days.

77/ Where Government establishes visitation rights it shall compel both parents to watch up to 4-hours of orientation videos on the subject of visitation rights.

78/ Where the parents of a child cannot agree on long term decisions, they shall be required to use a random Sub-Senator on duty to cast the deciding third vote. These may also be used to decide on other marital problems and who is right. The fee for this (with neither side talking for more than 5 minutes) shall be 8-hour's wages. This job shall only be open to Sub-Senators with children over age 20.

79/ Where educators or other child workers call CPS on parents, and it is both baseless and retaliatory looking, the parents may demand a court hearing where they charge the educator/child worker with making false charges. The courts shall have a low bar for cancelling child worker license for making false accusations of abuse. Also, with regard to CPS and child removals, the CPS worker only gathers video and plays the video to the Senate jury in charge of police. They make the ultimate child removal decision. They also place the children, and not the CPS people, which now have no real authority without being directed to do something by a Senate jury. They can also go around and investigate on their own.

80/ There shall be Senate supervision of all children living in orphanages, foster care and under CPS care. Only randomly chosen Senators decide on matters of child custody and child placement for CPS and adoption, and they are not supposed to heed any caseworkers.

81/ We shall differentiate between the kids in the foster care system (or its successor system) who are there because of death or parental neglect, and those who are there because of neglectful, sexually abusive, and violent situations.

82/ CPS shall have no power over people who are displaced by natural disasters, mass financial crisis, or bankruptcy. This is not a matter for CPS. The state shall not have any right to separate families because they experienced hardship from a natural or financial disaster.

83/ Pedophiles and child traffickers working in CPS and child protection charities and police and immigration shall be removed from society forever.

84/ All CPS physicians shall be randomly assigned by the Senate.

85/ Hypersexuals and homosexuals shall be prohibited from

working with children in distress.

86/ Where the mother is an alcoholic and drug addict, the father gets custody

87/ All parents and grandparents shall always have the right to see their children and grandchildren when they are in the hospital.

88/ It is not allowed to have children expose themselves in crowded places to urinate as people do in France.

89/ Step parents shall never be required to pay child support or care for a child that is not genetically theirs under any circumstances, even if they married the child's parent, and even if they adopted the child. Otherwise, we have many fewer parents adopting children because they don't want the risk and the liability in the event of a break up. Men who marry a woman who has a child by a prior man, and later divorce them shall not be required to pay anything to the woman or her children, even if they agreed to do this the past, and even if they adopted the child/children. People who are not the genetic parents of a child shall never be forced to pay anything for that child as child support.

90/ People who abandon their offspring and later want to claim them back shall have little to no standing in the courts.

91/ It should be thought impossible, a firing offense, and perhaps a crime, when any part of the police system, healthcare system, education system, or child protection system takes children from their parents without either a court order, or a clearly articulated, genuine, and certain emergency situation.

92/ Orphans are supposed to spend more time at their schools learning than normal kids. They are supposed to have a fuller schedule so they have less time to dwell on being orphans.

93/ The Orphanages, the foster housing, the schools, and the school housing is supposed to be owned by the counties. To reduce cash payments to people for being a foster parent, we will give free housing and public ward food stamps to foster parents. In areas where most meals come from the local food court, there will be meal vouchers for approved child meals ordered from competing regulated food hawkers.

94/ The foster care system shall be regarded as a choice of last resort over any family members or friends of the family with children, or grown children. Even childless couples and single women are thought to be better than the foster care system.

95/ All pacifiers and early baby toys must be FDA approved.

96/ All of the communications between divorced people and estranged co-parents shall be via the recorder system's communication surveillance app. Parents shall also be able to post video evidence that is held confidently by the recorder system for claims of physical abuse, not answering calls and texts, or evidence that one parent is saying bad things about the other parent to the children, or other reasons.

97/ Every child shall be paternity tested by Government. Every person that pays child support shall have the right to paternity testing and immediate release from their paternity obligations if the test shows that the child is not theirs.

98/ Where single parents date, this shall be thought another area where Government does not belong, including the court system and the divorce system. However, where one parent is not dating around and the other parent is dating around,

the parent that is not dating around shall have the option of getting the larger share of days in a 5day/2day custody time. or a 4day/2d custody time if we are using 6-day sweeks.

99/ Except where the child is clearly malnourished or clearly beaten or clearly sexually abused, CPS shall generally have no right to remove children and put them in the foster care system. The following shall never be grounds for emergency removal of children:

a/ Parents wanting to get multiple opinions from other healthcare providers.

b/ Any matter related to any vaccination.

c/ Passive endangerment of children, such as when parents who fall asleep or pass out.

d/ Where children run off and do things without permission, or parental knowledge.

e/ Any matter of any common parenting style.

f/ Where there is a grandparent or aunt or uncle or parent approved friend to take the children.

100/ No matter of emergency child removals shall be rushed. Both the parents and the children shall be given time to get their head around what is happening and to think of ways out of this. No removal by CPS shall occur without police presence.

101/ The following shall never be grounds for removal of children from biological parents:

a/ Unwillingness to get healthcare treatments for the child.

b/ Vaccination status.

b/ School attendance, and compliance with school demands.

c/ Parents that smoke marijuana

d/ Parents with alcohol licenses below a certain Senate described threshold.

e/ Where the parents disapprove of their minor child's homosexuality or hyper-sexuality.

102/ All organizations with rainbow iconography shall be shut down immediately. Especially those having to do with children.

103/ The most dangerous place for children shall be thought to be in government custody in the foster care system. All CPS AND foster care for very very young children must be with older, empty nest grandmothers that have born three of their own children at least. However women who are still nursing are thought to be preferable if they are available.

104/ No court shall deprive any person of the right to see their children because they did not previously spend enough time with them, or for substance abuse, or for prostitution, or for being a hypersexual. However for violent abusive people, the courts shall eagerly deprive these of their right to see their spouses, partners and children upon request by these people.

105/ There shall be a death penalty for CPS people who traffic children or their parents, or that have sex with minors, or they have sex with the parents they lord over.

106/ Where people under age 18 have children, it should generally be thought the right of the grandparents to raise their grandchildren as their own children, if they want to do this.

NR'121. SEX

1/ Government shall be prohibited from squandering its

energies on anything so inconsequential as who grown people choose to have sex with. Government shall make no law restricting the right of grown people, heterosexual or not, married or not, to have sex in private. Everyone shall have the absolute right to have sex with as many people as they want, to be single, to be a single parent, or to have a family, if they so wish, and this shall never have any bearing on their career unless they are working with other people's children. And this should especially go for Senators. Also, it shall not be allowed discriminate against people for having many heterosexual sex partners. Indeed, rockstar Senate status, and lots of women eager for sireage should be thought central to making the Senate work well.

2/ If people contracted in an exclusive marriage wish to dissolve their exclusive marriage based on extra-marital sex, then they shall have the right to do so, but the extra-marital sex itself shall never be either a crime, or a thing subject for government involvement.

3/ The legal system shall neither favor the accused nor the accuser, and this shall be especially so in regards to laws concerning rape and sexual misconduct. Blackstone's ratio must apply to all crimes including sex crimes: "It is better that ten guilty persons escape than...one innocent suffer." For this reason, the burden of proof must always be on the accuser, and charges of sex crimes regarding either females or minors shall be no exception. In fact, there shall be no exceptions at all to the idea that the burden of proof shall always be on the accuser. Also, mere accusations by one person against another without any hard evidence shall never be enough. There must always be some corroborating evidence.

4/ Except for victims of extreme violence, victims abused by a non-peer when they were under 16, those held captive for more than 8-hours, and those who were incapacitated, or unable to contact police, no criminal charges for rape, or sexual assault shall be valid if made more than 5 days after the occurrence or discovery. Also, when victims have not filed official charges of sex crimes for official adjudication within the official time frames, they shall not be taken seriously by either the media or the people. Then, the media must ignore the claims as baseless or risk Senate stigmatization.

5/ The Senate shall establish reasonable penalties for those who bring definitely false charges of either sex crimes, or sexual misconduct.

6/ In order for sexual contact to be considered non-consensual, generally one of the following must apply:

- a/ The accuser was injured, or under threat of injury.
- b/ The accuser was prevented from getting away.
- c/ The accuser was incapacitated or not conscious.
- d/ The accuser was a minor, or not legally competent in another way.
- e/ The accuser was touched in a way that prevented them from expressing disapproval in time to prevent the touching.
- f/ The accused disguised their birth gender with either dressing or surgery. Here, the rights of normal breeding people shall be all important, and the rights of the mentally ill sex freak criminal rapist shall not matter at all.

7/ For all crimes of rape or unwanted sexual contact, the conviction standards shall be significantly higher and the penalties shall be around 90% lower when the non-minor accuser voluntarily did any of the following:

a/ Previously had consensual sex with the accused in the prior month once: (1-year max/misdemeanor. This discounted penalty shall only apply once in the life of the accused).

b/ Previously had consensual sex with the accused in the prior month, more than once : (30-day max/misdemeanor). This discounted penalty shall only apply once in the life of the accused).

c/ Previously had consensual sex with the accused ever (4-years max/misdemeanor). This discounted penalty shall only apply once in the life of the accused.

d/ Sent communications or was recorded or witnessed saying things that state or clearly suggest a willingness for a sexual encounter. (3-years max/misdemeanor.)

e/ Voluntarily went back to someone's place or a hotel room. (3-years max/misdemeanor.) This includes voluntarily going to the doorway of a the place and touching that occurred there. (For the safety of women, it is better that the goodbye occurs on the sidewalk, or at least 20 meters away from the door by custom. It is much harder to quickly drag a woman inside from 20 meters away, without people noticing, than to do this from the door threshold. Also, on the sidewalk it is much easier for women to get help from others. For these reasons, we shall have it that insisting on walking a person to their door on a date shall be a reportable dating infraction because it augurs against dating safety for women.

f/ Voluntarily disrobed to expose their nude breasts or underpants with the accused on a date. (1-year max/ misdemeanor.)

g/ Was wearing an open bottom dress/skirt and/or a garment that ends at the crotch that can be easily pulled aside, when meeting for a date. (2-years max/misdemeanor.)

h/ Voluntarily engaged in prolonged mouth kissing with the accused. (5-years max/misdemeanor.)

i/ Voluntarily touched the private parts of the accused, or allowed themselves to be touched in their private parts by the accused. (6-months max/misdemeanor.)

j/ Voluntarily got intoxicated with the accused, or went with the accused while intoxicated to extreme. (3-months max/ misdemeanor.)

k/ Was a prostitute or porn star either at the time, or before that time. (30-days max/misdemeanor.)

l/ Was a stripper, go-go dancer, nude model, or escort on a date. (30-days max/misdemeanor.)

m/ Had certain types of high intake drug license. (30-days max/misdemeanor.)

n/ Had a high intake alcohol license. (30-days max/ misdemeanor.)

o/ Checked the accused in the STD system. In fact, where there is a recent mutual checking of the STD system, the legal system shall be biased strongly against conviction for charges of unwanted touching and rape. Also, when people conduct a near simultaneous and mutually voluntary check the STD system on one other, the penalty for rape shall be (30-days max/misdemeanor).

x/ Items/conditions a-o above shall frequently disqualify all charges of groping and unwanted touching, particularly when it is brief and quickly withdrawn. These conditions shall also be a strong defense against charges of rape in many cases. Also, all of these conditions shall always be considered pertinent to all charges of rape and unwanted sex. Where

these conditions exist, the sentences must be significantly lower.

8/ As far as one's legal protections for unwanted sex are concerned, it is not enough to simply say "no" once you have started with someone. Those who have willingly engaged in kissing or embracing, or undressing must make a genuine effort to get up and walk away if they want to stop. Also, if one says "stop" or "no" or a similar word and later willingly engage in kissing or holding, or caressing, or nudity, the resumption of sex cancels all previous commands, which must be repeated again if they are to have meaning again. Further, Where people have been voluntarily snogging or hugging, there shall be no right to make charges of unwanted touching until the pursued party makes an effort to get away, or the pursuing party uses force or threat.

9/ Where the accused recently had consensual sex with the accuser, it should be difficult to prove rape unless there is physical harm or some sort of official do not contact statement was filed. Likewise, if an accuser in a sex crime case voluntarily goes to the accused, or voluntarily meets with the accused, or initiates communication with the accused, or engages in lengthy communication with the accused after leaving the crime scene, but before filing charges, it shall be considered consensual sex. This rule shall not apply where contact is unavoidable. However, the accuser must make every attempt to avoid and get away from the accused, or they will lose their right to claim non-consensual sex.

10/ To reduce stalking, indexes shall no longer display people's residential addresses or workplaces unless they change their settings/preferences to display this formation for everyone to see.

11/ All indexes for looking up personal contact account information shall require ID verification and logging of the who is inquiring, even if the person is only requesting contact back.

12/ People over age 16 may use an official government interface to block any particular person from contacting them in either the virtual world, or in the real world or both. It shall be a minor crime to make contact with someone after they have blocked you, unless there is a legitimate and system pre-approved reason for you to contact them. Also, when one person blocks another, this shall be thought confidential information and it shall be a crime to aggregate or charge for this information.

13/ When heterosexual males are not allowed to behave in certain ways towards females they are interested in, homosexual males shall also not be allowed to act in similar ways towards males they are interested in. The rules of unwanted touching and harassment shall be no less strict and the penalties no less enforced for homosexual males touching other males.

14/ Wherever women have traditionally had separate women-only rooms from men, such as toilets, showering and dressing rooms, or they have had traditionally women-only jobs rape counseling, rape reporting, women's shelters, halfway houses, sex education, or gynecology by women: From now on, all of these areas shall be closed to men pretending to be women, and these men shall all be regarded as a form of sex criminal for the trauma they cause to real

women just trying to live their lives. Also, this sort of activity in the past decade, before this constitution came into effect: All this shall be subject to prosecution as a sort of mass sex crime where we had men pretending to be women working or frequenting woman only spaces. Only people born a woman and still a woman may use the woman's facilities. Everyone else shall use the men's facilities. Those born male may only use clearly-marked woman's toilets if accompanied by a woman and age 9 or younger. Everyone else must use the men's toilet, including the female caretakers of the males that are retarded or disabled and over age 9. It shall be a felony for people born male to enter and remain in clearly marked places where females disrobe, or shower, or go to the toilet. Men found lingering in this sort of place, or regularly walking in and out of women only places shall generally be considered under the law as sexual predators waiting for an opportunity to harm a woman. These shall generally get 10-years in a work camp. Where male-to-female transsexuals are found in such areas, they shall generally also get 10-years in a work camp. Where men are waiting in remote, or lockable women-only bathrooms, they shall generally get 20-years in a work camp. Also, all public bathrooms shall be required to have video at the entrance to get a picture of who goes in. And this video shall be monitored by the recorder's AI video monitoring system. Male to female transsexuals shall be thought to be fixated on using female-only places and pronouns because if they use men-only places and male pronouns, it is much harder to fool their "trick" their victims into thinking they are a real female.

15/ Wherever females compete separately from males, all males, all transsexuals, and anyone with any ambiguity or abnormality in their chromosomes, sex organs, or hormone levels shall be prohibited from competing as a women. Also, all women in the top 1% with regard to testosterone levels, or height shall be prohibited from competing with women.

16/ No man shall be allowed to get out of the military draft or a call to arms by dressing as a woman or by having cosmetic sex change surgery and hormone treatments. However, all women who recently taken male hormone treatments shall be subject to the military draft according to their birthday. Transsexuals and open homosexuals shall not be allowed to enlist or serve the military or militia because it is thought that they are enlisting for the wrong reasons, namely to be around attractive men, and not because of a sense of duty. Thus they are thought to be weaker fighters as a result. However, Transsexuals and homosexuals shall be subject to the draft like everyone else, as shall immigrants, and particularly illegal immigrants. In fact immigrants and particularly illegal immigrants may be drafted first and sent in to fight in the most dangerous places. Also, it shall be official policy that high school dropouts, welfare recipients, illegal immigrants, and homosexuals shall be presumed to be weak soldiers and shall normally get point as a result.

17/ When transsexuals and those with any ambiguity in their chromosomes commit assault, or have fist-fights, or engage in other violent activity they shall be regarded as men under the law. This includes female to male transsexuals. In other words, if they are biologically male and strike a woman, they get punished as a man striking a woman would be punished. And if they are a biological female having a fist fight with a

male, they get no benefits for being a female.

18/ Everyone who is imprisoned shall be housed according to their birth gender. There shall be no female staff in male prisons, and no male staff in female prisons. The incarceration system shall make no accommodation for the gender identities or hormone treatments of the incarcerated.

19/ The right of society to know the truth about a person's birth gender shall be considered the most important issue with regard to gender identity. In comparison, personal gender fantasies shall be considered totally irrelevant under the law. Whatever ideas people may have about their sexual identity, it shall not be a thing that government or the business world, or anyone else shall be required to participate in. Furthermore, everyone's prior gender identities and homosexual activity shall be recorded by the STD system, and all authorized potential sex partners shall be able to see this information, because people shall always have the right to know about the truth with regard to their sex history of their life partners and even their sex partners.

20/ Under the law, everyone born a male shall be a male for their entire life, and everyone born a female shall be a female for their entire life.

21/ The main reason why transsexuals are so fixated on changing their identity card gender and their pronouns is that with these changed, it becomes much easier to trick an unsuspecting "trick" into having homosexual sex with them. As we don't want to go in this direction, all public records shall permanently freeze everyone's gender at birth, and all government issued IDs, all school IDs, and all business IDs shall show the person's birth gender.

22/ Neither Government nor any fictional citizen shall make any laws or rules regulating the use the gender pronouns that people use. The pronouns "he" and "she" shall be the only options for the two birth genders. Where the gender is difficult to determine, or there is some ambiguity, the people shall be free to use the neutral pronoun "it" for these individuals. Also, where transsexuals commit crimes they shall be recorded as transsexuals of several sorts. We must have accurate statistics on how much violence is caused by each sort of transsexuals and their hormones and how much surgery they have had. We shall also have statistics on both sorts of homosexuals, bisexuals and how much more likely they are to become sex criminals including child predators.

23/ Our nation has long been a pioneer in truthful labeling and full disclosure. We require truthful labeling for all things that are important and valuable, and all things that might be counterfeited. This is so that people know if they are getting real or fake goods. For this reason, we shall require that all fake women and fake men clearly label themselves as fake women and fake men and never try to pass off as fake women and fake men. Also, it may be considered criminal fraud when third parties, particularly fictional citizens act to conceal a person's true birth gender while they pretend to be of the other gender. This constitution also advises the people to go out of their way and properly re-gender all transsexuals so that they cannot commit homosexual rape by pretending to be of the other gender.

24/ The right of overall society to be free from transgender frauds and homosexual rapists shall prevail over the rights of those few individuals who would pretend to be the other

gender and victimize others. Therefore, all forms of sex-change surgery, and sex-change hormone treatments shall be prohibited except for people reasonably judged by a Senate medical jury as someone born as a genuine hermaphrodite that is in need of surgical disambiguation. It shall be a felony for people to appear in front of thousands of people and pretend to be of the other sex when they are not this. This shall be applied retroactively with no jail time, so the people know, and so these people are excluded forever from working with children, and also prohibited from voting and serving in the Senate. Also, from now on, any dressing up as the opposite sex must be in private, and not in front of children and families.

25/ Existing transsexuals shall be "grandfathered-in". Then increased scarcity will only improve their value in the dating market. However it shall be a felony for new people in the future to either undergo sex change surgery, or take sex change hormones, or puberty blockers. It shall also be a felony to either prescribe or dispense or fund either sex change surgery, or sex change hormones, or puberty blockers. It shall also be considered felony grooming for transsexuals, hypersexuals, or prostitutes to associate in any way with other people's minor children. Transsexuals and hypersexuals shall not be considered a protected group, and all laws regarding special protection of transsexuals shall be void. Furthermore, nobody shall ever be required to humor someone else's sexual identity fantasies. Also, the people shall be allowed to avoid transsexuals, in the same way they avoid people who are mentally ill or ugly. It shall be a felony to use or prescribe puberty blockers, except in the chemical castration of rapists and sex criminals convicted of their crimes and sentence to chemical castration by a court of competent jurisdiction. Also all drug companies that have sold these drugs shall refund 20 times the sales proceeds to the public in punitive damages.

26/ Those who have had both top and bottom cosmetic sex change surgeries may continue to take the fake hormones of their new sex. However, they must pay for these themselves, and all insurance companies and government shall be prohibited from giving any money for the totally frivolous folly of cosmetic surgery on the genitals of people so they can pretend to be of the other sex. No. These people can pay for their own follies.

27/ We shall not allow the world's eternally scarce medical resources to be squandered on anything so trivial, dangerous, futile, ineffective, and mutilating as cosmetic gender surgery or gender hormone therapy in order to pretend to be of the opposite sex.

28/ Transgenderism shall be reclassified back as a mental illness. Transsexuals shall not be allowed to have firearms or other weapons because they are mentally ill, and because of extremely high number of violent acts caused by the sex change hormones and unhappiness of transgender people. Transgender treatments shall be thought by government to be an absolute and total waste of inherently scarce medical and surgical resources. Neither government, nor any insurance company shall pay for any sex hormones, or sex change surgery regardless of the reason. From now on, all sex change surgeries shall be considered genital mutilation, and malpractice for the healthcare people doing them, and

anyone else involved either as a psych or an educator. All involved with the butchery of people because they are transsexual shall be jailed for no less than 10 years.

29/ This constitution does not guarantee the right to be a transsexual, or to be some other sort of hyper-sexual. This is not included in our freedoms because it creates so many problems for other people, and it also infects and screws up the minds of many children. People shall therefore not have the right to raise their children as transsexuals, and this shall be considered child abuse and grounds for removal of the child from its family by CPS or child protective services.

30/ There shall be no special protections for any form of hypersexual or transsexual. These shall be considered groups that we as a society want to discourage rather than to encourage and protect in any way. This is our official policy. We will tolerate them to some extent in certain limited circumstances, but we shall entirely prohibit them in many situations, such as where they are working with other people's children. In general, the people free to discriminate against hypersexuals like transsexuals and extremely sexualized people. It shall be a felony for transgender people to go to bars, dance club, late night venues, and venues where many people are intoxicated, for the assumption shall be that they are prowling for victims to rape.

31/ Men that dress as women to be a sexual predator upon women get triple penalties. Ladyboy transsexuals that dupe or trick, straight men into sex get treated just the same as men that drug women for sex. Also, where victims of transsexual rapists wake up during or immediately after the sexual encounter and beat up their rapist, this shall be considered self defense. However, if they kill the ladyboy, they may be required to spend up to 2-years under lockup. Also, where the ladyboy and the partner use the STD tracking system, this shall not apply. It is thought that this sort of a legal attitude about self-defense with regard to predator ladyboys will mostly end the plague of ladyboy transsexuality.

32/ Those people under the prior system who engaged in the genital mutilation or chemical castration of minors may be tried by the Senate for felony child abuse. This Constitution reiterates that there shall be no ex post facto restrictions or statute of limitations restrictions on those who commit murder and those who have sex with, or harm, or groom, or traffic multiple children for sexual activity.

33/ We shall consider it rape when people use blackmail, extortion, or threat (but not empty promises) to get another person to have sex with them. This shall especially include threats to make nude or sexual imagery of a person public in order to obtain sexual favors. But it shall also especially include threats to tell a person's spouse, or sex partner confidential information in order to obtain sexual favors. We shall also consider it rape when a transsexual dupes a heterosexual person into having homosexual contact with them without their informed consent about the transsexual being either a fake female, or a fake male.

34/ It shall be a crime for transsexuals to work in an environment where they pass as the opposite sex in view of many people. This shall be punishable by a 2-year lock up for those transsexuals working in restaurants, hotels, bars, airlines and similar in-person hospitality roles. Where transsexuals work in the media as actors, porn stars, models, presenters,

musicians, athletes, hosts, or where they appear in front of a large stage audience, this shall be punishable by a 4-year judicial system lockup. Where transsexuals are in judicial system lockup, they shall not be allowed to take any form of sex hormones. For the protection of the unsuspecting men who might pick them up, it shall be a crime for transsexuals to hitchhike. Any restaurant, bar or other business found to have illegally hired a transsexual for a public display job shall be fined two year's wages. Where transsexuals are in any form of media, there shall be no-copyright for that media.

35/ Secret transsexuals, ritualized child sex, and child torture being a thing of the Devil/ Baphomet religion, reports of these things shall be aggressively investigated, rooted-out, and prosecuted. We shall tolerate none of these things, and all shall be criminal.

36/ All of the following shall be tested to see if they are secretly a transsexual when multiple complaints come in about them: All public figures, celebrities, athletes, musicians, educators, and person working with children present or past. This testing shall however only be done twice in a person's lifetime.

37/ Those accused by 8 or more credible people (who have not cried wolf before) in one year, that they look like they have taken sex change hormones, or suddenly they much more muscular and steroids are suspected, or they start to look like a drug addict or junkie. In all these cases, these people must give a drop of blood and a cup of urine upon demand to marshals empowered to show up at your house from 7:00am to 9:00 pm to get the personal samples. People shall be free to use their own blood drop prickers. Either that, or they can use the new, ready-to-use, and sterile prickers provided by the checking team. Also the tested person shall be allowed to see and film the testing and result. There shall be one Holmes capillary screening card for all the common self-induced health issues, as well as for detecting drug traces.

38/ Nobody shall have the right to speak to the children of other people about their gender identity with or without parents permission. This thing shall not be a thing for the schools, children's counselors, day camps, or anyone working with other people's children. Also, everyone who has ever spoke out to children, or groups (including all elected officials, leaders and celebrities) shall have their internet history checked, and those who have a search and browsing history that appear to be pedophile oriented shall:

a/ Be prohibited from working with minors for life.

b/ Be more carefully investigated for child sex crimes.

39/ All transsexuals must use the Government's STD and identity database to inform their sex partners of their gender. Failure to use this database shall always leave the transsexual open to claims of rape, as well as beatings by their sex partners claiming self-defense. The euphemistic term trans shall be prohibited. Also we shall no longer say trans woman, but faux female, and faux male. Also, there shall be noting wrong with the term tranny because it sounds like tyranny.

40/ All transsexual name changes shall be cancelled and all transsexuals must use their original birth name. There shall also be no right to hide the fact that one was once a transsexual or a prostitute. In general, people and fictional

citizens shall no longer be allowed to rename themselves, or to start over using a new identity. This Especially where the name is one of the opposite sex. We as society don't want any men tricking other men into sex by pretending to be a woman.

41/ Transsexuals caught working as prostitutes, or advertising sex in any way may be treated by the law as rapists even if they inform the other party. Where transsexuals are discovered to have passed as the opposite sex in sexual relations with other people, they shall be treated as rapists under the law. Where transsexuals have passed as the opposite sex with many people, or for a long time with one person, they shall be treated as serial rapists under the law and they shall be forever removed from society.

42/ It shall be a crime for transsexuals to work with minors, or where they will surely encounter minors, or large numbers of people, or where they touch people as part of their job, or where they work for government, or where they work in places where intoxicants are served or used.

43/ Where male to female transsexuals gain the trust of people by pretending to be females, and then engage in a sex crime, they shall be tried like priests and teachers who abuse their trust to have sex with those who trust them, or those entrusted to them. Where sex crimes are committed by transsexuals, there shall commonly be multiplied penalties.

44/ All existing transsexuals shall have 60 days to register with the county recorder system in order to obtain grandfather status. Those who fail to register and are caught passing as a transsexual may be presumed to be rapists even if no victim can be found. Under the law, nobody shall have the right to change their sex, either by cosmetic surgery, or in legal records. Transsexuals with a conversion surgery or hormone treatments after revelation day shall not be grandfathered in as transsexuals. Those with a penis and breast implants shall have 180 days to remove their breast implants.

45/ All government IDs shall use 3 genders: M, F, and H for Hermaphrodite/Transsexual. The gender at birth shall be the legal gender that shall never be changed. All existing and past transsexuals shall have their birth gender listed on all government ID and all facebook and biography pages. All registered transsexuals that are grandfathered in shall also have the words "grandfathered transsexual" on all their public ID pages and documents along with their birth gender. Non-binary sexual terms like GENDER FLUID, PANSEXUAL, and the sneaky term SISGENDER, meaning sister-gender, shall have no meaning under the law, but if someone wants to tattoo their forever ID with a non-binary sexual identity (like a divorce record) they can. Also, these lists will be seen by all as an accurate census of people who genuinely identify as some form of non-binary sexuality.

46/ The legal definition of a woman/female shall be a person born with a vagina, uterus, and ovaries. The legal definition of a man/male shall be a person born with a penis and testicles. Those who do not fit in these categories shall be considered legally under the law intersex. All intersex people must use the men's toilets, men's dressing room, and compete in male sports. Nobody who is in one group shall be allowed under the law to be in any other group because of surgery or the way they dress, or what the fell like.

47/ Transsexuals shall not be allowed to work in sales, or in

food service, airlines, or other positions where people must engage with them to get along with their life.

48/ Transsexuals and their sex partners shall be disqualified from Senate service, including the sub Senate. It shall be a felony when transsexuals or their life partners serve in the Senate.

49/ It shall be a felony for transsexuals to appear in the media, or as fashion models or live performers of any sort and normalize the way transsexuals look. Also, it shall be considered conspiracy to commit gender fraud when people in the media, government, police, sports, education, or other places of authority work to conceal the true birth, gender of transgender people appearing in the media, on government ID or in sports, or in other places.

50/ Neither government, nor any insurance company, nor any fictional citizen shall pay for any sex change treatments.

51/ It should be a felony to conduct sex surgeries or administer sex hormones where no physical ambiguity in the body shape exists. If there is physical ambiguity, the family can petition the Senate.

52/ All brand names that have featured transsexuals in their advertising shall be banned.

53/ We are tolerant, we tolerate of homosexuality, just like we tolerate bar drinking and certain sorts of drug use. However, we shall never allow any of these things to be glorified and paraded. If we allow this, then we start confusing our kids as has always been the ancient plan.

54/ The Senate shall investigate all the adults previously involved with pushing hyper-sexuality, or confusing children about their sexuality, or getting them connected with any sort of sterilization drug. Many of these people should be at least symbolically convicted of a felony sex crime, so they can be banned from being around other people's children for life.

55/ All so-called inclusive language about transsexuals and hypersexuals shall be banned from all schools nationwide.

Any person in school using this sort of language shall be considered a child sex groomer and charged with a felony.

56/ No foreign transsexuals shall be allowed to enter or our nation to commit gender fraud upon our people. Where the nation's border guards or police are unsure in this matter, they may order a test to determine the foreign person's true genetic gender. The immigration status of all foreign born transsexuals is hereby cancelled, and they must leave the nation within 30 days or be subject to 10-years imprisonment. If we don't do this, then we will have a backdoor for transsexuals to enter our nation.

57/ Everyone's biological gender at birth shall be their legal gender for life, regardless of how they dress, or what surgery they have had. Those born with external or internal testes shall be male under the law regardless of their other organs or chromosomes. Those born without testes shall be female under the law regardless of their organs or chromosomes. Those with ambiguity in their chromosomes, sex organs, or hormone levels may have surgery to eliminate the ambiguity, however the fact that they were born a hermaphrodite shall always be listed on their identity documentation.

58/ It shall be a felony to prescribe, sell, buy, or traffic in puberty blocking drugs. It shall be a felony to help a minor to obtain puberty blocking drugs. The penalties including those for prescribing doctors shall be similar to those for heroin

trafficking and heroin addicts obtaining drugs from a physician. Also, all sex change hormones for existing transsexuals shall be dispensed via the high security addictive drug dispensing system, and must be injected on site. All IP for sex change drugs shall be nationalized and only available from government. Trafficking in illegal sex change hormones, and body building steroids shall be a 20-year felony. Buying, possessing, or using illegal sex change hormones or body building steroids shall get the drug abuser 5-years in a work camp and random blood testing for life to see if the illegal drug user is back on their illegal drugs of choice.

59/ The term man/men is used herein because it is the shortest readily understandable term, and doing otherwise increases mental overhead, and dumbs down our ability to communicate. We are mankind, and we are all men, regardless of our gender. The word is related to meme and mind and is about thought and ideas. The word man here refers to a thinker, or consciousness. There is little sense of gender in this context.

60/ The policy of our nation with regard to open homosexual behavior is that:

a/ It shall not be tolerated where it interferes with other people's privacy, particularly their privacy rights with regard to their impressionable minor children.

b/ Each metropolis shall be allowed one gay neighborhood which may sprawl and be quite large. Outside of this neighborhood there should be no overt homosexuality. Within this area, the conditions may vary.

c/ There shall be no right of homosexuals and sexual deviants to have or festivals, parties, or parades on public property. Government in no way supports their behavior, even though they are free to have this lifestyle if they want behind closed doors.

d/ There shall be no transsexuals or openly gay people displayed the media where children might see them.

61/ The Senate shall favor groups and lines that will live on in future generations over groups that will mostly die out in this generation.

62/ Sexual equality shall not apply to those who pretend to be of the other sex/gender, even if they modify the shape of their sex organs and take hormones. This constitution does not guarantee any special rights for grandfathered transsexuals. Employers shall be free to discriminate against workers that are transsexual, just as they are free to discriminate against workers for their tattoos, piercings, hairstyle and the way they dress. Existing transsexuals must remain in most child-free districts so they don't infect impressionable minors with their gender dysphoria mental illness. The term gender dysphoria shall officially be seen as describing a mental illness.

63/ No fictional citizen shall have any authority to rule, judge or arbitrate in cases of rape, improper sexual conduct, sexual harassment, or other sex crimes. This includes all schools and all employers.

64/ The Senate shall be free to establish special discriminatory rules for homosexuals, transsexuals, and sex criminals. This especially for people working in schools, in the media, in hospitality, in government, and especially those working in roles that are focused on children or in roles that may be seen by children.

65/ The term "gay" shall no longer be used to describe

homosexuals because:

a/ It is terribly confusing to many children (such as the author of this constitution who thought, much to his social detriment, that it meant convivial and social until age 12).

b/ This term was created to be intentionally confusing to children by the same people who made ancient Greece and Rome into homosexuals.

c/ This term suggest that homosexuality is a happy life path, when it is really a dead end for the individual and for our society.

66/ The perversion rainbow flag and various other sexual rainbow icons like unicorns shall also be prohibited due to their colorful appeal to children. The sneaky term LGBQTP (lesbian, gay, bisexual, queer, transsexual and pedophile) in its various forms shall also be prohibited because it creates a slippery slope and a false middle level of perversion that leads to both non-reproduction and mimetically infectious pedophile activity. It shall no longer be allowed to misdirect young people with these terms and symbols. All children's media and toys with the perversion rainbow flag or with a penis-like unicorn horn, or depicting or talking about, or hinting at homosexuality or transsexuality, or any aspect of anus sex shall be prohibited. This media shall not be edited, but prohibited outright. This includes books for pre-schoolers to high-schoolers.

67/ The fact that there are so few synonyms for the word gay is telling of the way the English language has been manipulated to assure that homosexuality is only branded as happy and gay. In order to counteract this, we shall revive some old words and create some new ones about homosexuality. From now on, all the following words shall be allowed: faggot, fag, queer, fruit, pansy, puto, pede, schwul, ladyboy and shemale.

68/ Some of the new definitions from above:

a/ Faggot = This is a 5mm to 5cm diameter stick with one end turned to a hot burning coal. This is somebody who has this side of them that is super burning hot for sex and interaction with you. It can refer to heterosexual men, but it is mostly about people who display excessive unwanted male homosexual attention. It shall also mean a person who allows their sexuality rule their life in the way that the burning end of a twig faggot dominates their existence. Faggot also can be a general slang term for any hyper-sexualized person, anyone who makes sex/gender identity an oversized part of their life

b/ Fag = An ugly, old, burnt-out homosexual, or a stinky used up and old cigarette butt.

c/ Queer = Someone who does sexual things that are sexually rotten, though perhaps not illegal for adults to engage in.

d/ Sexual Predator = Someone who practices pedophilia, necrophilia, ladyboy tricks, bestiality, rape, incest, or physically harming people when they have sex. These behaviors do exist and we as a society must recognize them for what they are and have a name for practitioners of this sort of behavior.

e/ Fruit = A generic non-derogatory term for homosexual.

f/ Pansy = A feminized man unable to fight for what is right.

g/ Puto = A male homosexual prostitute.

h/ Ladyboy = A male to female transsexual or transvestite that pretends to be a woman in order to trick men into thinking

they are having sex with a female.

i/ Shemale = A female to male transexual.

j/ Pedo = A person with a strange and abnormal sexual fascination for children. This word replaces the blurring acronym MAP. Everyone who has self identified as a MAP shall now be considered self-identified as a pedo. The word pedo shall not be legally accusatory, but a statement of suspicion. The word pedophile is however accusatory, like the term child molester, which refers to people having non-rape, non-penetrative illegal sex with children. The term child rapist refers to people who have had penetrative sex with children.

k/ Schwul = a degenerate, or lowlife sex freak.

l/ It is important that our language has adequate derogatory words for the various dead-ends of sexual perversion (which shall be permitted by law, but discouraged by government, the media, and education system). This is instead of a language intentionally cleansed of such words and thoughts by those who seek to destroy our dear freedoms through pulling them into destructive perverted excess. The terms cis, cisgender, and sis-gender shall no longer be used. Instead there shall be the terms: normally gendered and perverted genders. Also, under the law there shall only be two legal genders, and all the other many forms of perverted fantasy genders shall collectively be known as the perverted genders.

m/ The word brawndos shall be an insulting word for dumb people, specifically the degenerates of the idiocracy.

n/ the word camacho shall be an insulting word for a brawndo that is in a position of power.

69/ Michael Foucault, Gayle Rubin, Eve Sedgwick, Michael Warner, Lauren Berlant, Adrienne Rich, and Judith Butler and their followers, along with all Maoist and Marxist ideology shall not be taught in any school in the land (serious or frivolous), except as examples of how insidious propaganda can be. Also, any author that has ever advocated removal of age of consent laws for child sex shall not be taught in any school. Also, the author shall also be investigated carefully for child sex crimes.

70/ Except for Senate approved materials in a Senate approved learning module, when non-parent adults talk about sexual identity, gender, or sexual pleasure with minors these may be charged with child sex grooming or child abuse, and excluded from working with children for life. Where people talk about Senate sex education as they are supposed to, there shall be a safe harbor.

71/ The people shall be generally free to have whatever religious beliefs, political beliefs, and sexual identity they want. But the people shall not be free to demand anything at all from other people with regard to these beliefs and identities. People shall also not be allowed to deceive or trick others about their true gender.

72/ Under the law, everyone obviously born male shall be treated as male, and everyone obviously born female shall be treated as female. However nobody shall ever be punished for misgendering a person as either male or female.

73/ The Mideast house of war has been actively struggling to encourage homosexuality in the land of the free, our land, as they did to eliminate democratic ancient Athens, and democratic ancient Rome. This is to reduce the population and power of the infidels not adhering to their religion of feeding the land of no resources. Here we should note how it

has been long and widely thought that homosexuality was a chief cause of classical Greece's collapse. Other reasons for the collapse of Greece in around 400BC was a plague recorded by Thucydides ("sacrificial ideas"), A banquet sym•poison ("with poison", recorded by both Plato and Xenophon "foreign•voice"), and a 27-year war between the Spartans and the Athenian upstarts who were were lead to settle just on the border of the (Pen•insula = tube•island) of the Spartans, like an ancient version of Tijuana on our border. Eventually, some generations later, the same treacherous adversaries that setup a rival upstart city (Athens) just on the border of the peninsula: eventually Athens was larger than the peninsula. Then there was a 27-year war that led to the total destruction of both the old Greeks of the Peloponnesian peninsula and the new Greeks of the Athenian area. Also, we must note that it isn't the Saronic Gulf, but the Sarah•nikos = queen's victory, like the Sarah=queen's desert.

74/ To eradicate most types of sexually transmitted disease, each county health department shall keep an optional database of people regularly blood tested as free of STDs. These people shall be issued a safe sex license via a constantly updated log-in account with their county. This shall be a nearly free and optional government service in every way, including the cost of disease testing. When licensed people have sex, they shall be required to check each other's STD accounts and thus register the encounter. If people have sex with someone outside the system, they have to get tested again and quarantine the required time before having sex with anyone inside the system, or it will be considered a jail-able crime that is enforced by police and government. If a person tests positive for HIV, TB, herpes, hepatitis, gonorrhea, syphilis, or any other STD as defined by the Senate, then they shall not have sex within the system until they test negative again. There shall never be any hiding of changes in STD status from one's continuing marriage or sex partners. However, spouses shall only be auto notified of diseases, not partners.

75/ Even for epidemiologists chasing down STD outbreaks present and past, the viewing the name information requires a court order. In order to increase the epidemiological effectiveness of our STD database, we shall also include kissing in the list of required notice activities. Kissing may not be how HIV is transmitted, but there certainly must be some diseases transmitted by kissing. Also, the STD database shall have special areas for people who are HIV, hepatitis, and herpes positive.

76/ The STD database shall display a person's convictions, including the confidential court record photographs of victims, to all potential sex partners. The STD database shall also keep track of condom use. We shall let people know, so they can make their own decisions. Also the STD database shall confidentially track child sex claims for future investigations. The system shall also note the ages of all children in each household, each boyfriend/girlfriend dates. This is so it is easier to find Humbert-Humbert types who date people to gain access to their children.

77/ Those who contract sexually transmitted diseases from consensual sex have no right to sue for damages. This may be made criminal, but money should have nothing to do with the matter.

78/ The STD database shall have special sections for people who are HIV+, hepatitis+, and herpes+, and also people who want children.

79/ To reduce the potential for sexually exploiting foreign people by holding their travel documents, we shall allow all visitors in our nation to access our records of their travel.

80/ The penalty for acting as a pimp, brothel, or prostitute agency, or prostitute logistics agency shall be 7-years for the first offense, and 14-years for subsequent convictions. When the prostitutes are unlicensed, or under age 21, the penalty shall be doubled.

81/ The penalty for working in a brothel, either as a prostitute or as support staff, or visiting a brothel shall be 1 year in a work camp. Also, pimping shall be regarded as equivalent to sex trafficking, and career pimps shall often find themselves serving life prison sentences in a sex criminal work camp.

82/ Where people tout for brothels, strip clubs, and dancing women business, this may easily be called pimping.

83/ Where people have illegal businesses like strip clubs, brothels, or drug dens, or illegal gambling dens in the middle of a town for long periods where they go unbothered by police or government enforcement, this shall be considered prima facia evidence that they have committed the felony of having corrupted government in addition to their other crimes.

84/ We shall have Orwell market in all our "Geylang" prostitution zones. This is actually wanted by all honest market participants. And we shall outlaw and heavily prosecute prostitution outside of our prostitution zones. Also, we shall tax our prostitutes per customer, so that we don't have any 15-minute nag prostitutes spreading diseases like in Mark Twain's celebrated story about the jumping frog of Calaveras county with "consumption...coughing, sneezing and blowing her nose".

85/ Sting evidence of illegal prostitution, and illegal sexual solicitation shall be valid in court to get the nation's prostitutes off the street.

86/ It shall be a crime to hand-out, and scatter flyers and business cards for places where prostitution is occurring. Also, where there are brothels or other sex crimes occurring, those people marketing these illegal activities may be held to be a co-conspirator to those crimes. This shall include taxi drivers who repeatedly transport prostitutes between sex customers.

87/ Those having sex outside the STD system may be charged with various crimes such as: sex with a minor, rape, and trafficking if these charges are applicable. However, it shall be difficult to charge people with crimes of non-consensual sex where the accuser recently applied to the STD system regarding the accused. Also, where the STD system approves of a person, this shall normally provide a "safe harbor" for nearly all charges of sex with a minor, and all charges related to forceable sex. Also, the STD system can sometimes take up to 30 minutes to give a reply, because a real human must often read the STD history of the parties, and other problems including cousin incest. This time will also give police time to arrive if one of the STD system users calls police by using their call-the-police password.

88/ In order to use the optional STD system all males must submit a DNA sample to use the system. (optional in that joining the STD system shall always be optional, and people

shall be free to boycott and go without STD system approval of their sexual activity.

89/ The STD computer system automatically and instantly contacts all subsequent partners upon confirmed detection of a STD. These people will be required to immediately get tested and treated, and will be totally locked out of the STD system until they are certified as safe. It is thought that having a STD registry will mostly eliminate the risk of getting a STD.

90/ The STD tracking system shall also have:

a/ Free dating apps, such as a tinder and a dating app with fees for making contact that go to the Government's general fund. These shall also be identify verified and anonymized.

b/ Free breeding and baby making apps.

c/ Where people are married or cohabiting, the partners shall be able to see the current dating history of their partners if their partners agree.

d/ To encourage people to date and have children, the government's various dating systems and the STD registry shall all be free public services, including the free distress call monitoring for women. Women on dates shall be able to drop green, yellow, and red pins, notifying the monitoring system just before they start saying goodbye. Nobody gets notified on a green pin, but various neighbors and other are notified on a yellow pin. Police are called on a red pin. Police may be notified on a yellow pin.

e/ 15-16-year olds only get STD system matches for peers.

f/ The STD tracking system also reports felony convictions of users.

91/ All Senators, police, priests, educators and everyone in a position of power shall be required to join and use the STD checking system for all sex partners. This is certainly to keep everyone safe from STDs, but it is also to reduce the power that sexual favors can have over people in power. Also, all government workers (including Senators) must keep a telescreen-tracker phones on them at all times. If it fails, it must immediately be replaced. Those who have had sex with a Senator, police officer, priest, educator or anyone else in a position of power that is outside the STD system and report it, these shall get a Senate reward of 12-month's wages. So our Senators will be extremely reluctant to have sex outside of the system where sex with other adults will be perfectly legal.

92/ The county recorder system shall have an optional free platonic dating app that allows women and their dates to agree to more restrictive rules of platonic dating. Here, when the parties agree to a platonic date, neither party is supposed to be sexual in any way with the other. The male shall also be governed by all sensible anti-stalking rules, starting the moment the female uses the system to communicate and notify of her non-interest. From this moment forth, the male who used the platonic date app shall be required not to contact or look at the female and shall always be polite to her. In order to end a platonic date, the couple must separate by more than 1-km and 30 minutes with no virtual communication. Once they have been apart for the required period, they shall be free to go their own way, or meet again and have sex immediately afterwards if they both agree. However, if the couple has sex on a platonic date, before they have separated, and the male tells authorities, then the female may be charged with a permanent record unspecified violation of the STD system, which the dating consent system

is part of. Therefore: All females will demand separation before having sex, and this is the point where the female is able to simply not contact the man back. Also, at this point, the male shall legally be considered a stalker if he visits the female again without permission, or calls or texts more than 10 times.

93/ Pimps that exploit others with addictive and psychoactive drugs, or locked rooms, or beatings and violence, or they tattoo their trafficked victims, these pimps shall all be seen by the law as the equal of men who kidnap women and lock them up in their basements. Is the man selling access to sex with a woman on multiple occasions, and also providing her with addictive drugs? If so they he goes away forever on the first offense. If he is a foreigner, he gets executed on the first offense. It is one thing it we have women selling sex, and it is a whole other thing if we allow men to participate in marketing and managing the prostitutes.

94/ The maximum penalty when a female prostitute, or her 3rd-party defender killing a verified pimp shall not exceed 2-years in a work camp. Also, there shall generally be no penalty when these commit assault that results in no long term physical harm to the pimp. The Senate shall make educational videos to help young people recognize when they are being groomed for sex trafficking and sexual exploitation.

95/ To prevent criminal proceeds from being used to buy sex, the prostitute payment system shall only accept non-anonymous electronic funds. Certain groups and occupations shall be prohibited from using the prostitute payment system as customers. Government shall tax all prostitute payments by 1/8. Given the government's STD monitoring, this is not enough to cause tax fraud, yet it is enough money to stamp out black market prostitution, pimps, brothels, and sex trafficking as well as to provide stepped-up police presence in the prostitution zones. All prostitution zones must be located in areas that are seldom visited by minors.

96/ Female prostitutes shall be required to have an examination and blood test at least every 30 days to maintain their prostitution license. Male prostitutes shall be required to have an examination and blood test at least twice as often to maintain their prostitution license. It shall be a crime for either a prostitutes or a prostitute customer to have sex without a condom, or where the customer is clearly drunk or out of their mind on drugs. When prostitutes have sex with clearly intoxicated people, this can be seen as rape, even if the customer is a man. In order for a prostitution license to be valid, the prostitute must work at one of her registered and permitted work addresses. There shall be no street prostitution, except perhaps in special government designated zones. There shall be no such thing as sex surrogates under the law. These shall be renamed as prostitute sexual therapists. Prostitution licenses shall be required to engage in the Stripping off of one's clothing as a form of entertainment, dancing on a pole, dancing on people's laps, nude modeling, lingerie or topless shows or services, lingerie, bikini, or nude services (such as maids and drink service) and even where women's wear bikini tops while serving drinks. A prostitution license shall also be required where women get paid to drink alcohol with men, or to be with men who are drinking or singing.

97/ It is absurd that unwanted touching or rape of prostitutes

or other forms of sex worker is treated the same as with normal people. This especially in environments where alcohol is served. Therefore accusations of sex crimes by prostitutes, strippers, go-go dancers, alcoholic drink bringers, and hired nightlife companions shall have both higher standards for accusations, and significantly lower penalties.

98/ Government shall punish exhibitionist public sex in crowded places as a sex crime, like public onanism. Public sex involving prostitutes, homosexuals, transsexuals, or sex in front of children shall have double penalties or more. It shall be a crime for adults to twerk, or have simulated clothed intercourse in front of children. But Where people screen themselves off so that nobody can tell, or they are in a remote place with nobody around, this shall not be a crime, although they may be visited by police to check on the vehicle they can't see into.

99/ Under this constitution, everyone shall have the right to wear whatever clothing they want (except as called for herein) and neither government nor anyone else shall ever have any say in this matter of individual choice, provided however that the skin between the armpits and the mid thighs (the legs at least 8 cm below the crotch) remains covered (while they are standing) in fully opaque materials. The people shall have the right to dress like this if they want and no business and no event shall have any right to keep them out, or kick them out for not dressing appropriately as long as the areas between the mid thigh and arm pits is covered.

Also, all women's pants and shorts are supposed to be at or covering the naval/ belly button area. This is so that everyone's sisters who have babies don't need to worry so much about their stretch marks being visible. Also, there should never be anything wrong with women wearing bikini tops anywhere men are taking their shirts off. Also family beaches and parks may require the area from the arm pits to the mid thigh to remain covered. However, on all the other beaches and parks, women can wear bikinis. The belly covering requirement is for two reasons:

a/ It is to encourage women to have children by de-emphasizing this belly part of their bodies.

b/ It is to keep young girls from showing off in public and harming the relative appearance of older women that are more of reproductive age.

100/ In all pools, beaches, lakes, city parks and other places for swimming and sunning, where men frequently take their shirts off, women shall always be free to wear bikinis. A woman's bikini shall be defined as:

a/ Enough area of opaque fabric in the lower front to cover the pubic hairs of most young women;

b/ Opaque fabric that covers the woman's backside from the lower cheek creases to the top of the middle crack, even when bending over. As an optional women's solidarity thing, young attractive women are supposed to cover their bikinis with an oversized t-shirt when they are standing up and especially when they are walking around, or sitting in a prominent place.

c/ A strip of opaque fabric at least 3cm wide must cover the crotch of the bikini.

d/ There must be enough opaque fabric to cover 2/3 of each breast without showing the nipples.

x/ All men's speedo type swimwear must cover the area from

the lower cheek creases to 5cm over the top of the middle crack. Men wearing thongs or jock straps shall be considered as being nude under the law. Men shall only be allowed to wear speedo type swimsuits while either in the water, or walking to or from the water. or drying off. They shall not be allowed to stand around exposing themselves in speed type swimsuits. Each county may establish clothing optional zones as it likes, and this may include the entire county if the county Senate elects.

101/ The right of free speech shall not include:

a/ The right to directly solicit strangers for sex, or make repeated sexual comments, or repeated sexual advances upon many strangers. Also, when people make direct invitations for sex with strangers, it may be considered a form of sexual assault. Euphemistic questions like: "Do you live far from here", and general complements like: "You look great" shall generally not be considered assaults, if done without menace or threat.

b/ Prostitutes advertising or publicizing themselves, or their parties.

c/ Pornography outside of government approved pornographic venues and directories.

d/ Graphic violence outside of government approved graphic violence venues and directories.

102/ There shall be no pornography media that depicts or describes any of the following sexual activities:

a/ Rape, resisted sex, coerced sex, or sex under blackmail, extortion, threat.

b/ Violent sex with beatings, whippings, blood, red marks, bruises, beating marks, or infliction of pain.

c/ Sex presented as incest or cuckoldry.

d/ People in chains, ropes, restraints, handcuffs, or bondage.

e/ Lack of consent, sleeping, groggy, drunk, or seemingly drugged actors.

f/ Domination, degradation, cages, cells, or imprisonment, dungeons.

g/ Fearful or improper facial expressions and porn where weapons or valuables are present.

h/ Sex with animals. This does not apply to people genuinely caught in the act.

i/ Sex with oversized objects inserted into orifices, and gagging sex.

j/ Secret recordings of sexual activity.

k/ Sex or nudity for money, or money depicted along with sexual acts. Otherwise this sort of media will serve as advertising for a prostitution lifestyle..

l/ People who have had surgical alterations of any sort including injections, liposuction, face lift or skin tightening, vaginoplasty, and especially breast implants.

m/ Feces, urine, vomit, drool, spitting, menstrual blood, or semen being wasted. Also there shall be no direct or indirect mouth to anus contact.

n/ Transsexuals and transvestites, either with or without surgery.

o/ Sexualized feet.

p/ Minors or apparent minors, people presented as "teens" and underdeveloped people and people presented as minors under age 25. This shall include all children's uniforms, dressing styles, children's hair styles, and infantile or childish behavior or dialogue lines. Now that we are using a minimum

age of 25 for porn acting and nude modeling, we shall banish the word teen from use with porn and sex. The word "teen" shall from now on be understood the same way as "child" in the context of porn and sex. Neither word shall be used to describe porn. Also, government shall have the right to regulate all terms used in marketing porn. No synonym or slang words used to describe outlawed forms of porn shall be allowed in search or other places. Porn shall now be a thing that only depicts and sexualizes fully grown, fully mature people over age 25, and not young people. Also the BMI should be worked up over time, so that the imagery of sexy women is more in keeping with the average proportions of the most fecund women.

103/ There shall be no writing or speech or fictional depictions about sex with children or advocacy of this. Every person who has been recorded as declaring or inferring that they are attracted to minors shall be required to register on the national sex offender database. No person on the national sex offender database shall go near a school or daycare or playground, or its approach-ways while children are present or they may be charged. Homosexuals shall be prohibited near other people's children unless they are with their own, or collecting their own. Also, transsexuals, sex criminals and self-declared minor attracted people shall not be allowed to work with children, or in education, or teach, or counsel minors.

104/ All sexualized animation whether lifelike or not shall be considered porn as if real people were doing that sex act. It shall be a crime to merge a person's face onto the nude or pornographic images of other people in a way that looks even slightly real, or to display such images. However, when this merger is done in a way that is obviously fake, there shall be no crime.

105/ There shall be a clear distinction between the pornography media and the non-pornography media, particularly with news media. All pornographic internet feeds shall be on special pornography top level domains. Non-pornography search engines and commercial websites shall not link to any pornography TLDs. Nor shall they display any porn images or media, or audio. It shall be a crime to intentionally cause pornographic advertising, images or audio to be displayed or played to people outside the pornography internet. Prostitutes, swimsuit models, and virtual unclothed models shall not be allowed on the non-porn internet, including its social media. Imagery and talk and audio of copulation, and sexual practices, and kissing that is not on the head or face, as well as nudity, and homosexuality shall not be considered matters of free speech. Pornography shall not have any storylines, or games associated with it. And games and story media shall not have nudity or sex in them. Also, there shall be no free speech rights for "artistic presentations", or normalization media with regard to prohibited types of pornography including especially: incest, bestiality, rape, abduction, and sexual violence. The only exception shall be the Oedipus plays when used to explain propaganda.

106/ All licensed pornography websites must obtain government permission and licensing via an automatic search engine to verify that the porn they display features only licensed adults and permitted content that is free of revenge

porn, secret recordings and the like. Those using government licensed porn websites shall not be responsible if that site displays off-limits porn including child porn, instead the website people shall be responsible. Also, if the off-limits porn comes from a non-licensed source, they may be held responsible. All homosexual porn feeds must be on their own special TLDs away from the normal heterosexual feeds.

107/ Free speech shall not be thought to be about the portrayal of illegal sexual activity such as pedophilia, rape, bondage, and bestiality. This is an inconsequential freedom of speech, and a distraction from genuine and all-important matters of free speech that involve properly running the society we all live in.

108/ Government shall compile, maintain and update a list of all forbidden porn files, and all social media and files sharing and email platforms shall be required to use search engines to search for these files and to report those people sharing them.

109/ In all sexualized media including both porn and soft core media, the women are supposed to be facing their partner (if any) or the camera, glorifying the fronts of women over their backsides at least 90% of the time.

110/ There shall be no minors under age 18 viewing the porn internet. There shall be no porn or sexuality in tertiary, secondary, and especially primary education.

111/ Parental authorization shall be required for social media and gaming accounts for minors. Animated and computer generated porn that represents illegal activities shall be just as illegal as if it was a high definition image or video of that sex act. Animations, paintings and drawings shall not depict children or adults that look child like in nude or sexual poses or video. They shall also not depict torture, cannibalism, or murder, or any form of homosexual act or illegal sex. Fake and illustrated images of nude children and children having sex shall still be child pornography.

112/ Nobody with a child work license shall:

a/ Have engaged in prostitution, or have any nude images online.

b/ Have had a mafia drug license, except that Marijuana is excluded

c/ Have a porn license

d/ Be a homosexual.

e/ Have been a Catholic priest or alter-boy or similar past where child molestation is so common.

113/ The term Porn may also apply to X-rated audio and audio books.

114/ The non-X-rated internet and other media shall have neither porn, nor individual models, nor prostitutes, nor graphic talk about sex, nor breasts, nor nudity, nor translucent clothing, nor swimsuits nor clingy body suits.

115/ The law shall have heavy penalties for those who make and distribute child pornography and those possess large collections of child pornography, particularly younger children. However, the following shall never be more than a misdemeanor. These are not the people the law should be focusing going after.

a/ Media of one's own children or family members swimming or running around naked by a pool, or before wash time.

b/ Sex Media that includes a few people who do not look particularly under-age, but actually are.

c/ Sex media possessed by political people who have done or said unpopular things.

x/ Enforcing the edge like this empowers prosecutors to go after their enemies, and the enemies of their allies. Also, powerful and rich people shall not be charged with possession of child pornography or minor sex crimes unless there is ample corroborating evidence, for the greatest likelihood is that they are being framed.

116/ Police may employ minors and pose as minors for the purposes of conducting video sting operations on child predators and those trafficking in child pornography.

117/ School sex education shall be about: reproduction, contraception, sex diseases, pregnancy, birth, child rearing, health issues, and government benefits. It shall not be about sexual pleasures, or sexual freedom, or homosexuality or gender fantasies. It shall be about teaching young girls and boys to be wise, safe, disease free, and procreative breeders. — and helping them to be good parents for the next generation. That is what sex education should be about. Sex education should never be about sexual pleasure or normalizing any unusual or non-procreative sexual behaviors.

118/ No primary or secondary school curriculum or teacher, or any children's media, or any family media or activity shall be allowed to address or talk about sex, sexuality, or homosexuality, sexual orientation, transsexuality, or sexual pleasures in any way, except for the Senate approved sex education modules. It may be considered sexual grooming to talk about these things with other people's children, even when a teacher or camp counsellor does it.

119/ All schools, and all media directed at children shall presume and work under the assumption that society wants to educate its next generation of students so they are heterosexual and reproduce.. No school shall in any way discourage students from being procreative, child-bearing heterosexual members of society. This includes all talk and activities about all non-procreative lifestyles. No school media or children's media shall discuss any of the following topics: Homosexuality, gender identity, transsexuality, onanism, or racism. Also, no media for small children shall include mention of Kings, queens, princesses, princes, rulers, magic, superheroes,

120/ No laws concerning rape and sexual misconduct shall be so broad they enable extortion and shakedown scams for men. No sex trafficking law shall be so broad that it is applicable to normal long-distance dating behavior.

121/ Where men drive women around, or escort women during social dates, these men shall be required under the law to take these women back to where they started, unless the female wants to get out somewhere else along the way. Failure of a male to do this shall be recorded as a public-view, non-criminal dating offense, akin to directly asking for sex.

122/ Unless one side of a gray marriage is complaining about unwanted sex, the subject of legal competence to decide about sexual activity shall not apply.

123/ In order to stop borderline offensive sexual behavior, the Senate shall name the various acts in detail and establish reasonable minor penalties for minor sex crimes.

124/ There shall be no burkas or Islamic headscarves anywhere in our nation, and where males go topless, females can too if they wish. Males shall also be allowed to wear

men's bikini swimwear while swimming and within 300m of the water. However, men shall not wear bikini swimwear in other places. Also, everyone with a BMI over 36 shall cover the area between their armpits and roughly the mid thigh while out in public.

125/ Feminist groups being traditionally inclusive shall include heterosexual women, homosexual women, males, and male to female transsexuals. However Womanists (womb•an•ist) groups shall be about heterosexual female life, and baby making, with lesbians, males, and male to female transsexuals prohibited. Womanist groups shall be considered a safe space for heterosexual breeding women only. Also, there shall be groups for mothers that do not allow anyone except mothers and their children age 4 and under. In mother's groups everyone except women who have born living children shall be excluded. Also, mother's groups should be looked at favorably by our society, our government and our media, while womanist groups should be viewed neutrally, and feminist groups should be viewed as mother's groups twisted and perverted by the ancient Arab struggle into something bazaar/bizarre and unnatural.

126/ The various counties shall be free to allow, ban, or tax homosexual porn from their internet entirely. The official policy of our nation is that heterosexual porn is only mildly harmful, while homosexual porn is very harmful.

127/ The fact that homosexual men are widely thought to be more attractive than average, and homosexual women are thought to be less attractive than average tells us that the born gay hypothesis is a lie. So if people are not born homosexuals, then their life experiences are what makes them homosexuals. This is why we should be very strict about prohibiting gay teachers, and pro-gay media, and even homosexual romance media for adults, unless it is controlled so that impressionable minors cannot view it.

128/ There shall be no Government prohibition or special regulation of programs that convert people away from a homosexual lifestyle, except that:

a/ nobody of any age shall be forced to attend one of these programs against their will,

b/ No retreat shall be held outside an urban area, and

c/ People, including minors shall always be free to leave.

129/ There shall be no penalty for speaking out against homosexuals and transsexuals that is not calling for violence. The people shall be free to call them disgusting perverts if they want.

130/ All domestic convictions go on a person's official facebook page for all to see. It isn't the rights of the convicts that are important here. It is everyone else's rights to know who is a criminal and who is not. That is the primary thing about ex-convicts. It may not help with reform, but it sure helps prevent crime.

131/ With regard to marijuana dispensaries, liquor stores, bars, gambling places, dancehalls, and sexually oriented businesses, and places with scantily clad people dancing: For all of this sort of business, there shall be no right of due process when the county Senate elects to shut the business down, however all of these businesses are subject to being closed down if they are the repeated scene of felony crimes.

132/ There shall be no right of victims of sex crimes to use the money court system. All penalties and punishments for

sex crimes shall only be meted out by the criminal court system. To do otherwise is to create a world of fraudulent claims for profit. There shall be no right of spouses, parents, children, boyfriends, girlfriends, or other third parties to bring or press criminal charges for sex crimes.

133/ All condoms shall be made in appropriately sized base diameters in 1-mm increments. They shall generally be tight at the base and looser elsewhere.. The Senate shall test our nation's critically important condoms for reliability and breakage under a variety of conditions because it is just so important that our nation's condoms are reliable, comfortable, inexpensive and get used more often as a result.

134/ Public urination and defecation in themselves shall not be sex crimes. There shall be no sex crime of exposure where males urinate facing away from the road/path with each hand coving one side of their penis. There shall be no sex crime of exposure where a female squats down and either urinates or defecates knees together facing the road/path.

135/ Adults over age 19 shall not be allowed to meet with unrelated minors under age 16, where a parent or guardian has not granted consent to the county recorder system:

a/ Where adults are found alone in a residence, or hotel room, or in an isolated place with an unrelated minor, this may easily be considered child sex grooming.

b/ Where adults over age 18 make arrangements to meet in public with minors under age 16, without parents present, and without parent consent, this may easily be considered child sex grooming.

136/ Where we can not decide what we will tolerate with regard to sexual mores, we shall err on the side that will get our best people to leave more children. And the existence of transsexuals will certainly not help with that.

137/ Where people kill convicted felony child sex criminals, regardless of the circumstances, the maximum penalty shall be 7-years per murder, and 2-years per non-fatal, non maiming assault.

138/ The maximum penalty for killing a grown man who had sex with your child under age 13 or younger shall be 5-years in lockup. If the child is under age 12, the maximum penalty shall be two years. If the child is under age 11, the maximum penalty shall be 1-year. The definition of a gown man shall vary.

139/ All multi convicted, child sex predators with 5 or more separate victims and two separate rounds of convictions shall be executed if they are currently incarcerated.

140/ No person shall ever be forced to pay for college for their children.

141/ All transsexuals and those who have coupled with a transsexual shall be disqualified from Senate service. The Senate shall make a complete list of all famous people in the nation who are probably transsexuals.

142/ Nobody shall ever be required to humor someone else's sexual identity fantasies.

143/ The national police shall be allowed to run sting operations in foreign nations to find and gather evidence about the residents of our nation that travel to foreign nations and have sex with minors under age 16.

144/ We shall long ponder the words of Saladin:

"If you want to destroy any nation without war, make adultery or nudity common in the younger generation."

145/ Under the law, a woman is an adult human genetic female, and a man is an adult human genetic male. No matter what a person does to change their outward sexual characteristics, it shall have no bearing on their gender under the law. Also, if a person is pregnant, then they must be a female/woman and cannot be a pregnant male/man.

146/ People who are not staff, or relatives, or guardians of children present shall not be allowed to go to playgrounds, schools or other child oriented places.

147/ Unsolicited pictures of genitals and sex acts may be punished by police, particularly when they are sent to people who are under age.

148/ When adults talk to minors under age 16 about sex, and when they meet minors under age 16, this shall be considered a sex crime.

149/ We shall ponder the ancient words of Romans 1:26, and note the ancient influence of Ishtar: "The God [the Devil/ Ishtar] gave them over to shameful lusts. Even their women exchanged natural sexual behaviors for unnatural ones. Likewise, their men also abandoned natural relations with women, and were instead inflamed with lust for one another, committing shameful acts with other men."

150/ There shall be no CPS emergency removals:

a/ For two parent households where one parent is a problem.

Instead, the problematic parent shall be issued a restraining

b/ where Grandparents or other non-dysfunctional family members can take the child.

c/ For parents that are always drunk, or they are always high on marijuana.

d/ For parents that appear sober but test positive for drugs.

e/ For children that are merely not sent to school, or children who have problems with school, or with law enforcement.

f/ in situations where parents refuse medical treatment for health issues that are not life or death

151/ The Senate shall carefully investigate all existing CPS workers and educators with regard to child sex crimes. This is because it seems as if many are actually child abusers.

152/ CPS, police, and others in a position of authority that rape or have sex with the children they are supposed to protect may be executed for their perfidious actions. Where CPS work with child traffickers, or they rape several children they may be subject to death by torturous execution.

153/ the Senate show establish laws for exposing minors to lewd acts in front of them.

154/ It shall not be allowed to display any sort of imagery of children with porn or nude media.

155/ It shall be a felony sex crime for grown men to peep into windows of other people's homes at their children. Where this occurs these men may be freely beaten (but not killed) by family members. Where they are registered

156/ There shall be no overt sexuality in the military or by military people who are active duty.

157/ Media with Women's tongues stuck out in a sexual way may be stigmatized and stripped of its IP rights.

158/ Once a person has been convicted of sexually abusing minors, he may never live in a household with children again or work in a child oriented environment again.

159/ The purpose of the std tracking system is preventing STDs, not tracking how many partners people have, there shall always be a right to have sex outside the system

untracked and later return to the system.

160/ There shall be no sexual cartoons depicting people that are not clearly above the legal age.

161/ There is this part of the human experience where people gossip about who is having sex with who, and thus many women have less sex and fewer babies because they're worried about what other people will think. This appears to be something that was "fostered" by Ishtar so we infidels have fewer children.

162/ Instead of making men responsible for their spawn, we shall give them all a single payment of 1/3 year's average take-home wages for every child they father. Then, nearly all men try to have children wherever possible. However, all women on this program must use the healthcare system's ovulation tracker, so our sires can concentrate their efforts on women who are fertile at that time. So women will not offer babies when they really just want sex.

163/ No statements by victims to close people about a sex crime shall be admissible in court if the crime took place more than 18-days before.

164/ All of the men that were recently intruding over and again into women's spaces shall prosecuted for this. Just because it hasn't been enforced doesn't mean that it's OK. The ones that were doing this with girls under 16 shall double penalties, the ones with other convictions for sex crimes shall get sent to an island sequestration place for life, so that we may be rid of this dangerous psychologically infectious trash from our society.

165/ The people shall not be allowed to do any of the following in front of other people either in real life, or in media without consent.

a/ Have sex.

b/ Grind in clothing, or get handy, covered or uncovered, or show tongue while kissing, in front of other people, and especially children.

c/ Send sexual images, and especially images of any penis.

166/ Males over age 5 shall not be allowed to hold hands or hug with each other in public.

167/ Grown people shall not be allowed to kiss each other on the mouth or body (face and head OK) or embrace in public, or hold hands in public, and this especially for homos. However, at entryways, train stations, airports, after 9:00pm, at funerals and weddings, and secluded places it shall be allowed.

168/ There shall be no media depicting:

a/ Romantic relations of any sort involving people under age 18, or people who look under age 18.

b/ Friendships or relations between minors and adults.

c/ People meeting as grown up and child, and later after some years, the child matures and comes of age and then gets close to the older person.

d/ Sexualized dwarfs, midgets, disabled people, amputees, or people with a BMI over 32.

169/ As a safe harbor for managers against claims of sexual harassment and other claims by employees, all private meetings between a managers and the people that they manage should be recorded by the recorder system.

170/ Where managers, owners, teachers, landlords, police, government official, coaches, umpires, judges, camp counsellors or other people in similar positions of authority

are having sexual contact, or massages, or hugs, or kisses with other people they have authority over, there shall be a presumption of sexual harassment. The safe harbor for claims of sexual harassment shall be that one of the two quits the relationship on video and then grants consent for sex on video, and then immediately afterwards, the safe harbor against claims of sexual harassment shall be 100% valid.

171/ Where co-workers repeatedly make offers of sex, this may be considered sexual harassment, however people inviting people to coffee or dinner, or drinks up to 3 times shall never be considered harassment, unless the person asking is in a position of authority over the person being asked.

172/ It shall not be possible hire people for a job, or to partner with individuals or small fry businesses and these workers come to be in debt to their employer, even if they screw up. So under the law nobody shall ever become a net debtors to their employers. It is not possible. Also where any sort of employee debt situation exists for young people involved in socializing work of any sort, the employer may also be charged with pimping.

173/ It shall no longer be possible to have businesses that offer the masochistic/ sadistic practice of waxing or the ripping out of a person's body hairs. Now people can do it themselves, or they can shave or use a laser. But the ripping out of a person's hair shall no longer be allowed as a business.

174/ Where two men or two women raise a child that is not theirs, they shall be called Dutch uncles and Dutch aunts, or Dutch nephews and Dutch nieces. Where two lesbians have children by the same father, the woman that is not the child's mother shall be considered the child's "auntie". Where the mother is living with a person, that is not their child's father, the person automatically becomes a step parent (with no automatic parental powers over the child) upon marriage or after 3 years. Where the mother is coupled with a female, the female shall be called a step mother.

175/ It should be every homosexual's duty to rat-out other secret homosexuals that are working around other people's children. Hypersexuals and homosexuals working around other people's children shall be thought to be one of the two great sources of bad feelings against homosexuals. The other main source of bad feelings shall be thought to be males pretending to be females, or acting like females.

From now on, there shall be no right of male homosexuals to act like females in public. The rights of the normal heterosexual majority shall matter and the homosexuals and hypersexuals now have to behave like straight men in public and at work. Homosexuals shall however be free to act any way they want in their homes and their gathering places, and among their friends.

It shall also be thought that homosexual men do a big disservice to the appeal of women when they counterfeit their feminine ways. It is wrong for them to damage this wonderful thing that helps to produce more infidels for Islam to struggle against.

NR'122. GOVERNMENT ARMS AND THE PEOPLE

1/ The military and the militia exist primarily to protect the people from foreign threats. When they do this, they are great and noble. When they are used instead as police and when they suppress the people of their own nation, they then become awful and evil, a gestapo for the people to rise up against and overthrow. Therefore, our nation shall reenforce the Posse Comitatus Act of 1878 but have it that:

a/ The military shall not pursue criminals that are citizens, but it may pursue foreigners, and especially illegal migrant invaders.

b/ The military shall not be involved with either operating government, the economy, or the criminal law system as the PLA does in the so-called People's Republic of China.

c/ The Military may be used to defend our nation's border zones, and that there is no problem putting military bases on our nation's borders or

2/ Our nation must always be watchful that its own defensive military does not become a tool for subjugation. Throughout history, a large pie-slice of armies have eventually become a tool for the subjugation of the very people they were created to protect. Also frequently, the protective military of many nations have been used by third parties for profit and the enforcement of foreign monopolies, and for the degradation of the people by means of military-enforced over-taxation. A great example of this is well written about in the records of the Roman legions stationed in northern Europe. We must always be watchful that we don't go down this path ever again.

3/ Any use, display, brandishing or threat of deploying military force or equipment against the people (and especially the people in the process of Mustering) may be considered democide. Everyone who remains involved with the administration/ political party/ leadership that is ordering the military against the people may be charged with democide. This includes the people giving the democidal orders, the people carrying-out the democidal orders, and even the people who fail to resign.

4/ Police and militia shall be the sole method of suppressing rioting and disorderly assemblies and protests. Never shall the military get involved with assemblies or protests on penalty of death.

5/ All armed forces shall be designated as either military or militia but not both.

6/ The national Over-Senate shall be the supreme commander of our nation's military. No general shall command more than 10% of our nation's army. No admiral shall command more than 10% of our nation's navy. No air commander shall command more than 10% of our nation's air force.

7/ The various county Main-Senates, by a single vote of all then-serving county county Main-Senators, shall command all militia forces in their county regardless of the origin of those militia forces. Seconded militia forces may be recalled by their

own county Senate at any time if they are unhappy with the way their forces are being used. However, until then, all militia forces shall be under the command of the county they are deployed in.

8/ militia forces shall not be used outside the borders of the nation for any reason. Except for natural disasters and foreigners in our nation, military forces shall not be used or deployed inside the borders of our nation.

9/ Any attempt to use militia forces outside the borders of the nation, or to illegally use regular military forces inside the borders of the nation shall void and cancel the enlistment agreements of all people involved.

10/ There shall be no military parades in our nation. And no military assembly shall occur within any community with a population over 200,000. Military hardware parades shall be seen by all as a way for tyrannies to intimidate and oppress their people. The land of the free shall not put its weapons on display like this.

11/ Military and militia service shall never increase the likelihood of compulsory service under a wartime draft. If regular troops must be drafted, then they must be randomly drawn from the general population on the basis of their birthday and birth year as if the militia did not exist. Also, only the Sub-Senate may authorize a military draft.

12/ In our nation, we hold that invading armies are the #1 cause of war, and that millions of well-armed citizen and militiamen are the #1 best and cheapest way to stop such invasions.

13/ In our nation, we are still skeptical that the world has seen the end of war and tyranny. And we think that free men must all themselves take precautions against the rise of tyrants.

14/ Another word for military is a "standing army in time of peace". This was something widely talked about and feared in America of the 1770 & 1780s. It is thought that our new approach using Centi-Nome armories is a good way to assure our national defense. We shall neither have a standing army in time of peace, nor have many dangerous weapons of war floating around. And the people will only have access to appropriate civilian and armory weapons.

15/ Each day, all police and armed forces personnel shall repeat how they are loyal to the nation's Senate and how they are only loyal to their commanders so long as they obey the Senate. Calling for, or attempting to invoke loyalty to commanders over the Senate shall be considered a form of democide. Each day, all Armi personnel shall repeat how they are loyal to the nation's militia and they are only loyal to their commanders so long as they obey the militia.

16/ For public safety, government shall not have military domestic military bases where non nuke bomb blast and debris will be likely to harm nearby civilians.

17/ The number of men in the part-time militia shall be between 2 and 3 times the number of men recently deleted from the military.

18/ In order to keep war from being used as a way to purge the people of their best, all those drafted to fight shall be drafted by birthday-lottery for an age range. Also, a 75% overmajority shall be required to draft our citizens to go and fight in a foreign war.

19/ Another ancient well-worn path is to misuse a nation's military force in helping to enforce parasitic tax collections

and other debt schemes. For this reason, the military and militia forces of our nation shall be prohibited from enforcing matters of debt, debt collections, tax collection, treaty enforcement, tax collection, debt collection, taxation, tax collection, dues payment, bills payment, taxpayer revolts and tax collection.

20/ Governments may use police to enforce financial obligations upon individuals debtors and tax payers who fail to pay their debts, however, when a large portion of the people in a community come under threat of dispossession due to economic crisis, then the problem shall be thought to require that lenders get put on hold and debts get rescheduled for a fair amount of time.

21/ The military shall be prohibited from keeping the peace at assemblies and protests. If police are unable to keep the peace, then the militia shall be called upon to keep the peace.

22/ The militia shall be organized to maximize enlistment of quality men, and minimize time investment and cost. Therefore, basic militia service shall involve no more than 24 hours a year of group training and 24 hours a year of video training. Achieving militia rank involves more time and training.

23/ All citizens over 13 shall be required to watch 1-hour of Senate-assembled public service media every teneth.

24/ There shall be no physical conditioning of militiamen.

25/ At least 1/2 of militia training shall be about disaster contingency plans, riot control, and being a supplemental police officer in times of crisis.

26/ The various county Senates shall have the power to:

a/ Require that all militiamen keep their arms with them.

b/ Call up militiamen to help with emergencies.

c/ Grant militiamen limited powers as emergency police officers.

d/ Give a firearm carry permit to certain classifications of militiamen, if they have the screening and training certificates.

27/ militia service may be resigned in time of peace at any time with 30-day's notice.

28/ militiamen shall focus on sniping and other defensive guerrilla warfare measures so that it becomes unthinkable for anyone to invade our nation.

29/ The various county militias shall elect their Didec, Dient, and Dimil leaders. militias shall not have great generals, and there shall be no greater power in the militia than a dimil in command of 2,000 minutemen committed to dropping whatever they were doing if they are truly needed.

30/ There shall be no uniforms as the militia, for it is stronger if it blends in. They will however have optional caps with their militia company number on them.

31/ No man shall avoid the draft by paying money or obtaining a person willing to be a vicarious. No academic enrollment shall qualify for a military service deferral.

32/ Confirmed Senators and full Ubigs shall be exempt from military service if they wish to be exempt. The Senate shall make every attempt to exempt the smartest from dangerous and combat roles.

33/ No weapon system or military hardware in our nation shall be stored in less than 20 stockpiles, unless there are less than 20 copies.

34/ Immigrant citizens may serve in the militia and military, however they should not have roles where they can cause

much damage. Ishtarian immigrants may be excluded from many areas of the military for security reasons.

35/ In order to be cockpit crew on military aircraft, or command a military sea vessel, or serve as an officer in our military, or be a militia dicent, both parents of the person must have been citizens of our nation at the time of the person's birth. Only native-born citizens shall be permitted to command men in the military, or serve as a military officer, or work in our nation's intelligence administration, or be given special clearance to work in critical military or defense operations. Only people whose parents were both full citizens born in our nation shall be given top secret clearance, or serve as top military officers. All workers in national intelligence under the old system shall be reviewed by the Senate before being allowed to work in the new intelligence gathering apparatus. Those intelligence workers that have had controversial work assignments, connections, political ties, questionable dealings and the like shall not be allowed to work in intelligence, either for government or in the private sector or for foreigners until and unless the Senate approves of them for this work.

36/ All police officers and military officers shall be required to join the militia and spend at least 12 hours a year training with the militia. This is intended to connect both the police and military to the militia, the core defensive body of the nation. This is also intended to help impart valuable knowledge to the militiamen. Government shall not impose an upper limit the number of citizens in the militia, however the total budget shall not be changed, and the pay shall fall.

37/ Each person in the militia is supposed must know their district number and have a phone app map of their district divided into 1,000 sub districts, so they can call in anti-drone defenses and other forms of help when they spot enemy drones. Other citizens may also use this app to precisely call in drones or other countermeasures located at 123-456-789. Finally, each township tower will have a spotting level at the top. This tower will be able to see up images from the video towers on the road poles between the townships. They may also communicate with other township observation towers.

38/ All of the new townships shall be designed with a few and varied firing holes per unit, always from behind a thick concrete wall. The outside looks normal, however an inside the wall cone can be removed to fire from.

39/ The various branches of the military, the militia, police, fire, and EMS shall all have feeds where they post videos of situations and commentary that the people can learn from. The best lessons here will be ubiquitized and put in student education modules and driver safety modules.

40/ The term insurrection shall not be applicable:

a/ Unless the people involved were armed. Insurrections without firearms or large numbers of brandished knives shall be considered protests or assemblies of the people.
b/ At least 50 establishment security people or 5 Senators are intentionally killed by the side being called an insurrection. The term violent insurrection shall not be in any way applicable until at least 500 establishment security people or 50 Senators are intentionally killed by the side being called an insurrection.

41/ No charges for any insurrection shall be tried by the then current Senate bringing the charges against the defendants.

All charges for insurrection must wait at least 10 teneths before the trail may begin. Also, unless the people being charged for insurrection were actually in arms, or carrying arms, at the time of the "insurrection", they shall be allowed to remain free pending trial.

42/ The primary objective of our military is to protect our nation, and nothing shall be allowed to detract from that. This includes fantasies about gender equality in combat rolls, and tactical decisions (currently, only 2% of chess grandmasters are females.) It also includes fantasies about tolerance of homosexuality in the military. Homosexuals are all by nature serving in the military for impure reasons. The problem is that those who are in the military half for duty and half for homosexual lust are just not as brave as those who are serving entirely out of duty. Duty is a great wellspring of bravery and sacrifice, while homosexual lust is not. Also homosexual lust is particularly selfish, while duty is the exact opposite. Also finally, lust adds impure dimensions to positions of dominance and command and for these reasons it must be minimized in the military. So it is not though blind intolerance that homosexuals have traditionally been prohibited from the military, but to keep the military brave, united, and powerful. For these reasons, we shall have it that that no open homosexuals or transsexuals shall be allowed in either the military, or in military support roles.

43/ It is the stuff of fascists and Nazis for militia to beat people, or break windows, or destroy businesses, even illicit businesses. The military and militia shall not be used for these purposes. The militia exists to defend the nation from foreign invaders and also to defend the nation against those who would usurp power from the people, and no other reason.

44/ If the Senate votes for the arrest of the police, or certain police officers, the militia shall be allowed to use all reasonable force to achieve this directive. In such cases, the powers and advantages of police transfer to the militia, and the police shall be criminals if they resist arrest.

45/ Except for our internationally recognized infectious disease research islands, all biological weapons development shall be prohibited in our own land.

46/ Diversion of government arms for purposes not authorized by the Senate shall be a capital offense. Diversion of large sums of government money for unauthorized foreign: wars, warlords, oligarchs, dictators, and weapons research shall also be a capital offense.

47/ We shall strive more to develop military and militia arms that favor defenders, instead arms that favor attackers. This is so that when others copy our weapons, or our weapons fall into the wrong hands, the world will be safer as a result. Also, when we make defensive weapons, we shall plan to produce them as some ratio to the general population, such as 1-device per citizen fighter, or 1-device per 50, citizen fighters. Also, it shall be the intent for all our defensive weaponry and systems — to make millions of units with interchangeable parts and ammunition. These standard militia arms should be as indestructible, durable, jam resistant, easy to take apart and tolerant of various conditions as the AK-47.

48/ Violent groups (including organized crime groups, drug gangs), that are at least 1/4 made up of foreigners, immigrants and those with extensive ties to foreign nations

may be treated as foreign invading army when they take up arms in our nation. These shall also be tried by the military as an invading army. Where violent criminal mafias and gangs have bases in foreign nations and use these bases to engage in crimes in our our land, these bases may be neutralized by any means that is found expeditious, including airstrikes.

49/ The name army shall be changed to the Italian word Armi, meaning arms. This is because the new full-time Armi will be mostly about keeping the Arms and logistic systems of the part time militia functioning and ready for full-time deployment whenever they are needed. Also, the army shall be thought of as being a part of the militia, the full-time job part of the militia, and entirely loyal to the militia.

a/ The primary role of the army/Armi shall be providing exactly the sort of support not provided during the revolutionary war until the battle of Yorktown: namely, sufficient arms and other supplies for the militia in its millions of men to repel invasions. To be clear, the roles of the Armi are in order:

b/ Arm the militia, including re-supply of ammunition to supplement the large supplies already in each Centi-Nome Armory.

c/ Train the militia and cater militia days with barbecue food.

d/ Provide additional "heavy" equipment such as artillery, handheld missiles, anti-aircraft and anti-drone systems to the militia and other branches of the military in times of war or invasion.

e/ Monitor supply/stocks and staffing of the military and militia.

f/ Help organize the militia and monitor the success of its activities and criticize plans.

g/ Help organize the military draft in case of invasion.

h/ The Armi should be viewed as the Arsenal of Democracy branch of the military that develops, produces, maintains, stores and delivers our nation's military equipment and military supplies such as rations and ammunition. Wherever practical, each branch of the military shall develop and produce its own weapon systems and military goods. However the stuff used by all branches (like .50 cal bullets and rations) this shall be procured by the Armi.

i/ Backup military transport logistics, including our stocks of bought-up end-life passenger aircraft and big-rig trucks. Basically, we are buying these up around the last 5% of their useful life and then extending their life by only using them for a few hours a year.

50/ The Armi shall have a large number of army reservists, particularly weapons specialists. The army also trains a great number of part-time specialists. The army also has systems for calling up and training large numbers of fighting men very quickly. The Armi shall be funded and directed by the national Senate. In matters of big weapon systems kept for the navy, marines, and Air Force, and the militia, the army shall obey the national Senate, even if these big arms are pre-distributed to, and kept in the Centi-Nome Armory system. The militia weapons in the armories are all up to the county Senate to deploy, along with the men of the militia. This decision to have a call to arms (full or partial) belongs to each county Senate, where it previously belonged to each state governor.

51/ Our founding fathers (the real ones, not the fake ones

Hamilton, Madison): Our real founding fathers had a strong aversion to a standing army in time of peace. We shall respect this idea in that we shall have no standing, nationally controlled, fighting force that is allowed to act within our nation, except where the militia and county Senates rightly request needed support.

52/ People in the Armi can all be sent to overseas deployment. Combat army forces can be sent into combat overseas. Non-combat army forces can be sent overseas to bases that might be attacked suddenly by enemy forces. There shall be different pay rates and benefits for army combat enlistment, army non-combat enlistment, and militia enlistment, where there is no distant deployment. Overseas deployment of Armi specialist fighters shall only happen where the marines don't have enough men or equipment.

53/ Where there are wars, we shall have a stage between exclusively using our professional military and drafting people to fight like Ukraine recently did. In this stage, we will call for volunteers offering large sign-up bonuses.

54/ We shall have overseas marines and Air Force and navy, as well as army. But at home it will be only the militia and the army, and the marines on our southern border.

55/ The armi will keep a large number of junk trucks that are going out of service because they are too expensive to maintain. Just before this time, the Armi buys the trucks very cheaply and keeps them around on blocks, fuel tanks drained, without a battery for another 20 years in case our nation needs them for logistics during a war or crisis. These will be 18-wheelers, as well as smaller sizes of truck, and even pickups.

56/ Where aircraft is piloted by part-time Armi pilots at home, this shall be called the army Air Corps. Every citizen with a pilot's license present or past in our nation, shall be required to register with the Armi Air Corps.

57/ As a safety measure, we shall say that the Armi only gets access to 50 of our nation's 5,000 Centi-Nome armories at a time. We shall also repeat here that the Centi-Nome armories are all under county jurisdiction, not national jurisdiction. However part of the Armi goes around to all the Centi-Nome armories and makes sure the weapons are all stored properly and are all in working order. The Armi will also manage the maintenance of the advanced weapons systems as today, however with these, the Armi will focus more on having instructors to assure a large base of certified operators in the militia

58/ The armi will have mostly full time jobs, while the militia will be almost exclusively part time jobs. However, instead of having 480,000 full time servicemen in the army. Perhaps 110,000 stay with the army for training and weapon system maintenance, 110,000 shift over to the marines as combat forces, and the other 260,000 are replaced by a million militiamen that meet for 8 hours per 172 hour month, and cost 5% of each full-time servicemen. So we cut our army wages in half, while increasing people to defend the homeland by say 300% or 400%.

59/ The army trains and outfits the militiamen and helps maintain, ship and distribute equipment, but it does not have any say over their hiring, enlistment or tactical deployment.

60/ The Armi-militia shall be the force that manages the militia

arms. The army is the supply and support side of the militia. When the shooting starts, the militia takes over command of the army, and how this happens is very well drilled into everyone, especially for the field commanders

61/ The Armi uses its base supply system for its inventory. The Armi also uses its own logistics system with its own trucks and rented trucks in convoys. Given the restructuring of our army/armi, we will have a large army facilities for feeding and providing medical care for large numbers of people. We may elect to send a portion of this force to feed and provide medical care for people in disaster areas. Thus, the army is more of a supply and logistics and feeding agency.

62/ The army shall also have people specialized in ramping up output in various industries under day halving and double day halving. Double day halving is where we run 4-shifts 22 hours a day in key industries. These people test key industries for this from time to time in all key industries. All manufacturing industries should run double day halving for one week every two years. The Armi also helps make sure that our nation never becomes dependent on any key industries outside of North America.

63/ The army shall be the branch of government that orders and optimizes all the government's large runs. The Army commissary shall make all the official uniforms of police, fire, EMS, and it shall also make a couple lines of inexpensive and durable clothing, including children's uniforms, and work clothing, including especially traditional American blue jeans, all at a low cost high quality.

64/ The US Army, which shall be entirely funded by the Senate shall now be a thing that is almost entirely about supplying and re-supplying our fighting forces at home and abroad. So the Army shall make weapons and equipment in vast quantities for very little money each. The Army keeps the militia equipment in order. and double checks that the weapons don't go missing.

65/ All the new Army supply managers shall come from the Militia, and they are elected by the militia. They are the people that the militia elects to secure the nation's anti-war supplies, to keep war from profiting anyone. These elected army leaders also make sure the armory weapons and ammo is all well kept.

66/ Standard configurations of car and truck drive-frames (engine, transmission, differential, two axils and a frame) shall no longer be imported into our nation, due to military and war preparedness needs. All must be entirely built here by either domestically or foreign owned factories. Also, all drive frame factories can only be open 12 hours a day 182 days a year. This way, if we need to quadruple output, we can do that overnight.

67/ The army is not only supposed to have approved plans for all sorts of replacement factories in critical industries, but a large number of people who have built those factories.

68/ We shall not have a handful of massive suppliers in any industry. This is a situation that not only supports pricing shenanigans, but it make us more vulnerable to attack and sabotage. Our efforts to have many smaller suppliers instead of a few larger ones shall be thought to be a thing that prevents Standard Oils and Exxons, and, but also a civil defense thing that will make us harder to attack. So let's have

at least 200 refineries, 100 owned by various counties, and 100 owned privately by county locals only from other counties, with no group able to own more than one refinery. Also, refineries can only be operated 180 days a year for 12 hours a day, and these must still supply the nation's refinery needs. And in any time of refinery shortage, the refineries can be allowed more days until the capacity can be put at the appropriate level. Also there should be concrete walls and exaggerated distances between the various parts of the refineries that are so flammable and so vulnerable to air attack.

69/ The army shall take over the strategic petroleum reserve and a food bank, where it shall roll-over a 90-day supply of fuel and a 180-da supply of dry grains and seeds for the nation. This may be extended and other departments may do the same thing redundantly. The Army shall also offer verification services for other places where things are supposedly being stored.

70/ Our nation shall have lots of small truck routes for civil defense purposes. Having multiple roads a fair distance apart, and a standby truck fleet makes it much more difficult for an enemy to cut off shipments in our nation.

71/ The regular Air Force shall be international and much more offensive in nature. The Armi Air Corps will be about domestic air power and repelling domestic invasion and empowering the militia. The Armi Air Corps will have a heavy bias towards small inexpensive aircraft, drones, and counter-measures for these things, as well as F-15s and jet drones that ape F15s on radar. The Air Force will be more about stealth fighters and stealth bombers and foreign bombing raids.

72/ We shall have 4 rival anti-drone corps for navy, marines, Armi, and militia. Rather than developing offensive drone tech, we shall push more towards defensive drone tech.

73/ One of the Navy's slogan to be painted on all of its smaller ships shall be "Free men need a navy to stay free of pirates."

74/ All the people serving in the militia together will know each other, so when there's a call to arms, they shall police their own ranks. So when they go to the armory to collect their militia weapons, they will tape a version of their voter ID papers to their chest and appear on video when they collect their arms and militia kits. This shall be drilled, and it will enable everyone to quickly collect their militia equipment.

75/ The armories shall look like a row of tandem one car garages, with hooks on the walls for all the militia arms, backpacks and ammunition for each 100 men. There are maybe 70 of these one car tandem, garages at each Centinome armory, or 7,000 militiamen per armory. There are 35 garages like this back to back with a common 3m hallway between. The walls are tilt-up 20cm concrete, and the roof is 8" concrete panels bolted down and roofed. There are also extreme eaves with a 2.5m vertical wall a few meters away from the "garage doors". Thus in an air attack, a bunker buster will only blow the doors off one cell and the damage will not spread too wide. Thus the armories will be relatively impervious to air attack. Some people may call this overkill to have one of these 70 garage buildings per 50,000 people. However, when we consider the cost of the garages and the weapons wholesale, if we make them all ourselves by the

millions, the cost of each tandem garage and exterior wall and part of the hallway is only perhaps 3 day's wages per person to build (\$700 x 100 = \$70,000). We can't afford not to do this, it will end nearly all invasion wars.

76/ During a call to arms, the militiamen who are driving, are supposed to pick up their fellow militia men on the way in if they have room in their vehicles so there is little need for parking.

77/ We shall have a bias towards putting our military bases near our southern border, yet away from the coastline, such as in places like Fort Bliss and Junction, Texas some of our biggest military bases will go in these areas, with the attack aircraft and drones being a warehoused further towards the center of the country.

78/ We shall have no central Pentagon control over the military, and the army will work according to a separate budget than the Marines and the Air Force. all of these branches of the military shall be separately budgeted and separately managed, and they shall all have multiple headquarters so that it's harder to attack and wipe out our military leadership and headquarters, and all of these headquarters must be towards the middle of the country and in areas that are hardest to attack.

NR'123. TERRORISM AND WAR MONGERING

1/ We shall ponder the words of Procopius, Secret History, c.565 AD, 21.21: "When it [the genocide] is destroying the knowledge of past events, and when the license which impunity gives encourages the victimization [slaughter] of everyone encountered, it [the purge] inevitably swells to such proportions that it is not even possible for the minds of the sufferers to grasp its totality." [Who is saying this? And to who is the audience?]

2/ We shall ponder the words of Procopius, c.565 AD, Secret History, 10.3: "When a man cares nothing for the infamy of his actions [because he is using an escape goat] and does not hesitate for fear of being known as a revolting character, no path of lawlessness is closed to him, but armed with the shamelessness visible at every moment in his face, he advances cheerfully and without any misgivings to the most loathsome deeds."

3/ We shall ponder the words of Lucretius, On the Nature of the Universe, c. 60 BC, Bk 2.1: "What joy, again, to watch [two] opposing enemies assembled on the field of battle — when you yourself have no part in their danger. This is the greatest joy of all: To stand aloof in a quiet citadel, stoutly fortified by the teachings of the wise. Gazing down from those heights on others wandering aimlessly..."

4/ We shall all ponder the words of Herodotus 5.92: "Thrasybulus invited the [messenger] to walk with him from the city to a field where corn was growing. As he passed through the cornfield, he kept cutting off and killing all the tallest and best stalks of corn which he could see, until the finest and best-grown part of the crop [generation] was ruined. Peri•ander [surrounding man] seized the point at once; it was perfectly plain to him that Thrasybulus recommended the murder of all the people in the city who were outstanding in influence or ability." Here we see how the parasitic spirit of the de-ex-pull, sometimes called the devil

wants to kill off the smartest of the host part of the world, so they can better rule their human livestock. Gr. aristo = the best, highest or tallest. And Thr•asy•bulus breaks down as Gr.thur= sacrifice, kill, burn, destroy + asy=us + Gr. boule = the will, or a directive.

5/ We shall all ponder the words of Smedley Butler:

a/ "We must take the profit out of war."

b/ "I spent 33 years and four months in active military service and during that period I spent most of my time as a high class muscle man for Big Business, for Wall Street and the bankers. In short, I was a racketeer, a gangster for capitalism. I helped make Mexico and especially Tampico safe for American oil interests in 1914. I helped make Haiti and Cuba a decent place for the National City Bank boys to collect revenues in. I helped in the raping of half a dozen Central American republics for the benefit of Wall Street. I helped purify Nicaragua for the International Banking House of Brown Brothers in 1902-1912. I brought light to the Dominican Republic for the American sugar interests in 1916. I helped make Honduras right for the American fruit companies in 1903. In China in 1927 I helped see to it that Standard Oil went on its way unmolested. Looking back on it, I might have given Al Capone a few hints. The best he could do was to operate his racket in three districts. I operated on three continents."

c/ "Beautiful ideals were painted for our boys who were sent out to die. The was the "war to end wars." This was the "war to make the world safe for democracy." No one told them that dollars and cents were the real reason. No one mentioned to or them, as they marched away, that their going and their dying would mean huge war profits. No one told these American soldiers that they might be shot down by bullets made by their own brothers here. No one told them that the ships on which they were going to cross might be torpedoed by submarines built with United State patents. They were just told it was to be a "glorious adventure".

d/ Victory or defeat will be determined by the skill and ingenuity of our scientists. If we put them to work making poison gas and more and more fiendish mechanical and explosive instruments of destruction, they will have no time for the constructive job of creating greater prosperity for all peoples.

6/ We shall ponder the words of Thomas Paine:

"There are men in all countries who get their living by war, and by keeping up the quarrels of Nations is as shocking as it is true." Terrorism shall be defined as the use of violence and fear to move the most emotional and animal-minded people, thus steering the heard of men, the mob, as if they were animals.

It shall be considered a fool's errand to attempt to define all the many things that can be terrorism. We might as well try to define all the many things that can be frightening.

7/ The words democracy and dinosaur come from ancient Greek diemos = terror. Thus we understand how some Greek speakers conceived of democracy as government of a flock by terror, terrorism at least 2,500 years ago. So to the greatest extent possible we all need to call-out and counteract these forces in our democracy.

8/ We must always be on guard that our government of the people by the people and for the people does not become a

diemocracy (Greek Diemos = terror, as in dinosaur) driven this way and that by terrorism. The definition of Terrorism shall be: "the shocking use of violence on a civilian population to drive a political goal". However, the nation's Over-Senate may declare any violent act or threat of violence as terrorism with a 2/3 overmajority. The people asking us to define terrorism were trying to bewilder us with a distraction.

9/ The Senate shall be allowed to use infrastructure attacks, group punishment, and escalated retribution against groups and nations that use, or condone terrorism. Initially, the escalation should be less than 20 fold for terrorist attacks. If the terrorist group keeps attacking, or the attacks is as large as a small war incursion, then there should be no proportionality requirement. We must also always be mindful that third parties might be provoking conflicts for the arms and war equipment industry income. Or they may want the mighty nation war weary from fighting their "Viet Cong". Or they may want the poor, oil-rich scapegoat nation to go totally police state, so that it's oil can be kept off the market. We must also always be careful that a third party is not once again driving Rome into garrisoning 7 legions in the Mideast. (42,000 fighters in a world with 20 times fewer people). That is like an imperial power today garrisoning 840,000 troops in the Mideast.

10/ Regarding hostages and hostage situations:

a/ Government may only negotiate with terrorists and hostage takers when it is reasonably sure that it can and will act to severely punish their cause and their people in the future.

b/ It is our law that contracts signed under duress are invalid. Likewise government shall be free to later ignore deals made with terrorists. so when government agrees to terrorist demands, it isn't necessarily valid. Doing the opposite and abiding by terrorist promises is asking for trouble.

c/ Where nations such as China engage in shadow terrorism in the form of unharmed hostages kept by government in jail, we shall escalate the matter by various nonviolent means such as obnoxiously variable: tariffs, trade embargoes, visitor entry requirements, and cancellation of long-held visa status for people employed anywhere around our tertiary schools, research institutions, and government. We may also require that all of our own citizens obtain a permit to visit the dangerous hostage taking nation on penalty of jail time. We may also impose special product standards on various imports and industries from the hostage taking nation. We may also impose lower tariffs and less expensive trading situations on third nations to harm the nation taking jail hostages.

11/ We call attention to the Chinese term Hostage Diplomacy" in reference to the jailing of foreigners visiting China to achieve national political aims. Now people can say things like: "China claims that the arrests were for a genuine crime, but we think it looks like hostage diplomacy".

12/ We shall have a 30-year statute of limitations for retribution against substantially identical tyrannical regimes (and their government leaders) with regard to when they take our people as hostages, or where they support terrorism. After 30-years, everyone is supposed to forget about it.

13/ Our nation shall do what it reasonably can to prevent people from profiting from causing, or fanning the flames of war, terrorism, hatred and political instability. To aid in this

objective, our nation shall do what it can to help keep prices near war zones from being much higher than outside.

14/ Our nation shall sensibly and strategically accumulate and decumulate large buffer supplies of all key commodities. When there is a war, or shortage, the government shall sell these buffer supplies to spoil the profitability of war. As well, when the price of any key raw-material or commodity rises significantly due to war, government shall turn its attention to helping increase output and market supply so as to ruin things for war profiteers.

15/ Our democracy shall not act like a dumb animal herd in the face of terror. No act of terrorism, no matter how severe, shall be allowed to bend the decisions of our democracy as the terrorism was intended. To do otherwise is to invite terrorism and subjugation.

16/ Once a nation has been declared as supporting terrorism, or at war with our nation, or driving other third party nations towards war with us, the Senate may with a simple majority of the Security Sluice inter or deport any named individuals of that citizenship or birth nationality, including those who are immigrant citizens of our nation. With regard to immigrants from these particular problematic nations, the Senate shall be free to:

a/ Discriminate based on affiliations and associations, as well as public comments, including religious, political, and economic comments for all immigrants from these particular nations.

b/ Issue blanket surveillance authorizations for all immigrants from these particular nations.

c/ Waive all requirements of due process for all immigrants from these particular nations.

17/ When terrorism happens for no clearly state reason, it should be presumed to be furthering a cause that must be kept secret.

18/ All laws regarding counterterrorism since 1990 shall be repealed. This expressly includes all parts of the so-called Patriot Act, the find all the patriots act. If the Senate wishes to reinstate them, it shall have the right to reinstate them on an individual basis, so long as they conform to this constitution.

19/ Some things we can do to sour the economic incentives driving the world towards war and terrorism are:

a/ Keep large stores of foods and supplies, so that these may not be profited from in war.

b/ Avoid using the same companies we use to provision our military in times of peace. Otherwise these companies can drive for war.

c/ Where our nation uses private companies to develop weapons equipment, our government of the people and by the people shall own all the IP, as well as the full cooperation of the development team with the next phase. The main consequence of this is that government will always seek an open bid to develop, and another open bid to manufacture each run of a given piece of Government mass produced equipment.

20/ Islam and Ishtar shall be regarded as things that by ancient plan use violence at their periphery. The lands that have already been settled, the lands that are within Islamic territory, these are very peaceful most of the time. It's only the edge of the Islamic territory that is violent. This is where the

new people get squeezed out to. The people behind them are pushing them to be as confrontational and violent as possible for the good of the group. It is like a Roman battle phalanx in slow motion. But they all get pushed up eventually. The whistle blows, everyone gets pushed up one more person closer to the sword-man position on the battle line. There is something similar to this where Islamic north Africa is forever driving into the Christian oriented part of Africa. This also exists where Islam is driving into India. Once we realize we are fighting the systemic peripheral ooze or secretion of Islam's empire on its borders, then we understand that this is not merely an accident or annoyance, but a terrorist thing that exists by design in Islam and throughout Islam. This is why it is so important that we halt and even drive back Islamic territorial spreading. With this in mind, the Senate shall have the power to use airstrikes against communities engaging in Islamic oozing terrorism wherever it is occurring.

NR'124. OATHS AND SYMBOLS

1/ The citizens of our nation shall not, like slaves, waste their time on pledges of allegiance and songs of devotion. No pledge or devotional songs shall precede any public or government meeting or broadcast. However, all government employees, military, militia and police people shall recite the following three vows in groups at the start of every work day:

a/ I vow help my people to remain free,
and not to help enslave, exploit, or harm them.

b/ I vow that the people of my nation are my ultimate master,
and that I shall uphold their decisions as expressed by their duly elected Senate as the ultimate power I obey.

c/ I vow to disobey any group that tries to usurp the powers of my nation's Senate, or countermand its orders, even if they are my commanding officer, and even if they are the world government.

2/ The oath for all judicial matters shall be:

"I swear to tell the whole truth.

I swear not leave important details out.

I swear not to distort or mischaracterize.

I swear not to be biased.

I swear that I do not have any un-declared conflicts of interest, or grudges.

I swear that I have not received compensation for my testimony.

I swear that I will not accept compensation for my testimony in the future.

This is my oath of perjury to the spirit of justice,
and the just courts of my great land."

3/ The Anthem of the US shall be:

"Oh beautiful

are heroes proved

in liberating man.

Who more than self

their freedom loved,

your beacon shows the way

America, America,

you are truly blessed

Cuz we the people

Rule our land

From seat to elected seat"

4/ All uniforms for our nation's military shall be emblazoned over the heart with the lady liberty art, the circle and torch part, from the July 4, 1934 issue of the Saturday Evening Post. This is done so that our military remains close to its power source, its perception as force for liberty/liberation, light/truth, and justice. The Lady Liberty insignia is intended to:

a/ Protect our military men from harm because they will be perceived more as liberators.

b/ Keep our military men going in the correct direction, as liberators.

c/ Keep others from using our military men for evil, because our military shall see itself as a liberation and protection force.

5/ All honorably discharged military shall be free to wear their branch's serialized and issued caps, but no other person can do this. The number links to their anonymized facebook page.

6/ Lady Liberty's torch symbolizes the way America is the beacon of democracy, and the leader in a world of darkness. Our free and open media is supposed to dispel all sorts of myths like the-world-is-flat myth, or the hole in the ozone layer myth, or the CO2-is-a-problem myth. The book is the same as the Anti-kal-laws book and it implies that our democracy is fake. Therefore it shall be deleted. So now we imagine that all future Lady Liberty's will have their left arm outstretched in a welcoming way, the Christian helping hand of the Eu•trope•ianists that founded our great nation.

7/ Lady Liberty shall be moved to Washington Rock in New Jersey. The plaque shall be changed to:

"We are light, liberty & fairness,

And this is why we succeed".

The old plaque with the words of Emma Lazarus shall be removed and put in a museum identified as propaganda.

8/ The national flag shall be the Betsy Ross flag with the word "LIBERTY" inside the ring written in white. The blue part with the ring of stars shall be enlarged to the point where it almost matches with three sides of the flag rectangle. Then the vertical rectangle to the right is made from red and white stripes. So there is a big ring of stars and inside the ring is the word "**LIBERTY**". This flag shall be known as the "Liberty Flag of the United States", or the "US Liberty flag". When we wear this flag on our uniforms, it means that we are liberators and this greatly magnifies both the power of our freedom fighting forces over other forces, and it also greatly magnifies the will to enlist and liberate people around the world.

9/ We shall also fly a Gadsden, "Don't Tread on Me" flag, on all our nation's warships, and military bases. Only militiamen and honorably discharged veterans may wear or display the term "MOLON LABE" insignia goods. The Gadsden flag and the Molon Labe flag shall have all the protections of our nation's liberty flag.

10/ Nobody shall ever be punished in any way for carrying or displaying any of our nation's flags. Where people punish others for this, it may be considered a felony. This shall be so especially for government workers and educators.

11/ We shall all be mindful that during times of war, the enemies of freedom may seek to purge our nation of its best and brightest, its "pharaohs best born". Therefore, everyone shall do what they can to hide the identity and location of all our leaders

12/ We shall no longer accept any Swiss flag that leaches off of the goodwill of the international red cross.

13/ We shall all ponder 2 quotes from Ronald Reagan:

a/ "Armed aggression must not succeed."

b/ "Don't let anyone tell you that America's best days are behind her"

14/ There shall be no oath to support this constitution against future updates elected by the people as called for herein.

15/ The names of the following great Americans shall now be thought to imply American values as follows:

a/ Benjamin Franklin implies: Open source free IP.

b/ Paul Revere implies: A responsive sneaker-net

c/ Patrick Henry implies: Using your own eyes and thinking for yourself.

d/ Thomas Jefferson implies: A level playing field for the poor.

e/ Thomas Edison and the Wright brothers imply: America's long lead in innovation.

f/ William Knudsen implies that economies do better the more we ask of them.

g/ Henry Kaiser implies the flood gates of American industry.

16/ There shall be no fascist fasci symbolism in our nation. In the Vindolanda tablets we read about a foreigner being beaten/whipped by rods by a bunch of soldiers as punishment. This is what the rods of the fasci are for. This is what the fasci symbolized. It was the accouterment for whipping people with a dozen switches, perhaps 6 or 12 at a time. This caused little long-term damage, but hurt terribly. There was also the ax which symbolized the power of removing the thief's hand or the killer's head. The Roman government lictors after all had the power to hand down capital punishments. And the leather strips are for tying a person, arms extended outward to a 1x5 inch transtrum board. Transtrum boards were the Roman version of handcuffs. In the 1959 film Ben Hur, we see the way a transtrum should have made a man unable to fight.

The transtrum boards had holes for the leather straps where the wrists would be tied to the board by means of the leather straps. Also, there was a hole in the middle of the transtrum board. They would use this hole to set the transtrum board on a big spike of a nail hammered into the top of a small cut-off tree. So people didn't bear whole crosses at their crucifixion, they only bore the cross-member, the transtrum, the ancient version of hand-cuffs. And when they would crucify someone, they would be nailed or spiked through their hands to holes they used for the leather straps. Then the lictor would recover his straps, and use these straps to wrap up his hatchet and whipping sticks. And this is what the fasci symbolizes. It is the complete opposite of any symbol we would ever want in our land of the free. It really is a 180-degree wrongheaded cracked liberty bell sort of thing that we never want to use again. In fact the word fascist should be forever tainted by the symbolism of the fasci.

Also, the synchronized multi-point whipping by the fascists also existed to confuse Roman men about the pain of battle wounds in conversations with the men who had experienced both. Thus, the Roman men came from a culture where more men were willing to take risks in battle. Thus they were more useful as a frontman fighting force for the Mideast. For these reasons, all fasci and fascist symbolism shall be banned as symbols of the limitlessness of Arab fronting

odious tyranny and the oppression of the transtrum crucifixion it ultimately lead to. In fact, crucifixion should be regarded as one of the defining gifts to mankind that the devil spirit Ishtar has brought to the world. And the way they would crucify people just outside the town gate, that was designed and intended to shock and traumatize those Rumi flock, and especially the children, on their first trip out of the town's walls. (Arabic Rumi = Roman).

Crucifixion and FGM really belong at the top of the list of the many gifts of Ishtar and Islam. And they are followed by slavery, and the Roman colosseum spectacle death camps, and also countless planned famines, and staged wars for profit. All these horrible practices are from Ishtar otherwise known as the devil, and all of these things say very clearly what Ishtar is, and what Islam will become if we in the outside world let it be. After all, Ishtar loved it when its Roman imperial courts and its famously corrupt Roman government was able to threaten people with fascist whippings, fascist crucifixions, or being labeled corrupt or a traitor and then being fed to hungry lions as public spectacle. And this is not us, this is everything we hate about tyranny, and it is all from Ishtar.

NR'125. WAR AND MILITARY PRINCIPLES

1/ Our nation's military shall never be sent into situations in foreign nations where it is hard to tell who is a friend, and who is an enemy.

2/ There shall be no part of the nation's military, militia, police forces, or intelligence services that are exempt from Senate oversight. This shall especially include all government procurement and rules. Only the Over-Senate shall have the power to establish and update the rules of war and establish the rules of engagement in all war. The Over-Senate shall do this as a first order of business.

3/ No important aspect of government shall exist outside the purview of the Senate. And one of the most critically important, life-or-death aspects of government is war and military service, where the decisions of government are life and death for both society and individual.

4/ No law shall ever make our nation neutral or isolationist to ill-defined future events.

5/ Conquest, empire, territorial expansion, occupation, enslavement, and long-term peace keeping are inconsistent with our nation's principals. World domination and occupation of foreign lands is not a natural Western idea: but an Ishtarian parasitic idea. It springs from parasitic groups who would take-over and use foreign governments for enslave the outside world so as to secure a source of wealth for themselves. Our military, and our intelligence service shall not be allowed to conduct actions for economic reasons, except to prevent ishtarian profits, and to prevent monopolies from forming and to prevent other foreign nations and sub-national groups from intervening for economic purposes. In other words, we shall only use our forces, military, and intelligence agencies, to keep tyrants and monarchs and islamists from gaining control of other nations. And to keep other nations from developing monopolies, and other nations from dominating third nations for parasitic economic purposes.

6/ The military, militia and intelligence services shall initiate

no attacks and take no new military actions without Senate orders.

7/ Except in emergency deployments, the reasons, scope and objectives of all warfare shall be clearly stated by the Senate before it shall be permitted to take any military action.

8/ All three of the following shall be thought legitimate uses for our nation's military:

a/ Help the militia to defend our nation's homeland. (Priority-1)

b/ Help eliminate tyranny in the rest of the world where this appears to be reasonable and easy for us to do. (Priority-2)

c/ Defend the trade and overseas financial interests of our nation, and the cause of free trade in general. (Priority-3)

9/ There shall be no declarations of war when we are fighting pirates or terrorist, are people who take hostages or use ransom situations. Likewise, state-sponsored, terrorism or piracy don't need any declaration before military action is taken. In such circumstances, the state taking action, shall be regarded as dealing with a nuisance when it takes action.

10/ There shall be no military service without representation. The Military and Militia Sluice shall send an adequate number of its Senators to regularly visit all our nation's military bases and all combat zones our nation fights in. These are supposed to spend a week in each review area talking with people on the ground. These Senators shall regularly and independently report to the Senate, but they shall have no power to give orders.

11/ Every person in the military, and working for government shall have an alternate chain of command where they can report problems to their Sub-Senator, and the Sub-Senator will then report them to the Senate, which may look into the matter. The most important thing to report is when people screw-up and move-up. These are the exact people we don't want in command in our military or in command of government. These are the people of parasitic influence and sabotage in our government and military.

12/ Where we have had wars in the past 20 years, only combat soldiers may serve in the military as generals and admirals. Wherever practical, machines shall make no decisions in war about who to kill, but only those related to guidance and eliminating fast moving threats.

13/ The Main-Senate sluice alone shall approve all war weapon systems and all key components. Always, a realistic number of prototypes shall be considered and thousands of actual test users (especially designers) shall be directly interviewed by Senators. And the whole nation may comment. Thus we will not make any more "under-armored", under-gunned deathtrap Sherman tanks to be sacrificed, thrown to the "Tigers", the properly armored, properly gunned German tanks.

14/ It shall be held that war reparations incentivize war, and no war reparations shall ever be commanded, voted for, lobbied for, honored, or paid by our nation.

15/ Any use of our nation's military in a foreign police action lasting more than 90 days shall be conclusively considered an occupation or a war, and as such, inconsistent with our nation's principles. Thereupon, all forces must be returned home. Our nation shall not be allowed to garrison troops in any part of the PU for more than 30-days.

16/ When we use our military to oust a broadly unpopular

foreign government holding onto power by force, we will:

a/ Bust all bunkers, and use our air power on all gathering places and residences of the old regime.

b/ Seize all military equipment and bases and police stations for the local people. Secure these until the local Senate can muster and propagate.

c/ Distribute ammunition and bolt-action rifles of an appropriate mix and leave.

17/ In order to prevent nations from baiting (Mideast-style occupation) police actions, or (Ukraine-style) wars to stimulate their economy, or their war investments, government shall take all reasonable steps to prevent police and war actions from benefitting and stimulating the local economy and other economies around the world. And if this must be accomplished with bombing third party nations, then let it be so.

18/ Except when the nation is fighting for its survival, or the survival of a close ideological ally, all military objectives must be fairly certainly attainable.

19/ Peace through strength shall always be a motto of our military and our government.

20/ The State Department and other branches of government shall be prohibited from having any power over the military's tactics, strategy, policies and deployment. The military answers only to the Over-Senate with regard to tactics, strategy, policies and deployment.

21/ The Main-Senate manages military operations, the Over-Senate deploys the military.

22/ All soldiers sent to a Battlefield shall be armed before they leave for the battlefield.

23/ No working military equipment shall be left in any foreign land unless it has been destroyed or scuttled, lost in combat, or formally given to that government.

Officers that order the abandonment of equipment, or allow this, resulting in the enemy, or recent enemy getting armed with our weapons should be charged with aiding the enemy. Also, even the Senate shall be prohibited from abandoning weapons in this way.

24/ It shall be thought a matter of national security that all of our electrical generation equipment and other key infrastructure be relatively protected from drone attack, and that the components be both relatively easy to replace, and interchangeable.

25/ We shall consider it a civil defense imperative to build our new cities out of cast concrete with thick separating walls, so that we are more invulnerable to attack in a climate crisis.

26/ We shall rapidly phase-out all arms production or mass arms storage in the vulnerable coastal parts of our nation.

27/ For reasons of defense against air attack, the following shall not occur within 1100 km of the Pacific or Atlantic coast, or within 700km of the Gulf of Mexico, or Mexico.

a/ Long-term war materials storage, including especially aircraft rotated out from forward deployment near the coast.

b/ Defense manufacture.

c/ Strategic fuel storage.

d/ Critical industries with only a few plants, like those famous German ball bearing plants we attacked in WW2.

x/ This is also convenient from the standpoint of earthquake and tsunami vulnerability. However many people will have to relocate as a consequence of this prudent no-cost rule (no

cost except for the transition away from our vulnerable coastal locations.

28/ As many naval and merchant ship factories and port piers as practical are supposed to be located upon the shores of the Great Lakes, near our steel mills and far from the costs where they are vulnerable. The smaller Naval ships shall be made near Duluth. The slightly bigger ships shall be made near Green Bay. Lake St. Clair should make larger ships still. And the largest lake Great Lakes ships shall be made in Hamilton (the Canadian city, with a US name) that will now be located in the Niagara foreign worker zone). We shall rename this city as Henry and we will have our Henry service and repair shipyards there, for our naval vessel interiors and deck work. Our largest ships will be built at the La Pinta port where the Sea of Cortez meets the Mexas zone. This shall be our nation's main naval shipyard for our largest ships. Another large ship naval shipyard might be near Bellingham WA if needed. All ship building locations are maximally far from our nation's coastlines, and as such harder for our enemies to attack. Another, naval shipyard shall be located in the New Orleans/ Mobile area. The existing shipyards in California and on the east coast shall no longer be used for ship building.

29/ To reiterate for emphasis: all the nation's military assembly, and critical manufacturing (such as the famous ball bearing plants of Germany) shall also go in the center of our nation. All the long term storage of military equipment also goes in the middle of our nation.

30/ We shall put all our critical military manufacturing inside of compartmentalized heavy-duty concrete roof tilt-up factories in the center of our nation. These shall be long A-frames of thick concrete that tilt/bolt together to create a bomb roof. here we use segments of 50cm thick, factory made reinforced concrete ribs. It is foolish to have our ongoing military factories anywhere else, but in a structure designed to be resistant to bombing from the sky.

31/ Flying craft can use jet fuel and gasoline. However, all wheeled vehicles and boats that might get shot at must use safer and less explosive diesel fuel. Turbine engines shall not be used in sandstorms or in deserts, or landed or used in dusty airports.

32/ US airpower is to be understood in 2 parts

a/ The power to dominate the skies and prevent enemy aircraft from preying on either our ground forces, or our ground domination aircraft.

b/ The power to drop bombs on any enemy target.

33/ We must realize that US air power is useless where:

a/ There are no clear targets to blow up.

b/ It is impossible to tell friend from enemy.

34/ It shall be the official policy of our nation to fill the world with primarily defensive weapons, while almost never sharing offensive weapons.

35/ All wars and military deployments over 200 men must be discussed daily by the national government, no matter how long the war goes on for.

36/ It shall be an official motto of our nation and its armed forces that "If you want peace, prepare for war".

37/ Anybody who seeks to disband our nation's part-time militia should be regarded as if they're trying to disarm the people.

38/ When the US had a war department, everyone there

fought for peace, and then, when we renamed this government agency as the defense department, many people fought for more wars. Therefore we shall use the term War Department from now on, instead of defensive department. Let's be fierce to our adversaries, and let's have no mistakes about what this branch of government is, what it does, and where it came from. War Department is the best name. And the study of the War Department, and its procurement systems, should be a legitimate field of study in all tertiary schools.

39/ Given the immense size of our nation's military expenditure, and the importance of national defense, it shall be required that all secondary and tertiary graduates take at least one course in war/defense spending and military/militia orientation and pass the public test to be a secondary and then later a tertiary school graduate. There shall also be similar required courses in the overall government budget at both levels of school.

40/ It shall be a policy of our nation to get lots and lots of people exposed to military procurement from the standpoint of keeping the system honest so our nation can arm itself as rapidly as possible, for as little as possible.

41/ Woodrow Wilson's idea that millions of free people will have to die to bring freedom to the world should be well studied, so we never make this mistake again. This sort of ideology should be regarded as an idea brought to us by Ishtar.

42/ Woodrow Wilson ran on the platform that he would not get involved with WW1, but ended up doing the exact opposite. This should be well studied, so we never make this mistake again.

43/ Woodrow Wilson was responsible for excesses of the Versailles treaty that set up Adolph Hitler for WW2. This should be well studied, so we never make this mistake again.

44/ The bolsheviks of the Soviet union were the antiwar party. But once they got into power that changed. This should be well studied, so we never make this mistake again.

45/ We shall ponder the words of Smedly Butler, the most decorated US Marine in history: "War is a racket. It always has been. It is possibly the oldest, easily, the most profitable, surely the most vicious. It is the only one international in scope. It is the only one in which the profits are reckoned in dollars and the losses in lives."

46/ Religious beliefs and sexually identity shall create no exemption for avoiding the military draft, or universal basic training in high school. Everyone not born with a vagina, and physically able to fight shall be subject to the draft. Those of our people who run off to other countries may be Shanghaied if their birthday is called up for the draft.

47/ All men and women must take training in rifle and pistol marksmanship, and the laws of firearm self defense in order to be considered a secondary school graduate, and be eligible to vote.

48/ We want a situation where there is universal training, but we don't want people spending years of their life on this. So there shall be around 5 days of 8-hour universal semi-physical sleep-at-home militia defense training required to graduate secondary school. Then, each year there shall be one 2-hour day of universal paintball training combined with 10-rounds of rifle marksmanship and 10-rounds of skeet

shooting required of every able bodied male age 18-58 in each year. This is thought to be the most cost-effective way to do basic military defense and also to instill an appropriate amount of the right fighting mentality in the people. The top skeet shooters will also be issued shotguns for drones.

49/ Because India has a much stronger leaning towards democracy and openness, our nation shall favor India over China until China is as democratic, free, and non-imperialistic as India.

50/ The term homecoming dance shall now only be used for deployed military people coming home. It shall no longer be used for anything related to school or any other use. The reason this name always seemed so inappropriate is that it is fake and used to weaken the meaning of a hero's homecoming and homecoming dances after being away serving the hero's country in the military.

51/ Women who will never go and fight in combat, should not have the right to make decisions about war, and when we will go to war, and when we will take military action.

52/ Because there are so few female chess grand masters, women shall not be allowed to make military command decisions, or policy decisions about the military. This includes female senators, who must abstain in military strategy matters. If it ever comes to pass that even half of all chess grandmasters are females, then we shall allow women to make decisions about military strategy and war. Also, we shall make women's chess tournaments an alternate way to qualify for being a Senate sire. Women's chess is played with a long 30 minute clock per side, so it measures focus as well as strategic reasoning.

53/ No homosexuals shall be allowed in military command roles as this lead to homo-domination sexuality, which is extremely demoralizing for our forces and corrosive to our military strength. Also, it must be recognized that it is extremely corrosive to have any overt sexuality in the military. If we allow sexuality in the military, then people will serve because they want to be around all sexy and fit military people, and not because they are so patriotic that they will gladly put their life on the line for their nation. In fact this is precisely why all successful militaries have been opposed to homosexuality since the time homosexuality brought down mighty Sparta 2,500 years ago.

54/ Given how immensely profitable wars can be, future generations would be wise to read George Washington farewell address any time they are considering getting involved with some foreign war: "Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike of another cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots who may resist the intrigues of the favorite are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people, to surrender their interests. The great rule of conduct

for us in regard to foreign nations is in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop. Europe has a set of primary interests which to us have none; or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities."

55/ In the military and militia, there shall be no special foods in the meals prior to shipping out to fight. In the military and militia there shall be no lobster, fish or shellfish served to soldiers. This is because of price and quality issues with these foods that tend to augur towards low quality food and food poisoning.

56/ The military shall be an educational experience where our fighting men also learn valuable skills in supply chain management, allocation of resources, and disaster planning and response. When people come out of the Air Force, they're all supposed to have the skills needed to fly, manage, and service commercial jets, The Marines shall all be educated in security, border protection and INS duties.

57/ There shall be no prohibitions on using either the police or the military against non-citizens in our nation.

58/ The center of the USMC is on camp Normandy in San Diego, and also the Fort Bliss highlands, and the highlands southeast of Rock Springs Texas. But there are other marine bases that go on Kauai, and another one that is in the Viento Frio highlands which shall include all of Colon province west of Viento Frio in Panama. This shall become US territory. We will also have a small marine base at Lopp Lagoon, and a large one at Trincomalee, Sri Lanka. The Marines will certainly still deal with amphibious projection of our nation's power, but they will also all be trained in drone-enabled firearm distribution, qualifying local men for who gets guns and who doesn't, in training people to fight, in border security, in base access, in anti-tunneling, in running an immigration checkpoint.

59/ The first nation that we will arm will be Cuba. What an embarrassment on the doorstep of the land of the free. Then next we will arm the Irish of Ireland, the Swedes of Sweden, the Australians of Australia, and then the British of Britain. Where forces in body armor are oppressing the people, we shall generously hand out full auto 22LR machine guns

60/ The following shall be a mantra of our nation's military:

Liberators bring arms

Invaders & Tyrants

Take arms away

Thus, the first job of our overseas military is to arm, supply, and train the people of nations yearning to breathe free. With this in mind, it shall also be our official policy that invading armies and tyrant armies that disarm the people are normally supposed to be killed to the man by whatever means possible.

61/ The USMC shall add have the following specialties:
a/ **BORDER MARINES** assure total closure of our nation's borders. This includes a mandate to shoot or blow up people who are crossing into our nation illegally.

b/ Armory specialist uses drones and aircraft and cable pulled sea containers to drop arms to people around the world so they can overthrow their oppressive government ruling over them by force. These guys have uniforms that say

“USA
FREE
GUNS”

c/ Marine SUPPORT ADVISORS goes in country anonymously as air strike advisors.

d/ Marine LIBERATOR sweep areas looking for kidnapped people sold into slavery. The Marines shall recruit women from all over Africa to help with this. There shall also be a language determination system for the women they come across. They keep asking all women in the Arab parts of the world to identify the language they speak. Those that don't speak Arabic properly get taken back to the headquarters and offered to go back home. Also, here we see how a world of countless micro-languages greatly helps the cause of slavery. And here we realize that this state of affairs was fostered by Islam and Ishtar so that it may be more effective as the master race to all the other slave races.

e/ COMBAT SPECIALISTS specializes in combat.

f/ MINEFIELD MANAGER specializes in laying precisely located mines that can be disarmed wirelessly and laid and recovered or detonated crushed by robot.

g/ Marine Oil DRILLING SPECIALISTS supervision during drilling and they also prevent sabotage after the fact. There shall be extreme shoot to kill order for all trespassers which shall be presumed to be saboteurs. We shall not ask permission to drill in any Caribbean shores, or on the west coast of Mexico & central America. We shall simply send in our marines and drill here and there without permission. And if anyone tries to prevent us, we shall kill them as Arab/OPEC agents. Also, we shall treat much of our nations flammable oil infrastructure (and our Latin American neighbors) as something like our military bases with regard to trespassers. In this way, our marines shall also offer added security for our nation's oil fields and oil infrastructure, to keep OPEC from sabotaging our oil production.

62/ The custom of massacring invading armies and foreign Mafias is probably one of the most important rule change for ending war and organized crime worldwide. If we are serious about invading armies, the simplest thing we can do is for everyone to make a promise to kill them all to the man, total massacres of invading armies wherever possible. However those forces that bring arms should never be considered invaders but liberators. To mark forces as liberators, all forces in an arming role shall wear a special blue uniform that says on the front and back on the chest.

**"US LIBERATOR,
We bring guns
To your people"**

63/ We Americans absolutely believe that it is our duty to arm freedom fighters worldwide that suffer under years and decades of tyrannical rule over them by force. However, once we hand out the guns, and have spy/spotters in place for our air support, then we leave. Otherwise we get baited into Mideast adventures for profit like with ancient Rome, and like what happened to us in the 1990s to 2020s — where we

spent several trillion dollars occupying nations to put down low cost terroristic insurgencies.

64/ Where our nation is involved in arming foreign nations, we shall take our old and redundant pistols and rifles and service/clean and test most of them en masse. Then we will take a box of ammo and a pack of desiccant and then we will heat seal each gun in a thick plastic vacuums pack. Then we will use drones to drop these arms on the people we are arming. And some of these drones will also have grenades for the forces that fire on them. We may also drop some fiber military drones, so the people will have that weapon to use on their kings, dictators and oligarchies.

65/ The number of officers per man in the military shall not exceed 12%.

66/ We shall ponder the words of Samuel Adams that:

a/ “If we tamely suffer a lawless attack upon our liberty, we encourage it, and [call] others to be involved in our doom.” And also,

b/ “America shall be independent, and we shall be satisfied with nothing less than this.”

67/ With regard to using our forces for peacekeeping purposes. Instead of sending soldiers to places to engage with locals, we're going to have drones, and our drones are going to follow the bad guys to where they live and then we will use midnight airstrikes on them at their many homes. That is how we are going to do peacekeeping without having soldiers on the ground.

NR'126. MILITARY PROCUREMENT AND SUPPLY

1/ The government's bidding and purchasing platform shall be called a “Knudsen”, named after William Knudsen, leader of the US war materials production efforts to prepare for World War II. We shall also honor this man's words: “We won because we smothered the enemy in an avalanche of production, the likes of which he had never seen, nor dreamed possible.” And we shall always keep in mind the way we can smother our enemy poverty in a similar way, by having Knudsen-ized goods like grits, multi-vitamins, jeans, dining tables, railcars, passenger-vehicle chassis, and even whole economy apartments. All government spending including especially all military and militia spending shall occur via the main government Knudsen, along with all honest and important input from the people, and from all government workers about the equipment. All comments shall be welcome. We shall award ubiq status for those who make valuable comments, and we shall never punish any person for making fresh comments that are even vaguely relevant.

2/ As a matter of national defense, all peacetime purchases of combat equipment used by our nation's military or militia shall only be made in our nation and from components made in our nation.

3/ All existing military IP rights related to military and militia equipment and techniques, in addition to all healthcare IP for military personnel and children are hereby nationalized. All future IP in these 3 categories shall belong to the people, just like the Brooklyn Bridge. However, all discoverers shall be rewarded with Ubiq status and money.

4/ Which American military is strongest? The one with a few giant military suppliers, or the one with a few thousand?

Which nation is going to innovate faster? Which nation is harder to sabotaged though infiltration? Which nation is harder to bomb with aircraft and missiles? Which nation is going to have more competition and and less expensive defense costs? Which nation is going to be stronger? Which nation is going to ready for war faster? Therefore, we shall at least cut-up and diversify our domestic military supply base into at least hundreds of potential suppliers.

5/ Except for complex items such as aircraft, no military supplier shall provide more than 1/2% of any military or militia budget. Also, we shall also always welcome new companies entering the market, so that a more competitive environment will exist.

6/ In order to diversify, we shall use different vendors to supply our military aircraft and our military aircraft engines, and our aircraft weapons systems that go on those aircraft.

7/ The nation shall have sufficient factory capacity (either in production or mothballed) to entirely duplicate our supply of all steel and lead bullets and bombs within 2 months.

8/ Due to the new international rail system and more distributed oil and coal production, we will soon see a glut of oil tankers. When this occurs, and tankers are being sold for near scrap value, the Senate shall step in and buy a large number of newish and smallish tankers. These tankers shall be kept moth-balled, ready to deploy should any oil cartel form in the future.

9/ The real strategic petroleum reserve is supposed to be buried deep underground at our main navy and air bases around the world. These bases are all supposed to have enough diesel fuel, aircraft fuel, water, food and ammunition and parts to last 3 years without resupply. Back at home, we shall have instead of a strategic petroleum reserve, a map of all the oilfields that we can easily pump oil from. This is a much cheaper and better supplied approach.

10/ For civil defense purposes, our key military factories are supposed to be somewhat hardened against overhead bombing. They shall also be widely scattered to make strategic bombing of our factories and weapons depots difficult. And again, the most critical plants must be located in the center of our nation, in the Nebraska/ South Dakota area.

11/ Rather than relying on darkness to make sure that our adversaries don't know how many bullets we have, we shall instead try to have so many bullets, and such a capacity for making bullets that nobody will ever dare attack us. We will also have so much capacity that we will be easily be able to arm our friends when they need arming. We shall also shun and opportunistically attack the enemies of freedom. In fact, we will always have at least 30 million rifles available for our friends, in addition to the 30 million armory rifles we will have for our own civil defense purposes. At \$100 each, this is only \$6-billion. And this armory system will slant every tyranny and ever battlefield on Earth towards freedom at a cost of practically zero dead Americans. Once we do this, our small arms armory will be the most powerful wildcard in the worldwide battle of free people against tyranny, and it will be our Over-Senate that will control the supply of these things.

12/ In this age of microchips, it is madness to have foreign electronic weapon systems in our military and militia, and as civilian weapons. For our enemy could have a hidden radio kill-switch. And what if the supplier is destroyed or threatened,

or the trade lines get closed? No, it is foolish to allow any imported weapons. Also, all of our domestic firearm manufacturers shall be required to sell directly to citizens.

13/ Everyone involved with government procurement must read the relevant sections of The History of Great American Fortunes by Gustavus Meyers having to do with government procurement and disposal of public assets. This includes especially junk ships purchased, and the long history of public land sold for a fraction of its true value to Ishtar's frontmen.

14/ To figure out and finalize exactly which design we will use for our military, militia and civil defense equipment: we will first have a competition and X-prize for the best design. Then we will test the favorites all over the nation and in all sorts of conditions. Then we Send the top choices back for re-prototyping. Then we will pick several new favorites and re-test these. Then we will send the top designs back for more versions. Then we will have different manufacturers make their version. Then we will pick the best manufacturer. Then we will approve other manufacturers for their copies of the best manufacturer.

15/ All military suppliers must have at least 20% Senate representation on their boards.

16/ Everything that our military and defense industry tells us about foreign military power should be taken with a grain of salt. We should always be skeptical of the ultimately self-serving things they say. Our Senate must decide on its own. Also we're probably better off with several cheap and plentiful weapon systems, then one single expensive weapon system.

17/ The Senate shall manufacture its own aircraft. One supplier will do the landing gear, another the wings another company the engines. Another company will do the instrumentation. Everyone will be co-located for each project, with military security, administering the security and software / network for design and build.

18/ The military shall develop a 3-to 5 camera array similar to a telescreen camera array that uses regular light, night vision, and infrared. This shall be combined with a computer and given the ability to hone in on pre-programmed shapes such as vehicles and men with rifles. Also, the GPS systems shall have error testing and also switch to visual targeting for the last mile or three.

19/ We shall also test nuclear, EMP, and neutron weapons to see if they're real.

20/ We recommend that our allies in Britain use the depths of the Bristol channel for their ship building.

21/ We imagine that one day, each township tower and each plant will have its own inexpensive directed energy weapons. when under attack the non-critical township power goes out and the plant's full remaining energy is directed to the directed energy weapons.

22/ Government shall not use psychologists or psychiatrists for most veterans mental health problems. Instead it shall have a much larger number of veterans trained as mental health councilors. These shall either make nothing but expenses, or they shall make 1/3 the average wage per hour for their time while they are helping their fellow warriors to get over their problems.

23/ The government delivery system shall have at least 1,000 2-story warehouse complexes. For invulnerability to air attack, we shall design these each with perhaps 50 sub

warehouses that are too far apart from one another to have a fire that spreads between the 50,000 sub-warehouses as individual targets. Government shall provide free delivery for certain essential goods where the goods are stored for 30-days to perhaps 90-days in the buffer warehouse system prior to delivery for retail sales. It is better that we use smaller buildings that are too far apart to chain-react and ignite the next building. Also, the army is supposed to track supply of all key supplies. The emergency supply system shall be thought to be a key way of keeping people from instigating wars for fat wartime profits. All warehouses shall be non-combustable construction, and the structure is supposed to provide sheer strength to keep the pallet shelves from tipping over.

24/ All of our nation's main warehouses are generally supposed to be over 600km away from the coastline, to make attack more difficult. All of our main aircraft storage is suppose to be more than 900km from the coast.

25/ We shall have bomb resistant hangers for all our military aircraft. Given the inconsequential relative cost of cast in place 60cm thick reinforced concrete aircraft hangers, every war aircraft shall have a bunker/ hangers. In fact, we should probably have multiple hangers per aircraft.

26/ The land of the free would be wise to develop cheap mass produced signal jammers so it's people and all three people everywhere will be less vulnerable to drone attack.

27/ We in the land of the free should be developing weapon systems like this that just generally favored defenders over attackers. This is an obvious way to reduce war. To make it more costly and uncertain for all attackers.

28/ We shall develop 25mm slide-in motorcycle guns, for defense purposes. This is to eliminate enemy light armor from our nation should it ever arrive on our shores. These gun gets slid out from the extra wide gap between the handlebar forks at the headset. The rifle fits into a groove in seat and can be lifted out and placed on a number of different pegs, the motorcycle + kickstand creating a tripod for firing the big gun. The motorcycle leans away from the firing person so that the wheels and tires absorb the shock partially along with the mount, which is perhaps on some kind of spring gimbal.

29/ We shall have a large number of defense-oriented shoulder fired anti-tank and anti-aircraft missiles in our armories. Enough to give away when our friends need them.

30/ We shall have at least a couple million defense-oriented belt-fed, turret-seated, and hand-held shotguns for anti-drone purposes in our armories. Maybe also the township hallways extend for one floor above the roof and have 30cm concrete walls ceilings and floors and turrets to fire on drones if this is ever needed. This in addition to the 9mm steel shutters that are required for all township windows and doors as a civil defense, security, and anti-crime matter.

31/ When Government develops new things, such as military equipment, these shall be designed by one group. and then the prototypes and fino-types shall be fabricated by several separate groups for the incremental design reward money from the Senate. Then the mass production build will generally involve two or more companies with two separate but identical builds.

32/ Instead of focusing on keeping top-secrete documents secret for national security, we shall employ a system where various minor and less obvious aspects of our aircraft and

weapons systems and tactics are not written down. Instead this information is supposed to live in our design and development teams as a sort of company culture thing in over 100 different minor parts of the aircraft. When we combine this with a total prohibition on both Issay and even Neesay citizens in the top-secret design process, we will have systems that will be much more resistant to knock-offs.

33/ We must always remember that the deadly Japanese Zero fighter was substantially based on the Howard Hughes H-1 aircraft. We must remember this, or we will be much more likely to once again fight an enemy that has stolen our designs. Our enemies should always remember how quickly we took back our lead in fighter jets: for we are made up of the best of the people of all the earth.

34/ We imagine our fighting aircraft will be built in several parts: Fuselage, wings, engine, avionics, and various weapons. Various domestic companies will upgrade these parts for our F-22s, our A-10s, etc. based on the war department's. Also the interchangeable weapons systems might involve several arms launcher/firing attachments.

35/ All IP associated with the nations military and other public equipment shall now be nationalized and the IP rights shall be the property of the people and their Senate. This rule shall be applied retroactively to all arms manufacturers and developers in the nation. Also, where the IP developed is not related to a tactical or military advantage of our nation, the Government must ubiquitize the IP for all humanity to use.

36/ The Senate shall now re-verify the true cost of all military hardware on the open market. Also, we shall feel no obligation to the old totally corrupt defense industry with regard to the IP rights for the grossly overcharged weapons systems we paid to develop with them.

37/ All military investments and purchases shall be authorized and directed by the Senate. No military aircraft or vessels may be sold for 50 years after decommissioning. All must be stored in case of war.

38/ We shall develop Vizcaino and Cape cod into our steal and smelting zones. It shall be thought better that we have lots of low grade steel capacity and regularly use steel in our construction. In the event of a war, we can always upgrade our quality as needed.

39/ Each Centi-Nome armory shall have a durable, foolproof machines for making the three most common sizes of bullets. There shall also be machines for refilling the shells. The Senate must have sufficient bullet capacity that in time of peace, the factories can produce enough bullets being open for 90 days a year 8-hours a day. This way, operating the factory 24 hours a day will increase annual output by 12-fold.

40/ For reasons of civil defense against war, and artificial pricing shocks for profit (such as the Arab oil embargo of 1973-77), the Senate and the Armi shall actively root-out and discourage all just in time manufacturing. This practice makes our nation much more vulnerable to attacks and financial exploits for nothing more than a sliver of profit. Indeed, the Senate shall provide subsidized, below market warehouse space to encourage large stockpiles. Where the Armi will be keeping critical war and economic supplies, the Armi shall pay for the goods and then store the goods itself.

41/ In times of peace, our nation's key civil defense factories shall be put under the control of the armi. These shall be

penalized when they operate more than 1/4 of the time. This is so they can be put on an around the clock schedule and output quadrupled.

42/ Instead of the army, taking the lead and developing infantry equipment, we shall use the militia and retired military people for developing all the infantry systems, and whatever equipment the infantry uses shall be designed by the militia, and this equipment must be defensively biased.

43/ The military shall not conduct any weapon's testing for the Senate, the Senate shall conduct its own testing, the military only does its own initial testing.

All testing of weapon system shall be done by senators, with no more than 2 military representative per 20 senators. also, these military testers must be combat soldiers that have worked their way up. Also, all all new weapon systems shall be required to pass multiple senate tests so that multiple Senate juries can see what the government is spending so much money on.

44/ Government shall accept no testing that is not done by the Senate. This shall be especially important for military equipment and for pharmaceutical drugs, especially expensive pharmaceutical drugs, and pharmaceutical drugs that are getting ubiquitized. There shall be multiple different senate juries doing these tests at all at all times.

NR'127. WAR WEAPONS SYSTEMS

1/ We shall consider the following military weapons systems to be on their way to obsolescence, and we shall only have, develop, and use such systems in a secondary, enemy distracting and support way: helicopters, armored vehicles, particularly lightly armored vehicles, and stealth technology.

2/ We shall consider the following military weapons systems to be largely of the future: Directed energy weapons, particularly those used for ground defense. Super fast ground to air anti attack missiles, mini and micro drone missiles, radar-guided anti-drone low calibre gatling guns, ground/ drone attack aircraft, bunker busting bombs for taking out tyrants. Micro-smart bombs for unsheltered infantry, cheap anti-drone drones, particularly drones released from larger aircraft on top of drone swarms, signal jamming tech, and metal shutter-able buildings that are relatively impervious to lightweight drone attacks, and indirect blasts.

3/ The development of drone and anti-drone technology shall be helped by having each branch of the military/ militia have its own drone development teams. In fact, every specialized drone gets its own program, and they all meet regularly to compare notes. The Air force shall specialize on developing the long range drones, and the biggest drones, and aircraft deployed drones, and smart bombs of various sorts. The navy shall develop underwater and ship based drones, including mid-sized drones for launch from fixed wing bomber-type aircraft. The army shall develop offensive infantry support drones and ground attack drones. The militia shall develop land based defensive infantry support drones, fixed-wing drones, hand-launched drones, cruise-missile style suicide drones, and copter grenade/surveillance drone systems, as well as various anti-drone systems including shotguns, .22-cal Gatling guns, lasers, as well as micro-missile systems for drones and signal jammers.

4/ We shall develop drone torpedos for our war ships that can be rolled into the ocean and then guided to their eventual target.

5/ We shall employ 5 strategies to defeat enemy radar.

a/ Our current path of aircraft largely invisible to conventional radar, but still quite visible using infrared.

b/ Large numbers of non-stealth drones that can carry ordinance, emit heat, and act as decoys. These may have retractable dorsal fins for radar.

c/ We shall fly our aircraft at various and irregular speeds, in confusing ways among these drones. These can climb and slow and attack attackers from behind. They can also automatically be called to go between an arriving missile and a command ship. The drones should be indistinguishable from the command craft on radar and heat signature.

d/ These drones also talk with each other and hone-in on ground radar, deploying one drone, or 1-missile of their ranks to attack the radar sites. We don't simply make stealth aircraft, but we also try hard to knock out the enemy radar when we can so we can bring in our larger, non-stealth Air Force.

e/ We will use computers to fly our ground attack aircraft a short distance from the ground, below the radar.

6/ The chilling of exhaust in stealth aircraft (so it can't be detected in infrared) —this shall be thought to be an impossible fools errand. Better we have faster aircraft and a large wing of decoy and bombing and counter-attack drones.

7/ Radar stealth technology will not matter forever. For this reason, we shall build a large number of decoy jet drones with IR profiles that look just like our F-35s. These will carry bombs, and missiles like the F-35. And some will also carry air-to-air rockets to protect the 2-man command fighters. We shall build catapults for these drones on our "helicopter" carriers. And sometimes, the drones will not be recovered. Thus, one command ship F-35 might bring along 2 to 20 small unmanned wingman drones with a radar profile that is indistinguishable from the manned F-25 aircraft on radar or perhaps IR and thus act as decoys. The higher flying F-35s in turn prevent enemy aircraft from attacking our bombing drones.

8/ We shall have ongoing production of the F-35 and F-22 for some years, and especially as long as our firmest allies want this:

9/ There shall be no more VTOL military aircraft.

10/ Our military shall stop buying heavily, and lightly armored vehicles. Instead it shall use vehicles that blend in better and look civilian. We shall instead use electronics to tell friend from enemy.

11/ We shall stop developing and buying attack helicopters, except for:

a/ Evacuation purposes

b/ Helicopter carriers. However, these shall be smaller and they shall be over 90% copter drones, and only ~10% human operated helicopters.

12/ Instead of helicopters we shall use an updated version of an A-10, call them A-11s, (or "Wolverines" to emphasize the ferocity of the weapon system over the system's ugliness). A-10s are at least 2.3x faster, they also have a higher payload and greater range, and they are much easier to fly (and harder to crash) compared to helicopters. These shall be

updated with: radar, thermal imaging, night attack capability, battlefield coordination, and computerized guidance. The new A-11s shall have a variety of removable weapons systems such as:

- a/ Front and rear facing air-to-air missiles.
- b/ The existing gatling gun, but computer targetable. The new A-11s shall also be capable of co-ordinated in AC-130-mode for arcing machine-gun ground attacks using side facing gatling guns. The A-11's large caliber gatling gun (an update of the GAU-8 Avenger Gatling gun), shall normally use exploding bullets. The targeting computer shall tell the bullets the distance to the target, so they can explode in that area. There shall also be depleted uranium bullets for harder targets. Our military shall also experiment with tungsten tips on our depleted uranium bullets.
- c/ Drone-oriented gatling guns of around 22 calibre will be the weapon system for drones. These small gatling guns are computer targeted to any direction, so long as it is below the aircraft. The targeting computer automatically detects targets and fires on the drones when on.
- d/ Drone laser(s) instead of gatling-gun. These aircraft will thus probably have a turbine generator and unlimited ammunition. It is very important to be able to take the battle to the drone storms before they arrive at their targets. They are both easier to attack when all heading in one general direction together, and also, they can be eliminated before they do harm.
- e/ Armor busting missiles for tanks, like Saddam Hussein's forces got.
- f/ Anti automobile and truck missiles.
- g/ Targetable air to ground rockets.
- h/ Targetable precise location and altitude smart bombs.
- i/ Tail-hook, carrier-based versions, because the greatest restriction on the A-10 is its range. Also, air-wings of carrier-based A-10s can appear out of nowhere and strike at the equipment of the proverbial better-equipped-invader.
- j/ There will also be drone, and heat seeking grenade deployment tubes inside the fuselage. These drones will be as get-in-the-way air-mines for aircraft and missiles pursuing our A-11s. They can also be left over the bombing site for various purposes.
- k/ Either .22 or 22lr computer targeted machine guns for drone swarms.
- x/ It should be noted that the A-10 or soon the A-11 is our main aircraft for turning air superiority directly into all forms of ground superiority.

13/ First rolled out in 1977, only seven A-10s have ever been shot down. A-11 engines shall have wire frame "fan shields" to keep drones from attacking the engine inlet and going into mine-mode. It should be presumed that all drop drones will be capable of going into mine mode while in the air. So our aircraft will hit drone swarms from above, and skate-bowl their way down, the automatic radar and gatling fire targeting the drones repeatedly. Also, the new A-11s shall be made so they can take off and land from carriers.

14/ Using internal maps and GPS, the A11s will automatically follow the ground at whatever elevation is selected, so these airplanes will be able to fly very close to the ground. Thus they will have their own sort of stealth when working in

numbers. Also we imagining them zig-zagging in unison over the land on their way to target.

15/ Our great aircraft carrier fleet shall be renamed as follows, to instill more fight in our carrier group crews:

- a/ Gerald Ford to Yorktown, the flagship. The Yorktown battle is the symbol of Americans finally having enough guns to force a British surrender.
- b/ Chester Nimitz to Nimitz.
- c/ Dwight D. Eisenhower to Patton.
- d/ Carl Vinson to Midway.
- e/ Theodore Roosevelt to Panama Canal.
- f/ Abraham Lincoln to Edison
- g/ The George Washington to Yeager.
- h/ John Stennis to Kitty Hawk.
- i/ Harry Truman to McArthur, the Chinese people really were ripe for American liberation from abusive totalitarian communists. After World War 2, American declined a global empire as the world lay in ruins. For that, the world trusted us more than their own corrupt governments.
- j/ Ronald Reagan to McCampbell.
- k/ George Bush to Gatling.
- l/ Doris Miller to Liberator.

m/ If we need more names, they shall be Hornet, or Argus.

x/ The questionable roles of George Patton, and Douglas McArthur in the Bonus army protest were considered. No ship shall ever be named after any politician, Senator, or especially no president or king, or other monarch.

16/ The flagship aircraft carrier, the most advanced carrier today, and its all-star crew drafted from the other carriers upon the launch of another new carrier shall be called Yorktown. This name refers to the decisive battle of our revolutionary war, where our forces were finally well-enough armed to defeat their well-armed oppressors that have invaded our land from across the seas. We shall honor our worthy cautionary memories of being underprepared for our own revolutionary war by naming our navy's flagship as Yorktown. The Iron Mike carrier group shall always be the oldest. It's motto shall be:

a/ "We have to fight harder". And

b/ Under the name of the ship shall be the sage words: "Everyone's got a plan till they get hit". Inside the ship in several places shall go the sage words: "Discipline is doing what you hate to do but nonetheless doing it like you love it." The Iron Mike shall normally sail between the east coast of South America and the west coast of Africa, and make many ports of call for partly diplomatic purposes. Its travels shall be centered roughly around Ascension Island. Also, where our naval crew go ashore in dangerous places, they must all concealed carry a fingerprint-activated .45 pistol. All shore parties in dangerous or crime-infested places shall only be in groups of at least 10 men. Also, they shall not take shore leave in dangerous nations that will not allow them to carry arms while they are ashore.

17/ One of the places where we shall be the most generous with our foreign aid is in mass arming oppressed nations so they can overthrow those who rule over them by force. Generally we will bomb the military part of the junta, then we will send in our marines to arm the people. Then we will leave, except when a heavily equipped military gets up again.

18/ Our flagship missile ship shall carry with pride the name Goddard. Our flagship helicopter carrier shall carry with pride the name Sikorsky. Our flagship submarine shall carry with pride the name Monitor. Our flagship attack submarine shall carry with pride the name Kyle. Our flagship anti-aircraft ship shall carry with pride the name Arizona. In the navy, all flagships shall draft their all-star crew from the other ships of that class. It is thought that having flagships will drive the entire navy to work harder to be flagship crew. The Monitor will be the flagship of a strike-force of 6 or more attack submarines and protective destroyers that will mostly be tasked with keeping ocean vessels from entering either the Persian Gulf, or the Red Sea.

19/ We shall rename our destroyers as follows:

a/ The Zumwalt shall be renamed the Goddard, and Goddard shall always be our flagship missile destroyer for obvious reasons.

b/ The Lenah Sutcliffe Higbee shall be renamed the Firestorm.

c/ The Arleigh Burke shall be renamed the Burke.

d/ The Laboon shall be renamed the Barrage.

e/ The Delbert Black shall be renamed the Black.

f/ Donald Cook shall be renamed the Adkins.

g/ The McFaul shall be renamed the Fury.

h/ The Oscar Austin shall be renamed the Winchester.

i/ The Forrest Sherman shall be renamed the Sherman

j/ The James Williams to the Kellner

k/ The Paul Ignatius shall be renamed the Hathcock.

l/ The Jason Dunham to the Inferno.

m/ The Winston Churchill shall be renamed the Churchill.

n/ All other destroyers shall all bear the names of the nation's most celebrated snipers such as, Mawhinney, Waldron, McBride. Other war hero names that we will use for our ships shall include Gaido, Kleiss, and Ault, among others.

20/ We shall name our ships not as much to honor brave people, but to inspire their crews and to strike fear in those who would be our enemy. Also, the purpose of a military is not just to use, it but to cause others to back down. In this intimidation role, it is much better that we call one of our destroyers as the Firestorm, instead of the Lenah Sutcliffe Higbee. Also we shall have hospital ships and rail based emergency response trains that can be driven slowly on roads and on land. These shall be called Salk, the Mullens, Fleming, Williams, Drew, DeBakey, Pasteur, Barnard. Also perhaps Curie, Geiger, Morse, Jobs, and Banting.

21/ So long as China continues to:

a/ Occupy its recent foreign conquests in Tibet, Burma, Xin Jiang, and other places.

b/ Menace Taiwan.

c/ Steal our intellectual property without paying.

d/ Undermine our nation with its political corruption and gendermandering.

e/ Spy on us.

We shall develop a mini fleet of 16 medium-capacity sea-to-land missile destroyers intended to accompany our two aircraft carriers.

22/ All large scale arms factories shall be in government-owned buildings on public property, in a remote location in the hard-to-strike-at middle of our nation. We shall try to keep our factories going at 1/4 or 1/8th speed/cost, but some will

simply get shut down. When this happens, everything in the plant gets covered in tarps and then the government leaves everything in place. Also, everyone at the plant is supposed to describe everything they do at their job for their successors. So if we suddenly ever need to start the factory of some sort of weapon system, we can easily do that.

23/ Except when the weapon system becomes completely obsolete, all assembly facilities for all weapons platforms shall be protected from dismantling and selling off the machinery and stocks.

24/ Infra-red stealth technology shall be considered a fools errand. Better we have faster aircraft with larger payloads and better fuel economy than we diffuse the

25/ We shall not let America's world-beating aerospace industry die off. Instead of letting the new railroads kill our aviation industry and automobile industry, These people should be re-employed in the development of a new aerospace industry, new rail industry, and new single wide cars, among other things. They shall also be used to produce:

a/ An updated version of the A-10 (the A-11) in numbers around 10,000 or 20,000 units (due to the drone swarm menace), and supporting a variety of bolt-on weapons systems for these aircraft. We shall sell some of these to our closest allies. Around half of A-11s shall be for domestic defense under the Armi Air corps, and kept in thousands of concrete hangers, 2 per Centi-Nome armory. Also, it must be noted that when the Senate makes so many of these aircraft, the price will fall dramatically, precipitously. We will have 60% for domestic uses, and 40% for our overseas allies that have a long history of being our best allies. Again, there is no better system for turning air superiority into ground superiority than the A-10 family of aircraft. Furthermore, all old mothballed A-10s shall be kept in the state of where they can easily be made ready if needed. Also the Gatling gun shall be capable of holding multiple types of rounds so that we can use tank grounds and lightly armored vehicle rounds, and antipersonnel rounds. The A-10s can also be mounted with. Something like a 22 LR, or 38 caliber Gatling guns with a vast number of rounds on board.

b/ A fleet of inexpensive propeller aircraft like the Super-Tucana. The army Air corps. shall develop and build 1,000 propeller driven fighters that are capable of flying in volcanic ash. These will also be useful for defense purposes. We shall get about half of the order, then we will hit the slow-down button and trickle out aircraft for perhaps decades. Then if more aircraft are needed, we can run 4 full-time shifts and increase output up to 4 fold. We can also easily clone our one operating line to increase output. This "trickle manufacturing" method is also the least expensive way to do mass production in preparation for war. It is also the easiest way to jump into a war economy should that be suddenly needed.

c/ New drones, anti-drone, and flying decoy tech.

d/ More F-35 inventory.

e/ Wingman drones and systems for turning old mothballed aircraft turned into bombing drones. Remember, aircraft are super easy to take off in, hard to land.

f/ More ship to shore missile systems and, more surface to air micro missiles for drones.

g/ Radar matching decoy drones for all our aircraft.

h/ Stealth drones and inexpensive, non-stealth bomber drones.

i/ Short range ground to air missiles with a range of under 100km that contain many drones stacked up. These drones are pulled out of the back of the missile by a parachute cord folded around them. There might also be deployment systems for one or a few drones. These drones either collide with enemy drones and blow up, or they drop heat-seeking and movement seeking grenades on enemy infantry.

j/ New, 3 story tall passenger compartment passenger aircraft.

x/ The Senate shall investigate whether the airfoil effect is fake. Maybe all that matters is that you have a flat surface that is gliding along at an angle that lifts the aircraft enough to counteract the fall of gravity. The Senate shall also investigate whether front-facing Dyson-inlets as with the gimmicky blade-less Dyson fans at the top front edge of the wing will increase lift. This may increase lift with almost no increase in wing profile or drag. It may also enable us to have smaller engine inlets.

26/ It shall be noted that the more ways we have to exert air power, the harder and more expensive we make it to challenge us in our air dominance.

27/ All warships and military bases shall fly the stars and stripes as well as the Gadsden flag, symbol of our nation's eternal animosity to tyranny. Both flags shall be white-listed nationwide, and it shall be a crime to question either flag/symbol regarding its appropriateness for any situation.

28/ Ways in which Concord was sabotaged by OPEC:

a/ The ridiculously tiny 100-passenger capacity.

b/ The famously steep climb of the concord shows us that the craft was sabotaged so as to have too much power and too much engine weight.

c/ The bending nose cone.

d/ The oversized landing gear.

e/ Wing edge ports.

f/ The many media messages about the Concord using great amounts of fuel, which it did use, because it moved 2.5 times as fast as a 747, and the aircraft only held 100 people, instead of the 416 people of a 747. But on a per seat/mile basis, the Concord aircraft used up to 20% less fuel than a 416-seat Boeing 747. Also, the two aircraft have similar weights empty due to the poor weight engineering of first-prototype Concord.

g/ The way the matrix immediately determined that all Concorde must be retired after only one crashed.

h/ The way tickets cost 16 times the price of a 747 ticket, not 4 times as we should expect given the 100 person capacity.

29/ It appears that someone doesn't want us to have supersonic air transport. This is probably because:

a/ It is more fuel efficient and faster.

b/ Fewer people will stop in the middle, in the Mideast.

c/ It is impossible to shoot down aircraft with shoulder fired missiles. At least a truck mounted missile system is needed to fire on an aircraft moving at mach 2.

30/ We are all missing something important about supersonic aircraft. It is that if we go up high and cut the air pressure in half, the airplane can go twice as fast for just about the same amount of fuel. And if we get up to around 60,000 feet (Concord's cruising altitude) where air pressure is 90% lower,

the airplane can go 10 times as fast given the same number of molecules going through the engine, and same number of molecules interacting with the wings. Another counter-intuitive aspect of high altitude flight is there is no difference in the molecular physical experience of moving 10 times as fast when you're in air of 10 times less pressure. There's no added danger to this. The physical experience is exactly the same. There is no added danger. We can simply climb to 60 or 70,000 feet and move 10 times fast with the same aircraft in air, that's 10% of the pressure on the ground. As we climb up we accelerate to mach 3 or 4, and as we come back down we decelerate.

31/ What we really need to figure out is aircraft engines that can cruise fuel-efficiently at the highest possible altitude, so speed and fuel economy can be maximized. The key to understanding is that altitude means speed and fuel economy, but it also means lack of air to burn. So we imagine a new aircraft will have much larger turbine inlets, perhaps with operable vents for lower altitude flying.

32/ Specifications for our new supersonic passenger aircraft:

a/ It shall copy nothing from Concord-1 except what worked.

b/ It shall have over 600 passengers fitted loosely or 700 fitted tightly.

c/ It shall have a cruising altitude is around 60,000 to 65,000 ft or ~19,000m. At this altitude, the air pressure is about 5-6.7% of that at sea level, and thus there is 92%-95% less drag and fuel use.

d/ It shall have speeds over mach 2.5 as its cruising speed. It should have cruising speeds above mach 3.

e/ Lets not forget that lift comes from a certain number of gas molecules displaced this way or that. The same wings can be used at higher speeds at higher altitudes.

f/ We shall build a fleet of full double decker, 800 passenger supersonic aircraft for travel to and from all of our major airports. This is the new sort of long haul air travel that will survive, and all our existing aircraft are mostly obsolete.

g/ The cabins will all be segmented into perhaps 20 parts (or spheroids per floor and independently pressurized.

h/ It should be noted that these aircraft will move at up to 4 times current speeds, so we imagine that most of the US is within 3 hours of most of Asia by mach-3 "hyper-jet".

i/ We imagine the US orders up a few thousand of these.

Then we own the industry, the long-haul super fast travel on mostly 800 passenger ships. We shall do that for our own nation's financial well being and for the benefit of mankind by developing this. Like the train system, the people shall not operate their long haul flight system to make money from it.

j/ Sonic booms shall now only be prohibited in urban and suburban areas at altitudes under 11,000m.

33/ It must be stated that mach 3.2 mass produced aircraft do already exist and are almost impervious to missiles due to their extreme speed. So stealth technology doesn't really matter so much for the fastest aircraft, particularly if decoy drones can accompany.

f/ With Mach 3 passenger aircraft, we see something like 1.3 hours to climb to and descending from 60,000 feet. But the time in between, the aircraft is cruising at Mach 3. So the 15,348km, 18-hour flight from Singapore to New York changes into a at 3,705kph only takes a bit over 5 hours. And

really this using no more fuel per hour that the aircraft would use to fly at a lower altitude.

34/ Supersonic airliners are easy to change into supersonic bombers that can't be easily shot down due to their speed.

35/ We need drone bunkers for our aircraft and we should have half million dollar bunkers for all of our \$100-million aircraft.

36/ There shall be no more elaborate weapons twirling rituals, or precision marching rituals or parades in the military.

Training the military to march in unison should be stopped, and instead military men taught to spread out, always spread out. There shall be no more military boots, and instead our military shall wear low rise shoes, with optional velcro ankle wraps. All military shall be issued fold up insulated sombreros with their uniform to help defeat infrared drones.

37/ There is no way to defend against other nations shooting our satellites down. So, in addition to having a space force with sufficient anti-satellite missiles, we shall have tower-based GPS and communication systems in urban and suburban areas, with a good amount of bandwidth and redundancy. And we also might want to have overlapping numbers of satellites waiting on standby.

38/ We shall do extensive research on the best way to jam drone signals, and bring down drones with shotguns, rail-guns, small missiles and other means. Also, concrete buildings with fold-away steel shutters are probably the best thing we can do to resist drone attacks and ensure that our nation is not invaded.

39/ All exterior walls in our new cast concrete communities shall have at least 2 firing positions.

40/ Where our Senate develops war aircraft and other costly technology, it shall always look for allied nations that want to participate financially in the production line. Our new A-11 protector craft, and our new ground to drone missile systems should be developed in this way with foreign partner participation.

41/ We shall fragment our defense industry more than it is, with no contractor (or related contractor) providing more than one weapon system.

42/ Our nation shall not engage in any transfer of nuclear technology.

43/ All new townships shall have signal monitoring and jamming equipment, along with a great ability to produce smoke. This is the sort of defensive war equipment development that freedom lovers want to encourage. Townships shall also have a variety of moving decoy humans to draw AI drones into attacking the decoys.

44/ We imagine that many townships will cut non-essential electricity and use it to power rail guns and rail-gun drone launchers, as drone defenses. This shall be thought the sort of defensive war equipment development that freedom lovers want to encourage.

45/ Our new townships shall be built with 2"x 8" heavy steel joists at 1.22m on center over the areas between the buildings. When there is a risk of drone attack, the townships can put panels and heavy duty chain link across these rafter structures, as a defense against flying drones.

46/ It shall be thought wise for the militia to have at least one machine-gun shotgun per 30 citizens to counter drone attacks.

47/ To prevent our naval and defensive position machine guns from overheating, We shall investigate using:

a/ Reusable long heatsink copper bullet sleeves in our machine gun feeding belts.

b/ hot-swappable revolver-style barrels for our naval and land defense machine guns.

c/ Copper heatsink sleeves for our machine gun barrels. this may use an automobile-style water cooling system.

48/ There shall be no sales of sophisticated weapon systems to either Africa, the Middle East, or to any PU member state by any UM member nation. This prohibition shall however, not include rifles, pistols, 25mm rifles, .50cal rifles, and ammunition for these. It shall also not apply to weapon systems for attacking light armor. However, it shall include all forms of grenade and land mine, and other sorts of explosive devices that can be used to make improvised explosive devices or dropped from drones.

49/ To increase the number of skilled aircraft maintenance people available to our nation in times of crisis; to increase our nation's passenger aircraft manufacture revenue streams; to increase passenger aircraft safety; to increase the power of our sanctions, and to increase the US brand value: we shall require that all of our nation's passenger aircraft only be maintained by our people worldwide. Furthermore, it shall be our nation's official policy that piloting, manufacture, and maintenance of large passenger aircraft is one of the most important places where we must have both high wages and a strict meritocracy.

50/ We shall take some anti-drone measures that have practically no cost in the great scheme of things. We shall have carefully designed poles and tie-rings around our townships and various sorts of lines and netting between these to reduce the effectiveness of drones. The tower shall have pulled cables to the outskirts, and in time of war, we can easily add support lines, netting, along with many tangle lines. So neither the drones, nor their drop grenades will be able to get through this. Also there are perhaps there will be 6 or 12 sub towers around the main tower that will project up say 5 additional floors, which is above the netting. This is to provide firing platforms for turreted belt-fed shotguns. There might be 1 or 4 rings of these.

51/ Now that we all realize that the power of nuclear weapons has been wildly exaggerated, we need to adjust our chemical weapons policy, because these are now the most effective weapons. These and biological weapons need to take the place of our nuclear weapons policy.

52/ We should have extensive audio, video radar and other sensing audio along the Mexas zone and also near our bas in Panama.

53/ Light armor has been made obsolete by drones. And light armor shall no longer be a strategy of our nation. In fact, we shall mass produce in immense numbers 20mm guns so that all around the world light armor can be driven from the battlefield. We shall also mass produce body armor rounds to empower the people against the body armor of their oppressors. Armor is the enemy of free men everywhere. However, our local police and all of our leaders can wear it. Foreigners can't wear body armor, unless they are leaders. All visiting public speakers can wear body armor always.

54/ All major weapon systems shall tested by 30 groups of grunt military and an equal number of militia. All the expert weapons critics will get the opportunity to add comments. There should be testing at each stage of design and development, from schematic design, design refinement, and design finalization. Then short run production and actual use testing. Also all interested Main-Senators and up will be given the opportunity to give input.

NR'128. LATE LIFE PASSENGER JETS

1/ Each large passenger jet is capable of being turned into a WMD and used for terrorism. A 747 for example can be converted into a bomber that can carry about 416 100kg smart bombs, or 4,160 10kg incendiary bombs. So we and our allies shall endeavor to buy up all the late life passenger jets we can. We shall also prohibit certain nations and certain sorts of groups and fictional citizens from buying and using passenger jets. Then we shall keep these aircraft for 30 to 60 years and then scrap them.

2/ We shall use most of the good design practices of the FAA, However the FAA shall have no jurisdiction over military aircraft safety. This is because the safety required of military aircraft used for an hour's training a month by 1 crew is completely different from a 140-person 737 used 15-hours a day, every day. The former risks 1 human hour per month, while the latter risks 63,000 human hours per month. So we need to be around 63,000 times more careful designing and building our passenger aircraft than our military aircraft. With our military aircraft we would be better off with many times more aircraft that are much cheaper because they are built to much lower standards than high-use civilian aircraft. They can also be aircraft too old to use for either passengers and even too old to use for freight. They are fine however to keep around in semi-storage, just in case of war.

3/ The Air Force shall accumulate and keep all the low cost passenger aircraft just prior to the end of their useful life and retirement. This shall be particularly so for the 737s that will be mostly obviated by the new rail-based transport system. Thus, there will soon be a glut of 737 aircraft. At this time, the US government shall step in and buy up this glut of surplus aircraft for the sake of both threat reduction and war preparedness.

4/ Our fleet of passenger aircraft shall be surplus aircraft retired due to FAA requirements for the number of hours in service as passenger aircraft. We shall buy up a large number of these aircraft as our new rail system starts cutting into demand for short haul flights and there is a big glut of short haul aircraft. At this point in time, we should buy up all the 737s on the market at a low price, so we will have ample bomber aircraft, and at the same time these will never be used as WMDs by our adversaries. We shall also track what is going on with all the world's commercial aircraft that are not in regular service — and regularly check to see that nobody is converting them into WMD systems, particularly the passenger aircraft in adversary nations. We should also have the requirement that individual commercial aircraft that enter our airspace get continually fly back and fort to our nation.

5/ Wherever practical, the military shall deploy troops using civilian airlines in much safer civilian aircraft that neither have

to worry about failure or attack. However, as we have to buy up the late-life aircraft anyway, to keep them out of the hands of terrorists, the Air Force shall have its own own fleet of end life civilian airliners used for a variety of purposes including:

a/ The fast movement of great numbers of troops, as well as evacuations in times of natural disaster. We shall rent out our 737s for use during the busiest 2 or 4 travel days of the year: so more people can travel more easily during this time. Also, when weather cancels large numbers of flights, the Air Force can inject a few hundred extra aircraft into the system, so the system can get moving as soon as possible. The rent income will help pay for the annual aircraft upkeep. We will buy these aircraft in time of great over-supply with only one year left on their useful life, and use these aircraft for only 5-days/year for 50-years. We shall leave the seats in most of our 737s, so we can do this. However we shall have large numbers of men trained in rapidly taking the seats out and using the aircraft for mass rapid air cargo transport purposes.

b/ For re-fueling aircraft, we shall remove the seats and gas tanks, and strip the aircraft down and install a pressurized system of fuel-containing oversized wine-boxes or suitcase forms. This shall be the same fuel the aircraft itself uses. The gas tank areas shall be edge banded against bullets, and especially rear shielded. Also, even though we might only pre-convert 100 of our 737s to refueling, we shall produce and keep 1000 kits for doing this with our 737s.

c/ We shall also have 500 kits for each of 5 sorts of feed to deploy drone/bomb canisters. The drones/bombs all must use one of 5 standard sized brewery-bottle-feed sizes. These feeds can rapidly spit-out standard sized clamshell packaged bombs and quad drones, switchblade drones, guided bombs, anti-drone drones, loitering drones that drop gravity propelled guided missiles, chaff spitting drones, radar decoy drones, and radar spoofing drones high in the sky. Our F-35 fighter-bombers shall use a similar system for deploying large numbers of small packages, particularly groups of radar spoofing drones that work in sync to simulate incoming aircraft.

d/ Airlift of food and supplies to disaster area.

e/ dropping flame retardants.

x/ For maximum utility, our old airliner fleet shall be easily converted in a couple days between passenger, cargo, fuel, and feed-in-feed-out drone/ precision bomb deployment. We might also have a fleet of late-life 747s stored on the just in case lots in the middle of the nation.

6/ We and our allies shall have strict rules on who can and who cannot buy and own commercial airliners.

7/ As all aircraft can be made to deploy drones and precision guided bombs, we realize that we should not put out new international airports near any high value targets, or the midst of many people.

8/ Where possible, we shall keep our decommissioned large naval vessels in on the western side of Lake Ontario if they remain in water. The smaller ships shall be kept as far into the Great Lakes as possible.

9/ We shall also have a fleet of 500 water scooping slow seaplanes in North America. The fleet will reside nearer to the center of the country where they're less vulnerable to attack, for these are military assets. They will be rather like the CL-415 scooper fire fighter aircraft. These aircraft will also

carry army paratrooper firefighters to knock out the fires quickly. Thus we can fairly instantly put up to 4,500 paratrooper firefighters on any fire. Given a top speed of 223 miles an hour, fires 1000 Miles away can be reached within five hours. As most of our 737 passenger retrofits will have the comparatively simple ability to paratroop from, we will actually be able to dispatch an almost unlimited number of fire fighter, paratroopers to any remote fire. All the guys in the paratrooper corps will also be trained as firefighters. Also firefighters from all over the country will be able to call in and volunteer for fire storm suppression.

10/ We shall also use our 737s converted to bombers to deploy heat seeking flame retardant bombs on wildfire lines and urban fires. So the 737s come loaded from their bases, and many other airports around the country (especially in fire zones) have warehouses full of flame retardant bomb cartridges that load in the plane via a multi track feed system in five minutes. Then we see perhaps hundreds of aircraft converging and simultaneous detonation of well spaced fire-suppressant “bombs”. Also, this sort of areal firefighting can happen around the clock.

11/ The Senate and others shall investigate whether or not there is a universal over-statement/over-measure/over-billing of fuel actually used in passenger jets.

NR'129. TACTICS OF WAR & FORCE

1/ Generally it shall not be allowed to insert small military forces into dangerous combat situations using a noisy helicopter. They may be removed with helicopters, but they can't be inserted. Also, helicopters have become just too easy to shoot down given today's shoulder-fired missile tech. So except for the areas right around our bases, and over safe areas, and territory we control, and to extract soldiers in an emergency, we shall buy and use no more helicopters. The 2.3x-as-fast, much more robust, larger payload A-10s/A-11s shall take over this roll from our helicopters.

2/ We shall keep large amounts of fuel safely stored deep underground and spread out at our military bases.

3/ The Sub-Senate Senate shall review which of our military bases (domestic and foreign) are no longer worth keeping. Then the Senate shall sell/ give away the unneeded/ redundant bases around the world. If the bases are to be given away, they can only be given to the UM or returned to the broad democracy of that nation.

4/ Wherever we see nations oppressed by tyrants using the threat of armed force against their own people to hold on to power, we shall struggle against this as follows:

a/ We shall be eager to use our air power and sea power against target-rich military, government, and personal targets of tyrants and their ruling junta.

b/ We shall be eager to arm the oppressed people of that nation with semi-automatic rifles and easy to conceal semi-automatic pistols.

c/ We may sent military coordinators to organize and train local forces, in addition to coordinating the use of our air power. However, the number of our men with boots on the ground shall be limited to 1% of that nation's own domestic freedom fighting forces at any particular time.

d/ We shall be extremely reluctant to send our fighters to foreign nations, where our forces are more than 1% of that nation's own domestic freedom fighting forces at any particular time. This shall be thought to be fighting a war on behalf of a foreign nation.

5/ We shall stop using our great navy to assure the safe sea passage of ships trading with the nations and empires we hold to be the adversaries of our dear freedoms. The navy shall also track all of these ships and post their locations, images, vessel name, country of registry, and probable cargo on the navy website as our duty to our allies in freedom.

6/ As long as there are frontman monarchs and frontman oligarchs and frontman super-human zillionaires, the State department shall have a large corps of assassin-spies that it will notify and activate when the monarch, oligarch is within range. These tyrant killers, even if there are 30 collateral dead civilians and 300 dead collateral government workers, shall be treated like heroes and given Over-Senate access to use the Senate resort system. They shall also be paid an appropriate bounty considering the service they did for freedom. It is thought that this policy will rapidly eliminate monarchy and oligarchy worldwide — and good riddance!

7/ When we (or our close allies) find ourselves at war with other nations, we shall use our great navy to close off some of following sea sphinxes to our enemy's ships. This shall be considered the easiest, most powerful, and the most peaceful way to coerce the rest of the world over to our ways of peace, truth, and freedom:

a/ The Panama canal.

b/ The Straights of South America.

c/ The Straights of Africa.

d/ The Red Sea / Suez Canal.

e/ The Straights of Alaska (Bering straights).

f/ The Straights of Persia (the Persian Gulf).

g/ The Straights of Spain (Gibraltar).

8/ We shall place our naval vessels including our submarines in the Arabian Sea and at the cape of South Africa, and perhaps also at the cape of South America. So long as China, Iran, Russia, and the other Muslim nations remain our adversaries, we may use our submarines to close these areas to their ships. This will have the effect of forcing the ships of these nations to use our newly-reclaimed Panama canal to trade instead. Thus the center of world sea trade migrates from the Red Sea to the Panama canal. Thus North America is at the center of the world trade, instead of the Mideast. This is how we force democracy on all the nations of the world. This is how we force the Muslims of the world to obey us.

9/ With a 66% overmajority, the Senate may elect to use our navy to close-off any of the world's sphinxes it so elects in order to further the long-term cause of world peace and harmony:

a/ The Senate shall be biased towards doing this with all nations that menace other nations with threat of military force, or terrorism, or addictive drugs, or that wage wars of propaganda and even those that simply have excessively adversarial relationships with our nation.

b/ The Senate shall frequently go along when the UM votes to close the world's sea sphinxes to the sea vessels headed to, or from certain nations.

10/ military intelligence and long range military planning shall not be squandered on anti-terrorist or policing agendas. Also, if there is any anti-terrorism intelligence agency by Government, let it be outside the military. Let there be an anti-terrorism police that is only allowed to spy on and arrest foreigners. Matters of domestic terrorism shall be regarded as under the national police which must allocate a fair amount of budget money in consideration of the number of people killed by domestic terrorism vs. all the other ways that crime is leading to the death of our people.

11/ There shall be no more Pentagon. The Pentagon, like all our other DC bureaucracies shall be replaced by a distributed network that physically works in all 34 of the Senate's staff-only secured office cities built around our 34 RVCs. Within 180 days, all of our nation's military acquisitions department shall be fired. We shall completely rebuild the military acquisitions department from scratch, because of the existing department is so corrupt. Within 180 days, at least half of the staff of the Pentagon shall be fired, and the other half shall be moved out of Washington, and to the less strategically vulnerable heartland of our country.

12/ For invulnerability to strategic bombing, all of our RVC government offices communities shall have special features:
a/ Heavy-duty minimum 20-cm 10,000 PSI concrete walls and roofs, made with ample rebar.

b/ In general, no more than 12-people's offices without a minimum 20cm thick wall in between.

c/ Bomb shelters in the basement.

d/ All outside walkways and parking areas shall be covered to prevent tracking of where people are going from satellites.

e/ The offices will have a small operable window that uses level 8 bulletproof glass and a rolling 2.5-cm steel plate as inside bomb shutter. The roof shall be made of minimum 40-cm thick concrete. The RVC buildings should all be 5-stories tall and the township wings all separated by at least 20 meters.

13/ Each Centi-Nome shall decide which of its militiamen it will elect to provide RVC security. This will be a very easy job, and a mostly pleasant, and a social job with rather high pay. But the people who manage the entry, security, and ejections at our nation's RVCs shall be elected by their Local Centi-Nome.

14/ The Senators voting at each RVC shall manage any prosecutions related to trespassing at an RVC. It is important to note that the Senate, the military leadership, and the 34 national police headquarters will all be guarded and protected by militiamen, and not by police or the military. In fact, if the military drives towards (or just appears) at the Senate or military HQ, in arms, or with arms ready nearby, or in a demanding, protesting, domineering, or confrontational state, there is supposed to be a general call to arms to force these men out and perhaps charge them with armed insurrection if this is actually applicable.

15/ We shall have radar stations dotting the entire Mexican coastline, except perhaps south of Cancun. We shall have radar stations on the west end of Cuba and also near Varadero Cuba.

16/ We shall be mindful that what our adversaries and enemies do is frequently a tip off as to how to resist them. For example Iran's threats to close the Persian gulf is a tip-off that

this is what we need to do to dominate Iran and the other nations of the Mideast.

17/ We shall extend the Monroe doctrine and allow no Asian European or African military presence in the Americas.

18/ Our generals and military leaders shall not be empowered to make statements or offers to adversary nations, and they shall generally be relieved of duty and tried in a court martial for doing this. Only the Senate and its juries shall make these decisions.

19/ If necessary we shall use the following strategy to easily and completely defeat all the Mideast nations and make them all do what we want. We will threaten to shut down their trade and use food as a weapon. Then we can compel them all to abandon Islam in exchange for trade and the outside food imports they are dependent on. We can also isolate and greatly impair the power of the eternal Mideast allies in China/ North Korea, and Russia at the same time:

a/ We deploy a dozen submarines on rotation outside the mouth of the Persian Gulf, Gulf of Aden area, as well as Somalia, and attack all shipping commerce with these areas/ inlets. This will drive all global commerce through our Panama canal which is only slightly (5-20%) further for everyone except India. To make up for the added shipping costs, we will allow the largest ships to go through our Panama Canal for free. If there is not enough capacity, we shall build a second canal at the Rio Congo pass.

b/ We will also take over Venezuela's oil fields (supposedly the largest in the world). Then we will open e-money accounts for all Venezuelans in Venezuela that are not employed by the Maduro government and put all of the Venezuelan oil profit money in these Venezuelan citizen accounts. This will win over the people of Venezuela that we are their liberators and not their conquerors. Then once the Venezuelans elect a broad democracy of their own, we will turn the oil fields over to the Venezuelan Sub-Senate with the caveat that the production can never be reduced from the levels we had it at, and all the Venezuelan people must share this money equally, or we will take over Venezuela's oil industry again. We must always remain watchful that the Arab reductionists do not return to ruin the oil output of their competitor Venezuela again.

c/ We will conduct oil exploration all around Cuba, especially on the north shore.

d/ We will welcome it when China and India begin driving for a rail connection to Europe via Ukraine, because this will force the complete evacuation of the Mideast.

20/ Venezuelan and Cuban oil are so important because oil from these places completely ruins the market and pricing power of Mideast oil in Europe, North America and East Asia. It has always been a #1 goal of OPEC and the Mideast to sow tyranny, poverty and chaos in these two nations to ruin their ability to compete with OPEC and the Mideast. Therefore it is a #1 military objective of our nation to assure that these nations remain democratic, peaceful, and prosperous.

21/ There are also vast oil fields on and around Baja California particularly around Vizcaino which is an ideal location for smelting and toxic activity. The more sources of oil we develop, the more unfeasible it becomes for Mideast interests to stir up wars for temporary monopoly power and

10X profits as we saw before the 1973-1977 Arab oil embargo. The US shall manage the oil fields of Baja California to max out output for the Mexican people which shall remain the owner of all underground oil in Baja California.

22/ It must be noted how Russia fears our 45-year-old F-16s, And China has no ability to project power over our oceans. Once we shut off Middle East trade and force all the trade through our Panama Canal, China will make it job number one to create a railroad to Europe, which it should have, which the Chinese people surely want (instead of being gouged by the Arabs) which will completely bypass the Middle East from Aisha, or it's Asian trade, Muhammad's first wife, which was nine centuries old, not nine years old. This is how we will completely conquer Islam and end the inverted and devilish economics of Ishtar.

23/ Regarding our combat aircraft, we shall emulate Singapore and say that:

a/ All military pilots must be born to citizens on both sides, and must have lived all of their life in our country except perhaps when stationed overseas.

b/ Muslims and people from Muslim nations shall not be allowed to serve in the Air Force because they cannot be trusted not to be terrorists.

24/ We shall develop and mass produce a couple sorts of cheap signal jammers, so we will be less vulnerable to drone attacks. We can keep these in our armory system along with our decoys for enemy drones. We should also have some millions of automatic and semi-automatic shotguns in our armories.

25/ If our nation or the free world ever come under secret sustained attack from an undisclosed attacker, then we should close Suez, the Red Sea, and Persian Gulf, and operate the world centered on Panama for some years.

26/ We would be wise to make all of our concrete steppingstones so they look like people from above from various angles, so as to act as drone decoys. If they are needed, they can be re-purposed and set all over where they are going to get hot in the sun. Then the IR drones will not work well, because of the decoy IR shapes everywhere, especially at the end of the day. So the drones, the foreign drones can't work very well, but the local people know where all the decoys are, and they have a computer program that that they use that rules out all of these reports from their own drones.

27/ As long as it is true, we shall regard China as a nation living in high-rise chicken cooking racks that is terrified of losing their only son or their only grandson.

28/ The command base for the Mideast shall be located on our base at the tip of Cyprus. We shall have no command function of our military located in any Islamic or former Islamic country lest we stimulate the economy. And to the east we will run our military out of bases in far northern India, and not in Afghanistan where we will only stimulate the local economy.

29/ For ever 10 rifles we have in our armories we shall have 2 M203 grenade launchers and ammunition of various thrust and destructive power.

30/ Government shall be prohibited from simulating attacks on our nation, as these simulated attacks are often very hard

to tell from real attacks.

NR'130. MILITARY AND MILITIA OTHER

1/ Each branch of the military shall have its own college and its own online study material for that branch's service members. The names West Point and Annapolis shall remain, however both schools shall be moved to multiple locations around the world. Each academy shall also produce ample online learning material for all military staff who cannot attend the college and wish to learn more about defending our nation.

2/ military training should be much more about endurance, marksmanship, navigation, dashing among cover, and strategy than the time-wasters of hand to hand combat abilities or obstacle course abilities.

3/ Once we have brought the enemies of democracy in this world to their knees, we will substantially cut the size of our standing military. However, we will still fund our large carrier-based navy and our world-beating air power for many many decades, just in case. The changes we are making to our systems of Government spending, and the ubiquitization process will enable us to substantially trim our military hardware costs. Also, the Senate will be much more efficient financially and thus we will be able to reduce the cost of our military equipment. Also, we shall rely more on vast numbers of part time military and militia

that meet only 1 to 60 days a year for training, instead of a giant standing army.

4/ The Senate shall make a list of all of our military and tactical blunders, as well as all the blunders of Rome and Greece as they fought to secure the world. The Senate shall make this list, and it shall also make several video series that explain all of these things to our middle schoolers, our high schoolers and our college students, on multiple occasions.

5/ Our national security imperatives shall be thought more important than our rules against racism when it comes to people who are from, or appear to be from nations that are our nation's adversaries on the geopolitical stage.

6/ All naval vessels shall be camouflage painted like the USS Gosselin was.

7/ All long-term VA benefits shall be the same regardless of where the veteran lives.

8/ To reduce smuggling:

a/ The Coast guard shall be under the navy and the navy crews and commanders shall cycle through the Coast Guard under short commissions.

b/ There shall be 3 national ship traffic monitoring systems, in addition to the UM's ship traffic monitoring system. There shall be the navy system, which tracks the entire world. There shall be the navy Coast Guard system which focuses on the seas near our nation. There shall also be harbor system which track ships in and near harbors. All ships must notify and log into each relevant system to use the oceans. Also, all commercial shipments moved around the nation originating overseas must be tracked as they move to their final destination up to the point of individual distribution. When it comes to imported goods, we shall aim for a total big brother situation with regard to their importation, distribution, shipping, retailing, and use. The reasonable cost of

government compliance for this shall be put on the importers and distributors, without government credits or rebates of any sort.

9/ Each branch of the military, the financial system, the county recorder system, the police system, and the disaster system shall have their own independent communication system with their own independent secure communication lines.

10/ We shall compile an anthology of all film and television war propaganda in support of going back for fallen comrades no matter how risky. We shall not blindly go back for fallen comrades when the risks clearly outweigh the rewards. This decision shall not be made with one's heart, but weighed carefully. We shall also not reward foolish disregard for one's own life by calling it bravery or giving it war medals. At least 6% of armed forces training shall be about how to avoid getting shot, and when to take a risk.

11/ No branch of the military shall engage in any sort of commerce or trade the way the so-called "People's army" does in China. (People's oppression army more like it.) If we allow military commerce, this causes the military to be corrupted.

12/ It is battling with each other that made a man's punch much more powerful than a woman's. A similar thing happened with the battle minds of men. Freedom's power shall not be handicapped by delusions of sexual equality with regard to combat leadership. Only men shall make tactical and strategic military command decisions. Only men shall pilot or crew military aircraft, command naval vessels, or lead other men into combat or potential combat, including military patrols and military police.

13/ Pregnant women shall not work as police officers, military, or or crew on any military vessel.

14/ For service on our nation's aircraft and naval ships, we shall only pick the best, the smartest and the strongest according to one realistic test that shall not be made any easier for the sake of racial or sexual equality. If there are no women that can pass the test, then there shall be no women in that area of the military. We shall not weaken our military forces to create artificial sexual equality, for this is suicidal madness.

15/ Regarding the militaries of Rome, Athens, and Sparta, we read about homosexual craziness in their military, so we know their culture was manipulated by the enemies of freedom towards allowing homosexuality in the military. For this reason, we shall go in the opposite direction and prohibit openly homosexual people from the military and police. The Senate may also prohibit all homosexuals by a simple majority vote from the Air Force, marines, and/or navy if it elects.

16/ We shall do all we can to assure that the military and police remain places of duty and public service and do not become a homosexual lifestyle choice. One direction augurs towards military power, the other towards military weakness. This is because the people motivated by duty are a much stronger force than those motivated by sexual lust and duty. There shall be no transsexuals or cross dressers in the volunteer military.

17/ Women are around 3 times as likely to suffer from PTSD than men. For this reason and for their lower physical

strength, women shall be allowed to join both the militia and the military, however women shall be prohibited from combat positions and field police positions except where they are needed for working with women, or in emergencies. Also, given that only 2% of chess grandmasters are women, we shall prohibit women from leading others in combat, or making life and death tactical and command decisions in the military. Also, women may achieve high rank in the military, but they shall be barred from command. Each branch of the military shall establish its own policies for where women can serve, and the sole criteria for this shall be combat strength.

18/ National defense tactics shall be offered as a high school elective subject. Synchronized marching and gun twirling and uniforms shall be thought to be aspects of systems for the mighty to control whole armies and use them against the people. Xenophon's Persian Expedition, with its emphasis on defensive tactics shall be the main guidebook for high-school defense tactics.

19/ Propaganda tactics shall be offered as a high school elective subject in each year.

20/ The various parts of the military shall be free to discriminate against (or ignore) servicemen that:

a/ Are disabled in various ways that prevent them from being an effective fighter.

b/ Are too short, too thin, too tall, too fat, or too weak for combat.

c/ Will not always be combat ready. This includes all diseases and conditions that cause bouts of illness or weakness, diseases such as Hepatitis, HIV, and asthma.

d/ Carry an infectious disease like malaria, typhoid or tuberculosis and thus pose a risk of causing infection in other servicemen.

e/ Have a blood infection such as HIV or hepatitis that makes them unable to donate blood in an emergency, or that makes them potentially infectious to medical staff or corpsmen. Also, simply having servicemen that might be infected slows down all surgical care for all combat wounded.

f/ Have ever been openly homosexual, or transsexual or any of the many queer genders.

21/ All military dog tags shall have a plastic cover over a barcode that accesses the soldier's army and healthcare file including their blood types and factors and any allergies and chronic illness.

22/ Only citizens born in our nation and without extreme religious views may be flight crew on our nation's military or militia aircraft.

23/ There shall be no special religious, political, extremist, or racially defined battalions inside the military as this is the stuff of tyranny. There may however be male-only and female-only battalions.

24/ It shall be a civil defense requirement that each household keep food and drinking water sufficient for at least 180 days. However, people shall not attempt to build their stores when government says not to do this. The Senate may require inspections of people's home food stores and penalize those who fail to take precautions.

25/ Government shall go out of its way to prevent stolen valor, and the impersonation of military heroism and civic service. Therefore, we shall have it that criminal charges shall apply to everyone who falsely claims that they have served in the

military, or served in a combat role, or that they have received certain military rank or awards, or medals, or service records. Also, similar charges shall apply to those who make false claims about service in police, fire departments, or EMS. To this same end, all retired military, police, fire department and EMS workers shall have their service record on their main public facebook page for all to see. This information shall not be in the section the page holder controls, but in the part of the page controlled by the county recorder system. Like with criminal records, professional licensing, and education testing, this official information shall not be under the control of the person who's page it is, but Government. This to ensure that the social information is always truthful and accurate, and not corrupted by the page holder for reasons of status or prestige. Also, everyone claiming to be a veteran must state their unique service number at the same time as the claim. If they fail to give their number (which can be verified by photo on a front page box of heroes.gov) they should be presumed to be liars. Those who are recorded lying about being a hero should be sentenced to 2-years in a work camp upon conviction. The person recording them and reporting them is always supposed to get two month's wages (average wages) as a bounty. Also, this verification system shall be thought key improving the connections between our veterans and the public. It is thought that this will help reduce homelessness, unemployment, loneliness and suicide among veterans. Also, all the vets that don't have anywhere to go for holiday meals or weekend barbecues may post their name and see if they can get an invitation.

26/ All government identity documents shall indicate whether the person is active duty military, or retired, and this shall not be optional. To honor those who have actually served, it shall be a crime to commit stolen valor by impersonating a veteran, or to wearing clothing that implies that a person is either. It shall be a felony to beg while pretending to be a veteran. Everyone wearing a military uniform, or a police uniform, or any part thereof, or anything that suggests that the person is military or police or fire department or EMS must eagerly furnish ID and proof that they in fact work/worked in these fields, or they should be immediately arrested.

27/ When military and police equipment is going through the streets, the people shall have an absolute right to take pictures and record this and ask questions about this.

28/ All military bases renamed after the year 1990 shall be restored to their prior name.

29/ Given the strategic importance of Panama, We shall have no fewer than 5 standby runways in our newly recovered Panama canal zone, and no fewer than four standby runways on the well named Isla del Rey (King's Island), which shall be entirely depopulated of civilians and used only as a US military airbase and military harbor.

30/ We shall always have a sort of G.I. Bill. This will help our military people to either go to school, or slightly preferably, start a business.

31/ We imagine mass produce laser systems that convert all the power from a township plant into focused energy beams beings with multiple mass produced emitters atop each township tower, and around each utility plant. Eventually, warfare will be lasers defeating all forms of missile, except during times of fog and clouding.

32/ For reasons of security and infiltration, only citizens shall be eligible to serve in our nation's military. For important roles in the military, only native born citizens shall be eligible to serve in our nation's military. Also, no workplace or employer within our nation (and not in any foreign worker zone) shall employ more than 50% non-citizen workers.

33/ The Senate and each military command in each theatre of operation shall publish a daily list of deaths and serious injuries to our nation's military and militia (if applicable) resulting from all wars, and terrorism, and military actions, no matter how long the war goes on for. This discussion must include a tally of both the day's casualties and the war's casualties. This shall be thought an important thing that we owe all of our fallen servicemen. It shall also be thought to be a thing that reduces the potential for war casualties to get out of control.

34/ Those who have been in the militia or military shall be no more likely to be drafted or called to serve than anyone else. of their birthday and age.

35/ There shall be no penalty for killing military conscription officers that don't use a birthday lottery to decide who gets drafted. There shall be no penalty for killing military conscription officers that round people up off the street.

36/ Women can never be drafted to fight in war, and this shall be considered genocide.

37/ Our nation shall not consider the Geneva convention to be applicable in regard to unwounded combatants abusing active hospitals, schools and civilian shelters as hiding places. We shall also not consider that the Geneva convention is applicable to those strapped with explosive vests.

38/ The great and illustrious hero of the Militia shall be 80-year old Samuel Whittemore of Revolutionary War days.

39/ Where practical, all crew on all naval and coast guard ships shall have the right to bunks with:

a/ 12cm thick mattresses with a zippered and sealed plastic fluids cover all the way around the mattress.

b/ Privacy curtains

c/ At least 90-cm of distance between the mattress floor, and the bottom of the bunk above.

d/ All sailors shall have the right to a mattress that is at least 3cm longer than they are tall.

x/ On land, all military mattresses must be of standard hotel thickness and covered with a plastic fluids cover. On land, there is no need for privacy curtains.

40/ All combat military that have suffered major injuries while deployed shall get free healthcare up to and including all Tier-3 healthcare for life. They shall also get all reasonable surgeries needed to put them back together again.

41/ All active duty military, their spouses and genetic offspring shall get:

a/ Free healthcare up to and including all Tier-2 healthcare.

b/ Free use of the passenger rail system and merchant marine passenger liners. They shall also get a reasonable amount of personal items shipped to their deployment zone for free.

c/ Two round trip flights per year from the deployment area to home in our nation for military personnel, and one round trip

flight per year from the deployment area to home in our nation for spouses and children.

42/ All combat military and all police officers, firemen, and EMS shall get free group psych counseling together as one group, and each shall also be picked by a 24-hour crisis phone help buddy (or two if the patient is extremely messed-up). All of this counseling should come from retirees/veterans, and not from people with mostly-worthless psych academic credentials. It should also be easy for the people seeking help to switch phone help buddies until they find the right one. It should also be common for the people seeking help to meet with their phone help buddies.

43/ We should all ponder what happened in ancient Spartan Greece, and how nobody could get at the lands of the Peloponnese, the original pen-insula, or tube island. They couldn't get past the massed Spartan troops at the microscopic Corinthian canal border. So Sparta could plant olive trees and other sorts of orchards and suffer no risk of attack. So Sparta profited and indeed it batted on Ishtar's losses. And the Spartans were smart and they couldn't be turned away from their obvious need to defend their microscopic border, the entire reason their wise forefathers all settled in the Peloponnese to begin with. So Ishtar responded in several ways, including turning all the normal Spartans into a crazy hyper-militarized homosexual society. They also raised the people living just outside the Corinthian moat in Athens. So the Mideast brothers twisted Sparta into a hyper-military society that was that was LGBTQP friendly to the point that the women, or "birthing persons" were totally devalued. Thus the Mideast Bros, which were called Helot slaves at the time had many children, while the Spartan numbers declined.

44/ All military used to detain or plan the detainment of masses of citizens shall be subject to execution. When the military is commanded to lock their people up for any reason, this shall be thought the equivalent to firing on their own people. In both cases the military is supposed to disobey orders and fire on the people commanding them to do such wrongheaded things.

45/ Stealth tech shall not be used by the public or foreign governments in our waters or near our nation. Unregistered stealth craft found in our waterways or skies shall generally be either confiscated or brought down. The military shall maintain a monopoly on fighter jet use in our nation.

46/ All militia and military firearms including the internal hardware pieces shall be made from stainless steel and delivered with appropriate camouflage paint for their region.

47/ Our new military and militia rifles should emulate the AK-47 in regard to the rifle's reliability, ruggedness, durability, simplicity, and ease of production. Our rifles shall however had longer, heavier barrels, and bigger higher grain bullets. Also the guns shall be designed so that parts from various damaged rifles are easy to use in other military/ militia rifles.

48/ In addition to militia firearms, all our militiamen and infantry shall all get issued scopes, night vision and infra-red vision equipment.

49/ Our Military shall no longer be regarded as a thing of jarheads, but more a thing of freedom fighter and liberators.

50/ In the military, nobody shall ever be punished for speaking to a commanding officer, or to a Senator about bad

weapon systems, or poor readiness practices, or seemingly suicidal orders, or irregular orders.

51/ The Senate shall be above all military rank. The Senate shall have the right to override all military command decisions, and all military rank. The Senate may also stop any prosecution, or pardon any military people that have been court marshaled.

52/ The Senate shall have the right to subpoena any member of the Armed Forces, or any member of the militia, or any civilian government worker for testimony without the consent or permission of their work superiors. Indeed, there shall be no communication between superiors and subpoenaed people between service of the subpoena, and when the deposition/ testimony is given.

53/ With regard to the government's mass produced widgets, systems, robotics, and infrastructure, be they military or civilian: One of the most important statistics shall be the cumulative amount of money spent on developing the Government's new "thingus" since its inception. Also, no Government thingus shall be renamed, and any renaming of any thingus should be regarded as the kiss of death, and an admission that the thingus is profoundly flawed and should not be continued. The second most important issue is what all the detractors say and what has been done in response.

54/ Military whistleblowers shall normally get transferred to the Senate inspection core for the military, where they will be outside the military chain of command.

55/ Foreign grain and meats shall not be allowed in our nation's markets, unless the Over-Senate declares a food crisis. All grocery stores must sell 10kg vacuum-packed blocks of wheat, corn, lentils, and Rice at the spot price farmers receive plus a 25% markup for packaging, transport and retail.

56/ There shall be no prohibition against using our military within our nation in time of disaster, or when we need to remove a large number of foreigners that are armed or not. However, apart from this, we shall not allow our military to operate within our nation, for fear that this standing army in times of peace evolves through a large number of "Islamic-style struggle" steps to eventually hold arms over the people they were originally supposed to help and protect.

57/ The Senate shall be allowed to use airstrikes and drones, even with collateral casualties for the following groups:
c/ Monarchs and dictators, oligarchies, and other non-democratic governments and governments that lord over nations with threat of force.

a/ Terrorists.

b/ Communists.

c/ Islamic organizations.

d/ Overseas Mafia drug traffickers, drug manufactures, and drug growers, but not those who are involved with marijuana.

58/ We have been paying trillions on our military but only graduating 1000 people from our Naval Academy and our West point. This was obviously designed by the devil (or Islam) to keep our military dumb and foolish and weak. Under our new constitution we shall have no fewer than 100,000 students graduating from West Point, Quantico, the US Naval Academy, and the Air force academy. Also, no less than 100,000 students a year shall be graduated by our new crisis medical corps, with specialists in air quality experts,

biohazards, radiation, trauma care. These tertiary schools shall offer a first rate education and housing and charge no tuition, but the students must all be trained for either military command or civilian civil defense.

These schools shall use at least 50 campuses worldwide. Army training will focus more on storage logistics for the army and militia, Marines training specializes in attacks, attack logistics, mineral exploration and handing out guns to oppressed people. The naval academy specialize in naval warfare, merchant marine logistics, and the suppression of piracy.

59/ All military officers and the leaders from among the fighting or enlisted men shall have the right and privilege to speaking frankly to command about mistakes in the approach used, provided they either do this in writing, or the words were read from something written down.

60/ Every person that serves in the armed forces of our nation, or attends a military academy shall get a 6-day introductory hands-on course in how the oil industry works, with one day on a drill rig, one day on refining, one day on transport to refineries, and one day of wildcatting, one day about sold oil transport and selling, and one going over how all the prior oil monopolies worked. This knowledge of oil shall be thought key to ending all OPEC and all Ishtarian power forever.

61/ No foreign nation shall have any military base in our nation. We may allow allies to have training facilities, but they shall not be considered military bases, and there shall be no right to prevent inspection by our people.

NR'131. ARMED SERVICES REORGANIZED

1/ Instead of our infantry, weapons specialists, and even most of our pilots working a full time job in the military, we shall instead try to have a much larger pool of part time military staff working 1-day a year to 30-days a year (after 1-to-12 weeks of basic training, and some video training). For example, we will cut our full time army staff by 1/3 to 1/2, and we will then use half of these wages saved to double or perhaps quadruple the number of lightly trained men ready and available for national defense in the militia and overseas deployment in the army reserve. The part-time militia reservists only get the average wage for the time they serve. However, the low-time army reservists will get much higher pay because they agreed to go overseas. They will also get to say with pride that they were in the army reserve and agreed to overseas deployment. So when men want to serve but don't agree to go overseas, they join the militia Reserve. And when they agree to to possibility of being sent overseas into combat, they join the army Reserve and get much more money and recognition. There will be many identical combat positions in the army and militia, identical except for the danger premium, which varies depending on the army job and the geopolitical risk at the time.

2/ The Navy, Marines, and Air Force shall be regarded as foreign expeditionary forces. They shall only be used to project power overseas and shall have no place in the matters of our nation of the people, by the people, and for the people.

3/ The army shall now be made into something different that it

has been. The army shall now:

a/ Manage and store the arms of the other branches of the military in the homeland.

b/ Assure that there is sufficient ammunition and stores of weapons and equipment.

c/ Take possession and maintain all of our nation's arms factories that go out of service. This is instead of the factory being liquidated.

d/ Train and organize army reservists and militiamen in the use of arms.

e/ Organize the militia.

f/ Be a source of part-time army reservists available for overseas deployment.

g/ The army also provides redundant inventory management of all the weapons in each armory. This along with the militia, and the Centi-Nomes managing the same inventory.

h/ The militia services the militia weapons in the armories, cleans the weapons, cycles the ammunition and cycles the other supplies for training and range use or near expiration sale. The Armi restocks the militia with fresh stocks.

i/ The militia weapons and military weapons are supposed to be identical, and use identical parts and ammunition where practical. Thus broken weapons can be used for parts. Also we can achieve greater economies of scale with both weapon and ammunition production for our armed forces.

j/ Each Centi-Nome armory is supposed to have a bullet making and shell re-using machinery for each sort of ammunition used. These bullets may be used by either the militia or the military.

x/ The Armi shall not run the militia, or give orders to the militia. The Armi only arms the militia with large arms in case of invasion or war. The Armi also supplies/resupplies the militia with ammunition in addition to the militia's own ammunition stocks.

4/ The army may now be spelled Armi, like the word "Arms" in Italian.

5/ The Armi shall be under the control of the national Senate, just like the navy, Air Force, and marines. The militia shall however be different. The militia shall be called to arms and deployed by the various county Senates in the same way the national guard was "called out" under the various individual governors of the old system. Also, the national Senate shall be expected to establish reasonable uniform policy for for the militia, just like it does for the other branches of our nation's armed forces.

6/ America's military and DOD shall be re-imagined as follows:

a/ The navy is about its mobile floating weapons platforms.

b/ The marines are about rapid oversea deployment of fighting men and military equipment

c/ The Air Force is about controlling the skies, delivering bombs, and air-lifting moving men and equipment.

x/ The US army fighting force shall either be moved over to the marines, or another branch of the military, or they shall switch to part time work, or join the militia. Instead, we shall rely more on army men and militiamen trained 1 day to perhaps 60 days a year for combat forces. However the Armi logistics and training people will frequently be full time positions.

7/ All of the following shall be under the Air Force.

a/ Air superiority fleet, and scramble jets to intercept incoming hostile, or black-box aircraft.
b/ Purpose-built bombers.
c/ Aging airliner backup Fleet.
d/ Paratroopers.
e/ Ground attack aircraft.
f/ Helicopters for evacuation.
g Air deployed drones and missiles, especially air-to-air missiles. Ground to air defensive weapons shall be under the Armi and militia.

8/ The number one thing that the army shall be expected to do is to maintain homeland equipment and forces readiness and especially ammunition supplies in the vast amounts necessary to fight a major war, and to resist invasion. The bullets are after all just as important as the guns.

9/ We need a navy, and an Air Force, and a marine force of super well trained men to act as our nation's professional military. The giant standing army in time of peace is a huge waste of money.

10/ A certain amount of militia training shall be required in secondary school, including all aspects of basic firearm use, care, marksmanship, and firing range. You must pass these tests in order to graduate secondary school. The familiarization of everyone with firearms shall be thought both important for civil defense, and also important for keeping adversary states from undermining out will to own firearms.

11/ The armed forces shall experiment with various sorts of part-time marine enlistment and training, hiring people into full time jobs. When the marine corps needs people to do work, it shall prefer marines by the hour to non-marines. Likewise with the army, navy and Air Force.

12/ All sorts of firearms may be kept in a Centi-Nome armory. Some will be privately purchased and owned. However it is expected that most armory firearms (along with body armor, helmets, uniforms, night vision and other equipment) will be given for free from the national government and the Armi to the dutiful people who join the militia and who complete 20 training sessions in two years. Then the firearm and other defensive equipment shall be given to the militiaman, and the government shall no longer have any claim on the firearm or equipment. However, if this is an armory weapon it must be kept at the armory except when there is a call to arms.

13/ After range time (All armories have free public firing ranges) the firearm owner turns his armory firearm back into the armory range crew who inspects the gun and clean it if needed. All active militiamen also get 20 rounds of range ammunition to practice with each year. The 6% that snipe best at a distance, and the 6% that get the most clay pigeons get double pay. (They can only win one of the two prizes per teneth). Also, the best snipers get offered a 50-caliber rifle or perhaps a 70-caliber tripod gun as their militia weapon. If they pick either, they get to pick their spotter.

14/ Instead of having a standing full-time army in time of peace numbering nearly a million men. We shall now think it better to have around 400,000 full time people including trainers and a couple million reservists. This will certainly be much cheaper, but it will also make our nation much stronger defensively. It will also have the benefit of being both harder to drive the people into foreign wars, and harder for tyrants to use our military for their own nefarious purposes.

15/ For domestic defense, the Armi Air Force shall rely more on decoys than on expensive stealth materials.

16/ It is thought that a part time militia will have better people, and better fighters than a full time domestic army. Thus after just a week or two of war, we will not just have many times more men in the field defending our nation, but we will also have much better men in the field defending our nation as well.

17/ With regard to our nation's gifts of food aid, we shall switch to now giving away our own foods stores, for our own people as these are about to expire and we shall deliver this ourselves without any local help. The distribution of this food and other supplies shall be by our merchant marine that will transport the food to foreign ports in crisis situations worldwide. And then our Marines will work handing out the food, managing the lines and the face and handprint logs. The marines keep the warlords at bay, because they know the marines have backup forces and drone surveillance, and air strikes on the terrorist warlords. We shall stop using military contractors and non-governmental organizations for logistics, because they are so frequently totally corrupt.

The staff that we use to distribute our aid will be USMC. All the overseas transport of USMC equipment via ships shall be by the merchant marine which shall also use the deployment ships for our nation's trade particularly with Hawaii, Cuba, Hispanola, Jamaica, Yucatan, and Europe.

18/ The duties of the USMC will be expanded from being only about Combat. Now the Marines will work on other things like:

a/ Using drones to get arms to people around the world, so they can overthrow their oppressive government.

b/ Keeping our trains safe from crime.

c/ Border closures.

d/ securing railways and pipelines.

e/ Shallow oil probing and drilling.

f/ Combat training.

g/ Assuring food delivery in famines.

h/ Domestic backup drone defenses.

19/ We shall not have any military bases in the Mideast. If we have these, then we will get constantly baited into profitable wars by terrorism. From now on, all that happens when we get baited into action by Mideast terrorism is that we cause them to suffer more cost than they get from us.

20/ Our main airbase for Afghanistan shall be located near Jalandhar India. This is a much better location for an airbase than in Afghanistan. here, the Afghanis get no money from our base, so there's no incentive for them to terrorize us. In fact all they will get is bombs, so there won't be any terrorism because there's no benefit to the to the local economy.

Instead we stimulate the Indian economy, and we also have aircraft on hand to defend India against incursions by Muslims from the west if we decide to do this.

We should be really careful about building airbases in any Muslim countries. We should default to being on their outskirts such as this location. And this place will not be much of an airbase, but we will be able to land our bombers and refuel and re-arm. In fact, most of the munitions and fuel and certainly aircraft are not even kept there most of the time.

We shall also have an airbase and minor naval port at Beyt Dwarka island and perhaps the naval Park Peninsula of far west India.

NR'132. DOD INTO 75+ BUDGET ITEMS

1/ It is thought that breaking up the DOD will result in significant cost savings. It will also help the sort of stealing that was reported just before September 11, 2001.

2/ We don't want one giant government agency for anything, because it helps augur towards corruption. And the DOD has been the largest government agency. So under our new constitution, we will start with 80 separately funded government agencies funding the military. Later, we shall divide these agencies into over 150 agencies. This is so it will be easy for the Senate to pay our military men, and armory staff, while at the same time cutting back on spending for costly weapons systems.

3/ We do this to make it harder to steal from the massive national defense effort as was all so common under the old system. Here we also recall the September 10, 2001 reports of trillions of dollars missing from the DOD. Each of the following top-level divisions of our defense budget shall have its own separate Senate budget numbers, which shall always be public information, especially in time of war:

a/ navy aircraft carrier groups and their aircraft. Each carrier group shall have its own budget.

b/ navy destroyers/ missile ships.

c/ navy Submarine fleet.

d/ navy transport fleet.

e/ navy coast guard.

f/ navy new ships.

g/ navy non-carrier aircraft.

h/ navy ship weapons systems.

i/ Panama Harbor base/port.

j/ Pearl Harbor base/port.

k/ Okinawa main port/base.

l/ Guam navy ports/bases.

m/ Subic Bay/ Philippines port.

n/ Trincomalee base/port.

o/ Madagascar base/port.

p/ Cape Town base/port.

q/ A Coruna base/port.

r/ Falklands base/port.

s/ Bermuda port.

t/ Other various ports.

u/ navy Wages.

v/ navy administration and mgt.

w/ navy Human resources.

x/ Naval command, intelligence.

y/ Naval recruiting, training and education.

z/ navy veterans, wounded, and dependents.

aa/ navy ammunition and bombs.

4/ The other top-level budgets for the Air Force shall be:

a/ Air Force aircraft.

b/ Aircraft weapons systems development. Shared by all branches.

c/ Aircraft weapon system production. Shared by all branches.

d/ Air Force anti-satellite, GPS, and space security division.

e/ Air Force bases domestic.

f/ Air Force bases Europe

g/ Air Force bases Japan

h/ Air Force bases other

i/ Air Force wages.

j/ Air Force administration/ management.

k/ Aircraft inspection and servicing.

l/ Air Force recruiting, training and education

m/ Air Force veterans, wounded, and dependents.

n/ Air Force bomb inventory.

5/ The other top-level budgets for the marines shall be:

a/ marines aircraft.

b/ marines logistics vehicles.

c/ marines surface vehicles, and troop transports.

d/ marines weapons systems.

e/ marines administration/ management

f/ marines wages.

g/ marines domestic bases.

h/ marines foreign bases.

i/ marines command, intelligence, and management

j/ marines recruiting, training and education

k/ marines veterans, wounded, and dependents.

l/ Marine security services for embassies and overseas bases.

m/ marines ammunition and bombs.

6/ The other top-level budgets for the Armi and militia shall be:

a/ Armi stored arms, and military equipment.

b/ Armi stored supplies, and standby logistics.

c/ Armi artillery.

d/ Armi ground patrol and distribution vehicles. These should be indistinguishable from a pickup truck with a shell.

e/ Armi high tech weapons systems.

f/ Armi Air Force

g/ Armi Drone Force

h/ Armi anti-drone systems.

i/ Armi civil-defense building inspection for invasion safety.

j/ Armi civil-defense food storage.

k/ Armi backup logistics system

l/ Armi commercial logistics charges.

m/ Armi domestic bases.

n/ Armi foreign bases.

o/ Armi command, intelligence, and management

p/ Armi recruiting, training, inspection and education

q/ Armi veterans, wounded, and dependents.

r/ The stars of the militia get invited and honored to join the

Armi as a militia trainer/inspector. We shall have 2X or 3X too many trainer/inspectors so that we can rapidly ramp up our force readiness if this should suddenly be needed.

s/ Armi and militia HR.

t/ Armi wages.

u/ militia wages.

v/ Armi budget for lunchtime militia chicken-leg barbecues in the middle of the training session.

w/ Armi and militia ammunition and bomb stocks.

x/ Armi/militia injuries.

y/ military personnel transportation services.

7/ No military bases in the Middle East, except Georgia, Greek Cyprus, and Armenia. Occasional use air bases are not included.

8/ All military equipment shall be made in small numbers and tested by the actual fighting man. And these will be allowed to veto the equipment in they mostly don't want it.

NR'133. MERCENARIES AND SECURITY

1/ If we don't allow people to buy or sell extra-judicial violence within our societies, why should we allow them to do this among our societies? Of course, we shall not allow this to happen, and our democracy shall use its military to oppose and kill such hired-gun mercenary forces wherever possible and practical. Also, we shall pay no heed to foreign nations (particularly tyrannies) when they object to our killings of extra-judicial mercenary gangsters.

2/ Hired private armies like the Nazi Sturmabteilung (SA) are an ancient tool of tyranny. These have been used to stage countless coups and low-cost guerrilla insurgencies around the world. As such, our nation shall consider these extra-democratic and extra-governmental forces a menace to democracy, freedom and peace. Therefore, we shall no longer abide by the terms of the Geneva convention with regard to hired armies of foreigners, or mercenary armies. Failing that, we encourage war profiteers to re-invest a slice of their fat war-profits, on violence to keep the hate and warfare alive. Also, from now on, we shall not apply the Geneva convention to unwounded combatants using human shields, or active hospitals, schools, or civilian shelters as hiding places. Also the Geneva convention shall not apply for people strapped with explosives and other forms of suicide bomber. Therefore, all despicable mercenaries from unrelated third nations, all despicable users of human shields, and all despicable people strapped with explosives shall have no protections from being tortured to death.

3/ The military, police and other branches of Government shall be prohibited from hiring private military and police consultants, contractors, or mercenaries for any reason, or even allowing these to exist. This shall include all consultants, contractors, or mercenaries used for capturing people, managing captives, or working in jails or prison camps. Also, where soldiers are selected to manage war prisoners, these must be randomly selected, and also they must not be the vindictive or violent sort of man.

4/ It shall be a felony when for-hire security forces go to a political meeting or protest of the people on public property. It shall be treated as democide when private forces touch peaceful protesters on public property.

5/ The courts shall use multiplied penalties for crimes committed by private armies and their personnel, including private security guards. The courts shall also be free to greatly reduce penalties for crimes against private armies and their personnel by any amount when the guard was demanding something they had no right to demand.

6/ We shall consider it a capital offense when the citizens of one nation take up arms in another nation without the consent of their own nation's government and military. Upon conviction by a military court, such nationless mercenaries, or soldiers of fortune, may be imprisoned for life or executed.

7/ It shall be a capital offense for the citizens of one of Arabia's provinces to take up arms in another one of Arabia's provinces or outside the PU, either for pay, or as volunteers.

8/ All majority convict military forces shall be considered mercenary armies. These shall be struck and killed by our military as is expeditious, including in times of peace.

9/ It shall be a felony for the citizens of our nation to lend-or-give money-or-aid to foreign nations and alliances we are at war with. Where large amounts are involved, it shall be a capital offense. Where immigrants do this, their entire family and all minor children shall be deported.

10/ When third party nations lend-or-give money-or-aid to tyrannies to suppress their people, or to engage in war, we shall use our military and spy agencies to kill those involved.

11/ No private security company organized in or around our nation, or its name or in any foreign nation shall employ more than 300 men at a time, or join forces with other private security companies in any sort of network. Private security personnel shall not work as police, or work with the police.

12/ All unarmed private security staff shall wear a national private security number (5cm tall) which may be searched as PS1234-5678. This brings up a photo of the guard, where he works and how long he has been a guard. It shall be a crime for private security to work out of their correctly number uniform.

13/ It shall be a crime when private security guards or police, or other government workers wrongly order people to stop recording something that they have the right to record.

14/ In general, private guards filmed venturing beyond their power reservations may be sent to jail, while police only get fired for similar gray area offenses.

15/ When proprietors and private security tell non-violent non-confrontational people to leave private property for disturbing others, they must identify themselves, and give sufficient means for the ejected person to verify this information. They must also give the ejected person a reasonable amount of time to gather their belongings and notify the people they are with of their departure. They must also give a reasonable amount of time to leave. If these courtesies are not given to non-violent, non-confrontational people before they are grabbed and ejected, it may be considered an assault under the law. Also, when the people are wrongly ejected for merely expressing their political beliefs or for saying political things, those ejecting them and their employers may be required by the money courts to pay damages for violating the ejected person's first and foremost right of free speech. Non-compliant hecklers may however may simply be grabbed by security and brought to the door.

16/ Private security guards shall have no special or protected status under the law. They shall be no different from any other employee under the law. There shall be no penalty multipliers when members of the public fight back and injure a private security guard. However, when private security guards injure innocent people, they may be charged with battery. Also when a person in a private security uniform illegally attempts to detain people under threat of violence, this threat can sometimes be justification for claims of self defense on the part of the person the guard is illegally detaining.

17/ It shall be a crime for police and especially private security to bluff-threaten people with arrest or instruct people to stop recording, or to illegally drive people from a place they are legally allowed to be at.

18/ All armed private security staff shall be required to be deputies that have completed the government licensing program for deputies. Only deputies shall work as armed

security guards. To become a deputy, a person must:

a/ Get recommendation from their Nome.

b/ Pass the Senate character test.

c/ Pass the stress test.

d/ Pass the multiple choice test.

Watch the 200-half-hour self-study video modules on the law, rights, firearms, and the other aspects of being a deputy.

More than half of this time is spent watching the situational videos the Senate elects to present and test on.

19/ We shall not allow police or other government workers to have other jobs while off duty. Deputies will do that instead. All deputies, like all police shall wear their number front and back in big numbers and shall have an account with the recorder's office to report bad behavior. Deputies cannot detain or arrest, but they can drive people off if they do not have a right to be there. It is also thought that deputies will get much higher pay than non-armed private security people. It should be considered the crime of privateering when police or government officials work in other roles tangentially related to their actual job. For example, it shall be considered privateering when police officers work as security guards when they are off duty, or when they are on duty.

20/ Deputies are also subject to being drafted by police in time of disaster or civil unrest. The police stations may at times have the county recorder system call up the nearest 30 or 3,000 deputies.

21/ Private unarmed security shall not be allowed to use handcuffs, or to tie people up. Private unarmed security guards shall have no right to put their hands on people, to touch them in any way, unless they're harming somebody, or producing great harm to property, or stealing something in the place they were hired to protect. Once unarmed private security guards stray beyond this narrow range, and lay hands upon the people, those people they touch and their immediate family shall have the right to act in reasonable self-defense, as if the person touching them was not guard or anybody special. Also, there shall be no sort of immunity for unarmed private security guards who wrongly injure people who have committed no crime.

22/ All bouncers and bodyguards shall be considered a form of private security guard under the law. Nobody shall work as a bouncer or bodyguard without completing the Senate legal test for both private security and for bouncers and bodyguards. Once bouncers and bodyguards have completed their test, they shall be held strictly to the law.

Bouncers and bodyguards that use banned tactics like sleeper holds and certain types of punch/kick may easily be charged with felony assault. And this shall be particularly so when they use these techniques on the non-violent or barely-violent people they remove. All bouncers and private security guards shall be background checked for convictions and like with police, nobody with a felony conviction may work as a security guard of any sort. Bouncers are supposed to be wrestlers, not fist fighters. And bouncers are supposed to be very tolerant of people bumping into them and shoving them. Where they shove people or topple them, and cause severe injury they shall get no protection for being private security, and in fact they shall face double penalties for using excessive force as a private security guard.

23/ Rather than ejecting people quickly, the #1 duty of private

security is to gather video evidence of people breaking the law at their premises.

24/ When people are ejected from a premises, there shall be an obligation on the part of the people ejecting them to double record the ejection.

25/ The penalty for failing to leave a premises upon an ejection shall be based on how long the person remain in place after they have been told they have to leave. Everyone gets 2-minutes to discuss the matter, everyone who goes willingly and peacefully get 5-minutes including discussions. Office employees get at least 30 minutes at their desk to gather boxes and say goodbye to their co-workers. Those who overstay may have to do 4 hours of public service work for each minute they delay over this time period. Also, this penalty shall be dependent on how much of a disturbance they cause on the way out.

26/ Mercenaries shall not be covered by the Geneva convention. All third nation foreigners participating in a war maybe presumed to be mercenaries.

27/ The Marines shall be repurposed, so that a primary role is landing and distributing large amounts of arms on foreign soil to arm the people in that place so they can revolt against the government that is oppressing them. And also to help people access our air support.

NR'134. NUCLEAR AND MILITARY POLICY

1/ The true power of nuclear weapons shall be accurately presented to the people, along with which areas are logical targets. This is so the people may more intelligently spread out in response to a realistic nuclear threat. If nuclear weapons are are are a great threat, then the people can act accordingly. If nuclear weapons are fake, then the people can act accordingly.

2/ The use of neutron bombs in strikes against underground nuclear installations in small rogue nations shall not be considered a true nuclear attack if these weapons are real. To protect against military and WMD weapons facilities buried deep underground, our nation shall keep an arsenal of neutron bombs, if these are effective and real.

3/ The nation's nuclear weapons shall only be used according to the command of the Over-Senate.

4/ By 2027.01.01, no nuclear power plants shall operate any place that has suffered a tsunami inundation, or looks as if it might ever suffer a tsunami inundation, or is on any portion of the Pacific Plate, or any other plate that jumps during an earthquake. All such nuclear plants shall be decommissioned.

5/ No new nuclear power plant shall be allowed in our nation except with a two thirds overmajority of the Over-Senate.

6/ Odd numbered Over-Senators shall be required to remain at the voting centers on odd teneths, even numbered Over-Senators shall be required to remain at the voting centers on even teneths. Using the nation's nuclear weapons in an emergency requires a 3/4 overmajority of all Over-Senators present for the vote in the nation.

7/ Except in response to a threat, no more than 1/3 of the nation's naval coastguard fleet shall be in port or too far into a continental shelf at any one time. None of the nation's warships shall be based in on the west coast of North America due to the risk of tsunami. This especially for the

ports of San Diego Long Beach and San Francisco Bay, due to the risk of harbor waves. Pearl Harbor shall be the home the Pacific fleet. The Atlantic fleet shall generally harbor in Hatteras and Bermuda. The Indian Ocean fleet shall generally harbor in Trincomalee and Antsiranana. Naval and coast-guarding ships shall be free to seek shelter in tsunami vulnerable ports during storms.

8/ Bermuda must be a US port. for it is the most ideal place for the Atlantic fleet. All of the existing residents on Bermuda must relocate like all the other people living in such low-lying places now. The US shall grant its European allies the right to dock war ships on Bermuda.

9/ The navy shall maintain a redundant system of tsunami alert buoys which shall include at least 2,000 stations worldwide and at least 100 around Antarctica.

10/ We shall make decoy drones with large radar images that match our stealth and semi-stealth manned aircraft and perhaps hold munitions, flares, and radar chaff. These may also generate radar signals. They may also intercept missiles.

11/ There shall be no nuclear power plants down wind from a crowded area. All new nuclear power plants must use fuel balls, and all fuel balls must go in parabolic dispersion tubes with tin failsafe blocks in case of meltdown above 235°C, the melting temperature of tin.

12/ All of our nation's nuclear waste shall go to the Baja California (Mexico) nuclear waste facility

13/ We shall use one standardized, pre-approved nuclear power plant design in three sizes, to minimize the cost of nuclear power. All nuclear power plants must be one of these three sizes. A similar things shall apply for all the reactors in our naval vessels.

14/ The Senate shall test and determine whether nuclear power has the output it purports to have, and if it is worth developing, or it is a costly fool's errand like wind power. Also:

a/ The vulnerability of nuclear power to air-strikes and earthquakes should be considered in the cost-benefit analysis.

b/ Do we even need dirty nuclear power, or are pipe hydroelectric and geothermal enough to meet our needs?

15/ If we have new nuclear reactors, they shall be required to use:

a/ Fuel balls instead of fuel rods.

b/ The fuel balls shall be used in a reactor that uses Atari-logo shaped tubes with tin blocks as a failsafe. If the bottom of the reactor goes above the melting point of tin (235°C) then the tin blocks melt, and the fuel balls will roll down and spread out in a couple Atari-forms, so that they don't produce any more heat. If the reactor is on a vessel, there shall be a number of one-way paddles that prevent the fuel balls from flowing back from the bottom of the Atari back into the main reaction/heat-generating configuration.

c/ Only the vertical part of the fuel ball tubes will be inside the reactor. The almost horizontal and inflection area of the fuel ball containing tubes shall be outside of the reactor, but lead shielded.

d/ The bottom of the lead shielded failsafe area for fuel balls shall have gate valves, and these bottom tubes shall not be difficult to remove. The tin blocks portions of the tubes shall also be easily replaced if there is a meltdown of the tin

blocks.

e/ Once the tin blocks are replaced, the bottom tubes may be temporarily attached to the top of the reactor and the fuel balls reinserted from the top of the reactor.

f/ The spherical reactor itself, shall probably be made out of large thick plates of pure copper. Perhaps 6 to 200 flattish (but crenelated and interlocking pieces) that are loosely bolted together. These are slowly and evenly heated and cooled.

g/ The control rods use two completely independent and redundant systems A and B. Thus the failure of one control rod system or total loss of power will no lead to a melt down situation.

h/ It shall be noted that this reactor design has 3 important failsafe features:

- Melting tin blocks.

- Control "rods" (cartridges of fuel balls) that fall upward and away from the reactor core

- Double independent control cartridges where the failure of one system will not lead to a meltdown situation.

- Also, the control rod system shall have backup motor and mechanical actuation where people can roll up the control rod chains and lift the control rods up and out of the reactor.

i/ It shall be noted that the reason for the specificity here is to keep nuclear power from being sabotaged as it has been in the past.

j/ There shall be no ridiculous containment domes, or massive concrete structures as are so common in the fake reactors of the past.

k/ The shape of the spherical reactor core shall be that of a sphere barely penetrating a 60cm thick copper pipe buss near the top of the sphere. Also, the meniscus of the two shapes should be maximized to increase heat exchange by primary coolant pipes passing through the reactor core.

l/ We note that primary coolant (the water passing through the reactor core) shall not mix with the secondary coolant that drives steam turbines. The primary coolant stays on its side of a copper heat transfer membrane, and the secondary coolant stays on its side. And this membrane can be as thick as we want, whatever is necessary to keep the secondary coolant from becoming in any significant way radioactive.

Thus the barely radioactive secondary coolant can be released as steam, or disposed of far offshore into the ocean

m/ All reactors shall be shaped like a long pill and permanently sealed except for two fat (and lead covered) axil holders at the top of the reactor. On the inside of the reactor the control rod actuation chain is rolled up on an axil. On the outside of the reactor there is a replaceable cable that turns the same axil. This cable has a bit more weight acting as counter weight, so the control cartridges always fall up and out of the reactor core when power is lost. Thus if power is lost, the control cartridges will fall upwards while remaining inside the lead-lined pill-shaped radiation chamber.

n/ Everyone must be aware that the primary cooling water passing over and through the reactor does not mix with the secondary coolant that is transported away. The primary coolant stays on its side of a barrier and the secondary coolant stays on its side. And this barrier can be as thick as we want, whatever is necessary to keep the secondary coolant from becoming in any significant way radioactive.

o/ Reactors might also be pill shaped, and vertical with pipes that arc into 6° slopes. If power is lost, the sphere at the top stays put. It's fixed to the ground, and the fuel balls then will melt the tin blocks and rolls downhill while remaining inside the lead lined radiation chamber.

K — CITIES AND TRANSPORT

NR'135. CITIES

1/ Government shall not involve itself with building aesthetics on private property, other than supporting private sector efforts at standardizing colors for certain communities. Aside from this, government shall impose no aesthetic requirements on the nation's private buildings. We do this because looking at the older buildings around our country and the world, these became both uglier and much more expensive when government became involved in building aesthetics. Also, in general, Government shall not involve itself with aesthetics, and government shall not be allowed to engage in beautification projects. County, National and world government shall be prohibited from giving money to redecorate remodel and improve cities and urban infrastructure.

2/ Government shall assure the basic health and safety of the people by establishing a Uniform Minimum Building Code or

UMBC standards for things like fire safety, emergency exiting, railings, minimum room size, ventilation, sanitary plumbing, electrical safety, water-proofing, and the like. However, government shall not squander its energies, or the energies of the people, regulating the nation's buildings for more than the minimum for health, safety, and structural purposes. Aside from the regulation of minimum health and safety, government standards shall not regulate construction.

3/ The governments of all counties and all communities of our nation shall fully cooperate with the private sector and always have enough building sites and also to issue building permits for these sites upon application in the required time frame. No county shall enact rules or fees designed to slow growth, or in-migration, or reduce the supply of building lots, dwelling units, or working space. Where county governments come under the spell of people who work to limit construction (presumably to increase housing prices), the national government shall cancel local control of the zoning, land subdivision, and building process and then randomly assign the approval process to other counties or for-profit plan checking firms incentivized to this purpose.

4/ Nobody from any neighboring community shall have any say over where new linear infrastructure or townships may go, or how they may be built, or how the linear infrastructure may tie-ins with the existing infrastructure.

5/ So that housing and workplaces will be more abundant and inexpensive in our nation, we will shall institute a great surplus of places for new townships with the following rules:

a/ Government shall not limit the number of new cities, townships and communities that may form in a region if there is land.

b/ Government shall pre-designate at least 50,000 township sites nationwide (not including Canada). This is about one township for every 6,800 people today (2,250 units). This while the new townships might hold as many as 20,000 units each. (20,000 x 50,000 = 1 billion potential units and an eternal overage of places for new units.) Also, if all the US township sites were to be used, and the townships averaged 9 square km each, this would only be about 5% of the nation's land area for 3-billion people. It is around 1% of the nation's land to house all of our current citizens.

c/ Thus there will be a many-fold abundance of township sites, and urban land will no longer sell for any significant premium over farmland. Thus this overage of sites will assure that the price of urban land will remain crushed forever. Also, these relatively sealed townships shall be sited all around our nation, in the nicest most Sedona-like spots our land has to offer, the places that are mostly between our current cities and in our national parks and wilderness areas (but isolated from them and with no roadkill) Also, all nations that emulate this constitution should aim for a similar 5 to 10-fold overage of available township land for placing units of various sorts, be they apartments, row houses, detached homes, or commercial units.

d/ Government shall pre-designate at least 25,000 township sites in the Canada region.

e/ Government shall never do anything to discourage new communities of over 5,000 dwelling units from forming in crowded areas.

f/ Government shall never do anything to discourage new

communities of over 2,000 dwelling units from forming in uncrowded areas.

g/ All townships under 6,000 dwelling units must legally and physically permit new units to be placed. Only communities over 6,000 dwellings may be closed to new unit placements. Also, some 9-km communities (1.5km radius from the train station) might have 1,000 units, and some might have 100,000 units. Some townships might have a 2-km radius and cover 16km of area. Most will probably be between 3,000 units and 30,000 units.

h/ All townships shall have a minimum 500m wide green-space between them, except on the along the rail line axis, where townships may blend together as they follow the rail line.

i/ Certain regions may become full of townships, but their periphery should always be ready to accept new townships.

j/ Instead of rebuilding our cities, it shall be thought much better and much more cost-effective to simply build new cities and either bulldoze the old cities, or use them for housing the poor.

6/ When local property prices are rising at a rate exceeding the rate of general inflation for the nation, each County government shall make more good lots available to relieve the building site shortage.

7/ We seem to have gone from complete building anarchy 100 or so years ago to a double-double belt-and-suspenders situation. For today we have architect review, building department review, building inspector review, and finally lawyer review. This quadruple approval is a big part of why housing is so expensive. Better we just have a large library of standardized plans that are free for everyone to use. Government shall not tax or charge any fees for copying plans from the Building Library Project, or building any "Library Project" using any plan from any nation's free plan library. All of these tens of thousands of plans shall all be considered pre-approved. All anti-nuisance fees charged by Government for library project applications shall be refunded upon completion of the project.

8/ Where people build or place a Library Project, be it a prefab, a kit, or a build from library plan and materials list, there shall be no charges by government for placing or building a structure, or plan evaluation. However, all who waste their talents building custom projects in our nation shall have to pay a fee of 6-month's wages to submit a plan. All custom projects shall also have to pay a 25% luxury tax on all components, and a 25% surcharge on their property tax as long at the structure exists. Prototypes in remote, non-commutable testhouse communities of 30 or more testhouses shall be exempt from the added custom project fees and taxes.

9/ Government may charge anti-nuisance deposits for building permit applications, lot subdivision applications, plan checking and similar things. Except for custom construction, all these fees shall be refunded (without interest) upon project completion. Also, in no event shall the county government's refundable construction related fees for Library Projects exceed:

a/ 20-day's wages for any single residence.

b/ 20-day's wages per 1000m of non-residential property.

c/ 10-day's wages for each unit in a multi-unit residential

building.

10/ We shall have specialized licensed utility contractors that are license to make connections to public utility water pipes, public utility gas pipes, public utility underground electric lines, public utility overhead electric lines, public utility coaxial (cable TV) and fiber optic lines, privately owned coaxial (cable TV) and fiber optic lines, sewer pipes, among perhaps other public utility infrastructure. These contractors shall compete nationwide. All of these shall bill according to a standardized pricing system with the company able to only declare how far above or below standard pricing they are. All public utility companies and Government shall be entirely prohibited from making public utility connections. These shall neither make any connections to their utility system's lines, nor charge any money to those who make connections to utility system. Also, it shall be considered corruption where anybody working for a public utility, or government either charges, or attempts to charge any sort of all fees for connecting to any public utility system. Thus, there shall be no permit fees, design fees, system integration fees, or any other sort of fee for connecting to any utility system in the nation.

11/ Government and public utilities shall have emergency equipment for the various utility lines and problems in each region. However, all the non-emergency work shall be by contract, let through the county recorder system's bid board system. Where public utility systems or road systems are expanded, this shall be out-sourced to utility/ road/ rail/ bridge contractors, with the entire county Sub-Senate (and no smaller of a body!) electing the lowest responsible bidders from the public bid boards. Where people connect to the utility system, this shall be done using a competitive market for connection services, like with so many other matters of public construction or public support services.

12/ Public utility employees shall not be allowed to do non-emergency work to their system. They shall also not be allowed to dispatch ridiculously excessive numbers of workers in any "emergency" as they so frequently do.

13/ It shall be presumed that most of the building and business regulations added in recent decades were added due to bubble-feeding parasitic influences in our government.

14/ Down zonings being contrary to the agenda of more and better, all prior down-zonings shall be void. The term down-zoning shall include: the number of dwelling units allowed, floor area ratios, minimum lot sizes, increased setbacks, building height reductions, building size compatibility restrictions, road frontage requirements, parking requirements, and curb cut requirements, among all other similar takings of property or property rights by real and fake "community" influences. Setbacks genuinely required for fire safety from other structures shall be exempt from the foregoing.

15/ Government shall no longer concern itself with the utter folly of impervious cover regulations. All existing laws and regulations about impervious cover shall be void because they are thousands of times more costly than they are beneficial. Also, this garbage policy should be seen as a textbook example of the high cost of innumeracy with regard to large numbers. This along with the CO2 theory of climate. Quite the opposite, to greatly reduce soil heave and to greatly

increase the longevity of our buildings, we shall have it that all new habitable buildings must be skirted with 90cm of roof eave, or 90cm of water lapped impenetrable paving. So there is no point for water to enter, except 90cm away from the building. Buildings on adjustable height legs shall be exempt.

16/ Except for the profit center of ticketing and towing of trespassing vehicles, and taxing of parking charges, Government shall no longer concern itself with the regulation of parking on private property, either as parking to build a building, or as parking to have a restaurant.

17/ Government shall never require any new-build building project, or any remodel, or any business to have any parking spaces. We shall now make a complete break with regard to parking policy in our nation, and no longer shall government have anything to do with requiring parking for housing or other projects. Further, we shall regard all of our parking regulations to be a textbook anti-corruption studies case of Mideast corruption.

18/ Due to the advent of single wide cars, self-driving cars/ busses, and greatly improved transit and computerized ride hailing/sharing:

a/ Government shall be prohibited from requiring parking for any building project, apartment building, shopping center, restaurant, office building, business, or change of use.

b/ Government shall be prohibited from having or requiring shoulder lanes on any road that is mostly flat.

c/ Government shall be prohibited from requiring parking lanes on any privately built road, except on commercial streets, and at scenic viewpoints, Government shall be prohibited from building parking lanes.

c/ Government shall be prohibited from requiring any sort of parking, and especially government shall be prohibited from requiring underground parking. Government may tax parking, but it shall have nothing to do with who offers parking where.

19/ Government shall have a bias towards encouraging density in urban areas. Government shall be prohibited from taking any measures at all to inhibit, or tax, outlaw, or burden the growth of our cities until they grow to the heights of famously beautiful central Paris. However no building over 3 stories or more than 4 units shall be made of wood.

20/ Any neighborhood recognized as a neighborhood by most of the people in the community shall be allowed, with a simple majority of land owners (but not including the tenants), to elect themselves an up-zoning. And while these up-zoned neighborhoods shall be required to have at least 4 lanes to them for busses and service vehicles, or 2-lanes through them or adjacent to them via rail-access, they shall not be required to have or provide any personal automobile access, or parking. 4 road lane shall be thought enough for bus and truck access.

21/ People who cannot vote, and people who do not own property in a community shall not have the right to give input about matters of construction projects, roads, land use, zoning, re-zoning, and especially re-development. Only voters that are also property owners in a community shall be allowed to give input on these matters in their community.

22/ All land nationwide more than 20 meters and less than 200m from a six or eight-lane freeway shall be zoned for at least 16m tall long buildings as sound barriers. All land between 200 and 400m away shall be zoned for 11m tall

buildings.

23/ In order to maximize the buildable land area for our nation, we shall have it that an easement for one flagpole user over unbuilt areas shall be an easement for other nearby lots that are otherwise landlocked.

24/ All owners of an unpaved flagpole easement shall be allowed to:

a/ Grade and pave a driveway

b/ Install and maintain utilities under the ground of his easement.

c/ Bring equipment and materials in and out via his easement.

d/ Prune pants hanging over their easement.

25/ The rules of land zoning, and the approval process for land subdivisions, building permits, business approvals, and just about every other aspect of making new buildings shall be the same in every county in the nation with perhaps 30 optional rules from the national zoning law code. We do this in the interest of simplification, and so people from other parts of the nation can prevent local bottlenecks in the process of construction. It also helps us spread our workload around nationwide. Also, we imagine all our plan checkers as randomly chosen, mostly retired construction people working mostly from home. There will be no more of these corrupt building departments.

26/ Our building departments, and land subdivision departments shall work as follows:

a/ All nationally approved building plans and nationally approved prefabricated housing units and components shall be assigned a design code number. And each lot's deed shall list a range of pre-approved plans and pre-made units that are allowed. And maybe other uses will be added to this list by the zoning code, but none will ever be taken away. Also, many deed restrictions will have surface coverings and color range restrictions.

b/ All nationally approved plans and pre-fabricated units shall exempt from all local pre-approvals and pre-inspections. Also, all factory made housing is almost always of acceptable quality without government involvement. And if there is any government inspections or approvals of pre-fabricated buildings, they shall only occur at the factory level, and these shall have nothing to do with the site the unit is placed on. The only thing the local government shall approve of is the post construction inspection to verify utility connections and whether the unit is placed within 3cm of the the right location and orientation, and the unit is level and plumb to less than 1% of true level and plumb.

c/ While the mass produced units will be excluded from all county government regulation, except position, hook-up, and orientation, custom building plans shall get a final government inspection.

d/ one and two story custom construction projects shall be checked by 3 private companies that specialize in checking plans. These all report to the recorder's system independently without being able to see the responses of the other plan checkers. If there are changes requested by the checkers, then the applicant shall either modify the plan or explains to why this is not right. Also, if there is a conflict among the plan checkers for the same issue, the applicant may choose which plan checker to follow for any particular issue. The applicant can also hire new plan checkers and ignore the ones that he

hired previously.

e/ For all custom construction jobs there must be at least 3 plan reviewers, with these 3-reviewers all probably paying for themselves in savings due to better-planned custom projects. The checkers that get rewards for genuine problems that the other checker's miss. In fact, the other checkers get docked for the things they miss, and are thus driven from the plan checking industry.

f/ All of the above are self-service by applicant via the county recorder system's building plan check interface. The various plan checkers also make their comments on this system. And no plan checkers will work for the Government.

g/ Subdividers shall never be required to design structures pave roads, or run utilities for their subdivisions. These pre-improvements shall be viewed as something that raises the cost of building for no good reason.

h/ All Government required geology and environmental toxicity testing for construction, private and public shall be provided by the county government for free. All communities of over 500 people must check the entire 1-km area that they are at the center of for both geology and 100 samples for toxicology screening. And because we do this, there will be no more reports required for either geology or toxicology.

27/ A tribunal of Senators, and 3 private building inspectors shall be responsible for certifying construction as legally complete, not the building department due to a conflict of interest.

28/ All factory-made housing shall be exempt from county building department permits, or progress inspections. And the final inspection should be mostly a formality to verify the unit's location and existence mostly, not how it was made. All the quality inspections shall happen in the factory.

29/ All factory-made buildings shall be of perhaps 200 categories. All counties shall list which categories are allowed in each zone. After this, there is a setback check, to make sure the building is not sited inside a setback or in the wrong place. Government verifies this, and provides free construction surveying and pin setting for all new buildings.

30/ All building permit intake shall only have one single application, and one single application process. There shall be no more than one application for any building permit, or for any land subdivision project. All sub-sections of the permitting process shall reference the one primary-key project-number, and the national county number.

31/ If all the required boxes on the plan application have been satisfied, the system automatically issues a building permit within 72-hours. If there are unresolved matters, the system requests more information on why. If the applicant satisfies this request, the system automatically issues a building permit within 72-hours. If not the applicant can either call, or go in to meet with the permit issuance people.

32/ Government turn around times for building-related projects shall be as follows:

a/ For placing a unit in a township, or in a township's suburbs, there shall be no turn around time because government can't say no. This provided the person paid their purchase/delivery down payment, and their township strata-title reservation deposit. Also in townships, the township has jurisdiction over all conforming zoning, not the county.

b/ For library projects outside of a township, and for land

subdivisions, the county shall have 3-days to tell the applicant which supporting information is needed, and what needs to be changed.

c/ Where government is processing a custom building permit application, or a land subdivision application, the government's turn-around time shall be 36-days from first application, and then 12-days on each subsequent turn-around. If the county building department cannot handle its workload, then it must hire another county, or an engineering company.

33/ In general, all government procedures shall be cloned nationwide so government:

a/ Is maximally able to hire people from cheapest parts of the nation for government telework such as building plan checks.

b/ Is free from local and regional bottlenecks.

34/ All public and group-owned real estate shall use Government forms for their organizational documents, and rules.

35/ All shared communities shall have a communal property map. This map must show:

a/ The extent of the land to be communally owned.

b/ Which properties are attached to the communal property, and their percentage ownership and dues for the operation of the communal property.

c/ If there are any non-standard or optional conditions that apply, these shall be individually and specially noted and approved on the deed.

36/ No builder's qualification shall be required to build a Library Project, or remodel conventional construction that conforms to load tables and the national building code, and is also 7m or less tall.

37/ All existing buildings and privately owned land in all Holocene-era flood zones are hereby nationalized as of 2050.01.01. By 2032.01.01, no school, government office, military base, or fictional citizen headquarters shall be located in any Holocene-era flood zone.

38/ Those who have foolishly paid money for real estate in the jaws of death deserve nothing from the public for the discovery that their property is actually deadly due to tsunamis every so many centuries, everyone has to leave by 2050.01.01. There shall be no right for anyone to own or hold title to unimproved land in any Holocene-era flood zone, and all such ownership may be voided by the Senate at any time.

39/ All prohibitions on prefabricated or modular construction shall be void whether public or private. All prefabricated structures shall be nationally approved for standard zoning and number of stories, and exempt from local building permitting and inspection. Prefabricated homes up to 8m wide may be trucked over the roads without a permit between 11:00pm and 6:00am, provided the roads are pre-approved for cargo this wide.

40/ The township slots shall generally be free for anyone who buys and places a new factory cast unit. This only happens when the township is being built due to the equipment setup needed. Once the unit is placed, the owner will get a free life estate. However, the owner will have to pay their share of taxes, enough to run the local community expenses for schools, common areas, police, rail line, delivery system, rudimentary road system, etc.

41/ Government shall not concern itself with the innumerate

folly of impermeable coverage ratios, and rainwater impounding on urban and suburban lots. Far more important is that we keep the water away from our foundations so our buildings will take centuries rather than decades to be soil heaved into ruins. Government shall be expected to accept and deal with all rainwater that flows into the generously sloped and greatly oversized public storm drains we will design for our communities. All the recent impenetrable lot coverage regulations and the eve-less buildings and stepping stones shall be viewed as a form of Arab sabotage, a stumbling block put before us, so there will be more for them.

42/ For the benefit of the poor, government shall not require balconies, or surface articulations or any aesthetic considerations at all on buildings. And for this exclusion, there will be no more conditional approval for projects, only that the building is built in accordance with the building code.

Government shall not involve itself with landscaping except for mediating neighbor squabbles about matters of planting and fences. However, government may require that all areas in a community remain planted or paved for the control of dust.

43/ Regarding windows and egress in structures:

a/ Government shall not concern itself with marginal and frivolous things related to glass such as color, or tinting, or reflectivity, or emissivity, or special insulating glass. Dual pane glass shall however be required in all developments with over 300 meters of interior residential, office, or retail space. The Senate shall study the optimal spacing for various dual-pane, triple-pane and double-double pane glazing spacing with regard to thermal insulation, and establish thickness standards for various multi-panel glass assemblies.

b/ Government shall establish a maximum glazing to floor area ratio for all heated or air conditioned rooms.

c/ The Senate shall slightly modify the requirements for openings used for a second means of egress. On the first floor, egress windows may be up to 180 cm above the floor. On the Second floor they may be up to 145cm above the floor.

44/ Government shall not get in the way of the process by which low density uses are demolished to make way for high density uses. Government shall not heed, or even listen to tenants, for they are by definition biased and the exact opposite of disinterested.

45/ Government shall not license landscape architects, building designers, or decorators. However, there shall be licenses for plumbing designers, HVAC designers, electrical designers, and waterproofing designers etc. There shall also be licensed structural designers. None shall require any experience. The designer's experience is always shown on their professional landing page. Many new designers will want to get some business, so they can rise in customer volume, by proving themselves. So they can get non-discounted pricing for their work due to a low experience rating.

46/ Except for removing plantings that block the way for drivers, or utility lines, or break up paving, or threatening overhead utilities, or and trees on arterial routes, or timber harvesting rights, Government shall not concern itself with regulating anything so trifling as landscaping, irrigation, tree removal, tree trimming, and plantings on private property, or

behind of the setback line fences under 240cm in height. None of these trifling things shall be the domain of government, unless they cause a special hazard, like a clearly unstable brick wall, or a spiny cactuses planted by the wayside. Also, the birds and varmints nesting in plants shall likewise be none of government's business. Government shall not have any regulation of plants or the animals nesting in them or living in them, or of paving or plans, or fence plans,

47/ There shall be civil liability for removing plants and causing a damaging flood or landslide on a neighbor's property, or diverting the flow of water and causing flooding harm to a neighbor. But aside from this, government shall not get involved in landscaping on private property.

48/ Where practical and needed, each county shall have inspectors that go around to the various properties public and private and check for dangerous conditions. Where they find trip hazards, or projecting bolts, or dangerous plant needles, or Urushiol oil plants, or similar conditions, these must be made safe. Also, the community, the county government shall not only inspect for urushiol oil plants as needed, but it shall always remove all urushiol oil plants at no cost using properly-dressed county removal techs and robots.

49/ Government shall not require that any private builder provide any facilities for the poor as a condition of building market rate structures, or to obtain favorable building or zoning rules.

50/ Government shall be prohibited from establishing or enforcing any rules at all about how many parking spaces any development, residential or commercial must have. This section is intentionally redundant so this incredibly expensive yet seemingly harmless area of regulation stays dead forever. Also, any people in the future start getting crazy to regulate parking, they should be regarded as OPEC spies.

51/ Government shall not regulate the design or location of non-spiky, non-injurious fences or walls under 2.2 meters in height that are inside the setback, except that they may not be made from wood. With regard to walls and metal fences up to 3m tall, government shall establish clear nationwide rules. Also, in all fire zones, and all urban areas denser than R-20,000, or 2-lots/homes per acre, all exterior fences and walls must be made from concrete or masonry or blocks or concrete panels and not from wood. In this way we use a slightly more expensive material that helps stop big fires instead of giving them fuel. In fire zones, pickle weed espaliers (and similar no-burn plants) up to 3m tall shall also be allowed without any permit. Likewise we imagine the rebirth of succulent plant popularity.

52/ All regulations for constructing buildings up to 2 stories shall fit on in a single volume of under 250,000 words. This code shall be a secondary school course. These boxes that we live in, the greatest manifestation of our efforts. We will have concise rules for them so they are easy and cheap to make, as well as safe.

53/ Government shall have no mandatory health or sanitary inspections or approvals to open or operate a restaurant, bakery, cafe, or grocery store, and all special health and sanitary inspections for these shall be voluntary. Government shall however have mandatory ratings of these businesses and compel them to display their government health rating

placard on their door and website. Also, the foregoing does not apply to the basic fire, egress, sanitation, vermin infestation, insect infestation, and building regulations that all premises must obey. Thus restaurants and stores may be closed down for having housefly or cockroach or vermin infestations.

54/ Landlords shall not be permitted to mark-up the cost of their utilities, taxes, cleaning, maintenance, insurance or similar things to their tenants. Contract clauses calling for a markup shall be void. In all places where there is sub metering, and group to private utility systems, the part up to and including the sub meter inlet shall be common, regardless of any statement in the HOA docs.

55/ Government shall not regulate the size of the security deposits collected by those renting property. To reduce problems, the county recorder shall hold all security deposits. The recorder shall get a flat fee when the deposit money must be used, and an additional flat fee when the matter must be adjudicated. As with many government services, the fees here shall be high enough that the public pays nothing in providing this service, but low enough that the public makes nothing in providing this service.

56/ All charges, credits, and security deposits monies related to renting or homeowner associations shall be paid to the county recorder's account. The recorder shall keep 100% of all late fees and penalty charges related to rentals and HOAs. This is to keep the management pure of heart with regard to charges.

57/ All tenants shall have the inalienable right to remove or demolish the structures and improvements they added to property they rented, provided the removal or demolition does not cause the property to be left in worse condition than it was delivered to them. Where commercial properties are re-tenanted, or sold and the new tenant or owner has a confusingly similar name or use, The must be prominent signage saying "Under New Tenancy" or "Under new Ownership."

58/ Tenants of less than 5-years shall have no say in local zoning and land-use matters.

59/ No lease clause calling for the owner to take a share of the land's harvest, or a business' sales shall be enforceable. All contracts subject to inflation adjustments shall use the Senate's local inflation index unless another is clearly stated in the contract.

60/ The property tax rate on warehouses, factories, and industrial uses shall be less than 1/3 of the rate for housing or offices. This is because we want to encourage both factories and storage facilities. All factory warehouse and industrial properties used as housing or office shall pay the normal residential property tax rate.

61/ All existing historical designations shall expire on 2028.01.01 unless renewed by the county Senate. No historical designation shall exist in any 5,000-year tsunami zone, flood zone, or volcano zone. If a structure is truly worth saving, let it be moved, or re-assembled somewhere else. Also, some more points about historical structures and historical communities:

a/ Our new cities will be much nicer than our older communities today.

b/ We should not preserve too many neighborhoods

nationwide. Maybe only 100 of the nicest.

c/ The really remarkable structures will get emulated.

d/ There shall no longer be any tax breaks for building conservation.

e/ All dangerous historical conditions shall be replaced, especially stairways and lifts.

f/ Nearly all the old cities will be abandoned in 50 years due to the high cost of maintenance.

62/ Government shall not shut down construction projects unnecessarily and shall be liable for delays for unwarranted construction shut-downs.

63/ If precious archeological treasure is discovered during building excavation, and the project must be shut down for a time, government shall pay everyone for the inconvenience. Failing to do this, we will see people ignoring sometimes precious discoveries.

64/ In areas with sewer and water piping, government shall not enforce residential zoning densities lower than 12 dwellings per acre, or floor area ratios under 100%, or height limits under 11-meters from pre-existing grade. In areas considered central, or pedestrian, government shall enforce no density lower than twice these densities.

65/ Until the Senate can determine safe maximum heights for the nation's buildings given seismic risks:

a/ The construction of new buildings over 17 stories shall be prohibited elsewhere in our nation unless the Senate wishes to restrict the height further.

b/ The construction of buildings over 2-stories shall be prohibited in the portions of our nation that are located on the Pacific plate, or within 200km of an active ocean subduction zone.

66/ When components of an older building system break down, and the system is not in conformance with the new rules, the people shall normally be free to replace the components without replacing the entire system. Government shall not require the costly replacement, or update of existing building systems, except when there is a significant and pronounced health or safety risk.

67/ Except for painting, all goods and services used in the aesthetic renovation and remodeling of buildings shall be taxed at a higher than normal rate. This is to free up workers for more productive things.

68/ Government shall pay no value premium when it condemns blighted areas for redevelopment. Also, government shall pay no premium for property because it is near a prior government development or re-development area.

69/ All building department and subdivision fees shall be uniform nationwide and the fees shall be set by the national Senate.

70/ There shall be no public hearings for individual houses, even if they require a variance. With regard to building permits, 100% of all variance fees shall accrue to the national government.

71/ If the county that a property is located in can't handle its workload and can't get projects evaluated in time, then applicants can use a neighboring county to process the approval application.

72/ Upon approval by the relevant county Senate, the 10% highest crime districts shall be free to put-up walls and checkpoints that verify everyone's ID and arms carry upon

entry.

73/ Government shall be prohibited from forcing private property owners to provide rainwater catchment. Government shall focus on larger catchment projects first and then later shift to progressively smaller projects.

74/ Government shall not put plants in pots or raised boxes.

75/ Except for flamed granite, government shall not use stone, or tiles, or cement pavers, or bricks, or other sorts of pavement. Only cement and asphalt shall be used for paving. All bicycle lanes, pedestrian lanes, and township ring and loop roads shall be paved in steamrolled smooth asphalt hot-impregnated with rubber-gripping sand on the surface. The inside walkways shall have concrete floors covered in a spray-on hard plastic surface like people use in their garages.

76/ Where a large block of land under the control of one group, the property may generally be upgraded one level of density in the existing urban plan.

77/ We shall have X-prizes for cajete or planter berm machines. These drill an oversized planting hole, they also pulverizing the soil and add soil amendment material. The machine operates two counter rotating drills at once. It also puts down a plastic washer-shape sheet that is buried at the center and periphery.

78/ We shall have X-prizes for smart grading equipment that will use site lasers to automatically position themselves, and shave the soil down to a topography that has been electronically described. It shall be presumed that this is not necessary for fill dirt. The fill dirt will be re-compacted via placement in lifts, and then the smart grading equipment will cut this down for the final grading. The human operates, but the soil blade auto-stops when the cut reaches the limits in the system. This automation will greatly reduce the skill-level required to grade land. It will also make the work sort of fun. This sort of equipment will work with the new larger-sized (up to 9-meters wide) earth moving equipment, and honest bidding processes to greatly reduce the cost of building new linear infrastructure and dams, especially high mass earth and plastic sheet dams.

79/ For reasons of civil defense from structure fires, firebombing in war, and resistance to wild fires, at least the outer 10cm of all township insulation layers shall be made of rigid compressed fiberglass. Where there are nearby trees that might catch fire, the entire insulation layer shall be made of fiberglass and there shall be no styrofoam insulation. Also, in high-rise situations, we might want to only use non-combustible fiberglass insulation.

80/ In the past we built buildings under this regulatory charade where government sets up these detailed aesthetics requirements for people to design their buildings. Then people hire someone to design a unique building. Instead, from now on, government shall simply designate acceptable designs and people will select one. This will be cheaper, easier and better than the process of conditional approval for aesthetics.

81/ There shall be no restrictions on how much power or energy people can use. A person's access to utilities shall not be used as a punishment. There shall be no mandatory energy efficiency standards, except in townships.

82/ There shall be no smart utility meters that video or audio record, or spy on users.

83/ All new communities and neighborhoods shall be wired for fiber optic communications lines.

84/ Government checks on concrete quality for free. Also, the people shall be free to hire their own concrete testing companies.

85/ All new buildings in soil heave areas must have at least a 1-meter paved rain skirt around them, so the soil doesn't heave, and so the buildings last longer. If the bottom of the foundation is more than 66cm deep, then the rain skirting must be 1.5 times as wide as the depth of the foundation.

86/ All office buildings and group apartment buildings must maintain an average temperature above 21°C in the cold season, and below 22°C in the hot season (This where the building was built after 1985, and is air conditioned). Also, all areas are supposed to always be maintained above 20°C in the cold season, and all areas not exposed to the sun through windows are supposed to always be maintained below 23°C in the hot season (This where the building was built after 1985, and is air conditioned). It shall be thought penny-wise and pound-foolish to allow our group buildings to be conditioned outside these ranges, for the pennies we save on energy are completely dwarfed by the value of the comfort, productivity, and healthcare savings we get from properly conditioned buildings. Where temperatures go beyond this range, the people may call the county health department, which shall fine building managers in an escalating way until the building is brought into compliance. Also, where buildings are not kept above 18°C, 10% of the rent may be withheld permanently on a time prorated basis by the tenant. And where the temperature is not kept above 15°C, all rent may be withheld permanently on a time prorated basis by the tenant.

87/ All apartment blocks must be built according to a mass produced apartment block plan that is owned by the national government, with only slight modifications. These plans shall be free to use.

88/ All government buildings shall use standard construction designs all across the nation, so as to greatly reduce the potential for theft, and to reduce the cost of government buildings. It shall be thought to be very important that Government build the same thing every time, so that we may get to the bottom of what is the true price for a building. Also, there shall be strict limits on custom features in our government buildings. A regional Airport in one city should cost exactly the same as a regional airport in another city, except for some multiplier adjustment, because one city is more expensive than the other.

89/ When people build anything, even fences, they shall not be allowed to put lumber on the ground, even treated lumber and recycled lumber. If it comes in contact with the ground, there must be cement between the ground and the wood. Also there must be enough cement around all the steel so it does not spall. We shall not allow our scarce biome, material and lumber to be used in a way that it must constantly be replaced. Also, with regard to fences. There can be no more wood inserted into concrete in the ground for the wood rots here too. All wood post for all fences must be set on a heavy gauge steel L metal, with the wood post at least 10 cm above ground level.

90/ Realtors, architects, ecologists, and neighbors shall be

excluded from participating in county government decisions about land use and land development, due to their various obvious conflicts of interest.

91/ Government shall not be allowed to charge for business licenses, or

92/ Government shall charge no fee or tax for starting a business, or building a building, or remodeling a building, or for paving land, or making dirt roads, or laying pipes, or for creating other linear or ethereal infrastructure.

93/ To drive our nation towards always having plenty of land, Government shall be mandated to do all low-cost things it can to help property owners divide, and subdivide properties, and it must offer these services for no charge to the people. All of the following shall be free services offered by government:

a/ Checking for division of land viability under the rules.

b/ Surveying the existing lots to check if the subdivision and creation of more lots is viable.

c/ Create new plats of the new lot configurations with more lots.

94/ Government shall never charge fees to start businesses, or to try things out. Government shall never charge any fee for either building or placing, or changing a structure upon land. Nor shall it charge anything to start a business, grow a crop, operate a mine, or a factory. Going forward, these fees should be thought to be the domain of corruption, whenever government gets the money, or the one government person gets it.

95/ Even in the old communities, there shall be no more development impact fees, or water system impact fees, or sewer system impact fees, or school fees, or building permit fees, or building application fees, or any of the other fees for putting a structure on a property, or for dividing or subdividing property, or paving roads, or installing utilities. All of these fees shall now be forever banished from our system.

96/ Government's official policy on free parking is that if there isn't enough of it, no big deal— a shortage of free parking only drives more people into eco-friendly transit. This is part of the reason why Government is prohibited from having any parking requirements for any building or project.

97/ Government shall not involve itself in anything so trivial and immensely expensive as parking on private property. This is such a hugely costly thing, with only the most marginal of benefits. Government may only concern itself with illegal parking on private property as a moderator to make sure the illegal parkers were properly notified and still parked illegally.

98/ The recent community firestorms in Lytton Canada, Lahaina, Jasper, Eaton, and Palisades show us that having personal vehicles in wood frame buildings, or adjacent to wood frame buildings is not a feasible thing in modern war. This is because these vehicles all have gasoline or flammable batteries in them. Therefore, the center of all of our townships should be completely free of fuel and battery vehicles except the vehicles doing pick-ups from the central station. However, if we use compressed air vehicles, this is not much of a problem and these may be kept inside the township. Also, the insulation on the outside of the buildings needs to be covered in such a way in such a way that it's not subject to catastrophic fires. Perhaps we imagine insulation that is 60 cm thick, but with perhaps 1cm glass outside of 20cm of fiberglass outside of 40cm of styrofoam, outside of a cast

concrete structure. Also, in between units the exterior insulation has perhaps 30cm of fiberglass.

99/ Except for connecting existing cities to the new rail system, we shall stop remodeling our existing old automobile based communities and instead focus on new rail based cities.

100/ It's the most ridiculous thing the way we rebuild whole districts in our cities, but we don't build entire new cities. It would be cheaper to simply start over again than to update everything at once.

101/ Regarding lot coverage and rain water:

a/ All laws concerning impenetrable lot coverage shall be void and there shall be no more new laws for impenetrable lot coverage. Impenetrable lot coverage policies arise from both extreme innumeracy, and corruption by nations that hate our freedom from their tyranny.

b/ The amount of impenetrable coverage is less than 1% of what causes flooding.

c/ No government policy shall penalize the people for doing the right thing and building with either eaves or rain skirting pavement up to 90cm around their building. Failing these, there will be much more water-induced soil heave, and buildings that fall-apart much faster, no matter how deep the foundations. Therefore, all new buildings shall have either 70cm of sloped-away concrete rain skirting on the ground all around the building, or eaves of this size. We require this out of our sense of ecology. Government shall undertake no regulations that drive the people into omitting any similarly important investment in building longevity.

d/ Except for having a working septic system or using government sewage, there shall be no more government environmental pre-checks for building on a graded approved lot. Also, the use of remote community septic systems shall be encouraged for the obvious advantages of this approach.

e/ Government shall no longer require any rain impounding calculations or actual rain impounding on private property. Government shall no longer have any rain impounding on public property, except for dams and pipe hydro electric storage.

f/ Government shall no longer require any erosion control plans, for construction.

102/ Where people build new building projects, all of the following shall normally be obtained as part of the government's free building permit process:

a/ Grading permit.

b/ Foundation permit.

c/ Electrical permit.

d/ Plumbing permit.

e/ Mechanical permit.

f/ A demolition permit

g/ An encroachment permit.

h/ The fire department needs to give you a permit.

i/ If you have a septic tank, you need a permit for that.

j/ You need a water and sewer connection permit.

k/ You have to have an energy compliance permit.

l/ An environmental permit.

m/ Zoning permits.

n/ Tree removal permits.

o/ Solar panel permit,

p/ Certificate of occupancy.

103/ In our nation, there shall be no more right of existing residents to express their opposition to new residential dwellings being built that conform to the regional plan and its neighborhood and block zoning. There shall also be no local hearings for linear infrastructure construction or for re-allocation of raw land or non-parkland government property. Rezoning of parkland and nature reserves by the Senate shall require no public hearings. Also, no existing parklands, habitat, or wilderness areas shall be off limits to new linear infrastructure projects or new townships due to some fake precedent created by the prior fake democracy. All good and suitable and pretty settlement lands shall be open to development.

104/ There shall be no government approval required to build a railroad, or other sealed or inaccessible linear infrastructure, or township, or township backup roads through a national, state, or county park. These may be built anywhere any group of 2,000 people or more wish to build a township, provided that all the sewage can be disposed of. After all, roads are allowed in these places, why not railroads?

105/ There shall be no wildlife, habitat, biodiversity, or runoff, permitting requirements for new or existing community densities up to 4 dwellings per acres. All of the existing laws for this situation shall be void with immediate effect.

106/ We shall have no more filthy unhealthful animal shit or urine in our cities. We shall achieve this by completely banning all pets and livestock from the outdoor areas of our cities where the units touch. In these areas, there shall be no more pet shit, pet urine, pet sounds, or pet parasites such as fleas and worms.

107/ All home batteries shall be required to be of a non-flammable nickel iron design.

108/ When dwelling units are sold before completion by developers, and any money transfers to the developer, all of the proceeds of the sale shall be subject to a 5% sales tax on the price of the unit.

109/ All parking on arterial roads shall be cancelled.

110/ Also, the local Senate shall hold hearings on all past roadway remodeling as to whether to keep the new plan or revert it. However all the people abutting the road shall be banned from giving input, because they are all biased.

111/ Government shall no longer concern itself with the regulation of parking on private property. Government shall be prohibited from establishing any rules at all about how many parking spaces any development, residential or commercial must have. This section is intentionally somewhat redundant so this incredibly expensive yet OPEC-friendly, and seemingly harmless area of regulation stays dead forever, even though OPEC desperately wants all high density developments and our efforts at transit burdened with ample pre-paid parking.

112/ Where any mass produced buildings passes the national approval process, there shall be no more regulation by the county government with regard to the structure, provided it is inside the lot setbacks.

113/ Government shall have no liability for its plan checking mistakes.

114/ All driveways to less than 8 residences may be as narrow as 3m wide.

115/ Every inhabited property or buildable lot shall have a right to install a curb cut and a driveway. No permit shall ever be required to install a driveway and curb cut (if applicable) on a non-arterial street. Government shall not strictly regulate curb cut aprons.

116/ It shall be thought that droid access is a much better guarantor of handicap access than actually having rules for wheelchair access.

117/ All data centers and electric vehicle charging stations must generate their own power. These shall not be allowed to go on the regular grid.

118/ Except for ports and public works involving navigable water ways, neither government, nor anyone else shall build any form of sea wall or wall against the seas and such things shall always be regarded as futile.

NR'136. NEW TOWNSHIPS

1/ The national government and all county governments must provide sufficient land for new rail based townships to meet demand.

2/ When government sells land, it shall not be sold to maximize the up-front proceeds to government, but to maximize property tax revenue over the long run. This is because:

a/ Government is less likely to have budgetary problems as time goes on.

b/ It is more affordable for the people.

c/ It is harder to squander, misappropriate or steal the cash flow than the lump sum.

d/ Such a system is less likely to produce real estate bubbles.

3/ To encourage an efficient national market for inexpensive factory-made structures, government shall minimize the number of standard zones in the nation, establishing no more than 20 nationally established standard urban and suburban zones for residential and commercial uses in both the new cities and the old ones. There shall be no local zoning in new cities except those that conform with these national zones.

4/ All neighborhoods shall be pre-designated by the county government regarding which classes of structure are automatically allowed. There shall be no surveys or drawings required by government until after the conforming factory-made unit is placed.

5/ When government builds a new rail-based township, it shall be prohibited from taking money for the sale of the land, or the cost of placing standard pre-fab apartment units in that townships. Also, government shall charge no property taxes, rents or fees on new units until 1-year after the units were placed. And once a unit is placed, all reservation deposits shall be refunded. Instead, government shall charge the residents a fair amount to pay-off the cost of township common facilities build-out and unit placement over 20-years, starting at the beginning of year two. This shall be in addition the county property tax, and township owner's association fees.

6/ The county recorder shall provide contract, escrow and title services for 0.2% of the transaction amount. People can pay money into an escrow account before their unit is started and be sure that their township unit is delivered and placed before any of their money is released.

7/ Government shall be prohibited from building new transit infrastructure that does not have a 100% dedicated right of way, and where the transit system does not own all the land within 2-km of the line. The only exception shall be where the new transit oriented system connects with the old road based system. Where new transit systems hook up to old cities, the old cities shall pay for the new transit system in their densely populated zones and this shall not be a burden to the new rail-based system.

8/ The con-dem-nation shall occur before the transit is started. The valuation shall take no account of the value created by the transit or new community contemplated. Upon completion of the new transit, the land will be up-zoned for township use.

9/ Because of self driving cars, wheeled droids, disabled people, and twisted ankles, none of the new cities shall have any curbs or offsets in the pavement. All cracking offsets over 3mm must be ground and filled.

10/ There is simply no need to build our new cities in locations that are vulnerable to tsunamis, earthquakes, volcanoes or forest fires. There's plenty of room on our planet let's just build our new communities above the tsunami zone, whatever elevation we find that to be in each area.

11/ With regard to the township sewer sub-orbs (up to 5km out) and the septic system ex-orbs (up to 15km out) of a township:

a/ This land is the property of the township.

b/ There will be an infinite supply of suburban lots on earth now. So people will not hoard housing any more, and nobody in most parts of the world, is going to bother with the lots that are too far from the train stations via 10-meter outside bike/ pedestrian lanes and 7-meter one-way indoor bike/pedestrian lanes. He's also accommodate disability droids and wheelchairs. So, the township central tower(s) and surrounding elder-care zone will have high rent. They will be owned by the township, and the high rents here will help offset the cost of operating the township, its 24-hour clinic, its transit system, its utility plant, its delivery system, and its maintenance services. The 40-stall food courts will make no money as the half of the stalls that sell the most shall pay no rent. the other 20 stalls get auctioned off one per teneth, along with the failures.

12/ The townships will build their own "zip trains", their own transport system connecting them to the nearest interchange. Thus this element of construction will be standardized and built by many groups all over the nation. Thus it will be harder to steal from the area of township construction where we build the rail lines connecting our milliads/ myriad townships with our our centiad interchanges.

13/ Once the train lines have been built, the interchange operation division of the county government will operate the driverless endless loop of in-out on protected viaducts. Government does not charge for using the transit/delivery system, except for special delivery. This holds for both the county government, and also for the townships. There shall be no charge at all to use transit going forward. However, the use must be sensible, and people can't be living on the metro trains, or riding them for pleasure.

14/ In the more desirable areas, there will not be ex-urbs, ex-orbs and their septic based wastewater disposal.

15/ So that people don't get confused about what a township is, let it be defined as a pedestrian maximized village centered around at rail-based transit stop, with minibus and car loops around the outside.

16/ The synchronization of the loop bus, transit and rail system should not take into account that needs of people carrying things. Mothers with children, slow old people, disabled people, and the 3% slowest people overall. The needs of the 97% shall be met by the synchronization. The people who are too slow, shall have to wait for the next train unless the trains are running less frequently than once every 15 minutes. However, those who use the transport system in a place at least once a day on average. all these people have the right to vote to increase or decrease the weight for the outbound bus.

17/ We shall develop a new form of heavy duty river boats for transporting individual house-castings/ building blocks that weigh up to 150-tons on our nation's navigable waterways on our nation's river and lake system systems. These boats shall be thought to be a thing that will bring much economic lift to all our nation's many navigable fresh water waterways such as:

a/ The Mississippi and Missouri river system area.

b/ The Great Lakes system area.

c/ The Erie Canal area,

d/ The Hudson river area.

e/ The St. Lawrence river/seaway.

f/ The Columbia river up to the Idaho border

g/ The Mobile/Alabama Rivers.

h/ the Apalachicola/Chattahoochee Rivers,

i/ The san Francisco bay.

j/ The California valley via new no-lock canals as far as Willows to the north and Newman to the south.

k/ The Yukon River in Alaska.

No special permits other than any other commercial boats require shall be needed to transport house castings on any of these navigable river systems. House casting factories shall be encouraged on these waterways and transport of cast houses shall be encouraged in these areas, which shall also be located adjacent to the rail system in locations where the castings can be cured in water. Also, no environmental studies or permissions shall be required to take fresh river and lake water and use it for concrete deep or shallow curing ponds that are more than 500-m from the waterway and not in a valley bottom in the course of water flow. Also, the overflow rim of the curing pond area must be at least 2-m above the waterline. Thus it might happen that the reactive and mildly toxic pond water overflows rain-barrel style in an extreme 5-year rain event, but it will be extremely unusual and the amounts will be small. Also, Government shall only regard fresh concrete less than 30-days old, and concrete curing water less than 90-days old as toxic. After this the Ph will have balanced sufficiently that these materials shall no longer be considered toxic. The house casting factories shall be allowed to own barges of their own and transport railcars of their own. Also no one person, partnership, or fictional citizen shall provide more than 2% of our nation's house casting factory output.

18/ Landwarp shall be the word for the phase-shifted land that is maximally isolated between cities. This land typically

sells for around 1% of what land sells for in cities. This is where we are going to build our new cities in the middle of absolutely nowhere today, but part of a giant new network across the nation that will eventually replace our existing communities entirely. This except for the people who choose to live in the communities of the old inefficient relic civilization.

19/ It is not enough to have standardized buildings, we must have standardized lots/building sites, and the entire dimension of the lot and the orientation should be more or less consistent and of less than 50 different standardized sizes and shapes inside our townships, and 100 different standardized sizes and shapes outside our townships.

20/ We shall open up the Sutherlin/ Medford/ Redding/ Santa Rosa area for the settlement and enjoyment of up to 50 million people.

21/ It is not possible to build an efficient transit system into an existing city. Instead we must design the city and the transit system together, because the transit systems only barely work when we design the two together.

NR'137. SEWAGE AND GARBAGE

1/ All sewage and garbage standards shall be established at the national level and enforced at the county level. Our task with regard to wastewater is not to make our wastewater safe for drinking, but it's to make it safe enough to deposit 5 miles offshore and 200m down in a natural trench that endlessly buries anything that falls to the sea floor in that place.

2/ Both the national and the county government health departments shall be required to redundantly survey all water supplies in the nation each year at a ratio of one sample site per 1,000 residents to check for tap water contamination of a biological, chemical, or radiological nature, randomly selecting units in each zone for testing. Government shall also test for mineral levels. Then these levels shall be published on the government website. Also, every teneth, one water supply outlet shall be selected per 10,000 units shall also be tested.

3/ Government shall not charge anything to take reasonable quantities of bathroom, kitchen, household, or small business, or small manufacturing wastewater, nor shall it charge people to connecting their sewer pipes to the sewer system, provided they do all the work, except the final connection with the main line.

4/ Low levels of industrial waste discharge shall be taken by the government at no cost. However, high levels of industrial waste discharge shall be provided at no additional cost by government.

5/ The Public Property Sluice shall start afresh and establish realistic all-new disposal standards for toxic waste, ordinary rubbish and the various sorts of waste water. The Public Property Sluice shall also determine the most optimal locations for the nation's garbage dumps. These shall be the places where garbage runoff is least likely to get into groundwater that will be consumed by people, and also places a reasonable distance from our communities

6/ The national government shall build spurs to connect the national rail network with the nation's garbage dumps and other disposal areas. Once the infrastructure is built, government shall charge no more than marginal cost for

industrial garbage transport and proper disposal. There will therefore be no need to dump things illegally. Also, each township shall have a location for dumping clean dirt and compost materials.

7/ All counties shall be required to collect reasonable quantities of landfill garbage at no charge. Industrial uses that make great quantities of non-hazardous garbage may be required to deliver their garbage to the dump.

8/ Once the Senate has located the nation's garbage reserves, there shall be no more discussion of the locations we have chosen for ourselves.

9/ There shall be no burning of garbage, including leaves in communities and valleys. This shall even apply to small towns of 2 residences if they are clustered together.

10/ If irrigation is commonly installed in some part of the nation, then all new streets used for the construction of buildings in that part of the nation shall be piped for lightly pressurized gray water, and lightly pressurized brown water, as well as for normally pressurized drinking water. Then the local landscaped greenbelt areas can be irrigated for free with wastewater. In areas that get abundant rain, the disposal of gray and brown water will be the primary purpose of the wastewater system will be the elimination of the excess wastewater.

11/ We might as well recycle our bio-energy. Therefore, the Senate shall produce detailed guidelines for turning wastewater into usable amendment soils and using this soil after a reasonable quarantine period of some years. Where we do this, we should do so in non-salty lake beds that can be flooded with fresh water in wet season, when there is too much water, this to de-leach the salt from the sewage-enriched soil.

12/ There shall be no companies, dealing with ordinary trash that do business in more than one community. Nationwide we show use one identical type of residential trash truck and trash container. This may be phased out in favor of another type of identical, trash truck at any time by the Senate.

13/ Regarding community trash receptacles and chutes:

a/ All wet and sticky trash must be put in a sealed trash chute bag, or fines may be charged.

b/ All new trash chutes must be round and of the standard size for roof-mounted trash-chute cleaning robots. All shall have rounded face stiff doors and a system that gives a red light all the other doors on a chute. We shall not concern ourselves if the bags break once they have hit the collection receptacle.

14/ All trash receptacles/cans for public pickup shall be plastic and of only one size and owned by the public waste removal system. These must be replaced, and the old trash can taken away and washed by steam pressure washing machinery at least once every two year. Users can also get a new clean receptacle for 4-hour's wages any time that wet garbage leaks into the public trash receptacle. The bottoms of all trash collection receptacles shall be sprayed with an insecticide that binds to the plastic of the receptacle.

15/ We shall favor conserving rather than burning biomass because biomass is more precious than petroleum. This is the current life force of our planet, petroleum is the preserved past life force of our planet that can't be readily added to soil the way biomass can. We should instead be burning fossil

biomass that is not usable by living creatures. All live biomass (including human feces and urine) should be composted until it can be reused. It shall no longer be allowed to burn living biomass. The only exception to this rule is people burning wood from their immediate neighborhood used to heat the inside of their home. Other than this, biomass is supposed to be recycled as bio fertilizer where practical. Nowhere on earth should anyone be burning leaves.

16/ All county governments shall be required to keep all urban and suburban areas, all exurban streets, all exurban hiking trails, all playgrounds, all lakes and all waterways and free of dog feces and all other sorts of feces. Manure shall not be used in cities.

17/ To prevent the dumping of garbage, we shall have no dump fees and no cost of trash disposal. We might also have hidden serial numbers for things we don't want dumped late in life as garbage, for example: batteries and electronics, used tires, mattresses, coatings containers and other things we don't want dumped.

18/ Each county shall have one electronics disassembly and grinding-up facility per 500,000 people. This service shall be free to the public. All disassembly and grinding destruction of electronics shall be in front of the person throwing away the electronics.

19/ Neither government nor anyone else shall be allowed to require trash sorting.

20/ The following shall never be considered toxic waste:

a/ Cement, concrete, cement blocks, brick and rebar

b/ Asphalt.

c/ gypsum board, plaster, and stucco.

d/ Plywood and lumber.

e/ All roofing materials except old style "asbestos roofs" which last for many decades.

21/ Because Asbestos and petroleum containing materials originally came from the ground they may simply be buried in designated unlined desert pits in at least 40 locations nationwide to dispose of them.

22/ Government shall provide free disposal of all industrial production waste for all products and industrial processes allowed in our nation as finished products. Therefore we shall no longer have the situation where certain industrial products may only be imported to our nations as finished products and these cannot be made in our nation due to industrial/environmental prohibitions.

23/ Stale and recently expired food shall be recycled as chicken feed for chicken farms far outside our townships.

24/ Neither Government nor any HOAs shall be allowed to prohibit or tax car washing of private owned family vehicles on private property or exclusive use land.

25/ Adults who shit and run:

a/ In an elevator or stair, or on or near stairs get 10-years.

b/ In a door step, or building lobby get 5-years

c/ In a crowded urban area or popular beach or popular park, or anywhere that the shit will get into a lake or stream or pond, or swimming pool 4-years.

d/ In a remote park area that nobody uses except as a toilet: 10 days of public service. Where a bag is used outside, there can be no charges.

x/ In all of popular ad hock shitting locations in each community, the park people are supposed to put out a

number of plastic toilet bags (These day-glo pink bags that say Government Property roll into a flat bowl on the ground and have twist ties at the top. They also have a small amount of toilet paper inside. We put these out in parks next to our same color dog shit bags, for the sake of shit cleanliness. xx/ Foreign visitors and immigrants violating these rules shall be subject to double penalties in our land for public defecation. If India emulates this constitution, it must impose similar rules. Those who must go, and who either go in their clothing or a plastic bag shall not however be punished provided they put the bag in a trash bin.

26/ When it is hot:

a/ All spoilable garbage must be bagged in air tight plastic.

b/ The health department shall require collection every 3 days instead of once every 6 or 7 days. this especially for high density areas.

27/ Each household/ address/ business shall be responsible for cleaning up after wet garbage that leaks, and washing this down the storm drain system.

28/ Everyone's garbage shall be considered their own private property until it is either burned, buried or recycled by the people collecting it. Therefore, those people going through other peoples garbage and recycling bins (at either private residences or fictional citizen sites) shall be regarded as thieves and they shall be treated as thieves under the law. If we fail to do this, we have people creating various public nuisances such as:

a/ People rooting through other people trash finding confidential information.

b/ People creating a mess around trash cans.

c/ Surface mining homeless people living off of other people's trash in nicer neighborhoods.

29/ Recyclable plastic bottle caps shall not count as having recyclable packaging, or partly recyclable packaging.

30/ Glass containers shall be the benchmark for food packaging. The most important aspect of food packaging shall be thought to be whether it will keep the food as fresh as glass. The next most important aspect of food packaging is whether the packaging will leach any measurable amount of unnatural chemicals into the food it is holding. All "recyclable" food packaging must totally satisfy these first two conditions before it is even allowed.

31/ The Senate shall have X-prizes for advancements in garbage sorting AI and robotic arms. The delivery system shall also print QR labels for garbage, to notify the sorting robots about special value. All bagged useful furniture and household items shall be collected by the delivery system on trash day at each location, provided a photograph is sent in.

32/ All toxic activities shall be regulated at the supply level by the government's monopolist distribution system which also may charge refundable "core charges" for toxic items to make sure they are properly disposed of. Also, all toxic activities must occur in a national toxic industry zone.

33/ No sewage or waste water other than runoff may be discharged in Chesapeake Bay, Long Island sound, Delaware Bay, lake Borgne, Tampa bay, the St. Lawrence Bay, the St. Lawrence seaway, the Gulf of St. Lawrence, Hudson Bay, the Cooke inlet, Prince William sound, the Hotham inlet, the straight of Georgia, Puget Sound, the San Francisco Bay, east to Stockton, or in any other freshwater way or a inland

salty bay. All must be discharged in the ocean.

34/ Government shall not be allowed to participate in any system for turning waste water into drinking water, or for distilling seawater into drinking water.

35/ Toxic fly ash and toxic used tires shall not be recycled.

36/ All of the plastic trash bags and grocery bags shall be designed to break-down in 5 to 7 years.

NR'138. NUISANCES

1/ There shall be no right to go around our cities and root through people's garbage and open areas looking for things of value. This shall include the garbage of fictional citizens.

2/ The value of the recycling that homeless accomplish is a sliver fraction of the cost of their scrounging and the cost of securing against their scrounging. For this reason, government shall institute various laws and policies to end urban scrounge recycling by homeless people.

3/ The use of deposits of less than 20-minute's wages shall be prohibited as this draws homeless desperados to our important city centers where they frequently engage in crime.

4/ There shall be no recycling without a government issued ID, a valid address and a bank account, and video documentation of the source of the recycled material. No payment shall be made less than 15-days after the recycled materials have been delivered to the recycling center.

5/ Due to questions of toxicity, and problems with surface mining homeless people and recycling, the use of aluminum for food packaging shall be prohibited. Metals shall not be salable for recycling, except with credible video proof and the addresses of the thing in place, and where it came from.

Where people tear-out and recycle small amounts of public or private infrastructure, wiring or piping, manhole covers, or other valuable things for the recycling money, this should be regarded as a thing that will get a person islanded or isolated for 10 years. Also, the cost of the repair shall be used in determining the value of the theft and the punishment, so grand theft will get them up to 20-years of isolation. Where homeless people are found using baby prams and shared shopping carts for their things, these wheeled carts are supposed to be confiscated by police.

6/ There shall be no recycling center, or recycling machine in or within 5-km of any urban area. All recycling centers shall require a powered road vehicle to enter. None shall allow entry by pedestrians.

7/ There shall be no recycling machines of any sort at all in our nation. No grocery market shall take-in recycling.

8/ It shall be the felony of fraud to participate in fake recycling where either the true cost is hidden or where recycling is claimed but most of the ostensibly to-be-recycled material is simply trashed. Also things must be 80% recycled in order to claim that they are recycled. So for example, simply recycling the caps on the bottle doesn't count, and that shall be considered fraud if the bottles are supposedly recycled. All behind the scenes recycling must be audited regularly at least once per teneth.

9/ Nobody may require residential or office recycling, neither Government, nor any fictional citizen.

10/ Except for easy to dissolve paints approved by the Senate, no paint, coating, or pigmented liquid shall be sold in

pre-pressurized vessels, or vessels than can be readily pressurized. All paint pens shall also be prohibited.

11/ For each count of vandalizing a transit vehicle, transit facility, or urban center the person shall spend 2-months in a work camp, or 1-months in a jail cage. Where the vandalism involves scratching of glass, or stainless steal, the penalties shall be doubled. Where the vandalism involves acid on glass, the penalties shall be tripled. Where the vandalism is temporary, or can be washed away, or peeled off, that sort of thing shall not be considered criminal vandalism, especially if it is political.

12/ Vandalism shall be of 4 degrees and punishments: Vandalism-4 = Graffiti that at least tries to help the public and only needs another coat of paint, or a scrubbing, or razoring-off to get back to normal. This gets community service penalties.

Vandalism-3 = Breaking a window, or Graffiti that can't be removed, such as scratching stainless steel, or etching/scratching glass. This gets work camp penalties depending on the damage.

Vandalism-2 = Breaking a few windows and causing other sorts of expensive damage. This gets long periods in a work camp.

Vandalism-1 = totally ruining a place. This gets 1/3 of the arson penalty.

13/ There shall be no begging, busking, or unauthorized commercial activity on any train or in any transit facility, or in the driving lanes of any road, or between those road lanes, or within 200m of an intersection of roads. **13/** This Constitution does not guarantee the rights of people to live their entire lives in public in our city centers. It also does not guarantee the rights of people to spend long periods of time in our city centers, if they are recorded as apparently unaware of their surroundings, or talking to non-existent people, or ranting, or repeatedly threatening or menacing others, or harming themselves, or unable to care for themselves, or if they smell to the point where nearly everyone runs from them, or if they are covered in dirt or excrement. If a Centi-Nome elects with a 2/3 overmajority that a street person at least partly of their territory is mentally ill and making trouble, then the Centi-Nome may require that person be institutionalized. Also, this process of declaring street people insane is not supposed to involve any specialist judges, or specialist psychiatric or psychological experts at all, except those working in, and reporting from a facility that housed the person in question.

14/ This Constitution does not guarantee the right of people to live homeless in our cities. This includes sleeping outside in the open, or in tents, in passenger vehicles, in camping vehicles, or shanties. The counties shall be free to permit, regulate, tax, or ban homeless and camping activities in all their areas.

15/ No public money or benefits at all shall be given to homeless people who are not staying in the homeless dormitory system, once there is sufficient capacity. No dormitory shall have fewer than 50 people in a room. All homeless and emergency shelters shall be same sex, except for boys with their mothers who have not yet had their 12th birthday.

16/ Wherever homeless people get into a conflict with the people who have paid to live in houses that they are living

around, the presumption of guilt shall always be with the homeless person who does not really belong in that place. Also, where homeless people commit crimes against the people they are living around, the penalties shall be doubled. Also, where homeless people, commit petty thefts, or other crimes, and people around them retaliate against them, the maximum penalty shall be halved.

17/ Improvised dwellings such as tents and slums on public urban property, and/or someone else's private property, shall be considered garbage if and when nobody is at that place. Also, when people are there, they must come out when called, or the improvised dwelling may be considered empty and eligible for demolition.

18/ The term homeless person shall be repealed and changed back to either "drifter" or "vagrant". This especially if they move around a lot and are homeless.

19/ Homeless facilities shall only be open to citizens that can prove their citizenship and identity via fingerprint scanner or other biometric scanning system. Homeless people that have caused trouble in other homeless facilities may be banned from the entire national homeless facility system. All homeless facilities shall have full coverage by overlapping video in and around the facility. All sites for homeless and drug interventions shall be in non residential neighborhoods accessed by transit.

20/ Where hotels and other places are used to house poor people and immigrants, they shall be required to get a permit from the county government. And this permit shall require public hearings.

21/ Government shall assure that our cities are free of insect infestations, all forms of rodent, including squirrels, pigeons (wild or pets), bats, and other forms of disease vectoring vermin. All dangerously large sharks and reptiles that are sighted near a swimming area shall be killed if possible. Lifeguards in shark and reptile infested waters may have scoped rifles to shoot the dangerous animals with and to warn swimmers.

22/ All public toilets such as those in restaurants, bars, markets, shopping centers, train stations and the like shall neither require patronage nor charge for entry. However, they may require ID to enter. People convicted of making a mess, or bathing in a public toilet, or loitering, or creating other sorts of problems in public toilets may be deprived of the right to use all ID verified toilets in the nation. When establishments close their public toilets to the public, or they require patronage or a fee, the penalty shall be a fine of 30-days wages.

23/ Our nation shall remain committed to health and sanitation, and for this reason, we shall have severe penalties for people that cause feces to be dumped in our urban or suburban areas or into our nation's fresh waterways. Therefore, defecating in an urban or suburban area, or by a waterway without the use of a toilet, or at least a plastic bag shall get a person up to 1-year in a work camp. This penalty shall however not be applicable where people go inside their clothing and it leaks out, or there is a medical emergency, or mental retardation, or senility, or they are under age 7, or over age 70, or they another valid emergency reason. Everyone with IBS or a similar health issue shall be required to carry a couple plastic bags at all times. However, for all

others, particularly when they are homeless or living out of a vehicle, these shall face harsh penalties if they deposit feces in urban or suburban areas outside of a bag. Also, where people use a bag for their feces in an urban or suburban place, but do not put the bag in a trash can, the penalty shall be up to 1-teneth in work camp. These rules for proper disposal of feces in urban and suburban areas shall be for both humans and their pets and livestock. They shall also include dogs off their leashes that sneak one out in an urban or suburban areas and adjacent parks when the owner is not looking. Where illegal defectors cannot give a home address, they shall be subject to double penalties. Double penalties may be assigned when homeless people commit urban nuisance crimes such as public urination, public defecation, petty theft, vandalism, among other crimes.

24/ Bricks, concrete, tiles and similar building materials shall only be cut with wet saws in urban and suburban places. It shall be a crime of pollution to cut these dry and produce a cloud of noxious dust in an urban or suburban environment.

25/ Walled or fenced breeding communities and tourist communities shall be free to exclude people with a history mental disorders. Breeding communities shall also be free to exclude:

a/ Felons.

b/ All who are or were transsexuals, queer, non-binary gender fluid and similar other categories of sex pervert.

c/ All who come with arms.

d/ All who arrive from the periphery and do not use the ID verification system

e/ All who are homeless and not invited by a resident.

f/ Certain named individuals over age 7 that the community has black-balled for egregiously violent or lewd behavior.

g/ Certain named individuals over age 11 that other communities have black-balled for egregiously violent or lewd behavior upon confirmation by a Senate jury that this person does not belong in any breeding community.

h/ Homosexuals. Also, same sex marriages may be prohibited from breeding communities, even if they have children. However, Homosexuals shall not be discriminated against in ordinary communities that are not especially for breeding and having children.

i/ Prostitutes.

26/ There shall be no more cloud seeding at all until the harmful effects of the ingredients can be studied for at least 15 years under objective studies. All agricultural crop dusting shall be regional, and organized by the counties as a regional solution to regional pest infestations. All the workers and residents of any area shall be given at least 48 hour's advance notice on when all crop dusting and cloud seeding will occur so they may leave, or stay away, or stay indoors. The national Senate shall promulgate reasonable rules for cloud seeding and crop dusting.

27/ Except where an 80% overmajority of the national Over-Senate agrees to allow spraying, there shall be no:

a/ Spraying of pesticides or other chemicals above or near urban or suburban areas.

b/ Spraying of any sort of chemicals, catalysts, or pesticide, or bio-agents by aircraft of any type.

c/ Spraying of climate modification chemicals.

d/ Spraying of cloud seeding chemicals.

28/ Regarding cloud seeding:

a/ There shall be no cloud seeding where the average rainfall is over 60 cm per year.

b/ There shall be no cloud seeding in areas that are not in a rain shadow.

c/ There should be no cloud seeding within 100 kilometers of any city of more than 100,000 people.

d/ All cloud seeding shall require a national permit that must be renewed every five years, and requires hearings from all the people who live in the seeding area.

e/ Due to the hazard that a terrorist gas attack might lead to, we shall prohibit the spreading of aerosols and other particulates from aircraft, except that the Air Force may spray cloud seeding chemicals and crop dusting pesticides in regions of the country affected by crop plagues.

f/ There shall be no cloud seeding at all until all cloud seeding ingredients can be studied and approved by the Senate.

g/ Only the Air Force may spray aerosols and powders from aircraft. This is intended to result in a more regional approach to our pesticide use where all of the fields that are infested with a certain crop pest in a certain area get pesticide in a concerted manner, rather than in a disjointed manner.

29/ Until the safety and efficacy of toxic fluoride can be determine by at least 100 large peer-reviewed studies, fluoride and sodium fluoride shall be banned and shall not be added to any water or anything else that people take into their mouth. Nothing except chlorine shall not be added to tap water or bottled water unless and until it is proven clearly safe and effective.

30/ Each county controls the pests in its agricultural areas. This shall be considered a thing like dog catcher, animal control, and wastewater quality. So the Senate is making the decision as to where to spray, what to spray, and how much to spray to get rid of our crop pests, not individual farmers. So the application of pesticides is more wholistic, complete, and effective, and less haphazard.

31/ All potatoes and other heavy pesticide crops shall be grown in the desert under spread-out conditions using irrigation, and dry land in between. This instead of using the insane cocktail of pesticides needed to grow potatoes in the large areas with the best soil that are infected with many potato pests.

32/ All pesticides shall be tested for bee toxicity and regulated accordingly. We shall not allow any especially bee-toxic pesticides on the market.

33/ Government shall test all township sites en masse for contamination.

34/ Government shall not require that farmland or natural land be checked for pesticides or other manmade toxins to convert the land to suburban land or less dense uses.

35/ Within the first year, the Senate shall review all prohibited and allowed pesticides and industrial chemicals to determine how toxic they are, and how harmful they are to the environment. All pesticide packaging must indicate both the toxicity to humans, other mammals, and to the pests they are used to poison. They must also indicate the circumstances under which they may or may not be used. Government may use pesticides in agricultural areas and require evacuation of all humans for up to 12 hours.

36/ Neither Government nor anyone else shall spray

chemicals or pesticides from the air over populated areas unless approved by a 75% overmajority of the County Senate. This includes cloud seeding, research, pesticides, vaccines and medical treatments.

37/ There shall be no roller coasters or amusement park rides without government approval of the devices.

38/ The people collecting government aid money (other than child benefits) for more than 1-year must move to a community in the bottom 20% community with regard to cost.

39/ The people shall be free to put video cameras on their door steps, lifts, lobbies and other hidden urban areas people commonly use as toilets. Where there is clear video evidence of illegal urban urination/defecation police shall run this video through their face recognition system. Where police can positively ID someone and they don't have an alibi, they can be convicted on the video evidence alone. Where people are sent to work camp for urinating or defecating in someone's doorstep or near yard, the crime victim shall get half of the work camp income.

40/ The Notting hill "carnival" and other similar violence-prone events shall be stopped. Also, immigrants shall not be allowed to have massive events like the Notting hill "carnival". People carrying knives or firearms in hand at crowded street festivals may be shot without warning by police. At all street festivals, those ganging up and pummeling people on the ground may also be shot, but these are supposed to be shot below the belt.

41/ Parallax video evidence from multiple cameras shall be sufficient to convict a person of most urban nuisance crimes such as littering, making too much noise, dog shitting, going to the toilet in the wrong place, petty theft, etc.

42/ Where a pet or a pet owner has an outstanding pet fine, the pet license cannot be renewed either for the person or the pet. Then if the person is found out with an unlicensed pet, that is a higher crime.

43/ There shall be no underground tunnels that are not approved by the county and disclosed to the county recorder system. Also, no child oriented business shall have tunnels or be near tunnels or hallways or rooms that can be made private. And yes, this includes Disney and all the other theme parks, zoos etc. All reports of secret tunnels shall be verified by multiple police and various Sub-Senators. The Senate shall pay a healthy reward for reporting any unknown underground tunnels or rooms in any urban or suburban area.

44/ Each county fire department shall enforce the following fire and hazard restrictions:

a/ All under bridge areas, and all under overpass areas shall be kept free of all loose and especially flammable things, including trees, shrubs, garbage, slums, and vehicles. There shall no longer be any flammable vehicle/trailer parking or storage yards under any bridge, and all such places shall be cleared before 2027.01.01 or the local fire department shall cleared the property and send the owner the bill.

b/ All rooms shall be kept clear of junk.

c/ All urban lots shall be kept free of flammable junk.

45/ Where bridges have people camping and living under them, the local government should put extra-large chunks of rock and rubble there to keep homeless people away.

46/ We are going to start having voluntary registration for non-criminal, non-nuisance homeless people. These are homeless people who can identify themselves, and prove that they don't have any warrants or convictions for actual crimes.

47/ In our nation's 5% worst areas as measured by the homicide rate: in these areas, the county government may establish fenced cantonments, where everybody entering must verify ID and be checked for weapons going in or out.

48/ All urban areas and places where the units touch shall be de-iced or salted when there is ice. This shall be considered something that the local government is responsible for. Where the units touch, all the walking pathways shall be salted by the owner, HOA or the municipality as applicable.

49/ Regarding people riding wheelies on bicycles and motorcycles: These may be knocked over at no liability to the person knocking them over. Also, if the person riding the wheelie gets up and attacks the person knocking them over, it shall be considered a completely unprovoked attack.

50/ When people are laying down, sitting, or praying in the street or protesting in the street and blocking traffic, or perhaps to be highwaymen, the Maximum penalty for running each person over shall be 1-year in jail per road blocker killed. If the road blockers are merely injured, the maximum penalty shall be 30-days in jail per road blocker.

51/ Homeless people shall not be allowed to live in urban parks, beaches, and similar urban areas. There shall be no camping on or within 500m of any urban or suburban beach. No county shall allow this. However, for remote beaches there shall be many more camp grounds at least 20-meters above sea level.

52/ No air conditioner shall be allowed to drip onto any paved area or walkway below, or any place where people commonly go, all air conditioners over public property and other people's private property must have a exhaust water drain system.

53/ Except for requiring outside lights to be of a particular reasonable frequency range nationwide, government shall make no laws regulating outside light pollution.

54/ Retarded and damaged people shall not be allowed to live among other people if they make loud vocalizations and sounds that many people find disturbing.

55/ Due to the famous corrosiveness of seawater, and the scale of the oceans, we shall see no problem with piping human excrement into the ocean.

56/ Everybody has the right to rinse their vehicle with plain water and the runoff from the vehicle shall not be considered toxic in any way. Also where people are pressure washing their vehicles, flat concrete, decks, buildings and asphalt with pure water, this shall not be considered toxic. However, where soaps and detergents and other chemicals are used, this can create a problem for the storm water system. And for this reason we ban the outdoor use of soaps where the wash water will get into the river system and pollute the river system. And this especially in urban and suburban areas. This is due to the exaggerated effect that a tiny amount of detergent can have on our fresh water system with regard to bubbles.

57/ All trash collection trucks used between 9:00 pm and 9:00 am shall be electric and quiet. This shall include the main engine, the trash compression equipment, the hydraulic

system, and the brakes. Also, all there shall be no metal trash receptacles or dumpsters that are smaller than 1 cubic meter. All must be plastic.

58/ Where people willfully cut down big magnificent trees on their neighbors land, or on community property they should sometimes be forced to pay several years wages as a penalty. Where people cut down trees older than 80 years old, in any front yard, or urban area, a permit shall be required. The cut-off shall be 5 dwellings per acre. All of the planting areas in these more dense "urban" areas shall be considered public park in some way if it is not walled/fenced off according to the plan, or it involves mature trees. In all areas less dense than 5DUA are free to cut all their plants as they see fit. However, this shall not apply to large forested areas, which will now require a permit to cut down. Going forward, the the right to harvest the wood from the trees of our forests shall be a thing that is owned by the county, and owned apart from the land. Also there shall be a 30% sales tax on all softwood harvested. and a 50% sales tax on all hardwood harvested from the wilds of our nation, from our nation's precious biosphere.

59/ All homeless people shall be offered a homeless license that verifies identity, criminal convictions and military/ academic record. This license shall be required to use the public shelter system.

NR'139. TRANSIT AND PARKING

1/ When we compare the current heavy-vehicle transportation system with the new rail-centered system, we find the old system is:

- a/ Much more dangerous.
- b/ 10 to 50 times more expensive to operate.
- c/ 10 to 50 times more fuel hungry.
- d/ 2 to 10 times slower.
- e/ 10 to 50 times more polluting.
- f/ Much noisier.
- g/ Destroys the urban experience.
- h/ Needs expensive parking.
- i/ Kills some 2-million animals each year.

2/ Transportation systems with practically no marginal cost per rider shall be maximized for ridership by keeping the fares at zero. No urban rail system in the nation shall charge users any amount to use the system. All municipal and urban train, bus, minibus and transit systems in every part of the nation shall be operated as a free municipal service without any per use fees, just like the way we do street lighting, and road maintenance.

3/ Government shall not permit any new central parks. Government shall not permit any new central parking except for shared system operated vehicles. All new parks, and shared parking for private vehicles shall be put at the periphery. Also, there shall be thought nothing wrong with trading a little underused park land in a city center for land to be used for much needed roads and high intensity outdoor restaurant areas.

4/ We are on the verge of switching to a system of commonly shared system-driven vehicles with much less need for nearby parking due to self-operation. Also we will switch to smaller vehicles that only need about half the parking area as

today, if they are parked at all. Therefore, Government shall no longer require any vehicle parking on private property at all for any activity or any new construction. All existing parking areas may be eliminated at the will of the property owner without any government involvement at all. Then this land may be used to build new buildings. Government shall stop providing or requiring facilities for vehicle parking on the new streets and building projects of the nation. All developers shall be free to provide parking if they want, or no parking at all if they want. Also, the provision of parking shall not be a consideration in any building project or business approval at all. Government shall stop regulating parking totally with regard to new construction and existing parking facilities. All laws concerning parking lot landscaping shall be void. Government shall also be prohibited from mandating where parking must occur. Government shall be prohibited from mandating that parking be underground, or above ground, or outside the setback or in any place at all, except where the parking genuinely obstructs the view for drivers. Government shall have nothing at all to do with parking on private property. It shall establish no rules whatsoever about parking on private property, except those rules having to do with unauthorized parking on private property. Government may tax private parking on private property to encourage the use of transit where the transit stops are nearby.

5/ The road system shall be for getting around, and for temporarily parking vehicles when it does not slow the flow of traffic. Where having a lane of parking causes a traffic bottleneck, the parking shall be eliminated.

6/ Nobody shall ever acquire any right to any parking on public property either in law or politics. All such claims shall be void.

7/ The needed parking for temporary vehicles shall always be our first priority on public property. All day, or all night parking shall not be allowed on public property where there is demand for temporary parking.

8/ All paid public parking spaces shall be numbered throughout each community. Where payment is required, the parker must use the municipal parking app to pay for their car to use space number X. Private property owners may get their spaces approved and numbered and use the local parking app, but they must pay 1/3 of their income to the county. There shall be no liability for property owners or tenants when they allow their parking areas to be used for public parking. Approved, numbered parking spaces rented through a county parking app shall be considered entirely public property in regard to liability for people parking in this location. The parkers can pick their disposable account numbers from a pool of numbers that are at least 100 times larger than the number of drivers.

9/ There shall be no permit-only street parking reserved for residents of a neighborhood. Instead, government shall rent roadside parking spaces by the foot, auctioned off annually. specific cars register to certain number ranges on certain blocks. Merchant associations shall have the right to band together and bid for nearby parking in residential areas. The merchant's association then makes these spaces available for short term parking under the municipal parking system, frequently making a profit. There is a computer algorithm for matching everyone's parking space to their apartment and

minimizing walk time for all. To increase the supply of parking spaces, all parking spaces that are not reserved, shall be available on a first come first serve basis for appropriate vehicles. It shall be a crime for pedestrians to try and block parking spaces for their friends and family. Also, this shall not count. Where shared urban parking lots have reserved weekly or monthly spaces, these shall be subject to luxury tax.

10/ All private vehicles must have a parking spot either on paid public property, or private property a realistic distance from the residence of the user. We say this, however we also say that no building should be burdened by parking requirements. We also note that OPEC never would have tolerated a rule like this under the old system.

11/ Communities shall not profit from municipal parking fees or parking fines, and 80% of all public parking revenues and penalties collected by county government shall accrue to the national government.

12/ The national government shall tax private vehicle parking in prime locations by having a 50% tax on private parking lot income derived from private parking fees. This shall not apply to multi-story parking, but only one-story garages, on-grade parking lots, and on-grade parking lots with semi-permanent car-lift structures.

13/ All parking on public property shall be for the benefit of all, on a first come, first serve basis, and there shall be no special public parking rights for the people residing or working in any community. Nobody shall be thought to own the public parking in the street in front of their house.

14/ It shall be a stated objective of government to impel the people living and working in our urban centers into abandoning their personal vehicles and switch to public transit and other forms of shared vehicles.

15/ Townships shall be designed to live for a number of years, and then be totally re-furnished and re-sold.

16/ No business may be located inside and in between a transit exchange except:

a/ Emergency medicine and ambulances.

b/ Police, courthouses, jails,

c/ High-volume government offices such as the DMV.

d/ Recorder's offices in addition to the various townships.

17/ Our township shall elect on of the Nation's standard entry settings for various groups of residents and visitors, such as:

a/ People who carry certain types of arms.

b/ People who are convicts of various sorts of petty crimes.

c/ People who are convicts of various sorts of violent, theft, or sex crimes.

d/ People who have a fever.

e/ People accompanied by certain sorts of animal or noxious material.

f/ People with certain sorts of drug licenses.

g/ People who are unverified non-citizens.

h/ People who lack a housing address.

18/ Police shall not regulate parking on private property unless asked by the property owners.

19/ No matter how many parking violations a person or vehicle has, there shall be no criminal penalty for this sort of infraction, no matter how long the person doesn't pay. The sole remedy of the courts shall be the suspension of the violators right to register or transact vehicles. Even the right

to drive shall not be affected by parking violations.

20/ We shall always bear in mind the way the Glasgow subway system was obviously sabotaged by making the ceilings too low for people to stand in, So there are no strap hangers, there are only the sideways facing seats and nobody in the middle. This is a model for sabotage, with its grooved and hard to clean floors, with its always dirty cloth seats with sofa springs of a 1930's design. Many metro systems are put too far underground, to make them less convenient, like in Rome and with the insane depth and escalator length in the Kiev metro. Other sabotage things to look for are: custom made things, uncomfortable seating, jerky acceleration and braking, tracks that lurch the train from side to side, broken air conditioning or heating, noisy trains, expensive fares, filthy bathrooms, filthy stations, stations full of bums. All of this is by design and a gift of OPEC's infiltration. In the future, it all must be stopped. We must beware other nations sabotaging us for profit.

21/ All parking for big rig shipping container sized trucks that is within 600m of the interstate highway system that is rented on a daily/ nightly basis shall hereby be nationalized. This parking shall now be free to use from now on and shall be considered part of the interstate highway system. Also considering the cost, the highway system outside of our cities shall always aim for a 5-fold abundance of truck parking spaces.

22/ Big rig container sized trucks with trailers (two 40-ft containers or less) shall be allowed throughout the interstate highway system between 8:30pm and 6:30am. Trailers may be used on the interstate system 24 hours a day on the area between I-5 and I-35 and more than 100km away from either highway.

23/ The maximum speed for any sized vehicle with a trailer shall be 90kph. All vehicles with trailers found outside the slowest lane shall be ticketed.

24/ The illegal parking fine system shall not be used on private property. Also, except for dust control and paving and vehicle towing, Government shall not regulate parking on private property. Also parking violations shall not increase or suffer penalties when unpaid for a long time. Government cannot fine people for having cracked driveways or walkways. No parking ticket shall exceed 1-day's wages. Government shall have no rules about grass height, or parking on grass.

25/ Government shall be prohibited from buying any more kneeling or battery powered buses. Instead, all transit systems shall use raised bus platforms and ramps made out of concrete that are placed on the sidewalk and are the height of a standard double-wide new bus floor.

NR'140. URBAN PROXIMITY TAX

1/ There shall be a proximity tax with a rate that varies depending on distance from the township station. Every 100 meters out, the proximity tax rate shall fall by some amount until 1,000m from transit, at which time, there shall be no urban proximity tax due to mass transit

2/ To discourage the squandering of precious urban space near transit, there shall be no land use near transit that is exempt from proximity tax. All urban land uses must pay urban proximity tax for every square meter they use, without

exception or exemption. This shall include all parks, yards, churches, non-profit uses, golf courses, playgrounds government uses, schools, parking, sidewalks, vacant lots, town-squares, malls military bases, national government property, roads, sidewalks, and even roads.

3/ All government land uses shall be required to pay itself urban proximity tax from its budget. This intended to incentivize government to be mindful of wasting urban space.

4/ Uses that have over 36 unique visitors or employees per teneth per 5 square meters shall be exempt from proximity tax.

5/ In the new rail based pedestrian townships, the proximity tax shall be a function of walking distance to transit facility, the proximity tax fading-away over perhaps 1-km, as people walk further away from the train platform. In the old automobile based cities, the proximity tax shall be based on a much bigger automobile-type scale, with the proximity tax fading-away over about 10-km to 30-km from the central business districts, depending on the size of the city.

6/ The proximity tax is intended to take the place of high real estate values in our urban centers. In fact, it is intended to capture much of this money as tax revenue.

7/ The Senate shall be free to experiment and tinker with different tax rates and distance tax systems so that it may maximize its capture of urban proximity premium.

8/ The proximity tax is intended to encourage multi-story construction at the center of our urban areas. The tax should not be so high that it discourages people from living in urban centers. It is only intended to diminish the value proposition of non-users banking prime locations in our urban centers.

NR'141. GOVERNMENT SPLENDOR

1/ Only government offices visited by a great number of people each day may be located in prime locations. All normal government offices and services shall be located in other locations.

2/ Except where a 2/3 overmajority of the relevant Over-Senate elect to allow it, Government shall not build, or spend money on luxurious, grand, excessively expensive, or showpiece projects, or use or have:

a/ Expensive custom-made components.

b/ Monopolized, imported, or patented components.

c/ Ceilings over 3.5 meters high, or curvilinear designs.

d/ Polished stone except for common local polished granite on extremely high traffic floor areas such as interior transit stations and lobbies for great numbers of people.

e/ Glass ceilings, skylights, or clerestories.

f/ A budgeted cost of more than 133% of the median per-foot cost of building private buildings in that area for similar uses.

g/ For special buildings such as airports, train stations, bus stations, and freight handling facilities the special equipment shall not be included in the construction budget, but must be in a separate budget for custom outfitting.

x/ Where local governments use custom, patented or and luxury goods for their construction projects, they must pay the national government a 300% sales tax on those things.

3/ When Government uses special windows, high ceilings, and other fancy features not found in ordinary private-sector buildings, it shall be thought an indication that the people are being ripped off.

4/ All floors in multi-story government buildings shall be no more than 3.5 meters floor to floor.

5/ No new Government building shall have more than 25% glazing on any wall. No new residential or office or hotel building shall have more than 40% glass on their external vertical external "wall" surfaces. At least 60% of their external vertical external "wall" surfaces must be at least R-33 and opaque.

6/ Except where a 2/3 overmajority of of county Over-Senators elect it, no existing Government facility shall be demolished or renovated.

7/ Government shall not build monuments, nor shall it depict any monarch, president, war leader, political leader, or religious leader on its currency. Government shall however be permitted to allow the private sector to donate monuments and Roman-style fountains to the public.

8/ Government shall not squander its efforts on the construction of new housing. Government shall instead focus on assuring that an oversupply of new lots is always available. In order to keep housing costs low, government shall also make sure to have hundreds of pre-approved plan groups for every building site nationwide.

9/ Government shall be prohibited from building housing to house the poor. This is because new housing is for the rich and old housing is for the poor.

10/ Government splendor and unique marvel should always be regarded as a driven by stealing. More than anything else, government projects must be driven by practical needs, and not by aesthetics.

11/ No airport, building or public place in our nation shall ever be named after an unelected bureaucrat like John Foster Dulles airport, or the J Edgar Hoover building. These names speaks of the power that the CIA and FBI and intelligence apparatus wielded over DC and America. Instead these names are supposed to be reviled through all eternity like Benedict Arnold and the pedophile frontmen Caesars/Seizers who brought down democratic Rome for their masters.

12/ Every single one of the tallest 500 structures in our nation shall be required to fly our nations great flag, the main flag of freedom in this world in giant size and at full mast every day of every year, except when they are ordered to fly their flags at half mast.

13/ Government shall be prohibited from using building designs that are not rectilinear and based on straight lines and with 90° corners.

NR'142. RAILROADS

1/ All railroad and municipal transit companies and their infrastructure, rails, railcars, rolling stock, lands, equipment, easements and rights of way are hereby nationalized and made the property of the people to the extent the Senate wishes to claim these. There shall be no public hearings for the nationalization of past or future rail-based right-of-ways either intercity railroads, or urban/suburban rail transit systems. The nation's new rail system, township land, township roads, and other linear infrastructure (including township plants and utility lines and intercity roads and railroads shall go on the most optimally located locations. Those who currently own land near where the new townships

and township infrastructure will go including, road/rail infrastructure, utility lines, utility plants and other infrastructure shall get no input in the location of these things, or the valuation of the land, or the amount to be paid upon condemnation. There shall also be no right to challenge the valuations or the exchanges or the amounts paid for lands, or the routing in court. All land owners shall get 15% over market value in like property in exchange if their property is needed by for group infrastructure. All land in communities located in critical pass locations such as parts of North Adams Massachusetts are also subject to nationalization if they are in the way of any Hoosac tunnel, or its replacement tunnel through the ridge.

2/ All land, rights of way and easements that were ever owned by a railroad is hereby nationalized to the extent the Senate wishes to claim these lands. The tremendous corruption involved in the acquisition of this property, as explained in The classic book "The History of Great American Fortunes" by Gustavus Myers clearly explains that this land was almost entirely obtained by fraud more than a century ago, and then monopolistically used to wring extreme profits from the American people for merely transporting their goods from point A to point B. Therefore, all this land shall be subject to nationalization by the people and used to build a new US rail system. This shall include all the land near our current rail lines.

3/ To foster a more efficient economy, our nation shall work to maximize the use of rail due to its extreme low cost and environmental efficiency in comparison to all other means of transportation. For this reason, there shall be no taxation of nation's interstate rail system by Government, or monopolists, or cartels, just as there is no taxation of the nation's interstate highway and road system. The government may however charge for electric power to the rail system at a reasonable mark-up. Government may however charge up to 20% of the average hourly wage (per hour of voyage) where homeless people using trains as hotels a problem. Where there are few problem homeless people on trains, the maximum anti-homeless fee shall be 10% of the average wage per hour of voyage. Also, where non-travelers are a nuisance in travel stations, all people must either have a ticket barcode to enter, or they must pay 30-minute's wages to enter the station, and then they shall be given script for rail station purchases on that day.

4/ Our nation shall build-out a new 7.00-meter gauge, high-speed, steel-wheels-on-steel-rails system of at least 50,000-km.

5/ Noise-skirted electric railcars using raised or fenced railways are the safest, quietest, least polluting, least animal deadly means of transportation. For this reason, no new raised or fully fenced rail infrastructure shall be required to provide any studies about pollution, noise, or environmental considerations. All shall be exempt from all environmental reporting.

6/ Both the national and county governments shall have the right to run railways where they elect, and without any environmental approvals due to the extremely low environmental impact of railroad systems in comparison to automobiles.

7/ No company shall assemble or operate more than 1/200th

of the nation's railcars, or more than 1/20 of the nation's pulling engines. No company shall build more than 1/50th of the nation's rail lines, raised viaducts, or stations.

8/ No company shall assemble or operate both passenger and freight cars. No company shall assemble or operate both pulling engines and and freight cars.

9/ When our nation builds its new rail system, this system shall be optimized anew, with a fresh start and without any consideration about either connecting to the antiquated, centuries old rail system, or using its right-of ways. The only exceptions are connections to the old ports and entry points along our borders, and mountain passes where the most optimal route is already being used. However, where the new 21st century rail system is built adjacent to the old broken-down 19th century rail system, the old system must be torn up.

10/ None of the old narrow gauge rail or transit companies shall be allowed to operate any part of the new rail system. No workers for the old narrow gauge rail or transit companies shall be allowed to work in any of the new train companies. We shall start completely anew with our new 21st century rail system.

11/ It shall be a top priority of the Senate to establish detailed standards for every size of railcar, and every gauge of rail in the nation. Government shall not however establish standards for the interior design of our passenger cars.

12/ We shall not stop pushing for faster trains until our passenger trains are all going over 500kph through the plains of our nation.

13/ The road system is much more flexible, it must work around the rail system. In fact, all other systems must go either under or above the rail lines.

14/ There shall be no on-grade vehicles crossing for any of our nation's rail lines. It is simply too dangerous. If we can make our freeways non-stop, then we can do it with our rail network. All same-grade crossings anywhere in the nation shall be eliminated or gone around at the Senate's earliest convenience. Intercity railways and rail-based city transit shall always have right of way, and all other means of transportation, pre-existing or not, must be re-routed around the rail lines if one or the other must be re-routed. Ultra-high capacity and ultra-fast railroads shall not stop or slow down for any other form of transportation.

15/ Rail infrastructure shall pay for no other infrastructure. If there is any road or road bridge that needs work near the rail line, the road system shall pay 100% of the cost including any costs it creates for the railroads.

16/ All on grade rail lines shall be 100% fenced, and there shall be no on-grade crossings.

17/ Rail shall always get the right of way. It never even needs to slow down.

18/ There shall be no railway slowing because of neighbors or noise.

19/ Given the low cost of railcars, the rail system shall never be allowed to run with overcrowded trans. More railcars must be purchased, or the trains run more frequently. All rail lines and metro/subway lines shall have enough passenger cars so that there are enough seats on the busiest part of the 3rd busiest day of the year.

20/ No train shall sound its horn unless there is an obstruction

on the tracks or about to enter the tracks.

21/ Once our new train system is built, we will tax the use of hub-and-spoke airline systems, except for mountain area airfields that are significantly less well connected via surface transportation.

22/ All trains shall use reinforced concrete trestles, and the use of wood trestles or non-reinforced concrete trestles shall be prohibited everywhere in the rail system for all new tracks and all replaced tracks.

23/ The roads and railroads located in each county shall be maintained by that county. However, if these are not being properly managed and their condition impedes the national system, then the national government may intervene to make the system work properly. Then it shall send the bill to the county.

24/ To prevent collisions, all railways and transit trains must operate in a one-way manner. Either the two track sides loop, or they go back and forth on each side of the track.

25/ Both freight and passenger shall use the same 7-meter gauge tracks. However, some super-fast express routes may prohibit freight if this causes the tracks to distort excessively fast, or creates a collision hazard with relatively slow freight trains.

26 Government shall stop investing in rail transit in existing high density areas. All such projects and funding shall be halted immediately. Instead, all new rail based transit system and new cities must be built on low density, low costs surrounding our cities. Then government will make money on the value it creates for this land.

27/ The railroad system shall have no more liability for each death or injury than the road system has. Payouts for injury and death on the rail system shall be no higher than the road system.

28/ All trains shall be network controlled. The railcar and engine operators shall have no liability for accidents caused by the system.

29/ All railcars shall be inspected at least twice per year by government.

30/ Government shall indemnify rail operators for accidents that appear to be the result of sabotage, but not cosmetic vandalism.

31/ All train horns must be equipped with forward video recording. Train operators may only use their horn when there is an obstruction on the track that the horn will help with. Operators that violate this rule may be charged by the appropriate county with disturbing the peace. Repeat offenders may be jailed.

32/ The municipal trains will be electric because we are harvesting energy from one train slowing to directly power the start of other trains. But the intercity trains can burn fluid fuel, such as gasoline or diesel.

33/ People shall have a right to exit stopped trains and busses after after 1 hour. Provisions shall be made for this, and for them to get back on when the train resumes. All elevators shall have a phone in them.

34/ Neither Amtrak, nor any of its workers shall have any involvement, employment, or input in the new rail system that we are building for our townships. The Senate shall review the pay and benefits of all Amtrak workers, and the obligations of the company.

35/ All freight railroads crossing moving streams and rivers shall be sleeved with concrete sleeves. There shall also be berms near the water ways at the edge of the sleeve to prevent spilled liquids from reaching the waterway. After this, there shall be, no more regional or national shipments of toxic materials via the roadways. All must instead come by train.

36/ A full freight-car load is 9m x 24m x up to 9m height. Although the upper few meters will have to be lighter weight material like insulation. The standard sizes of freight-car shipment boxes shall also be used, and all shall auto-grapple together and to steel stabilization bars. There shall also be 4 different weight categories from super heavy to moderate, to light to weightless things like 60cm thick insulation panels. The Freight trains always go on top of all the other lineal infrastructure so there is no upper limit on tall light cargo. Except perhaps a series of upward weight envelopes. So many super heavy house shipments will move along at 50 kph (30 mph), while the normal freight might go more than twice that speed. The wind resistance and weight of the rooftop cargo is not important. So many stand-alone 2- story concrete houses, and even light weight third stories will be delivered ready build, turn-key furnished. These will go on machine drilled foundation posts. The standard box sizes are:

$1/2 \cdot \text{car} \cdot 12\text{m} = 9\text{m} \times 12\text{m}$

(a 1,200 sq.ft or 110m apartment)

$1/2 \cdot \text{car} \cdot 24\text{m} = 4.5\text{m} \times 24\text{m}$

$1/3 \cdot \text{car} \cdot 8\text{m} = 9\text{m} \times 8\text{m}$

$1/4 \cdot \text{car} \cdot 6\text{m} = 9\text{m} \times 6\text{m}$

(a 3-car garage, or 600 sq.ft or 55m apartment)

$1/4 \cdot \text{car} \cdot 12\text{m} = 4.5\text{m} \times 12\text{m}$

$1/4 \cdot \text{car} \cdot 24\text{m} = 2.25\text{m} \times 24\text{m}$

$1/5 \cdot \text{car} = 9\text{m} \times 4.8\text{m}$

$1/6 \cdot \text{car} \cdot 4\text{m} = 9\text{m} \times 4\text{m}$

$1/6 \cdot \text{car} \cdot 8\text{m} = 4.5\text{m} \times 8\text{m}$

$1/6 \cdot \text{car} \cdot 12\text{m} = 3\text{m} \times 12\text{m}$

(About the size of a 2.4m x 2.4m x 12m container.)

$1/6 \cdot \text{car} \cdot 24\text{m} = 1.5\text{m} \times 24\text{m}$

$1/8 \cdot \text{car} \cdot 3\text{m} = 9\text{m} \times 3\text{m}$

$1/8 \cdot \text{car} \cdot 6\text{m} = 4.5\text{m} \times 6\text{m}$

$1/8 \cdot \text{car} \cdot 12\text{m} = 2.25\text{m} \times 12\text{m}$

$1/8 \cdot \text{car} \cdot 24\text{m} = 1.1\text{m} \times 24\text{m}$

$1/10 \cdot \text{car} = 9\text{m} \times 2.4\text{m}$

$1/12 \cdot \text{car} \cdot 6\text{m} = 3\text{m} \times 6\text{m}$

$1/12 \cdot \text{car} \cdot 8\text{m} = 2.25\text{m} \times 8\text{m}$

$1/12 \cdot \text{car} \cdot 12\text{m} = 1.5\text{m} \times 12\text{m}$

$1/24 \cdot \text{car} \cdot 1 = 9\text{m} \times 1\text{m}$

$1/24 \cdot \text{car} \cdot 2 = 4.5\text{m} \times 2\text{m}$

$1/24 \cdot \text{car} \cdot 3 = 3\text{m} \times 3\text{m}$

$1/24 \cdot \text{car} \cdot 4 = 2.25\text{m} \times 4\text{m}$

$1/24 \cdot \text{car} \cdot 6 = 1.5\text{m} \times 6\text{m}$

$1/24 \cdot \text{car} \cdot 8 = 1.1\text{m} \times 8\text{m}$

$1/48 \cdot \text{car} \cdot 1 = 4.5\text{m} \times 1\text{m}$

$1/48 \cdot \text{car} \cdot 2 = 2.25\text{m} \times 2\text{m}$

$1/48 \cdot \text{car} \cdot 3 = 1.5\text{m} \times 3\text{m}$

$1/48 \cdot \text{car} \cdot 4 = 1.1\text{m} \times 4\text{m}$

$1/48 \cdot \text{car} \cdot 6 = 0.75\text{m} \times 6\text{m}$

$1/48 \cdot \text{car} \cdot 8 = 0.55\text{m} \times 8\text{m}$

$1/96 \cdot \text{car} = 2.25\text{m} \times 1\text{m}$

$1/200 \cdot \text{car} = 1\text{m} \times 1\text{m}$

1/500•car = 1m x 1m

(1.4m high)

It shall be thought important that the international shipment system do two things to max-out aid to the poorest parts of the world:

a/ We should use railcars at the edge of being oversized.

b/ We should divide those railcars into many tiny little pieces with tiny little prices.

c/ Fair value means the cost of towage energy plus 17-year equipment depreciation, staff cost, and the cost of each transaction for the system.

37/ The entire inter-city rail system and all municipal metro trains Shall use 7.000-meter gauge rail lines that are all checked by the army 10-times a year for:

a/ Gauge (track spacing)

b/ Outflex when the brakes are engaged.

c/ Smoothness of ride.

d/ Noises.

We shall robots that are expected to cover the entire system 10-times a year, fixing all faults. We shall also have dispatch robots for repairing emergency situations.

38/ Disaster preparedness demands that every railcar, passenger and freight, and municipal metro, and municipal delivery shall use the same 7.000 gauge railcars. All shall be identical in every way, except that some railcars shall be self-propelled, and others not, and the brakes on our ore cars and building block cars will need to be stronger than those on the freight cars for light weight freight. Steep terrain and spline trains are also allowed to be 3.000m gauge.

39/ We shall no longer use overhead catenary lines. Instead, we shall use 1x 5cm copper bands (upright) that are followed by greatly redundant copper brushes, and or copper spatulas. The following brushed/ spatulas and the copper band inserts will have to be replaced every couple years. The conductors being 23-ft apart and at the outside of the viaduct will be hard to accidentally touch. In the stations, there shall be Singapore style sliding glass MRT doors that keep people from coming in contact with the high-voltage tracks when it is not covered by a metro railcar.

40/ One of the most important things we can do to control construction and operating costs for our metro and train systems is to use nationally-standardized massive-quantity components to build our system. This applies to the railcars, the locomotives, the H-viaduct blocks, the rails, the rail electrical system, the bridges, the generator plants, the electric recapture, etc. Under this scenario, there is absolutely no reason that our rail cars should not cost any more than our dump trucks, and rental car fleet vehicles: pound per pound, or passenger per passenger. Also, when we take into account the immense waste and stealing that occurs when we build unique bridges and freeway overpasses, it might be cheaper just to build universal raised viaduct than a few unique bridges.

41/ Every meter of rail line on the bid sheets for every rail system in a crowded region shall:

a/ Have a viaduct that runs at least 3-meters over grade, not counting the height of the rails themselves.

b/ Have dynamic load footings that are an extra 33% under the usual depth for the soil heave line.

c/ Have precipitation skirting that is at least 1.5 times the

depth of the footings.

d/ Have the cubic meterage of soil cut (including back-cuts) expressed for that meter of line.

e/ Have the amount of additional viaduct H blocks expressed in square meters of viaduct line.

f/ Have sub-totals for each 10-meters, 100-meters, and 1,000 meters.

g/ Have over 200 reinforced concrete bridge and steel suspension bridge designs.

42/ All Metro doors are supposed to close slowly and hurt quite a bit when they bite the people trying to make it through at the last moment.

43/ No combustible or wood rail trestles shall be used either for new railroads, or for repairs. Also, no gravel may be used for rail foundations. All existing rail track gauges (the distance between the tracks) narrower than the 2.2 meters must be replaced with track gauges wider than 2.2 meters.

44/ Our nation/continent crisscrossed by rail lines just like Europe and just like it once was before OPEC infested our group mind and got us to cancel our rail system.

45/ It shall be thought that there is an obligation on the part of national government and to make the nation accessible at a certain scale and to link all of the counties by high speed rail.

46/ Our nation shall have at least 100-km of track that is movable and self propelled and can temporarily extend the rail system up to 50 miles into any area on pre-graded dirt roadways.

47/ All intercity and local metro trains shall be required to have operable windows in case the air-conditioning, or the power system malfunctions.

48/ Bus drivers and bus companies shall never have any liability for letting people over age 13 get on or off a bus in between stops. They are supposed to do this where it is not dangerous and where the bus is already stopped

49/ No public bus for use by the general public shall kneel, or have other special facilities for people in wheelchairs.

50/ All shipping charges shall be by volume and weight and shall remain constant on all shipments within each system without regard to:

a/ The size of the customer's business, or how much business the shipper does with the shipping company.

b/ Size of the individual shipments.

c/ Advanced purchase.

d/ Direction of travel.

e/ The nature of the goods carried, except for fragile goods and goods that might cause damage. A fair increment must however be charged.

NR'143. ALL RAILROADS ARE FREEWAYS

1/ All railways and public transit infrastructure, lands, and former lands are hereby nationalized and made the property of the people to the extent the Over-Senate elects to claim ownership.

2/ Just as with our nation's vast and hugely expensive road and freeway systems, people may operate their cars on our nation's railroad systems for no charge.

3/ All railroad vehicles must conform to national standards, and they must all be registered and use transponders. All must be system-driven, network-interfaced, maintenance-

certified, electric-metered vehicles with computerized coupling and decoupling. All must be capable of 20-km of self-propulsion on tires when disconnected from the electrified track. All operators, if any, must be licensed. The national Senate shall impose other conditions as it elects.

4/ At least half of our road spending will go to building a new and vastly more efficient 21st century railroad system to replace most of the inefficient road system. Then, when we the people build the new rail system, we will also ask for nothing from the people for using their new super-efficient railroad system. All railcars using the rail-roads shall use these rail-roads for free, just as people use the flat-road system for free today. Until today, the government has been providing an immense national flat-road system for free. This includes street lighting, police, surface cleaning, landscaping, and repaving among other things. With the railroad system, we will provide different things that will cost perhaps more per vehicle, like towing, but much less per passenger.

5/ Just as we provide the roads for free today, the UM shall not seek to profit-from, or recover the cost of building or maintaining its rail infrastructure. All government owned rail infrastructure shall be priced at built marginal operating cost, with no money charged for payback of the cost of right of way acquisition and system build-out, including viaducts, bridges, stations, and locomotives. Users shall only bear the cost of pulling, or the electricity they use for their own engines, and the cost of healthcare resulting from injuries to those traveling via the railway system, exactly as we will do with our roadway system. Users shall also frequently supply their own railcars just as we do today with our road system and private bus operators, who share the routes with municipal busses. Whichever approach works best.

6/ No group or nation, whether in the UM or PU, shall ever be permitted to block, unnecessarily delay, threaten, or extort money or concessions from the UM for either installing rail-lines in its land, or for using those lines.

7/ If congestion develops, we shall impose per train congestion pricing.

8/ On-grade railway crossings shall be prohibited entirely. All flat-roads must pass under all railroad lines, which will frequently be on raised viaducts anyway.

9/ We shall fence or elevate our government's non-stop railways just as well as our government's non-stop freeways. Those who stray into the way of the traffic, in either case shall be considered 100% responsible for their injuries. Nobody would think of suing the freeway system or drivers if they suffered injury because they tried to cross a freeway. Therefore, nobody should ever be able to sue the railway system or any railway operator for an injury sustained while venturing onto raised or fenced tracks.

10/ Use of the flat-road system shall be taxed at true cost, with all vehicles bearing their fair share of road work necessary to keep the surface smooth. Likewise, all railcars shall pay their fair share of the cost of track adjustment robots that turn the bolts that keep the track smooth. They shall also pay their share of the cost of the robots that spray anti-corrosive oil on the lower parts of the tracks, just like the flat-road vehicles must pay for repairing potholes in their roads.

11/ The national Over-Senate shall elect a fixed and prorated towage charge per 100-km for all cargo cars, and another

fixed price per 100-km for high-speed intercity passenger cars. Thus all non-island passenger routes in each continent shall pay the same rate for transportation based on distance. Thus all non-island cargo routes in each continent shall pay the same rate for transportation based on distance. The Over-Senate shall adjust these charges from time to time.

12/ Government shall provide the rails, towage, stations, ticket verification staff, and transaction infrastructure at cost. Private railcar operators will offer many types of railcars on these routes.

13/ All railcars must move according to the schedule assigned by the system, and all must join with other cars on existing trains of cars unless there is no other traffic.

14/ To reduce freight train crime, we shall:

a/ Try to always keep our freight cars moving in high crime areas.

b/ Use containers that have no place to grab on to.

c/ Use raised viaduct around our cities.

d/ Load all our shipping containers on our railcars with their door sides facing inward for domestic freight. This includes the end doors.

e/ Perhaps we will need booby-trapped cage/sleeves (shoebox bottoms) that are lowered over the entire railcar in high crime areas. Some of these might also have armored turrets for security people to ride in.

15/ Train and transit use shall not involve registering the identity of the people on the trains.

NR'144. TRANSPORT

1/ Businesses that engage in rail transportation, trucking, conveyance, or delivery for others shall not operate in manufacturing, distribution, retail, raw materials, or commodity production. They also cannot discriminate against customers. All equally flammable shipments pay the same rate.

2/ All ports, airports, rail stations, bus stations, rail lines, roads, bridges, interchanges, terminals, boarding gates, boarding docks, rain platforms, and related transportation boarding or loading facilities shall be built, owned, operated and maintained by the counties they service, and none of this may ever be sold or leased. All prior sales and non-government ownership of these facilities shall be void. They shall be absurd. Like someone having an official deed for the Brooklyn Bridge.

3/ Our nation considers all private ownership of common pathways and interchanges as a potential sphinx. Thus we shall prohibit all private ownership of common pathways and interchanges.

4/ Users of the road system shall bear the full cost of operating the road system. This includes maintenance, required system upgrades, police, lighting, cleaning, and the cost of healthcare resulting from injuries to those traveling via the road system. These shall be charged by using a combination of electronic road pricing, vehicle registration fees, and fuel taxes.

5/ Road maintenance being a thing that is more than 80% caused by heavy trucks with stiff suspensions, these vehicles shall pay their fair share of road maintenance costs via the electronic road system. The heavier trucks shall also pay

more than the lighter ones. The transportation of military vehicles in time of peace shall not be exempted from the payment system.

6/ Government shall not tax any transportation system to recover the cost of build out. The only time government may tax a transport system or the goods or people moving around in it is for:

a/ Congestion pricing, to convert congestion waste into tax revenue. We shall err on the side of maximization this type of “free-revenue” taxation until there is no congestion. and
b/ To recover the actual cost of operating the system, direct and indirect. We shall err on the side of minimizing this type of taxation so we do not stifle industry too much.

7/ Transportation companies shall be prohibited from being subsidiaries and from having subsidiaries.

8/ Transportation carriers, air, sea, road, and railroad shall not discriminate between customers. All non-hazardous cargo shall move by the same rate in each company's network. All flammable cargo, and all hazardous material of each category shall move by the rates established by the government.

9/ Shippers and other transportation carriers shall not be allowed to give preferential rates to big customers. Our nation shall not allow discrimination against its new baby businesses.

10/ Transportation, communication, delivery, and commercial services companies as well as information exchanges, bulletin boards, video posting boards, social networks, facebook, tweeting platforms, and any monopoly or oligarchy shall not be permitted to ban verified citizen users from using their services without a court order, or criminal charges against that person arising out of their use of the service.

11/ No airline shall fly more than one aircraft between two cities unless there are at least 2 other airlines flying that route on those days. This shall not include special irregular charter flights. Shell companies shall not count. Collusion to evade this rule shall be a felony. No airline shall provide more than 4% of the nation's air travel.

12/ No rail company shall provide more than 0.5% of the nation rail cargo needs, or more than 1% of the nation's rail passenger needs.

13/ No trucking company shall provide more than 0.5% of the nation truck cargo needs.

14/ No bus company shall provide more than 8% of the nation's bus needs.

15/ No sea-shipping company or international rail company shall provide more than 2% of the nation's international shipping or rail capacity. No foreign nation shall supply more than 3% of our nation's sea-shipping, or more than, 3% of our nation's international rail transport services. This shall include “third nations” used to evade this clause. This shall be seen as a way to gently encourage the break-up of the largest nations of the world.

16/ People arriving by air for the purposes of international transit do not need to clear immigration, but are still subject to security inspection and customs inspection and arrest if they have an outstanding warrant, or contraband.

17/ The railcars shall be owned by vast numbers of people. Thus the market will assure both an adequate capacity, and a proper fleet where companies compete for business by

offering nice rail compartments. However, the system for scheduling and guaranteeing the safety of the cargo and passengers, that will be by government. Also, railcars that are hired out for carriage on specific routes cannot leave that route without their cargo being reloaded. So the cargo is always totally safe. Nobody gets to go near it.

18/ Until our nation has fully built-out the following, Government's spending on these things shall exceed Government's spending for roads, highways, and airports:

a/ National high-speed, 7-meter-gauge rail system.

b/ A robotic freight handling and droid delivery system, along with pathways for the droids.

c/ A national automobile system that is entirely driverless and system driven.

19/ All transportation projects not yet started are hereby canceled. Those projects already underway shall put their lines and lanes in order, if applicable, and shut down.

20/ Each aircraft shall pay the national government one cent per person capable of hearing aircraft noise over a certain decibel threshold, and a tenth of a cent for aircraft noise over another decibel threshold. This will not affect some airports at all, while others it will cause to be entirely shut down for smaller aircraft.

21/ Our nation's Senate and its official courts shall be the exclusive arbiter of who will be deprived of the right to fly in airplanes in our nation, and who is not allowed to leave or enter our nation. The nation's various transport providers must file complaints against people using little brother video, because everyone is supposed to stop what they are doing and start filming when there is a commotion on a commercial airplane. The people where alcohol is an issue, can have their license to fly reinstated as long as they have been entirely off alcohol for a year. The people with other public incidents or a criminal record may lose their right to fly for life. Even individual airlines shall be put on person on any sort of no fly list (even for only their airline) without a court order. Either the person can fly, or they can't. Also, all immigrants that get put on a no-fly list, go on for life. Immigrants should also have a lower bar for being put on a no-fly list. Airlines shall not be allowed to have their own idiosyncratic rules in regard to no fly list and many other things. Airlines must take every passenger's business that's not on a no fly list.

22/ When citizens are away from home and come to find out that they are on our nation's no-transport list, they shall be allowed to fly home unless they create a second disturbance. Except for people on the no fly list for airline misbehavior, and terrorist affiliation, full citizens shall only be denied the right to travel upon arrest for credible accusation of a crime, or a one-person court-order.

23/ Government shall have no right to say to masses of citizens that they shall not travel, or that they must pay taxes or some ecological offset monies to travel and move around. Or that they must get intrusively tested if they want to travel. Quite the opposite, government must work to make it as easy, cheap, fast and enjoyable as possible for the people to move around in their community, and their world. Those ordering or even suggesting that the people should not to go outside on color of authority shall rightly be jailed.

24/ Except for fire retardants dropped on fires, and Senate-approved spraying of pesticides, cloud seeding materials, and

other Senate-approved spraying, it shall be a crime to spray or disseminate any fluids or powders from aircraft or drones.

25/ All commercial drivers, including delivery drivers, taxi drivers, and ride share drivers shall be required to verify identity with the police before working as a driver. They shall also have background checks of all drivers, whether they drive people or goods around. Also, all taxi passengers shall be ID verified by Government which shall only display the first name to the driver unless there was a crime. All taxis and ride share vehicles shall be prohibited from having mechanisms to either prevent the passenger from using the window, or to prevent the passenger from opening the door.

26/ All passenger sea vessels shall have a suitable number of drones to carry large life preservers and survival kits out to people who fall overboard. Some of these might also to drag the partly submerged people back to the ship.

27/ All aircraft housed in a building, and all aircraft that will be unused for more than 2-days (other than fighter jets for scrambling) shall have their fuel drained via the fuel dump line into a fuel removal and return tank. This tank must be kept a safe distance from the building. Where de-fueled aircraft are kept in non-combustible concrete roofed hangers, there shall be no fire suppression system required.

28/ The Senate shall investigate the various charges for all ports in the nation, including sea ports as well as air ports.

29/ The Senate shall develop a county recorder system app to help assure safer hitchhiking.

30/ Background checks shall be required of all commercial drivers, whether they taxi drivers or delivery drivers.

31/ There shall be no restrictions on:

a/ How far citizens may travel in a year or in a teneth.

b/ How far citizens can commute.

c/ How much fuel or CO2 a person uses in a year or a teneth.

x/ All of these things shall be thought an overreach on the part of government.

32/ Effective immediately all urban remodeling in existing car based cities shall be halted forever. Effective 2029.01.01, there shall be no more remodeling or redesign of existing urban roads.

33/ Effective 2030.01.01, all container handling at all our nation's ports and rail heads must be fully robotic and automated. Trucks with rubber tires will only be used for areas that cannot be reached by our nation's extensive train system.

34/ Government shall provide 10% co-pay insurance for our nation's buses and trains, so long as they all pass their regular equipment and driver inspections.

35/ All trains, busses, and aircraft shall have a countdown timer until they depart. This includes metro cars, metro trains.

NR'145. ROADS AND VEHICLE CHARGES

1/ All vehicles used on the roads shall be required to have an electronic payment systems and an anti-collision location transmitter. These transmitters shall be interchangeable and thus mostly anonymous.

2/ In the 20% of our nation with the highest crime rates, government may require that all vehicles and all drivers be tracked.

3/ All vehicle shall pay a road tax and insurance for each mile

of use. Government shall install electronic road tax gantries in many places to electronically charge anonymous or non-anonymous driver accounts. The prices will vary depending on the congestion. The price shall be high enough that all roads operate near their maximum carrying capacity instead of suffering traffic jams that profit nobody. The money captured by this electronic road tax shall go entirely to the county, and the national government shall take no share. Also there should not be fees to enter area. Instead, the roads should be priced to maximize carrying capacity in terms of vehicles per hour. Also, this is one of the most cost-effective ways to obtain tax money. Where we have a form of waste, and we convert that waste into tax money.

4/ Government shall be prohibited from charging electronic road taxes where and when the roads can flow well without them.

5/ No road shall be widened unless it has had an electronic road taxation system in place for one year to manage congestion. Vehicle charges are supposed to change a number of times each day to manage flow.

6/ All vehicles, pedestrians and animals on the road system or potentially on the road system shall be equipped with transponders so they can communicate their position, speed and direction with each other, and with the road system.

7/ All vehicles used on the road system shall be equipped with an interchangeable cash card reader and cash card with sufficient money for parking, tolls etc.

8/ There shall be no special paid lanes on the nation's roads. Either the entire road is free, or all of its lanes are paid.

9/ Minor moving violations for human-operated vehicles where the maximum penalty is less than 3-day's pay shall be adjudicated over video.

10/ After 2026.01.01, all remaining semaphores shall have optical vehicle recognition systems and optimizing computers so the nation's intersections never go unused while are people waiting for a light to change to use them. All Semaphores shall have audio and visual cues. The audio cues shall play through the car PA system in the same way that SMS tones did. When drivers approach a light that is red or turning red, the system send one kind of alarm that escalates in volume until the driver reach the red intersection. There shall also be another audio queue for when the light is about to turn green. These sounds gives us better intersection clearances.

11/ After 2026.01.01, every car on the system shall have both front and rear drive cams. When a car's cams records video of people driving in a clearly unsafe manner, or an accident, the video shall be admissible for traffic court. When the cam video does not clearly show who was driving the car, the owner must either admit that they were driving or sign an affidavit as to who was driving their car.

12/ Cities suffering from traffic congestion can limit the use of commercial and doublewide vehicles on certain routes at certain times of day. This may apply to all vehicles that are not conforming single-wide vehicles or it may allow doublewide busses.

13/ Vehicles with 11 or more seat positions for passengers shall be considered busses.

The vehicle allocation system shall always give priority to single-wide vehicles and busses over other wider vehicles.

14/ The vehicle routing system shall prioritize conforming single-wide vehicles and busses over all other vehicles except emergency vehicles. Non-conforming vehicles may be subject to delays, convoying, and pre-scheduling.

15/ Where truck traffic causes congestion delays on the roads, the driverless trucks must be used at night and when the roads are not congested. The humans going around in society shall never be delayed by freight unless this is unavoidable.

16/ When congestion is a problem, the non-conforming uses have to start paying higher and fees during peak periods.

17/ So that people avoid using commercial and doublewide vehicles for transportation, we will do the following:

a/ Conforming single-wide passenger vehicles and busses get priority where there is congestion. All other vehicles get sidelined during where there is congestion.

b/ All traffic that isn't single-wide or a bus pays much higher road use fees in general.

c/ All non-conforming vehicles get painted bright colors, so they look like service vehicles and people avoid using them as personal vehicles.

18/ There shall never be a prohibition against personal automobiles for people living in the outskirts. These vehicles may only be discouraged by high use fees, high parking fees and high road tax/ ERP charges.

19/ Government shall not be allowed to discriminate either in favor or against one sort of vehicle power system: Be it gasoline, diesel, electric or compressed air, unless one sort of car is significantly more deadly than the rest.

20/ There may be taxes on individually owned vehicles, however, there shall be no taxes on individually owned vehicles for the benefit of ecology. Vehicle speed limits shall never be lowered primarily to conservative energy as we mistakenly did with the 55mph speed limit. Vehicle speed limits may only be lowered because of safety.

NR'146. ROAD VEHICLE FLEET

1/ Over a million Americans have died in car accidents over the past 30-years and millions more have been horribly injured. To encourage the development of a system that promises to stop the ongoing vehicle death epidemic entirely, government shall indemnify the computer and network driven car industry for honest failures on approved tests.

2/ In Q1 2024, Tesla auto pilot was reportedly 11 times safer than human operators. Now the right of the people to be safe from vehicle accidents trumps the right to continue using outmoded vehicles. Once the current human-driven system becomes statistically more fatal than the new system-driven car network (which it already has), the use of the old inefficient and dangerous human-operated vehicles shall be phased out as soon as practical.

3/ The new system-operated road vehicle system will eventually be much safer than our air-transport industry. Also, instead of driving 5,500lb. SUVs we shall drive 480kg single-wide vehicles to start. So to start, we will cut fuel use and emissions and vehicle costs down by around 80%. So in addition to being much safer, the new system will cost about 1/5 as much.

4/ All new cars shall have the newest and most precise snap

to line technology, as well as lane following tech. This will enable us to eliminate the waste of excessively wide lanes and add more lanes to our nation's roads.

5/ All new human operated vehicles shall have at least two front-facing, and one rear facing high definition video camera and a black box that records at least 12-hours of driving before overwriting. The black box shall also record the speed of the car, turn-signal, and brake-light activation, and accelerometer readings with the video. When the black box records a collision, the prior 10 minutes and subsequent 10 minutes of video shall be sent to the recorder's office. All new human operated vehicles must have a low-resolution asleep-at-the-wheel/distracted driver camera and alarm. This can be turned off. All driving cameras shall have GPS and these can be kicked into high definition mode with the word bookmark. Then the camera records 10 minutes in high definition until the driver says bookmark end. When we have video of drivers committing road violations, people can send this clip in to the recorder with relative anonymity to the other driver. And these clips will be admissible in court so we can easily enforce bad driving, speeding, reckless driving, etc.

6/ Collision safety standards for single-wide system operated vehicles shall presume no interaction with heavier vehicles. This is because all non-conforming traffic will be sent in pods, apart from the conforming single-wide traffic.

7/ By 2027.01.01:

a/ All new cars shall be equipped to read and navigate by means of lines and barcodes painted on the road in addition to reading micro-chips in the roadways.

b/ There shall be a multi-redundant automobile routing and collision avoidance system. The primary system shall use the county recorder's master computers operating in a cellular design. The secondary and tertiary backup systems use vehicle based cameras, sensors and onboard computing.

There shall also be a human override stop and pull over button. There may also be human controls for where the vehicle gets stuck or the vehicle's parking position must be adjusted manually, or the vehicle must be turned around. The system shall be designed so that all road vehicles move around without a human operator, except as a backup.

c/ All of the highway and arterial intersection red/green control lights in the nation shall use cameras to count the number of cars waiting and approaching, so the light timing can better optimize traffic flows.

d/ Where personal vehicles impede the flow of busses, the busses and shared vehicles shall get priority.

e/ All new vehicles shall be equipped to couple and de-couple on highways at highway speeds.

f/ All roads in the nation shall be re-lined for single-wide 1.83m lanes. Double-wide commercial vehicles will use two lanes at once. These vehicles may be up to 3m (10ft.) wide, a bit wider than today's 2.44m (8ft.) wide shipping containers. Triple-wide vehicles will use three lanes and may be up to 16' wide (4.88m). Quadruple-wide vehicles may use four single-wide lanes. and may be up to 22' wide (6.7m). These system-driven, slow moving, triple-wide and quadruple-wide delivery vehicles may only be used on the roads between midnight and 6:00am.

g/ All vehicles shall have identical crash safety functionalities.

h/ All movement shall by destination location number. All

parking places have a location number.

i/ So humans can maneuver in tight places there shall be two small hand controls. On the right goes a one-handed torsion resistance steering wheel. On the left, a bending resistance left paddle. Leave either alone and the wheels go straight and the vehicle stops. Lean forward on the paddle and the vehicle first inches forward, and then it begins to go faster and faster over 6 seconds until it hits 8kph. The maximum speed can also be set lower for safety. Other than this, the vehicle must be system operated.

j/ No new vehicles shall have projecting side mirrors. All shall use video instead.

k/ The maximum dry weight for new conforming single-wide passenger vehicles shall be 480kg. And as our self drive system becomes safer we will cut our vehicle weight similarly until our vehicles never crash and there is no reason for any crash safety features, or even metal skins. This is not very different from the weight of a 1960's four-passenger Fiat 500 car (530kg). If the Senate elects to use a lower maximum weight it may.

l/ The maximum width for new conforming single-wide passenger vehicles shall be 1.22m (4-ft.), the maximum height shall be 1.4m.

m/ All single-wide vehicles shall weigh the same, go the same speed, have the same horsepower, and all shall use identically-sized tires, wheels, and lug-nut configurations. The specs for the suspensions, and brakes shall also be the same.

n/ The weight and standards of conforming single-wide passenger vehicles may be lowered over time, however not more frequently than initially and once every 5-years.

o/ All conforming single-wide vehicles shall have identical height bumpers on all four sides. These shall be 20cm-tall steel base, that is vertically flat all around, centered at 72cm above the ground.

p/ All conforming passenger vehicles for each half-decade shall use interchangeable wheels, tires, lug nuts, lug nut configurations, brakes, lights, bumpers, engines, drive trains, maintenance requirements, electric current, drive computers, computer interfaces, and the operating system among other things the Senate may wish to add. The interior, the exterior appearance, the passenger compartment, the instrumentation, guidance, and chassis shall vary.

q/ The 20-cm steel flat-bar of both front and rear bumpers shall have a minimum 10-cm gap between the body of the car and the inside of the steel bar so that minor damage to bumpers is less obvious. The side bumpers should be invulnerable to the door dings that have caused much social strife. Also, all bumpers shall be covered in a flexible plastic cover that can be fitted and micro-adjusted over slightly bent bumpers.

r/ There shall be a single steel band as a structural bumper in front of the doors, and another in the back. These shall screw attach using a number of paired posts, in the same configuration for all standard single-wide vehicles. The doors shall have their own bumpers at standard height. There shall also be a steel roll bar of sufficient strength, but aside from these and the air bags, the rest of the car can be made ultra-light. All the bumper posts are not really posts, but a double row of appropriately flexible springs. that attach, one pair after

another to the bumpers. The 10-cm projection will also give people a step to stand on if automation fails.

8/ Our nation shall switch to a road vehicle system optimized for single-wide vehicles. These are 4-foot or 1.22 meters wide and tall standard passenger vehicles that are system driven/ navigated. This system will primarily accommodate the needs of these single-wide vehicles. These cars shall all electronically snap to 6-foot or 1.8m wide and 1.8m tall Single-wide clearance lanes. It is expected that over time, the 1-foot, between-the-lane buffer zones will grow unnecessary. Then the height and width of the vehicles will be allowed to increase within the confines of a standard lane. If 6-foot lanes are found to be too wide to begin with, to accommodate 4-foot cars, the Senate may elect to use narrower lane sizes.

9/ A large part of the system will only accommodate Single-Wide vehicles. But much of the system will also accommodate 10-ft wide, or double-wide vehicles with no height restrictions. Less of the system will accommodate 16-ft wide triple-wide. Less of the system will accommodate 22-ft wide quadruple-wide vehicles, and even less will accommodate 28-ft wide quintuple-wide vehicles.

10/ The Senate shall have the power to reasonably ban the use of non-emergency, non-essential multi-line vehicles at more or less daily times it finds necessary in times and places of traffic congestion.

11/ The rail system shall deliver concrete building blocks the size of whole apartments made by the mostly regional house-casting system. All the rail heads will have gantry cranes for transferring building blocks, cargo containers and heavy equipment to tank-trucks for carrying the heavy cargo the last 100km. House moving shall ideally move mostly on dirt roads when possible (in places with a dry season. In fact all of the country that is dry enough that we can have dry dirt roadways (even raised ones) for over 20-days a year, shall now have a dirt road system for this purpose at the periphery of all of our communities.

We shall now have municipal dirt roads systems around the periphery of our communities. These shall be dragged when needed by the government. Dirt roads shall be thought to be more ideal for moving building blocks and equipment than paved roads, due to the wear that the heavy loads will cause to the roadways. The tank trucks that use dirt roads, shall all have steel treads with blades optimized for dry dirt travel. The ones used on roads must have rubber tank treads. The dirt road system shall also be used for hiking, jogging, mountain biking and off-road vehicle driving, all on the driving system using road transponders, just like on the paved road system.

The inner ring road is paved, the outer 2 ring roads, at least to start are unpaved. The first dirt ring road goes at the far limit of the 1-for-1 loop bus loops, and the next further out ring road goes at the limit of the 2-for-1 outer bus loop. At the ends of the loop roads (about 1-2 km out past where the paving turns and head back to the town) At the limit of this about 3km out from the train station is where the first dirt ring road goes.

The dirt ring roads goes on a wide berm that are one story up. There is a doublewide rectangular concrete tunnel through each berm creating a double-wide, or two-lane-wide tunnel though the dirt road berm. This tunnel shall be 12-feet

wide and 8-feet tall. The top of the dirt ring road berms is supposed to be 10-meters wide and the slope is supposed to be optimized for the most comfortable stairway with one 1-meter landing. All around our radially designed townships, our dirt road berms will be designed to help reduce flooding. The loop roads are going to be about 1 to 2 km out from the 0.6km diameter paved main ring road. So the dirt road will be about 2 km radius out from the train station, and it will have many dirt ramps on both sides into the spaces in between the loop roads.

12/ The doublewide vehicles for trucks and busses will probably have at least 8 different standard double-wide drive-frame sizes, and maybe there will be at least half as many triple wide drive frames and maybe there will be 4 quadruple-wide drive frames. But given that all our single wide vehicles will be going the same speed in packets, we should probably have one identical drive frames and vehicle weight range for all our new single wide cars. Every single one uses the same engine, the same drive frame, the same brakes, wheels, tires, spare tires, suspensions, and bumpers. They all have identical suspensions and all have the same identical road handling. The passenger compartment is however totally variable up to 1.22 meters in height and width. This is intended to make single-wide underpasses cheap and easy and plentiful. The system routes the bigger vehicles through one of the tall and wide 10-ft wide and x 10ft tall Boulevard tunnels. The other bigger loads must go around the community.

The single-wide cars will be very light because their top speed might only be 60kph (but with no stops) and the roads will all be super smooth. And the maximum travel distance (round trip) will be under 5km to 8km for well over 90% of all townships dwellers.

13/ Double, triple wide and quadruple wide vehicles shall not be electric. All the new vehicles that are used outside of our townships must be diesel. All of the service vehicles that enter townships, if they are not single-wide, then they may be diesel.

14/ If we are all driving the same cars, then they can use their bumpers to shoe-into bays on the trains. All the single wide cars which eventually will weigh maybe as much as a two mopeds, and cost about as much. These single-wide 4-ft wide x 4ft tall cars auto-park on the trains, maybe in 5-levels, one car per side of the train. You can either send your car by itself ahead from your township, or ride in it. But most battery cars will only have a limited range for getting people to and from their rail station.

15/ All existing self-driving car technology needed by the public shall be ubiquitized for fair value.

16/ All complete trucks (and later automobiles) shall be subject to luxury tax of 20%. However when automobile manufacturers sell a drive frame, and other manufacturers sell components, there shall be no complete vehicle tax. Also, the businesses that sell drive trains must remain separate from the businesses that sell automobile components. Also, there will be specialized mechanics that put the components together at the final local assembly and collection point for the new vehicles.

17/ Once we have self driving electric cars that operate as interchangeable system operated vehicles, we realize that all

cars should have the same brakes, drive train, engine, weight and tires. Therefore, we imagine a fleet of single-wide cars (at least) that are all identical and tiny.

18/ The following changes will help the US to revive its vehicle manufacturing industry while it transitions to a system of super-safe, self-driving micro cars without significant crash safety measures, because these are no longer needed due to the extreme reliability of the computer operated system:

a/ Standard, open-source drive frames.

b/ The ending of intellectual property protections for repair parts.

c/ Standard open-source inexpensive VW1600-style parts. (or perhaps the US domestic car parts company Mopar.)

d/ Mandatory 500,000 km design durability engineering.

e/ Because vehicles will be delivered to market as open-source interchangeable naked drive frames, the added value of OEM equipment will be nil. Also, all the parts will be cheap because they are all open source and made by many competing companies.

f/ Having means to load our cars and trucks onto trains for intercity travel. Thus most vehicles will have 20 or 40km ranges and tiny inexpensive batteries, or air tanks that don't burn.

19/ There shall no longer be any liability for automobile manufacturers related to components made to public specifications, or assembled by the end user. DOT shall also publish guidelines about which accessories are approved for which drive frames.

20/ Going forward, all vehicles will use the same standard diagnostic connections (buss and wireless). And all shall be required to run on the same standard diagnostic software using the same interface worldwide for all vehicles, droids, engines, motors, generators, washing machines, backhoes, tractors, and robots of every sort with regard to diagnostics of machine mechanical health and accessing all the sensors and readings that the device monitors and uses. And while manufacturers can easily add options to the optional interface menu, it will be a serious free trade crime to use any sort of alternate software to access a diagnostic systems. So all the mechanics will have their phone or tablet and they will scan the QR code of the device and then log into its diagnostic system with the permission of the trusted recorder system. The vehicle or machine will show the top problems it thinks it has, with the most important at the top, the reason it started asking for mechanical service. And the mechanic can go to different screens for other readings. There shall also be a window where the device recommends or pulls up possible repair parts for the mechanic to order from the special delivery system.

21/ All Vehicles, Droids, Robots and expensive equipment shall be required to use the Senate's standard wire busses and free open-source public-domain VDR operating system, programs and interfaces (And all shall be available in tablet, all standard physical haptic control knob desks, arm gestures on video, and more). All software for all vehicles, droids, robots and expensive equipment shall be open source and approved by the Senate. There shall also be a total ban on proprietary operating system software in all vehicles, droids, robots and expensive equipment. We shall also say that all software included with all devices at time of sale, or that must

be loaded on the device to make it work: we shall say that none of this software shall ever be subject to any ongoing ownership rights for the equipment manufacturer

22/ The Senate's VDR operating system shall allow for the user to override all parts authenticity and parts permission to use systems, including both chips and software and permissions whether these are from the manufacturer, or the recorder system. However the system administration level permission must be used for this purpose. There shall be no passcodes to use parts.

23/ We shall develop robots to lubricate our uniform single-wide vehicles, and check their tires, and change their brake pads, and fuel pumps, etc. Our ultimate objective with regard to our automobile servicing robots shall be that all standard drive frames will have robots to do all the mechanical maintenance and all the common repair work needed prior to 300,000km.

24/ All Single wide cars shall be required to use the same wheels, the same oil filters, starters, alternators, spark plugs, brakes, brake cylinders, radiators, belts, a/c compressors, air filters, water pumps, and these must all eventually be robot replaceable.

25/ We shall note the way Elon Musk greatly simplified NASA's rocket engines. We shall also note the way new engines in our cars look like the complicated NASA engines, and the engines that we originally used prior to OPEC looked like the Musk rocket engines. The Senate shall therefore carefully reevaluate the need for all the emissions controls measures on our vehicles, and delete all the systems that are no longer needed.

26/ Regarding all vehicles, equipment, machines, generators and motors:

a/ No special tools shall be required without a good stated reason.

b/ It shall be easy to reach and replace all parts and service the vehicle. There shall be no unnecessary removing of one part to gain access to remove another part.

c/ All standard drive frames shall only use the same limited sets of common tools depending on their size category: (light hand, heavy hand, moped, motorcycle, single-wide, doublewide light, and heavy truck for all engines.

27/ In all engines, motors, and wheels only materials stronger/harder than mid-grade aluminum shall be allowed. Where plastic vehicle parts commonly fail before the vehicle reaches age 10, the manufacturer must provide replacement parts free of charge in a timely manner for 17 years.

28/ Regarding belts for internal combustion engines and electric motors:

a/ All shall be required to one of them Senate's 500 standard belts.

b/ All external belts shall be replaceable within 30-minutes.

c/ All internal belts shall be replaceable within 2-hours.

d/ Drive frames shall not use internal engine belts, and all external drive-frame belts shall be replaceable within 10-minutes.

29/ With regard to vehicles, equipment, machinery, and parts built to open-source, public domain, Senate-elected standards and plans, there shall never be any prohibitions-on, or taxation-of these repair parts. Anyone may make these freely and sell them without paying any taxes at all. Even

government certification of these things shall be provided by government at no charge. This is what we want public policy to encourage and never discourage in any way. Anyone proposing any measure that will burden these people in any way should be regarded as corrupt.

Where vehicles, equipment and machinery are made according to an idiosyncratic or non-open source design, government shall tax these repair parts, and OEM repair labor, at no less than 50% of the sales price. However, small idiosyncratic mechanisms where a full year's production runs sell for less than 2,000-years wages per year shall be exempt from all OEM repair parts taxes.

30/ There shall be an obligation of fairness with regard to idiosyncratic OEM repair part and especially replacement part prices. The recorder system shall set standard prices for repair and replacement parts (communist style). Then all OEM manufacturers must provide the parts at the standard price. By rights, manufacturers are supposed to make mechanisms that do not break down. And where they do break down, government shall assure that this does not become an illicit pathway to profit for the manufacturer.

31/ Vehicle, equipment, and machinery manufacturers (and their associates, partners, intermediaries, proxies and dealers) shall not be allowed to charge for any fees at all to use the products they sell, or to gain access to any feature of that product. There shall no longer be any manufacturer subscriptions, or fees to access features on any vehicle or equipment.

32/ We shall have a new crime of post sale fraud, where sellers extract money from buyers after a sale to unlock or buy access to some feature of the product they already purchased in a supposedly total sale. Also, it shall not be possible to have less than total sales for vehicles, farm equipment, or earth moving equipment, construction tools. And none of these things shall have any secret unlock passwords.

33/ Where abusive post-sale practices exist, or a device will simply not run as it was described, the buyers shall have the right to return the product for up to 2-years and receive a full refund of the money.

34/ A Vehicle, equipment, and machinery manufacturers (and their associates, partners, intermediaries, proxies and dealers) shall not be allowed to have any post sale rights to any product they sell.

35/ It shall be thought much better for the efficiency and longevity of our nation's car industry if the people making cars and other complex equipment do not sell parts. Where they must sell parts, it undermines the will of the manufacturer (over the long-term) to make reliable cars and other equipment. Instead they are pushed towards making poor quality cars and machinery that work for a couple years and then break down. Thus the manufacturer harvests money from repair/replacement parts on the poorly made equipment they produce in a vicious circle.

36/ The recorder system shall keep statistics on the average cost to maintain all vehicles.

37/ Wherever practical the Senate shall have various standard drives frames for farm equipment, earth moving equipment, house moving equipment and both motored and un-motored railcars.

38/ We shall try to emulate the cloned VW1600 parts system that existed in the 1970s and later, with regard to low cost quality parts made by many companies, along with a general ease of making repairs. This is something that we definitely got right in the years before the Arab oil embargo of 1973.

39/ It should be thought a matter of ecology and civil defense that our vehicles are mostly all uniform and easy to repair and that the drive frames are designed to run for over 300,000 kilometers without significant overhaul repairs.

40/ All the self-driving vehicles will go in (by themselves) for a check-up every 3,000km or so. On top of this, people may bring their cars in for diagnostics. However, from now on, the vehicle diagnostics will be separate from the people actually doing the service work. This is much way we do things with our dental hygienists and dentists.

41/ The recorder system shall track all vehicle repair shops and do statistical analysis to look for problem repair shops. The recorder system shall also institute a system of standard pricing for all repairs, with shops charging a fixed premium or discount on all their work.

42/ All vehicle repairmen must wear recorder system head cams with AI analysis to track the repair work. Also there shall be HD overhead videos of the repair shops. This all at least until we develop robots for servicing our uniform vehicle fleet.

43/ All vehicles with salvaged titles must be taken apart and sold as parts on the Senate's vehicle parts auction website. When police find a vehicle that has been stripped, they shall not be allowed to auction-off or sell the chassis, but it must be stripped further and the striped parts must be sold separately as used parts, for full market price and the proceeds used to compensate the victims that had their cars stripped.

44/ All automobiles, busses, trains and other passenger vehicles shall have rubber or vinyl pans that are waterproof and cover the entire floor, at least 3cm up the sides, so that wet and muddy shoes will not cause a lasting problem. For automobiles and small trucks, these shall all fit to one of 100 Senate approved, standard velcro edged carpet floor mats. On our busses and trains, the floors will be of rubber floor tiles. No vehicle may be made by their manufacturer with cloth seats. All vehicle seats must be covered in non-perforated long-lasting vinyl, or non-perforated leather. In fact, here shall be no perforated vinyl seats or ceilings panels of any sort in our nation.

45/ All vehicle seats must use one of 80 different designs, so the seat covers may mate properly. All vehicle seats shall be designed with the presumption that a standard and precisely formed after-market seat cover will be used around it. This is so our vehicles fleet will last longer before becoming worn to the eye. All shared passenger vehicles must get new floor vinyl and new seat vinyl and padding whenever it becomes damaged, or at least every 4-years.

46/ Each conforming single-wide vehicle shall have:

a/ A semi-flexible video mast that projects 20cm upward from the roof. In some ways, this will provide a better vantage that direct vision through glass.

b/ Night vision video. At night this will provide better vision than direct vision through glass.

c/ They may have backwards seating in our network operated vehicles. The human will view the HDVR video of the road instead of looking at the actual road. And when the

driving system has spotted something it is unsure of, it can highlight this on the driver's monitoring screen and and give a warning alert, and ask the driver for interpretation.

47/ We shall delete all the road signs and traffic lights and painted curbs and painted parking spaces and instead use GPS+ or GPS plus buried RFID chips. But all the Semaphore traffic lights will get deleted. Also, in congested areas, the system will soon take over driving all the vehicles, so capacity can be increased over human drivers. The cars automatically locate all the parking places free and paid, and how long street parking is allowed for. They will also auto-park. They will also be able to read the parking restrictions where they are.

48/ Regarding kill switches in vehicles: It shall be considered an important right of the people in system operated vehicles that they be able to hit the stop button and do an emergency stop of the vehicle they are in, forcing the vehicle to pull over as quickly as is safe to do. Also, decentralization shall rule regarding kill switches on our vehicles. All kill/stop buttons for all transport vehicles shall be a thing that always belongs to the people in the vehicle and never to the system. There shall be no system-wide power to switch off personal vehicles. If we have this, then we might have a foreign power hacking into our vehicles and turning them all off when they attack us

This one-sided treatment of kill-switches shall be considered an important right and personal safety matter of all the people using system operated vehicles, that they always be free from anyone having the ability to remotely shut down their vehicle. Even police in hot pursuit of a suspect must follow a suspect to his local destination (50km of driving max), or they must block the route of the system operated vehicle.

49/ It shall not be allowed to have remote disable functions or remote operation functions on personal vehicles. While this may seem appealing from the standpoint of police disabling the cars of criminals while they are fleeing. Such a remote disable function is only marginally valuable to police. On the other hand, the people with access to the switch might become quite tyrannical. And hackers will probably prey on pretty women. And assassins might take-over people's vehicles to kill them. No, we shall have no remote disable, or remote operation functions on our vehicles.

50/ To reduce car theft, vehicle hacking, and runaway vehicles, we shall require that all self-propelled road and railroad vehicles have:

a/ An easy to reach mechanical emergency kill switch that cuts off all power to every system in the vehicle.

b/ At least 30 hard-to-access mounting bus locations wired in series for adding remote control kill switches.

b/ Four standard mounts in their trunk. This is so people can bolt a security box or hotel safe sort of box to the frame of the car in the trunk.

b/ Mechanical, rear wheel emergency brakes that use human force over cables instead of hydraulics or electronics to activate or deactivate. The emergency brakes must be activated whenever the road vehicle is parked, or the driver shall be responsible if the vehicle rolls away and causes harm. Where the emergency break is activated hard by the driver while the care is in motion, it shall disengage the vehicle's main power coupling.

51/ Personal vehicles shall not be made with manufacturer GPS trackers or listening devices. However, to reduce vehicle theft, each new vehicle must have at least 10 hidden power points in hard to reach places for powering aftermarket trackers. The design is that each of these locations takes some minutes gain access to and verify. So it might take hours to clear all the potential tracker locations for a vehicle.

52/ The people shall be free to add their own monitoring equipment, and remove all the monitoring equipment of other from their personal places and vehicles. No vehicle shall be constructed so that it will suffer any loss of function when any or all of its tracking devices are removed, or disconnected.

53/ While we will prohibit all listening inside of vehicles, we will allow the network to take over the audio system to play various horn sounds and give vocal instructions about emergencies like road ice or stopped cars ahead.

54/ It shall not be allowed to sell ostensibly private vehicles that can be remotely shut down or disabled in any way. For certainly desperados will be using this to kidnap our people.

55/ All new non-emergency tire and road automobiles shall be speed limited so they cannot be driven faster than 130km.

56/ All vehicle shall have the same standard ground clearance, except that the larger vehicles shall have more ground clearance. After this, there shall be no paving conditions on public or private property that violates the uniform ground clearance standards, and uniform curve and grade change standards, as well as offset and irregularity standards. It will all be very yes or no and there will be liability for building non-conforming roads.

57/ For all shared passenger vehicles (such as busses, mini-busses, and taxis): The fuel tanks shall be made from minimum 12 gauge stainless steel. All other vehicles must be made from minimum 16 gauge stainless steel.

58/ Wherever cars automatically turn themselves off to save fuel, the user settings shall have the option of turning this feature off, so the vehicle stops turning itself off.

59/ The Senate shall establish maximum weight to power ratios for the vehicles on our roads. No longer shall there be any super fast cars.

60/ All new car passenger compartments must come with a tablet screen on the dashboard that is at least 30cm diagonally.

61/ No headrests shall cause taller drivers to tilt their heads forward. All anti-whiplash head arresters (not head rests) shall be vertical. However, they may tilt backwards up to 10°. All vehicle headrest must be removable.

62/ All vehicle seats must use one of 7 standard mounts.

63/ All key fobs must be one of 100 or so different standard electronic designs, no drive frame manufacturer or vehicle cab manufacturer shall be allowed to make or sell their own key fobs.

64/ All vehicles cabins shall also have power points at both upper corners of the windshield and in the middle. All vehicles must also have standard 110 V plugs and a transformer for both output and input power.

65/ All electric vehicle windows must use the same 30 standard window motors that are all adjustable with regard to travel on each side of the window.

66/ All conforming passenger cabs must use one of 100 standard windshields, and all standard windshields must be

available in double glazed 5cm thick versions. Boeing glass shall be ubiquitized and made a standard safety and comfort feature on all automobiles.

67/ All windshield wipers must use one of 60 standard motors/actuators.

68/ All single-wide drive frames shall use the same oil filters and tires and wheels and brakes, and starters and generators and radiators, etc.

69/ The following features shall be prohibited in all new vehicles:

a/ Auto-stop/auto-start engine systems.

b/ Electronic hand brakes. All must use a cable instead.

c/ Fake air vents and air systems that warm the air from outside.

d/ Pop-out door handles.

e/ Window that cause cavitation when opened.

f/ Cloth seats, cloth ceilings, or carpeting other than velcro floor mats on rubber subfloors.

70/ All cars and trucks with diesel engines shall be designed to run at least 500,000 km. All cars and trucks with gasoline engines shall be designed to run at least 300,000 km.

71/ All automobile doors must have a physical door handle both inside and out and a physical key lock.

72/ Regarding window tinting in new automobiles, trucks, RVs, etc:

a/ The windshield must allow 80% of light to pass through, except in the top 10 cm which may have any amount of tinting.

b/ Both driver row windows must allow 70% of light to pass through so that police can see intoxicated and impaired drivers.

c/ Windows behind the driver's seat must allow 30% of light to pass through. Also, it shall not be allowed to sell or install automobile window tinting that that allows less than 35% of the light to pass through.

73/ There shall be minimum and maximum noise standards for all vehicles. All vehicles must emit a sound so that people can sense that there is a vehicle near them. Also, our vehicles shall not be so loud that they disturb the people.

74/ All vehicle navigation electronics and programming shall be open source and approved by the Senate. It shall no longer be allowed to make road vehicles that are not either 4-ft, 10-ft, 16-ft, or 22-ft wide. All of the new containers shall be 9.9-ft wide. This is two containers on a 7m gauge train, or three containers on a 7m gauge train with 1m cantilevers on both sides.

75/ All new passenger cars shall have a quiet city horn that only plays on the transponder on vehicles and on devices very close and in the path. They also have a super loud animal horn. The super-loud animal horn cannot be used in urban and suburban environments unless there is an actually emergency, or it looks like somebody is about to have a collision. other than this, the quiet horn must be used.

76/ The tips of all automobile seatbelts tongues shall be shaped like a large regular screwdriver, so they may be inserted into a window edge and used to break the glass in the window. All trunk/boot lids must have a mechanical internal release lever, so people cannot be locked in this compartment.

77/ It shall be possible to permanently turn off any or all

driving assist functions in all vehicles.

78/ All steering wheels must be perfectly round and spin concentrically.

79/ In all new vehicles, there shall be no systems where the engines stop while the vehicle is stopped. Instead we shall return to idling engines for our vehicles.

80/ No vehicle parts shall be plated, or have a mirror chrome-like, or bright "mirror" stainless finish. All vinyl used in vehicles (including passenger aircraft seats) must be minimum 900gsm and UV resistant. Manufacturers shall be prohibited from using low strength (fast to wear out) 3-D printed parts in their new vehicles and other complex mechanisms.

81/ Volvo's new truck emergency braking system shall be ubiquitized for fair payment. The Volvo corporation shall also get a fair sum for the three-point seatbelt design that it gave to the world decades ago.

All vehicle seatbelt tongues shall be made of hardened steel and have four hardened steel points at all four corners of the tip of the insertion edge. The tongues shall also have a handle that is long enough so that a 45kg person can insert the tongue into an operable window of the vehicle and shatter the glass by means of focused pressure to the edge of the tempered glass in the window. This is so people can always escape a vehicle, if the vehicle is in water, or a person in the backseat is being kidnapped.

82/ All tracker devices in all vehicles must be aftermarket and exchangeable very easily, to assure the privacy of the people. Government shall have no right to turn people's vehicles off, or to use technology to keep the people from venturing too far from home, serf style. However, taxis and other other shared vehicles shall have recorder system security video and location monitoring.

83/ All new vehicles must have their license painted directly on them in 15cm characters. This is a number that will never change for the life of the vehicle. This number shall match the one particular car until it is scrapped, and only then the number get recycled. It is foolish to use license plates that can be changed-out in 1-minute.

84/ For reasons having to do with keeping housing costs down, national competitiveness, fire prevention, construction and civil defense, all the regular drive frames should be available in heavy-duty, larger engine versions that will have four-wheel-drive, and human-driving mode available. Eventually most of the roads (the big roads at least) will not allow human drivers because the system will be so much safer.

85/ We must make a fresh start in our new US car industry. No US vehicles shall be designed in Michigan, or using designers from the Michigan car industry. And to be clear, we are reviving our vehicle industry, not Michigan, and not Ford, and not GM or any of the other Wall Street companies.

86/ Except for aircraft, military, and militia equipment, all internal combustion engines used in urban and suburban areas shall meet the same standards for noise, be they in vehicles or yard equipment. Vehicles and equipment found violating the national noise standards may be impounded for up to 90 days at the owner's cost. However, due to big changes in the nature of urbanism and urban transportation, the maximum acceptable noise levels for passenger vehicles shall be raised a bit.

87/ The people shall always be free to switch and swap vehicles at anytime.

88/ However to discourage parasite car dealers, we shall have no sales tax for owners that put over 5,000km on their vehicle, while the people that don't do this shall all be presumed to be dealers that must pay the dealer's sales tax rate that is designed to drive the parasitic used car dealers out of the industry.

89/ Due to big changes in the nature of urbanism, urban transportation, and fuel choice, the use of petrol in urban vehicles will soon be slashed. So it will no longer be necessary that we have the strict energy wasting emission control standards lobbied for by OPEC. Therefore we shall say that Government environmental policy shall lower clean emissions standards, so that petrol burning vehicles may get better mileage and the following new standards shall apply:

a/ Catalytic converters for gasoline burning vehicles shall not be required to eliminate more than 90% of unburned hydrocarbons, particulates, or nitrogen oxides, or more than 94% of the carbon monoxide.

b/ Carbon dioxide shall no longer be considered a pollutant.

c/ Regarding sulfur dioxide and volatile organic compounds in gasoline vehicle exhaust: We shall not require that more than 94% of these be removed.

d/ Due to profound changes in the nature of urbanism and urban transportation, the maximum acceptable noise levels for vehicles shall be raised, however all vehicles, yard equipment, and chainsaws, blowers, compressors, generators and vacuums must comply with the same standards.

90/ Once the delivery system is up and running, there will be much less need for personal cars with large amounts of cargo capacity

91/ DOT approved motorcycle helmets shall be required nationwide for everyone operating a motorcycle or open motor vehicle. Where poor nations copy this constitution, they should strictly limit motorcycle speeds to 70kph.

92/ Road motorcycles being some 70 times more deadly than automobiles, mile per mile:

a/ As long as we allow motorcycles and ATVs to be driven on our nation's roads, these people must carry medical and life insurance in the amount of 30 year's wages (the life insurance payout when the motorcyclist dies) that is charged by-the-kilometer, so the drivers grasp the true danger and cost of dangerous motorcycles. This insurance also protects the other drivers and the healthcare system from added motorcyclist costs due to the extreme hazard of riding a motorcycle.

b/ To reduce motor-bike injuries, and help people save on insurance, the Senate shall offer motorbikes (and perhaps other vehicles) where the system controls the motorbike's maximum speed. On these speed-limited vehicles, the speed shall be limited by both electronic means and also by noisy/ vibrating gearing. This to make the speed control hard to hack.

c/ When we prohibit human operated automobiles from the roads, we will also definitely prohibit human operated motorcycles. Perhaps we will later use system operated motorcycles, perhaps we will not. However, off road, motorbikes must always remain on the option menu, provided

the insurance is paid.

d/ Where rich nations emulate this Constitution, they shall treat motorcycles the same way. When poor nations emulate this Constitution all will keep their motorcycles. However they should limit their top speeds by the system.

e/ Motorcycles may drive between lanes of cars. However, if there is an accident involving one of the cars on either side of them as they're passing between lanes, the motorcycle driver shall be entirely responsible for the accident. Also, motorcycles with panniers shall be required to act like four wheeled vehicles in terms of lane position.

f/ The Senate shall be free to impose any restrictions it elects on any form of wheeled vehicle where the human rides on the outside.

93/ The names Jeep and Hummer shall become the property of the United States Army, which will make its own standard Jeeps, full-size pickups, compact pickups, mini vans, and mini-busses. There shall be two versions of these names, one for the public (painted army blue), and one for government (painted army green). Everything goes together in exactly the same way, it is just that none of the government parts fit in the private versions, and vice versa. Jeeps will be for the ultra-mass produced diesel and gasoline vehicles that the Army buys. Hummers will now be hybrid that are all potentially silent, attack vehicles. Some will be motorcycles and some drones and some micro buggies, where both time in target zone and target size are reduced, while supplies are increased.

94/ With regard to the giant over-sized size of SUVs, the giant 2-car garages, the giant parking-lot shopping centers, and the giant freeway based America: The reason our nation is this way is because it has been infiltrated and steered by OPEC so that OPEC could make more money selling more oil.

95/ There shall be no advertising still or screen advertising displayed in any shared or public vehicle. However this shall not include government public service and educational announcements.

96/ For reasons of national security, civil defense, and long term national economic competitiveness we shall no longer allow foreign companies to make more than 1/4 of our nation's vehicles or drive frames, or add-ons, or its tractors or limbless earth moving equipment, or add-ons. We must remember the lessons of WW2 that it is critically important that we always have our own vehicle factories and domestic supply chains that can be repurposed for making war vehicles and war equipment in our land.

97/ As a matter of national defense, all high-school graduates must spend at least 20 hours learning to human drive a vehicles in simulators. They must also spend the same amount of time learning to drive various sorts of drones and earth moving machinery, or how to operate some sort of machinery.

98/ From now on, all vehicle sales shall be cashless, with the recorder system and DMV acting as escrow. The Senate shall aim for a system that drives all vehicle transaction intermediaries from the marketplace.

99/ Regarding used car dealers:

a/ Government shall regard them as a parasitic public nuisance that government must try to abate and mostly eliminate.

b/ Government shall have its own covered used car lots for vehicle owners to leave their cars at, while they are being slow auctioned by the system, and this only costs the daily anti-nuisance fee.

c/ Whenever a vehicle is bought and then sold by someone who has put 30,000km on it, or owned it for more than 18-months, these people shall be excluded from vehicle transaction taxation that exists to drive the dealers from the system. To start, this dealer tax shall be 10% of the total money paid by buyer to the seller in each transaction.

d/ Except at the salvage/recovery life stage, fictional citizens shall not be allowed to buy used consumer vehicles/

e/ Once a car has been in a big accident, or flooded, or burned, It can only be sold by a salvage dealer using a salvage title. Then the vehicle gets certified as dismembered and removed from the fleet.

100/ From now on, all new car dealers shall also pay the 10% dealer sales tax when they as third parties get involved with a car sale, unless they put 30,000km on the vehicle, or owned the vehicle for more than 18-months. The Senate might also elect to totally outlaw all middleman dealers between vehicle manufacturers and vehicle buyers, as well as between used vehicle transactions. Also, we shall give these "businesses" nothing when they get wiped out by this new constitution..

101/ Publicly traded vehicle manufacturers shall no longer be allowed to use sell their vehicles via independent third party car dealers. This shall be thought to be a corrupt practice from now on.

102/ Wherever a business sells a particular sort of vehicles, they shall not be allowed to also service that sort of vehicle.

103/ It shall no longer be allowed to finance personal transport vehicles over 12 years old.

104/ All vehicle mileage testing shall be done on Interstate 5 in California between highways 119 and 152, and then back again, using cruise control set at 100kph (61mph) without air conditioning or heat. Senators shall do the testing.

105/ All roadways and all train lines at all points must have adequate wireless communication coverage.

NR'147. FREE PUBLIC UTILITIES

1/ Government shall provide fast, high-bandwidth virtual communication pathways as a free public utility just like it provides street lighting and street sweeping as free public utilities. The cost of providing these virtual communication pathways being a sliver fraction of the cost of providing real world infrastructure, the virtual infrastructure shall be offered free of charge in nearly all cases.

2/ All fixed line telecom and cable, all telephony, internet, municipal WIFI, texting, cellular voice, and cellular data shall be free so long as the usage is normal and uses accepted software and data throughput levels. Above these use levels, communication services shall be delivered at marginal built cost.

3/ There shall be no difference in price for ordinary phone calls or texts whether around the corner or around the world. The concept of long distance electronic communication shall be entirely deleted.

4/ The telephone, broadcast, and cable TV industries are hereby nationalized to the extent the Senate elects to claim

ownership.

5/ For all utilities, the property, equipment, and infrastructure shall all revert to the people after 23-years. If this equipment is already over 23-years old, then it shall be considered already reverted. No utility infrastructure over 23-years old shall be privately owned, leased, franchised or contracted to any private company for management.

6/ All public utilities shall be condemned. All shall be managed by appropriately sized, and appropriately rotated juries of their county Senate.

7/ All easements granted to utilities on private property are hereby nationalized and made the property of the people and put under the administration of the county they are located in. This shall include but not be limited to: electric, water, sewer, telephone, fiber optics and cable TV. An easement for one utility may be used by any other utility or government purposes not yet existing.

8/ All group easements of every kind, once created shall be thought nearly impossible to cancel without an entire urban or suburban neighborhood being bulldozed, or all users agreeing unanimously. Easements for public roads and railroads and trunk utility lines shall never be permanently cancelled until 150 years have passed since the cancellation. Easements used by a community shall be extremely difficult to cancel, in fact the rules for prescriptive easements by communities shall be extremely asymmetrical, with these coming into existence after 6-years if used by under 50 people and 4-years if used by over 50 people.

9/ To be clear, all cable TV and telephone wires and system and switches first installed more than 20 years ago now be nationalized and made the property of the people to the extent they want to claim ownership rights. Government shall not charge anyone for using these, and it shall maintain these systems for as long as they are useful.

10/ Any attempt by government to sell-off or privatize any built linear infrastructure system shall be void. This shall include all built road systems, transit systems, railroads, pipelines, pipings, aqueducts, wiring, electric grid, and other infrastructure. All prior sales shall be void and may be struck down and rescinded at any time by subsequent governments and without compensation.

11/ All shall see privatization of infrastructure as a thing that is only an equivalent over the short term, when there is a risk that the privatized assets will be taken back by the people. Thus the owners of the privatized assets fear extracting more money from the people than before. Thus the privatization becomes an equivalent over the short term. However, over the long term as ownership in the privatized assets becomes more secure, the privatization actually becomes much more expensive than public ownership due to the monopoly power of the infrastructure.

12/ A 75% overmajority of the Over-Senate shall be required for the Government to sell off, or privatize linear infrastructure and monopolies. Also, no sale or privatization shall be for a period of more than 6-years.

13/ Government shall offer a free facebook-like website or linked facebooks with a limited number of advertisements as a free public utility. The government facebook shall not sell user data to other parties. The people are advised that their common interest will benefit greatly if they all switch to using

the government's facebook and completely shun the for-profit facebook. All facebooks shall have all felony convictions, bankruptcies, and marriages on display for life. They must also indicate academic progress, and when a person has less than 60-day's pay to his name.

14/ Each county shall offer an ID-verified auction and classified advertising website as a public utility. These shall be watched-over and enforced by the county governments and their police departments. These auction websites shall not be run for a profit, except where beneficial data integrity fees provide excess profit. Each auction website shall be able to search all the other county auction websites in the nation if the user elects.

15/ Fictional citizens shall be prohibited from buying assets at auction. Only human citizens may buy assets at county auctions. Nobody may bid on behalf of another person, or acquire assets on behalf of another party at a county auction.

16/ All auction bidding shall have 3rd party recording by the county recorder system.

17/ No auction shall allow payments by cash or cashiers checks, or letters of credit. All financial accounts shall support auction system blocking of funds.

18/ Where people do not follow through with their action bids, there shall be a 10% penalty which shall accrue to the benefit of the next highest bidder and the price they offered.

19/ The Amazon company is hereby nationalized. Automated fetch warehouses will become an industry. Robotic delivery will piggyback or overlay upon the self driving vehicle system and rail system. Amazon's scale with regard to presenting the market of goods is also a thing that should belong to the people.

20/ The Google company is hereby nationalized and put under the supervision of the Sub-Senate.

21/ Both Amazon's and Google's citizen shareholders shall be paid a fair value for their shares in this company as determined by the Economics Sluice. When the Senate assesses these companies, it shall pay nothing for the portion of their value that arises from their monopoly power, the far larger share of their value. The Senate shall also not consider the current stock price and implied market capitalization for either company.

22/ Neither government nor any utility company shall charge any fees for connections to any utility systems. Only the actual cost of making the physical utility connection may be charged. However, builders shall always have the right to install their own inspected utility infrastructure on their own property, and their own easements, and in the streets roughly adjacent from their property. No utility company shall be allowed to build any infrastructure for their system.

NR'148. BROADCASTING

1/ All non-government rights and interests in the TV and radio broadcast spectrums, all satellite TV systems, all satellite radio systems, and all cable TV systems are hereby nationalized for the public benefit to the extent the Senate wishes to claim ownership.

2/ The broadcast spectrum shall be managed in a way that maximizes the use of the scarce number of channels, not in a way that maximizes income to government or some fictional

citizens as government's corruptly-obtained master-tenancies. No, the broadcast spectrum shall be a thing that is supposed to maximally inform and entertain the people with.

3/ Government shall divide the broadcast, satellite, and cable spectrum into the maximum number of television and radio channels that technology reasonably allows. Then each channel shall be divided into 48 one half-hour slots for each day and auctioned off by the county recorder system. Individual citizens and groups of citizens may operate 30-minutes a day, or 24-hours a day, however, they shall not operate more than one channel, and secretly operating more than one channel shall be a crime.

4/ All broadcast stations must broadcast one hour of un-interrupted Senate approved educational media for each hour of their optional broadcast programming. The odd numbered hours broadcast privately generated media. The even numbered hours broadcast Senate media. All broadcasters shall be named by a number, and no letters shall be used.

5/ The county recorder system and the Sub-Senate shall run:
a/ Advertisement submission platform where broadcast ads can be approved.

b/ A payment platform for advertisers to pay broadcasters for the advertising.

c/ An audit platform where viewership levels and demographics are determined

6/ No airwave broadcaster, shall use more than 5-minutes each hour for non-government advertising, or have more than one advertising break per hour. All must run 1-minute of Government public service announcement (chosen by the Sub-Senate) per hour for no charge.

7/ There shall be no radio or television broadcasting over our nations airways in any language, other than English. Stations in our part of Mexas may however broadcast (with reasonable power) in Spanish, into our nation. Also the people of Quebec may broadcast (with reasonable power) into our nation in their language if they wish.

8/ There shall be no music or fictional stories broadcast over the airwaves (either over radio, or video broadcast), however audio books may be read. Thus we drive all non-constructive content off our terrestrial broadcast radio and onto satellite radio.

9/ Broadcasters shall no longer be allowed to produce any continent other than when they use live human studio presenters and the broadcaster is on the air for less than 1 hours a day on average.

10/ The county recorder system shall auction off slots at the minimum price that fills all the slots in that half-hour of the day. Then all tenants pays the same price for a slot in that time hour. Thus we have a situation maximized for openness with many thousands of weekly time slots.

11/ With broadcasting, it shall always be presumed that children are watching. Therefore all broadcast media shall be banned from having material not suitable to children. If broadcast media is judged to contain any instances of tobacco use, drug use, racism, dating, homosexuality, queerness, dirty words, sexuality, nudity, or sex acts, then the whole program may be considered an advertisement and a punitive fine shall be due from the broadcaster (per audience member) for the entire long ad. These rule shall also apply to radio.

12/ All existing television and radio news broadcasters shall cease operations within 10-days, including news broadcasts via cable-TV. The Senate shall decide what to do with these people once the dust settles. They may be jailed, prohibited from media, or ignored by the Over-Senate.

13/ As a national security and civil defense matter, all vehicles, except train cars must have radios AM/FM and shortwave radios. Except for telescreens, it shall not be possible to sell an audio player without AM, FM and shortwave capability. All vehicles found without a working radio systems must be repaired, in order to have the registration renewed. AM 1000, and FM 100.0 shall be reserved for emergency broadcasts, road hazard alerts, and police announcements, including, especially officer commands to cars that they are near. These channels shall remain on and open to reception and unused and on at all times except in case of government emergency. However, they shall not play except when there's an announcement. The radio need not even be on, but if it is, the other signal shall be dimmed, such as the way, GPS commands lower music audio.

14/ There shall be no more television or radio receiver licenses. The playing of amplified sounds and ambient music in a business or public place shall however require a license.

15/ Everything previously broadcast over the broadcast Airways shall be irrevocably in the public domain in every way conceivable. When something is broadcast over television or radio with authorization by the rights owner, all private ownership rights shall be gone forever. There shall be no more rights for either the author or for the broadcaster after this happens.

16/ The number of channels must be maximized, and there shall be no portion of the broadcast system that is reserved for future use. The radio spectrum allocations shall be adjusted as follows:

a/ Maritime mobile shall be compressed by 2/3.

b/ Obsolete A.m. broadcasting Shelby reduced by 80%, and all a.m. stations and spectrum except news station shall be shut down and nationalized.

c/ FM broadcasting spectrum shall be reduced by 50%.

d/ All of the fixed portions of the radio spectrum in our cities shall be phased out and instead we shall use fiber. This will get phased out over the next decade and we will use the spectrum for other places.

e/ Mobile and mobile to satellite tech she'll be increased.

f/ GPS spectrum shall be expanded.

This scarce spectrum will be used for other valuable uses with less energy and more harm to people less harm to people.

17/ Print media companies shall not be allowed to participate in broadcasting. Foreigners may own no portion of our radio spectrum, and no fictional citizen shall more than one half of one percent of our radio spectrum, or more than one percent in any category, and one percent overall.

18/ All of the broadcasting stations will be managed by the county governments, and they will lease out the radio slots.

19/ Nobody shall have any rights to claim any rights over the broadcast spectrum simply because they had this previously. Now all of the radio spectrum gets nationalized.

L — BUSINESS FRIENDLINESS

NR'149. GOVERNMENT ECONOMIC POLICY

- 1/** The property rights of some citizens shall not serve as an excuse to infringe on the basic human rights of other citizens.
- 2/** In times of crisis, all shall be required to contribute.
- 3/** When there is a conflict of rights between flesh and blood people, the right to life and limb shall be held higher than the right to mere property.
- 4/** All other things being equal, government shall favor a an economy composed of many small baby enterprises over one with fewer older, larger enterprises. Government shall be biased slightly against the biggest enterprises and it shall be biased slightly in favor of the smallest enterprises.
- 5/** Government shall value manufacturing more than the exchange of goods. It shall push the people to make more instead of profiting from trading what is made.
- 6/** In general, government is best that governs least. This

shall be our default setting.

7/ Except in time of war or other form of crisis, government shall not establish minimum or maximum market prices for anything in the private sector, be it for goods, services, wages, or rentals.

8/ Government shall not set or establish or require:

a/ A minimum wage.

b/ Work times, the parts of the 24-hour day when people can work.

c/ The length in hours of the maximum work day.

d/ Overtime pay multipliers.

e/ Days when businesses must close.

f/ Or suggest that certain days be holidays or sabbaths.

g/ Days when businesses must pay more to get their employees to work.

h/ A guaranteed minimum income.

i/ Free housing, or money for free housing except bunks in dormitories and housing for children and college students.

j/ Benefits for one race and not others. However, this shall not apply to non-citizens.

k/ Programs for getting farmers to produce less of certain agricultural products.

x/ Government shall instead push in the opposite direction, towards a nation that is open for business 365 days a year, and a nation that produces all it can. One of the chief ways to increase economic growth, and increase the wealth of the people around the world is to eradicate the concept of the weekend, and the holiday where people take synchronized time off from work. This is one of the most economically destructive practices that can easily be changed. It especially is important among people who take two complete days off. Instead, we need to switch to a system where the background economy is open seven days a week, while the workers take their time off as they wish, generally about half of days. This constitution instructs government policy to officially attempt to cause all businesses to be open seven days a week equally, 365 days a year, and tax those businesses that close down for one or two days a week, however, businesses that follow a day having schedule shall not be taxed for this. Only the businesses that are closed down one or two days a week. Those even that are open four in six days a week shall not be taxed either.

9/ Government and industry groups, shall be prohibited from imposing minimum wages, or standard prices of any sort anywhere in our capitalist economic system, be they economy-wide, or confined to a specific industry, or confined to a specific geographical area. This shall also include wage-life fees, such as distance fees for drivers, and prices per sale, or per unit of production. It shall also not be possible to seek damages in money court for wage schemes that pay workers less than a given amount per unit of time. This is just like how Government shall be prohibited from imposing rent controls and other price controls that live for more than 3 months, or are repeated. Certain aspects of the capitalist system must remain functional, or the system becomes substantially less efficient and we eventually all pay much more for everything. All forms of long-term rent control, and rent stabilization shall be regarded as related to communist property seizures, and a thing that is completely unconstitutional.

10/ Given the vital role that travel, trade and sharing have in wealth creation, government shall impose no taxes that discriminate against travelers, traders, sharers, shippers, or short-term users as groups. There shall be no special taxation, expensive permits, or limited quantity permits to take in lodgers by the night, or to ferry people around in vehicles.

11/ Cargo carriers shall not be allowed to charge less for big customers. Our nation wants to give its baby businesses every advantage.

12/ Government shall not use contractors to operate its ongoing enterprises. Ongoing means anything that may go on for more than 120-days.

13/ It is not allowed to sell valueless things to the people, or keep money gained from selling valueless things to the people.

14/ When government sells anything it shall go on the government's asset sale website. The method of sale shall be by decaying price auctions and the process similar to the way real estate auctions work. If there are multiple offers on the first day, the asset shall be reintroduced at a higher price.

15/ When government sells its assets to the people, it shall generally be prohibited from selling assets in huge chunks that only a few corporations can afford. Government must instead break up its lots into as many usable parts as it can to maximize the number of bidders and sales value.

16/ Except in industries government has elected to curtail, Government shall always facilitate and never hinder trade and the movement of goods. Government shall not be afraid to scare investment away from curtailment industries.

17/ Government shall protect the nation's industry from foreign predatory pricers who would drive our industrial base out of existence and leave us vulnerable to economic and military attacks.

18/ Government shall encourage the people to work hard and get ahead of their debts. Government shall stigmatize media and enterprises that encourage the people to slack-off and enjoy life more.

19/ No government policy shall encourage, or incentivize the people to take-on or maintain debt.

20/ Government shall encourage and help the people to live smaller, closer together, and with greater peace and quiet.

21/ Government shall encourage the people to keep learning and growing throughout their lives.

22/ Our nation and its people should try as much as possible to pay our leaders and inventors with things that are beyond money. But it shall also use money. This is not only less expensive, but it is also a much more powerful motivator than money alone for many people.

23/ We believe that our society get more invention when it pays 10,000 inventors 2.5-year's wages (\$100,000), than if it pays 1 inventor 25,000 year's wages (\$1-billion).

24/ Individual pay beyond 1,250-year's wages (\$50-million) for personal use offers little increased incentive for people. After this, we are better off with more inventors.

25/ The Senate may kill or smitheren any fictional citizen it elects. The only stipulation is that the Senate's actions against fictional citizens must benefit the people over the long term.

26/ The Senate shall have the right to shut down any business or business identity it elects as fraudulent, deceitful,

opportunistic, or detrimental to the public interest.

27/ Aggregators and middlemen shall be guilty of fraud when they pretend to be the actual supplier of a good or service.

28/ All new low-cost townships and rail-transportation system shall be financially independent from the old system. The new system shall not be in any way burdened by the cost of maintaining the old and inefficient system.

29/ No portion of the nation's transportation infrastructure, public utility system, or communication system may be owned, operated or supplied by foreign companies.

30/ The Senate shall prevent our nation's currency from becoming overvalued.

31/ The department of homeland security shall be broken up into 11 separate agencies as follows: cyber security, critical infrastructure, counter-terrorism, FEMA, Airport Security (TSA), Citizenship, INS (immigrants, refugees, and exhods), DOV/ Department of visitors, Coast guard, Customs, Border patrol, Senate security Service (Secret Service). The unnecessary agglomeration of government agencies shall be thought a thing that supports corruption.

32/ The national government shall have a new department of Government procurement. The Senate shall negotiate and purchase all military equipment itself.

33/ The postage-master shall do nothing but sell postage and enforces the postage payment laws. The postage master shall not be associated with the post office, which delivers the packages. And neither shall be affiliated with the drop shipping system. The money raised from selling postage and from the unaffiliated drop ship warehouse rental system should not be thought to have anything to do with the cost of delivering mail. Also, some of the drop ship warehouses will be rented piecemeal as warehouse for finished goods. Some of the postal warehouses shall also be used for packaging and final assembly. All of these warehouses being supplied by railcar on one side and perhaps trucks on the other side.

34/ Government shall aggressively prosecute non-government individuals and fictional citizens who pass themselves off as a government agency in any way. This shall include those who give the look and feel of a government agency in any way, or mimic a government agency, or its website, or offices, or directory listings, so create a situation where some of their customers think that they are dealing directly with a government agency.

35/ There shall be no requirement that a company be registered at an office. Companies can be registered at home addresses.

36/ There shall only be a one time registration of the business, and a requirement that the business operator have an official email address, and respond to demands on that the business. This must be reviewed twice a teneth by the business owner and checked if the information is correct, or it needs updating.

37/ There should be no requirement that businesses have liability insurance, or health insurance as these will all be covered by the payroll system.

38/ All required occupational training shall be offered online for no charge by government. All required occupational testing shall be done by the recorder office at least 20 times a year for midsize cities, and 40 times a year for the biggest cities.

39/ Universal education like how not to hurting your back shall be sent via the daily educational video that all workers much watch for five minutes a day

40/ Where heavy equipment is used, and the device must be insured, this insurance shall be paid via the DMV insurance system. All heavy equipment shall have video and Wi-Fi so that the people who own it can watch what the operators are doing The DMV shall also regulate all trailers and transport of equipment and insurance thereof as part of the regular registration fees. Nobody shall ever have to wait more than 7 days for any DMV testing. All the ID functions of the DMV shall be shifted over to the county recorder system.

41/ Only things at least half made in our nation at the manufacturing level may be said to be made in our nation. Where no nation contributes at least 20% to a product it shall not better than name made any certain country.

42/ Government shall be as easy to understand as possible and have a well explained by video tutorial. Government shall also use the most intuitive names possible. These two things shall be thought to be primary rules of open government.

43/ Minor errors in documents shall not disqualify the documents from use for their intended purpose. This shall be especially so for formatting errors, and near universal errors that occur across an entire class of document, and errors that occurred for many years unnoticed.

44/ Where the national currency is changed by government, all contractual obligations shall be required to use the new currency at the official rate if this is the plan established by government.

45/ Our democracy shall use a capitalistic economic framework that uses capitalism wherever practical and socialism where capitalism doesn't work well. For example, government will continue to pay for education (socialism), but we will privatize the management and operation of our schools through a voucher system (capitalism). Also, the delivery system/post office will probably always be a pocket of socialism in our economy, with capitalistic use fees (postage). Also the military shall always be socialized, because to do otherwise is to incentivize the horrible evil of ever-disloyal mercenaries.

46/ Marketing shall be viewed as an endless arms race sort of thing, that should be taxed and discouraged in our economy. The economy will work just as well whether we have 10-million or 10-thousand people working on marketing. Marketing shall be thought a flaw of capitalism, a thing that government should try to reduce as much as practical. It shall be official government policy to automate, make-fair, and eliminate the human marketing effort where possible.

47/ To encourage the arts, government shall provide an adequate number of live theaters, 2-week art galleries and free art vending websites. However, government shall no longer provide any money for artists.

48/ There shall be no fees for cancelling any service. Where people cancel a service, the service provider shall not be allowed to charge a cancellation fee.

49/ It shall not be allowed for businesses to charge repeat business more, or to give less, the way they do things in China. Everybody has to charge repeat customers either the same or less.

50/ It shall not be possible to advertise things as free when it later turns into a paid service. In that case the advertising must offer a “free trial”.

51/ It shall be national economic policy to attempt to repatriate industries and jobs.

52/ For reasons of civil defense against war and artificial pricing shocks for profit (such as the Arab oil embargo of 1973-77), the Senate and Armi shall actively root-out discourage just in time manufacturing. This practice makes our nation much more vulnerable to attacks and financial exploits for nothing more than a sliver of profit. Indeed, the Senate shall provide subsidized, below market warehouse space to encourage large stockpiles. Where the Armi is keeping critical war and economic supplies, the Armi shall pay for the goods and then store the goods itself.

53/ It shall be the official policy of our great continental nation that we should never need anything from any foreign vendor. Our economy should never be dependent on any foreign nation for anything.

NR'150. MAIL AND DELIVERIES

1/ The postal delivery service shall now be primarily for sending packages and documents. The following shall no longer be allowed to use the postal delivery service and must instead be sent electronically via the internet:

a/ Mass shipping and regular shipments of Newspapers, magazines, catalogues, flyers, and similar publications.

b/ Recurring bills and statements, including utility bills, loan payment billings, credit statements, bank statements, and financial statements.

c/ Coupons and discount promotions of any sort.

d/ Retail advertising of any sort, especially advertising by grocery stores, drug stores, and clothing stores.

e/ Mass unsolicited commercial solicitations sent to people at their homes. This shall include disguised commercial solicitations such as reports on real estate market trends, or surveys and awards about which service provider is best.

x/ All of the above must use electronic communication instead. All political communication on paper shall however be white-listed, and shall always be allowed.

2/ To get the most of our equipment, the postal system shall operate every day using a day-halving schedule and 6-day sweeks. Postal workers (like everyone else) shall generally be allowed to switch work days to accommodate the holidays of their religion.

3/ The regular postal system shall be run for low cost delivery rather than speed. Those who need a fast delivery can order a special delivery via the post office, or via a special delivery service, however special delivery postage must be paid regardless of who delivers the shipment.

4/ Ordinary mail shall be delivered to individual addresses once every 6 calendar days on scheduled days. Ordinary mail shall also be delivered daily to neighborhood gang mail boxes with 50 or more system-registered addresses. If the sender wants daily delivery to the recipient's gang mail box, then they must write the word “GANG” before or above the first line of the address, otherwise the post office shall hold the mail for up to 6-days pending delivery. Alternately, the sender can pay the special delivery postage and get delivery any day

to the recipient. The gang mail boxes shall not have a separate address, but shall be an alternate mailbox for daily mail delivery.

5/ The mail system shall be operated to be cheap first and relatively fast second, the special delivery system shall be operated to be fast first, and relatively cheap second. All special delivery shipments shall have progress tracking and general location tracking, all regular deliveries shall not have tracking.

6/ All shipments not arriving with the postal system's regular deliveries shall be considered special delivery, and in this case, special delivery postage must be paid. All special deliveries shall pay the special delivery postage whether delivered by the mail service, or by a private company, or whether the special delivery is a letter, postcard, online purchase, or shipping container. All shall pay the same nominal special delivery postage charge. The special delivery charges will vary depending on how far out the delivery point is. Deliveries in city centers will be quite cheap, deliveries in agricultural areas shall be quite expensive. In each case all deliveries must pay the true cost of special delivery.

7/ Only places under county recorder system video monitoring shall be allowed to have gang mailboxes, or post office boxes for rent. All PO boxes shall be identity verified by government, and tied in an anonymized way to both a citizen and that citizen's real physical address.

8/ Everyone, including citizens, non-citizens, fictional citizens, and commercial enterprises, shall be required to keep their physical address information up to date on the government's address registration website. The directors of fictional citizens and commercial enterprises that fail to do this may be charged with mail fraud if they are engaging in questionable practices using a false address. No post office box, mail drops, or part-time office shall be considered a valid registration address for a fictional citizen or commercial enterprise. These must use a physical address regularly visited or lived in by a director. Those who commit fraud via a post office box, or mail drop shall suffer double penalties.

9/ With regard to the postal system, only Government and nobody else shall use a light or medium robin's egg blue colored envelopes. Those in regular communication with a person may use light green colored envelopes. Unsolicited communication shall be required to use legal pad yellow envelopes.

10/ All mail must have a truthful return address. It may be considered mail fraud to omit the return address or misrepresent the return address or sender on a mass mailing.

11/ All mailed solicitations must have the word “solicitation” clearly written above the name in the return address at the same text size. The subject in all email solicitations must begin with: “ SOL: ”. It shall be mail fraud to deceptively present solicitations as non-solicitations so they will get looked at.

12/ The national postal system shall be changed as follows:
a/ All the local post office facilities shall be the property of the county. All the local post office workers shall be county workers. The national postal system only carries mail from mass collection point to mass collection point and establishes uniform standards and policies for the mail system.

b/ We will replace our outbound USPS mailboxes, and our post-offices with dumpster enclosures and scanner bays for entering mail into the system. If the postage and address labels are valid, the outer door stays locked and the inner door opens and the shipment is carried off into the system.

c/ Postal stamps shall be eliminated, and stamps shall no longer be sold or used by the postal system. Instead, the system shall use system generated labels for postage.

d/ The county recorder system shall manage the ample video security monitoring of the mail and delivery systems.

e/ When oversize deliveries arrive at a gang mailbox, they go into a temporary oversize delivery box for pickup. After 12 hours, the temporary box starts charging the recipient by the hour for late collection.

f/ All new gang mailboxes shall automatically notify all recipients when the mail carrier opens them.

13/ The delivery system shall have means for recipients to report opened and damaged packages.

14/ All grocery stores, gas stations, township rail stations, and the main roads must have mail drop boxes for outgoing mail. If more security and prosecutorial heat is needed, then more shall be provided by government.

15/ The outmoded fax/facsimile machine shall be prohibited, and their signals shall be blocked on the communication system.

16/ The special delivery system shall have regular special delivery and secure mail with video of the recipient receiving/ opening the package and acknowledging receipt of the goods. This is for a price higher than special delivery due to the extra tracking and other extra services.

17/ Some semi-valuables and all prescription pharmaceuticals shall be sent via secure mail from the national prescription filling system. Under this system, the drug manufacturers will bottle and sell their drugs in the various standardized prescription amounts and ship boxes of these to the interchange prescription filling systems of the nation. So when healthcare providers enter prescriptions into the system. The automated drug dispensing fulfillment center at each interchange robotically outputs the bottle, robotically labels it, and robotically sends it out to the interchange's community for delivery.

18/ In our townships, many people will rent a mailbox and/or a general purpose locker at the township's central station. There should always be an overage of these for yearly and daily rental. These will be one floor down from the train level. Also, these mailboxes get daily or perhaps twice daily mail delivery for free. They have hallways for mail carriers on the back side of the boxes, like in the La Jolla post office mailbox area. However, there are more boxes and the boxes are 30 x 20 x 80cm deep, and bigger. There are also bigger monthly boxes, and also boxes for ad-hoc use.

19/ At each mail system delivery, the mail carrier shall scan the package bar code, and the mailbox barcode, and the code of the delivery person gets automatically added, and the recipient automatically gets notified that the shipment has been delivered. This is thought a low-cost, high value-added service for the mail system to offer.

20/ Postage on emails should be high enough to eliminate nearly all spam. Postage on deliveries should be enough to eliminate nearly all private delivery and moving companies.

The piano, sofa and bed delivery services will always still remain, and so will the shippers of refrigerated things, and other specialty deliveries. But nearly all of the rest of the private delivery industry will go extinct, in favor of a universal delivery system run as a public utility that also conveniently reduces road use, and vehicle use, and fuel consumption and vehicle pollution.

21/ The Senate shall establish an entirely new government delivery system in competition with the old postal service and private delivery company system. Once the new system is up and running, and delivering to every address in the nation, the old geriatric postal service shall be shut down, and everyone in the old system let go. Given the profound inefficiency of the geriatric postal service, its staff shall be regarded as uniquely disqualified from working in the new deliver system.

NR'151. PROFESSIONS

1/ To increase competition, and decrease bottlenecks, people licensed to work in a profession or occupation in one county shall be automatically licensed to work anywhere in the nation without further government approval, testing or registration. This shall apply to all lawyers, healthcare workers, engineers, teachers, builders, building tradesmen, architects, accountants, drivers, financial advisors, transport services, and all other occupations and services licensed by government. Also, for all occupations, licenses and professions: In general, we shall have a rule that all the various trades are allowed in general the maximum amount of overlap with other trades, so long as they have 1 foot inside the door so to speak. The trades are supposed to be taught this way so that there's a big an overlap as practical, and the greatest competition and freedom of the people from bottlenecks practical.

2/ All lawyers shall be allowed to work in all courts in the nation. There shall be no special qualifications or admissions to plead before any court in the nation. Lawyers and legal surrogates may specialize, but there shall be no official, or government recognized specialties or subdivisions for lawyers and legal surrogates.

3/ There shall never be any limitation on the number of people in any market, industry, trade, union, occupation, or profession.

4/ There shall be no government tax, fee, or school fees required for either obtaining or maintaining any license, certification, or academic qualification in the nation.

5/ No government approvals shall be required to be a

a/ Hair cutter.

b/ Beautician.

c/ Massager.

d/ Chiropractor.

e/ Naturopathic physician.

f/ Future predictor.

g/ Priest.

h/ Investment manager.

i/ Investment salesperson.

j/ Stevedore.

k/ Building repairman.

l/ Building remodeler.

m/ Landscape architect or designer.

n/ Acupuncturist.

o/ Audiologist.

p/ Athletic trainer.

q/ Interior designer.

r/ Physical therapy assistant.

s/ All other occupations the Senate may wish to de-regulate.

t/ For all of these economic activities, the government shall have lifelong customer comments and replies. Thus people who don't listen, and those who are incompetent will be quickly pushed out of their niche industry.

6/ The county recorders shall all have sufficient test hall space for all academic and occupational testing. Each professional test shall be given no less frequently than once per teneth. Everyone must show an ID and give thumbprint and photo for all official tests.

7/ With the exception of internships for healthcare people, no work experience, school-time, or apprentice period shall be required to obtain any professional license.

8/ Those who pass the Government test shall be automatically considered qualified to work in that profession or occupation for 5 years. At the 5-year point they must pass the new test.

9/ Every professional's test scores and ranks on their most recent test shall be indexed and ranked and made available for public viewing so that the people can accurately and objectively judge the retained abilities of the people they hire.

10/ The lifelong complaint records of all professionals and businesses shall be posted, comment moderated, and objectively ranked by the recorder's office.

11/ Those making complaints against a professional must do so in their own real and lifelong name, which will be indexed for plaintiveness, both positive and negative. This real name will be seen by the recorder's office, and the parties to the matter being complained about, but not by ordinary system users.

12/ All complaints shall be impartially investigated and judged by government. The cost of making a complaint shall be 4-hours wages. If the complaint is mostly correct, the fee is refunded. If the complaint is mostly incorrect, the fee is paid to the national government and a national government intake receipt email is sent by the recorder.

13/ In the first year of this Constitution, government shall require that all active professionals sit for professional re-testing. This first testing shall be primarily designed to look for frauds that have corrupted the licensing process. All professions that require an educational degree must take this test.

14/ Where practical, government shall compile standard national pricing for all commonly delivered services in all professions and many non-professional services. Where government offers standard national pricing, people must generally offer their services as a consistent multiplier of these prices. This multiplier must be registered with government and shall require 30-days advance notice to all ongoing customers in order to change. All professional signage, advertising, name cards, and directory listings shall display this multiplier where it is being used in the same size as the name of the professional.

15/ All companies placing financial market trades shall be

prohibited from giving financial market advice. All companies giving financial market advice shall be prohibited from making financial market trades. Trade placement companies may have commissions, however, financial advisors shall not be allowed to have commissions. financial advisors can have expensive newsletters, but not commissions.

16/ It shall be a felony to attempt to strip someone's professional qualifications for things they said about practices related to their chosen profession.

17/ Social workers must have a 2-year college degree, that is all.

18/ All professionals and service workers and other work on the well-worn-path shall be required to use the Senate's service agreements and payment system. These agreements shall all require payment in advance and work documentation submission by the date stated. They shall also offer easy and rapid termination by either party with no more than 18-day's notice.

19/ Where people have professional qualifications, the licensing boards shall not have any right to punish, discipline, or strip them of their professional qualifications, except in conditions where they repeatedly provided sub-standard service to their customers, or where they kill or harm a large number of their customers. In matters of free speech, particularly professional commentary about the processes and procedures that all of their profession undertake, the licensing boards shall not have any right to punish, discipline, or strip people of their professional qualifications. Also, licensing boards shall not have any right to establish professional policy. Only the Senate shall have the power to establish professional policy.

20/ In general, all the construction trades and professions are supposed to overlap. This is so there is no situation where an area isn't covered.

21/ Neither government nor anyone else shall be allowed to limit how many people may work in any industry or profession so as to drive towards higher prices in that industry or profession.

22/ Regarding professional practices such as accountants lawyers, doctors, veterinarians, architects, etc. All of these must be at least 80% owned by the professionals in their field. They may also be up to 20% owned by business types. There shall no longer be professional corporations. Now they must do business as corporation-like partnerships that are 80% professionals in that field.

23/ Regarding licensing for things like landscape architecture and hairdressing and acupuncture or being a tattoo artist or a piercing person, all of these professional licenses are for people who are operating businesses doing these activities. Government only regulates the business activities. And there is no right to stop other unlicensed people from being a hairdresser or landscape architect if they can get the business. Also, where people are doing chiropractic on friends, or they they pierce each other's ears, or they give each other tattoos, or they cut somebody else's hair. The government is not allowed to get involved with these kinds of small informal activities involving people who know each other there already. Governments only right to regulate business is for commerce claiming to be certified by government.

24/ There are supposed to be various levels of training in various fields of study and also professional abilities.

NR'152. INDUSTRY STANDARDS

1/ Regarding all markets, professions, occupations, markets, industries, and exchanges, neither Government nor anyone else shall limit the number of participants, or delay market entry, or charge for market entry, or restrict or assign territory, or institute excessively burdensome qualification requirements. The foregoing does not include innovator and commercializer IP. All prior grants of restricted competition such as taxi medallions are hereby void. And if there will every be any sort of taxi medallion, the number of medallions issued shall not be limited. Also if there are any taxi/cab/transport medallions (or similar privilege rights) issued in the future, that are valid for more than 37-days, these shall be void.

2/ When industries set their own standards, they normally impose standards that reduce membership, reduce output, reduce competition, and increase cost to the market. Therefore, the Senate shall elect all standards for all industries, professions, products, buildings, services, business activities, ethics, and especially education requirements.

3/ No professional, industry, or trade organization may establish any industry standards without Senate approval. Industry standards shall only be imposed by the Senate.

4/ Senate elected professional standards shall not exceed the minimum needed to protect the public, and they shall err on the side of too-few regulations. Beyond this point, higher minimum standards quickly become less valuable to society than competitive markets.

5/ There shall never be any liability for those who generally comply, or act in good faith in complying with the standards set by the Senate.

6/ No limitation shall be put on the number of people participating in any market, industry, trade or profession.

7/ For all manufactured goods, it shall be a crime when vendors use their names and own serial numbers instead of the manufacturer's names and numbers.

8/ All serial numbers of all manufactured products, the last 3 of 4 digits (after a hyphen) of all product serial numbers shall be the year and teneth of manufacture.

Then the last and final number shall speak about the quality of the goods as follows:

a/ All first rate products shall end in a 1.

b/ If they come from a problem manufacturing run, the last number shall be a 2.

c/ If the particular item was damaged during manufacture, the last number shall be a 3.

d/ If there is slight cosmetic damage during manufacture, the last number shall be a 4.

e/ If there is major cosmetic damage during manufacture, the last number shall be a 5.

f/ If the product was reconditioned, the last number shall be a 0.

9/ The Senate shall (with the help of various manufacturers suffering from counterfeit goods) compile and keep an online museum of counterfeit goods. This shall show the people

what to look for in counterfeit good and how to tell if they are fake. The Senate counterfeiting website shall also have indexes of all official retailers of each manufacturer's goods.

10/ The Senate shall create a code of required-compliance general business ethics, and specialized ethics for the various industries as applicable.

11/ All of our nation's aircraft, both civilian and military shall contain parts only made in the US by native born citizens who have passed the tests on the things they are making. All civilian airline parts shall have a logged history of people who have touched them. All parts must be made in a FAA aircraft parts manufacturing zone, where all the inputs and inbound shipments are verified by FAA inspectors as to material used.

12/ It shall be considered fraud when businesses intentionally delay the provision of their services so that higher fees can be charged for faster service. All abusive charges for prompt service and all abusive late charges by large businesses shall be subject to retroactive Senate regulation, retroactive punitive damages and retroactive MECOT taxation.

NR'153. LABOR UNIONS AND GUILDS

1/ The term labor union shall be understood in a very broad sense, and shall include all labor organizations, guilds, industrial unions, craft unions, and other labor related organizations. It shall apply anywhere a group of people are working in a field get-together to improve their financial situation as workers by meeting and strategizing together.

2/ Labor unions (like employers) shall not be allowed to have or manage pension funds for workers. Labor unions shall also not be allowed to manage other pools of money in excess of the base amount a labor union would ordinarily need to operate. This is because such treasure-chests of group money are normally misspent, misappropriated, redirected, squandered for profit, pillaged, or simply stolen. Remember: group money has both the biggest treasure-chests and it is also the easiest to steal.

3/ All existing labor union pensions and pools of money shall be frozen for up to 3-years pending a Senate plan for the liquidation and fair redistribution back to each fund's contributors. During this time, we shall kill all of the nation's labor unions and then let them grow back, but with completely different management and labor union staff (not membership) and completely different rules and organizations. All current labor union leaders and staff (not membership) shall be forever excluded from working in any labor union for life. Also, there shall be no new labor unions until this Constitution has existed for at least 4-years.

4/ No employer shall ever pay or funnel any money to any labor union, either for their own account or the account of their workers. It shall be considered felony fraud when employers pay money or things of value to labor unions, or people at labor unions accept gifts from employers or potential employers.

5/ No labor union shall ever have mandatory dues or payments of any sort from their membership. All payments to labor unions shall be voluntary. Labor unions shall be prohibited from even suggesting dues or other amount to be paid. Also, foreigners shall not be allowed to work in labor

unions. Foreigners shall be required to stay away from all labor unions.

6/ All monies paid to labor unions shall be made via the county recorder system. This system shall track all inflows and outflows of the labor union's money and report the same to the union's membership, together with who authorized the payment.

7/ No contract or agreement of any sort shall be made by any labor union without a majority of members voting in favor. No money shall be paid from any labor union's account without a majority of members voting in favor of the expenditure. The county recorder system shall verify that the voting occurred and the contract is acceptable.

8/ All employers must allow their workers to hold union meetings at their workplace. Employers may record the meetings, however they cannot harass the workers either at the meeting, or afterwards. Employers would be wise to view these meetings as a forum for open discussion and a valuable source of information about what the workers want. What is said at these meetings shall be considered private conversation said away from the workplace and hence it shall be considered protected, no matter what insults are expressed to either ownership or management.

9/ Labor unions and employers shall no longer be allowed to offer retirement plans, because these so often end up get raided by either their employer or government, or the company goes bankrupt, and the pensions get sucked into a bankruptcy maelstrom. Better that the retirement money funds the government, and the obligations of retirement money is more certain to come back to the person paying it. But nothing is perfect, and the best solution is to own your own home and to have kids to take care of you when you get old.

10/ No labor union shall be allowed to:

a/ Discuss or exert influence over matters not directly related to the employment conditions of the workers that are their members.

b/ Act as a political party, or lobby government for anything at all. As with all other fictional citizens, it shall be a felony for their leaders to lobby government either openly or secretly.

c/ Work with other labor unions to form coalition(s), meta-union(s) or political party(s).

d/ Have a representation ratio narrower than 1:500.

e/ Have less than 500 members, or more than 100,000.

f/ Require the payment of dues or other monies. Voluntary dues and donations shall however be allowed.

g/ Compel membership in any way, or create incentives among workers driving towards membership.

h/ Effectively close any industry or workplace to non-union workers.

i/ Work to limit the number of potential workers available to increase wages for the membership.

j/ Harass or intimidate non-union workers including strike breakers.

k/ Get involved with employer paid healthcare not related to on-the-job injuries.

l/ Get involved with matters of mental health.

m/ Pay for advertising.

n/ Purchase luxury products or services including luxury first class fares and top 20% lodging.

o/ Employ specialist labor union managers. Instead all union leaders must come from the rank and file of the labor union, and none shall serve for more than once per decade.

p/ Take money from foreign governments, or foreigners, or zillionaires, or make policy choices that favor these.

x/ However, all labor unions shall always be free to push for higher pay, safer working conditions, better equipment, better training, better rest areas, and better dormitory housing if applicable.

11/ No labor unions or strikes shall be allowed for:

a/ Where companies get work from a competitive bidding process, including especially companies bidding for government work. Even factories that bid should not have to have labor unions.

b/ Government workers and government contractors and the employees of their contractors and sub-contractors. Also, anyone directly or indirectly paid by government. This is because our legislatures are fairer and less corrupt arbiters of government employee pay when acting alone, than with the corrupt influence of a large constituency of government workers unified under a labor union. The later situation leads to overpaid and complaisant government workers.

c/ Those working for regulated monopolies such as utility companies. This includes the employees of their contractors and sub-contractors. Those working for any monopoly or cartel situation. This tends to lead to a sort of gordian knot situation where a monopoly acts as a shell for an easy to control constituency of overpaid obedient union workers/ voters beholdng to the people that gave them their oversized paychecks for their easy job.

d/ Those working in education and schools as well as those working for those working for police departments, fire departments, paramedics, pharmacists, and critical services.

e/ Those working in the military, military supplies, and weapons manufacture in times of hostilities.

f/ Those working in basic commodities such as oil exploration, oil drilling, oil transport, oil refining, oil vending, coal mining, coal transport and coal vending, metal mining, metal smelting and metal mills.

g/ Farmworkers and others working in agriculture

h/ Road builders, Rail builders, and other sorts of construction contractors due to the short term nature of the industry

i/ Those working in rail vehicle manufacture, railroad building, railroad operations, and those working in other aspects of railroads.

j/ Those working in trucking, communications infrastructure, and other critical industries because this leads to extortionate demands from the workers. The term public utilities and critical services includes the delivery system, the mail system, airports, train stations, rail carriers, and airlines.

k/ In new industries and new technologies less than 15 years old. This is to stimulate the full development of these new industries, and new technologies, and the eventual creation of more new jobs that may be unionized after the new industry is 15 years old.

l/ Where the average worker turnover is less than 2 years, including people hired back. In these transitory positions, higher job mobility assures market wages better than labor unions.

m/ Where there are 10 or more competing and non-related employers in an industry in a single county. In this situation we have a free market, and free markets are in the long run far better than labor unions in pricing labor.

n/ Where there are 50 or more competing and non-related national employers in that industry. In this situation we have a free market, and free markets are in the long run far better than labor unions in pricing labor.

o/ In inspiration work such as: design, science, engineering, programming, media, acting, music, dancing, sports.

p/ In jobs where there is little or no learning curve, or the skills are generic, and all workers are easily replaced.

q/ For food service, restaurants, or grocery stores.

r/ For film making, actors, media, Internet media, music, television, radio, news media, magazines, newspapers, books.

s/ For people working in transportation, logistics, freight, trucking, ports, loading and unloading, warehousing, public transit systems, movement of goods or people, or production of key goods, because of the power these people would otherwise gain over the remainder of the nation.

12/ Where people work independently on their own initiative and mostly on commission, tips, or marking up some product or service sold, these workers shall generally be regarded as independent contractors. All other workers shall generally be regarded as employees. There shall be no labor unions for independent contractors.

13/ Government shall not discriminate in favor of unionized workers in any way. Workers shall not be denied the right to organize, to unionize, or withhold their labor from their employers for better pay, except in the following circumstances, where labor union activity and striking shall be prohibited:

a/ In a time of invasion, full-mobilization for war, impending full-mobilization for war, huge natural disaster, supply crisis, and when the Senate elects to declare a state of emergency for just cause.

b/ Workers in healthcare, or essential services, because of the power these people would otherwise gain over the remainder of our nation.

c/ Workers in transportation, logistics, freight, trucking, ports, loading and unloading, warehousing, public transit systems, movement of goods or people, or production of key goods, because of the power these people would otherwise gain over the remainder of the nation. This includes everyone working in: ports, airports, airlines, shipping companies, railroad companies, transit companies, trucking companies, teamsters, taxi drivers, bus drivers, mail carriers, delivery workers, and any other form of logistics or transportation-related workers.

d/ Employees of government, regulated monopolies, and private companies or individual plants get more than 50% of their income from Government contracts, or Government payments, or more than 50% of their output is sold to Government, or paid by Government. This is because our legislatures are fairer and less corrupt arbiters of government employee pay when acting alone, than with the influence of a large constituency of government workers unified under a labor union. The later situation leads to overpaid Government

workers. Also because there is nobody on the other side trying to wring every dollar from the negotiations.

14/ There shall be no right of labor unions to increase pay and benefits beyond market levels. They may however prevent below-market pay and benefits. The Over-Senate may step in and adjust the terms of any labor union agreement that it elects is significantly over-market. Also, when everyone and his brother wants to get in on the high paying union job action, the labor price is too high.

15/ The Over-Senate may elect to establish, raise or lower pay amounts where:

a/ Labor unions are prohibited.

b/ In genuine crisis situations.

c/ The proper functioning of the labor market is being distorted by some temporary externality.

d/ Where some small party or group (including the actual workers) is making a windfall from misplaced labor rates.

e/ Where private companies or individual plants get more than 50% of their income from Government contracts, or Government payments, or more than 50% of their output is sold to Government, or paid by Government.

16/ Labor unions shall not be allowed to negotiate the following with employers:

a/ Any matters concerning the operation of the business the workers are engaged-in that is not directly and entirely related to the workers wages or working conditions.

b/ Any matters of worker seniority, apprenticeship, training, education, or certification.

c/ Any matters relating to variations in worker pay or worker incentives. Labor unions may only negotiate on matters of average pay, including employer incentives.

d/ Non-work-related benefits. This includes especially, non-work-related health benefits.

e/ The number of workers or jobs in a facility or position.

f/ The number of available workers.

g/ Monies paid by the employer or the employees to the union.

h/ Matters related to the automation of certain jobs by investment in plant and equipment and robots.

i/ Matters of offshoring or re-shoring of work.

j/ Length of the work day, or overtime rates.

k/ Work scheduling, or break times including breaks.

l/ Non-dormitory housing, or worker-provided meals.

17/ No union shall prevent or delay the implementation of automation, or restrict the numbers union members/workers. it shall be a crime when union leaders cause either thing to occur. Unions that call for prohibitions on automation in their industry shall be shut down, and the people calling for these prohibition may be charged with a crime. Where union workers go on strike to prevent automation they may be compelled to work by the courts, and if they failed to, or if they sabotage their work, they may be jailed for this. Penalties for violent crimes by strikers, and against strikers, and strike breakers shall be doubled.

18/ Non-citizen workers in fenced-off foreign worker zones shall not be allowed to unionize. However, the Over-Senate shall establish a minimum wage for such foreign workers. Also, these foreign workers shall be allowed to write and talk to government about safer working conditions, safer

equipment, better training, better rest areas, and better dormitory housing.

19/ It shall be a crime to threaten, coerce, force, or intimidate people into either participating or not participating in a labor union.

20/ Employers cannot require that their employees join or quit any labor union. In matters of hiring, firing, and promotion, employers shall not discriminate, either for or against workers based on their labor union membership. Nobody shall be forced or directed to pay money to labor unions as a condition of employment.

21/ All labor unions of every sort shall be considered fictional citizens. As such, they shall all be prohibited from engaging in the activities that fictional citizens are prohibited from engaging in. For example, they cannot lobby government, or run ads to express how they stand on various public issues.

22/ There shall be no guilds where independent workers organize. Architects, realtors, chiropractors, psych doctors, lawyers, and teachers are not allowed to have any kind of organization that advances their professional causes or lobbies the government for them.

23/ There shall be no labor unions for small entirely independent companies entirely owned by one person, or one family, and with fewer than 500 workers. Where the industry is large and the industry employs over 100,000 people nationwide, there shall be no labor unions for small entirely independent companies entirely owned by one person, or one family, and with fewer than 1,000 workers. Where the industry is very large and the industry employs over 300,000 people nationwide, there shall be no labor unions for small entirely independent companies entirely owned by one person, or one family, or a partnership of fewer than 10 people, and with fewer than 2,000 workers. We have these exemptions from labor unions because:

a/ Labor unions are only justified and beneficial for industries where there are only a handful of giant companies (or fewer). In industries where there are hundreds (or even dozens of competing companies), competition in a free market will better assure the long-term high wages for skilled workers.

b/ It is of utmost importance for the long term availability of high paying jobs that our nation incubates many small competitive companies.

24/ Labor unions shall be viewed as a thing whose time has mostly come and gone, and a thing that is no longer totally necessary given today's giant mobile labor force. For this reason, the Senate shall slowly phase out labor unions by increasing the size of the firms (as in the above paragraph) that are exempt from having labor unions over time. Also, the existence of the Niagara foreign worker zone combined with the abolition of the income tax, and the extensive deregulation of manufacturing contemplated herein will transform the economic reality of people working in rustbelt industry.

25/ Government shall not dictate that any project or enterprise (whether by Government or the private sector) use union workers, or pay prevailing wages, or make any demands about the minimum wage paid to workers.

26/ Government shall not be allowed to hire or employ union workers. This is because hiring union workers has traditionally created large voting constituencies that feed on

overpaid government jobs. Then these constituencies lead government in the direction of corruption, and an opposition party that is a socialist coalition of this sort of corrupt interest.

27/ In times of war and deflation, all labor unions shall be shut down. After the war/ deflation crisis, all unions shall be allowed to grow back with new people from the rank and file of the labor union.

28/ Labor unions shall be regarded as a thing that in invariably turns into a total mafia scam within a decade, just like socialism and communism. All of these systems where money is reapportioned by either government or some organization are all eventually corrupted, and 90% the annual money flows eventually get stolen. For it will invariable be Ishtar that climbs into the drivers seat and steals all the money. Therefore Ishtar with its very long time horizons loves labor unions.

29/ No labor unions managers may be politically active, and it shall be a felony to work in a union either before or after serving in government government.

30/ Until 2035, there shall be no labor unions for any vehicle manufacturers, or commodity manufacturers in our nation.

31/ We must be able to get our national economy back on its feet and have a economy that provides all classes of commodity and manufactured goods as our economy once did. This will not be possible with labor unions sucking all the money out of our nation's commodity production and manufacturing industries.

32/ Labor unions like socialism shall be seen as more of a problem, than a solution by our people. In fact, either one of labor unions or government regulation can easily totally ruin a nations manufacturing base. Therefore we shall be very careful with both empowering either one.

33/ All existing labor unions shall be shut down, and their bosses and leaders all excluded from working in labor unions for the rest of their lives. Only after 2035 shall we allow labor unions to come back, and then there shall be strict rules of conduct, including no political involvement in the broader government.

34/ Labor laws shall be regarded as too extensive and too powerful in our nation and in Europe and some other developed nations. All of these workers would more money over the long run if they had a slight relaxation in the labor laws, especially those laws and rules having to do with hiring and firing people, length of the work day, group healthcare, and individual vs. collective pensions. However, in the developing world, labor unions are not nearly strong enough. So our nation shall push for stronger labor unions in Latin America, Africa, India, China and Southeast Asia for the good of the people worldwide. Also, training for the low skilled people of the developing world shall be thought key to controlling world population growth.

35/ We should all long ponder how the ports and trucking labor union strike of October 2024 did not affect the China side of our nation. Instead it only affected China's competitors on the other side of our nation. This shows another problem with labor unions in logistics. Namely that they can be corrupted by foreign nations to drive their competitors out of business. Here is yet another reason why there cannot be labor unions for key industries and especially those involved with moving goods.

36/ In our nation (including its foreign worker zones), our labor unions shall only be for our citizens, and no foreigners shall be allowed to join any labor union.

37/ It shall be thought very easy for Senate juries to order union workers in critical industries to go back to work for a short time.

38/ Union violence against replacement workers shall be subject to triple penalties.

39/ It shall be thought very easy for a grand jury of Senators to order union workers and critical industries to go back to work for the short time under penalty of being jailed and fired and barred from their industry for life.

40/ The UAW and the Teamsters unions shall be closed down and no new labor until 2031.01.01. There shall be no unions in Mexico, Niagara and Nova Scotia or old New Brunswick.

41/ It shall not be allowed for unions to organize mass general strikes as they do in Europe, as this plays in to the hands of so-called communists.

42/ Unions may only work in one industry, and when they cross over to other industries, they shall be considered as violating their right to exist, and these unions can be shut down permanently.

43/ Labor unions shall not be allowed to use the money court system as plaintiffs.

NR'154. IP MONOPOLY PERIODS

1/ With regard to IP or Intellectual property, government's objective is firstly to assure that innovators, discoverers, and creators are properly rewarded, and innovation well encouraged so that many people will continue to strive for innovation. Government's second objective is to assure that innovations are diffused as quickly as possible. Government shall be free to achieve these twin objectives either through the market, or through ubiquitization by the public.

2/ Government shall offer no IP rights unless:

- a/ We want more of the thing we are protecting, and,
- b/ Output can be increased through IP protection.

3/ In all awards of exclusive IP rights, government shall be prohibited from using long-tail profits as a reward. For this reason, no IP monopoly right shall live for more than 21 years including renewals.

4/ The patent office may only grant patents that last for up to 17 years. Only the Knowledge Sluice shall have authority for matters related to IP.

5/ No IP monopoly shall be extended through subsequent major developments and subsequent patents for more than 50% of the initial period. No IP monopoly shall be extended through subsequent minor developments and subsequent minor patents for more than 20% of the initial patent period.

6/ All IP monopolies shall expire if working mass produced products are not introduced to the market at a reasonable mass production price by the halfway point of the protection period.

7/ The following maximum IP monopoly periods shall apply. Where multiple classifications apply, the one with the shortest term is applicable. Existing IP rights already over the following ages are hereby expired, and the subject IP is hereby in the public domain:

- a/ Political and news media — 4 hours.

- b/ Printed periodicals — 30 days.

- c/ Download only periodicals — 4 years.

- d/ Media of a partly or wholly fictional in nature — 8 years.

- e/ Media that depicts the use of swords, punching, fighting, shoving, physical conflict, firearms, laser guns, bombs, explosives, or vehicular assault, 3 years.

- f/ Media of a strictly non-fiction or educational nature that has no music — 17 years.

- g/ Serialized fictional media 2-years. Serialized fictional media shall be regarded as a squandering of human potential. All fictional characters older than 8 years old shall now be considered public domain and shall no longer be subject to any IP protection. This shall include: Mickey Mouse, Daffy Duck, Darth Vader, Harry Potter, Superman, Batman, and Indiana Jones among countless other fictional characters.

- h/ Serialized educational media 17-years

- i/ Mass produced building components — 17 years.

- j/ Electronic hardware — 12 years.

- k/ Computer software and operating systems — 10 years, except where the software is delivered over the cloud or as a service, in which case the IP period shall be 2 years. All versions over this age shall be in the public domain. The uncompiled source code for all software over 12 years old, shall be made public.

- l/ Technologies and processes that are mostly delivered over the internet — 12 years.

- m/ New cures for diseases — 17 years from approval by the government's drug approval administration. Also Senate Ubiquitous money shall be heavily skewed towards rewarding cures over treatments.

- n/ New treatments — 10 years from approval by the government's drug approval administration. This is for when the drug does not cure and must be taken for a long time. For cancer treatments the IP period shall also be 10 years. As is the norm herein, all existing IP over the IP monopoly period for that class of product or service that is already of the maximum time period shall be considered immediately expired. Also, there shall be no recognized drugs or drug-like treatments that are less than 5% more life-extending than control groups with the same health problem over the lifetimes of the subjects (from the start of the test), using a giant test group and a giant control group. However this 5% number may be reduced if there is some definite improved palliative, or improved quality of life improvement in the equation. Furthermore, all treatments that are less than 8% more life extending than a control group shall not be subject to IP protections. Finally, where treatments are less than 3% more life extending than a control group, these shall be considered as failing testing due to limited efficacy.

- o/ In order to be classified as a cure, the drug or treatment must cure at least 90% of the people who receive it. If it doesn't cure at least 90% of the people who receive it, then it shall be called a partial cure, which shall still be favored by the Senate. Partial cures effect a cure on between 10% and 90% of the people who take them. Partial cures shall be regulated differently than regular cures and occasional cures that cure between 2% and 10%. Non-cures cure less than 2% of people who take them

- p/ Human genetic material, biological inventions — 14 years.

Also, there shall be no DNA patents unless they are both remarkable and substantially beneficial in a clearly articulated way.

q/ Healthcare-related testing — 14 years.

r/ Seeds and livestock — 8 years.

s/ Mining — 10 years.

t/ Well-drilling 6 years.

u/ Energy generation or conveyance — 8 years.

v/ Oil and coal processing — 6 years.

w/ Path dependencies — 12 years.

x/ Privately developed military equipment — 12 years.

However where Government pays to develop anything, Government keeps all the IP.

8/ Wherever government pays for or sponsors the private sector to develop some new technology, or new treatment, or some new thing, then Government shall own the intellectual property rights for that technology or thing. Then government shall be free to hire companies to produce parts or all of this IP as it elects. This rule is intended to increase competition, and to make it cheaper for government to make things for the people.

9/ Regarding old works that are no longer under IP protection, publishers shall be prohibited from editing these in any way, including abridging them. Furthermore, it shall be a crime to alter the words of old public domain works, or to have an abridged work in any library.

10/ Where we ban intellectual property rights for seeds, this shall include all pesticides and fertilizers that work with seeds and germination of plants and treatments for plant and livestock diseases, and similar such things that are required to make agriculture work, or not work.

11/ Regarding the IP laws for sequels, the entire "franchise" expires with the expiration of the IP for the original work.

12/ In order to reward inventors, the government IP system shall try to rule on all clear and big money cases of IP infringement automatically, and without the inventor or his successors having to waste any of their time on this. It shall be noted that a situation where inventors must spend any time in court at all arguing over who owns their inventions is clearly a system where government is getting in the way of progress. It is also the sort of system that favors the sort of large immortal fictional citizen that typically fronts for hostile foreign interests that hide behind corporations. However, where government enforces patent rules free of charge, and with minimal time on the part of the inventor or his successor patent owners, that's the situation that rewards inventors.

NR'155. NO IP MONOPOLY RIGHTS

1/ Government shall no longer offer patent, trademark, or copyright protection for creators/owners of the following intellectual property or IP. All of the following shall only be rewarded with Ubiq status and Ubiq payments if any. :

a/ All recordings of sounds including music, sounds, concerts, dancing, or media depicting musicians playing their music, or dancers dancing. Also included are sheet music, and audio-books for books outside of their new copyright periods. Also, dance moves, gestures, and hand signals of meaning such as sign language words, and computer actuation gestures. No sound oriented IP shall be covered by intellectual property

protection. However the artists shall have the exclusive and non-transferrable right to their own name and whatever sounds they make in live performances.

b/ Athletic displays and sporting events, and media depicting or simulating these.

c/ Photographs, even artistically manipulated photographs. Also text/font designs and page layouts shall no longer be subject to IP protection.

d/ Images of human nudity, if it depicts the human skin between the the armpits and the top part of the legs less than 4cm below the crotch of the person while they are standing.

e/ All live recordings of newsworthy events.

f/ Performances that are indistinguishable from reality, or performances that attempt to spoof reality.

g/ Public speaking and educational lectures. Our new educational video system will be funded by over a billion dollars a year in X prizes.

h/ Government standards, or industry standards, Government and community meetings, plans for public property, public facility design, functions of government, cultural customs, the financial system, the education system, the various religions, other institutions, and similar things involving the activities of large numbers of people. The prohibition on financial system IP shall include all trading systems, all clearinghouse functions, all processing systems, auditing systems, interfaces, and especially all profitable activities in the financial system.

i/ Transaction systems, auction systems, pricing systems, billing systems, accounting systems, economic systems, marketing systems, contracts, and similar systems once they are used for everyone the government must buy them out. So there shall no longer be any privately owned IP in regard to the financial system.

j/ Wires that connect electronic devices and chargers. Computer operating systems, search technology, search data, website design, website technology, human to computer interface design.

k/ Material having to do with politics, government, public policy, economics, history, or the public discussion: The only right for these things shall be that of authorship credit. All of this material may freely copied without attribution — it cannot however be misattributed.

l/ Replacement parts, parts that wear out quickly, and parts that need refilling. This is not the sort of reward we want to give to discoverers, inventors, or even manufacturers.

m/ The architectural plans and architectural details that building designers, architects, and engineers prepare for clients. These may now be freely copied without limit as they typically copied anyway without limit. It shall be thought far more important that we share plans without limit, and have inexpensive buildings, that we have a bunch of redundant, overpriced custom building designers that are never as good as they purport to be anyway.

m/ Beauty contests, be they for humans, animals, or architecture.

n/ Speed races, including vehicle races and animal races.

o/ Fictional names and terms from fictional media that are over 10-years old. It is far better that we have more characters than we have geriatric and lame characters like Mickey Mouse, Daffy Duck, and Buck Rogers,

p/ Fresh translations or re-hashes of material that is outside the copyright period.

q/ Addictive drugs, or addictive medical treatments which must be repeatedly taken without end once treatment has started, or the recipient will die or suffer significant harm.

r/ Public discussions, and especially political forums and debates, and candidate speaking, and similar things.

s/ Sex change hormones and other sex change drugs.

t/ Artificial insulin, and all other artificial hormones that are older than 17 years old.

u/ Cultural customs, Financial system processes, system standards, and Government activities.

v/ All foods that contain over 20 grams of sugar per 100 grams of dry weight. All brands of just add milk breakfast cereals that contain over 12 grams of sugar per 100 grams of cereal. All non-alcoholic beverages that have over 3.5 grams of sugar per 100ml (This includes all juices, which are not thought to not actually need IP protection).

w/ There shall be IP protection for registered luxury apparel items that pay luxury sales tax of at least 50% (resulting in a doubling of the sales price). Also, there shall be IP protection for the Senate's high-quality, standardized garments. However no other apparel shall be protected by Government IP protection. The term apparel shall include all sorts of clothing, footwear, gloves, hats, handbags/purses, belts, underwear, outerwear, jewelry, textiles, and mechanical time keeping devices. Unless these things are registered luxury products, they shall have no IP protections, and may be freely copied and counterfeited.

Modern computerized manufacturing has gotten us to the point where there is almost no difference in quality between cheap and costly apparel. Today, apparel is all about advertised brand image. But we don't want this money in our media shaping either content or ads. And we certainly don't want this money constantly telling women they are fat and that they don't dare have another infidel baby or they will ruin their figure.

x/ All fictional characters that have any shade of scientific, genius, or moral, or public policy cred. For example the fictional character Mr. Spok. Nobody shall be allowed to create some super-human and immortal character in the mental-verse, and then have the exclusive right to forever determine what their super-human mind character says and does. This is something that inherently shouts over the organic voice of our flesh and blood citizens. And for that reason, there shall be no IP for any fictional genius. In fact, the Senate shall have the right to censor and ban all of the genius Mr. Spok sorts of characters.

2/ Research done in connection with institutions that have any sort of tax-free, tax-reduced, or non-profit status, or that take money from government.

3/ Where everyone agrees that there is a gold-rush in some industry or industries, the IP protection periods shall be cut by 3/4 in year 1, and 1/2 in year two, and 1/4 in year-3. Then back to normal. Also, during gold rushes, and other times, nobody gets to use the IP rights system to call first dibs on solutions that are obvious to many people.

4/ We shall not give IP protections where people come up with derivative designs and names, and content — where they fail to make a significantly different new thing that

deserves monopoly protection from Government. This sort of IP protection for derivative works is an insidious thing. It tends to lead to patent-entitled copy-cats abusing the legal system to enforce "their IP" and stealing the rewards justly due to the genuine creators.

5/ It shall be a capital offense to develop, or give people health problems in order to sell them a treatment or a cure. And this shall include all conspirators. No IP rights shall apply under conditions where the people selling the cure had anything to do with the disease either being developed or getting out. Also, both the workers and the fictional citizens managers knowingly involved in this sort of sickness-creating, or gain-of-function research shall be subject to this capital punishment.

6/ To prevent people from giving us a disease to sell us the cure, we shall say that no vaccine treatment or cure for any new diseases or new variety/mutation of a disease, shall subject to IP protection unless the Senate elects to make an exception to the general rule.

7/ There shall be no IP rights for diseases. It is important that we don't have any monetary reward system where people invent diseases in order to sell expensive treatments to the world. On the other hand, it is not very important that our drug companies be rewarded for getting lucky by having a new market for an old drug. Also, there shall be no IP rights for herbicides, bioweapons, or chemical weapons.

8/ In general, all recommended treatments for all infectious diseases shall be required to be ubiquitized.

9/ Where a treatment/cure existed before a new disease, the public shall have the right to use the treatment for free in treating the new disease.

10/ It may be considered a felony to use the intellectual property system to keep cures and discoveries secret.

11/ Technology and inventions that can be considered as helping Big Brother to spy on people shall generally not be subject to IP protection. Therefore, cameras and microphones and handphone locating tech, and similar things shall no longer be subject to IP protection.

12/ Whatever has been offered as freeware by its creators shall be considered as public domain with regard to discovery patents. However, this shall not be so in regard to development patents.

13/ For all human interfaces, the nature, organization, layout, and presentation of the various commands, the button design, the organizational trees, and just about anything related to an interface shall not be subject to intellectual property protection. New designs may receive Ubiq rewards, but there shall be no IP rights for interface designs and everyone shall be free to use all aspects of all interface designs.

14/ Patent holders shall not be allowed to buy similar or competing patents, or to work with other holders of similar or competing patents to form cartels that prevent other others from entering the market. Where this is discovered all patents involved shall be cancelled and the IP involved shall be put in the public domain.

15/ All existing IP for all vaccines and infectious disease treatments shall be nationalized. It is far more important that the people know the truth with regard to these critical things, than we reward inventors with profit incentives. Instead, like

everywhere else where we cancel IP, we shall exclusively rely on the Senate's ubiquitization system to reward the actual discoverers. Also, naturally, the ubiquitization payments for infectious disease discoveries shall be some of the highest of any industry.

16/ There shall be no IP protection for Herbicides, herbicide resistant plants, pathogens, and pathogen resistant life forms.

17/ There shall never be any IP protection for treatments when effective cures already exist.

18/ There shall never be any IP protection for treatments that cannot be objectively, statistically, and measurably demonstrated by the Senate to either improve quality of life, or to extend life beyond 10% of any patient groups remaining lifetime. For example, a chemotherapy drug that is given to people with a certain form of cancer as a patient group.

19/ Regardless of what laws the Senate may pass in the future, it shall be a felony akin to food adulteration to put secret treatments, secret drugs, or secrete vaccines in other things such as foods, beverages, livestock and crops.

20/ Political matters and political uses shall be considered above and exempt from IP protections." The right to keep people from using your trade name or copyright or patent shall not extend to political usage, and it especially shall not extend to political communication about misconduct, regulation and punishment.

21/ It shall be a crime for people, fictional citizens and their lawyers to submit baseless demands that people cease the use of some IP that they clearly have the right to use.

22/ Wherever Government pays for any part of the research, or the research is conducted by a tax-exempt non-profit organization, Government and the people shall have the right to use the intellectual property rights for free. In other words, wherever Government pays for any part of the research, or the research is conducted at a tax-exempt non-profit organization, the work shall be in the public domain.

23/ Misspellings of generic terms that play on the true meaning of the generic term shall now be regarded as generic terms under trademark law. Also, when a trademark holder misspells a generic term, they shall have no claim to other different misspellings of that generic term.

24/ Once a celebrity, dies, such as Marilyn Monroe, or Elvis Presley, the name shall go into the public domain for anyone to use. There shall be no right to inherit a celebrity name.

25/ No exclusive publishing or distribution agreement between an author and a publisher or book distributor shall be binding upon the author. Also, the Senate shall smitheren all of the biggest publishers because they have too much power over the people.

26/ All existing IP for elevators, airport security scanners, and windows shall be nationalized.

27/ There shall be no IP protection for breakfast cereals, candies, sweets, sodas, liqueurs and other things which are more than 20% sugar by weight.

28/ It is hoped that many men will sit around and dream stuff up for others to make. It shouldn't be necessary to do anything more than come up with the idea to get rewarded. And the rewards should be disproportionately given to the people that first utter those new ideas. These utterers, or utters, these first inventors are what is scarce. There's a huge

supply of everyone else. So these utterers get the biggest part of the IP rights.

29/ If any IP holder wishes to sell their interest, they must file a notice of availability with the Senate. Once a notice of availability has been filed, the IP will be valued a bit low and put up for auction by the recorder system which will not take any money for this service.

30/ There shall be no IP protection for names for businesses or products that are racist or offensive such as FCUK, or Banana Republic. All existing brands like this must find a new name.

31/ All IP and all other assets owned or held by Ishtarians and illegal aliens shall be nationalized. All assets (including especially the IP) that is majority owned by the frontmen of Ishtar shall be nationalized. There shall be no IP protection for the name Nestle.

32/ After 2030.01.01. all existing processed meat and breakfast cereal brands shall be nationalized and ended.

33/ There shall no longer be any no IP rights for sex change drugs, and all sex change drug IP shall be nationalized. This is so that no sex change drug company pushes for more society-corroding transsexuality. Also, government shall be the exclusive seller of sex-change hormones and these shall be heavily taxed so they cost half of the average wage per year.

34/ There shall no longer be any IP rights for seeds, or plant cuttings, or plant genetics of any sort. Instead, plant breeders shall be compensated entirely by the ubiquitization system. All IP for plant seed varieties and plants is hereby nationalized. This includes all pipeline seeds and seed technology and cross pollination. Also, pollination and cross pollination shall always be considered and act of god sort of thing that nobody is ever responsible for. Anybody who needs to stop cross-pollination must go to a island or desert to do their growing.

35/ There shall no longer be any IP rights for software applications that existed in any form prior to 2009. All software applications (along with their source code) shall now be put into the public domain once it reaches 17 years old. You made your billions, now that is over.

36/ There shall be no IP rights for replacement parts, and this especially for parts that need several replacements or refillings, or reconditionings, or repairs. Also, manufacturers shall no longer be allowed to sell replacement parts or participate in the repair/ replacement parts industry. We do this for the following reasons:

a/ When manufacturers also have a parts selling business, this it creates incentives for manufacturers to make intentionally defective products that will later provide a way to take advantage of customers by overcharging for overpriced repair parts.

b/ Stripping manufacturers of the right to sell parts gets them all trying to make the best, and most reliable products they can. This will result in better made product for the people that seldom need repairs.

c/ This will greatly reduce the cost of parts and repairs.

d/ Cheaper repairs make for longer-lived and hence more eco/green vehicles and other products.

37/ OEM manufacturers shall not only be banned from the parts market, but they shall get no IP protection or contract

protections when they sell any of the following: Repair and replacement parts, refill parts, batteries, adapters, electric power supply systems, connectors, mounts and similar things. Also, all replica parts companies selling certified replica parts, all of these shall be free to use the name of the original product to describe themselves. In other words, they shall be free to call themselves as a certified replica parts for Ford model T vehicles.

38/ Nations that do not respect our new and much more reasonable intellectual property laws shall not be allowed to export goods to our nation without paying a special tariff to compensate for this.

39/ Those people making payments for IP that was cancelled by this constitution shall no longer have to make any more payments. Even if the payments were contractually agreed to.

40/ There shall be no IP rights for Mafia drug treatments such as methadone.

NR'156. IP MONOPOLY RULES

1/ Ishtar adores trade paradises, also called monopolies. Ishtar adores these whether they are for the sale of oil, or the right to look at some 74-year old movie that Ishtar owns.

Therefore, we shall start with the assumption that our entire IP monopoly system has been corrupted to grant overlong monopolies that are as eternal as Ishtar could get away with. Future generations are warned that increasing the 17-year maximum IP monopoly periods called for herein will only produce the the most minimal increase to inventor payback and investment motivation.

2/ Patents shall not be granted for things already in mass production, and they shall not cover things made for personal use by many people. Proof of prior production or delivery to market cancels any patent filing for the same thing.

3/ The purpose of IP rights is to help bring more good products to the marketplace, not to reward inventors and producers. It is important that we distinguish between these two very similar objectives. Rewarding inventors shall be seen as something we do to bring more good products to the marketplace.

4/ IP rights shall only be granted in areas that we want to encourage. This is why copyrights are not offered for media with nudity or media with tobacco use.

5/ Government shall accept the filing of anti-patents for those who wish to propose an idea for public use, but have no intention of bringing that idea to market. Anti-patents are filed with government for everyone to use. Those who file an anti-patent shall have the right to a sliver share (normally 1%) of the invention's revenue recorded by the sales tax system. The standards for filing anti-patents shall be lower than those for filing normal patents. Also, anti-patents should be construed as broadly as reasonably possible with regard to conflicts with subsequent patents. This while regular patents should be construed as narrowly as reasonably possible with regard to conflicts with subsequent patents.

6/ Once an anti-patent is filed and accepted, no ordinary full patent shall be issued for this idea, but only a patent restricted to product development. And these restricted product development patents may only be applied-for more than one year after the anti-patent was filed, and under

conditions where the anti-patent is not proceeding to market. **7/** With a 2/3 overmajority, the Socialist Sluice may elect to nationalize, ubiquitize, shorten the IP period of, or cancel or modify any IP rights in any way it elects to, and under any conditions it elects are fair. The Senate shall have no obligation to make any payment if it elects that this course is fair.

8/ If the Senate elects that an invention is gimmicky it shall cancel the IP. A good example of a gimmicky invention is the Dyson "blade-less" fan. This uses a hidden fan to push air that leaks through gaps in a plastic ring. The blade-less fan shall be though to be exactly the sort of invention is not what the patent system exists for.

9/ No court shall be considered competent to judge the Senate in any matter, including fairness with regard to patent and ubiquitization buyout matters, or the value the Senate pays to condem land.

10/ Patent holders shall generally have the right to develop their patents over the time frames of their respective IP monopoly. However, when important patents are not proceeding to market in a reasonable time frame or manner, the Senate may cancel or force the sale of the IP rights or assign a new management team. Also, the standards for this type of cancellation shall be lower when the patent holder is not the inventor.

11/ There shall be no right to hold patents that are under-used, or are used primarily used for obstructionist, or parasitic/trolling purposes. The Socialist Sluice may elect to cancel any such patents. This rule shall be more strictly enforced against those who own many acquired patents, but fail to bring sufficient products to market themselves. Also, for the purposes of this paragraph, selling to others, or partnering with others who bring products to market shall not count as brining products to market.

12/ Nobody shall use the patent system to reduce or quash innovation, or the copyright system to quash information. When publishers, distributors, patent buyers or others IP acquirers fail to bring the IP to market within a reasonable time, the patent/copyright shall be subject to cancellation by the Senate. Under these circumstances, the inventor/author shall keep all monies previously paid for their IP, and then the inventor/author shall get half of the proceeds when the Senate auctions off the IP to qualified buyers

13/ When inventions go out of production, or substantially out of production, or it never appears on the market, or new stock of the invention is not available on the market at a reasonable unit price range, and at a reasonable time, the inventor may sue for the return of his patent rights. Under this circumstance, the inventor shall have the right to keep all monies previously paid.

14/ When written material goes out of production, or substantially out of production, and new copies of the work is not available on the market at the unit price range stated in the sales or licensing contract, or new copies of the work cannot be sent out within 30-days of its order, the author may petition the courts for the return of his copyright rights. Then he shall have the right to keep all monies previously paid.

15/ Patent lawyers and the people working in the patent application process (and their families) shall be prohibited from owning patents they did not apply for.

16/ Government's patent office shall record the ownership and transfer of all patents. No transfer or collateralizing of patent rights shall be valid unless it is recorded by the patent office system.

17/ Government shall not mandate that the people use any monopolized or cartelized products, including those monopolized or cartelized through and IP monopoly. If government mandates something for everyone or nearly everyone, that thing must be ubiquitized.

18/ Patent applications shall only be accepted between 15:00 and 15:30 on the first working day of each teneth. No patent application shall be accepted unless the applicant first files a notice of intent to file a patent between 14:30 and 15:00 on the same day. This notice of intent shall include both a vague description of the patent and the classes that will be applied for. Also, the patent application fee shall be paid with the notice of intent, and it shall be 80 hours wages.

19/ All IP applications received on the same day, with valid notice of intent, shall be considered temporal equals. If two or more patents arrive simultaneously, for substantially the same thing, then both shall be considered anti-patents. Thus it will be impossible to steal a patent claim, only to render it co-owned.

20/ The patent intake system shall be via the county recorder's system which shall hold all patents and notices of intent to file a patent until 15:30, when they all get sent to the national patent office. The system automatically and instantaneously email all notices of intent, and patent applications, to everyone listed on the patent application, up to 50 recipients. The idea is that most people will file just before 15:30.

21/ When the Senate declares gold rush conditions in a new industry, no patents may be granted for one year. After that, all patent periods shall be halved for one more year.

22/ Patents do not necessarily confer a monopoly, but at the election of the Senate, they may be converted into the right to a realistic fee on everyone who uses that patent for the patent term.

23/ Government shall operate under the premise that the people will achieve more innovation through offering 20,000 Ubiquitous prizes of \$50,000 than 1-prize of a \$1,000,000,000, with some people getting multiples of \$50,000

24/ Government shall tax or limit the excessive profitability of the most profitable IP monopolies. However, when government taxes excessive IP profitability, it shall be required to use all that revenue on funding for other innovators, so as to maximize the number of innovators making as much money as any man would ever need.

25/ If the Senate judges that a manufacturer has designed or reconfigured its products for no good reason, but primarily to thwart competition from third party replacement part manufacturers, or to get the consumer to buy another unit, the Senate may bar that manufacturer from selling replacement parts and other replacement units.

26/ Replacement products and parts, such as shaver blades, ink cartridges, and paper vacuum bags, gaskets, shall not be protected as intellectual property. Also, anyone making replacement parts can use the product name to describe what their version of the replacement part is for. Also, the OEM-parts (original equipment manufacture parts) and a

reasonable number of aftermarket parts makers must be sold together if OEM parts are being sold at all.

27/ When products are made artificially complex, such as with printers and their wildly variable ink cartridges, the complex and expensive ink cartridges shall be subject to a special tax that is sufficiently high to drive this practice from the marketplace.

28/ Manufacturers must provide adequate official literature posted to all the main manufacturer literature libraries online. Where manufacturers fail to provide adequate repair literature, or they provide faulty literature, they may be sued for the harm they have caused. This is after all, an aspect of their product.

29/ Companies that produce printers shall not be allowed to sell ink or toner, or similar refill products or products that wear out, and all of these should be considered a conflict of interest. All companies that manufacture consumer printers must use one of the 20 standard toner, and 20 standard ink cartridges.

30/ All printers shall default to printing one page only. No printer may print more than one page without the users, selecting the page range. All consumer printers, must come with sufficient ink to print at least 300 typical images. All printers must operate on the standard printing driver for Mac, and for windows.

31/ Ecology and common sense demand that we design our IP and tax system to minimize planned obsolescence and similar replacement product schemes, as well as reductioneering of existing products. To this end, the Senate shall both test new products and keep consumer statistics on product lifespans and cause of failure. Products elected as using intentional planned obsolescence or not living up to longevity claims may be fined or removed from the market. All mass produced products sold in our nation shall be checked by the county recorder system for weight at least ten times per year. Where the weight per unit declines, the goods may not be imported, unless they go through the import approval process for mass produced again.

32/ No OEM manufacturer may sell batteries or make their own batteries. All must use one of the 300 or so generic batteries.

33/ Batteries and other parts shall not be glued together, unnecessarily by manufacturers or with little reason such as the way Apple does it. It shall not be allowed for manufacturers to use non-standard heads on their fasteners. Also, there shall be no intellectual propriety rights for screwed fasteners, or screw threads, or screw heads.

34/ There shall be no use of Lock-tight or glue in mechanisms that make parts almost impossible or impossible to repair without special tools.

35/ All computers, telescreens, e-bikes, automobiles, trucks, trains, and all other machinery shall be serviceable without special tools that favor repair monopolies. Therefore all unnecessary use of special tools shall be considered restraint of free trade. Also, All devices must disassemble and come apart without unnecessary special tools, or injury to any parts. It shall not be allowed to have designs that commonly break from the act of people taking them apart. Designs like this can easily be considered a form of industrial sabotage. Also, wherever practical, we shall have standard government

designs and competitive markets for different companies cheaply building the same VW bug clone (for example). And all these use the same repair parts.

36/ No sales agreement shall be valid where the buyer substantially does not own the thing purchased, or is unable to continue to use the thing purchased without paying more money to the vender under any circumstances including especially access to software, repairs,

37/ To encourage first rate products, we shall have it that:
a/ Disposable and short lived products (particularly tools) may have to pay a tax.

b/ There shall be no more intellectual property rights for repair and replacement parts.

c/ Manufacturers and Dealers that sell products/vehicles shall be prohibited from selling repair parts or repairing those vehicles.

d/ All repair parts must come from the open market. All original manufacturers must share to the recorder system true and precise information on all repair parts in all products.

e/ The system keeps precise repair statistics on all manufacturers of both whole vehicles and repair parts.

38/ In the vehicle industry, factory recalls seem to have become intentional, and a means of attempting to reintroduce overpriced dealer services a dozen times per recall appointment. And look at how costly dealer prep is, like our vehicles are not turn-key when they come off the line. Look at the wildly overpriced repair costs and parts costs. Look at the markup per vehicle. How many car companies make less per vehicle than their own supposedly 100% disposable dealers.

39/ From now on, all vehicle manufacturers shall be required to deliver their new turn-key vehicles to one of the county's vehicle sales lots, which shall charge an hour's wages per day each doublewide vehicle is left on the lot. New vehicles on first delivery shall get 24 hours of parking for free. In this way, we will all save many thousands of dollars on each doublewide vehicles we get from a car lot. If any manufacturer service is required, then they must use one of the manufacturer's free inspection agents. If the matter warrants manufacturer paid repair, then the vehicle owner can use one of the manufacturer's repair shops. If the matter is to be paid by the vehicle owner, then the vehicle owner takes the vehicle to a shop that has passed the education system's modules on those repair procedures for those vehicle designs.

40/ All factory recall work may be done by any one of multiple unaffiliated third-party repair companies at the expense of the manufacturer. In places where factory recall work is done, there shall be no possibility of also doing other repair work at that place, or near that place, or at that time, or near that time.

41/ The disconnect between manufacturers and repairs is expected to make all mechanisms cheaper to make, longer lasting, and easier to repair.

42/ All common repairs for all mechanisms shall have tutorials. The repair techs will be able to stream these videos to their visor or screen as they do the job.

43/ We are a democracy and well over 90% of people would rather have a world without new car dealers. And this sort of middleman do-nothing is just so easy to delete from the system. It really isn't like the other sorts of criminal

enterprises, it is super easy to delete.

44/ Here we see who is running the US car industry like a parasite. Here we see who is actually profiting from the US car industry. How much does the average car dealer make per car sold vs. how much the manufacturer makes? Let's have a 30 year graph, and let's also be very skeptical of this information, because the dealers might be getting the manufacturers to lie for them.

45/ Manufacturers and middleman dealer shall not be allowed to have anything to do with repairs to the goods that they make or sell. If we allow this, then we allow for planned obsolescence, and planned breakdowns, fake factory recalls and rip-off super-expensive repair part prices from parts monopolies. Don't we all as free men always abhor monopolies wherever we find them? Why do we allow parts monopolies? No. Instead Government should try to get rid of all parts monopolies to control vehicle costs. So government shall:

a/ No longer support or enforce any intellectual property rights claims with regard to repair parts.

b/ No longer allow manufacturers to sell parts for the things they manufactured.

c/ Rely on the testing standards of the nation they came from. Each of these nations will have a trade-volume over problems rating.

d/ The delivery system minimum fee includes all repair parts up to 40kg in the rapid response system. There shall be no higher prices for parts either here or there, or in stock on site.

46/ In the new matrix, we are not going to have extortionately priced OEM repair parts and overpriced OEM technicians that repair over-complex, constantly-changing between model years, intentionally hard-to-repair mechanisms, that exist mostly to create an artificial post-sale profit-nexus for car-dealers and other dealers. We will instead use simple, slow-to-change, proven-reliable, Mopar-priced, and Mopar available parts than only get updated in the 10 years total upgrades of the parts. And doubtless there will be at least one total upgrade for our new road vehicle system along with our new rail system, after maybe 1 or 5 years. This way we will have hundreds of companies making interchangeable vehicle components like steering systems for the standard single-wide drive frames worldwide. This way everyone gets maximal cheap for their vehicles thanks to the modern miracle of robot-enabled assembly lines all doing exactly the same thing year-in and year-out. Also, unless there is a break-down or safety problem, all standards for each part get frozen at the model's authorization as a standard Senate plan. However the weights of the components and the standards for those components shall never be reduced once a model is authorization as a standard Senate plan.

47/ All mechanics have their name and years as a mechanic printed on their tickets and their final bill.

48/ It shall be regarded as corruption where manufacturers sell parts or make repairs to the things they make. This shall be prima fascia regarded as a corrupt practice. Manufacturers should only be concerned with making the best product they can, and then should never be making money on either repair parts or making repairs, or accessing repair software. Allowing this creates a conflict of interest in our nation's manufacturing base. Instead we shall now focus exclusively

on making the best products anyone can make. The people selling repair parts shall be free to use the name of the company that made the original vehicle or machine to label their replacement parts as belonging to the manufacturer. In other words people making and selling repair parts shall be free to use the name of the manufacturer, because everybody knows that Ford, Mercedes, Toyota, Xerox, and Caterpillar are no longer allowed to make repair or replacement parts such as ink cartridges and brake pads.

49/ There shall no longer be any right to intellectual property protections in regard to repair parts, as this has been greatly abused by various forms of costly gleaners to extract little profit while causing wasted time. Instead government listens to find out if the parts are defective. If too high a percentage call the parts defective, then government demands proof that the parts are not defective. (This is incidentally a good model for the way government regulation should work)

50/ Everyone shall have a right to repair their equipment without the participation of the manufacturer and its invariably overpriced approaches. Instead, manufacturers shall not be allowed to insinuate themselves into any repair process, except to help train mechanics.

51/ Here we realize that we need to get rid of the car-dealer layer of our auto industry. Therefore this good-for-absolutely-nothing, wildly overpaid, entirely parasitic part of our economy shall be shut down and eliminated. In fact, we shall banish new vehicle dealers from our nation. Everyone shall be required to order their vehicles themselves online, and from a location away from the local vehicle display lot. Also, the new vehicle dealers need to get deleted entirely before our car industry can recover its former greatness. Their influence had a large role in the malfunctioning of our car industry.

52/ All used vehicles sold must sell on a county vehicle sales lot where owners can display their vehicles for an hour's wages per day, or 2-day's wages per day if they want to be in the fast sale area of the lot. Vehicle get parked on the county lot and on display. There shall be no other fees charged, and all the money goes to the county recorder system.

53/ Where cars are recalled for some manufacturing defect, and the car is needed to be kept in the shop for more than 90minutes, the manufacturer must provide a free car of comparable size (but not condition) as substitute car while the recalled car is in the shop. Indeed, from now on, all repairs involving cars left

54/ With regard to the rather large losses the nation's car dealers will suffer as a result of these changes:

a/ It is all stolen and has to be given back

b/ They have all been wildly overpaid thanks to their repair monopolies.

c/ The new approach to repairs will save consumers a great deal of money, and it will also eliminate intentional defects in expensive repairs for the repair money.

55/ All new vehicles shall come with 6 sets of keys and water proof water tray floor mats. All of the keys shall use one of the Senate's standard 30 vehicle key fob designs.

56/ No car manufacturer and no car sales dealership shall be allowed to sell any parts or do any repairs. No car manufacturer shall charge for accessing its diagnostic software, or limit access to its diagnostic software.

57/ The new vehicle dealer industry shall be entirely deleted

from the economy. The sales part shall go to the manufacturer's website and its test drive cars. And the repair part shall go to the open market.

58/ All diagnostic software and equipment used by manufacturers or others on various vehicles shall be open source, and it must be shared among the repair shop community at no charge. Car manufacturers and car dealers shall not be allowed to either have their own special software or charge for access to the software used to diagnose and repair their equipment. Where they do this, it shall be considered restraint of free trade in an attempt to monopolize the repair aspect of the good they manufactured.

59/ When a manufacturer sells equipment or vehicles, that equipment/vehicle is sold to the Senate's standard rights, including the inalienable right to repair, and the right to use whatever spare parts the buyer wants.

60/ Wherever software is required to repair a mechanism that software must be given away for free by the manufacturer to all repair people. Also manufacturers are supposed to focus on manufacturing equipment, not servicing that equipment.

61/ The Senate shall drive for a North American vehicle industry with thousands of firms competing to provide identical parts for assembling and repairing our nation's standard fleet vehicles, such as a:

a/ single-wide passenger,

b/ single-wide cargo,

c/ its double-wide passenger 2-row

d/ its double-wide passenger 3-row

e/ its double-wide passenger 4-row mini bus

f/ its double-wide passenger 5-row mini bus

g/ its double-wide passenger 5-row mini bus

h/ There shall be a similar range for low density trucks, and heavy material trucks, and mining trucks.

x/ Under this scheme all the system vehicles in each class will be identical in build, weight, breaking, steering, etc. These vehicles shall be designed so they are easy and quick to repair, like 1960's cars.

62/ To keep repairs planned obsolescence and planned breakdowns from being part of any manufacturers business model, we still have a total prohibition on repair income and spare parts income by mega corporation manufacturers. Repair income shall however be allowed for small manufacturers with an annual turnover of under 50-million per year.

63/ It shall be considered data trafficking for vehicle manufacturers and others making vehicle products to secretly track where people go in their vehicles, or where those vehicle go.

64/ Manufacturers of equipment shall not be allowed to:

a/ Charge money for servicing their equipment.

b/ Charge money for replacement parts for their equipment.

c/ Charge license fees for authorized repairmen or authorized repair shops.

d/ Have proprietary diagnostic equipment or software for figuring out what is wrong with the equipment/vehicle.

e/ To use software or operating systems that are not open source.

65/ If we allow any charges for any of the above, we will see the free market drive all manufacturers into making faulty products that require expensive authorized technicians that

only use expensive OEM repair parts. Then the higher profitability of bad practices will drive all the good honest manufacturers from the market over one product lifecycle.

66/ The Senate shall establish sensible minimum lifespans for various sorts of products. The minimum average lifespan for a lightbulb in a normal environment shall be 70,000 hours, and this shall be regularly spot checked by government.

67/ Using media without paying the user fee shall not be called or regarded as piracy, but illegal copying. Those downloading accurately named illegal copies from registered download websites shall not be penalized for illegal copying if the illegal copy has been up for more than 72 hours.

68/ When people come to a violent death, or are severely injured in the production of non-educational entertainment media, that media shall lose all IP rights.

69/ It shall be a stated objective of Government to make innovation as easy and as rewarding as possible for the people doing it. To this end, Government shall work to maximize the benefits and reduce the cost of being an innovator. Government shall offer free IP escrow and a free contract library for the sale and licensing of all forms of IP. Government shall work to minimize the energy that innovators must spend on managing their IP rights and profiting from them.

70/ Government shall try to maximize the use of Ubiquitization to get innovators paid quickly, so innovation is easier, less time consuming, and more profitable to innovators.

71/ All registered IP shall have a homepage at USPTO. On this home page there shall be:

- a/ Links to contact information for the patent holder, if the patent holder wishes to be contacted.
- b/ Similar patents owned by the patent holder, and downloads about the subject patent.
- c/ Information about whether the patent owner is looking to sell their patent, and if the patent is for sale. The owner may also put an asking price for the patent on the PTO website. USPTO shall charge nothing for this homepage.
- d/ A section for IP owners to declare that they are looking for the Senate to make and offer for ubiquitizing their IP.

72/ Regarding orphan IP:

- a/ Where a fictional citizens go out of business, or go defunct, all their IP gets generally gets cancelled, not re-sold. Although, if the business was apparently driven out of business in order to put its IP into the public domain, the Senate may appoint a Senate jury to act as a trustee committee to take over as the owner, and try to monetize the patent(s) against the apparent business killers.
- b/ To keep inventors from being murdered for their valuable IP, we shall say that when patent applicants, or patent holders die, and especially when they die under strange circumstances, the Senate shall generally appoint a Senate jury to act as a trustee committee to take over as the owner, and try to monetize the patent(s) against the apparent killers.

73/ Except for pending applications, non-profit organizations (such as schools, charities, and religions) shall not be allowed to hold IP rights. Charities may apply for IP rights, however, they may not receive, or delay the final award. Bequeaths of IP rights to charities shall be considered bequeaths to the public domain. The Senate shall attempt to fairly compensate

all research charities and the individual researchers for the Ubiquitous work they do.

74/ All price information shall be considered in the public domain, and no confidentiality agreement regarding pricing shall ever be enforceable.

75/ When a fictional or fictionalized story coins a word, name, or term, the creators of that fictional tale shall have no monopoly rights over that word, name or term.

76/ There shall be no IP rights for dramatizations and computer games where people go around shooting multiple targets, except those used by the government in military training.

77/ Artificial scarcity with regard to top-notch business names is a huge waste that gives nothing in return. Therefore, the trademark system shall not unnecessarily limit the number of available good names for businesses to use. To this end we shall say that the fee to file, and the annual fee to keep a national trademark shall be the following rates for each of the hundreds of classes at the patent and trademark office:

a/ 5-hours wages if 3 or more terms are used.

b/ 200-hours wages if 2 terms are used.

c/ 4,000-hours wages 1 term is used, or if the trademark has 9 or fewer characters.

d/ The Senate shall make a list of words such as: AAA, best, American, quality, discount, reliance, and western that will not count as terms for the purpose of annual trademark fees.

78/ Highly valuable trademarks may also be charged a percentage of their turnover for government protection of their trademark rights.

79/ The IP system should not give any offensive power at all to recorded trademarks that are barely used, or barely known in their industry. Also, the bar for the term of barely used should be defined as 5% familiarity in their marketplace. The only exception is where large existing players seek to extinguish a new competitor with goods in the market by creating a similar brand after the fact.

80/ There being not enough graphical motifs to go around, graphical similarity should be rather hard to prove in similar products, and nearly impossible to prove for different sorts of products. The important question shall be: Will the design cause more than a sliver of A's customers to confuse B's products and business identity with those of A?

81/ Trademark protections for frivolous things like sports, beverages, apparel, and fictional media shall be very weak. Also, beverages, apparel and fictional media shall not be allowed to advertise.

82/ We shall favor trademarks with two or more terms as this will cause an exponential increase in the number of possible trademarks available. Single term trademarks shall be construed and protected as narrowly as is practical. We shall err on the side of having more marks than protecting and broadening the rights of single term trademark holders.

83/ Vulgar, immoral, scandalous, disparaging and deceptive terms and logos/symbols shall not be subject to trademark protection. If a mark is later discovered to be any one these (such as the OPEC logo) the mark shall be cancelled.

84/ There shall be no trademark protection for the following industries:

a/ The tobacco industry.

b/ The beverage industry, including especially carbonated

sodas and alcoholic beverages.

c/ The candy and sweets industry.

d/ The marijuana and Mafia drug industry.

e/ The dishes and individual order items served by the restaurant and beverage industry.

85/ Individual vineyards and breweries, and wine brands and beer brands shall not have IP protection for their names. However, all the wine-producing and beer producing regions of the world shall have protection for the region's name and for its wine/beer ratings 0-10. The regional origin and regional ratings of all wines, oils, and produce shall also be IP protected by the IP system. Luxury tax of at least 60% shall be paid on all wine, champagne, and grape derived alcohols sold for more than 2-hour's wages. The term Champagne shall now apply to all sparkling wines. However, the term Bordeaux shall be the exclusive domain of high-quality French wines approved by the French Senate. Also likewise the terms Rioja, Romano, Athena, Alfez, and Trojan shall be protected.

86/ All existing trademarks that violate these rules shall have protection under the old rules until 2027.01.01. No trademark shall exist for more than 35-years. All marks older than this shall be required to change their names by 2030.01.01. All expiring trademarks shall be auctioned-off to the highest bidder by government to benefit the public purse. Also, fictional citizens shall not be allowed to change their names for any reason and at any time except when their trademark expires. Only new companies may buy old recycled trademarks.

87/ When more than one businesses shares a name, each shall include a randomly assigned 3-digit numerical identifier after their name.

88/ The use of a trademark in media, advertising and directories does not qualify as use in commerce, except during the first year of the mark's existence. After this, the trademark owner must show that goods or services were regularly exchanged in continuous and repeated commerce of a reasonable financial amount for their mark to exist. How much is a reasonable financial amount? If the mark is only to be enforced in a small area, that amount should err on the low side. If that mark is to be enforced regionally, or nationally, that amount shall err on the high side, and shall clearly manifest a genuine business enterprise with a reasonable turnover.

89/ There shall be no right for squatters to call first dibs on good names in any system in the land (trademark, internet domains, phone numbers, etc.) to later scalp them to actual businesses. Businesses with turnover less than 20-people's wages shall not qualify for name protection between counties, or name protection for more than 10-years.

90/ Sub-Senate juries shall adjudicate and enforce all relatively clear-cut patent and trademark infringement cases for no fee. The right to file and continue on with such infringement suits cannot be transferred or assigned even if the trademark is sold.

91/ The Socialist Sluice shall review all controversial existing IP rights and strike down the ones that it elects as overly broad.

92/ The IP system exists to benefit the public by helping with the compensation for inventors and thus stimulating

invention. When people are the role of inventor, or trademark holder and do not successfully bring products to market, the patent periods shall normally be cut in half, although the Senate may elect to cancel the IP entirely if enough time has gone by on a new and hot innovation.

93/ No trademark or fictional citizen name shall exist in the same hands for more than 30-years, and all existing trademarks more than 30-years old shall be cancelled by 2030.01.01. Also, it's probably healthier for society that we don't have these old trade names, and the luxury names die with their generations.

94/ The right to keep others from using a trademark or trade name shall not extend to public discussions about the trade name or its owner. This shall include all public criticism, all disparagements, all insults, all satire, and all mockery of a business or trade name. Also, people shall have the right to describe their products as a competitor of the trade name. However, those who search for a trade name, be at a local or national trade name, they shall only be directed to the main intake URL of the trade name itself. Also, the names of businesses and products must always take all the verbal abuse that real humans care to dish out.

95/ No pre-existing business practice shall ever be forced to change in any way, or pay any money due to subsequent and later arriving intellectual property monopolies. Wherever a patent or some government regulation touches some pre-existing way of doing something, the patent loses. Wherever a trademark touches some pre-existing business name, the trademark loses. It shall be a felony to knowingly bring or pursue an intellectual property rights case against a pre-existing use.

96/ Any time the Government hires companies and people to design, develop, build, prototype, or mass produce new products, new computer programs, new microchips, new bridges, new weapon systems, new phones, new fighter jets, new educational video, new treatments, new vaccines, or anything else, the work shall always be done under the terms where the Government and the people always have the right to use all IP developed under public funding. Government shall publish all valuable findings and all proposals so as to bring more products to market faster. Furthermore, the people shall have the right to share in all of the innovations that came out of publicly funded research.

Also, there is people's sense of duty and giving something back and patriotism, and bettering mankind that has fueled the drive to figure out or develop many inventions. Surely these inventions are a thing given to the people, and nobody should ever be allowed to steal this or hijack this spirit.

The designers and developers may be granted Ubiquitous status, and Ubiquitous money by the Senate, but nobody gets to own anything they designed or developed for the people and/or their Government. Also, regarding the foregoing design, development, prototyping and mass production work: it shall be a crime when the people involved fail to use the county recorder system's communication platform for all communications between the people involved, so that Government has possession of all design documents as a matter of the normal course of business. Also, all of the Government's IP property rights shall be inalienable due to

their anti-patents. The public's rights to IP it paid to develop shall be inalienable and as such, it can never be given away.

97/ The county recorder system shall develop a system where billers point to key communications, key drawings, and key videos to fill their resume, and justify their high pay, and show their creative involvement in the creation process, and to get credit for being a good design/development team member. When designers and developers bill, they shall normally reference this media, and this shall be thought critical to eliminating a number of abusive billing tactics like:

- a/ Late billing to hide abusive charges.
- b/ Double billing.
- c/ Billing for things that are not included.
- d/ Projects that cannot be brought to an end.

98/ Again, all the IP for everything Government paid to develop shall always be free for Government to use. Government shall generally turn all this IP into anti-patents for all to use free of charge.

99/ The county recorder system shall have a department of IP development auditing (staffed mostly by Sub-Senators with some non-Senate advisors). DIPDA (Department of IP development auditing) shall audit all government IP development teams to determine what IP of value they have actually created. DIPDA shall be related to, and work with the patent office. DIPDA shall also offer its services to those investing in design, development, prototyping and mass production teams so as to offer some unbiased third party insight into the work they are funding. DIPDA shall also:

- a/ Keep lifetime records on every person registered to work in design, development, prototyping and mass production work, and keep track of their actual lifetime output in an unbiased way.

- b/ Rate workers and teams as productive or not, and declare people as frauds when they have collected piles of money and produced no innovation.

- c/ Hire many retirees that have had a lifetime in business and have developed a nose for bullshit.

100/ Regarding the top 5% of design, development, prototyping, and mass production people, the ones that are the creative juice: These shall be generally compensated by share-in-the-enterprise compensation, and not the hired worker wage compensation, or vague and idiosyncratic compensation schemes that frequently lead to squandered money on legal and court costs. Here, the DIPDA system is supposed to help the contributing people in the 95% make the leap to the 5% where there is merit. After this, we realize that it is not necessary and inadvisable to have an IP ownership system for employees. Therefore, IP ownership

101/ Where people or fictional citizens hire or pay others to design/ develop new things, whether mass-produced product or one-off, whether in-housed or out-housed design, the work (completely-paid-for, or not, transferred-or-not) shall always automatically come with an inalienable right for both the employer and the designers to use any IP created. In fact, both the customers and the designers shall have the unlimited right to reuse the IP, and to refine the IP with other designers and other owners. This shall be so regardless of any agreement the two parties make. However, Senate status all goes to the designer/developer.

102/ No pre-existing business practice shall use or name

shall ever be forced to change in any way, or pay any money due to subsequent and later arriving intellectual property monopolies.

103/ Fictional citizens shall have a number of disadvantage is over real flesh and blood citizens. One of these is that when fictional citizens develop IP, or own, IP, they must share their IP with government when requested by the Senate. Flesh and blood citizens shall not be required to share their IP.

104/ Contract clauses calling for the employee to transfer their IP rights to the employer shall be valid, easy to enforce, and very hard to void.

105/ We shall try to make the IP rights division process as automatic as possible for creation teams. We shall try to create an IP rights system that minimizes this huge source of strife and lawsuits among creation teams, so the process can be more enjoyable and beneficial for everyone.

106/ Once a development team breaks up, the team(s) with the creative juice that keep the process of improvement alive shall be greatly favored by the IP rights system.

107/ All intellectual property rights (patents, copyrights, and even trademarks) shall exist outside of marriages, and no interest in any IP rights shall ever be transferred by marriage or created within a marriage. All belongs to the great creator who made a thing that many people want. None shall be a topic in any divorce proceedings. The rewards from society for that person's creation shall always belong to the creator alone for the length of the IP periods stated herein. Like the fundamental rights of all men expressed herein, and Senate status, and Ubiquitous status, the IP rights of creators shall likewise not be a thing that can be judged by the money court system: Except where they are sold, licensed, leased, or used as collateral for a loan by their creator or his successors in interest. Also, government shall assume the valuable IP rights of those who die young or under suspicious conditions.

108/ The first rule for granting IP rights shall be: Does not having IP rights, significantly harm the creative output of that class of product. Because if it does not, then, there shall be no IP protection for that class of creative or manufacturing output.

109/ Useful mined data shall be generously rewarded by the Senate with ubiquitous status, however, mined data shall not get any intellectual property protections other than attribution of who found up the nuggets.

110/ We shall allow search engines to pull up and display information that is open-for-all-comers from across the web. This shall be thought to greatly change the information by aggregating it and making it accessible. There shall be no right for those with an open-for-all-comers website to extract any money from the people who help them get their pages (as designed) seen by more people.

111/ Where humans and AI programs recombine images and information from the web, getting less than 25% of their information from a particular source, there shall be no right for those with an open-for-all-comers website to extract any money from such re-combiners.

112/ The products of artificial intelligence, products created by computers, shall have an IP rights period of one teneth for still images, and one year for video. Computer generated software shall have an IP period of 3-years. However, where the AI has created work that is obviously derivative, it should

be governed by the same IP rules as humans creating derivative works.

113/ Mass produced goods shall generally be regarded as having a much higher level of IP protection in comparison to one-off goods. In fact, the one off goods shall be protected by a completely different set of rules.

114/ All one-off goods may be freely photographed and video recorded.

115/ The county recorder system shall develop a mechanism for sharing IP rights when multiple peoples cooperate and when the work of multiple individuals is re-combined.

116/ The licensing of a IP should be done through the Senate's IP licensing interface, complete with acceptable metrics that are regularly audited by the IRS or GAO, or some other similar body. So government shall give the owners of valuable IP a free interface for leasing and licensing, and selling their valuable IP, with no commission being collected for the transaction. And also, there shall be free auditing and rulings by unbiased people about how much money is due to the inventor.

117/ Where government pays more than half of the money to develop something, government shall own all the IP. Also, where government pays for weapons systems, or war ships, or war aircraft, or similar things, then government shall automatically own all the IP entirely.

118/ It should not be allowed to name and title products or give-aways and web pages with titles that can be construed to be an advertising or inducements to commit crimes. For example, the book called: "How to kill your husband, and other handy household hits". Such products shall not only be denied IP protection, but the authors and publishers and IP owners may be held criminally and financially liable for causing violence. Similar liability may exist for the makers of first person shooter media and for extremely violent media, particularly when it is violently racist, such as the "Django" film.

119/ The Government shall be exempt from all IP ownership laws regarding:

a/ Everything that government even partly funds. Those who take even \$1 from government.

b/ All weapons systems and military hardware and other technology and inventions built for government.

c/ Where Government hires companies to make military systems, and equipment, Government shall own all the IP.

120/ The right of a creator to use their own name shall be considered an inalienable thing that cannot be transferred away by contract. It shall also be considered a thing that can be sold endlessly, regardless of how many times it has been sold before, and regardless of any contract clause. All creators shall always be able to use their own name and sell their work and pay nothing for this.

Also, regarding live performances, there shall be no ability to contract for more than a 60-days at a time.

121/ When names are used in fictional content, this shall not count as use in commerce and no IP rights shall arise from names used in fictional content.

122/ There shall be no intellectual property protection for seeds, or for cuttings from varietal individuals, or animal breeds except for the name of the varietal. Nobody else can sell seeds in that name. However, once the seeds or cutting

are sold, the seller shall retain no rights in the further offspring of that seed or cutting. No contract for the use or offspring of seeds, eggs, cuttings, or genetically modified living things shall be enforceable under the law.

123/ All herbicide resistant seeds and plant species shall be banned under the law.

124/ If there's any liability for anybody involved with cross pollination of seeds, it shall be the giant agricultural company being liable to other people for contaminating their heirloom seeds with the unproven, untested GMO genes.

125/ All crop varieties shall be equal under the law. It shall not matter if the varietal the result of natural variation, or helped by genetic engineering.

126/ People with IP rights in plant varieties shall have the power to prevent other people from selling other varieties using their name. However, once they sell their seeds or cuttings, all their rights shall be thought to expire and pass on to the person growing the plant. There shall also be no right on the part of the seed companies to make any demands at all on how the farmer can farm/use the seeds/cuttings, or their progeny.

127/ Making seeds and farming into big business shall be thought the agenda of Ishtar and parasitism, along with artificial throttling of output, and the creation of manmade famines, unfair trade, and poverty for humanity. Making farming small and broad based shall be seen as the way of free trade, cup-runneth-over abundance and prosperity for humanity.

128/ Seed companies shall be thought to be both an artificial food crisis risk, and a parasitic nuisance industry like real estate agents. We shall get rid of them by having County Senators in a blind judgement of characteristics yields nationwide adjusting for local soil richness and fertilizer use. Here each county pays the grower +40% over market for his excellent crop. And counties may buy from other counties. Then the county turns around and sells this seed (with free delivery) for +50% over what they paid.

129/ The name, Purina shall be regarded as descriptive and void

130/ It shall not be allowed to sell seeds that are over 50% sterile a can't produce viable offspring.

131/ No seed company shall supply more than 1/1,000th of our nation's seeds, or more than 1/1,000th of our nation's corn or wheat seeds.

132/ Government may require structural engineers. And when necessary other sorts of engineers, but it shall not be allowed to require architects for any project.

133/ Where architects and engineers design buildings, the client and the Architect share the IP created and can both use the IP for the current project and for other projects. However, floor plans, fenestration layouts, roof designs, kitchen/bath layouts, structural wiring and plumbing designs, building site plans, exterior elevations, building styling, and everything that goes with them shall not be subject to IP protection. No combination of walls, windows, doors, roofs, entryway bedroom, floor plans, layouts, bathroom, furniture, Interior decorations, etc. and no combination of these things shall be subject to IP protection.

134/ All designers and professionals shall be required to work under constant cloud based updating, with the the client

allowed to view and take copies of all files at any time and to view the work files from any time. Extreme transparency like with regard to work that would otherwise be based entirely on trust is expected to help make design work much more honest.

135/ Every client of every designer/fabricator shall have the right to take all of the work that their designer has done for them and use it with another designer at anytime and without the consent or notification of the first designer.

136/ All designers must charge in advance. If it hasn't been paid in advance, then the designer or architect shall not have any right to collect money on the work.

137/ Creations by computers, and creations of computer programs shall not be subject to intellectual property protections. Also when computers or computer programs make disturbing or sensational statements or function in a way that is notable, it shall be a felony to engage in silencing the story about the non-human computer.

138/ The primary purpose of IP protections shall be thought to be the increase in the number of inventions, and the breath of human thought for the people. The purpose of IP protections is not to reward inventors and discovers. That is the secondary objective. The primary objective is to increase the rate of inventions. To this end, the Senate may find it expeditious in future years to discontinue IP protections for whole classes of invention, when these prove detrimental to advancement in the variety of inventions and ideas.

139/ The companies making and installing cameras and security systems shall not be allowed to monitor those systems. Also, where security systems and security cameras are installed, they shall become part of the property, and the security company shall have no right to remove anything once it has been installed and a premises. The same for all utility companies that leave equipment on a premises, especially cable modems. All of these devices shall be thought to be electronic garbage once they're installed for they have almost no value once they have been used.

140/ It is thought that stripping music of its intellectual property protections will also make the next generation less musical, and more inclined to do serious things.

141/ There shall no longer be any patent rights for psychotropic or addictive drugs. This includes all other uses for these drugs.

142/ Once we nationalize all the drug IP rights in the current healthcare system, we will switch to a new system that takes new drugs from where they've had 3 or 6 private studies, followed by 4-5 Senate studies. At this point the promising new drugs will be condemned and then, the drugs will be owned by the people. The people and their Senate will be the sole judges, and sole beneficiary of the efficacy of all drugs, regardless of what the next stage of testing show. So the people who are developing new drugs, will not have to wait long for their payoff, which will be much smaller, but much faster in coming.

143/ All of the old privately developed vaccines shall not be used until the Senates says that it they are allowed.

144/ The primary objective and purpose of IP protections shall be thought to increase the rate of advancement in inventions, and to increase the breath of human thought. The purpose of IP protections is not to reward inventors and

discovers. This shall be thought to be a secondary objective.

145/ It is thought that stripping music of its intellectual property protections will also make the next generation less musical, and more into serious things. With regard to photos and short videos and IP protections, photos are just far too easy to make today and so the idea that they need legal encouragement seems absurd.

146/ Patents can be granted for old things used in new ways. A good example of this is Botox. However, they must actually be proven to work and cause no harm.

147/ There shall be no intellectual property protections for genetically modified crops.

148/ Products made with unnecessary complexity and designed to fail after a certain point and requiring costly repairs: These shall generally lose some of their IP rights for operating a repair parts scheme. The IP rights may also be canceled entirely if the abuses are extreme.

149/ One industrial-sized vat of drugs goes so incredibly far that the stuff should be free. Therefore, for some time at least, we shall run the world drug industry with idea patents, ubiq status, ubiq payments, and public health doing all testing except the initial testing. This will slash the cost of developing new drugs with probably no detrimental effect. Also, all drugs would be nearly free under the system. Basically, we would be nationalizing/socializing our drug development industry.

150/ Nations that do not obey our reasonable new trademark and patent laws shall suffer tariffs on other goods they sell in our nation until they do obey.

151/ Where they're already exists a drug or a naturally occurring herb that does the substantially the same thing, for example, caffeine blocking acetylcholine receptors, there shall be no patent for other drugs that do the same thing.

152/ Manufacturers shall not allowed to sell warranties if they're not allowed to sell parts.

NR'157. CANCELLED PATENTS

1/ All existing patent rights relating to the following are hereby cancelled: drilling the ground, or operating wells of any sort, drill bits of any sort for rock or earth, underground mineral recognition, fuel transportation, petroleum pumps, oil refining, synthetic fuel, vapor recovery, mining any mineral extraction, refining raw materials, smelting, milling of metals, power generation and conveyance, geothermal energy, solar energy, wind energy, clean burning technology, railroads, monorails, public transit, automobiles, busses, farming equipment, disability access, engines, motors, city design, heating systems, cooling systems, ventilation systems, washing machines, kitchen appliances, thermal insulation, body armor, glass manufacture, window shading and tinting, window coverings, electronic glass tinting, window systems, window covering systems, door systems, architectural designs, tile designs, furnaces, water heaters, plumbing fixtures. However electric equipment and plumbing connections shall remain under IP protection: coatings, power couplings, batteries, high output LEDs, elevators, escalators, moving walkways, ride-sharing, car-pooling, reinforced concrete, concrete forming, concrete manufacture and distribution, injection molding, 3-d printing, pre-manufactured structures and wall systems, thermal insulation, airport

equipment, airport security systems, automated warehousing, cancer treatments, psychiatric drugs, psychotropic drugs, and all existing drugs that are mere treatments that do not cure any diseases or conditions.

All existing patents in the above areas shall no longer be enforceable. Except for anti-patents, no new patents shall be issued in the above areas for at least 3 months.

Thereafter, a majority vote of the Socialist Sluice shall be required to re-institute the patent application process in each of the above industries by separate vote. The Socialist Sluice may also add patent areas to the above list if they are a great tax burden or great obstruction to the economy.

2/ All existing IP related to concrete casting and forming concrete, and forming and integrating rebar panels and conduits shall be nationalized for the house casting industry.

3/ The IP of the Bowley lock shall be ubiquitized and bought for fair value and then the world will have inexpensive top-notch hard-to-pick, hard-to-drill entry door locks.

4/ All IP rights for all statins, and all synthetic hormones including especially insulin shall be nationalized and the crooked owners of this IP shall get no money for their loss.

5/ Recreational and psychoactive drugs shall never be subject to IP protection rights. Otherwise we have legal drug pushers trying to get people hooked on their maintenance drugs.

6/ It shall no longer be possible to obtain patents for seeds or livestock varieties.

7/ Herbicide and pesticide resistant plants shall be prohibited and no IP shall be possible for these.

8/ All existing IP for anti-immune response drugs shall be nationalized/cancelled

9/ There shall be no patent rights for drugs that do the same thing as caffeine or amphetamines, salt, or other drugs that have gone off patent.

10/ There shall no longer be no intellectual property rights for epi pens or any sort of syringe technology. All existing IP shall be cancelled for all syringe delivery systems. You have all made more than enough money on your aging IP rights. From now on, the maximum cost for an epi pen shall be 1-hour's wages, and the pens shall be good for 3 years. Anyone who has ever had a prescription for an epi pen may continue to get these without any additional prescriptions. Also, all convenience stores and grocery stores shall be required to sell both epi pens and Narcan/Naloxone drops. (now renamed No-OD), along with certain other medical kits.

11/ All existing IP for osteoporosis drugs shall be cancelled.

NR'158. PUBLIC RESEARCH FUNDING

1/ Government research stipends are supposed to be a bit stingy. Government research grants are not really for people living in expensive parts of the nation, or in expensive housing.

2/ Everyone working in a public lab on public stipend shall be expected to make the most of their chance and work long hours.

3/ The Senate shall allocate all of the Senate's research money directly to researchers. We shall not have unelected department heads and other academics deciding on what research gets funded, and who gets to be considered

important with regard to research.

4/ When the Senate condemns work and offers Ubiquitous payments, it shall pay all contributors based on its judgement about their fair share of contribution.

5/ Regarding Ubiquitous payments for drugs, Government shall conduct drug trials itself and judge how reproducible the initial trials were.

6/ To reduce fraud, all drug trial participants shall be required to have a Senate license for being a drug trial participant. This shall include some training about what ruins a study and the rewards paid by government for those who spot pharmaceutical study corruption. Those involved in a drug trial may not communicate with one another except under monitoring.

7/ Every classroom in the nation shall have the following great words of Thomas Edison on the wall:

a/ "To have great ideas, have lots of them."

b/ "Genius is 1% inspiration and 99% perspiration."

c/ "Many of life's failures are people who did not realize how close they were to success when they gave up."

d/ "We often miss opportunity because it's dressed in overalls and looks like work."

e/ "I never did a day's work in my life. It was all fun."

f/ "There is no substitute for hard work."

NR'159. WORK TIME

1/ Our nation shall use a new day-grouping system in addition to the old one. This new day-grouping system uses 6-day periods called WEEKS, and tenths of years called TENETHS, which shall be 36.5 days each. The even numbered teneths shall have 6 weeks of 6 days each. The odd teneths shall have an extra day in the last week. Every 4th year, there shall be an extra day added to the calendar at the end of the 2nd teneth.

2/ Government shall not adjust the time between winter and summer, and the time shall remain the same all year round. If the clocks must be adjusted, it shall be in the first moments of the new year.

3/ All jobs must have an employment contract. The contract shall state the minimum and maximum number of work hours per week. This contract shall also state a minimum ratio for days off, a maximum length for the work day. The contract shall also include a pay multiplier for overtime wages up to an overage of 20% each day or each week. The contract shall also include a pay multiplier for overtime wages over an overage of 20% each day or each week.

4/ Neither government nor any labor union shall establish standards for the length of a work day, work week, or the day's start or finish time, or the multiplier for overtime wages. Everyone shall have the right to work long hours to forget about their PTSD, or a lost love, or to get ahead financially. Government shall have no prohibitions on bury-yourself jobs declared as such, and with special rules for that sort of employment.

5/ It shall be thought a symptom of foreign corruption, whenever a government says to its people: "Citizen, you are working too hard, you must rest, it is the law". This prohibition on laws limiting the work day are not to be confused with the location based night-time prohibitions on establishments in

mostly residential areas. In this case the county government shall have the right to say to various sorts of businesses, you must close down at night according to national standards for your sort of establishment.

6/ Government shall offer incentives to spread out the start and finish times for work, so that the nation's transportation infrastructure may be more efficiently used.

7/ Government shall encourage the adoption of day halving by having an income tax of up to 2% on people who work less than 11 hours on most days. This is so the nation's shared infrastructure may be used more efficiently on every day, and so that the people do not have to waste as much time, or fuel commuting to work.

8/ All government offices, schools, and all financial companies shall typically use 6-day weeks and day-halved schedules where a 2,002-hour annual work schedule is typically worked in 11 hour days, 182 days a year. This is done to double the capacity of our group infrastructure, to include, schools, government offices, factories, and most importantly our congested roads. This is also to reduce the time wasted getting to and from work. It will also result in many businesses being open 11 hours a day every day.

9/ Under the day halving system, the only annual holiday shall be international freedom day, voting day, on June 19th. There shall be no work holidays except for these days, with a normal schedule potentially working about half of the remaining 363 days, or ~181.5 days per year, call it 180 days per year. However all banks and government services shall be provided at least 360 days per year.

10/ In many long-term wage agreements, wages will be expressed as a multiple of the average national wage, a number that shall be re-calculated and re-set by the Senate from time to time.

11/ Those who bill or work by the hour shall generally be required to clock in on the county recorder's contract, time clock, work watcher, and billing app. Some of these people will be required to record their work platform's work-stream. Certain types of billing clock fraud shall be enforced by government either with or without employer complaints. Also evidence of suspected billing clock fraud shall go on the worker's permanent record.

12/ With regard to wages for all sorts of time-based employment, the time spent by the contractor and his workers driving to and from the worksite from their offices and equipment yards and homes and similar locations shall not be billable under any circumstances, even if this is called for in a contract. Thus, for example, the length of an 8-hour work day shall be 8-hours on the job site actually working, and the time spent getting to and from the worksite shall never be billable.

13/ Where people give an unspecific daily rate, this is for 8 hours of work time on the job site actually working, and not including lunch time, unless another amount of time is clearly stated and signed-off on by both parties. Without this sign-off by both parties, it shall be considered fraud when people bill in such a way that the time spent getting to and from the work site is included in the time billed.

14/ Where construction sites and factories want to have 1, 2, 3, or 4 six-hour shifts every day of the year, this shall be allowed, so long as the site or factory isn't somewhere with

the late night sounds are realistically disturbing neighbors. Also, where workers want to work 12 hour days and waste less time commuting to work, neither Government, nor any labor union shall have any business saying to them that they can't do this. However, nobody shall ever be punished in any way by their employers for not wanting to work more than either 8 hours a day, or the maximum daily work time stated in the employee's employment agreement.

15/ There shall be no right to bill for expenses or services that took place more than 11 teneths before. There shall only be limited rights in billing for these things that took place more than 3 teneths before.

16/ There shall be no valid contract without a maximum billable amount listed. Charges in excess of this amount shall not be due under the law.

17/ When an employment relationship is terminated, the terminating side must state a reason. However the most extreme latitude shall be given under the law with regard to the validity of reasons stated for the record: for future job-seekers and future employers to view and consider.

18/ In order for a new employment contract to be valid, the wages be expressed as a multiple of the Senate's average wage.

19/ The Senate shall develop or buy AI programs to monitor and rate how hard workers work.

20/ Nothing shall prevent factories in industrial areas from running in shifts and operating 24 hours a day, if there is demand for their output. We shall not cause inflation by saying that our factories must close down so that people can rest at night, now that we have electric lights, the factory owners shall be free to use multiple shifts.

21/ Factory workers have a right to vary the repetitive things that they do. Also, the things that workers like to do and don't like to do shall be auctioned-off with regard to the wage multiplier for the more/less preferred work.

22/ We should have a standard formula for paying people when they're requested by their employer to work overtime:

a/ Where they are called to work 12% extra hours per day, they get 12% more money for the over time.

b/ Where they are called to work 50% extra hours per day, they get 50% more money for the over time.

c/ Where they are called to work 100% extra hours per day, they get 100% more money for the over time.

x/ All workers shall have the right to refuse to do overtime in excess of 30%. All overtime must be scheduled at least 48 hours in advance by employers.

23/ Nobody should be compelled to work when there is a natural disaster calling for evacuation or there's a flood or fire warning in that area. Where employers require people to work despite official evacuation instructions and the workers die or are injured, it can result in the trial of persons/people ordering the workers to work for negligent homicide.

NR'160. INSURANCE

1/ The insurance industry is another tentacle on the Ishtar hydra. It is another way for Ishtar to gain power, money, and ownership rights over assets. as well as lawsuit power and the ability to shape industry. All of these sorts of power are used by Ishtar to shape our nation as a more juicy host for

Ishtar's economic parasitism.

2/ Insurance shall be regarded as thing of extra-democratic power, regulations, and bureaucracy. It is a thing that always promises, but often disappoints for the biggest claims. And when there is a great disaster, an earthquake or a hurricane, despite the impotent excuse of reinsurance, there never really seems to be enough money in every big crisis, and the government and people end up bailing out the insurance company which would otherwise go insolvent without the government bailout.

3/ Seven reasons to mostly delete the private insurance industry:

a/ The public always ends up paying for the big disasters anyway.

b/ They promise everything, and frequently deny coverage.

c/ They cause inflation in healthcare.

d/ They have power over our treatments, and the insurance company's bottom line frequently corrupts these decisions.

e/ They bend people's behavior and public policy so they can make more money.

f/ It feeds money to Ishtar. Instead, Government can make money on it, and at the same time run the insurance industry better and more profitably for the people.

g/ Government life insurance is categorically better and more valuable than any insurance company. All other forms of insurance are also better for the same reasons, and some significantly better.

4/ Risk pools shall be allowed and even encouraged. Also, there shall be some non-government insurance for unusual situations and purposes. But most of the run-of-the-mill insurance categories, the big insurance categories covering over 2,000 policies per year nationwide, most of these will be insured by Government policies, sold directly to the public online, with no insurance salesman commissions. Also, all Government insurance shall be offered at a price that is twice the amount paid out in claims. So socializing the insurance industry will be yet another way for our government to raise revenue and keep taxes down.

5/ All government insurance shall be sold by the county recorder system, with all the adjusters and coverage decisions made by the people of different nearby counties on rotation.

6/ Government may partly subsidize insurance for certain industries that it wants to encourage. However, in all other circumstances Government shall be prohibited from paying for private insurance of any sort, be it for government property, assets, or activities, or as a subsidy or tax break paid for the people who buy insurance. We shall especially prohibit all forms of insurance subsidies. We have learned well from the disastrous Obama-care ACA experience that we never want to allow this sort of subsidized private insurance corruption again. And it should be considered a hallmark of corruption whenever lawmakers or political groups advocate any form of government money for any private insurance company.

7/ To restate for emphasis: Government shall not be allowed to subsidize or offer tax breaks for any form insurance. Government shall not be allowed to have any form of mandatory private insurance.

8/ The people shall not ever let a large insurance industry rise again.

9/ All assets of all existing insurance companies shall be viewed as Ishtarian assets and nationalized, including their names, which shall no longer be used in our nation for insurance or financial services.

10/ The Senate shall establish reasonable nationwide insurance standards/regularization for what exactly is insured/covered under insurance for the various categories such as health, fire, life, flood, earthquake, liability, and all the other common sorts of insurance. And perhaps we will have 3-levels of insurance: Minimus, Medius, and Maximus for each sort of insurance. When the Senate establishes these standards, no insurer shall be free to make up its own coverage rules, but must insure according to national standards. Healthcare insurance shall have more levels of insurance.

11/ For all insurance policies, the recorder system and the court system (in a different randomly selected county) shall decide what losses are covered and what losses are not covered, and how much is to be paid. Private insurance companies shall have no say over interpretation of their insurance policies or when they will pay, or how much they will pay.

12/ All insurance premium payments shall be made to the recorder system so that there is no question about this important matter. Also, all insurance payouts shall likewise be paid via the the recorder system. The recorder system shall keep its own separate statistics on the ratio for how much the people pay for insurance and how much they get out. There shall be no private insurance where the payouts are less than 1/2 of the premiums paid. In other words, there shall be no insurance (public or private) where the money going to management/ administration/ and profit is greater than the money going to actually insuring and remedying the losses.

13/ Government shall regard private-sector insurance as a bad thing, a thing that society is mostly better off without, all things being equal. Also, all things being equal, it shall be the policy of our nation to discourage the use of insurance wherever practical. And to this end Government must always discourage the use of insurance by charging an insurance sales tax of at least 25% of all private (non-Governmental) insurance premiums paid. Also, Government shall not be allowed to have any laws that "drive" people into using of private insurance. If insurance is required by government, it must be provided by government at twice the cost of payouts.

14/ No sudden loss insurance such as fire, flood, insurance shall have deductibles less of less than 2-month's wages. No vehicle or drivers insurance shall have a deductible of less of less than 1-month's wages.

15/ It shall be thought important that insurance companies not have any power over how business is conducted, or how people live, or what the road rules are, or how the road rules are enforced. If we allow this, then our democracy leaks power to the insurance industry and whoever its masters might be. So while government shall be prohibited from regulating plants and planting, the insurance industry shall also be banned from getting involved with plants as well. Also, under our new system, all fallen branch injuries shall be legally considered no-fault situations, like a person getting

bitten by a shark in the ocean. Nobody is responsible. There is nobody to sue. Also, we shall never allow our little-brother insurance companies to tell us it is time to trim our trees. However, dry fire hazard plants shall not be covered by this paragraph and the fire martial may require clearance of brown fire hazard plants. Also insurance providers may demand clearance in order to continue to have fire insurance.

16/ We shall tax all private insurance company revenues at 20% of monies collected for private insurance. We shall also eliminate or phase out the following sorts of insurance:

a/ Earthquake, tsunami, and volcano.

b/ Forest fire hazard zones.

b/ Fire insurance for wood frame buildings.

c/ Human operated vehicles.

d/ Ultra-luxury healthcare.

e/ Medical malpractice.

f/ Vehicle theft and vandalism.

g/ Insurance for gold and jewelry and household valuables.

17/ No longer shall any lender have any right to demand that any property owner insure any property that is acting as security for any loan. If the lender wants insurance on their security, then they shall have to either get that insurance or accept the risk for the reward.

18/ The Insurance industry lobbying of the past corrupt democracy shall be seen as a hugely costly thing for national productivity. The problem was not mostly the slice of GDP squandered on insurance, but the way that the insurance industry caused huge compliance costs, and the way it ruins national competitiveness in many key industries. Also surely, the insurance industry played a key role causing healthcare spending and entitlements to spiral into being almost a quarter of government spending.

19/ The new constitution/system will eliminate insurance from healthcare in a number of ways:

a/ Our healthcare allocation system will make basic healthcare free, so many more people will opt to go without any healthcare insurance.

b/ Our healthcare allocation system will make luxury healthcare quite expensive, so these procedures will be pushed outside of insurance.

c/ All ubiquitized drugs, all cancer treatments, all psych drugs, all synthetic insulin and thyroid hormone, and other "drugs" will simply be generic and outside of the insurance industry.

d/ Healthcare insurance shall no longer include long-term care, assisted living, or nursing home care. If people want long term care insurance, they must be by a differently policy. Also, assisted-living facilities cannot have contracts where they get all of the assets of their guests/patients.

e/ Insurance companies are not allowed to dictate which doctors people can see or who's in their network. However insurance companies can limit the amount that they pay for procedures.

f/ Standard pricing will greatly limit healthcare costs.

g/ Eliminating private hospitals as the nexus of healthcare billing will help reduce costs a great deal.

20/ Life and limb are precious and irreplaceable: house and property can be replaced, or lived without. Government's first priority by a wide measure is the preservation of the life and limb of its citizens, its distant second priority is the property values of those fools who chose to live in dangerous places

such as flood and fire zones. Our nation's territory is enormous and varied. There is simply no need to build in dangerous locations. Government shall do nothing to help people to continue to live in dangerous locations and dangerous buildings. Government shall instead go in the opposite direction. Government shall take tax measures to get the people to move away from all dangerous locations and dangerous buildings.

21/ The people shall be expected to build away from geological, flood, and fire hazards. There shall be no insurance (public or private) for earthquakes, tsunamis, river floods, volcanos, landslide, forrest fires, brush fires, or urban firestorms, or from building buildings too close together, or building out of combustable fire-friendly building systems such as wood shingle roofs, wood eves, or lithium batteries in smart meters. There shall especially be no earthquake insurance either on the Pacific plate, or within 200km of the Pacific plate. There shall also be no insurance for tsunamis, river floods, or leaky roofs. There shall be no flood or all loss insurance for properties that are less than 100m above sea level, or in any 5,000 year flood zone, or in any tsunami run-up zone. The people shall be expected to build in places that are high and dry, and government shall assure that there are enough locations and infrastructure to do this.

22/ Government shall not insure or help fund the construction, rebuilding, or purchase of any property in any 5,000-year flood, tsunami, earthquake, fire or landslide hazard area, or less than 200m above sea level. Government shall be prohibited from aiding the rebuilding effort in any area that seems likely to be harmed again by a similar natural disaster. Where people lose all of the value of a property in a flood zone or a fire zone as a result of these new insurance rules, it shall not be government's problem, however they shall be given up to 30-years to relocate.

23/ Loan clauses compelling borrowers to insure real estate shall not be enforceable. As well, lenders shall have no recourse against borrowers in the event the loan security is destroyed by accidental fire, wildfire, lightning, earthquake, tsunami, flood, storm, tornado, landslide, sinkholes, or volcano. Lenders shall be free to discriminate against borrowers based on their vulnerability to these events, the type of construction, the location of the property, and whether or not the inhabitants are licensed to smoke tobacco. If a lender wants to insurance its collateral, then the lender can pay to insure its collateral. It shall not be thought a big problem that we are changing this rule for existing loans.

24/ Loans on properties in zones vulnerable to earthquake, tsunami, river flooding, forest fire, fire storm, and landslide shall not be bundled and sold with normal loans. If these high-risk loans are bundled, they must be bundled separately according to the class of risk and level of risk as determined by historical fire and flood sedimentation data. All urban and suburban areas of the nation shall be surveyed by the Senate with regard to these risks as part of the new national geographical survey.

25/ Government shall be prohibited from building or allowing any new dikes or levees against floods. After 2050.01.01, government shall be prohibited from maintaining any dike or levee against the ocean that protects buildings. No dwellings shall be built or remodeled less than 100m above any 5,000-

year flood zone, or less than 100m above sea level. There is simply no need for this. This shall however shall not include the oversized river flows of post ice-age thaws. It shall also not include all isolated farmer's home and agricultural service buildings.

26/ The people shall be expected to build relatively non-flammable structures a safe distance from fire hazards.

27/ The people shall be expected to use leak detectors. There shall be no public or private insurance for roof leaks, or burst pipes.

28/ There shall be no insurance for terrorism, civil unrest, vandalism, or war. Airlines shall have no liability for aircraft crashes that result from terrorism, especially Islamic terrorism. For with the high levels of airport security, the airlines have absolutely no control over this. With regard to terrorism, the national government shall cover 92% of the cost of replacing the aircraft and give 5-year's wages (as always herein, national average wages) to surviving families with minor offspring when the main household breadwinner dies in an act of airline terrorism. Thus, islamic terrorism will not increase costs for our airlines in competition with foreign air carriers.

29/ No fire insurance shall be offered in fire hazard areas such as cedar, pine, or chaparral forests, or other wooded areas prone to catastrophic forest fires.

30/ All businesses that are failing and then have fires shall suffer a 35% tax on their fire insurance pay-outs.

31/ There shall be no medical malpractice liability or insurance because our nation's legal system will no longer use money fines to eliminate incompetent healthcare professionals. Instead it will fine them, or strip them of their hard-earned qualifications.

32/ There shall be no insurance for luxury products. This is because the luxury tax portion of the thing destroyed shall remain valid after the thing is destroyed. So the burnt luxury vehicle may be replaced without paying luxury tax again. However if the vehicle is sold, the new owner must pay the luxury tax again.

33/ There shall be no travel insurance because of the tiny amounts under consideration, and because this easily leads to Mafia protection schemes.

34/ There shall be no form of insurance against investment defaults, because this leads to people taking risks with other people's money.

35/ There shall be no life or health insurance policy that pays more than 51 year's wages per individual. No injury, or wrongful death liability or settlement shall exceed 51 year's wages per person. (As always herein, this is average wages.)

36/ No personal automobile shall be insurable for more than two year's wages. No individual residence shall be insured for more than 40 years average wages.

37/ It shall be the official policy of our nation to discourage the use of insurance wherever practical. To this end all healthcare insurance policies shall have a deductible of no less than two months wages.

38/ Only government may offer the vehicle liability insurance needed to drive. Also, the insurance shall be included with the license fee.

39/ Because so much vehicle vandalism and theft is caused by the vehicle owner's actions and parking choices, there

shall be no insurance for vehicle vandalism or vehicle theft. There shall be no flood or fire insurance for vehicles.

40/ After 2028.01.01, commercial vehicle shall be prohibited from collecting for cosmetic damage that does not significantly impair the use of the vehicle.

41/ When government institutes system operated/navigated vehicles, and this system is safer than today's human operator system, there shall no longer be any liability for accidents for system navigated vehicles.

42/ To encourage the use of ultra-safe railroads and potentially ultra-safe network operated vehicles, government shall insure the users of these systems free of charge, for users that obey the reasonable rules established by the Senate.

43/ All insurance must state a realistic limit to its benefits, and no insurance may be marketed as having either unlimited benefits or benefits less than those described.

45/ To ensure properly functioning markets for insurance, insurers shall only be regulated and approved at the national level for business nationwide.

46/ Insurance companies may only invest their funds in the debt of the national government.

47/ In our nation we shall neither recognize nor allow foreign insurance companies. No insurance company operating in our nation shall have any foreign ownership, or be owned by any parent company, or have any subsidiaries, or engage in any business other than selling insurance and investing in government debt.

48/ Government being the nation's de facto re-re-insurer anyway, Government shall maintain a monopoly on all re-insurance in our nation.

49/ To reduce insurance fraud, each person's permanent record shall include all insurance policies they have ever been a part of, all insurance claims made by these policies, and all insurance payouts.

50/ Insurance benefits shall not be assigned or sold, or they shall become void.

51/ All private life insurance, and long-term disability benefits shall be paid to government in a lump sum. Then, the recorder system shall disburse these payments annually for a specified time period to the beneficiary.

52/ When insurance companies make pay-outs, the insured party shall receive no part of the money. All the money shall only be paid to third parties making repairs or providing other mitigations. Failing to do this firstly incentivizes people to make claims for minor damage that would otherwise be overlooked. It secondly encourages people to pad damages. And thirdly, it greatly helps make insurance fraud more profitable to the fraudsters. The rule shall be that insurance gives one the opportunity to recover, rebuild or repair, not to cash out, or relocate. Those who don't rebuild, replace, replace elsewhere, or repair, shall not get any insurance money, and this includes those who government prevents from re-building because they are located in a tsunami zone or other hazard zone.

53/ With all forms of insurance, the settlement shall only come as equivalent stuff, not cash in hand. And this is always subject to taxation and a delay, and some paperwork. Therefore, with regard to all insurance payouts the recorder system shall:

a/ Assure that the insured never gets quite full restitution.

b/ Verify that the insurance money is used exclusively for compensating the insured.

c/ Verify that any co-pay is actually paid.

d/ Verify that the recorder system bid boards and used and kickbacks are not paid.

54/ All insurance repairs shall be paid according to the lowest responsible bidder's price on the government's bid boards.

55/ When insurance companies acquire damaged property, it shall be auctioned-off by the county recorder.

56/ Unique, rare and non-replaceable assets and expensive art works shall not be insurable.

57/ Insurance companies shall be prohibited from paying for psychiatric or psychological counseling.

58/ Whenever people go missing in a natural disaster and mass death event and everyone would presume them to be dead, the government shall declare the people dead after 90 days have passed.

59/ With regard to ski resorts, skate parks, swimming areas, those who tow water-skiers, and similarly dangerous activities: The user will have to get a license, and pay the insurance fee for each time period engaged in dangerous activities.

60/ Nobody shall have no liability for injuries for sport activities such as swimming, and ball games that take place on public property or property open to anyone who comes or anyone who buys a ticket.

61/ The counties shall be free to outlaw skateboarding because:

a/ Skateboards cause lots of injuries/

b/ Skateboards are at times used as weapons.

c/ Skateboards are noisy.

d/ Skateboards make our cities look beat up.

62/ All insurance shall prorate to the day, and all unearned premiums shall be refundable. If somebody signs up for an annual policy and only uses it for three days, they shall be entitled to a 99% reduction in the cost of the policy. The dates of all insurance policies shall be between the policyholder and the record system, which shall notify the insurance company about the day that starts and ends.

63/ Healthcare insurance shall never include long-term care. Long term care shall require a separate policy, which may be delivered at home in our nation, or overseas in a variety of nations. Retirement homes, and long-term care shall not be covered by regular health insurance. Long-term care must instead be insured with a separate long-term care insurance policy. It is thought that many people will opt out of the long term care system and rely on care by their family. It is also thought that this rule will offer a powerful incentive for the people to have children and families as they did in past decades.

64/ No insurance company operating in our nation shall be allowed to have any offshore parent company, or subsidiaries or any offshore of affiliates that are out of reach of our government, for if there is a giant disaster in our nation, they will just roll everything up and declare bankruptcy leaving our government holding the bag, when the foreign company got all the premium money. We simply can not have foreign insurers, because they are fundamentally judgment proof and they are outside of the reach of our government.

65/ Everyone shall be responsible for taking care of their teeth, and there shall be no insurance for dentures or dental procedures. All free government dental programs for children shall back-charge the kids and their families for cavities for failing to brush and floss daily and for the cost of fillings and other required dental care related to poor dental hygiene.

66/ Everyone involved with the insurance system in any way shall be recorded by the system, together with the services they provide and require. The recorder system shall regularly used data forensics to find fraudsters and conditions that cost the system excessive amounts of money.

67/ Where for profit insurance companies pay people money for writing insurance policies, this money shall be subject to commission sales tax whether or not the money is called a commission. In other words, regardless of how insurance salesman are paid, they shall pay the same 35% tax that lawyers and commission car salesman pay. Where people buy their insurance directly from a Government insurance provider, no such tax shall be paid.

68/ Private insurance companies shall be prohibited from participating in disaster responses, but must stick to their role of paying out money.

69/ The private insurance industry shall pay a 20% sales tax on all money it collects there shall be no tax of insurance payouts.

70/ All claims adjusters shall work for the recorder system and they shall be paid by the recorder system.

71/ All health insurance companies shall always pay standard average pricing without any surcharge or discount. So the better healthcare providers will frequently not accept insurance.

72/ All insurance company financials shall be required to show their total premium income, and the total amount they paid out for claims, and the percentage difference. Where any sort of insurance is marketed, a similar calculation shall go on the prospectus.

73/ Insurance companies shall no longer be allowed to offer healthcare services because this is obviously a conflict of interest. Therefore all HMOs must be broken up. It shall be considered the crime of fraud whenever insurance companies provide medical care, or when they own any part of any healthcare facility they are paying for.

74/ Insurance companies shall no longer be allowed to negotiate discounts, or special charge rates, or pay rebates, kickbacks, or make secrete profits, or communicate secretly with healthcare providers, or divide up services, or offer their own healthcare services, or have preferred vendors, exclusive relationships, and all of these activities shall be considered healthcare fraud.

75/ Insurance companies shall not be allowed to have their own idiosyncratic time-wasting diagnosis or payment rules, but all must all obey the national standard care rules. Also, insurance companies will be responsible for either paying promptly according to the rules, or paying for adjudication by a Senate jury.

76/ Everyone who has insurance shall always have the ability to not use the insurance and not pay any more for not using insurance. It shall be considered healthcare fraud when healthcare providers refuse to cooperate with efforts at cash payments.

77/ There shall be a single pre-quoted price for all non-emergency healthcare procedures. This price shall include normal anesthesiology, normal incidentals, and normal recuperation.

78/ The Senate shall regard the private insurance industry, the realtor industry, the lawyer industry, the title insurance industry, the expensive drug industry, the for profit hospital nexus industry, and the over-qualified architect industry, are mostly unnecessary things that only add the most marginal benefit to society. Therefore, the Senate shall lean towards reducing these industries as much as practical.

79/ Insurance companies shall not be allowed to do anything that drives the healthcare industry towards consolidation. Where this is discovered the insurance company may be required to pay toxic waste level amounts as penalty.

80/ Insurance companies shall pay toxic waste level fines when they break the rules for profit. Also, it shall not be thought a terribly bad thing when the government drives insurance companies out of business due to overly strict regulation. The insurance industry will just grow right back if we ever need it.

81/ The scam of non-government or "Swiss" reinsurance shall be prohibited. It shall be considered fraud to engage in non-governmental re-insurance, which eventually tends to leave the government and the people "holding the bag" for the next big underfunded disaster.

82/ Insurance companies and healthcare companies shall be prohibited from offering any sort of incentivized or performance based pay to their workers, contractors, or board members, or salesmen. It shall be considered felony fraud for healthcare and insurance staff and board members to give or receive any such payments.

83/ All vehicle liability insurance shall be associated with the driver and not any particular vehicle. All of the other sorts of insurance shall be associated with the vehicle. Where people only drive a small amount in location-tracked log-in vehicles, then the driver shall have the right to pay the standard, per-kilometer rate for car insurance.

84/ Here we note how under the old system, driving penalties were assigned by the legal system, however the biggest portion of the cost of a violation was paid to the private insurance system in the form of much higher insurance premiums for many years. And also that was for a ~\$30,000 required insurance coverage, an amount that was completely inadequate for most injury accidents. So this was an expansive bag of worthless hot air. Behold the way our government's social designs were shaped and molded to maximize insurance industry profit.

85/ Once self-driving cars are safer than human operated cars, insurance shall no longer be required for human backup drivers of almost fully autonomously driving vehicles.

86/ There shall be no liability for fallen limbs or trees, except when people are trimming trees or cutting them down and they fall on someone or something. If we don't do this, then people will have another reason to cut down our beautiful trees. Also, fallen branches shall no longer be a matter of liability or insurance or court liability, except for the species known to suffer from fallen branches that actually cause significant injuries.

87/ Insurance companies shall not be allowed to get in the

business of healthcare treatments or vehicle repairs. They also can't get involved with pharmaceuticals or drugs.

88/ There shall be no insurance for plagues, or wars or other human made disasters because somebody might make it happen to money make on the disaster. In fact, government shall be thought to have extensive rights to keep people from benefiting from from man-made disasters and from human natural disasters

89/ There will only be about 4 or 5 grades of insurance coverage and all all insurance must be of one grade or another. All the grade-1 healthcare is provided free by the nation. All of the grade-2 healthcare is neither free nor taxed. All of the grade-3 healthcare is lightly taxed. All of the grade-4 healthcare is taxed at a higher level. All of the grade-5 healthcare pays luxury tax. But at each level, there is an exhaustive and complete list of common procedure that are either acceptable, or they are not. And if there is any determination to be made, the rules shall be the same for all insurance companies, and the ruling shall come from our randomly drafted judiciary, and not from either the insurance company or the insured people. Also, our economy shall have a number of barriers between our healthcare industry and our insurance industry. Some of these barriers will be in the form of recorder system data verification. There will also be a rule that no insurance company shall ever be allowed to have any people working in any healthcare provider environment, let alone running their own healthcare providers.

90/ In general, the insurance company people and the hospital billing department people shall not be allowed to communicate with either patients or healthcare professionals until after the procedures have been done. Either the procedure can be done on a person showing whatever symptoms of whatever age, or it can't and the insurance company should not have any say in which standard procedures are done.

91/ The insurance industry, the pharma drug industry and the healthcare providers shall not be allowed to have any power over how Government policy is determined. In these matters of public policy the insurance industry, the pharmaceutical drug industry and many other industries shall be required to remain mute.

92/ Government shall be required to discourage the use of healthcare insurance. Therefore, we shall have it that neither government nor any fictional citizen shall be allowed to ever compel people to buy health insurance.

93/ Healthcare insurance shall now only cover treatments and media training in self-help rehabilitation. It shall no longer cover long-term care. And it shall especially not cover the sort of long term care for elders that is normally provided by loving family members. That shall no longer be considered an aspect of the healthcare system. That will be the care system and the Care system will operate and be funded in a completely different way than the healthcare industry.

long term shall be considered the responsibility of every person to either have loving family members to care for them when they get old, or to have savings. When there are no family members, or when the family members will not do this, it shall generally not be considered government's responsibility. The foregoing shall be regarded as a key means of:

- a/ Controlling healthcare spending.
- b/ Getting good people to reproduce.
- c/ Assuring that old people are properly cared for.

94/ With regard to health insurance, we shall tax time-expensive procedures to pay for time-cheap procedures. However, we shall not tax the healthy to pay for the sick.

95/ All health insurance companies shall be nonprofit, as most were prior to 1973.

96/ Government shall stop using psychologists to:

- a/ Evaluate criminals.
 - b/ help criminals grow from their time in lockup.
- This is both expensive and it doesn't seem to result in any real improvement.

97/ Both government and insurance companies shall be prohibited from paying for psychologist/psychiatrist counseling. After all, mental health therapists commonly say that it is important that the patient pay for his own mental health counseling, so he makes the most of it. However this shall not apply to veterans who come back with mental problems from their time in combat.

NR'161. PUBLIC LIBRARIES & MUSEUMS

1/ The Sub-Senate shall compile and the Knowledge Sluice shall elect a definitive public library, a WIKI, and self-study education system. These shall also run a testing and certification system for all courses and occupations. This system shall explain all aspect of all common professions and specialist jobs. It shall do the same for all aspects of serious knowledge. Except for testing, this system may be accessed without registration or login, and there shall never be any charge to use this system. This media shall be democratically assembled, meaning that no portion may be added, divided, consolidated, modified, headed, edited, disambiguated, or prioritized without a vote of the Knowledge Sluice.

2/ Every public domain item in every library in the land, both public and private, shall be digitized and put in the Senate's online library. Special attention shall be paid to making sure that all documents from closed stacks and private collections are digitized. It is everyone's duty to truth, honesty and goodness to make sure that all the old books are scanned into the free online library for everyone to read.

3/ All precious books in closed stacks must be made available for anonymous downloading, and browsing. The only exception to the foregoing is that information on making weapons shall be only available with an ID.

4/ The national Senate library shall be mirrored by all county recorders, block-chain style, to reduce the possibility of data tampering.

5/ All library materials written and audio/video shall be converted to text files and put on great library of at least 16GB chunks for download. Each chunk shall have about 20% serious political and economic material in it so that nobody knows who is reading the harmless stuff, and who is reading the political material. Also the political material shall be mixed-in in such a way that so nobody knows who is looking at the political material, and also so that nobody can strip this material out of the data stream. These downloads shall require no registration and use no encryption or passwords.

6/ The Sub-Senate shall promulgate both recommended and must watch media. The recommended media can be text or video. The must watch media must be video, and shall not exceed 60 minutes per teneth. We do this so our freedom waxes in important thoughts instead of waning in distraction and forgetfulness. It is a small price to pay to keep our democracy from eventually capsizing.

7/ This Senate media shall not be frivolous. and it shall be elected by the nation's wise-man Over-Senate. Regarding children's media, only educational children's media may use songs. Normal children's media shall not use songs or singing.

8/ No less than 25% of the nation's eduction budget in the first 10 years of this Constitution shall be used to assemble our nation's free educational media library, rewarding content makers for their efforts.

9/ All libraries not in a primary or secondary school shall be open to the public at least 8 hours a day every day. All libraries must allow entry and real or electronic browsing and downloading of all information housed without showing an ID. Again, there shall be no requirement of showing an ID to enter any library. There shall also be nothing wrong with covering your face in a public library.

10/ All major museums and libraries everywhere must be open every day from at least 9am to 5pm. When there are seasonal or year-round extreme crowds and long lines, all public museums and libraries must be open from 7am to 10 pm or enough to prevent crowds.

11/ All museum commentary shall have a QR code link to multiple languages which may be played on any standard player app.

12/ No government money, tax breaks, non-profit status, or public land shall be used for museums, libraries or zoos unless:

a/ There is no charge for admission. All museums, libraries, and zoos must be considered a gift to the public or they shall be considered for-profit. Also, asking for donations and having suggested donations at the entry shall be considered the same as charging.

b/ All real world exhibits are put online for all to see free of charge and free of registration.

c/ That museum, library or zoo is located outside a tsunami or flood zone.

d/ That museum, library, archeological site, or zoo allows all non-flash photography and recording, and does not have a special dress code. All areas that allow the public shall open themselves to public recording.

e/ That museum, library or zoo must provide sufficient seating sufficient to meet demand.

f/ All purchases and sales of expensive display items shall be approved by the Senate.

x/ If the land for a museum, library, or zoo was previously owned by government, or the institution was ever a non-profit, then it must abide by this paragraph.

13/ All museums shall have seats at a ratio of 1 seat per 7 visitors when they are at capacity. These seats shall be spread around the museum and those in cafe/restaurant/ office areas shall not count in this calculation. All museums shall be ranked in terms of importance and value. There shall be a Senate established minimum cut-off for calling a

museum a museum. All museums shall show the number of artifacts, and all artifact must appear on the museum's website in no less than 6 clear and high-resolution photos from each side in order to be on public display. All museum artifacts on display shall stay where they are, if currently owned by that museum. If they are on loan, then they shall be returned as called for. All important museum artifacts shall be duplicated/ replicated and sold at cost to all other museums. All artifacts and writings in any Islamic land shall be removed due to the extremely long history of destruction by Ishtar once it becomes convenient to destroy the history associated with the artifact. No museum shall be located less than 300m above sea level.

14/ The public museums shall have first right of refusal to buy all museum grade discoveries.

15/ Public libraries shall not be allowed to closed for either special events or holidays.

16/ All of the librarians that participated in drag queen story hour at their public library shall be banned from getting/having a child worker licenses. This is intended to make them substantially unemployable.

NR'162. SCHOOL VOUCHERS

1/ A voucher based education system supports the diversity of thought we need for a smart group brain. It also gets government out of our schools and puts the parents in charge instead. As parents shift over to the new private voucher schools, and the old schools are no longer needed, we shall close down our old schools. once the school has been shut-down, it will become community property rented to voucher schools. The rent shall be that of grade B- office space if there isn't enough demand for all the classrooms, and whatever the market will bear if the school is completely rented up.

2/ Under the old system, around 2/3 of our education budget was spent on things other than teachers and classrooms. In other words, it was mostly stolen. If we switch over to vouchers we should be able to cut educational spending by 1/2 to 2/3 with no loss in money spent on teachers and classrooms and educational material. After switching to vouchers, all the money paid for education and all education related property taxes and other education funding taxes should be reconsidered and cut accordingly.

3/ We shall switch to a voucher-based education system that will have government paying for the education, but private micro companies and partnerships of teachers will compete for the voucher money. In the new voucher system, religious schools shall not be allowed due to the separation of church and state. Also, all school vouchers must be spent with third-party, unrelated, certified schools. Schools that teach things that are off-limits and frivolous things shall not be allowed to participate in the voucher system.

4/ We want government to pay for universal education, it's just that we don't want lifetime plod-along government workers anywhere near our kids, for this will certainly guarantee a bad experience. We also don't want government running our schools. There shall no longer be any government schools or school boards, or school-districts. All their assets shall now be the property of the county they are

located in. The school buildings shall all now be rented out to several private schools. All public schools shall be privatized including those for the disabled and misbehaved. There shall be no more teacher's unions also.

5/ The education system shall work on vouchers given by each county to parents living in that county. Then the parents can spend the vouchers directly with the teachers/schools of their choice, thus creating a competitive marketplace for educational services and school voucher money.

6/ On the voucher system, all conforming children between 9-months and their second birthday shall get 1-hour per day of free save-able and combine-able, but not transferrable daycare until the child is 2. Between 2 and 3, the child gets 4 hours of free daycare/preschool per day.

7/ Now we will have a voucher gold rush, a feast of vouchers, a feast on the billions in education money hanging out for motivated people to grab. And all our old schools will be available to rent space to various new schools. And we also have a glut of commercial space worldwide due to the Internet and the coalescing automated delivery system, and the township co-op's and commissaries. This glut of space will be re-used to a small degree as schools, and also as new shared healthcare facilities.

8/ Under this system, good teachers and good schools will have many students and make more voucher money than the rest. Some will hire teaching assistants. Other less expert teachers, or unknown people will make their way more on their small class sizes.

9/ The chief cost of a group of teachers operating a for-profit voucher school shall now be thought to be renting school rooms in a government, private, or township facility. The teachers will put their time into a school enterprise according to a county recorder system voucher income and rent liability partnership, or hired educator agreement. All reasonable teacher partnerships for the apportioning of voucher money shall be handled by the county recorder system, however no partnership shall exceed 50 teachers. The following shall all be paid by government:

a/ Maintenance, janitorial, and utilities shall all be included in the rent of the schoolrooms. The school buildings shall be maintained at the cost the county under the division of building maintenance by private companies. This shall have a special heading for school maintenance. The budget for school facility maintenance and construction shall however never be conflated with the school system as this leads to corruption. Anyone calling for school building maintenance or construction to be done by the education people shall be thought to be corrupt.

b/ Textbooks and edu media (These will be virtual and downloaded and free nationwide).

c/ Grade documentation. The official testing of students and video monitoring shall be conducted by the county recorder system. Teachers will no longer conduct exams/tests that count for anything outside their classroom.

d/ Video monitoring of schools. The official testing of students and video monitoring shall be conducted by the county recorder system.

e/ Teacher oversight shall be by the Sub-Senate. Thus the Sub-Senate will make sure that the teachers stay on a Senate approved teaching script.

f/ Violent students. Under the voucher system it will be very easy for teachers and schools to kick students out at a moment's notice and block the children from re-entering the school's security zone. Thus we can greatly reduce our school security funding.

g/ Student media and teaching management applications shall be free from the county recorder system.

h/ Tax filings: No tax filings shall be required for voucher income. Schools shall not be allowed to have application fees for fines for bad behavior, or other extra fees. If schools start.

i/ Cafeteria: This will be provided by the nearby township food court. The vouchers will come with children's meals, and the police station will be just steps away from the under-video student meal zone, which is inside the security zone, but next to the food court.

j/ Gym: The weights and cardio equipment area shall be at the center of the township. These will also have a smaller area with equipment, weights, and cardio equipment for children. The various tracks, fields, and pitches shall be located at the periphery. Thus no serious school shall have any athletic buildings or areas. The various schools may also have children's ellipticals and other cardio equipment in their hallways.

x/ The net result is that it will be much easier for people to begin schools and daycare businesses, and these will not cost so much due to greatly increased competition.

10/ To be perfectly clear, no education voucher money shall be spent on sports or physical education. This shall go under the sports category, and this shall be paid by the county, as shall the budget for crafts and community workshops.

However, the money for trade school shall come from either school vouchers for children, or trade school vouchers for grown people who apply for vouchers from the workforce development division of government.

11/ Parents shouldn't pay for education, society should pay for a free automated education. The children that make the most progress, they get more than their inherently scarce share of education resources. The children that make the least progress get taught a skill or two and then they get pushed out of the free education system.

12/ All public spending on education shall have separate budgets (and vouchers) for serious and frivolous subjects. There shall be no voucher spending outside of these two headings, and none for religious education.

13/ There shall be no more teacher's unions or school boards. From now on, the parents and the market for children's education shall decide what their kids are taught and there shall be no place for any school boards. And there will be no teacher's unions or corrupt foreign influence.

14/ To start, the voucher system will take the average national per-student spending level and cut that by 1/3. Then it shall pay the remaining two thirds directly to the teachers in the form of per-student, length-of-time payments. Most of the 1/3 being saved will be re-invested in the national educational media library in the form of hundreds of thousands of X-prizes and Ubiq status awards. Also, the existing school shall be maintained by the county and rented to teachers and groups of teachers (the ones with the most kids signed up), These can rent classrooms for the same price as month-to-month tenancies on grade B office space nearby.

15/ In year-2, we will start cutting our voucher fees, and we will do the same in year-3, the value of our investment in a media library will start paying off then, and we will thus be able to cut our spending on per-student vouchers even more. Ultimately we will trim our educational spending by more than 2/3 of what it was under the previous system due to the elimination of a corrupt management layer and also due to automation of the educational media display process.

16/ Under the voucher system, the most exciting teachers and classes will have large followings and huge classrooms and these teachers will make lots of Ubiq money and status for their ubiquitized teaching materials.

17/ The trouble-making kids will tend to get turned down by the most popular teachers. The county may need to offer larger voucher payments for problem children, however, the amount shall not exceed 10% of the average wage per trouble making kid, except in the reform schools.

18/ All primary and secondary school tuition in excess of the government's voucher payments for that part of the nation shall pay a 50% luxury sales tax except where the school is dealing with special education students including reform school students or advanced students. Tertiary school and Graduate school tuition that exceeds 10% of the average wage shall be subject to an 80% luxury tax.

19/ Every education voucher of each category in each county shall be worth the same as everyone else's, except for the various special needs and troubled child supplements which shall not be more than three times the average.

20/ The competition and market forces caused by vouchers is expected to take education out of a communist mentality and give it a quality of service more associated with capitalism. We will allow a gold rush situation in our schools at first, and then we will cut back on spending.

21/ Schools affiliated with a religion, or that favor one religion over the others, or that teach religions, or satanism, or violent ideologies, or sexual ideologies, or that teach in a way that the county Senate does not like shall not be allowed to be part of the voucher system. Satanic and Ishtarian religious symbols and celebrations shall be prohibited in our fictional citizens and government.

22/ All publicly funded schools be paid with vouchers, and there shall remain no school operated by government. All schools must be privatized, although they will be paid with public school vouchers.

23/ Some parents may home-school and send their children only for afternoon and weekend voucher activities, which will be more social than academic. The after school activities shall be optional and shall not be dependent on attending the school at other times.

24/ Government shall provide school vouchers for conforming citizen and legal immigrant children. The education of illegal immigrant children shall no longer be supported in our nation.

25/ Three sorts of School vouchers shall be issued to primary and secondary students: one for serious education, one for sport/ physical conditioning, and one for meals. The education voucher shall be 95% of the money and the physical conditioning and sport part shall be 5%. This ratio may be adjusted, from time to time, however it should be fixed nationwide, and it should not give too much money for physical fitness.

26/ The way we will get Government out of the business of school meals is that the private voucher-paid schools and teachers will either have to provide meals, or they will have to co-locate with others that will provide this. And because of the generous money paid by our vouchers for kids meals, the meal providers will complete for business rather than acting like an island of awful socialist service in the land of the free.

27/ Except for schools for convicted criminals, Government shall be prohibited from running its own schools. All schools must be private, even the reform schools of last resort.

28/ All current prior primary, secondary and tertiary school administrators shall be banned from working in education for life.

29/ It shall be a felony for schools give a kickback to parents for their vouchers, either in cash or valuables. Likewise with parents receiving a kickbacks. In other words, as with all kickbacks both sides may be charged with a felony. Also, to be clear, all vouchers shall be given to parents free of charge.

30/ Vouchers shall pay for all education up to the end of secondary school. Then afterwards, they shall pay for all or part of the education depending on how much academic progress has been made by the student in serious studies.

31/ The free education system, and our free school vouchers shall be thought to exist for economic growth, group decision intelligence, and the political stability of our nation. The free education system shall not be thought to subsidize education in frivolous subjects like the arts, fiction, story telling, athletics, music, or theatre. These things shall be viewed as distractions fostered by the enemies of our freedom. They should be viewed in the same light as ancient Greek theatre. Greek theatre was fostered to distract the Greeks from politics and the public forum discussion of their illustrious world-changing isocratic democracy full of T-ed talks, and wiki-hacks for ancient Greece. Instead the frivolous Greek theatre distracted the Greeks and made all the sheeple men into homosexuals. Instead, we shall repair this part of our education system, and only use our education money for things that will turn a profit for our society, or make it wiser, or more stable.

32/ All conforming citizen and legal immigrant children shall get free vouchers for school, after-school supervision, and before-school supervision, for up to 7:00am to 8:00pm, every day, year round during the days when the parent works and commutes. This includes school meals. Under this scheme we will:

a/ Better educate children because they will spend more time at school.

b/ Get our kids off the streets and into a structured and more healthy environment.

c/ Get more women working.

d/ Make it much easier to have children.

33/ Under the voucher system, there shall be an attendance system managed by the county recorder system. The kids will clock in each day so they can enter through one of the school's double security doors. And they also clock out each day when they go back out through one of the school's double doors. Then the teacher (and their assistants if any, and not the school) gets the voucher credits for the student.

34/ Some schools shall be like county-owned secure office/retail buildings that rent out classrooms to teachers.

35/ The women (not men) working in our school hawker centers shall be paid by the meals portion of our school vouchers. The system shall give space rental priority to mothers of students currently at that school, then mothers of kids in nearby school and then other parts of the system. This is so the children's food will be made with more care. The voucher amount for school meals should be enough that people jump at the opportunity to make quality fresh good tasting food from scratch, with a healthy amount of egg at breakfast, and unprocessed fresh cooked meat and vegetables at lunch and dinner, and fresh hot bread, or fresh rice, or fresh kasha at each meal. The kids also get milk or water. There shall be no soda, no candy, no sweets, no chocolate or caffeine, a small amount of fresh fruit, and the eggs are sweetened so they will always be eaten, and all the kids always tend to have enough brain chemicals at school. The sugar is after all what we will use to motivate our kids.

36/ the voucher system shall be operated so that it is easy for students to change teachers and schools rapidly if they want. It shall be thought that the exposure to many adults in a teaching environment greatly benefits students by broadening their horizons. At no level should any student spend be required to spend any more time than they want with any one teacher. If they don't like the teacher, then they should be free to take their vouchers and move on to another class on a day's notice, so long as they have a clean record with regard to violence. This way we have kids meeting lots more teachers and lecturers. Also, this way, school isn't so boring.

37/ Where the student is having a problem with another student, or a teacher, it shall be easy to transfer away to another school in this new voucher system where the customer with the voucher money is king. For raising real Americans, stand up Americans, this should be a thought a much better approach. No longer shall we habituate our young people in the ways of the daily suck-up to bullies or petty and often bad-tempered government bureaucrats called teachers. No longer shall our children be habituated into obeying the arbitrary ways of an indifferent and un-punishable government education bureaucracy: a bureaucracy that herds thousands of children in the easiest way possible for its do-nothing administrators.

38/ The better progressing and better behaved 10th-12th grade school students in some districts will be bussed to a central point, where they will change busses and go to their choice of school. This is thought a better way to:

a/ Increase class specialization.

b/ Help desegregate the young people of each community.

c/ Reduce school violence.

d/ Help kids to enjoy school more.

e/ Reduce the power of school cliques.

39/ There shall be no nationally funded or run school infrastructure, or school policy administration, except where elected Senators establish national educational policy and assemble the national edu book and edu media library.

40/ The following shall be closed down:

a/ All unelected national school administrations, including those that approve graduate school candidates. There shall be no national unelected bureaucracy for education. There shall only be the national Sub-Senate assembling the education media library, and establishing national policy for

education. There shall be this and the county senates running their own schools according to the national standards and menu options offered by the national Senate.

b/ All school boards.

c/ All teacher's unions.

41/ Under this system, the government shall establish policy and rules for primary and secondary learning. However it shall have no involvement with teaching, or selecting teachers. Instead, the actual students and their parents shall select their own teachers.

42/ All citizens shall get first priority in school, over legal immigrants. First, the citizens go, and then the legal immigrants get the leftovers. If there are any illegal immigrants at all, they shall go third, after both of the two legal groups get their needs met.

43/ Our education system shall be completely egalitarian with regard to funding in each county. There shall be no more school money spent for the richest parts of the country than the poorest ones except that in some areas, teachers must be paid more because they must live in a more expensive area.

44/ All the oversized college endowments shall be seized and used to offset the cost of wiping out the student debt.

45/ Government shall be prohibited from spending education money on frivolous subjects as well as matters of gender or race identity.

NR'163. SCHOOL TESTING

1/ Each teneth, the county recorder system shall conduct all occupational and educational qualifying tests as decided by the national Sub-Senate.

2/ The Sub-Senate shall compile a vast pre-approved test question library for each academic and professional subject. In the 5 to 15 minutes before each senate test, The Sub-Senate shall randomly draft Sub-Senators and these will each randomly select a single test question from each of a few libraries for a few different tests. The Sub-Senators will send their choices in the 5 minutes between when the test candidates are seated (without any network or electronics) and when the tests begins. Also, a great many different tests for different subjects shall be given in the same hall, with the test takers, unable to look on their neighbors test, because they are all taking a different test for a different subject or profession. Each person gets a 10cm number chip corresponding to the test subject they are taking and no two numbers can be next to each other. On top of this, all the testing site should have super intrusive casino-style video monitoring.

3/ On 2028.01.01, or sooner if the Senate elects, everyone shall defer to the national Senate's objective tests for all purposes of official learning certification and professional certification. The only thing that will define a person's academic abilities will be their score on the Senate's official and incorruptible exams. Thus, the bottleneck in super-scarce degrees from exclusive and expensive schools will now become practically worthless by intent and design

4/ The county recorder system shall keep track of everyone's government test results and academic progress on the government's tests. However, the county recorder system

shall not have any place for school records of any sort. These shall now be considered totally corrupt and irrelevant and not worth keeping records on, or reporting (except with regard to violent acts at school). Therefore, after 2028.01.01, there shall be no name protection for any school and people shall be free to say they went there. Also, the people are no longer supposed to take the status of the school into consideration in hiring anyone. The only thing that will matter for job candidates and other people in regard to learning shall be their score on the relevant Senate tests. Also, under the new system, unbiased achievement distinction shall come exclusively from Senate testing, and schools shall no longer have any power to confer official achievement. Thus school diplomas shall be considered worthless under the new system. Also, because school diplomas are considered worthless under the new system, there will no longer be any graduation ceremonies, and schools shall no longer be allowed to keep records on past students. Also, there shall be no speeches by famous people at any school to celebrate the beginning or the end of the school year.

5/ There shall be no more school grades. Instead, employers must rely exclusively on the unbiased, impossible to corrupt and completely objective government tests for qualifying job candidates in each field and for breadth of general knowledge.

6/ In order to encourage smart young people to fly in their studies, we shall not record how many times a person has taken a test, or class, or anything about failed tests. The only thing that gets recorded is the most recent qualification test or its continuing education test.

7/ Because of the new way that we will now do teaching and testing, teachers will no longer have any power over their kids regarding grades. This and the vouchers will get our teachers being super nice to our children, like people working on tips. Surely this will get some more cooperation and learning from students in general. This will also make school much more enjoyable for the student.

8/ The students that can make lots of progress shall get many of perks. For example, they shall get better quarters and after age 16, they can take classes in other parts of the nation. After age 17, they can to go to certain other nations to study.

9/ Only Government shall have the authority to accredit schools. However, this will no longer matter much, because government will give (for a day's wages per test) the only tests that will matter to everyone.

10/ Our first priority in testing the credentials of professionals and experts shall be the people who work with children, including those working with university age young people. We shall also first check the credentials the people who work as government managers, and corporate managers.

11/ The focus of the Senate's education system and tests will be on employment and developing the workforce. All the big name schools like Harvard, MIT, Yale, Sloane, UCLA: all these names shall now be ended. The percentage of Senate questions a person gets right on the relevant Senate test, and their placement among all the people who took that test shall be all that matters going forward.

12/ The Senate shall have simulators electronics and physical simulators for training all forms of equipment operators, including especially oil drillers and oil probe operators.

13/ Government shall not tax serious education or child care in any way. To the contrary, Government shall provide a number of free services to all schools such as recorder-system monitoring of school video feeds, free learning materials, free testing, some degree of free healthcare, and stepped-up security for all school and daycare facilities who have enough children under tutelage.

14/ All minor children shall be checked for a fever when they arrive at school, when they come back from recess, when they come back from lunch, and at the end of the day when they leave the school. This is all automatic. Where a kid has a fever in the middle of the day. They cannot come back to school that day.

15/ Regarding special needs children:

a/ The people designating children as having special needs and deserving of more education funding must be outside the education system getting the increased funding from the business. If we fail to do this, we see eternal bar-lowering and eternal increases in all sorts of children's educational problems like autism and dyslexia.

b/ As with healthcare, there is theoretically unlimited need for special education. Therefore, we must have an upper limit on the budget for special needs children. So to start this shall be set at 5% of the education budget.

c/ Every class up to grade 14 shall have a variety of versions for all common types of learner. This is intended to deal with most special needs learners.

d/ We shall not spend any public money at all on special teachers for children that have standard Downs syndrome or an IQ that is 69 or below. We shall however prepare and give away free video media for these children.

e/ Government shall not spend more than three times the per-child average on any retarded, gifted, special needs, or reform-school student in the education system.

f/ Some of the people banned from teaching and working with children may however still be allowed to work with special needs children approved on a case by case basis.

16/ There shall be no more education loans, or loans for people while at school:

a/ Government shall now provide free locking-closet bunks in 50-person dorms at a walkable distance for all students.

b/ All textbooks shall be free and the Senate shall establish a great library of free download textbooks and other learning media for our nation's people and the people of other nations. All school textbooks and all school library books shall be electronic, and provided for free online by the Senate. There shall no longer be books in school libraries.

c/ There will be no fees required to take Senate video classes or the Senate tests.

17/ Schools shall not be places of stinginess and secret knowledge imparted to a select few people for outrageous sums. Instead, they shall be the opposite. If any school wants to have secret knowledge, let it be called not-accredited in our land of more and better. Let that school be exempt from non-profit status. Let that school be off-limits for all government voucher and other education money.

18/ All school endowments and school wealth shall be nationalized. All of the top 50 universities shall be shut down and replaced over the next decade, if not sooner. Academic degrees shall never be considered any qualification for

government employment, as all academic degrees are easy to corrupt in a giant backdoor too political power

19/ Our previous post-graduate education system was hypocritical. On one hand it made a huge show of objectivity measurement and quantification wherever possible. Yet, on the other hand, where objectivity mattered most (in the process of selecting new scientists electors) there was a totally subjective sponsor-based approval process of new PhD candidates. Thus only sponsored people could become a new PhD, a priest in the "Church of Reason". It should be remembered that this was not about ensuring that our brightest minds became leaders in academia. Instead it was for the opposite reason — to ensure that our brightest minds could be kept out of certain areas of academic leadership and influence like climate science, oceanography, atmospheric science, petroleum geology, etc. If we don't do this, then a fake consensus can be created fabricated by those people who care to manage the tree of knowledge for parasitic ends. No. We must turn this situation around 180° and take great care to ensure that no individuals, and no corrupt clique is ever to run its own church of science, and bestow membership (or veto membership) in our academia, and our intellectual elite. Only the Senate shall have the power to bestow intellectual or academic, or scientific status of any sort (including Nobel prizes), and this shall come exclusively as Senate Ubiq status.

20/ We shall always be on guard that nobody and no foreign Mafia is ever able to influence who we have as our leaders. This is a primary aspect of democracy. Nobody should be ever able to block our real leaders from their ascent, or and install their own fake leaders. If this ever happens then the Mafia will be able to corruptly manufacture a fake consensus as happened with the immensely costly CO2 theory of climate. This is the most important aspect of academia, for this is what created the fake consensus of climate scientists that enabled the multi-trillion dollar fake climate crisis.

21/ Regarding all the people who are voting on committees about who gets to be a PhD: All these people in many branches of study should be presumed to be working for Ishtar as one of Ishtar's corrupt gatekeepers.

22/ The mysterious and inexplicable nature of writing a good and acceptable PhD thesis needs more careful consideration by the people. For this sort of subjectivity is exactly the sort of thing we do not want anywhere in our group decision-making system. The demand for originality (normally marginal and insignificant originality) seems reasonable as a guideline for bestowing status as an intellectual. However, it is really just an excuse for inserting ruinous subjectivity and the power to bar the disobedient from the academic consensus mechanism. It is far better that Government manages technical knowledge, and the employers and funders worry about the person's ability to come up with new original ideas.

23/ The esteemed word professor shall now be thought an evil word that creates extra-democratic credibility and power, and backdoors to power in our democracy. For it was the many Ishtar-friendly professors that foisted on our society many lies about everything from global warming, to nuclear winter, to acid rain, to Y2K, to panic over HIV and COVID. From now on, they shall all be called teacher or teach in all languages.

24/ All forms of teaching tenure, even if renamed shall be prohibited and void, and all employment contracts for teachers longer than one-year shall be void.

25/ It shall be a crime for any school worker to interfere with any Government or defense industry recruiters or recruiting process. No school staff shall ever get involved with recruiting in either direction, and no school staff shall ever participate in any anti war protests or student activities.

26/ There shall be no more grade point averages. These GPAs shall be now thought to exist to empower the few teachers in the system that are actually spies, that sabotage our brightest young minds, and keep them from being super achievers, so they don't have the distinction of our society, and so that we as sheep are more easy to manage, this is why we have these GPAs and these permanent academic records, and why all students must focus on being excellent followers that please their teachers. No. We will be much better using Senate tests than GPAs.

27/ We still have undergraduate colleges, and we shall have graduate colleges, and undergraduate colleges shall not offer graduate programs. And graduate programs shall not offer undergraduate instruction. Also colleges and post graduate institutions shall not share names, or suggest in any way that they're affiliated.

28/ It shall be thought that our nation will be both better off economically and more just if highest most academic distinction is spread out among the top 5% of young people than among the top 0.1% of young people. Also, educational prestige shall be a thing that belongs to the people and not to any probably corrupt fictional citizen educational institutions.

29/ The kids that can learn how to think shall be taught how to think, all the other kids should be taught what to learn. The former group should be thought of as smart, and the latter group should be thought of as rather robotic.

30/ School kids should try to look as mature as possible, and as smart as possible, as young as possible, so that other people will smile on them and help them more.

31/ No person shall ever suffer any penalty, either under the law, or in any school for copying or cheating on any non-governmental test. The place where cheating shall be punishable in education is on the all-important objective government tests, which shall be all but impossible to cheat on, due to the way the questions are chosen by thousands of Senators in the moments before the tests are given. Under the law, schools shall not be allowed to accuse students of cheating, or "plagiarizing" papers, or saying they were expelled or punished for cheating. Also there shall be no criminal penalty under the law for cheating on sports competitions or cheating on gambling. Also, Government and the justice system shall not involve itself with any sort of school fraud, of any sort except racial discrimination.

32/ Academic dishonesty shall no longer have any meaning either legally, or in anyone's mind-space. The power to make such accusations shall not belong to any non-government person. Besides, we don't even need to have this thing in our world. Soon, there will be no reason to cheat at school, and cheating the Senate test will be all but impossible. Also, we will eliminate the take home papers due to AI and the multiple choice nature of Senate tests.

33/ No schools should be allowed to defame their students

with any claims of fraud, or cheating. This is because all school experiences are inherently fake and simulated, and unimportant in the outside world. Besides, the schools shall not matter, only the Senate test matters with regard to training and education.

34/ Schools not be allowed to establish idiosyncratic rules for the conduct of teachers, parents students, or discipline, but must adhere to the Senate's uniform rules of school conduct. No teacher group or teacher union shall have any power to make rules of conduct or discipline or academic honesty. Academic honesty shall no longer have any meaning apart from cheating on Senate tests, which shall be regarded as the crime of Senate testing fraud.

35/ Teachers shall not be allowed to lobby government or to have to teach unions or conventions.

36/ When children use the Senate's school system, every time they encounter a new word or new idea, they're going to have to remember that word or they're just going to keep seeing it over and over again until they do remember what it is. Also, all of each student's work and their system identity follows them and the school shall have absolutely no right to this and parents shall be free to delete all teacher comments except those that relate to confirmed abuse

37/ Schools shall not get involved with drug testing of students unless they're obviously intoxicated.

38/ After 2032.01.01, no job shall require a "college degree", but many will require certain Senate tests.

NR'164. EDUCATION MEDIA & SUBJECTS

1/ We shall ponder the ideas of Thomas Jefferson, principle author of our nation's masterfully written declaration of independence:

a/ "If a nation expects to be ignorant and free...

It expects what never was & never will be." We shall ask if this is about frivolous studies like art, literature, gender studies, and race studies... or was it more about knowledge and wisdom about politics and economics?

b/ "Educate & inform the people... They're the only thing we can rely on for the preservation of liberty.

c/ "Wherever people are well-informed, they can be trusted with their own government."

x/ We shall ponder the words of Jean-Jacques Rousseau on using schools to brainwash the people: "Once you teach people to say what they do not understand, it is easy enough to get them to say anything you like." We shall also ponder the words of John Stuart Mill: "How can great minds be produced in a country where the test of great minds is agreeing in the opinion of small minds?"

2/ The Senate shall compile various video modules and tests. These should be designed and refined so that most people will find the media sufficient to learn most subjects, But there should be Senate certified teachers for the people who need someone to explain things to them, or to get confirmation feedback from.

3/ The Senate shall try to automate education as much as possible. There should be multiple explanation channels, with various explanations for all things. There should also be FAQs everywhere. There shall also be remote video conferencing

support by experts in each section of the text.

4/ Our national education policy shall be that:

a/ Live teachers are not supposed to squander their time monologging with their assembled students. Students should be spending at over 80% of their time with media and reading and less than 20% of their time with teachers. Wherever teaching is done via monologue, it should be automated and optimized through the modern miracle of recorded library video.

b/ All the questions on the well worn path should be answered as FAQ turnoffs in the video.

c/ Our educational media shall be typically optimized at assembly from all the best parts from all best presenters in the world. Then it shall be subject to continuous improvement as elected by the Sub-Senate.

d/ The education system can ultimately be made over 95% automated, and then we can have significant cuts in teacher staffing nationwide. Also, we shall not be discouraged from our task of fully automating teaching by the defeatist advice of government teachers, whose careers are at stake.

5/ Our students will probably spend over 80% of their class time watching/reading tutorials in a prefab media bay. The remainder of their time will be spend in telepresence with teacher's aids and teachers, as well as in person teacher's aids and teachers.

6/ The teachers and the the teacher's aids (the people who clarify specific parts of the material), these will generally work via telepresence in smaller schools. In the bigger schools, they will tend to have live teaching staff. In all schools, the teaching staff will tend to work from 7:00am until dinner time, with some starting and leaving early and others starting and leaving late.

7/ Generally we will stop distracting teachers with matters of behavior problems, unless they want to get involved. We will instead use "Monitors" as adult supervision/ private security/ camp counsellors. All shall be required to have a child worker license. Monitors shall only need to be high school graduates, because they will be barred from doing any education, or talking with the children, except to stop a problem. Children dropped off in the early morning, and/or picked up after dinners shall all be under the supervision of the school monitors, in a monitor's hall (like a study hall). In the monitors hall, the kids can either pull up any of the media they're authorized to see, or they can go to the virtual library in and get help with getting new media. In larger schools, there might also be a live librarian. It is not hard to imagine a sort of public daycare where we have two school monitors in charge of up to perhaps 120 children each afternoon. This is how we keep our children off the streets.

8/ Everything ever said or presented in front of students by anyone who goes by the name of teacher, or professor, shall be considered as public domain for teaching purposes and this may be freely recorded and copied for teaching purposes. No school or teacher shall have the right to prevent recording, or to restrict access, or re-use in any way. All student study material shall be saved in the student's server-based accounts, and all students shall have access to all their study material for the rest of their lives.

9/ Except for the right to Ubiq status, there shall be no IP rights for anything said in a school lecture. All school lectures may be recorded and copied freely.

10/ Education shall not be dumbed-down, but to the contrary, education shall be ever more thorough as teaching automation advances.

11/ The best portions of the best educational presenters shall be saved by the Senate. Many will be awarded Ubiq status and public money, but they shall have no other intellectual property rights.

12/ The Senate shall maintain the most detailed libraries and training materials for each occupation and each field of study, so that no secret society can profit from secret information. Secret societies with secret rites and oaths of secrecy shall be prohibited in our nation.

13/ All learning materials, all entertainment materials, and all standardized testing questions for minors shall be approved and disapproved by the national Senate. This shall include all material in the school libraries. No primary or secondary school shall show children media or books or that are not both approved by the Senate and ubiquitized or otherwise free of IP payments.

14/ It shall be a crime when education staff (including librarians, guidance counselors and psych people) recommend or get minors under age 18 to look at non-Senate-approved media. If this material is sexual, or pornographic, or involves sexual words in any way, or deals with gender in any way, the education staff person may be charged with child grooming.

15/ It shall be a crime when education staff (including librarians, guidance counselors and psych people) act to hide important matters or learning materials taught to their children.

16/ All school class materials, and all school library books must be published online for free download without login.

17/ Regarding all primary and secondary schools, all school books, all school lectures, all school teacher conversations, and all school library books shall generally be required to exclude all material about: religion, sexual adventures, race, politics, gender, gender identity, sexual identity, sexual attraction, homosexuality, transsexuality and other frivolous topics that Over-Senate elects to ban. If we fail to bar these topics, then we make our schools places of indoctrination. Teachers that talk about these things or reveal their beliefs about these things may be barred from teaching for life. If the excursion from what is allowed is judged to be extensive by the Senate, then the teacher may be charged with grooming or other crimes as applicable.

18/ We should all ponder Albert Einstein's perhaps disingenuous words about the old educational system: "It's a miracle that curiosity survives a formal education."

19/ The main priorities of our education system are to:

a/ Assure a wise electorate.

b/ Teach the laws of the nation and acceptable behavior.

c/ Inspire a unified team spirit for our society.

d/ Teach useful subjects.

e/ To give the people a trade or two to work in.

f/ To instill healthy work habits.

g/ To teach self-reliance and self-motivation

h/ Education shall not be about changing the beliefs of

students, or doing things to make students feel good about themselves, or making them sexual, or musical, or artistic.

20/ All secondary and tertiary schools shall be designated either serious or frivolous. Serious schools shall not teach or offer experiences in sports, music, visual arts, acting, religion, literature, story-telling, oratory, fiction, fictionalizations, design, poetry, pottery, clothing, fashion, textiles, philosophy, alternative medicine, gender and race studies, craft-making, physical activities, and any subject that a majority of Senators in the national Knowledge Sluice elect as frivolous. Frivolous schools shall not teach history, science, technology, engineering, building, manufacturing, business, economics, government urbanology, transport systems, or healthcare.

21/ Government shall work to reduce mental overhead in education. No instruction material or activities shall squander student time or learning passion/energy, no matter how old or long established.

22/ To improve the school experience, we shall:

a/ Favor history and real and practical subjects over fantasy and hard to access “great works” of fiction from olden times.

b/ Give credit for much smaller increments, so students try out more subjects.

c/ Make all media so the speed can be adjusted by the student.

d/ Not require that students sit still, but allow them to stand and move around while viewing their educational media.

23/ All high school graduates must take several courses, 10, in the following, as well as other subjects:

a/ The constitution and laws of the land

b/ Government spending.

c/ Defensive military tactics and firearm use.

d/ Firearm laws, safety, and use.

e/ Government procurement.

f/ Government and company corruption.

g/ Taxation, and tax filing.

h/ Propaganda and subversion tactics.

i/ Money, lending and finance.

j/ Communism, fascism, and totalitarianism.

k/ Election laws and how elections work.

l/ Citadel rights.

m/ National constitution introduction.

n/ How the Senate works.

o/ How the criminal court system works.

p/ How the money court system works.

q/ UM constitution introduction.

r/ Supply and demand economics.

s/ Scientific notation and large numbers.

t/ Violent crime and penalties.

u/ Sex crimes.

v/ Social media rules and overview, including what can be said without acquiring stigma.

w/ Emergency preparation.

24/ In addition to the above, we shall also have many other courses in subjects like:

a/ Budgeting and bookkeeping.

b/ The Rail and delivery system.

c/ Owning and renting property.

Starting a business of one's own.

d/ Nutrition.

e/ Scams and how to avoid them.

f/ Networks and their rules.

g/ Township design.

h/ Township utilities.

i/ Various science classes.

j/ Conflict resolution.

k/ Negotiation.

25/ We shall start separating kids who are going to do healthcare (for example) in perhaps 6th grade. We shall also make sure that there are many care jobs open for people with only a high school degree in subjects like disability care and geriatric care.

26/ What is politically important about high school math:

a/ Proficiency with scientific notation math.

b/ Understanding quantity, especially large numbers and ratios so the people can be numerate with regard to the immense public purse.

c/ Understanding the true scale of the planet vs. mankind, and understanding micro-concentrations, so we can make informed decisions about the environment.

d/ Understanding accounting enough to understand how corrupt people divert money away from the public purse.

e/ How to balance accounts.

f/ We should also try to instill a certain righteousness about not stealing from the group, not taking more than your share, not taking a bite from the forbidden fruit at the center of our Garden of Eden.

27/ Shakespeare, ancient theatre, and Moliere, shall not be taught, except as propaganda. Government shall operate, using a standard dictionary, in the school, she teach standard, English and there shall be no special law dictionaries.

28/ We shall take the best exhibits of the San Francisco exploratorium museum and add a few dozen more exhibits. Then we will clone the museum 500 times and give the containerized clones away to our friends in many cities.

29/ There is a large amount of content that is regarded as serious that is actually fake. The following shall no longer be considered as serious subjects.

a/ Climate science and the CO2 theory of climate

b/ The hole in the ozone layer being manmade

c/ Einstein.

d/ Quantum physics.

e/ Astronomy.

f/ Literature.

g/ Poetry.

h/ Theatre.

i/ Art.

j/ Fashion

k/ Story telling, or stories

l/ Music.

m/ Dance.

n/ Gender, Race studies

o/ LBGTP studies, Sexuality.

p/ We shall also aggressively remove many small modules of fake content. For example, the fake psych cover story for the terms: ectomorph, mesomorph, and endomorph, which mean outsider-looking, middle-looking, and insider/Mideast-looking and were gotten rid of by making them psych words.

30/ There shall be no calculations or math cyphering in the first half year of algebra & exponents, and also physics. The

overview, the popular inclusion, and the better grasp is much more important than the number part here in the beginning. Also there shall be no number/calculation based physics in high school. Physics must be taught without numbers in high school. Otherwise, the numbers act as an impediment to true understanding of the hugely valuable subject.

31/ Where economics has complex equations, we shall all regard this as the domain of scam artists because hardly anyone bothers with studying the equations, and then the clagues of fake experts can take over. There shall be no certifications for economics that requires or rewards those who use any complex calculations, or math cyphering in economics.

32/ The first course in statistics shall be simple statistics, lying with numbers and understanding large numbers. The second half year shall involve the much harder to grasp aspects of statistics.

33/ We are a people of light and truth and more and better. We want everyone to know the good news about how our form of more and better economics works. Our government and our education system should go out of their way to increase everyone's knowledge of economics, and business practices.

34/ Here, in our land of the free, we regard communism fascism, and all vaguely defined forms of government as a very appealing lie told by parasitic forces to enslave people under tyranny. Indeed, the history of Chinese communism, Russian communism and German Nazism (along with all forms of totalitarianism) shall be on a variety of tests that all students must pass in order to become a secondary school graduate. This so that we may protect ourselves from these garbage ideologies in the future.

35/ We should be exposing our children to at least one daily problem from a young age. What is the best course of action?

36/ With regard to after school learning and homework we shall use short texts that remind the student of the highlights of what they learned that day. These can be turned up and down by the student.

37/ There shall be no advanced degrees in government work. It shall not be possible to get a masters degree or PhD and government work, and all of these shall be worthless as far as our new democracy is concerned. This sort of advanced degree, shall only be thought necessary for parasites to maintain better control over the people in government, for with the advanced degree the greater investment forces the worker to be completely obedient to their foreign masters. Regarding those who work in social work, no degree over a two-year college degree shall ever be needed. It is more important that we have inexpensive social workers than we have expert social workers.

38/ We shall long ponder the following paraphrased words from Thomas Jefferson: "When we estimate a man's value to his democracy, integrity comes 1st and foremost. Learning and talents are only secondary considerations." In other words, for positions of power in our democracy, we shall hold incorruptible-ness by far more important than expertise. For this reason, Government shall recognize no advanced degrees in government work. Also, it shall not be possible to get a masters degree or PhD in government work, or social work, and all existing degrees in these areas shall be just as

void going forwards as degrees in the fake subjects like climate science, gender studies, race studies, colonialism, or social justice and similar fake fields of study. Also, rather than having expert government workers, it shall be thought far more important that we have honest government workers and inexpensive government workers. Government workers shall be subject to pay cuts in times of deflation.

39/ It is the parents and the Senate that shall decide what their kids are taught and not the teachers, or any school, or any school board or teacher's union.

40/ Only Senate juries of appropriate size shall be allowed to put content on the national student media databases or exclude media from these databases. There shall be several broad categories:

a/ Required kid's media,

b/ Recommended kid's media,

c/ Neutral kid's media,

d/ Slightly not recommended kid's media.

All the heavily not recommended and the off limits kid's media shall be considered as stigmatized media that minors can't get access to. We shall have a system of media access including face recognition that keeps kids off of the grownup internet, and also off other people's devices.

41/ We shall ponder the words of Johann Gottlieb Fichte, and go in the opposite direction: "Education should try to destroy free will. This is so that for the rest of their lives, the students will be unable to think or act in a way other than as their schoolmasters programmed them." There really are people trying to enslave us by giving us hard to learn worthless junk and calling it education. And there is a vast amount of edu memes that must be deleted as fake, for example ectomorphs, mesomorphs, and endomorphs, and the ozone hole/ CO2 climate change garbage theory.

42/ We shall ponder the words of Carl Sagan:

a/ "Who is running the science and technology in a democracy if the people don't know anything about it? ... Science is more than a body of knowledge, it's a way of thinking, a way of skeptically interrogating the universe with a fine understanding of human fallibility. If we are not able to ask skeptical questions, to interrogate those who tell us that something is true, to be skeptical of those in authority. Then we are up for grabs for the next charlatan political or religious who comes ambling along. It is a thing that Jefferson laid great stress on. It wasn't enough he said to enshrine some rights in a constitution or a bill of rights, the people had to be educated. and they had to practice their skepticism and their education otherwise we don't run the government, the government runs us."

b/ "I have a foreboding of America in my children's or grandchildren's time—when the United States is a service and information economy; when nearly all of the manufacturing industries have slipped away to other countries; when awesome technological powers are in the hands of a very few, and no one representing the public interest can even grasp the issues; when the people have lost the ability to set their own agendas or knowledgeably question those in authority; with our critical faculties in decline, unable to distinguish between what feels good and what's true, we slide almost without noticing, back into superstition and darkness."

43/ From now on, serious schools will teach practical things

instead of the garbage programming of the previous education system.

44/ To those who question the value of school, we shall all ponder the words of Davy Crockett: "How it is, with 6-months of schooling only, [that] I, David Crockett, find myself the most popular book writer of the day. And such is the demand for my works, that I can't write them [even] half fast enough [to meet demand.]"

45/ Wood shop and electric shop should be half be about making one thing and half about making 10 or 100 of a thing on an assembly line with several students cooperating and selling these things.

46/ We shall try to get away from the old broken educational paradigm where:

a/ Truth comes from authority.

b/ Intelligence is regarded as the ability to remember and repeat.

c/ Accurate memory and repetition were rewarded.

d/ Noncompliance was punished.

e/ Intellectual and social conformance was rewarded.

47/ All existing text books shall now be in the public domain.

All new text books shall be entirely reliant on Senate Ubiquitous and X-prize type funding for producing good learning materials.

48/ We shall teach all of our children about the learning curve and the great efficiencies of doing the same thing over and over again, and the mentality that they want to mass produce things in their lives, instead of making one-off things. That they want to make prints instead of paintings. That they want to eventually hire other people to help them, that they want to get orders and sell things based on the sample.

49/ We shall teach all of our children about all of the genocides, and wars as a way to stop this from happening in the future.

50/ All kids watch 3-10 minute videos for all jobs. Then they can use the library to look up hours and hours of media, including training media about all the various jobs and occupations.

NR'165. SCHOOL CONDUCT

1/ We shall ponder the words attributed to Pythagoras:

"Teach children well and it won't be necessary to punish men".

2/ We shall ponder the words attributed to Heraclitus: "Day by day, what you choose, what you think, and what you do is who you will become.

3/ Everyone working with other people's children shall be required to have a county recorder system issued child-work license. This shall include everyone working in or around a school, in children's sports, in scouting, in religions, in healthcare, in trade schools, in cram schools, in day care, in amusement parks, working in children's media, in children's camps, in children's entertainment, in family-oriented restaurants, baby sitters, tutors, school bus drivers, school crossing guards, librarians, school nurses, school cooks, ice cream truck drivers, and anyone else who works with children or entertaining children has to have a child license. This shall include all other jobs and people who work around other people's children. To obtain a child worker license, the

applicant must pass a background check on criminal convictions, sex crimes, homosexuality, prostitution, and drug use. They must also go to an interview by a Senate jury of 3-female and 3-male Sub-Senators, who are adult victims of child sex abuse if possible. Everyone with a child worker license must display their license number front and back while at work, like how police officers must do this. All child worker license holders shall have a make-a-complaint page on the government's complaint website. Here the liberal standard of making a kid feel uncomfortable shall apply.

4/ All teachers must make a statement on their government worker's facebook page where they express how they stand on the various issues of that time that the Senate wants sworn clarification on by all teachers. Again, the right of free speech shall not apply with regard to the teachers of minor children. Teachers shall lose their child worker license for being political or for trying to convert kids to a religion, or talking about sex, or gender, or for talking down our nation.

5/ Child worker licenses shall be thought a thing that exists outside the control of any school, school administration, teacher, or teacher's union. Also child worker licenses shall not be about the qualification of child workers, but their disqualification for sexual behavior, or violence, or touching, or grooming, or going off the school script, or for or for doing other things we don't want our child workers doing. The fact that someone had their child worker license suspended or cancelled shall be private information for the people who get cancelled as a child worker.

6/ When children come home from school or daycare with bruises or injuries from school, they make a report to the Child worker licensing department. Then this department investigates and makes a report to the computer algorithm. This algorithm flags extreme CWL violations and also CWL licensees who get many minor complaints about violence in a short period of time. Then the people at the child worker licensing division review the county recorder system videos to look for the abusive child worker, or other student.

7/ Genuinely bad behavior should quickly get a child worker's license revoked. Also, revocation of a child worker license shall not prejudice either law enforcement, or the courts.

8/ The county recorder system shall offer child worker licenses, where people are background checked by government, and the problem people excluded from the system nationwide. The following groups shall not be allowed to get/ have a child worker license.

a/ Hypersexuals, overtly sexual people, non-binary people, Homosexuals, transsexuals, prostitutes, porn stars, nude models, bikini models, strippers, and people who make sex a big part of their life.

b/ People with felony convictions of any sort, and people with a history of misdemeanor sex crimes, or violence.

c/ People with too many sex partners in the STD system.

d/ People certain sorts of alcohol, smoking, or drug licenses.

e/ People with a history of mental health interventions.

f/ Those who are political activists, or religious zealots.

g/ Everyone who has majored or minored in a sex, gender, or race related topic.

h/ Anyone who more than 1/3 of the mothers vote to de-platform for any reason. We use 1/3 of the mothers, because everyone is always too slow to fire, and we want to be rid of

our child workers when even one out of three mothers sense, some thing is wrong.

i/ Other criteria the Senate may wish to add. Also, it shall be thought quite an important thing that our education system is relatively free of bad examples of many sub-varieties.

9/ Those who have advocated, or supported any of the following shall not be allowed to obtain a child worker license or work with minors under age 21. They shall also not be allowed to work for Government.

a/ Has ever advocated Genocide, murdering any population sub-group, or culling the human population.

b/ Has ever advocated Racism or discrimination, or genocide against any race including Europeans, so-called whites.

c/ Has ever advocated Monarchy, oligarchy, dictatorship, lifetime leadership, illegal seizure of power, or any other form of non-democratic government, or Theocracy, Leninism, Maoism, Nazism, Sharia law, Fascism, or anti-Fascism, including Antifa, and Marxism and all of tyranny's many disguises.

d/ Has ever advocated, homosexuality, transsexuality, pedophilia, or non-binary sexuality, or declared themselves as one of these, or is one of these groups.

e/ Has ever had sex with a current or previous student.

f/ Has been previously institutionalized by the court for psychiatric problems.

g/ Is a convicted felon.

h/ Has ever had a prostitution license.

i/ Currently consumes 3 or more portions of alcohol a day on average.

j/ Has had within the past 7 years had any sort Mafia drug except marijuana.

k/ Has spoken to groups (including groups of students) about how bad our nation is. Teachers are supposed to be neither nationalistic, nor haters of their nation. In fact they are supposed to be a-political. If they are not, then adversary nations will use them to grab ahold of our young people. This is why teachers are not supposed to get involved with politics.

10/ Perverted people shall have the right to quietly live their perverted lives/lines in peace. But they shall not have the right to be a model for the next generation.

11/ Government shall run a teacher reporting and review service/ website. Here, parents and students can post comments and complaints and link to the class video stream of their kid's class. They can also post videos and text.

12/ All schools for minors and all child-oriented businesses, including doctor's offices shall have double (two different views) HD video in all places and times except certain private places. The inside of the private areas such as toilet stalls and changing areas shall not be video monitored, however all the approaches to the private areas shall be monitored. All primary and secondary schools, classrooms, schoolyards, school interior areas, school food areas, walkways, approaches and main walking routes for the students, busses, bus stops, lavatory areas (but not toilet areas) shall be 100% under overlapping video recording with county recorder system file storage. The individual toilet stalls and the changing rooms shall not be under video, however, the approaches to these areas shall be under video monitoring.

13/ All classrooms and other school areas where children are shall be live streamed to the parents with both cameras and

microphones. It shall be a crime for non-parents/grandparents to access the feeds of classrooms. The system shall automatically blur-out the other kids.

14/ Parents will be able to log into the county recorder system's video tracking system to view their children in school. This system will show the child's tag location on a school plan with the nearby cameras displayed for the parent to select from. The county recorder system's monitoring system shall have AI with human final evaluation for videos of violations. There shall be computerized transcripts of everything said in the school.

15/ All school video files shall be stored by the recorder's office. All such school video shall be admissible in court. Because of the video feeds, parents can make informed decisions about the teachers and schools to use for their kids. Indeed, an important aspect of the system is that the parents can be watching their child's treatment and school lesson and judging the quality of the teacher.

16/ All new schools shall have double-door entries with metal detectors. If the person trying to get in has too much metal, then he gets locked in the entry vestibule until the duty officer calls police. All of the school exit doors will use rotating combs like in the New York Subway system. All new schools and security areas in townships shall have their double-door secure entry gates located directly under the township's police station. Also, the ceilings in the security area shall be double height. This is so police can train long guns from above, and from the theatre balcony on the people trying to get through the security areas if needed. From the security check area, the kids will go through a hallway to a pair of elevators that only serves the school floor(s) on the tower. Thus our schools shall be relatively unassailable.

17/ Minor students shall not be allowed to use unmoderated communication platforms. They must instead use one of the government's cloned school platforms. All unmoderated communication platforms shall be required to verify that their users are over age 18. If they fail to do this, they shall be liable for harm to minors that was caused by their platform.

18/ All schools for minors shall have only moderated communication platforms. All school apps automatically disable during each student's class time. All primary and secondary school students shall be required to use only school apps while at school. Also, their phones shall only use the school's free network while at or around their school. This networks shall only work for limited types of communication. It only permits access to approved websites and to parents. All primary and secondary students must carry a phone/location device while at school. Many parents will not provide their children with another communication device or platform.

19/ Government may limit the right of primary and secondary school students to carry and use certain types of communication devices, applications, and media while at school. Government may also install signal blockers for non-school networks, thus forcing everyone at the school to use the school's network while on campus. It is better that the schools block outside signals, then teachers are constantly fighting with students about the use of their device(s).

20/ No school networks or school staff shall block or prevent child/parent, or parent/child communication while the child is at school. No school may prohibit, block, or erase student

recordings of the violations of school employees, or recordings of what school employees are saying or doing while at School.

21/ Regarding every person working with other people's children (including: teachers, psychologists/psychiatrists, school counselors, school coaches, school administrators, school nurses, day care workers, and monitors), all shall:

a/ Use the school communication system for 100% of their communication with students and parents and while at school or discussing school matters. They might also be required to use the system to record any meetings they have with parents or students.

b/ Have zero obligation of confidentiality with regard to the statements and actions of the children entrusted to them. Quite the opposite, everyone working with other people's children shall have a legal obligation to tell the parents about all important statements and actions of the children entrusted to them according to the Senate's guidelines. Also, under the law, parents shall be thought to have an all important right to know everything about their children. This while a strong relationship between the child and the unrelated adults teaching the child shall be thought to be not only unimportant but very easy to replace. Also strong child/teacher relationships shall be thought an unhealthy thing that frequently edges into sexual grooming, and thus strong child/teacher relationships shall be thought a thing that should be discouraged. Everyone who works with other people's children shall be required to share all important statements and observations with the child's parents. This shall include all crimes, all violent statements, all bullying, all statements of a sexual nature, all statements related to gender and everything called for in the Senate's must-share-with-parents guidelines. Those education workers that fail to notify may be charged with sexual grooming of the children entrusted to them.

22/ Only the national Senate shall establish the national menu for for:

- a/ Textbooks and what is taught in school.
- b/ School conduct.
- c/ School academic performance.
- d/ School admission.
- e/ School administration.

23/ All existing people working in college admissions shall be replaced within 90 days of this constitution coming into effect.

24/ No primary and secondary schools shall have any admissions process, but shall only run the student's records. This shall take no longer than overnight. No tertiary school admission process shall take longer than 3 working days.

25/ All schools shall be required to treat all students, all potential students, and all employees equally regardless of race, sex (male or female), political ideology, or religion. It must be noted that this term religion here does include Islam because violent Islam is not a religion of peace. Schools and teachers shall not favor or disfavor any of these groups (except Islam and other religions stripped of their protections because they are violent, or because they cause a large share of their people to kill themselves.) Schools shall however be allowed to discriminate against students who are overly sexual. This shall include those who present themselves, or engage with others in an overly sexualized

way. It shall also include everyone who makes an overt display of their sexuality, be they male, female, heterosexual, or homosexual. All transsexuals and complexly gendered people may always be considered as having made an overt display of their sexuality, and these may be discriminated against in colleges and in the workplace.

26/ All academic admissions shall be done without the student's name, or images of the student, or the student's address. All shall use the government's confidential student number and be completely anonymized. All applicant students shall remain completely anonymized and no photos or videos of the student shall be shared until after the student has been approved by the school. All school databases shall be prohibited from having any place for race, or sex, or culture, or primary language. The government's testing side of things may track these things, but the school admission side shall be exclusively about academic progress, test scores, and disciplinary problems. When people send resumes for jobs, a similarly anonymized system should be used to reduce racial discrimination. Also, when teachers are subjectively grading work from a class, all the names shall be anonymized with the teacher unable to see the names of the students they are grading.

27/ All schools and all employers shall be required to use the same admission standards for all students. There shall be no racial or sex quotas in any school admission or hiring process, or on any school campus. Nobody shall ever be favored again because they are black or a woman, or a homosexual, or a member of any other group. No school shall be penalized for having too few of any sort of student.

28/ In the interest of national brotherhood, students shall not have ethnic identity groups in or centered around schools.

29/ All scholarships shall be merit based, and there shall be no more need based scholarships. Also, the educational system should be designed so that boys do just as well as girls in primary and secondary school. Otherwise the system will be excessively oriented towards memory over actual learning.

30/ All school applications K-16 and after shall be filed online using the standard forms of the education tracking system, which will not be viewable by employers, and which gets flushed at age 18, 21, and 25 so that schools gain no power at all over the Senate's unbiased employment and general knowledge testing system. We do this because we cannot allow non-democratic schools to gain any influence over who is considered smart and good at any sort of job or task.

31/ The county recorder system shall manage all of the following school documentation using standard school forms applicable nationwide:

- a/ All school enrollment documents.
- b/ All school permission documents for things like field trips and photography.
- c/ All school testing results documentation.
- d/ All school compliant documentation.
- e/ All school discipline documentation.

It is expected that this will automate most school administration, and eliminate the need for most of school administrators.

32/ No schools shall have school websites, or school magazines, or school newspapers, or school yearbooks.

33/ There shall be no crime of truancy where the child is able to pass the test for schooled students of the same age. Nobody may be jailed for truancy violations. Also, there shall be no special truancy police. It shall be a felony for police, the courts, school administrators, or teachers to attempt to enforce truancy laws. Also county senators who attempt to pass truancy laws shall also be guilty of a felony.

34/ Parents of record shall always have the right to take their children out of any school at any time, including the middle of the day and without prior notice. They shall also have the right to call their children to the school office and meet with their children at any time, including the middle of the day and without prior notice.

35/ All school staff, kindergarten through college and post graduate schools that marched in solidarity with the Palestinians in 2024 shall be regarded as failing the deep state litmus test. All shall also be presumed to be blackmailed deep-state traitors that have fake credentials. All shall be disqualified from either teaching or having a child worker license for life. All shall be regarded as traitors and all shall be treated exactly the same as all the deep state operatives in government. All school staff that is either foreign or an immigrant shall be either jailed and deported or simply deported.

36/ Military recruiters for volunteer soldiers shall be allowed to go anywhere to recruit, including every school. It should be a crime to treat them rudely, and it shall be a felony to assault them, or the people that help them.

37/ There shall be no Muslims or Muslim sympathizers, or Middle Eastern people teaching in our schools. Also, foreign education people shall not be allowed except for foreign language instruction.

38/ Teachers are not allowed to prevent people from joining their classes late. Also, students over age 16 shall have the right to get up and go to the bathroom without asking. Also, the requirement that student lift their hand to ask a question shall be thought demeaning for students. Also, students shall be free to read whatever serious approved media they want in classes.

NR'166. SCHOOL VIOLENCE AND BULLYING

1/ All students shall watch a 1-minute anti Bullying module every 20 - days on average all throughout their K-12 education.

2/ We shall have a zero tolerance policy with regard to school violence and bullying. Where kids have fights or they demanding physical violence, or they are hitting another kid fist or kicking them in in aggression or violence, these kids get streamed away from the peaceful kids. We need to get this out of our schools and our society entirely. And we must realize that this has historically been mostly Ishtar getting rid of our leaders early, giving them brain damage and damaging their psyche.

3/ We must make education nice, so kids will enjoy it and gladly participate in it, because that gladness is directly related to how they learn. So we look at this bullying aggression, and we realize that this is terribly counterproductive, especially for the proudest young minds, the people that will matter in our society, the people that will

guard the society and carry it forward successfully. These are the people who matter in our schools. The violent bullies don't matter.

4/ Student that threaten and bully other kids and teachers shall thought very easy to remove from the main stream education system, and put into the reform school system. This decision, however, shall not be made by either teachers or school administrators due to the excessive power it gives them. Instead, there must be a sub Senate trial. In reform school, the kids get lower quality food and an ultra low sugar diet. They also get no internet except the reading material they must complete and pass the test on, in order to get higher quality food and sleeping arrangements.

They also wear old orange jail uniforms while in reform school. They shall also have to repeatedly watch scared straight type videos about prison life. There are also stricter rules about violence and bullying. Also in reformed school, the kids that do not behave are moved around weekly/ monthly from school to school. So there is much less potential for gangs, brotherhood and friendships.

5/ Wherever any member of the school staff sees proof of kids fighting or trying to start fights on the audio/video record, the provoking kid must be removed from that school. The provoking kid must also do their last completed teneth over. Also, kids kicked out for bullying or fist fighting will quickly find themselves going to less and less desirable schools. This is because none of the good schools will tolerate bullies, let alone 2nd and 3rd degree bullies repeatedly kicked out of schools. Perhaps we will have normal schools, probationary schools, and reform schools and work camps for four levels of bullying and criminal kid.

6/ Schools and educators that ignore reports of bullying should be held complicit in the bullying, and where the student kills themselves. These educators should be considered accessory of murder, and the bullies should be considered the murderer. Teachers and others that ask or direct kids to hit each other shall be tried for assault, just as if they had said the words themself. Where teachers and unrelated people are found to have beaten children, they shall be incarcerated just like they are street criminals.

7/ Students that start conflicts with other students on their way to or from school shall get more severe penalties than those who do this at school. Also, the rights of self-defense on the part of the people being bullied should be much greater on the way to and from school.

8/ Except in clear cases of a victim fighting back in self defense or community self-defense, everyone involved in a primary or secondary school fist fight shall spend at least 1-year in reform school. Second offenders shall get at least 5 years or jail and shall be two violent crime convictions on their way to permanent removal from society for life.

9/ Students that throw the first punch in fights against school staff, may be sent to work camps for 3 years if they are fighting a strong man. If they punch a weak male teacher or a female teacher, they shall get 6 years in work camp. They shall also have the fact that they beat their teacher on their permanent record for life, and for all their future employers to see.

10/ When teachers and school staff fail to act on credible evidence of violent bullying at school, they may at times be

held to be co-responsible for the bullying.

11/ There shall be no forced association with bullies in our schools. All kids shall have the right to change classes and schools to avoid bullies.

12/ All children and minors that punch each other in the face, neck, head, at school shall not be allowed to attend regular schools, but must complete their education with the other violent children in a special school for violent children. It shall also be a lifelong blemish on their record: That the child went to reform school. This is how we end the bullying epidemic in America that is partly responsible for the mass shooting epidemic.

13/ Kids that fight on the school bus, and kids that fight with other kids on the way to and from school shall be considered the same as the kids that fight at school.

14/ Regarding bullies that keep needling and intruding in minor ways, this if witnessed by others, or filmed:

a/ This shall be easily considered grounds for claims of self defense on the part of the victim.

b/ It shall be easy to charge the bully with bullying.

15/ Where school bullies double down and beat some student for reporting them, they should get 3 to 5-years in reform school or work camp, depending on their age, and how much they harmed the righteous student. Where they only threaten the student reporting them, they should get 1-year. They should also be much more likely to be charged with battery if they harm a student who reported them.

16/ School staff may use tasers on large or fierce students having fist fights. However, there shall be double penalties for teachers that beat non-violent students. There shall also be the right of self-defense for students that beaten, punched or kicked by teachers. Also we shall have a very low bar for dealing with teachers priests, and coaches that beat the kids entrusted to them. In fact, the child workers that even threaten this shall lose their child worker license.

17/ Certainly people will be forced to go through metal detector gates at our airports and in our courthouse buildings as we do this today. Also, in certain buildings like Social Security and our schools we may have metal detectors, so we can keep shooters out.

18/ The Senate shall do an extensive study of all mass and school shooters and determine the association with psychoactive drugs, gender ideology, marxism, first person shooter games, other violent games, violent media, Mafia drug use, family history, bullying, and teacher conduct.

19/ Where education venues wish to cancel their relationship with either students or teachers due to some non-violent act, such as saying something, the person cancelled shall have a right to a public hearing prior to the school acting. If we fail to do this, the school would become a backdoor to our democracy.

20/ Younger bullies boy and girl and minor bullying may be punished by court ordered head shaving for the bully. It should be thought a relatively effective means of punishing most kids. With regard to clear cases of students bullying other students, and the bullied student stands up against the bully, there's no possibility of money court lawsuits against the kid that stands up against the bully.

21/ Whenever a student is disciplined in any way by any school at any level, there must be a case file and there must

be evidence submitted. Where educators punish students without this, they shall lose their child license. This includes everyone involved with punishing the student. Educators have no right to punish students without a report and video evidence and with a signed statements from people, swearing under penalty of perjury that the child did what is claimed.

22/ Those who care for other peoples children shall not be allowed to handcuff them or to restrain them in anyway, unless they have either injured themselves, or someone else or were clearly about to injure themselves or others. Restraining other people's children should be a very dangerous thing for people to do who want to keep their child worker license.

23/ With regard to the rights of the children entrusted to them, teachers and school administrators shall be regarded as babysitters who have no right to do anything to harm or restrain the children entrusted to them, either physically or psychologically, unless it is a matter of necessary self-defense, or the necessary defense of another child entrusted to them.

24/ No school shall have the power to place any child in a mental health facility of any sort, or to isolate or keep the child from their parents, or to hold the child after the regular time the school ends. If the child is arrested, then police shall have the right keep the child from their parents, however schools and teachers shall not have these rights.

25/ Exposing children to many interesting adult teachers shall be thought a good thing, a thing that makes kids smarter.

NR'167. PARENT RIGHTS

1/ It shall be thought that there is no need for government regulation of homeschooling where the kids are making the appropriate recorder system grade level tests for their age. The Senate shall regard schools as almost always inferior to homeschooling, especially when the home-schooling time is over 1/3 of the school time. And with regard to homeschooling by determined parents that have any brains at all, all homeschooling shall be thought much better than sending kid to school, where they are being ignored over 95% of the time by the overworked teacher.

2/ There shall be a right of parents to homeschool their children and raise them as they like. It shall be thought better for the group mind that more people are raised in divergent ways. The people in the education system shall have no jurisdiction over the children that are homeschooled, and it shall be a felony for them to assert this. Nobody in government shall ever be paid to supervise homeschooling of people's own children.

3/ All schools must notify parents if their children do anything important that is on the Senate's list of important things that require school notification of parents. This shall include fist fights and other violent behavior, It shall also include referrals to the principal disciplinarian's office, drug use, homosexual or hypersexual behavior, or activities, among other things the Senate may later wish to add to the list.

4/ Schools shall not be allowed to get involved with healthcare. Schools shall in no way participate in dentistry except to teach kids about mouth health.

5/ It shall be considered felony child abuse to undertake healthcare treatments upon other peoples children without informed consent by their parents via the county recorder system. This informed consent shall be much more detailed than the informed consent for adults.

6/ All school authorizations for field trips and other things shall be via the county recorder system. Schools are not allowed to communicate with parents or students and way not authorized by the national senate. There shall be no annual health questionnaires by schools. However parents shall normally give the schools access to the county recorder system's school level access in the child's healthcare records.

7/ Every person involved with providing unauthorized healthcare to children, that was not properly authorized shall lose their child license or medical license. They might also be sent to prison for child abuse as well.

8/ Except for genuine violations in the jurisdiction of CPS, police, immigration, and the courts, Government workers shall not have jurisdiction over the relationship between genetic parents and their genetic children.

9/ The idea that Government must worry about parents harming their own kids shall be thought to come from pedophiles in government looking for children to trade, sell, or otherwise exploit and victimize. Arguing for this sort of wrong headedness should be regarded as an inadvertent admission of guilt.

10/ Government should not worry about parents. It should worry about the people who are drawn to working with other people's children. Also, government shall have a bias towards supporting parents over the people working with other people's kids.

11/ With regard to who makes the decisions for minors: the schools, the teachers, the school administrators, the counsellor/head-shrinkers, the coaches, the police, the unelected government people have no rights at all. Nothing. And while the children have some rights in themselves (mostly related to parental neglect and abuse), It is the parents that retain all rights over their children. If anyone wants to overturn a parent's rights they must take the parent to court and get an individual court order. Also, the parents shall the right to take their kids out of school whenever they want, for as long as they want, so long child is making average academic progress taught by the parents.

12/ Hypersexuals and homosexuals and other non-breeders shall have no right to say anything about the upbringing or education of the next generation. They shall also not be allowed to participate in educating and grooming new generations to accept their dead-end ways. The continuation of our society, its people, and our way of life is a vitally important thing, and the sexual agenda of the dying lines of non-breeders simply do not matter at all in comparison.

13/ Just as we shall not allow non-citizens and immigrant citizens to sway our immigration decisions, even though they are very interested, we shall also not allow people without children to sway the way child rearing or education works in our nation. Non-parents shall not be allowed to address government, or give input at hearings, or protest government decisions. The people who do not have genetic offspring of their own shall have no right to make any changes regarding

children, or future generations. An offshoot of this line of thought is that only parents matter with regard to school policy. Everyone else should be regarded as most likely some sort of child exploiter or foreign frontman. Either they want sex, or sex income, or they want to alter the minds of our people while they are young, extra-rebellious, weak and pliant. Also, to be clear, all taxpayers must pay their share of our nation's socialized child rearing and educating costs for conforming numbers of children, even if they don't have children themselves. This shall be considered an important aspect of keeping our land free and successful.

14/ Children shall be regarded as a matter for their parents, and nobody else, unless the parents are neglecting or abusing the children. Those who want to have jurisdiction of other peoples children, and who angle for this, and who create situations for this shall be considered child groomers under the law. further, there shall be no concept of group management of children, and even children going to sleep away school shall still be be jurisdiction of the parents and nobody else. It shall be the parents that have the final say in what their children will study in school. This shall no longer be up to the teachers, or the school boards, or the teacher's unions, or anyone else. Only the parents shall decide what their kids should be learning in school from the Senate's giant edu media library. And there should be great competition among all the voucher schools for getting lots of kids and having big plump profitable classrooms.

15/ The parents shall decide which serious studies the student will take. The parents, shall thought the people who know the child best and know what is best for their children. The school may have suggestions, however, they shall have zero input in the decision-making process. It is also thought that a highly varied learning program will greatly increase mental diversity in our next generation, and increase respect for divergent or maverick ideas. These two tings are thought to be something that will increase the intelligence of the group mind.

16/ Parental consent (or a trial and court order) shall be required every time a school, daycare, teacher, educator, government person, or psych doctor does any of the following:

a/ Takes a child to a different physical location.

b/ Gives the child any medical treatment other than painless topical antiseptics and sterile bandages. All immunizations and injections shall be prohibited without parental consent.

c/ Examines a child physically.

d/ Talks about sexual orientation, or gives any sexual education to the child.

e/ Provides any sort of psychological counseling, mental health counseling, violent crime counseling, career counseling or other sort of counseling

17/ To be clear, it shall be a crime for teachers to seek or accept private meetings with students with or without parental consent. Regarding former students, contact with former students under age 22 shall be prohibited.

18/ Every time adults meet with school kids in groups it shall be on video. Adults shall not be allowed to meet with school kids individually at all.

19/ Evidence gathered illegally from minors under age 18, without either parental consent, or a court order shall not be

admissible as evidence in court.

20/ Parents shall always have the right to take their children out of school whenever they want. And they may simply show up and take their children out. And the children shall have every right to stay away from school as long as the child is making acceptable progress on the Senate tests. There should be an absolute right of parents to remove their children from school at anytime they want, and for any reason they want, and without even stating a reason to the school, or giving advance notice to the school. Nobody (Not teachers, not school staff, not government officials) shall ever have the power to prohibit or delay previously identity-verified parents when they come to pick up their children, and regardless of any contract terms or school policy, all parents and guardians registered with the county recorder system may remove their children from any school at any time, and without any advance notice, or explanation, or any penalty of any sort for anyone. However, if the students are sleeping away at school during lights out, the parents must wait until morning.

21/ It shall be a crime for teachers, school administrators and any other adult to physically discipline or punish minors including minor students in any way. Also it should be considered a form of assault when teachers threaten children with beatings and washing their mouth out with soap, and other violent things they are not allowed to do. Step parents and boyfriends/ girlfriends, grandparents, siblings, and teachers and other educators shall be considered as child abusers when they beat other people's children. There shall be much lower standards for child abuse when it is coming from a step parent or boyfriend/girlfriend, or non-parent instead of an actual parent, and these may easily be regarded as strangers under the law.

22/ Schools and teams shall not have any power to compel anyone to do anything if they don't want to, and this includes both students and parents.

23/ There shall be no physical discipline of children by education providers. Any such physical discipline may be considered assault, or abuse of a child under the law.

24/ It shall be a crime for teachers and school staff to bluff children into thinking they have powers they don't actually have. This not causes passivity and subjugation, it also tends to lead to sexual abuse.

25/ Teachers shall not be allowed to belittle, demean, or mock students.

26/ The Senate shall make a complete list of the things that schools can and can't do to children without parental consent.

27/ Teachers that conspire (or have conspired) to hide important information about children from their parents shall be banned from teaching and working with children. Also, it may be a crime when grown people tell the unrelated children entrusted to them to keep secrets from their parents. It is a double crime when threats are attached to a teacher's secrets. Educators shall not be allowed to hide things from parents in any way and must be completely forthright with parents. Educators shall not have any authority to countermand anything a parent has told their child.

28/ Regarding Boy Scouts and Girl Scouts, and similar children's groups that are apparently non-religious, non-ideological. These shall be prohibited from participating in or talking about any political, social, or religious matters. And it

should be a crime for their leaders to direct children to these ends.

29/ School writing assignments shall not be controversial, emotional, or have anything to do with politics or political stances, or race, or gender, or liberal politics, or conservative politics or religion, or ecology, or endangered species, or taking land off limits for human use, or fictional stories. School writing assignments shall exist to teach kids how to accurately describe real events with words.

30/ Schools and educators shall not allowed to discipline students for their beliefs, or for disagreeing with what they're being taught. School must be a place for open discussion and disagreeing. Students should not be silenced or censored, but instead encouraged so that the other students may test their ideas and may ask similar questions about the information they're being taught.

31/ Nobody of any age shall ever be compelled by any education provider to do any of the following, and parental permission shall be required to do any of the following in schools for minor children:

a/ Play in any injury-prone sports. Physical activity in the form of walking, jogging, cardio machines may however be required. Dynamic calisthenics may also be required.

b/ Study any frivolous subject such as art, music, fiction, or poetry.

c/ Study mathematics beyond basic algebra.

d/ Study religion.

e/ Study Race studies, anti-racism, gender studies, psychology, sociology, climate studies, or the details of communism and marxist ideology.

f/ Study hand-writing or penmanship. These shall no longer be taught in school. All academic writing must use a computer interface with voice input and keyboard.

32/ Teachers shall have no freedom to go off the Senate's script. Where teachers do this, it shall be thought a slippery slope to groomer infesting our education system. There will be tens of thousands of scripts (that may be paraphrased, and need not be recited verbatim).

33/ All parents should ponder the situation of kids being generally being left too much (for their taste) at school.

a/ This makes them much more eager to please their parents when they take them out.

b/ It becomes much easier to be a parent.

c/ It becomes cheaper to be a parent.

d/ The kid gets better educated and less accustomed to sloth.

e/ The lonely kids can just stay more at school.

34/ In some opt-in breeding communities, the sugar intake for children shall be managed by their schools based on learning progress. And parents and visitors shall not be allowed to cheat the fair and unbiased community reward system (what a terrible example this corruption creates in the mind of the child.) The children get the finest French and Italian sweets, and fresh donuts, cheesecake, and real Italian gelato, fine chocolates, Thai fried bananas, semi-sweet lopis, and whatever delicious things that are popular. The children who make progress get sugar units in their school sweets wallet. With these sugar units, the kids can buy micro sweets based on how much sugar is in them. Hopefully this will habituate the children more towards hard work. It will certainly get them studying harder and eating less sugar.

35/ Parents shall be free to take their children out of school at any time of the day. Schools shall not have idiosyncratic rules on parents dropping-off or collecting their children. Schools shall also have no power over when and for how long the parents elect to keep their children out of school for health reasons. Schools shall also not have the power to demand that parents justify, document, or get a doctor's/nurse's statement about that a child was genuinely ill during the child's absence from school.

36/ All schools must use the Senate's standardized forms where these are available. All school forms for parents must be signed through the county recorder system, so that we may eliminate more school administrators and automate/delete their jobs. No school shall display the images of their kids online.

37/ The Senate shall develop a mass produced double-door recorder-system identity-verification-system to control entry to all primary and secondary schools in the nation. This system shall also have a metal detector for preventing students from bringing weapons to school.

38/ No electronic services shall allow for adults to view or communicate with the accounts of children, without the parents authorizing it. Where electronic services allow this, it shall be considered a sex trafficking or grooming sort of crime.

39/ No schools shall have their own idiosyncratic rules for picking up and dropping off children at school, or driving around the school, or parking in school parking lots. Every person allowed to pick up children from school shall be allowed to do that at any time of the day they want without pre-notifying the school. No school shall be allowed to display the images of their students online at all, even behind a login.

40/ Without a court order from a proper court trial, or a genuine emergency, all parental rights are inalienable, and no agreement can sign them away to government.

41/ There shall be no such crime as truancy under this constitution. Courts and schools have no right to enforce that the children go to school, or attend any particular school or submit any homeschooling work so long as they test at or above their own grade level.

42/ No school shall have any right to fine or punish parents or students for anything. Schools shall be prohibited from fining anybody for anything, including parents, including students, including people that don't obey them.

43/ No teachers shall have any visible tattoos, or face piercings.

44/ To prevent abuses of power by school staff, all parents and students shall have the right to record all interactions with every school. There shall also be the right of students to record every single person giving instruction or speaking to students in every single school. There shall be no right of privacy for teachers, and any document that anybody signs I have no bearing on this. Our schools shall not be places of secret knowledge. This includes uploading of the videos of teachers.

45/ All parents shall have the absolute right to disown their kids for being criminals, or homosexuals, or for being transsexuals, or for being disobedient, or hard to get along with. This has always been the right of people for all human history, and we shall not change this.

46/ There shall be no alcohol on any school campus in the nation, and schools may ask people on their campus to take breathalyzer tests.

47/ The recorder system shall establish cash cards for kids. Under this scheme, children are not allowed to buy sweets in some counties unless they have a cash card, and that card is pre-authorized and funded by the parents. This is done to increase the power and ease of parent's lives. However, this must only be used in breeding communities where guests are strictly regulated.

48/ Parents shall be allowed to complain about educators for the way they treat parents as well as children. The teachers that are in the top 2% or 3% with regard to complaints from many parents shall generally be fired. We shall use the same sort of program throughout government, so we can eliminate all the problem people from public service.

49/ All signature forms that schools send home with kids for authorization shall all be opt-in. It shall not be possible to send opt-out forms and these shall never be valid.

Government shall not have opt out programs unless this is directed by a 2/3 vote of the Senate.

NR'168. SEX IN SCHOOL PROHIBITIONS

1/ There shall be only male and female pronouns used in our nation's schools. This in order to minimize homosexuality and increase the birth rate. All the people with a penis shall be referred to in the masculine by government and the school system, and all the children with a vagina shall be referred to in the feminine.

2/ No minor shall have the right to change their name, or pronouns, or take sex change hormones or undertake any sex change surgery.

3/ All adults that conspire to help minors to physically or hormonally mutilate their sexuality shall be charged just like the people who practice FGM or female genital mutilation.

4/ With regard to the people that cut what are branded as "sex change surgeries" into minor children, or give chemical castration drugs to minor children: No medical or educational, or other certification shall offer any safe harbor from charges of child abuse. All the sex change for kids people, especially the fake surgeons and psychs, all shall stand trial for their heinous crimes. Furthermore, this constitution advises the Senators judging them to:

a/ Look through the sub-cultural excuses, and at the net effect of the mutilation that these sadistic fake healers carved into innocent children, so they could ape someone of the opposite sex for long enough to trick someone into what actually is homosexual sex.

b/ Presume that their main personal reason for going into this area of medicine is personal sadistic sexual gratification.

5/ We shall send a message far into the future about those who would use surgery to help homosexuals fraudulently pose as someone of the opposite sex, so they could commit homosexual rape. This will not be tolerated, and all fake doctors shall at least be removed from society forever for their insidious crimes against minor children.

6/ When people with a child worker license talk about Bitcoin-tulips, disguised tyranny (communism, sharia oligarchy, etc.) politics, religion, sex, race, racism, reverse-racism, race

studies, gender, gender studies, gender identity, sexual identity, homosexuality, sexual attraction, or transsexuality, they shall lose their license to work with kids. How can we have it any other way? The Senate may add other similar topics

7/ All educators that have ever exhibited perversion rainbow symbolism in their classroom, shall be banned from teaching and working with children for life. All future talk about sex or gender by teachers and others in a position of power over minors that is not authorized by both the Senate and parents shall be considered a sex crime and shall generally disqualify the person from teaching for life. It may also go on the person's permanent record.

8/ Where an adult is a person working in a position of trust such as a teacher, priest, doctor, or a child worker license holder, such as a school nurse or a school counsellor, or administrator, there shall be double penalties for child sex crimes.

9/ With regard to people talking to other people's minor children, and presenting media to other people's children, the right of free speech shall be suspended by the Senate in various ways. The Senate shall make certain topics off-limits in the nation's primary and secondary schools, and for certain ages of minor. The Senate may also require certain scripts and curricula for these people making media for everyone's children.

10/ There shall be no adult talk about, or participation in the process by which children learn to masturbate, as this is an old trick for homosexuals to seduce children. This shall always be considered grooming.

11/ The education system and everyone in it shall be prohibited from talking about sex or porn or masturbation, or attractiveness with minors. These are not things for the education system to get involved with, unless the education system is infested with child sex criminals, which it recently was. If anyone is going to teach sex education, they must be over age 65. These might also have sex-related health problems of old age that they should talk about and make real.

12/ Government, the schools, the churches, and psychiatrists shall not involve themselves with the sexuality, or gender identity of people, and especially children. All those people working with children that previously involved themselves with this subject shall be investigated as probable pedophiles. All those that have previously espouse hyper-sexual ideology to minors, shall be barred from working with children for life.

13/ It shall be official public policy that all daycare and School workers shall have nothing at all to do with the sexuality of the kids entrusted to them. And we must use zero-tolerance, otherwise it is an incredibly slippery slope. So we shall have zero tolerance for teachers that bring up sex, or who contact students off-venue in any way, or who touch kids in any way. All should be regarded as grooming behaviors that are entirely illegal and aggressively prosecuted.

14/ Teaching shall not be about the sexual agenda of the teacher but the non-sexual improvement of the student's mind and character. There shall generally be no special legal exemptions for teachers regarding the sexual grooming of minors.

15/ With regard to child worker license people doing any of

the following with underage students, we shall err on the side of considering this as grooming:

a/ Communicating outside of the Senate's AI and human moderated communication platform.

b/ Meeting students outside of school, or sending students to meet others.

c/ Talking about sex or genders, or sharing sex media, or humor media.

16/ Teachers shall not even suggest or hint about pornography, or taking Mafia drugs, or engaging in sex, or watching extreme violence. Teachers shall generally not be allowed to touch students at all, except for emergencies and self-defense and to break up fistfights.

17/ The acknowledgement of a minor's sexual identity fantasies shall not be a thing for either the schools, or any other branch of government. Sexual identity issues for minors shall not be a subject for any branch of government.

18/ Only females shall teach other people's children up to and including the grade most common among those turning 11-years old. No homosexuals, bisexuals, or transsexuals (present or past) shall teach or work in a primary or secondary school.

19/ No homosexuals, bisexuals, or transsexuals shall work in a locker room, dressing room, or showering environment, or teach in any school or gym, including adult facilities.

20/ For the sake of preventing abuse, mothers shall have the right to briefly visit their minor children at school for 1-minute each day unannounced.

21/ Government, all schools, and all teachers shall not involve themselves with the sexuality, or gender identity of the people, regardless of their age. All those that have previously involved themselves with these subjects shall be barred from working with children for life and investigated for child sex crimes.

22/ In our primary and secondary schools, we shall have private bathroom stalls, but the way in and out of the stalls shall have video monitoring of everyone entering or leaving, and stiff penalties for two in a stall. Aside from these bathroom stalls, there shall be no private places at all in any school for sex. All the janitorial equipment must be in a separate no children area. Teachers don't get offices. They get a lockable stainless steel laptop cover and some desk space in the corner of the room. If there are any offices in any school, they shall not be visually private. If we have janitorial equipment, it must be kept inside a see-thru room. If we have on-site school office, that must either have glass or caging so that there are no private places in any primary or secondary school.

23/ Right on the main corridors, there are rows of 1-person toilet stalls, and open lavatories. Some areas are for boys, some for girls. The girls get at least 30% more stalls than the boys.

24/ Those involved with covering up pedophile acts and sexual abuse by educators and priests (including lawyers, investigators, administrators, and representatives), these shall be considered conspirators in the acts they are attempting to cover up.

25/ All the adults who involved themselves with child sex rights and child sexuality shall be investigated as probable pedophiles. Also, the term "helping children to understand

consent” shall be considered an aspect of grooming children for sex.

26/ The Senate will be strengthened if it makes media and encourages children to think of themselves more as a line, rather than as an individual, and to continue their line, putting the greatest decision into who will be their coparent(s).

27/ Both the county and national licensing divisions shall access the STD database information of all teaching applicants to scan all the files for disqualified teachers every teneth. Homosexuals, and anyone with more than 3 sex partners a year since age 16 on average shall be disqualified from teaching minors under age 21.

28/ No school and no adults shall teach children under age 18 about homosexuality, masturbation, anal sex, or any aspect of sexual pleasure.

29/ It shall be considered child abuse for parents to bring up boys as girls or girls as boys. It shall be considered grooming for teachers and other child-related workers to have anything to do with helping minors to pretend to be the opposite sex before they turn age 18.

30/ There shall be no sex or race clubs at schools. No LBGTQP groups, no Black students unions, no Asian student's unions, no Hispanic student unions, etc.

31/ Government shall be prohibited from hiring violent people, hyper-aggressive people, domineering people, sexual predators, homosexuals, and hyper-sexual people in child-related roles. Also Government shall be required to institute reasonable measures, precautions, investigations and prison punishments to protect the nation's minors from these dangerous types in all schools (public and private) and all child-related roles in society, no matter how intently they will invariably try to sneak back in.

32/ There shall be a right of the people to keep their children away from any and all people in positions of power over their children as they decide.

33/ In the land of the free, we all hold that people domination issues do not belong in education, law enforcement, sports coaching, HOA management, healthcare, and transport operation, among perhaps other roles.

34/ The definition of child abuse shall also include the madness of people in power (such as teachers, priests, and other adults) who are encouraging children to undergo sex changes, so that they may perhaps gain young sex partner. Further, the focus on gender-meandering in schools shows who is running our nation's education apparatus. Apparently, our government and nation's education system is just chock full of blackmailed pedophiles.

35/ All minors must use a special Internet where:

a/ All the spammy ads are replaced with educational media and PSA announcements.

b/ All users are ID verified and there are no grown people participating.

c/ There is no porn, and the violence levels are much lower.

d/ The media is matched to the educational level of the children.

e/ Monitoring is possible by parents.

36/ Disneyland, Disney World, and the Disney company shall be shall be thoroughly investigated with regard to pedophiles. Furthermore, every single person who has ever worked for the child-related parts of this company shall have a page for

confidentially reporting sex crimes against children. All shall be investigated for child sex crimes against children.

37/ All of the people involved with hiding gender conversions shall be considered groomers, and all of them shall be banned from working with children for life, whether this happens in the future or it happens in the past. Also, this clause shall not preclude any prosecution of educators for sexually grooming children.

38/ The prohibition on ex post facto laws shall not apply to child licenses, or to other forms of fiduciaries.

Unconscionable behavior is unconscionable behavior, whenever it occurred. Also people who have been involved with grooming or gender, transitions, or who have had their child license revoked, especially if they don't have children of their own at the time their license was revoked, these shall not be allowed to live in safe breeding communities.

39/ We shall teach children to think more about their line than themselves when they have children. That the right thing to do is what is best for their family line and their nation, and that they should not think so much of love or sexual gratification. And if they can't find a good mate for a long term relationship, they should find the best donor to have a child with. We shall tell this several time to all the children in all the schools.

40/ Our prohibitions against excessive male attention in schools shall apply to both female victims, and other males as victims. The males who cannot control their excessive sexual urges in school may be sent to reform school. This applies to both males who are attracted to females and males who are attracted to other males, as well as female females that are harassing other females.

41/ Neither Government nor any school, or child oriented fictional citizen or individual shall not get involved with favoring or disfavoring sexual customs and stereotypes among the two sexes, male and female except where these are authorized by the Senate.

NR'169. SCHOOL SCHEDULES & TIMING

1/ Normal school attendance shall be 3 days in every 6, however motivated primary, secondary, and tertiary school children shall be allowed to go to school every day if they want, or if they are sent to school more by their parents. The voucher system must support these motivated students. Also, the system shall encourage student motivation by listing the age at which each student finishes each grade level, thus giving kids the ability to say that they are a year ahead, or two years ahead in their studies. Attendance and tardiness shall not count for anything in any class.

2/ The basic school year shall offer 180 days of instruction per year on a day-halved schedule. This is about the same number of days as the old school system including summers, winter and spring breaks, and various other holidays. Thus the new day-halved school schedule will involve potentially longer days at school, but not more days. It will also double the capacity of our school buildings, because some children will go to school on days 123 of the 6-day sweek, and others will go to school on days 456, or days 135, or days 246, of the 6-day sweek. Thus in the same school facilities we can have around twice as many teachers and classes. Thus when

each county leases out its old school buildings, it will be able to handle twice as many kids with no increase in classroom size. Also, because there will be no school boards or teacher's unions, this groups will not be able to block our new more efficient way of running our schools.

3/ Every 3 full days of instruction shall be considered one academic credit. The typical school year shall consist of 60 credits, and potentially up to 60 different subjects, at up to 60 different campuses, so school can be much more exciting for children.

4/ Time is relatively elastic. Instead of having two semesters and 12 classes per year, we shall divide the year into more segments. We shall have 10 teneths of education, each with 12 1-hour time slots. Thus children will take up 10 times as many classes and be exposed to 10-times as many subjects if they are highly driven red-hot types. Other less motivated children will only take 6 courses at a time, and either go home to their parents after school, or they will classes or athletics in after school daycare for children. Also, given that learning is heavily front-loaded (like a LL curve, the lower left quadrant of a circle) having up to 12 classes a day will result in a more intellectually progressive next generation.

5/ Students may start at 7:00am, 8:00am, 9:00am, or 10:00 am depending on the drop off and pick-up schedule of their parents. Students may also be dropped off early and picked up late due to the new mandatory daycare function of all schools.

6/ The number of days one teacher can teach each student shall be limited. This so the children can get exposed to a large number of adults as teachers. If kids find a teacher that they get, they can only study with that teacher a certain amount.

7/ Every primary and secondary student shall spend some specific amount of time reviewing the Senate's universal educational modules each year.

8/ Children who can work productively in serious study under a librarian shall not have to attend school, and can quietly explore a library instead.

9/ Starting in Secondary school, many students will opt for taking one subject at a time, all day, during school days until they are finished.

10/ School is not real. It is a practice and training period before life. If you cheat on a government test, it is a crime. But if you cheat on a school practice test, or you lie on your school entrance exam, or you copy someone else's work at school, the worst thing that can happen to you is that you get kicked out of the school. Schools shall not have the right to defame students because they cheated on any of their school assignments or tests.

11/ In primary and secondary school, there shall be 6 or more streams for kids based on the Senate tests, and the student's birthday.

a/ Those kids that are more than 15 teneths ahead.

b/ Those kids that are 3 to 15 teneths ahead.

c/ Those kids on schedule.

d/ Those kids that are 3 to 15 teneths behind.

e/ Those kids that are more than 15 teneths behind.

f/ Kids with violent tendencies (not violent words)

x/ There shall be separate classes for each group in each large community that is large enough for kids to separate the

groups. In all communities the f/ group kids shall be separated from the rest and sent to special schools. Then, where possible, the d/ and e/ kids should be separated from the good and productive kids.

12/ The most progressive 20% of 16-year olds and up shall have the option to go to various parts of the nation for school, and to up to 6 different schools a year if they travel around in groups of 6 students who are supposed to attend all their classes together, with perhaps 20 to 90 local kids. Also, the kids that are the 10% most progressive get private sleeping rooms, and the kids that are in the 5% most progressive shall get private apartments for school accommodation.

13/ No school shall ever close because of any religious holiday. All schools must be open 364 days a year, with June 19, election day the only day that all the schools close. Thus we have 2 half years of 182 days and we have 4 quarters of 91 days. and we also have 10 teneths of 36.5 days on average. We also have 60.66 six day sweeks. To help with the cost of vacation trips, we shall make all school vacation times flexible and people will take them at random times throughout the year.

NR'170. SCHOOL GENERAL RULES

1/ All new classrooms and other school structures must be entirely pre-fabricated and entirely non-combustable. They must also have systems that prevent firearms and large metal knives from being brought into the school.

2/ Schools are supposed to be places where a wide range of ideas, even crazy ideas are expressed for the next generation to sort through anew. It shall be considered democide when any school administrators or faculty retaliate-against, punish, intimidate, or expel any faculty member or student for the non-violent expression of 1st class free speech.

3/ All Schools shall be required to be heated and cooled to the same temperatures as shared office buildings. All shall also be properly ventilated. All schools that are not properly heated, or air-conditioned, or ventilated shall be investigated by the Senate because this is a sign of theft. All schools must have vinyl covered padded seats everywhere. There must be three density padding (soft over medium over hard padding) that is thick enough to be comfortable. No school furniture may be over 15 years old. All school furniture must be replaced at least every 15 years. There shall be no carpeting in any classroom for students over age 6. All classrooms must be kept at a proper temperature. And there must be sufficient airflow to keep infectiousness down through social distancing.

4/ Schools shall not regulate what parents give their children to eat at school except that no store-bought processed food shall ever be over 15% sugar and vegetarianism shall be discouraged. It shall be thought that fresh good tasting food is one of the easiest ways to get kids to eagerly go to school. And this shall be thought to be particularly so among the poorest kids that need education the most. Therefore, all schools shall provide fresh high quality foods such as Japan wisely does for its children, albeit with different and more culturally appropriate foods. Also, all of the people working in the school cafeterias of our nation shall be phased out and new people shall be brought in to replace them. This is

because all of the old people have the exact wrong attitude about children's meals. Milk, and meat must be offered to all children at all school meals. The following foods/ ingredients shall be prohibited in all school supplied foods up to grade 12:

a/ All forms of canned food.

b/ All fruits and vegetables from jars. All vegetables and fruits must be fresh.

c/ Dried foods and especially foods made from or containing powdered milk powder, powdered eggs, or dried or flaked potatoes, or potato starch.

d/ Eggs adulterated in any way, ground meat, re-constituted meat, sausages, hotdogs, meat that is more than 1/4 fat, organ meat, or processed lunch meats.

e/ Chocolate, tea, coffee, or other sources of caffeine. This includes a total prohibition on chocolate milk.

f/ Cakes, pies, cookies or other sweets.

g/ Food containing artificial sweeteners, or sugars other than glucose, fructose, or sucrose.

h/ Salty foods and foods that contain nitrates, sodium nitrate, monosodium glutamate, sulfur dioxide, or artificial colorants or non-digestible substances.

i/ Foods containing peanuts, pine nuts, and other tree nuts.

j/ Ingredients that come from insects, because insects have evolved to be hard to digest. This shall include bee honey and all forms of fake and adulterated honey.

k/ All forms of fake meat, or blender meat, or ground meat, or hot dogs, or hamburgers, or so-called processed lunch meats.

5/ Much new school construction and maintenance will be provided by private companies that rent classrooms tenethly to teachers and groups of teachers. In some cases, especially in the beginning, the old schools shall be re-organized so some teachers can rent.

6/ All of the schools in each township will share the township clinic with everyone else. And if any, the county will hire the school nurses. Everyone entering a school or daycare shall go through the county recorder system thermal cameras. Those with fevers or shall not be allowed in. Those with sniffles, or lots of mucus shall not be allowed in either. All schools and daycare facilities must be properly ventilated, properly cleaned, and sufficiently spread out that they do not spread diseases.

7/ Regarding school security:

a/ Only clear bags may be brought into schools.

b/ Extremely baggy weapon hiding clothing (including especially Muslim clothing) may not be worn to school.

c/ Schools shall be free to prohibit people who do not wear a school uniforms with special identifying insignia patches. Perhaps in some jurisdictions, the Senate will have it that all minors under age 16 must wear one of the 30 children's uniform clothing items while outside the house. This will help keep the grown people away from the under-16 young people. It will also help reduce the cost of having children, because most kids will use second and third hand uniform clothes.

d/ All students shall stop using printed books in K-12 education. There shall be no more K-12 textbooks. Instead, the students will only carry a tablet or laptop and their clear bag. All school bags must be clear from now on.

8/ Except for essential medicine-related lab classes, there

shall be no attendance, school enrollment, or internship requirement for taking the all-important government administered final test in any subject or level in the nation. Some medical and clinical licenses and other licenses may however require lab classes and internship periods prior to licensing.

9/ As long the child can pass the test for the tenethly grade level corresponding to their age, the school system must consider them as properly educated and they shall not be required to attend school or study if they do not want to.

10/ No school shall be allowed to take any money from a foreign government.

11/ Each year, at each grade level after grade 6, in all secondary schools we shall teach about the evils of communism, fascism, totalitarianism, monarchy, caesars, czars, kings, popes, emperors, racism, anti-racism, propaganda, gendermandering, drug addiction, war for profit, and the ways that people are enslaved as groups.

12/ Except for teachers of very young kids, and the 20% most highly regarded, teaching shall be regarded as a part-life job. Thus most teachers will not be career teachers. Also, primary and secondary teaching shall not be regarded as the sort of job that comes with a pension. It shall be thought better than the teachers come from all sorts of backgrounds and that they work while they are young and enthusiastic.

13/ To start, we will say that no more than 10% of our teachers may study the same broad subject such as: politics, history, programming, technology, economics, chemistry, biology, healthcare, earth science, accounting, law, government, logistics, manufacturing, agriculture. Also, there shall be no teachers in any serious schools with degrees in: gender studies, race studies, CO2 theory of climate, religion, physical education, music, poetry, literature, creative writing, design, studio art, cultural anthropology, sociology, psychology, theatre, film/video/photography, philosophy, communications, marketing, advertising, art history, culinary arts, ethnic/civilization studies, or fashion.

14/ Mental health counseling of minors shall not be under the educational system, but the healthcare system. And within the healthcare system, the mental health department shall never have any right to work with people who don't want to work with them, unless there is a court order issued on probably cause and carefully deliberation by a competently sized body of Senators for the task at hand.

15/ No school shall have any graduation ceremony, because the school diplomas are considered worthless under the new system. Also schools that have graduation ceremonies should be closed down as a penalty for their corrupt behavior. Also there shall be no speeches by famous people at any school to celebrate either graduation or the end of the school year.

16/ Government may require that everyone entering a school is required to enter a double door chamber with face ID and metal detectors.

17/ The smartest kids should be raised mostly around adults and older people, and not other kids.

18/ There shall be no head coverings or black clothing worn at any school, or by students within 300m of any school. The only exception is that cold weather caps may be worn outside the school when it is below 14°C, or cold and windy/wet

19/ Due to big changes in the way, we are now organizing our

tertiary education system, there will be little need for foreigners to come to our country to go to tertiary school. Where foreigners do come to our country to go to school (except for extreme merit scholarships), they shall be prohibited from working, and those that do work shall have their visas cancelled and they shall be immediately deported. There shall be no working while one is a foreign student as it tends to make school into an excuse, and it also tends to draw in the global under classes.

20/ Schools shall not be allowed to contact their alumni, or have alumni associations, or beg for money. All violators shall be shut down down.

21/ No school in our nation shall have any authority to punish people in the real world, or charge people with any sort of crime related to their school work, or cheating, or copying other people's work, or slander them anywhere in the real world for their behavior at school. They may however expel students as they see fit, and inform other schools of the reason. However, when schools expel students for any reason, they must refund the students their unearned tuition or unearned voucher credits so they may switch schools. Claims of plagiarism and cheating by schools (which are not real after all) shall not have any bearing on anything at all. For now that the public tests are all important, nobody will care about the opinions of inherently corrupt schools. The public may charge people with crimes that occur on schools such as assault and bullying, but the schools shall have no right to charge either the students or their teachers with any crimes at all, just as our religious fictional citizens and corporate fictional citizens are not allowed to do this.

22/ Schools shall not have any ability to sue their students for anything at all related to the materials they are given, and especially not for copying instruction or library material, or for any misappropriation knowledge, or any school secrets that they reveal, that supposedly belong to the school. All Schools shall be regarded as places of openness about sharing knowledge without limit, and schools shall have no right to limit the knowledge shared with their students. Schools shall not be allowed to own any intellectual property. In general the actual discoverer(s) shall own the intellectual property they created. But if this is not the case, the school shall not own the intellectual property. And this shall include all research organizations affiliated with any school or university or college. All existing intellectual property rights owned by any school, college or university, or university affiliated research institution shall be void.

23/ The misnomer of Plagiarism (making a beach head and needing elimination) shall neither be a crime, nor an excuse to eject any student from a any school. We say this because it dis-empowers unelected school officials from being the arbiters of who is smart, and who is not. Something that all nations desperately need.

24/ Schools shall not provide any drugs or treatments to minors, even aspirin, and vaccines. Schools shall have nothing to do with verifying that medical procedures or vaccines were taken by their students.

25/ Home schooling shall not require parents to submit a curriculum, and there shall be no government regulation of home schooling curriculums. If the kids pass the Senate's annual progress test with a score above the 30th percentile

for their age, then they can remain homeschooled. They may also remain homeschooled under other conditions such as living in a remote place.

26/ There should be a much lower standard for incitement of violence by professors, teachers, and journalists.

27/ Schools shall be prohibited from Investigating felonies that occurred on their campuses. Also, it shall be a crime for school administrators and teachers to fail to report (and cover-up) obvious felony crimes.

28/ No educator or school or government official shall ever say to any young person that they should think about going into some occupation or other. They may however inform students about where the jobs are.

29/ Freedom of speech rules shall not apply to messages printed on store-bought children's clothing, which must be worn in school and until they turn age 16, and on public property. Only Senate-approved written messages shall go on children's clothing for kids under age 16. There shall be no other messages, and no commercial messages, or product identities.

30/ School should not be boring in any way for kids. The Senate shall have a responsibility to keep our kids from wasting time while they are participating in the education process. No garbage ideas not approved by the Senate shall be allowed in school. No fortune telling. No story telling, No fiction. No going greatly off the script.

31/ In our new townships, all the schools and many other security uses such as jewelry stores, firearm shops, social security offices, lenders, political news organizations, etc. will go inside a self-serve double-door metal-detector barrier at the police station. Some doors will lead to the school(s), some will lead to commercial secure zones.

32/ The national Senate shall establish national primary and secondary and tertiary education policy, national ubiquitized curriculums, national ubiquitized textbooks, and national ubiquitized children's library books.

33/ Universities and colleges have always been one of the most important venues for free speech and open discussion, as this is where the next generation of the nation's leaders work out their initial grown-up beliefs. Therefore, the people's rights with regard to 1st class free speech in our nation's tertiary schools shall be considered greater, freer and more precious than most other places. No post-secondary school shall establish its own policies limiting free speech and the words of students or faculty with regard to political debate and the political positions argued by students and teachers.

34/ Those who come in first tend to matter for society, while those who come in last generally do not. School shall give no consolation prizes or recognition for those who come in last. Such rewards are demotivating for our best and our important young people and push them in the wrong direction.

35/ No school administrator shall have jurisdiction over teachers for what they say or don't say in class as this amounts to a fictional citizen having power over the free speech rights of teachers. It also concentrates power. Thus it shall be prohibited. No school administration shall in total cost more than 15% as much as the total budget for the teachers they administer.

36/ All videos of teachers misbehaving shall be admissible in court without limit. No school shall ever establish health policy

with regard to vaccinations, or masks.

37/ Where there are schools in areas that regularly see weapons at schools, there shall be double-door, lock-in, robotic metal detectors at the entrances. Metal detector wands may also be freely used on students as they move about.

38/ The county Senate of jurisdiction may strip any child worker of their child worker license when these misbehave. Our first priority in checking the credentials of the people that we have as experts shall be pediatricians followed by other people who work with children. The county recorder system shall have a rating and confidential comments board for all child workers and teachers, as well as police, and all other government officials.

39/ All teachers except foreign language teachers must have graduated high school in our nation, and have had a background check, and worked as a substitute teacher for 60 work days. Teacher shall not be paid while on vacation. Teachers shall be paid by the hour instead, with a mandatory time clock. All the teachers shall start as substitute teachers. Then, the students rate them for how good they are as teachers. The teachers that can't get a good rating as substitutes, can't get to become real teachers and have to stay in the substitute area for a couple of years until they flunk out of teaching. And the ones that get high ratings, these get to become real teachers. So that the students get rid of the really bad teachers from the start, and keep these out of teaching.

40/ The test for being a preschool, kindergarten, or up to a 4th grade teacher shall presume a high school early education stream plus 13th grade. Either this or a 2 year course in early education. The test for being a 5th through 9th grade teacher shall require. shall presume education to grade 14. Higher levels of secondary school shall presume a grade 16 education.

41/ There shall be no official teacher certification system that is not run by the Senate.

42/ All teacher must complete all the modules related to the subject they are teaching. They must watch the video presentations, read the material, and take the tests.

43/ All universities that unfairly muzzled, conservative speech must be shut down for censorship. They shall all be considered infiltrated and compromised, and their opinions shall be considered of no value to society.

44/ All of the big name universities and colleges shall now be shut down over the next few years due to the anti-democratic cred power that these institutions have usurped. And also because of the unnecessary narrowing of our economy. After 2030.01.01 the staff and students at these colleges may not use the name of these name colleges it undermines the power of our county recorder system's unbiased testing platform.

45/ All academics, doctors, and engineers must take the test in their field, and the continuing education tests every 4-years. Everyone's scores on their licensing test and their most recent continuing education test shall be posed for all to see. Where we have people under the old system that were supposedly eminent, but they score poorly on their new-incorruptible test, these people shall be investigated for being connected to the Ishtarian mafia.

46/ No parents shall ever be compelled to pay for their child's tertiary school education. Tertiary education shall always be thought of as completely optional where the kid is a mid or below. And all the tuition will be free, and all the smart kids will be able to get dormitories.

47/ It shall be thought that once we automate the testing process with mass testing administered by the county, and once all the progress testing is done by computers, that all teachers will be doing is talking to kids about the problems that the progress testing reveals. Also, all the kids with one sort of problem will the material will be taught together thanks to technology organizing and notifying people when to go where and always prioritizing the problems affecting the largest number of students. So our teachers will teach twice or thrice as as many kids at a time, and we will further reduce the cost of education.

48/ The education system is supposed to expose all kids to the idea that they can do totally immersive all-day, every-day working. To this end, we shall have a Ben Franklin certification for both graduates and non-graduates of any level. In order to obtain a Ben Franklin certificate, the student or worker has to work 12-hours a day for 30-days in a row. Either in school, or on a job, or studying in a public place, the total number of hours spent working must average 12-hours per day over a 30-day period. Earning your Ben Franklin at a young age shall be thought a life-long indicator of maturity. The motto of the Ben Franklin certification process shall be: a/ "Diligence is the mother of good luck." and b/ "Whatever your life's work, the older you get, the harder it gets."

x/ It is thought that many nations will copy our Ben Franklin certification, especially those that work hard normally. The Ben Franklin certification process is supposed to show kids that they can work hard. It is also supposed to help create company cultures of working long productive hours, that many startup enterprises will find quite valuable. It's also supposed to educate students that they might want to do intense short term work as contractors and then go somewhere remote to relax for the rest of the year.

49/ Schools, corporations, charities, and shopping malls shall not be allowed to have special laws that can result in people being jailed or arrested.

50/ People over age 19 shall not be allowed to attend secondary school. If they want to go to school, they must either go to a junior college, or to a remedial school.

51/ Young people who cannot pass the appropriate public grade-level test for their age at school shall not be allowed to get a drivers license until they are 18. Those kids who cannot graduate high school secondary school. shall not get a drivers license until they turn 21.

52/ Only teachers with Ubiq status can teach for more 20,000 hours in their life-time

53/ The children of foreign illegal aliens/immigrants shall no longer be allowed in our schools.

54/ All schools, and all colleges in the nation where the teachers are over 10:1 registered Democrats over registered Republicans must be permanently shut down within three years, and all the entire staff (teachers and others) banned from working in education for life. Where the teachers are over 5:1 Democrats over Republicans, these places must be

permanently shut down within three years and the staff shall not be prohibited from education. The provisions of this paragraph shall be thought vitally important for draining the educational swamp in our nation.

55/ Our nation's schools, public and private shall only be allowed to teach in English. No other language shall be used except for secondary language instruction. New arrivals that do not speak English shall be taught in English, with a translation app.

56/ Children that are unable to pass the test for their grade level in English must be held back until they can pass the test.

57/ No national educational policy shall be modified, except by the national Senate.

58/ The kids that can learn how to think shall be taught how to think. All the other kids be taught what to learn. The former group should be thought of as smart, and the latter group should be thought of as rather robotic.

59/ There shall be no loan forgiveness or free Government money for frivolous educational subjects.

60/ There shall be total curriculum transparency in schools.

61/ At least 20 times a year, all students in the edu system shall be taught indirectly about people who made foolish decisions with long term consequences.

62/ There shall be no ownership of multiple private schools. No foreign nation or fictional citizen shall ever own any part of our nation's schools. People from adversary nations shall not be allowed to work in our schools.

63/ The Senate may label certain sorts of media as addictive or over stimulating. Where this occurs, sharing it with minors may be considered similar to sharing alcohol or drugs or cigarettes with minors.

64/ It shall no longer be required to have a teaching credential to teach physical education, art, crafts or music. Instead only a 2-year training certificate shall be required.

65/ Due to widespread abuses in the past, there shall no longer be any education grants or loans (public or private) for foreigners or for frivolous subjects, even literature and theatre shall now be off limits.

66/ No school shall employ more than one non-teacher per 8 full time teachers. Also, the money going towards school administration shall be limited to 8% of the money spent on teacher payrolls. All cleaning people, school nurses, and food preparers, textbook management, and grade recording people, physical education staff shall be employed by the county and shall no longer count as school employees even if employed at a school.

67/ Everybody recognizes that child rearing by caring parents and family is normally far better for the child than rearing by indifferent and often predatory strangers. So why do people have so much trouble realizing that education by caring parents and family is normally much better than education by indifferent and often predatory strangers? Therefore under this constitution, education by caring and effective parents that do the work and put in the time shall generally be regarded as superior to education by schools and professional teachers. Also, even part time education by parents shall be regarded as providing a superior educational environment for children. Also, from a societal standpoint, parents shall be regarded as superior to teachers and

especially school systems due to the fact that home schooled students are inherently divergent, and school system students are inherently conformist.

68/ Everyone licensed to work about children must wear a recorder system monitoring camera at all times while they're at work. This camera must be on from the moment they enter the child-related workplace until the moment they leave. Those with missing parts in their camera logs must be fired, unless they're in a teacher's bathroom.

69/ We shall remember the words of Ayn Rand: "There was once a time when College Students studied facts, knowledge and human greatness. Now they study nothingness, ignorance, and the fool, the madman, the blind beggar, and the witch."

70/ Schools shall no longer have either auditoriums nor school plays. There shall be no more school plays or singing or rhymes studied until after secondary school. This is:

a/ A distraction from real learning about important things.

b/ It leads towards homosexuality for boys.

c/ There is no longer any need for auditoriums now that all the children have screens.

71/ All schools located in tsunami zones must be closed down, and all of the people must all of them must be relocated to higher ground where they're safe

72/ We shall ponder the words of Benjamin Franklin: "If everyone is thinking alike, then nobody is thinking."

73/ We shall ponder the words of Samuel Adams: "It is in the interest of tyrants to reduce the people to ignorance and vice. For they cannot live [function] in any country where virtue and knowledge prevail."

74/ We shall ponder the words of Thomas Jefferson a/ "The cornerstone of democracy rests on the foundation of an educated electorate."

b/ "Educate and inform the whole mass of the people... They are the only sure reliance for the preservation of our liberty."

75/ We shall ponder the words of Vladimir Lenin: "Give me four years to teach the children and the seeds today of so will never be uprooted Vladimir Lennon."

76/ The Senate shall create a uniform code of conduct for all primary, secondary and tertiary schools and students. No educational institution shall have the power to make its own code of conduct.

77/ The education system is supposed to pass slightly more of men and women, and if it does anything else, the curriculum must be adjusted.

NR'171. UBIQS

1/ An Ubiq is someone that created something valuable for all of society as judged by the Sub-Senate. The reward for this creation shall be both various levels of official Senate-bestowed Ubiq status and money.

2/ Ubiq status shall never be awarded for athletics, music, poetry, art, architecture, fiction, fictionalizations, fictionalized history, acting, theatre, or any other frivolous subject.

3/ In order to rapidly propagate our Ubiq gene-pool, the Senate shall look for people who have advanced mankind in the past, even as part of a team, and grant them reasonable amounts of Ubiq status.

4/ For all drugs, and where the Senate is still hoping for a

better way, the Ubiq payments shall generally be paid out annually. Where the Senate regards a solution as total and complete, the Ubiq payments shall generally be paid as one lump sum.

5/ The Senate shall audit all claims of Ubiq status and it shall be a felony to impersonate an Ubiq or a Senator, just as it is a felony to impersonate a police officer.

6/ All Ubiq payments and all profit rights from authors and inventors shall be sacred and these shall not be taken away for any reason. No debtor, no court judgement, no tax liability, no contract, no child support, no government fine shall ever have the right to claim Ubiq income from inventions or authorships. Even those in prison shall have their Ubiq and authorship monies held for them until their release, or death. Also, Ubigs can pass their Ubiq money on to others tax free.

7/ When the Senate declares an innovation emergency, or a bottleneck it can offer a multiple of the normal Ubiq rewards. For an epidemic the Senate might offer 20X the normal Ubiq awards for a vaccine or treatment.

8/ The Senate shall focus on rewarding creators for their work. Rewarding publishers and promoters shall not be much of a consideration. No publisher or non-author, or non-inventor shall ever receive any Ubiq recognition or money. Also, where someone's IP is acquired, and the acquirer substantially default on their obligations to the IP creator, the courts shall be quick to revert the IP to the author/inventor and give the IP acquirer nothing.

9/ The smallest increment of Ubiq status is 0.01. Until you are given 1.00 Ubiq points by the Sub-Senate, you are not an Ubiq. After earning 1.00 Ubiq points, you are an Ubiq for life and all your genetic offspring are all considered sires.

10/ There shall be a college of software Ubigs, and education Ubigs, and immunology Ubigs, etc. These colleges among other groups will advisory the Senate in their area of expertise.

11/ The Utter, the person who first expressed an idea, will get the most status and reward for his ideas. But the early supporters will also get a sliver of the credit. Also, the people who created improved versions that take over from the original and become the species of the new idea shall be properly rewarded. Also a sliver of Senate status shall accrue to Senators who shorten or streamline the nation's laws by even one word, or make a single sentence easier to understand, or less equivocal.

12/ When people develop things and get Ubiq or Senate status, and they have a regular partner at the time that the things were developed or proposed, then the wife/ girlfriend(s) or husband/ boyfriend(s), get an extra 50% of the status and an extra 50% of the payout money. The Ubiq status recipient gets 100%, and the Ubiq's spouse/ girlfriend(s) gets another 50%.

13/ The Senate will be generous with status for the people who find things and streamline things. This is how we get our Senate spending combed through by thousands of people. All of them looking for some improvement to get confirmed to the Senate or confirmed as an Ubiq. So they may live their entire life as a confirmed Senator or Ubiq.

All these people will be playing the competitive game called make government better so you can rise in status and get lots and lots of kids raised by their mothers (coupled or

not) in a system that pays mothers more so that there is no security or standard of living aspect connected to their decision of who to have their children with.

14/ No woman should be allowed to keep her Senator/Ubiq spouse/ partner from donating sperm. In fact, if asked, all are supposed to come along and eagerly help with this, regardless of any fighting between them as a duty to their Senate and the breeding advancement of her people.

15/ Whistle blowers will frequently be given Ubiq status. They may also be given Ubiq money, and up to 25 years of wages from if they were persecuted for being a whistle blower.

NR'172. FICTIONAL CITIZEN RULES

1/ The freedoms of our land exist exclusively for the benefit of its real human citizens. Fictional citizens on the other hand are merely legal conveniences that are only allowed to exist because they are beneficial to the financial interests of our nation's real human citizens. The moment that the rights of fictional citizens impinge on the fundamental human rights of real people, those fictional citizen rights must be curtailed. Indeed, fictional citizens shall only have the right to exist so long as they don't impinge on the fundamental rights of real people, or cause harm to society or the physical environment. Also, personal human political and economic freedom shall be considered a primary thing. Freedom for large enterprises shall be considered secondary when this interferes with the primary freedoms of real people.

2/ The only rights that fictional citizens have under this Constitution arise from the rights of their citizen shareholders. Under this Constitution, fictional citizens themselves do not have any inherent rights, and fictional citizens may be killed and plundered of all their assets by the Senate and people if the long term benefit of the people is served.

3/ We shall always be on guard that our fictional citizens, mere legal conveniences, are not abused by foreign interests as a facade. The previous narrow democracy suffered hugely from this problem.

4/ We the people shall be thought completely free to put any restrictions we want on our companies if:

a/ It will benefit the real citizens of our nation.

b/ All the nations of the world are doing it too. This way there is no cost advantage for everyone.

c/ It doesn't cost them very much.

5/ Fictional citizens and foreigners must remain absolutely non-political, and shall not in any way use their super-human assets to influence election outcomes, economic policy, government management decisions, regulatory rules the public discourse, political norms, social norms, sexual norms, ecological norms, morals, the will to fight in a war, media coverage, or the other matters of real flesh and blood citizens participating in their democracy. When fictional citizens violate this rule, they shall suffer heavy dilutions of their ownership equity in favor of the public for polluting the environment of the public policy discourse. Also, the fictional citizen managers, owners, and employees directing a fictional citizen towards violating this rule shall be subject to felony charges for both their money diversion crimes, and more importantly their free speech crimes. Also, these rogue managers abusing their power to divert company millions to the matters related to real human citizens participating in their democracy shall generally be considered similar to voting by non-citizens, or if these activities are widespread and far reaching, they may be punished as a sort of mass election

fraud. Fictional citizens and their managers and zillionaire founders (as well as foreigners) shall not do any of the following, and these activities shall be punished the same as when foreigners vote illegally.

a/ Lobby government.

b/ Attempt to influence the outcome of elections in any way.

c/ Sponsor, produce, or finance any media that attempts to shape the beliefs, habits, decisions, or elections of the people in ways that are not directly related to selling their products. This includes advertising and sponsorships that support such media.

d/ Organize or participate in boycotts, or avoid, or seek out relationships for reasons of politics or free speech by real genuine human citizens.

e/ Speak out in praise or disapproval of public figures or public policies, foreign nations, or use front men for this purpose.

f/ Reward or punish real citizens in any way when they exercise their right of free speech.

g/ Push environmentalism, or advertise with depictions of nature.

h/ Influence people's views on physical attractiveness.

i/ Advocate for a policy of more immigration, or help immigrants to migrate illegally, or advocate individual people as immigrants.

6/ Whenever a fictional citizen or business denies service to a human, or they eject someone from a premises or vehicle, they must state a valid and reasonable reason at that time, and must allow themselves to be recorded saying this, otherwise the presumption shall be that the FC/business or its workers are discriminating against that human and violating the human's rights. If there is no statement of why, together with the opportunity to record this statement, there shall be no right to deny service or to eject the person. Furthermore, where people have paid nothing to be in/on the place they are ejected from, the bar shall be very low bar for ejecting people. However, when they have paid a great deal to be in/on the place they are ejected from (such as airline seats) the bar shall be quite high for ejecting people.

7/ No fictional citizens shall be allowed to influence government as either a primary, secondary, or tertiary objective. There shall be no more political, action, committees, or lobbying companies.

8/ Our first and foremost right to free speech by flesh and blood citizens about 1st class free speech is all-important to the functioning of our informed democracy and to maintaining of our freedom. On the other hand, fictional citizens are mere conveniences. One thing is all-important to the people, the other thing is trifling. We shall not allow fictional citizens to impair the rights of real people in any way with regard to our citadel human rights especially the first and foremost right of free speech. Thus, the right of a business to be inoffensive to their customers shall be considered trifling in comparison to the all-important right of its human citizen employees to express their personal opinions and live their life in their free time. Fictional citizens and their managers shall not discriminate against, or punish citizens for off-work political activity, comments, or protesting that the worker has not connected with their workplace.

9/ Except for the apportionment of ownership and voting

rights among many people, and the marketability of those rights as shares, there should be no tax benefit or legal benefit for operating as a fictional citizen.

10/ No fictional citizens shall ever have any right that real flesh and blood citizens don't have. However, real people shall have rights that fictional citizens don't get. Also, no fictional citizens shall be allowed to live for longer than a long human career. Also, we must counteract the advantage of not having to pay death tax like humans. To counteract this advantage and loophole, we shall have it that all fictional citizens shall pay a 2% annual wealth tax on all assets in the form of an annual incremental stock dilution in favor of the people.

11/ No human or fictional citizen shall be allowed to evade the death tax through any legal or financial machination.

12/ There must always be some sort of income tax for that all fictional citizens must pay. This will help to:

a/ document cash streams and reduce many forms of corruption.

b/ It will give personal enterprises a needed advantage. Also a great many personal enterprises will crowd around the large corporations due to the tax disparity. In other words, large corporations will tend to spawn work for personal enterprises with anything over a 10% disparity in tax treatment.

c/ It will bring in money.

d/ Even non-profits must pay some income tax, for anti-corruption purposes, and because it will lead to many spending and bidding rules that will reduce theft and corruption.

e/ The initial income tax for fictional citizens that are for profit shall be 20%. The initial income tax for non-profit fictional citizens shall be 3%. This is in addition to the sales tax on retail sales to end users.

13/ Being an employee, manager, director, or board member of an illegally-acting fictional citizen shall confer no protection from criminal prosecution. This private status should be totally irrelevant as an excuse for evading trial and punishment.

14/ When government lends money to fictional citizens, it shall always either charge a fair rate of interest or demand a fair amount of shareholder equity in the fictional citizen. If the fictional citizen cannot either repay their debts or their taxes, then the shareholder equity shall be diluted in favor of the public. In some instances, all non-public equity in the fictional citizen may get wiped out. When this is threatened, the Senate shall normally re-float the company by issuing new shares to the people.

15/ When fictional citizens receive great public largess, or bailouts, they shall become the property of the people in proper proportion. Fictional citizens that are over 40% owned by the public shall not issue stock, or debt or increase payments or buy or sell assets without the approval of the Senate.

16/ In general, fictional citizens shall not be allowed to operate more than one chain of operations, unless an older chain is founding a new chain, or in the process of merging with another chain.

17/ All official fictional citizen and OPM manager notifications shall occur via the county recorder system's notification system. Notifications sent through this system shall be a

requirement of using the county recorder system's mandatory system for fictional citizen voting. Also, using the recorder's voting system shall be required for any action by the fictional citizen. Thus it becomes harder for managers to secretly misappropriate money from fictional citizens. Under this system, much of the work of a corporate secretary will be automated by the county recorder system, with online forms used nationwide, and verified email notification delivery by the recorder's office.

18/ Aside from the normal rules of private property, no fictional citizen shall have any special jurisdiction of its own where it establishes special laws or rules for the people.

19/ Fictional citizens shall have no right to earn a premium on assets condemned by the public, particularly land for linear infrastructure.

20/ There shall be no special tax grants to fictional citizens so they will locate some business in a particular jurisdiction.

Also, all existing tax grants are hereby cancelled and nationalized, and let this be a precedent.

21/ There shall be no right of free speech for fictional citizens when it in any way diminishes the ability of real flesh and blood citizens to hold a public dialogue.

22/ Fictional citizens shall be required to tell the truth, the whole truth and nothing but the truth, and not in a sneaky or deceptive way. Fictional citizens may only speak truth and facts, and they must do this in an unbiased way. Where fictional citizens lie for gain, or pollute the public discourse, or obfuscate the public discourse, they shall pay business crippling toxic-waste sized fines.

23/ Fictional citizens shall be prohibited from uttering their views, or sponsoring people to express views about news events.

24/ In order to assure a broad and dynamic fast-evolving media production ecosystem we shall say the following. No fictional citizen with more than 1,000 employees or contractors shall produce media of any sort. No fictional citizen with more than 200 employees shall produce media for minor children. This includes feature films, serial programs, magazines, serious journals, websites, and book publishing.

25/ In all mergers and acquisitions, it shall be expected for the management to share all information related to the company's financial condition, customer base, debt, boardroom matters, and anything else that might affect the acquiring company's market value, potential value, or value to the acquirer. The Senate shall make a complete list of all the things that an acquired company must share by law. If a company being acquired fails to deliver this information, the courts shall be quick to issue subpoenas for this information. There shall also be a presumption that company management that is reluctant to share this information is stealing from shareholders somehow and are trying to hide this.

26/ Where cash offers are made for public companies that are at least 20% over the trading price of the company, the company management shall not be allowed to refuse the offer. Government may however not allow the acquisition for reasons discussed herein.

27/ Where company purchase agreements exist, neither side can sue the other over matters that are not explicitly stated in

the purchase agreement.

28/ When fictional citizens make media, it shall either use narration, or if a person must demonstrate something, that person must wear a mask and gloves so that they don't show any skin. This is so fictional citizens never can gain any human feeling.

29/ No fictional citizens and no business shall be permitted to use the following words in their name. This shall also apply to foreign entities doing business in our nation: America, American, United States, US or U.S, treasury, official, government, royal, king, or king's, queen, or queen's, dominion, federal, national, world UM or U.M, or any other words that imply that the entity is related to the government, or is some official or government sponsored organization.

30/ No fictional citizen shall be allowed to bestow any honor or distinction upon any person, for this is corrupt.

31/ All fictional citizens shall be required to have open public books that anybody can log into and verify the transaction information online at any time.

32/ There shall be no corporate shenanigans where:

a/ FCs are named like, or pass-off as a real person.

b/ One FC is confusingly named like another FC, or like a government agency.

33/ Foreign companies not allowed to work in toxic manufacturing or biological laboratories, what chemical, manufacture, or batteries, or other toxic processes in our nation. For what if they make a huge mistake and let their subsidiary die, leaving us on the hook? What if this is an intentional act of war?

34/ Fictional citizens shall not be allowed to name their companies after common words and phrases in our language, for example: apple, meta, facebook, google, alphabet, uber, jack in the box, taser, xerox, waste management, thermos, fedex, hoover, velcro, aspirin, popsicle, memory stick, band-aid, bubble wrap, chapstick, dumpster, fiberglass, frisbee, hula-hoop, jeep, jacuzzi, jetski, photoshop, teflon, vaseline, ziploc, cellophane, dry ice, escalator, kerosene, laundromat, trampoline, app, app store, yo-yo, zipper, rollerblade, scotch, tape, super glue, power-point, and last but definitely and absolutely not least: realtor. None of these words, shall ever be trademarks, or business names, or names of fictional citizens. Apple computers shall be renamed as Mac/Macintosh computers. Also, the Waste management corporation shall have 1/4 of its equity nationalized due to its sneaky name, whereby its customers think that they're dealing with the government. Waste management corp shall lose another 1/4 of its equity because of its monopolistic practices.

35/ To be clear, all NGOs, PACS, charities, corporations, partnerships, government liked companies, religions, cults, and all other non-human, non-government organizations shall be considered fictional citizens. And this shall also include informal associations. And all of these entities shall:

a/ Not have the right of free speech.

b/ No participate in our democracy.

c/ Not participate in the public dialogue.

d/ Not talk about anything else but whatever products they make, or sell.

36/ Businesses shall not be allowed to establish their own idiosyncratic rules regarding health and hygiene and personal conduct, but must use the standard menu of rules.

37/ No publicly traded company shall have non-citizens as more than 20% of its staff or 5% of its management.

38/ The personal political and economic freedom of real people shall be considered a primary thing. The freedom for large fictional citizens shall be considered secondary when this interferes with the primary freedoms of real people. Corporate officers shall have no right to keep their corporate communications private.

39/ Government shall audit the prices managers pay for various things and both point out apparently excessive charges.

40/ The largest multinational fictional citizens shall pay their taxes to the UM, for fair apportionment to the various nations they do business in.

41/ There shall be no fictional citizens with names that are confusingly similar to a nation, or to any financial company, or to any other very large fictional citizen.

42/ The Senate shall be free to alter the culture and memories of any fictional citizen.

43/ All existing fictional citizen laws for both for-profit corporations, non-profits, HOA's, and cooperatives, shall be voided and replaced with new Senate compiled laws and new form documents.

44/ All advertising spending must be through the county recorder system, which shall keep track of the amount of money spent. The percent of revenues spent on advertising shall be indicated on every businesses information page. And those businesses that spend a ton of money on advertising shall be clearly indicated, and obvious to everybody who cares to look.

45/ It shall not possible for fictional citizens to punish customers in any way unless there's a reasonable Senate-approved standard claims resolution system.

46/ Wherever there is a situation where a fictional entity is causing death or harm to real human citizens, the government, shall have an obligation to notify all of the directors of that fictional citizen, and put them on notice that if they don't immediately stop the harm, they shall be held personally responsible. This is how we stop corporations from harming people for profit, for causing and engaging in situations that lead to people being harmed.

47/ No fictional citizens shall ever have any right that real flesh and blood citizens don't have and easily could have.

48/ It shall not be allowed for any form of nonprofit to become a for-profit organization under any circumstances. It shall also be a felony to convert nonprofit assets into personal assets or assets owned by a for-profit corporation. Nonprofits can't give money to other nonprofits. They can't have subsidiary, child and grandchild subsidiary nonprofits. They can't pay for luxury things, they cannot provide luxury services. They also must die after 20 years.

49/ The Senate shall establish strict rules whereby our nation's fictional citizens will be required to promptly pay the people they owe money to. The requirements of large entities paying promptly shall be higher than with smaller ones. This is because otherwise, the large entities get too much power over the cash flow of the smaller entities.

50/ To help the people to recognize and favor small businesses, government shall have corporate designations by the number of employees in a fictional citizen. We shall thus have FCs that are up to 10 employees, and others that are up to 50 employees, and others that are up to 200 employees, and others that are up to 1000 employees.

51/ Companies shall not be allowed to sit on large piles of cash. Except in fast growing companies, and founder-run companies, there shall be an obligation to refund all excess cash to shareholders if it is over 3-years operating costs. Otherwise this money frequently gets siphoned off and stolen by the professional managers.

52/ Once the initial growth phase of a company passes the leaders tend to move on and a new bunch of leaders come in. Quite often, this new group is more interested in diverting money to their friends. People working in this role should suffer extra scrutiny.

53/ People who use their own name for their business shall not be allowed to sell that name or their likeness or their identity. This is an important distinction to make. Also, we never want businesses going around buying up other people's goodwill and then extracting whatever they can extract from it. This sort of specialist in business is not what we want in our economy.

54/ In general, trials and due process shall be required before government can close down a business, or a farm or change any government rules that have the effect of making an existing industry or group of businesses nonprofitable or impossible. This is essential because history shows that for thousands of years since ancient Greek times, parasitic foreign interests have tried to get our governments to shut down our businesses so they could as foreign competitors sell their essential stuff, their far-in grain, their valuable oil due to a shortage.

zebra

to us for many times the price it cost domestically. viz the recent the Arab oil embargo. So therefore, in the future, when the people want to start a business, they shall not generally be encumbered by government regulation. And on the other hand when government wants to shut down businesses or have new regulation for a businesses this shall require a lengthy approval process.

55/ Foreign money, zillionaire money, and fictional citizens (whether for profit, or not for profit) shall not be allowed to initiate law suits over political or industry cost matters, including especially environmental matters, and matters that will drive up domestic production costs. If we fail to have this prohibition, we will see foreigners using these to bring lawsuits against our producers, so that Rome (us) will once again become dependent on 10x rip-off priced imported Egyptian "far" grain.

56/ Fictional citizens shall not allowed to engage in a sale/ leaseback agreements in regard to their company assets.

57/ Regarding non-financial industry companies with stocks that are traded on a public stock exchange: All shall be

prohibited from buying bonds, borrowing money, or lending their money out. All of the capital shall come from the stock market, and all of the capital and gains shall only be returned to shareholders. If a company has both financial and non-financial divisions, the company must break so that there is a financial company and a non-financial company.

58/ The Senate shall establish standard loan practices for all classes of home, vehicle, and consumer lending. The Senate shall tax all non-standard loans at a rate of no less than 3% of the regular payments (for the life of the loan and the payoff) for being non-standard.

59/ No domestic company shall be allowed to transfer more than 2% of its assets overseas to invest in foreign production in any given calendar year. Also, all of foreign investments must be directly capital in nature for factories, and there should be no investment in foreign lands or foreign stocks or bonds or debt instruments by our companies, and there should be no foreign bank accounts for our companies, except those having to do with payroll and ongoing factory and office expenses in that year. Our tax hours shall also spend 5 times more time auditing foreign accounts than domestic accounts and it shall charge a reasonable amount for this service.

60/ No fictional citizen shall pay excessive wages, or make cash transactions, or evade using the recorder system's bidding system.

61/ It shall be considered criminal restraint of free trade where companies ask others to enter into exclusive trading agreements. Also, exclusive business relationship contracts shall not be enforceable in court. It shall also be considered restraint of free trade when producers and suppliers get together and restrict output to increase prices. This shall always be considered anti-competitive behavior and criminal.

62/ Individuals businesses shall be allowed to discriminate against people who are not citizens, with regard to the extension of credit, with regard to entering into business relationships, and with regard to other matters where there is any chance that the foreigner might take something valuable and leave the country. This shall also apply where low value foreigners have a history of harassing or raping women: Such as in nightclubs and bars and taxi drivers. Also, due to the possibility of child crimes, all childcare providers and teachers must also be citizens, and likewise with police.

63/ Where a franchisor enters bankruptcy, all of its assets shall be sold to the franchisees, and any excess shall go to the investors in the franchise.

64/ All franchisor ownership and equity rights shall revert to the national government after existing for 30 years. to the franchisees, and they take control of the enterprise, so McDonald's corporation, and all these other franchisees die and they don't remain as these immortal entities. Even though they will continue on.

65/ Fictional citizens are not allowed to trade in derivatives, except when they either own the asset or have a way to make the asset. They may also trade an amount of derivatives equal to what they have on hand.

66/ Fictional citizens shall not be allowed to rebrand themselves and significantly change their name. They shall be free to do different things, but they must always use the same name.

67/ To control stealing, all significant remodels shall require a 2/3 of majority of shareholders or a 2/3 over majority of homeowners.

68/ Fictional citizens involving more than 100 people including all parent entities shall not be allowed to produce fictional media, or stories, or commercials. They shall also not be allowed to put writing in advertising, or on bags or clothing. Company names shall be allowed, but not ideas or thoughts. Even slogans like just do it, or its the real thing shall no longer be allowed.

NR'173. FC MANAGEMENT

1/ In all matters where the rights of shareholders and owners are in conflict with the interests of management people they hire to run their group affairs, the all important rights of the owners and shareholders shall prevail totally over the completely irrelevant rights of the managers in every way reasonably possible related to owner and shareholder power.

2/ It shall be considered fraud when FC managers take any measures, or implement any rules, or spend any money (including their own personal money) to prevent FC owners and FC's shareholders from firing them as managers. Managers shall be free to call and talk to the shareholders, but they shall not be allowed to do anything else to either prevent the firing of management, or to prevent other people from buying an interest in the FC they manage.

3/ It shall be considered felony fraud when FC managers implement any so-called poison pill measures to prevent a takeover of the the company they manage. This is because such poison pill measures almost invariably lead to a dilution-of, and reduction-in the all-important shareholder equity the managers were hired to defend in the first place. If we allow this practice, then we allow managers to violate their fiduciary obligations and put their own irrelevant interests ahead of the all-important interests of the shareholders. So we must do the opposite and prohibit all poison pill measures not annually approved by a majority of shareholders.

4/ Fictional citizens shall not be allowed to:

- a/ Discriminate either in favor or against certain potential shareholders, or certain types of shareholders such as existing and new shareholders, preferred shareholders, or non-preferred shareholders. All shareholders shall remain totally equal.
- b/ Sell shares at a discount to either existing shareholders, or others.
- c/ Transfer or sell assets to take any action intended to prevent a takeover.

5/ Except for founders, no person may serve on the board of any fictional citizen for more than 8-years. Managers must each own more than 0.5% of shares in order to acquire the rights of an owner.

6/ No new shares shall be issued, and no stock split shall take effect until 60 days have passed since being authorized and noticed.

7/ Fictional citizens shall not be allowed to engage in secret dealings of importance to the public. Corporate officers shall have no right to keep their corporate communications private.

8/ The operations of all of our nation's fictional citizens and all foreign fictional citizens doing business in our nation shall

based on honesty and openness. Fictional citizens shall not be allowed to be a party to any secret agreements or secret dealings. Those officers signing off or otherwise making secret agreements may be charged with felony fraud. Also those company directors and managers that become aware of a secret agreement and who fail to report it shall be considered co-conspirators in the crime. Government officials that sign off on, or make secret agreements may be considered democides.

9/ All officers and directors of all fictional citizens shall complete the Senate's anti-corruption module and shall pass the test with a 100% perfect score. After this, we shall strictly hold all FC directors to the rules of corruption. The Senate may elect to take away the stock and stock options of managers that act corruptly, or abuse the public or their company's shareholders.

10/ To prevent the possibility of interlocking directorates, nobody may serve as an officer or director of more than one fictional citizen they did not found at the same time. However, if a man founds 100 companies, he may serve on the board of all 100 and one more that he did not found. Also, humans may control up to two FC's with little or turnover. However, the third FC, must have a turnover of more than 50 year's wages in explainable transactions, and services not related to murky sources such as consulting services.

11/ No publicly traded fictional citizen shall have less than 20 directors. All fictional citizens shall have at least one director per 500 full time employees.

12/ Except for a small number of co-founders, people ineligible to vote in our nation's elections shall not be eligible to either vote as part owners of a fictional citizen registered or operating in our nation, or to be a director or board member of a fictional citizen registered or operating in our nation. Except for a small number of co-founders, Only human citizens of our nation shall be allowed to vote shares in our nation's companies which they own. Also, mutual funds and exchange traded funds and all other sorts of baskets of shares shall be considered as fictional citizens and these shall not have the right to vote the shares they own in the various fictional citizens they own.

13/ We shall not have corporate Matryoshka dolls. Fictional citizens shall not be allowed to vote the shares of other corporations, either themselves or via a proxy. Thus no mutual funds, or retirement funds, or hedge funds will be able to vote for anything at all with regard to the corporations they own. A complete corporate family tree showing all divisions of the company must also be submitted with each corporate tax return.

14/ All shareholder voting in FCs shall be open with everyone's vote recorded for all to see. All board voting shall be in secret using the county recorder system's FC voting chambers and a system similar to what the Senate uses.

15/ In our nation, people are innocent until proven guilty in a government court of law. Therefore, all fictional citizens shall be prohibited from discriminating against real citizens that have been accused but not convicted of a crime. They must instead rely on legal rulings. However, those who have been in jail for more than one teneth awaiting trial may be fired for this reason alone.

16/ Those who have worked as a lawyer, those who have not

completed a tertiary school test, and those who are not full citizens shall not be directors, officers, or board members of fictional citizens they did not found or co-found. Convicted felons shall not be directors, officers, or board members of fictional citizens under any circumstances, for this gives them a way to hide their felony status.

17/ The salary and bonuses of all fictional citizen directors and officers shall be expressed as a multiple of the average national wage. Except for FC founders, no fictional citizen officer or director shall receive annual wages exceeding 50 times the average wage.

18/ Our government encourages performance based pay for workers and managers. However it prohibits performance based pay for directors of fictional citizens. This is because performance based pay drives workers and their managers towards hard work. However, it drives directors towards risk taking, short-term thinking, and financial trickery.

19/ No group working for others shall be considered competent to adjust their own wages or other compensation. For this reason, all changes in compensation (including profit sharing and stock options) for company directors and officers must be approved by a majority vote of the shareholders, or they shall be considered fraudulent.

20/ The officers and directors of fictional citizens with more than 15 owners shall not do business with the fictional citizens they manage.

21/ For all fictional citizens, all board meetings, borrowing, spending, contracts, and all corporate secretarial documents shall be recorded with the country recorder's office in real time. All fictional citizens shall be registered with at least one county recorder. Large fictional citizens must be registered with multiple redundant recorders. A sensible number of Sub-Senators shall view the meeting video and judge the decisions. Where the decisions of the boards seem unconscionable, or corrupt, the observer Sub-Senators shall report the matter for investigation.

22/ Each year, all fictional citizens, including non-profits, shall be audited and the market value of their purchases and sales and assets shall be assessed.

23/ Fictional citizens shall not be allowed to purchase goods and services subject to luxury taxation.

24/ It shall be a felony for the directors, managers, and employees of fictional citizens to harass real people for their political words or deeds. All fictional citizen workers shall be required by law to be entirely non-political while on the job. It shall be a felony for fictional citizen managers to program their fictional citizens to go against other citizens for their political views. This shall be considered a bigger problem than when fictional citizen managers program their fictional citizens to discriminate against citizens based on race. Thus the punishment and the shame should be regarded as higher.

25/ Neither Government nor any fictional citizen or enterprise shall discriminate against real citizens or favor fictional citizens, or foreigners.

26/ Where company directors cause their company to blow up seemingly on purpose, they may be held criminally responsible. It's shall be thought better that we have slightly weaker company directors, then we have any company directors, running schemes, where they make money on the companies demise, as with the Red Lobster restaurants.

27/ Fictional citizens shall not be allowed to change their nationality or their name.

NR'174. FCS AND COMPETITION

1/ The people shall have the right to competitive markets and to markets with enough participants to assure competition. Where competitive markets are impossible and there must be a monopoly, this monopoly must be run by Government.

2/ A number of unfair trade practices shall be prohibited between ostensible competitors. These shall include: collusion, price fixing, discriminatory pricing, dividing-up territories of operation, exclusive dealing, output restrictions, paying people not to compete, taking money in lieu of competition, preferential treatment, and refusal to trade equally among other unnamed practices.

3/ Government shall err on the side of smithereening all monopolies it breaks up. Smithereened corporate parts are not allowed to engage in mergers or acquisitions for at least 12-years unless a longer period is stated.

4/ All penalties for violations of anti-trust laws shall be paid in the form of diluted shareholder equity in favor of the national government. These government rights may be sold immediately or over time, or kept forever by the people.

5/ All fictional citizens must have open public bidding on public bid boards for the contracts they let. If there is a need for confidentiality or secrecy the FC must hire full time workers.

6/ We shall work to reduce the size and power of the largest fictional citizens in our land. For-profit fictional citizens with over 200,000 people shall pay an added corporate sales and turnover tax of at least 2%. Those with over 50,000 people shall pay a tax of at least 1%. Those with over 5,000 people shall pay a tax of at least 0.1%. The Senate may impose higher sales taxes on large companies, and certain industries if it elects.

7/ Government shall impose special industry specific sales taxes on large vendors whenever it elects that having a large and diverse free market will be better over the long run than using a few large operations.

NR'175. FCS AND CONSOLIDATION

1/ Government shall do nothing to encourage mergers involving large companies private sector.

2/ Ownership of the nation's 2,000 largest fictional citizens and their debt shall be reserved for the Flesh and blood citizens of our nation. The largest fictional citizens shall not be permitted to own each other's stock except immediately before and after a merger.

3/ All mergers involving the nation's 2,000 largest fictional citizens must be approved by the Senate.

4/ Fictional citizens shall not be allowed to own the shares or debt in other fictional citizens, except in the 90 days before and after a merger or purchase. All assets not merged within 90 shall be forfeited to government.

5/ All fictional citizens shall be monads, and none shall own any other fictional citizen, in whole or in part, except in the 90 days following a merger or purchase. There shall be no corporate subsidiaries, or parent corporations, or holding

companies. Such relations are not for the benefit of the people, but exist to hide the harm being done to them.

6/ All fictional citizens must have a minimum amount of turnover, and all fictional citizens owned or held by Senators, must have a higher amount of turnover and scrutiny. Indeed, all shall be audited each year while the Main-Senators and Over-Senators are in office, and for some years after that.

7/ No citizen or fictional citizen may do business under more than one name, or hide its identity behind aliases. This shall include all subsidiaries. Also, it is surely fraud when businesses (like Expedia and Booking) trick customers into thinking they have multiple bids on in an open market, when in truth, they only have one bid.

8/ When fictional citizens grow bigger, depending on the tax brackets, they may have to pay higher taxes. When fictional citizens spin-off units, or break themselves up into completely independent companies, they shall have the right to benefit from lower taxation due to being in a lower tax bracket. The IRS shall always audit company affiliations so that each company pays the appropriate tax rate for its size

9/ To slow industry consolidation, our nation shall tax corporate takeovers and mergers. When a fictional citizen is taken over, or merged and when businesses sell part of their organization, or capital assets to their competitors, government shall get at least 15% of this money as a tax on mergers and consolidation. However, where a distressed asset situation is occurring, the Senate may waive this tax.

10/ Fictional citizens shall not conglomerate unrelated industries.

11/ Government shall not pay any inconvenience value when it con-dems fictional citizen assets.

12/ No foreign companies over 25-years old shall be allowed to do business with our nation, because it's too easy to conceal where money comes from.

NR'176. FCS AND EMPLOYEES

1/ Where these rules are applicable, they shall apply to all workers.

2/ We shall try to prevent non-cash employer benefits from being a legal way to cheat the tax system a small bit. We shall go in the opposite direction a bit, and drive all these transactions onto the arms length open market as much as reasonably possible. To that end, we shall have a sliver tax of 4% on the assessed value of all non-cash benefits. This includes rent discounts, credits for company stores, and benefits for non job-related healthcare. In the few places where these benefits are needed and genuine, they will pay the small increment. Where these are fake, the higher assessment will drive the benefits towards cash.

3/ The following types of housing shall have no taxable value:

a/ Dormitory style worker housing where 4 or more workers share a room and a toilet.

b/ Employer-provided non-luxury worker housing for full-time workers in remote facilities.

4/ It shall be a crime for employers and managers to coerce their citizen employees politically, or to discriminate against citizen employees for the political views they express as disassociated individuals while they are off the clock.

5/ It shall be a crime for employers and managers to

discriminate against disassociated citizen employees on the basis of unproven accusation of criminal activities, or unsavory behavior outside the workplace. All citizens shall have the right to be considered innocent until proven guilty with regard to employment.

6/ The paragraphs immediately above shall apply to all students, all association members, all parishioners, and all members of all religions as if they were employees.

7/ Only our Senate shall make public policy regarding vaccines, treatments and healthcare policy. No fictional citizen, or unelected government person or czar shall ever establish requirements for employees, students, passengers, customers, members, residents, etc. to take any vaccination or undergo any treatment as a condition of involvement with the organizations listed just above.

Such non-governmental requirements shall always be considered an overreach. And it shall be a per count crime when human managers abuse their power, real or imagined to direct a non-human entity to "lord-it" over the people.

8/ All disciplinary actions by employers, including all disciplinary communication, shall be recorded by the county recorder system, and shall be public. This is thought to be a right, and just use of big brother.

9/ People shall not have the right to be overtly sexual, racist, aggressive, evangelical, or politically demanding, while at work or school, or serving others. This includes co-workers, workers, employers, and customers, as well as students, teachers, and other workers. All extremely flirty people, transsexuals, flamboyant homosexuals, and other highly sexualized people of either sex may be considered overtly sexual, and these people shall not have any protection from job discrimination. Employers shall always have a right to know, when their applicants and employees are convicts. They shall also have a right to discriminate against people who:

a/ Are in poor health, or their work performance is hindered by a disability, or incompetence.

b/ Are not citizens, or they are immigrant citizens.

c/ Are or appear to be lazy, or slovenly.

d/ Show excessive hate or vindictiveness.

e/ Show a lack of cooperation with coworkers or managers.

f/ Are unable to do the same amount of work as other people in the same job.

10/ Employee profit sharing shall be mandatory and automatic in our nation for companies with over 100 employees, as it costs little on net to give a sliver to the employees and it makes all the difference in their loyalty and work ethic. Automatic profit sharing for startups shall be 7%, for mid-life companies it shall be 3%, and for old companies it shall be 1%. Companies shall be free to offer more than this, and companies with big profit share payouts do not need to offer such high base pay. This profit sharing shall not apply to the proceeds generated when a company or a division is sold or goes public, but only the annual net profit.

11/ In order to minimize the cyclicity of the economy, all employee profit sharing and all annual bonuses to employees shall be paid at the start of the second teneth.

12/ When workers sues their employer, this shall go on their permanent employment record where the worker either loses the case, or settles out of court. If the worker wins in the

proceedings, there shall be no record of the matter.

13/ When workers figure-out a way to eliminate a job, the entire crew is supposed to get a super-fat bonus, and a raise, and a recognition letter for this. The eliminated person is also supposed to be kept on payroll if practical and used nearby if they want to stay with their friends

14/ Human resources shall be re-named back to "personnel" nationwide. At least half of the people working in personnel shall be males and straight males at that. Wherever practical, all hiring and firing should be done by supervisors.

15/ Companies will no longer have to protect themselves from employees and would be employees. This is because generally, in the future, the employees will not be able to sue their employers in court unless they've done something terribly wrong. There are not going to be any more discrimination lawsuits against companies, but there will instead there will instead be a realistically sized fine obtained by using the government's complaint apparatus.

16/ No county shall be allowed to make its own rules regarding hiring and firing discrimination of workers and workers rights in the lake. All employer hiring regulations shall fit in a 20,000 word booklet.

17/ HR/ personnel should be a 1-year course and the people involved with it should be thought to be akin to low-level accountants.

NR'177. FC STOCK AND VOTING RIGHTS

1/ Every time a publicly traded company sells fresh new shares, the people shall get 3% of the shares as a sort of underwriting fee. No third party financial firm shall be involved when a publicly traded firm sells new shares.

2/ All ownership shares in all corporations shall dilute equally upon the sale of more shares, and no shares shall be exempt from this. All dilutions of shares shall be required to take place on the county recorder system in order to be valid. Again, there shall be no dilution of share except where all shares in the company are diluted equally.

3/ There shall be only one class of shares in all corporations. All share preferment is hereby void.

4/ Everyone who manages a publicly traded company, their kith and kin, and everyone who owns more than 1 per mil of a publicly traded company must schedule their stock, bond and options transactions involving that company in advance with the SEC by more than 6 days. Those who own more than 2 per cent of a publicly traded company must schedule their purchases, sales of stock and options by more than 12 days in advance.

5/ No shareholder voting rights shall exist when shares are owned, optioned, or otherwise controlled by the following groups:

a/ By for-profit fictional citizens, mutual funds, investment funds, hedge funds, or other similar 3rd party, and non-human ownership schemes where these own less than a 50% controlling interest in the company.

b/ By non-profit fictional citizens, and government entities other than the National Senate.

c/ By people unable to vote in our nation's elections.

d/ By foreigners, both human and non-human.

6/ in all cases where the owner of the shares is disqualified

from voting, the national Senate shall automatically have the right to vote these shares as the proxy of the ineligible owners of these shares, if the national Senate elects to do so.

7/ Along with the idea that we want to have more baby businesses in our nation, there is the follow on idea that we the people over the long-run want to discourage industry consolidation a bit. So the Senate shall be allowed to tightly regulate industry consolidation. Industry consolidation permits shall generally be required except a health crisis.

8/ All investors in the stock of all companies shall automatically assign their proxy to the Senate unless they name another party.

9/ Fictional citizens including mutual funds, hedge funds, and all other sorts of investment funds shall not be allowed to hold or delegate proxy voting rights in others Nobody shall attempt to market or sell proxy voting rights, and this may be considered vote selling. All proxy documents must be recorded with the recorder in order to be valid.

10/ Fictional citizens shall not be allowed to hold elections or polls about political matters. It shall be a crime for the Boards and Directors and Employees of fictional citizens to even formulate policy for the fictional citizen on how it stands on political matters. No fictional citizens shall be allowed to influence government as either a primary, secondary, or tertiary objective. There shall be no more political action committees, or other sorts of lobbying companies.

11/ The right of free speech is a protection from government mostly. But it is also a protection from fictional citizens restricting what people say, or censoring them.

12/ All media made by fictional citizens, or paid-for by fictional citizens must be disclosed as such to the audience. Also, all media made by non-humans must be disclosed as such.

13/ All existing fictional citizens engaged in policy and lobbying shall be shut down and renamed. The names Greenpeace and Sierra Club, and ACLU shall no longer be used.

14/ Fictional citizens shall have no right to regulate firearm carry in their shops open to everyone. However, where tickets are sold, and people are checked at the entry, fictional citizens shall have the right check for weapons alcohol and mafia drugs and these may be prohibited.

15/ Fictional citizens shall not be allowed to engage in secret dealings of importance to the people at large.

16/ All nonprofit fictional citizens shall be required to have a name that describes what they actually do. Many existing charities will have to change their name.

17/ Black box fictional citizens shall never be deputized, or delegated with any government authority. Only flesh and blood citizens can be deputies or delegated with government authority. Where government hires private security, these shall have no more powers than other private security guards working in other places. Also government shall be prohibited from hiring private security forces that carry or use any sort of weapon firearms, knives, clubs, tasers, or pepper spray. Furthermore, where government hires private security, the guards shall have no special protections under the law because they were working for government, and those who assault the private security guards shall be treated no differently than those who assault shopping mall security guards.

18/ Cooperatives or co-ops shall be considered fictional citizens in every way, and subject to the law just as if they were corporations. There should be no loopholes for practices by co-ops.

19/ Neither Government nor any fictional citizen or enterprise shall discriminate against real citizens or favor fictional citizens, or foreigners.

20/ Government owned property shall not be leased to foreigners, or international fictional citizens, or fictional citizens that are more than 6% owned by foreigners or immigrants.

21/ Stocks that are traded on exchanges shall not be allowed to borrow money, or lend, or buy bonds or pay excessive wages, or buy bonds, or make cash transactions, but must get all of their money from the stock market. No domestic companies shall be allowed to transfer more than 2% of its assets overseas to invest in foreign production on any given year. Also, all of foreign investments must be directly capital in nature for factories, and there should be no investment in foreign land by our companies. Also, there should be no foreign bank accounts for our companies, except those directly having to do with paying foreign factory workers and operating foreign factories and sales expenses.

22/ The Senate shall establish special and considerably more restrictive rules for foreigners and fictional citizens when they borrow money. These rules shall involve the payment of higher interest rates.

NR'178. GOVERNMENT POWER OVER FCS

1/ Fictional citizens are fictional things that have been delegated powers by the people of our nation for the benefit of the real human citizens of our nation. If the people are not benefitting, or they are suffering abuse from their fictional citizen, then government may:

a/ Kill the FC and nationalize its assets.

b/ Dilute the equity of FC.

c/ Break-up or smother the FC, selling-off each of its facilities separately and handing the proceeds to the shareholders as their cash out payment.

2/ The Over-Senate shall have absolute, total, at-will, life or death power over every fictional citizen in the nation. If the Over-Senate elects with a 2/3 overmajority that any fictional citizen shall be nationalized, then it shall be nationalized with no payment to its shareholders. After this, all shall be bound by the Senate's election with regard to that fictional citizen. The Senate shall have no obligation to pay anything to any fictional citizens or their owners in cases of gross dishonesty. The Senate's only obligation is to make sure that future honest investors are not scared away from investing.

3/ The national Senate shall have the right to break-up or partition fictional citizens when it elects that the people will benefit from such partitioning over the long run. This shall apply to for-profit enterprises as well as non-profit organizations. When the Senate breaks up for-profit fictional citizens for abuse of monopoly power, it may also assess a reasonable deter-hence penalty in the form of a dilution of equity benefitting the public purse. The Senate may also compel the multiple repayment of all monopoly and cartel extractions.

4/ There shall be no court held competent to judge the will of the Senate in any matter, including matters related to the nation's fictional citizens.

5/ All Senate inquiries of fictional citizens shall be judged by Senate juries of appropriate size for the fictional citizen's gross income.

6/ Senate oversight management of fictional citizens shall primarily exist to prevent corruption and parasitism, but it can also reduce mistakes and improve the level of management.

7/ Government shall be free to sell-off its shares in fictional citizens at any time. However, government should sell its shares slowly and in small chunks so as not to inflame the market, and so that the people can maximize the value on their equity.

8/ All fictional citizens have an obligation to be responsible members of the national economic ecosystem. When fictional citizens behave like parasites, or when they abuse consumers, free markets, the environment, or investors, that is when they start losing the right to exist.

9/ Government shall not discriminate against people because they are self-employed. If anything government shall favor self-employed entrepreneurial people over people employed by others.

NR'179. ALL WEALTH REVERTS TO THE PEOPLE

1/ Only the Senate and people may operate economic drains in our nation. All reversion rights shall belong to the people and the government they establish for themselves. One of the most important things we can do to prevent the rise of a 1% ultra rich class is to have proper drain/inheritance taxation when people die, and proper wealth tax levels.

2/ High inheritance taxes are a critical part of the people owning all the drains in their economy. No citizen real or fictional shall be allowed to get out of paying death taxes. And no fictional citizen shall be allowed to live longer than an average person and thus avoid death taxes.

3/ Because we don't want to give fictional citizens any advantage over real citizens, they must pay death taxes at a rate that is equal or faster than the average human lifespan in business.

4/ Ishtar is the main supporter of generous inheritance rights. Without these rights, many of Ishtar's intergenerational rackets cannot function. For example the deathtrap tsunami funnel city racket doesn't work unless the deathtrap land can be held for some generations. Likewise with path of progress farmland racket at the periphery of each city doesn't work well. Likewise with the hereditary royalty that all of America uniformly despised in the late 1700s. Everyone then and there despised royalty, except the Federalist imposters that had already infiltrated our leadership. • • Now Ishtar has over many generations grown into every system of man all around the world, it's like a good gods alternate, parasympathetic nervous system. This second nervous system of mankind, a thinking with the diametrically-opposed agenda of a parasite — this has been immensely retrograde for our species. Preventing inter-generational ownership and flows of money is obviously an important part of ending multi-generational Ishtar on Earth.

5/ There shall be no eternal ownership rights in valuable

property, and no private property rights shall live for more than 80-years. After 80-years, all property rights shall revert to the people, and shall generally be re-leased or sold for up to 80-years by the people to raise money for the public purse. Essentially, we are saying that there is no right to inherit real estate and other assets over many generations, as the Mideast-fronting dynasties have always struggled for. And because of this there will be much more good property for everyone to use.

NR'180. LAND OWNERSHIP AND CITIZENSHIP

1/ Real humans from other UM member nations that reside in our nation's territory shall be allowed to own one reasonably-sized personal residence. Except for this, and real estate owned by our Government, only the real flesh and blood citizens of our nation shall own land, buildings, mineral rights, and water rights in our nation.

2/ Fictional citizens shall not own land or buildings. They may lease land and/or buildings for up to 30-years, but they shall not be permitted to own real estate. Also, to be clear, fictional citizens may not option real estate or hold it under any form of contract so that the control period can exceed 30-years in total. Also, the term fictional citizen applies to both for-profit and non-profit entities.

3/ All existing fictional citizen land ownership equity that is not taken over by others in the reapportionment shall be converted to pre-paid triple-net leases of not to exceed 30-years with the county government holding title to the property when it reverts. At 1-year from ending, the property shall be auctioned off by the county. The existing tenant shall not have any privileges or suffer any discrimination in the auction process.

a/ For flat agricultural land leased by FCs, a 15-year lease shall apply. For sloping agricultural land, a 30-year lease shall apply.

b/ For hotels leased by FCs, an 19-year lease shall apply.

c/ For mineral real estate, mineral rights leased by FCs a 21-year lease shall apply.

d/ For retail real estate leased by FCs, a 23-year lease shall apply.

e/ For residential real estate leased by FCs, a 30-year lease shall apply.

f/ For office real estate leased by FCs, a 26-year lease shall apply.

g/ For factory and storage warehouses leased by FCs, a 30-year lease shall apply.

4/ There shall be no leasing of domestic agricultural land to foreign governments, or foreign fictional citizens, foreign nationals, or foreign fictional citizens except when these are a non-citizen's single (leased or owned) residence in our nation.

NR'181. FREEDOM OF RELIGION IS SECONDARY

1/ In our nation, we offer freedom of religion as a right. However, the freedom to practice one's religion is a subordinate right, subject to the other rights and responsibilities set forth herein. The other freedoms guaranteed by this Constitution shall generally be regarded as more important than our freedom of religion. If there is a conflict with any other part in this Constitution, the other parts shall generally overrule the religious protections provided herein.

2/ In our nation, we offer freedom of religion as as right. However, the freedom to practice one's religion shall be subject to restrictions intended to keep everyone's religion from impinging on the rights of other people who believe something else. No religion shall be allowed to make any demands at all on the believers of other religions, or non-religious people. If one religion exalts ducks, and the other eats them, neither shall have any right to make any demands on the other. Both groups must put their differences aside and live in peace.

3/ The freedom of religion comes with no right to demand anything at all from the non-believers they share their pluralistic society with. The people shall all be free to practice their religions in peace, but the moment they ask anything at all from non-believers, even that the listen to their evangelism or preachings, or hear their prayer calls, or church bells, or they pray or prostrate themselves in the street, this group shall be thought no longer practicing their religion in peace.

4/ To promote peace and harmony among the people, all religious clothing and accessories shall be prohibited at all workplaces and schools. Employers, but not schools may grant permission for religious clothing. However, they must allow all normal religious clothing and ornaments if they allow any of it.

5/ Employers and schools shall not be required to make any accommodation at all for religions, or their beliefs, or take any account at all of any religious holy days in their scheduling. Employers and schools may choose to follow one set of religious holidays over the others.

6/ The freedom to practice one's religion shall only apply when the religion is genuinely an ideology of peace and the religion does not impinge or seek to impinge on any other right of the people, or public safety, or our ability to defend our land from invasion, or our proposition of freedom. Freedom of religion is not guaranteed to ideologies with a large contingent, anywhere in the world, that advocates hatred, violence, terrorism, war, jihad, or struggle against our

freedoms and our public safety. And no religion, no matter how popular or ancient shall be exempt. Freedom of religion is also not guaranteed to ideologies with a large contingent of priests that rape or molest or otherwise abuse the children of the believers.

7/ We are a nation of light and openness not darkness and secrecy. Freedom of religion shall not be afforded to religions and ideologies that have dark secrets, secret rites, secret initiations, or facilities that prohibit non-believers or non-followers. These shall all be considered occults or cults.

8/ Religions shall not be free to send money out of our nation either directly or indirectly.

9/ Religions that violate these rules may be closed down with a 2/3 overmajority of the Sub-Senate.

10/ No Christmas music shall be played before December 10 or after December 25.

11/ Where people block either a street or a public area for prayers they shall be arrested for having an illegal protest that blocks the way.

12/ All forms of Islamic, Mideast and Ishtarian charities shall be prohibited. The religious aspect of these shall not be considered a valid excuse.

13/ History is not written by the victor, or the victim, but by a always involved third-party seeking to cure the meat of history, as Herodotus of Hali-carn•nasus (salted•meat•nose) did. If the meat is properly cured it is fine to eat, but if it is improperly cured, it creates a stinky mess, and all your efforts will be for nothing. The older the work, the more likely it has been totally cured and censored of all its problems, and all the truly useful stuff has been made as useless as the censors could get away with. Viz the ancient legend of the Odious Rex by Sophocles. Note how that meat of history has been totally cured of its problems. The older the work, the more likely it has been totally censored and all the truly useful stuff has been made as useless as the censors could get away with.

14/ People who are Jehovah's Witnesses, and Christian scientist shall not be allowed to say no to the emergency medical treatment of their children and other loved ones that are authorized by a Senate treatment jury.

15/ The following two orphan quotes about religion attributed to Thomas Jefferson shall be added because they are so apt.
a/ "The clergy converted the simple teachings of Jesus into an engine for enslaving mankind. They also adulterated [Christianity] by artificial constructions into a contrivance to filch wealth and power to themselves...these clergy, in fact, constitute the real Anti-Christ."

b/ "Religious institutions that use government power in support of themselves and force their views on persons of other faiths, or of no faith, undermine all our civil rights. Moreover, state support for an established religion tends to make the clergy unresponsive to their own people, and leads to corruption within religion itself. Erecting the 'wall of separation between church and state,' therefore, is absolutely essential in a free society."

16/ Freedom of religion and freedom from religion, we believe in both.

NR'182. CHURCH SEPARATION

1/ There shall be an absolute separation between church and state and economy. No religion or religious group shall involve itself in the workings of government, the political debate, the voting process, the economy, or the public education system.

2/ Government shall obey no religion, and no religion shall be permitted to make any demand on either government or the people.

3/ No religion shall be given any office, embassy, place or meeting with government. No religion may hold any processions on the public way. No religious emperor may enter our nation.

4/ The separation of church and state shall be considered one of the most fundamental, eternal, and inflexible aspects of Americas constitutions.

5/ Government shall not establish, or support the practice of any religion, or give any money to any one religion, either directly or indirectly. Government may however build pantheons for all religions of peace and freedom to use.

6/ We shall only tolerates and protects genuine religions of peace and love for one's fellow man, however we will not support tyranny named as religion or Islam.

7/ No religion or its holy men shall tell or hint at how its followers should vote. Thus, we shall say that religious entities shall not have the right of free speech. Religious followers may say what they wish, however the religious entities themselves, their priests, imams and holy men, shall have no right to free speech with regard to matters of government, the political debate, the voting process, the economy, or the education system. To do otherwise is to give religions a back door to our democracy.

8/ It is thought that public pantheons will help foster more brotherhood among the various religions. Therefore we shall have it that except for public pantheons, no public property or transit infrastructure shall be used for chapels, churches, or prayer rooms. Also, except for public pantheons, no public property shall be used for any religion's group services or group prayers. All post-theists shall only use pantheons for their services and moments of hope for a better, more unified mankind.

9/ No high ground, or visible spot (public or private) shall display any religious icon.

10/ No house of worship, religion-owned property, or religious worshippers shall ever emit any sound into the surrounding community. This shall include music, bells, voices, sirens, singing, and prayer calls. There shall be no group prayers on any road, or in any public place. Arab style slave-religion prostrations shall be prohibited in our land of the free.

11/ No government official shall ever say any word of prayer, or burn candles, incense, or hashish, or sacrifice the life of any creature for religious purposes.

12/ We echo the words of the original Massachusetts constitution that nobody "shall be hurt, molested, or restrained, in his person, liberty, or estate, for worshipping God in the manner and season most agreeable to the dictates of his own conscience... provided he doth not disturb the public peace or obstruct others in their religious worship."

13/ No public square, urban park, train station, bus station, port school, highway, roadway, sidewalk, public transit, train, airplane, or bus shall be used for sermons, religious services,

or prayers.

14/ The separation of church and state shall be considered one of the most fundamental and eternal aspects of any American constitution. America is not a Christian nation, but a nation tolerant of all genuine religions of peace and love for one's fellow man, including nearly all types of Christianity, Buddhism, Hinduism and all other genuine religions of peace. This list notably does not include Islam because it is not a religion of peace and love.

15/ Neither Government nor any fictional citizen (including religions) may dictate marriage, sex, or infidelity terms to the people. Religion shall not be allowed to have opinions about sex and marriage. All religions must stop picking on women for having sex.

16/ To maintain a strict separation of church and state, no voucher school shall:

a/ Have school trips to houses of worship.

b/ allow religious people to meet with students or speak to assemblies.

c/ Use textbooks not approved by the Senate.

d/ Conduct any prayers in schools.

e/ ban all religious iconography.

f/ Shall ban all religious clothing or jewelry.

NR'183. GOOD RELIGIONS & EVIL OCCULTS

1/ We shall long ponder the words of Thomas Jefferson: "In every country and ever age, the priests have always been hostile to Liberty." We shall always ask why: "How can this be unless these religions where (like so many other institutions) commonly infiltrated and used as a tool of tyranny.

2/ To be classified and protected as a religion or protected ideology, the belief system must deserve protection, and it shall be required to obey the following reasonable rules worldwide. Ideologies that violate any of the following rules anywhere in the world may be declared evil occults, and closed down thorough either the variable constitutional clauses herein, or the constitutional amendment process herein.

3/ The belief system shall be an instrument of peace, friendship, light and truth and not conflict, animosity, darkness and lies. Belief systems shall not have:

a/ Secret rites.

b/ Secret literature.

c/ Secrete or closed libraries.

d/ Secret files on people.

e/ Services or meetings that are closed to outsiders.
